England

# **Health Profiles Local Authority Summaries**

## West Midlands Public Health England Centre

## TECHNICAL DETAILS

### PURPOSE OF THIS SUMMARY

These summaries aim to capture how local areas have 'changed' on the Health Profile indicators by comparing data contained in the published 2013 Health Profiles and the Health Profiles published on 8<sup>th</sup> July 2014 (where these data are comparable between these two publications only).

### TARTAN RUG DISPLAY

- **Red-Amber-Green (RAG) ratings:** For each indicator, a RAG rating is assigned to the local value contained in the 2013 and 2014 Health Profile. The RAG rating shows how the local value compares with the England value; being red if the local area is significantly worse than, amber if similar to, or green if significantly better than the England value. The RAG rating is assigned by calculating whether or not the 95% confidence interval of the local value overlaps with the England value. A green rating should not be interpreted to mean that the issue is not an important public health problem for the local area, rather, comparatively to England, the local area is significantly better.
- **Rating change 2013 v 2014:** This column indicates any 'change' between the 2013 and 2014 RAG ratings when compared to the England value for the respective years for each indicator. This 'change' compares the RAG ratings assigned in these years, described as either, improved **▲**, worsened **▼**, or no change **■**. For example, if an area had been assigned a red rating in the 2013 Health Profile and has an amber rating in the 2014 Health Profile, this column would indicate improvement **▲**. Not applicable (N/A) is displayed where the indicator is not comparable between the 2013 and 2014 Health Profile data (see indicator notes for further details).
- **Local change 2013 2014:** This column indicates where there has been a significant change in the local value between the 2013 and 2014 Health Profile data. This 'change' in the local value is described as either, improved **▲**, worsened **▼**, or no change **■**. A significant change is noted where the 95% confidence intervals for the 2013 and 2014 local values do not overlap. For further information on using confidence intervals to make comparisons, refer to the APHO Technical Briefing on commonly used public health statistics available at <http://www.apho.org.uk/resource/item.aspx?RID=48457> Not applicable (N/A) is displayed where the indicator is not comparable between the 2013 and 2014 Health Profile data (see indicator notes for further details).
- Consideration of the '**rating change**' and '**local change**' columns will allow a local area to say things like, "Our RAG rating has improved and our local value has also significantly improved. This shows our local area is improving faster than other areas as shown by our relative position to the England value."
- **Comparisons with other areas:** For county and unitary authority areas, RAG ratings are given for the other county and unitary authority areas in the Public Health England Centre area. For lower tier local authority areas, RAG ratings are given for the other lower tier local authority areas in the county as well as the county rating. For all local authority summaries, the RAG rating is given for the PHE Centre (where available) and the region, along with the England value.
- Where an **asterisk (\*)** is given in place of a value or RAG rating, no data is available for this local area.

### INDICATOR NOTES

Brief indicator explanations are given below for data included in the 2014 Health Profiles (2013 Health Profiles details in brackets)

#### Our Communities

- 1 Deprivation: % people in this area living in 20% most deprived areas in England, 2010 (No comparison – no update to data)
- 2 Proportion of children in poverty: % children (under 16) in families receiving means-tested benefits & low income, 2011 (2010)
- 3 Statutory homelessness: Crude rate per 1,000 households, 2012/13 (2011/12) (No comparison – change of methodology)
- 4 GCSE achieved (5A\*-C inc. Eng & Maths): % key stage 4, 2012/13 (2011/12)
- 5 Violent crime: Recorded violence against the person crimes, crude rate per 1,000 population, 2012/13 (2011/12) (No comparison – change of methodology)
- 6 Long term unemployment: Crude rate per 1,000 population aged 16-64, 2013 (2012)

### Children's and Young People's Health

**7** Smoking status at time of delivery: % women who smoke at time of delivery, 2012/13 (No comparison – change of methodology)

**8** Breastfeeding initiation: % mothers who breastfeed their babies in the first 48 hours after delivery, 2012/13 (No comparison – change of methodology)

**9** Obese children (year 6): % school children in Year 6 (age 10-11), 2012/13 (2011/12)

**10** Alcohol-specific hospital stays (under 18): Persons under 18 admitted to hospital due to alcohol specific conditions, crude rate per 100,000 population, 2010/11 to 2012/13 (pooled) (2007/08 to 2009/10 (pooled)) (No comparison – change of methodology)

**11** Under 18 conceptions: Under-18 conception rate per 1,000 females aged 15-17 (crude rate) 2012 (No comparison – change of methodology)

### Adults Health and Lifestyle

**12** Smoking prevalence: % adults aged 18 and over, 2012 (No comparison – change of methodology)

**13** Physically active adults: % adults achieving at least 150 mins physical activity per week, 2012 (No comparison – no update to data)

**14** Obese adults: % adults classified as obese, Active People Survey 2012 (No comparison – change of methodology)

**15** Excess weight in adults: % adults classified as overweight or obese, Active People Survey 2012 (No comparison – new indicator for 2014 Health Profiles)

### Disease and Poor Health

**16** Incidence of malignant melanoma: Directly age standardised rate per 100,000 population, aged under 75, 2009-2011 (2008-2010)

**17** Hospital stays for self-harm: Directly age sex standardised rate per 100,000 population, 2012/13 (No comparison – change of methodology)

**18** Hospital stays for alcohol related harm: The number of admissions involving an alcohol related primary diagnosis or an alcohol related external cause, directly age sex standardised rate per 100,000 population, 2012/13 (No comparison – new indicator for 2014 Health Profiles)

**19** Drug misuse: Estimated users of opiate and/or crack cocaine aged 15-64, crude rate per 1,000 population, 2010/11 (No comparison – no update to data)

**20** Recorded diabetes: % people on GP registers with a recorded diagnosis of diabetes 2012/13 (2011/12)

**21** Incidence of tuberculosis: Crude rate per 100,000 population, 2010-2012 (No comparison – change of methodology)

**22** Acute sexually transmitted infections: Crude rate per 100,000 population, 2012 (chlamydia screening coverage may influence rate) (No comparison – no update to data)

**23** Hip fracture in 65s and over: Directly age and sex standardised rate for emergency admissions, per 100,000 population aged 65 and over, 2012/13 (No comparison – change of methodology)

### Life expectancy and causes of death

**24** Excess winter deaths: Ratio of excess winter deaths (observed winter deaths minus expected deaths based on non-winter deaths) to average non-winter deaths 1.08.09 – 31.07.12 (1.08.08-31.07.11)

**25** Life expectancy – male: At birth, 2010-2012 (2009-2011)

**26** Life expectancy – female: At birth, 2010-2012 (2009-2011)

**27** Infant mortality: Rate per 1,000 live births, 2010-2012 (2009-2011)

**28** Smoking related deaths: Directly age standardised rate per 100,000 population aged 35 and over, 2010-2012 (No comparison – change of methodology)

**29** Suicide rate: Directly age standardised mortality rate from suicide and injury of undetermined intent per 100,000 population 2010-2012 (No comparison – new indicator for 2014 Health Profiles)

**30** Under 75 mortality rate: Cardiovascular: Directly age standardised rate per 100,000 population aged under 75, 2010-2012 (No comparison – change of methodology)

**31** Under 75 mortality rate: Cancer: Directly age standardised rate per 100,000 population aged under 75, 2010-2012 (No comparison – change of methodology)

**32** Killed and seriously injured on roads: Rate per 100,000 population, 2010-2012 (2009-2011)

**FOR FURTHER INFORMATION PLEASE VISIT THE HEALTH PROFILES WEBSITE WHICH CAN BE FOUND AT [www.healthprofiles.info](http://www.healthprofiles.info)**
