

## What is the North West Relief Road?

The North West Relief Road (NWRR) is a new 60mph single carriageway road, which will link the northern and western communities of Shrewsbury. It will include new bridges over the River Severn and the Shrewsbury - Chester railway line, connecting Ellesmere Road and the A528 in the north with Welshpool Road and the A5 (Churncote Roundabout) in the west.

Connections along the route will be made via two new roundabouts at Holyhead Road and Berwick Road.

Shropshire Council has made the decision to incorporate what was previously the Oxon Link road into the North West Relief Road. By combining the schemes, the road can more easily contribute to the strategic objectives of the NWRR and support the Sustainable Urban Extension (SUE) housing scheme.

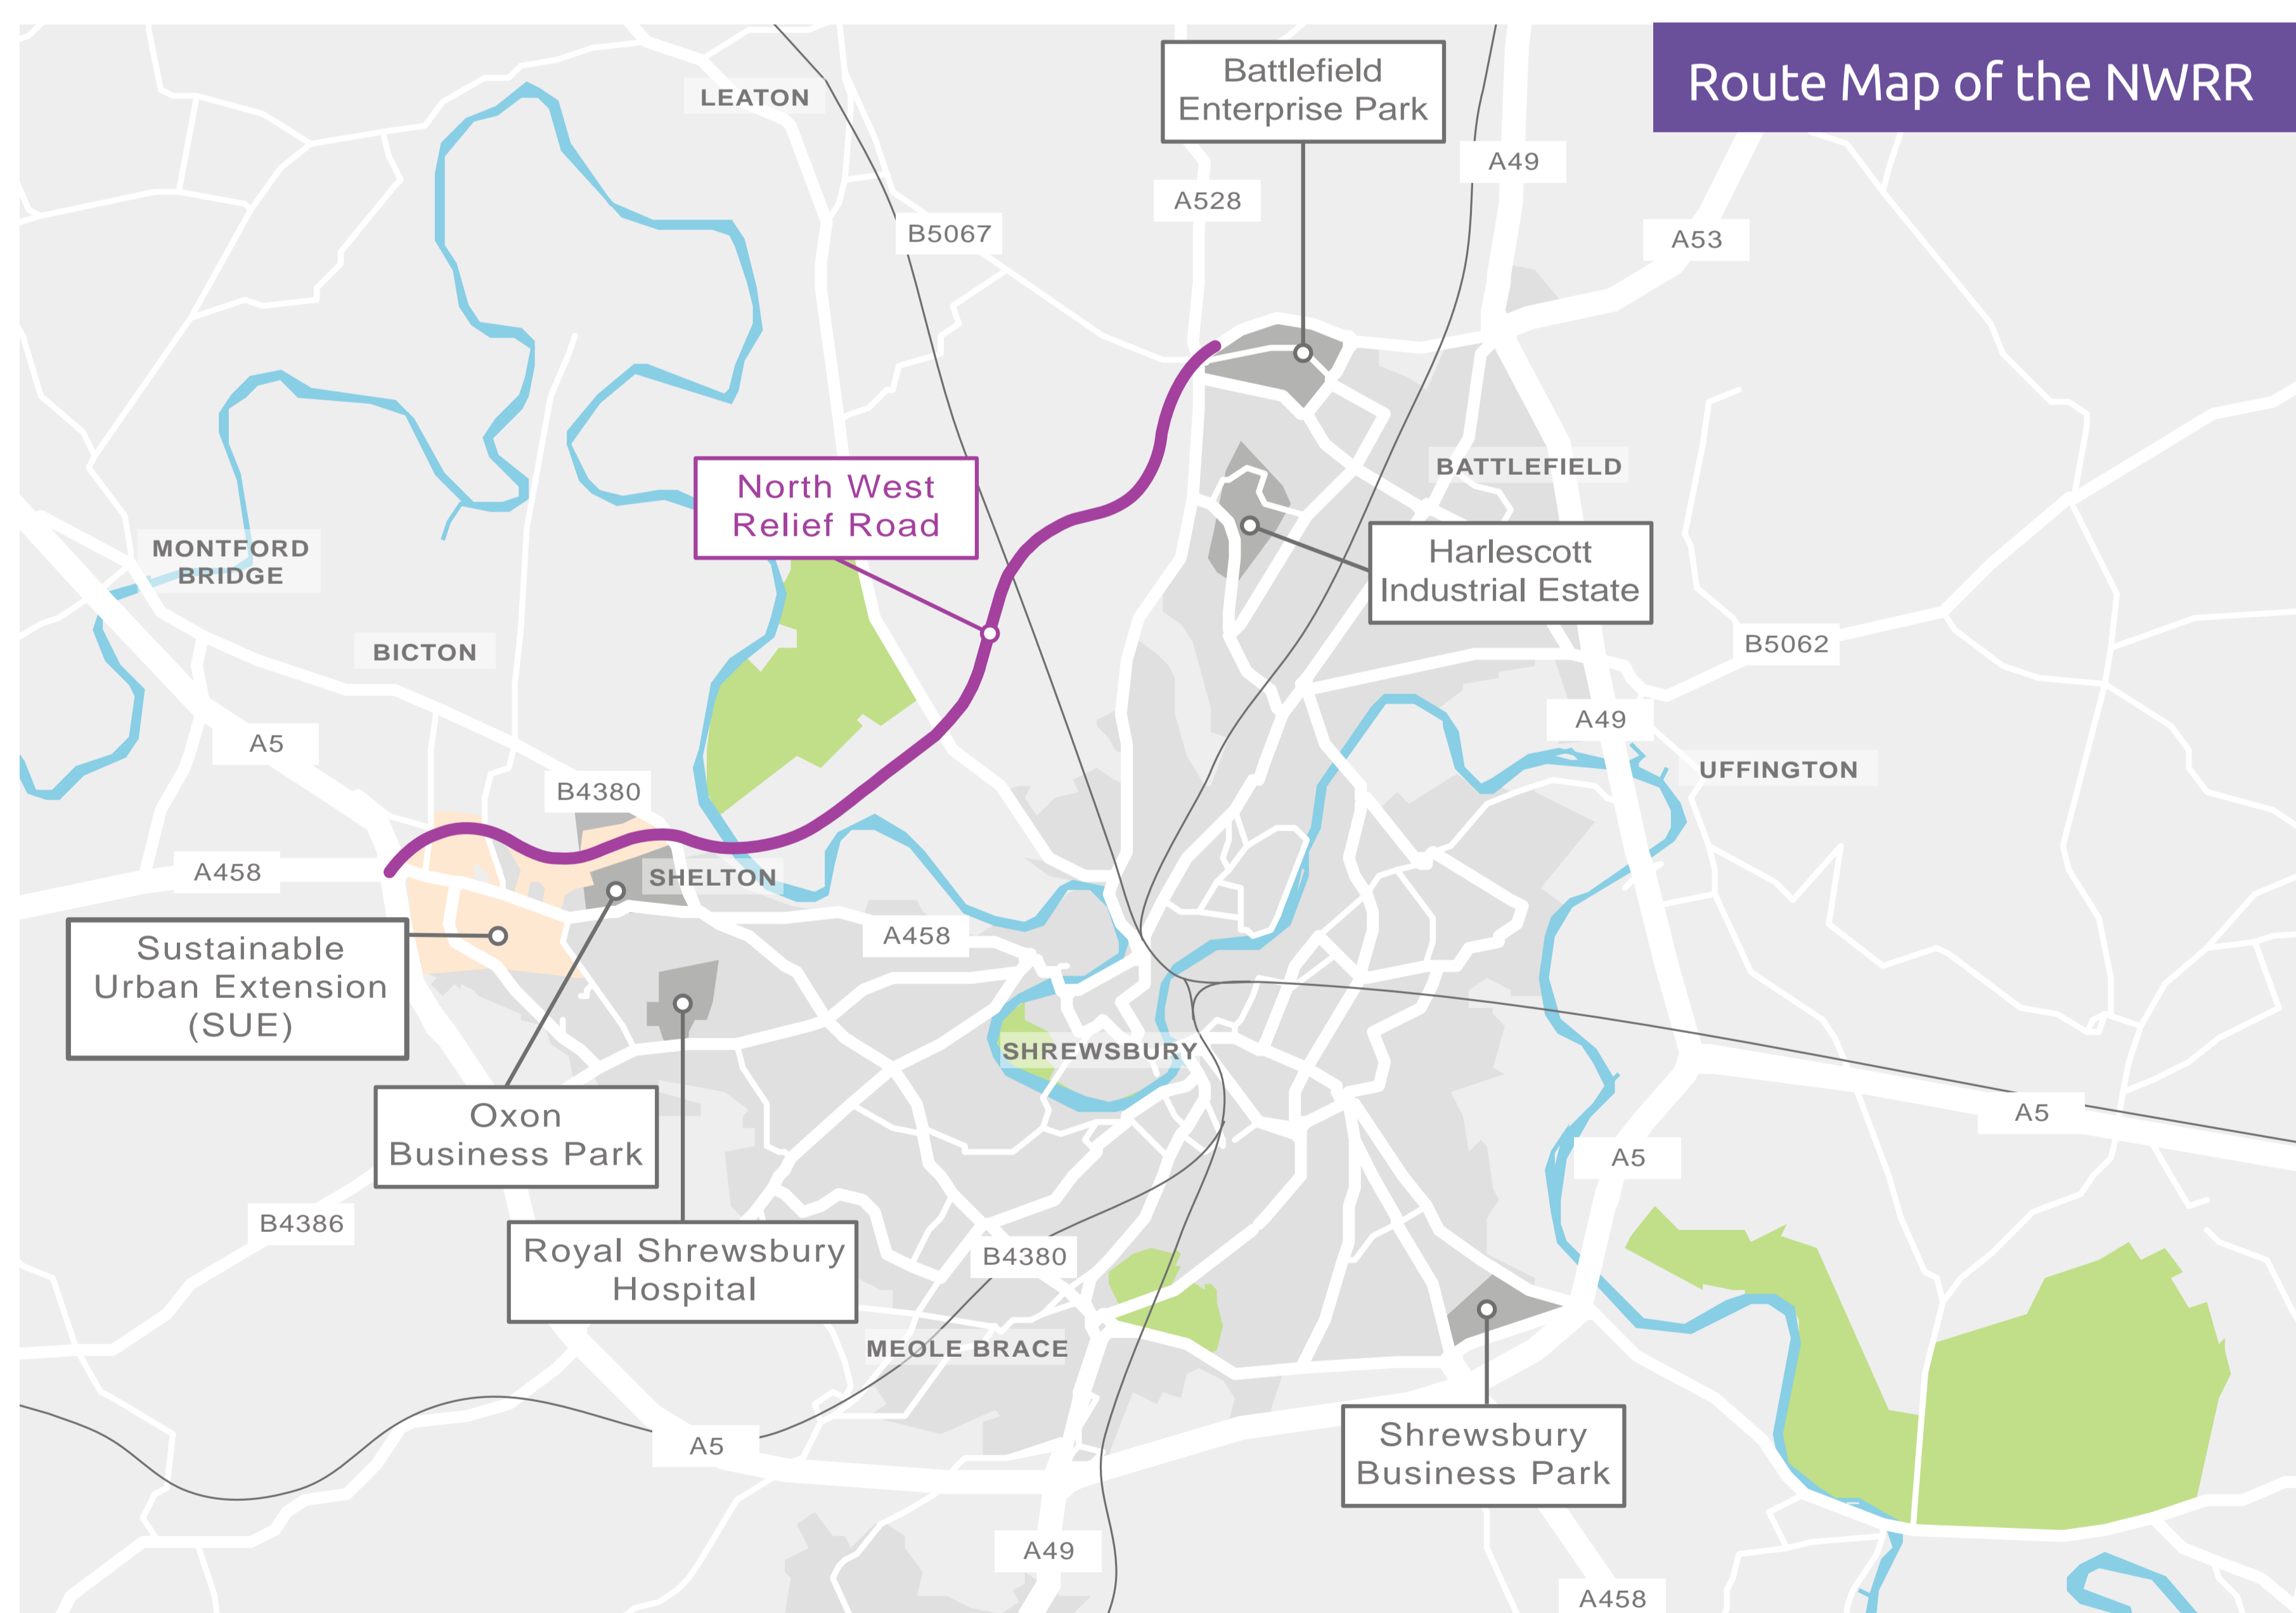

## How can I comment?

This consultation is to update you on all changes that have been made since the 2017 consultation. You can comment:

- Online at [www.shropshire.gov.uk/get-involved](http://www.shropshire.gov.uk/get-involved)
