Dear Mr Fletcher

Patient name: Mr Clifford Weston

The above named has requested that I write to you regarding his fitness to drive his taxi.

Mr Weston has a long history of recurrent low back pain and left-sided sciatica. This is worse when he is doing a lot of driving; however, it is tolerable and doesn't interfere with his driving, especially when using an automatic vehicle. He also struggles with lifting and struggles with wheelchairs etc.

Mr Weston is able to lead a pretty normal life and drive as long as he has an automatic car. He is fit to drive a taxi however; he does request that he is exempted from having to have a wheelchair adaptable taxi. I feel in view of his medical problems that this is an entirely reasonable request.

I trust this information is of assistance to you in helping him.

Yours sincerely

Dr N C Russell
