What inequalities does this paper address?	Personalisation/ Personalised Care is a priority of SHIPP and a programme area of NHSE/ I designed to support the NHS to shift the relationship between health and care and the people we work with. It is intended to support the workforce to ensure that people have the same choice and control over their mental and physical health that they have come to expect in every other aspect of their life. A one-size-fits-all health and care system simply cannot meet the increasing complexity of people's needs and expectations. Personalised care is based on 'what matters' to people and their individual strengths and needs			
Risk assessment and opportunities appraisal (NB This will include the following: Risk Management, Human Rights, Equalities, Community, Environmental consequences and other Consultation)	As a health and care system we work to reduce inequalities in Shropshire. All decisions and discussions must take into account reducing inequalities. Covid 19 has shone a light on inequalities and requires all of our services to further risk assess individual risk and to support the population who are at increased risk of ill health due to Covid 19.			
Financial implications (Any financial implications of note)	There are no direct financial implications as a result of this report, however the development of integrated working and the programmes of SHIPP will have financial implications in the future.
