

Guidance for the erection of Banners, Bunting or Christmas Lights over a public highway, footway or grass verge.

- If attached to any buildings or bridge railings, permission from the relevant owner/landlord is required.
- Any anchor points are the responsibility of the asset owner, and fixing points should be tested and recorded.
- If applicable, Permission must be obtained from the asset owner to use the fixing points/wires, and also to agree proposed dates for installation, display and removal.
- Any power source or fixing points must be established and tested accordingly prior to installation.
- They should not be placed on an island.
- They should not obstruct any visibility splays such as when approaching an island or junction.
- They should not be attached to any street furniture such as lamp columns unless explicit permission from the Street Lighting Team.
- They should not restrict public highway, a legal minimum of 2.5 metres (width) or 4.2 metres (height) is required for vehicles and pedestrians to pass.
- They should be installed and removed appropriately, outside traffic sensitive times/days.
- They are only for an event or development, please avoid highlighting or emphasizing an establishment or business as this could be seen as advertisement which requires planning permission.
