## Project Detail

### Next steps for Mental Health Care in Shropshire, Telford and Wrekin

We are proposing to strengthen community mental health services in our area. These proposals include having more staff to support people in or near their homes, making services more responsive to patient needs and building a modern, therapeutic mental health "village" adjacent to the existing Shelton Hospital site in Shrewsbury. You can respond to the consultation by referring to the documents listed below, or by visiting <http://www.shropshire.nhs.uk/Get-Involved/Current-consultations/Next-steps-for-mental-health-care-in-Shropshire-Telford-and-Wrekin/> (this includes the option of an online questionnaire).

If you would like a copy of the report with feedback from the consultation, please send your contact details to the email address given below.

#### Main aims of the consultation:

The main aims of the consultation are to ask people's views on how mental health services could best be delivered locally. The consultation questionnaire asks about the following:

What factors do you think are most important in delivering good community mental health services in future

What future role do you think the voluntary and independent sectors can play in delivering mental health services to the people of Shropshire

What factors do you think are most important in delivering good inpatient (hospital) mental health services in future

Whether there is anything in the proposed arrangements set out in the consultation document that you think we haven't got quite right, in relation to both community mental health services and inpatient mental health services

To what extent you agree with the proposals in the consultation document

**Geography / Coverage:** Shropshire

<b>Project start date</b>	02 August 2010
<b>Consultation start date</b>	06 September 2010
<b>Consultation end date</b>	06 December 2010
