A0142B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The two sites proposed to be allocated for employment development Stanmore should not be allocated for employment and should be removed from the Plan, because:</p> <ul style="list-style-type: none"> •There is no need for the proposed allocation. The allocation of some 49ha of land for employment purposes in Bridgnorth in order to create choice and competition in the market (para. S3.1.1), is excessive and not fully evidenced and justified. Sufficient land for employment purposes to serve the existing and proposed residential expansion of Bridgnorth without Stanmore. •Stanmore is divorced from existing & proposed main residential areas and thus workforce would need to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Draft Local Plan Policy SP4.1. and NPPF & the proposal cannot be considered sustainable development. •Stanmore Industrial Estate was established in order to make use of a former WWII military site. But there is no such justification for the present proposals. Additionally there are vacant plots on Stanmore Industrial Estate, some for months, others years.No current need or desire for business operations generated by Bridgnorth residents to locate at Stanmore. •The proposals for development at Tasley, include 16 ha of employment land within walking distance of the main residential development proposed for Bridgnorth is more than capable of supplying the additional necessary floorspace to serve all Bridgnorth's growth. •The proposed allocations at Stanmore are in 'Countryside' unrelated to any significant urban development area and thus contrary to Policy SP9 of the Draft Local Plan. •The number of long term vacant/undeveloped plots of land on existing, industrial estates in Bridgnorth shows there is no need or demand for additional land allocations such as Stanmore. •No certainty that the land at Stanmore would be developed within a reasonable timescale. Existing allocations for employment development in the Tasley area (some in same land ownership as proposed Stanmore allocation land) have yet been not been taken up. •Having several sites available for development will not necessarily increase choice for developers, will be influenced by sustainability of location and Green Belt designation. Over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place. <p>Allocation of the land at Stanmore conflicts with National Planning Policy Framework 2019, aim of sub-section 2.e. of Policy SP11 and Policy DP25. Policy says that the Green Belt should be protected against inappropriate development. Development of Industrial Estates is "inappropriate development" in a Green Belt – it harms the openness of the area and conflicts with the aims of the Green Belt and no very special circumstances had been advanced. A Local Plan Review should not be used to justify inappropriate development in the Green Belt.</p>
A0148B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The proximity and relationship of the Garden Village and its residential development with the relocated livestock market incompatible, would restrict its operations and threaten viability. Also contradicts Shropshire Council's requirement to separate the residential and market uses.</p> <p>The land is divorced from the town with 'deep countryside' characteristics & an open parkland feel. The development would destroy an important landscape setting.</p> <p>The development would impact on four Sites of Special Scientific interest, two listed buildings on the site and encroach on nearby Grade 1 listed Morville Hall. Location of the proposed development is on the opposite side of Bridgnorth from the major towns to the north and east (Telford, Wolverhampton and Stourbridge, would increase commuting & traffic, congestion, noise and pollution in and around Bridgnorth.</p> <p>B4364 (Ludlow Road) wholly inadequate as the sole access for the site.</p> <p>Safe pedestrian/cycle access across the A458 not achievable as the bridge over the A458 cannot be delivered as the developer does not own the land</p> <p>The developer's proposals do not follow recognised Garden Village Principles or practice., as set out in Sir Ebenezer Howard's recommendations and adopted by the Town and Country Planning Association. Unlikely to be any long-term stewardship by a major volume housebuilder. principally motivated by profit and shareholder returns and they are not known</p> <p>The scheme is not supported by local Town and Parish Councils and timing of the proposal with minimal local consultation limits opportunity for input from members of the public and local democratic representatives.</p> <p>The development represents anodyne urban sprawl of no merit and out of keeping with the special character of Bridgnorth and its setting, a primary reason people chose to visit and live there.</p>
A0153B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such.</p> <p>The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan.</p> <p>The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity.</p> <p>The proposal is contrary to National Planning Policy.</p>
A0153B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF).</p> <p>An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2. Form 2</p>
A0153B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported.</p> <p>However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.</p>
A0153B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Sites STC002 and P58a should not be allocated for employment as:</p> <p>The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community.</p> <p>The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town.</p> <p>The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley.</p> <p>There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore.</p> <p>The sites are situated in Green Belt and no very special or exceptional circumstances have been identified.</p> <p>The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9.</p> <p>Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development.</p> <p>Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have ben for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore.</p> <p>Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation.</p> <p>Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>
A0153B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such.</p> <p>The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan.</p> <p>The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity.</p> <p>The proposal is contrary to National Planning Policy.</p>
A0153B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF).</p> <p>An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. A0153B8	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.
A0158B8	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The Council would prefer site ALV009 to be retained within the Green Belt. There are ecological and hydrological issues with this site that we feel have not been taken adequately into account. However, we agree with the proposals for sites ALV006 & 007.
A0163B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such. The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan. The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity. The proposal is contrary to National Planning Policy.
A0163B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2.
A0163B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.
A0163B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.
A0172B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	HOUSING with 2500 new homes population will increase by 4,500 that is a 35% population increase, this needs major increase in infrastructure, where is the investment for this coming from? Taylor Wimpey only think of profit margins. Whilst growth is needed surely a Local Housing Need Assessment is needed. EMPLOYMENT 29ha of employment land allocated south of A458 outside development boundary plus 11ha in the greenbelt at Stanmore. What impact will 40ha have on the environment with added pollution & traffic. Is 40ha needed? The livestock market has to be relocated to build 500 homes, north of A458, it is incompatible with housing how can it be incorporated into Garden Village? Residents backing onto market would not tolerate noise, smell & practises. But loss of market & auction would be detrimental to Bridgnorth. Are all the business units currently occupied? What is the vacancy rate? On what grounds does SC believe predicted levels of employment growth is achievable? Coronavirus impact on our working practices how will this affect need for 40ha of employment land. What happens to designated land if target is not achieved? land nr TGBS & new petrol station is suitable for employment land better than near housing. Delay plan until outcome of SAMDev plan is known, build the needed infrastructure and understand impact of coronavirus. Bad broadband & mobile communications in Shropshire holds employment back. INFRASTRUCTURE Due to topographical restraints road connections are restricted A roads are mainly single carriageways, any plans to improve this? Approx 60% of Bridgnorth residents commute out to work & approx the same number commute into the town unlikely to change. Allowing for 1 car per household that is 2500 more cars. Taylor Wimpey say they will build a footbridge but do not own that land, is only one bridge enough? Will it be intimidating at night? Will private car use increase & will pedestrians be tempted to cross road on foot? Site is 2km from town no established cycle routes, return journey is uphill. Parking facilities and dedicated park & ride is not mentioned by Taylor Wimpey but is in local plan, where is it? Who will fund the bus? AGRICULTURAL LAND Site is grade 3. as we leave EU & try to lower our carbon footprint sites should be infill and brownfield. Encourage specialist food production and small scale farming increasing employment. ECOLOGY CPRE & SWT objected to development what's the justification? LANDSCAPE & VISUAL AMENITY profound impact, effecting the unspoilt tranquil gateway to the Shropshire Hills' has impact on tourism, walking been assessed by a professional? Pandemic meant no public meetings, timing unfortunate and should have halted plan not a proper consultation.
A0179B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	No need to change Stanmore greenbelt boundary. NPPF says it should be exceptional circumstances to remove land from GB. PreSubmission Draft gave no exceptional circumstances. There are other options on sites outside GB so proposal is contrary to national planning policy.
A0179B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	site excessive, not fully evidenced or justified. other land available. nothing to justify GB status removal. Site divorced and unsustainable so contrary to SP4.1. & NPPF. Originally WW11 military site now many sites are vacant have been for year. New housing development is 3.5miles away which is too far. Tasley site proposed 16ha of employment land within walking distance of proposed housing, no need for more at Stanmore. Stanmore unrelated to urban area proposal contrary to SP9.
A0179B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Agrees with NPPF SP11.2.e. that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). removal of land from the Green Belt at Stanmore would not protect the Green Belt & no very special circumstances to justify its removal. So is in conflict with the stated aim of sub-section 2.e. of Policy SP11, and in conflict with Policy DP25 of the Draft Local Plan and the NPPF
A0179B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	49ha excessive and not fully evidenced and justified. enough land outside of GB. no very special or exceptional circumstances have been identified that would justify removing that designation. distance from town means more car use so runs contrary to the aims of Draft Local Plan Policy SP4.1. and the main aim of the NPPF. Large number of units are empty & have been for years. Allocation at Tasley is 3.5 miles away so it is not sustainable especially as there is a 16ha employment area adj to the allocation, which is within walking distance from housing. Stanmore is in the countryside so proposal is counter to SP9. Vacant land on existing site in town has not been developed indicating there is no desire to invest so there is no need to allocate at Stanmore. Core Strategy & SAMDev sites have not yet been taken up there is no proof that Stanmore site would be developed any quicker. Stanmore has drawbacks it's in the GB & it's unsustainable so other sites are more attractive. Over-provisions of sites can fragment development opportunities making investments less attractive & less likely to happen.
A0190B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Object to the inclusion of Tasley Garden Village. The development would surround the livestock market and restrict its viability. The site is divorced from the town and has the feel of deep countryside not urban fringe and development would destroy the setting of Bridgnorth. Development impacts on 4 SSSIs, 2 Listed Buildings and encroachment on Grade 1 Listed Morville Hall. Commuter traffic from the site will increase congestion, noise and pollution. The pedestrian and cycle link is not deliverable. There is no bus service. Access along the B4364 for the first 10 years is wholly inadequate. The development does not follow Garden Village principles as set out in Sir Ebenezer Howard's recommendations and adopted by the Town and Country Planning Association. Submission of this proposal during the Covid lockdown has severely restricted consultation. The Town Council, and Tasley and Morville Parish Councils all object.

Page 123

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0196B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area		Undemocratic: Opportunistic proposal with no strategic planning consideration within the democratic scrutiny of the Shropshire Local Plan process. Undemocratic to make these major decisions, with no proper public consultation during Covid19 crisis. Online consultation is not wholly inclusive. Proposal fails the Shropshire test policy SP1 Climate and ecological impacts have not been considered: The house building and lifetime energy requirements of the households will contribute to the negative impacts of climate change contrary to Shropshire Council Climate Emergency Declaration. This is coupled with increased pressure on wildlife populations in the surrounding countryside. In the context of a growing climate, ecological and health emergency, would question the appropriateness of the proposal in a post-Covid-19 situation where desire is for a 'Green Recovery'. Significant ecological concerns. Mor Brook is a very valuable, restored and virtually continuous wildlife corridor from Much Wenlock will be compromised by loss of buffer zone land. Proposal contrary to Policies SP3, DP12. DP13 & DP15. Loss of agricultural land and character. The land is classified as Grade 3 agricultural land and would be lost from a threatened an important local food production role for which it should be safeguarded in principle despite local availability of good agricultural land . Interrelationship with Footbridge farm Intensive Poultry Unit (IPU) Whilst the Appendix 2 assessment indicates that if site allocated then Poultry units would not be built this is contradicted by the advice in the Councils regulatory services 2019 Air Quality Annual Status Report to keep residential properties at least 100 metres away and if this is the case, then no assessment is needed. As the site of the IPU is more than 100 metres from the proposed, if the Garden Village development goes ahead without the proposed employment units (which are on the site of the IPU), then there is nothing to prevent the IPU, should it be given planning permission, from being built very close to the new housing. Development of the proposed garden village alongside Footbridge Farm IPU would run contrary to Policies SP1, SP3, DP18 and DP19. Question need/demand for the employment land identified in the Bridgnorth area given existing vacant plots of land on existing industrial estates in Bridgnorth. Greater focus on urban revitalisation & brownfield sites needed: If numerous brownfield sites and empty buildings across Bridgnorth (and Shropshire and the Black Country), which should be prioritised for housing and employment development, were utilised there would no need for Tasley Garden Village. local plan should look to utilising empty buildings/land in town centres to regenerate and revitalise our town centres, all of which have been affected by the Covid 19 pandemic, to bring more residential properties to town centres. This would solve the problem of empty office buildings, shops and shopping centres & bring a consumer base directly to town centres to help revitalise existing businesses, such as cafes and restaurants, without the need to use a car thus reducing carbon emissions. Development of the graden Village would run contrary to Policies SP3, SP4, DP10 and DP12 of the Draft Local Plan. Historic Environment : Taylor Wimpey's designs for the development show little/ no regard to the historic town of Bridgnorth and its environs and do not reflect existing traditional farm or historic buildings or the local architectural style including grade II listed The Leasowes. The designs are pedestrian and lack local distinctiveness being the same as development elsewhere in the UK. Development would run contrary to Policy DP24 of the Draft Local Plan. Inadequate road network and commuting Around 60% of people in Bridgnorth travel to work outside Bridgnorth (mainly to Telford, Wolverhampton and Kidderminster) & a similar percentage of jobs in Bridgnorth are filled by travelling in to the town. This situation is unlikely to change. There are acknowledged topographical and landscape restraints in/around Bridgnorth which severely restrict development and road improvements & the main roads to Telford, Wolverhampton, Stourbridge, Kidderminster and Shrewsbury are slow single, winding carriageways. Given poor road links and lack of proposed improvement no reason why businesses would choose to locate in Bridgnorth, therefore no likelihood of meeting the stated employment targets. Development of the proposed TGV would run contrary to Policies SP11 and DP27, of the Draft Local Plan. Pedestrians and Cyclist Access:There is an essential need to cross the A458 from the site safely to facilitate pedestrian and cycle access from the site to Bridgnorth town . Only one footbridge across the A458 not be sufficient for whole site and lack of certainty that it would be built because developer does not own or control the majority of the land fronting the A458, and the footbridge is also subject to ground investigations. Three footbridges along the Garden Villages frontage with the A458 required to ensure residents are not tempted to put themselves at danger from the fast traffic. If the development approved, the A458 should be moved to incorporate the site into the town. Residents would then be able to safely access Bridgnorth high street on foot or cycle. Development would run contrary to Policies DP29 and DP30, of the Draft Local Plan.
A0197B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such. The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan. The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity. The proposal is contrary to National Planning Policy. (Form 1)
A0197B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2. (form 2)
A0197B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area		Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.(Form3)
A0197B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have ben for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.(Form 4)
A0205B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Agree with SP5, but not applicable to the proposed "garden village" in Bridgnorth as it is a separate entity and in open countryside on a green field site.
A0205B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The proposed design code and master plan will provide a framework and guidance on the development, but will it be robust enough to guide design should the government decide to give carte blanche to developers to go ahead and build without the need to apply for planning permission once a site is allocated for development, yet at the same time be flexible enough to allow for and encourage imaginative and creative design?
A0211B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Strongly object to proposed allocation BRD030 and references to it in Schedule S3.1(i) and paragraph 5.56. The site conflicts with policies SP1: 1a, 1b, 1c and 1d as: There is no justification for 1,050 dwellings in Bridgnorth on top of the 500 already allocated. Bridgnorth is some distance from a main employment centre such as Telford or Wolverhampton and the motorway. Limited local employment would result in increased commuting, bringing further congestion and road infrastructure would not cope. BRD030 would break a natural planning barrier, the A458. BRD030 is typical south Shropshire countryside on the route to the South Shropshire Hills, on the crest of a hill and highly visible. Landscape damage cannot be mitigated. BRD030 and existing allocations would double the size of Bridgnorth High Town, but it will be dissected by the A458. an extension to the suburban area but divided from the existing town by the A458 makes no sense. There are no details/evidence of proposals to provide extensive and attractive pedestrian links. This is crucial to avoid segregation, but unachievable - crossings on roundabouts are not safe and a footbridge or tunnel present numerous social issues. BRD030 would therefore form a separate community contrary to the Council's strategic policies. Selecting BRD030 rather than Stanmore Garden Village is convenient as it is not in the Green Belt, but the site is inappropriate for a major extension to Bridgnorth - it is much needed agricultural land. Development of BRD030 for housing/industrial estate would have a hugely detrimental impact on the local historic monuments and villages in this area.
A0224B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	No need to change greenbelt boundary at Stanmore. No exceptional circumstances have been put forward in Plan to justify removal. There are other reasonable options for meeting need outside Green Belt boundary.
A0224B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2.
A0224B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.

This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development.</p> <p>Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore.</p> <p>Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation.</p> <p>Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>
A0238B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Document Reference BTC1: Oppose Tasley Garden Village proposal. Physical divide created by the by pass which needs to be overcome and sustainably considerations addressed. Site location outside a fast, busy main road raises safety concern. Much additional traffic, in particular through low town, would be generated from the developer. Concerns about close proximity next to livestock market.</p> <p>Taylor Wimpey is a large national house builder who have no interest in the employment development. To maximise profitability their focus will be first bringing forward most attractive housing from sales perspective with supporting infrastructure to follow. Lack of indication how much the developer would work with all relevant Councils to ensure the needs of Bridgnorth are met. The interrelationship with the SAMDev site development also needs consideration.</p> <p>Whilst a commitment is made that "necessary improvements to the A458 Ludlow Road roundabout, the wider highway network and associated infrastructure will be informed by Strategic and Local Highway Transport Assessments," for a development of this scale to be included in the draft Plan, such an assessment should already be available as a supporting document. Similarly such assessments, which would have already considered the implications for the wider network, should have been available to support the earlier proposals for Stanmore.</p> <p>Not practical walking distance to town. Query how the deteriorating public transport provision, will ensure linkages between residential and employment areas and other local towns? The linkage of the site to the town centre, tenuous with a single bridge over the A458 bypass is proposed for pedestrian and cycle use. Significant investment in footpaths and cycleways to link to the town centre would also be required & not clear that appropriate routes for these are available. Careful consideration needs to be given to where & how children living on the site would travel to school. Inadequate parking in the town centre to accommodate demand from housing on the site & funding needed to provide this.</p>
A0238B02	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Document Reference BTC2; Cover letter: Proposal for a Stanmore Garden Village preferred. Tasley Garden Village is on the wrong side of the Town relative to employment opportunities. Most local commercial/ industrial type employment is located to east of the river or on Stanmore Industrial Estate. A significant proportion of working age residents commute to neighbouring towns mostly to east side of the river, resulting in most commuters living on the western side of the town having to cross the river within the town. Proposal will generate significant additional traffic in Low Town, notably traffic to Telford. It is noted that Stanmore more divided/distant from Bridgnorth, less practical to achieve pedestrian/cycling access & will increase traffic on already problematic Hermitage. Stanmore site promoters have a long established Bridgnorth connection but need to provide firm commitment to infrastructure provision. Record of Stanmore Industrial estate in attracting new businesses not noteworthy.</p> <p>With reference to Policy S3.1 point 2, concern that the proposals for a Tasley Garden Village only presented in May 2020. No justification for housing and employment land development to occur in this single location. Other landowners have not had the opportunity to put their land forward for consideration – as no further call for proposals.</p> <p>Other options may be a better fit for Bridgnorth's needs and should be considered with a further site allocation assessment being carried out over the next five years.</p> <p>S3.1, point 8- concern relating to reserved land beyond to development boundary also only recently proposed but understand that this is provisional and not an irrevocable extension of the development boundary.</p> <p>Whilst Policy DP18 provides protection for landscape and visual amenity no adequate impact assessment relating for Tasley Garden Village has been carried out and presented in the draft Local Plan or supporting documents. Location is visible over a large area and proposal should have been explicitly assessed for visual impact and the results presented in the supporting documentation.</p>
A0238B08	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Document Reference BTC8: Insufficient evidence for requirement for Bridgnorth area to deliver 1800 dwellings; 1250 dwellings is a more appropriate. The current SAMDEV 500 home site allocation at Tasley still to be brought forward. Growth in both housing and employment is needed but no up to date housing needs assessment for Bridgnorth to identify requirements. Delivery in the Bridgnorth area 2006/7 – 2018/19 lower than draft plan, 63.1 per annum compared with 87.5. Historical delivery included high proportions of affordable housing & analysis suggests the market can absorb 56 homes each year with 20% affordable. This equates to 1232 homes in the period 2016-38. 2. Shropshire Council 250 "windfall" homes from 2016-2038 is too conservative a figure in the light of recent development rates and outstanding permissions.</p>
A0238B09	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Document Reference BTC8: Whilst policy is to deliver "balanced growth" between housing and employment, and to make sufficient employment land available to facilitate this there is no evidence of an ability to attract a further 1800 jobs to Bridgnorth area 2016 -2038. Success more about replacing jobs lost, rather than net gains. Therefore allocations could be reduced substantially</p>
A0238B10	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Document Reference BTC8 & BTC12: The draft Plan does not identify the infrastructure needed to support the proposed development around Bridgnorth or identify sufficient investment to implement it. major concern about infrastructure capacity and any allocation must be subject to the results of the Strategic Highways Assessment and a program to address the issues raised. Investment in footways and cycleways in the Bridgnorth needed prior to allocation of sites. Adequate plans for infrastructure have not been produced for Bridgnorth.</p>
A0238B11	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Document Reference BTC9: Paragraph 5.62 - agree with the general comment but strategic assessment of the highway network should already have been completed and the implication of the required investment be taken into account in finalising the Plan.</p>
A0238B13	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Document Reference BTC 10; BTC11; BTC12; BTC 13: Para 5.63 Place Plan is inadequate for strategic policy making. It allocates funding after development has occurred, rather than planning & funding infrastructure in advance. Plan/evidence does not identify the infrastructure needed to support the proposed development around Bridgnorth or identify sufficient investment to implement it. Para 5.65 No controls in place to ensure that development does not progress ahead of infrastructure provision. Limits on the scale of development should be imposed until firm plans & funding in place for the significant infrastructure required to ensure sustainable growth. This could be completed in time for the next Local Plan review</p>
A0238B15	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Document Reference BTC13: Plan emphasises 'Strategic Corridors'. DP29 identifies proposed enhancements to the Strategic and Local Highway Networks but not any improvements around Bridgnorth. Without improved connections between Bridgnorth and the A5/M54 strategic corridor, or to Wolverhampton, Stourbridge or Kidderminster the proposed level of growth around Bridgnorth cannot be justified.</p>
A0238B17	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Document Reference BTC17: All investment listed in Policy SP10 will be required for Bridgnorth but no evidence of advance planning/financing for most. Particular need for local Education and training opportunities in addition to Marches centre. Of note lack of proposals to address transport 'capacity constraints' around Bridgnorth, or enhancements to make Bridgnorth practically part of a 'strategic corridor'</p>

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0238B19	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Document Reference BTC18:Reasoning behind the growth proposed for each market town in Shropshire is not explained in the Plan or supporting documents. There should be a clear explanation why second highest level of growth proposed for Bridgnorth when: it is not on a strategic transport corridor; is constrained by the Green Belt and difficult topography. Would be reasonable to expect Bridgnorth to grow by a similar amount to Oswestry and Ludlow, both of which lie on strategic transport corridors and have mainline railway stations. Consultation at community consultation meetings & carried out as part of Bridgnorth Plan preparation shows significant lack of support for proposed growth level identified.
A0238B20	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Cover letter additional: Number of dwellings proposed for Bridgnorth is excessive and not justified because the plan sets a high aspirational level of growth for the County with second highest percentage level of growth accorded to Bridgnorth on basis that it is within a strategic corridor when it is not. More realistic level of growth evidenced by 500 dwellings & local Housing needs assessment required. Allocations should be made only to reflect lower level of growth to 2032 only (approx. +250 dwellings additional to SAMDev) with outline targets and potential sites only beyond then to allow Shropshire Council to meet its housing land commitments and progress a site allocation review over the next 5 years which considers scope for infill in Bridgnorth & other alternative sites (to Tasley Garden Village) that are likely to come forward given the time opportunity. Concern however that no recognition of strain of major development on town centre and more generally on infrastructure or assessment of infrastructure requirements and funding
A0238B21	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Cover letter additional: Concern that options for development presented are single developer led and with inherent delivery risk because of lack of other options. Excludes participation by smaller developers when it is important that SME builders participate in future of Bridgnorth. To achieve this other sites need to be available and thus size of single allocation reduced
A0238B22	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Cover letter additional:Proposals in the Shropshire Economic Growth Strategy and in the Bridgnorth Local Economic Growth Strategy are not sufficiently robust to justify the growth in employment land (including safeguarding) and population proposed in the draft Local Plan. Unlikely based on recent experience and lack of good connections that employment growth anticipated & necessary to match Plan aspirations can be achieved. Insufficient regard given to alternative buildings available. An approach is required to limit housing growth in areas where anticipated level of job creation is not achieved
A0238B23	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Cover letter:Support the proposed expansion to the Stanmore Industrial Estate & exceptional circumstances proposed to remove land from the Green Belt. Would support a further Green Belt review to allow 500 dwellings at Stanmore subject to the requested site allocation review process. This would allow a more even distribution of development around Bridgnorth. Note the requirement that the proposed expansion is restricted to employment land uses with the consequence that, having been taken out of the Green Belt for that purpose, it cannot be subsequently used for housing development. Requested exceptional circumstances statement still needs to be provided for proposed changes to the Green Belt. Would continue to support housing development & employment land around Stanmore if an acceptable statement provided but safeguarded land should be reduced.
A0238B48	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Document Reference BTC9:Paragraph 5.62 - agree with the general comment but strategic assessment of the highway network should already have been completed and the implication of the required investment be taken into account in finalising the Plan.
A0256B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	The proposed sites will form the gateway into the village and therefore should be developed to the highest standards possible reflecting their prominence and location in the Green Belt. The allocations must reflect the local housing needs, firstly those identified within the Parish and also the mix of housing identified. Community benefit must be established creating new access to the Green Belt for the community at the lower side of the village. Opportunities should be explored which offers the community open space for informal exercise and places to meet, well linked by public rights of way, i.e. offsetting the loss of Green Belt.
A0256B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The community undertook a Housing Needs Survey which demonstrated a need for affordable housing including bungalows, and this can be met under current policy without the sacrifice of Green Belt. Properties should reflect existing housing densities, with useable gardens, regardless of the number of bedrooms, to support the wellbeing of residents. Also the matter regarding a caravan site which is currently being developed for 100 residential units. I appreciate the numbers are not counted in housing supply, however to me this is an anomaly within the current system. 130 houses are proposed and 100 park homes are being developed now on a former caravan site, this reflects considerable growth with additional strains on our infrastructure.
A0256B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The current proposals for the land use at Tasley to create a garden village causes concern regarding the scale of development for significant housing growth and employment land. The main concerns are in relation to the increased traffic movements particularly at peak times heading to the West Midlands, Telford and Kidderminster, which involves the use of the bypass and potentially introduces more traffic onto the original route through the town. The bypass was developed to alleviate the congestion in the town and in low town. This location is potentially the wrong side of the River Severn crossings.
A0261B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of Policy SP11, and is also in conflict with Policy DP25 of the Draft Local Plan and the National Planning Policy Framework.
A0261B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in ‘Countryside’ and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.
A0273B1	Viability and Deliverability of Proposed Site	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Hoping to deliver in the short term but feel medium term is more realistic.
A0288B1	Viability and Deliverability of Proposed Site	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Site is viable and deliverable, and the delivery timing is considered correct.
A0295B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The level of housing growth proposed is too high. Consider that between 800 and 1,000 new dwellings should be planned for in Bridgnorth between 2019 and 2036, as over 90% of respondents to a Local Survey undertaken by the Bridgnorth Plan Group expressed a preference for a figure below 1,000. This equates to around 900 to 1,100 dwellings between 2019 and 2038 (including around 500 dwellings already included in the SAMDev Plan). The level of employment growth proposed may be difficult to achieve, for reasons including proximity/connections to the motorway network; lack of plans to invest in local highway networks; limits to electricity network capacity (although plans are in place to address the needs of individual existing companies); lack of availability of highest speed broadband; and lack of a main line railway station/poor public transport. Furthermore there is no robust plan for job creation in Bridgnorth, this should include consideration of strengths, weaknesses, opportunities and threats (including comparison to nearby settlements); analysis and costing of necessary highway improvements; review of potential for office-based employment; relocation of some government administration to the town; and potential for starter units. Additional housing should be linked, in some way, to the provision of new jobs and housing development should not progress too far ahead of available jobs. Job creation and housing growth should be reviewed every 5 years and that additional housing may be allowed for (in subsequent reviews of the Local Plan) if the creation of new jobs justifies it. The amount of employment land allocated in the SAMDev Plan (plus space on existing employment sites and vacant premises) is sufficient to meet needs to 2036 - acknowledge some additional land may be needed for the period to 2038. Emphasis should be given to providing modern office premises, which has not been addressed in the draft Local Plan or Local Economic Growth Strategy for Bridgnorth. The draft Local Plan proposes significantly higher levels of growth in Bridgnorth and Whitchurch than other market towns, yet no justification has been provided. Given acknowledged topological and Green Belt issues facing Bridgnorth, consider its growth rate over the plan period should be no higher than other market towns, such as Oswestry and Ludlow, which are on the strategic transport corridors and have mainline railway stations. Any growth in employment and housing should only proceed once commitment and funding for necessary infrastructure improvements are made. Bridgnorth does not lie on a strategic transport corridor and that there are no published plans for any improvements. Policy DP29 (para 4.261, page 138) lists proposed enhancements to the Strategic and Local Highway Networks, none are around Bridgnorth. This would imply that there are no plans to improve connections between Bridgnorth and the A5/M54 strategic corridor, or to Wolverhampton, Stourbridge or Kidderminster. The explanation to this Policy includes reference to a strategic assessment of the highway network. The proposed level of growth for the Bridgnorth area cannot be considered sound without such an assessment having been completed and plans put in place for the implementation of any recommendations. The draft Local Plan and supporting documentation provides no assessment of the infrastructure required to support proposed growth around Bridgnorth. Without this, do not consider the proposed level of growth around Bridgnorth is sound. Emphasise the need to provide continuously faster broadband within the town if we are to achieve the economic growth envisaged. Welcome investment in footpaths and cycleways (DP29, point 3, page 136) in and around Bridgnorth. However there have been past commitments that have not been achieved. Tourism should be encouraged in the town, supported by investment in supporting infrastructure and amenities. Need to enhance Bridgnorth town centre and increase availability of parking to ensure it remains viable.
A0295B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	There are advantages and disadvantages of both BRD030 and the previous preferred option Stanmore Garden Village During a Local Survey undertaken by the Bridgnorth Plan Group, when asked about the location for new development: 25% indicated they wanted none. 42% who gave an indication of preferred locations requested it be distributed around the town (in more than one location). People voted specifically for development in Stanmore, Tasley, Oldbury and Astley Abbots in the ratio 2:2:1:1 (they could vote for more than one specific location). Responses to this Local Survey therefore preferred distribution of development around the town (in more than one location)

A0296B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Mor brook forms a valuable and virtually continuous wildlife corridor from its source near Much Wenlock, through numerous wildlife sites, before flowing into the Severn. Habitat management and restoration on this corridor has had considerable success halting/reversing decline/extinction of mammal, bird, amphibian, reptile and insect species. Current levels of access by tourists and locals is likely sustainable due to agricultural land which forms a buffer between Mor brook and Bridgnorth, this will be lost if BRD030 is developed. Shropshire Wildlife Trust objects to large scale development around Bridgnorth. BRD030 is an opportunistic proposal outside of any strategic planning consideration within the Shropshire Local Plan. There are a number of other very large developments in Shropshire, for example Tong Garden Village and Ironbridge Power Station - these will all have a cumulative impact on limited water resources in the county. The potential impact of house building and lifetime energy requirements of households will have negative impacts of climate change. This has not been considered and does not align with the Climate Emergency Declaration signed by Shropshire Council last year. Coupled with increased pressure on wildlife and a growing climate/ecological/health emergency, question whether this proposal is appropriate post-Covid-19, when there is an appetite for a 'Green Recovery' rather than business as usual. BRD030 is classified as Grade 3 agricultural land. The NFU says the UK only produces 58% of the veg consumed and 16% of fruit. At a time when local food production is under threat, why is Grade 3 agricultural land being taken for residential and employment facilities? The Local Plan proposes 2,250 new houses (at least 4,500 people) in the Tasley area, representing an increase of 35%. Whilst more dwellings are needed to meet future growth of the town, how has this been arrived at? and how has it been determined that this will make provision for the surrounding hinterland? A Local Housing Needs Assessment is required in order to establish what the needs are. This should be undertaken before determining the numbers of dwellings to be built? Can the Town support an increase of 35% to its population? The Local Plan proposes 29 ha of employment south of the A458 in the Tasley area and 11 ha of Green Belt land to extend Stanmore Industrial Estate. This totals 40 ha for employment land in the Bridgnorth area. How has the need and deliverability of 40ha of employment land been determined? Are existing units already occupied? What is the vacancy rate? What effect will coronavirus have on our work practices and how will this affect the requirement for 40 ha of employment land? What happens to this designated land if the targets are not achieved? It would make more sense to deliver existing employment allocations and delay any further decisions until the success of these allocations is known, required infrastructure improvements have taken place and impact of Covid-19 is known. Decisions should not be made until post-Covid-19. There has been no proper public consultation on these proposals. Many (particularly older people) cannot get involved online. Alternative methods need to be worked out if public meetings remain contraindicated.
A0297B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Mor brook forms a valuable and virtually continuous wildlife corridor from its source near Much Wenlock, through numerous wildlife sites, before flowing into the Severn. Habitat management and restoration on this corridor has had considerable success halting/reversing decline/extinction of mammal, bird, amphibian, reptile and insect species. Alternative methods need to be worked out if public meetings remain contraindicated.
A0315B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	No evidence for scale of development. No justification for West Midlands housing being allocated to Shropshire. No assessment whether a primary or secondary school are needed. NHS should be consulted to determine whether medical developments are needed. There has been no air quality impact assessment. Unclear how the employment land need will be met. Other areas in the county are more attractive to businesses. Pedestrian crossings needed for the A458. Traffic will be generated. Will the Footbridge Farm Industrial Poultry Unit be built? Current times means that the process has not been open and transparent. Feasibility studies need to be carried out prior to allocating land.
A0328B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such. The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan. The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity. The proposal is contrary to National Planning Policy.
A0328B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2.
A0328B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.
A0328B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.
A0357B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2.
A0357B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.
A0357B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.
A0397B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of Policy SP11, and is also in conflict with Policy DP25 of the Draft Local Plan and the National Planning Policy Framework.

Page 127

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0397B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The two sites proposed to be allocated for employment development Stanmore should not be allocated for employment and should be deleted from the Plan, because: 1. The allocation of some 49ha of land for employment purposes in Bridgnorth in order to create choice and competition in the market (para. S3.1.1), is excessive and not fully evidenced and justified. There would be sufficient land for employment purposes to serve the existing and proposed residential expansion of Bridgnorth without the necessity to develop at Stanmore. 2. The land proposed for employment development at Stanmore is situated in Green Belt and no very special or exceptional circumstances have been identified that would justify removing that designation. 3. Stanmore is divorced from residential areas and that means that all workers would have to travel, mostly by private motor vehicles, to access the site. This runs contrary to the aims of Draft Local Plan Policy SP4.1 and the main aim of the National Planning Policy Framework, in that it cannot be considered a sustainable form of development. 4. There is no need for the proposed allocation. Stanmore Industrial Estate was established in order to make use of a former WWII military site. There is no such justification for the present proposals. A number of the plots on current Stanmore Industrial Estate are vacant, and have been for months, in some cases years. There is no current need or desire for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. 5. The main residential element of proposed expansion of Bridgnorth development in Bridgnorth, is indicated in the Draft Local Plan to take place at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. 6. The proposals for development at Tasley, include provision for some 16 ha of employment land. This will be within walking distance of the main residential development proposed for Bridgnorth in the LPR, and is more than capable of supplying the necessary floorspace to serve the proposed population growth for the town. There is no need to provide more land at Stanmore. 7. The proposed allocations at Stanmore are located in 'Countryside' and are unrelated to any significant urban development area. Development of the proposed allocations would run contrary to Policy SP9 of the Draft Local Plan. 8. There are a number of plots of land on existing, developed, industrial estates in Bridgnorth which are vacant, and have been for a long time, and which show no signs of being taken up for new development. This shows there is no need or demand for additional land allocations such as that at Stanmore. 9. The current Local Plan comprising the Shropshire Core Strategy and the Site Allocations and Management of Development Plan, shows allocations for employment development in the Tasley area which have not been taken up during the Plan period (i.e. between 2006 – 2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed by now. Some of the land included in those currently allocated sites is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the sites proposed for allocation as an employment site at Stanmore. There can, then, be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. 10. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.
A0403B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such. The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan. The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity. The proposal is contrary to National Planning Policy.
A0403B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2.
A0403B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.
A0403B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. A0404B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.
A0404B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.
A0405B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such. The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan. The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity. The proposal is contrary to National Planning Policy.
A0405B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2.
A0405B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.

Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.
A0433B7	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	No evidence of local demand for even a fraction of the housing proposed at BRD030. The existing SAMDev Plan allocations would satisfy local demand for many years. Whilst some housing in needed, it should be of a volume compatible with and sensitive to the needs of the town and all of its inhabitants, both current and future. Proposals risk damaging to the attractive historic market town that is Bridgnorth. BRD030 and the future direction for growth represent good quality agricultural land which should be retained. There is negligible public transport that would be of benefit to BRD030. The description of BRD030 as a garden village is misleading, it is a vast housing estate attracting migrants from the West Midlands. There is insufficient infrastructure to support BRD030 (e.g. medical facilities). BRD030 will not address the local need for affordable housing. No reference is made to the need to improve the A442, which will be required if BRD030 is developed and is home to commuters to Wolverhampton and Telford. Further Hospital Street is subject to significant vehicle pollution. No evidence employers view Bridgnorth as an ideal location for significant employment expansion - major local business have no desire for expansion other than by way of existing plans and why would new employers base themselves in a location with poor transport links? It seems unlikely that 1,000 households could provide enough staff to service the assumed employment types (e.g. tech and IT jobs), result in increased in-commuting
A0462B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The Tasley Garden Village proposal is totally out of scale for the town to its future detriment. Until there is a credible employment plan this scale of housing should not go ahead.
A0473B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Object to BRD030 because Tasley Garden Village will ruin the character of Bridgnorth for the following reasons: (1) it is too large and will expand the town by one third; (2a) will result in the loss of greenfield/agricultural land and natural rural habitat putting wildlife at risk and (2b) affecting the community by removing rural views and footpaths which provide a valuable local amenity and replacing this with traffic and noise; (3) Telegraph Lane already floods from small levels of rainfall causing traffic to divert through the town and this development may cause more flooding; (4a) there is insufficient evidence of the local housing need to justify the development and (4b) if permitted, the development may not provide sufficient affordable housing for Shropshire residents who cannot afford to buy a property and (4c) building in Shropshire to meet Black Country housing needs seriously lets down Shropshire residents.
A0485B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The increase in housing figures for Bridgnorth from 1455 to 1800 does not fit with ONS growth forecast. When added to SAMDev the Plan proposes 2250 new dwellings. This will increase the population by 35%. This is not based on the need for Bridgnorth. The Tasley Garden Village does not adhere to Garden Village principles. Previous Garden Villages have increased traffic generation and not provided integrated employment (Transport for New Homes report). This site and land to the west towards Morville are outside the development boundary. The site will surround the livestock market. All the employment land allocated is outside the development boundary. What grounds does the Council have for the 40 ha of employment land in Bridgnorth (TGV plus Stanmore)? How will coronavirus affect employment? The employment allocation does not comply with SP11 2b, 2c or 2e. The SAMDev employment allocation should be delivered first and other allocations delayed until the success of the SAMDev site is known. Infrastructure is clearly insufficient in Bridgnorth and existing facilities can't support much population growth. New residents will travel to Wolverhampton and Telford to work and put pressure on already inadequate roads. The increase in population and traffic will deter people moving to Bridgnorth in the future. Crossing the A458 is dangerous for pedestrians and cyclists and TW do not control the land fronting the road so can't build a footbridge. A single point of access is not sufficient for this development. Doubts exist over whether the broadband access would be sufficient and in place before employers move in. Decisions on infrastructure improvements should be delayed until working practice changes from the pandemic are known. Doubts about feasibility of a Park and Ride and its location within the site. Concern that the poultry units may still go ahead. Concern that air quality will be negatively affected. Concern that the SSSI and environmental networks will not be safeguarded.
A0490B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Object to this site. Stanmore is preferable: old RAF site and grade 4 agricultural land. There is no provision for traffic calming. Housing will surround the livestock market. The existing sewerage network is not sufficient. Residents will commute to Telford, increasing traffic through Morville and Much Wenlock. Car parking in Bridgnorth will become impossible when this development is added to the houses already earmarked. This will discourage shopping in Bridgnorth. I consider this site unnecessary.
A0504B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such. The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan. The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity. The proposal is contrary to National Planning Policy.
A0504B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2.
A0504B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of Policy SP11, and is also in conflict with Policy DP25 of the Draft Local Plan and the National Planning Policy Framework. Ref S3.1(ii) should be removed from the Local Plan due to lack of soundness as well as S3.1 point 5 and point 9 where referring to Stanmore Industrial estate.

A0504B7	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area		<p>SCALE OF DEVELOPMENT AROUND BRIDGNORTH (See Section 4.2, "Regulation 18 Consultation Update Report") Based upon the work carried out by the Bridgnorth Plan Group in their report "Bridgnorth Plan: Phase 1 Report", Bridgnorth Plan Steering Group, June 2020: • They recommended that 800 to 1,000 new dwellings be planned for in the revised Local Plan for the period from 2019 to 2036. Over 90% of the 155 respondents to the survey expressed a desire for housing growth to be below the upper of these figures. For the period from 2019 to 2038, they now recommend that 900 to 1,100 should be planned for, which is an additional 50 dwellings per year for each of the extra two years, as shown in their document, I support these aspirations however I do not support Shropshire Council's aspirations as highlighted in point 1. • The group expressed concern that the levels of employment growth being considered [in the draft Local Plan] may be difficult to achieve. They are still concerned that there is no robust plan for job creation in the Bridgnorth area, I do not support Shropshire Council's aspirations without clear evidence that growth expectations are achievable, especially when past history demonstrates poor take up. • The group recommended that additional housing development be linked, in some way, to the provision of new jobs. Housing should not progress too far ahead of available jobs. They recommended that job creation and housing growth should be reviewed every 5 years and that additional housing may be allowed for (in subsequent reviews of the Local Plan) if the creation of new jobs justifies it. I support this view. • The Group provided data indicating that the amount of employment land already allocated under SAMDev was sufficient, or almost sufficient, to meet needs through to 2036. They acknowledge that some additional land will probably be needed for the period to 2038. I support this view but do not support Greenbelt land being removed without clear evidence that it will be used as employment land within the plan period. I prefer to see the greenbelt being reviewed in 5 years time when the success of both Stanmore and Tasley can be compared to expectation. • I support the Groups recommendation that emphasis should be given to providing modern office premises. This has not been addressed in the draft Local Plan or Local Economic Growth Strategy for Bridgnorth. And seems to not be an aspiration for Stanmore industrial estate. In the Consultation Update Report from the Group they also provide a table showing that the draft Local Plan proposes that Bridgnorth and Whitchurch have been allocated a significantly higher growth rate than other market towns, yet no justification for this has been given in the draft Local Plan or supporting documents. Given the acknowledged topological and Green Belt issues facing Bridgnorth, I support their view that they consider that its growth rate over the period should be no higher than other market towns, such as Oswestry and Ludlow, which are on the strategic transport corridors and have mainline railway stations.</p>
A0504B8	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>LOCATION OF DEVELOPMENT AROUND BRIDGNORTH (See Section 4.3, "Regulation 18 Consultation Update Report") Based upon the work carried out by both the Bridgnorth Plan Group and Save Bridgnorth Greenbelt Group, in the report "Bridgnorth Plan: Phase 1 Report", Bridgnorth Plan Steering Group, June 2020: • They made no specific recommendations as to where development should be located as, at the time, the only option being offered was around Stanmore. However, Tasley Garden Village has since been proposed. • The survey asked where development should be located. 25% of respondents said there should be none. 42% of those giving an opinion on the location preferred it to be distributed (that is, not all in one location). In addition, people voted specifically for development in Stanmore, Tasley, Oldbury and Astley Abbots in the ratio 2:2:1:1 (they could vote for more than one specific location). • Overall, voting for the survey supports distributed development, rather than all in one location (155 respondents) From the Save Bridgnorth Green Belt group survey results, over 90% of the responses did not support development within the Greenbelt. This covered both industrial as well as residential development. Over 1044 residents supported this view which statistically represents the views of the whole place plan area. I do not consider the plan as proposed to be sound in terms of supporting residents views and actively taking these into account</p>
A0504B9	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>INFRASTRUCTURE TO SUPPORT DEVELOPMENT (See Section 4.4, "Regulation 18 Consultation Update Report", Bridgnorth Plan Steering Group, September 2020) In the report "Bridgnorth Plan: Phase 1 Report", Bridgnorth Plan Steering Group, June 2020: • They recommended that "any growth in employment and housing should only proceed once commitment and funding for the necessary improvements to the local infrastructure, road network, transport links, public facilities and services has been confirmed." • They commented that Bridgnorth does not lie on a strategic transport corridor, and that there are no published plans for any improvements. They also noted that the draft Local Plan places emphasis on 'Strategic Corridors'. DP29 (para 4.6.21, page 138) lists proposed enhancements to the Strategic and Local Highway Networks. It does not include any improvements around Bridgnorth. This would imply that there are no plans to improve connections between Bridgnorth and the A5/M54 strategic corridor, or to Wolverhampton, Stourbridge or Kidderminster. • They noted that the Settlement Policy for the Bridgnorth Place Plan area states (S3.1, para 5.62, page 175) that "a strategic assessment of the highway network will be undertaken." They consider that the proposed high level of growth for the Bridgnorth area cannot be considered sound without such an assessment having been completed and plans put in place for the implementation of any recommendations. • The draft Local Plan and its supporting documentation does not provide any additional assessment of the infrastructure that would be required to support the proposed growth around Bridgnorth. Again, without this do not consider that the proposed level of growth around Bridgnorth is sound. • They emphasised the need to provide continuously faster broadband within the town if Bridgnorth is to achieve the economic growth envisaged. • I would support investment on footpaths and cycleways (DP29, point 3, page 136). However, there is already a commitment to this under earlier plans and there has been little, if any, investment on these to date. I support the statements above and find that the Place Plan for Bridgnorth is not sound.</p>
A0538B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The land that is proposed for employment use at Stanmore lies within the Green Belt and should not be taken out of the Green Belt. The Green Belt Review that the Council commissioned does not qualify as an "exceptional circumstance" and in any event the Review undertaken did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity. The proposal is contrary to National Planning Policy.</p>
A0539B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>49ha is excessive not fully evidenced and justified – enough employment land at residential expansion of Bridgnorth (at Tasley). No exceptional circumstances have been identified. Private cars needed to access site. There is no need or desire for employment there. Main residential proposal is far away from employment proposal. Allocation is in countryside. There are vacant plots in Bridgnorth which can be issued instead. There is no demand for this site.</p>
A0539B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The land that is proposed for employment use at Stanmore lies within the Green Belt and should not be taken out of the Green Belt. A0540B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The land that is proposed for employment use at Stanmore lies within the Green Belt and should not be taken out of the Green Belt. The Green Belt Review that the Council commissioned does not qualify as an "exceptional circumstance" and in any event the Review undertaken did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity. The proposal is contrary to National Planning Policy.</p>
A0541B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>49ha is excessive not fully evidenced and justified – enough employment land at residential expansion of Bridgnorth (at Tasley). No exceptional circumstances have been identified. Private cars needed to access site. There is no need or desire for employment there. Main residential proposal is far away from employment proposal. Allocation is in countryside. There are vacant plots in Bridgnorth which can be issued instead. There is no demand for this site.</p>
A0576B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The two sites proposed to be allocated for employment development Stanmore should not be allocated for employment and should be deleted from the Plan, because:</p> <ol style="list-style-type: none"> 1. The allocation of some 49ha of land for employment purposes in Bridgnorth in order to create choice and competition in the market (para. S3.1.1), is excessive and not fully evidenced and justified. 2. The land proposed for employment development at Stanmore is situated in Green Belt and no very special or exceptional circumstances have been identified that would justify removing that designation. 3. Stanmore is divorced from residential areas and that means that all workers would have to travel, mostly by private motor vehicles, to access the site. This runs contrary to the aims of Draft Local Plan Policy SP4.1. and the main aim of the National Planning Policy Framework. 4. There is no need for the proposed allocation. Stanmore Industrial Estate was established in order to make use of a former WWII military site. There is no such justification for the present proposals. A number of the plots on Stanmore Industrial Estate are vacant, and have been for months, in some cases years. There is no current need or desire for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. 5. The main residential element of proposed expansion of Bridgnorth development in Bridgnorth, is indicated in the Draft Local Plan to take place at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. 6. The proposals for development at Tasley, include provision for some 16 ha of employment land; This will be within walking distance of the main residential development proposed for Bridgnorth in the LPR, and is more than capable of supplying the necessary floorspace to serve the proposed population growth for the town. 7. The proposed allocations at Stanmore are located in Countryside and are unrelated to any significant urban development area. 8. There are a number of plots of land on existing, developed, industrial estates in Bridgnorth which are vacant, and have been for a long time, and which show no signs of being taken up for new development. This shows there is no need or demand for additional land allocations such as that at Stanmore. 9. The current Local Plan comprising the Shropshire Core Strategy and the Site Allocations and Management of Development Plan, shows allocations for employment development in the Tasley area which have not been taken up during the Plan period (i.e. between- 2006-2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed by now. Some of the land included in those Currently allocated sites is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the sites proposed for allocations as an employment site at Stanmore. There can, then, be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0605B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Object to the inclusion of BRD030 in the Draft Shropshire Plan as: It would surround the relocated livestock market on three sides, constricting its operations and threatening its viability. This also contradicts Shropshire Council's requirement to keep the market away from housing, as the two are incompatible. It is described as having the appearance of 'deep countryside' rather than 'urban fringe'. It is divorced from the town, has an open parkland feel and is in the foreground to the Shropshire Hills a designated AONB (development would forever destroy this setting). It would impact on four SSSI, two listed buildings on the site and encroach on nearby Grade 1 listed Morville Hall. It is on the opposite side of Bridgnorth from major towns to the north and east (Telford, Wolverhampton and Stourbridge), so commuter and business traffic travelling to BRD030 from these areas would increase congestion, noise and pollution in and around Bridgnorth. Proposals to construct a pedestrian and cycling bridge over the A458 cannot be delivered as the developer does not own necessary land, so people will be forced to walk across the busy bypass. There is no bus service and the closest bus stop is one mile away. For the first ten years, access to the development is proposed along the B4364 (Ludlow Road) a country lane wholly inadequate for this purpose. No evidence development will follow Garden Village Principles. For example, there is no evidence of the requirement for strong vision, leadership and community engagement, or of community ownership of land and long-term stewardship of assets. The developer is a major volume housebuilder, principally motivated by profit and shareholder returns and they are not known for retaining control over their developments following completion. Proposals were submitted after the deadline, during the Covid-19 lockdown and with minimal local consultation. Shropshire Council's subsequent consultation appears to be designed to raise the minimum amount of input from members of the public and local democratic representatives. Bridgnorth Town Council, Tasley Parish Council and Morville Parish Council have all objected to the proposals. Bridgnorth Town Council voted 6-2 in favour of the alternative development at Stanmore Garden Village rather than BRD030 at an extraordinary meeting in May 2021
A0624B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Stanmore is preferred to Tasley, good access and cars aren't necessarily needed and good future employment possibilities here.
A0629B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	This development proposal is opposed by the majority of people who live in Bridgnorth and the surrounding area. Housing and industrial buildings on this scale would ruin the town. It would double the size of the High Town, traffic would clog the roads, good farmland would be destroyed. The only beneficiaries would be the landowners and developer. No exceptional circumstances exist for the site. Site is far from services.
A0649B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Concerned about lack of community facility being planned for a development of this level. Current level of sports facilities and clubs are inadequate and dated. Desperate need for an additional all weather pitch away from school run leisure centre. There needs to be adequate parking, a picnic area and an all weather surface sports pitch.
A0660 B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	1 Schedule S3.1 (i) does not meet government criteria for a garden village. difficult to recognize how the proposals for BRD030, Schedule S3.1(i) are formulated to deliver a strong local vision which reflects to unique character and identity. does not offer sufficient reassurance that it would meet local needs, achieve a good fit with the existing town and community, or enhance the attractiveness of the town. 2 The town's infrastructure is not currently adequate for the scale of the proposed development S3.1 (i). The challenges of the location, which lacks close rail links and is situated across the river from existing transport links to the West Midlands, means that Bridgnorth is heavily reliant on its roads, which already suffer daily periods of congestion and poor air quality. Some of the town's key local services and amenities are not currently adequate to support the proposed additional growth, it would be detrimental to the quality of the lived experience of the existing community and also the new residents.(Ref. Draft Local Plan 2:28, Draft Local Plan The Shropshire Test 3:SP1a, b, c, g) 3 The outlined size and timescale of the proposed development in the Draft Local Plan S3.1(i). suggest an emphasis on delivery of the planned development. This emphasis could come at the expense of limiting the flexibility for Bridgnorth to evolve organically over time, and to respond sensitively to the changes affecting the community and individuals. The ability to be flexible is particularly valuable during this current period of uncertainty and change, nationally and internationally and is needed to ensure sustainability. (Ref. The Local Plan introduction NPPF 2:15) 4 The proposals do not include plans for the stewardship of the green infrastructure and the blue and green networks around and close to the site S3.1(i). The green infrastructure consisting of green spaces and a linear country park to be integrated into the development of the Draft Local Plan S3:1.(i) may result in a semi natural network such as exists on other similar local sites. While they provide useful local areas for dog walking etc, on their own they may contribute little extra to the enhancement of the local environment, the development of wildlife corridors or the increase in biodiversity. There are no specific details for how the local plan would protect the natural water course network, including Tiddle Brook, or how it would safeguard nearby local wildlife restoration and conservation projects from the dangers of adverse impacts resulting from proposed growth and development. The aspirations of the Spatial Vision and the criteria of the Shropshire Test would not be achieved without a commitment to, and investment in a sustainable long term stewardship scheme of management which reflects good ecological practice and also garners and facilitates community engagement for the whole area, around and including any proposed development. Without this the quality of the local environmental assets, which exist at the moment would decline. (Ref. S3.1(i), The Shropshire Local Plan 2:18 and SP1 the Shropshire test 1d, Draft Local Plan, Spatial Vision 2:28) (Examples of stewardship of Garden Villages - The Bournville Village Trust and 'London Assembly - At Home with Nature, Encouraging bio-diversity in new housing developments', London.gov.uk)
A0675B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The current proposals for the land use at Tasley to create a garden village causes concern regarding the scale of development for significant housing growth and employment land. The main concerns are in relation to the increased traffic movements particularly at peak times heading to the West Midlands, Telford and Kidderminster, which involves the use of the bypass and potentially introduces more traffic onto the original route through the town. The bypass was developed to alleviate the congestion in the town and in low town. This location is potentially the wrong side of the River Severn crossings.
A0688B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The policy states the importance to "reduce the need of people to travel by car" The plan proposes development in Bridgnorth on green field land which is 30 minutes by car from anywhere and an hour by bus to the nearest railway station. Garden village development like this are completely dependent on the car and with no employment growth in Bridgnorth will see people commuting to Telford, Wolverhampton and Stourbridge. Plan shows no evidence for an extra 1000 homes in Shropshire to accommodate West Midlands overspill and no rigorous study of demand has been completed. School places in Bridgnorth are full so where wil children be educated. These residential development proposals are too big. they need to be built in Telford where there is easy motorway and train access not in Bridgnorth where the infrastructure is not suitable
A0689B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Don't know / no opinion	General comments from Worfield & Rudge Parish Council - There is unfulfilled development proposals for 550 houses at land at Tasley, which includes a relocation of the Livestock Market. This development is "live" awaiting commencement. The impact of this upon completion, will be considerable. It will be felt both within Bridgnorth Town and the surrounding parishes and is likely to see an impact on services and local infrastructure. This then has to question the need for any additional housing in Bridgnorth until the impact of this development at Tasley has been undertaken and assessed. Worfield & Rudge PC would argue that there is no demonstrable need either in terms of housing, or in meeting government set targets in the context of the current Local Plan Review Process for the allocation of additional sites in Tasley or at Stanmore Industrial Estate. Parish Council outlines existing problems with Bridgnorth roads - A454, A458, A442 and pinch points throughout Bridgnorth town; new development would only increase use and congestion on these roads; Infrastructure to accommodate new development, including medical provision should be clearly defined and non-negotiable, both in terms of the accommodation needed and the ability to recruit, staff and fund these facilities. Air pollution - Bridgnorth Town has already been identified as having existing dangerously high levels of traffic pollution Any addition to the traffic will serve to produce pollution hot spots as yet not identified within the area. This must be a matter of concern from the aspect of our future green credentials and more importantly for the health of the current population. Adequate workplace and commercial opportunities - any new development needs to be accompanied by nearby work opportunities otherwise commuting will increase and access to teh Midlands Motorwat system is not good from the area. Over development may also impact on tourism which is a major economic driver for Bridgnorth. Parish Council questions the need for expansion of Stanmore Industrial estate and the evidence submitted in the report, as this is contrary to visual evidence of empty units on the site. This requires further investigation especially in light of the impact of the Covid pandemic on work places. Sufficient evidence to change the policy on Green belt developmnt has not been brought forward in the plan and is a concern for the Parish Council; Concern that teh development of a graden village in Tasley would impact on the Cattle Market in Bridgnorth which is a concern. Should the site close - as others in Shropshire have done - there would be a loss of jobs and further distances traveled by cattle which is an animal welfare concern.
A0699B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Significant concerns regarding the proposed development of BRD030 including justification of the need for housing and employment land on the scale proposed, the resultant increase in traffic and air pollution, effects on ecology & landscape and whether this consultation will be representative under Covid 19 conditions. However as other submissions address these issues focus on the potential loss of good quality agricultural land. BRD030 has not been subject to a detailed Agricultural Land Classification (ALC) survey, so no definitive information is available on presence of "Best and Most Versatile Agricultural Land" (BMV) (grades 1,2 and 3a), as required for planning decisions. Natural England Regional ALC maps are the only published information and this is only indicative (1:250,000 scale) and does not distinguish between grades 3a and 3b, this shows the site to be grade 3. However, Natural England have also produced regional maps showing probability of BMV, which indicate the site has >60% probability of BMV. A detailed ALC survey should be undertaken before any decision is made on this land. ALC grading is determined by a range of both site and soil characteristics. Some information on soils can be inferred from the published soil map of "The Midland and Western England" (Soil Survey of England and Wales). This shows the majority of the site is mapped as the Clifton Association, which comprises soils capable of producing good yields of common agricultural crops (Soil Survey of England & Wales "Soils and their Use in Midland and Western England" 1984). This soil association is also mapped on land immediately to the west of the proposed site, where a detailed Post 1988 ALC map is available, showing these Clifton Association soils to be ALC grade 3a. Given the similar soils and similar climatic and topographical features of the land and BRD030, this further increase the probability that a significant proportion of the site is Grade 3a BMV. This should be given due consideration in planning decisions. Grade 3a land is 'Good Quality Agricultural Land' which should be retained for agricultural use wherever possible. The Covid 19 crisis had highlighted the need for food security, but the UK has been declining in self-sufficiency in food (only 64% self sufficient in 2019, compared to 78% in 1984) and the NFU recently reported that the UK currently only produces 58% of the vegetables we consume and 16% of our fruit. The Climate Crisis requires action on reduction of carbon emissions and growing more food locally is necessary to address this. At a time when local food production in the UK is even more important, why should BMV agricultural land be taken for residential and employment facilities? Draft Policy DP19 states development should avoid BMV wherever possible. Para 170 of the NPPF states policies and decisions should contribute to and enhance the natural and local environment by protecting and enhancing soils and recognising the economic and other benefits of BMV agricultural land.
A0843B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	development of this site has over the years been fiercely resisted. .land is in the Green Belt and forms part of the only Green Space between the historical hamlet of Turley Green and Alveley on the western side of the A442. It has been used for village events and functions, which has brought in tourism and income to the Rural economy. Development of this site would have a major visual impact on the outskirts of the village and totally urbanise the existing Rural approach. The proposed development has been put forward "and accepted" as a community asset, allowing housing development to provide the capital for a new sports & social club with new sporting facilities. Much of the proposal was based on the local Recreation ground being oversubscribed as Alveley Cricket Club reserved most of the bookings. but the cricket club has now moved to new ground and pavillion on the outskirts of the village so there are now more than adequate sporting facilities that can be held within the Recreation'
A0849B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	with regard to sites ALV006 and ALV007 the sites are available and deliverable within the first 10 years of the plan period to accommodate a replacement club together with the community facilities and outdoor playing areas, and for at least 35 dwellings. The relevant planning applications will be made as soon as possible after Adoption, as we must await the removal of the Green Belt designation via Adoption.
A0864B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of Policy SP11, and is also in conflict with Policy DP25 of the Draft Local Plan and the National Planning Policy Framework.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0984B22	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Para 137 of the NPPF states that Green Belt boundaries should only be altered when all other reasonable options for meeting its identified need for development have been explored and there are no other reasonable alternatives.</p> <p>The draft Local Plan recognises BRD030 (a non Green Belt sites) as a sustainable location for the delivery of housing and employment. The site also includes land proposed for housing and employment development and additional land capable of accommodating future growth well beyond the plan period. As such, there is no need to allocate Green Belt land either within this plan period or safeguard Green Belt land for development post plan period to deliver Bridgnorth's housing or employment needs.</p> <p>The Green Belt Exceptional Circumstances Statement seeks to provide justification for release of these sites. This is informed by evidence regarding current demand, capacity and occupancy rates at the existing Stanmore Industrial Estate which has not been published as part of the evidence base, this should be published to allow scrutiny.</p> <p>There is also a great focus on Stanmore being a centre of excellence and having a focus on advanced manufacturing and engineering, noting the presence of the Marches Centre for Manufacturing and Technology CIC (MCMTC), however no evidence base documents evidence how, or whether, the estate acts as such a centre of excellence or provides a concentration of such uses.</p> <p>The consideration of current occupiers and the current function of the industrial estate is critical given that this forms a significant part of the exceptional circumstances case and also provides much of the justification for dismissing all other reasonable options. For example, if there are a large number of non-manufacturing or engineering companies within Stanmore, these could be relocated over time to proposed and existing allocations elsewhere in Bridgnorth, thereby freeing up floorspace or sites to accommodate the specialist manufacturing uses proposed.</p> <p>If allocated, these sites will need to be tightly constrained to ensure they deliver engineering and advanced manufacturing employment development only, noting that it is the site's ability to act as a focus for such uses which appears to be the basis of the exceptional circumstances to justify Green Belt release on the site. Current guidelines allow for any B1, B2, B8 and sui generis uses, which would fail to deliver the forms of employment envisaged in the exceptional circumstances statement and would further increase competition for employment uses between the three main planned employment allocations.</p>
A0984B28	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Support the proposed housing guidelines (part 1 of the draft policy) for Bridgnorth which will help address affordability issues and support economic growth in the town, which acts as a key service centre for a large rural hinterland.</p> <p>Support identification of a level of employment floorspace that is appropriate to deliver economic growth, addresses an existing structural imbalance between housing and employment and provides for additional growth by existing businesses and employers in the town. However, concerned about the significant level of employment land proposed (part 1 of the draft policy), which amounts to around 23.5ha more than the previous proposed requirement within the Preferred Sites Consultation. It is unclear how this has been calculated, which sites are included and what evidence is available to justify it. Concerned about the level of employment development proposed and the impact that a potential oversupply could have on the delivery of employment sites in the town, particularly the concentrations of new employment sites around Tasley Garden Village which includes the SAMDev employment allocations.</p> <p>Part 3 of the draft policy relates to the identification of a mixed use sustainable urban extension (BRD030) for a comprehensive development to contribute towards the housing and employment guidelines whilst also delivering new community facilities within a new local centre and significant areas of open space. This is supported as an appropriate strategy for the settlement of Bridgnorth, given that the level of development that needs to be delivered and the need for this to be delivered through a strategic, co-ordinated and joined up approach to ensure that the level of proposed development is supported by, and able to deliver, services and facilities, infrastructure, open space, etc.</p> <p>Parts 4 and 5 of the draft policy confirm that new residential and employment development will also be delivered through the saved SAMDev residential allocations. Support the retention of the existing SAMDev allocations and their identification in Appendix 2, despite delays to their delivery, as this is a sustainable location for growth.</p> <p>Support part 7 of the draft policy regarding retail facilities in new development complementing and not negatively impacting on the viability of the town centre.</p> <p>Part 8 of the draft policy relates to development beyond the proposed plan period. Encourage and endorse the approach taken and the proposed future location for development. This allows for a comprehensive masterplan of the proposed allocation and land for development beyond the plan period to be undertaken and provides flexibility during the plan period should there be any amendments to housing or employment land requirements in the town.</p>
A0984B29	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Fully support allocation of BRD030 within the Local Plan Review.</p> <p>An updated Vision Document (Appendix 1) and masterplan (Appendix 2) prepared in support of this site. These demonstrate that proposals are for the development to be designed to comply and uphold the principles of a garden village which is identified within the Garden Communities Prospectus and the TCPA Garden City Standards.</p> <p>Support preparation of an SPD to help guide development on the site. However, there is some concern about the requirement for the SPD to be adopted before any planning application for the development of this site, as this would take time to prepare and therefore delay the site coming forward to deliver much needed new housing and employment. As such, recommend development guidelines are amended to allow early delivery of some initial phases of development. Whilst this may necessitate submission and determination of a future planning application during the preparation of the SPD, this could still be done whilst achieving the vision for the site. Given the nature of the site, its relationship to the existing town and proposed access arrangements from Ludlow Road, early phases of residential development/plots could be brought forward towards the north-eastern corner of the site which would still be well connected to, and easily accessible from, facilities within Bridgnorth. Furthermore it is unclear whether this relates to the submission or determination of an application.</p> <p>Fully support the delivery of housing to meet the identified local housing needs on BRD030, whilst upholding the Local Plan policies. It is envisaged further information on this will be obtained through the SPD.</p> <p>BRD030 can provide a range of densities to allow for different types of dwelling sizes and tenures, which will in turn accommodate a variety of households including first time buyers, older people, family housing and housing for key workers/local employees. This will provide a hierarchy of dwellings from larger detached properties through to smaller terraced forms, allowing for a variety in the proposed streetscape, as seen across Bridgnorth.</p> <p>The draft policy requires at least 10% of the energy needed to be generated from renewable sources, whilst supportive of provision of renewable energy, consider the level of renewable energy achievable is dealt with through the future SPD to ensure that it takes into account the future vision, design and masterplan for the site.</p> <p>Agree that employment development is an intrinsic part of BRD030. Additional employment land is needed to address the current balance between housing and employment and attract new businesses and industries into Bridgnorth, which will assist in securing economic growth.</p> <p>Agree that employment land on BRD030 should be in a gateway location, the site is located south of the A458 a main arterial route into Bridgnorth. The masterplan shows the employment located adjacent to/visible from the A458 and the existing SAMDev employment allocation and could create a business hub.</p> <p>Generally support employment uses being targeted towards office and R&D, however there it is important that the type of employment delivered on the site is not so constrained that it prevents the site from serving future and existing business needs, including the ability to adapt to changes in business requirements. Therefore greater flexibility should be provided.</p> <p>Support the need to deliver a village/local centre as part of the wider development in order to deliver localised retail and community uses. Guidelines state provision of the centre will be linked to the first phase of residential development, however it is envisaged this will be considered in more detail, including the proposed location of the centre, through the preparation of the SPD. It will be important that the centre is appropriately located so it is easily accessible and is also delivered at an appropriate time in the phasing to ensure the viable use and occupation of the centre and its units.</p> <p>Guidelines include a requirement to provide 2ha of land for a primary school, it is important that the location of the primary school is carefully considered through the SPD to ensure it is well related and easily accessible from new and existing dwellings.</p> <p>Support the provision of a medical centre if required by the CCG, welcome the recognition that this may not be required and it is for the CCG to decide if a facility of this nature is required on site, based on their knowledge of the provision and facilities within the local area.</p> <p>Agree that the design of BRD030 should respond to identified landscape and visual effects and include appropriate mitigation. A Landscape and Visual Impact Assessment (LVIA) (Appendix 3) has been prepared, including an illustrative landscape masterplan (with significant areas of GI and open space, designed to reflect opportunities in the Shropshire GI Strategy and consistent with the draft site guidelines - hectares of green infrastructure and 19 hectares of Country Park). This can be built on through the SPD. It is important that GI opportunities in the Shropshire GI strategy are reflected on adjacent SAMDev allocations.</p> <p>Support retention of existing vegetation, where possible. This has been incorporated into the design and masterplan.</p> <p>Support retain and respect of the two listed buildings within/in close proximity of the site. Whilst informed further by the future SPD, the current masterplan demonstrates how the Garden Village could account for these assets - land adjacent to the listed building will be used for open space and recreation.</p> <p>Agree that noise arising from the A458 can be appropriately managed through use of GI and strong tree planting. Masterplan highlights the ability to deliver significant landscape buffers along the A458 and around the employment development.</p> <p>Management of noise, dust or odour arising from the SAMDev allocations (ELR011/a and ELR011/b; given that part will be used for the relocation of the livestock market) and mineral activities in the surrounding area are appropriate requirements for the future development of this site.</p> <p>The policy seeks to ensure that Tasley Garden Village is appropriately designed to accommodate pedestrians, cyclists, and motorists. Promoting sustainable transport is a key priority and the site has been designed with the movement of pedestrians and cyclists as a priority, ahead of vehicles and includes a number of shared spaces and quiet streets to constrain vehicular speeds and to provide a safe environment for pedestrians and cyclists.</p> <p>The policy also seeks to ensure access to BRD030 complements the proposed roundabout access to the existing SAMDev allocation. Keen to ensure BRD030 and the existing SAMDev Plan allocation are complementary and the highest quality development is brought forward. Ask the Council to work with both applicants/developers to ensure the best scheme is brought forward and infrastructure requirements for both sites can be fully delivered without comprising the delivery of the other site.</p> <p>Consider there is significant potential within BRD030 to provide a range of improvements transport connectivity. There is the potential to form new bus stops close to and within the site and bus operators have already expressed interest in serving BRD030 through either a bespoke new bus service or a diversion/extension of an existing bus service. Also exploring the opportunity to deliver a park and ride facility on the site, however welcome the wording of the policy in this regard as there would be a need to identify a suitable operator, it is assumed the existing facility would need to be relocated and some indication from local residents this service is needed.</p> <p>The draft policy requires significant and effective pedestrian and cycle links over the A458 to encourage the movement of pedestrians and cyclists from BRD030 to the wider town, which is wholly agreed with and supported. The draft policy states this could include, but is not limited to, a raised pedestrian and cyclist footbridge. It therefore acknowledges that there are other solutions which may be more appropriate and therefore these would also be accepted. Welcome this flexibility and are currently working with the Council's highways team and the planning policy officers to establish the most suitable, appropriate and safe method of crossing the A458.</p> <p>The draft policy seeks to ensure nearby SSSI's are appropriately safeguarded. It is envisaged could be achieved through appropriate construction management.</p> <p>The draft policy requires multi-stage SUDS informed by a sustainable drainage system. BRD030 will deliver comprehensive SUDS, designed at application stage.</p> <p>The masterplan demonstrates how the site could be developed to avoid areas of potential flood risk through the creation of a new Country Park along the Tiddle Brook boundary.</p> <p>Commentary provided on various evidence base documents including the Bridgnorth Development Options Assessment. This covers flood risk, Green Belt, landscape and visual sensitivity, ecology, heritage, highways (vehicles and pedestrians/cyclists), public protection and other strategic considerations. Conclusion is support for the de-allocation of Stanmore Garden Village and support and agreement with the Council's conclusion that BRD030 represents the most appropriate site for a mixed use allocation to meet the housing and employment needs of Bridgnorth. Also supports the identification of additional land west of BRD030 for the future growth needs of the settlement, beyond the plan period. Agree that this allocation would complement the existing SAMDev allocations which are located in close proximity to the site.</p>

A1101B16	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Shropshire Council has published a Green Belt Exceptional Circumstances Statement. This demonstrates exceptional circumstances exist for release of Proposed Sites P58a and STC002 at Stanmore Industrial Estate near Bridgnorth</p> <p>Site assessments for P58a and STC002 confirm they are suitable, available, achievable and viable subject to exceptional circumstances.</p> <p>All other reasonable alternatives to expansion at Stanmore and for expansion at Stanmore, are assessed and it is concluded their removal from Green Belt is justified by:</p> <ul style="list-style-type: none"> - Supporting the role of Stanmore Industrial Estate; - Supporting the medium and long term needs of existing businesses; - Attracting new businesses, particularly those in the 'engineering and advanced manufacturing' sector; - Supporting the strategic role of Bridgnorth; - Supporting the aspirations of the Economic Growth Strategy for Shropshire; and - Provision of market and affordable housing in a sustainable location. <p>The statement does not consider impacts on access to facilities for employees at Stanmore Business Park. A Local Centre (with convenience store) in Stanmore Garden Village (within walking/cycling distance) and greater frequency of bus services through the Business Park as a result of the new community will help reduce travel by private vehicle would enhance Stanmore Business Parks sustainability.</p> <p>Existing businesses see high in-commuting due to lack of affordable housing. Conversely out-commuting by higher paid workers living in Bridgnorth is also high. The Local Plan commits to reversing this. Based on the principle of connecting housing and employment, locating houses close to Stanmore Business Park (and town) should assist in increasing availability of employees to Bridgnorth companies and would reduce the number of in-commuters (linking eligibility for affordable housing to key workers has also been offered at Stanmore Garden Village).</p> <p><u>As a result, the Council's exceptional circumstances are narrow and miss wider opportunities to deliver a sustainable inclusive new community. These exceptional circumstances can apply equally to the new garden village</u></p>
A1152B41	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>During Preferred Scale and Distribution of Development stage of consultation, the proposed housing and employment guidelines were 1,500 dwellings and 16ha of employment land (based on Shropshire Council's balanced growth calculation and rounded up).</p> <p>During Preferred Sites consultation the housing guideline remained the same, but the employment guideline was increased by 12ha to address 'local circumstances'.</p> <p>In the draft Local Plan, the housing guideline as increased by 20% to 1,800 dwellings, but the employment guideline has been increased by 21ha to 49ha, an increase of over 300% compared to the original figure.</p> <p>Neither the draft Local Plan nor the Bridgnorth section of the Green Belt Release Exceptional Circumstances Statement cogently justify this massive proposed increase in the employment land or for the departure from balance with the housing guideline.</p> <p>The draft Local Plan includes a proposed allocation of 1,050 houses on BRD030, rather than the previously proposed allocation of 850 houses on the Stanmore site. It is not consistent to continue to propose an employment land allocation at Stanmore, the more so because it is Green Belt.</p> <p>Have reservations about the site promoters consultation on proposals for BRD030 as:</p> <ul style="list-style-type: none"> -The consultation process was deficient. -Public is asked to judge merits of the scheme without the benefit of information known to have been produced -Phasing details indicate that the road frontage would be dominated by industrial estates; essential facilities would not become available until more than a decade into the scheme or, in the case of much of the country park, after 2038; and that locals would have a large building site near them for most of the next 30 years. -There is some doubt as to whether the land has been assembled with sufficient certainty as to make the whole scheme as put forward viable. -There is no proven need for the scale of the proposals, either for housing numbers or for employment land. -Economic benefits claimed should be treated as marketing hype rather than evidence in favour of the proposals -Pursuit of profit should not be the motivating force for any development around Bridgnorth there would be a greater benefit to Shropshire were Shropshire Council's Cornovii Developments Ltd to carry out any housing development proven to be needed. -Not enough account has been taken of the climate emergency. -Not enough account has been taken of the biodiversity gains that should be built into this scheme in view of the provisions within the current Environment Bill. -A different world might emerge after the Covid-19 emergency passes -Transport considerations of the scheme need to be rethought -There should be some indication of amount and timing of Community Infrastructure Levy (CIL) payments. -Use of the epithet "Garden Village" appears misleading; the present scheme remains a long way from the original concept of a walkable community, in fact it still remains dominated by the motor car -The scheme would use good agricultural land (likely to include Grade 2 and Grade 3a); there is an increasing realisation that good agricultural land is a national resource and that, as far as possible, it should not be used for development; food security post-Brexit is also of importance. <p>Some advantages of BRD030 are:</p> <ul style="list-style-type: none"> -The site appears to be better connected to Bridgnorth than the Stanmore scheme -BRD030 is not within the Green Belt and its clear availability as an alternative site to the Stanmore proposals means there are not the exceptional circumstances under NPPF para 136 for the release of Green Belt land around Stanmore. <p>Proposals are only promises with no certainty. BRD030 has advantages over proposals at Stanmore, but needs considerable modification, not least in its scale, in order to become an acceptable proposal; a significantly smaller scheme is likely to be more acceptable. As a mark of the landowners' combined commitment the application for Intensive Poultry Units should be withdrawn.</p> <p>These comments remain valid, particularly that there is no proven need for the scale of the proposals, either for housing numbers or for employment land, and not enough account has been taken of the climate emergency.</p>
A1177B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Morville Parish Council - Whilst accepting the need for more housing in Shropshire, the scale of development proposed in the plan is questioned, and in light of covid 19 and brexit its felt a more cautious approach with a lower housing figure should be adopted. With regard for proposals in Bridgnorth the Parish Council Council has reason to doubt the claims related to job creation stated in the Taylor Wimpey proposal at Tasley. Proposals for 'Garden Villages' have employment potential as a vital component – in the current economic crisis it seems unlikely that such ideals would be met. The Parish Council have concerns about the proposals for Tasley as they came in late and its not been possible to discuss them with the community due to Covid restrictions. Morville Parish Council are in agreement with Tasley Parish Councils response to the proposed garden village at Tasley which was made in June 2020. We also have concerns the development could impact on the future of Bridgnorth Livestock Market which would be in close proximity to housing development. The loss of this facility would be very hard for Bridgnorth. The scale of the Taylor Wimpey site is inappropriate for this rural community, and any expansion of the site should only be considered after the existing 500 homes allocated have been completed and their impact assessed. A detailed need assessment of housing in Bridgnorth should also be carried out. •The town of Bridgnorth would face a possible 35% increase in population with the Tasley development. It is misleading to propose the plans are a Garden Village. It is a large suburban development on the outskirts of a market town.</p>
A1184B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>As a neighbouring farmer - who farms our own land, I believe that now more than ever we need to become more self sufficient as a Nation, and be able to produce vital food, locally for us all to live on. I feel very strongly that agricultural land should be used for agriculture and not housing. I do not believe that the housing development on the proposed scale is necessary for Bridgnorth. I believe that future developments should be kept within the town. There are other locations around the town where development has already been given approval: Tasley livestock market area, Westgate/ former council office. Rushmere/former Davro site. These sites and many more brownfield sites within the town area should be made prime development areas and utilised without the need to lose the proposed/any valuable agricultural land forever. I truly elieve the proposed development would put intolerable strain on our local infrastructure and ecology. There fore destroying the heart of Bridgnorth - our unique historic market town.</p>
A1185B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>I am writing to register my objection to the proposed Tasley Garden Village Development. As neighbouring farmers - who farm our own land. I believe that now more than ever we need to become more self sufficient as a Nation, and be able to produce vital food locally for all to live on. The proposed site is on valuable prime agricultural land and the development would mean it being lost forever, please we really do have to preserve it for farming and our communities. I can not understand why brown field sites are not being proposed in place of agricultural land. There are already several industrial sites in the Bridgnorth area, all of which have vacant units. As a result of Covid 19 we are being warned of a major recession which seems to have already impacted hugely on our economy. I feel sad but sure that there will be many more vacant units and businesses premises available in the coming weeks/months, therefore removing the need for further industrial development. Maintaining our ability to produce food is the most vital and necessary way forward. It is also vital to protect our countryside so that residents can benefit from the natural outdoors. I do not believe that Bridgnorth needs further housing on the proposed scale. Perhaps we should be building apartments in the town to provide homes for people of all ages rather than more and more retired people. These retirement developments seem to have reached saturation point in the town with so many for sale. The proposed Tasley Garden Village development would put a huge strain on our local infrastructure and ecology. I strongly believe that Tasley Garden Village Development should be rejected and not included in the local plan review.</p>
A1195B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.</p>
A1195B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Sites STC002 and P58a should not be allocated for employment as:</p> <p>The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community.</p> <p>The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town.</p> <p>The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley.</p> <p>There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore.</p> <p>The sites are situated in Green Belt and no very special or exceptional circumstances have been identified.</p> <p>The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9.</p> <p>Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development.</p> <p>Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore.</p> <p>Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation.</p> <p>Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>
A1196B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>I am against the Taylor Wimpey proposed Garden Village for the following reasons</p> <ol style="list-style-type: none"> A re-sited cattle market would be situated against new housing. Serious doubts about whether Taylor Wimpey have access to land to build the suggested footbridge over the main road, or that it would ever be built. Access to the probable first part of the proposed Tasley Garden Village site to be built is not known; possibly would have to be from the Ludlow Road just above the Punch Bowl. Most of the residents on this site would probably need to travel down the bypass or otherwise cross the river through the centre of Low Town to reach their place of work on the eastern side of Bridgnorth, Stanmore Industrial Estate, or commute to other towns such as Telford, Wolverhampton, Dudley, Stourbridge or Kidderminster. <p>Many people in Bridgnorth commute to work to locations east of Bridgnorth, and relatively few commute to the west.</p>
A1196B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<ol style="list-style-type: none"> Residents much more likely to work locally at Stanmore Industrial Estate or at businesses on the eastern fringe of Bridgnorth Town, or commute to work in neighbouring towns, without the need to travel through Low Town. This would significantly ease the traffic situation through Low Town when compared with the alternative that would occur if the proposed Tasley development went ahead. The proposed Stanmore Garden Village is smaller than the proposed Tasley site, and house sales could be more easily moderated to meet demand. The proposed Stanmore Garden Village could be a more innovated, interesting, and exciting architectural development, and much superior than normal housing estates. Of course, it might not happen. In their latest ideas on the current LPR, SC intend to put forward proposals to expand parts of Stanmore Industrial Estate that would change to the Green Belt.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1274B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such. The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan. The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity. The proposal is contrary to National Planning Policy.
A1274B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2.
A1274B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.
A1277B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have ben for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.
A1278B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such. The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan. The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity. The proposal is contrary to National Planning Policy.
A1278B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2.
A1278B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.

A1285B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Sites STC002 and P58a should not be allocated for employment as:</p> <p>The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community.</p> <p>The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town.</p> <p>The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley.</p> <p>There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore.</p> <p>The sites are situated in Green Belt and no very special or exceptional circumstances have been identified.</p> <p>The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9.</p> <p>Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development.</p> <p>Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have ben for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore.</p> <p>Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation.</p> <p>Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>
A1286B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported.</p> <p>However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.</p>
A1286B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Sites STC002 and P58a should not be allocated for employment as:</p> <p>The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>
A1297B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported.</p> <p>However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.</p>
A1297B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Sites STC002 and P58a should not be allocated for employment as:</p> <p>The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community.</p> <p>The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town.</p> <p>The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley.</p> <p>There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore.</p> <p>The sites are situated in Green Belt and no very special or exceptional circumstances have been identified.</p> <p>The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9.</p> <p>Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development.</p> <p>Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have ben for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore.</p> <p>Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation.</p> <p>Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1421B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of Policy SP11, and is also in conflict with Policy DP25 of the Draft Local Plan and the National Planning Policy Framework.
A1421B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The two sites proposed to be allocated for employment should be deleted because 49ha is excessive and not fully evidenced and justified. There would be sufficient land for employment purposes to serve the existing and proposed residential expansion of Bridgnorth without the necessity to develop at Stanmore. No exceptional circumstances demonstrated. There would be a dependency on private vehicles. Stanmore is far from the residential allocation. Employment is included at Tasley. Stanmore is contrary to SP9. As there are vacant plots in Bridgnorth, it means that there is no need or demand for allocations like Stanmore. Employment was included in SAMDev and none built – if it was needed it would have been built by now.
A1422B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). A1429B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.
A1429B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.

As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.</p>
A1432B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Sites STC002 and P58a should not be allocated for employment as:</p> <p>The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community.</p> <p>The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town.</p> <p>The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley.</p> <p>There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore.</p> <p>The sites are situated in Green Belt and no very special or exceptional circumstances have been identified.</p> <p>The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9.</p> <p>Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development.</p> <p>Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have ben for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore.</p> <p>Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation.</p> <p>Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>
A1433B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported.</p> <p>However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.</p>

The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>
A1502B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported.</p> <p>However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.</p>
A1502B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Sites STC002 and P58a should not be allocated for employment as:</p> <p>The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community.</p> <p>The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town.</p> <p>The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley.</p> <p>There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore.</p> <p>The sites are situated in Green Belt and no very special or exceptional circumstances have been identified.</p> <p>The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9.</p> <p>Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development.</p> <p>Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have ben for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore.</p> <p>Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation.</p> <p>Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>

A1618B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>DUTY TO COOPERATE</p> <p>I consider that the case for allocating an additional 1,500 homes to meet the Black Country's projected shortfall is not sound. In particular, the referenced report notes that:</p> <p>Shropshire is not adjacent to any of the Black Country authorities.</p> <p>Progress on the Black Country plan has stalled due to Covid-19.</p> <p>The Black Country Authorities, Urban Capacity study indicates a shortfall of just under 27,000 homes, but the worst shortage is in Sandwell borough making up over half the total. The Bridgnorth area is not an obvious place to make up for that shortfall ... Other Black Country Authorities would be better positioned.</p> <p>Telford & Wrekin rejected ABCA's request in 2019 - they said there was not any evidence to support them contributing to the unmet Black Country Housing Need. One must assume that the same condition must apply to Bridgnorth and the adjoining parishes. (See Section 5.1, "Regulation 18 Consultation Update Report", Bridgnorth Plan Steering Group, September 2020 for more details)</p>
A1618B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>SCALE OF DEVELOPMENT AROUND BRIDGNORTH</p> <p>I recommended that 800 to 1,000 new dwellings be planned for in the revised Local Plan for the period from 2019 to 2036. Over 90% of the 155 respondents in the recent survey expressed a desire for housing growth to be below the upper of these figures. For the period from 2019 to 2038, we now recommend that 900 to 1,100 should be recommended for, which is an additional 50 dwellings per year for each of the extra two years (see reference below). I express concern that the levels of employment growth being considered (the draft Local Plan) will be difficult to achieve, and the recent pandemic will further add to the problem of jobs. I am still concerned that there is no robust plan for job creation in the Bridgnorth area I recommended that additional housing development be linked, in some way, to the provision of new jobs. Housing should not progress too far ahead of available jobs. We recommended that job creation and housing growth should be reviewed every 3 - 5 years and that additional housing may be allowed for (in subsequent reviews of the Local Plan) if the creation of new jobs justifies new housing.</p> <p>Provided data indicating that the amount of employment land already allocated under SAMDev was sufficient, or almost sufficient, to meet needs through to 2036. We acknowledge that some additional land will probably be needed for the period to 2038 (see reference below). I recommended that emphasis should be given to providing modern office premises. This has not been addressed in the draft Local Plan or Local Economic Growth Strategy for Bridgnorth and adjoining parishes.</p> <p>In the BPSG Consultation Update Report a table was provided showing that the draft Local Plan proposes that Bridgnorth and Whitchurch have been allocated a significantly higher growth rate than all other market towns, yet no justification for this has been given in the draft Local Plan or supporting documents. Given the acknowledged topological and Green Belt issues facing Bridgnorth, we consider that its growth rate over the period should be no higher, or lower than other market towns, such as Oswestry and Ludlow, which are on the strategic transport corridors and have mainline railway stations.</p> <p>(See Section 4.2, "Regulation 18 Consultation Update Report", Bridgnorth Plan Steering Group, September 2020) Report "Bridgnorth Plan: Phase 1 Report", Bridgnorth Plan Steering Group, June 2020: INFRASTRUCTURE TO SUPPORT DEVELOPMENT</p> <p>I recommended that "any growth in employment and housing should only proceed once commitment and funding for the necessary improvements to the local infrastructure, road network, transport links, public facilities and services has been confirmed." Infrastructure Provision "New development should only take place where there is sufficient existing infrastructure capacity available." "if there is a shortfall in infrastructure provision, the development will be required to fund necessary improvements ..., unless ... addressed by other means." Developer funding does not look to be sufficient. No other sources for Bridgnorth. Except "additional Section 106 contributions". Car this be confirmed that any developments will only commence after the infrastructure provision is in place?</p> <p>I commented that Bridgnorth and adjoining Parishes do not lie on a strategic transport corridor, and that there are no published plans for any improvements. We note that the draft Local Plan places emphasis on 'Strategic Corridors'. DP29 (para 4.621, page 138) lists proposed enhancements to the Strategic and Local Highway Networks. It does not include any improvements around Bridgnorth. This would imply that there are no plans to improve connections between Bridgnorth and the A5/M54 strategic corridor, or to Wolverhampton, Stourbridge, or Kidderminster. https://shropshire.gov.uk/media/6087/economic-growth-strategy-for-shropshire-2017-2021.pdf I note that the Settlement Policy for the Bridgnorth Place Plan area states (S3.1, para 5.62, page 175) that "a strategic assessment of the highway network will be undertaken." We consider that the proposed high level of growth for the Bridgnorth area cannot be considered sound without such an assessment having been completed and plans put in place for the implementation of any recommendations.</p> <p>The draft Local Plan and its supporting documentation does not provide any additional assessment of the infrastructure that would be required to support the proposed growth around Bridgnorth: and without this we do not consider that the proposed level of growth around Bridgnorth is sound or sustainable. I emphasise the need to provide continuously faster broadband within the town and adjoining parishes if we are to achieve the economic growth envisaged. I would welcome investment on footpaths and cycleways (DP29, point 3, page 136). However, there is already a commitment to this under earlier plans and there has been little, if any, investment on these to date. (See Section 4.4, "Regulation 18 Consultation Update Report", Bridgnorth Plan Steering Group, September 2020) In the report "Bridgnorth Plan: Phase 1 Report", Bridgnorth Plan Steering Group, June 2020: LOCATION OF DEVELOPMENT AROUND BRIDGNORTH</p> <p>•No specific recommendations were made as to where development should be located as, at the time, the only option being offered was around Stanmore. However, Tasley Garden Village has since been proposed. The Tasley Garden Village was introduced late into the LPR. There are advantages and disadvantages of both locations, however I feel consideration should be given to other areas, with any developments spread across smaller multiple locations.</p> <p>•The survey recently carried out; asked where development should be located. 25% of respondents said there should be none. 42% of those giving an opinion on the location preferred it to be distributed (that is, not all in one location). In addition, people voted specifically for development in Stanmore, Tasley, Oldbury and Astley Abbots in the ratio 2:2:1:1 (they could vote for more than one specific location).</p> <p>•Overall, voting for the survey supports distributed development, rather than all in one location (155 respondents) (See Section 4.3, "Regulation 18 Consultation Update Report", Bridgnorth Plan Steering Group, September 2020) In the report "Bridgnorth Plan: Phase 1 Report", Bridgnorth Plan Steering Group, June 2020:</p>
A1631B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>1) Lack of awareness as the proposals have been compiled at short notice and during the Covid pandemic 2) Over development of this part of Bridgnorth. We live in Tasley on Wenlock Road adjoining the Persimmon development which added around 315 houses in 2009. Land between Church Lane and Wenlock Road is already outlined for further residential development. The Taylor Wimpey proposals would add a further 1050 houses which would appear a ridiculously high number of houses additional to what is already proposed in addition to commercial/industrial development. We are aware there are government requirements for development but I cannot believe this level is necessary. I would suggest that the development plans should be re-considered following Brexit and the Covid pandemic. 3) Impact on ecology/landscape. We appreciate the area is not designated green belt but the land nevertheless provides a green boundary to Bridgnorth outside the by-pass. There would likely be negative impacts on the nearby Mor Brook Lakes part of the restoration of the sand and gravel workings which we understand are now being managed in conjunction with Shropshire Wildlife Trust for their conservation value. 4) Loss of high quality agricultural land. 5) Claims to provide a 'garden village' and 'country park' are just developers spin. The developers plan shows well over three quarters of the area covered by hard development - residential, commercial, industrial. This is not a country park, it's a hard development. (We have witnessed developers promises at the planning stage not being provided with the recent Persimmon development - bus service through the development never provided and a lack of replacement of dead trees during the aftercare period). Much of the green areas are occupied by ponds which I would expect would be required anyway for water balancing requirements for this size of development.</p>
A1633B1	regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>There is no evidence that there is a demand for the scale of expansion proposed other than speculative</p> <p>The roads around Bridgnorth do not allow large vehicle traffic easy and quick access to any industrial development and businesses other than small scale enterprises will prefer Telford with its Motorway links.</p> <p>Any housing development is only going to increase road usage with resulting pollution and congestion as more people commute from the county to the West Midlands unless there is a change to more local work practices.</p>
A1641B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of SP11, and is also in conflict with DP25 of the Draft Local Plan and the NPPF.</p>
A1641B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The two sites proposed to be allocated for employment development Stanmore should not be allocated for employment – 49ha is too high and there is employment proposed in Bridgnorth. It is in Green Belt. It would rely on private car use. There is no need for the allocation. It is far from the housing allocation. It is countryside. There is no demand for Stanmore to be used because the existing vacant plots in Bridgnorth are not being used. Existing SAMDev sites have not been taken up yet – why are more being allocated?</p>
A1652B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Industrial development in Bridgnorth has expanded substantially over the last few years – all adjacent to the Green Belt. No confidence in duty of care if the boundary of the Green Belt at Stanmore is moved, for employment, that 'Acoustic design, layout, green infrastructure and appropriate building materials will be used to appropriately manage noise arising from the site.' Ancient woodland and unspoilt countryside which is Green Belt are right next to both sites. Unclear on any exceptional circumstances.</p>
A1652B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt no exceptional circumstances have been advanced that would justify its removal.</p>
A1652B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>I support this as the preferred site, it is adjacent to existing settlements and avoids green belt. I would question the housing need, particularly in the light of Covid-19 and looming economic recession. Housing for housing sake should not go ahead particularly in an area of poor infrastructure and transportation links</p>
A1652B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Page 2 of the Policies map, shows development boundary for the aluminium factory/TG are to the South East corner. This borders Green Belt, and in the planning applications and approvals for the industrial development little to no credence has been given to it being adjacent to historic, open and unspoilt countryside, and ancient woodland which happens also to be greenbelt.</p>
A1653B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of SP11, and is also in conflict with DP25 of the Draft Local Plan and the NPPF.</p>

A1654B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of SP11, and is also in conflict with DP25 of the Draft Local Plan and the NPPF.
A1654B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The two sites proposed to be allocated for employment development Stanmore should not be allocated for employment – 49ha is too high and there is employment proposed in Bridgnorth. It is in Green Belt. It would rely on private car use. There is no need for the allocation. It is far from the housing allocation. It is countryside. There is no demand for Stanmore to be used because the existing vacant plots in Bridgnorth are not being used. Existing SAMDev sites have not been taken up yet – why are more being allocated?
A1655B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	This area should not lose its classification as Green Belt land. It is though that the owner is a current Shropshire Councillor, however no declarations of interest have been completed by the owner throughout his term in office. Should this de-classification go ahead, it would raise serious legal questions about propriety that would require investigation.
A1655B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The location and topography of the Stanmore site leaves only one real option for residents to access health care, children to access education and adults to access employment – single use car journeys to the centre of Bridgnorth. The current level of public transport facility is completely inadequate to support healthcare, education and employment access for the current population – before any additional houses are built. The topography of the location makes it utterly inappropriate from a safety point of view to either walk or cycle to the centre of Bridgnorth. The main access road from the Stanmore development into the centre of Bridgnorth is one of the 2 areas in Shropshire where AQ exceeds national and European levels of pollution. If Shropshire is serious about reducing carbon emissions and promoting low carbon transport options then more appropriate housing sites – such as Tasley must be scored more highly
A1823B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. A1861B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Having lived in Bridgnorth for over 16 years, it is already evident that the Air Quality (Climate Change Policy) has deteriorated by congestion and traffic is a constant problem – this has a serious impact on peoples health. Bridgnorth is a rural town with several A roads which have been in disrepair for years and further development of dwellings on the scale suggested in this document will, in my opinion, be detrimental to the Town as further strains are put on the infrastructure. We would anticipate hundreds of additional car journeys in the area daily, either driving into the town or commuting across the county further afield to work elsewhere. The mixed use development at Tasley will by no means support local employment to the extent of the hundreds of new dwellings being built – it will simply mean that people will commute on the already busy roads roads further afield to work in Bridgnorth and vice versa, to live in Bridgnorth and commute elsewhere in the West Midlands, accessing the A5, M54 and other main roads – it just does not stack up that people will work and live in the same town on this scale and will lead to further congestion and problems. The town will lose its community by expanding too big. This will be a further problem for Policing, Secondary Schools and Medical Practice – you can't build new ones and expect Police, Doctors and Teachers to just appear – there is already a shortage and the town is already struggling to cope with the current population.
A1862B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Consultation: The plan seeks to deliver additional housing to help meet the requirements of adjoining councils. There is no evidence that communities of Shropshire support this ambition. The site allocation as a Garden Village in Tasley was not included on the original consultation of the Preferred Sites Allocation in 2018. It is noted that Taylor Wimpey consulted in June 2020 but this was only online and during the Covid 19 pandemic and was highly unlikely to have reached as many people as should be consulted on such a major development like this. It is undemocratic to make these major decisions until we are past the Covid19 crisis. People have the right to be consulted and to have the chance to express their views and there has been no proper public consultation about this. Housing: In total, the Local Plan is recommending that 2,250 new houses be built in the Tasley area, representing an increase of 35% on the existing population. Whilst it is accepted that Bridgnorth and surrounding areas requires more dwellings to cater for future growth, the existing housing needs assessment does not justify this level of increase in this area. It is not clear how has Shropshire Council arrived at the larger figure. An updated, detailed Local Housing Needs Assessment is required in order to establish what the needs are and whether the Town can support an increase of 35% to its population. Employment Land: The Local Plan confirms that in total 29 ha of employment land has been allocated to the Tasley area south of the A458, all of which is outside the Bridgnorth Development Boundary. How was this need established by Shropshire Council? This requirement is not identified in the Shropshire Economic Strategy and nor the Town Centre Study. Of the 2 documents only the Town Centre Study was completed during the Covid 19 pandemic period and pays some acknowledgment to the current economic climate. Employment patterns and requirements will undoubtedly change in at least the short to medium term. It would make more sense to deliver the employment land as set out in the SAMDev Plan and delay any further decisions until a. the success and impact of the SAMDev Plan is known b. the required infrastructure improvements have taken place c. the impact of coronavirus is clearly understood. Communication and Transport: As acknowledged by Shropshire Council there are topographical and landscape restraints within Bridgnorth. There is no evidence that existing Bridgnorth infrastructure will be able to cope with the additional traffic requirements of what is essentially a large housing estate. There is a paucity of information about how other transport requirements whether by bus, foot or cycle will be met. Ecology: I concur with comments by Shropshire Wildlife Trust that 'the insistence on pursuing a level of housing in excess of housing need is not a sustainable approach and reflects the focus on economic growth'. The proposed TGV is local to 4 SSSI's and forms a buffer zone between the urban and the rural. How can Shropshire Council justify pursuing the TGV without a full understanding the environmental implications and having clearly agreed mitigation strategy? The decision to include Tasley Garden Village appears to have been made before the evidence has been put together. As the proposal stands at the moment it does not fulfil the TCPA agreed 3 principles of a Garden Village. How and will Shropshire Council hold all those involved to these?
A1869B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	I strongly oppose these plans on the basis that, whilst you make reference to providing 'employment land to create choice and competition in the market' in truth most of the 1800 planned new dwellings will be occupied by commuters who will choke up local roads with their vehicles, having an obvious detrimental effect on the environment. In my experience running a small company in the Bridgnorth area for over 20 years, I am aware that countless business premises in existing industrial estates in Bridgnorth and surrounding areas (e.g. Stanmore, Netherton Workshops in Highley) have been under-occupied for years, (despite offers such as business rates reductions). The fact is this area is too rural and distant from motorway or rail networks to be of interest to most non-agricultural businesses. This situation will surely be exacerbated by the uncertain post-Covid era that will see many businesses closing premises or downsizing, not moving to new premises in the Shropshire countryside.
A1875B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. A1884B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>I am writing in response to the proposed overly vast and inappropriate urban housing 'garden' development on the border of Bridgnorth upon valuable farmland. My family and I are extremely opposed to this development, reasons be as follows:</p> <p>1. The development is overly extensive covering a very large expanse of farmland, that affects the landscape enormously. This is not an inconspicuous development, one that cannot be undone and will be detrimental to the countryside that Bridgnorth is proud to own. This would cause unnecessary urban sprawl further into the countryside.</p> <p>2. Due to the expanse this will have an enormous affect of the local nature population as greenbelt land continues to be built upon. One huge reason why people visit Bridgnorth, to escape urban housing estates of nearby towns.</p> <p>3. Many other developments within Shropshire and surrounding counties exist or will do, that mean there is plenty of housing to meet any required needs. This development seems more like developer greed as oppose to a response to a demand. Farmers have been swayed by the cheque book of a large corporation, whom are pushing to see just how vast a development can be pushed through Shropshire Council. Housing on greenbelt land, once never built on, is a tragic growing problem. Other nearby developments in Telford (again huge), Shrewsbury, Wombourne, Shifnal as a few examples. Many of which are building on greenbelt land. It seems greenbelt / farmland is more of an attractive proposition to developers than brownfield sites, if councils continue to grant exceptions, precedent is set for every proposal thereafter. I would like to understand with so many new 'clone' estates popping up in other villages and towns, just what is the justification for yet another. In total, the Local Plan is recommending that 2,250 new dwellings be built in the Tasley area. This will increase the population of Bridgnorth by at least 4,500 people which represents an increase of 35%. On what basis has Shropshire Council arrived at the larger figure? Whilst it is accepted that Bridgnorth and surrounding areas require more dwellings to cater for the likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'? What are the needs of the town? A Local Housing Needs Assessment is required in order to establish what the needs are. Should this not be carried out before it is decided on the numbers of dwellings to be built? Can the Town support such an increase of 35% to its population?</p> <p>4. With Brexit and Covid the requirement to bring more food production back to UK soil is a reality. The UK needs to become more self-sufficient relying less on EU and foreign imports. Once farmland has been built upon there is no way back. This is a point I would seriously wish to highlight.</p> <p>5. The plans state the development expects to last 30 years. 30 years!!!!!! At a disruption cost to the existing residents of the area. There are plans to build industrial units, which will bring more transport to the area, in addition to that already seen at the quarry. There is already industrial space at Stanmore which could (and was going to be) developed further. I believe Stanmore have recently place a revised proposal to Shropshire Council, Why pursue Tasley when over town there is a plot that locals are asking for development on?</p> <p>6. What makes this proposal an exception for removing restrictions to build on this land?6. This I am writing in response to the proposed overly vast and inappropriate urban housing 'garden' development on the border of Bridgnorth upon valuable farmland. My family and I are extremely opposed to this development, reasons be as follows:</p> <p>1. The development is overly extensive covering a very large expanse of farmland, that affects the landscape enormously. This is not an inconspicuous development, one that cannot be undone and will be detrimental to the countryside that Bridgnorth is proud to own. This would cause unnecessary urban sprawl further into the countryside.</p> <p>2. Due to the expanse this will have an enormous affect of the local nature population as greenbelt land continues to be built upon. One huge reason why people visit Bridgnorth, to escape urban housing estates of nearby towns.</p> <p>3. Many other developments within Shropshire and surrounding counties exist or will do, that mean there is plenty of housing to meet any required needs. This development seems more like developer greed as oppose to a response to a demand. Farmers have been swayed by the cheque book of a large corporation, whom are pushing to see just how vast a development can be pushed through Shropshire Council. Housing on greenbelt land, once never built on, is a tragic growing problem. Other nearby developments in Telford (again huge), Shrewsbury, Wombourne, Shifnal as a few examples. Many of which are building on greenbelt land. It seems greenbelt / farmland is more of an attractive proposition to developers than brownfield sites, if councils continue to grant exceptions, precedent is set for every proposal thereafter. I would like to understand with so many new 'clone' estates popping up in other villages and towns, just what is the justification for yet another. In total, the Local Plan is recommending that 2,250 new dwellings be built in the Tasley area. This will increase the population of Bridgnorth by at least 4,500 people which represents an increase of 35%. On what basis has Shropshire Council arrived at the larger figure? Whilst it is accepted that Bridgnorth and surrounding areas require more dwellings to cater for the likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'? What are the needs of the town? A Local Housing Needs Assessment is required in order to establish what the needs are. Should this not be carried out before it is decided on the numbers of dwellings to be built? Can the Town support such an increase of 35% to its population?</p> <p>4. With Brexit and Covid the requirement to bring more food production back to UK soil is a reality. The UK needs to become more self-sufficient relying less on EU and foreign imports. Once farmland has been built upon there is no way back. This is a point I would seriously wish to highlight.</p> <p>5. The plans state the development expects to last 30 years. 30 years!!!!!! At a disruption cost to the existing residents of the area. There are plans to build industrial units, which will bring more transport to the area, in addition to that already seen at the quarry. There is already industrial space at Stanmore which could (and was going to be) developed further. I believe Stanmore have recently place a revised proposal to Shropshire Council, Why pursue Tasley when over town there is a plot that locals are asking for development on?</p> <p>6. What makes this proposal an exception for removing restrictions to build on this land?6. This project will bring additional traffic and transport to the area. When the bypass was closed for works and traffic had to flow through the town, the town was gridlocked. It highlighted just how populated the town is already. And if anything like that was to happen to the bypass again, just how it would affect the congestion of the town further.</p> <p>7. Calling the development a 'garden village' is purely marketing spin to make it sound more attractive and less shocking than what it actually is. This is in fact another vast glut of identical characterless blueprint houses, a plot of grass and a path and industrial units. Bridgnorth will in time lose all its character and any reason for tourists to visit. I urge you Shropshire Council to deeply consider this enormous unnecessary development. It is my understanding that it is under only exceptional circumstances farmland and greenbelt land can be built upon. I do not believe these tests have to be met and I would like to understand what justification has been laid out to make this proposal an exception.</p>
A1923B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	This is a housing estate not a garden village. I don't believe any of the attempts to preserve hedgrows for example will last very long. Once occupied owners will do what they want. Inhabitants live in Bridgnorth precisely because it is a market town.
A1923B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	New build houses which have been empty and for sale in Pound Street? Will any of these new estates have the schools and medical centres shown on the plan. All this will just make Bridgnorth a suburb of Wolverhampton or Telford
A1924B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such. The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan. The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity. The proposal is contrary to National Planning Policy.
A1924B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2.
A1924B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.
A1924B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Sites STC002 and P58a should not be allocated for employment as:</p> <p>The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community.</p> <p>The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town.</p> <p>The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley.</p> <p>There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore.</p> <p>The sites are situated in Green Belt and no very special or exceptional circumstances have been identified.</p> <p>The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9.</p> <p>Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development.</p> <p>Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have ben for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore.</p> <p>Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation.</p> <p>Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>
A1925B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such. A1925B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF). An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. If the land were subject to a Planning Application for employment uses it would be refused due to conflict with the Green Belt and lack of very special circumstances. The Local Plan Review should not be used to justify inappropriate development of the Green Belt. As there are no very special circumstances and employment development is considered inappropriate in the Green Belt, proposed allocations STC002 and P58a conflict with policy DP25.2.
A1925B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy SP11 (2.e) states development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. As such proposed allocations STC002 and P58a conflict with sub-section 2.e. of Policy SP11, in addition to Policy DP25 and the NPPF.

A1925B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Sites STC002 and P58a should not be allocated for employment as:</p> <p>The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community.</p> <p>The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town.</p> <p>The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley.</p> <p>There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore.</p> <p>The sites are situated in Green Belt and no very special or exceptional circumstances have been identified.</p> <p>The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9.</p> <p>Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development.</p> <p>Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have ben for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore.</p> <p>Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation.</p> <p>Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>
A1930B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>The land that is proposed for employment use at Stanmore currently lies within the Green Belt and should remain as such.</p> <p>The NPPF indicates Green Belt boundaries should only be revised where exceptional circumstances are fully evidenced and justified. No adequate justification have been put forward within the Pre-Submission Draft of the Shropshire Local Plan.</p> <p>The Green Belt Review does not qualify as "exceptional circumstances" and did not demonstrate or suggest that there was a necessity for change to the Green Belt boundaries at Stanmore. Other reasonable options for meeting the identified need for development exist, outside the Green Belt in the near vicinity.</p> <p>The proposal is contrary to National Planning Policy.</p>
A1930B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Policy DP25.2 indicates that the Green Belt will be protected against inappropriate development (consistent with the NPPF).</p> <p>An industrial estate represents inappropriate development in the Green Belt, as it would harm openness. A1932B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.
A2105B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Para 3 of SP6 and Para 3.42 of the explanation claim to provide clear guidelines regarding circumstances when development guidelines may be exceeded. However, the vagueness of these guidelines means a limitless amount of development may be approved based on a subjective test. For example, sub-para (d) states, "The increase of the number of dwellings relative to the guideline." Without any form of limit or tolerance, it makes this section of the policy worthless, meaning any number of dwellings could theoretically be approved provided it could be shown that 'due regard' had been given to the conditions. In order to provide residents with some form of peace of mind or confidence in the overall plan for a particular centre or hub, the guidance needs to be more robust and commit to the fact that the proposed guideline number of dwellings should be taken as an absolute maximum. This concern is amplified later in the same para with the statement, "The guideline is not intended to represent a ceiling on development."
A2105B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Development boundaries are an important mechanism for controlling development. However, para 4 of SP6 provides too much leeway in allowing development outside the boundaries. The clause that allows development outside the boundary where, "there are specific considerations set out in the Settlement Policies," is too wide ranging. The Settlement Policy (S17) for Wem Place Plan Area, specifically S17.2, allows the contents of any community-led plan to be used in support of this decision. Given such plans are not necessarily subject to the same level of scrutiny and consultation as the local plan, I would contest that they are suitable means for informing such important decisions. Also, within the same para, the test of 'community need' is not defined. How is this metric to be assessed and by whom?
A2119B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of Policy SP11, and is also in conflict with Policy DP25 of the Draft Local Plan and the National Planning Policy Framework.
A2119B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.
A2139B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	It is hard to believe that 1550 houses are needed in Bridgnorth and there is certainly insufficient infrastructure to support this many. Of the 1550 houses proposed two thirds of these are allocated to a large, national, profit-driven developer and this seems totally unreasonable. Therefore we are strongly opposed to this development.
A2141B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Against proposals for Bridgnorth. Scale of growth has not previously been consulted on and agreed by Bridgnorth residents. The targets are too high and will see sprawling development in the countryside that surrounds Bridgnorth and will ruin the town. Proposals make it hard to deliver sustainability targets and the Covid outbreak should have seen the plan paused and a rethink of the Councils strategy for development
A2142B02	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy DP19 sets out the Council's desire to reduce pollution and safeguard public amenity through development proposals Policy DP19.1 says that development must be appropriate to its location, and the site must be suitable for its proposed use. Policy DP19.2 and 3 express concern about air quality. Policy D19.4 confirms that development should avoid, if possible, the use of Grade 1, 2 and 3a agricultural land. Policy DP19.5 says that the use of previously developed land is encouraged. Policy DP19.7 indicates that development should not create unacceptable adverse effects through increase in noise levels. The proposed employment development at Stanmore (Sites S57 and S58) would conflict with most of the issues set out in Policy DP29 because the land proposed for employment allocation is, a) In "countryside" and in the Green Belt – this is not a suitable location for operators that are engaged largely with the motor and steel fabrication, b) Is divorced from Bridgnorth town and thus is likely to encourage the use of motor cars, which will increase pollution and have a detrimental effect on public amenity. b) The local environment is relatively calm, quiet and with good air quality which would be adversely impacted by the proposed employment development at Stanmore and, c) The land concerned is Grade 3 abutting Grade 2 agricultural land, and thus likely to be Grade 3a, d) The land proposed for allocation is not 'previously developed land' as defined in the NPPF. The proposed allocation of land for employment purposes at Stanmore is in conflict with Policy DP29, and should be deleted from the Plan
A2142B04	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Policy S3: Bridgnorth Place Plan Policy S3.1 sets out a number or more detailed issues relating to the development of Bridgnorth as a Principal Centre. Policy S3.1.1 says that Bridgnorth will grow by 1,800 dwellings and by 49 ha. of employment land. This element of the Policy is supported. However Policy S3.1.1 goes on to indicate that one of the areas where 11.4 ha of the employment land is to be located, is proposed for Stanmore. This element of the Policy is not supported by any assessment of need, and is objected to. Policy S3.1.2 says that Bridgnorth is bounded on its eastern side by the Green Belt, and that development proposals in the Green Belt must be in accordance with national and local policies on Green Belt. Essentially, national and local policies indicate that Green Belt land should be protected from inappropriate development unless exceptional circumstances exist. This element of the Policy is supported. Policy S3.1.3 indicates that a comprehensive mixed use sustainable urban extension will contribute to new residential and employment development guidelines, whilst also delivering new community facilities within a new local centre and significant areas of open space. This Sustainable Urban Extension is shown on the proposals Map for Bridgnorth to be located to the north-west of the town, at Tasley. This element of the Policy is supported. The Bridgnorth Place Plan Policies Map indicates a development boundary for Bridgnorth which includes i. the existing built-up area of the town, ii. the areas of land included in the SAMDev Plan as allocations for employment growth, iii. that area proposed for the Sustainable Urban Extension (which includes land for employment development) at Tasley. iv. the employment areas within Bridgnorth town at Stanley Lane, Farriday Drive, Chartwell Business Park, and old Worcester Road. This development boundary is supported. The boundary however, does not extend to include either the existing industrial estate at Stanmore, or the land being proposed in the Local Plan Review as an extension to that estate, clearly indicating that they are not regarded as being part of the town. They are indeed, located in open countryside and in the Green Belt where development is significantly restricted unless there are exceptional circumstances. It is, therefore, inappropriate to confuse the consideration of the proposed extensions to the Stanmore Industrial Estate with those employment uses that lie within the proposed boundary of the Principal Centre of Bridgnorth as in Policy S3.1.5 and .6. Different considerations apply and this should be clear in the text of the Plan. This element of the Review, that is the proposed extensions to the Stanmore Industrial Estate, is not supported. Policy S3.1(ii) further confuses the issue. Both parts of the proposed extensions to the existing Stanmore Industrial Estate, i.e. 6.8 ha of running north from the Estate (SLAA Site P58a) and 4.6 ha to the west of the existing Estate (SLAA Site STC002) are referred to as Employment Allocations for Bridgnorth Principal Centre. Para 5.60 says that Stanmore Industrial Estate is located to the east of Bridgnorth and is "inset within the Green Belt". Whilst it is correct to say that the existing Industrial Estate is an inset within the Green Belt, it should be clearly stated that the land that is proposed to be allocated as extensions to the Estate is not part of that inset, and that the land is currently subject to Green Belt designation. Whilst, since the publication of the Local Plan Consultation document, the Council has published a document intended to explain the exceptional circumstances that have led them to conclude that the allocation of additional land at Stanmore for industry is imperative, it is clear from the document that there are, in fact, no exceptional circumstances have been advanced that would justify removing that Green Belt designation from the land. The text of para. 5.60 indicates that the existing Industrial Estate is of local importance, is successful and that there is limited land available for expansion – but these factors do not qualify as exceptional circumstances, especially when there are other areas of land being allocated, within the proposed boundary for Bridgnorth and well away from the Green Belt, that are in the same ownership as some of the land being proposed for development at Stanmore.

A2142B05	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP1: The Shropshire Test Save Bridgnorth Greenbelt supports the general aims of this policy. However, it is essential that other policies contained in the Local Plan Review are in line with these aims, and Save Bridgnorth Greenbelt do not believe that this is the case. A prime example, and one in which Save Bridgnorth Greenbelt and our local supporters have direct involvement in, is the proposal to allocate more land adjacent to the Stanmore Industrial Estate for, in total, some 11.4 ha of Class B1, B2 or B8 uses. This cannot be justified in terms of Policy SP1 which says that "development will contribute to meeting local needs and making settlements more sustainable". The local employment needs of the settlement at Stanmore would not support the existing Industrial Estate at Stanmore, let alone further significant additions. The settlement at Stanmore is very small and is clearly regarded as a separate entity from Bridgnorth because the Council was, at one time, proposing to use it as a base for a new village quite separate from Bridgnorth. The area is excluded from the now-proposed Development Boundary for the town of Bridgnorth as shown on the Proposals Map for Bridgnorth. The development now proposed for Stanmore would then, conflict with Policy SP1, as it would not meet any identified local need and would not make Stanmore more sustainable, and with several other policies. Either the proposal at Stanmore should be removed from the Plan in order to secure compliance with Policy SP1 and others, or the policies concerned should all be revised such that developments such as that proposed at Stanmore do not conflict with them
A2142B06	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	The basic aim of Policy SP2 is supported. There is no disagreement with the idea of Shropshire accommodating investment and new development that contributes to meeting needs and making settlements more sustainable. However, the estimated need for 300 hectares of employment land, appears to be much more of an aspirational target rather than one that is actually based on identified need and making settlements more sustainable, and it is far from certain that such a figure can actually be delivered within the timeframe of the Local Plan Review. This is certainly the case in relation to the proposed allocation of two sites at Stanmore (totalling 11.4 ha) - a settlement that has no need for further employment provision. The emphasis in the Local Plan Review is very much meeting local need, and even if the proposed allocations at Stanmore are intended to cater for Bridgnorth town rather than the rural area in which it is situated, it remains clear that the Stanmore sites are unnecessary, given the amount of currently available but undeveloped or unused employment land in Bridgnorth, the allocations that exist and are to be carried forward from the SAMDev Plan, and the additional allocations being proposed in association with the Garden Village, Sustainable Urban Extension, at Tasley. The proposed employment development at Stanmore would, then, be in conflict with the aims of Policy SP2. Stanmore stands in an area of open countryside and in the West Midlands Green Belt that is outside any Principal or Key Centre, or Community Hub or Cluster. Policy SP2.6 says that, outside such settlements "new development will consist of affordable housing where there is evidence of local needs and appropriate rural employment and economic diversification". The aim of Policy SP2.6, then, is supported. It is clear that this Policy does not support the proposed allocation of 11.4 ha of unneeded employment land at Stanmore, and the type of employment provision being proposed by the Council is not "appropriate rural employment" or any form of "diversification" of the rural economy.
A2142B07	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	The basic aims of Policy SP4 are supported. However, the preparation and adoption of a Local Plan should not be used simply to avoid having to comply with more general policies, particularly when those policies are endorsed in the National Planning Policy Framework (NPPF). The NPPF is clear that land in a Green Belt should be protected from development unless there are exceptional circumstances that are fully evidenced and justified, through the preparation of local plans. Allocating land in a Local Plan should not be used as a means of legitimising development that is, in itself, an unsustainable proposition. There is no evidence that the development of land adjacent to the existing Stanmore Industrial Estate is necessary to serve the needs of Stanmore, or Bridgnorth. Whilst, since the publication of the Local Plan Consultation document the Council has published a document intended to explain the exceptional circumstances that have led them to conclude that the allocation of additional land at Stanmore for industry is imperative, it is clear from that document that there are, in fact, no exceptional circumstances that could justify the proposal that has been put forward. At present, the land that is the subject of the proposed allocation of 11.4 ha at Stanmore is Green Belt, and, if a planning application were to be submitted for employment development on the land, unless very special circumstances were advanced, permission for the development would be refused. An unjustified allocation in a local Plan should not be used to circumvent accepted planning principles. Such development would be unsustainable and would be in conflict with Policy SP4. If exceptional circumstances that made the development of 11.4 ha of land at Stanmore essential, then the proposal could be furthered through the submission of a planning application - an allocation in a Local Plan is unnecessary.
A2142B08	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	The proposals advanced in Policy SP6 and SP3, as far as the development of housing, employment, community facilities and open space, in the proposed Sustainable Urban Extension at Tasley are concerned, are supported.
A2142B09	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP9.1 indicates that, in the rural area, Community Hubs and Community Clusters will be identified as a focus for new development, whilst fostering appropriate rural employment opportunities, subject to further controls over development that apply to the Green Belt, the AONB and other designated areas. Policy SP9.2 and .3 say that employment, business and community development, will be considered against national policy and other relevant Local Plan policies, recognising the need for flexibility to meet rural economic and community needs. Sustainable employment in the countryside, where it maintains or enhances countryside vitality and character, and which is consistent with national Green Belt policy, and which relate to, i.small scale new economic diversification including farm diversification projects, ii.the retention of an existing established business (unless relocation to a settlement or established employment location is a better option), iii.agricultural, horticultural, forestry or mineral related development, iv.rural tourism, leisure or recreational proposals, v.community uses, vi.re-use of redundant or disused buildings, will be considered positively. The aim of this element of Policy SP9 is supported as a matter of principle. However, the Local Plan proposes an allocation of some 11.4 ha of employment land at Stanmore, which will encroach into open countryside which is designated Green Belt. The resulting development would not meet any of the suggested employment types set out in Policy SP9.2 and .3 (above) and thus the proposed allocations at Stanmore would be in conflict with the aims of Policy SP9. Policies in the Local Plan should be consistent one with another.
A2142B10	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	The essential aims of Policy SP10 are supported. However, it is important that the public is able to appreciate that the Council is promoting both these aims and the aims of other policies in the Local Plan. It is important that different policies do not conflict with one another, and that the Strategic Policies (in particular relating to land allocations), Development Management Policies and Settlement Development Guidelines, should all be consistent with the essential aims of the Plan as a whole. Policy SP10.3 says that economic growth and investment will be supported in, i.Shrewsbury, ii.Principal and Key Centres, iii.Strategic Corridors, Settlement and Sites, iv.Community Hubs, v.Community Clusters and the Countryside through windfall development where the location, scale, land use and impacts of the proposal will conform with existing land uses, settlement form and environmental qualities in accordance with relevant Local Plan policies. However, the Plan proposes the allocation of two areas of land, totalling 11.4 ha, at Stanmore in open countryside which is also Green Belt land, adjacent to an existing industrial Estate. Stanmore is not within Shrewsbury, a Principal or Key Centre, a Community Hub or a Community Cluster. Its location within the East Strategic Corridor is tenuous as it does not connect effectively with other settlements within that Corridor or the major road links upon which the Corridor is based. The development proposed for Stanmore, then, fulfils none of the locational requirements set out above, and the proposed allocations would, therefore, be in conflict with Policy SP10.3. The proposed development at Stanmore should therefore be deleted from the Plan in order to ensure compliance with Policy SP10
A2142B11	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11: Delivering Sustainable Economic Growth and Enterprise Policy SP11 is supported in terms of its essential aims, but the justification for 300 ha of land to be allocated for employment use in the County is questioned. This would equate to the delivery of around 14 ha. every year throughout the Plan period. That is a tall order, indeed, when, in the period 2016 – 2019, a yearly build rate of only 10.7 ha of employment land had been delivered – over the period of the current Local Plan, delivery has been far less. No particular factors are evidenced as guaranteeing an increase in delivery in the plan period 2016 – 2038. This lack of delivery has not been caused by lack of sites or planning permissions, as land on existing employment areas, as committed sites and in "Saved" allocations, amounts to 239 ha, which in theory has been readily developable (figures taken from Appendix 6 of the of the Local Plan Review consultation document). It does not appear that the figure of 300 ha of employment land is likely to be delivered in the plan period and there is little need for the 142 ha of newly allocated employment land. Policy SP11.2.e says that a development proposal for employment will predominantly comprise Class B uses, (though certain others – sui generis, A2, C1, C2, C2A and D1 would be appropriate, though that is debatable – for example, an employment site in an employment area is possibly not the most appropriate location for a place of worship or Church Hall) but the proposals should "satisfy the requirements of national and local policies especially to protect the Green Belt".....(amongst other things). The land proposed in the Local Plan consultation document for employment allocation at Stanmore is located in the Green Belt and in countryside, and an allocation for the use of the land for employment would clearly be in conflict with Policy SP11.2.e. The allocations should be deleted from the Plan.
A2156B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of Policy SP11, and is also in conflict with Policy DP25 of the Draft Local Plan and the National Planning Policy Framework.
A2156B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community. The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town. The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley. There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore. The sites are situated in Green Belt and no very special or exceptional circumstances have been identified. The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9. Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development. Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore. Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation. Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A2157B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>[1] Ecology Mor brook forms a very valuable and virtually continuous wildlife corridor from its source near Much Wenlock through numerous wildlife sites before flowing into the Severn. Habitat management and restoration work along this corridor has had considerable success in halting and even reversing the terrifying decline & extinction of so many mammal, bird, amphibian, reptile and insect species that is occurring in so much of the UK and around the world. The current degree of access by tourists and the local population is probably sustainable because the agricultural land between Mor brook & the town forms a buffer zone. But the permanent loss of this buffer zone is being proposed. Shropshire Wildlife Trust objects to these proposals for a large number of houses in the open countryside around Bridgnorth. It appears to be an entirely opportunistic proposal outside of any strategic planning consideration within the democratic scrutiny of the Shropshire Local Plan and the SAMDev housing allocation process. Along with this proposal there are several similar developments of this significant scale under consideration in Shropshire, for example Tong Garden Village and Ironbridge Power Station. They all have a cumulative impact on limited water resources in the county, whilst the potential impact of house building itself and the lifetime energy requirements of the households will contribute to the negative impacts of climate change. They have not been taken into consideration and do not align with the Climate Emergency Declaration signed by Shropshire Council last year. Coupled with increased pressure on wildlife populations in the surrounding countryside, and in the context of a growing climate, ecological and health emergency, we would question whether this proposal is appropriate in a post-Covid-19 situation when there is an appetite for a [Green Recovery] rather than business as usual approach.</p> <p>[2] Pollution and Public Amenity: The land on which the proposed Tasley Garden Village is to be built is classified as Grade 3 agricultural land. The NFU says the UK currently only produces 58% of the veg we consume and 16% of our fruit. At a time when local food production in the UK is under threat, why is Grade 3 agricultural land being taken for residential and employment facilities?</p> <p>[3] Housing: In total, the Local Plan is recommending that 2,250 new houses be built in the Tasley area. This will increase the population of Bridgnorth by at least 4,500 people which represents an increase of 35%. On what basis has Shropshire Council arrived at the larger figure? Whilst it is accepted that Bridgnorth and surrounding areas require more dwellings to cater for the likely future growth of the town, on what basis has Shropshire Council decided that such numbers will make provision for the needs of the town and surrounding hinterland? A Local Housing Needs Assessment is required in order to establish what the needs are. Should this not be carried out before it is decided on the numbers of dwellings to be built? Can the Town support an increase of 35% to its population? [4]</p> <p>Employment Land: The Local Plan confirms that in total 29 ha of employment land (the equivalent of just over 54 full sized football pitches) has been allocated to the Tasley area south of the A458, all of which is outside the Bridgnorth Development Boundary. As well as setting out the above for employment land the Local Plan has identified a further 11 ha of Green Belt land to allow for the extension of the current Stanmore Industrial Estate. Altogether the Local Plan has earmarked a total of 40 ha for employment land in the Bridgnorth area. On what grounds does Shropshire Council believe that there is a requirement for 40 ha for offices, research and development, industrial processes and warehousing for storage or distribution? Are all the units already available for occupation by businesses in Bridgnorth and surrounding areas occupied? What is the vacancy rate? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable? What effect will coronavirus have on our work practices and how will this affect the requirement for 40 ha of employment land? What happens to this designated land if the targets are not achieved? It would make more sense to deliver the employment land as set out in the</p>
A2181B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of Policy SP11, and is also in conflict with Policy DP25 of the Draft Local Plan and the National Planning Policy Framework.
A2181B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Sites STC002 and P58a should not be allocated for employment as:</p> <p>The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. A2188B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Bridgnorth is NOT the second largest principal area; it is a small market town with approx. 12,079 population, according to the 2011 census. Oswestry has 17,105 inhabitants (2011 census), therefore Bridgnorth is the THIRD largest principal centre in the Shropshire Council area. This is misleading information and should be changed, as you development plan is built on erroneous information. A development of 1,800 homes in a market town the size of Bridgnorth is totally unwarranted and I object strongly to it. If each home houses a family of 4 (average sized family), this would mean an increase of 7,200 people, which would MORE THAN DOUBLE the inhabitants of Bridgnorth. Whilst development is expected, a development of this size is totally unacceptable and out of keeping with the town. In addition, there are 500 homes already planned and agreed at Tasley, so this increase could actually be significantly higher. An increase of homes of this size is NOT to accommodate existing residents; it is to increase the size of the town by incoming buyers, namely, West Midlands overspill.</p>

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A2188B02	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Greenbelt land must only be used where there are exceptional circumstances; where there are not, use of this land would be unlawful.
A2188B03	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sustainable or not, this type of large 'urban extension' means you would create a completely new, massive, community in itself, completely out of keeping with the size of the existing town. Whilst development is expected, the proposed development of a 'garden village' is similar to that which is currently taking place in Telford, a town which can accommodate this type of development, whereas Bridgnorth is a small market town whose transport network and services are already at breaking point. Namely: <ul style="list-style-type: none"> • The roads are narrow/one way and struggle to accommodate existing traffic • Car parking is already inadequate for current residents and visitors to the town • Although there are 3 supermarkets in Bridgnorth, they are all small with very limited parking, which is frequently full • There is ONE fuel station which is already overloaded, creating dangerous queues onto the A442 • The road system is already extremely poorly maintained and with additional traffic, will no doubt degrade further, particularly the major A422 running through Low Town • Services such as the doctors surgery are completely overloaded already I object strongly to this development as an 'urban development' on this massive scale, because it is completely out of keeping with the existing town.
A2188B04	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Regarding business land, the local Chamber of Commerce has already stated that no other business premises are required and that there are some already lying empty. There are no links to motorways (apart from via the already congested and poorly maintained A442), so any development for business is surplus to requirements. Just because business premises may be created, it doesn't mean businesses will relocate to Bridgnorth – why would they, when nearby Telford, near to the M54, is much better served?
A2188B05	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	'All other new retail development will be directed towards the town centre in line with policy DP10, where it will benefit from and contribute to the historic character of the town'. How can retail development contribute to the historic character of the town? This statement is a joke! By this policy, it is expected that the new 7000+ residents will make Bridgnorth town their main shopping centre. The town centre is already overcrowded, has grossly inadequate parking, and welcomes hundreds of visitors. Saturdays (market days) are heaving already – so much so that residents are already staying away. Social distancing is simply not possible. This type and size of development is totally out of keeping with an already overcrowded town centre, and I object strongly.
A2188B06	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	I am appalled that, after proposing more than doubling the size of the existing town of Bridgnorth Shropshire Council wishes to add further development in the future, as well as the proposed 'garden village'. Who will that be for? The town of Bridgnorth will become the new Telford – ever-growing sprawl with no thought whatsoever to the nature of the town. I object strongly to even further plans for uncontrolled development long term.
A2188B07	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Paragraph 4 of this section cites that 'identified local needs' will inform the development. No-one from Shropshire Council has demonstrated what these 'local needs' are – ie to accommodate and grow the existing residents of the town. Will Shropshire Council share their figures and evidence for this? I believe the 500 homes already agreed for development at Tasley will more than accommodate local need, considering the population of Bridgnorth is NOT growing but FALLING; school admissions clearly show this. Shropshire Council are passing off this development as being for 'local need' when it is absolutely NOT for local need, but to encourage buyers from outside the locality, ie the West Midlands, to generate funds for the Council. The Council must start to be accountable to the residents of Bridgnorth, and start telling the truth about the figures for 'local need'. I absolutely and strongly object to the development of a massive garden village at Tasley
A2188B08	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	A raised pedestrian and cycle footbridge would be an ideal means of crossing the busy A458, although your rider of 'subject to ground investigations and available land' means this will probably never happen. Pedestrians and cyclists will find themselves fighting with fast traffic and there are bound to be accidents. The A458 is not only busy but a fast road (60mph), meaning any accidents are likely to be of a serious nature. The noise element is also realised as you have included 'noise reduction' methods. The hundreds of bikers who roar up the bypass on a Sunday already cause a noise nuisance to existing residents in Wellmeadow (many adverse comments on social media), so a development so close to the A458 would be very unpleasant for residents. I object strongly to the siting (and size) of this development.
A2188B09	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	In my view, it is simply impossible to build over huge areas of natural farmland and not cause flooding to properties lower down - it just can't be done, whatever your assurances. Low Town residents are already battling with flooding issues. As a Low Town resident, I object strongly to this aspect of the development. As previously stated, this development is NOT for Bridgnorth's housing need, but about attracting overspill from the West Midlands to re-locate, and to make money for the cash-strapped Shropshire Council. This does NOT mean it is acceptable - it isn't! I object strongly to the 'Tasley Garden Village' development proposals.
A2188B10	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	As previously stated, Bridgnorth is NOT the second largest principal centre of the Shropshire Council area, but the third. If development strategy is built on this premise, it is erroneous, because Oswestry is a considerably bigger centre. You have cited 'Bridgnorth's 'extensive services and facilities', yet once again, I list the very overloaded current 'services and facilities' in Bridgnorth: <ul style="list-style-type: none"> • The roads are narrow/one way and struggle to accommodate existing traffic • Car parking is already inadequate for current residents and visitors to the town • Although there are 3 supermarkets in Bridgnorth, they are all small with very limited parking • There is ONE fuel station which is already overloaded, creating dangerous queues onto the A442 • The road system is already extremely poorly maintained and with additional traffic, will no doubt degrade further • Services such as doctors surgeries are completely overloaded already
A2188B11	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The strategic role of Bridgnorth? It is a market town without direct links to motorways and other transport links – it is not strategically placed at all!
A2188B12	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The housing needs will have already been met by the 500 homes already agreed to be built at Tasley, without the proposed 'garden village' or any further housing. Again, this phrase 'local need' is used glibly – there are no figures or evidence given to support the supposed 'local need' of Bridgnorth! The population of Bridgnorth is NOT growing but FALLING; school admissions clearly show this. As previously mentioned, the Bridgnorth Chamber of Commerce has already stated that there are already sufficient employment buildings available in Bridgnorth, with some existing buildings lying empty. I strongly object to the scale of development planned by Shropshire Council for Bridgnorth.
A2188B13	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	The Bridgnorth Chamber of Commerce works hard to attract business to the town; there is a reason why more businesses are NOT attracted to the town – because the road networks are poor and there is no direct link to a motorway. No new road networks have been proposed, so new businesses will NOT be attracted to Bridgnorth. It's as though Shropshire Council think they can provide employment land, and businesses will automatically come – they won't!
A2188B14	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	In an ideal world, a 'better balance' would be lovely, but it won't ever happen, despite whatever provisions are made – for the reasons cited previously – ie poor transport links - no access to the M54 - poorly maintained roads, specifically the A442.
A2188B15	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Potential businesses will not 'relocate' or 'start-up' for the reasons already stated; the road network is just not up to this. Businesses have already moved OUT of Bridgnorth for this very reason. In an ideal world, everyone would like to live and work in the same town, but this just isn't going to happen, unless Shropshire Council has a plan to build a new road network system connecting the town with motorways. The state of the main A442 going out of Bridgnorth towards Telford is in a dreadful state of repair; it carries a huge amount of traffic, yet has not been resurfaced for many years. It is currently breaking up and only resurfacing will save it from further decay. If additional traffic uses this road, it will only exacerbate this problem.
A2191B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	I am concerned about plans to build on greenbelt near Stanmore industrial site. If covid has taught us anything it is that we need our green areas more than ever. We need to protect our greenbelt and its wildlife which in turn helps our wellbeing. Once it is gone it cannot be replaced! We do not want the area to become a mass sprawl. I really hope this does not go ahead. Kind regards Jane Deeley Brewer.
A2193B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of Policy SP11, and is also in conflict with Policy DP25 of the Draft Local Plan and the National Planning Policy Framework.
A2193B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Sites STC002 and P58a should not be allocated for employment as: <p>The allocation of some 49ha of land for employment purposes in Bridgnorth to create choice and competition in the market (para. S3.1.1) is excessive and not fully evidenced or justified. There is sufficient land elsewhere for employment purposes to serve the existing and proposed community.</p> <p>The proposed Tasley allocation includes some 16ha of employment land, this will be within walking distance of the main residential development proposals for Bridgnorth and can accommodate necessary floorspace to serve the proposed population growth for the town.</p> <p>The current Local Plan includes employment allocations at Tasley which have not been developed (between 2006–2026). These sites are carried forward into the current Local Plan Review. If demand or need for significant employment development existed these sites could have been developed. Some of this land is believed to belong to the same organisation that owns Stanmore Industrial Estate and one of the proposed allocations (STC002 or P58a), meaning that there can be no certainty that the land at Stanmore would be developed any quicker than the sites that are currently allocated at Tasley.</p> <p>There are long-term vacant plots on existing industrial estates in Bridgnorth which show no signs of being taken up. This shows there is no need or demand for additional land at Stanmore.</p> <p>The sites are situated in Green Belt and no very special or exceptional circumstances have been identified.</p> <p>The sites are located in 'Countryside' and unrelated to any significant urban development area. As such they are contrary to draft Policy SP9.</p> <p>Stanmore is divorced from residential areas and workers would have to travel, mostly by private motor vehicles, to access the site. This is contrary to the aims of Policy SP4.1 and the main aim of the NPPF. As such it cannot be considered sustainable development.</p> <p>Stanmore Industrial Estate was established to make use of a former WWII military site, there is no such justification for the present proposals. Furthermore a number of the plots on the current Estate are vacant, and have been for months/years. There is no need for business operations generated by Bridgnorth residents (existing or future) to locate at Stanmore.</p> <p>Residential allocations proposed are at Tasley, some 3 1/2 miles from Stanmore. It is unsustainable to locate a major employment allocation so far away from the main new housing allocation.</p> <p>Having several sites available for development in Bridgnorth increases choice for developers, but only if all other matters are equal. The land proposed for employment development at Stanmore has significant drawbacks, not least being its current designation as Green Belt and its unsustainable location, and so it is, in any event, in a less favourable situation than other sites that are either currently allocated or proposed for allocation in the Local Plan Review. Further, an over-provision of sites can fragment development opportunities making investment in buildings and infrastructure less attractive and less likely to take place.</p>
A2277B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Site allocation conflicts with SP1 and should not be allowed because of this. This and the SAMDev development substantially increases the size of the town. Development to the south of the A458 prevents the creation of a cohesive community. There is no detail about new pedestrian and cycle facilities and in my view these will be impossible. Development here will increase traffic in Low Town as people commute to work at Stanmore, Telford or Wolverhampton. This is contrary to policy SP1 1c addressing climate change. It will not be possible to mitigate the impact on the landscape as the site is on high and sloping ground. This is contrary to SP1 1d.
A2281B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies requirements of national and local policies especially relating to protection of Green Belt (amongst others). This element of the draft Policy is supported. However, proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of draft Policy SP11, and is also in conflict with draft Policy DP25 of the Draft Local Plan and the NPPF.

A2337B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>No exceptional circumstances for removing land from Greenbelt in Alveley. Suitable land in Highley should be allocated instead</p>
A2362B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>There is no need for additional massive development of Bridgnorth. Future plans should be guided by</p> <p>a) the need to retain productive farmland, particularly post-BREXIT/COVID</p> <p>b) the protection of green local environments and ecosystems, for their physical and mental health benefits</p> <p>c) the need to reduce car travel and associated pollution (including noise pollution) There is no evidence that large numbers of people commute to Bridgnorth for work from Telford and the West Midlands conurbation - so providing additional housing will not reduce road travel. In fact, the significant traffic flows are in the opposite direction- out of Bridgnorth . New housing will exacerbate this if, as is likely, a lot of housing is occupied by incoming new residents who will continue to work elsewhere. New housing should be driven by local needs only, and should be as close to existing employment as possible. Further excessive development will destroy the character of the town, and significantly reduce the quality of life of the current residents</p>
A2379B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	<p>Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst others). A2386B1	regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Why Bridgnorth, a quaint market town, much loved by residents and visitors alike, which already struggles for the lack of infrastructure and internal development</p> <p>When there is already permission for 567 houses to be built in Tasley, with a rumoured 31 houses to be built on the former Bridgnorth Council Office site, how can a development of an extra 1050 houses up to the year 2038, prove to be acceptable?</p> <p>As for employment on the proposed site, why is this necessary, when there are already empty units available, with unused industrial land, that has been granted and remains undeveloped? When you consider that within a 15/18 mile radius, there is Shrewsbury, Telford, Wolverhampton, Stourbridge and Kidderminster with commercial developments that are well serviced by good road,rail and motorway access, why choose Bridgnorth? The local road system struggles to cope with current levels of traffic. The A458 is already a very busy road linking with the A53, through from the M6 motorway at junction 15, through to the West and South of the West Midlands conurbation. Extra traffic on this road will cause more air pollution, noise pollution and increase the dangers that are already part of the day to day.</p> <p>The only winners of this development will be Taylor Wimpey from the sale of new properties, Shropshire Council from the rates payable from new properties, and the land owners. Bridgnorth could be left in a much worse situation with no further investment, but having to cope with an increase in population, traffic and the loss of productive agricultural land.</p> <p>At a time when Covid19 excludes public meetings to discuss situations like this, would it not be sensible to put a hold on the proceedings until the correct manner of discussion can be held?</p> <p>I strongly believe that the Tasley Garden Village Development should be rejected and not included in the Local Plan Review.</p>
A2387B1	regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Why Bridgnorth, a quaint market town, much loved by residents and visitors alike, which already struggles for the lack of infrastructure and internal development</p> <p>When there is already permission for 567 houses to be built in Tasley, with a rumoured 31 houses to be built on the former Bridgnorth Council Office site, how can a development of an extra 1050 houses up to the year 2038, prove to be acceptable?</p> <p>As for employment on the proposed site, why is this necessary, when there are already empty units available, with unused industrial land, that has been granted and remains undeveloped? A2395B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Do not support the Council's change in its approach to the growth of Bridgnorth through the proposed amendment to Policy S3 to allocate Site BRD030 for residential development. The Preferred Options version of the Local Plan Review (November 2018) proposed to allocate land to the east of Bridgnorth for 850 dwellings (Sites P54, P56, P58, STC002, STC004, STC005 and STC006). The Pre-Submission consultation document proposes to remove this site and instead allocate land to the south west of Bridgnorth for 1,050 dwellings (Site BRD030). A presumption in favour of sustainable development is at the heart of the National Planning Policy Framework ('NPPF') 2019. Having reviewed Appendix D of the Sustainability Appraisal ('SA'), the sites that comprise the previous proposed allocation to the east of Bridgnorth perform more highly than Site BRD030. We understand from the SA that the key reason that Site BRD030 is now proposed to be allocated is because it is outside of the Green Belt. Paragraph 136 of the NPPF states that Green Belt boundaries should only be altered where exceptional circumstances are evidenced and justified. However, the High Court has determined that releasing Green Belt land and allocating it for development in Local Plans does not need to be "a last resort". In 2014, a Judicial Review was brought by IM Properties against a decision by Lichfield District Council to release two strategic sites adjacent to Lichfield City from the Green Belt and allocate them for residential development rather than the land being promoted by IM Properties which was outside of the Green Belt but also adjacent to Lichfield City (IM Properties v Lichfield District Council and Taylor Wimpey and Persimmon Homes [2014] EWHC 2440). Mrs Justice Patterson rejected IM Properties claim that Green Belt could only be used to meet housing needs "as a last resort" and rather it was a matter of planning judgement as to whether exceptional circumstances to release land from the Green Belt have been demonstrated. The NPPF (paragraph 137) states that before concluding that exceptional circumstances exist, Councils should be able to demonstrate that all other reasonable options for meeting its identified need for development have been examined which includes: use of brownfield sites; optimising density of development; and neighbouring authority discussions. The Strategic Land Availability Assessment (SLAA) has identified that there is insufficient previously developed land / infill opportunities within Bridgnorth to accommodate the development needs for the new plan period. There is also a Greater Birmingham and Black Country Housing Market Area shortfall and Shropshire is required to accommodate some of this shortfall in order to accord with the duty to cooperate (NPPF Paragraph 24). Additionally, we consider that allocating a single area of land for the creation of a new mixed use settlement to the east of Bridgnorth provides an opportunity to support the delivery of a range of new residential and employment development to meet local needs with the delivery of new infrastructure and community facilities, including enhancement to the quality, quantity and connectivity of public open space, as well as improved access to extensive recreational open space and the wider countryside, which would benefit both new and existing residents. It is therefore considered that Shropshire Council can demonstrate that there are exceptional circumstances to remove land from the Green Belt to accommodate the strategic development needs for Bridgnorth. When it is established that there are exceptional circumstances to release Green Belt, when reviewing Green Belt boundaries "the need to promote sustainable patterns of development should be taken into account" and consideration should first be given to release Green Belt land which "has been previously developed and/or is well-served by public transport" (NPPF paragraph 138). Mrs Justice Patterson concluded in the IM Properties case that the Lichfield District Council had legitimately had regard to travel patterns and urban focus when deciding to release Green Belt land in preference to other land which it considered performed less well in these respects. In light of this, we consider that development in Bridgnorth should be directed to the east of the Settlement, as previously proposed. This land is better performing than Site BRD030 (Appendix D of the Sustainability Appraisal) and will improve connectivity to Stanmore Industrial Estate which is considered to be of local importance (paragraph 5.60 of the consultation document). Development to the east will also assist with rebalancing the growth of Bridgnorth, which has been focused to the west of the settlement during recent decades, whilst also offering good connectivity from new development at Bridgnorth to the Black Country conurbation. Should the Council correctly revert back to its original approach to allocate land to the east of Bridgnorth, the inclusion of our clients land (Site STC003) would result in the A458 being the revised boundary of the site. We consider that this will create a more logical, permanent and defensible Green Belt boundary than the edge of Stanmore Country Park, to accord with the requirements of paragraph 139 of the NPPF. In regards to Local Housing Need, Shropshire Council's assessment using the Government's Standard Methodology indicates that as of April 2020 there is a minimum need for 25,894 dwellings over the plan period (2016-2038). However, the Government is currently consulting on a revised standard methodology which will result in Shropshire's annual housing requirement increasing by circa 80% (1,177 dwellings per annum to a minimum of 2,129 dwellings). It is also noted that the proposed housing requirement for the County has increased since the Preferred Options consultation to 30,040 dwellings (previously 28,750 dwellings) to include 1,500 dwellings towards the Black Country housing shortfall. The revised housing requirement proposed through the Plan is not enough to meet the Shropshire housing needs calculated using the revised standard method. We therefore request that this is reviewed and additional sites are allocated within the plan to meet this greater housing need. In order to comply with the NPPF and Policy SP2 of the consultation plan, we consider that the additional housing growth should be directed to the most sustainable settlements in Shropshire; Shrewsbury and the Principal Centres (Bridgnorth, Ludlow, Market Drayton, Oswestry and Whitchurch). The proposed housing apportionment to Bridgnorth has increased from 1,500 dwellings in the Preferred Options document to 1,800 dwellings in the Pre-submission document. The Principal Centres are proposed to deliver 7,500 dwellings, which is circa 24% of the Council's housing requirement. In our previous representations we sought confirmation as to how the Principal Centres' housing figure apportionments had been decided. As the second most sustainable tier in the proposed 'Urban Locations' Hierarchy (Schedule SP2.1), and in accordance with the sustainable development aims set out in Policy SP2, we consider that a greater proportion of the Council's housing need (once amended to accord with the revised Standard Method figure) should be directed to the Principal Centres, particularly Bridgnorth which is the third largest settlement in Shropshire. Policy S3 of the Pre-Submission consultation document states that Bridgnorth is expected to provide a total of 1,800 dwellings towards the total requirement of 30,800 dwellings. Schedule A5(i) sets out that 1,050 dwellings will be delivered on the Local Plan allocation (Site BRD030) and 500 dwellings will be delivered on saved SAMDev allocations. The schedule also highlights that between 2016-2019 only 52 dwellings were completed in Bridgnorth and there are only 38 dwellings with planning permission as of March 2019. We do not consider that there is a sufficient amount of immediate sites that can deliver housing in Bridgnorth within the next 5 years. Smaller sites, such as our client's site (STC003) that are currently available and can be delivered in the short term should be allocated in addition to, and to complement, any strategic allocations to ensure the housing needs of Bridgnorth are sufficiently met. It is considered that the wider proposed Preferred Options allocation at Stanmore and our client's site can together accommodate both the identified 1,050 allocation apportionment to Bridgnorth and further growth to meet the additional requirements identified (through applying the revised standard methodology) for the next Plan period and beyond. The enclosed Illustrative Concept Plan demonstrates at a very high level how development might be accommodated on our client's site, whilst linking it to the wider area being promoted by the Stanmore Consortium to the north and west of our client's site.</p>
A2395B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	<p>Do not support the Council's change in its approach to the growth of Bridgnorth through the proposed amendment to Policy S3 to allocate Site BRD030 for residential development. The Preferred Options version of the Local Plan Review (November 2018) proposed to allocate land to the east of Bridgnorth for 850 dwellings (Sites P54, P56, P58, STC002, STC004, STC005 and STC006). The Pre-Submission consultation document proposes to remove this site and instead allocate land to the south west of Bridgnorth for 1,050 dwellings (Site BRD030). A presumption in favour of sustainable development is at the heart of the National Planning Policy Framework ('NPPF') 2019. Having reviewed Appendix D of the Sustainability Appraisal ('SA'), the sites that comprise the previous proposed allocation to the east of Bridgnorth perform more highly than Site BRD030. We understand from the SA that the key reason that Site BRD030 is now proposed to be allocated is because it is outside of the Green Belt. Paragraph 136 of the NPPF states that Green Belt boundaries should only be altered where exceptional circumstances are evidenced and justified. However, the High Court has determined that releasing Green Belt land and allocating it for development in Local Plans does not need to be "a last resort". In 2014, a Judicial Review was brought by IM Properties against a decision by Lichfield District Council to release two strategic sites adjacent to Lichfield City from the Green Belt and allocate them for residential development rather than the land being promoted by IM Properties which was outside of the Green Belt but also adjacent to Lichfield City (IM Properties v Lichfield District Council and Taylor Wimpey and Persimmon Homes [2014] EWHC 2440). Mrs Justice Patterson rejected IM Properties claim that Green Belt could only be used to meet housing needs "as a last resort" and rather it was a matter of planning judgement as to whether exceptional circumstances to release land from the Green Belt have been demonstrated. The NPPF (paragraph 137) states that before concluding that exceptional circumstances exist, Councils should be able to demonstrate that all other reasonable options for meeting its identified need for development have been examined which includes: use of brownfield sites; optimising density of development; and neighbouring authority discussions. The Strategic Land Availability Assessment (SLAA) has identified that there is insufficient previously developed land / infill opportunities within Bridgnorth to accommodate the development needs for the new plan period. There is also a Greater Birmingham and Black Country Housing Market Area shortfall and Shropshire is required to accommodate some of this shortfall in order to accord with the duty to cooperate (NPPF Paragraph 24). Additionally, we consider that allocating a single area of land for the creation of a new mixed use settlement to the east of Bridgnorth provides an opportunity to support the delivery of a range of new residential and employment development to meet local needs with the delivery of new infrastructure and community facilities, including enhancement to the quality, quantity and connectivity of public open space, as well as improved access to extensive recreational open space and the wider countryside, which would benefit both new and existing residents. It is therefore considered that Shropshire Council can demonstrate that there are exceptional circumstances to remove land from the Green Belt to accommodate the strategic development needs for Bridgnorth. When it is established that there are exceptional circumstances to release Green Belt, when reviewing Green Belt boundaries "the need to promote sustainable patterns of development should be taken into account" and consideration should first be given to release Green Belt land which "has been previously developed and/or is well-served by public transport" (NPPF paragraph 138). Mrs Justice Patterson concluded in the IM Properties case that the Lichfield District Council had legitimately had regard to travel patterns and urban focus when deciding to release Green Belt land in preference to other land which it considered performed less well in these respects. In light of this, we consider that development in Bridgnorth should be directed to the east of the Settlement, as previously proposed. This land is better performing than Site BRD030 (Appendix D of the Sustainability Appraisal) and will improve connectivity to Stanmore Industrial Estate which is considered to be of local importance (paragraph 5.60 of the consultation document). Development to the east will also assist with rebalancing the growth of Bridgnorth, which has been focused to the west of the settlement during recent decades, whilst also offering good connectivity from new development at Bridgnorth to the Black Country conurbation. Should the Council correctly revert back to its original approach to allocate land to the east of Bridgnorth, the inclusion of our clients land (Site STC003) would result in the A458 being the revised boundary of the site. Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A2446B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	I suggest that SC develops the Country Park making infilling between Russel's Close and The Hobbins, making the wood along the Hermitage ridge nearer the town between the Wolverhampton A454 and Stourbridge A458 into a replacement country park. Do not agree with developing Stanmore Farm as it is one of the best productive farms in the Bridgnorth District.
A2448B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area		A reasonable assessment (based on occupancy by single persons, couples and families) concludes the proposed development (existing and new allocations) could result in a 40% increase of the Bridgnorth population. To mitigate this: -Relieve traffic flows through Low Town, which cause congestion and air pollution (above permitted levels). One solution to northbound (and conversely southbound) traffic from the Kidderminster direction towards Telford would be to improve the route north from the A454/Wolverhampton Road roundabout to where it joins the A442 (plus work to associated roads), and encourage traffic onto it. -Improve/provide additional car parking. Bridgnorth is not simply a market town, it is also an important visitor destination due to its medieval streets/character which creates significant demand. Of the two central car parks, one is privately owned and used for a market on Saturdays (as are both sides of the High Street), exacerbating parking problems on Saturdays. Closure of Westgate and redevelopment of the site will also result in loss of 70 parking spaces. The Council's Innage Lane Car Park is within walking distance of the town centre (but too far to carry shopping and used for school drop-offs/collections), a multi-story car park should be developed on this site. -Further education facilities required. Existing facility was closed and site redeveloped, however there is an overwhelming need for such a facility. This could be integrated into a special needs facility and provided on BRD030. - Quality of housing. Recent proposals for the Westgate site were poor. Future housing should comply with the following criteria: solar panels on each home, sufficient internal space for dishwasher/fridge/freezer/washing machine/perambulator/airer/kitchen extraction fan, parking for two vehicles (one beneath a car port) or one for multi-occupancy buildings (beneath a car port), no gas connection, heat pumps provided and a water butt.
A2467B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	1. Bridgnorth is NOT the second largest principal area; it is a small market town with approx. 12,079 population, according to the 2011 census. Oswestry has 17,105 inhabitants (2011 census), therefore Bridgnorth is the THIRD largest principal centre in the Shropshire Council area. This is misleading information and should be changed, as your development plan is built on erroneous information. A development of 1,800 homes in a market town the size of Bridgnorth is totally unwarranted and I object strongly to it. If each home houses a family of 4 (average sized family), this would mean an increase of 7,200 people, which would MORE THAN DOUBLE the inhabitants of Bridgnorth. Whilst development is expected, a development of this size is totally unacceptable and out of keeping with the town. In addition, there are 500 homes already planned and agreed at Tasley, so this increase could actually be significantly higher. An increase of homes of this size is NOT to accommodate existing residents; it is to increase the size of the town by incoming buyers, namely, West Midlands overspill.
A2467B02	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	2. Greenbelt land must only be used where there are exceptional circumstances; where there are not, use of this land would be unlawful.
A2467B03	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	3. Sustainable or not, this type of large 'urban extension' means you would create a completely new, massive, community in itself, completely out of keeping with the size of the existing town. Whilst development is expected, the proposed development of a 'garden village' is similar to that which is currently taking place in Telford, a town which can accommodate this type of development, whereas Bridgnorth is a small market town whose transport network and services are already at breaking point. Namely: <ul style="list-style-type: none">• The roads are narrow/one way and struggle to accommodate existing traffic• Car parking is already inadequate for current residents and visitors to the town• Although there are 3 supermarkets in Bridgnorth, they are all small with very limited parking, which is frequently full• There is ONE fuel station which is already overloaded, creating dangerous queues onto the A442• The road system is already extremely poorly maintained and with additional traffic, will no doubt degrade further, particularly the major A422 running through Low Town• Services such as the doctors surgery are completely overloaded already I object strongly to this development as an 'urban development' on this massive scale, because it is completely out of keeping with the existing town
A2467B04	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	5 & 6. Regarding business land, the local Chamber of Commerce has already stated that no other business premises are required and that there are some already lying empty. There are no links to motorways (apart from via the already congested and poorly maintained A442), so any development for business is surplus to requirements. Just because business premises may be created, it doesn't mean businesses will relocate to Bridgnorth – why would they, when nearby Telford, near to the M54, is much better served?
A2467B05	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	7. 'All other new retail development will be directed towards the town centre in line with policy DP10, where it will benefit from and contribute to the historic character of the town'. How can retail development contribute to the historic character of the town? This statement is a joke! By this policy, it is expected that the new 7000+ residents will make Bridgnorth their main shopping centre. The town centre is already overcrowded, has grossly inadequate parking, and welcomes hundreds of visitors. Saturdays (market days) are heaving already – so much so that residents are already staying away. Social distancing is simply not possible. This type and size of development is totally out of keeping with an already overcrowded town centre, and I object strongly.
A2467B06	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	8. I am appalled that, after proposing more than doubling the size of the existing town of Bridgnorth, Shropshire Council wishes to add further development in the future, as well as the proposed 'garden village'. Who will that be for? The town of Bridgnorth will become the new Telford – ever-growing sprawl with no thought whatsoever to the nature of the town. I object strongly to even further plans for uncontrolled development long term.
A2467B07	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	Paragraph 4 of this section cites that 'identified local needs' will inform the development. No-one from Shropshire Council has demonstrated what these 'local needs' are – ie to accommodate and grow the existing residents of the town. Will Shropshire Council share their figures and evidence for this? I believe the 500 homes already agreed for development at Tasley will more than accommodate local need, considering the population of Bridgnorth is NOT growing but FALLING; school admissions clearly show this. Shropshire Council are passing off this development as being for 'local need' when it is absolutely NOT for local need, but to encourage buyers from outside the locality, ie the West Midlands, to generate funds for the Council. The Council must start to be accountable to the residents of Bridgnorth, and start telling the truth about the figures for 'local need'. I absolutely and strongly object to the development of a massive garden village at Tasley.
A2467B08	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	A raised pedestrian and cycle footbridge would be an ideal means of crossing the busy A458, although your rider of 'subject to ground investigations and available land' means this will probably never happen. Pedestrians and cyclists will find themselves fighting with fast traffic and there are bound to be accidents. The A458 is not only busy but a fast road (60mph), meaning any accidents are likely to be of a serious nature. The noise element is also realised as you have included 'noise reduction' methods. The hundreds of bikers who roar up the bypass on a Sunday already cause a noise nuisance to existing residents in Wellmeadow (many adverse comments on social media), so a development so close to the A458 would be very unpleasant for residents. I object strongly to the siting (and size) of this development.
A2467B09	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	'Flood and water management measures must not displace water elsewhere.' In my view, it is simply impossible to build over huge areas of natural farmland and not cause flooding to properties lower down - it just can't be done, whatever your assurances. Low Town residents are already battling with flooding issues. As a Low Town resident, I object strongly to this aspect of the development. As previously stated, this development is NOT for Bridgnorth's housing need, but about attracting overspill from the West Midlands to re-locate, and to make money for the cash-strapped Shropshire Council. This does NOT mean it is acceptable - it isn't! I object strongly to the 'Tasley Garden Village' development proposals.
A2467B10	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	5.53 As previously stated, Bridgnorth is NOT the second largest principal centre of the Shropshire Council area, but the third. If development strategy is built on this premise, it is erroneous, because Oswestry is a considerably bigger centre. You have cited 'Bridgnorth's extensive services and facilities', yet once again, I list the very overloaded current 'services and facilities' in Bridgnorth: <ul style="list-style-type: none">• The roads are narrow/one way and struggle to accommodate existing traffic• Car parking is already inadequate for current residents and visitors to the town• Although there are 3 supermarkets in Bridgnorth, they are all small with very limited parking• There is ONE fuel station which is already overloaded, creating dangerous queues onto the A442• The road system is already extremely poorly maintained and with additional traffic, will no doubt degrade further• Services such as doctors surgeries are completely overloaded already
A2467B11	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	a) The strategic role of Bridgnorth? It is a market town without direct links to motorways and other transport links – it is not strategically placed at all!
A2467B12	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	c) The housing needs will have already been met by the 500 homes already agreed to be built at Tasley, without the proposed 'garden village' or any further housing. Again, this phrase 'local need' is used glibly – there are no figures or evidence given to support the supposed 'local need' of Bridgnorth! The population of Bridgnorth is NOT growing but FALLING; school admissions clearly show this. As previously mentioned, the Bridgnorth Chamber of Commerce has already stated that there are already sufficient employment buildings available in Bridgnorth, with some existing buildings lying empty. I strongly object to the scale of development planned by Shropshire Council for Bridgnorth.
A2467B13	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	d) The Bridgnorth Chamber of Commerce works hard to attract business to the town; there is a reason why more businesses are NOT attracted to the town – because the road networks are poor and there is no direct link to a motorway. No new road networks have been proposed, so new businesses will NOT be attracted to Bridgnorth. It's as though Shropshire Council think they can provide employment land, and businesses will automatically come – they won't!
A2467B14	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	e & f) In an ideal world, a 'better balance' would be lovely, but it won't ever happen, despite whatever provisions are made – for the reasons cited previously – ie poor transport links - no access to the M54 - poorly maintained roads, specifically the A442.
A2467B15	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Disagree	5.55 Potential businesses will not 'relocate' or 'start-up' for the reasons already stated; the road network is just not up to this. Businesses have already moved OUT of Bridgnorth for this very reason. In an ideal world, everyone would like to live and work in the same town, but this just isn't going to happen, unless Shropshire Council has a plan to build a new road network system connecting the town with motorways. The state of the main A442 going out of Bridgnorth towards Telford is in a dreadful state of repair; it carries a huge amount of traffic, yet has not been resurfaced for many years. It is currently breaking up and only resurfacing will save it from further decay. If additional traffic uses this road, it will only exacerbate this problem.
A2484B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	Policy SP11.2.e. says that Development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the Green Belt (amongst other points). This element of the Policy is supported. However, the proposed removal of land from the Green Belt at Stanmore would not protect the Green Belt and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the Green Belt is, then, in conflict with the stated aim of sub-section 2.e. of Policy SP11, and is also in conflict with Policy DP25 of the Draft Local Plan and the National Planning Policy Framework.
A2485B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S3 Bridgnorth Place Plan Area	Agree	POLICY SP11.2.e. says that development proposals for employment development will be expected to demonstrate the development scheme satisfies the requirements of national and local policies especially relating to the protection of the GREEN BELT, amongst other points. This element of the Policy is supported. However the proposed removal of land from the GREEN BELT at Stanmore would not protect the GREEN BELT and no very special circumstances have been advanced that would justify its removal. The proposal to remove the land from the GREEN BELT is then, in conflict with the stated aim of sub section 2.e. of POLICY SP11, and is also in conflict with POLICY DP25 of the DRAFT LOCAL PLAN AND THE NATIONAL PLANNING POLICY FRAMEWORK.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0028B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The site is located within the AONB. Whilst new housing is needed this should be small-scale and adjacent to the current built environment The site has been promoted numerous times in the past and ultimately not allocated due to constraints present. The site is well used by countless groups, visitors and locals - particularly during the lockdown. The site offers immediate access to wild/semi-wild countryside along the Jack Mytton Way. The site is extremely wet. There have been flooding incidents along main access routes including Watling Street South and Regleth Road. There are serious immediate and wider access issues. Clive Avenue is a particular point of concern, with a narrow carriageway causing problems for vehicles and pedestrians. Increased vehicular movements will exacerbate damage to local roads.
A0028B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 because the site is in an AONB, used by rambling groups, visitors, locals etc via Jack Mytton Way. Major development in an AONB is against NPPF and is against policy DP18. There is no objective need for 200 houses in Church Stretton. Snatchfields flood, has underground spring issues, is too far from schools, has terrain and access problems. Sinkholes opened up in Ragleth Road and Clive Avenue in 2019 after heavy rain. Site failed Council's own SA in 2018. Smaller and brownfield sites would be less damaging. CSTR014 is preferred. Snatchfields is a haven for wildlife and cannot deliver 10% biodiversity net gain.
A0092B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Extremely high quality, amenity area with amazing views and scenery. Historic site is a rare commodity, the loss of which would be environmentally disastrous and impact on health and wellbeing of locals and visitors, who also contribute to the local economy. Such areas of increasing importance due to COVID-19. Access to the site is not safe or appropriate for increased traffic levels with poor access to public transport & potential impacts and risk to pedestrian and cyclist safety. Future residents would be car dependent contrary to national climate change act and carbon emission reduction targets. Do not consider that this the most suitable site out of 33 available - notable that site fails Council's SA test. Recognise need for housing but location is inappropriate. Council needs to carry out in depth housing needs assessment for the area and provide more detailed evidence of demand for housing here. Evidence needs to be provided as to why this is considered to be most suitable site rather than others available. Construction of housing in AONB in conflict with Policies DP13 & 18 & does not meet NPPF criteria which states that major development more damaging than smaller carefully planned development to meet local need based on objective assessment of housing requirements in that area. Council needs to prioritise accessible brownfield sites within easier reach of public transport & amenities. If no option other than single allocation then site CSTR014 (behind School) far more suitable than CSTR021(Snatchfield)
A0105B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The site is in the AONB. No justification for 200 dwellings in C. Stretton. The site floods, is far from schools and had a sinkhole. Brownfield sites should not have been screened out. Wildlife on the site disrupted - contrary to DP13. Poor access to the site, and increase in cars in area. This is major development, so is contrary to DP26. Need for 200 dwellings in C Stretton is wrong. 20% affordable unlikely due to costs. There is no detailed evidence for Exceptional Circumstances for development of this site in the AONB - development can be on alternative sites, such as CSTR014. Noise and pollution will increase.
A0109B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	There is no proof of the need for all these houses. There are more suitable smaller sites, such as CST014. Poor access from the site - narrow with no pavement. Site contrary to NPPF - smaller developments are recommended in an AONB. There is no detailed evidence for Exceptional Circumstances for development of this site in the AONB.
A0125B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	It is recognised that the site referred to under CST016X is a small infill plot less than 0.2 ha but my clients, HF Holidays, who own the land wish to make it clear that the site is currently available as an infill plot and therefore the assessment set out on page 31 (or 29) of the report is not correct in its conclusion and should be amended. To confirm this site is available and the owners are currently contemplating submitting a planning application.
A0151B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Housing target must be based on conclusive evidence of the numbers and types of dwellings. Guideline of 200 is too high. Focus on housing for the young families, those who work in the town and older people. Affordability and close access to facilities are key. CST021 failed your own sustainability assessment [-7]. The Snatchfield site is likely to be expensive to develop enabling developers to argue against the DP3 Affordable housing provision percentage of 20%. I consider this percentage too low anyway. Sites CST001, CST002 and CST017 are examples of sites ideal for affordable small sized properties close to facilities. Location of CST021 does not promote sustainable transport - development here would increase car dependency and worsen existing traffic problems along Clive Avenue and worsen the Watling Street South junction. The household survey conducted by the Community led plan [2020] indicated a desire to protect the landscape and the character of our town. CST021 is in the AONB. Covid has emphasised importance of countryside walks. CST021 would affect an attractive visual area and the quality and extent of important wildlife habitats.
A0152B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Shropshire Council has provided no evidence based on local need for housing in Church Stretton No quantitative analysis of the need for housing growth in Church Stretton has been undertaken. The number of 200 homes has been based on vague statements about the need to grow Church Stretton as a Key Centre The site lies within the Shropshire Hills Area of Outstanding Natural (AONB). This is not addressed. The justification fails to demonstrate exceptional circumstances. Insufficient weight has been afforded to conserving and enhancing the AONB and therefore major development should not be allocated in Church Stretton. Site specific constraints would significantly reduce the viability of the site and the number and type of houses that could be provided. Access to the site is steep and its location and topography make it unsuitable for the provision of specialist housing other alternative sites should be explored further Alternative smaller and brownfield sites exist in Church Stretton and these should be developed CSTR014 should be considered Snatchfield is an unsuitable site to achieve Shropshire Council Policy DP13 (net biodiversity gain) or Policy DP18 (safeguard or enhancement of landscape character and visual amenity)
A0157B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Nothing has changed from the decision to reject this site in 2015. The land is extremely wet and building here would pose a significant increased flood risk to properties lower down the valley. There are serious access problems - Clive Avenue is a particular concern. The carriageway is narrow and there is no pavement or pedestrian walkway anywhere to provide one. There is hardly room for cars to pass each other and certainly not when pedestrians are present. The site is in an AONB. Snatchfield is a valley that offers perhaps the most significant walking access route to the hills east of Church Stretton. There are several smaller and low impact sites already within the town that could provide the sort of low cost practical housing that is required.
A0170B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to inclusion of CST021 within the Plan as: There has been no objective assessment of housing need. Without this, the guideline for Church Stretton is just an arbitrary figure. Local agreement of need for around 20 affordable houses, due to local demographics there are always other properties available. Due to site constraints and associated costs, CST021 will deliver no affordables. As Shropshire's housing need is being exceeded and cross-boundary need accepted (without consultation, so that Green Belt can be protected and valued countryside in Shropshire lost), no contribution is required from Church Stretton and the AONB, other than windfall and affordable dwellings. CST021 was withdrawn from the Local Plan process in 2012 as the Council said it was not suitable for development and was not supported locally. Nothing has changed, except infilling around the site has exacerbated problems. CST021 performs poorly within the Sustainability Appraisal. CSTR014 performs better and is now available. The AONB has greater protection from development than other areas - no major development should occur without exceptional circumstances. Including CST021 when there are alternative sites, several smaller, fails the exceptional circumstances requirement. CST021 also contradicts policy DP26. The 875 responses to the Community Led Plan Household Survey clearly show residents wish to "protect the landscape on both sides of the valley" and "preserve the character and appearance of the town (and) preserving the trees and green spaces". Vehicular access to CST021 is dangerous, demolition of a bungalow will not resolve steep gradients, pinch points to the A49, on-street parking, subsidence on Ragleth Road and conflict between vehicles and pedestrians. Further traffic and pedestrians from development of CST021 would increase risk. No comprehensive traffic survey has been conducted by the Council, a local on highlights problems. CST021 is saturated and there is run-off into the Bridalways and from here into Swains Meadow causing flood risk when it rains. Development would increase these problems and it is unclear how development could alleviate them. Tourism is vital in Church Stretton, development of CST021 (around the Jack Mytton Way) would detract from this and aspirations to increase walking in the hills east of the A49. Jack Mytton Way is well used and would not be the same if through a housing estate. CST021 is an important habitat including for Badgers, Bats, Foxes, Deer, Owls, Buzzards and smaller birds. Development of CST021 contradicts policies DP13 and 18. Development of CST021 would increase smoke pollution (more bonfires, barbecues, wood burning stoves etc), noise pollution (amphitheater effect of the valley) and light pollution. There is insufficient infrastructure, employment and parking in the town centre (need to cross the A49 from the site). Smaller brownfield sites should be pursued.
A0194B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	None
A0195B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	None
A0201B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Site is in AONB - no exceptional circumstances cited by the council. DP18 recognizes the importance of safeguarding landscape character and visual amenity - contradicts this site allocation. Poor roads/access, no change since SAMDev, no suitable public transport, site will have drainage/flood issues. Houses on this site would be too expensive against DP3
A0204B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Poor access to the site - difficult in icy conditions. Increased traffic would cause congestion and pollution. No pavements on Clive Avenue for pedestrians. Noise and light pollution issues with site. Site has drainage issues. Habitats badly affected. Visual amenity affected.
A0206B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Poor access to the site. Increased traffic would cause congestion and pollution. No pavements on Clive Avenue for pedestrians. Noise and light pollution issues with site. Site has drainage issues. Habitats badly affected. Visual amenity affected. It is AONB land.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0235B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The Snatchfields site likely to yield a reduced number of houses and unlikely to deliver required affordable homes due to economic viability arguments relating to expensive site development & infrastructure costs. The chosen site for development at Snatchfield has hilly terrain, drainage issues and will require a new road so prove expensive to develop on. There is a specific need for affordable homes as available information confirms there are proportionally fewer small houses and flats at affordable prices compared to Shropshire as a whole, & a shortage of smaller affordable properties A more suitable site (CST014 "Land adjacent to the School) has become available which has lower landscape sensitive, more suitable terrain, road access and is within easier walking distance of school, bus stop and town centre. As this site is likely to be less expensive to develop it is more likely to be economic to provide affordable housing on it. This site should be considered as a more suitable alternative to the land at Snatchfields
A0236B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	More housing is needed in England but Church Stretton should contribute to meeting that need in a way appropriate to a town fully within an AONB. Shropshire Council needs to <ul style="list-style-type: none"> • base housing plans on real needs determined by full housing needs assessment; • reflect feedback from previous consultations and take heed of previous decisions both at Council and Inspectorate level. The Snatchfield site is unsuited to development. key issues with the site are: (a) It contravenes NPPF - strategic transport and site-specific transport issues. Shropshire Council cannot demonstrate that it is a suitable site to promote sustainable transport. The housing would be up steep hills accessed by a lengthy access route & few residents would walk. (b) It contravenes Shropshire Council Policy DP13 (net biodiversity gain) and Policy DP18 (safeguard or enhancement of landscape character and visual amenity); (c) access problems- Clive Avenue "pinch point" already problematic & additional traffic movements would increase highway issues (d) drainage problems- modest rainfall creates continuous run off down the leading to localised flooding at the lower end of Chelmick Close which freezes in winter creating dangerous conditions (e) Development would create a significant, detrimental intrusion into the AONB, affecting views' the AONB as an amenity asset and the visitor experience; visitors being needed to sustain local businesses; Jack Mytton way is a major walking route (f) significant local opposition. (f) Snatchfield is a demonstrably unsustainable site, as scored by Shropshire Council's own Sustainability Assessment. Alternative sites more environmentally acceptable with far lower detrimental impact, and likely to be more supported locally. CST021 should be replaced with site CST014
A0237B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	There should not be any major developments in an AONB contrary to NPPF & other opportunities to in-fill or to develop in locations outside AONB should be pursued. The outline plans for a major development here are completely at odds with NPPF - Section 15 – Conserving and Enhancing the Natural Environment Top down approach does not properly assess and match the new housing allocation to the actual needs of local people or the location of employment opportunities and public services Lack of demonstrable need for more housing - (FOAHN) does not include assess of the actual housing needs in the Church Stretton community. Insufficient infrastructure and services to support growth. Site location is unsuitable- elevated & distant from the town both in terms of distance and elevation. A selection of in-fill/ smaller sites in brownfield or closer to town locations would provide a more diverse stock of housing to meet the aspirations of a wider population, although Site Assessments process deliberately screen out and exclude any small (mostly brownfield) sites of less than 0.5ha Further development would greatly diminish biodiversity, the diverse natural landscape and views and amenity for walkers. Proposal inconsistent with the Council's Policy DP13 – The Natural Environment which requires development must deliver at least a 10% net gain for biodiversity in accordance with the Environment Act. Poor & hazardous access . Increased traffic will, significantly increase the danger to pedestrians in this area contra to Paragraph 108 of the NPPF that states that it should be ensured that safe and suitable access can be achieved for all. The ability for new residents to easily and sustainably access the town's shops and facilities should be taken into account. The Sustainability Appraisal for the site resulted in a failure score. Most journeys will be taken by car as no attractive/practical alternative sustainable options contrary to Council's Policy DP 12 – Managing Carbon Emissions Increased traffic and carbon emission increases will result- already a problem with existing levels of traffic on the lower part of Clive Avenue/ junction with Watling Street.
A0257B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Shropshire Council have provided no credible evidence of exceptional circumstances for AONB development. Without an OAHN it seems that 56 unneeded homes are to be built in order to provide 14 needed affordable homes! Costly development may reduce affordable numbers. Other sites are more suitable. No detailed review of the site taken or ecological survey. No surveys on how to protect trees, priority habitats, heritage or archaeological assessments. The 200 allocation is not based on local needs. The site failed the SA. Shropshire deliberately screen out brownfield sites of <0.5ha. The guideline could be reached through existing brownfield conversions. The Community-Led Plan Group in 2020 showed that there was a desire to preserve and protect the landscape and character/appearance of the town. Smaller sites would limit the damage to the AONB. Church Stretton's Housing Needs Survey (2020) identified a great need for adapted homes (8%) than affordable homes (5%). But DP3 wants more, but 20% would affect a developer's profits, as other guidelines are needed at a cost (drainage issues, highways etc.). The site would not deliver 10% biodiversity net gain (contrary to DP13) – it is a wildlife haven and a priority habitat. The site is contrary to DP18. The site would rely on private transport, poor footpaths in area. There will be over 600 additional vehicle movements per day should the site go ahead. Poor access off Clive Avenue and Ragleth Road, with poor/no paths. The site is in Flood Zone 3. Policies that work for Shrewsbury or Oswestry cannot meet the needs and requirements of a rural community of the nature of Church Stretton, and in particular of communities in Areas of Outstanding Natural Beauty.
A0263B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Objects; reasons are impact on the AONB and access to countryside and Jack Mytton Way; plan doesn't sufficiently demonstrate the need for this level of housing; lack of affordables in the plan; major development in AONB should be refused; Policy DP13 and DP18 yo protect biodiversity have not been properly applied to this site; access to the site is steep and not suitable for older peoples needs
Page 164 A0292B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Understand the need for new housing and identification of Church Stretton as a Key Centre. However, Church Stretton is located in the centre of an AONB, therefore outward expansion should be a last resort. CST021 is unsuitable for development, especially at the proposed scale. Access (or lack of) via a convoluted route with steep gradients, narrow points where cars cannot pass, presence of parked vehicles which narrow the route further and difficult junctions is unsuitable for the increased traffic associated with development of CST021 (nor the larger vehicles during construction). Ragleth Road has also suffered from sink holes, CST021 would double traffic on this road. Traffic at the bottom part of Clive Avenue would increase by around two thirds, this is the most problematic part of the access route as it is very narrow, on a blind/steep hill with busy junctions at either end. It also has no pavements meaning it is particularly dangerous for pedestrians. CST021 is 1km from the town centre, parts of the route are steep/unlit which is unattractive to pedestrians and cyclists. There are also no bus routes near the site and this is unlikely to change given its location, this will increase use of the car and may encourage people to shop outside the town. Development of CST021 will directly impact on one of the most of popular walking routes out of the town towards the Stretton Hills and due to increased road traffic indirectly effect other key paths (from Clive Avenue and Poplar Drive). This will negatively impact on the Church Stretton's attraction as a walking town, a key part of the local economy. Accept the desperate need for housing in the Country, but requiring a maximum of 15% as affordable housing, means the main ddrive is to make money not address the housing crisis - more affordable housing should be required.
A0293B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to identification of CST021 as a proposed allocation. Development of CST021 would have a detrimental environmental and recreational impact on the AONB. It offers access between the town/railway station and the eastern hills. Enclosing the route in housing will diminish it and disadvantage its users (particularly the elderly for which it represents the only accessible countryside). Development of CST021 contradicts Government aspirations to protect AONB's as expressed within the recent Planning White Paper and ignores the Council's responsibility to conserve and 'enhance' this valuable legacy of an AONB. Clive Avenue is a dangerous pinch-point with no pedestrian pavements and Ragleth road is steep, experience run-off and sink holes. Additional traffic associated with CST021 must pass these roads and will exacerbate existing issues and there is no way to mitigate this impact. The exceptional circumstances identified for CST021 fail the requirements of para 172 of the NPPF and development of CST021 would not support proposed policies DP1 and DP3. This is because: There has been no objective assessment of housing need (the assessment undertaken is not locally informed), the housing delivered would be entirely disproportionate in meeting identified local need (DP1) and providing affordable housing (DP3) for the young people and key workers (only a small number of affordables will be delivered and these may even occur off-site). The Council concludes there will be no significant environmental/landscape/recreational constraints. To reach this conclusion there must be publicly available ecological, recreational usage, heritage and archaeological, flood risk and road safety assessments. Do not consider they have been undertaken, otherwise there would be recognition that CST021 contains one of the few remaining ancient meadows in the county, numerous species/habitats and that scores of people (locals and visitors) access the eastern hills on a daily basis via the Jack Mytton Way, which runs through the site. There are alternative sites that offer the potential to meet housing need, protect the AONB and have better/safer highway access, these are the sites at Ley Gardens (CST014), the police & fire station and Woodbank House.
A0294B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to identification of CST021 as a proposed allocation There are smaller and more suitable alternative sites which have not been considered. A recent 'Household Survey' conducted by the Community Led Plan Group, recorded a desire to protect the landscape on both sides of the valley and preserve the character of the town. Large scale development at CST021 will not achieve this objective as it is clearly visible from every hill based view point around the town, including Hazler, Helmeth, Hope Bowdler, Caradoc, Haddon, Burway and Ashlett's. Local housing need is for affordable homes for the young and key workers and it makes no sense to ignore smaller brown field sites in this process or the re-purposing of a number of older large buildings within the town (this would maintain the fabric and character of the town (desirable given its tourist status) and provide more suitable housing to meet the identified need (essential)). There is no need to develop in an inappropriate area (CST021), away from shops, services, transport and health and education facilities. Are we really aiming to meet local need or make a profit for developers. Development of CST021 will enhance risk of flooding in Watling Street, an identified high risk flood zone (level 3). There are high levels of water run-off from Ragleth Hill and heavy rain sees CST021 heavily waterlogged and sheets of run off water flow over the slopes and into the wet flush area and main stream, Snatchfield Brook. CST021 is a natural water-soak which would be destroyed by development and extensive works would need to be carried out to prevent localised flooding at the bottom of the hill. In addition to visible run-off from Ragleth Hill, there is well documented dangerous underground run-off along the slope of Ragleth Road, which has repeatedly caused sink holes to emerge on the road surface despite attempted fixes. This is the only access road to CST021 and would need to be used for all heavy construction traffic. The ongoing threat to the ongoing integrity of this access road to our homes, particularly for emergency services, is a major cause for concern. Development of CST021 ignores the 2019 Target Amendment in respect of carbon emissions, generating hundreds of additional vehicular movements each day (A 2020 council study suggested 5.86 vehicle movements per household per 12 hour period). CST021 is a car dependent site, there is no access for public transport, neither is their local (walkable) employment to sustain potential residents, meaning most new residents will be commuters. Walking distance to town services is over 1km if using Jack Mytton bridleway, longer if using the metaled but non pedestrianised, and dangerous, Clive avenue. Extensive assessments of the road safety issues have been undertaken by the local community, but am unaware of any such undertaking by the Council, who are either ignorant or in denial about vehicle and pedestrian safety
A0304B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to inclusion of CST021 within the Plan as it would not be in the public interest as it's location is not sustainable and does not meet the criteria of Shropshire Councils 2018 Sustainability Appraisal. Development would not meet the needs identified within the recent Town Council Housing Needs Survey. Concerned that topography of site would not allow for required affordable housing deliverability. There is a failure to demonstrate exceptional circumstances for the site and there is an alternative deliverable site at CST014 which would be less harmful to the Shropshire Hills AONB. Concerns about flooding to the land and biodiversity. No material change to make the site suitable following rejection many times in the past.
A0305B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to inclusion of CST021 within the Plan as an act of environmental vandalism to 3 medieval meadows of special environmental interest which should be preserved. Concerns about flooding and location of the site with regards to transport and amenity links and inadequate pedestrian access. No material change to make the site suitable following rejection many times in the past.
A0308B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to inclusion of CST021 within the Plan as location is not sustainable and does not meet needs of Church Stretton residents. Site is too far from amenities with inadequate vehicular and pedestrian access. Other site available on Burway or next to the school which are suitable for development. Development would cause light pollution and damage wildlife.
A0312B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	No local need evidence for these houses. There are brownfield sites more suitable, The site is home to biodiversity and wildlife. Ragleth road is poor. Clive avenue is a dangerous pinch point for pedestrians

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0320B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to Snatchfields being developed. The access to the site is dangerous and convoluted. To permit more building work and inevitably more traffic would be irresponsible on an already dangerous road putting pedestrians at even greater risk than they are now. This access would result in unnecessary extra pollution and noise as this is not the direct route to Snatchfield. A sink hole appeared on Ragleth Road a year or two ago – is the road stable enough to cope with even more traffic? The proposal is to build on a very beautiful and ancient meadow which leads to some of the Shropshire Hills. Looking at Snatchfield it is clear that water drains down the valley towards the town. More development will make this worse. Finally, tourism for the town is very important. Many people visit the town to enjoy the surrounding countryside and do not wish to see yet another housing estate as the town sprawls out whilst in the centre there are sites suitable for redevelopment (respondent ref; Form 1)
A0322B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I understand the need for affordable housing. However it has already been admitted that the chances of a property developer wanting to build affordable houses is very unlikely. This will be somewhere for the “better off” to invest their money and to live in a large under occupied house. There have been plenty of other similar projects in the town where large houses are either lived on by one or two people or even empty. This does not help the town, or local families and is a disaster for the beautiful countryside that is already struggling to survive. Please therefore do not build on this meadow that during “lockdown” gave me somewhere very lovely and peaceful to walk each day important for physical and mental health.
A0324B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Strongly believe that no exceptional circumstances exist and Shropshire Council have not shown that they do. Where is the evidence that 200 houses are needed in Church Stretton. What is needed, as a recent housing needs survey has clearly shown is more affordable housing (in perpetuity) and smaller adapted homes in a suitable location, easily accessible to public transport and within easy walking distance of town amenities. The alleged “Affordable houses” in the proposed Snatchfields development may be initially affordable in price but their location does not match the truly affordable needs of residents in such designated housing. The site does not achieve the Council’s own Affordable Housing Provision DP3 and specialist housing provision Policy DP1. Permission for development of this site has been refused several times before. What has changed to now to make the site acceptable? The site has failed Shropshire Councils own Sustainability Assessment. The site does nothing to promote Sustainable Transport(NPPF Section 9) and would be highly car dependent. This would also be contrary to Shropshire Council’s own carbon reduction plans (40% of the county emissions come from transport.) Paragraphs 102, 103 and 108 of the National Planning Policy Framework (NPPF) require sites to demonstrate the ability to promote sustainable transport. The Snatchfields site is an important “soak” for surface run off from the surrounding hills. Any building development of the site (even with attenuation tanks and a % of additional capacity etc.) will increase stress on the Snatchfields brook and cause flooding downstream. Climate change is making this worse and design of the Snatchfields open culvert as it runs through The Bridleways is already causing considerable erosion at the point where the concrete culvert ends and during extreme rainfall it gets close to maximum capacity. Site Assessments: Church Stretton Place Plan Area (November 2018) Smaller sites for development have been deliberately screened out. The view that smaller sites are uneconomic does not stand up to scrutiny. DP13 – The Natural Environment This policy outlines that all development must deliver at least 10% net gain for biodiversity. Development of Snatchfields will destroy rather than enhance existing high levels of biodiversity.
A0332B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The housing guideline proposed for Church Stretton over-estimates local need and may result in dwelling types unsuited to local demographics There is a need to consider the capacity of other sites - small sites and CSTR014 represent a more effective means of meeting need than CST021. Precedent at Arnside and Silverdale: Removal of sites from AONB and adoption of separate Development Plan Document aimed at unique needs, giving priority to small sites with relevant housing. Object to inclusion of CST021 within the Plan as: There is no proven exceptional need or public interest to develop within the AONB, required by para 172 of the NPPF. There are also alternative options. Planning Permission has previously, correctly, been refused. Support the Town Council report regarding the unsustainability of the site. The site fails the Shropshire Council Sustainability Appraisal. The site assessment process excluded smaller sites better located. more capable of meeting local need and in line with local wishes. Development of CST021 is unlikely to meet either the preferred housing mix (DP1) and potentially not economically viable to provide affordables (DP3). CST021 is contrary to draft policies DP13 (natural environment) and DP18 (built environment). Contrary to paras 103 and 108 of the NPPF and the Climate Change Act (2009)/Target Amendments Order (2019) as CST021 will generate high car usage, has limited transport options and does not have adequate/safe access. Development of CST021 will exacerbate existing general safety issues on unsuitable roads. Examples include Ragleth Road (subsidence), ‘blind’ exit from The Narrows, pedestrian safety in Clive Ave (children, walkers and cyclists), nursery, church & nursing home at Watling St junction, Bridleways junction, no turning opportunities, steep gradients, impact of HGV site traffic, one way in and out for all traffic, access for emergency vehicles. Contrary to draft Policy DP26 (AONBs). CST021 will have significant landscape, environmental and recreational impact. Access to CST021 is via a road in flood zone 3. The catchment is identified as susceptible to the cumulative effect of development - flooding and run-off from higher ground would affect CST021 and have a knock-on effects elsewhere
A0333B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The housing guideline proposed for Church Stretton over-estimates local need and may result in dwelling types unsuited to local demographics There is a need to consider the capacity of other sites - small sites and CSTR014 represent a more effective means of meeting need than CST021. Precedent at Arnside and Silverdale: Removal of sites from AONB and adoption of separate Development Plan Document aimed at unique needs, giving priority to small sites with relevant housing. CST021 is contrary to draft policies DP13 (natural environment) and DP18 (built environment). Contrary to paras 103 and 108 of the NPPF and the Climate Change Act (2009)/Target Amendments Order (2019) as CST021 will generate high car usage, has limited transport options and does not have adequate/safe access. Development of CST021 will exacerbate existing general safety issues on unsuitable roads. Examples include Ragleth Road (subsidence), ‘blind’ exit from The Narrows, pedestrian safety in Clive Ave (children, walkers and cyclists), nursery, church & nursing home at Watling St junction, Bridleways junction, no turning opportunities, steep gradients, impact of HGV site traffic, one way in and out for all traffic, access for emergency vehicles. Contrary to draft Policy DP26 (AONBs). CST021 will have significant landscape, environmental and recreational impact. Access to CST021 is via a road in flood zone 3. The catchment is identified as susceptible to the cumulative effect of development - flooding and run-off from higher ground would affect CST021 and have a knock-on effects elsewhere
A0335B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to identification of CST021 as a site allocation as: CST021 is located wholly within the AONB. Its development contravenes draft Policy DP26, which specifies that development in the AONB which is likely to have a significant adverse effect on the special qualities of the AONB will be resisted in the interest of conserving the area’s natural beauty. Further, para 172 of the NPPF states major development should only occur within the AONB where there are exceptional circumstances, development of CST021 represents major development. How can development in the AONB be proposed to protect sites in the Black Country (accepting cross boundary need) and without an assessment of housing need. CST021 was considered unsuitable for development within the 2012 Plan review and scores poorly against Sustainability Appraisal criteria. Access to CST021 is convoluted. The route includes Watling Street South (cars and larger vehicles are often parked on both sides of the road due to lack of off-street parking), Clive Avenue (steep, narrow in places and has no pavements causing difficulties for pedestrians - a local survey highlights issues on this road), Ragleth Road (suffers from subsidence and sink holes) and Chelmick Drive (quiet road). Development in the vicinity has placed increased pressure on the access route. Development of CST021 would increase traffic movements and exacerbate existing problems. It would also effect the street scene. The Jack Mytton Way which runs through CST021 is a well known/used walking route that provides a ‘sense of place’ within the AONB. Development of CST021 would represent placeless urban sprawl and deter residents/visitors. CST021 has existing serious water saturation problems. Surface water, following a heavy downpour, flows into The Bridleways causing flooding in this established residential area. Development would increase this problem. CST021 will increase air (wood burning/bonfires), noise (garden machinery and vehicles - amphitheatre effect of the vally is well documented) and light pollution. CST021 is a habitat for many species, development would contradict draft Policy DP13. CST021 is the last remaining ancient meadow in Church Stretton and must be preserved and protected for future generations to explore, development would contradict draft Policy DP18. Support the Town Council submission that CST021 is unsuitable for development.
A0337B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to identification of CST021 as a site allocation as: It is located within the AONB. Past Planning Applications on CST021 have failed and the SoS has stated that it should not be built on. Church Stretton is heavil reliant on tourism, it makes no sense to develop CST021, a site well used by tourists and local walking groups for recreation. CST021 takes pressure off Carding Mill Valley, which suffers from overcrowding. Noise and pollution from CST021 would be unacceptable for residents of the Chelmick Estate and Hazler Orchard. Access to CST021 is inappropriate and dangerous for construction traffic (particularly in the winter) as these are steep residential streets. CST021 contains important habitats and species.
A0338B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Strongly disagree with the inclusion of CST021 within the Local Plan as Access to CST021 is unsuitable, roads are steep and in winter the roads are very slippy and it would not be possible to reach the site. The community conducted a Traffic Survey in 2019, which should be considered. Residents of CST021 would have limited job opportunities in the town. The Exceptional Circumstances Statement contains no assessment of local housing need, no data on the economic impact of developing (or not) CST021 and no detailed review of environmental impacts of developing CST021.. The need for affordable housing in Church Stretton could be met through alternative small or less environmentally damaging sites. CST021 is a haven for wildlife. CST021 is well used by walkers enjoying the AONB and bringing tourists to Church Stretton. There is a need to consider alternative options, particularly CSTR014, development fo which would have a much smaller impact on the AONB. Within the SAMDev Plan site assessment CSTR014 performed much better than CST021 as: It is within walking distance of a regular bus service, schools, sports and recreation facilities and the town centre/main employment areas. Access could be provided from the housing to the south, in addition to the track between the school and its playing fields. It is not within a SAC, SPA, Ramsar Site, SSSI, national/local nature reserve, wildlife site, ancient woodland or RIG. the site was previously promoted with no legal/ownership constraints. Part of the site is in the flood zone, but the remainder is developable. Community supported the site for housing during SAMDev, although this has not been tested since.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0466B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Strongly object to Snatchfields. 1) Transport - car dependency for access to services; greater emissions and lower air quality; Clive Avenue too narrow with no footpath and pinchpoints for vehicle/pedestrian interaction; used by parents with children, walkers and mobility vehicles; only road lit at night; Ragleth Rd has sinkholes - HGV traffic will increase problem. 2) AONB - last remaining field of three original oneast side of A49 - significant to the AONB. The Jack Myton Way runs through the site. Walks are enjoyed by locals and tourists. Site does not conform to the wishes of the community regarding the protection of the landscape of the hills and to preserve the character of the town.
A0474B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to the Church Stretton strategy because the housing guideline is merely a pro-rata share of the Shropshire housing requirement. The Church Stretton housing guideline fails to assess housing need, appropriate dwelling mix and affordable housing requirement and this has not been considered for least 10 years. This will affect the implementation of the Shropshire test in Policy SP1 as the housing guideline does not match the needs of the community
A0474B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to the AONB Exceptional Circumstances Statement which fails to meet the NPPF three part test due to (1) the lack of evidence of housing need; (2) absence of an economic justification for development and (3) the failure to consider alternative and more sustainable sites proposed by the local community.
A0474B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 due to insufficient evidence to justify large scale development in Church Stretton especially at Snatchfields Farm. CST021 has biodiversity value as the last medieval water meadow in the town with woodland habitat on bird's feeding and roosting flight paths. CST021 has local amenity value due to presence of Jack Myton Way through the site and views out to AONB. CST021 is too distant from the town services and schools. A local housing survey indicated a need for smaller adapted living properties with significant affordable housing and it is questioned whether this can be delivered with the likely significant development costs for Snatchfields Farm. Development of CST021 will increase traffic into Clive Avenue identified by experience and a resident Traffic Survey as a dangerous road due to speeding and poor driving. The County Transport Statement fails to assess issues of road safety and so the Council fails to consider road safety issues from poor highway maintenance, on-street parking, traffic volumes and speeding.
A0475B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 land at Snatchfields Farm because it will increase traffic flows through Clive Avenue which already carries significant and sometimes dangerous levels of traffic. The resulting issues of road safety and air pollution raises three significant but often overlooked considerations: (1) highway safety issues and traffic generated air pollution affect the use of local roads as safe routes for children walking to school; (2) where proposed developments would increase traffic flows on local roads there may be a need for off-site infrastructure investment such as provision of pedestrian footways and (3) increasing levels of traffic on local urban roads poses some risk to urban biodiversity from wildlife passing through the town/village and to residents pets. These safety issues may be best served by not permitting further housing developments especially at CST021 land at Snatchfields Farm.
A0480B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to site CST021. There is no evidence that Shropshire Council have based the housing needs on objectively assessed evidence in its FOAHN. The Council cannot demonstrate how it has achieved a figure of 200+ houses to be built and why Church Stretton is nominated a Key Centre. The SA process scored Snatchfield as an unsustainable site. It is highly unlikely that the developer will provide 20% affordable housing. Development will not achieve 10% biodiversity net gain and is contrary to DP13. The effect of development will be landscape wide and impact visually on the AONB. This will damage wildlife and the tourist economy. There is no evidence that this development in the AONB is sensitive and a case of last resort. The development is not in the public interest and does not meet the Exceptional Circumstances test in NPPF. It undermines DP13 and DP18. The increase in traffic is not sustainable, will impact the road surface and will be dangerous. Existing flooding problems will be exacerbated.
A0481B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to site CST021. There is no evidence that Shropshire Council have based the housing needs on objectively assessed evidence. The Council cannot demonstrate how it has achieved a figure of 200+ houses to be built and the FOAHN is not fit for purpose. The SA process scored Snatchfield as an unsustainable site. Development will not meet policies DP1 and DP3 and the developer will argue for a reduced number of affordable houses. Previous affordable housing has been sold off after 5 years. No evidence that the Council actually addresses specific local housing needs. The site will not meet policies DP13 and DP18. Snatchfield is a corridor for wildlife and the impact of the housing on nature will be significant, particularly with the addition of dogs and cats in the neighbourhood. The bridleway has seen a considerable increase in use of this area. The view to the Longmynd and the backdrop of the woodland is an asset to the area and developing it will impact biodiversity as well as the aesthetics. The site is an historic landscape and should be protected (respondent ref: page 1). Development disregards NPPF on major development in an AONB. There is no evidence of that the Council has met the exceptional circumstances, public interest and environmental harm tests. Vehicle journeys will increase carbon emissions. The only vehicular access is unsafe for pedestrians and passes through Flood Zone 3. Run off from the hardstanding in the development will increase flood risk elsewhere (respondent ref: page 2). The Council has deliberately screened out small brownfield sites. CST014 is a more suitable site. A separate DPD for the AONB should be prepared. The site will not promote the use of sustainable transport (respondent ref: page 3). The consultation process has not been transparent and there are more people who want to have a say. The consultation process should have been extended due to Covid restrictions (respondent ref: page 4). Respondent questions the following: how will affordable housing remain as such; how many local people are in housing need; why do windfall sites never address affordable housing need; how will this development help with the government's Levelling Up agenda; where will then new residents work (respondent ref page 4). Other questions: how does the travel to work outside Church Stretton fit with the Council's Climate Emergency; how will existing road and rail links be promoted above the road network: how does development fit with air quality regulations for Lond Mynd SSSI; why is greenfield preferred; why is development not focussed in Craven Arms; why is the Council overriding the existing quality of life of the Church Stretton community (respondent ref: page 5).
A0482B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to site CST021. There is no evidence that Shropshire Council have based the housing needs on objectively assessed evidence in its FOAHN. The Council cannot demonstrate how it has achieved a figure of 200+ houses to be built and why Church Stretton is nominated a Key Centre. The SA process scored Snatchfield as an unsustainable site. It is highly unlikely that the developer will provide 20% affordable housing. Development will not achieve 10% biodiversity net gain and is contrary to DP13. The effect of development will be landscape wide and impact visually on the AONB. This will damage wildlife and the tourist economy. There is no evidence that this development in the AONB is sensitive and a case of last resort. The development is not in the public interest and does not meet the Exceptional Circumstances test in NPPF. It undermines DP13 and DP18. The increase in traffic is not sustainable, will impact the road surface and will be dangerous. Existing flooding problems will be exacerbated.
A0483B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to site CST021. There is no evidence that Shropshire Council have based the housing needs on objectively assessed evidence in its FOAHN. The Council cannot demonstrate how it has achieved a figure of 200+ houses to be built and why Church Stretton is nominated a Key Centre. The SA process scored Snatchfield as an unsustainable site. It is highly unlikely that the developer will provide 20% affordable housing. Development will not achieve 10% biodiversity net gain and is contrary to DP13. The effect of development will be landscape wide and impact visually on the AONB. This will damage wildlife and the tourist economy. There is no evidence that this development in the AONB is sensitive and a case of last resort. The development is not in the public interest and does not meet the Exceptional Circumstances test in NPPF. It undermines DP13 and DP18. The increase in traffic is not sustainable, will impact the road surface and will be dangerous. Existing flooding problems will be exacerbated.
A0486B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Concerned about surface water flooding downstream of the site which contributes to the creation of Flood Zone 3 on the valley floor. If this site is developed it is imperative that the sustainable drainage scheme ensures that the current surface water flooding is dealt with as well as additional runoff from development. Object to this policy on these grounds.
A0492B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021. The exceptional circumstances test is not met. Other brownfield sites have been disregarded and should be used instead. Extra vehicle movements would exacerbate already dangerous and difficult roads. Landscape and visual amenity are not being safeguarded. This site has been rejected at least 7 times already.
A0493B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to this site. There is no assessment of housing needs for Church Stretton. The exceptional circumstances test is not met. Development will increase flooding downstream. The access to the site is in Flood Zone 3. Existing roads have not been designed to accommodate the extra traffic from the site. This site is a medieval meadow. Site CSTR014 should be developed instead.
A0500B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Opposes allocation of the site for a range of reasons including lack of community support; the impact on the immediate and surrounding ecology and biodiversity of the area; no clear rationale for the need for 200 homes in Church Stretton; restrictive vehicle access to the site and impact on wider highway network; impact on the AONB and not protecting key characteristics of the AONB in Church Stretton
A0505B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area		Object to inclusion of CST021 within the Plan as: There has been no objective assessment of housing need. Without this, the guideline for Church Stretton is just an arbitrary figure. Local agreement of need for around 20 affordable houses, due to local demographics there are always other properties available. Due to site constraints and associated costs, CST021 will deliver no affordables. As Shropshire's housing need is being exceeded and cross-boundary need accepted (without consultation, so that Green Belt can be protected and valued countryside in Shropshire lost), no contribution is required from Church Stretton and the AONB, other than windfall and affordable dwellings. CST021 was withdrawn from the Local Plan process in 2012 as the Council said it was not suitable for development and was not supported locally. Nothing has changed, except infilling around the site has exacerbated problems. CST021 performs poorly within the Sustainability Appraisal. CSTR014 performs better and is now available. The AONB has greater protection from development than other areas - no major development should occur without exceptional circumstances. Including CST021 when there are alternative sites, several smaller, fails the exceptional circumstances requirement. CST021 also contradicts policy DP26. The 875 responses to the Community Led Plan Household Survey clearly show residents wish to "protect the landscape on both sides of the valley" and "preserve the character and appearance of the town (and) preserving the trees and green spaces". Vehicular access to CST021 is dangerous, demolition of a bungalow will not resolve steep gradients, pinch points to the A49, on-street parking, subsidence on Ragleth Road and conflict between vehicles and pedestrians. Further traffic and pedestrians from development of CST021 would increase risk. No comprehensive traffic survey has been conducted by the Council, a local on highlights problems. CST021 is saturated and there is run-off into the Bridalways and from here into Swains Meadow causing flood risk when it rains. Development would increase these problems and it is unclear how development could alleviate them. Tourism is vital in Church Stretton, development of CST021 (around the Jack Myton Way) would detract from this and aspirations to increase walking in the hills east of the A49. Jack Myton Way is well used and would not be the same if through a housing estate. CST021 is an important habitat including for Badgers, Bats, Foxes, Deer, Owls, Buzzards and smaller birds. Development of CST021 contradicts policies DP13 and 18. Development of CST021 would increase smoke pollution (more bonfires, barbecues, wood burning stoves etc), noise pollution (amphitheater effect of the valley) and light pollution. There is insufficient infrastructure, employment and parking in the town centre (need to cross the A49 from the site). Smaller brownfield sites should be pursued.
A0506B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Development on the hillsides should be resisted, as urban creep is producing increased water roll off, exac
A0506B04	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	This map shows the development boundary for Church Stretton. Anything outside that boundary is regarded as open countryside. However, in the main, although the boundary is drawn tightly around the existing built up area, it excludes some parts of the town, such as Ley Gardens, Street Meadow and Leasowes Close, for no apparent good reason. The Town Council request that this is corrected. In addition, any new sites agreed as part of this consultation should be included in the development boundary.
A0506B07	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Under this section the Town Council requests the inclusion of the heritage assets of Hazler Hill, Ragleth Hill and Ancient Woodland, Helmeth Hill and the Lawley which lie to the east of the A49. More importantly the Ancient Scheduled Monument of Caer Caradoc multivallate Hill Fort has been omitted from this section of the 'Explanation'. This should be corrected

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0614B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object: No exceptional circumstances have been proved; no evidence of objectively assessed local housing need has been made. Concern about environmental and heritage asset being lost, along with recreational and footpath access loss. Suggest alternative sites in Church Stretton are more appropriate
A0617B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to allocation of the site, as it doesn't meet Shropshire Councils Sustainability appraisal, and I can find no evidence of Shropshire Council fulfilling it's obligations to carry out updated and proper assessments (or any in some case) of environmental impacts and impacts on the recreational use and public footpath/bridleway use on Snatchfields.
A0623B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Site will require car access - increased emissions. Poor, single access route. Additional flood risk.
A0628B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Site is unsustainable for housing. Dependent on car travel - no pavements for pedestrians. Affordable housing here would be ridiculous. Contrary to AONB status. Site should be a nature conservation.
A0630B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Site is in AONB, pollution increase, visual effects, inadequate access proposed, pollution increase due to increase car numbers, SC is noticeably lacking in a policy that addresses climate problems. Housing guideline too high,
A0634B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	This site was withdrawn from SAMDev and nothing has changed since. The FOAHN is not finished and the figure of 200 for Church Stretton is arbitrary. There are plenty of other houses for sale. The costs of building on this site mean that affordable houses will not be delivered. There are other sites available. Major development in an AONB is against NPPF. Clive Avenue has pinch points and is dangerous and hundreds more vehicle journeys will make things even worse. Surface water will flood the Bridalways and the town if the site is developed. This ancient meadow must be retained. The site is an amphitheatre and development will create nuisance throughout the valley with light pollution being immense.
A0636B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021. Road infrastructure is totally inadequate to cater for the projected traffic volume from both construction vehicles and proposed additional residents. CST021 just produces more traffic congestion through housing estates and narrow roads. Regarding the exceptional circumstances argument, local housing requirements are not realistically taken into account. The Arnside and Silverdale model should be used to protect the AONB. The housing requirement is not objectively derived and is top down, ignoring local wishes. Small and brownfield sites have been deliberately screened out. The Communities wishes are being ignored. CST014 should be allocated. Safe and suitable access to Snatchfield, via the Clive Avenue Conflict Area route, cannot be demonstrated. Shropshire Council Flood Risk Assessment for the site is far from assuring. A very valuable environmental asset will be lost for ever should this site be developed contrary to policies DP13 and DP18. The site has historic value. Other professional opinions are against this site; the Green Planning Studio Position Statements – Objection to Policy S5 (Failure to Conform with National Policy) and Objection to CST021 Site (Specific Objections); Previous Regulation 18 Consultation and the Church Stretton Housing Survey have expressed local opposition; The Strettons Civic Society response to Preferred Site Consultation. In my view CST021 site development is not a plan to provide housing for local Church Stretton residents in need of housing. The site is uphill and remote for young families and encourages the use of motor cars rather than walking to local amenities and school.
A0640B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Not based on any objective assessment of housing needs in Church Stretton. Although 70 homes proposed there are key restrictions that will likely result in developers having to reduce this number or build higher 3 storey homes which will affect the visual impact and could result in lower numbers of affordable housing. The exceptional circumstances statement has not succeeded in making a valid case for building on this site. Proposal contradicts spirit of Policy DP26. Concerned also about impact of additional traffic to the town. Several previous attempts to develop the site have failed and there are no material differences in the local circumstances or new grounds.
A0643B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 as there is another more suitable site at CSTR014. CSTR014 is allocated under SAMDEV to provide replacement sports facilities to allow for development on school playing fields at CSTR018. Understood that CSTR018 has proved unviable for development and has been deallocated from the SAMDEV. Consequently CSTR014 is no longer required for replacement school facilities and could be used for housing as it's of similar size to CST021. CSTR014 performed better in every respect in the Housing Site Assessment than CST021 as it's closer to amenities, bus routes, schools and has no legal constraints. Community is in favour of CSTR014 and is supported by the Town Council as an alternative to CST021.
A0643B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 as allocation of 200 homes is arbitrary and does not take account of the needs of the town. No objective housing needs survey undertaken. ONS figures indicate Shropshire's population growth will be driven by 65+ who are likely purchasers and will likely exacerbate the demographic challenges in Church Stretton. The housing need figures are inflated to reflect the needs of the Black Country requirement. CST021 should be removed and an objective assessment of housing needs should be conducted.
A0643B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 as unsuitable for development as indicated in the Sustainability Assessment where CST021 received a score of -7 which is a fail.
A0643B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 as site assessment process was flawed as it failed to take account of more suitable brownfield sites. The Council argued that smaller sites would be uneconomic for developer but this has proven not to be the case as planning applications are already being processed for some smaller sites. These smaller sites are closer to facilities and are far less damaging to the appearance and quality of the town and the AONB. A recent survey by a group working on the Church Stretton Community led plan found that from 875 respondents there was an overwhelming desire to preserve the character and appearance and green space.
A0643B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object as CST021 is not a suitable site to achieve DP1 and DP3. Due to the location and nature of this site it is an inappropriate site to meet these specialist range of housing types to meet the housing needs identified in the local community. Due to the infrastructure requirements for the site it is believed that CST021 will be an expensive site to develop. Highly likely that developers will be argue that 20% affordable housing be reduced or substituted with a financial settlement resulting in few affordable homes and more open market homes.
A0643B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 as site does not meet requirements of DP13 or DP18. It is a haven for wildlife, trees, plants etc and development will destroy not enhance these features. A major development cannot possibly safeguard or enhance the landscape and visual amenity.
A0643B7	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 as it is not in accordance with NPPF. In particular Section 9 Paras 102, 103 and 108 - as the site will create a car dependent development with little option for alternative means of transport due to it's location. Access for pedestrians, wheelchairs mobility scooters and cyclists is via sections of narrow roads without pavement along with the significant increase in traffic flow, would be dangerous.
A0643B8	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 as site doesn't meet exceptional circumstances test for a major development with AONB under NPPF instead of less damaging alternatives. The exceptional circumstances statement produced by the council contains no evidence of objectively assessed local housing need and no data to prove the economic impact of developing. No detailed site review has been undertaken to confirm environmental impacts and affordable housing requirements for Church Stretton can be met through alternative sites. In respect of NPPF major development test the Council has not given consideration to the need for major development on CST021 including the impact on the local economy. There is no objectively assessed need for the 200 dwellings up to 2038 for Church Stretton, or 70 dwellings on CST021, the council has provided no date illustrating the economic impact and the council has not produced an ecology study.
A0643B9	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 as Shropshire Council has applied "one size fits all" approach to the provision of development land across the county and has not taken into account special circumstances of the AONB like other authorities do where their development plan meets objectively assessed local community needs.
A0645B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to inclusion of CST021 within the Plan and support the long list of objections from the Town Council. The AONB has greater protection from development than other areas - no major development should occur without exceptional circumstances. Vehicular access to CST021 is dangerous. Development would increase flood problems and it is unclear how development could alleviate them. Concerned about environment impact of developing site. Impact on tourism should not be underestimated.
A0646B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Shropshire Council have totally failed to demonstrate the exceptional circumstances that would allow for a major development in an AONB.
A0653B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Objections to CST021 the Jack Mytton Way is used by dog walkers and ramblers they contribute to the local economy. the roads are not suitable for additional residents traffic. Unsuitable for families with children as need to cross the A49. the noise would be 'intolerable' and cause light pollution. drainage problem at lower part of field. building at the back of the school makes more sense
A0654B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	object in strongest possible terms area is in AONB and outside of the development boundary -used by walkers, land is wet and proposes flood risk to others, access problems for additional traffic. Site has previously been rejected by Planning Inspectors. Want this site deleted from the plan for now and future plans
A0655B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	CST021 objects due to personal use and memories of the meadow, future generations not being able to benefit from it, blocks the entrance to the Jack Mytton Way, access to the site and disturbance to residents from construction traffic and future volume of traffic. Sink hole concern
A0656B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	object to site CST021 after studying the detailed technical objections and endorsing them, wishes to draw attention to - SC's exceptional circumstances statement lacks supporting evidence, previous planning application have been rejected following an appeal, suggests CSTR014 as a better site. concern with flooding and drainage, wants brownfield site development no
A0657B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Concerned about on and off-site flood alleviation being the responsibility of the developer due to existing problems with flooding and size of potential development. Developers of Hunters failed to address the continual flood risk and residents left accountable. Given history of serious flooding 2007 and 2020 disgraceful that insufficient flood alleviate measures have been carried out. Strongly opposed to any significant development in and around MW without properly designed and constructed alleviation measures. Concerned about effects of flooding from Farley Brook as the sole drainage watercourse from the town to the River Severn.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0664B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	In allowing this development in an AONB. Shropshire Council would not meet the major development tests of 'exceptional circumstances' and 'public interest' regarding the proposed building site. (Paragraph 172 of the National Planning Policy Framework) (NPPF) Local planning authorities need to determine whether there are any environmental designations or policy constraints which prevent them from meeting housing need. These include Ancient Woodland, and Areas of Outstanding Natural Beauty. Shropshire Hills AONB Management Plan Countryside and Rights of Way Act, 2000 Section 82 states that ..."the primary purpose of designation of an AONB is to conserve and enhance natural beauty". The site has two ancient woodlands and a conservation area on the boundaries so therefore should not even be considered for such a large development. Indeed in Shropshire Council's own Core Strategy 'ENVIRONMENT & LANDSCAPE CSS' it states that "There will be areas where development will need to pay particular regard to landscape character, biodiversity or other environmental considerations including in the Shropshire Hills Area of Outstanding Natural Beauty" Tourism plays an important part in the local economy. People travel from towns and cities in the West Midlands and beyond to enjoy the beautiful views and hills around Church Stretton. A development of this size would be a blot on the landscape from many viewpoints on the surrounding hills and make the area far less attractive to visitors. On landscape history grounds there is a good case for opposing this development proposal. Snatchfield, being the last relatively intact area of open field, provides a direct link with the historic development of Church Stretton's early medieval settlement and thus an important educational resource. The position of the estate would lead to an increase in traffic on Clive Avenue and in the town as the majority of residents would travel down by car, causing more air/noise pollution as well as raising the danger levels to pedestrians walking down 'The Conflict Area'. There is no evidence that the town needs such a large-scale development. It would be much better to use other more appropriate areas for smaller and less obtrusive sites within or close to the town. A 2020 survey of the residents demonstrated how much people thought it was necessary to protect the local landscape on both sides of the hills. The recent pandemic has also demonstrated the importance of open spaces and green areas to people's wellbeing. Hopefully, Shropshire Council will play their part in working towards the Prime Minister's commitment of protecting 30% of our countryside by 2030 announced today and reject this totally inappropriate application.
A0667B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area		I object to the inclusion of CST021 in the Local Development Plan - The infrastructure within Church Stretton would not be able to cope - The Doctors and dentist are already bulging - The road network is totally inefficient, can barely cope with the amount of traffic on it at present - No pavement making it extremely unsafe for walkers and local residents. - This land concerned lies within an area of AONB which is protected by the Countryside and Rights of Way Act 2000 - Why build on a site of beauty when there are other sites within the town which are more suited
A0668B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to the inclusion of site CST021 and believe the Snatchfield site should be removed from the local development plan Snatchfield medieval meadow forms part of the Jack Mytton Way This land lies on the east and slopes down the valley. The site is clearly visible from various areas high and low within the valley, how can you calculate how much light pollution 70 houses will cause and how this will affect our dark sky policy Also there is only one access in and out to this site, it is not suitable for the current amount of vehicles let alone another 70 vehicles plus and the extent of any heavy machinery would put our lives, local residents, walkers and our vehicles at risk when emergency services are unable to get through
A0676B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	There is no need for 200 new homes in Church Stretton which is a AONB. It will decrease biodiversity. This proposal does nothing to enhance or conserve the natural environment any development of this scale is at odds with the Environment Act. The Snatchfield site is used by many existing and local walking groups as a starting point, The development would damage the area and the economy of Church Stretton. This development will increase cars and congestion it would not reduce climate change goals. Visitors to the area are horrified at the proposal. There is no local support for this development and if democracy is to be respected then this proposal must be rejected.
A0681B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Objects to allocation of the site and agrees with Church Stretton Town Council representation of 25.09.20. Does not feel that the Exceptional Circumstances Statement for the site is valid, and the need for 200 dwellings in Church Stretton is not proven, and their economic and environmental impact properly assessed. The site is up a steep road so is an unsuitable location for affordable housing. Drainage works are also required to mitigate flooding, and a public footpath would need to be rerouted.
A0687B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Opposes allocation of the site as it is against a number of National and Local Planning Policies, including NPPF para 172, Local Plan Policy DP26 and other relevant planning documents such as the Council's own Core Strategy Objectives 4 and 11, and Policy CS5; their Natural Environment Guidance Note 13, the CROW Act and Shropshire Hills AONB Management Plan. Consultation has also failed to consider sites previously identified in SAMdev including CSTR014 North of Ley Gardens and CSTR018
A0687B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The development of 70 houses on Snatchfield is a major development and should only be allowed in exceptional circumstances, and the site does not meet the three tests for this set out in paragraph 172 of the NPPF. The need for these houses has not been shown, indeed the Town Council's own survey suggests demand for affordable housing is low. The suitability of other sites including those at Craven Arms has not been fully explored and the impact of the development on the natural environment has not been fully explored. The site also fails to meet paragraph 108 of the NPPF - Safe and sustainable access to the town centre. Services and facilities are beyond the distance recommended for a comfortable walking distance and hence Snatchfield would encourage car usage and not contribute to the Council's commitment to reduce greenhouse gas emissions. For the above reasons Land at Snatchfields Farm (CST021) is not a suitable site for development of 70 houses
A0703B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to CST021 land at Snatchfields Farm being allocated for new housing development. This greenfield site in the AONB is historic landscape, providing wildlife habitat for a range of species and amenity access into unspoilt open countryside. The land is extremely wet and prone to flooding due to drainage issues likely to be affected by housing development. The single access route to and from the site creates a number of traffic problems for construction traffic and for the car dependent new residents who have no public transport options. Clive Avenue is narrow, on a steep gradient without pedestrian footways especially for the young and elderly. Ragleth Road has potholes and subsidence likely to be further affected by construction traffic. These narrow, steep roads will be dangerous in winter. Further evidence is provided in the local Community Conducted Clive Avenue Conflict Area Traffic Analysis from January to April (2020?) and in the RIBA Green Planning Studio report. Site CST014 adjoining the school is a better development opportunity along with brownfield sites in the town which will have fewer impacts on the AONB
A0715B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	No development should take place on access to the main walking routes ie Shropshire Way Jack Mytton Way. Demand does not exist for housing development in this area and can be met in other locations
A0720B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Building on this site will create the feeling of denser building and destroy the general outlook from the Longmynd.
A0721B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Site fails to meet strategic objectives of the Plan. No exceptional circumstances. Landscape and visual amenity affected, flood risk, transport issues, road safety issues, natural environment impacted.
A0722B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Objection to allocation. The Council has not surveyed actual housing need in Church Stretton. Small sites within the development boundary would be better. These two issues mean that the first AONB exceptional circumstances test is failed. The second test is failed because there is no assessment of possibility of developing outside the AONB The site suffers severe access problems and its allocation is contrary to NPPF paras 108-111. Clive Avenue is already a safety hazard and Ragleth Road has experienced subsidence. Both roads are steep and treacherous in cold weather. The site is not within walking distance of the town centre so would lead to an increase in car use. The ground easily becomes saturated and development would lead to increased run off and flood risk to properties further down the hill. This will be worse with climate change. The site acts a gateway to the Stretton Hills. Its development would diminish this and harm the tourist industry. It would also lead to pressure for the development of more sites on the east of the town. This is contrary to policy DP13 and against the principle of AONB designation. These factors cause the failure of the third test. The site is near two ancient woodlands and is a medieval meadow. Development is counter to DP26, DP18 and NPPF paras 172 and section 16. A previous planning inspector stated there should be no preference for development to the east of the A49 and there have been no material changes since. Shropshire Council has not demonstrated exceptional circumstances for such a major development in an AONB.
A0723B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Objection to allocation. The Council has not surveyed actual housing need in Church Stretton. Small sites within the development boundary would be better. These two issues mean that the first AONB exceptional circumstances test is failed. The second test is failed because there is no assessment of possibility of developing outside the AONB The site suffers severe access problems and its allocation is contrary to NPPF paras 108-111. Clive Avenue is already a safety hazard and Ragleth Road has experienced subsidence. Both roads are steep and treacherous in cold weather. The site is not within walking distance of the town centre so would lead to an increase in car use. The ground easily becomes saturated and development would lead to increased run off and flood risk to properties further down the hill. This will be worse with climate change. The site acts a gateway to the Stretton Hills. Its development would diminish this and harm the tourist industry. It would also lead to pressure for the development of more sites on the east of the town. This is contrary to policy DP13 and against the principle of AONB designation. These factors cause the failure of the third test. The site is near two ancient woodlands and is a medieval meadow. Development is counter to DP26, DP18 and NPPF paras 172 and section 16. A previous planning inspector stated there should be no preference for development to the east of the A49 and there have been no material changes since. Shropshire Council has not demonstrated exceptional circumstances for such a major development in an AONB.
A0828B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to site allocation. The Council has not demonstrated exceptional circumstance for major development in an AONB. Need affordable homes for the elderly who want to move in to town. The small need for housing that does exist could be met on brownfield sites within the development boundary. New residents will be commuting to work elsewhere and thus increase the traffic. Development would mean more surface water run off with nowhere to go. The Council's own flood risk assessment says the site is sensitive to the cumulative impact of any development. The valley is boulder clay which would mean deeper foundations and many houses would have to be split level because of the topography. These issues make development expensive and rule out affordable homes. Previous planning applications have been refused on appeal and the SAMDev Inspector said the same. The access to the site is dangerous and there are sink holes. There is no footpath on the bottom part of the route along Clive Avenue. There is no exit for emergency vehicles. People on mobility scooters will be at risk
A0830B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to site allocation. The Council has not demonstrated exceptional circumstance for major development in an AONB. Development will create noise and light pollution and spoil tranquillity. The access route is hazardous and Clive Avenue has no pavement. Extra traffic will make things worse.
A0840B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to inclusion of CST021 within the Plan and support the long list of objections from the Town Council. The AONB has greater protection from development than other areas - no major development should occur without exceptional circumstances. Vehicular access to CST021 is dangerous. Development would increase flood problems and it is unclear how development could alleviate them. Concerned about environment impact of developing site. Impact on tourism should not be underestimated. No demonstrated housing need.
A0844B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	strongly disagrees as inappropriate to the AONB, would be car dependent, access is through a flood area, traffic issues, sink hole, prone to flooding
A0877B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Don't know / no opinion	Pleased CST033/ CST034 is identified as a site with long term potential which has no significant constraints by the SLAA. However considered site is has short term potential because site is immediately available, fully deliverable ; adjoining land has been developed for residential use and there has been interest from developers in the site; has direct access to A49 via Watling Street North (with required arrangement & upgrading achievable as outlined in highway access report). Access to A49 in turn provides good access to larger service centres and employment opportunities with less strain on minor roads, as per preferred site. Site has a favourable Fair sustainability rating which is better than for many other sites including preferred site, CST020 which is Poor & located with challenging topography. Additional information can be provided as required to support bringing the site forward. Site location plan provided.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0921B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The designation of Church Stretton as a Key Centre settlement in Policy S5.1 is strongly supported as this is seen as vital to ensuring the town's long-term future. We agree with the explanatory text to policy S5.1 that Church Stretton plays an important role in south Shropshire, providing services and facilities for a wide rural hinterland (paragraph 5.88). In addition, due to the town's strategic transport links (including main rail line) the settlement contributes towards strategic growth objectives in this area of the County". Nonetheless, despite the strategic importance of growth being directed to Church Stretton the plan allocates only 1 site for 70 dwellings in the town, with an additional 51 dwellings identified to be delivered as windfall (unplanned development). There is, therefore, a significant reliance on windfall development and this reliance may increase, given the comments made in our representations on Strategic Policy SP2 'Strategic Approach'. It is therefore considered essential that further land is included within the development boundary of the town and potentially allocated for residential development to ensure that the needs of the settlement and surrounding area are met and consequently the aims and objectives of the Plan are realised. Our client's land was submitted under the Council's Call for Sites and identified as CST035 'Springbank Farm, Church Stretton' (a site location plan has been attached to this representation's covering letter for ease of reference). This site was subject to assessment by the Council as part of the Plan preparation process and the results of the assessment are included within the 'Church Stretton Place Plan Area Site Assessments (August 2020)'. The results of the site assessment detail that, whilst the site achieved the joint second highest score in the Stage 2a Sustainability Appraisal and that residential development on the site was considered to be achievable and viable in the Stage 2b Screening, the site was removed from the assessment process due to concerns over flood risk and ecological impacts. However, detailed reports on flood risk and ecology prepared in support of a current planning application on part of site CST035 (application ref. 18/01258/OUT) have addressed these issues. In summary, the current consultation provides an opportunity for Shropshire Council to amend policy S5.1 and Inset Map S5 to include our client's land, in whole or part, within the development boundary of the settlement and potentially allocate it for residential development. The inclusion of this land would result in a greater level of certainty that the aims and objectives of the Plan, including the strategic growth objectives in this area of the County, will be realised over the Plan period.
A0921B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area		The designation of Church Stretton as a Key Centre settlement in Policy S5.1 is strongly supported as this is seen as vital to ensuring the town's long-term future. We agree with the explanatory text to policy S5.1 that Church Stretton plays an important role in south Shropshire, providing services and facilities for a wide rural hinterland (paragraph 5.88). In addition, due to the town's strategic transport links (including main rail line) the settlement contributes towards strategic growth objectives in this area of the County". Nonetheless, despite the strategic importance of growth being directed to Church Stretton the plan allocates only 1 site for 70 dwellings in the town, with an additional 51 dwellings identified to be delivered as windfall (unplanned development). There is, therefore, a significant reliance on windfall development and this reliance may increase, given the comments made in our representations on Strategic Policy SP2 'Strategic Approach'. It is therefore considered essential that further land is included within the development boundary of the town and potentially allocated for residential development to ensure that the needs of the settlement and surrounding area are met and consequently the aims and objectives of the Plan are realised. Our client's land was submitted under the Council's Call for Sites and identified as CST035 'Springbank Farm, Church Stretton' (a site location plan has been attached to this representation's covering letter for ease of reference). This site was subject to assessment by the Council as part of the Plan preparation process and the results of the assessment are included within the 'Church Stretton Place Plan Area Site Assessments (August 2020)'. The results of the site assessment detail that, whilst the site achieved the joint second highest score in the Stage 2a Sustainability Appraisal and that residential development on the site was considered to be achievable and viable in the Stage 2b Screening, the site was removed from the assessment process due to concerns over flood risk and ecological impacts. However, detailed reports on flood risk and ecology prepared in support of a current planning application on part of site CST035 (application ref. 18/01258/OUT) have addressed these issues. The inclusion of this land would result in a greater level of certainty that the aims and objectives of the Plan, including the strategic growth objectives in this area of the County, will be realised over the Plan period.
A0925B1	regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area		Site promotion for sites CST029 and CST031. These sites were subject to assessment by the Council as part of the Plan preparation process and the results of the assessment are included within the 'Church Stretton Place Plan Area Site Assessments (August 2020)'. With specific regard to the assessment of site CST029, the stage 2 assessment gave an indicative capacity of 28 units. However, that density of development is not achievable on the site as it fails to have regard to the site's (and wider area's) ecology, heritage, trees and landscape. The indicative site layout (attached) demonstrates how the site may be developed for 3 dwellings. A development of 3 dwellings has regard to the site's characteristics and constraints, ensuring that no unacceptable adverse impacts (including landscape, visual and highway impacts) would arise as a result of the development. It should also be noted that whilst the stage 3 assessment states that the site is steeply sloping, this is not the case. In addition, and significantly, the site was previously owned and allocated for residential development, with the rest of Clive Avenue, by the Stretton Land Company. Kenyon Road was constructed to provide access to CST029 and makes legal provision for this. A development of 3 dwellings on the site can easily be accommodated by the surrounding highway infrastructure. Similarly, with regard to the assessment of site CST031, the stage 2 assessment gave an indicative capacity of 14 units. Again that density of development is not achievable on the site due to the site's (and wider area's) ecology, heritage, trees and landscape. The indicative site layout (attached) demonstrates how the site may be developed for 6 dwellings. A development of 6 dwellings has regard to the site's characteristics and constraints, ensuring that no unacceptable adverse impacts (including landscape, visual and highway impacts) would arise as a result of the development. It should also be noted that whilst the stage 3 assessment states that the site is steeply sloping, this is not the case. The site, via the southern end of Clive Avenue, benefits from an existing access onto the A49. The additional traffic generated from 6 dwellings on the site would be insignificant. In addition, whilst the existing highway arrangement is more than adequate to accommodate 6 additional dwellings, it is agreed that the 30mph speed limit should be moved to include the existing access. The development of CST031 would deliver this betterment which would be a significant highways improvement not only to CST031 but also Watling Street North and Laundry Bank, which has been called for by the community for many years. Given the above, it is evident that the two proposed sites represent sustainable opportunities to deliver windfall residential development in the town on land that is unconstrained. We are also aware that Church Stretton Town Council, community groups (including The Strettons Civic Society) and individuals have expressed support for the development needs of the settlement to be delivered across a number of smaller sites, objecting to the larger allocation of 70 dwellings on Snatchfields Farm CST021. As with other settlements in South Shropshire it is difficult to get medium to large developers to deliver housing numbers. Smaller developments, of up to 20 units, are therefore better placed to provide the housing required. The provision of development across a number of smaller sites in the settlement would better accord with the advice contained within the National Planning Policy Framework (NPPF), including: Paragraph 68 which stresses the importance of small and medium sized sites to the delivery of housing; and Paragraph 172 which states that the scale and extent of development within Areas of Outstanding Natural Beauty should be limited and planning permission refused for major development "other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest". The inclusion of CST029 & CST031 within the development boundary would therefore meet with the aims and aspirations of the local community and ensure that development in the settlement better accords with the guidance contained within the NPPF. In summary, the current consultation provides an opportunity for Shropshire Council to include sites CST029 & CST031 within the development boundary of the settlement. The inclusion of this land would result in a greater level of certainty that the aims and objectives of the Plan, including the strategic growth objectives in this area of the County, will be realised over the Plan period.
A0925B3	regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area		The designation of Church Stretton as a Key Centre settlement in Policy S5.1 is strongly supported as this is seen as vital to ensuring the town's long-term future. We agree with the explanatory text to policy S5.1 that Church Stretton plays an important role in south Shropshire, providing services and facilities for a wide rural hinterland (paragraph 5.88). In addition, due to the town's strategic transport links (including main rail line) the settlement contributes towards strategic growth objectives in this area of the County". In this regard, Paragraph 4.91(e) specifically identifies Church Stretton as a Key Centre on a Strategic Corridor and Policy DP9: Strategic Corridors states that the "Shropshire Economic Growth Strategy seeks to deliver a 'step change' in the capacity and productivity of the local economy. To contribute to this aim, 'Strategic Corridors' along the principal rail and strategic road routes through the County will be the primary focus for major development especially along 'strategic corridors' with both rail and road connectivity". It is evident, therefore, that Church Stretton should be a significant centre for growth in Shropshire, both socially and economically. Nonetheless, despite the strategic importance of growth being directed to Church Stretton the plan allocates only 1 site for 70 dwellings in the town, with an additional 51 dwellings identified to be delivered as windfall (unplanned development). There is, therefore, a significant reliance on windfall development and this reliance may increase, given the comments made in our representations on Strategic Policy SP2 'Strategic Approach'. The delivery of sufficient windfall development in Church Stretton will be problematic given that the development boundary has been drawn tightly around the existing built form of the settlement and the numerous constraints to development identified in the supporting text to policy S5.1, including the Shropshire Hills Area of Outstanding Natural Beauty (AONB), the Long Mynd Site of Special Scientific Interest, the Coppice Leasowes Local Nature Reserve, Scheduled Ancient Monuments at Nover's Hill and Brockhurst, The Old Rectory historic designed landscape, woodlands and trees protected by Tree Preservation Orders, flooding, the large Conservation Area and the need to separate the two smaller settlements of All Stretton and Little Stretton from Church Stretton. Given the above, it is considered evident that in order to provide the significant level of windfall development needed in the town over the Plan period the development boundary should be redrawn to encompass additional unconstrained land for small scale residential development to ensure that the needs of the settlement and surrounding area are met and consequently the aims and objectives of the Plan are realised. Our client's land was submitted under the Council's Call for Sites and identified as CST029 'Land between Clive Avenue and Kenyon Road, Church Stretton' and CST031 'South of Clive Avenue, Church Stretton'. Site location plans and indicative site layouts have been attached to this representation's covering letter for ease of reference. These sites were subject to assessment by the Council as part of the Plan preparation process and the results of the assessment are included within the 'Church Stretton Place Plan Area Site Assessments (August 2020)'. With specific regard to the assessment of site CST029, the stage 2 assessment gave an indicative capacity of 28 units. However, that density of development is not achievable on the site as it fails to have regard to the site's (and wider area's) ecology, heritage, trees and landscape. The indicative site layout (attached) demonstrates how the site may be developed for 3 dwellings. A development of 3 dwellings has regard to the site's characteristics and constraints, ensuring that no unacceptable adverse impacts (including landscape, visual and highway impacts) would arise as a result of the development. It should also be noted that whilst the stage 3 assessment states that the site is steeply sloping, this is not the case. In addition, and significantly, the site was previously owned and allocated for residential development, with the rest of Clive Avenue, by the Stretton Land Company. Kenyon Road was constructed to provide access to CST029 and makes legal provision for this. A development of 3 dwellings on the site can easily be accommodated by the surrounding highway infrastructure. Similarly, with regard to the assessment of site CST031, the stage 2 assessment gave an indicative capacity of 14 units. Again that density of development is not achievable on the site due to the site's (and wider area's) ecology, heritage, trees and landscape. The indicative site layout (attached) demonstrates how the site may be developed for 6 dwellings. A development of 6 dwellings has regard to the site's characteristics and constraints, ensuring that no unacceptable adverse impacts (including landscape, visual and highway impacts) would arise as a result of the development. It should also be noted that whilst the stage 3 assessment states that the site is steeply sloping, this is not the case. The site, via the southern end of Clive Avenue, benefits from an existing access onto the A49. The additional traffic generated from 6 dwellings on the site would be insignificant. In addition, whilst the existing highway arrangement is more than adequate to accommodate 6 additional dwellings, it is agreed that the 30mph speed limit should be moved to include the existing access. The development of CST031 would deliver this betterment which would be a significant highways improvement not only to CST031 but also Watling Street North and Laundry Bank, which has been called for by the community for many years. Given the above, it is evident that the two proposed sites represent sustainable opportunities to deliver windfall residential development in the town on land that is unconstrained. We are also aware that Church Stretton Town Council, community groups (including The Strettons Civic Society) and individuals have expressed support for the development needs of the settlement to be delivered across a number of smaller sites, objecting to the larger allocation of 70 dwellings on Snatchfields Farm CST021. As with other settlements in South Shropshire it is difficult to get medium to large developers to deliver housing numbers. Smaller developments, of up to 20 units, are therefore better placed to provide the housing required. The provision of development across a number of smaller sites in the settlement would better accord with the advice contained within the National Planning Policy Framework (NPPF), including: Paragraph 68 which stresses the importance of small and medium sized sites to the delivery of housing; and Paragraph 172 which states that the scale and extent of development within Areas of Outstanding Natural Beauty should be limited and planning permission refused for major development "other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest". The inclusion of CST029 & CST031 within the development boundary would therefore meet with the aims and aspirations of the local community and ensure that development in the settlement better accords with the guidance contained within the NPPF. In summary, the current consultation provides an opportunity for Shropshire Council to include sites CST029 & CST031 within the development boundary of the settlement. The inclusion of this land would result in a greater level of certainty that the aims and objectives of the Plan, including the strategic growth objectives in this area of the County, will be realised over the Plan period.
A0925B4	regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area		Location plans and indicative layouts accompanying promotion of CST029 and CST031
A0979B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Disagrees with intentions of Policy S5 not to identify any "hubs" or "clusters" in the Church Stretton Place plan and submits evidence for inclusion of land at Old Hall Farm Cottage. Concern that designation of community clusters is influenced by local opinion rather than professional assessments of the sustainability and suitability of settlement such as All Stretton. Assistance in this regard has already been provided by the Inspector in the 3149461 appeal decision. On the basis of the Inspector's independent assessment of the sustainability of All Stretton, its development status should clearly be altered from "open countryside" to a named "cluster" settlement in Policies SP2.3 and S5.3. This would then enable Shropshire Council to support appropriate housing development in accordance with Policy SP8 on our client's Starr Lane site. Preliminary site layout on the site submitted with document which shows a mixture of housing which reflects the requirements of Policies DP1 – DP7 to support the differing categories of housing needed in Shropshire identified in the SHMA and draft Housing Strategy. This will become increasingly important if the revised housing methodology for Shropshire becomes national policy in late 2020
A1000B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Surprised that Church Stretton needs to encroach into the AONB to meet its target for new houses. However, if it does this site should not be considered for development. This land is a green finger stretching out from the edge of the town and separating two substantial housing developments; it is popular with walkers and includes the Jack Mytton way. There are drainage problems below Snatchfields now and additional housing can only make matters worse. The only access to the site for vehicles will be via Clive Avenue. For most of the relevant part of Clive Avenue the road is too narrow for vehicles to pass with comfort and there are no pavements for pedestrians. To add to the risk of a serious accident by increasing the flow of traffic from this development seems reckless to say the least.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1071B1	Viability and Deliverability of Proposed Site Allocations	Draft Policy Area S5 Church Stretton Place Plan Area	Agree	Fully support the Development Strategy proposed for Church Stretton. Fully agree that Church Stretton plays an important role in South Shropshire, providing services and facilities for a wide rural hinterland and, as such, it has been identified as a Key Centre. Fully agree with the identification of CST021 as a proposed residential allocation. It is the most appropriate and justifiable location for such housing growth, which will make a meaningful contribution to the town's housing needs and the Local Plan target of 200 dwellings. CST021 is available now, offers a suitable location for development, with the delivery of housing on the site within the next five years a realistic prospect (anticipate delivery in the short to medium term, between 2021 and 2029), subject to allocation within the Local Plan. The site is viable, taking into account the policy requirements set out in the Local Plan as a whole. As such the site is considered deliverable as defined in the NPPF. Construction of around 70 dwellings at CST021 would deliver economic and social benefits for the town with viable options available to mitigate any limited environmental harm. It is unclear if the site guideline is a maximum, minimum or approximate figure. Draft site guidelines for CST021 include the need to undertake a number of supporting assessments. Reflecting this, a thorough and comprehensive review of the site's constraints and opportunities, including the completion of a number of baseline technical studies and assessments, has been undertaken. Supporting technical assessment appendices to this representation are: Drainage Report; Preliminary Ecological Assessment; Heritage Statement; Landscape and Visual Appraisal; Constraints and Opportunities Plan; Proposed Site Plan; and Traffic and Transport Feasibility Report. The assessments demonstrate the sites suitability and lack of fundamental constraints. An illustrative masterplan (comprehensive development proposals would not be prepared until the Planning Application stage, subject to confirmation of the current draft allocation) has been provided demonstrating how the site could comply with draft policies DP1 and DP2. It also shows generous areas of open space and ensures that an attractive environment would be created, while being cognisant of the intrinsic site constraints, such as the biodiversity and arboricultural qualities of the land and the line of the Jack Mytton Way that crosses the site in a broadly north-south axis. Development would also incorporate sustainable methods of drainage (appropriately sized attenuation basin located in the site's north-eastern corner), as part of a sustainable drainage strategy. The site is within 2,000 metres of the entirety of Church Stretton town centre, with good accessibility to a variety of local services to cater to future residents' everyday needs. The Church Stretton railway station is also located within 500 metres of the site, a short walking distance, providing onward connections to larger towns and interchanges. The site is in a sustainable and well-linked location. The Traffic and Transport Feasibility Report concludes traffic generated by the development is unlikely to have a severe impact on the surrounding highway network and the creation of the primary vehicular access at the southern end of Chelmick Drive via the demolition of number 24 (which is under our clients' ownership) is entirely appropriate and capable of meeting usual highways standards. Aware of Town Council and some local residents concerns regarding CST021. However, many are considered unfounded or can be addressed through the design of any future development informed by further appropriate technical work at the Planning Application stage. The site is not a meadow, but farmland used for grazing sheep and as such is not a recognised green space that should be protected from development. The Jack Mytton Way that crosses the site will be retained and enhanced as part of the development. The woodland to the south of the site and marshland/mature trees along the site's eastern boundary will be retained and adequately buffered as part of the development. The heritage assessment indicates that there is limited archaeological interest and no indications that, if present, any archaeological resource within the site would be so complex, rare, and well-preserved so as to elevate its significance and preclude development. Any requirement for further archaeological works ahead of development taking place can be agreed in consultation with the Council. The site is surrounded by existing residential development on three sides, which means that the proposed housing allocation will constitute a logical 'rounding off' of the built-up area of Church Stretton. The form and location of the site means that the impact on the Shropshire Hills Area of Outstanding Natural Beauty (AONB) will be limited, as demonstrated by the initial Landscape and Visual Appraisal prepared for the site. The site has capacity to accommodate a sensitively designed residential development which would not give rise to significant landscape or visual effects, the illustrative site plan shows how such development could be laid out. Welcome the opportunity to respond to concerns raised during consultation and provide assurances to the Town Council and community that the site is suitable for development and that any concerns can be satisfactorily addressed.
A1112B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	In the Bridleways, where I live, there is an open water course adjacent and parallel to the road and pavement which carries the surface water from the proposed development site. During the twenty years that I have lived here, there has ALWAYS been a continuous flow of water, even during the hot and dry summer of 2018. I am extremely concerned that the volume of water will increase dramatically, potentially flooding some properties in The Bridleways
A1113B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Concern about traffic access to the Snatchfield site via Chelmick Drive and The Bridleways which is a Cul-de-sac. The roads are very narrow and there is only one pathway on one side of the road. Concern that cars will be parked in The Bridleways by residents of the new development and used as through new pedestrian access to the Snatchfield site. At the moment, as I understand it, the road at the eastern end of The Bridleway is privately owned by whom I do not know
A1122B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to allocation of CST021 Snatchfields Farm as unsustainable, inaccessible and unviable because the site is affected by the following considerations poor single carriageway site access constrained by neighbouring properties with no capacity to introduce pedestrian footways to improve safety; there is poor visibility along Chelmick Drive towards the site; the development exits onto the highway (this is a southern access point at the junction of Chelmick Drive & Chelmick Close) on an existing junction (into Chelmick Close) which will create a confusing and unsafe highway layout; site slopes steeply with an uneven surface that will require significant groundworks to level the surface that will permanently alter the landscape affecting the setting of the site within the AONB; CST021 is not a site the community wish to see developed as shown by the local objections and so, is unsustainable in many ways. The better development option is to expand and reallocate the existing employment allocation at Springbank Farm CST018 up to 5.5ha to deliver the housing needs of the town, physical infrastructure and other community benefits and improvements to replace site CST021 Snatchfields Farm. CST018 Springbank Farm will provide flood alleviation, reduced risks of affecting trade to the town centre and local infrastructure improvements if built to conform with the Local Plan and CST021 Snatchfields Farm should be deleted.
A1122B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Proposal to expand and reallocate the existing employment allocation CST018 Springbank Farm for housing development to replace CST021 Snatchfields Farm. The expanded site to comprise two paddocks north of Lawley Close to increase the site area to 5.5 ha (CST021 comprises 4.25ha) with access from the B5477 Shrewsbury Road using the existing private accesses. Access to CST018 from Shrewsbury Road is within the 30mph formal speed limit and within the advisory 20mph limit and lies on the access apron for the adjoining secondary school giving a wide and safe degree of visibility onto the highway with the possibility for a pedestrian crossing to provide both a safe access to the school and a safe point of access into the surrounding countryside. There are no ecological constraints on CST018 as the site has no local, national or international ecological or biodiversity value; CST018 is larger than the preferred allocation at CST021 and so can deliver the required housing numbers and open space provision; The open space can lie over the Flood Zone 3 within CST018 and the site access road can comprise a raised highway through the Flood Zone 2 within the site as part of a comprehensive Site Flood Risk Assessment and Management Plan; CST018 lies outside the Church Stretton Conservation Area and whilst the site is flat open within the AONB the development can be sensitively located against the built edge of the town and designed to protect the special landscape qualities of the AONB including retention of boundary trees, site landscaping, biodiversity enhancements and visual amenity improvements. This development proposal is accompanied by a letter of support from the Church Stretton Mayor Bob Welch
A1133B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to the inclusion of site CST021 because of its natural environment used by walkers and horse riders, and has biodiversity. We need to protect our countryside. The building need in Church Stretton could be accommodated by considering sites closer to town. Snatchfields is not easily accessed and will cause increased traffic to Clive Av., Ragleth Road and Chelmick Drive and will make it dangerous to walk these areas
A1134B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	There is no local need or desire for a housing development on this scale. Church Stretton should not be subjected to the same policies that apply to larger towns such as Telford, Oswestry or Shrewsbury and no solid evidence has been provided that Stretton needs more housing. Impact on wildlife. Studies of Snatchfields have discovered that the site is particularly vulnerable to flooding, including the access track. The access is poor. This site is also of huge historical, ecological and physical importance to residents and visitors alike. Sit rarely used by walkers.
A1150B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Please find attached the submission by the All Stretton Village Society which rejects proposed major developments within Church Stretton Plan Area under Draft Policy S5. The ASVS agree with Church Stretton Town Council, the 'Save Snatchfield' Group, GreenPlanning Solutions (independent planning consultants), and numerous residents that the proposed site CST021 fails to satisfy the tests established by NPPF172. As an alternative way forward, the ASVS propose that the area covered by the Stretton Hills AONB is removed from the draft Local Plan and a separate development plan created for the AONB following successful precedents elsewhere in the country. Creating a Shropshire Hills AONB DPD would remove difficulties for the passage of the local plan because Church Stretton is the only town in Shropshire protected by NPPF172 and CROW 2000 Section 85. It would also afford Shropshire Council the opportunity to demonstrate excellence in planning. The attached document forms part of the ASVS submission and provides detailed legal justification for this position.
A1152B42	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Church Stretton is the only Key Centre in the South Shropshire Hills Area of Outstanding Natural Beauty (AONB). It is therefore heavily constrained by the presence of those protected hills all around it. Shropshire Council should therefore treat it in a different way to other towns in Shropshire, and not necessarily require it to take 'its share' of development'. Consider there is no justification for levels of development proposed. The Shropshire Hills AONB Exceptional Circumstances Statement simply repeats the fact that 'the Local Plan Review identifies a need for 200 dwellings and 2 hectares of employment land in Church Stretton'. Pages 183 to 185 of the consultation document offer no further explanation of how those figures have been arrived at. Understand the employment figure has been calculated to balance the housing figure. CST021 is particularly controversial, as witnessed by the considerable local opposition to it. It would be obtrusive in views of the town from the Long Mynd and surrounding hills. Understand the local preference is that any development in Church Stretton should be on smaller sites around the town, rather than on a large site in a controversial location. These sites would conserve its character far better than large new housing developments
A1153B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Detailed response from Church Stretton Community Led Plan Group on policies for Church Stretton and specifically the Snatchfields site proposed in the Local Plan. In summary the group supports the views of townspeople who are opposed to large scale housing developments in the AONB and specifically to designating Snatchfield Farm (CST021) as an Allocated site. The proposal to build a major housing development at Snatchfield Farm is clearly in conflict with the guiding principle in paragraph 172 of the NPPF: 'Great weight should be given to conserve and enhance landscape and scenic beauty in National Parks, the Broads and AONBs which have the highest status of protection in relation to these issues'
A1154B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	National planning Policy Framework (NPPF), paragraph 172 and Local Plan DP 26. Shropshire Council's intention to build 70 houses at Snatchfield Farm does not comply with the principles of the NPPF nor its iteration in the Local Plan, DP 26. Paragraph 4.227 of the Local Plan says: "Areas of Outstanding Natural Beauty (AONB) represent areas of the highest scenic quality, and, in landscape terms, are intended to enjoy equal status with National Parks. The primary purpose of an Area of Outstanding Natural Beauty designation is the conservation of the natural beauty of the landscape." The injunction to conserve is reinforced in the CROW Act 2000 which says " - - - in exercising or performing any function in relation to, or so as to affect, land in an AONB, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty". In 2012 the Shropshire Council assessment for Snatchfield Farm for the South Shropshire Landscape Sensitivity and Capacity Mapping report says "the site helps to alleviate the linear nature of the settlement edge in a prominent location. The area has very limited capacity for housing, as this would fill in the green wedge which is a major positive feature of the settlement". Snatchfield Farm (CSTO 21) is one of the few remaining examples of the medieval field system of Church Stretton. It is a finger of green meadow that provides a scenic route into and out of town for walkers on the long distance Jack Mytton Way, which traverses the site. This is important because it offers a fine vista of the hills of the Long Mynd to the north-west across the valley when approaching the town and when walking out of town through Snatchfield it provides an attractive panorama of the wooded hills rising to the south: some of these are ancient woodlands of a protected landscape owned by the Woodland Trust or the National Trust. Tourism is important for Church Stretton; walkers and holiday makers come to enjoy the scenery and we need to preserve it in the interests of both visitors and the community. Church Stretton, has, as the result of planning decisions, spread steadily into the open countryside of the AONB since the second World War. Development began as infill near the town centre in the middle of the valley; urban development to the west was limited because of the topography and the status of the Long Mynd much of which is in the ownership of the National Trust and this situation has fostered growth up the hillsides to the east. This urban growth has now reached the stage when its cumulative effect on the landscape must preclude any more significant major development on the hillsides east of the town.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1154B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Shropshire Council, in accordance with policy guidance in the National Planning Policy Framework, undertook a Full Objectively Assessed Housing Need (FOAHN). It showed a need for around 25,000 homes for the plan period, but the Council decided that the number should be around 28,000 because they considered that Shropshire should adopt a high growth policy that recognised the potential that could arise from major national initiatives, including the HS2 railway, the Midlands Engine and the Northern Powerhouse; the figure was subsequently raised to around 30,000 when the plan period was extended from 2036 to 2038. The guideline for housing in Church Stretton was reduced from 250 to 200, partly because of the deletion of the Gaerstone site (CSTO20) from the plan and partly because the school housing site (CSTRO18) in the current Local Plan was de-allocated when the developer withdrew the planning applications. The composition of the 200 homes is listed in Appendix 5 table of the plan, Residential Development Guidelines and Residential Supply; 17 have already been built, 62 have planning permission, 51 are estimated windfall and 70 is the Snatchfield Local Plan Allocation. In practice the National Planning Policy Framework does not permit the inclusion of AONB housing development within FOAHN targets for the county. Paragraph 11 of the NPPF says: "Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that: b) strategic policies should, as a minimum, provide for objectively assessed housing needs and other uses - - - unless: i) the application of policies within this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area (6); Footnote 6 says; "The policies referred to are those in the Framework - - - relating to - - - land designated as Green Belt, Local Green Space, an Area of Outstanding Natural Beauty, a National Park - - -" It follows clearly that a top-down target for development related to the county FOAHN cannot be imposed on Church Stretton because it is embedded within the Shropshire Hills AONB: a housing target must be derived from an assessment of local needs.
A1154B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	DP 26, paragraph 3 This section of the Local plan relates to Shropshire Hills AONB and says: " Proposals for major development (as defined within Annex 2 of the NPPF) in the Shropshire Hills AONB should be accompanied by a proportionate assessment setting out: a) The need for the development - - - b) The cost of, and scope for, developing outside the designated area, or meeting the need for development in some other way; and c) Any detrimental effect on the environment, the landscape - - - " Shropshire Council has accepted that the proposed Snatchfield allocation of 70 houses is a major development which the NPPF says should be refused other than in exceptional circumstances. The Council have published an AONB Exceptional Circumstances Statement which argues that Snatchfield meets the three tests set by paragraph 172 of the NPPF. The first test relates to the need for the development and its impact on the local economy. By its nature a housing development must cause some harm to the purposes for which the AONB was designated. It is therefore essential for the Council to provide conclusive evidence of such a housing need in Church Stretton. The Council argues that the 70 houses are required to support the town's role as a key centre in South Shropshire but they have not demonstrated the specific need for 70 houses, of which only 14 would be affordable and 56 would be market price houses. The recent Housing Needs survey carried out by Church Stretton Town Council demonstrated a strong demand for affordable homes rather than market homes which are likely, based on historical facts, to attract mainly retired people rather than key workers who will contribute to the economy. The second test relates to the scope for developing outside the designated AONB area or meeting the need in some other way. The Council do not appear to have fully assessed the scope for development in Craven Arms, a key centre, 8 miles south of Church Stretton and outside the AONB boundary. It has good bus and train links to Church Stretton and Shrewsbury. The Council offers no evidence that it has examined the option of meeting the need "in some other way". The third test relates to any detrimental effect on the environment. The Council says it has examined issues of landscape, wildlife, woodland heritage factors and flood risk and find that Snatchfield is the most appropriate for housing when compared with other available sites. But the proper test is not whether Snatchfield is less harmful than other sites but whether it is harmful in itself. It is a highly popular walk for both local people and visitors and its development would be harmful to the principle of conserving and enhancing the AONB landscape. Shropshire Council has not met the test of 'exceptional circumstances'.
A1154B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Shropshire Council cannot demonstrate that Snatchfield is a sustainable site for transport, nor cansite-specific problems be overcome. NPPF paragraph 103 says: "significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions and improve air quality and public health." Paragraph 108 says: "In assessing sites that may be allocated for development in plans, it should be ensured that safe and suitable access can be achieved for all." Snatchfield fails to meet these guidelines for the following reasons: Road Transport There are about 120 dwellings in the area served by a single access road network and there are a number of outstanding planning permissions, mainly in Clive Avenue, so the addition of 70 houses would mean about 200 houses would be served. The road access climbs from Watling Street South, up Clive Avenue, Ragleth Road, then steeply to the Chelmick Drive summit (one of the highest points of urban development in the town) where a new access, requiring the demolition of a bungalow, would descend to the housingsite. The network is below standard with Chelmick Drive and Ragleth Road being 4.8m wide carriageways compared with the Council's 5.5m specification for estate roads. The Clive Avenue section, which would service all 200 houses, is steep, has no pavements and a survey conducted by residents showed that it is now regarded as a conflict zone between traffic and pedestrians; the addition of 70 houses would make the existing dangers much worse. Pedestrian Access There is a more direct access to the town centre for pedestrians along the Jack Mytton Way, it is currently narrow, dark, overshadowed by tall hedges, poorly surfaced and badly lit; these discouraging conditions could be mitigated by upgrading the route. However it would not meet the standards for accessibility on foot, nor would it provide a reasonable route for people using wheelchairs or with sight disabilities.. It is a distance of 830m to the Sandford Avenue shops, 1.15km to the medical practice and 1.6km to the schools. The 'Manual for Streets' regards 800m as a comfortable walking distance and a 20 minute (1.6km) walk as acceptable in a suitable environment. The route involves a busy traffic light crossroads of the A49 which includes a pedestrian controlled crossing. The site falls just below the standards for access. There is no bus route in this area; the bus route to Ludlow and Shrewsbury is about 1km from Snatchfield and the railway station about 700m. Because of the access limitations for both vehicles and pedestrians Snatchfield is not a sound and convenient location for specialist housing provision or affordable homes. Snatchfield would be a 'Car Dependant' site which would contribute to Shropshire Council's greenhouse gas emissions.
A1154B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Alternative Deliverable Sites At the previous informal consultation, the Preferred Options stage, Shropshire Council ruled out for allocation sites below 0.5ha. Subsequently, but after the consultation had closed, they accepted that these smaller sites could be considered but have declined to work with the community to identify and assess them for sustainability. There is a widespread view in the Church Stretton community that a detailed examination would produce a number of small brownfield sites within the town boundary and small rural exception sites just outside the town boundary; both would usually be good sites for affordable homes, which is what are needed. Although any major site would not be welcomed by the community, and this was made clear in a recent survey carried out by the Steering Group of the emerging Community Led Plan, there are two potential sites on the valley floor which could accommodate a larger number of houses but would be less damaging to the landscape of the AONB than Snatchfield Farm. They are CSTO 35, field adjacent to Springbank Farm and CSTO 19, formerly CSTRO 14 under the current SAMDev local plan (sometimes referred to as Oak Berries, from medieval field names in the locality). This latter site was part of the substitute playing fields site allocation for CSTRO18, now de-allocated, so Oak Berries may now be available for housing development. Parts of both sites are in flood zone 3 but this can be avoided for house building or mitigated by raising part of the access road on a low embankment. It is not known publicly if either site has been put forward for development but both are worthwhile exploring in preference to Snatchfield.
A1154B7	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Summary document of A1154B1 - B4
A1166B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	As a resident of Church Stretton, I wish to object in the strongest possible terms AGAIN, to ANY housing development at Snatchfield - (CSTO21) How many times does this have to happen, numerous development applications have been refused and rejected for this inappropriate and unsuitable land over the years, for very specific and important reasons - NOTHING HAS CHANGED to affect any of these decisions! The site has been designated as an Area of Outstanding Natural Beauty (AONB) for very important reasons - I.E, with its last remaining unimproved Medieval Meadow in Church Stretton, it's 2 x Ancient Woodlands, the vast array of Flora, Fauna, Habitats, Nesting Birds, Animals, Bats & Badgers, to name just a few! Preserving these Trees and Green Spaces, must now be considered a Priority. The much valued and unspoilt landscape in Church Stretton is absolutely unique with its views and vistas which bring in much valued Tourism to the area with Walkers and Visitors, which our local economy needs and depends on. This development would have a completely negative impact on Tourism to this beautiful area. There are also MAJOR road safety and environmental concerns that need to be considered as it is an AONB. With the additional increased volume of cars using these roads for 70 New Homes, the impact will have severe consequences for pedestrians and residents safety. ALL of the roads to this site are totally unsuitable, they are inaccessible, unpaved in many areas, narrow and have steep gradients in excess of 1 in 8, which DO NOT get gritted when the weather is BAD in the Winter and so consequently access can be impossible! The land on this site is also extremely wet, so there will be MAJOR drainage issues and any housing development on this site, would pose a significant flood risk to these houses and also to the properties lower down the valley. Local facilities and infrastructure cannot cope at the moment, so building 70 New Homes will just exacerbate the situation - this development is just NOT viable. Shropshire Council have not met any of the criteria or produced any evidence for using the phrases "exceptional circumstances" and "public interest" with regards to the proposed housing development at the AONB - Snatchfield - (CSTO21). So, given all of this information, points, and facts, I believe that the proposed development of 70 New Homes on Snatchfield - (CSTO21), should once and for all, be deleted, refused and removed from all planning considerations, now and in the future
A1167B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	As a resident of Church Stretton, I wish to object in the strongest possible terms AGAIN, to ANY housing development at Snatchfield - (CSTO21) How many times does this have to happen, numerous development applications have been refused and rejected for this inappropriate and unsuitable land over the years, for very specific and important reasons - NOTHING HAS CHANGED to affect any of these decisions! A1193B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	1. Proposals for building on Snatchfield Meadow have been rejected 7 times by the County. What has changed? The meadow hasn't that. 2. This land is part of an Area of Outstanding Natural Beauty, given extra protection unless there are special circumstances. There weren't for the last 7 applications to build on this Medieval field so what is suddenly different? This proposal would destroy beauty. 3. The latest Government proposal is to create more countryside. This contradicts that. 4. A recent TV programme showed The Wash, where bird populations are dropping alarmingly, owing to the destruction of natural habitats. Climate Change is now recognised as a major factor, leading to flooding, which has affected Shropshire, and major fires in many parts of the world. We should all be helping nature to survive; proposals such as this one are totally out of keeping with today's thinking. Preservation is more important than the profit motive. 5. My wife and I have derived much enjoyment from walking through this meadow on the way to Ragleth Hill and cannot bear the thought of its becoming another estate. There must be alternatives. 6. It is difficult and dangerous enough to walk up Clive Avenue at the moment. This proposal would involve serious disruption and more danger with many lorries competing for space with cars, delivery lorries, of which there are more with lockdown, with children on their way to school and with older disabled people. We don't want accidents or deaths. 7. Why do we need all these houses? These are surely arbitrary figures.
A1194B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to inclusion of the site for following reasons - no evidence of exceptional circumstances for the development are put forward that meets the criteria, nor that alternative sites have been explored; The site is not sustainable and people will need to use cars to access services as it is over 1 mile to shops and schools; development of the site would see significant loss of an important wildlife corridor and impact on the surrounding AONB; The site is an example of medieval layouts of fields and its loss would be detrimental to the heritage of the area. It is also an important setting for the Jack Mytton way
A1384B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Against allocation of the site as the residential roads leading to it are already narrow and steep. Also object due to impact on the AONB
A1384B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Against allocation of the site as the residential roads leading to it are already narrow and steep. Also object due to impact on the AONB
A1384B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Against allocation of the site as the residential roads leading to it are already narrow and steep. Also object due to impact on the AONB

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1387B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Against allocation of the site as the residential roads leading to it are already narrow and steep. Also object due to impact on the AONB and feel better sites are available elsewhere in Church Stretton that are better suited for access to services
A1608B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Inappropriate, AONB, scale is too large, poor roads, out-of-town, inappropriate house types are likely (i.e. too large). Any alternative sites would have the same problems.
A1625B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The major development test in the exceptional circumstances argument has not been met. The site is car dependant and will exacerbate the pressure on the already narrow and unstable access route. This is the last of the three medieval meadows left in the town. There are other more sensible sites in Church Stretton which would provide affordable housing for local people.
A1626B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The major development test in the exceptional circumstances argument has not been met. The site is car dependant and will exacerbate the pressure on the already narrow and unstable access route. This is the last of the three medieval meadows left in the town. There are other more sensible sites in Church Stretton which would provide affordable housing for local people.
A1640B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Tourism is important for Church Stretton and, as such, the preservation of the natural landscape and visual landscape must be of the highest priority, as per DP18. There are no exceptional circumstances for this major development in the AONB. Alternative sites for development have been proposed by Church Stretton community groups. These sites are near the town centre and the town's services.
A1645B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	CST020 should be included in the LPR. It has been amended to take account of topographical issues, access and objections raised within the community during the consultation process. The site area has been amended, density reduced and on less visible areas, the wooded amenity areas would act as a 'buffer' to reduce visual impacts, alternative access. It would have less negative impacts than the current preferred allocation at CST021.
A1812B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	No exceptional circumstances. Other sites more suitable
A1815B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	[9 Forms Bs submitted, all on CST021]. No exceptional circumstances to allocate in AONB, no requirement for 70 homes here. Other sites in the town are better (Form 1). It has a low SA score (form 2). Smaller 0.5ha sites should be allocated – smaller sites would be preferred by the residents (form 3). Snatchfields is not the place for range of specialist housing. Due to viability issues relating to drainage, highway mitigation and buffering, it is unlikely that many affordable homes would be built (form 4). CST014 should be allocated instead (form 5). Snatchfield would not achieve DP13 or DP18 (form 6). The site would depend on private transport and the roads are unsafe (form 7 & 9). Brownfield sites should be used (form 8).
A1816B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Concern over traffic increase and lack of pedestrian pathways. It would affect the visual amenity of the AONB. There are other, smaller more appropriate sites in the town which are closer to the services on offer. CST014 should replace the Snatchfields proposal, with far less impact on the landscape. The Exceptional Circumstances Statement contains no evidence supporting the need for this major development which would impact the AONB and the surrounding environment.
A1817B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Bad effects on visual amenity. Site is in AONB. Flood risk increase. Far from existing services.
A1822B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	No exceptional circumstances demonstrated, in AONB, local people do not want it
A1853B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	This site is entirely unsuitable within the AONB. It is an important buffer between the existing buildings and Hazler and Ragleth hills, and should remain so. The PM has just announced a strategy of increasing the % of land to be left to the natural world. Developing Snatchfields would be a negative step. I note that Paragraph 172 of the National Planning Policy Framework (NPPF) describes the exceptional circumstances 'test' as follows: "Planning permission should be refused for major development in an AONB other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest. Consideration of such applications should include an assessment of: • the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; • the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and • any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated." The development of the Snatchfields would have very detrimental effects of the local environment.
A1855B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	ACCESS. Traffic access via Clive Av, Ragleth Rd and Chelmick Dr is narrow, with blind bends and humps, and no pedestrian footpaths. Part of the surface of this access is fragile, having already collapsed into sinkholes twice in recent years (subterranean stream washes away road bed). Totally unsuitable for use by the type of construction traffic this type of development would require. Additional domestic traffic, including delivery vehicles, would also increase traffic hazard/risk beyond the capacity of access. NOISE POLLUTION Modern styles of living are already creating new sources of noise pollution. Barbeques, fireworks used in family celebrations and music already drifts from one side of Snatchfield to the other on warm evenings. 70 more houses will increase this to the detriment to the rights of residents to quiet enjoyment of existing properties. Increased noise levels, which will also come from increased traffic movements, will have a devastating effect on local wildlife. WILDLIFE Dozens of varieties of birds feed, breed, roost and hunt across Snatchfields. In recent years, buzzards, Red Kites, owls and cuckoos have become common place. Weasels, and other hunting mammals cross the field, using field margins for cover. These would disappear should houses be built. DRAINAGE The Bridlways would be at risk of flooding from water run-off. Part of Snatchfield is already marshy, especially in wet weather, and the extra interference with run-off caused by new roads, housing, concrete and domestic garden design/buildings will increase risk. BREACHES OF GOVERNMENT GUIDANCE This development breaches declared Government policy of preserving designated AONB and environmentally precious sites. OTHER SITES There are several other, more suitable sites, available, which are closer to the town centre and local facilities. The Council has not provided any logical, reason against using these sites, which have been offered and are much more suitable for development
A1865B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	ACCESS. Since moving to Church Stretton over 8 years ago, sinkholes in Ragleth Road have had to be repaired twice in that time. This, coupled with the fact that the access for the large number of houses in the proposed development is restricted makes the site totally unsuitable. EMPLOYMENT/ENVIRONMENT Church Stretton provides limited options for employment, mainly serving the local community and tourism. The proposal for this development means that the new residents will need to travel further afield to obtain work opportunities (Shrewsbury, Telford, Wolverhampton etc). There is no heavy industry locally and minimal office opportunities. It can be argued that the development might increase the risk of destroying jobs in the tourism industry on which the town so heavily relies. DRAINAGE Snatchfield is already has marshy patches. The water will have to go somewhere. There must be a risk of increased flooding lower down the valley. BREACHES OF GOVERNMENT GUIDANCE This development breaches declared Government policy of preserving designated AONB and environmentally precious sites. Indeed, the government has decreed that there should be greater use of brownfield sites of which there are many within the County. OTHER SITES There are several other, more suitable sites, available, which are closer to the town centre and local facilities. The Council has not provided any logical, reason against using these sites, which have been offered and are much more suitable for development
A1873B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Site would be car dependent. Access is poor. No exceptional circumstances for AONB development. There are alternative sites in the town
A1881B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	major development site in Church Stretton is not needed and Shropshire Council has not demonstrated otherwise. Indeed, there has been no quantitative analysis of the need for housing growth in Church Stretton or for the AONB as a whole For Policy S5 to be 'sound' it would have to meet the 3 tests of 'exceptional circumstances' - as set out in Para 172 of the NPPF. Shropshire Council have failed to demonstrate these exceptional circumstances (indeed it is doubtful that any serious attempt has been made to do so.) Firstly, as outlined above, there is no adequate justification explained for the need for 200 new dwellings in Church Stretton. Secondly, the provision of housing in alternative locations outside Church Stretton and the AONB has not been adequately explored. For example, there is no adequate evidence to support the conclusion that Craven Arms is not able to meet any housing need identified for Church Stretton. Thirdly, insufficient weight has been given by Shropshire Council to their duty to take into account "any detrimental effect on the environment and landscape". As such, Policy S5 is clearly in conflict with national policy and insufficient evidence has been demonstrated in order to meet the test of exceptionality. Land for major development should not be allocated in Church Stretton
A1881B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Shropshire Council have not demonstrated that a major development in the Stretton Hills AONB is necessary and meets the 3 NPPF tests of 'exceptional circumstances'. However, even if this evidence subsequently comes to light, site CST021 is still a demonstrably unsuitable site for 70 new dwellings and I Object to Site CST021 on the following grounds - CST021 FAILS Shropshire Council's own Sustainability Assessment. CST021 is a COMPLETELY UNSUITABLE site to meet the Residential Mix requirements in Policy DP1 (specialist housing eg sheltered housing, extra care housing, housing to meet the needs of those with disabilities or special needs etc). CST021 will be a very expensive site to develop (topography, drainage, mature trees etc). As such, 20% AFFORDABLE HOUSING (Policy DP3) WILL NOT BE MET. CST021 WILL NOT DELIVER 10% net gain for biodiversity (Policy DP13). CST021 will DESTROY the rich biodiversity already in existence. CST021 will be a car dependant site - due to i) distance from shops, schools, GP Surgery and ii) distance to realistic employment opportunities. As such, CST021 will INCREASE Shropshire's greenhouse gas emissions. In addition, the additional vehicle movements (circa 600 per day) and the poor quality of the existing road infrastructure (particularly the pavement free Clive Avenue Conflict Area) will SIGNIFICANTLY INCREASE existing pedestrian safety issues. he only access to CST021 will have to pass through Flood Zone 3. Access for Emergency Vehicles CANNOT be guaranteed. In addition, in Shropshire Council's own words - "Runoff is likely to be RAPID given the site's location in the foothills. This catchment has been identified as one of those that is MOST SENSITIVE to the cumulative impact of any development
A1894B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	strongly object to Snatchfields being considered as a potential building site. The ancient area is currently one of peace and tranquility and an important haven for local wildlife with established native trees and shrubs. It is part of a celebrated walking route and an asset to our town for local residents and visitors alike. The site would require access by Clive Avenue. I live at the bottom of this road so already experience the congestion caused by drivers attempting to pass pedestrians and cyclists who don't have access to a pavement, leaving people who are trying to access their own homes or countryside on foot in a dangerous position. I have witnessed people turning into Clive Avenue and putting their foot on the accelerator as they attempt to drive up the narrow, steep road. A sight that makes me shiver for the safety of my young family who do not have a footpath to walk on and a situation that would become significantly worse with seventy households all accessing their new properties. (And this is without the danger, disruption and potential structural damage caused by all of the construction vehicles required.) In addition to this, Snatchfields would be a car dependent site thus adding to the problems already mentioned. It would also cause increased noise and would be in complete contrast to the Climate Change Strategy to avoid car use. (Policy SP3) I urge you to reconsider this proposal and look for more suitable, safer and convenient locations to the town centre.
A2127B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The Snatchfield site is a wildlife corridor promoting biodiversity. It represents the last relatively intact area of Church Stretton's three open fields. As thus Snatchfield provides a direct link with the historic development of the early medieval settlement of Church Stretton and should be protected as an educational resource in its own right.

Page 174

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A2129B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to the allocation of CST021 (Snatchfield Farm) on the basis that, in the event that Shropshire Council maintains that the allocated housing requirement in Church Stretton is to be met through development of a large site, there is another site (CSTR014) which is far better located for development and access to the town and is much less damaging to the nature and appearance of the AONB. Site CSTR014 is within easy walking distance of Church Stretton Town Centre, transport links and the Secondary School. It is not within a Special Area of Conservation, a Special Protection Area, a Ramsar Site, a SSSI or a National/Local Nature Reserve or Wildlife Site and the site is promoted and available and is also supported by the Town Council
A2129B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to the allocation of CST021 (Snatchfield Farm) on the basis that the allocation of 200 houses to Church Stretton is arbitrary and does not take into account the needs or requirements of the town Shropshire Council has not carried out any objective assessment of housing need within Church Stretton and has allocated the required 200 houses simply on the basis that Church Stretton must be allocated a share of the total housing the Council has planned to create in Shropshire. ONS figures indicate Shropshire's population growth over the Plan period will be driven by the older, 65+, age group. These people are likely to buy the proposed open-market homes built on CST021 thus exacerbating the demographic challenges in Church Stretton. The housing numbers indicated for Church Stretton have been influenced by Shropshire Council's desire to pursue a 'high growth' strategy, building more houses than are required within the County. CST021 should be removed from the Draft Local Plan and an objective assessment of housing need should be conducted for Church Stretton to identify specifically what type, and what numbers, of housing the community needs
A2129B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to the allocation of CST021 (Snatchfield Farm) on the basis that the site is not a suitable site for development as indicated by Shropshire Council's own Sustainability Assessment In the original assessment of sites in and around Church Stretton during 2018, 33 potential sites were identified through the call for sites exercise. Each of the sites identified were subjected to a Sustainability Appraisal covering issues including: - Distance from schools; - Distance from GP services; - Flooding issues; - Landscape sensitivity; In this process CST021 received a score of -7 which on Shropshire Council's criteria is a fail. CST021 should be removed from the Draft Local Plan as it does not meet Shropshire Council's own criteria for sustainable development.
A2129B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to the allocation of CST021 (Snatchfield Farm) on the basis that the Site Assessment process which resulted in the identification of CST021 was flawed as it failed to take into account more suitable brownfield sites within Church Stretton Shropshire Council's Site Assessments: Church Stretton Place Plan Area - November 2018 specifically excluded small (typically brownfield) sites within Church Stretton having a size less than 0.5Ha. The Council argued that such smaller sites would be uneconomic for developers to pursue. This has already proven not to be the case as planning applications are already being progressed for some of the smaller sites excluded by the Council's assessment. These smaller sites are typically much closer located to the facilities of the town and are also far less damaging to the appearance and quality of the town and the AONB than a large housing development far from the town centre and in a highly visible location such as is proposed for CST02
A2129B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to the allocation of CST021 (Snatchfield Farm) on the basis that CST021 is not a suitable site to achieve Shropshire Council Policies DP1 (specialist housing provision) and DP3 (affordable housing provision). Policy DP1 mandates that any residential development will be expected to provide a mix of housing sizes and types to meet the housing needs identified in the local community. Sites of 50 or more properties are required to incorporate a range of specialist housing types including sheltered housing, extra-care housing, retirement housing and housing that will meet the requirements of those with disabilities and/or special needs. Due to the location and nature of CST021 it is an inappropriate site to meet these specialist requirements. Policy DP3 requires that 20% of new homes in a development of 5 or more dwellings are affordable properties. However, it is open to developers to argue that, due to the impact on the profitability of the site, fewer affordable homes should be produced or a financial contribution made in lieu of affordable homes. Due to the topography of CST021 and the infrastructure requirements that will be needed to make development of the site viable (including drainage, highways, terracing, etc.) it is believed that CST021 will be an expensive site to develop. In these circumstances it is considered highly likely that developers will be able to argue that the 20% affordable housing be reduced or substituted with a financial settlement resulting in the net gain of fewer affordable dwellings in Church Stretton and an increase in open-market housing which, it has been established through surveys, are not required in the town. CST021 should be removed from the Draft Local Plan as it not compliant with Shropshire Council Policies DP1 or DP3.
A2129B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to the allocation of CST021 (Snatchfield Farm) on the basis that the site does not achieve the requirements of Council Policy DP13 (net biodiversity gain) or Council Policy DP18 (safeguard or enhancement of landscape character and visual amenity). CST021 is a haven for wildlife including badgers, at least 5 species of bats, nesting birds and butterflies. It has a mix of mature and younger trees including ash, oak, hazel, cherry, alder, and rowan. It also has brambles which provide habitat for several species including dormice. The lower part of CST021 is considered to be 'priority habitat' (rush pasture) and supports vascular plants and multiple invertebrates. Development at CST021 (irrespective of mitigation measures) can only result in a destruction rather than an enhancement of the above features which is incompatible with Policy DP13 which requires that ALL development must deliver at least a 10% net gain for biodiversity in accordance with the Environment Act. In respect of Policy DP18, this states that development proposals should respect, safeguard and wherever possible, restore or enhance landscape character and visual amenity in Shropshire. It further states that significant adverse landscape and visual effects will be a material consideration in determining planning applications. Given the existing stunning landscape that CST021 significantly contributes to, a major development of this site cannot possibly safeguard or enhance landscape and visual amenity. CST021 should be removed from the Draft Local Plan as it does not allow for compliance with Council Policies DP13 or DP18.
A2129B7	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to the allocation of CST021 (Snatchfield Farm) on the basis that major development of this site would not be in accordance with the sustainable transport requirements of the National Planning Policy Framework (NPPF) Section 9 of the NPPF (Promoting Sustainable Transport) states: - Para 102 - Transport issues should be considered from the earliest stages of plan making. Shropshire Council has no strategic view of transport issues to 2038 to inform the Local Plan proposals. The only document existing is the "Provisional Local Plan Transport Strategy 2011-2026". This was produced in March 2011 using an evidence base extending only up to 2009. This document is clearly long out of date and not suitable for use in discharging the Council's obligations under NPPF Para 102 in respect of the current Local Plan Review extending to 2038. - Para 103 - Significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions and improve air quality and public health. The proposed housing estate on CST021 will create a car dependent development with little option for alternative means of transport modes. The site is a considerable distance from a bus service to local towns, the town shops, GP and health services, schools and recreational facilities. Traffic surveys carried out recently have shown there is already significant road traffic from existing dwelling which would greatly increase due to the limited options for access to a development on CST021. - Para 108 - In assessing sites that may be considered for development in plans it should be ensured that safe and suitable access can be achieved for all. Access for pedestrians, wheelchairs, mobility scooters and cyclists to a development on CST021 is via sections of narrow roads without pavement. Coupled with a significant increase in road traffic this would provide a dangerous access route which it is very difficult to mitigate against. CST021 should be removed from the Draft Local Plan as it is unable to be brought into compliance with Section 9 of the National Planning Policy Framework (NPPF)
A2129B8	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to the allocation of CST021 (Snatchfield Farm) on the basis that Shropshire Council has not met the tests of "exceptional circumstances" for a major development within an AONB as required under the National Planning Policy Framework (NPPF). Major development in an AONB is demonstrably more damaging than smaller, carefully managed developments, designed to meet objectively assessed local housing needs. By actively promoting a major development at CST021 in the Shropshire Hills AONB instead of, less damaging, alternatives Shropshire Council is ignoring the clear intent of the NPPF. Para 172 of the NPPF states that "Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues. The scale and extent of development within these designated areas should be limited. Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest". Shropshire Council has not met the major development tests of 'exceptional circumstances' and 'public interest' in respect of the potential major development on CST021. The Exceptional Circumstances Statement produced by the Council contains no evidence of objectively assessed local housing need, no data to prove the economic impact of developing (or not developing) CST021. No detailed site review has been undertaken to confirm environmental impacts. In addition, the affordable housing requirements for Church Stretton can be met through alternative, smaller, less environmentally damaging sites in the town. In respect of the NPPF 'major development' test the Council has not given consideration to the need for major development on CST021 including the impact of including, it or not including, it on the local economy. The Council has not given consideration to the cost of, and scope for, developing outside of the AONB or meeting the need for housing in some other way than major development of CST021. In particular: - There is no objectively assessed need in Church Stretton for the proposed 200 dwellings up to 2038. - Consequently, there is no objectively assessed need for the proposed 70 dwellings on CST021. - The Council has provided no data illustrating the economic impact of the major development on CST021 or the impact of not developing the site. - The council has not carried out a detailed review of CST021, has not produced an ecology study for the site, has not carried out heritage, archaeological, or priority habitat assessments. CST021 should be removed from the Draft Local Plan as it does not meet the 'exceptional circumstances' test for a major development in an AONB as set out in the NPPF.
A2129B9	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to the allocation of CST021 (Snatchfield Farm) on the basis that Shropshire Council has applied a "one size fits all" approach to the provision of development land across the County and has not taken into account the special circumstances of the Shropshire Hills AONB. Other Councils have created dedicated, separate, Local Plans to address the needs of AONBs within their Council areas. In particular South Lakeland District Council and Lancaster City Council created a dedicated Development Plan to meet the special qualities and requirements of the Arnsdale and Silverdale AONB which falls within their Council areas. The Arnsdale and Silverdale AONB Development Plan Document identifies sites for new housing and employment which directly meet objectively assessed local community needs and sets out robust planning policies to ensure that developments respect the special qualities necessary to protect and enhance the AONB. Specifically, the Development Plan Document allows for a 50% affordable housing requirement in order to meet the objectively assessed housing need. It also gives priority to smaller development sites (typically less than the 0.5ha size that was excluded by Shropshire Council's site allocation process) limiting the damage to the AONB and avoiding issues of major development contrary to the NPPF. CST021 should be removed from the Draft Local Plan and a dedicated Development Plan should be created for the Shropshire Hills AONB which addresses the specific circumstances of development within an AONB.
A2130B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Disagree with allocation of the site for a range of reasons, which could also be applied to other areas within or adjacent to the AONB. Reasons for opposing the site allocation are: Impact of development on the AONB; site does not promote sustainable development as residents would be car dependent to access services and employment; site does not meet the needs of local population as no clear housing need has been identified; sites below 0.5ha should also have been considered in Church Stretton; topography of the site would require mitigations for flooding biodiversity and green infrastructure which make the site expensive to develop and will make delivery of policy DP13 impossible; will be in contradiction of Policy DP18; the site won't deliver sufficient type and number of affordable homes needed for Church Stretton. The designation of this site should be deleted and Shropshire Council should investigate a number of smaller sites in Church Stretton that will deliver genuinely affordable, accessible, energy efficient, low carbon homes that enable local people to live within the boundaries of Church Stretton, thus reducing car dependence
A2143B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Disagree with allocation of the site for a range of reasons: increase in traffic through steep residential roads that the development will create; unsuitable location to allow safe pedestrian and cycle access; increase in delivery vehicles would have detrimental impact on the area; ambulances would have difficulty accessing the site
A2145B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	We totally understand that we need more houses. But my main objection the development is far too big. there will be too many cars using Clive avenue and that will be very dangerous for pedestrians. In my opinion get rid off the old sheds which ones are in a very bad state and full of asbestos. Use that area for a small development of 8-10 houses. In that case, that will keep everybody happy.
A2151B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I write in support of the All Stretton Village Society submission which objects to Policy S5 of the Church Stretton Area plan. In particular, the Draft Local Plan for this area fails to distinguish the AONB and further fails to recognise Church Stretton as the only town in the AONB. The draft local plan does not reflect the high level of protection afforded to AONBs under Section 85 CROW 2000 and NPPF 172. This local area must remain an economically viable and thriving community and not preserved as a museum-piece. However, given the special nature of Church Stretton within the AONB, and the undoubted economic benefits that the AONB brings to Shropshire in terms of tourism, it is essential that a separate plan be constructed which reflects Church Stretton's position as the market town of the AONB. An example of where this has already been done is in South Lakeland.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A2185B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Snatchfields is a haven for diverse wildlife - foxes, badgers, deer and many birds and insects. It is an ancient meadowland and you wish to replace this with an urban sprawl of 70 up-market and expensive houses. More of this new type of housing is not needed by the local people of Church Stretton. Brownfield sites could be developed within the town in order to provide affordable houses for young people - but this is an idea which has been rejected. Rather than local people, this development would attract buyers from other areas such as Shrewsbury. I already know of one young couple who have heard about the proposed development and plan to put their names forward; they are wealthy professionals who would be travelling daily to Shrewsbury for their work. This would be repeated many times over. Climate change is high on the world's agenda. I do not feel that ripping up green areas and covering them with unnecessary housing makes a contribution towards addressing the problem. Concrete in itself gives off a lot of carbon dioxide, not to mention the pollution caused by the building process. This area becomes saturated, especially during the winter months, and once the green space is replaced by roads, houses and drives, the water would be displaced to lower-down areas, causing flooding problems for other properties. Ragleth Road is not suitable for access, especially where it becomes steep and narrow at its junction with Clive Avenue. It is used by many walkers, elderly people, and children going to school. It is therefore dangerous for pedestrians and also prone to developing sinkholes as the water from surrounding hills undermines it constantly. In view of all these points, I would hope that the Council would think again before destroying such a beautiful area within the AONB - an area which the Government plans to protect from development in the future.
A2195B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	National policy designation Snatchfield (CST021) is a designated ANOB which is a national designation to protect the area. To achieve the designation the area will have been subject to rigorous appraisal as to its quality and uniqueness. These factors have not changed and as such is not suitable for development The recently published Planning White Paper: Planning for the Future (2020) sets out the Government's approach to planning for the coming decades. It will create Protected Areas where development will be restricted to protect areas of treasured heritage like AONBs and National Parks. Access to Snatchfield site is via Clive Avenue and Ragleth Road Clive Avenue is approx 200m long, it is narrow, twisting and has poor visibility. It has a steep gradient in places and is without pavements. It is already dangerous for pedestrians. Save Snatchfield group studies (2 week day, 2 weekend) forecast an annualised vehicle and pedestrian/cyclist movements in the Clive Avenue Area are currently around 300,000 per annum. The split between vehicles and pedestrian/cyclists is 75/25. During our surveys we recorded 102 'safety concerns' and 'near misses'. No similar studies have been undertaken by Shropshire Council. Adding likely new vehicle movements of over 600 per day to an already unsafe route will exacerbate the situation Ragleth Road has longstanding sinkhole and subsidence problems. The considerable volume of HGV construction traffic over the site development process can only exacerbate existing issues. On this basis I wish to object to the allocation of Snatchfield as a suitable site for a housing allocator
A2198B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I strongly object to the inclusion of site CST021 and to Shropshire Council's Exceptional Circumstances Statement. It is very dispiriting that yet again I need to object to another proposed major development which would further damage the South Shropshire Hills AONB. This is particularly inappropriate at a time when the prime minister has just signed the Pledge For Nature, and made a commitment to protect the English countryside and to support the recovery of nature, including national parks and AONBs. Objections and arguments against major housing developments in the South Shropshire Hills AONB, have been made repeatedly by local residents to Shropshire Council over the past decade. Why are small sites not counted in the numbers which Shropshire Council deem (spuriously in my opinion) to be needed to meet Church Stretton's needs? Small developments provide housing for families as well as large developments, but are more in keeping with the visual landscape, so important in an area where tourism is the main industry. Why have Shropshire Council not followed the example of Arnsdale and Silverdale AONBs, who successfully argued that priority be given to small sites, and meeting local housing needs, rather than compensating for shortfalls in the whole county or adjoining counties? Shropshire Council's Exceptional Circumstances Statement is simply not true. Firstly there are enough small sites in Church Stretton to accommodate 70 houses, and at least two potential sites in Church Stretton which would accommodate major housing developments, but in a less damaging way than the Snatchfield site, namely CST014 (the site behind Church Stretton School) and CST035 (the site abutting Springbank Farm), although as I hope I have already made clear, I oppose any major housing development in Church Stretton because it lies within the AONB. Secondly, Craven Arms is outside of the AONB, is also a key centre in the same way as Church Stretton, is only 7 miles away and has bus and rail links to Church Stretton. There are no exceptional circumstances to justify the destruction of AONB open countryside. The Snatchfield site is not sustainable. A housing development there will increase car use and associated carbon emissions and congestion problems in Church Stretton, partly because of distance from the town amenities and the schools, but also because the access via Clive Avenue is already dangerous for pedestrians and cyclists. The Snatchfield site is an unspoiled green field site which is highly visible from many viewpoints, borders ancient woodland, and is an important wildlife corridor. Preserving such an area should be a priority in these times of dwindling biodiversity. Light pollution and noise pollution are also important factors which should be taken into account, both in terms of the impact they will have on wildlife and for people living in the vicinity. Many years ago a Department of Environment Planning Inspector, who rejected an appeal for planning permission on this site, drew attention to the amphitheatre effect at this site I hope that Shropshire Council will take into account the feedback that local residents have provided in the past about proposed developments on this site. Not surprisingly people who take the trouble to take part in consultations become disillusioned when their Council continues along the same pathway, apparently intent on getting their own way by hook or by crook.
A2251B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Development over recent years has put an incredible strain on the infrastructure in Church Stretton, roads/traffic/doctors. In a period where mental health issues are increasing people can benefit from exercise in our beautiful countryside. This development should not be allowed to re-route an ancient right of way
A2252B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Object to inclusion of CST021 within the Plan as: There has been no objective assessment of housing need. Without this, the guideline for Church Stretton is just an arbitrary figure. Local agreement of need for around 20 affordable houses, due to local demographics there are always other properties available. Due to site constraints and associated costs, CST021 will deliver no affordables. As Shropshire's housing need is being exceeded and cross-boundary need accepted (without consultation, so that Green Belt can be protected and valued countryside in Shropshire lost), no contribution is required from Church Stretton and the AONB, other than windfall and affordable dwellings. CST021 was withdrawn from the Local Plan process in 2012 as the Council said it was not suitable for development and was not supported locally. Nothing has changed, except infilling around the site has exacerbated problems. CST021 performs poorly within the Sustainability Appraisal. CST014 performs better and is now available. The AONB has greater protection from development than other areas - no major development should occur without exceptional circumstances. Including CST021 when there are alternative sites, several smaller, fails the exceptional circumstances requirement. CST021 also contradicts policy DP26. The 875 responses to the Community Led Plan Household Survey clearly show residents wish to "protect the landscape on both sides of the valley" and "preserve the character and appearance of the town (and) preserving the trees and green spaces". Vehicular access to CST021 is dangerous, demolition of a bungalow will not resolve steep gradients, pinch points to the A49, on-street parking, subsidence on Ragleth Road and conflict between vehicles and pedestrians. Further traffic and pedestrians from development of CST021 would increase risk. No comprehensive traffic survey has been conducted by the Council, a local on highlights problems. CST021 is saturated and there is run-off into the Bridalways and from here into Swains Meadow causing flood risk when it rains. Development would increase these problems and it is unclear how development could alleviate them. Tourism is vital in Church Stretton, development of CST021 (around the Jack Mytton Way) would detract from this and aspirations to increase walking in the hills east of the A49. Jack Mytton Way is well used and would not be the same if through a housing estate. CST021 is an important habitat including for Badgers, Bats, Foxes, Deer, Owls, Buzzards and smaller birds. Development of CST021 contradicts policies DP13 and 18. Development of CST021 would increase smoke pollution (more bonfires, barbecues, wood burning stoves etc), noise pollution (amphitheatre effect of the valley) and light pollution. There is insufficient infrastructure, employment and parking in the town centre (need to cross the A49 from the site). Smaller brownfield sites should be pursued.
A2254B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The site is not suitable for housing and has been rejected before. Access to the site is poor. Developing the site would cause disruption to existing residents for a long time. Clive Avenue is hilly and narrow and traffic would have further problems with 70 more houses.
A2255B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	SC is attempting to destroy a valuable country green space. AONB status means nothing. This site was refused at SAMDev. This site is completely inappropriate and would spoil a valuable community green space. Other areas in the town are suitable for housing but have been ignored. This site would cause disruption to existing residents over long periods. Traffic delays and friction between drivers would result. Access to the Battlefield estate should be via Watling Street south, not north.
A2261B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Road network cannot sustain more houses. It is dangerous in Clive Ave and Snatchfields La as it is.
A2262B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Road network cannot sustain more houses. It is dangerous in Clive Ave and Snatchfields La as it is. I see no exceptional circumstances that justify the destruction of our landscape for ever, one recognised as an AONB.
A22641B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	There are no Exceptional Circumstances for this proposed development in the AONB. There are less damaging sites in Stretton not in the AONB. The proposal is in conflict with national policy as insufficient weight has been afforded to conserving and enhancing the AONB. Snatchfield is the wrong site to include any special housing to meet the need for retirement living, sheltered housing, extra care housing, housing to meet the needs of those with disabilities and special needs. Access to the site is dangerous, no pavement up Clive Avenue, single file traffic in places. The road is continuously collapsing.
A2265B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The council has a responsibility to safeguard Church Stretton's position as the gateway to the hills. This proposal will decrease the attractiveness of the area. I am concerned for the safety of the residents following the increase in traffic this proposal will bring. Clive Avenue is narrow and beyond the pinch point will be made a dangerous road. There are several other smaller low impact sites in the town that could provide the sort of low cost practical housing that is required.
A2270B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	The access roads are not suitable for any extra traffic, they are at capacity now. The lower end of Clive Avenue poses a threat to safety. The Snatchfields site is not suitable for the young or old as it is too steep.
A2272B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to CST021. Access is dangerous and parts of Clive Avenue have no footpath and are narrow. We walk the Jack Mytton Way and it would be awful to lose this historical meadow. The noise would be terrible as several hundred people would be living in a "bowl" This development will also affect our dark skies status. I support the cornerstone objection.
A2273B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to CST021. Access is dangerous and parts of Clive Avenue have no footpath and are narrow. We walk the Jack Mytton Way and it would be awful to lose this historical meadow. The noise would be terrible as several hundred people would be living in a "bowl" This development will also affect our dark skies status. I support the cornerstone objection.
A2278B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I object to site CST021. No development should take place in the AONB without exceptional Circumstances. There are other possible smaller sites. It is a meadow of historical importance, to develop it goes against SC policies DP13 and 18. The valley is a natural bowl and pollution would get trapped. So would noise and light pollution, threatening our dark sky status. Large concerned over the infrastructure issues. Parking, Medical dentists? Drainage. What has changed since this site was removed from consideration in 2012.
A2279B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Access to the site is very difficult and steep. Roads are often icy which makes it even more dangerous for pedestrians and motor traffic. Flooding is already a concern and more building will increase run-off. Surely a better site would be CST014

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A2287B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Snatchfields lane already has a drainage problem, creating a flood at the bottom of Clive avenue. Traffic down Clive avenue following this proposal would make enormous problems as there are no footpaths and bends down this steep hill make driving dangerous. It would be a crime to destroy the Jack Mytton Right of Way.
A2310B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	At the recent virtual United Nations event, Boris Johnson pledged to increase protection of the English countryside to support the recovery of nature: '...to support biodiversity we must turn words into actions and agree ambitious goals and binding targets'. At the heart of this commitment is the protection and expansion of National Parks and Areas of Outstanding Natural Beauty. At the recent Citizens Assembly on Climate Change Solutions, a key recommendation was that all new housing developments must have good access to facilities through walking and cycling. Developments which increase reliance on car use should be resisted. I do hope that Shropshire councillors are able to recognise and support the direction of travel that we as a country are now keen to embrace to mitigate the imminent threats of pollution, climate change and depletion of biodiversity. Locally to Church Stretton, which is wholly within the AONB, this means protecting the area from anything other than sympathetic small-scale developments and definitely not building any more on the hillsides, where the most damage will be done with regard to all of the factors mentioned above. The accolade of AONB has been awarded to just 38 areas in the whole of England and Wales and is a recognition of landscape which is exceptionally fine, of great value to the nation and worthy of conservation. In a very real sense AONBs belong to us all and they should be protected from the predations of development. The Snatchfield site lies within the AONB and is a well-used, primary access route to Hazler Hill and Ragleth Hill and the countryside beyond. Development of this hillside site would be intrusive and overbearing and would damage a 'public visual amenity'. Already the hills that surround Church Stretton have been somewhat snared by creeping development, and any further development plans should be strongly resisted. Any new developments in Church Stretton should be small in scale, in keeping with the local area and restricted to the valley floor to ensure sustainable access to local facilities on foot or by bicycle. I would argue that windfall sites and available brownfield sites should be taken into account, and if any larger developments are still deemed necessary because of economies of scale, first consideration should be given to the area near to the schools or to the area to the south of Stretton Farm Road. The latter site might well be challenging as it tends to bogginess, but the upside of this is that it could be developed as an area of unique interest and value to the town and to visitors (upon which the economy of the town substantially depends) as it could include natural areas in the form of ponds in addition to housing and employment and visitor facilities: I strongly object to the proposed development of 70 dwellings on the Land at Snatchfields in Church Stretton (Ref S5.1 Residential Allocations. Church Stretton Key Centre) for the following reasons:
A2313B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	1. Building on rural land surrounding the Stretton Hills will diminish greatly the Area of Outstanding Natural Beauty which is the main attraction of the area. Whilst the Stretton Hills are a great asset, they cannot be separated from their rural landscape in terms of natural beauty. 2. Significant development will increase the population and may well result in pressure on services. Services such as banks, dentists, GP surgeries and post offices are facing external pressures nationally and would almost certainly not be in a position to respond to increased demand. 3. Large development on greenfield land will not, in the long term, deliver the mix of housing required for the local community. So called 'affordable homes' soon become unaffordable when sold on, even if some safeguards are put in place initially. 4. Many incoming residents will add to the road traffic in the area, increasing pollution and reducing air quality. 5. Whilst Church Stretton is referred to as a Key Centre, it is in relation to the current community and 'wide rural hinterland' who already use the town and would be unlikely to benefit from further significant housing development as they already live here or nearby. Residential development of any significant size would not 'enhance' the role of Church Stretton plays in Shropshire, it would greatly diminish its significance as a tourist attraction. 6. There are several brownfield sites in the town, some already identified, that should be prioritised for development instead of greenfield land. Whilst large developers may not benefit from small scale development on brownfield sites, this type of development could deliver more 'subservient' housing, benefit local builders and increase employment of local tradespeople and small businesses. This is unlikely to happen with larger developers. Alternative development sites. a) Site of previous 'TOFFS' store in residential road which has been empty for two years. b) Repurposing of empty shops and banks for residential use (already identified by the Government as a priority). c) Consider potential incentives to convert large, difficult to sell, houses into two or more dwellings at more affordable prices and without impact on land use
A2326B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Inappropriate site for major development, no exceptional circumstances provided, it is in AONB, density of 70 too high, visual impacts, habitats and mature trees on site, existing highways insufficient
A2326B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	There has been no quantitative analysis of the need for housing growth in Church Stretton or for the AONB as a whole. The justification provided for the delivery of houses within the AONB is weak and fails to demonstrate exceptional circumstances. S5 is in conflict with National Policy
A2347B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	1. Church Stretton is meant to be in an Area of Outstanding Natural Beauty. A development of this size and position undermines that status and massively damages the scenic beauty both of the hills and from the hills. 2. This development will contribute to the ongoing damage of the natural environment and wildlife of the area (something acknowledged as a problem in the main section of the Draft Local Plan). Apart from the intrinsic value of the environment and its wildlife, it adds massively to the quality of existence in the town. 3. Apart from the environmental damage caused, undermining the AONB and its appearance around Church Stretton will detrimentally impact the tourist based economy of the area. Perhaps more should be made of this local natural resource, not less. 4. It is very unlikely, that these homes will house many people with jobs in Church Stretton. The development will add further to traffic movements on the A49. This will counter objectives of environmental sustainability and reductions in emissions. It will add to existing unsatisfactory levels of air and noise pollution from this road which should be dealt with even as things stand. 5. There are alternatives, if these are less easy for the councils involved and less profitable for developers. There are a number of sites in the town that should be developed first. Action should be taken on the Crown Carpets site(s) at the bottom Burway. There are many unused/underused sites within the "business zone" where retail businesses, financial concerns etc are withdrawing and are unlikely to return in the foreseeable future. Too many retail units are given the apparent signs of occupation and economic viability by charitable use. Also, some of the hospitality units have either closed or appear to be in irretrievable decline. There should be some radical repurposing of many buildings to provide housing, reinvigorate the local tax base and prevent the use of agricultural land, woods etc. (The former TOFs retail unit on Beaumont Road is an excellent example of where town space could be brought into resident use to individual and collective benefit.) While it might be sad in some ways, there are a number of very large, older properties lingering on the property market, which perhaps need sympathetic subdivision. 6. Apart from the Snatchfield Site, when this development is added to the other threatened sites of longer term development along the Stretton Gap, the area will soon take on the horrid appearance of the Battlefield area of Shrewsbury. Another environmental monstrosity waiting to happen at the hands of "government planning". 7. We should wait? Covid, Brexit... even by the usual standards of difficulty in predicting the future (until 2038!), who knows what is about to occur in the next few years in terms of both the quantity and quality of economic activity. 8. If the natural environment and scenic value do not have importance in an area like Church Stretton, and on the sides of Hazler and the Ragleth, then where does it matter and where does it get protection? Stop preaching to us about sustainability and global warming as these sentiments are clearly not meant and are merely used to fill bureaucratic paper and time.
A2349B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	Strongly believe that this major development will have far-reaching and irrevocable negative impact on the Shropshire Hills AONB. The AONB requires particular respect and protection of several aspects. This site holds a prominent position clearly visible from many areas of the valley. A housing estate would create a large suburban area that would dominate and destroy the character and appearance of the landscape. As a local resident and regular walker in this area, I am greatly aware of its benefits to health and wellbeing through appreciation of open spaces, tranquility and wildlife. The Jack Mytton Way runs through the site, contributing to tourism in the town. The proposed development would destroy the high levels of biodiversity on the site. It borders areas of ancient woodland and provides a habitat for numerous wild mammals, birds, invertebrates and plants. This is one of very few remaining areas of historic landscape and if developed, would be lost forever. In addition to the sensitivity of the landscape and natural environment there are other reasons why the site is unsustainable. I have serious concerns regarding the safety of road users due to the limited and challenging access to the site. The only access is via Clive Avenue at a point which is already dangerous, particularly in bad weather. This part of the road is steep, narrow and does not have footpaths. It has a high volume of use by schoolchildren, walkers, elderly residents and vehicles including HGV and delivery vans. I feel that sustained increase in traffic from 70 additional households would greatly increase the congestion, emissions and safety risks. Due to the distance from schools, shops, medical services etc, with no transport links, the site would be car-dependent. There are drainage issues, a brook runs through the site, access crosses a flood area and potential run off from a major development would increase problems further downhill. Ragleth Road already has problems with damage from sink holes which would be further compromised by heavy construction vehicles which would also cause huge disruption to traffic and local community. I do not believe that the requirement for development is based upon objective assessment of housing need in Church Stretton. The Snatchfield development seems unlikely to provide 20% affordable housing of the type required to meet need for smaller or adapted homes close to the town centre. Benefits from the development to local shops and businesses would be insignificant compared to the strain on medical, educational, welfare, transport services etc. Actual local needs should be met using brownfield or alternative sites (eg CST014) which would have significantly less impact on the AONB. Community surveys appear to demonstrate that local priorities across all ages are to preserve the landscape/countryside/AONB that are so central to this town and its economic situation. Major development of this type is not necessary or appropriate in the AONB. Irreversible mistakes must be avoided and responsibility must be taken to conserve and enhance the character of the landscape.
A2352B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	I strongly object to the inclusion of Site CST021 within the plan for the following reasons: The proposed development is contraindicated by both national policy and the County's own plans (including but not limited to SAMDev). On 28 September 2020 the Prime Minister signed the United Nations Leaders' Pledge for Nature and made significant commitments to protecting biodiversity and increasing the 26% of protected land (National Parks and AONB) in England to 30% by 2030. Site CST021 is a biodiverse site within an AONB and clearly falls within the remit of this commitment. Development within an AONB is only permitted in exceptional circumstances and where it can be demonstrated that the development is in the public interest. Annex 2 of the NPFF enumerates three areas which require a proportionate assessment where such development is under consideration. Clear justification, in the public interest, must be present for all three criteria for development to be permitted. I address these below with reference to SC's Exceptional Circumstances Statement. 1. The need for development. SC's Exceptional Circumstances Statement for this proposed development references an assumption that employment will increase in line with Church Stretton in line with Local Plan Review. However, I can find no compelling evidence of or substantive plan for any such employment increase in the local area and hence evidence for increased housing need. The current and recent employment opportunities in Church Stretton are extremely limited and predominantly low paid, which would lead to occupiers of the new development commuting out of the area for work and a consequent increase of traffic and pollution with little benefit to the town's economy. The Statement fails to show a quantifiable analysis of the impact on the local economy of NOT developing the site. 2. The cost/scope for developing outside the designated area. SC's Exceptional Circumstances Statement discusses alternative options of Shrewsbury and Craven Arms, but is silent on alternative sites within Church Stretton itself. Alternative development sites, both small and major, exist within the town which would have a smaller negative impact on the AONB and should form part of a holistic assessment. 3. Any detrimental effect on the landscape and the environment. It is specious to suggest that the impact on the visual amenity and environmental security of this landscape could be mitigated by design. The site is highly visible from many points in the valley and surrounding hills and its loss would be irreversible. The section of the SC's Exceptional Circumstances Statement which deals with this criteria (4.21 to 4.28) is thinly argued and unsupported by evidence. In effect, the suggestion seems to be that Site CST021 is the least worst option (of the limited options considered), which is not a compelling argument for development in an AONB. I dispute that Shropshire Council has satisfied the requirement for providing a proportionate assessment or of demonstrating that it is in the public interest to permit development on site CST021 within the AONB. In addition to the principles highlighted above, I object to the inclusion of site CST021 on the following grounds: 1. Access to the site, both pedestrian and by car, is indirect and through steep and single-track roads. The roads are wholly unsuited to a higher volume of traffic particularly in the areas where there are no pavements and the road is shared with pedestrians. I live at the lower end of Clive Avenue and my family walk up and the down the bottom of Clive Avenue to access the town and public transport virtually every day. This section of road is steep, only partially lit and has no pavement. This development would compromise our safety through increased traffic in this area. 2. My family and I walk in the Church Stretton hills several times a week, and use the Jack Mytton Way across the site very regularly. The building of 70 houses on the site would be hugely detrimental to the many local people and visitors who are lucky enough to enjoy this area. I find it immensely disappointing that the Council's position is to argue for this development when it so clearly is in contravention of national and local policy put in place to protect such sites.

Further traffic and pedestrians from development of CST021 would increase risk. No comprehensive traffic survey has been conducted by the Council, a local on highlights problems.</p> <p>CST021 is saturated and there is run-off into the Bridalways and from here into Swains Meadow causing flood risk when it rains. Development would increase these problems and it is unclear how development could alleviate them.</p> <p>Tourism is vital in Church Stretton, development of CST021 (around the Jack Mytton Way) would detract from this and aspirations to increase walking in the hills east of the A49.</p> <p>Jack Mytton Way is well used and would not be the same if through a housing estate.</p> <p>CST021 is an important habitat including for Badgers, Bats, Foxes, Deer, Owls, Buzzards and smaller birds.</p> <p>Development of CST021 contradicts policies DP13 and 18.</p> <p>Development of CST021 would increase smoke pollution (more bonfires, barbecues, wood burning stoves etc), noise pollution (amphitheater effect of the valley) and light pollution.</p> <p>There is insufficient infrastructure, employment and parking in the town centre (need to cross the A49 from the site).</p> <p><u>Smaller brownfield sites should be pursued.</u></p>
A2366B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	<p>ALSO SEE ATTACHMENTS FOR A2366 CACA SURVEY 2019 FULL REPORT and CACA SURVEY 2019 KEY SUMMARY</p> <p>This objection solely relates to the Transport Statement for Land at Snatchfield Farm (Site CST021) Church Stretton. The objection INCLUDES two attachments to the e mail entitled Local Plan Review - Bunce, which are referred to in the text below and should be read in conjunction with the text below. The Transport Statement for Land at Snatchfield Farm is dated 26 June 2020, fully 18 months after Shropshire Council first proposed CST021 as a preferred option. As such, it is hard to escape the conclusion that Shropshire Council are trying to 're-fit' some (albeit flimsy) justification for their choice, long after the initial decision was taken. Indeed, Shropshire Council Highways and Shropshire Council Planners had previously (2014) decided on the basis of a similar Transport Statement (2012) thatthe technical exercise (previous BWB Report) has demonstrated there will be a significant impact on the local highway network without any consideration for mitigation or improvement and as such Snatchfield could not be supported for future allocation'.</p> <p>It is hard to see what has changed since 2014. Particularly, as the Transport Statement for Land at Snatchfield Farm (Site CST021) Church Stretton is a very high level, desktop driven report that lacks objective analysis and contains suspect base material and illogical extrapolations. For example, it is nonsense to extrapolate peak rate trips from a development 'Land Adjacent to Church Stretton School'. For one thing, this site is a short, level walk from town centre amenities, while CST021 is anything but. For another, were the statistics for 'Land Adjacent to Church Stretton School' based on an actual vehicle count or estimated projections? The Transport Statement consistently claims that the traffic increase will be well below the capacity of the local roads but nowhere does it reveal what those capacities actually are, which seems to undermine the case being made. Beyond, some sweeping statements that there are no pedestrian safety concerns from the additional vehicle journeys generated from the proposed Snatchfield development, no 'on site' observations have been done by WSP to assess the existing (considerable) vehicle and pedestrian conflicts in the pavement free Clive Avenue Conflict Area. This contrasts with the 102 'incidents of concern', including 'near misses' recorded by the Church Stretton community during our 4 traffic/pedestrian safety events in 2019. In conclusion, the WSP report does nothing to allay the justifiable concerns of local residents regarding traffic generation and pedestrian safety. We would happily contest the WSP 'findings' at a Planning Inspectorate Examination in Public. The evidence collated by the local community (the two documents attached to the e mail entitled Local Plan Review - Bunce), represent compelling evidence of the unsuitability of site CST021. We will continue to build our evidence base and consult with Highways Consultancies and Transport for New Homes over the coming months.</p>
A2376B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	<p>Site CST021 (Snatchfields Farm) is an area of open land extending into the east side of the built-up area of Church Stretton. The open land softens the appearance of this elevated area of the town when seen from surrounding higher land, including in views across the valley from the Long Mynd. The open land also gives a gradual transition from the built-up area of the town on the footpath that leads to Hazler Hill. This path forms part of the Jack Mytton Way, an important recreational route.</p> <p>The National Trust is a charity founded in 1895 to promote the permanent preservation of places of historic interest and natural beauty for the benefit of the nation. Although independent of government, we have been given the unique ability to declare our property inalienable, meaning that it will be protected for everyone, for ever. Our ownership of land at Church Stretton includes a significant area of the Long Mynd on the west side of the town. Near the site, we own 7.3ha of land comprising part of Raglith Wood with adjoining paddock. This land was bought by the Trust in 2001 with a bequest from Mr K E Wild and a grant from the Countryside Agency. The nearest part of our ownership is about 100m from the site boundary.</p> <p>Raglith Wood is an Ancient Semi-Natural Woodland. Ancient Semi-Natural Woodland is identified as irreplaceable habitat in the National Planning Policy Framework. The woodland within our ownership is largely upland oakwood with an area of wet woodland – both of which are identified as UK BAP priority habitats. The paddock includes an area of lowland dry acid grassland, also a UK BAP priority habitat.</p> <p>Like the whole of Church Stretton, site CST021 is within the Shropshire Hills AONB. Paragraph 172 of the National Planning Policy Framework states, "Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues."</p> <p>Church Stretton is the only market town in the Shropshire Hills AONB. This is recognised in the AONB Management Plan which states, "As the only such town in Shropshire within a nationally protected landscape, the scale and design of development here needs to be of high quality and be sensitive to the location. The fact that no communities have come forward as Hubs or Clusters within Church Stretton's hinterland places greater pressure on the town itself to accommodate housing, while at the same time there are real physical as well as environmental constraints on the availability of sites in the town." The Management Plan also states, "The AONB Management Plan supports a vision of sustainable rural communities and of development which enhances local landscapes, heritage and biodiversity. Housing developments need to be of appropriate scale to the location and its landscape sensitivity, and of a high standard in terms of design."</p> <p>We raised concerns about impact of development on the natural beauty of the AONB in our response to the preferred sites consultation. We continue to have these concerns. The Council's Landscape and Visual Sensitivity Assessment (Gillespies, 2018) shows the site as part of an area with medium-high landscape and visual sensitivity to housing development. This clearly indicates that there would be some harm to the landscape of the AONB as a result of the development of this site. In accordance with the NPPF, that harm should be given great weight.</p> <p>Appendix F of the sustainability appraisal states, "the site's visual and landscape sensitivity to residential development is amongst the lowest in Church Stretton." However, we are aware that Church Stretton Town Council has suggested alternative sites within the town and other means of meeting the development need identified. We do not envisage any of these having the same harm on the AONB as CST021 and urge Shropshire Council to give them serious consideration.</p> <p>Our preference would be for the allocation on site CST021 to be deleted and for the land to be excluded from the development boundary.</p> <p>If the Council continues to propose the allocation, we suggest that the development guidelines in schedule 5.1 should as a minimum address mitigation of the impact of development of this site on the AONB, including in views across the valley. This could, for example, include guidance in relation to landscaping within the site as well as on its boundaries, the quality of design, the need to reflect local traditions, the choice of materials and use of external lighting. These are all matters raised in general in Policy P4 of the AONB Management Plan.</p>
A2381B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	<p>The proposed development land at Snatchfields Farm (CST021) has been put forward by Shropshire Council with out any consideration of the restrictions and protection that an ANOB is subject to. Shropshire imposes many rules in its area of control but fail to follow rules and regulations that the Authority itself should follow. How the Council feel they can over ride and ignore these requirements is deplorable and puts even more in doubt the credibility of the County Council.</p> <p>Sustainability The classic example here is in the Sustainability Appraisal assessment. CST021 score on Shropshire's own sustainability assessment was -7 (very conservative) a real independent assessment would show worse figure, however this still failed and yet this authority continues to ignore this. There are underlying tones here to develop at any cost to the environment as if the ANOB did not exist</p> <p>Affordable Housing Any site that is developed in Church Stretton needs to have a high percentage of affordable housing not a pitiful 20%. The Town needs to look after the young and the people who work here and to provide the housing they need, you do not go down the big developer route to achieve this. Shropshire County Council need to employ a traditional building company who will build what is required i.e. 100% affordable. This is done by many housing associations through out the country so if Shropshire Council wants to listen to the local needs survey recently carried out it should step up to the task and investigate this route. There are Architect practices and Contractors who specialise in this work so the wheel does not have to be reinvented.</p> <p>DP13 Natural Environment. Any development must deliver a net gain for biodiversity; the Environment Act is quite clear on this. How can Shropshire County Council ignore this, do you have some special standing within this country that says you should not comply. Any development on CST021 will produce a significant loss to the Natural Environment and you should therefore desist from further consideration.</p> <p>DP18 Landscape and Visual Amenity It is a clear that the Local Authority cannot under any circumstances comply with DP18. How the development will not Safeguard and Enhance the landscape is obvious to so many but Shropshire Council seem to have their heads buried so deep in the sand. Planning permission should not be granted for developments in AONB unless there are exceptional circumstances. There are certainly no exceptional circumstances especially when Brownfield site are available and also site (CSTR014). This site has a large capacity but we do not need 70 houses building only the ones the Local Needs Survey has identified. What Church Stretton need is an understanding Local Authority like Arnsdale and Silverdale in the Southern Lake District. Here you have an authority that listens and understands the local needs, complies with National Policy and knows the restrictions of an ANOB. Shropshire County Council are not in the same league and should be ashamed,</p>
A2390B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	<p>object to the planning on snatchfields.. its a great place to take the children to see the wildlife they like to go see the sheep and have even seen deer in the field. we have problems with raglith road as theres a sink hole underneath the road and the road keeps falling away if there was heavy machinery going over it the road wouldnt last and im very concerned as i live with a fire fighter for church stretton and when on call need to get out.</p>
A2408B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	<p>Obect to inclusion of Snatchfields Farm (CST021) in the Draft Local Plan.</p>
A2411B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S5 Church Stretton Place Plan Area	Disagree	<p>The Snatchfields site is an historic meadow providing a scenic walking route for residents and visitors to and from the town. It can be easily seen from many areas surrounding the town. The economy of Church Stretton depends upon visitors many of whom are walkers and any damage to the surrounding landscape will have a detrimental effect on the economy. The town is within an AONB and according to NPPF, major building developments should not be permitted. This proposal for 70 dwellings is a major development, which has been accepted by Shropshire Council, but should not go ahead. In relation to the housing target set for Church Stretton, the need for the proposed numbers has not been demonstrated, and it should be done so based on the needs of the town and restrictions of an AONB. Alternative sites within the area of the town, such as a site behind Church Stretton School, should be investigated. I object to this proposed development.</p>

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0934B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S8 Ellesmere Place Plan Area	Disagree	The selection of Community Hub settlements in policy SP2 and schedule SP2.2 was based on an assessment by the Council in the Hierarchy of Settlements document November 2018. All settlements which scored a total of 48 points in the Assessment were designated as Community Hubs. Those scoring below 48 points were classed as other rural settlements. Some of these were subsequently designated as Community Clusters. Dudleston Heath/Gadlas scored 42 points in the assessment, and yet is identified in the Submission Draft Local Plan (SDLP) policy S8.2 as a Community Hub. This is inconsistent with the approach taken for other settlements scoring below 48 points. No explanation or evidence is included in the SDLP to explain why Dudleston Heath/Gadlas should be so designated. The settlement should therefore be down-graded to a Community Cluster.
A0967B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S8 Ellesmere Place Plan Area	Agree	Support for Modified Ellesmere Settlement Boundary as shown on plan provided. Modification of the settlement boundary responds to inclusion within the allocation in the Adopted Local Plan of ELL003a & planning permission 14/04047/OUT (phase 1 of allocation subject to current application). The modification on the settlement boundary assists in the delivery of the residential/leisure allocation & provides the potential for a mix of housing and/or commercial uses within this road frontage site. The modification of the settlement boundary creates a windfall site which will assist in the provision of the housing target for Ellesmere and the wider Local Plan area and should be retained. Confirm land along with the wider site is viable, is available for development & deliverable, expected timescales Spring 2023 on site, Spring 2025 expected completion therefore would come forward in the 'Short Term' (2020 to 2025)
A0978B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S8 Ellesmere Place Plan Area		with reference to the Part B consultation response form for the ELL003 land submitted to you on 30.09.2020, the planning application referred to in the form has now been validated (20/03759/FUL).
A0978B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S8 Ellesmere Place Plan Area	Disagree	Our client, the owner of the land shown on the attached location and illustrative development plans, disagrees with the settlement strategies for Ellesmere proposed in Policies SP6 and S8.1. The reason for this is that he considers that the ELL003 land should be included in Policy S8.1 as an allocated site in order to address the growing need for older persons' accommodation in Ellesmere and the County as a whole. An example of how this can be achieved on the ELL003 site is contained within the attached Meadow View Proposal Document. It is welcomed that an acknowledgement of this unmet need is contained within Policy SP2:-"support the delivery of specialist housing for older people, people with disabilities and the needs of other groups within the community", and "much of the household growth projected is driven by increase in households with an Elderly Household Reference Person (65 years and over)" In the light of this evidence, the Council is strongly urged to include the ELL003 land as an allocated site for older persons' accommodation in Policy S8.1. National Planning Practice Guidance (NPPG) encourages specific allocations stating:- "Allocating sites can provide greater certainty for developers and encourage the provision of sites in suitable locations. This may be appropriate where there is an identified unmet need for specialist housing" (NPPG Ref ID: 63-013-20190626). The Council would be able to satisfy this requirement by allocating and cross referencing the site to another specific, separate policy in Section 4 (Development Management Policies) of the Plan. This additional policy (perhaps entitled "Delivery of housing for older people") could be based on the part of Policy DP1 which refers to the diverse housing needs of older people. A specific, targeted policy such as this would assist Shropshire council to achieve its objectives in the Housing Strategy of "meeting the overall current and future housing needs of Shropshire's growing population by addressing the housing needs of particular groups within communities"
A0993B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S8 Ellesmere Place Plan Area	Disagree	Site promoted - The land is a continuation of the approved development at The Hawthorns and is a natural progression of the proposed development boundary for Ellesmere, which this site is directly connected to. SC should consider this land as a preferred site in the current Local Plan as the placement and location of our site seems to be a natural progression of development in Ellesmere, and additionally serves a potential benefit to the town of Ellesmere itself in so far as providing relief of traffic congestion through the centre of town. It is our view that this site should be included for allocation to address the shortfall in delivery since the SAMDev was adopted and meet the growing need for different types of housing identified in the NPPF and the draft Local Plan (Policies DP1 – DP7).
A1834B08	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S8 Ellesmere Place Plan Area		Consider that proposed site allocation ELL005, ELL008 & ELL033 would result in a likely impact on the SRN, as such it should be subject to consultation with Highways England, and appropriately assessed in line with the Circular, to determine the extent of its potential impacts on the SRN. Depending on the scale of likely impact on the SRN, the applicant/developer may need to identify suitable mitigation measures. The type of potential impact on the SRN and immediate SRN junctions likely to be impacted by each site is summarised as follows: ELL005, ELL008 & ELL033: traffic; A5/ A495 Whittington roundabout. Whilst we have identified the immediate SRN junctions in close proximity to the site allocations identified in the pre-submission version of the Local Plan, where a likely impact is anticipated, it should be noted that the assessments should not be limited to these junctions only and a wider extent needs to be considered based on the scale of the proposed development.
A1844B08	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S8 Ellesmere Place Plan Area	Disagree	Reference to connectivity and opportunity for enhancement of public rights of way should be expanded to include the canal towpath. Potential access and enhancement of the canal towpath should be referenced within the design guidelines for the site. Development in proximity to waterways can increase use of towpaths and we are keen to ensure that where appropriate, any potential impact is mitigated.
A1844B09	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S8 Ellesmere Place Plan Area	Disagree	Consideration should be given to future re-use of the Listed Buildings at Ellesmere Yard. The Canal and River Trust is exploring future opportunities for their sustainable use to safeguard them. Aspirations for the regeneration and re-use of this area and improving its connectivity with the town would be both appropriate and beneficial. We welcome the opportunity to discuss this with you.
A2415B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S8 Ellesmere Place Plan Area	Don't know / no opinion	Under the development guide in schedule S8.1(i) and explanation 5.114, both on page 194 of the plan, councillors would like to see the creation of a circular cycle route as well as the creation of a circular walk detailed in the plan. Other than that, they are happy with the rest of the plan.
A0898B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S9 Highley Place Plan Area	Disagree	Object to housing guideline for Highley which is appropriately designated as a Key Centre. The guideline has increased to 250 dwellings (from 200 dwellings) but Highley can deliver more dwellings. From 2006 - 2019, Highley delivered 181 dwellings in 13 years and had commitments for 47 dwellings totalling 228 dwellings. If completions are extrapolated over 22 years from 2016 - 2038, the settlement could deliver 306 dwellings consistent with the national policy objective to significantly boost the supply of housing. Furthermore, set into the context of the County housing requirement for 30,800 dwellings [Note: A0894B1 Berry's are also requesting this requirement be increased to 46,700 dwellings] it might be possible to take the County's 135,452 households as a proxy for the number of dwellings. The housing requirement (30,800) would then represent growth of 22.7% equal to 1.03% per annum over the household/dwelling stock (135,452). If these growth rates are applied to Highley's dwellings stock (1,462 dwellings) the housing guideline would increase further to 332 dwellings over the plan period. The Highley housing guideline should therefore be increased further to 330 dwellings (rounded down). Also note, if the housing requirement were increased to 46,700 based on a revised 2018-based household projection of 171,876 the Highley guideline recalculation would be County growth of 46,700 div by 171,876 equal to 27.2% or 1.236% giving a revised guideline on the Highley dwelling stock (1,462 dwellings) of 397 dwellings].
A0898B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S9 Highley Place Plan Area	Agree	Support housing allocation HNN016 land south of Oak Street as most sustainably located site close to High Street and school. Located in the east, HNN016 is less sensitively located to Shropshire Hills AONB to the west of Highley. In relation to Landscape and Visual Sensitivity Study, the east of the town is less sensitive than the north-west of the town. Site assessments in south-west for HNN010 (Redstone Drive) and HNN006 (south-west Highley) identify historic environment issues with proximity to Highley Conservation Area with archaeological significance and maintaining separation between historic settlements of Highley and Netherton. HNN010 and HNN006 considered unsuitable due to historic environment, existing amenity access and traffic impacts especially on Redstone Drive and providing suitable access to HNN006. In contrast HNN016 adjoins a site with an approved highway access, junction and LVIA assessment under permission 20/00193/FUL and it is considered that the issues resolved in this permission would apply equally to HNN016. HNN016 could also provide better pedestrian connections to the countryside, Severn Valley Country Park and Shropshire Way. HNN016 also offers further long term potential through provision of an estate road link to the B4555 north of Highley. Land at Hazelwells Farm is in same ownership permitting development north-east of Hazelwells Road in a future plan to relieve congestion on Woodhead Road and improve Highley's road network. Existing rear gardens at Yew Tree Grove adjoining HNN016 are extensive protecting amenity. Topography falls to the east lowering HNN016 below Yew Tree Grove. HNN016 has a density of 18.5 dwellings allowing for green space corridors. HNN016 can meet the proposed development guidelines. HNN016 is deliverable and likely to start earlier than forecast in 2025-2030 and so HNN016 is viable.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0986B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S9 Highley Place Plan Area	Disagree	<p>Disagree with the proposed allocation of site HNN016 for 100 dwellings.</p> <p>Acknowledge Highley is a Key Centre with proposed guidelines to deliver around 250 dwellings and 3 hectares of employment land which responds to local needs.</p> <p>However, consider HNN016 is inadequate in terms of access arrangements - the site is severely constrained by the limited frontage onto public highway at Bridgnorth Road. No evidence of a suitable access solution has been presented. We have consulted a highways engineer and consider it is doubtful that the widths of a conventional priority junction with associated bellmouth and new road to adoptable standards is capable of being achieved within the site frontage and that it would appear that third party land will be required to achieve suitable access arrangements. Use of third party land has not been demonstrated to be a viable option at this stage. This is a significant constraint and undermines the deliverability of the site.</p> <p>In comparison, HNN019 is unconstrained in terms of access. A priority junction can be located approximately 30m north of the southern boundary at an existing field gate (allowing 59m visibility in each direction, commensurate with speeds typical in a 30mph zone).</p> <p>HNN019 is suitable for residential development and is not constrained by technical constraints to prevent development on the site as a whole. A Vision Document is provided as part of this representation, including a concept masterplan demonstrating how a scheme might work on the site. Consider HNN019 could deliver a residential-led mixed use development (40 dwellings), to include a potential care home (60 bed care home) and additional space for a new/expanded GP Surgery and sufficient car parking spaces (stopping visitors to the surgery parking on the roadside on Woodhill Road), should the existing surgery be required to upgrade and expand if necessary. Can also provide areas of high quality open space for play, general amenity and leisure.</p> <p>HNN019 extends to approximately 3.56 ha and comprises agricultural land to the north of the stables on Woodhill Road and also includes a modern bungalow and its curtilage. It is broadly bound by Woodhill Road to the east, residential development to the south, the Malt Shovel Inn Public House and residential properties to the north and agricultural land to the west.</p> <p>HNN019 offers an opportunity for distinctive, legible and active place that embodies best practice urban design principles and is responsive to important site features. It could promote healthy lifestyle through provision of open space and informal walks along adjoining PRoWs.</p> <p>Bus stops are located opposite the site. Pedestrian and cycle connectivity from HNN019 to key local amenities, facilities and destinations will be maximised where possible.</p> <p>Key local amenities within walking distance of the site (1.5km) include a public house, convenience stores, golf course, pharmacy, restaurant, primary school, post office and leisure centre with swimming pool/gym. Higher order services and facilities are also available in nearby Bewdley, Bridgnorth and Kidderminster.</p> <p>Information on matters such as ecology, noise and landscape sets out the benefits of this site coming forward and have informed identification of opportunities and constraints, in summary:</p> <ul style="list-style-type: none"> -Access and movement: Vehicular access summarised above. Pedestrian/cycle access can also be achieved along Woodhill Road to enhance the permeability of the site and walking/cycling accessibility into Woodhill and Highley. Both accesses are deliverable within the extent of the site boundary and highway land. -Noise: Not anticipated that road noise from adjoining B4555 Woodhill Road will require extensive mitigation measures such as acoustic fencing. Subject to mitigation, not anticipated that noise will constrain development. Would be formally assessed as proposals evolve. -Agricultural land: Natural England mapping identifies the site as Grade 3 good to moderate agricultural land. Site specific work currently being undertaken. Do not consider it represents best and most versatile agricultural land. -Heritage and archaeology: The site lies outside of the Conservation Area for Highley and Woodhill, although note a Conservation Area runs along the terrace houses immediately to the south-east of the site on Cleve View, it is screened by the existing mature hedgerow which runs along Woodhill Road to the north and south of the proposed access point. Therefore intervisibility would be minimal and therefore the harm associated with the character and appearance of the conservation area limited. Whilst works are ongoing with the archaeological desk based assessment, it is unlikely that the site contains any major archaeological features. -Ecology: Currently being assessed. Given agricultural and pastoral nature of the site, consider it offers little in the way of significant habitats for protected species. More likely surrounding mature landscaping will provide suitable roosting and foraging habitats for birds and bats which will be considered accordingly as the masterplan evolves. -Drainage: Entirely within Flood Zone 1 and is therefore subject to the lowest possible risk of flooding. It also has a very low risk of flooding from surface water. Site slopes from a high point in the north eastern corner. Currently propose to provide an attenuation basin to the south western corner to allow adequate surface water drainage of the site. Detailed drainage information will be provided. -Trees: A self contained parcel of agricultural land bounded by mature hedgerows/trees. Anticipate these will remain in situ and development designed around these landscape features which add to the character of the settlement in this location. Furthermore, mature landscaping will assist in screening the proposed development from both the PRoW to the south-west of the site and the bridleway which runs along the north-western boundary. Views into the site are therefore limited. -Landscape: Within the Shropshire Landscape and Visual Sensitivity Assessment, HNN019 is considered within Parcel C, which has a medium to high sensitivity to residential development and a high visual sensitivity to residential development. The site has well defined boundaries and built-up area of Highley wraps around it. Trees/hedgerow boundaries provide good screening opportunities from the development from the PRoW to the south-west and wider views across to the Shropshire AONB. The landform on the site is sloping from a high point in the north-east to a lower point in the south-west which is characteristic of the area and the views across to the Shropshire Hills AONB. There are no PRoWs within the site. The closest PRoWs to the site run along the northern and western boundaries of the site connecting further to the open countryside across the settlement. Landscape principles also identified. <p>Following design principles have informed the masterplan for the site:</p> <ul style="list-style-type: none"> -Site capacity (see above). -Access (see above). -Development parcels will front onto well defined streets and spaces wherever possible, ensuring good levels of natural surveillance and activity. This includes the eastern development frontage which adjoins Woodhill Road. The setback and scale of new properties which front onto Woodhill Road will take into account the living conditions of existing occupier. -Built development parcels fronting the western site boundary will be set back, overlooking a green wildlife corridor that will 'buffer' with the adjoining open countryside. Landscape screening and planting will be utilised to soften the new development and
A1271B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S9 Highley Place Plan Area	Disagree	<p>Carrying out a SA offers provides an opportunity to:1 -consider how a plan contributes to improvements in environmental, social and economic conditions2 -identify any significant adverse effects that a plan might have3 -amend proposals in a plan to avoid any significant adverse effects4 -propose mitigation measures to counter any remaining significant adverse effectsAs has been made clear in ALL earlier correspondence, the preferred site does none of those things.#1. The choice of site breaches an existing Article 4 Direction in place for 18 years and goes against guidelines laid down by the current head of Shropshire Council planning, Ian Kilby.#2. Multiple submissions to Shropshire Council planning department clearly identify the known risks associated with the access to the whole development area. con)401rmed by the current di)401culties encountered by TC Homes the developer of 20 affordable houses on the neighbouring site in identifying a safe location for a crossing point to protect residents of the site when crossing the busy B4555. [See Shropshire Local Plan Review: Consultation on Preferred Sites. November 2018 - p93, 12.19: Information of each of the preferred allocations: 'A pedestrian crossing of Bridgnorth Road should be provided at an appropriate location in proximity of the site.'] The provision of such a crossing was made a condition to the planning committee's allowing the application to proceed.#3. Shropshire Council has consistently ignored this opportunity, choosing instead to dismiss all concerns about the suitability of the site for such a large development.#4. No mitigation has been proposed for any of the risks identified by the local community, certainly no mitigation that would pass the most basic examination. Instead Shropshire Council has consistently ignored the local community's concerns about any clearly identified adverse effects, whether direct (highways) or indirect (environmental/landscape ref: Gillespies 'Shropshire Landscape & Visual Sensitivity Assessment: HIGHLEY [14HG]). My response to the Local Plan Review - Preferred Sites Consultation went into some detail about my opposition to the planning of)401ccr' hsoice, but that response went unacknowledged. That completed questionnaire will be included as an attachment together with this form. Attachments included: Extract from Regulation 18 Pre-Submission Draft Shropshire Local Plan Sustainability Appraisal and Site Assessment Environmental Report Summary Respondent's response form to Preferred Scale and Distribution of Development consultation. Highley section of Shropshire Landscape and Visual Sensitivity Study. Respondents submission to planning application 19/02791/FUL Email correspondence between respondent and SC Highways Officer Highley section of Preferred Sites consultation document</p>
A2337B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S9 Highley Place Plan Area	Disagree	<p>The Site at Netherton Lane in Highley should be allocated. It would provide for 300-350 homes with access to the south for cars and access for pedestrians and cyclists throughout the site. This site should be preferred over HNN016 - it has better access, is more deliverable, better linkages and is better in terms of landscape and visual impact</p>
A2435B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S9 Highley Place Plan Area	Disagree	<p>Objection to allocation. As close residents of the proposed access to the development we see and hear many incidents on this bend</p> <p>The junction does not have good visibility either way along Bridgnorth Road.</p> <p>Traffic speeding up the bank from the direction of Bridgnorth and those from the village direction are often caught out by this 'blind' bend. It often causes busses, lorries, large vehicles, etc. to mount the kerb to avoid colliding. On numerous occasions I have witnessed close calls with screeching tyres and horn warnings where incidents have occurred.</p> <p>To think that this site has been passed for development with such poor access considering that there are more suitable sites within the village is certainly a concern.</p> <p>As for the council's procedures of local consultation I feel that our and the parish council's concerns have been disregarded in this matter.</p> <p>Access to and from the proposed development is on a dangerous bend near the brow of a hill where pedestrians have no safe place to cross the road. This corner has been the site of at least three accidents that I have personally observed. One of these resulted in a car rolling over the pavement into our hedgerow, completely writing the car off and damaging our property.</p> <p>A second incident again involved a car rolling over right on the access point. Thirdly, a car swerved across the road on this corner and damaged the railings on the opposite side. These incidents involved the vehicles mounting the pavements. Therefore, it is of great concern should this development go ahead as there would be more people/children around this area. Young children accessing the playing fields opposite or going to school will be at the highest risk.</p> <p>The proposed access is currently a bridleway, but the farm uses it as an access route, several times a day, for large farm vehicles/machinery.</p> <p>The Council has a responsibility to ensure the safety of pedestrians and road users on its highways. This development will seriously jeopardise public safety due to unsafe access and an increased volume of traffic in a known danger zone</p>
A0046B1	Viability and Deliverability of Proposed Site	Draft Policy Area S10 Ludlow Place Plan Area		CHK002
A0089B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	<p>The loss of infiltration of surface water which will result from the proposed planning at BUR004 will exacerbate the situation. The stream will have to pass under the A456 which may increase flood potential – a much wider flood prevention scheme is needed. There are little employment opportunities for new dwellings. New development would result in too many cars, existing services are not enough – overreliance on Tenbury Wells. Proposed speed limit change to 40mph welcomed.</p>
A0103B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	<p>A series of questions raised on whether the site floods, the hydraulic assessment and brownfield sites</p>
A0253B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	<p>This farming land is needed for the future. The field floods. Bats are in the vicinity. Air pollution will increase. Uncertain whether doctors/schools would cope. Highway casualty issues already exist. Existing pedestrian paths are poor.</p>
A0265B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	<p>Object to the site allocation. The site is susceptible to flooding from the river Teme and also general run off from the surface. The flood area extends beyond the site and onto the nearby A456 and based on Government Flood Plan website information has been subject to flooding on several occasions. Concern that if developed the site could increase flood risk for neighbouring properties. Nearby brownfield sites are more suitable</p>
A0269B12	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Agree	<p>Community Hubs Ludlow Place Plan areas We support the need for an ambitious 190 dwelling housing guideline for Burford, reflecting it's sub regional status and local needs. We were instrumental in securing BUR001 for housing development, now under construction. We are already experiencing off market demand for BUR002.</p>
A0269B13	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Agree	<p>We support the allocation of BUR002, it's development guidelines and approximate site provision figure of 40 dwellings. On behalf of the owner, see our separate report on viability and deliverability as well as our further comments in relation to the Sustainability Site Assessment for BUR002, Appendix K and timescales for delivery in draft Appendix 7</p>

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0269B14	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Agree	Community Hubs : Ludlow Place Plan Area We support in so far as community led plans are complementary to the development guidelines and approximatre site provision figures in relation to strategic allocations and are not at material variance with the same
A0269B15	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area		BUR002 is said to have a Poor Sustainability Rating due to the distance to services in Burford and the additional services located in Tenbury Wells. Nevertheless, the Stage 3 Assessment concludes " Allocate for residential development" – see Appendix K page 141 with full reasoning, which is supported. The owner wishes to make the following points on the Stage 2a assessment (Appendix K page 22) :- 1. Primary School : distance from the site to the school car park is 596m, one minute extra walking time from the control distance 2. GP surgery : distance of 539m, 50m beyond the control distance ; it is about a 6 minute walking time, has pavements for the whole route suitable for wheel chair and baby carriage access, with no roads to cross until opposite the surgery where there is a crossing point 3. Library : distance of 554m and has same access and distance as surgery 4. Leisure : Gym HQ is 442m away / gym-swimming pool at 718m 5. Burford / Tenbury Town playgrounds at 650m – open to development management discussion as to some provision on-site 6. Outdoor sports : 589m to the tennis club / bowling green ; 600m to cricket / rugby club with pavement access to all sites 7. Extensive footpath network within retained land providing access to amenity / natural green space – direct access available to Burford Church and gardens parallel to the River Teme SSSI 8. Transport nodes within 480m, with buses travelling to Ludlow, Kidderminster and Worcester – pupils, college students and working adults serviced 9. 4 minutes walking time to town, 6 minute walking time to Tesco 10. Public protection / constraints : very little, if any, noise from business park and nursery no longer in operation 11. The site does not lie directly opposite Kerry Foods or the Aspire Centre
A0269B16	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	Forecast of Delivery Timescales for Local Plan Allocations The assumption for delivery of BUR002 is too late ; we, as the owner's agent, have already received off market interest from developers following publication of the Regulation 18 draft plan ; delivery should be moved forward to Short Term (2020/21 – 2024/25) ; current implementation of BUR001 (with our involvement) is supportive evidence Please
A0269B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Agree	Managing Development in Community Hubs We support the development boundary for Burford set out on the Policies Map
A0282B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	Flood issues with site, oversubscribed medical practice
A0339B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	Concerned about development of BUR004 due to flood risk. The site is often under water during periods of heavy rain and if the river Teme floods, there will be nowhere for the water to go, except possibly west into the existing properties in Boraston Drive, which currently do not have a flooding problem. Strongly object to the proposed secondary vehicular access into BUR004 from Boraston Drive, this would increase traffic on an already busy road. Pedestrian access from BUR004 onto Boraston Drive could be achieved via an existing PROW.
A0390B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	From the policies map it looks very much as if Cleestanton is labled and a Community Cluster. Could you confirm this? Earlier this year there was a meeting held at Stoke St Milborough village hall, where approximately 60 people attended from the surrounding area. People from Cleestanton, approximately 10 of us, were given the option of becoming a "rural area allocation" or a community cluster. We voted almost unanimously to be considered as a rural area. Could you please confirm that this is the case. As it stands, it looks like a disregard of a democratic vote, if this is the case, residents of Cleestanton will no doubt be pursuing the matter. Shropshire Councils total of the employment land guidelines and housing guideline is vastly overrated for the Ludlow community. I have a daughter who has no problem finding a aplace to live. We need some housing, of course, but it is very clear that the intention is to grow Ludlow economically by pooling the increase of population from outside the area rather than just supplying housing for local need. This applies to most areas, particularly the larger towns. I question your figures for growth taking account of climate change, the resultant pollutant, loss of wildlife habitats and light pollution. I understand there is pressure from government diktat, but looking ahead, they will in turn be pressurised by a young population fuelled with a new environmental awareness, reacting to climate change by producing less offspring and consuming less. We all know economic growth for its own sake is futile; look at the research of the European Environment Bureau.
A0421B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	BUR008 should be included for employment - The Council Must make proper provision for its established Industry and relying on infilling is an inadequate designation and is far from satisfactory.
A0424B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	Hints relates well to both Ludlow place plan area and to Cleobury Mortimer place plan area and should be included for housing development as a cluster settlement.
A0456B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	BUR004 is in Flood Zone 3 and subject to severe annual flooding and likely to be further affected by climate change. Development may widen the local effects of flooding to affect adjacent properties. Development would also affect the operation of the annual Tenbury Country Show.
A0574B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	Object to BUR004 land adjoining Boraston Drive on A456 for the following reasons: infrastructure - there are likely to be capacity constraints for the school and GP surgery. flooding - the site is affected by a flood risk and is partially flooded for many months of the year. highways - safe access need to be provided to the A456 and Boraston Drive with the latter only currently providing private drives and public footpath accessibility. pollution - increased traffic likely to create air pollution and ground contamination issues. parking - development of the land will deprive the Tenbury Show of much needed public parking. countryside use - the site is used for livestock farming and provides feeding/breeding ground for tawny owls and buzzards. countryside views - the community enjoy views across this open field to the wider countryside
A0575B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	Disagrees with the allocation of the site. Reasons for opposing the site are: Flooding on the site; impact on views across the site; lack of infrastructure in the village; increased pollution from traffic movements; loss of parking for Tenby Show; road safety issues on junction with A456; loss of wildlife habitat for buzzards, tawny and barn owls
A0577B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	Raises concerns about the scale of development on a small community; the impact on local schools and doctors; the issues of flooding on the site; loss of habitat for animals and birds; increased trafic caused by the development of the site
A0912B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Agree	Policy Map Inset S10 Ludlow is supported. The statement in paragraph 5.136 that "there is scope for flexibility in the employment uses delivered on the allocations, but any flexibility must respect the significance and setting of this historic town to ensure it's history will continue to be recognised and appreciated" is also supported. However, further to our representation on policy SP11, we would request that the Council have maximum flexibility in employment generating uses given the uncertainty of the post-COVID marketplace. In summary, the allocation of site LUD052 is supported as it represents a significant, and unique, opportunity to meet the economic needs of Ludlow during the Plan period and realise the ambitions of both the Shropshire and Ludlow Economic Growth Strategies.
A0912B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Agree	Employment Allocation 'Land south of The Sheet on A49, Ludlow' (LUD052) is supported. However, further to our representation on policy SP11, we would request that the Council have maximum flexibility in employment generating uses given the uncertainty of the post-COVID marketplace. In summary, the allocation of site LUD052 is supported as it represents a significant, and unique, opportunity to meet the economic needs of Ludlow during the Plan period and realise the ambitions of both the Shropshire and Ludlow Economic Growth Strategies.
A0912B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Agree	This policy and its supporting text is supported as it recognises the strategic role of Ludlow in the County as the third largest employment centre in Shropshire and a principal focus for investment, employment, housing and development during the Plan period. In addition, the identification of 11ha. of employment land to meet the needs of the town and its hinterland (including employment land allocation LUD052 and saved employment land allocation ELR058) is supported as this land will make a significant and unique contribution towards meeting the employment growth needs of both the Town and this area of the County
A0912B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Agree	Strategic Policy S10.1(ii) 'Employment Allocations: Ludlow Principal Centre' is supported. The statement in paragraph 5.136 that "there is scope for flexibility in the employment uses delivered on the allocations, but any flexibility must respect the significance and setting of this historic town to ensure it's history will continue to be recognised and appreciated" is also supported. However, further to our representation on policy SP11, we would request that the Council have maximum flexibility in employment generating uses given the uncertainty of the post-COVID marketplace.
A0912B7	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area		Supporting letter covering response to LUD052 and other policies for Ludlow

Page 183

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0923B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	<p>The designation of Ludlow as a Principal Centre settlement in Policy S10.1 is strongly supported as this is seen as vital to ensuring the town's long-term future. We agree with the recognition in the explanatory text to policy S10.1 that the settlement plays a key role in the strategic growth objectives for south Shropshire. In this regard, Paragraph 4.91(e) specifically identifies Ludlow as a Principal Centre on a Strategic Corridor and Policy DP9: Strategic Corridors states that the "Shropshire Economic Growth Strategy seeks to deliver a 'step change' in the capacity and productivity of the local economy. To contribute to this aim, 'Strategic Corridors' along the principal rail and strategic road routes through the County will be the primary focus for major development especially along 'strategic corridors' with both rail and road connectivity". It is evident, therefore, that Ludlow is a significant centre for growth in Shropshire, both socially and economically. However, Policy S10.1 places a significant reliance on windfall development to meet the needs of the town over the Plan period, with an additional 82 dwellings as windfall (unplanned development). Given the strategic importance of growth being directed to Ludlow such a reliance on windfall development is considered inappropriate. It is therefore considered essential that further land is included within the development boundary of the town and potentially allocated for residential development to ensure that the needs of the settlement and surrounding area are met and consequently the aims and objectives of the Plan are realised.</p> <p>Our client's sites were submitted under the Council's Call for Sites and identified as</p> <ul style="list-style-type: none"> • LUD047 'Land off Burway Lane, Ludlow'; • LUD048 'Land adjoining Ludlow Football Stadium, Ludlow'; and • LUD049 'Site A Land at Burway Farm, Ludlow' <p>Plan identifying the location of these sites is attached to this letter for ease of reference.</p> <p>These sites were subject to assessment by the Council as part of the Plan preparation process and the results of the assessment are included within the 'Ludlow Place Plan Area Site Assessments (August 2020)'. The results of this 3 stage assessment detail that these sites are available, viable, deliverable and developable. No physical constraints have been identified that would prevent their development. In this regard, whilst the assessment of LUD047 details that its development would have significant impacts upon the highway network, the local highway authority commented that it had no objection to the site's development subject to Burway Lane, along the site frontage, being improved to an appropriate standard.</p> <p>Whilst the site assessments identify that there are more preferable sites available within Ludlow, there are significant concerns over the delivery and development of the allocated housing sites LUD056 and LUD057, given that they have been included within the development boundary of Ludlow for a number of years but have yet to be developed.</p> <p>Our client's land therefore represents a unique and highly sustainable opportunity to deliver residential development in the town on land that is unconstrained and lies in close proximity to existing built development and some of the settlement's most significant services and facilities (and key trip generators) including the Secondary School and Leisure Centre.</p> <p>In summary, the current consultation provides an opportunity for Shropshire Council to amend policy S10.1 and Inset Map S10 to include some or all of our client's land within the development boundary of the settlement and potentially allocate it for residential development. The inclusion of this land would result in a greater level of certainty that the aims and objectives of the Plan, including the strategic growth objectives in this area of the County, will be realised over the Plan period.</p>
A1141B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	<p>Promotion of site on Castle Grange, Linney Ludlow for single story accommodation to meet the need for Elderly Households in Ludlow. The site is considered to be entirely sustainable both in terms of its location and the contribution it would make towards Ludlow. The provision of specialist housing is NPPF and NPPG compliant and outweighs the harm to the Conservation Area and deserves a specific allocation in Policy S10.1</p>
A1191B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Agree	<p>Support proposed allocation of BUR004 for 100 dwellings. An illustrative Masterplan, informed by initial technical assessment of the site's constraints and opportunities, has been prepared for the site which illustrates how development could comply with proposed site guidelines. Fully committed to bringing BUR004 forward for residential development and recognise its important role in helping to deliver the Council's housing need and the sustainable growth of Burford.</p> <p>Comments on proposed development guidelines for BUR004 are as follows:</p> <p>Point 1: BUR004 can deliver a wide range of housing in line with the Council's emerging planning policies.</p> <p>Point 2: Proposed developable area of BUR004 has been defined after identifying site constraints, and the layout of the development will respond to all identified constraints and opportunities. When further detailed site-specific surveys are undertaken ahead of submission of an outline planning application (including a Topographical Survey and more detailed hydraulic modelling), the developable area will be refined further. Consider the capacity of the site should be expressed as 'approximately 100 dwellings', in order to allow a reasonable amount of flexibility in dwelling numbers, to respond to more detailed assessments of the site's capacity.</p> <p>Point 3: BUR004 will provide new public open space and green infrastructure which will benefit both new and existing residents of Burford. Open space proposed to the north west of the site will provide a link to the former Tenbury – Bewdley railway to the north of the site. Open space will also help ensure any habitats of value associated with the railway embankment are retained and appropriate buffers are maintained. Development would respect the heritage of the Tenbury – Bewdley railway. The Heritage Note prepared for the site concludes there are no major archaeological constraints to BUR004 as any below ground remains relating to the railway would not be of a significance that would prevent development.</p> <p>Point 4: Significant areas of proposed open space will assist in retaining BUR004's open character. New landscape planting will soften the edge of the settlement and help it to assimilate with the River Teme Valley.</p> <p>Point 5: An outline planning application for the site could be accompanied by a Phase 1 Ground Investigation to fully scope the potential for ground contamination. Development would ensure the site is safely remediated.</p> <p>Point 6: Open space to the south and east of the site can accommodate an attenuation pond for proposed SuDS. Best practice SuDS methods would be used, designed to discharge clean water from the attenuation pond into the watercourse (at a greenfield run off rate). This will help to lessen the impact on the River Teme SSSI, as this current suffers from water pollution as a result of agricultural run-off. Existing culverted watercourse to the east of the site will be re-naturalised to provide significant ecological benefits and potentially provide a betterment to surface water flood risk.</p> <p>Point 7: A site-specific Flood Risk Assessment and Sustainable Drainage strategy would be submitted alongside a future planning application. Hydraulic modelling will be undertaken to better understand the risk of flooding from the existing watercourse, surface water flooding and the available developable area.</p> <p>Point 8: BUR004 would be served by a new primary vehicular and pedestrian access off the A456. A new priority-controlled T-Junction will be provided onto the A456 and residents would be able to access Burford on foot via the existing footway along the A456.</p> <p>A secondary vehicular access from Boraston Drive is not required to facilitate development of BUR004. Reference to provision of a secondary access to Boraston Drive should therefore be deleted. Feasibility of delivering a secondary pedestrian access to Boraston Drive will be confirmed ahead of any outline planning application.</p> <p>Point 9: A Utilities Assessment would be provided to support a planning application for the site.</p> <p>As recognised in para 5.141 of the draft Local Plan, Burford in combination with Tenbury Wells is an important service centre for surrounding communities, see response to draft Policy SP2.</p> <p>Having regard to the proposed policy requirements for BUR004, including the mix of dwellings, the requirement to provide affordable housing and self-build homes, and the site specific factors (such as de-culverting the watercourse and addressing potential site contamination), we can confirm that the site is viable and deliverable. There is known market interest in the site due to Burford and Tenbury Wells being attractive and popular locations for home buyers. Finally, we also confirm that there are no known significant abnormal costs associated with developing the site.</p> <p>Delivery is anticipated to commence in 2023/24 meaning that the majority of the site will be complete within the 'Short-Term' period of 2020/21 to 2024/25.</p> <p>Burford has a wide range of existing services and facilities, including a primary school, pre-school, sports club, pub and a petrol station with shop. Burford also contains a hospital and a fire station. Moreover, there are significant existing employment opportunities within Burford at the Upper and Lower Teme Business Parks, including the Kerry Foods Factory.</p> <p>Additionally, Tenbury Wells has a wide range of shops (including a supermarket) available on Teme Street/Market Street. Moreover, there are other services, such as a further primary school, secondary school, library, doctors, dentists, cinema/theatre and a swimming pool. In combination with the services available in adjoining Tenbury Wells Burford is a highly sustainable location for development. Whilst they are referred to as two settlements, they are nevertheless intrinsically linked, hence why Burford could be considered a Key Centre.</p> <p>The SAMDev Plan has restricted growth in the locality. Indeed, Appendix 5 of the draft Local Plan shows Burford has only had 2 residential completions between 2016/17 to 2018/19. Allocating around 190 dwellings at Burford would provide an important opportunity to ensure ongoing vitality and viability of services and facilities in Burford, allowing the settlement to grow in a manner commensurate to its size and importance in the Ludlow Place Plan Area.</p> <p>Recognise 190 dwellings is the higher 'Residential Guideline', but consider this is appropriate having regard to the range of services and facilities in Burford and its position in the settlement hierarchy when the full range of services are considered with neighbouring Tenbury Wells.</p> <p>Delivery of new dwellings in Burford identified through the draft Local Plan's proposed residential allocations; supplemented with appropriate small-scale windfall residential development within the development boundary (where it is consistent with Community Hub Policy SP7 and other relevant policies), is supported as a way to ensure the growth assigned to the settlement is delivered.</p>
A1393B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	<p>A1393 Series of responses commenting on policies for Burford.</p> <p>My main point of interest is Site reference BUR004 in BURFORD to which my comments/observations apply, although there are other sites in this locale to which some of my comments may also apply.</p> <p>The site is often referred to as Brownfield, and sometimes as Agricultural. I cannot understand the Brownfield reference which would appear to refer to the possibility of the remains of the railway bridge which was in the North West corner whose remains may have been deposited in a section of the "field" at this point. The area under consideration is very much agricultural and forms part of the local farming community's operations being used for the grazing of cattle and sheep with a crop of hay gathered during the Summer, on occasion two crops of hay in a good year. It also once a year forms either the site for the Tenbury Wells Annual Show or alternately it's car park. It also forms the opening vista of beautiful scenery down the valley of the river Teme which is enjoyed by many local residents and visitors, who either sit and enjoy the scenery and wild life, or sometimes park their cars in Boraston Drive for similar purposes.</p> <p>As mentioned in the Consultation Documents it is prone to flooding both during heavy rain and periods of wet weather, this will be referred to later.</p> <p>Burford is a small residential area serving the Market town of Tenbury Wells which is across the county border in Worcestershire, it is also within walking distance of Herefordshire, and at the very tip of Shropshire. There is little industry in Burford except a medium sized factory producing products used in jam making, a small industrial estate which is full and two disused industrial buildings that have been unoccupied for many years. It has a large number of retired residents together with a mixture of others who either work in Tenbury or travel to Kidderminster, Worcester, Ludlow or Hereford and various small traders in between, not forgetting local farmers.</p> <p>Considering the total area and accepting projected population gains together with industrial projections into the foreseeable future, it is considered unnecessary for developments of the size proposed for Burford, except to help underpin the National expansion projections imposed on Shrewsbury and the county of Shropshire. Here we are more dependent and supportive of our neighbouring Counties.</p> <p>Developments proposed for Burford and in particular BUR004 have no practical reason except to be counted in the County figures so should not be progressed.</p>
A1393B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	<p>Ludlow shows significant positive effects as SO3 which is; Provide sufficient amount of good quality housing, which meets the needs of all sections of society.</p> <p>As Burford comes under the Ludlow heading which is a collective location therefore Table 1.1 is a generalisation and is not specific enough. Therefore the Positive SO3 cannot necessarily include Burford although Table 1.2 does state BUR004 is not included at this stage. The reference to Burford however, which we know is likely to be included in the future, see a reference in Table 2.4 page 33 it can be argued that the Supplementary questions stated are not met since the requirement is not present now or in the foreseeable future.</p>
A1393B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	<p>It is not stated if this includes Burford, if not it can be argued that Burford is not required to provide Settlement in the Local Plan Review.</p>
A1393B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Don't know / no opinion	<p>Paragraph Table 10.3 Allocated Employment Sites Allocated Employment Sites SA Rating. Nothing shown for BUR004, Why?</p>
A1393B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	<p>Community Hub, Burford Page 22 Primary School OK for now but will require enlarging if more children enter the area.</p> <p>Children's Playground, Where is it sited?</p> <p>Outdoor Sports facility Is it viable in the time of the proposals. The facilities are meagre and probably would need updating and the building improved, who will pay assuming it still exists.</p>

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1393B7	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	With regard to BUR004: Visual Impact Considerations from the LVSS - Not agreed the result should be High not Medium and Medium High. Highway Comments - Direct access to Highway Network A456 j Possible but on to a road with a reasonably high density of traffic including a large number of HGV where there has been 4 fatalities in the last 4 years. Traffic calming, speed limits, are not recognised and for some reason,possibly the location of the road to County Boundaries, speed checks have been refused by the Police. Existing Highway at Access Point - No, possible but not practicable. Development without off Site Works - Not agreed,there would be considerable upheaval particularly during Flood works. Ecology Comments - agreed it is a natural wildlife habitat. Public Protection Comments - High Level of Traffic Noise,Fumes Etc. alongside the A456. Traffic noise is already increasing and becoming a nuisance for the existing houses. Strategic Considerations - Development of site could allow de-culverting of watercourse with SUDS scheme to improve drainage through town from Cleve Hills to river Teme. - Not agreed. There would need to be a water catchment area for use in flood times which could - impact any houses built on the site, and probably not work. Ground water levels rise during rain and lying water appears over the site. Additionally there are a number of 'Dry' springs which appear and in some cases flow towards the Teme. Water flows from the East of the site forming a wide frontage of water along the A456 to the center of the site, also the complete frontage is covered with water from the 'Waterway' on site. There is some flooding of the A456, not all of which comes from the site. However, although slowing traffic it has never stopped the slow flow of vehicles. I don't recognise the comment that there are 'A shorter distance of some key services located in the East of Burford'. Where? all main services except one school, a local Hospital which is constantly under closure threats from the NHS and a playing field. Other services are in Tenbury (in Worcestershire) across a narrow bridge where extra traffic from any development would cause extra congestion in the town and it's road system. Self Build is mentioned, I don't think any self builder would have his house as part of a 100 house site! A proposed entrance from Boraston Drive would cause traffic problems and extra noise and fumes to houses adjoining the entrance. No mention is made of the Medium Voltage Electricity Cable running along about half the South and West of the site. Indeed one report and map refers to wooden pylons and electricity cables across the site, which have not been there for many years. The foot path towards Tenbury is narrow and would require widening, it is quite frightening to walk along this footpath due to heavy HGV's being too close, and very noisy. There is a national walkers foot path along part of the West side of the site. No mention is made of the increased use of Doctors, Dentists, and Schools, in the area. The capacity of Sewage systems, including Pumping Stations, and any extra employment for incomers. A high percentage of working people travel away from the area.
A1393B8	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	I have considered all documents in the Consultation papers and understand that this is not a Planning application. The paper covers the whole of Shropshire and I have no comments to make other than the sites being considered in Burford. This is a small residential community at the very tip of Shropshire mostly dependent on Tenbury Wells for it's services etc. situated in the adjacent County of Worcestershire. Any increase in housing and therefore the population has no material significance for the community other than to underpin any requirements of Tenbury Wells and Worcestershire. There is a small development of 35 houses to the West of Burford which should meet any requirements of the village well towards and beyond the time span of the Consultation period. Although it is assumed that all Burford proposals are part of the County's estimated population increases which should be concentrated more towards the centres of population and work,not small villages miles from where an increase of 200 or so adults can be found work. There may be some entrepreneurial work in the area in the future, but it is not suitable for large industrial organisations - there are already two large premises that have been empty for years. The whole area is one of beautiful countryside living for a static population and there is no need for house building in the hundreds (190 or so in the document). My specific interest is regarding the proposed building of 100 houses on BUR004 which would need considerable work and therefore expenditure in order to make the site suitable for building and I disagree with the proposals being considered for Burford per se.
A1834B09	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area		Consider that proposed site allocation LUD056 and LUD052 would result in a likely impact on the SRN, as such it should be subject to consultation with Highways England, and appropriately assessed in line with the Circular, to determine the extent of its potential impacts on the SRN. Depending on the scale of likely impact on the SRN, the applicant/developer may need to identify suitable mitigation measures. The type of potential impact on the SRN and immediate SRN junctions likely to be impacted by each site is summarised as follows: LUD056: traffic; A49/ A4117/ Henley road roundabout. LUD052: traffic, boundary; A49/ Sheet Road roundabout. Whilst we have identified the immediate SRN junctions in close proximity to the site allocations identified in the pre-submission version of the Local Plan, where a likely impact is anticipated, it should be noted that the assessments should not be limited to these junctions only and a wider extent needs to be considered based on the scale of the proposed development.
A1834B10	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area		Consider that proposed site allocation BUR004 would result in a likely impact on the SRN, as such it should be subject to consultation with Highways England, and appropriately assessed in line with the Circular, to determine the extent of its potential impacts on the SRN. Depending on the scale of likely impact on the SRN, the applicant/developer may need to identify suitable mitigation measures. The type of potential impact on the SRN and immediate SRN junctions likely to be impacted by each site is summarised as follows: BUR004: traffic; A49/ A456/ Wyson Lane junction. Whilst we have identified the immediate SRN junctions in close proximity to the site allocations identified in the pre-submission version of the Local Plan, where a likely impact is anticipated, it should be noted that the assessments should not be limited to these junctions only and a wider extent needs to be considered based on the scale of the proposed development.
Page 185 A1858B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area		In the area of LUD052, there are significant opportunities to improve the access to residential and business areas. With reference to the hatched area current allocated as existing mixed use by the Sheet, this area should be reallocated as residential land to support the development of the existing housing at the Sheet. Ludlow Town Council would also like to see a roundabout created at the point that the road forks. The area of the proposed employment site LUD052 should be extended in a block along the edge of the A49, which would create up to an extra 4 hectares of employment land. A roundabout should be created on the A49 to serve access to the existing Foldgate Lane housing allocation and the extended LUD 052 site. Ludlow Town Council believes that the town needs to attract more employment opportunities to support the 1,000 extra properties that Shropshire Council has allocated for Ludlow. Working from the premise that one hectare of land will support employment for 100 people, there is a disparity between 1000 new homes, which could equate to up to 2,000 adults seeking employment, and only 11 hectares of employment land is currently allocated to Ludlow. Ludlow will need to attract and keep a younger population to ensure the town thrives in the future, which means there needs to be sufficient employment land available, and the sustained and planned impetus from Shropshire Council to help attract employers. Significant need for actively generating business opportunities. Employment opportunity and economic growth are the drivers that will fulfil Ludlow's planned housing growth. At present the significant new employment opportunities are being created 30 plus miles from Ludlow – this needs to change. The A49 needs to be developed as a corridor for economic growth. The issues faced by the south of the county in terms of much lower levels of industrial development than the east and north of the county, need to be recognised, and the solutions to these problems need to become the planning and economic focus of Shropshire Council in the south of the county. Ludlow needs the right sort of housing for the right reasons. Ludlow is heritage rich, and people will pay considerable amounts to buy into the historic environment / properties. However, ill-advised builders think that because people will spend large amounts on beautiful period homes, there is a market for 'run of the mill' expensive new homes in Ludlow, which is completely missing the point of the attractiveness of Ludlow. It is also the case that whilst there are over 500 listed properties in Ludlow, there are not enough historic properties to accommodate everyone, and the income levels of the majority of people who live and work in Ludlow will not stretch to affording a period property, so there is a significant need for affordable housing for those on typical rural economy wages, and also a need for a supply of mid-range well-designed modern housing to ensure that Ludlow continues to thrive as a market town. Ludlow currently has a significant aging population, and whilst there is a need to support young families and offer them the right sort of housing, it is also revealing to understand that in a survey of estate agents by Ludlow Town Council the most desired type of property were bungalows, but no new bungalows are being built in Ludlow. Ludlow is a town on the border of Shropshire, Herefordshire and Wales. Historically border towns are at risk of poor impetus for development from the planning authority. Ludlow Town Council asks Shropshire Council for assurances that Ludlow will be adequately supported within Shropshire's planning and economic growth strategies, policies and initiatives. Ludlow Town Council appreciates that the majority of residential and business development land is in Ludford Parish. However, the future prosperity and development of the town must be considered holistically from a joined up and inclusive perspective. Ludlow is a beautiful town and an asset for Shropshire, and Ludlow Town Council want to work with Shropshire Council to create opportunities that support the future prosperity of Ludlow. Currently, employment prospects are not growing in Ludlow, and in the past 11 years, no significant new employers have moved into Ludlow. Our town needs to be made attractive to new employers, and also retain its unique heritage appeal. Ludlow Town Council wishes to work with Shropshire Council to find the best ways to achieve positive long term outcomes for Ludlow.
A2308B37	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Disagree	Additional information should be added to settlement policies where a proposed allocation falls within a designated safeguarding zone. This will provide clarity for applicants and ensure potential impacts on defence interests are considered, in line with para 95 of the NPPF: LUD052: Safeguard Zone - West WAM Plan T Any development.
A2456B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Agree	Broadly in support of the proposals put forward in the latest Regulation 18 Pre-Submission draft of the Shropshire Local Plan. More specifically, policies relating to the projected housing numbers for the borough and the amendment of the settlement boundary to include windfall sites with permission around the Principal Centre of Ludlow. Draft Policy S10.1 outlines this strategy in greater detail and on a localised scale. This policy allocates sites in order to meet the requirement of 1,000 dwellings for Ludlow. Although this is a figure that should be seen as a minimum, it is a number which is supported by Tesni. In order to meet Ludlow's ambitious strategy and approach to economic growth with inward investment, and to maintain its position as the primary location for businesses and jobs in the south of the County, the settlement will require significant housing to support its future growth. The target of 1,000 dwellings is highly appropriate especially given the settlement's position within the authority's hierarchy. Tesni are supportive of the current draft Shropshire Local Plan and in particular the proposed policy in relation to the Strategic Approach (SP2) and the Ludlow Place Plan Area (S10). The proposal to include 'Land to the North of Bromfield Road' (as identified in the Location Plan in Appendices 01) within the settlement boundary of Ludlow is supported by all parties involved.
A2457B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S10 Ludlow Place Plan Area	Agree	Response from Ludford Parish Council. Supports policy of Windfall housing development within the Ludlow Town boundary, essential to support open countryside around the town. Ludford Parish has supplied considerable amounts of land for economic development, it is not in favour of allowing windfall sites for further commercial uses outside the development boundary of the town. Ludford Parish Council supports the policy of retail development within the town and the presumption against out of centre Retail Parks. This relates directly to LUD052 and the comment from Shropshire Council on page 203 "limited service provision within the development." Ludford Parish Council regards this comment as prejudicial to any future discussions and planning applications. Since the inception of the Village Plan in 2004, Ludford Parish Council has sought to improve and protect infrastructure improvements around the southern entrance to the town. The most important of which should include curtailing heavy traffic using Ludford Bridge. The bridge is a popular viewing place for visitors, it gives access to local walks and sets the scene for the historic entrance to Ludlow. Ludford Parish Council welcomed the residential development at Rocks Green at the junction of the A49 and B4117. Keen to see policies that address the conservation of Ludford Bridge. LUD057. It is interesting to note that the current Western Power Distribution site at Riddings Road is described as "an inappropriate use in this residential area." However, its new site, within Ludford Parish, sits next to a site of 68 houses. Ludford Parish has always been keen to support appropriate developments but is not keen on being a convenient location for inappropriate commercial uses that are excluded from the town environment. LUD052. Land south of the Sheet. Ludford Parish Council were not in favour of green field development that breaches the route of the A49. Consequently the quality of the development, landscaping and infrastructure must be of the highest quality. In the final paragraph Shropshire Council makes reference to "limited service provision within the development." With the existing services at Foldgate Lane and the proposed supermarket and petrol station at Rocks Green there are ample opportunities within the locality. Ludford Parish Council expresses its concerns regarding expansion by subterfuge. The policy statements and commitments by Shropshire Council acknowledging that "Any further expansion into Ludford Parish is deferred to focus on the delivery of housing within the town."; and that "limited intensification of the cluster of development around The Sheet..." are to be welcomed by Ludford Parish Council and its residents. Since the inception of SAMdev Ludford Parish Council has continued to raise the importance of its independence whilst supporting the welfare of the town and its development. This work will continue as the parish expands and consolidates these changes, as well as protecting its individual character.
A0041B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	HKW009 site is not viable as promoter claimed to need 68 houses, but even at the reduced number of 35 there will be disruption to our business as we load and unload lorries. Last consultation large number of objections to this site.
A0054B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Sets a precedent for development north of the bypass Development north of bypass not supposed to happen - area should remain rural Development would aesthetically degrade the approach to Market Drayton from both directions along the A53 and from Adderley. Environmental assessment and appeasement work should be carried out as the ponds on the northern boundary could be important wildlife habitats (possibly Great Crested Newt breeding sites as they are present nearby)
A0054B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Sets a precedent for development north of the bypass Development north of bypass not supposed to happen - area should remain rural Site subject to flooding and provides a water retention function which if lost would increase flood risk downstream Supports wet pasture and marsh habitats Not suitable for development

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0054B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Sets a precedent for development north of the bypass Development north of bypass not supposed to happen - area should remain rural Site subject to flooding and provides a water retention function which if lost would increase flood risk downstream Supports wet pasture and marsh habitats Not suitable for development
A0054B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Sets a precedent for development north of the bypass Development north of bypass not supposed to happen - area should remain rural Development would increase risk of pollution entering water course Site is good productive farmland which should not be developed for housing
A0054B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	This site is close to Fen habitat and water course which would be at risk of pollution and degradation of an important wildlife habitat.
A0064B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	The policy map does not indicate an accurate settlement boundary for Hinstock village. Considering the recent 95 extra dwellings, a further 155 is not realistic considering the lack of amenities. A new road system with revised road junctions and adequate footpaths needs to be planned and agreed by both the Parish Council and residents before this Shropshire Local Plan is approved, Remote planning approval could result in a Judicial Review
A0130B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	School Bank is a very busy road, used by heavy/large vehicles, farm vehicles and cars. Vehicles regularly speed and the pavements are narrow and dangerous. The road cannot be widened without removing trees, which the draft site guidelines state will be retained. Visibility on the road is poor, particularly where the junction for the lower part of the village is located. Consider that creating an access from the road into the site and the extra vehicles will exacerbate these existing issues. The construction process will also exacerbate road problems. A mini-roundabout would not represent an appropriate site access as they are driven over and represent a hazard for pedestrians and other road users. There have been two other recent developments in the area. New properties on the site will overlook existing ones, resulting in loss of privacy. Whilst existing trees and hedges may be maintained, in the winter they will not protect privacy. The development will increase light pollution. Underground water needs to be considered. A stream from the pond in the upper part of the village enters our property and is then diverted underground. It is possible that the stream re-emerges lower in the village which means that it may well be under part of the field where building is proposed. The lower part of the village floods and new development increases surface water runoff, drains have insufficient capacity to accommodate this and flooding will increase. Existing wildlife will lose their habitat - many birds and small mammals use this area and will be lost. Most development makes no provision for wildlife. Developers offer green space/play areas but do not always provide
A0264B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Additional wording to complete statement and should read as follows: 5.160. A Neighbourhood Plan has been prepared for the Woore, Irelands Cross and Pipe Gate area. This Neighbourhood Plan establishes the long-term delivery strategy for the linked communities with strategically important gaps between them, as defined by the development boundary.
A0323B19	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I wholeheartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected.
A0373B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Site LCA001 should be allocated within the Local Plan. It is in a wholly sustainable location adjacent to the cluster settlement of Longford and only a short distance from the large town of Market Drayton (a Principle Centre). The site and it available and could come forward for a mixed residential development immediately.
A0389B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	I disagree with your assessment that land at Longford Turning (MDR031) should be included in the local development plan. I also urge the council to retain this stance in the future. Other more appropriate areas for housing have been allocated without loss of local amenity green spaces. The land at Longford Turning provides vital and easily accessible amenity space for both physical and mental well being. Also wildlife and diversity within these spaces should be retained. It also provides a natural boundary between residential dwellings and industry. The Countryside Access Improvement Plan stipulates that dog friendly access to the countryside should be encouraged and safeguarded.
A0390B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I wholeheartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected.
A0391B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I wholeheartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected.
A0422B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	The settlement of Colehurst is omitted as a cluster settlement in this policy and should be included. It is as sustainably located as the other settlement indicated and its inclusion will I strengthen the the plan overall
A0425B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	The Community Hub of Woore Irelands Cross and Pipe Gate does not include any boundary or allocations for Pipe Gate. Site promoted in Pipe Gate should be included for a housing allocation to address the shortfall in delivery since the SAMDev was adopted and meet the growing need for different types of housing identified in the NPPF and the draft Local Plan
A0436B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Support identification of Market Drayton as a Principal Centre and the proposed housing and employment guidelines However development boundary could be extended so that it is more logical and provides greater windfall opportunities. Particularly with regard to MDR013, which should be included within the development boundary given that it is surrounded by existing built form/proposed allocation MDR006 (which lies to the north and west of the site, whilst existing built form is to the east and south). Inclusion of MDR013 in the development boundary would afford efficient use of the land and represent a logical windfall opportunity or could deliver suitable roadside uses. MDR013 is around 0.49ha and is afforded road frontage with good visibility, subsequently it is considered sufficiently large enough to cater for several uses. It is noted that a signalled pedestrian crossing is proposed as part of MDR006, this could also serve MDR013
A0437B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Support identification of Cheswardine as part of a Community Cluster as this will remove the development boundary and provide opportunity for new housing on suitable sites - challenge SP8. CHS004 is a suitable site for development but may not comply with Policy SP8. The site is located within the 30mph speed restricted area of the village; within walking distance of Nursery School, Primary School, Community Shop run by volunteers, Large Park, Children's Play Park, Village Hall, Bowling Green, Two Public Houses and the Church, and served by 'Border Car' Dial-a-ride bus service. Failure to plan positively and appropriately for settlements will negatively affect the existing range of facilities. For example, it is understood that the number of pupils enrolled at the school are falling due to lack of development in the village, subsequently there is a risk that if numbers continue to fall, the school could face closure. It should be noted that the approved redevelopment of Cheswardine Farm, North East of CHS004, has not delivered the anticipated new dwellings as yet (24no. dwellings). Thus, it is increasingly important that Cheswardine can expand appropriately allowing new suitable housing developments.
A0443B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Welcome inclusion of Hinstock as a Community Hub. Recognise that the settlement has a range of facilities and services. Concerned the proposed development boundary is overly restrictive and will not allow the targeted amount of housing to be delivered. The development boundary should be expanded to reflect recent development to the south and logical opportunities to round-off the settlement, including land in the immediate vicinity of the Old Malthouse. Land at the Old Malthouse is at the heart of Hinstock Village and affords the opportunity for additional windfall development without major alterations to the development boundary. Modest development in this location would complement its surroundings. Other nearby developments have benefited the community by increasing the stock of new homes and introducing new families into the community to support the existing facilities. A similar development of two homes could be accommodated on the subject land. The subject site is afforded suitable road frontage to Marsh Lane, an adopted public highway, and there is mains drainage available in the vicinity. For the Local Plan to be considered sound, sufficient opportunities for windfall development need to be allowed.
A0448B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Disagree with the inclusion of land Longford Turning (MDR031) within the Local Plan now or in the future. Other more appropriate areas for housing have been proposed for allocation within the Local Plan, which would not result in loss of local amenity green spaces and more than satisfy local need. MDR031 provides vital and easily accessible amenity space for our local community. Particularly during lockdown, when we have been reminded how important green spaces are to both our physical and mental well-being. There is also huge amount of wildlife and diversity within these spaces which needs to be retained for the benefit of the community. It would be vandalism to cut down 100's of trees on the site. Particularly as National Policy supports planting of new trees. MDR031 also provides a natural boundary between residential dwellings and industry. Shropshire Councils Countryside Access Improvement Plan (2018-2028) stipulates dog-friendly access to the countryside, outdoor volunteering and outdoor recreation needs to be encouraged and safeguarded. The document specifically points out a need to "work with other partners... to maximise economic benefit, whilst protecting natural and cultural heritage".
A0449B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Disagree with the inclusion of land Longford Turning (MDR031) within the Local Plan now or in the future. Other more appropriate areas for housing have been proposed for allocation within the Local Plan, which would not result in loss of local amenity green spaces and more than satisfy local need. MDR031 provides vital and easily accessible amenity space for our local community. Particularly during lockdown, when we have been reminded how important green spaces are to both our physical and mental well-being. Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0508B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	We consider that the Plan is unsound as it is not positively prepared and that its failure to make an allocation or allocations in Woore will undermine the Council's objective of sustaining rural settlements. The change to the Plan that we seek that would in our view address this issue is for the Council to allocate land that is within MPG's control at Audlem Road, Woore. The site extends to approximately 4.7 hectares and is located on the south side of Audlem Road on the north western edge of the village. It is well located to the centre of the village, being approximately 200 metres away from the site.
A0625B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	All references to Victoria Wharf to read Victoria Farm Using the wording suggested below will make the developments read as more deliverable schemes Page 212, S11.1, paragraph 4 4. Land is specifically allocated for this purpose and it is recognised there are opportunities to deliver a marina and related uses on land at Victoria Farm. Page 213 Schedule S11.1(i) MDR012, paragraph 1 The development of a new marina at land adjacent to Victoria Farm is a firm opportunity and should be considered as part of the development of this site. Page 214, Schedule S11.1(i) MDR034, paragraph 1 The development of a new marina at land adjacent to Victoria Farm is a firm opportunity and should be considered as part of the development of this site. Page 216, paragraph 5.155 5.155. During the process of the Neighbourhood Plan for Market Drayton a questionnaire was distributed to all the residents of Market Drayton and the surrounding areas. There was resounding support for the development of a Marina of over 70% of residents. In seeking to utilise the town's proximity to the Shropshire Union Canal, the development of a marina is another key objective for the town, in recognition of the economic and social benefits this could bring as identified in the current Shropshire Core Strategy, upon securing the support of the Canals and Rivers Trust. It is considered that in principle land at Victoria Farm identified on the Policies Map is capable of delivering such a marina alongside associated uses.
A0626B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Changing the wording as indicated below will make the document sound as more deliverable Page 212, S11.1, paragraph 3 3. The relocation of Market Drayton Sports facilities to land at Longford Turning, allocated on the Policies Map, is a central objective of the Strategy, and housing development (MDR39 and MDR43) has been identified specifically to support its delivery. Page 216, paragraph 5.154 5.154.. To support the relocation of the sports facilities the strategy recognises that there is a presumption in favour of supporting additional residential windfall development at the existing Greenfields site given the sustainability credentials of this site its proximity to other existing and planned residential developments.
A0662B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I whole heartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected.
A0685B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Policy S11.2 (page 217) deals with the Community Hubs within the Market Drayton Place Plan area. There is no objection to the allocation of an additional 88 dwellings within this hub at Woore, Irelands Cross and Pipegate. Support is given for policy text which supports appropriate small-scale windfall residential development within the settlements development boundary, as shown on the Policies Map. To avoid doubt this should confirm that small scale means up to and including 10 dwellings. Additionally and again to avoid doubt and give certainty the site at London Road should be included as an allocated site within this draft plan. It is anticipated that if the present planning application on the site and/or the lawful development certificate is approved this site will be completed well before this revised plan is adopted. The policy planning team are informed that as matter of fact site drains have been installed and detailed reserved matter approvals have been granted in respect of the site. Once the present impasse with the council's development management team is resolved work on this development can continue.
A0698B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Agree with and fully support conclusions that MDR014 should not be included within the draft Local Plan, now or in the future. Urge Shropshire Council to retain this view in any future consultations and look favourably on a proposal to designate MDR014 as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. MDR014 should remain as high quality, vastly diverse, organic agricultural land. Fordhall Farm (adjacent) is a vital resource to our local community and a flagship for our area, both locally and nationally. It needs to be protected
A0853B14	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	The identification of Market Drayton as a Principal Centre is supported and the level of growth is broadly supported too. However, Market Drayton could accommodate a higher level of housing growth. It is a sustainable location for new development, and there are suitable unconstrained sites available for development, in particular to the north of the A53. The draft plan proposes that Market Drayton should accommodate 1,200 dwellings but it is not clear from the available evidence base, why certain other settlements within the same tier of the hierarchy, are apportioned higher levels of growth than Market Drayton. For example, it is proposed that all of the Principal Centres would accommodate dwelling growth of 19-22% save for Bridgnorth (29%, increased from 24% in the Preferred Sites consultation) and Whitchurch (35%). It should also be noted that 35ha of employment land is allocated in Market Drayton, which is substantially more than the quantum of employment land allocated in all of the other Principal Centres with only 20ha is allocated in Whitchurch, except for Oswestry where 57ha is allocated. Therefore, with 35ha of allocated employment development available in Market Drayton, additional housing development in the settlement would be logical in the context of aligning housing and economic growth and delivering a sustainable pattern of development. Furthermore, Whitchurch already benefits from one significant housing allocation (Tilstock Road) which raises concerns that additional housing allocations could compromise the delivery of this strategic site. Market Drayton is the other Principal Centre located in the north-east of the county, and is well placed to accommodate any additional growth that cannot be delivered in Whitchurch
A0853B15	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Support the allocation of MDR006 which is controlled by SLG, and considered to be deliverable in the first 5 years of the plan period. A full analysis of the site is provided in the representation. The draft allocation is for approximately 125 dwellings. We consider that this quantum of development is realistic and is therefore supported. However the capacity could be increased if the Council considered that a higher density development would be more appropriate. The 2018 SLAA identifies an indicative capacity of 137 dwellings for the site. The previously submitted illustrative layout took into account the technical work commissioned by SLG, as discussed above, and demonstrates that the site can accommodate approximately 131 new homes, including affordable housing. This accounts for a policy compliant level of public open space (amounting to almost 10% of the gross site area), and the retention of key features such as trees and hedgerows.
A0853B16	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	The principle of a new marina in the town is supported and the principal of allocating MDR012/MDR034 for residential development is not challenged in principle because there is a residual housing requirement of 435 dwellings (along with a windfall allowance for 206 dwellings) which cannot be met on MDR006 alone. There is concern however, that the complexity of delivering a marina alongside a housing development means that the first homes may take some time to be delivered and occupied. This is reflected in Appendix 7 of the plan, which identifies that the sites will deliver in the medium – long term. Therefore to ensure that a five year supply of housing land may be maintained, further provision for housing development should be made through additional allocations within Market Drayton for deliverable sites free of constraint, capable of coming forward early in the plan period including an increased housing capacity to 131 dwellings or even 137 dwellings (from the current capacity of 125 dwellings) on existing allocation MDR006.
A0853B17	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	The principle of allocating MDR039/MDR043 to deliver playing fields and to continue the allocation in the Draft Market Drayton Neighbourhood Plan is supported especially because there is a residual housing requirement of 435 dwellings (along with a windfall allowance of 206 dwellings) which cannot be met on MDR006 alone. There is concern however, that the delivery of the site for the playing fields is reliant upon land in third party ownership, and furthermore any planning application involving the provision of new playing fields is likely to be extremely complex. It is not clear whether there is sufficient evidence to justify the site being identified for delivery within the short term, as suggested in Appendix 7 of the draft plan. Therefore to ensure that a five year supply of housing land may be maintained, further provision for housing development should be made through additional allocations within Market Drayton for deliverable sites free of constraint, capable of coming forward early in the plan period including an increased housing capacity to 131 dwellings or even 137 dwellings (from the current capacity of 125 dwellings) on existing allocation MDR006.

A1119B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Summary document of responses included in wider representation which concludes Acknowledge the Stoke Upon Tern Neighbourhood Plan, its robustness and recognise that it should be given significant weight in planning decisions and accordingly, designate the area as a Community Cluster under Schedule SP2.2 and change Policy S11.3 to account for this; Provide a positive framework for residential park homes by acknowledging the legal obligations imposed on the authority by the Housing and Planning Act 2016; Further enhance the framework by recognising the benefits and role of residential park homes which are wide ranging from assisting the housing market more generally to providing low-cost accommodation for local people; Introduce an entirely new policy relating to residential park homes including earmarking a proportion of the authority's total housing requirement for this type of residential accommodation; Allocate land adjoining the southern boundary of Warren Park as an extension to the park with a capacity of around 33 residential park homes given the plan currently makes no provision at all for this type of residential accommodation; Change Policy SP8 so that low cost housing, such as residential park homes, is included as an additional form of residential development, which will be allowed in principle in Community Clusters; and, Change Policy SP9 to include residential park homes as an additional form of residential development that is acceptable in the countryside, subject to being in accordance with specific criteria.
A1125B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Confirm that NIH is content with its entry in the Local Plan, noting the Community Cluster allocation
A1138B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future.
A1138B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	I disagree that MDR031 should be included in the local development plan. Other more appropriate areas for housing have been allocated within the local plan, without loss of local amenity green spaces. These other allocations more than satisfy our local need. If this land is built on it would be a huge loss to the community as a space to walk, and around nature and it would mean the killing of so much wildlife. Please reconsider building on this land.
A1144B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I whole heartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected.
A1145B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	I agree with Shropshire Councils assessment that land Longford Turning (MDR031) should be excluded from the local development plan. I also urge the council to retain this stance in the future. Other more appropriate areas for housing have been allocated within the local plan, without loss of local amenity green spaces. These other allocations more than satisfy our local need. The land at Longford Turning provides vital and easily accessible amenity space for our local community. It has been specifically vital during lockdown when we have been reminded how important these green spaces are to both our physical and mental well-being. There is also huge amount of wildlife and diversity within these spaces that we need to retain for the benefit of our community. It also provides a natural boundary between residential dwellings and industry. Shropshire County Councils Countryside Access Improvement Plan (2018-2028) stipulates that dog-friendly access to the countryside, outdoor volunteering and outdoor recreation needs to be encouraged and safeguarded. The document specifically points out a need to "work with other partners... to maximise economic benefit, whilst protecting natural and cultural heritage". I would also like to add that the planet needs to be encouraging the growth of wildlife as we see every day on tv. We are destroying habitats. Just to make way for houses that could be built in more suitable areas. This small area of land is one of very few places in market drayton for nature to live along side us in the woodland and the surrounding long grasses and brash
A1145B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	I agree with Shropshire Councils assessment that land Longford Turning (MDR031) should be excluded from the local development plan. This small area of land is one of very few places in market drayton for nature to live along side us in the woodland and the surrounding long grasses and brash
A1151B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	S11 indicates the requirement for sustainable drainage strategies to support delivery of allocations. This approach is very much supported by United Utilities and we wish to highlight our free pre-application service for applicants to discuss and agree drainage strategies to support planning applications in Market Drayton and elsewhere in the borough where we are the relevant water company. We cannot stress highly enough the importance of contacting us as early as possible. Pre-application discussions with United Utilities should be consistent with those with the LPA as they do not override the planning application process, and information submitted to United Utilities must be consistent with the planning application that they are proposing to submit. Should any circumstances change, we would recommend that a pre-application to United Utilities is resubmitted to highlight any changes. As referenced in our previous representations and discussions with the LPA, the experience of United Utilities is that where allocations are large and in multiple ownership, the achievement of sustainable development can be compromised by developers/applicants working independently. This can lead to issues between interconnecting infrastructure between phases of development. We are pleased to see the LPA use the above policy to influence a co-ordinated approach to ensure sustainable development from both the GMSF and future Local Plan allocations. We believe this is in the best interests of achieving challenging delivery targets from allocated sites in the most sustainable and co-ordinated manner. Future allocations in Market Drayton are close to existing infrastructure assets, but future applicants must be aware that they are located on the fringe/limits of the existing water supply and/or sewerage infrastructure networks. The network in these areas generally are of size that reflect their greenfield location. The current infrastructure may have limited capacity to support the planned growth. Providing a co-ordinated approach to infrastructure by collaborating with United Utilities will result in providing assets required to support the planned growth, in line with any sustainable drainage solution. Any growth in a co-ordinated matter with the LPA and United Utilities to ensure new infrastructure provision does not cause any unexpected delays to new development.
A1152B43	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	During the Preferred Scale and Distribution of Development consultation 1,200 dwellings and 13ha of employment land was proposed (based on the proposed balanced growth). This remained the same during the preferred sites consultation. In the draft Local Plan the housing guideline remains the same, however, the employment land guideline has been increased by 22Ha to 35Ha, presumably only because land to meet that guideline is already in the pipeline, so no new allocations are proposed. This does mean that housing and employment land are not balanced locally, raising issues of sustainability, partly because of increased levels of commuting.
A1157B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. The document specifically points out a need to "work with other partners... to maximise economic benefit, whilst protecting natural and cultural heritage" **ALSO SEE SECOND EMAIL RECEIVED VIA MP A1169 WITH FOLLOWING INFORMATION - I am writing to you today to ask for your support in overturning the development plans put forward for the Longford Turning development in Market Drayton. The woodland and wild areas set for development are important not only to our local community, but also for our native wildlife. There are countless species of plant, bird, wild, and insect life living in the grassland, woodland, and riverside scrubland that would be displaced, destroyed, and lost if the development were to go ahead. Any faith I may have had in the development being sensitively handled in regards to the natural residents was destroyed when the scrubland down by the river, which is covered in the plans, was illegally razed to the ground during nesting season. Multiple nests of varying species were destroyed, not to mention the loss of habitat for insects and destruction of the plants themselves. The space is well used by the local public of all ages, enjoying nature and the freedom it brings. There are precious few places like this left, and the current state of our climate calls for us to be creating more woodland to protect our future, not for it to be pulled down and replaced with housing. Furthermore, from looking at public information, this development falls outside of Market Drayton's development boundary. I fully support the current development boundaries of the town and would accept happily the building of these houses within that area. However the destruction of established woodland outside of the boundaries is wholly unacceptable. I believe that it would benefit the town and local community much more, if the Longford Turning area were to remain as the wildlife haven and public space it is now. Please voice your support in overturning these plans
A1169B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Email to MP Owen Patterson covering same points as A1169B1: I disagree with Shropshire Councils assessment that land Longford Turning (MDR031) should be included in the local development plan. I also urge the council to retain this stance in the future. Other more appropriate areas for housing have been allocated within the local plan, without loss of local amenity green spaces. A1701B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with you that the Land at Fordhill Farm should not be included in the Plan. The land should remain as agricultural and be available to Fordhill Farm to purchase. This facility is a vital community resource and it is not suitable for development at all. Please look favourably on a proposal to designate it as a "Local Green Space" to ensure the land is retained as a green gateway to the town. Fordhill Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected.
A1811B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Agree that Fordall Farm should not be included as a preferred site
A1811B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Disagree with the 'broad location for proposed relocation of Sports Facilities' in the Longford area. The town's sports facilities should be retained within the town's existing boundary. Moving the sports facilities out of town will increase car traffic or require children to walk along narrow unlit country roads to use the facilities. I would urge the Council to rethink the relocation of sports facilities. By all means develop Greenfields for residential use, but consider consolidating sport facilities on the Grove School site which would benefit the School and wider community.
A1819B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Agree that Fordall Farm should not be included as a preferred site

A1838B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Agree that Fordall Farm should not be included as a preferred site
A1840B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Agree that Fordall Farm should not be included as a preferred site
A1844B04	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Reference should be made to connection with and improvements to the canal towpath. Development should mitigate impact on the towpath caused by increased useage. There are no proposals for a marina and this reference in the third paragraph of the guidelines should be deleted. Future development should positively address the adjoining waterspace and the opportunities it presents and have no adverse impact on the structural integrity of the canal corridor or detrimental impact on heritage, ecology, or character. The planting of large trees (within any buffer to the canal) may not be appropriate.
A1844B05	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Reference should be made to connection with and improvements to the canal towpath. Development should mitigate impact on the towpath caused by increased useage. There are no proposals for a marina and this reference in the third paragraph of the guidelines should be deleted. Future development should positively address the adjoining waterspace and the opportunities it presents and have no adverse impact on the structural integrity of the canal corridor or detrimental impact on heritage, ecology, or character. The planting of large trees (within any buffer to the canal) may not be appropriate.
A1844B06	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Marina's are not generally supported by the Canal and River Trust. There is no specific proposal for a marina at Victoria Wharf and this reference should be deleted from the text and the policy map. The inability to guarantee that any site will ultimately be able to connect to the waterway network means that the wording of para 5.155 should be amended to 'it is considered that in principle, land at Victoria Wharf may be capable of delivering such a use if able to demonstrate the capability of the canal network to accomodate it'. Reference to the Canals and Rivers Trust should be corrected to Canal and River Trust.
A1844B07	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Whilst there is no site allocation for a marina, we suggest that some minor re-wording of the development strategy to address the Canal and River Trust's concerns around the need for such a development to pass the Trust's process for dealing with connections to our waterways is needed. It is difficult for both the Trust and the LPA to determine the deliverability of a marina scheme at this stage. Suggest point 4 is amended to read 'it is recognised that there may be opportunities to deliver a marina'. It may also be more appropriate to refer to aspirations for a marina rather than the potential for a marina.
A1848B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Agree that Fordall Farm should not be included as a preferred site
A1850B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Agree that Fordall Farm should not be included as a preferred site

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1854B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	I disagree that site MDR014 should be considered for development for the following reasons 1. The site is currently used as Organic Agricultural Land as it is rented to Fordhall Community Farm and therefore should be classed as valuable farm land which is already farmed in a sustainable way. The organic status of the farm is highly likely to promote and sustain greater biodiversity than any mitigating measures proposed by developers for a relatively small site. 2. The site in its current agricultural use allows the neighbouring farm to remain sustainable as a business. As grazing land this land frees up areas of the farm where biodiversity is greater. These areas are used recreational facilities, providing an accessible outdoor space for walking and education. This is a valuable space for the health and wellbeing of the surrounding community. The size of the site does not offer sufficient affordable development opportunity to mitigate the loss of the natural habitat. 3. The site scores poor on the SA and the subsequent assessment does not provide justification for this to be considered as a future development site
A1856B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Agree that Fordall Farm should not be included as a preferred site
A1859B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Carter Jonas LLP is instructed by Müller UK to comment on the Council's Regulation: Pre-submission Draft of the Shropshire Local Plan. Müller UK owns and controls the 25 ha 'protected employment land' site located north of the A53 and south of Longford. The site has the benefit of an extant permission for new production and distribution buildings lorry parking (permission ref. 07/02018/EIA). Müller UK would question the appropriateness of the proposed housing allocation on land to the east of the 'protected employment site' (Site Ref. MDR043 & MDR039). Müller UK is concerned that locating housing close to its major development site could give rise to amenity concerns from occupants of the proposed housing site which, in turn, could affect adversely its ability to make full use of its landholding for production, warehousing and other related development.
A1877B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	I agree with Shropshire Councils assessment that land Longford Turning (MDR031) should be excluded from the local development plan. I also urge the council to retain this stance in the future. Other more appropriate areas for housing have been allocated within the local plan, without loss of local amenity green spaces. These other allocations more than satisfy our local need. The land at Longford Turning provides vital and easily accessible amenity space for our local community. It has been specifically vital during lockdown when we have been reminded how important these green spaces are to both our physical and mental well-being. There is also huge amount of wildlife and diversity within these spaces that we need to retain for the benefit of our community.
A1878B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	I agree with Shropshire Councils assessment that land Longford Turning (MDR031) should be excluded from the local development plan. I also urge the council to retain this stance in the future. Other more appropriate areas for housing have been allocated within the local plan, without loss of local amenity green spaces. These other allocations more than satisfy our local need. The land at Longford Turning provides vital and easily accessible amenity space for our local community. It has been specifically vital during lockdown when we have been reminded how important these green spaces are to both our physical and mental well-being. There is also huge amount of wildlife and diversity within these spaces that we need to retain for the benefit of our community.
A1882B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	disagree with Shropshire Councils assessment that land Longford Turning (MDR031) should be included in the local development plan. I also urge the council to retain this stance in the future. Other more appropriate areas for housing have been allocated within the local plan, without loss of local amenity green spaces. These other allocations more than satisfy our local need. The land at Longford Turning provides vital and easily accessible amenity space for our local community. It has been specifically vital during lockdown when we have been reminded how important these green spaces are to both our physical and mental well-being. There is also huge amount of wildlife and diversity within these spaces that we need to retain for the benefit of our community. It also provides a natural boundary between residential dwellings and industry. Shropshire County Councils Countryside Access Improvement Plan (2018-2028) stipulates that dog-friendly access to the countryside, outdoor volunteering and outdoor recreation needs to be encouraged and safeguarded. The document specifically points out a need to "work with other partners... to maximise economic benefit, whilst protecting natural and cultural heritage"
A1883B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I whole heartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected.
A1887B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I whole heartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected
A2100B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I whole heartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected. Fordhall Farm has a reputation as a beacon of sustainable and resilient agriculture that extends far beyond the borders of Shropshire. In a post-Brexit, climate-challenged environment, allowing development on this land would send all the wrong signals about Shropshire Council's concern for the future.
A2111B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	I disagree with Shropshire Councils assessment that land Longford Turning (MDR031) should be included in the local development plan. I also urge the council to retain this stance in the future. Other more appropriate areas for housing have been allocated within the local plan, without loss of local amenity green spaces. These other allocations more than satisfy our local need. The land at Longford Turning provides vital and easily accessible amenity space for our local community. It has been specifically vital during lockdown when we have been reminded how important these green spaces are to both our physical and mental well-being. There is also huge amount of wildlife and diversity within these spaces that we need to retain for the benefit of our community. It also provides a natural boundary between residential dwellings and industry. The document specifically points out a need to "work with other partners... to maximise economic benefit, whilst protecting natural and cultural heritage"
A2113B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I whole heartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected.
A2115B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Proposed development at Longford Turning Market Drayton, I am against the area proposed for development, it should not go ahead as it takes away an area where local people & wild life can enjoy together. People out dog walking, would then have to seek open space, possibly adjacent to farmland. Also the elderly people living on the Sherwood ave estate, would surely have their lives blighted by the increased noise caused by the footfall through the public pathway that run between the areas.
A2124B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I whole heartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected.
A2133B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I whole heartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected. This land has been farmed organically for many years. Such ecologically managed and diverse ecosystems should be protected. The loss of numerous plants and animals is contributing to the climate emergency. By preserving this land and protecting it from development Shropshire Council is making a contribution to the future of the county, the country and the planet. Much of Shropshire is now owned by groups whose objective is to make financial gains from the limited land available. Please demonstrate that Shropshire Council cares about the environment above financial profit and values the future.
A2134B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	I disagree with Shropshire Councils assessment that land Longford Turning (MDR031) should be included in the local development plan. I also urge the council to retain this stance in the future. Other more appropriate areas for housing have been allocated within the local plan, without loss of local amenity green spaces. These other allocations including the future development of the MOD Tern Hill Barracks more than satisfy our local need. The land at Longford Turning provides vital and easily accessible amenity space for our local community. It has been specifically vital during lockdown when we have been reminded how important these green spaces are to both our physical and mental well-being. There is also huge amount of wildlife and diversity within these spaces that we need to retain for the benefit of our community. It also provides a natural boundary between residential dwellings and industry. Shropshire County Councils Countryside Access Improvement Plan (2018-2028) stipulates that dog-friendly access to the countryside, outdoor volunteering and outdoor recreation needs to be encouraged and safeguarded. The document specifically points out a need to "work with other partners... to maximise economic benefit, whilst protecting natural and cultural heritage" The assessment has no mitigation factors to the flooding of the River Tern and its adjacent tributaries. The assessment does not address the existing woodland, tree preservation etc.....
A2136B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	I disagree with Shropshire Councils assessment that land Longford Turning (MDR031) should be included in the local development plan. I also urge the council to retain this stance in the future. Other more appropriate areas for housing have been allocated within the local plan, without loss of local amenity green spaces. These other allocations including the future development of the MOD Tern Hill Barracks more than satisfy our local need. The land at Longford Turning provides vital and easily accessible amenity space for our local community. It has been specifically vital during lockdown when we have been reminded how important these green spaces are to both our physical and mental well-being. A2312B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I wholeheartedly support Shropshire Council's current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected. Although I am not a resident of Market Drayton, I have been a strong supporter of Fordhall Farm since its creation and greatly value the huge and varied contribution it makes to life in Shropshire. Any development which could restrict or in any way negatively impact on Fordhall's work should be discouraged.
A2329B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	MDR031 should not be included. It has mature trees, it would cause noise/air pollution, water runoff, erosion, wildlife habitats are there, contrary to the Neighbourhood Plan policy MDNDP7, other allocations more than satisfy the need
A2334B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	MDR031 should not be included. It has mature trees, it would cause noise/air pollution, water runoff, erosion, wildlife habitats are there, contrary to the Neighbourhood Plan policy MDNDP7, other allocations more than satisfy the need. Market Drayton is already over-populated.
A2355B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I wholeheartedly support Shropshire Council's current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital and long-established community resource. It is extremely well known for its long-standing commitment and practice of organic farming, and it is therefore a very important continuing attribute - indeed a flagship - not only for Market Drayton and North Shropshire, but for Shropshire as a whole. If this is to be sustained needs long-term protection. I want Fordhall Community Farm to continue to be a successful organic farming venture and Cottage field is an integral part of the farm. Since there is space for development elsewhere (adjacent to the town bypass) there is no need for development on this part of Fordhall Farm.
A2356B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	The destruction of the Longford Turning Woods in Shropshire is outrageous!! How can the Shropshire Council advertise that they are going to plant a tree for all Shropshire residents on naked land when they then want to go and tear down all the trees, shrubs and kill animals in the woods. Residents and the community of Shropshire is up in arms about this and quite rightly too. YOU CAN NOT DESTROY NATURE!!!
A2357B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Opposes development on the site as it will result in a loss of ancient woodland and have an impact on wildlife in the area.
A2359B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. A2412B12	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	SEE A2412 ATTCHED DOCUMENT S11.1 text.pdf Object - Please see the attached document. Objection to S11.1 Points 3 and 4 and S11.1(i) - Point 3 and MDR039 and MDR043 Land at Longford Turning. Site MDR012: Land to the east of Maer Lane, north of the A53. Site MDR034: Land to the west of Maer Lane, north of the A53. Site MDR006: Land adjoining Adderley Road, Market Drayton. Alternative option - Sites MDR014 and MDR031 provide a deliverable alternative. This document demonstrates that the land is suitable, available and achievable for housing or employment development. The land is in a single ownership and can be brought forward quickly to meet the housing need, and meets the requirements of the NPPF (2019). We therefore respectfully request that the Council considers MDR014 as a key allocated housing site for retirement living and land at MDR031 allocated housing site and allocate them within the Shropshire Local Plan Review. Space has been left for a potential community facility and we would like to investigate this further with the Council for doctors or nursery or any other community facility and would consider the revision of the scheme to include certain larger community facilities if and where they are required in the local area. If both options were allocated than this would viable allow for the Tern Valley to be completely opened up as natural open space. We look forward to working with the Council to facilitate the exciting development which will make a significant contribution to the local community and environment of Market Drayton and to Shropshire. We respectfully request that MDR014 and MDR031 are considered for allocations within the plan. As demonstrated the sites suggested within the plan have a number of deliverability and viability issues which restrict them being brought forward in its current form the plan is unsound for Market Drayton.
A2412B13	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	We support the Point 1 and support aspirations to deliver around 1,200 homes in Market Drayton. We support the ability for windfall sites to come forward within the settlement boundary (Point 2). However, we object to delivery of the housing, the approach taken, the site selection the sustainability appraisal and the level of allocations per site - this is set out in our representation to S11.1 points 3 and Point 4, and also to S11.1 (i). Please
A2419B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	I am disagreeing with your stance on p54 that development on the land at Longford turning could be developed on. I disagree with Shropshire Councils assessment that land Longford Turning (MDR031) should be included in the local development plan. I also urge the council to retain this stance in the future. Other more appropriate areas for housing have been allocated within the local plan, without loss of local amenity green spaces. These other allocations more than satisfy our local need. The land at Longford Turning provides vital and easily accessible amenity space for our local community. It has been specifically vital during lockdown when we have been reminded how important these green spaces are to both our physical and mental well-being. There is also huge amount of wildlife and diversity within these spaces that we need to retain for the benefit of our community. Once woodland is lost it can not be replaced easily and providing open grass land as a replacement would not retain the biodiversity of plants and animals current found on this land. It also provides a natural boundary between residential dwellings and industry. Shropshire County Councils Countryside Access Improvement Plan (2018-2028) stipulates that dog-friendly access to the countryside, outdoor volunteering and outdoor recreation needs to be encouraged and safeguarded. The document specifically points out a need to "work with other partners... to maximise economic benefit, whilst protecting natural and cultural heritage"
A2468B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Policy S11 Market Drayton Place Plan Area seeks to deliver 1,200 dwellings and to make available 35 hectares of employment land over the plan period. It has been observed under submissions to Policy SP2 that the 1,200 dwelling figure for Market Drayton is on the low side compared to other Principal Centre settlements. As the policy states the town is a focus for strategic growth objectives in the north-east of the County. The figure of 1,200 dwellings appears arbitrary and has not been justified by any evidence. The Plan proposes the allocation of four sites, all located to the north and west of the A53 that provides a by-pass to the town. These allocations total 435 dwellings. The Plan states that the relocation of Market Drayton Sports facilities on land at Longford Turning is a central objective of the Strategy, and that housing development (MDR39 & MDR43) has been identified specifically to support its delivery. The Development Guidelines for MDR39 & MDR43 is explicit in stating that "the delivery of this proposal is subject to it supporting the proposed relocation of the Market Drayton Sports Association Facilities". However, explanation paragraph 5.154 confirms "that the proposed relocation of the sports facilities is not guaranteed, with the viability of the proposal being a particular consideration". Accordingly, the rationale and justification for allocating sites MDR39 & MDR43 is acknowledged in the plan to have clear deliverability concerns. This was a concern of the Examiner who's Report on the Examination of the Market Drayton Neighbourhood Development Plan in October 2018 found many of the proposed policies (including this one) to fail the Basic Conditions. Proposed allocation MDR39 & MDR43 is therefore considered unsound as it is not justified. Similar soundness failings are evident with proposed housing allocations MDR12 and MDR34 being the required links to a marina development. The Development Guidelines for both allocations state "Where a proposal for a new marina in this location is suitably advanced development on this allocated site will be expected to contribute to initial feasibility work as a contribution to supporting this opportunity. The delivery of both these sites are therefore contingent on the delivery of a new marina - the location of which is not identified on the Policies Map - and is therefore subject to significant uncertainty". Again, due to significant deliverability concerns proposed allocations MBR12 and MDR34 are not justified. Appendix 5 to the Plan sets out where the supply for each settlement is coming from; for Market Drayton the total potential supply, including the 435 in proposed allocations and 206 in windfalls, add up to 1,200 dwellings exactly. There is no buffer and no evidence to support the predicted delivery of 206 windfall dwellings. Additional provision should therefore be made at Market Drayton in order for the plan to be positively prepared and to ensure that at least 1,200 dwellings as a minimum are indeed delivered over the plan period. Finally, it is not clear in the Plan or in the evidence base how the sites for allocation have been selected, having regard to the reasonable alternatives. Submissions are made in respect of the SA, but it is noted that the SLAA purports to be a 'live' document and that sites can be submitted at any time (SLAA paragraph 1.22). The SLAA is clearly an important resource as part of this site selection process. Whilst site MDR048 is considered as part of the SA, it is not included in the SLAA. Greater clarity is required on the site selection process in order for the plan to be justified.
A2470B10	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Gladman suggest that Market Drayton as a principal centre can and should support more than 1,200 dwellings over the course of the plan period. This figure equates to only around 3.9% of the total housing requirements whereas the requirement for 35ha of employment land is around 11.6% of the employment target. There is a clear imbalance between the two figures, to support the development of the level of employment land anticipated and to avoid unsustainable commuting patterns, further strategic housing growth should be allocated to Market Drayton. MDR042 should therefore also be considered as an allocation, adjacent to the current preferred option MDR006
A2470B11	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Site is in proximity to many of the town's facilities and services, and will provide affordable housing and sports pitches.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A2470B12	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	Support this allocation and are working with the landowner. This policy is supported. As currently defined, the area and shape of the proposed allocation does not seem to lend itself to a well-conceived and high-quality form of development. We would be happy to work with the Council in determining an appropriate shape and area which reflects the development quantum across this and site MDR039, as assessed in the Sustainability Appraisal.
A2474B1	Viability and Deliverability of Proposed Site	Draft Policy Area S11 Market Drayton Place Plan Area		
A2477B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	My client and respondent to this submission is the sole owner of the site hereby (known as MDR015) proposed for development and which this submission supports as a key development site. The site is free of any legal or contractual impediment and there are no known technical constraint This site is proposed as a residentially led or residential site in advance of or in addition to site MDR006 which is at present allocated for housing development in this draft plan. Please amend the plan by including site MDR015 in the plan ahead of or in addition to site MDR006. In the council's own Market Drayton Place Plan site assessment MDR015 scores fair and -2 whereas site MDR006 scores only -4. By the council's own assessment site MDR006 is the more suitable and sustainable than the presently allocated site. No sound planning reason has been found in council documents to justify setting aside the council's own intent to place sustainable decisions and sustainable site allocations at the heart of their own policy formulation. To remedy this the plan should be changed by allocation site MDR15 ahead of or in addition to site MDR006. It can be proposed as a wholly residential application or a residentially led allocation
A2477B08	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Disagree	Clause 7 of the policy should change by including site MDR0015 as an allocated residential or residentially led site. All the development guidelines that apply to site MDR006 can be met on site MDR015 and it can deliver the same if not more housing units. Paragraph 5.5156 says this: 5.156. In order to provide further certainty to housing delivery and to ensure the proposed local housing requirement is achieved by 2038, the Local Plan also proposes the inclusion land off Adderley Road shown on the Policies Map for around 125 dwellings. It is considered this site complements the delivery of the objectives of the town and can be delivered relatively early in the plan period. These sentiments apply also to site MDR15 with the added benefit of the site scoring higher against the council's own sustainability and suitability appraisal. Site MDR015 lies adjacent to an existing employment area which already projects Northwards out of Market Drayton. Site MDR015 would be contiguous with this settlement form whereas MDR006 would not be to the same degree. My client is aware of the findings of the independent inspector who reported on the draft Market Drayton Neighbourhood Development Plan on 30th October 2018. In dismissing that draft plan the examiner noted: "2.18 A Health Check was undertaken on the (amended) plan in August 2017 (and is included as Section 7 of the CS). It made a variety of helpful suggestions, particularly to improve drafting, as well as highlighting two issues of concern: "...the methodology of site selection and discounting must be more clearly expressed in order to robustly back up the sites included and excluded from the plan"; and "The consultation between the parishes prior to and after designation, in preparing the plan, is an area of very significant, fundamental concern." 2.19 The question arises as to what the Town Council did about these two key recommendations. I raised both topics as part of the hearing agenda. As to the site selection process, I did not find any development of a methodology as suggested. I accept that such assessments must be proportionate to the task in hand. Nevertheless, I felt that the Town Council simply carried on in its belief that no further exercise was necessary; in one case, as it was the only site with a willing owner it was considered to be sufficient to conclude on its suitability." These findings and the abandonment of a plan because it was not soundly prepared ought to be a clear indicator to the local planning authority that it cannot advance sites in a plan ahead of other sites especially where the favoured site scores less in its own sustainability and suitability checklist than the site not favoured for adoption at present. This applies in respect of sites MDR006 and MRD015. Site MDR015 is the more sustainable and suitable development site, is free from technical or legal constraint and has an owner willing to release it quickly for development. There is no sound planning reason not to advance it ahead of MDR006
A2483B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I whole heartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected.
A2491B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area	Agree	I agree with your conclusion that land at Fordhall Farm should NOT BE INCLUDED within the Local Development Plan now or in the future. The land should remain as high quality, vastly diverse organic agricultural land and therefore be available for Fordhall Farm to purchase. This facility is a vital resource to our local community. I whole heartedly support Shropshire Councils current view that it is not suitable for development, now or in the future. I would urge the Council to retain this view in any future consultations and urge you to look favourably on a proposal to designate it as a "Local Green Space" to ensure this land is retained as a green gateway to the town and a community resource for us all. Fordhall Farm is a vital community resource and a flagship for our area, both locally and nationally. It needs to be protected.
A2507B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S11 Market Drayton Place Plan Area		In response to the Regulation 18: Pre-Submission Draft of the Shropshire Local Plan, we set out comments on behalf of the Landowner. This consultation report should be read in conjunction with both Part A and Part B of the consultation response forms; the response was made in September 2020. The Landowner is in support of sites HHH001 and HHH014 being allocated for residential development and can confirm their availability to come forward early on in the plan period. Their allocation further supports sustainable growth of Hodnet which in turn is vital to support the key services that exist for the benefit of the local area. The sites have been identified as providing 40 dwellings as part of the Hodnet Community Hub (page 217 of the Regulation 18 Pre-Submission Draft of the Shropshire Local Plan), incorporating sustainable drainage and flood management strategies as well as conservation of local habitats and heritage assets. Given the size of the sites then an allocation of 40 houses and associated open space requirements could be enhanced to increase the number of houses to 60 with a more coherent masterplan approach to open space taken especially given the space coming forward through a nearby existing consent and the other green facilities already available. We further believe that the Plan should allow for further windfall sites and allocations at future stages of review to continue this growth which should be focused in spatial planning terms in the southern part of the village to avoid detrimental impact on the character and landscape area of the settlement. We support the proposed affordable housing percentage at 15% of the development as the sites lie within area B on the Shropshire Council Affordable Housing Area map and that this area would fall outside of the Community Infrastructure Levy (CIL) boundary – to date other sites subject to CIL historically have been delayed or limited by the burden of CIL when these consents have also delivered into local facilities in addition.
A0002B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S12 Minsterley and Pontesbury Place Plan Area	Agree	When describing amenities within hubs /villages public houses, churches and other very active groups are not mentioned. Thankful that the future development of Pontesbury will be limited. So important that we assess the effect the extensive estates will have on the roads and traffic through the village.
A0006B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S12 Minsterley and Pontesbury Place Plan Area	Disagree	Water Drainage a problem in Pontesbury for quite some time. Sites area liable to flooding. There are numerous underground sources of water. The Quarry is planning to re-commence blasting which will bring more traffic to the area. The fact that users of the cycle path have to re-join the road near the quarry entrance is dangerous.
A0160B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S12 Minsterley and Pontesbury Place Plan Area	Agree	Support the designation of Minsterley as a Community Hub as this will help the vitality and viability of the village. Consider that the housing guideline for Minsterley should be increased to reflect the extension of the plan period by 2 years and to at least match past levels of completions - consistent with Governments aspirations to significantly boost the supply of homes. If past delivery is matched, this would equate to around 185 dwellings rather than 155 for Minsterley (and 205 rather than 175 for Pontesbury). To be consistent with national policy, residential guidelines should be expressed as minimums.
A0160B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S12 Minsterley and Pontesbury Place Plan Area	Agree	Strongly support allocation MIN018, as it offers the village the opportunity for: A crossing of the A488 for pedestrians using the footpath/cycle link to Pontesbury; Better management of surface water draining from the A488 into Little Minsterley Brook - An FRA has been prepared for the site (submitted in September 2019 and attached to this submission). The FRA concludes that 94% of the site is in FZ1, development of the site could have an overall low risk of on or off-site flooding and presents an opportunity to reduce existing local flood risk issues. The development guidelines for MIN018 reflect these opportunities in their requirement for studies including, "flood risk and drainage with their recommendations clearly reflected in the proposed development scheme."; Slowing traffic entering the village by moving the 30mph speed limit extent and providing visual cues that encourage drivers to slow down on approach to the village; An attractive entrance to the village that helps meet local needs for a range of housing; A site that is relatively unobtrusive in the landscape and that will not affect the AONB to the south of Minsterley (within the least sensitive parcel identified within the Shropshire Council LVSS for Minsterley), although the Sustainability Appraisal is incorrect as the site should be in the low landscape sensitivity category; A site that is well located for both Minsterley's facilities and Pontesbury's additional facilities including the secondary school. The proposed site density is 20dph, this density conflicts with policies SP1, SP3, SP5 and DP1. We would suggest a capacity of 30dph. The site is highly deliverable and viable. It is likely to be delivered earlier than the Local Plan's current forecast of 2025-2030 with the 2021-2025 period more appropriate in Local Plan Appendix 7: Forecast of Delivery Timescales for Local Plan Allocations.
A0306B065	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S12 Minsterley and Pontesbury Place Plan Area	Disagree	We are concerned about firstly, the proximity of this site to a SSSI and secondly, the lack of mitigation measures mentioned in the plan:
A0376B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S12 Minsterley and Pontesbury Place Plan Area	Agree	Pleased to noted that PON002 has been identified as having Long Term Potential for residential development within the SLAA. Consider that the sites could be considered to have short term potential as The land is currently available and there is known interest from developers. Land opposite has recently been the subject of residential development. The site is deliverable. The site is level and easily developable. It performs 'good' within the SA. The site adjoins, to its south, land defined as suitable for development within the SLAA. Access can be secured from Hinton Lane. Further evidence and layout plans can be provided as required.
A0376B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S12 Minsterley and Pontesbury Place Plan Area	Agree	Pleased to noted that PON028 has been identified as having Long Term Potential for residential development within the SLAA. Consider that the sites could be considered to have short term potential as The land is currently available and there is known interest from developers. Adjacent land has recently been the subject of residential development. The site is deliverable. The site is level and easily developable. It performs 'poor' within the SA, however this is unfair compared with other sites in the settlement. The site has direct access onto Station Road. Further evidence and layout plans can be provided as required.
A0609B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S12 Minsterley and Pontesbury Place Plan Area	Agree	Would not want the proposed residential guideline of 175 dwellings for Pontesbury to be exceeded.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0044B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain open countryside, over 300 residents have said this, we moved here to get away from the town. village will not be able to cope with growth esp Dr & School.
A0051B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage to remain open countryside. disagrees with the Points score that causes Cressage to qualify as a "hub" Pharmacy/Dispensary, No post Office, Mobile/Permanant Library, Health centre/school insufficient capacity
A0052B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area		Cressage to remain Open Countryside. 300+ opposed Hub status last time. Doctors Surgery Full, School classes are full.
A0060B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Disagree with designation of Cressage as a hub. Errors in scoring. Disagree with development of land adjoining the vicarage. Raby proposal on Shore Lane has quite rightly been rejected.
A0060B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	Agree with small development at The Eagles.
A0061B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside. Errors were made when scoring Cressage as a community Hub. When this was last discussed over 300 residents said they did not want to become a hub. The infrastructure in Cressage cannot cope with the extra housing.
A0066B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside. Errors were made when scoring Cressage as a community Hub. When this was last discussed over 300 residents said they did not want to become a hub. The infrastructure in Cressage cannot cope with the extra housing. Reject the Raby estate proposals. School is not accepting new pupils. Increasing wait times to see our doctor.
A0072B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Remain open countryside. We are not a community Hub, we are a village in a green belt area. The local infrastructure is insufficient for more houses, Doctors, Schools full.
A0073B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The Village infrastructure is not sustainable for the current population. Both sites have no safe public access. Roads are narrow with little or no footpath. Road is beyond capacity and narrow. Bus services finiah early in the afternoon. No taxi service locally. Doctors are not coping with appointment a long wait.
A0074B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside. Errors were made when scoring Cressage as a community Hub. When this was last discussed over 300 residents said they did not want to become a hub. The infrastructure in Cressage cannot cope with the extra housing. Reject the Raby estate proposals. School is not accepting new pupils. Increasing wait times to see our doctor. I support the Eagles site re-development
A0075B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open Countryside. 300 villagers opposed the hub last time. Extra houses would worsen the situation with Doctors and schools which are full. traffic is already high through the village, would be a huge risk to the community.
A0076B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open Countryside. 300 villagers opposed the hub last time. Extra houses would worsen the situation with Doctors and schools which are full. traffic is already high through the village, more could have disasterous consequences.
A0123B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Distinctiveness of the town, its attractiveness to the tourism industry and hence its tourism economy will be undermined by growth proposal. The setting of the town will be negatively affected as demonstrated by Inspector's Report 2006 on Bridgnorth District Plan. Profusion of recent housing development in nearby settlements constitutes building over and above local need, is unjustifiable and no other historic town has been surrounded by so many new homes in this period. The core principles and policies in the Much Wenlock Neighbourhood Plan have been ignored. A single large site is a contradiction of the policies of the Neighbourhood Plan - the reliance on small sites has been ignored as has the preference to avoid unacceptable traffic impacts. The volume and intensity of traffic has greatly increased in recent years causing hazards to motorists and pedestrians and 120 houses will have a greater adverse impact than the rejected proposal from the 2006 Brignorth District Plan. The Neighbourhood Plan has been producing housing completions higher than the agreed rate up to 2017. These agreed figures have now been replaced without community consultation by larger totals. The level of growth fails to acknowledge completions or permissions in the pipeline. Recent rapid growth has exceeded infrastructure capacity and the local sewage works discharges have breached regulations. Works to remedy this have not increased capacity. The town was without a water supply in July 2015 and summer 2020. The medical centre capacity is already exceeded and cannot meet the needs from growth in the town and Cressage. The growth level is therefore too high.
A0123B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	This site was the location for the first games of the Oylmpian Wenlock Society. It is also the highest quality agricultural land and its development is contrary to sustainability guidelines in the NPPF. The site was chosen without any community consultation and as a result of pressure from the landowner and developer. The site is liable to flooding and there is no publicly available information to suggest otherwise. Flood attenuation ponds in other parts of the town would not protect site MUW012VVAR and are not designed to prevent flash flooding which is a serious danger. An on-site attenuation pond would be difficult to design and even more difficult to maintain. SUDS associated with individual domestic properties would be ineffective because the land becomes saturated in times of prolonged and persistent rainfall. Clear warnings of the risk of SUDS failure are in the Halcrow Report of 20017. The entire catchment has been designated as a Flood Rapid Response Catchment in the highest category. New homes would increase flood risk on this site and elsewhere in the catchment, contrary to policy DP23. Attenuation ponds on the parkland beyond the site ignores the fact that this area is subject to a Covenant with the National Trust. Flood alleviation should be both in advance and contractually separate from development. The development boundary should not be extended until all relevant parties take agree and take action to remedy existing flood issues. The assurances given that the adjacent Hunters Gate development would eliminate flood risk are completely wrong and the community have no confidence in developer led solutions. The bid for funding to reduce flood risk has not been made public and no plans for action have been confirmed. The new roundabout is not compatible with the Neighbourhood Plan and was rejected in 2006 by the Inspector for the Bridgnorth District Plan.
A0124B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Distinctiveness of the town, its attractiveness to the tourism industry and hence its tourism economy will be undermined by growth proposal. The setting of the town will be negatively affected as demonstrated by Inspector's Report 2006 on Bridgnorth District Plan. Profusion of recent housing development in nearby settlements constitutes building over and above local need, is unjustifiable and no other historic town has been surrounded by so many new homes in this period. The core principles and policies in the Much Wenlock Neighbourhood Plan have been ignored. The bid for funding to reduce flood risk has not been made public and no plans for action have been confirmed. The new roundabout is not compatible with the Neighbourhood Plan and was rejected in 2006 by the Inspector for the Bridgnorth District Plan.
A0149B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Proposal does not comply with the Neighbourhood Plan which is still valid. This contrary to national government policy. Not fair or democratic that local plan policy says the Neighbourhood Plan will only continue to apply where the policies and proposals conform to the Local Pla; MUW012VAR adjacent to Hunters Gate is subject to significant flooding, the worst site in Much Wenlock for flooding and therefore not suitable for additional housing which will make the situation worse. Identified developer led solution to address the flooding risk not acceptable as previous development industry provided local have failed and flooding in Hunters Gate has got worse. Additional traffic generated will add to the traffic congestion together with that from proposed developments at Buildwas and Tasley. Proposal to build a roundabout on A458 will create a rat run through the town via Merrywell Lane and Barrow Street to avoid the bottleneck at the Gaskell Arms Corner. Whole town solutions to address traffic issues (bypass) & flooding required rather than development on a known flood site. Infrastructure issues need to be addressed prior to growth, with sewage system & water supply capacity problematic, and insufficient doctors surgery capacity which will also need to serve additional homes in Cressage.
A0161B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Object to the proposed development guideline as it is too high, contradicts the Much Wenlock Neighbourhood Plan and exceeds local need. MUW012VAR is contrary to the Much Wenlock Neighborhood Plan which indicates that large scale developments are not acceptable to the community. The sites capacity exceeds local needs and will endanger the unique character of the Town - changing from an attractive market town to a surban dormitory. Infrastructure is at capacity and the impact of the proposed development has not been fully addressed.
A0161B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	MUW012VAR is contrary to Policy DP20 due to water supply and sewage disposal issues. In Much Wenlock, water pressure at times falls to danger levels and water has to be brought in by road tanker continuously for days on a 24 hour basis. The current sewage system is working at full capacity and is in no position to receive the amount of effluent that the proposed development will produce.
A0161B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	MUW012VAR is contrary to policy DP22 due to flood risk. The site is notorious for its flooding after heavy and persistent rainfall. On these occasions homes are flooded and gardens submerged in Hunters Gate and beyond - the most recent occasion being 16th February 2020. Historically the flooding problem was not addressed correctly when Hunters Gate was developed in 2002. It is necessary that a solution should be found and implemented before consideration is given to any new development. It must not be left, as before, to the developers.
A0161B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	MUW012VAR is contrary to policy DP29 as the road structure is insufficient to handle the increased traffic flows. Currently at peak times traffic now becomes congested, particularly at the Gaskell Arms corner. The traffic arising from the new development will make matters worse. The proposed large developments at Bridgnorth and the power station site at Buildwas can only add to this congestion. There no provision for a by-pass to alleviate this.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0171B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Agrees 200 dwellings but strongly disagree with MUW012VAR this is the wrong site as flooding still occurs there, whereas MUW008 has had flood attenuation work and is ready for development council missed this so flawed site assessment . Town councillors who live near MUW008 did not point this out. MUW008 vastly better, re flooding, road link to Telford, nr recreation facilities, no impact on Gaskell Arms junction.
A0177B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Reject the preferred site. This rep is submitted by a community group on behalf of the community. Shropshire Council has not engaged with the community neither has the Town Council - this has prompted our response. Shropshire Council has failed to recognise the agreed policy approach in the Much Wenlock Neighbourhood Plan. Object to increase in housing guideline from 150 to 200. Feel that the approach to Much Wenlock is fundamentally flawed. No explanation of how the Draft Local Plan housing proposals will meet local needs, as claimed, or why the levels of development are set at the scale suggested. This site is contrary to the SCI. Consultation on the LPR has been completely inadequate and at a level which is contrary to statutory guidance and legal expectation. An alternative approach using small scale sites provide a better solution than this single large site. There is no up to date catchment wide strategic assessment of the risk to life and property from surface water flooding and lawful obligations set out in national policy have not been met. Strong opposition to the concept of development-led flood alleviation derives from costly local experience. Development is contrary to current National Flood Risk Management strategy which emphasises working with communities to develop resilience to risks. The LPR must not override the Much Wenlock Neighbourhood Plan - advice given to us by MHCLG. Shropshire Council has failed to consider relevant evidence, significant community feedback, the legally made Much Wenlock Neighbourhood Plan and set aside national policy and guidance including the function and importance of Neighbourhood Plans. The site allocation is not a strategic proposal: truly strategic sites for development include the major redevelopment of the Iron bridge Power Station within the Much Wenlock Place Plan area. The housing this will deliver is being ignored. There is no deliverable programme of investment in the significant and obvious weaknesses of the town's infrastructure that is necessary to make growth sustainable. There is no assurance that the delivery of employment opportunities needed by the town if the objective of 'balanced growth' is to be achieved. The development choice does not address a response to the climate emergency facing Shropshire, the UK and the Council itself. There is no consideration of the strategic implications of its wider proposals for the town; in particular the cumulative effects of the large scale development in Much Wenlock combined with the 1000 houses at Iron-bridge Power Station and 500 houses on the livestock market and 1,050 at Tasley - if that's the site selected instead of Stanmore - at Bridgnorth, which will overwhelm the road infrastructure and the pinch point at the 'Gaskell corner' in Much Wenlock. Shropshire Council has: not explained why it cannot fulfil its legal responsibilities to address flood risk without requiring major development; imposed/allocated a site in the area of the town at the highest risk of flooding; determined not to consider alternative, non-development led approaches (as previously undertaken in the town); not sought funding from the hugely enhanced budgets allocated to the Environment Agency for flood risk management; ignored the effective delivery mechanism of the MWNP for housing at a scale and rates which are compatible with the historic market town; the scale of the site, which is without explanation, hides the fact that it will lead to over development. Given current requirements for 5 year reviews of housing land, we can anticipate 3 more proposals by SC to allocate large sites. If these are commercially led as currently proposed, this might generate another 360 houses by 2038. In total the scale of development would reach 600-700 houses, even excluding further small scale and exceptions sites. There is; a lack of a clear commitment and delivery mechanism to provide employment during the plan period; lack of a proper strategic approach to managing and mitigating the transport and traffic implications of the development; a skewed emphasis which describes community benefits from the site allocation as addressing existing flood risk, and omits a coherent approach to the weaknesses of health facilities, public transport and other infrastructure. The proposal by Shropshire Council to bring forward this site (MUW012VAR) as its LPR Preferred Site is flawed from a Transport and Accessibility perspective. Greater consultation with the community and Shropshire Council's own housing and Homepoint figures, (see the Housing Report on the Refresh Group web site) show that there is a greater need for smaller homes to suit young buyers and downsizers, as well as single level dwellings for older residents. The overall target for housing development should be reduced from 200 to 165 by 2038. The 'preferred option' site MUW012VAR should be deleted. We propose that the exact scale, location and type of the additions to overall housing development should be addressed through a review of the MWNP so that it can be accommodated on terms expressed by the community. Employment land should be actively brought forward. To achieve balanced growth, the Draft Local Plan should identify and commit to a delivery plan for employment land. The release of the housing site(s) should be linked to the provision of employment opportunities. As with housing sites, the allocation should be subject to the flood risk assessment. A strategic flood risk assessment must be undertaken as a priority and used to underpin all future development policy and decisions. The Draft Plan commits to undertake the flood risk assessment for the whole catchment and to consider development proposals in the context of clearly defined options for addressing the risks. Shropshire Council should commit to proper and lawful community engagement to revise the LPR. The Draft Plan should include a commitment to a meaningful consultation process about the future of the town which is based upon working with the community on a review of the MWNP and which integrates solutions to flooding, infrastructure and development needs. There should be a deliverable programme of infrastructure to meet the town's needs. A deliverable programme of improvements to Much Wenlock's local and associated strategic infrastructure should be identified and agreed with the community alongside funding arrangements. Clear links should be made to development proposals so the benefits are recognisable. Funding arrangements for any infrastructure development should be set out in advance to ensure public confidence and support.
A0178B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	Much Wenlock flood group support 120 houses on Hunters Gate2 site on grounds 1. Idea is to prevent further flooding on site & Walton Hills adding a surcharge to Barrow Street Culvert hopefully control excess water to the bowl. 2. existing pipe at Wenlock Parkland. 3.Parkland has existing ponds suitable for attenuation slowing water and protectin Down Mills & Farley. 4. Supports developer led development funding for flooding, allowing council to control attenuation ground work done before development starts. 5. no money available via DEFRA EA or RPA work needs to be done soon or no priority given. 6. We want CIL money to be used for flood relief in other parts of town. Correctly installed in the high risk areas could reduce 30% going into sewers & stop catastrophic flooding
A0181B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I strongly believe that Cressage should remain OPEN COUNTRYSIDE. I believe that numerous errors were made when scoring Cressage as a Community Hub. The last time Community Hub status was proposed, over 300 residents responded saying they di not want to become a Hub. Our infrastructure cannot cope with extra housing as it is.
A0200B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	The Parish Council support a guideline of 80 dwellings for Cressage hub in the period to 2038. In the Parish Plan 2017, 57% were in favour of up to 20 homes over 5 years and 80 homes over the Local Plan period is circa 20 homes every 5 years. The Parish Council does have concerns re road safety in relation to CE50005, The Glebe Field and it is important that this is addressed if the site is to be developed.
A0207B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	This site gives the best opportunity for some limited development in the village as long as the site access and main road traffic speeds can be controlled. Any traffic calming on the A458 would have the benefit of improving traffic speeds at the Severn Way junction. The pedestrian links to the nucleus of the village are well established and would easily accommodate the extra footfall directly to the school, shop and doctors together with the childrens play facility and recreation ground. The visual impact of this suggested site would be minimal for the majority of the residents and passing traffic.
A0207B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	I am in favour of development of this site but am concerned that the highway benefit may be compromised by the listed status. The footway is very substandard. Retail premises in the village have been closed over recent years and converted to residential use, and the same would be suitable here.
A0217B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Strongly disagree with the allocation of MUW012VAR. Large sites are contrary to the Much Wenlock Neighbourhood Plan (NP), which has successfully delivered housing on small-sites for a number of years. Whilst the plan period has been extended beyond that of the NP, there is no explanation/consultation on why this approach cannot continue or about local wishes/needs. Guidelines for MUW012VAR reference delivery of housing needs and addressing flooding issues, these two issues should not be linked together. The guideline for Much Wenlock represents a 15% increase to dwellings, exceeding projected population and household growth for England over the period to 2038. The Local Plan requirement equates to a 22% increase in dwellings to 2038 which is also highly contentious. There are natural limits to development (nature/character bowl) in Much Wenlock, as identified within the NP. Infrastructure is insufficient to support the increased population. The plan considers flooding, but not traffic, medical, school, recreational open space, water supply pollution etc. There is also the cumulative effect with the redevelopment of Ironbridge Power Station. How will affordable housing for local people be delivered on the site? The plan proposes that development of MUW012VAR will address flooding issues on site and in adjacent area, but Much Wenlock is designate a Flood Rapid Response Catchment in the highest category, so why any development? The proposed scheme is untested and there is no existing watercourse across which an attenuation scheme could be built. Proposals also fail to address existing flood risk in the town, these need to be addressed first. No confidence flood alleviation measures will be effective, given past failures at the Hunters Gate site.
A0225B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	MUV12VAR – Development of hoises near Hunters Gate seems to provide a suitable location for housing for all age groups, being located close to the town centre and amenities, including the primary school and reasonably level access to the town for an older demographic. The provision of a traffic roundabout A458 Bridgenorth Road, would provide much needed traffic calming – slowing traffic, when entering the town.
A0232B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Excessive houses for Much Wenlock which is a lovely quaint old town More traffic & traffic noise on and around the A458 and the Gaskell Arm's hotel and through Much Wenlock an issue. Flooding in the town (including Hunters Gate, High Street)is a serious issue that needs resolving before any development Schools and the GP surgery will suffer with extra residents in place. Need to retain green fields & consider wildlife? Bypass might be worth considering
A0242B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	There should be no new housing in Much Wenlock. Government is seeking to reduce transport use and greenhouse gas emissions (recent consultation). Best way to do this is locating houses near jobs. Much Wenlock has few employment opportunities. Jobs for the population resulting from development proposed cannot be accommodated within the town. As such they will need to travel to find work (for instance Telford, Shrewsbury or the West Midlands Conurbation) adding additional traffic, congestion and use of fossil fuels/greenhouse gas emissions. It would make more sense to place new development where there are jobs, such as the fringes of large urban areas, reducing the need to travel - and increasing viability of available public transport due to increased numbers of user.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0250B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	<p>Strongly support designation of Cressage as a Community Hub. Cressage has a good range of services and facilities (as per the Shropshire Council Hierarchy of Settlements Assessment), lies on the A458 (identified in paragraph 3.26 of the Local Plan as a strategic corridor), is well placed with good links to Shrewsbury, Telford, Much Wenlock and Bridgnorth and there are also a range of local employment opportunities in proximity, such as The Leasowes Business Park (2km), Atcham Trading estate (7km) etc. High speed broadband also allows people to work from home.</p> <p>Support the proposed residential guideline of around 80 dwellings as a minimum level of growth for the village, this equates to 1.08% growth per annum over the 22 year plan period. ONS 2018-based SNHP for Shropshire forecast 1.13% growth, equating to 83.5 dwellings for Cressage over the 22 year period, therefore a housing guideline of at least 80 dwellings is justifiable in order to meet the village's own growth, not including its rural hinterland.</p> <p>Strongly support proposed allocation CES005. The site is supported by the Council's site assessment work, scores well against sustainability criteria and has no technical constraints to development.</p> <p>The site offers community benefits in the form of a suitable mix of housing, quality public open space, traffic calming and good vehicular and pedestrian connections.</p> <p>Proposed allocation CES005 is highly deliverable and viable. It is likely to be delivered earlier than the Local Plan's current forecast of 2025-2030 with the 2021-2025 period more appropriate in Local Plan Appendix 7: Forecast of Delivery Timescales for Local Plan Allocations.</p> <p>Supporting information provided in relation to proposed allocation CES005, specifically: Indicative Site Layout Plan for site CES005, Historic Environment Assessment for site CES005, Ecological Assessment for site CES005 and Arboricultural Assessment for site CES005</p> <p>Proposed allocation CES005 offers the following benefits:</p> <ul style="list-style-type: none"> A mix of housing to meet local needs including 20% affordable housing, starter homes, family homes and homes for elderly residents (the indicative layout shows 56.7% of homes as two or three bedroomed); Safe footways through the development and that cross the A458 to link to the existing safe pedestrian route on the eastern side of the A458 and down Severn Way to the village shop, school, GP surgery, etc; Traffic calming features at the southern entrance to the village, where they are most needed as traffic comes down the hill, including visual cues to drivers that they are entering a built-up area with houses on both sides of the road; Feature houses on the site frontage to provide a gateway feature on entering the village; Good relationship to the built form of the settlement; Public Open Space that provides an attractive centre to the site that links to Wood Lane; Screened in the wider landscape by the woodland on Wood Lane and the natural change in levels; No impact on any Tree Preservation Order (TPO'd) trees; No adverse impact on the historic field patterns of the village; No harm to the setting of any listed buildings; No harm to the character of the village; No harmful impacts on ecological and arboricultural considerations - demonstrated by Ecological Assessment and Arboricultural Impact Assessment. <p>The Council's LVSS states in relation to Landscape Susceptibility that, "there is a small area in the north of the parcel, close to the (western) settlement edge, which is made up of small scale fields that would be vulnerable to change in landscape pattern." This is the site CES002.</p> <p>CES002 would also affect the setting of five listed buildings, a number of significant trees subject to TPO protection, the character of the village by altering the western approach and is disconnected from village facilities, with separation caused by land around the War Memorial junction and with the only connection via an inadequate, narrow footway along the busy Shrewsbury Road.</p> <p>Site CES005 (land adjoining the vicarage) is far preferable to the alternative site CES002 (land west of Shore Lane) and strongly support the allocation of their site CES005 in the Local Plan.</p>
A0274B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the facilities to constitute such.
A0275B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A0276B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Don't know / no opinion	Development at The Eagles pub should be prioritised. Only support additional housing (other than at The Eagles pub) if something was done to address speeding traffic and the lack of pavements in the village.
A0277B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Do not support building on land adjoining the Vicarage. I live in Cressage for health reasons and the view from my house is important. Development of this site would affect the re-sale value of my house. If I stay I would want compensation for the loss in value. This is causing me great stress and worry.
A0279B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside. It should not be changed to a Hub.
A0286B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as countryside. School and doctors already over-subscribed. Some of the scoring is wrong - Cressage has a dispensary not a chemist, no pub, no post office but a tiny shop.
A0301B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Concern over infrastructure deficiencies due to Ironbridge development, in particular, highways, traffic and demand on water supply.
A0303B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Scale of development excessive and contradicts the 2017 Shropshire Local Plan Review and Much Wenlock Neighbourhood Plan. Style of housing inappropriate, traffic congestion already major concern and proposed roundabout will not alleviate. Valuable agricultural land being used in conflict of Policy H3 in the MWNP for use of brownfield sites. Ignores the need for additional play areas. Sewage, water supply and flooding concerns in particular around Hunters Gate.
A0307B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Contradicts clear policies of Much Wenlock Neighbourhood Plan. Scale of development of 150 houses is excessive compared to needs expressed in 2017 Shropshire Local Plan Review. Style of housing is inappropriate, infrastructure concerns ie water supply, sewage system, burden on primary school and medical practice numbers and flooding.
A0340B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The statement 'New housing and employment development will respond to local needs' is bogus. Housing target has been increased to 200 without consultation. SC has ignored the Inspectors adjudication from 2006 public enquiry. The housing delivery rate was on target to deliver the original 150 houses, does not think adding 2 years to the plan necessitates increasing dwellings by a further 50. the proposed MUW012VAR of 120 dwellings is not representative of local need and ignores the wishes in the MWP of small developments (max 25 dwellings). overdevelopment will bring problems such as flooding, drainage and sewage (Barrow Street), school capacity, medical facilities capacity, traffic congestion, pollution, damage to the environment and towns unique landscape. the EA define the area as being 'very high risk response catchment' with risk to life and property. similar fears were expressed prior to the Hunters Gate Dev, they were ignored and subsequently properties have flooded twice in 13 years. Challenge to 'employment development will respond to local need' employment will continue to be in Telford with Much Wenlock becoming a commuter town increasing pollution and congestion within the towns streets. The 1000 dwelling sites at Buildwas and Tasley will generate increased traffic on the A458.
A0355B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	No guarantee on the range of house or tenures, what extent will be for local need or reservation of homes for local people, not in line with MWNP, no guarantee of open space and rec facilities, economic benefit will be limited people will drive to the larger towns, the water supply is insufficient as is the foul sewage network, flood concerns - flood alleviation needed. pressure on gp surgery and school. The housing target can be met through infill inline with the MWNP
A0359B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A0361B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status.
A0363B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status.
A0365B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status.
A0366B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status.
A0367B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0383B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Site is wholly sustainable to come forward for development immediately. The parish council should be encouraged to come forward with a new neighbourhood plan and request to be a cluster. Site plan attached.
A0384B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The statement 'New housing and employment development will respond to local needs' is bogus. Housing target has been increased to 200 without consultation. SC has ignored the Inspectors adjudication from 2006 public enquiry. The housing delivery rate was on target to deliver the original 150 houses, does not think adding 2 years to the plan necessitates increasing dwellings by a further 50. the proposed MUW012VAR of 120 dwellings is not representative of local need and ignores the wishes in the MWP of small developments (max 25 dwellings). overdevelopment will bring problems such as flooding, drainage and sewage (Barrow Street), school capacity, medical facilities capacity, traffic congestion, pollution, damage to the environment and towns unique landscape. The EA define the area as being 'very high risk response catchment' with risk to life and property. similar fears were expressed prior to the Hunters Gate Dev, they were ignored and subsequently properties have flooded twice in 13 years. Challenge to 'employment development will respond to local need' employment will continue to be in Telford with Much Wenlock becoming a commuter town increasing pollution and congestion within the towns streets. The 1000 dwelling sites at Buildwas and Tasley will generate increased traffic on the A458.
A0398B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	I support additional housing in Much Wenlock and agree the site behind Hunters gate is the best available location. Here are the 'buts' commonly voiced by residents and their representatives..... Concerns:-DP20 – water resources – Severn Trent tanker water several times a year spending up to three days doing so. This is evidence that the current supply is inadequate and an additional 200 houses will require an average of 35000litres per day of water. DP23 3SuD I understand that the Severn Trent map of drains is inaccurate. Local builders frequently find drains in unexpected places or those mapped as foul drains being mixed or vv. Much Wenlock frequently suffers from surface flooding due to its topography surrounded by hills assisting water straight down the High Street, Back Lane, Shenton Street and the BullRing. Climate change increases the frequency of 'sky rivers'. Attenuation ponds have helped mitigate this but not in any way solved the issue. Each new development reduces surface area for water absorption. Previous developments including Hunters Gate (no I don't live there) were built on the promise of adequate drainage. Much Wenlock will require more than a developer's reassurance in terms of addressing flood risk. Much Wenlock Town Council voted to permit additional houses on the site on the basis that this was the only option available to solve recurrent flooding of properties in Hunters Gate. The developer states that the development (which is on a field sloping down to Hunters Gate), will actually stop Hunters Gate flooding rather than adding to the flooding. Please insist on the drainage plans being available for independent expert inspection prior to approval. DP19 Air quality 2a) Baseline of air quality – Much Wenlock has this measurement at the Gaskell junction of 5 roads. This is a heavily congested area particularly at peak times including school runs. Locals know to avoid the long queues around this time. This does not and will not affect me so no personal axes to grind! However, the combined effect of the Buildwas development (with its erroneous prediction for traffic not impacting on Much Wenlock) and the Much Wenlock development, will only add to this. It is a major route to Telford, Buildwas, Shrewsbury, Bridgnorth etc. I anticipate the increased traffic will force the building of a bypass in the long term. It would be a shame to divert people away from Much Wenlock and impose this cost when local authorities have been squeezed to the point of losing staff and having minimal financial resources.
A0401B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	Development of MUW012VAR offers the opportunity to establish a storm water extraction system and foul water extraction system that will serve the site, surrounding area and open up land for development along the valley. It also offers an opportunity to meet community commitments to resolving flooding issues around the town and follows proposals in the Much Wenlock Urban Drainage document (Option 3), resolving several flooding issues in and around this area and provide opportunities to aid other failed developments. It is logical to open up this area by taking storm water extraction away from Much Wenlock towns internal storm water system by directing water from the site and Hunters Gate to the Shilte River via the Great Pool area. This will free-up capacity within the Much Wenlock towns internal storm water system. Support development of MUW012VAR subject to: Development proposals address all pluvial water that affect this site and the surrounding area (Merrywell Lane along to Walton Hills and Hunters Gate). Provision of a large roundabout access which slows traffic to a stop to enter the town. Storm water connection points should be provided around the roundabout to connect systems serving Calloughton Ash and Oakfield Park and run-off from Calloughton Lane and the Graveyard. This would mean that the pipe extracting water from the lowest point through Hunters Gate must be sufficient to deal with all this water. No or little on site storm water pool, water should go out to the off-site great pool. This saved space should be used as open space. If possible, storm water from Swan Meadow should also be incorporated into this system. Whilst supportive of MUW012VAR object to the proposed site guideline regarding flood risk. When undertaking water flow calculations, there is a need to consider not just the water on the site but that in the wider area and ensure that the system has sufficient capacity to accommodate this development and future development in the area. The Great Pool needs to be large enough to contain the storm flows expected from this valley. Additionally, sufficient suitable collection/connection point need to be made available to allow multiple feeds into the water extraction proposal and to deal with exceedance water from the area. Hunters Gate and Calloughton Ash are prime examples where only water collected within the development boundaries were considered to be in need of management. These clearly demonstrate that without sufficient consideration of external pluvial flows adding to the needs of water extraction from a described site boundaries, developments will flood. Now is the time to consider the infrastructure capacity of future development - at the inception of a new route for storm water. Make it sufficiently large enough to deal with and resolve our growth issues, rather than have to dig up what is already laid (again) when we next need to connect more Homes.
A0401B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Oppose development of MUW008 as better opportunities exist. The site assessment for MUW008 refers to planning permission for an attenuation pond that has already been built. This attenuation pond would not serve MUW008 which would require an additional careful review of rainwater extraction requirements if developed, adding extra cost. Do not consider that MUW008 is currently available for development. MUW008 does not offer the town of Much Wenlock any additional benefits (other than new homes). Other potential sites that are available around the town offer Much Wenlock Town the opportunity to reduce flooding in several key areas. This area (the Sycote tributary to the Shilte) has had that problem resolved already. Other areas around the town require flooding prevention solutions to be applied before this area is developed further
A0406B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	MUW012VAR is already at the case that water and sewage services are at capacity in Much Wenlock. Any large development such as the proposed site would have to await immediate improvement to both water and sewage services.
A0406B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Does the use of site MUW012VAR for housing development fulfil all the requirements of paragraphs 1 to 12 in DP22? What does the Sequential Test show for this 120-house development site?
A0406B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Don't know / no opinion	It would be necessary to ascertain the existence of any historic monuments in this parkland before flood defences involving such a large disturbance of land were created, so that the points made in paragraphs numbered 1 to 3 in DP24.
A0406B7	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The Local Plan seems to ignore the Neighbourhood Plan's intention that developments should be small and should give priority to local needs, eg. social housing for rent and retirement properties of limited size. Such a development would have large traffic issues.
A0406B8	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The selection of site MUW012VAR would appear to have little to do with lack of risk, but more to do with availability, because the owner of the site had an agreement with a developer. Sites for development should be taken out of consideration if they lie in a Rapid Response Catchment area, in the case of MUW012VAR next to a housing development where a number of houses have been flooded in recent years. How was site identified when the instruction seems to veer towards disregarding such sites, even if they are available?
A0409B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	CE5006 should remain a commercial site due to its position, with close links to the A458 It is of value to the community and this cannot be replicated elsewhere in the village. It offers the potential to provide much needed improvements to infrastructure. For instance: It could be linked to the village hall via the contaminated land of the former garage, which could be landscaped and the home of the village war memorial, allowing space for improvements to road junctions. Use of the site for shops or post office would provide services that are currently only available in nearby Much Wenlock and Cross Houses. The site could offer local employment and capture passing trade on the A458 Main concerns about the site are: The A458 severs the site from the rest of the village and the existing services and facilities. Access to the village will need to be addressed, however the speed of vehicles on the A458 is high. This is a particular issue for the site, which is on a slope where cars naturally speed up. Speed cameras help but this is focused at the Shrewsbury end of the village. the density of development proposed, given its location to the west of the A458, will impact on the environment of the village and surrounding countryside. The density of development in villages should be lower than towns. As the site is on a hill, water run-off will go into the river causing possible pollution Cressage should remain open countryside. There are insufficient amenities available to cope with the proposed number of houses that comes with Community Hub status. Scoring for the village within the HoS is incorrect as there is no library, pharmacy, functioning place of worship or post office. The shop is small and the bus service sparse. The medical centre and school are already stretched and could not support additional people. The draft Policy states that employment development will be delivered, but allocates the most commercially viable site in the centre of the village with access to the A458 for residential. If new Community Hubs are to be identified, improvements to infrastructure need to be made so they can support the development proposals. Cressage should remain open countryside until these improvements are made
A0409B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Main concerns about the site are: The A458 severs the site from the rest of the village and the existing services and facilities. Access to the village will need to be addressed, however the speed of vehicles on the A458 is high. This is a particular issue for the site, which is on a slope where cars naturally speed up. Cressage should remain open countryside until these improvements are made
A0417B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I believe that Cressage should remain OPEN COUNTRYSIDE. Previous attempts to classify Cressage as Community Hub have been met with strong opposition from residents. The Settlement scoring facilities previously used were incorrect/misinterpreted to the few facilities we do have. We DO NOT HAVE a library, a chemist/pharmacy/a post office (or outreach service) or a functioning place of worship. Since I have been in the village (20 years) we have lost a post office (plus adjoining shop), a pub, a church is now limited and a small garage has gone. I believe that the proposed development for the land adjoining the Vicarage for building should NOT be permitted. The A458 is a main road and here are not safe crossing and no adequate pavements or walkways at this end of the village by this proposal. A development here would cut the village in two, with the A458 providing the dividing line. It runs the risk of being a separate village within the village. Current meagre facilities in the village are insufficient to allow for new housing and the residents they will bring. Cressage is also an area rich in wildlife. Given the concerns on climate that is prevalent in the press, we should be looking to preserve what we have and build sustainably. As this proposal is at the top of a hill, water runoff could impact buildings lower down the hill. I do not believe developers would carry out these works as it severely impacts their potential profits. I believe that the site of the former Eagles Public House (on the A458) should remain a COMMERCIAL SITE. It is central in the Village and very accessible and visible from the A458. It is prime commercial land and could continue to be used to viable business opportunities, not just for the village but also for passing traffic. Part of this land could be used to resolve the road issue at that corner, perhaps by placing a roundabout there. There is a contradiction in the proposals in that the 13.2 proposals state that employment development will be delivered, but the only commercially viable site in the village (the Eagles pub) is seeking a change of status. therefore no employment development will be delivered.
A0431B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside. It should not be changed to a Hub.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0432B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside. It should not be changed to a Hub.
A0452B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	CES005 land adjoining the Vicarage should only be developed for 15 - 20 dwellings. Cressage has inadequate infrastructure to support 80 dwellings on CES005. The proposed access from A458 will be dangerous and traffic from CES005 will cause congestion on this strategic highway. Wood Lane to the rear of CES005 and the adjoining Local Nature Reserve will be adversely affected by the development of CES005.
A0452B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	CES006 will improve the visual appearance and the safety of the former public house site and the A458/Sheinton Road junction through the provision of a public footpath across CES006. The provision of 5 dwellings and the protection of the listed building on CES006 are further benefits of the proposed development. Nevertheless, CES006 should be developed to provide affordable housing not open market executive dwellings.
A0453B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside
A0460B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain open countryside. Insufficient infrastructure to cope with development - GP, School. Affordable housing does not meet local needs
A0464B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	Support measures proposed, but not enough. Near misses between pedestrians and vehicles common on the hill of the south of the village. Long term solution is fixed average speed cameras on the A458 and the entrance and exit of Cressage
A0467B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain open countryside because of a lack of services, and capacity issues at the primary school.
A0468B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain open countryside because of a lack of services, and capacity issues at the primary school.
A0484B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Residential Allocations: Much Wenlock Key Centre - The agreed number of dwellings for the Neighbourhood Plan adopted in 2014 was 80 no. for the site adjoining the Primary school and Hunters Gate in Much Wenlock. The number of dwellings has now been increased by 50% to 120 no. dwellings but to be accommodated on the same size piece of land. This must mean that the density of the houses will be increased and the amount of green amenity reduced. It also implies that properties are likely to be taller and with three storeys. The water and sewage system in this part of Much Wenlock is already running at capacity. We are concerned that without major infrastructure upgrades that the present system will collapse if added to. Upgrades will cause major disruption to local residents for an extended period of time. In order to accommodate the increase in the town's population (a minimum of at least 240 people, plus children) there will need to be resources found to expand the provision of health services, provide extra school places, postal services etc. None of these matters are specifically identified in the Plan
A0494B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area		Cressage should remain as open countryside and not be a Hub. Errors were made in scoring. The village does not have the infrastructure. Over 300 Cressage residents opposed Community Hub status.
A0495B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area		Cressage should remain as open countryside and not be a Hub. Errors were made in scoring. The village does not have the infrastructure. Over 300 Cressage residents opposed Community Hub status.
A0496B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area		Cressage should remain as open countryside and not be a Hub. Errors were made in scoring. The village does not have the infrastructure. Over 300 Cressage residents opposed Community Hub status.
A0497B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area		Cressage should remain as open countryside and not be a Hub. Errors were made in scoring. The village does not have the infrastructure. Over 300 Cressage residents opposed Community Hub status.
A0498B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area		Cressage should remain as open countryside and not be a Hub. Errors were made in scoring. The village does not have the infrastructure. Over 300 Cressage residents opposed Community Hub status.
A0499B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area		Cressage should remain as open countryside and not be a Hub. Errors were made in scoring. The village does not have the infrastructure. Over 300 Cressage residents opposed Community Hub status.
A0564B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The terms community hub and community cluster are confusing. I agree with the proposal for some additional housing but feel that the environmental impact and lack of sustainable infrastructure should inform the degree of building. CES006 requires sympathetic and careful planning and safe access for pedestrians and vehicles to Shrewsbury Road and Sheinton Street are a hazard. Where possible enhancing the community asset of the Eagles pub should be explored further. Raby estates proposal is not within the hub and unsustainable due to lack of infrastructure to support such development
A0570B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Disagree that Cressage is a hub as there is no pharmacy, post office and the school is at full capacity. The church is also only open for the main religious festivals and may soon close completely. Development of the Glebe site would increase traffic onto an already very busy road and increase pressure on village facilities
A0581B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A0582B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The road is already overloaded with traffic. Adding additional housing will make the risk to health worse. The Village has no facilities to support existing residents. No church, no pub, limited tiny local (expensive shop) The council should concentrate on building facilities for communities before further developing housing. Given a massive housing development will soon no doubt take place at the old Buildwas power station 1000 home site so we really need extra houses here. Also do not need the Raby Estate development either.
A0589B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The Neighbourhood plan should be respected. It allowed the town to grow and provide housing for renting and elderly in a coherent way. Building 120 housing on a flooding field in a block is an example of landowner and developers pressure. This site contradicts the wishes of the residents and the neighbourhood plan. As well as flooding there has been water supplies been cut off due to not enough pressure. The medical practice can't cope. There is also the traffic congestion at the Gaskell Arms corner which increases our pollution levels
A0591B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Environment Agency have warned that Much Wenlock is at high risk of flash flooding so building houses does not make sense. Rentals for old people is not being planned. We voted against large number of houses being built in a single development. It is far too big. It is too far out of town for older people. More problems with increased traffic at Gaskell corner. We run out of tap water several times - I support the neighbourhood plan not this new local plan.
A0593B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Don't know/no opinion	Disagree with designation of Cressage as a community hub as its not supported by over 300 residents; scoring system for hubs is written in Council favour and labeling of services in Cressage such as pharmacy and mobile library are incorrect. Existing services are under pressure and concern about capacity of school and doctors to cope with increased numbers. Scale of development not constructive to the village and more consideration of residents views needs to be made
A0593B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Disagree with designation of Cressage as a community hub as its not supported by over 300 residents; scoring system for hubs is written in Council favour and labeling of services in Cressage such as pharmacy and mobile library are incorrect. Existing services are under pressure and concern about capacity of school and doctors to cope with increased numbers. Scale of development not constructive to the village and more consideration of residents views needs to be made
A0593B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Disagree with designation of Cressage as a community hub as its not supported by over 300 residents; scoring system for hubs is written in Council favour and labeling of services in Cressage such as pharmacy and mobile library are incorrect. Existing services are under pressure and concern about capacity of school and doctors to cope with increased numbers. Scale of development not constructive to the village and more consideration of residents views needs to be made

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0601B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Disagree with allocation of 120 houses at Hunters gate, reasons for opposing the designation are: Much Wenlock has already experienced growth in the last 30 years and with very significant development planned in Buildwas, Tastlet and Cressage this will create more traffic issue in Much Wenlock; concerns about flooding on the site and town in general and no catchment wide flood plan is a concern; concern towns infrastructure can't cope with this level of development; also concern results of Neighbourhood Plan are not reflected in this plan
A0602B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Object to development in Much Wenlock. Welcomed past development and fully support the Neighbourhood Plan which sets a coherent and sensible plan for the long-term growth of the town and was subject to community engagement/agreement. However, current proposals have not been subject to community consultation, with the extension of the plan period used as a reason to override community opinion. Much Wenlock has insufficient infrastructure to support large scale housing (traffic, health facilities, school places, water supply, sewage capacity, flooding etc). Other large scale development outside the town, particularly the Former Ironbridge Power Station, already threaten the viability of this infrastructure. The infrastructure benefits of large scale development are unproven, the proposed roundabout is only necessary to serve the development and statutory bodies should fund flood alleviation work, as occurred in other parts of the town. Past developments have failed to deliver (e.g. Hunters Gate flood attenuation infrastructure) and this has not been enforced, which does not bode well for future development. Subsequent identified remediation works have also not been implemented. There has been no assessment of the potential success of proposed flood prevention measures.
A0641B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Number of houses is far in excess of anything previously proposed for the site and directly contradicts the Neighbourhood Plan. Concerned about increased traffic flow and congestion.
A0650B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Concerns about traffic on A458 and passing through village. Walking would be dangerous. Development would be an add on to the village not part of it.
A0661B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area		The target requirement to deliver 200 dwellings and around 2 hectares of employment development is too high and is not in keeping with the character of the town of Much Wenlock. I do not believe that SC calculations are in line with national Government guidelines for housing and employment land requirements.
A0661B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	A Neighbourhood Plan for Much Wenlock covering the period from 2013-2026 was adopted by SC in 2014. The draft Local Plan Review does not support the Much Wenlock Neighbourhood Plan. Restricted consultation on future developments has been led by developers and landowners, with little or no information from SC. This should be replaced by open consultations between residents, councillors from MW Town and SC, and developers, as is evidenced for developments in other parts of Shropshire. A review of the MWNPN is required to look at the "big picture" for Much Wenlock to include development requirements, the provision for more infrastructure (medical, educational, traffic etc) and a solution to the flooding for all of Much Wenlock. This will help Much Wenlock to continue being an attractive place to live and work.
A0661B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	MUW012VAR The preferred option site MUW012VAR should be removed and deleted. This large development outside the town boundaries is not in keeping with limited housing developments to meet local needs as agreed in the Much Wenlock Neighbourhood Plan
A0661B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	DP22 requires directing development to areas at least risk of flooding. Much Wenlock is designated as a Rapid Response catchment and no further developments should take place until a flood risk assessment for the whole of Much Wenlock has been completed. The provision of piecemeal flooding alleviation especially by a developer does not address the problem of flooding for all of MW especially as the same developer's previous development in MW has ongoing flooding problems.
A0662B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The preferred site takes no account of the Neighbourhood Plan. What was the point of all the effort put into it by the community? At the time we were told it would determine housing policy to 2026. We are fed up of having to allow major developments in order to get a few affordable homes. We have trialled a new approach which has been successful in increasing the affordable housing stock in Much Wenlock. Much Wenlock will be gridlocked with the traffic generated by the power station development and further housing in Cressage The local road infrastructure cannot cope with more traffic. People from Hunters gate find it too hard to walk into town so drive in. This development would exacerbate these pressures. Wenlock has flooded frequently in recent years and the existing site will not improve the situation.
Page 204 A0672B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Object to the proposed increase to the development guideline for Much Wenlock (from 150 to 200 dwellings). This is proposed as the capacity of proposed allocation MUW012VAR has increased due to site promoter claims about the viability of flood risk mitigation (without public consultation) and the fact that this increase when combined with windfall development the proposed guideline would be exceeded. Much Wenlock has a legally binding Neighbourhood Plan, the draft Local Plan should have identified levels of development and the Neighbourhood Plan should have been used to allocate. Consider it is wrong that the Local Plan Review takes precedence over the provisions of the Neighbourhood Plan. Attitude towards the status Neighbourhood Plans is of great concern - particularly Much Wenlock and Shifnal. Neighbourhood Plans are supported only in so far as they do not conflict with this proposed Draft Local Plan. Note one excuse for overriding them is that they were made up to 2026 and the draft Local Plan goes up to 2038. Much Wenlock Town Council were advised that the Neighbourhood Plan did not need updating and residents wanted to update the Neighbourhood Plan but cannot without Much Wenlock Town Council support. A Much Wenlock Neighbourhood Plan Refresh Group has been set-up, consulted with the community and made a submission to this review. Firmly support continued communitywide involvement with the Neighbourhood Plan. Object to proposed allocation of MUW012VAR. There has been no meaningful community consultation about proposed inclusion and changes to the site nor changes to the development boundary. Have previously raised this issue. This large site contradicts the Much Wenlock Neighbourhood Plan which calls for small-scale development because of flood risk; the town's medieval street pattern; and other infrastructure constraints such as medical facilities, water supply/disposal which cannot support large scale development. The capacity and extent of MUW012VAR has been arbitrarily increased on the demand of a site promoter who has stated they will include flood attenuation as part of the work. They also intend to include flood attenuation for the adjacent estate known as Hunters Gate which has been unfinished either by the original developer or Council since construction 10+ years ago. However, at a presentation the site promoter stated flood attenuation should protect the new development but refused to be drawn on the likely success of the work they were offering to do for the earlier development. They were definitely not intending to finish work identified in a 2011 report for the Council about flood alleviation for all of Much Wenlock. Much Wenlock has been identified as a Rapid Response Flood Catchment Area by the Environment Agency, on a par with Bosccastle. Consider this makes it imperative that development if first to meet local need and not in a location which is most likely to flood. Not convinced the Town Council have fully considered problems which may arise or were aware that other funding sources for flood alleviation were available (confirmed by Shropshire Council) when deciding to support development at MUW012VAR. According to draft policies, a scheme of 120 dwellings should provide 20% affordable dwellings (24). However, draft Policy DP3 sites where exceptional/unexpected costs are met by the developer there can be a reduction in the number provided. MUW012VAR makes extra costs a distinct possibility. Consider the choice of MUW012VAR as a preferred allocation is fundamentally flawed as the site assessments (Appendix N) had not been brought up to date before the assessment. For instance MUW008 is rejected because it does not have an attenuation pond, however the attenuation pond was in fact completed before assessments commenced. Draft Policy DP22 references a Sequential Test for assessing the level of risk so that sites with less risk of flooding are preferred over those with a greater risk. It states this has already been carried out for proposed allocations, but how can this be accurate when the site assessment and Sustainability Appraisal are out of date. Agree with the draft policy DP25 Conserving and Enhancing the Historic Environment. Consider proposed allocation MUW012 has the potential to cause unnecessary and unacceptable harm to the historic environment through the flood alleviation works necessary to develop the site. The site promoter proposes to divert excess water into a large attenuation pond in nearby historic parkland, designed to capture flood water and slow its passage down the brook to Farley. There is a causeway across the park the first 170 metres of which is a Scheduled Ancient Monument. There has been reference to recreating a 'Great Pool' behind this, however the 1830 Tithe Map shows no such pool. On the map the causeway which once provided an elevated path to Downs Farm has a stream passing through it at one point which may be the site of an historic sluice. Closing the sluice may have formed a temporary pond to regulate the flow of water to the many mills once located on Farley Brook. The 'tufts' shown marked on modern Ordnance Survey Maps suggest the ground is often already saturated. On the far side of the causeway the tithe map shows two ponds, one which is still in existence and has the appearance on the tithe map of having been a moat around a piece of open ground, traditionally for securing livestock overnight on important estates before fields were enclosed by hedges. These proposals could also well be contrary to Environment Agency policies not to displace water. Draft policy DP29 states the impacts of transport movements must be managed. However, those identified for the alleviation of the proposed development of the strategic settlement at the Former Ironbridge Power Station (within draft Policy S20) on the A458/A169 junction in Much Wenlock are considered inadequate. Additional traffic from proposed in Bridgnorth and Cressage will overload this junction without MUW012VAR. The new roundabout proposed at MUW012VAR will cause traffic to stop and idle, polluting the area; add noise of vehicles breaking/changing gears; and will do nothing to improve congestion at the A458 A189 junction. The Inspectors Report for the Bridgnorth District Plan (2006) stated the visual impact of a smaller site covering only part of MUW012VAR would detract from the setting of the town. Much Wenlock's economy is dependent on tourists visiting the Medieval streets, admiring historic buildings and enjoying hospitality. Proposals are more indicative of a declining quality of life and visitor experience through traffic (rat running or queuing). Cumulative plans in draft policies S13.1, S13.2, S20 and S3.1 are more likely to lead to damage to the local economy than boost it. The draft Local Plan (para 5.182) states, additional development will need to recognise potential impacts on flood risk, heritage assets and other policy objectives on the Neighbourhood Plan. This paragraph is reminiscent of shutting the stable door after the horse has bolted. Much Wenlock needs more housing. Support developments of a more modest scale, where it meets local needs and includes genuinely affordable homes, retirement properties and some market housing. Do not support MUW012VAR until at least the failure of the original developer (Hunters Gate) has been addressed and in any event not too much development on any one site.
A0677B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	disagree with this statement in the development guidelines as it constrains the developers opportunities to offer alternative solutions too tightly. "Development will be required to deliver substantial community benefits both on and off site by way of flood alleviation. Specifically, development must demonstrate how properties currently at risk of flooding at Hunters Gate and Forester Avenue will be protected, as well as removing exceedance water from the existing surface water and foul sewer systems. Given the importance of this issue, development proposal will be required to show sufficient information on how these measures will be achieved in practice in order for planning permission to be granted. Any residual surface water flood risk will be managed by excluding development from the affected areas of the site, which will form part of the green infrastructure / open space network. Flood and water management measures must not displace water elsewhere." It is clear that if we are too make this a viable development, the water will need to be directed away from this area or given a concise route that it can follow to meet this requirement. This implies that an area that is greater than the development boundary MUST be considered in the flow calculations and suitable collection/connection points will need to be made available to allow multiple feeds into the water extraction proposals. It has been stated that the Great Pool area will be utilized to support an area large enough to contain the storm flows expected to outfall from this valley development. It is clear that sufficient capable routes need to be provided to deal with exceedance water from the development and surrounding area. Otherwise it is likely that we will have another failed development. Like Hunters Gate 1 and Callaughton Ash that are prime examples where only water collected within the development boundaries were considered to be in need of management. Subsequent lessons that have been learnt clearly indicate that, without sufficient consideration given external pluvial flows entering the development site boundaries, developments will flood. Currently poorly constructed re-direction bunds and poor thought out swaths etcetera have proven ineffective. We must incorporate these additional overland flows into the extraction calculations and pipe these additional flows into the Great Pool. Now is the time to prove to Much Wenlock Town that Shropshire Council are planning for growth and development in a professional manner for considering future needs NOW. This is the best time, at the inception of a new route for storm water. Let us plan for the future NOW. Make it sufficiently large enough to deal with and resolve our needs now and future growth issues, rather than have to dig up what is already laid (once again) when we next need to connect more Homes. All developments may need to consider "capture & re-direct methods" whereby a lower level site green space area maybe given as a temporary "submergable" space which in turn is connected to a larger storm water extraction facility which removes the water to a larger space (Great Pool) as the flows slow. So. Please review this paragraph and ALLOW flood and water management solutions to displace water as needed (with suitable authoritative consultation) to give consideration alternative developers solutions rather than forcing developers into a singular solution scenario.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0677B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	<p>very supportive of developing this area providing that specific additional criteria are met. Developing this area with new homes will offer Shropshire County Council an opportunity to put in place a suitable supporting infrastructure (for storm water extraction and foul water extraction) that will allow further future developments to be placed along this valley. It also clearly indicates that we are following the proposal in the Much Wenlock Urban Drainage document. See this at :- https://www.shropshire.gov.uk/media/5972/much-wenlock-iudmp.pdf option 3 this will resolve several flooding issues in and around this area and provide opportunities to aid other failed developments. It clearly indicates that we are honoring our community commitment to resolve local flooding issues.</p> <p>It makes logical sense to open up this area by BREAKING off storm water extraction away from the Much Wenlock towns internal storm water system. Then feeding this area (MUW012VAR) and the Hunters Gate 1 development storm water outfall out to the Shilte river via the Great Pool area. This will free up Much Wenlock Towns storm water system by a considerable amount. This development could (with thoughtful planning) free up capacity within the towns current storm water drainage system allowing other areas to release water more effectively into what is "at this moment" an overloaded system. I am very supportive of developing this area (MUW012VAR) based upon these provisions: -</p> <ol style="list-style-type: none"> 1) The development should include a large roundabout at the site entrance point (on the A458) that is suitable enough to severely SLOW the main traffic down to a stop to go fully around the island. The island traffic should not be able to see through to the other side - enforcing a stop situation (not allowing a skim through at speed scenario (unlike Cross Houses) . 2) Around the island the developer should include sufficient suitably large storm water connection points to allow the Shropshire County Council to connect feeds from the failed Callaughton Ash development storm water system, the Callaughton lane runoff, the Oakfield park storm water system and the Graveyard runoff. This implies that pipe extracting this water at the lowest point (through Hunters Gate 1) must be sufficiently big enough to deal with all this flow of water. 3) Development proposals take into consideration ALL pluvial water that will collate and be required to be dealt with at the lowest point of this area (removed in a controlled manner) - A failing that is all to visible in other area (Callaughton Ash) and developments around the town. It is common practice to limit a development to only need to deal with surface water flows within the boundaries of the development - this site will need to exceed that normal rule. Consideration should be given to undertake collation and extraction of water from Merrywell lane all along to Walton Hills and Hunters gate 1. 4) There should be little or no "on site storm water pool" the land saved by removing storm water out to the Great Pool should be used to provide a managed a green play space for the sites families and children. 5) If there is sufficient funding then incorporated into this development should be the Swan Meadow storm water outfall. This should be broken out of the towns storm water system and linked into this new proposal to go out through the Great Pool route as well. This will release a larger amount of water immediately to the Shilte rather than burdening the MWT storm system - again releasing spare capacity back to the towns drain systems. This will bring considerably more benefit to the Town of Much Wenlock than developing smaller areas around the town.
A0677B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>against developing this specific area. Other more beneficial development spaces and opportunities exist in the town. Within this document MW008 also refers to planning permission for an attenuation pond that has already been built on higher ground. Can I point out that this attenuation pond would not serve any purpose in assisting a development proposal in this area. A new development on this site would require additional careful review of wastewater requirements in this area. If developed this would add additional cost to this proposed development site with little or no additional benefit to the town - currently a point not considered for local discussion. I also believe that this suggested site does not offer the town of Much Wenlock any additional benefits (other than more housing) within the area. Other potential development sites that are proposed around the town offer Much Wenlock Town the opportunity to resolve flooding in several key areas (with careful planning). This area (the Styche tributary to the Shilte) has had its flooding problem solved already. There are other areas around the town that require flooding prevention solutions to be applied before this area is developed further. I am aware that the landowner is not currently in agreement to release this plot of land for development at this time. It is being held back at this moment.</p>
A0695B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>MUW012VAR is the wrong site for residential development as: Severe local flooding issues have not been resolved, building more homes on a critical site is not the way to resolve these issues. Additional traffic from MUW012VAR will have a severely detrimental impact on the Gaskell Corner junction, which is already stressed and will be more so because of the impact of developments at the Ironbridge Power Station, Tasey and Cressage. The Transport Assessment for Ironbridge Power Station demonstrates associated additional traffic will more than double existing problems at the Gaskell Corner. Identifying MUW012VAR as a preferred site when it will add to that chaos is ridiculous planning. All that will be achieved is to dramatically increase the problem of rat-running through the town. A new roundabout on Bridgnorth Road is destructive, environmentally unacceptable, divisive and wrong in both planning and highway terms and completely unnecessary in 'gateway' terms. Identification of MUW012VAR as a proposed allocation is premature (as well as wrong), proposed allocations should be identified through the proper process - via the adopted Neighbourhood Plan.</p>
A0700B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>Cressage should remain open countryside. Oppose housing plans. The views of the local community (over 300 residents) should not be ignored.</p>
A0701B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>Cressage should remain open countryside. It is not a Community Hub.</p>
A0713B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>The proposals do not respond to local need. Increase in population will increase problems at Doctor's, flood issues in town, increased pressure on already overloaded wastewater system, traffic problems</p>
A0714B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>Development in Cressage will have a negative impact on traffic in Sheinton.</p>
A0831B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Don't know / no opinion	<p>If a lot of houses are built in Cressage it will take away the rural character. Brownfield sites should be considered. The Eagles site would be much better and would tidy the place up.</p>
A0841B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>Number of dwellings proposed is too great for the town. Concerned about loss of character and subsequent loss of tourism. Major infrastructure problems ie highways, schools & medical practice. Flooding is also a major problem although acknowledge attenuation pool will help.</p>
A0847B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>Cressage should remain open countryside is does not qualify as a community hub. School and doctors at capacity, infrastructure cannot come with extra housing</p>
A0852B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>Opposes allocation of site MUW012VAR as area is subject to flooding; location of the development and Gaskell Corner junction suffer from traffic congestion; site is too far from centre for people to walk to so car use will increase</p>
A0854B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>I wish to write about an alternative site application of MUW008. This site has been put forward by the Neighbourhood refresh group as a possible alternative to other sites I object most strongly for this site to be considered as Chairman of the local flood group on their behalf and as an individual. 1. I am unaware that the Landowner has submitted this site as an option. 2. The topography of this site is wrong and would lead to soil and water run off into the houses on Southfield Road as attenuation could be a problem along the southern boundary. This happened in 2005 and 2007. 3. Part of the development would be skyline development. 4. access could be a problem as all round access is in the hands of one ownership. 5. The proposal is above the level of the present attenuation pool on the Styche site, and that pond would have little impact on the drainage of the housing, levels would not allow water to flood up hill! 6. Because of this the water would have to flow direct into the sewer/storm water drain, which is already at capacity and we risk further flooding on this side of town if we try to do this development. 7. The fact that the NPlan is critical in its comments as is Councillor Turner about building of up to 200 houses in the town up to 2036 on another site how many would they build on a similar sized plot here? I ask you to consider these objections carefully.</p>
A0856B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	<p>Opposes allocation of site MUW012VAR as area is subject to flooding; location of the development and Gaskell Corner junction suffer from traffic congestion; site is too far from centre for people to walk to so car use will increase</p>
A0861B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	<p>This site is located much too far from centre of Much Wenlock. The people from there will drive to other places rather than spend time in Wenlock. It is much too far to walk into town. This is why other sites are much more preferable. The traffic at the Gaskell Corner backs up continuously and is VERY dangerous for pedestrians. The so-called 'refuges' are constantly being struck by lorries so no-one in their right mind uses them. Hunter's Gate II will simply worsen this situation. Despite much talking, Much Wenlock has not yet benefitted from a proper strategic flood plan; therefore how is it possible to identify as a preferred site, the one that most suffers from flooding</p>
A0903B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	<p>It is accepted that Buildwas need not be provided with a development boundary and might be regarded as a Cluster rather than Hub, the existence of extant planning permission for the development of land in the village should be recorded in the description of the nature of development that is considered acceptable in the settlement in order to give certainty to the delivery of those developments. Site BUD007 enjoys two extant planning permissions.</p>
A0926B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	<p>This policy is supported as it recognises the role of Much Wenlock as a service centre for a large rural hinterland and its location on a 'strategic corridor' (the A458 Paragraph 4.91(e) of the Plan identifies that the A458 is a Strategic Corridor and Policy DP9: Strategic Corridors states that the "Shropshire Economic Growth Strategy seeks to deliver a 'step change' in the capacity and productivity of the local economy. To contribute to this aim, 'Strategic Corridors' along the principal rail and strategic road routes through the County will be the primary focus for major development especially along 'strategic corridors' with both rail and road connectivity". Given the above, it is evident that Much Wenlock should be a significant centre for growth in Shropshire, both socially and economically. The identification of land to the south-east the town (allocation MUW012VAR) is also supported as this land is unconstrained, lies in a highly sustainable location and will deliver substantial community benefits both on and off site by way of flood alleviation. The land will therefore make a significant and unique contribution towards meeting the growth needs of both the Town and the County.</p>

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0926B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	Settlement Policy S13.1(i) - 'Residential Allocations: Much Wenlock Key Centre', Policy Map Inset S13 – 'Much Wenlock' and Local Plan Residential Allocation – 'Land adjoining the Primary School and Hunters Gate, Much Wenlock (MUW012VAR)' are supported. The site is a strategic allocation and would make a significant contribution towards the overall housing requirements for Much Wenlock up to 2038. We note and accept the development guidelines set by the Council and would comment as follows on the key issues: Drainage and Flood Risk: In respect of the drainage infrastructure an initial flood modelling study has been carried out by McCloys Consulting. McCloys are an industry leader in the water and environmental engineering sector. The aim of this study was to review the local flooding issue with a view of exploring what land take would be required to attenuate water entering the site from the wider catchment. The summary of the study is as follows: <ul style="list-style-type: none"> • During flood events significant volumes of water are shown to run across the site and down into the Hunters Gate development below. This accords with the known problems of flash flooding on Hunters Gate and the fact that the combined sewer in Barrow Street cannot cope at times of flash flooding. • It is predicted that we would need to attenuate between 10,000m3 to 30,000m3 of flood water on site if discharging this at a controlled rate. As an attenuation pond of this size would take up so much space, this makes the development proposal in its current form completely unviable. • The existing STW surface water drainage networks for the existing sites are at capacity even without any flood water entering them. Connecting the site to these networks in their current form would not be accepted by STW. • To deal with the above point, a new surface water drain/culvert would be required under the Hunters Gate adopted roads and would need to discharge to The Parks. Alternatively it may be feasible to upgrade/replace the existing STW surface water sewer here. In either case a very large pipe is required, so we estimate this would cost in the region of £600k to construct. • As a ball-park figure, we estimate the cost of constructing the culvert and attenuation features as being in the region of £1,000,000. This would need to be carried out very early on in the development prior to any house sales. Highways and Transport Infrastructure: We recognise that development on this scale will require a new roundabout access to be provided from the A458. The roundabout will help slow traffic coming into the town and by the school. The cost of a roundabout to the A458 is estimated at £600,000. The precise design is unknown at this stage and a supporting transport and highways assessment will be required as part of any future planning application. This will fulfil the second objective of the proposed development guidelines. Other Matters: At this stage we have carried out a massing exercise and can confirm that the site can accommodate a maximum of 120 dwellings together with the required roundabout and drainage infrastructure. The Estate are committed to delivering a high quality, beautiful development which will be in keeping with the surrounding landscape and local vernacular. There will be a requirement for natural open space within the development and it is envisaged that the current planted boundary to the site will need to be displaced and replace with compensatory planting on the new site boundary. It is proposed that the development will deliver a good mix of housing including fulfilling the policy requirement to build 20% of the overall housing numbers as affordable dwelling. The development will deliver a Community Infrastructure Levy (CIL) contribution of £59.64 per square metre of build and the development overall could generate overall CIL receipt somewhere in the region of £900,000 to spend on local projects. The Estate are not seeking to reduce either of these contributions on viability grounds. To conclude the Estate fully support the site allocation. Allocating the site in the final plan would solve the longstanding surface water flooding problems in the town, provide a new roundabout and deliver a high-quality sustainable development. This is a once in a generation opportunity. We understand there is a willingness amongst all parties to see this scheme delivered to address the current local flood problem and were very pleased to see the Town Council supported the site allocation in their recent consultation response.
A0926B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Don't know / no opinion	Location plan and indicative layout for site
A0952B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Don't know / no opinion	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A0953B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Don't know / no opinion	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A0971B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Promotion of land owned by Raby Estate in Cressage at Shore Lane. S13.2 Cressage We support the allocation of Cressage as a Hub. We do not support the allocation of Land adjoining the Vicarage or The Eagles Pub. These sites should be deleted and replaced with land off Shore Lane promoted by the Raby Estate
A0971B7	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Promotion of land owned by Raby Estate in Cressage at Shore Lane. Historically there is an underdelivery of housing in the Much Wenlock Place Plan area, and the Market Signals and Housing Affordability Profile – Part II indicates that the median household incomes in the Place Plan Area are the highest in the county. . If the housing needs are not urgently met the existing population in the lower quartile of household incomes will find that they are repeatedly competing against those moving in to access higher paid employment causing an outmigration. Welcome inclusion of Cressage as a community hub, but argue that the windfall targets for Cressage can not be met based on the existing settlement boundaries, and this is contrary to paragraph 70 of the NPPF. . A more robust and national policy compliant position to ensure the appropriate delivery of housing in accordance with paragraph 59 of the NPPF would be to allocate the Shore Lane site which is of sufficient scale to accommodate the housing needs identified in the local plan. In the plan period, there is likely to be high initial demand for development to meet the unmet demand for housing need of Cressage and the lack of delivery across the place plan area. Development on the site off Shore Lane would be able to alleviate the housing pressures on the area early in the plan period.
A0971B8	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Supporting documents for allocation of Shore Lane Cressage within the Local Plan
A0987B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	No objection to housing allocation, and welcome the importance given to flood alleviation and the roundabout to be provided.
A0987B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Don't know / no opinion	Concerned that no employment land included. There are also concerns for the Town Council relating to increased traffic from development at Tasley, Buildwas, Shrewsbury and other areas. We ask that steps are taken to lessen the impact.
A0991B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I strongly believe that CRESSAGE SHOULD REMAIN OPEN COUNTRYSIDE. The facilities/amenities/services are not able to cope with the scale of housing proposals linked to the Community Hub status proposals. Cressage should not qualify as a Community Hub. Settlement scoring functions have previously been misinterpreted/incorrectly applied to the very limited facilities in the village. The village DOES NOT have a library, a pharmacy, a functioning place of worship or a post office. The shop facilities are very limited and the bus service is skeletal. The school and doctors surgery services are also stretched and would struggle greatly to accommodate a larger population. The Cressage Community Hub proposals stated with S13.2 state that employment development will be delivered, however the proposals go on to seek a change of use of the most commercially viable site in the village, that being the Eagles site – the only commercial site that is central to the village and with access directly off the A458. I strongly believe that if the Council wish to define new Community Hubs, improvements must first be made to existing local community services and amenities to ensure that they could meet future demand. Until these improvements have been made, the village SHOULD REMAIN OPEN COUNTRYSIDE.
A0998B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	From a civil engineering perspective I strongly disagree with the proposal to build 120 dwellings on this site. The phrase "flood mitigation measures" is glibly used in the Local Plan. The geology of this side of Much Wenlock is poorly understood at the moment. It was witnessed at the time of the February 2020 flood that a lake was formed in the field above Hunters Gate by a series of springs. When the next period of extreme rainfall occurs the short lived springs will again source water into gardens and even the houses themselves. How will a drainage system be designed when the precise mechanism of flooding may only be guessed at? No mention has been made of the provision of water to the dwellings. What will happen with any extra demand when there is already a struggle at peak times? A developer's sewer system will eventually have to be connected into the old single pipe that which runs the length of Barrow Street and Wilmore Street. And it is this link in the chain that will cause a massive headache to the local community.
A1028B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council. I want to have affordable life in the future
A1029B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. It should be countryside
A1070B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage does not have the infrastructure to support Hub status
A1099B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A1100B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A1136B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as countryside. There are errors in the scoring. The existing services (school, doctors) will struggle to cope with an increase number of housing. Existing speeding problems in the village.
A1137B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as countryside. There are errors in the scoring. The existing services (school, doctors) will struggle to cope with an increase number of housing. Existing speeding problems in the village. Residents have been ignored
A1148B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	In terms of Paragraph S13.2 Cressage is included within Schedule SP2.2: Community Hubs. This is a revised allocation for Cressage and is established by the associated evidence base for the review of the Local Plan, specifically the assessments and conclusions set out in the Shropshire Council Hierarchy of Settlements (August 2020). The Shropshire Council Hierarchy of Settlements (August 2020) sets out the key criteria within Table 4: Scoring of Services and Facilities (Page 12) and Table 5 Settlement Function Scoring (Page 14). These criteria set out the objective scoring for settlements within the Local Plan settlement affording the appropriate weighting appropriate to the associated category. In terms of Cressage the assessment calculations accord with those set out in Table 4 and Table 5 of the Shropshire Council Hierarchy of Settlements (August 2020). The scoring of Cressage is therefore objective and the total of the scoring confirms Cressage as a Community Hub Settlement. The principle of allocating Cressage as a Community Hub is strongly supported and this support follows the assessment of the settlement in the associated evidence (above), the related policy stating the proposed site allocations (Land adjoining The Vicarage on A458, Cressage (CES005) and The Eagles public house on A458, Cressage (CES006)), and the related policies of the Local Plan. The proposed site allocations provide a proportionate and logistically appropriate provision of housing sites. The sites are accessible and locationally appropriate for Cressage. Recognising the size and demographics of Cressage, and the variable nature of providing employment land it is supported to take the approach that new employment development will be delivered through appropriate small-scale windfall sites within the settlement boundary.
A1148B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	The principle of allocating the former Eagles Inn for residential development is strongly supported. This support follows the sustainability assessment of the settlement in the evidence provided by the Local Planning Authority in terms of the emerging Local Plan. The former Eagles Inn provides a centrally located site that is proportionate and appropriate in providing a housing site. The site is accessible and locationally appropriate for future housing in Cressage. Observations on the Development Guidelines and Provision for the site generate the following comments. The Development Guidelines for the site indicate 2 dwellings delivered by the conversion of the former public house, and 3 dwellings on the car park. The Development Guidelines therefore indicate 5 dwellings in total including the conversion of the former Eagles Inn. The Provision column states 4 dwellings and requires updating. In design terms this site has been discussed with the Council's Conservation Team and the design options included a continued frontage of appropriate design to complement and subordinate to the former Eagles Inn. This reflects the design and character of the recent residential development 100m (approx) south of the site. This form of design and density would provide for additional residential development on the site, development that is demonstrably required as enabling development. Enabling development is required as the former Eagles Inn is a Grade II Listed Building and the associated costs related to the surveys/assessments of the building relative to its heritage listing and the associated requirements for a sensitive conversion acceptable to the Local Planning Authority. In planning terms the revised status of Cressage to a Community Hub would provide material considerations for the assessment and determination of an application at the site for residential development. This would supersede the historical applications that were based upon and determined under the former policies of the Local Plan. Based upon planning densities for residential development, the needs to balance viability due to the need for enabling development related to the designated Listed Building a limited increase to 6 dwellings will assist on all these matters. The design of the scheme according with current discussions with the Council provides capacity to the east of the site, the site therefore remains able to accommodate this level of development whilst maintaining the local character and safeguarding the setting of the Listed Building.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1186B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	We are writing to endorse 100% the views of the Much Wenlock Neighbourhood Plan Refresh group. They have consulted, collated and represented the views of the majority of the local community in response to the Shropshire Local Plan Review and its proposals for Much Wenlock. They fully represent our concerns. We are residents of Much Wenlock and we cannot support the large scale development proposed at Hunters Gate for the following reasons: it is a site of high flood risk and we should not be reliant on developers to solve flood alleviation problems. Increased pollution of air and noise in the surrounding streets because of traffic (already on some occasions unbearable) as a result, would be completely unacceptable. Additional pressures on schools and medical facilities locally as a result of a large scale development would be untenable. The enjoyment of a public footpath running adjacent to the proposed site would be ruined. We understand fully the need for affordable housing but this could be achieved through the construction of a smaller number of houses in pockets around the town, which we believe would have a far less devastating impact on the community
A1187B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	1. Hunters Gate suffered from significant flooding in February 2020. It is undesirable to expect a developer to manage efficiently and comprehensively the complex flooding issues that need to be addressed at this site 2. increased pollution of air and noise in the surrounding streets as a result of building 120 new homes on this site will be completely unacceptable. Noise and air pollution from traffic passing through the narrow streets of Much Wenlock is already at peak times unbearable. 3. there is neither additional schooling nor medical infrastructure to support a large scale development at this site. 4. the enjoyment of public footpaths running adjacent to the proposed site will be severely impacted
A1267B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I think making Cressage a hub is wrong. The school is already near its maximum and have 30 plus children in each class and the library has been turned into an additional class room. Cressage has no bakery anymore and the Post Office has gone. Cressage needs to stay as open countryside
A1268B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage residents have voted before not to be a community hub. The scoring for the hub is wrong as we have no post office, the church is shut all but for a few days and we do not have a library, or a pharmacy (just dispensary which is quite different. Our Doctors surgery is at capacity and the school had to take on extra teachers this year but don't have the extra class rooms. Cressage needs to stay as open countryside we don't have the infrastructure
A1270B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A1272B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Object to both the soundness of the draft Local Plan and the fundamentally flawed approach taken to the long term development of Much Wenlock. In particular object to site MUW012VAR, which despite local objection has been increased in size from 80 to 120 dwellings and also object to the increase in the proposed housing guideline for Much Wenlock from 150 dwellings to 200 dwellings. There is significant local opposition to MUW012VAR. The Shropshire Local Plan Review fails to satisfy and comply with national policies, fails to consider alternative and better planning solutions, it is based on flawed assessments, has failed to consult lawfully and meaningfully and ignores relevant evidence including that from the community. There has been no opportunity to purposefully engage the local community on their views, other than that organised by a local community group. As such the draft Local Plan fails in its legal and moral obligations to consult and engage with the community (this is contrary to the Councils Statement of Community Involvement). It also fails to recognise the importance of the agreed and effective policy approach in the Much Wenlock Neighbourhood Plan (MWNP) which proposed a scale and rate of development compatible with the historic market town (this is contrary to national policy and guidance and means the draft Local Plan cannot be positively prepared). There has been no consideration of alternative approaches, including substantial evidence which supports alternatives as the better planning solution to the single large site. The site assessment process is flawed and fails to adequately consider other brownfield and greenfield options - CPO could be used to purchase brownfield sites for redevelopment. Do not advocate any specific alternative site but consider the MWNP should be applied. There has been a failure to consider relevant evidence and significant community feedback. The risk of surface water flooding to property and human life has not been given due consideration through a catchment wide strategic assessment. The approach taken is also contrary to the current National Flood Risk Management strategy. There is insufficient infrastructure to support development proposals. MUW012VAR draft guidelines focus on flood risk but ignore other infrastructure constraints such as health facilities, public transport etc. A roundabout access is proposed to MUW012VAR, however this is not referenced within the Place Plan and do not consider this is necessary and would be detrimental. Many other sites benefit from better access to infrastructure, particularly public transport and pedestrian routes than MUW012VAR. As such the site fails to comply with the NPPF. MUW012VAR is not a strategic proposal, Draft Policy S13.1 states it will contribute towards growth, truly strategic sites are those such as Ironbridge Power Station. Therefore a departure from the approach in the MWNP is unjustified. There has been no proper consideration of other development (Former Ironbridge Power Station) in the same Place Plan Area. There is no explanation of how proposals will meet local needs or why the level of development proposed is required. There is no clear and deliverable programme of investment in infrastructure - particularly transport. Also concerned that unexpected costs such as managing flood risk could result in a reduced level of affordable housing delivery. Need is significant in Much Wenlock. Lack of assurances/commitment that necessary employment to balance housing growth will be delivered. Proposals do not respond to the climate emergency (local/national). The site will represent over-development (assuming past levels of windfall and delivery of MUW012VAR, the guideline for the town would be exceeded by 2026). Further, given the 5 year local plan review cycle, we can expect further site allocations before 2038, which could mean 600-700 additional dwellings by 2038, even excluding windfall. The guideline therefore enables MUW012VAR and small windfall. Inadequate consideration of strategic implications of cumulative proposals - Much Wenlock, Former Ironbridge Power Station, and sites as Tasley Bridgnorth, particularly in relation to the Gaskell corner pinch point. Shropshire Council has engaged more with landowners than the community. Explanation of the increase of MUW12VAR site size by 50% is unclear and seems to be based on a landowner request. There is no explanation given in the Draft Local Plan, the only logic seems to be that the development will solve the existing flood risk to properties at Hunters Gate. Object to this as the Council has not explained why it cannot fulfil its legal responsibilities to address flood risk without requiring major development; the site is in the area of the town at the highest risk of flooding; there has been no consideration of alternative, non-development led approaches (as previously undertaken in the town); the Council has not sought funding from the hugely enhanced budgets allocated to the Environment Agency for flood risk management, especially, for the River Severn catchment; a catchment wide study as was previously scheduled and funded (c20K) by the EA in the previous 6-year round of funding has not been undertaken and it ignores the fact that many more properties were affected by flooding elsewhere in the town in winter of 2020. Consider the following changes should be made to the Draft Local Plan: -The housing guideline for Much Wenlock to 2038 should be reduced from 200 to 165. -MUW012VAR should be deleted. The exact scale, location and type of sites to achieve the overall housing development should be addressed through a review of the MWNP. -Employment land should be actively brought forward. A delivery plan should be prepared. -A strategic flood risk assessment must be undertaken as a priority and used to underpin all future development policy and decisions. The draft Local Plan should commit to this. -Proper and lawful community engagement should be undertaken to inform the Local Plan Review. -A deliverable programme of infrastructure to meet the towns needs should be prepared. Clear links should be made to development proposals so the benefits are recognisable. Funding arrangements for any infrastructure development should be set out in advance to ensure public confidence and support.
A1288B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	At the moment the site is an eyesore and danger so the plan represents a considerable improvement to benefit the village. The safety of the road junction will be improved and the plan includes provision of a public footpath through what is now the car park. I am please that the historic part of the building will remain. A maximum of 5 houses seems reasonable but I put in a plea for affordable, not executive dwellings
A1288B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I am firmly against 80 dwellings on the vicarage field as being totally unsuitable for the village. Access to A458 would be dangerous and lead to congestion. There is a real danger too that Wood Lane with its wildlife and being a "green lung" for village residents would be spoilt. Although we have been designated as a hub, we do not have the infrastructure to support such a scale of development. We have an over subscribed doctors surgery, a primary school which has grown in recent years and is nearing full capacity, a redundant church and a very small shop - no post office, pub or chemist. The sewerage system is also at capacity. I could envisage 15-20 dwellings of modest size on that field but only if safety measures were installed on the A458 to slow traffic down
A1288B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I would be in favour of a smaller development here (upto 40 houses) provided that full slowing down measures were incorporated all along the A458 stretch through the village and the school and sewerage treatment works were shown to be adequate
A1288B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	Support the development of the site as it will improve a focal point for the village. Maintaining the inclusion of a footpath across the site is important as is improvements to the junction onto the A458.
A1302B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should not be classified as a hub. This decision needs urgent review.
A1303B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A1304B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A1305B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A1306B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1391B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Local Plan doesn't take sufficient consideration of differences experienced by residents in this area. Don't sacrifice beauty of Shropshire, preserve it. Traffic in Much Wenlock is heavy on A458 by the Gaskell Corner, to build more houses will add to these problems. Additional development and traffic may mean visitors no longer come to Much Wenlock and the town relies on tourism. Flooding has been an issue in the town and areas proposed for development. The doctors surgery is already overcrowded and has poor car parking and the primary school has a demountable classroom and the play group is over crowded. These proposals ignore the Neighbourhood Plan. More consideration of the residents of Much Wenlock is needed
A1480B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I want to remain open countryside, we don't think the infrastructure or service to accommodate the number of houses
A1481B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council. Furthermore the Eagles site is clearly a commercial site its been for centuries and whereas the car park could be developed somewhat the pub should remain commercially viable and not entirely developed for housing.
A1482B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council. Furthermore the Eagles site is clearly a commercial site its been for centuries and whereas the car park could be developed somewhat the pub should remain commercially viable and not entirely developed for housing. The eagles is very important to keep as commwical reason being - the main focus of cressage entrance and historic 400 year importance post COVID 19 more local facilities are needed.
A1483B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A1484B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A1485B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	As a long standing resident of Cressage I believe that the village does not have the seage capacity for mmore houses nor can the sewage capacity be increased. Roads , medical and schools facilires are also at a maximum capacity
A1486B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council. There is not enough sewage capacity to sustain more houses
A1487B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A1633B2	regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	don't know / no opinion	There is no mention that I can see of the effect on the sewer works that I believe may be at capacity. Is there any plan to increase capacity in the event of severe weather to avoid downstream pollution and if so, who is to pay, the developer or the user through higher charges?
A1642B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The site assessment process was flawed as Appendix N is inaccurate in several places. In its entirety MUW008 is too large to come within the remit of the Neighbourhood Plan guidelines - I am not aware that there is any reason why the whole site has to be developed. The Neighbourhood Plan has been ignored and the LPR incorrectly claims that the LPR takes precedent. Much Wenlock should update its Neighbourhood Plan and that should be used to inform how development proceeds.
A1813B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	There is flood risk to the existing properties. When there is very heavy rain in Much Wenlock, the water treatment plant used to be unable to cope and to put it crudely the solids escaped the net bag and went straight into Farley Brook causing pollution Severn Trent have great difficulty in keeping the water pressure up during summer months - some people in Wenlock had no water at times let alone reduced pressure. The topping up went on for days at a time with sometimes up to 8 huge water tankers. How on earth will they cope with 200 extra houses in Much Wenlock? Wenlock needs housing for low income families to rent and smaller homes for elderly people to downsize into – those houses on Hunters Gate will no doubt all be built to make the maximum profits for the developers
A1833B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The site is on a moderately steep hill, and has dangerous access. Pedestrian crossings would be needed to access the village's facilities. The road is narrow at Wood Lane. Development to the East is preferred (Form 1). The scoring for Cressage is wrong - there is no Post Office, the Church and the library are not always available (Form 3).
A1833B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	Agree with site. There is a need for local infrastructure.
A1836B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I am in favour of Cressage remaining as 'open countryside'. I understand that this village is at risk of being classed as a 'hub', which I struggle to understand based on overwhelming opposition from local residents. I know that 300+ residents opposed hub status back in 2019, and the opinion remains that Cressage should remain ope countryside. To reiterate my points from the 'Shropshire Local Plan Review - Preferred Scale and Distribution of Development', submitted in Jan 2019, I oppose further housing being developed in the village for the following reasons:1) Lack of facilities – we only have an oversubscribed primary school, a stretches GP Practice, and a tiny village shop2) The village is missing basic amenities including: pub/cafe; church; post office; library. 3) The traffic is already a major problem on Harley Rd, due to the existing volume and speed of traffic.4) The area has environmental importance and the impact on local flora and fauna, including the protected Slow-worm and bats, would be unacceptable5) Concerns over sewerage and drainage6) Lack of existing green space to walk I would also point attention towards a recent survey that the parish council instigated. I don't have all the results to hand, but did note the following which was shared at the parish council meeting on the 16th Sept by Rebecca Turner (Clerk):- 72% of respondents were against development on the glebe field - 69% of the respondents were against the resent suggestion from Raby estate - 76% of the respondents were in favour of developing the Eagles sitePlease factor responses like these into future planning. Cressage does not have the infrastructure to support expansion
A1843B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I wish to endorse the points made in the deposition from the Much Wenlock Neighbourhood Plan Refresh Group. This group of volunteers has put an enormous amount of work into collecting and collating views from the community. The refusal of Much Wenlock's Town Council to engage with it is both inexplicable and extremely sad. All who have participated, in any way, in the planning deliberations so far will be aware of the strength of feeling and, unfortunately, bad feelings which have been engendered. I hope the Council will be able to rectify this. More than lip service needs to be paid to honesty, transparency, efficiency and inclusiveness. Meetings must be advertised well in advance. All parties should be able to put their points and answer challenges. Much Wenlock responded to the call to produce a Neighbourhood Plan in 2014. If the Government now requires more from Shropshire Council, surely the way forward is to again work with the community.
A1843B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The policies and proposals within this Neighbourhood Plan which conform with the Local Plan continue to apply". This is misleading: what about the policies and proposals in the Local Plan which do not conform to the Neighbourhood Plan? In 2014, huge effort was put into preparing the Neighbourhood Plan (including 26 public engagemer over 18 months). The Government frequently repeats its support for Neighbourhood Plans. According to the Planning Policy Advisor in the Ministry of Housing, Communities and Local Government "Once a Neighbourhood Plan has been approved at referendum, it forms part of then statutory development plans and becomes the starting point in making plannind decisions". The Neighbourhood Plan calls for small-scale development to be matched by necessary improvement to infrastructure. The Local Plan ignores this and proposes a large number of houses (200) with insufficient detail on supporting infrastrucur
A1843B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Flooding This is a huge subject which is not addressed in sufficient detail in this Local Plan. The views of various experts need to be brought together. The public need assurance that all proposals to prevent flooding have been tested and a conclusion reached. This will not happen if proposals are made and accepted by only one party,
A1867B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as Open Countryside. The service in the HoS are not available at all times and so should not score as highly.
A1867B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The site is by speeding traffic. Site should be of low density housing
A1867B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Should remain as Commercial use. It is the only commercial site in the immediate area.
A1874B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as Open Countryside. The service in the HoS are not available at all times and so should not score as highly.
A1874B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The site is by speeding traffic. Site should be of low density housing

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1874B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Should remain as Commercial use. It is the only commercial site in the immediate area.
A1895B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>The statement does not recognise the potential impacts on flood risk or the policies and objectives in the Neighbourhood Plan.</p> <p>1. The proposal does not take into account the nature of flooding, most recently exhibited in 2020. The flooding follows a spring line above the proposed attenuation pond and the water flows mid way down the incline onto the existing Hunters Gate estate. Therefore the proposed solution will not address the existing issue and the additional building will exacerbate the problem.</p> <p>2. The Neighbourhood plan achieves the local planning policy objectives through incremental small scale development across the town that allows for local services to absorb the increase in population and need for local services. My specific objections are:</p> <ul style="list-style-type: none"> - a) This development is far in excess of the numbers previously proposed exacerbating the flooding risk to the existing Hunters Gate development and downstream in the Town. The flooding risk was highlighted by the Towns people before the current development. It would be criminal negligence to make the same mistake twice. The numbers of houses is far in excess of either local need or in within the context of historic growth Much Wenlock. This level of growth would seriously damage the character of a historic market town that has grown gradually over the last millenia. Market rate housing will be affordable for existing residents and will accelerate the exodus of the younger residents, instead the demographic will be skewed even more to wealthy older residents. This is evidenced by the experience of the existing Hunters Gate development which has very few young families as the houses are just not affordable to families on average wages. - b) The town medical and educational facilities will not be able to manage the additional influx of new residents - c) The Town would not be able to absorb the additional traffic from the large number of residents. There are a number of areas that are consistantly congested, therefore irrespective of the access the situation will be made worse. In particular congestion in Barrow Street as well as at the Gaskell Arms. This will be made worse with the proposed major developments in Ironbridge and Bridgnorth. - d) The development is predominantly market value housing and not affordable housing. There is no evidence of local need for this type of housing. It is therefore not adhering to the Neighbourhood Plan voted for by the population. - e) The proposal goes against its own infrastructure statement in para 2.25. There are known infrastructure constraints that make this proposal impractical i.e. a) drainage and sewerage pipes leading from the Hunters Gate into the centre of town reduced in bore size increasing the likelihood of backed up water and localised flooding, this also increases the likelihood of water contamination with human waste, b) the Hunters Gate and Foresters Avenue estates regularly have low pressure for Severn Trent fresh water supply, it would be folly to add another development with this known issue (it would also contravene DP20 point 4 "Proposals are required to demonstrate that they will be served by adequate water infrastructure in terms of water supply"), and c) the traffic issues on Barrow Street cannot take any additional volumes. In summary: The proposal is wholly at odds with the Neighbourhood Plan, contradicting the statement in para 2.26. Similarly this proposal contradicts para 2.18 which states it "seeks to provide a sustainable pattern of growth". In the case of Much Wenlock, this is not true as it goes against the incremental growth approach from the Neighbourhood Plan. On my behalf MP Philip Dunne sought clarification from the Secretary of State for Housing the Rt Hon Robert Jenrick MP on whether there had been a change in policy in relation to Neighbourhood plans. He confirmed that "Once a neighbourhood plan has been approved at referendum, it forms part of the statutory development plan and becomes the starting point in making planning decisions". There are too many examples of where the Shropshire Unitary Council has deviated from the Much Wenlock Neighbourhood Plan to believe that it has been the starting point in making planning decisions, instead it has actively gone AGAINST the key points within the Neighbourhood Plan and the wishes of the Towns people. The consequence of this will be increased flooding risk for the Town and its environs, increased traffic congestion and a crisis in local services such as health and education.
A1895B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>I do not agree with the following statements:</p> <p>1. "It is considered a maximum of 120 dwellings is acceptable in order to secure sufficient local housing supply and opportunity in the long term, but at the same time directly responding to and addressing the issue of flooding in and around the site, and with adjoining residential areas" Responses:</p> <ul style="list-style-type: none"> a) 120 dwellings is not acceptable, it is too many to be approved in one go and will exceed what the Town can absorb. The proposal goes against the Neighbourhood plan i.e. what the Town confirmed was required in the referendum to adopt the plan. In addition the need for Much Wenlock and wider Shropshire has been shown to be contracting not increasing ref Shropshire Council Local Housing Need Assessment dated August 2020 section 4 Previous Calculations. This shows the LHN has reduced from 27,947 in the 2016 calculation to 25,894 in 2020 with the average value now 27,137. b) It will all be approved in one go, there is no evidence of local need for this number or type of housing, the Neighbourhood Plan clearly states that the need is for affordable housing and c) there is little evidence that the proposed attenuation scheme will address the flooding, given the flow of flood water both onto Hunters Gate as well as down stream into the Town, Downs Mill and onto Farley. This development would in particular exacerbate flooding risk at Downs Mill and Farley. <p>2. "It is considered the allocation offers the opportunity for a well-designed scheme, integrating green infrastructure". Integrating green infrastructure means nothing – the development will take away high grade agricultural land. The development extends beyond the boundary previously proposed and given its distance from the centre of the Town will create additional traffic in an already congested Town. It is highly likely that the increased level of Traffic would give rise to additional costs and development to address traffic congestion. In summary: there is no justification for an increased allocation for Much Wenlock or the wider county, in addition no evidence has been provided in the consultation that the proposed major development site next to Hunters Gate will successfully address the flooding issues experienced in 2020 or previous years. Therefore I strongly object to the proposed plan.</p>
A1895B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>I do not agree that the plan is achievable. Flooding was identified as a risk prior to the current Hunters Gate development. The development went ahead and increased flooding occurred. The Neighbourhood Plan specifically looked at this issue and priorities small incremental development and recommended that separate flood alleviation action be taken. This should be prioritised ahead of any new development. The proposal does not explicitly state how the flooding issues will be resolved simply through the creation of an attenuation pond. The flooding issues of the environs around Hunters Gate have not been fully assessed, there are multiple causes of flooding in this area and down stream. The consultation does not provide ANY evidence to show that this development would substantially reduce the risk. The failure of the existing Hunters Gate development to manage the surface flooding and in fact making it worse for the rest of the town it would be negligent of the Council to propose / approve such a scheme. Extending the boundary and without a full and public flood risk assessment that takes into account the new spring line risk identified in the February 2020 flooding would be at best irresponsible if not negligent. Shropshire Council would need to consider indemnity insurance for the likely legal claims for damages from existing and new residents for damage caused by the future flooding that would occur.</p>
Page 211 A1895B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>I do not agree with the following: "The council began preparing the Local Plan review in 2017. At the core of this process is continuous and meaningful community engagement, in line with the Council's Statement of Community Involvement (SCI). In the consultation with Much Wenlock residents in 2019, the council was informed in the local meeting that the proposed development adjacent would:</p> <ul style="list-style-type: none"> a) Not address the flooding on Hunters Gate b) Would exacerbate flooding further down stream c) Did not address the local need for affordable housing. The agents appointed by the landowners confired after this public consultation to the council that the development was not commercially viable. At a town meeting called by the Agents in February 2020 (not by the Shropshire or Much Wenlock Town Councils), the Agents confirmed that Shropshire Council had approached them directly to see how the development could be made viable. It was only at this meeting that the population of Much Wenlock was made aware of the potential increase in the dwelling allocation (in excess of the Neighbourhood Plan) and that the dwellings would not be affordable housing. The proposal presented by the Agents did not demonstrate that the proposed development would successfully address the flooding issues, nor did it demonstrate how the previous failings of the original Hunters Gate development would be prevented and therefore INCREASING the risk of flooding. I object to the above statement on the basis that: <ul style="list-style-type: none"> a) Delegation of consultation activities to an organisation with a vested interest in the development is at best irregular and a conflict of interest. b) The Agents held a meeting with the town in February 2020, however only feedback from the Agents was to be sent to Shropshire Council and no means provided for residents to do so. c) The meeting included statements that were incorrect i.e. the availability of funding to take excess water from the estates into adjoining fields. This was subsequently found to be incorrect and the funds could not be used for this purpose. This would have left many residents in attendance with an incorrect view of the flood risk mitigation open to the town. d) When a request for comments was made by the council for a cabinet meeting on 6th July 2020 I provided my feedback as well as complaining about the above. My objections were incorrectly rejected. My request to appeal were ignored. In summary there has not been "meaningful community engagement", instead a less than transparent discussion between council and agents of the landowner has taken place, and attempts to challenge the legitimacy of the output from these discussions have been obstructed. If you require evidence of the above, then this can be found from the Council e-mail servers under the subject: "RE: QUESTIONS FOR CABINET MEETING ON 6 JULY 2020 - PROPOSED DEVELOPMENT OF 120 HOMES AT MU012, MUCH WENLOCK - Item 7". The e-mails and recipients are as follows: <ul style="list-style-type: none"> - e-mail 14th July to Councillor Macey - Portfolio Holder for Housing and Strategic Planning - e-mail 8th July to Tim Ward - e-mail 4th July to Julie Ward - e-mail 24th June to Tim Ward - e-mail 25th March to PlanningPolicy@Shropshire.gov.uk
A1897B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>Where is the justification for designating Cressage as a Community Hub?</p> <p>I have been told that up to 2017, when Cressage, a Countryside Settlement in 2015, was scored to see if it qualified as a Community Hub it fell short, but in 2017 it was decided that Cressage qualified although nothing material had changed at that time. Since then the C of E church has closed, the shop is hanging on by a thread (although it did benefit from lockdown) and the pub closed about 2014.</p> <p>There is strong and increasing feeling in the village that this designation was taken without consulting the residents and that the previous status of Cressage as "Countryside" should be reinstated. There can then be a full and open debate about how and Cressage might qualify as a Community Hub and whether it would be beneficial to the residents to do so.</p>
A1897B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	<p>This site is not at all suited to housing development other than perhaps 2 or 3 houses adjacent to the A458.</p> <ul style="list-style-type: none"> 1. The A458 is on a steep hill at the site of the access to the site. There are existing houses very close to the road on the opposite side from the proposed site which lies above the road. Despite the speed limit much of the traffic along the A458 ignores this limit and there does not appear to be any enforcement at the east end of the village – and very little at the west end. 2. Footpath provision is minimal in this area and there does not appear to be space to construct a roundabout. The only way to ensure safe access to the site would be by traffic lights. In addition a speed camera would help to slow traffic down to increase road safety. 3. It is hard to see how surface water can be directed anywhere but across Wood Lane into the Plocks Brook. This stream already runs at full capacity in winter. During winter 2019/20 the stream overtopped its banks three times causing much damage to trees and gardens on either side. The surface water from a scheme of this proposed size would constitute a huge addition to the volume of this small stream. 4. Given the evident difficulties with access to this site it might make more sense long term to look at a site to the east of Severn Way. There is space to make an entrance road south of Severn Way and foul drainage and surface water could be discharged direct to the sewage works and River Severn respectively.

A1921B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area		Introduction. Just six years ago, in July 2014, the Much Wenlock Neighbourhood Plan (MWNP) was agreed following a public vote: it was endorsed by both the Town Council and Shropshire County Council. Created with regard to the National Planning Policy Framework it is designed to set the tone for the development of the town until 2026, incorporating the vision of the local community. In doing so the Plan takes account of the scale and size of the Parish, the natural and historic environment, employment, the rural and urban landscape of the area and the critical issues of flooding, traffic and affordable housing. The Plan takes a pragmatic approach to all these issues, recognising the pressures of the twenty-first century. In the Introduction of the draft LP it states at paragraph 2.26: "The Council has always taken a positive and proactive approach to Neighbourhood Plans and has always sought to work constructively with local areas to advance their aspirations." The MWNP was drawn up to cover the period 2014-2026, in line with the SAMDev Plan. However, Shropshire Council now intends to ride roughshod over the agreed MWNP, seemingly using the different time periods to justify this as indicated in paragraph 2.27. Moreover, under SP2 (Strategic Approach) it states at paragraph 7: "The production of formal Neighbourhood Plans will be supported and can identify development opportunities which will complement proposals in this Local Plan. In doing so, the Plan will be acceptable provided they accord with the Shropshire Local Plan and the views of local residents do not matter. This view is reinforced by the comment in 813 (Much Wenlock Place Plan Area) where it states at 813.12: "The Much Wenlock Neighbourhood Plan for Much Wenlock covering the period from 2013-26 was adopted in 2014. The policies and proposals within this Neighbourhood Plan which conform with the Local Plan continue to apply." Stakeholders have been given some opportunity to comment on the LP, but the tortuous methodology demanded by the Council suggests that few people will have the time or inclination to do so. Perhaps this is exactly what the Council wants. General - In paragraph 3.5 (Strategic Policies) the Government's Standard Methodology for assessing local housing need indicates that Shropshire requires 25,894 new houses by 2038, yet in paragraph 3.6 the Council has set a target of 30,800. This is 19% higher than the Government's target, but without any clear justification. As its contribution to this target the MWNP envisages a housing target of 130 dwellings during the Plan period (2013-26). Shropshire Council has now decided to impose a figure of 200 houses in Much Wenlock by 2038, 120 of which will be on a 0.30% increase in housing need. This is in sharp contrast to the MWNP which envisaged the increase being achieved via small windfall residential sites. Furthermore, the Council's figure of 200 is likely to be revised upwards over time, yet the repercussions of such an increase in housing need to have been ignored by the County Council. Furthermore, the Town Council appears paralysed and has merely noted the 0.30% increase in housing need for the Hunters Gate site. Residential development & traffic There is limited scope for employment in Much Wenlock which means that the 0.30% increase in housing need for these new residents will be commuting to work. There is no rail link and public transport is limited to a skeleton bus service which means that commuters will travel by car. In addition to the proposed development at Hunters Gate the Council is considering a development of 1,000 houses at Tasley on the edge of Bridgnorth as well as the construction of 1,000 houses at Buildwas on the site of the old Ironbridge power station. Many of these new residents are likely to be employed in and around Telford which will put considerable pressure on the A458 and most particularly at the Gaskell Arms junction. This junction is already a bottleneck with the A4169 and the B4378 both meeting the A458. In addition the B4371 joins the A458 just a few hundred yards from this junction. The likelihood is that Racecourse Lane and St Mary's Lane will become 0.30% increase in housing need for traffic cutting through the town centre via Barrow Street and Sheinton Street to avoid this junction. An increase in traffic in Racecourse Lane will adversely affect the Primary School causing congestion and health & safety issues, particularly at drop off and pick up times. The increase in traffic will inevitably increase carbon emissions in the town. Moreover, the pavements in the town are very narrow and in places almost non-existent which means that the increase in traffic will make pedestrians very vulnerable. For several years there was talk of a by-pass for Much Wenlock, but this has not been raised for some time, presumably because of the very significant cost. Affordable housing 0.30% The potential development at Hunters Gate is being driven by the landowner (Wenlock Estates) and the developer (Persimmon) with one aim in mind: PROFIT. There is no concern for the local community and its requirements and affordable housing is very unlikely to be a consideration, despite it being a key element in the Much Wenlock Neighbourhood Plan. The pitiful consultation exercise conducted by Berrys in February 2020 on behalf of Wenlock Estates demonstrates a complete lack of concern for the local community. Health & Education The Much Wenlock Medical Practice does not have the capacity to cater for the influx of significant numbers of new patients. Furthermore, the Primary School and William Brooks School are both at capacity and in any case an increase in the number of coaches bringing pupils into the town will only cause further congestion. Water & Waste Severn Trent Water was obliged to supply a number of houses in Much Wenlock by tanker during the very dry weather earlier this year: this demonstrates that there is already inadequate utility provision. The Severn Trent waste treatment plant on Downsmill Lane is already at capacity and will not be able to cope with the additional waste water: this could result in major pollution. Flooding - Much Wenlock has a long history of flooding. Following severe flooding in 2007 when 64 properties were flooded, including several houses in Hunters Gate, the Much Wenlock Flood Alleviation Scheme was initiated. This resulted in the construction of two attenuation ponds, one on the Sytche Brook and the second on the Shylte Brook. However, neither of these will benefit Hunters Gate as was very apparent during the flooding in February 2020 when a number of houses in the town centre were flooded. The 1401eildndsthe Park to the east of the Brsley road (B4376) were completely saturated with two feet of standing water in many places. Further house building and hard standing on the greenfield site next to Hunters Gate will only exacerbate this problem. Summary Unfortunately this is another example of centralised government failing to understand local issues and, worst of all, failing to undertake proper consultation in order to inform their decisions. The starting point for any new development should be the Much Wenlock Neighbourhood Plan. The housing targets set out in the Plan are easily being achieved through small scale, local developments. The imposition of a large scale development on a flood plain when there are many other options flies in the face of this Plan. It is naive to imagine that the Community Infrastructure Levy which would be paid by allowing the Hunters Gate development would be adequate to address the various infrastructure and other issues. It is important to recognise that the Much Wenlock housing targets were set before there were very sizeable projects at Tasley 0.30% on the Ironbridge power station sites were raised. If Shropshire Local Plan is to be acceptable then it must be informed by the Much Wenlock Neighbourhood Plan and be part of a democratic process involving the local community. The Town Council's inactivity is disappointing. As elected bodies the Town Council and Shropshire Council must ensure that sufficient time is allowed for proper consultation to take place and they must listen constructively to the outcome of that consultation as happened in 2014 when the original Much Wenlock Neighbourhood Plan was devised.
A1922B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area		Introduction. Just six years ago, in July 2014, the Much Wenlock Neighbourhood Plan (MWNP) was agreed following a public vote: it was endorsed by both the Town Council and Shropshire County Council. Created with regard to the National Planning Policy Framework it is designed to set the tone for the development of the town until 2026, incorporating the vision of the local community. In doing so the Plan takes account of the scale and size of the Parish, the natural and historic environment, employment, the rural and urban landscape of the area and the critical issues of flooding, traffic and affordable housing. The Plan takes a pragmatic approach to all these issues, recognising the pressures of the twenty-first century. In the Introduction of the draft LP it states at paragraph 2.26: "The Council has always taken a positive and proactive approach to Neighbourhood Plans and has always sought to work constructively with local areas to advance their aspirations." The MWNP was drawn up to cover the period 2014-2026, in line with the SAMDev Plan. If Shropshire Local Plan is to be acceptable then it must be informed by the Much Wenlock Neighbourhood Plan and be part of a democratic process involving the local community. The Town Council's inactivity is disappointing. As elected bodies the Town Council and Shropshire Council must ensure that sufficient time is allowed for proper consultation to take place and they must listen constructively to the outcome of that consultation as happened in 2014 when the original Much Wenlock Neighbourhood Plan was devised.
A2107B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Disagrees with designation of Cressage as a Community hub. Cressage can't be described as a significant rural service centre, it doesn't have the infrastructure or services to supply the needs that a growth in housing would demand. Cressage has limited services and some services listed in the criteria are no longer open in Cressage. 300 people indicated they wanted the village to remain as open countryside in 2018/19.
A2110B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Increased risk of air pollution. This site is right next to the primary school and traffic arising from this proposed development will directly impact on the air quality in the school vicinity. Road transport is a major source of air pollution that harms human health and the environment. It is well documented that primary school children are particularly susceptible to poor air quality as their airways are smaller and still developing. They breathe more rapidly than adults. Buggies and prams put them at the level of car exhausts. The proposal also states that a new roundabout access will be provided from the A458 into the site. Roundabouts cause tailbacks unless the traffic on each approach road is equal. These tailbacks of idling vehicles will be very close to the playground of the primary school. Increased risk of flooding. As an agronomist I have advised on this land and the surrounding fields and am aware of their potential to become waterlogged during spells of wet weather. This is an overdevelopment in an area prone to flooding. The met-office warn us that the flash floods we have experienced in the town due to intense rain events will increase in both frequency and intensity in the coming years. Lack of infrastructure to support a development of this size. The town does not have sufficient resources in the way of doctors surgery, shops, amenities, and sewage systems to cope with the increase in number of people and vehicles that would result from this development.
A2117B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I strongly object to the proposals and believe Cressage should remain as OPEN COUNTRYSIDE. I believe numerous errors were made when scoring Cressage as a community hub as the facilities listed do not exist, are inadequate for current number of residents or are over-subscribed. The last time community hub status was proposed over 300 residents responded saying they did not want to become a hub. The existing infrastructure within the village cannot support hub status, or any further housing development. The roads are already clogged with cars making it difficult for buses and farm vehicles to pass. The main road (A458) through the village has seen a massive increase in traffic with the volume being massively disruptive and dangerous, particularly due to the speed of vehicles using the road and not adhering to the speed limits. The (small) village school is over-subscribed as is the Dr's surgery. The local shop is limited. There are no other facilities in the village and in particular no provision for young people. In summary, I STRONGLY OBJECT to the proposal referenced above and believe Cressage should remain as OPEN COUNTRYSIDE.
A2120B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The Glebe field—CES005 is not an appropriate site for development. The A458 road is far too busy for more residential dwellings and traffic calming measures would not be able to address the speeding concerns. The road is not suitable for a roundabout as most vehicles do not abide by the current speed restrictions and there is no reason I think motorists will abide by the presence of the roundabout in good time to be safe. The A458 is not wide enough to allow appropriate distance between vehicles/lorries to be able to manoeuvre around a roundabout. If the side-road at site CES005 has very low flows then the mini-roundabout will not perform well and drivers will start to treat it merely as an obstruction to be negotiated. This makes the site completely unsafe for development. Also with the groundwork that would be required to develop CES005, the steep slope in the field will cause significant drainage issues and this has not been addressed in plans.
A2120B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain OPEN COUNTRYSIDE. Despite what the Shropshire Council 'points' system states, the reality is the village does not have the drainage, sewage, road/pedestrian access, GP surgery, school provision, commercial opportunities, etc to cope with the level of housing associated with Hub status. The point system developed by Shropshire Council was faulty and not an accurate depiction of the village. Cressage residents opposed the Hub status in earlier consultation and the local Parish Council ignored the views. Cressage residents would like to remain Open Countryside.
A2121B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I have serious concerns over the plans for the development of the Glebe Field—the land adjoining The Vicarage. The A458 is an extremely busy road and adding residential properties to the flow of traffic is going to adversely impact the village. The traffic flow from the south into the village comes down a hill and VERY few motorists obey the 30 mph speed restrictions. It has been proposed that traffic calming measures could be implemented. At the time of writing, no such plans have been made public. With the nature of the road and the proposed development, a roundabout has been suggested but there are real concerns about its feasibility. A mini roundabout on the A458 at the entrance of the proposed development site would not meet the guidance and the volume of traffic required for such a measure. The speed restriction isn't adhered to now—why would that change? Especially with the road descending into the village and natural acceleration of vehicles, adding traffic calming measures will lead to an increase in collisions/accidents. Also with regards to the Glebe field, there are environmental concerns about once the contraction of land occurs to build what the impact will be on drainage. The sewerage works in the village are antiquated and to accommodate the proposed number of dwellings, major development works would need to be carried out and will adversely impact the surrounding properties. The proposed number of dwellings is also a concern. With the high number of homes proposed there is a concern about density and quality of life. If village life is to be sustainable, then why cram in as many homes as possible on a field? There is a loss of privacy and light and the detrimental impact on the environment. There is a plethora of species that rely on the field as part of their habitat—bats, deer, newts, slow worms, etc. These creatures deserve to have their habitats protected. No plans have been made public as to what the development may look like. The original plan suggested several years ago was for a fraction of dwellings.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A2121B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Regarding the site of The Eagles Pub—I do think it would be a detriment to the village to see the pub demolished for more housing. Whilst sympathetic to the growing population of the country, there is also an economic need to provide employment. With The Eagles site being one of the very few commercial sites in the village, it would be worth keeping it as a commercial site. From a strategic point of view, it would be more beneficial to the village to have another local business that could be supported by residents. The village once had a vibrant bakery, Post Office, & pub. Any opportunity to resurrect these amenities will be lost if the site is converted to just residential dwellings.
A2122B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain OPEN COUNTRYSIDE. Despite what the Shropshire Council 'points' system states, the reality is the village does not have the drainage, sewage, road/pedestrian access, GP surgery, school provision, commercial opportunities, etc to cope with the level of housing associated with Hub status.The point system developed by Shropshire Council was faulty and not an accurate depiction of the village. Cressage residents opposed the Hub status in earlier consultation and the local Parish Council ignored the views. Cressage residents would like to remain Open Countryside.
A2122B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The Glebe field—CES005 is not an appropriate site for development. The A458 road is far too busy for more residential dwellings and traffic calming measures would not be able to address the speeding concerns. The road is not suitable for a roundabout as most vehicles do not abide by the current speed restrictions and there is no reason I think motorists will abide by the presence of the roundabout in good time to be safe. The A458 is not wide enough to allow appropriate distance between vehicles/lorries to be able to manouver around a roundabout. If the side-road at site CES005 has very low flows then the mini-roundabout will not perform well and drivers will start to treat it merely as an obstruction to be negotiated. This makes the site completely unsafe for development. Also with the groundwork that would be required to develop CES005, the steep slope in the field will cause significant drainage issues and this has not been addressed in plans
A2168B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The last time this community hub proposal was aired over 300 residents responded stating that they didn't want it and to remain open countryside and the scoring was flawed and numerous errors were made. This is still the case. We don't have the infrastructure to cope with additional homes or industry, our doctors surgery is full, we don't have a pharmacy only a dispensary, our school is having to hire additional teachers and has demountable classrooms as the main building is full. We MUST REMAIN OPEN COUNTRYSIDE
A2179B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	S13.1 Paragraph 2 I object to the Neighbourhood Plan for Much Wenlock being superceded by the Local Plan. The Neighbourhood Plan has been accepted and is in place. The new local plan should conform with the Neighbourhood Plan, not the other way around. Paragraph 7 I object to: a relatively large housing development of 120 houses; in an area where there are existing flooding issues and currently no provision for exceedence water and insufficient drainage systems in the nearby development of Hunters Gate. The Neighbourhood Plan focussed on small scale development, infilling, and brownfield sites so as to maintain the character and heritage of the town. It also states "minor housing development with no impact on surface water runoff".S13.1(i) Statement 1 I object to the increased number of vehicles that will discharge onto the A458. Although the A458 and A4169 have been declared a "strategic corridor" in Shropshire, there is no rail connection and the roads are narrow A roads with a considerable bottleneck at Gaskell corner. The planned developments at both Bridgnorth and Ironbridge along with the houses planned at this site will increase traffic on the roads and subsequently the narrow residential streets of Much Wenlock will become rat runs changing the quality of life in the town. Statement 2 I object to the need for the developer to " deliver community benefits offsite by way of flood alleviation" and "removal of exceedence water from existing surface water and foul sewer system" being included in the contract for the new development. The issues in the Hunters Gate area need to be addressed separately from the new development or the developer will be able to hold the Council to ransom through the number of houses he deems to be "viable" to cover the costs of the additional drainage work that is needed in addition to the requirements of the new development. Expanation 5.182 No mention has been made of the extra school provision that would be required for such a large number of new houses
A2186B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Oppose allocation of the site for a variety of reasons - better sites are available in Cressage; the A458 is a busy road and development on the site would add to traffic on the road; concerns about safety of vehicles entering A458 from new junction; need to improve pedestrian access from site to local services; mitigation measure of a new roundabout won't work; impact on wildlife from development of the field; potential for increased flooding
A2186B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Disagrees with designation of Cressage as a Community hub. Cressage can't be described as a significant rural service centre, it doesn't have the infrastructure or services to supply the needs that a growth in housing would demand. Cressage residents have voted against becoming a hub and feel that the scoring system for hierarchy of settlements is flawed
A2187B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I believe that a single housing estate of 120 units will seriously overwhelm the town, and would prefer arrange of smaller sites to be developed over the required period. At a time when the former IronbridgePower Station site will provide about 1000 houses, and with other sizeable developments in Bridgnorth andCressage, traffic and community services will come under impossible pressure.I understand that a reason for choosing a single site is to allow for a proportion of affordable houses, but Ialso believe that affordable homes should be distributed around the town, on sites specifically designed forthem. As we have seen in recent years in Much Wenlock it is perfectly possible to use exception sites toachieve this, and the resulting developments have been very successful, rather than tagged on to otherdevelopments just because it is a planners requirement.The development guidlines indicate that the development would deliver substantial community benefitsthrough flood alleviation measures, and I understand that the size of the development is needed to financethose measures. However, flooding in that part of town affects only a handful of houses, and I feel it quiteunnecessary to permit a huge development, which would of course require flood measures, merely to solvea small problem affecting a very small number of houses.
A2187B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I do not believe that a single housing site is appropriate for the community of Much Wenlock. There are other as yet undeveloped, smaller sites which over the period will become housing sites, and being smaller and developed over a longer period, will more easily integrate within the town, allowing for a more gradual uptake in demand for services, schooling etc. Additionally, given the flooding history of the town, especially in the Hunters Gate area, it seems extraordinary to propose further large scale development in that area.
A2197B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	No specific comments.
A2246B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A2247B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A2248B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A2249B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A2250B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	Cressage should remain as open countryside and not be a Hub. The village does not have the infrastructure: the school is full and the doctors are oversubscribed. We do not have a pharmacy, we only have one small shop and no library. The points for a Hub were thus wrongly awarded. Over 300 Cressage residents opposed Community Hub status and their views have not been considered by either the Parish or Shropshire Council.
A2306B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	object to the proposal to make Cressage a 'hub' and also to the additional proposal from Raby Estates. No expansion of Cressage can be contemplated without first addressing the A458 traffic safety issue by constructing the bypass initially proposed in 1991.
A2318B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	The Eagles Public house, this has been an eyesore for many years following several previous tenants failing to make a viable business of running the pub. The community as a whole want to see the site developed, preferably for commercial use of some sort but if not residential will do to rid the blight on the village that exists. Of recent time unfortunately the building has had listed status forced upon it and not at the will of the majority of residents to my understanding, which further limits the opportunities for developing this site as a whole. The building itself isn't fit for much, whilst also having limited footpath alongside, making it dangerous for pedestrians. The chance to have this building removed to improve the highways and implement either light industrial, commercial or residential developments provide vast visual improvements for most residents and those passing through. The site itself is ideally located to capture passing trade from the A458 and accessible to the whole village which lends itself to development for a village shop purposes, assuming space is retained for car parking to cater for the passing trade which would help in making it more commercially viable. Current applications have been to implement residential housing on the site and with listed status now on the Public House itself this restricts the development opportunities. I would be quite happy seeing almost any development of this site and am not opposed to it being residential.However this site is developed, and I hope it is, consideration should be given to the pedestrian needs and also that of those travelling by road at the junction of Sheinton Road as visibility there when joining the A458 is impaired.
A2318B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	The land adjoining The Vicarage on A458, Cressage has been identified to provide up to 60 homes, and for the largest planned development within Cressage I see this as the best location having least impact on the existing residents due to the main area of development being shielded by its surrounds. As this development would be on the opposite side of the A458 to that of the core of the Village traffic calming measures such as a pedestrian crossing similar to that Cross Houses, allowing residents to more safely cross to the School, Shop, Doctors or other amenities would be necessary and would hopefully help in general speed reduction when coming into Cressage from Much Wenlock direction. More generally the road infrastructure within Cressage will also need to have to deal with increase traffic from large scale developments at the Iron Bridge Power Station site where 1000 homes and business units will be built, further developments in Much Wenlock and Bridgnorth where 2000 more homes will be built. The likelihood is that traffic through Cressage will increase from these developments as residents commute. Cressage already has speed issues through the Village along with poor narrow footpaths along the A458 where passing Cars and Lorries come uncomfortably close to pedestrians. Additional practical traffic calming measures will be needed to control the speed of traffic and ensure the safety of pedestrians. Currently speeding through the Village is only ever addressed temporarily when the mobile speed van is present.
A2318B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	Cressage being defined a 'Community Hub' is an over statement, it is a small village within the countryside, which would be classed as 'Open Countryside' based on a visual assessment. The suggestion for Cressage to become a "Community Hub" I believe was following an assessment and grading process undertaken by the Council based on a facilities/services survey. The criteria used and points issued appears to have been questioned by some due to comparisons being drawn with facilities/grading's Cressage has with that of other Villages. Do the residents of Cressage want the Village to be classified a Community Hub? Do the residents of Cressage want the Village to remain Open Countryside? Putting a label on the Village is immaterial to many of the residents of Cressage, but what they generally want is small scale development spread over time which goes through a democratic planning process. My understanding based on what we were told by the council is we are better positioned to have some say on what development happens and where by being classified as a Community Hub, as opposed to being classed as Open Countryside. The Local Plan would appear to support my understanding in that the details from the Parish Plan which was ran by the community, appears to have been adopted by the Local Plan. However what concerns me is "Community Hub" sounds like an area identified for large scale development. What I/we don't want to see is large scale developments over and above that already outlined within the Local Plan and the defined development boundary. The Parish Plan identified two main sites for development within Cressage, these were The Eagles Public house and the Land adjoining The Vicarage on A458. These two locations with some other small-scale windfall residential developments would easily cater for the maximum developments wanted by residents of Cressage and meets the housing allocation detailed in the Local Plan. Assuming the advice from the council was accurate, I would have to support the classification of Community Hub, providing it does take into account the local residents views when it comes to any changes in and around the village.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A2343B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I feel VERY STRONGLY that Cressage should remain OPEN COUNTRYSIDE As per the previous local plan consultation, when over 300 residents responded by rejecting becoming a community hub. I believe the numerous errors made when scoring Cressage to be up graded are still in evidence. Cressage does not have the infrastructure or services to support further housing. Our school is at maximum capacity with having to employ further staff who have to work in demountable classrooms. The Doctors surgery is full as are neighbouring practices. We don't have a pharmacy, only a dispensary. There is a mobile library not a perminant building. On these points I believe we should remain OPEN COUNTRYSIDE
A2348B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	1. The site is on a moderately steep hill and is difficult and dangerous to access unless there is a major road alteration with a roundabout and pedestrian crossings to allow children and cyclists to access the facilities in the main village: school, shop, health centre and playground. 2. Wood Lane is narrow and rural in character with a steep drop from the land adjoining the Vicarage where there has already been a flash flood through the listed building below (Jasmine Cottage, Wood Lane and also Jasmine Lodge). More building would increase the flooding risk, despite any drainage strategies. There is also from there another steep drop down to the former mill pond and lead on the Plocks Brook, and its junction with the A458 is equally dangerous. 3. To create sufficient site lines for a splayed entry several buildings to the west of the A458 would have to be demolished. The village is bisected by the very busy A458 with the majority of the housing and all the facilities to the east of the main road. This road is difficult as it rises up out of the village towards Harley and vehicles drive extremely fast despite the 30 mph limit. It would be more sensible if the village is to develop to extend the boundary to the east beyond Severn Way with access via the Sheinton Road. It is not clear why the recently built large house outside the village boundary to the north was given planning permission as it breaches the current village development boundary. 4. Another proposal has been submitted from Raby Estates (not in the Local Plan Review document) which if Cressage warrants Community Hub status, appears much more wellreasoned, and managed. However a number of points are not clear: -where any local workspaces would be sited? -where any infrastructure improvements to serve the increased population be sited? -compulsory purchase of the land adjoining Wood Lane to create the 'community park'? and who would be responsible for its ongoing maintenance. The Plock's Brook floods regularly at the current crossing so flood alleviation would have to be addressed.
A2348B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	1. Redevelopment of The Eagles site as windfall development would enhance this current derelict site and reinstate the Eagles, now designated as a Listed Building, at the core of the village from a visual point of view with great scope for enhancement. 2. The relocation of the footpath through the site, mowing it away form the A458 is essential, as well as improvement to the site lines from the Sheinton Road junction 3. If Cressage is defined as a Community Hub and there is programme of significant house building, there will be a need for more local infrastructure (see para 5.184). The Eagles could then be converted into a residential unit on the first and part of the ground floor, with a few rooms on the ground floor unit for community use, such as local café/ local farm shop/ meeting place. This proposal has strong local support in a village already severely lacking in sufficient amenities for the existing population.
A2348B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	1. Why has Cressage been allocated as a Community Hub when it does not score highly enough? Is it in fact?? The parish council is very unclear about what the current status actually is and it seems it is actually still classed as Open Countryside. 2. The numerical assessment for Cressage was incorrect identifying it as a potential Community Hub as it does not have a Post Office, the Church is closed (apart from festival services) and the Library van stops for 45 minutes every 2 weeks. In addition, the bus service is very poor, the doctors surgery is already full, there is no Pharmacy (a dispensary is not the same), the School is overflowing and already has to hire extra teachers. Thus there were numerous errors in the scoring system and it does not score sufficient points for Hub status. 3. Basically amenities and services in Cressage have reduced concomitantly with the building of the large 'new' estate in the 1960's/70's (viz loss of post-office which was also a shop, bakery, garage, pub, church). 4. When the idea of 'community hub' status was proposed previously over 300 residents responded saying they were opposed –but this democratic 'protest' does not seem to have been recorded or seriously addressed. 5. Why did Shropshire Council not carry out a full needs assessment of all communities in order that those such as Cressage could assess its ability to cope with this proposed housing BEFORE any Local Plan was foisted on them. It is clear Cressage does not have the infrastructure or services to accommodate the number of houses that Community Hub status would bring. 6a. There are many agreed brown fill sites (nationally) still not having been built on, but if more housing is definitely needed apart from these, then in Cressage the more suitable option (also incorporating some community amenities) is the Raby Estate proposal (see under Comment 1. – S13.2(1)/CES005). 6b. However the vast majority of the local community (not represented by the parish council) wish Cressage to remain as Open Countryside,
A2384B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I request that we REMAIN OPEN COUNTRYSIDE for the following reasons. 300+ residents opposed Community hub status last time. 1. The surgery is TOO small. It is already at capacity. 2. You claimed we had a functioning church. We DON'T. The building is there, but there are no services, and in fact the church authorities would have already closed it down if there were no restrictions put on them by a building grant they had from English Heritage. It will be closed when the time restriction runs out in a couple of years. 3. The school is already at capacity. Unless you are planning to increase its size! 4. There is NO Post Office and has not been one for a quite a number of years. 5. We have only one small shop which the council has refused to allow to expand. This existing shop did apply to have a Post Office which was also refused. 6. We do NOT have a public house and have not had on for 5 years or more. However you should know this as its one of the proposed sites of development. 7. TRAFFIC: This is a big problem and getting worse every year, and I say that as someone who has lived in Cressage for nearly 50 years. We some times, at certain times of day, have to wait upto 10 minuetts at the end of Severn Way before you can get onto the main road. The majority of Cressage is all on one side of the road including the limited facilities that we have. The majority of the planned building extensions will be on the other side, so any residence in those proposed properties will have to get across to the facilities, either by car or on foot. Each of the properties will almost certainly have at least ONE CAR, increasing the amount of traffic trying to access the main road
A2385B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The proposal for the additional 120 dwellings is contrary to the agreed Neighbourhood Plan for Much Wenlock which was adopted in 2014. The latter was agreed after much research and debate amongst the local inhabitants of the town. Flooding has been a serious concern for the residents of Hunters Gate, Barrow Street and Forrest Avenue for many years and I am not confident that the existing properties will be protected from flooding if the new development is allowed. Any new development which will be visible from the A458 will detract from the overall view of the town detract from the unique character of the town. The proposed roundabout access on the A458 will further disrupt traffic on this road and add to the queueing traffic which is prevalent on the A458 at busy periods. With the proposed housing developments in the area of Much Wenlock, notably those proposed for Cressage, Tasley (Bridgnorth) and Ironbridge Power Station, together with traffic from this proposed development, the current traffic bottleneck at the Gaskell Arms corner will become even more of a disruption to both local and through traffic. Social facilities in the Much Wenlock area, notably the Primary School and the Medical Practise are already at capacity and to add a further 120 households, as well as other infill developments which will be allowed, will make it even more difficult for the local populace to access. As stated in the Neighbourhood Plan of 2014, the town needs affordable family housing for local people who will use the High Street shops and community facilities rather than relatively expensive housing for commuters who see the town as a nice location but do not generally contribute great to the economic and social aspects of the town.
A2389B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Don't know / no opinion	The Environment Agency recommends that you apply the SFRA and WCS to help inform the appropriateness of these sites. I'm not sure whether your latest evidence (we haven't reviewed), prepared by JBA, reflects these additional sites so some additional work may be necessary to inform those.
A2433B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I strongly believe that Cressage should remain OPEN COUNTRYSIDE. I believe that numerous errors were made when scoring Cressage as a Community Hub. The last time Community Hub status was proposed, over 300 residents responded saying they did not want to become a Hub. Our infrastructure cannot cope with extra housing as it is. I strongly believe we should remain OPEN COUNTRYSIDE.
A2449B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I strongly believe that CRESSAGE SHOULD REMAIN OPEN COUNTRYSIDE. The facilities/amenities/services are not able to cope with the scale of housing proposals linked to the Community Hub status proposals. Cressage should not qualify as a Community Hub. Settlement scoring functions have previously been misinterpreted/incorrectly applied to the very limited facilities in the village. The village DOES NOT have a library, a pharmacy, a functioning place of worship or a postoffice. The shop facilities are very limited and the bus service is skeletal. The school and doctors surgery services are also stretched and would struggle greatly to accommodate alarger population. The Cressage Community Hub proposals stated with S13.2 state that employmentdevelopment will be delivered, however the proposals go on to seek a change of use of the most commercially viable site in the village, that being the Eagles site – the only commercial site that is central to the village and with access directly off the A458. I strongly believe that the Council wish to define new Community Hubs, improvements must first be made to existing local community services and amenities to ensure that they could meet future demand. Until these improvements have been made, the village SHOULD REMAIN OPEN COUNTRYSIDE.
A2449B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I have two main concerns for the site policy for the land adjoining The Vicarage. 1. The A458 is a very busy road, and the village of Cressage suffers from speeding traffic. This has long been an issue for residents and concerns are regularly raised. This site is on the opposite side of the A458 to the school, village hall, doctors surgery and shop. If housing developments are to be proposed for that side of the A458, TRAFFIC SPEEDS MUST BE ADDRESSED and safe crossings and walkways provided. That side of the A458 is very much cut off from the rest of the village at present - most residents on that side of the A458 chose to drive their children to school, as the road speeds are too dangerous and the footpaths are too narrow. A mobile police speed camera vehicle regularly operates at the Shrewsbury end of the village and is very successful. During the hours in which it is present, traffic speeds are noticeably lower and acceptable, however when it is not present, traffic speeds of up to twice the limit have been observed. This development is at the other end of the village where concerns regarding speeding are also regularly raised as well as out towards the Cressage bridge. CRESSAGE NEEDS A PERMANENT AVERAGE SPEED CAMERA SYSTEM through the village, ideally with 3 cameras - one at either end of the A458 and one out towards the Cressage bridge. The initial expense would easily be covered by the revenue such cameras would bring and the improvement to the village would be immeasurable. Such a system would also be least disruptive to traffic flow along the A458. 2. My second concern is simply for the density of any house development on this side of the village and its impact on the environment of the village and surrounding countryside. The existing fields are rich, with wildlife - hares, buzzards, yellow hammers, bats and deer are regular sitings among others. Village developments should be of a lower density than town developments and each property should have a suitably large garden space to facilitate the planting of trees and mixed native hedging. Lower density development is far better for wildlife and also reduces the impact of surface water runoff.
A2449B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I strongly believe that the site of The Eagles public house on A458 should REMAIN AS A COMMERCIAL SITE as the land that it stands on is of outstanding community value that could not be replicated elsewhere in the village. The Eagles site is the only commercial site that is central to the village and directly accessible off the A458. It could offer wonderful, commercially viable business opportunities for much needed improvements to village shop services. No other site that is central to the village and with access directly off the main road could offer such opportunity. I believe that shop and post office services in this location, directly off the A458, would be far more commercially viable and offer much needed services to Cressage and its surrounding villages. As it stands villagers are forced to travel to Much Wenlock, Cross Houses or Shrewsbury on a near-daily basis, placing further strain on the road network. The sites position on the A458 is absolutely key to its commercial success and as such the whole community could benefit from the improved services that it would be able to provide, not to mention local employment opportunities. The traffic turning movements could also serve to calm traffic on the A458. The premises of the existing village shop at the top of The Moors could be redeveloped to have a hair salon or other business which would have a commercial viability that is less dependent upon the main road accessibility / passing trade. The village shop in its existing location does not benefit from passing trade and has always struggled commercially and I would say that there is a risk of Cressage having no shop in the future as a consequence, despite proposals for future residential development. The site could link very nicely, via the contaminated land of the former garage site to its rear, to the existing village hall, improving pedestrian access in the village. This contaminated land could be landscaped and potentially become home to the village war memorial in a pleasant garden setting, opening up the opportunity for much needed junction improvements adjacent to the Eagles and making a much more family friendly space for memorial services
A2450B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I strongly believe that CRESSAGE SHOULD REMAIN OPEN COUNTRYSIDE. The facilities/amenities/services are not able to cope with the scale of housing proposals linked to the Community Hub status proposals. Cressage should not qualify as a Community Hub. Settlement scoring functions have previously been misinterpreted/incorrectly applied to the very limited facilities in the village. The village DOES NOT have a library, a pharmacy, a functioning place of worship or a post office. The shop facilities are very limited and the bus service is skeletal. The school and doctors surgery services are also stretched and would struggle greatly to accommodate a larger population. The Cressage Community Hub proposals stated with S13.2 state that employment development will be delivered, however the proposals go on to seek a change of use of the most commercially viable site in the village, that being the Eagles site – the only commercial site that is central to the village and with access directly off the A458. I strongly believe that if the Council wish to define new Community Hubs, improvements must first be made to existing local community services and amenities to ensure that they could meet future demand. Until these improvements have been made, the village SHOULD REMAIN OPEN COUNTRYSIDE.
A2450B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I have two main concerns for the site policy for the land adjoining The Vicarage. 1. The A458 is a very busy road, and the village of Cressage suffers from speeding traffic. This has long been an issue for residents and concerns are regularly raised. This site is on the opposite side of the A458 to the school, village hall, doctors surgery and shop. That side of the A458 is very much cut off from the rest of the village at present - most residents on that side of the A458 chose to drive their children to school, as the road speeds are too dangerous and the footpaths are too narrow. A mobile police speed camera vehicle regularly operates at the Shrewsbury end of the village and is very successful. During the hours in which it is present, traffic speeds are noticeably lower and acceptable, however when it is not present, traffic speeds of up to twice the limit have been observed. This development is at the other end of the village where concerns regarding speeding are also regularly raised as well as out towards the Cressage bridge. CRESSAGE NEEDS A PERMANENT AVERAGE SPEED CAMERA SYSTEM through the village, ideally with 3 cameras - one at either end of the A458 and one out towards the Cressage bridge. The initial expense would easily be covered by the revenue such cameras would bring and the improvement to the village would be immeasurable. Such a system would also be least disruptive to traffic flow along the A458. 2. My second concern is simply for the density of any house development on this side of the village and its impact on the environment of the village and surrounding countryside. The existing fields are rich, with wildlife - hares, buzzards, yellow hammers, bats and deer are regular sitings among others. Village developments should be of a lower density than town developments and each property should have a suitably large garden space to facilitate the planting of trees and mixed native hedging. Lower density development is far better for wildlife and also reduces the impact of surface water runoff.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A2450B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I strongly believe that the site of The Eagles public house on A458 should REMAIN AS A COMMERCIAL SITE as the land that it stands on is of outstanding community value that could not be replicated elsewhere in the village. The Eagles site is the only commercial site that is central to the village and directly accessible off the A458. It could offer wonderful, commercially viable business opportunities for much needed improvements to village shop services. No other site that is central to the village and with access directly off the main road could offer such opportunity. I believe that shop and post office services in this location, directly off the A458, would be far more commercially viable and offer much needed services to Cressage and its surrounding villages. As it stands villagers are forced to travel to Much Wenlock, Cross Houses or Shrewsbury on a near-daily basis, placing further strain on the road network. The sites position on the A458 is absolutely key to its commercial success and as such the whole community could benefit from the improved services that it would be able to provide, not to mention local employment opportunities. The traffic turning movements could also serve to calm traffic on the A458. The premises of the existing village shop at the top of The Moors could be redeveloped to have a hair salon or other business which would have a commercial viability that is less dependent upon the main road accessibility / passing trade. The village shop in its existing location does not benefit from passing trade and has always struggled commercially and I would say that there is a risk of Cressage having no shop in the future as a consequence, despite proposals for future residential development. The site could link very nicely, via the contaminated land of the former garage site to its rear, to the existing village hall, improving pedestrian access in the village. This contaminated land could be landscaped and potentially become home to the village war memorial in a pleasant garden setting, opening up the opportunity for much needed junction improvements adjacent to the Eagles and making a much more family friendly space for memorial services
A2480B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	The scale of development proposed for this site is inappropriate and out of character for the size of Much Wenlock and is not compliant with the Neighbourhood Plan which has been approved by Much Wenlock Town Council and Shropshire Council The town does not have the infrastructure in terms of increased road traffic, primary school capacity, medical surgery provision to support a proposal of this scale. Large scale development here will exacerbate the town's flooding issues unless the latter are addressed first (previous promises to address flooding as part of permitted development have not materialised). Shropshire Council has not undertaken a proper community consultation over this revised (and upscaled) proposal as required by law. The support for the proposal from Much Wenlock Council does not reflect the views of the community
A2482B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I firmly believe Cressage should remain open countryside. Numerous errors were made when previously scoring Cressage as a community hub. The last time community hub status was proposed, over 300 Cressage residents responded saying that they did not want to become a community hub, but seemingly those voices and opinions were not heard, listened to or counted. The Cressage infrastructure (Doctors, School, Roads etc) cannot cope with demands the extra housing proposals would place on the Cressage community. I trust that this time the opinions and desires of the vast majority of Cressage residents will be listened to and accordingly acted upon. Therefore Cressage must remain open countryside for the future well being of the village.
A2490B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Disagree	I disagree with the Much Wenlock Place Plan as the number of houses in the new development at Hunters' Gate has been increased to 120. The reason given for the increase in numbers is that the developer will pay for flood alleviation measures for the development and some neighbouring houses. However, this is a small area of the parish and many more homes were flooded on the High St than Hunters Gate in February. There is the additional problem of traffic congestion at Gaskell Corner, which a roundabout onto the A458 will do nothing to address. Along with the proposed 1000+ houses at Tasley, 1000+ at Ironbridge, 60+ at Cressage, the pressure at the Gaskell Corner will be horrific. Not only the increased carbon emissions due to increased cars but also the increased pollution. As we are in the midst of a climate emergency these issues need to be addressed. This is a conservation area and Shropshire's place on the tourist map is important to local businesses. It is very important to preserve our heritage. Will these houses be PassivHaus design as the ones at Callaughton Ash? How many affordable homes? This policy is totally contrary to Much Wenlock's Neighbourhood Plan. The speed of cars travelling through Much Wenlock needs to be addressed, before someone is injured. The Local Plan does not include any note of traffic calming strategies. The Public Transport needs to be prioritised to enable workers to get to their places of work in time for the working day. It is impossible for passengers to reach Telford by bus in order to work. There is very little work locally so without an increase in Public Transport every new inhabitant will be reliant on a car to get to work.
A2495B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S13 Much Wenlock Place Plan Area	Agree	We support the designation of the site adjacent to Hunters Gate/Primary School site as being the best available in Much Wenlock, capable of accommodating the scale of development required. The site can be well visually contained and would have a relatively low impact on the character of the town. Other potential sites of this scale tend to be on rising ground and if developed, would be conspicuous and have an adverse impact on the visual character of a very attractive settlement which has great architectural qualities and importance for tourism.
A0011B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Traffic noise and pollution issues with site, four schools nearby and retirement complex added risk of accidents, harmful effects of vehicle emissions upon the school infants and children, plus the elderly in the area the road is narrow and will not take more traffic. Destruction of biodiversity and historic green area, should be a conservation area. Increase of flood risk, lack of duty of care urges council to rethink.
A0019B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The village is hopelessly overdeveloped for the infrastructure. Drainage floods every time it rains, the public transport is now down to one bus every 2 hours, weekday daytimes only. Your assessment of the public transport IS A LIE - the service is unusably infrequent. Please remove the fudged 'regular' criterion and replace with 'usable' - that and the score for the site reduces to 'poor'. This does not take into account the difficult access to the main road and the impossible access to the narrow back roads. The threat of the bypass blights the area due to the possibility of increased noise, flooding, increased traffic and the devastation of the Shropshire plain below the village. The obvious answers of traffic calming, lorry ban except for access and speed limit enforcement continue to be ignored. areas LYH007 and nearby would also be a terrible place to live if the bypass were ever built. Part is pretty much built out and has almost no 'affordable' housing. Get the infrastructure up to usable standards, give us some public transport and then think about possible building.
A0022B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	1) We feel that any proposed construction traffic requiring access to a development of some proposed 70 houses should be totally separate from Donnett Close. 2) We then fail to see how a possible 140 vehicles safely exiting on to an already busy B- road, that is, two vehicles per household from a narrow Close which at present just about copes at the busy times of the day from the existing properties. 3) When purchasing our existing property we were made aware of the potential flooding issues, surely the proposed development would only compound this ?
A0039B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	I oppose the allocation. The road past the site is already very busy with traffic, further development will exacerbate this situation. The situation is chaotic during rush hour, when flow is restricted by parked cars. Residents of Trefonnen road will have additional inconvenience and danger when exiting properties. The site is defined as a priority habitat and is a UK Biodiversity Action plan site and it should be preserved not developed.
A0042B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Whittington The Parish Council wish to reiterate the need for a roundabout on the B5009 on the junction of Castle Keep. Any development behind the Donnett needs to exit at that point.
A0042B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Support but Park Hall is a cluster and needs to keep green space to protect & maintain rural integrity. PC asks that infrastructure needs to be in place before development starts, roads area problem highways need to upgrade before development. Re-iterate 2019 comments, acknowledge Oswestry has limited growth opportunities & Park Hall could be key site for housing & employment. Infrastructure needs to improve esp. roads. Bridge improvements at Twmpath Lane also widening of road here as well as North Drive. Extend footways & footbridge to cross by-pass. Drainage & sewage improvements a priority. PC ask for master-planning with Gobowen to look at bus routes link to Gobowen station, orthopaedic, Derwen College, Park Hall, Whittington & Oswestry town centre. A possibility to create a tram link from station to hospital stopping at Twmpath bridge.
A0058B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Oppose the major housing development proposed for Trefonnen Road, Oswestry - OSW017.
A0059B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Strongly object to the proposed housing development on Trefonnen Road. This will cause totally unsuitable traffic loads to Upper Brook street, which is already overloaded.
A0070B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	WRPC object to any further Development in High Street, particularly Proposed Site WRP06. High street is a narrow road and unsuitable for further traffic. There is no footway on either side and no scope for improvement. it is a road safety hazard. Road is also blocked by cars parking further users will cause chaos. Any development change be confined to the Trehowell Lane location with access mitigated with appropriate road widening.
A0117B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Adequate land allocated for housing and the planning authority should not allocate additional. Inadequate consideration given to the need for infrastructure to support growth identified. In relation to Town Council services there is a need for the local plan to allocate land for burial purposes and allotments. The local plan addresses the need for employment sites but not the issues that are most important to the residents (schools, health facilities, traffic in the town centre, amenity space etc) As the Town will see significant growth local plan should specifically identify how infrastructure and services issues (e.g schools at full capacity) will be addressed in policies and allocate land to address requirements.
A0117B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	OSW 17 – Site should not be allocated as not suitable for development, nor any new sites within the boundary of the town as there is sufficient allocated land for housing which should be built out. Significant concerns regarding the extension of the town into surrounding green space and regarding traffic along the Trefonnen Road and into the town via Upper Brook Street. The development of up to 30 new homes would exacerbate this issue.
A0155B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The housing allocations should also incorporate smaller sites – having just 2 large ones excludes smaller local builders from the development process. Smaller sites are less disruption. The draft plan does not identify sufficient small sites – NPPF states that planning authorities should identify through the development plan and brown field registers, land to accommodate at least 10% of their housing requirements on sites no larger than one hectare. The land outlined in this rep is requested to be considered for allocation for 2 dwellings.
A0156B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Trefonnen is identified as a Community Hub but the draft plan offers no guidance as to how the village is expected to develop over the plan period. On this basis it is impossible to plan improvements to community facilities, services and infrastructure. Statutory undertakers will not invest in better services, equipment, etc without some certainty on demand and as a consequence the people of the village will suffer. Site promoted for self-build development.
A0186B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Knockin PC does not agree to any further development until continuing safety issues on B4396 are addressed. The development boundary should not be changed. PC considers KCK009 is not suitable as low lying & prone to flooding, concerns over sewage management, road access to the site unsafe any improvement will be detrimental to adjacent properties
A0191B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area		The public sewerage network can accept the potential foul flows from the proposed development site SMH031 however an assessment of the Sewage Pumping Station (SPS) would need to be undertaken to establish whether improvements are required. Potential developers need to be aware that this site is crossed by a sewer and protection measures in the form of an easement width or a diversion of the pipe would be required which may impact upon the housing density achievable on site. The sewerage system in this area drains to Five Fords WwTW which can accommodate the foul flows from the proposed growth figure.
A0191B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area		For site WRP006 a hydraulic modelling assessment (HMA) of the sewerage network will be required to assess its capacity to accommodate additional foul flows. Potential developers would be expected to fund investigations during pre-planning stages. The findings of the HMA would inform the extent of any necessary sewerage upgrades which can be requisitioned through the provisions of the Water Industry Act 1991 (as amended). The sewerage system in this area drains to Five Fords WwTW which can accommodate the foul flows from the proposed growth figure.
A0191B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area		The public sewerage network can accept the potential foul flows from the proposed development site SMH038. The sewerage system in this area drains to Five Fords WwTW which can accommodate the foul flows from the proposed growth figure.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0191B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area		For WRP017 hydraulic modelling assessment (HMA) of the sewerage network will be required to assess its capacity to accommodate additional foul flows. Potential developers would be expected to fund investigations during pre-planning stages. The findings of the HMA would inform the extent of any necessary sewerage upgrades which can be requisitioned through the provisions of the Water Industry Act 1991 (as amended). The sewerage system in this area drains to Five Fords WwTW which can accommodate the foul flows from the proposed growth figure.
A0202B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The SLAA Nov 2018 in dealing with Windfall Developments it states that "small scale windfall sites of less than 5 dwellings have always represented a significant component of housing supply in Shropshire and it is anticipated this will remain the case".This being the case, we would request that this site might be reassessed as a potential development opportunity.
A0231B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The Canal Yard at Llanymynech which remains outside the development area is likely to be a strategic canal side site providing possibly car parking for canal and heritage area visitors. It might also be an ideal location for an extended canal basin located at the English/Welsh border and which could attract visitors to the village
A0244B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	An additional site should be allocated/included within the development boundary for Gobowen (land east of Whittington Road - part of GWR023) The site is located between two approved developments (15/04968/REM and 15/04473/REM), is adjacent to the development boundary and a natural/logical continuation of development in Gobowen and 15/04473/REM. Access would be via 15/04473/REM (map illustrates location). As the site is behind 15/04473/REM which is currently subject to development, it will not increase visual impact. The site is well located to access services and facilities in the village. This site would contribute to addressing the shortfall of deliver since the adoption of SAMDev and meeting the need for different types of housing identified in the NPPF and draft policies DP1-DP7. Housing delivery will become increasingly important if the revised housing methodology for Shropshire becomes national policy (increasing need from 1,400 to 2,129
A0298B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Concerned about proposed allocation OSW017 as it would represent a significant highway safety risk to local residents, particularly students and families attending Our Lady & St. Oswald's Catholic Primary School, Little Acorns Pre-School, the Marches Secondary School, Oswestry School, Church parishioners, by adding further traffic to overstreched route. This will also pose a danger to cyclists. Upper Brook Street (which becomes Trefonen Road) is very busy (vehicles and pedestrians), has narrow pavements and a pinch point (at Our Lady & St. Oswald's Catholic Primary School) where one way passing and pedestrian crossings occur. The route past the school has a history of near misses due to speed and volume of traffic, the narrow pinch-point and visibility due to parked cars. At 'safe school' events the safety of Upper Brook Street is always highlighted as an extreme concern.
A0334B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The site assessment process for St Martins is unclear and as such it is unclear why the proposed allocations were selected The assessment of SMH041 is flawed. Its description of surrounding character (Residential to west, north and east. Agriculture (grazing) to south) gives the impression that it is adjacent to open fields, but it is a pocket of land surrounded by residential development. The development boundary has simply not been amended to reflect this (which is illogical given that the Local Plan Review includes a review of development boundaries). Errors flow from this description and have impacted on the assessment of the site. The development boundary should be updated to reflect recent developments. Part of the site was refused Planning Permission (and at appeal) only because it was outside the development boundary (appeal decision attached). In conclusion the Inspector found no harm arising from development of the site, other than the conflict with the policies of the then recently adopted development plan, which was assessed as being in compliance with the Framework. The Inspector attached significant weight to this in his determination
A0387B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Disagree that Morda has not been identified as a community hub. Potential for residential sites in Oswestry being limited, Morda is ideal via the B5069 for development and to become a hub.
A0388B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Believes that Morda should be identified as a community hub because of the facilities it has to offer.
A0395B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Hierarchy of Settlements 2020 - Para 5.41 a) This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. The suggestion in Para 5.41 that a "larger range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. b) Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria. Trefonen is the only proposed Hub settlement with neither of these key requirements, and so its designation as such is "unsound". Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria.
A0396B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Hierarchy of Settlements 2020 - Para 5.41 a) This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. The suggestion in Para 5.41 that a "larger range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. b) Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria. Trefonen is the only proposed Hub settlement with neither of these key requirements, and so its designation as such is "unsound". Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria.
A0407B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area		Object to the inclusion of preferred sites for development in: Kinnerley; Knockin; Llanymynech; Pant; Ruyton XI Towns; Trefonen; West Felton; Weston Rhyn; Whittington; and all Community Cluster: Hubs and Clusters in rural areas do not constitute sustainable development as defined in the NPPF. Development in rural areas should be no more than required to meet local needs. Development needs of the A5 corridor can only be met in a sustainable manner if located where main services are close by, and where the development can foster and be served by an integrated public transport system. That is the message of Oswestry 2050. There are preferable means of meeting the needs for development land. For instance, development in the north-west should be focused along the A5 strategic corridor, in accordance with the principles outlined in Oswestry 2050. Major local employers and residential areas should be linked together. Low carbon development could occur. Attractive high frequency, economic and low carbon public transport services and cycle links should be provided. Sattelite villages could be formed at Park Hall and Middleton. The A5 may need to be diverted beyond the main urban area. This would be a sustainable means of accommodating all the development proposed in villages, with little adverse effects on rural settlements. This option has not been given serious consideration by the Council
A0412B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Trefonen should not be designated as a Hub. Hierarchy of Settlements 2020 - Para 5.41) This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. The suggestion in Para 5.41 that a "larger range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. b) Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub. That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria. Trefonen is the only proposed Hub settlement with neither of these key requirements, and so its designation as such is "unsound". Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria. (First and third forms are blank).
A0426B1	Viability and Deliverability of Proposed Site	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Site is viable and available for development, and the delivery timescales suggested are considered accurate.
A0427B1	Viability and Deliverability of Proposed Site	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Site is viable and available for development, and the delivery timescales suggested are considered accurate.
A0428B1	Viability and Deliverability of Proposed Site	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Site is viable and available for development, and the delivery timescales suggested are considered accurate.
A0429B1	Viability and Deliverability of Proposed Site	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Site is viable and available for development, and the delivery timescales suggested are considered accurate.
A0487B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The proposal is to agree a further 70 houses on this site totalling 150 new houses planned for this part of Whittington At present, access for the 80 new houses, already given outline consent on the opposite side of th B5009, is only onto this small, winding lane which is used as a diversion for traffic from the A5 / A483 when road works (of which more are planned) are carried out at Maesbury & the Whittington & Gobowen roundaboutsThe currently proposed access for WHN024 is through Donnett Mews, presently a cul de sac of 6 houses & 6 cottages. Further housing is apparently intended on this site bringing the development up to 200 odd houses eventually. This access is totally inadequate. Apart from the access problems, the village school is full, there is no GP in Whittington, there are already traffic problems, caused by frequent HGVs travelling up to Ellesmere & Whitchurch on the A495 (Station Road) & the developers of the site behind the school are seeking access for their site of 50 houses onto this road next door to the school. This will create more traffic congestion on the A495 & make the junction with the B5009 where there are already a number of accidents, even more dangerous. In addition the site is liable to flooding as a small stream runs through it & it is already zoned as such for insurance & other purposes.There are no employment opportunities in the village and bus services (to & from Oswestry & Ellesmere) are non-existent in the evenings & on Sundays. This means that most transport will need to be by car which is contrary to Government policies. The Whittington Local Plan, completed in 2016 specifically opposed more housing behind the school & in general in the village, unless there was an increased provision of infrastructure & traffic control.I oppose the zoning of WHN02
A0510B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	West Felton Parish Council have concerns about the potential implications of the government white paper 'Planning for the Future' on community hubs, particularly the uncertainty around the following issues: What implications will the white paper have for the Local Plan and community hubs and how will the Local Plan work alongside national planning policy? In particular, how will 'development zones', referred to in the white paper, be implemented in the Local Plan and what are the implications of the white paper for CL monies? In light of these uncertainties, the Parish Council have withdrawn their support for the status of the parish as a Community Hub.
A0516B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	a) The key criteria for "Community Hub" status ,requiring "significant employment opportunities; and "peak time public transport"clearly does not apply to Trefonen,and the idea that this can be overruled by virtue of a playground and green spaces(para 5.41) is irrefutably incorrect.Trefonen is the only settlement proposed as a Hub which fails to meet these key criteria. This factor alone shows that Trefonen cannot possibly be regarded as meeting the necessary criteria for a Community Hub status,and its designation as such is therefore Unsound.It should be allocated Other Ruual Staus,for which the criteria are met. In the absence of employment in the immediate vicinity,any new houses would need its occupants(should any be found) to commute,probably significant distances,eg to the East of the County,with consequent damage to the environment and to traffic congestion.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0516B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Site OSW017 Land at Trefonen Road, Oswestry30 dwellings on this site will increase traffic congestion outside schools on Upper Brook Street & Trefonen Road. We must also consider the proposals for the extra building in Trefonen, which will add to this congestion. Both these plans are also contrary to all efforts and regulations designed to minimise human damage to the environment.
A0516B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Objects to designation of Trefonen as a community hub, as it doesn't reach the criteria designation for employment opportunities and public transport. Any new homes would require people living there to drive outside the village for employment. Allocation is contrary to SC Climate Emergency Policy, NPPF and Governments Zero Carbon aims. Trefonen should be designated other rural and not have a settlement boundary. The proposals represent a 15% increase in the size of the village which would be excessive and destroy the village character
A0615B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Designation of hub status is inappropriate for Trefonen. It doesn't have significant employment opportunities or peak public transport, and having play areas and outdoor sports facilities do not compensate for this. Any new development would require people to commute to work as few employment opportunities exist in the village which is contrary to the spacial vision and SP3 Climate change
A0615B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Don't agree with Trefonen being designated as a hub due to low employment opportunities and lack of peak time transport - two key characteristics of a hub. Development in Trefonen would see many people commute out of the village which is in contradiction to Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's Zero Carbon aims. It is also contrary to the Draft Local Plan "Spatial Vision" and SP3 Climate Change. Village should be designated as "other Rural" settlement and development boundary removed. Proposed growth of 15% of the existing village is not proportional and would impact on the character of the village
A0616B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Designation of hub status is inappropriate for Trefonen. It doesn't have significant employment opportunities or peak public transport, and having play areas and outdoor sports facilities do not compensate for this. Any new development would require people to commute to work as few employment opportunities exist in the village which is contrary to the spacial vision and SP3 Climate change
A0616B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Don't agree with Trefonen being designated as a hub due to low employment opportunities and lack of peak time transport - two key characteristics of a hub. Development in Trefonen would see many people commute out of the village which is in contradiction to Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's Zero Carbon aims. It is also contrary to the Draft Local Plan "Spatial Vision" and SP3 Climate Change. Village should be designated as "other Rural" settlement and development boundary removed. Proposed growth of 15% of the existing village is not proportional and would impact on the character of the village
A0626B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The Hierarchy of Settlements is unsound, Trefonen should not be a Hub. Significant employment opportunities and peak time public transport do not exist. Limited village shop. Without employment or peak time travel significant daily car travel already exists and it would be increased by additional housing in any Community Hub - contrary to the "Spatial Vision" and SP3 which seek to minimise travel and maximise trips by sustainable travel. The proposed build rate represents an extension of the village by 15%, which is excessive and damaging to the community and rural character.
A0626B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Site would compound traffic congestion - school are nearby. Combined with the 50 houses in Trefonen, there will be an unsustainable on services and increases in CO2
A0632B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Do not support policy 14.2 - allocation of a single site in Ruyton XI Towns. The Council should be allocating a range and choice of sites "to deliver the strategic priorities of the area". The Right Home Right Place survey results for Ruyton XI Towns indicate a pressing need for a further 38 dwellings in the settlement. RUY005 should be allocated for 4 dwellings (illustrative site plan and arboricultural report are included in the rep to support this proposal).
A0633B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6. Trefonen has no "significant employment opportunities; or "peak time public transport" It is the only proposed Hub settlement with neither of these key requirements. Additionally, without either employment c and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub. That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria.
A0633B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Hierarchy of Settlements para 5.41 Hierarchy of Settlements para 5.41 This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. The suggestion in Para 5.41 that a "larger range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub. That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria.
A0678B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Support identification of Community Hubs. Support identification of St Martins as a Community Hub. The sustainable credentials of St Martins make it an appropriate location to accommodate future housing growth. Strongly support proposed allocation of SMH031. Proposed delivery of circa 60 new dwellings on SMH031, is considered appropriate to the scale of the settlement. Support 'retention' and 'saving' of SAMDev residential allocations. The sustainable credentials of this western end of St Martins were recognised when making the SAMDev Plan allocations. Existing service / facility provision in the form of education (St Martins School), employment (Top Bank Industrial Estate) and recreation facilities are focussed in the general location of SMH031 which highlight the sustainable benefits of locating additional residential development here. SMH031 can complement and integrate with existing consented development proposals at Rhos-Y-Llan Farm (SAMDev Policy S14.2(v) – STM029). Note the proposed site guidelines for SMH031 and agree with the principles of providing an appropriate estate road junction to the B5069; provision of a pedestrian crossing of the B5069 and completion of missing footways (subject to Highway Authority/landownerships); and incorporation of sustainable drainage. Reviewed draft policies and considered implications for proposed allocation SMH031 (particularly policies on residential mix and open space). Confirm that a capacity of 60 dwellings is an appropriate unit quantum. A draft Masterplan has been provided as an appendix to this representation, this illustrates a potential layout for 60 dwellings and around 0.5ha of open space, which broadly complies with draft policy DP16 (open space) - note that residential mix will have an impact on the precise quantum of open space finally sought. Visual impact of development can be assessed and managed through a robust landscaping and green infrastructure approach. This can ensure proposals are responsive to the topography of the site and relevant zone of visual influence. Note proposed delivery timescales for SMH031 in Appendix 7, which is considered a realistic forecast and will enable housing delivery to be advanced in respect of the existing and saved SAMDev allocation at Rhos-Y-Llan farm; distribute development at St Martins over a proportion of the plan period (taking account of other site delivery); and allow a suitable lead-in-time for development at SMH031, taking account of the Local Plan/Planning Applications processes. A residential scheme, on the basis of the draft Local Plan policy requirements, is viable and deliverable. Promoter has experience of joint venture delivery in conjunction with a development partner and it is envisaged that a similar approach will be utilised in respect of SMH031. This provides a model which removes initial land cost and provides for greater flexibility in project delivery. Confident this delivery model can be replicated for SMH031.
A0692B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The proposed residential guidelines for St Martins should be increased to ensure consistency with the NPPF with regard to meeting housing need; reflect that St Martins is the most sustainable village in the Oswestry Place Plan area; and recognise that St Martins has delivered a high level of housing in the past and can do so again. The NPPF requires housing requirements to be calculated using the standard method for calculating housing need. Government is consulting on changes to this standard method which would increase housing need in Shropshire to 2,124 dwellings per annum (151.7% higher than the proposed housing requirement). This increase couldn't be ignored by the Planning Inspector at examination who is highly likely to increase the housing requirement, particularly given Governments aspirations to 'build, build, build'. St Martins is one of the highest scoring (4th) proposed Community Hubs in Shropshire and the highest in the Oswestry Place Plan Area, with regard to services and facilities and should have a higher residential guideline than lower serviced settlements. St Martins has built 123 houses between 2016/17 and 2018/19 (Appendix 5 of the Draft Local Plan), equating to 41 dwellings per annum. If this rate continued over the total proposed plan period, this would be some 902 dwellings. Do not suggest this level of delivery but the residential guideline should be increased to let St Martins pull its weight. Suggest 540 dwellings (151.7% increase, consistent with the increase to the overall housing requirement resulting from proposed changes to the standard method). Evidence in the Council's 'Local Plan Delivery & Viability Study' shows draft policies, particularly on climate change and housing mix (which when combined with CL increase estimated costs by some £554,093/ha) pose serious problems for the viability and deliverability of development. This represents a challenge to meeting the 'effective' test of soundness. One way to overcome this is applying a 25% non-delivery rate and allocate 125% of the land required to meet housing need. Within St Martins SMH037 could be allocated for around 65 dwellings to ensure delivery of the draft housing guideline. SMH037 is suitable for development and should be allocated within the draft Local Plan/included within the draft development boundary as: -It has a suitable access, previous concerns have been resolved by a recent development of 10 dwellings which widened Cottage Lane to the sites frontage. A second access could also be provided through a council-owned parking court, with replacement parking provided on site. -It is a highly sustainable location, all services and facilities are within walking distance (services are no further than from SMH038) and a regular bus service is nearby. -It is lower-lying than surrounding houses and contained within the landscape by mature hedges. Recent development on Cottage Lane's already introduced urban development to the north-west of the site. As such development of SMH037 would nestle within the village between existing housing and a mature tree belt and fit well with local character. -It could provide a mix of housing adjoining the Cottage Lane social housing site. -There are no technical environmental constraints and it could enhance the local environment. -It will ensure St Martins housing guideline is achieved in a plan-led manner. Suggested draft guidelines provided.
A0724B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Oppose identification of site OSW017 as a site allocation.
A0725B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Oppose identification of site OSW017 as a site allocation.
A0726B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Oppose identification of site OSW017 as a site allocation.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0867B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	There is continued support for the identification of Oswestry as a Principal Centre and to accommodate substantial growth through the Plan period. The Proposed Site Allocation, OSW017 ("the Site"), remains viable, deliverable and sustainable. The site will be made available upon adoption and any proposed housing scheme can be made in accordance with all draft policy requirements. We are aware of some comments made by a local resident and Oswestry Town Council. We wish to reply to these points:1) The Site lies in Flood Zone 1, on the Environment Agency map - the lowest level of flood risk. There is no surface water flood risk. 2) Ecology/Heritage - The Site is largely unconstrained, does not lie upon any sites of ecological/biodiversity importance, with only a single designated heritage asset in close proximity (approx. 250m south-west). Nonetheless a Preliminary Ecology Survey and Heritage Impact Assessment have both been submitted to the LPA, on the 29th January 2020, as part of previous consultations. Both surveys confirm that the development of this site can occur without causing any harm or loss of assets - habitats, species or assets. 3) Highways - Access to the site will be gained off Trefonen Rd, to the south. The Highways Authority have previously commented on the accessibility of this site, in which it was determined that subject to traffic calming (reducing local speed limits immediately adjacent the site) the development of this is acceptable from a highways perspective. The Site is afforded adequate visibility in both directions, commensurate to the proposed local highway conditions. 4) Landscaping - The trees of significance on the Site can be easily retained and incorporated into any housing scheme, ensuring their protection and retention. In addition, the proposed provision of 30 dwellings will result in the provision of open space policy requirements which will result in the enhancement of landscaping and improvement to the local biodiversity. 5) Visual Amenity - The Site represents a natural expansion of the Town, would not look out-of-character and is able to reflect the existing built pattern and context. 6) Oswestry, as a Town, is largely constrained in any further development expansion, through poor access to alternative sites, sites within Flood Zones or those that affect designated heritage assets. The Site adjoins the existing built environment, with good accessibility and will not negatively impact upon the existing built, natural and historic environments, with the ability to improve local environ offerings. 7) The Town Council's wish to delete this site should be resisted. Para S14.1 seeks to deliver 1900 homes with virtually all new allocations being at Park Hall - that lies several miles away. Residents would choose to drive to Oswestry for services and facilities, which is not sustainable. However, the Trefonen Rd sites will deliver a small scheme allowing people to walk or cycle to facilities in the town. This will deliver a sustainable development
A0881B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	New Site proposed which includes WEF002. Site has short term potential for development because site has no significant constraints; is well located, immediately available, fully deliverable with developer interest. Site could contribute to delivering housing required to meet target. The land is well positioned with direct highway access, which can be improved within land owned. Adjoins land recently developed for residential use and caravan storage.Option for an area to be provided for the primary school amenity/playing field/car park. Additional information can be provided as required to support bringing the site forward. Site location plan provided
A0899B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Object to Trefonen housing guideline of 'around 55 dwellings' although village appropriately designated as a Community Hub. Housing guideline is not explained and will not pass 'justified' test of soundness at examination. Recommend that Office of National Statistics' 2018-based household projections forecast growth of 27% for Shropshire over the plan period'. According to Council's 'Hierarchy of Settlements' report, Trefonen has estimated population of 779 in estimated 324 dwellings. Assuming around 320 households in Trefonen, 27% growth equates to additional 86 dwellings over plan period. Residential guideline of around 55 dwellings is substantially below this level and is an unnecessary constraint on natural growth. The higher 86 dwellings housing guideline conforms with NPPF paras 59 to significantly boost housing supply and paras 60 and 73 to treat housing guidelines as minimum requirement. The requirement should therefore be expressed as 'A minimum of 86 dwellings'. ¹ Shropshire's 135,452 households in 2016 are projected to increase to 171,876 households by 2038, an increase of 36,424 households (26.9% growth) over 22 years according to the ONS 2018-based household projections table 406 at https://www.ons.gov.uk/peoplepopulationandcommunity/populationandmigration/populationprojections/datasets/householdprojectionsforengland
A0899B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Object to Trefonen development boundary and absence of housing allocations. Spatial planning of Trefonen will not provide sufficient housing to meet the guideline because: development boundary too tight and sites will be backland or garden grabbing which will fail to meet Policy SP7. Development beyond boundary unlikely to deliver required scale of housing due to restrictions on supply of affordable and cross subsidy housing in Policy DP7. Recommend expanding development boundary to allow small scale sites including land east of Hyde Park (0.52ha) on Little London Lane. This site, preferably allocated for housing, will ensure growth plan-led and properly managed. This will improve highway at Little London Lane/Bellam Lane including new passing places, deliver CIL, provide low density development, respect local character, provide self-build homes. Shropshire Delivery and Viability Study also advocates provision of small greenfield sites of around 30 dwellings rather than 60 or 80 dwellings. Development guidelines submitted for land at Hyde Park.
A0904B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	There is a triangle of land that lies at the southern end of SAMDev site GOB012 between it and the recently completed housing development to the south. This triangle of land is consistently shown (on the Inset Maps for Gobowen in the previous Local Plan exercises) as excluded. There is no reason why this land should be excluded from the area to be developed - there are no boundaries to separate this land from the rest of the allocated site. It is suggested that the identified land should be included within GOB012 in order to ensure and continuous and comprehensive development.
A0907B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Expected can be delivered sooner than indicated. The site is readily available and there are no legal restrictions that would prevent its development early-on in the plan period.
A0916B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	This policy and its supporting text is supported as it recognises the strategic role of Oswestry as the principal focus for investment, employment, housing and development during the Plan period in the north-west of the County. In addition, the identification of 57ha. of employment land to meet the needs of the town and its hinterland (including saved employment land allocation ELR042) is supported as this land will make a significant and unique contribution towards meeting the employment growth needs of both the Town and this area of the County, realising the objective of the Shropshire Economic Growth Strategy to deliver a 'step change' in the capacity and productivity of the local economy.
A0916B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Employment Allocation 'land north ofWhittington Road' (ELR042) is supported. The saved employment land allocation ELR042 is unconstrained, viable, deliverable and developable. In addition, it is in a strategically importance location adjoining the A5 to the north-east of Oswestry - which has been identified as a significant direction of growth for the town with the allocation of this site, employment allocation ELR043e and the residential allocations at Park Hall. The site will therefore make an important contribution to meeting the employment needs of Oswestry as it represents a significant, and unique, opportunity to meet the economic needs of Oswestry during the Plan period and realise the ambitions of the Shropshire Economic Growth Strategy.
A0916B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Policy Map Inset S14 Oswestry is supported. The saved employment land allocation ELR042 is unconstrained, viable, deliverable and developable. In addition, it is in a strategically importance location adjoining the A5 to the north-east of Oswestry - which has been identified as significant direction of growth for the town with the allocation of this site, employment allocation ELR043e and the residential allocations at Park Hall. The site will therefore make an important contribution to meeting the employment needs of Oswestry as it represents a significant, and unique, opportunity to meet the economic needs of Oswestry during the Plan period and realise the ambitions of the Shropshire Economic Growth Strategy.
A0932B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Trefonen having no allocations as a Hub is inconsistent with the approach taken with the other hubs, and there is no evidence to justify a lack of potentially suitable housing here. There is a lack of evidence that there is greater need for affordable/low cost housing as opposed to open market. The outcomes of the Parish Council's survey differ to their conclusions. Open market housing is considered as something needed in this hub.
A0932B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	TRF014 provides an alternative option for providing the necessary housing for Trefonen and should be a preferred allocation. SA score is good and is within proximity to the services and has a flat topography.
A0933B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	disagrees, as believes that Morda village should be a hub- this has been scored differently in the Hierarchy of Settlements that in the SDLP
A0936B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	WRP006 Queries the widening of the footpath meaning vehicular and pedestrian access from the site would be onto the High Street - this is UNSUITABLE. Concerns include pinch point at mini roundabout, external walls to properties on the road edge, on street parking problems. STRONGLY advises the person making the decision to visit the area. proposed site WRP001 is a better option
A0936B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	In relation to the site WRP006 in Weston Rhyn and detailed on page 237 of the Regulation 18: Pre-Submission Draft of the Shropshire Local Plan 2016 to 2038 dated August 2020 I have to question whether any person who has had an involvement in creating such a plan has actually visited the area. The first paragraph states "Necessary widening of High Street and a footway on the east side of High Street along the site frontage to be provided". This suggests that any vehicular and pedestrian access from the site WRP006 would be onto High Street. I consider High Street to be UNSUITABLE to take vehicles and pedestrians from a potential 60 properties. The bottom end of High Street, where it joins with Station Road at the mini roundabout is a pinch point where two small vehicles cannot pass each other safely and where pedestrians have to be acutely aware of vehicles approaching in either direction. There are external walls of a shop and residential properties directly on the road edge to the west side of High Street and to the east side of the street there is a large residential property behind the stone wall. Approximately 50 metres from the junction with Station Road there is another property (Tower View) that has a narrow concreted strip outside the property on which one, sometimes two, vehicles are parked. The strip is not wide enough for vehicles and therefore part park onto the road thus reducing the available road width. As stated earlier, the road width at the in this area is very narrow and there has never been an option to construct footpath along this stretch for this reason. The location map outlining the proposed site allocations is not a scaled version. To the un-informed, the width of High Street would appear to be of a similar width to Station Road. This is far from being correct and would lead to any recommendation / decision on this site being ill-informed. There is an issue with on-street parking with some vehicles parking up on pavements and further up High Street (close to the proposed site) the pavement on the eastern side of the street is so narrow that an adult and child would be unable to walk side by side. I would STRONGLY advise those responsible for making a decision on this site to visit the area first and see for themselves how any substantial development with access onto High Street would compound the issues that currently exist. A previous draft plan (November 2018) showed a different proposal. This had a site designation of WRP001 which is to the east of the current 2020 proposal and borders Trehowell Lane which, if developed would provide a better scope for vehicular and pedestrian access from the site. What happened to this site?
A0938B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	agree	Content with policy SP8 for this cluster
A0939B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Believe that the sites should be considered for short term potential not Long Term Potential. Land is immediately available, ideally situated despite being in a sensitive location - visual impact and landscape sensitivity can be carried out by the client
A0940B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Disagree with the development boundary at Kinnerley. KNN017 believe that the sites should be considered for short term potential not Long Term Potential. Land is immediately available
A0941B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area		I am writing in response to the consultation for the regulation18: pre-submission draft of the Shropshire Local Plan, with regards to Upper Hengoed being designated as a Community Cluster within the Oswestry Place Plan. We are delighted with the designation due to our Client D H Eccleston having suitable land for development being part of UPH001 and therefore would like to ensure that this designation is carried forward into the adopted plan. Availability - Our Client has the benefit of full title to the land stated above and are willing to make it immediately available for development. Surveys - Our client is very keen to provide this site for residential development, therefore is happy to provide any information the Council deems as necessary as further evidence of the site being available and sustainable such as; environmental, habitat, flood or highways reports. In addition to this we would be happy to provide indicative layout plans to show how the development could be implemented.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0942B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	We are content with the policy SP8 with regard to the community clusters of Maesbrook, Dovaston and Knockin Heath and would like this to be confirmed within the new finalised Local Development Plan.
A0944B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	I am writing in response to the consultation for the consultation of the Regulation 18: Pre-submission draft of the Shropshire Local Plan with regards to land off Llwyn Road, Oswestry belonging to our client This site is currently an agricultural field located to the north of Oswestry, ref. OSW046. Under the SLAA consultation, we were pleased to note this site has been identified as a 'Long Term Potential SLAA Residential Site' within the consultation. This found the site to have no significant constraints, however it is not currently sustainable, but has future potential subject to further detailed assessment. I am writing as we believe this land can be considered for short term potential and therefore should be included within the the Oswestry policy map development boundary of Oswestry due to the following: Availability Our client has the benefit of full title to the land and are willing to make it immediately available for development. Deliverability and Sustainability We can confirm this is a fully deliverable site with an area of 8.66 ha. We believe this site is suitably placed to provide development in Oswestry towards the target of 200 dwellings by 2036. In the SLAA assessment, site OSW046 achieved a sustainability rating of FAIR, which is one of the better ratings compared to the other sites within Oswestry and the same rating as OSW017, an allocated site within the Oswestry policy map. The land is well positioned to provide additional growth and there is ability to provide appropriate access to the site, subject to highway approval. Physical, Environmental or Heritage Constraints The site is in a sensitive location within proximity of the Old Oswestry Hillfort Scheduled Monument and therefore the site requires a heritage impact assessment and archaeological evaluation which our client is happy to undertake. Furthermore, the site is also in proximity to a wildlife site and therefore our client would be willing to carry out further environmental surveys and provide mitigation works if any impacts were found. We believe that the site provides a natural extension to the already built form of the north of Oswestry and therefore the development boundary should be extended to reflect this Surveys Our client is very keen to provide this site for residential development, therefore is happy to provide any information the Council deems as necessary as further evidence of the site being available and sustainable such as; environmental, habitat, flood or highways reports. In addition to this we would be happy to provide indicative layout plans to show how the development could be implemented.
A0946B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	I am writing in response to the consultation of the Regulation 18: Pre-submission draft of the Shropshire Local Plan, with regards to land at Church Street, Whittington belonging to our client. This site WHN026 is currently an agricultural field located north of the centre of Whittington adjoining the current development boundary. We were pleased to note this site has been identified as a 'Long Term Potential SLAA Residential Site' within the consultation. This finds the site to have no significant constraints, however it is not currently sustainable, but has future potential subject to further detailed assessment. I am writing under this consultation as the land has not been included within the development boundary of Whittington and is not allocated for residential development. We believe this land can be considered for short term potential and should be included within the development boundary of Whittington due to the following: Availability our client has the benefit of the full title to the land and are willing to make it immediately available for development. Deliverability and Sustainability We can confirm this is a fully deliverable site with an area of 5.71 ha. We believe this site is suitably placed to provide development towards the target of 89 dwellings by 2036, adjoining the proposed development boundary, providing an excellent infill site and well located on flat, easily developable land. The location of the land shows it to be a natural extension of the built form of Whittington and therefore should be included within the development boundary or be allocated as a site for development. Access The proposed site has been challenged regarding how it may gain access from Church Street. As shown by the attached plan, this can be achieved by using the area hatched orange, also owned and occupied by our client. Conservation Area The site is located within the conservation area of Whittington and therefore been outlined as requiring a heritage impact assessment which our Client would happily provide. The impact of developing the site within the conservation area can be mitigated through the design of the dwellings by ensuring they are in keeping with the built form of the area. Surveys Our client is very keen to provide this site for residential development, therefore is happy to provide any information the Council deems as necessary as further evidence of the site being available and sustainable such as; environmental, habitat, flood or highways reports. In addition to this we would be happy to provide indicative layout plans to show how the development could be implemented. We believe that site WHN026 provide an excellent opportunity for infill development within Whittington and can be implemented with immediate effect
A0947B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	I am writing in response to the consultation of regulation 18: pre-submission draft of the Shropshire Local Plan, with regards to the employment site designation in the Oswestry Place Plan. In Oswestry there is no proposed employment sites but are existing allocations. We believe our Client has got a site which is perfect for the expansion of an existing allocated site (as shown by the attached plan in red). We believe this site is deliverable for the following reasons: Availability Our Client has the benefit of full title to the land stated above and are willing to make it immediately available for development. Oswestry Employment Guidelines Around 57 hectares of employment land is already committed in Oswestry and we believe that further land should be considered to enhance the employment opportunities for Oswestry. A major mixed-use urban extension was allocated in the existing Local Plan to the south east of Oswestry. The scale and complexity of the scheme and the need for significant infrastructure investment has delayed delivery to date, but work is expected to commence during the first part of the Local Plan Review period. New development proposals will need to complement the offer provided by this urban extension which we believe are client's site does. The Oswestry Civic Society and several local parish councils have recently endorsed the development of a longer term strategy for the Oswestry area which could cover the period to 2050. It is felt that such a plan would help to shape the future expansion of Oswestry through the potential development of interconnected villages, supported by a strong framework of public and road transport links, designed to foster community living and a low carbon economy. It is considered that expansion to the north-east of Oswestry would provide the opportunity to capitalise on existing assets such as Gobowen railway station, Old Oswestry Hill Fort and the sports facilities at Park Hall. Such an approach would also be consistent with the focus on development in strategic corridors, including the A5 corridor between Oswestry and Gobowen, which is identified in the Council's adopted Economic Growth Strategy. A Local Economic growth strategy is being prepared for Oswestry which will set out Shropshire Council's local economic delivery plan in this area, helping Shropshire Council to address priorities outlined in the overarching Economic Growth Strategy at a local level. This strategy will also have a key role in supporting existing business growth and attracting new business and investment into not just the town but also the surrounding areas. Identified critical infrastructure priorities for Oswestry include: • Waste water treatment and sewerage capacity. • Primary and secondary school provision. • Local and strategic highway improvements. • Provision of additional leisure, recreation, amenity and cemetery facilities. We believe the allocation of our client's site would help in achieving these priorities.
A0948B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	I am writing in response to the consultation for the Regulation 18: Pre-submission Draft of the Shropshire Local Plan, with regards to Chirk Bank being designated as a Community Cluster within the Oswestry Place Plan. We are delighted with the designation due to our Client having suitable land for development being part of CBG012 an therefore would like to ensure that this designation is carried forward into the adopted plan. We are fully in support of the SP8 policy as part of the consultation and hope that this is carried forward into the adopted plan. Availability Our Client has the benefit of full title to the land stated above and are willing to make it immediately available for development. Surveys Our client is very keen to provide this site for residential development, therefore is happy to provide any information the Council deems as necessary as further evidence of the site being available and sustainable such as; environmental, habitat, flood or highways reports. In addition to this we would be happy to provide indicative layout plans to show how the development could be implemented
A0949B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	I am writing in response to the consultation for the Regulation 18: Pre-submission draft of the Shropshire Local Plan, with regards to land off Weston Road, Oswestry belonging to our client. This site is currently an agricultural field located to the south of Oswestry, ref. OSW026. Under the SLAA consultation, we were pleased to note this site has been identified as a 'Long Term Potential SLAA Residential Site' within the consultation. This finds the site to have no significant constraints, however it is not currently sustainable, but has future potential. We now write as we believe this land can now be considered for short term potential and should be included within the newly adopted development boundary due to the following: Availability Our client has the benefit of full title to the land and is willing to make it immediately available for development. Deliverability and Sustainability We can confirm this is a fully deliverable site with an area of 6.65 ha. We believe this site is suitably placed to provide development in Oswestry towards the target of 200 dwellings by 2036, being situated adjoining an existing allocated housing site and well located on flat, easily developable land. Site OSW026 has achieved a sustainability rating of FAIR, which is one of the better ratings compared to the other sites within Oswestry and the same as the allocated site within this consultation, OSW017. Surveys Our client is very keen to provide this site for residential development, therefore is happy to provide any information the Council deems as necessary as further evidence of the site being available and sustainable such as; environmental, habitat, flood or highways reports. In addition to this we would be happy to provide indicative layout plans to show how the development could be implemented.
A0963B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	An alternative site (SMH024) should be allocated as part of the LPR in St Martins. This site will assist with the provision of the settlement's needs, and is a suitable location and would act as a logical/natural extension to the settlement. It is in close proximity to several services, including a supermarket, Post Office, Florist, Pharmacy, Petrol Filling Station and a coffee shop, schools, church, community centre. This site should replace the current preferred allocation SMH031 or should be allocated in addition to this site.
A0965B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Map provided of site location and boundaries. seeks to support the allocation of WRP001 2ha directly adjacent to the settlement boundary of Weston Rhyn is a highly sustainable location close to the services and facilities of the village. Weston Rhyn identified as a Community Hub and thereby a sustainable settlement where growth in the local area will be focused Site assessment assumes that sites availability for residential development is unknown-however land owner (details provided) is promoting site. Comparison between the allocated site WRP006 and the promoted site WRP001 shows that proposed alternative site WRP001 has better ranking (-5 vs -7); submitted plan /photos shows how proposed site WRP006 is poorly related to the existing pattern of development, particularly in relation to the access to the site. the principal High Street access serving the site has restricted visibility from roundabout & is narrow & restricted & without footpaths. Access clearly inadequate for the additional traffic. alternative site WRP001 has far superior access via Trehowell Lane with junction improvements possible to facilitate this & accommodate significant level of development. The owner of the WRP001 land is prepared to allow access across the site to serve the wider WRP006 site off Trehowell Lane as shown. Despite normal practice established by case law the owner is prepared to allow 'free' access to WRP006 subject to developers of the WRP006 site paying half of the cost of the access. This solution provides a good long-term strategic solution to the future housing development to the north of the village without exacerbating highway problems around the High Street access. It is considered that the proposal complies with NPPF including sustainability requirements with development providing economic and social sustainability benefits and meeting environmental sustainability requirements including : easy access to the local/frequent bus service ; accessible to & supporting local services & facilities, including increased spend; use of existing suitable infrastructure negating need to extend infrastructure; construction and associated jobs & spend ; housing to meet current and future need, including affordable; CIL income& benefits for village; create high quality built environment; sits within the natural settlement boundary of Weston Rhyn and would not negatively impact upon the natural, built or historic environment; no material visual impact upon the wider area; will incorporate best practice Building Regulation standards best practice Building Regulation standards, SUDs & retain trees/hedges. site would also include footpath routes to ensure it would be permeable, appropriate landscaping and open space and ecology report would inform the development. No known flood risk - Site in Flood zone 1 and not at risk of surface water flood. no known abnormal costs to the development of the site will allow the scheme to meet normal Affordable Housing & CIL requirements. No known physical or environmental constraints to development & utilities and services available. site has clear and defensible boundaries which will allow the development to be readily assimilated into the grain of the village. Site is available now & deliverable, single landowners for each of sites WRP001 & 006 . The site is viable, deliverable in the 'Short Term' (2020 to 2025) and there is a known market for houses in the village and local employment opportunities and services ad facilities. Potential delivery timescales Spring 2022 to – 2024 set out. The proposal scheme provides for a highly sustainable village expansion within timetable to be agreed with the Local Planning Authority. Suggest that combined alternative site shown (part WRP006 and WRP001) of 3.85 hectares would equate to around 115 dwellings similar to the original WRP006 site. Proposal superior to the Councils chosen site WRP006. Either illustrated part WRP006 and WRP001 site should be allocated or WRP001 be allocated in addition to the existing Regulation 18 Consultation site WRP006. Supporting information submitted: drone photos of locality; location & site plans; alternative access proposal
A0973B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	We support the allocation of site WHN024 in Whittington as identified in S14/S14.2 - Oswestry Place Plan Area Inset Map 14 Please see supporting report for additional information.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0973B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	We support the allocation of site WHN024 in Whittington as identified in S14/S14.2 - Oswestry Place Plan Area Inset Map 14. We support the Residential Development Guidelines and Residential Supply contained in Appendix 5 relating to this site
A0973B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	We support the allocation of site WHN024 in Whittington as identified in S14/S14.2 - Oswestry Place Plan Area Inset Map 14. We support the Forecast of Delivery Timescales for Local Plan Allocations relating to this site in Appendix 7.
A0973B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	We support the allocation of site WHN024 in Whittington as identified in S14/S14.2 - Oswestry Place Plan Area Inset Map 14. We support the Oswestry Place Plan Area Site Assessments relating to this site in Appendix O.
A0973B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	We support the allocation of site WHN024 in Whittington as identified in S14/S14.2 - Oswestry Place Plan Area Inset Map 14. We support Policy SP2. Strategic Approach.
A0973B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	We support the allocation of site WHN024 in Whittington as identified in S14/S14.2 - Oswestry Place Plan Area Inset Map 14. We support Policy SP7. Managing Development in Community Hubs
A0980B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Disagrees with content of proposed policies SP2.2, SP7, S14.2 and para 5.198. and provides evidence for inclusion of TRF006 within the plan. Supports designation of Trefonen as a Community Hub, but disagrees that no specific sites have been allocated in the settlement to enable the housing guideline of 55 houses to be delivered. Reviews of this site as a cross subsidy site have been undertaken which established it is unviable as cross subsidy site. It is therefore suggested that TRF006 receives a specific allocation in the proposed Policy S14.2 of the forthcoming Local Plan. It is proposed that the site would deliver 23 dwellings (via a local building company) to satisfy the unmet need and demand for smaller intermediate and starter housing and bungalows. It is apparent, by reference to the ONS 2018-based household projections for Shropshire, that the need for older persons' housing in Shropshire is rising rapidly. It is suggested, therefore, that Policies DP1 – DP7 are supplemented by specific allocations on sites of less than 50 dwellings which can deliver this type of housing. This approach is encouraged in the NPPF, para 61 and NPPG ref 63-013-20190626 In conclusion, it has been demonstrated that the TRF006 site is within a sustainable settlement, is not constrained by technical issues, is viable and can be delivered quickly in conjunction with a local housing developer.
A0981B21	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The former primary school site contains a disused playing field that has previously accommodated a mini football pitch. The wording of the policy incorrectly describes this as open space rather than playing field which should be addressed. The policy states that if the playing field is not demonstrated to be surplus, then an appropriate financial contribution will be required to fund equivalent or better provision. The proposed wording does not align with para 97 of the NPPF nor Sport England's Playing Fields Policy where the relevant criteria is to provide equivalent (ie equitable) re-provision in quantity and quality in a suitable location. It is recommended that the wording of the policy is refined to better align with the NPPF and Sport England's policy. The policy should reference that where re-provision is required, this will be in accordance with local priorities and recommendations of the Council's Playing Pitch and Outdoor Sports Strategy (PPOSS), and that the re-provision of playing field should be provided prior to the loss of this site to ensure continuity of playing field provision in accordance with Sport England's Policy
A0981B22	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Sport England supports the reference to the development securing the extended formal and permanent recreation ground on adjacent land, on the proviso that can be demonstrated to meet an identified need. Its not clear if this is intended to be for formal pitch provision or a more informal kickabout space to serve the surrounding community so this should be clarified?
A0981B23	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Sport England notes that the proposal involves the relocation of the existing playing field to the east of the site to Old Chirk Road. The policy map should identify the area of replacement playing field to demonstrate that this will be equitable for the quantity of playing field to be lost. The wording of the policy accords with para 97 of the NPPF and Sport England's Playing Fields Policy and so there are no objections in principle to how the loss of playing field is proposed to be addressed. The policy should require the replacement area of playing field to be provided prior to the loss of the allocated site to ensure continuity of use in accordance with Sport England's Playing Fields Policy and Guidance.
A0988B1	Viability and Deliverability of Proposed Site	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Site is deliverable and viable. Currently under Pre-app for 53 dwellings
A0992B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Site promoted to be an allocation. Previously was a preferred allocation but removed following SFRA L2. Site has come back in, shifted to the east to avoid the flood area, with access through the consented development which is due to commence in
A0994B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	This land at Selattyn should be allocated – it is a natural extension to the village, which has a number of amenities and services. A LAP or LEAP could be incorporated on the site near to the school. This site would help reach the shortfall calculated by Lichfields.
A1131B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	This should not be the only site included in Gobowen. Gobowen has more services than Park Hall but Park Hall has lots more housing allocations, Gobowen has more services and better roads/footways
A1132B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Issues with GWR023 (previous preferred allocation) have been solved with alternative access provided through the existing consented development. Gobowen is a better location for new houses than Park Hall as there are much more services here.
A1152B44	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	During the Preferred Scale and Distribution of Development consultation 1,800 dwellings and 19ha of employment land was proposed (based on the proposed balanced growth). This remained the same during the preferred sites consultation. In the draft Local Plan the housing guideline has increased by 100 dwellings and the employment land guideline by 38ha to 57ha, presumably only because land to meet that guideline is already in the pipeline, so no new allocations are proposed. This does mean that housing and employment land are not balanced locally, raising issues of sustainability, partly because of increased levels of commuting. With regard to the proposed Park Hall allocations, -They are informed by principles in the Oswestry & District Civic Society's "Oswestry 2050" document. Those proposals were for a long term masterplan for the wider area encompassing Oswestry, Gobowen and Whittington, which should include a transport plan with the aim of reducing carbon emissions. An impression of such a plan was given within the "Oswestry 2050" outline, but it was not intended to be the plan. To make a single proposed allocation in the name of "Oswestry 2050" is to miss the point entirely. -The proposal includes provision for key worker housing for the RJAH Hospital and Derwen College, which is to be welcomed. However, no mechanism is proposed to ensure that this comes about, rather than market housing being supplied. -The site location itself presents conflicts, being identified to meet Oswestry needs but being located in Whittington Parish and close to employment sites in Gobowen Parish. What will happen to CIL? Due to distance from Oswestry, it should be treated as a Whittington Parish matter, particularly as we have argued above that there is no need for further allocations for Oswestry. -Para 5.194 of the Draft Local Plan refers to 'the Indicative Masterplan and Transport and Movement Strategy for Oswestry town', although we have been unable to locate such a document in the Evidence Base. -Note proposed allocations at Park Hall have been altered substantially since Preferred Sites, although no explanation is apparent. These changes include specific sites and overall capacity. The Residential Conclusions Map for the SLAA indicates PKH029 and PKH013 were rejected, so it is surprising they are now put forward as proposed allocations. Site PKH007 does not appear on the SLAA Residential Conclusion Map at all. <u>Based on the above it is illogical, and seemingly unsustainable, to treat allocations at Park Hall as being to satisfy need at Oswestry and some of the new allocations now proposed for Park Hall are in any case on rejected sites</u>
A1176B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Disagrees with designation of Trefonen as a community hub and feels it should be classified as "other rural" as it doesn't have significant employment or peak public transport. New development in the settlement would see people seek employment outside the village which would be contrary to Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's Zero Carbon aims. Equally if Trefonen does not qualify as a hub the development boundary should be removed. The proposed level of development would see a 15% increase in the size of the settlement and would be difficult for the character of the village to remain and put a strain on services. No consideration given to the setting of Offa's Dyke which runs through the village
A1176B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The Hierarchy of settlement document should give greater weight to key criteria such as employment opportunities and peak time public transport; the lack of these services can not be made up for from a range of other services. Without employment or a peak time public transport service the need to travel by car increases and the Councils SP3 Climate Change policies can't be delivered. This is the case in Trefonen and so the village should be designated as "other rural"
A1176B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Policy S.14.1(i) Residential Allocations Site OSW017 Land at Trefonen Road, Oswestry This site, allocated for Open Market development of 30 dwellings, will compound traffic congestion, with its inherent safety and health issues, outside schools on Upper Brook Street & Trefonen Road. When considered with the additional traffic from 50 additional dwellings proposed for Trefonen (which has no employment or peak time public transport) this increased pressure on existing restricted infrastructure will be unsustainable, and also increase pollution & carbon emissions from queuing, contrary to policy SP3 Climate Change
A1178B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The Hierarchy of settlement document should give greater weight to key criteria such as employment opportunities and peak time public transport; the lack of these services can not be made up for from a range of other services. Without employment or a peak time public transport service the need to travel by car increases and the Councils SP3 Climate Change policies can't be delivered. This is the case in Trefonen and so the village should be designated as "other rural"
A1178B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Policy S.14.1(i) Residential Allocations Site OSW017 Land at Trefonen Road, Oswestry This site, allocated for Open Market development of 30 dwellings, will compound traffic congestion, with its inherent safety and health issues, outside schools on Upper Brook Street & Trefonen Road. When considered with the additional traffic from 50 additional dwellings proposed for Trefonen (which has no employment or peak time public transport) this increased pressure on existing restricted infrastructure will be unsustainable, and also increase pollution & carbon emissions from queuing, contrary to policy SP3 Climate Change

No consideration given to the setting of Offa's Dyke which runs through the village
A1188B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	OSW049 and OSW050 should be preferred allocations. Oswestry's housing is being delivered by one large site in Park Hall – to much reliance on one site when smaller sites in strategic locations would be more sustainable.
A1394B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	This site, allocated for Open Market development of 30 dwellings, will compound traffic congestion, with its inherent safety and health issues, outside schools on Upper Brook Street & Trefonen Road. When considered with the additional traffic from 50 additional dwellings proposed for Trefonen (which has no employment or peak time public transport) this increased pressure on existing restricted infrastructure will be unsustainable, and also increase pollution & carbon emissions from queuing, contrary to policy SP3 Climate Change
A1394B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Hierarchy of Settlements 2020 - Para 5.41 a) This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. The suggestion in Para 5.41 that a "larger range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. b) Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria. Trefonen is the only proposed Hub settlement with neither of these key requirements, and so its designation as such is "unsound". Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria.
A1394B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	1) Designation of Trefonen as a Community Hub settlement Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6. Trefonen has no "significant employment opportunities; or "peak time public transport" It is the only proposed Hub settlement with neither of these key requirements. Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria. Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in Trefonen. Walking, wheeling or cycling to Oswestry are not safe or practical alternatives. That is contrary to Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's Zero Carbon aims. It is also contrary to the Draft Local Plan "Spatial Vision" and SP3 Climate Change which seek to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and is therefore "unsound". It should be designated "Other Rural" settlement, for which it meets the full criteria. 2) Settlement Boundary Maps - Trefonen Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6 and should be designated as "Other Rural" settlement. Therefore it should not have a new defined Settlement Boundary. 3) Appendix 5: Residential Development Guidelines and Residential Supply Page 330 Trefonen Development Guideline 55 dwellings / Windfall Allowance 50 additional dwellings That is a build rate of 3 per year and a 15% expansion of the village of 324 existing dwellings. This is not "similar" to the recent rate and cannot be considered to be a "modest amount". The proposed growth would be excessive for the scale, layout, topography, historical assets and character of Trefonen. Multiple "small" developments to reach a "guideline" of 50 additional dwellings would have a cumulative impact amounting to the same, or arguably greater impact, as a large development over the course of time. Therefore, the guideline should be reduced to that required to meet "identified local needs" for truly "Affordable Homes" for local people at a guide rate of 1 per year – Guideline 18 Windfall Affordable Homes.
A1639B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The guideline for 60 dwellings is too high – it is out of proportion as there are only 149 existing dwellings (40% increase). County-wide, there is an increase of 25%, therefore Kinnerley guidelines should be for 37 dwellings. 23 new houses have been built since Nov 2012, so with the 60 guideline it would be a 66% increase in the numbers houses in the village. There is no justification for an increase on this scale. The figure should be no more than 50. We endorse the revised boundary on the Kinnerley map. The 2007 Design Statement and Landscape Character Assessment for the Parish of Kinnerley should be added to the evidence base. The Hierarchy of Settlements score should be amended following the re-opening of the Cross Keys Inn.
A1639B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Modest levels of development have occurred in Maesbrook, Dovaston and Knockin Heath – it is demonstrated that there will be 25 new dwellings here. The expectation in the Kinnerley Parish Neighbourhood Plan was that these settlements should have only 24 new dwellings. They are therefore already subject to more development than expected. Now that we are being encouraged by Shropshire Council to regard the village of Kinnerley as our Development Hub, we consider it inappropriate that local needs that are best met by sites close to Kinnerley village might be met in these outlying villages, which are not sustainable in the same way as Kinnerley village. In the absence of any updated and differently worded Type and Affordability of Housing SPD, we therefore wish to opt out of having Maesbrook, Dovaston and Knockin Heath designated as a Community Cluster, subject to the two sites in Maesbrook remaining as allocated sites.
A1782B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Oppose identification of site OSW017 as a site allocation.
A1783B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Oppose identification of site OSW017 as a site allocation.
A1784B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Oppose identification of site OSW017 as a site allocation.
A1785B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Oppose identification of site OSW017 as a site allocation.
A1786B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Oppose identification of site OSW017 as a site allocation.
A1834B05	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area		Consider that proposed site allocation PKH002, PKH011, PKH013, PKH029, PKH031 & PKH032 would result in a likely impact on the SRN, as such it should be subject to consultation with Highways England, and appropriately assessed in line with the Circular, to determine the extent of its potential impacts on the SRN. Depending on the scale of likely impact on the SRN, the applicant/developer may need to identify suitable mitigation measures. The type of potential impact on the SRN and immediate SRN junctions likely to be impacted by each site is summarised as follows: PKH002, PKH011, PKH013, PKH029, PKH031 & PKH032: traffic; A5/ A495 Whittington roundabout. Whilst we have identified the immediate SRN junctions in close proximity to the site allocations identified in the pre-submission version of the Local Plan, where a likely impact is anticipated, it should be noted that the assessments should not be limited to these junctions only and a wider extent needs to be considered based on the scale of the proposed development.
A1834B06	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area		Consider that proposed site allocation PYC021 would result in a likely impact on the SRN, as such it should be subject to consultation with Highways England, and appropriately assessed in line with the Circular, to determine the extent of its potential impacts on the SRN. Depending on the scale of likely impact on the SRN, the applicant/developer may need to identify suitable mitigation measures. The type of potential impact on the SRN and immediate SRN junctions likely to be impacted by each site is summarised as follows: PYC021: traffic; A483 Section. Whilst we have identified the immediate SRN junctions in close proximity to the site allocations identified in the pre-submission version of the Local Plan, where a likely impact is anticipated, it should be noted that the assessments should not be limited to these junctions only and a wider extent needs to be considered based on the scale of the proposed development.
A1834B07	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area		Consider that proposed site allocation LYH007 would result in a likely impact on the SRN, as such it should be subject to consultation with Highways England, and appropriately assessed in line with the Circular, to determine the extent of its potential impacts on the SRN. Depending on the scale of likely impact on the SRN, the applicant/developer may need to identify suitable mitigation measures. The type of potential impact on the SRN and immediate SRN junctions likely to be impacted by each site is summarised as follows: LYH007: drainage; A483 Section. Whilst we have identified the immediate SRN junctions in close proximity to the site allocations identified in the pre-submission version of the Local Plan, where a likely impact is anticipated, it should be noted that the assessments should not be limited to these junctions only and a wider extent needs to be considered based on the scale of the proposed development.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1839B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Agree	Please note that whilst we have indicated that we agree with the site, we would say that given the choice we would prefer that this development didn't proceed. However we do note that a number of the issues that have been previously raised have been addressed and therefore feel that on this basis an outright objection is not appropriate. We would however take the opportunity to stress the following points: This site is appropriate in extent. Its fits with a natural division between village and countryside and it should not be used as a reason (excuse) to extend the development boundary further in the future. The allocation has been reduced to 25 dwellings and this must be honoured at the planning permission stage. This is one of the primary points previously raised and this housing density is more in keeping (although still considerably higher) with the surrounding existing residential properties. The woodland coppice bordering the development must be given appropriate protection as we are keen to ensure that this remains a 'sanctuary' for badgers, foxes, birds of prey etc. The proposed traffic calming measures and access design must ensure that the potential for decelerating and accelerating vehicles (of particular note large lorries at 3am) isn't increased. This would otherwise considerably increase the road noise/vibrations to existing properties in the village and would be unpleasant at best for the residents of the new properties.
A1844B03	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Development should not adversely affect the canal corridor in terms of its structural integrity, landscape, ecological quality and character. Development should respond positively to the adjacent canal corridor and maximise benefits for local communities. We also advise that there is a culvert under the canal (culvert 90) and future proposals will need to demonstrate that any discharge during or after construction will not adversely affect this.
A1845B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	OSW017 should not be a preferred site. It has issues with: Highways, Ecology, Heritage, Landscape, flood risk, proximity to amenities and facilities, scale and utilities. There are alternative sites within the Development Boundary which are suitable. Disagree with the Consultation Review on the site.
A1864B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	This site, allocated for Open Market development of 30 dwellings, will compound traffic congestion, with its inherent safety and health issues, outside schools on Upper Brook Street & Trefonen Road. When considered with the additional traffic from 50 additional dwellings proposed for Trefonen (which has no employment or peak time public transport) this increased pressure on existing restricted infrastructure will be unsustainable, and also increase pollution & carbon emissions from queuing, contrary to policy SP3 Climate Change.
A1864B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	1) Designation of Trefonen as a Community Hub settlement Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6. Trefonen has no "significant employment opportunities; or "peak time public transport" It is the only proposed Hub settlement with neither of these key requirements. Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria. Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in Trefonen. Walking, wheeling or cycling to Oswestry are not safe or practical alternatives. That is contrary to Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's Zero Carbon aims. It is also contrary to the Draft Local Plan "Spatial Vision" and SP3 Climate Change which seek to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and is therefore "unsound". It should be designated "Other Rural" settlement, for which it meets the full criteria. 2) Settlement Boundary Maps - Trefonen Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6 and should be designated as "Other Rural" settlement. Therefore it should not have a new defined Settlement Boundary. 3) Appendix 5: Residential Development Guidelines and Residential Supply Page330 Trefonen Development Guideline 55 dwellings / Windfall Allowance 50 additional dwellings That is a build rate of 3 per year and a 15% expansion of the village of 324 existing dwellings. This is not "similar" to the recent rate and cannot be considered to be a "modest amount". The proposed growth would be excessive for the scale, layout, topography, historical assets and character of Trefonen. Multiple "small" developments to reach a "guideline" of 50 additional dwellings would have a cumulative impact amounting to the same, or arguably greater impact, as a large development over the course of time. Therefore, the guideline should be reduced to that required to meet "identified local needs" for truly "Affordable Homes" for local people at a guide rate of 1per year – Guideline 18 Windfall Affordable Homes.
A1866B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	TrefonenThe Parish Council has raised many issues with this Plan and visited planners at the Shirehall, but nothing has changed. The Council has objected to the Hub status for Trefonen and the additional 50 dwellings up to 2038. Realistically what developer can afford to build one or two houses a year? They will either want to build the whole allocation or at least earmark a site for growth. Could this be what is planned for the site in Trefonen under the guise of Affordable/Cross Subsidy Exception sites? The Parish Council has invited the developer (STAR Housing) to discuss their plans with residents although no response has been received. No local needs has been identified, Trefonen does not have any "Significant employment" or "peak time transport" so the points system is flawed. Proposed "Community Hub" Status The Parish Council considers that Trefonen is NOT suitable to be designated as a "Community Hub" and argues as follows: 1) It is noted that, among other matters, hub status is assessed on a points basis and that Trefonen is said to have a "score" of 48 – the lowest for a community hub. It is clear that several of the matters considered give a false impression of the current level of sustainability and/or services. Whilst there is a bus service to and from Oswestry, it is very limited indeed. The school is very nearly full and it appears that it cannot expand on its current restricted site. It does not have a dedicated car park – the adjacent car park is technically limited to use by the village hall. There is a library but only in the form of a mobile visit every other week. The shop is somewhat limited in its capacity. Current usage and shopping patterns suggest that, in normal times (i.e. no Covid-19) many of Trefonen's inhabitants only use the shop in an emergency. They tend to use local supermarkets and/or home delivery. 2) It has been acknowledged that, effectively, there are no real employment opportunities. Given that, for the period between now and 2038, any future employment in the Oswestry area is likely to be focussed on the proposed enterprise site or business "parks" on the eastern side of Oswestry, it makes no sense to establish a hub to the south-west of the town; thus increasing traffic through and around the town. 3) Effluent from the village is passed down towards the water treatment near the Maesbury Road/A483 crossroads via a main sewer running to the north of Trefonen Brook. It has been stated in the past that the capacity of this outgoing sewer is sufficient for any future development of the village. Given that there have been reports that, on a number of occasions, there has been leakage after heavy rain from an manhole near the bottom of the field behind Woodland View, this assertion seems unlikely to be correct. 4) The matters referred to below also provide arguments against hub status: 2) Traffic and access to Oswestry and Beyond 1) The unclassified road through the village is a major through route from the Tanat Valley into Oswestry. Traffic is noticeably increasing. 2) Unless on a very small-scale further development in the village would result in significant additional traffic to and from Oswestry (and beyond) – particularly at the morning peak time. There are already increasing morning traffic hold-ups at the entry to the town – from before Oswestry School and on down Upper Brook Street. Increased traffic from Trefonen would exacerbate this rapidly growing problem. 3) The proposed development immediately outside the parish (see Pre-Submission Draft, Schedule S14.1(i)). Residential Allocations: OSW017 Land at Trefonen Road) would very significantly worsen the traffic holdups. 4) As mentioned above (para.1, ii), travel to and from places of likely local employment and further afield would, in the main, require access to use or cross the A5 (or the A483). Leaving aside any limited travel to the south, the only routes from Trefonen are Oswestry Road and through Morda (Weston Road). Neither route is suitable for significantly increased traffic. Proposed Residential Guideline Referring to Pre-Submission Draft, S14.2. Community Hubs: Oswestry Place Plan Area, it is noted that a Residential Guideline of 55 dwellings has been proposed. The Council considers the arguments for this number to be flawed. It is understood that this number has been developed on the basis of continuing the rate of completed dwellings during the 10 years preceding the plan period. Given that completions during that time amounted to around 1.5 per year, a rate of 2.5 per annum does not continue the current rate. Countryside Status, Development Boundary and Possible Long-term Sites 1) The Council has, at the time of the "Preferred Sites Consultation", expressed the view that Trefonen should continue to be "Countryside" with a limited number of "Affordable Homes" for local people and the current assessment policy for "Rural Exceptions" and "Affordable Housing" being applied. 2) The proposed development boundary changes may lead to speculative attempts to develop further sites adjacent to the small extensions on the west of the main road. These areas are almost all on the hillside with very limited access via narrow roads entirely unsuitable for increased traffic. 3) Whilst the Council reserves the right to make detailed comments if and when any of the sites suggested as Long Term Potential SLAA Residential Sites are subject to further consideration, the following comments are put forward at this stage: Sites 06, 08 and 010 have already been the subject of rejected development applications. Sites 04, 05, 010 & 011 give rise to concerns about access mentioned in (2) above. Sites 01, 09 & 015 All of these sites along the line of the Trefonen Brook have been the subject of rejection in past planning consultations. If built upon, significantly threaten the rural landscape of the valley along the stream. This area was in the past designated as of special landscape quality. Now that the "Planning for the Future White Paper" has been produced it blows holes in the draft Local Plan. New housing will be dictated by the government; not local planning authorities and no opportunity to object to development plans as there will be no local design code. New fixed rate infrastructure levy will replace S106 and CIL plus other changes. Should there be any significant development there must be improvements to local amenities, roads and transport links as it will impact on local roads, school places, crime and policing, employment opportunities and a knock-on effect to the surrounding villages and hamlets. 3) Rhydycroesau and Llanforda Realistically, apart from disused farm buildings being converted into homes, and although there is a local need for affordable housing in the area, the young people looking for affordable homes tend to look at Oswestry rather than areas within the parish of Oswestry Rural. Young people and their families cannot afford to buy homes in the ward. New people move in and it is them that do not want to see any new development; not the local families that have lived and worked in the area for generations. Rhydycroesau is a lovely village, with a church and village hall that is very pro-active, but there is no desire for any new homes. Other Comments The Parish Council supports the response made by the Trefonen Rural Protection Group.
A1868B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	This site, allocated for Open Market development of 30 dwellings, will compound traffic congestion, with its inherent safety and health issues, outside schools on Upper Brook Street & Trefonen Road. When considered with the additional traffic from 50 additional dwellings proposed for Trefonen (which has no employment or peak time public transport) this increased pressure on existing restricted infrastructure will be unsustainable, and also increase pollution & carbon emissions from queuing, contrary to policy SP3 Climate Change
A1868B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	1) Designation of Trefonen as a Community Hub settlement Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6. Trefonen has no "significant employment opportunities; or "peak time public transport" It is the only proposed Hub settlement with neither of these key requirements. Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria. Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in Trefonen. Walking, wheeling or cycling to Oswestry are not safe or practical alternatives. That is contrary to Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's Zero Carbon aims. It is also contrary to the Draft Local Plan "Spatial Vision" and SP3 Climate Change which seek to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and is therefore "unsound". It should be designated "Other Rural" settlement, for which it meets the full criteria. 2) Settlement Boundary Maps - Trefonen Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6 and should be designated as "Other Rural" settlement. Therefore it should not have a new defined Settlement Boundary. 3) Appendix 5: Residential Development Guidelines and Residential Supply Page330 Trefonen Development Guideline 55 dwellings / Windfall Allowance 50 additional dwellings That is a build rate of 3 per year and a 15% expansion of the village of 324 existing dwellings. This is not "similar" to the recent rate and cannot be considered to be a "modest amount". The proposed growth would be excessive for the scale, layout, topography, historical assets and character of Trefonen. Therefore, the guideline should be reduced to that required to meet "identified local needs" for truly "Affordable Homes" for local people at a guide rate of 1per year – Guideline 18 Windfall Affordable Homes.
A1880B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Trefonen should not be a Hub. It would cause irreplaceable damage to the community.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1893B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	1) Designation of Trefonen as a Community Hub settlementHaving studied the documentation, I do not believe that Trefonen meets the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6.Trefonen has no "significant employment opportunities; or "peak time public transport", and it appears that it is the only proposed Hub settlement with neither of these key requirements.Trefonen should therefore be designated "Other Rural" settlement, for which it meets the full criteria.Additionally, without either employment or peak time travel it is a certainty that daily car travel will be increased by additional housing in Trefonen. Walking or cycling to Oswestry are not safe or practical alternatives.That is contrary to Shropshire Council's Climate Emergency Policy, to the NPPF and to Government's Zero Carbon aims. It is also contrary to the Draft Local Plan "Spatial Vision" and SP3 Climate Change which seek to minimise travel and maximise trips by sustainable travel.Therefore it is clear that the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and is therefore "unsound".It should be designated "Other Rural" settlement, for which it meets the full criteria.2) Settlement Boundary Maps - TrefonenTrefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6 and should be designated as "Other Rural" settlement. Therefore it should not have a new defined Settlement Boundary.3) Appendix 5: Residential Development Guidelines and Residential Supply- Page 330 Trefonen Development Guideline is proposed as 55 dwellings / Windfall Allowance of 50 additional dwellingsThat is a build rate of 3 dwellings per year and a 15% expansion of the village of the 324 existing dwellings. This is clearly not "similar" to the recent rate and cannot be considered to be a "modest amount". The proposed growth would be excessive for the scale, layout, topography, historical assets and character of Trefonen.Multiple "small" developments to reach a "guideline" of 50 additional dwellings would have a cumulative impact amounting to the same, or arguably greater impact, as a large development over the course of time. Therefore, the guideline should be reduced to that required to meet "identified local needs" for truly "Affordable Homes" for local people at a maximum rate of 1 dwelling per year – Guideline 18 Windfall Affordable Homes. B) Hierarchy of Settlements 2020 - Para 5.41 SP2.2 Strategic Approach and SP.2.2:Community Hubs) This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services and facilities.The suggestion in Para 5.41 that a "larger range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport.This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed.b) Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub.That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria.Trefonen is the only proposed Hub settlement with neither of these key requirements, and so its designation as such is "unsound". Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria. C) SP2 Strategic Approach - Para 2 Housing Requirement - target of 30,800 This target is 19% in excess of the identified need of 25,894 for Shropshire. Shropshire Council is still pursuing its "highly ambitious" High Growth target.The incorporation of 1500 dwellings for the emerging Black Country Plan places an additional burden on Shropshire during the Plan period for the delivery of that additional supply to be provided as part of the annual 5 Year Housing Supply assessments.Both of these factors increase the risk of an "out of date" Plan due to economic fluctuations between now and 2038, which are completely outside the control of the Council. Additionally the Covid-19 pandemic has had short term effect on construction and its long term impact on the economy and growth is unknown. The impact on consumer demand for housing will be financially lead whilst in turn supply by developers is profit lead. Despite Government exaltations to "Build, Build, Build" the funding for Local Authority housing is limited and the supply is majority private sector.It is established fact that whenever there is a lack of demand, housing is not built, but developers pursue consent on otherwise unattainable land.An "out of date" Plan holds that inherent risk of exploitation by developers & landowners to gain consent for open market housing on sites not identified in the Plan, which will be contrary to the aims of "Right Homes in Right Place" in the Draft Housing Strategy 2020-2025.By the next Partial Review (5 yearly) the repercussions of the Covid-19 pandemic will be clearer, and the Housing Target can be adjusted to suit the new circumstances then, rather than increasing now when a downturn in demand and supply is widely predicted.In view of the changed and rapidly evolving world circumstances I would again implore that the 15% "High Growth" Target is reconsidered by the Council, and changed to a more deliverable "Moderate Growth" 5% above identified needs to avoid a potential "out of date" Plan in the coming years. Black Country Plan housing provision I acknowledge the requirement for cross boundary co-operation with neighbouring authorities.However, my concern is the incorporation of the additional 1500 homes into the overall Shropshire Housing Target.This will increase pressures on settlements across the county for the supply of 'out of county' needs unless sites or location close to that region can be identified. If the aim is to supply housing for residents of the Black Country surely these must be located close to that area, and not anywhere across the whole county.I note the inclusion of Ironbridge Power Station strategic site into the housing supply calculation with 1000 potential homes, but that will not fulfil the full stated need. Sites need to be identified without impacting the Green Belt. D) Policy S.14.(i) Residential Allocations - Site OSW017 Land at Trefonen Road, OswestryThis site, allocated for Open Market development of 30 dwellings, will compound traffic congestion, with its inherent safety and health issues, outside schools on Upper Brook Street and Trefonen Road.When considered with the additional traffic from 50 additional dwellings proposed for Trefonen (which has no employment or peak time public transport) this increased pressure on existing restricted infrastructure will be unsustainable and will also increase pollution and carbon emissions from queuing contrary to policy SP3 Climate Change
A1926B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Trefonen should not be a hub – does not meet full definition in the HoS. It should be Open Countryside. There is no peak public transport or sig. employment opportunities – it is the only Hub without these. Reliance on car travel would be contrary to SP3. The planned growth is excessive given the recent trends and the character of the settlement. It should be affordable housing at a rate of 1 per year.
A1926B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The site would have issues with traffic, health and safety (close to schools) and would increase pollution and carbon emissions (especially when coupled with the 50 proposed at Trefonen).
A1934B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Trefonen should not be a hub – does not meet full definition in the HoS. It should be Open Countryside. There is no peak public transport or sig. employment opportunities – it is the only Hub without these. Reliance on car travel would be contrary to SP3. The planned growth is excessive given the recent trends and the character of the settlement. It should be affordable housing at a rate of 1 per year.
A1934B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The site would have issues with traffic, health and safety (close to schools) and would increase pollution and carbon emissions (especially when coupled with the 50 proposed at Trefonen).
A2101B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Disagree with designation of Trefonen as a community hub. It has no significant employment opportunities or peak time public transport; The lack of these facilities will require people to use private vehicles to travel to employment thus impacting on Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's Zero Carbon aims. It is also contrary to the Draft Local Plan "Spatial Vision" and SP3 Climate Change which seek to minimise travel & maximise trips by sustainable travel. Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6 and should be designated as "Other Rural" settlement. Therefore it should not have a new defined Settlement Boundary. Guideline for development in the village is too high and would change the character of the village
A2101B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Trefonen should not be designated as a Hub. Hierarchy of Settlements 2020 - Para 5.41 a) This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. The suggestion in Para 5.41 that a "large range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. b) Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub. That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria. Trefonen is the only proposed Hub settlement with neither of these key requirements, and so its designation as such is "unsound". Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria.
A2101B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	This site, allocated for Open Market development of 30 dwellings, will compound traffic congestion, with its inherent safety and health issues, outside schools on Upper Brook Street & Trefonen Road. When considered with the additional traffic from 50 additional dwellings proposed for Trefonen (which has no employment or peak time public transport) this increased pressure on existing restricted infrastructure will be unsustainable, and also increase pollution & carbon emissions from queuing, contrary to policy SP3 Climate Change
A2102B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Disagree with designation of Trefonen as a community hub. It has no significant employment opportunities or peak time public transport; The lack of these facilities will require people to use private vehicles to travel to employment thus impacting on Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's Zero Carbon aims. It is also contrary to the Draft Local Plan "Spatial Vision" and SP3 Climate Change which seek to minimise travel & maximise trips by sustainable travel. Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6 and should be designated as "Other Rural" settlement. Therefore it should not have a new defined Settlement Boundary. Guideline for development in the village is too high and would change the character of the village
A2102B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Trefonen should not be designated as a Hub. Hierarchy of Settlements 2020 - Para 5.41 a) This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. The suggestion in Para 5.41 that a "large range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. b) Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub. That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria. Trefonen is the only proposed Hub settlement with neither of these key requirements, and so its designation as such is "unsound". Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria.
A2102B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	This site, allocated for Open Market development of 30 dwellings, will compound traffic congestion, with its inherent safety and health issues, outside schools on Upper Brook Street & Trefonen Road. When considered with the additional traffic from 50 additional dwellings proposed for Trefonen (which has no employment or peak time public transport) this increased pressure on existing restricted infrastructure will be unsustainable, and also increase pollution & carbon emissions from queuing, contrary to policy SP3 Climate Change
A2103B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Disagree with designation of Trefonen as a community hub. It has no significant employment opportunities or peak time public transport; The lack of these facilities will require people to use private vehicles to travel to employment thus impacting on Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's Zero Carbon aims. It is also contrary to the Draft Local Plan "Spatial Vision" and SP3 Climate Change which seek to minimise travel & maximise trips by sustainable travel. Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6 and should be designated as "Other Rural" settlement. Therefore it should not have a new defined Settlement Boundary. Guideline for development in the village is too high and would change the character of the village
A2103B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Trefonen should not be designated as a Hub. Hierarchy of Settlements 2020 - Para 5.41 a) This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. The suggestion in Para 5.41 that a "large range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. A2147B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Hierarchy of Settlements 2020 - Para 5.41 a) This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. The suggestion in Para 5.41 that a "larger range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. b) Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria. Trefonen is the only proposed Hub settlement with neither of these key requirements, and so its designation as such is "unsound". Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria.
A2147B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	1) Designation of Trefonen as a Community Hub settlement Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6. Trefonen has no "significant employment opportunities; or "peak time public transport" It is the only proposed Hub settlement with neither of these key requirements. Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria. Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in Trefonen. Walking, wheeling or cycling to Oswestry are not safe or practical alternatives. That is contrary to Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's Zero Carbon aims. It is also contrary to the Draft Local Plan "Spatial Vision" and SP3 Climate Change which seek to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and is therefore "unsound". It should be designated "Other Rural" settlement, for which it meets the full criteria. 2) Settlement Boundary Maps - Trefonen Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6 and should be designated as "Other Rural" settlement. Therefore it should not have a new defined Settlement Boundary. 3) Appendix 5: Residential Development Guidelines and Residential Supply Page330 Trefonen Development Guideline 55 dwellings / Windfall Allowance 50 additional dwellings That is a build rate of 3 per year and a 15% expansion of the village of 324 existing dwellings. This is not "similar" to the recent rate and cannot be considered to be a "modest amount". The proposed growth would be excessive for the scale, layout, topography, historical assets and character of Trefonen. Multiple "small" developments to reach a "guideline" of 50 additional dwellings would have a cumulative impact amounting to the same, or arguably greater impact, as a large development over the course of time. Therefore, the guideline should be reduced to that required to meet "identified local needs" for truly "Affordable Homes" for local people at a guide rate of 1per year – Guideline 18 Windfall Affordable Homes.
A2149B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Hierarchy of Settlements 2020 - Para 5.41 a) This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. The suggestion in Para 5.41 that a "larger range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. b) Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria. Trefonen is the only proposed Hub settlement with neither of these key requirements, and so its designation as such is "unsound". Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria.
A2149B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	This site, allocated for Open Market development of 30 dwellings, will compound traffic congestion, with itsinherent safety and health issues, outside schools on Upper Brook Street & Trefonen Road.When considered with the additional traffic from 50 additional dwellings proposed for Trefonen (which hasno employment or peak time public transport) this increased pressure on existing restricted infrastructurewill be unsustainable, and also increase pollution & carbon emissions from queuing, contrary to policy SP3Climate Change
A2172B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	a) The key criteria for "Community Hub" status ,requiring "significant employment opportunities; and "peak time public transport"clearly does not apply to Trefonen,and the idea that this can be overruled by virtue of a playground and green spaces(para 5.41) is irrefutably incorrect.Trefonen is the only settlement proposed as a Hub which fails to meet these key croteria. This factor alone shows that Trefonen cannot possibly be regarded as meeting the necessary criteria for a Community Hub status,and its designation as such is therefore Unsound.It should be allocated Other Ruual Staus,for which the criteria are met. In the absence of employment in the immediate vicinity,any new houses would need its occupants(should any be found) to commute,probably significant distances,eg to the East of the County,with consequent damage to the environment and to traffic congestion.
A2172B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Site OSW017 Land at Trefonen Road, Oswestry30 dwellings on this site will increase traffic congestion outside schools on Upper Brook Street & TrefonenRoad.We must also consider the proposals for the extra building in Trefonen,which will add to thiscongestion.Both these plans are also contrary to all efforts and regulations designed to minimise human damage tothe environment.
A2172B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Objects to designation of Trefonen as a community hub, as it doesn't reach the criteria designation for employment opportunities and public transport. Any new homes would require people living there to drive outside the village for employment. Allocation is contrary to SC Climate Emergency Policy, NPPF and Governments Zero Carbon aims Trefonen should be designated other rural and not have a settlement boundary. The proposals represent a 15% increase in the size of the village which would be excessive and destroy the village character
A2173B05	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Our review of this document concluded that there is no baseline rationale provided with regard to value and sensitivity and the statements within this report appear to be very subjective. The Introduction states what they are but not how the evidence has been arrived at. The statements appear to largely contradict the Natural England National Character Area NCA Profile: 63 Oswestry Uplands (NE548) in relation to the content of landscape and settlement underpinned through work undertaken in conjunction with Historic England. We consider that it comprises notes around poor "parcel" boundaries; poor choice, quality and application of photographs, some of which are incorrectly recorded or duplicated, which err to showing the "low quality" areas that they have seen rather than the good quality aspects and prospects of the village and its setting and surroundings. The splitting of Offa's Dyke SAM between two different "parcels" of their assessment and then saying they are short lengths within them indicates a fundamental lack of appreciation that Offa's Dyke is a historic linear feature running along the length of the national border. The Report fails to consider the views of and over Offa's Dyke SAM from Offa's Dyke Path National Trail where it emerges from the current village boundary along The Gutter HER - PRN30616 We attach our own Trefonen - Landscape & Heritage visuals to show our village in the way that we believe that it warrants. Prior to unification, Oswestry Borough Council designated all the countryside surrounding Trefonen as an "Area of Special Landscape Character", completely different to Gillespie's opinion. Within the original Trefonen Treffach & Nantmawr Village Design Statement there is a "green wedge" coming into the centre of the village. There is strong resident support for this remaining, confirmed by:- many objections to Application Ref 14/00426/OUT (SLAA Site 006) and in the updated 2016 VDS:- -"Landmarks and strategic views in and out of the settlements must be protected and promoted." -"The character of Trefonen must be maintained by the protection from development of the open land and countryside of outstanding beauty which surrounds the present settlement." -"There are no sites outside the former development boundary suitable for development." The views both in and out of the village are highly valued by residents and visitors and are fundamental to maintaining the rural character of the village It is fundamentally key that Village Design Statements are formally acknowledged in the Local Plan as being "material considerations" for both Policy and Development Management decisions.
A2173B06	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Lack of appreciation of the value of Offa's Dyke SAM and ODP National Trail and Shropshire Way –heritage, landscape, leisure, and economic benefits.Lack of appreciation of Highways issues – "subject to appropriate access"There are serious constraints on the internal road network within Trefonen that would be exacerbated byany additional traffic, which cannot be resolved due to physical constraints.This should have ruled out many of the sites from "Future Potential"Long Term Potential for Employment developments" is suggested on all the sites around Trefonen.That form of development is patently going to be severely detrimental to the rural landscape and characterof a small rural village and its surrounding. Less impact would be from small scale rural diversification byre-development / re-purposing of existing building whilst providing employment opportunities.
A2173B11	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	This site, allocated for Open Market development of 30 dwellings, will compound traffic congestion, with itsinherent safety and health issues, outside schools on Upper Brook Street & Trefonen Road.When considered with the additional traffic from 50 additional dwellings proposed for Trefonen (which hasno employment or peak time public transport) this increased pressure on existing restricted infrastructurewill be unsustainable, and also increase pollution & carbon emissions from queuing, contrary to policy SP3Climate Change and Sustainability Objectives SO11 & SO12.
A2173B12	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	1) Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy ofSettlements Tables 2 & 6The full definition requires Hub settlements to have a combination of services and facilities; and have"significant employment opportunities; and public transport with a "regular service at peaktime" (employment businesses with more than 5 employees – Classes B, A2 Sui-Generis) (peak timebuses between 06.00-09.00 and 15.00-18.00 Mon-Fri all year).Trefonen has no "significant employment opportunities; or "peak time public transport"It is the only proposed Hub settlement with neither of these key requirements.Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria.2)a) Hierarchy of Settlements 2020 - Para 5.41. SP2.2 Strategic Approach & SP.2.2:Community HubsThis still includes a relaxation of these key criteria for "Community Hub" status requiring "significantemployment opportunities; and "peak time public transport"; as well as a combination of services &facilities.The suggestion in Para 5.41 that a "larger range" of services and facilities would compensate for the lack ofthese fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sportsfacilities & amenity green space cannot possibly compensate in any way for lack of employment and/orpublic transport. Additionally that "larger range" is not defined, and is purely subjective.This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and shouldbe removed.2)b) Hierarchy of Settlements 2020 - Para 5.41Additionally, without either employment or peak time travel it is certa that daily car travel will be increasedby additional housing in Trefonen.Other forms of Sustainable Travel are not safe or practical on a daily basis throughout the year.i) Walking – whilst there is a pavement on the main road to Oswestry this is narrow and impeded byhedges for the majority of the year forcing pedestrians onto the carriageway. There is no street lighting.ii) Wheeling – the width of the pavement would not accommodate wheelingiii) Cycling – is possible but the route involves steep hill with crests & corners with double white lines. Atpeak times the road is busy with commuting & school traffic and school, and used by agricultural anddelivery vehicles of all sizes. There is no street lightingiv) Buses – there is a no daily peak time service and very limited public service at other times (only 1mid-morning outward – 1 early-afternoon return daily)That is contrary to Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's ZeroCarbon aims. It is contrary to the "Spatial Vision" and SP3 Climate Change and Sustainability ObjectivesSOS, SO6, & SO12 which seek to minimise car travel and maximise trips by sustainable travel, and toreduce carbon emissions.
A2173B13	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	2)b) Hierarchy of Settlements 2020 - Para 5.41 cont/The travel routes to employment and services involve passing through Oswestry town centre withadditional traffic adding to congestion with its inherent safety and health issues outside schools on UpperBrook Street & Trefonen Road; or through Morda & Weston with impact on those settlements which already suffer excess traffic problems. Contrary to Sustainability Objectives SO11 & SO12.Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and itshould be designated "Other Rural" settlement, for which it meets the full criteria.3) Appendix 5: Residential Development Guidelines and Residential SupplyPage 330 Trefonen Development Guideline 55 dwellings / Windfall Allowance 50 additional dwellingsThat is a build rate of 3 per year and a 15% expansion of the village of 324 existing dwellings.This is not "similar" to the recent rate and cannot be considered to be a "modest amount".From our local knowledge and check of the SC planning portal, the build rate 2006- 2016 was 1per year(not 2per year stated in previous consultation), so the proposed 3per year is not a similar rate of growth.Using the terminology of the Council, 15% is considered to be "highly ambitious" High Growth, whereas 5%is Moderate Growth.The proposed growth would be excessive for the scale, layout, topography, historical assets and characterof Trefonen. It would also increase the risk of future pressures from developers for Open Market housingshould there be a shortfall of Housing Supply during the Plan period, which would not provide AffordableHousing for local people as intended.Multiple "small" developments to reach a "guideline" of 50 additional dwellings would have a cumulativeimpact amounting to the same, or arguably greater impact, as a large development over the course of time.We do not believe that this is the intention of NPPF in allowing Rural Exceptions outside rural settlements.Therefore, the guideline should be reduced to that required to meet "identified local needs" for truly"Affordable Homes" for local people – at a guide rate of 1per year – Guideline 18 Windfall AffordableHomes.We are also concerned that the proposal for 50 additional dwellings is only a "guideline" and not a definitivelimit, and that future pressures from developers for housing above that "guideline" would be approvedunder the "presumption in favour of sustainable development" adjacent to Trefonen if allocated Hub status.The core aim of "Rural Exception" policies is to deliver the "identified local needs" for Affordable Housing.This can equally be provided under "Other Rural – Countryside" status, which minimises this risk.We believe that Trefonen should retain its current "Other Rural – Countryside" status

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A2173B14	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	4) S.14.2. Community Hubs Settlement Boundary Maps - TrefonenTrefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6 and should be "Other Rural" settlement. Therefore it should not have a new defined Settlement Boundary. Without prejudice to the above, we are extremely concerned that the proposed Settlement Boundary creates "arms", which would encourage speculative applications for "infill" in the spaces between them outside of the proposed new boundary on the premise that they are "enclosed on 2 or 3 sides", particularly at the north. This could lead to an uncontrolled expansion of the village outside the proposed boundary.
A2173B20	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Evidence questioning the number of housing completions in Trefonen between 2006 and 2016. Level of past delivery is smaller than listed in the plan and so a smaller figure for future development should be included in the plan
A2173B21	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Photo evidence to show importance of Offa's Dyke path to historical importance of sites in Trefonen
A2178B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	This site, allocated for Open Market development of 30 dwellings, will compound traffic congestion, with its inherent safety and health issues, outside schools on Upper Brook Street & Trefonen Road. When considered with the additional traffic from 50 additional dwellings proposed for Trefonen (which has no employment or peak time public transport) this increased pressure on existing restricted infrastructure will be unsustainable, and also increase pollution & carbon emissions from queuing, contrary to policy SP3 Climate Change and Sustainability Objectives SO11 & SO12.
A2178B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	1) Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6. The full definition requires Hub settlements to have a combination of services and facilities; and have "significant employment opportunities; and public transport with a "regular service at peak time" (employment businesses with more than 5 employees – Classes B, A2 Sui-Generis) (peak time buses between 06.00-09.00 and 15.00-18.00 Mon-Fri all year). Trefonen has no "significant employment opportunities; or "peak time public transport" It is the only proposed Hub settlement with neither of these key requirements. Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria. 2) a) Hierarchy of Settlements 2020 - Para 5.41. SP2.2 Strategic Approach & SP.2.2: Community Hubs This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. The suggestion in Para 5.41 that a "larger range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space cannot possibly compensate in any way for lack of employment and/or public transport. Additionally that "larger range" is not defined, and is purely subjective. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. 2) b) Hierarchy of Settlements 2020 - Para 5.41 Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in Trefonen. Other forms of Sustainable Travel are not safe or practical on a daily basis throughout the year. i) Walking – whilst there is a pavement on the main road to Oswestry this is narrow and impeded by hedges for the majority of the year forcing pedestrians onto the carriageway. There is no street lighting. ii) Wheeling – the width of the pavement would not accommodate wheeling. iii) Cycling – is possible but the route involves steep hill with crests & corners with double white lines. A2308B17	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	KCK009 lies approximately 2km to the north-west of Nesscliffe Training Area and less than 1km south of Knockin Airfield, which is utilised by the MOD. Flying activity within these locations, undertaken in support of training for the front-line, produces a significant amount of low frequency noise which can be disturbing. Therefore, the proposed allocation would represent a cumulative increase in sensitive receptors to noise within this location and as a result has the potential to lead to an increase in noise complaints. For KCK009 to be in accordance with Para 95 of the NPPF (ensuring operational sites are not affected adversely by the impact of other development proposed in the area) and para 182 of the NPPF (existing businesses and facilities should not have unreasonable restrictions placed on them as a result of development permitted after they were established, with a requirement for the applicant to provide suitable mitigation before the development has been completed), it should make reference to a requirement for planning applications to be submitted with an appropriate noise assessment which takes into account noise arising from defence activities and provides appropriate mitigation solutions such as soundproofing. Applicants should engage with MOD in the production of such assessments. Furthermore, the site promoters of KCK009 should provide measures to enable future occupants to be made aware that military aircraft may be seen and heard operating in the area and that aircraft may overfly the site. The mitigation of noise in external areas may not be possible. Future occupants should also be made aware that aircraft types, flight paths and ground based activity can vary over time and this may cause disturbance.
A2369B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Hierarchy of Settlements 2020 - Para 5.41 * The criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. Para 5.41 suggests that a "larger range" of services and facilities would compensate for the lack of these fundamental criteria clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities & amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment & Hub designation "unsound" and should be removed. ** Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria. Trefonen is the only proposed Hub settlement with neither of these key requirements, and so its designation as such is "unsound". Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria.
A2369B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Policy S.14.1(i) Residential Allocations Site OSW017 Land at Trefonen Road, Oswestry There is already traffic congestion on Trefonen Road, especially as it enters Oswestry. A site of 30 dwellings will only add to this congestion, with its inherent safety and health issues, outside schools on Upper Brook Street & Trefonen Road. With 50 additional dwellings proposed for Trefonen (which has no employment or peak time public transport) this increased pressure on existing restricted infrastructure will be unsustainable, and also increase pollution & carbon emissions from queuing, contrary to policy SP3 Climate Change

A2369B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Designation of Trefonen as a Community Hub settlement Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6. Trefonen has no "significant employment opportunities; or "peak time public transport" It is the only proposed Hub settlement with neither of these key requirements. Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria. Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in Trefonen. Walking, wheeling or cycling to Oswestry are not safe or practical alternatives. That is contrary to Shropshire Council's Climate Emergency Policy, to NPPF, and to Government's Zero Carbon aims. It is also contrary to the Draft Local Plan "Spatial Vision" and SP3 Climate Change which seek to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and is therefore "unsound". It should be designated "Other Rural" settlement, for which it meets the full criteria.** Settlement Boundary Maps - Trefonen Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6 and should be designated as "Other Rural" settlement. Therefore it should not have a new defined Settlement Boundary. 3) Appendix 5: Residential Development Guidelines and Residential Supply Page330 Trefonen Development Guideline 55 dwellings / Windfall Allowance 50 additional dwellings That is a build rate of 3 per year and a 15% expansion of the village of 324 existing dwellings. This is not "similar" to the recent rate and cannot be considered to be a "modest amount". The proposed growth would be excessive for the scale, layout, topography, historical assets and character of Trefonen. Multiple "small" developments to reach a "guideline" of 50 additional dwellings would have a cumulative impact amounting to the same, or arguably greater impact, as a large development over the course of time. Therefore the guideline should be reduced to that required to meet "identified local needs" for truly "Affordable Homes" for local people at a guide rate of 1per year – Guideline 18 Windfall Affordable Homes.
A2371B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Hierarchy of Settlements 2020 - Para 5.41 * The criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services & facilities. A2378B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The development of housing, on the potential sites 006, 008, 010, 015 & 017 would have an adverse impact on both the setting of Offa's Dyke (a Scheduled Monument) and the Offa's Dyke National Trail path.The Offa's Dyke Association (ODA) would be very concerned in particular, at the prospect of any development on Trefonen 008. This field contains a section of Offa's Dyke (SM) along the entire eastern side of the site - inside the hedge-line and clearly visible to walkers from the National Trail path. Any development of this field, would be contrary to the guidance laid down in the Offa's Dyke Conservation Management Plan (ODCMP 2018) - which has been adopted by regional authorities along the length of the monument, including Shropshire Council.Section 7 of the ODCMP: 'Planning and Other Policy Relevant to Offa's Dyke Observations and Recommendations, states: "Appropriate regard should be had for the setting of the monument, so that the Dyke's social, historical and landscape context is protected and its purpose may be better understood. The setting of the monument should be protected from inappropriate development. Setting should take account of the line of the monument, whether or not Offa's Dyke survives as an upstanding earthwork. An appropriate and effective cordoned area should be maintained between the defined boundaries of the monument and the boundaries of development. This boundary should be formally defined as part of the planning process; and planning conditions should be used to enforce this".The ODA would also have very strong reservations in the event of housing development on Trefonen 010, as this would be immediately adjacent to (and overlook) the Offa's Dyke National Trail path.Development on 006, 015 & 017 would not affect the monument as much as on 008 & 010, but would still go against the core principles of the Offa's Dyke Conservation Management Plan. The above ODCMP recommendations would also apply in these cases.The Offa's Dyke Conservation Management Plan provides a proactive plan for the entire monument and details the conservation principles which will help to preserve it for the future. If required, the ODA would be pleased to provide a copy of this important document, to ensure that all lengths of the monument in Shropshire can be suitably protected.
A2402B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	Do not agree to the proposal - Weston Rhyns current infrastructure wont be able to welcome new and sustain extra housing. Roads are already narrow plus have constant parking from current roads leading to one way system ability only. Through traffic already dont do the speed limit so putting more traffic on the roads will lead to more accidents and cause Weston Rhyn not to be safe environment for childrens. Sewage is limited and field floods given any rain. The countryside community feel will be disrupted and the current beautiful view will be ruined. House prices will plummet and council tax will increase leaving many families unable to financially survive.
A2443B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	In earlier discussions with the Officer it was agreed that a total of 51 houses for the whole Parish would be developed up to 2036, this would be in addition to the 35 already planned for Meadowdale at the rear of Llanymynech village hall. Making a total of 86 in all, and that most of those homes would be developed in Llanymynech with a mix of house types and sizes. It was agreed that due to the landscape in Pant there were no suitable sites for development. Further now that the Llanymynech & Pant Bypass consultation and site investigation has been agreed by the Government any planning proposals for the villages of Llanymynech & Pant must be stalled until such time as a route has been agreed in principle.
A2443B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	There are existing water pressure issues in the village, this site would make this worse. Penygarrag Lane would be an unsuitable access. Unsuitable location along busy road, with fast vehicles and blind bends. Poor air quality in the village, and this would cause noise pollution. The dwelling number (25) is too high for the site. There are protected species in the woodland nearby. Some of the site floods. The site being adjacent to the very busy A-road is perilous and objectionable. The Llanymynech & Pant Bypass consultation and site investigation has been agreed by the Government and any planning proposals for the villages of Llanymynech & Pant must be stalled until such time as a route has been agreed in principle.
A2453B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	The SLAA appraisal was a flawed process. The cutoff benchmark for what constituted a community hub was quite arbitrary. Communities on either side of this mark could easily have disagreed with the outcome. In North Shropshire the decision to distribute more housing into smaller communities where infrastructure was more limited was mistaken. Other constituency areas had a better balance going to the larger settlements where existing infrastructure will be able to cope with new development. CIL /s106 money would have not been sufficient to cover the gaps in infrastructure. So in the north more development should have been allocated to the larger settlements. This has distorted allocations with less sustainable sites being allocated where other more sustainable sites were available within the settlement itself or in another settlement. West Felton is just over the threshold to be a community hub. The village has twice voted to stay as open countryside. The parish council has recently withdrawn its support for hub status. This was due to the implications of the White Paper and on sustainability grounds. Not with standing that the site allocated is the wrong site. There are other more sustainable sites nearer to the core of the village that are nearer to public transport, the shop, the pub, the school and have better access
A2455B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S14 Oswestry Place Plan Area	Disagree	1) Designation of Trefonen as a Community Hub settlement Trefonen does not meet the full Hub Definition for "Community Hub" status as set out in Hierarchy of Settlements Tables 2 & 6. Trefonen has no "significant employment opportunities; or "peak time public transport" It is the only proposed Hub settlement with neither of these key requirements. A0240B02	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	<p>2.18 NPPF paragraph 11b is clear that strategic policies should, as a minimum, provide for housing needs and other uses 'as well as any needs that cannot be met within neighbouring areas.'</p> <p>2.19 It is also clear that Local Plans should be 'based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground' (paragraph 35c).</p> <p>2.20 Principally, L&Q Estates welcomes the Council's recognition of its functional relationship with the Black Country and commends the positive dialogue undertaken between the relevant bodies through preparation of the DSLP11.</p> <p>2.21 However, there is significant concern regarding the quantum of the proposed contribution at 1,500 dwellings.</p> <p>2.22 Within its evidence base, the Council has published its correspondence with the Association of Black Country Authorities ('ABCA') comprising the following communications:</p> <ul style="list-style-type: none"> • 12.07.2018 - ABCA with Shropshire Council • 08.02.2019 - ABCA with Shropshire Council • 26.04.2019 - Shropshire Council with ABCA • 13.05.2019 - ABCA with Shropshire Council • 30.09.2019 - ABCA with Shropshire Council <p>2.23 In its correspondence of 13.05.2019, Wolverhampton Council (on behalf of the Black Country Authorities) welcomes the opportunity to provide additional evidence to enable Shropshire Council 'to make a positive recommendation to members to allocate land at M54 junction 3 for employment-led mixed use development'12.</p> <p>Crucially, the Black Country Authorities not only indicate a broad location considered appropriate in meeting their employment and housing shortfall, but suggest that a quantum of 3,000 dwellings would be an appropriate contribution:</p> <p>'With the exception of Shropshire, and those areas summarised above, other local authorities are either not currently progressing Local Plan reviews, have very limited physical capacity themselves or consider themselves to be too remote from the Black Country to be able to reasonably meet our needs. In this context, the strategic opportunity at M54 J3 of some 50ha of employment land, supported by provision of 3,000 homes to contribute towards meeting both the employment and housing needs of the Black Country would therefore make significant quantitative headway in addressing unmet needs for both employment land and housing in the Black Country.'13 [Emphasis added]</p> <p>ABCA later submitted further communications on 30.09.2019 strongly supporting the potential for land at M54 Junction 3 to be allocated in the DSLP, as well providing further justification relating to the strong functional economic relationship between Shropshire and The Black Country.</p> <p>Resultingly, strongly objects to the Council's proposed contribution of 1,500 dwellings to the Black Country unmet housing need, as opposed to a significantly larger contribution as suggested by ABCA.</p> <p>In the absence of a statement of common ground confirming ABCA's agreement to this quantum of contribution, the Council risks its plan being considered unsound by failing to satisfy NPPF paragraph 35c requiring 'joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground.'</p> <p>Consequently, considers it entirely appropriate for the existing safeguarded land at Land between Revells Rough, Lamledge Lane and the eastern rail line to be allocated for housing in order to further contribute to the Black Country's unmet housing need.</p> <p>This land has already been removed from the Green Belt and safeguarded through the Adopted Core Strategy to meet future housing needs. It is therefore recognised as being suitable for development and is available now in order to come forward through the early years of the new plan period.</p>

Infrastructure is not being improved despite recent development and a lot more on the way
A0290B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. Indeed, the town cannot cope with what has recently been built. Proposals do not account for existing and proposed employment areas within 10miles of the settlement and existing provision in the town. Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out. Proposed safeguarded land exceeds Shifnal's future housing needs and will destroy the village atmosphere. Employment proposals will exacerbate traffic problems/ gridlocks in the town centre. Additional commuters will inevitably use travel by car and use this route. Green Belt must be retained, particularly to the west. Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate
A0310B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	[Part 1 of 2] Employment Minimal amount of green belt should be lost. Windfall numbers are unsustainable, and no evidence provided. Safeguarded land & greenbelt will be subject to exception housing. Exceptional circumstances not possible if based uncertain figures. Housing site sizes not included. SHF013 & SHF015-29 – different densities in SLAA & PS – no explanation. Too much land allocated for guideline. Housing should be delivered post-2026 to allow for infrastructure provision to catch-up. Unclear how much employment land is needed. Ambiguity throughout re how much has been needed, and no justification, and site sizes. More land is allocated than needed. Increase in employment only in Shifnal and nowhere else – double counting 40% the total employment guideline figure. There are no local circumstances to justify the increase from 16ha to 41ha, as the 16ha originally proposed and announced to the TC, already included these adjustments which were applied to the whole County. There is, therefore, no exceptional circumstance to justify the removal of an additional 25ha of land from the Green Belt. ". The proportion of employment land to anticipated housing is higher than other settlements with no explanation. A recent application submitted an employment land assessment which concluded that a maximum of 2ha employment land for Shifnal could only be justified up to 2026. The Council have stated that the previous figure was "wrong". No reason was given why it was wrong. By allowing a disproportionate amount of employment land, it is more likely that this will lead to increased commuting into these employment areas from outside the town and result in pressure from developers to provide more housing, with potential adverse impacts on protection of Safeguarded Land and Green Belt. The proposed employment land is excessive - a cautious approach should be taken with employment land supply, which can then be reviewed when the effects of Covid-19 can be better assessed. There is already high provision of employment in this area along the M54 corridor (W Midlands Interchange, I54, Featherstone), as well as nearby areas (including Telford and the Black Country). No evidence for removing Green Belt and establishing that exceptional circumstances apply. No evidence for providing suppliers to Bridgnorth employment sites. No M54 access N onto M6. SC say that planned provision of new land for employment opportunities in the past has been limited. This is an incorrect statement. No evidence shown that a number of proposals for deliverable employment land in the town had been received. SC then stated in Oct 2019 that no formal approaches or expressions of interest to invest had been received. Strategic Sites & Employment Areas Assessment states there are no employment issues for the Shifnal Place Plan area & recommended no new allocations for Shifnal. Concern that the employment figure is proposed for beyond 2038 – casts doubt over 41ha in green belt justification. The balanced growth calculation for 1500 houses would require 16ha not 41ha. The Local Economic Growth Strategy has not progressed - SC have failed to progress a strategy for Shifnal. In 2018, the TC agreed to co-operate in a strategy for the town, but SC have not taken this any further. NO SC response to the TC's objections to SHF 18b and 18d. Illogical to allocate land in green belt when there is undeveloped land between it and the town boundary. SHF018a/P14 should be developed first. No evidence for improvements to Stanton Rd. The Green Belt Review states that releasing the land from the Green Belt would lead to a level of encroachment into the countryside to the E of Shifnal and a narrowing of the gap between Shifnal and Albrighton and weaken the integrity of neighbouring Green Belt. SHF018a/P14 would minimise these adverse effects. The release of western section of P13a would lead to a High level of harm to the Green Belt. The Green Belt Review States there is no clear boundary. The employment allocation should state High harm. SC have not examined fully all other reasonable options. The TC are concerned that SC have pre-determined the allocation of this site and failed to properly evaluate alternatives or to fully take into account comments received on the allocation. No viability assessment accompanied the Preferred Sites consultation for SHF18b & d, and it has a 'limited' SA rating.
A0310B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	[Part 2 of 2] Safeguarded Land Plan fails to give parcel references to the proposed Safeguarded Land, nor are these individual parcels identified on the proposals Map. Inconsistencies in the size of parcels of land included as proposed Safeguarded Land. Despite legal requirements to the contrary, the Plan does not consider the detailed objections raised to the original proposal (at Preferred Sites), how these have been taken into account and the reason for overriding these concerns. The TC object to the inclusion of the whole of SHF18/P14 as Safeguarded Land. The principal reason for the substantial release of Green Belt is to meet SC's underlying objective to expand the town to become a strategic centre. The TC object to this. The sites proposed do not satisfy the exceptional circumstances criteria. There is plenty of already committed employment land in neighbouring authorities in the M54 corridor. Covid-19 is likely limited demand for new land in the near future. Shifnal cannot compete with its proximity to Telford in terms of capacity/services. Concern that no strategic infrastructure will be delivered. The town does not want to be a strategic location where a large amount of development is allowed, substantially altering the existing character of the town. Local Plan is contrary to Neighbourhood Plan in places. The Plan does not address any of the points raised by the TC re the proposed neighbourhood community extension. No local public consultation on new strategic highway, the TC are against such a route. The TC has doubt that the highway would meet the full costs of the works, which would result in some costs falling on the public purse which is unacceptable. There is no traffic justification for the so called "by pass" and so no exceptional circumstances on this basis for the loss of Green Belt. The proposed bypass would not assist the traffic in the town centre. The TC rejects that the housing extensions will provide improvements at Five Ways and Innage Road. SC cannot know what the housing needs of the town will be beyond 2038. There is no evidence to substantiate that the railway arch between parcels P17a and SHF017north can physically take the full volume and type of traffic envisaged. The TC rejects that the housing extension will provide increased access to community facilities and commercial services and potential to offer further services. The TC rejects that the housing extension will provide a significant gain in Green Infrastructure and management of flooding. The TC reject that the housing extension will provide improved access into the town, to recreational open space and countryside in the Green Belt to enhance environmental quality and access. The proposed extension not to meet the needs of the town itself, but to meet some future strategic need, the TC objects to this. High Level of harm to Green Belt at land between the A4169 and railway land. SC should have consulted the local community when proposing Safeguarded land for development. TC objects to effectively allocate future development proposals on Safeguarded Land. Only Shifnal has proposals in Safeguarded Land, no other settlement does. Changes to Greenbelt boundaries should be reviewed by the Neighbourhood Plan. Shifnal has water supply and sewerage constraints. Protecting Greenbelt more important following Planning for Future from government. It is considered that no exceptional circumstances have been put forward to explain why only part of this Sub Opportunity Sh-1a has been designated as Safeguarded Land and not the whole area. The TC and Shifnal Matters consider that the amount of land proposed to be removed from the Green Belt and allocated as Safeguarded Land is excessive
A0310B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Concern over infrastructure deficiencies. The proposals do not "reflect the character, needs and opportunities of [Shifnal]," – NPPF. SC have failed to take into account the views of the local community and the TC - the town retains the character and feel of a village and the community largely wish it to remain so. SC have disregarded the long standing community views despite claiming local comments would be fully taken into account. Inconsistent proposals for deciding land being removed from greenbelt. No clearly defined Green Belt boundaries. The proposals take no regard to the Neighbourhood Plan's emphasis on the importance of the character of the town for existing and new residents. The loss of so much Green Belt is unjustified and not supported by credible evidence. The TC question why it was considered appropriate to mention the need to reflect the Neighbourhood Plan objectives at Market Drayton but not Shifnal. No credible evidence has been given to support the reason for changing the original proposal on employment land. The proposals take no logical and reasoned account of the Green Belt Review. The TC consider the proposals brought forward by Nurton Developments is unacceptable (land to the south of Shifnal adjoining either side of Upton Lane
A0310B8	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Concern over implications in the White Paper Planning for the Future, which particularly applies to the extensive changes from green belt to safeguarded land proposed for Shifnal where there must be a danger that safeguarded land could immediately be classified as a "Growth" area immediately developable rather than a "Protected" area not developable until post 2038. Recommend that SC consider its implications in determining the next stage of the review.
A0353B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. Proposals do not account for existing and proposed employment areas within 10miles of the settlement. Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out. Proposed safeguarded land exceeds Shifnal's future housing needs and will destroy the village atmosphere. Employment proposals will exacerbate traffic problems/ gridlocks in the town centre. Additional commuters will inevitably use travel by car and use this route. Green Belt must be retained, particularly to the west. Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate. Support the decision not to proceed with development at Tong. 36 acre site for Air Ambulance appears excessive in comparison with other site:

A0430B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Object to S15.1 for the following reasons: S15.1(1) states: "Shifnal will fulfil its role as a Key Centre and the largest settlement in the north of the Shropshire Green Belt. Shifnal will be the focus for investment, employment, housing and development on the M54/A5 Strategic Corridor through Shropshire with access to Junctions 4 and 3 with proximity to Wolverhampton and the i54 major investment site." But this is only true for the period to about 2025 and thereafter any new housing development is restricted to small windfall development. Shifnal can deliver more housing in the plan period and is suitable for more growth given its position within the M54/A5 Strategic Corridor. Support S15.1(2) refers to the Shifnal Neighbourhood Plan 2014-2026 and will respect policies and proposals that conform with the Local Plan. Similarly, support S15.1(11) says proposals should respond positively to the Neighbourhood Plan, as well as other community-led plans, community strategies, and masterplans adopted by Shropshire Council. S15.1(3) states: "Shifnal is inset into the Green Belt and planned development will only occur within the development boundary shown on the Policies Map. Development in the Green Belt may be permitted in 'very special circumstances' in accordance with national and local Green Belt policies that specify the appropriate land uses at the acceptable circumstances for this development." There is no issue in principle here although it is recommended that safeguarded sites be included within the development boundary. S15.1(4) says: "Shifnal will have a key role in providing homes, jobs, services and facilities to the Place Plan area, other Green Belt communities and the M54/A5 Strategic Corridor. Over the Local Plan period, the town will deliver around 1,500 dwellings and make available around 41 hectares of employment land to provide choice and competition in the market. New housing and employment will make provision for the needs of the town and surrounding hinterland, including attracting inward investment and allowing existing businesses to expand." There is no issue in principle here but the residential guideline of 1,500 may be being unnecessarily constrained and Shifnal could be considered suitable for a higher level of housing growth. Locating safeguarded land within the settlement boundary, the residential guidelines in the town would increase to around 2,765 homes. This might seem like a significant increase, only 1,495 homes would be from new allocations, including 1,265 at the safeguarded land and 230 from other housing allocations. Shifnal can accommodate this number of new homes from allocations, particularly with the necessary infrastructure in place, secured through reasonable s106/CIL contributions. S15.1(5) says new residential development will primarily be delivered through the saved SAMDev allocations and the new residential allocations in Schedule S15.1(i) and on Policies Map. 15.1. The SAMDev Plan residential allocations include: SHIF004a – Land south of Aston Road; SHIF004b – Land between Lawton Road and Stanton Road; SHIF006a – Land north of Wolverhampton Road. Appendix 5 shows the SAMDev Plan allocations have been completed or have planning permission. The new residential allocations at Schedule S15.1(i) include: SHF013 – Land adjoining Meadow Drive, Shifnal (65 homes); SHF015 & SHF029 – Land adjoining Beech House between A464 and Park Lane (65 homes); SHF022 & SHF023 (part) – Land between Windmill View and The Monument on A464, Shifnal (100 homes). Paragraph 5.204 says that given the past rate of housing delivery in Shifnal, all the supply of housing land could be delivered in its entirety by 2025. Thus, most of the housing provision set out S15.1(5) could be completed very quickly and then new housing in Shifnal would be limited to windfall development in the development boundary. This is a risky strategy putting pressure on land outside the settlement boundary. S15.1(6) says Shifnal will deliver a significant, new investment opportunity on the employment allocation in Schedule S15.1(ii) and on the Policies Map. This is supported since Shifnal is ideally placed for economic and employment growth being within the M54/A5 Strategic Corridor and would benefit from improved self-containment of the working population. S15.1(7) says land beyond the development boundary that is not part of the Green Belt is safeguarded for Shifnal's future development needs, as in Schedule S15.1(iii) and the Policies Map. The safeguarded land at Schedule S15.1(iii) includes: 4.5 hectares - Land adjoining junction of Stanton Road and Lamedge Lane; 9.4 hectares – Land adjoining Shifnal Hillcrest School and Shifnal Industrial Estate; 10.4 hectares – Land between Revells Rough, Lamedge Lane and the eastern rail line; 9.6 hectares – Land between A464 (south) and Park Lane; 46.1 hectares – Land between Park Lane and A4169 at Lodge Hill; 12.8 hectares – Land between A4169 and the western railway line The latter three sites comprise the land safeguarded for housing. There is no issue in principle here but it is considered that the settlement boundary could include safeguarded land, and there is a strong case to include a robust monitoring / 'Plan B' policy. Alternatively, this safeguarded housing land could be allocated. The benefits associated with the Site are set out at paragraph 5.214 of the plan. These objectives are commended for inclusion in the plan and consider that they could come forward in the plan period. S15.1(7) says that: 'Development of this [safeguarded] land during the Plan period will only be permitted in 'very special circumstances' to meet Shifnal's longer term development needs in accordance with national and local Green Belt policies.' S15.1(8) says: "To support Shifnal's role as a Key Centre and the importance of the town's distinctive retail offer and the need to sustain a vital and viable town centre, the town centre identified on the Policies Map is the preferred location for new or enhanced retail development. There is a presumption against out of centre retail development with the exception of the release of safeguarded land to the west and south of Shifnal in 'very special circumstances' to meet the longer term development needs of the town." Since there is no national requirement to demonstrate very special circumstances for development on safeguarded land a more robust approach may be to include a monitoring / 'Plan B' policy for safeguarded land, as previously highlighted. The recognition that retail development at the safeguarded housing land is appropriate is supported and indeed potential retail facilities will provide a choice and retain expenditure within the town. However, if the Site was allocated or included in a monitoring / 'Plan B' policy, then retail development could be controlled through Policy DP10. S15.1(9) is supported which says that development in the town will have regard to the town's natural and historic features, heritage assets, green corridors and spaces; and, the improvement of environmental quality, including the protection and enhancement of the corridor of the Wesley Brook and the effective drainage of river and surface water through the town particularly from the discharge of flood waters. S15.1(10) states that Shifnal will be a significant focus for the provision of infrastructure and services to meet the needs of the town and its wider catchment area, with current priorities set out in the Shifnal and Surrounding Area Place Plan which is supported and will contribute to the implementation of infrastructure through reasonable s106/CIL contributions arising from the development of safeguarded housing land which given the scale of this land would be significant.
A0430B7	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Object to the application of SP6(4) to the safeguarded land at Shifnal. SP6(4) indicates that development outside settlement boundaries would only be considered acceptable where there is clear evidence that the residential guidelines appear unlikely to be met or where there are specific considerations set out in the Settlement Policy: Obviously, the deliverability and the developability of sites in the plan may change over time, so there needs to be an element of flexibility to allow other sites to come forward, so this part of the policy is commended. However, it is suggested that the Council also add to this policy a hierarchy of sites that would be considered suitable for development in the event that the Council are unable to demonstrate a five year supply of housing land or in the event of other criteria being triggered. This should include the potential delivery of safeguarded sites before non-allocated sites. Such an approach would be aided by a monitoring / 'Plan B' policy similar to that applied by West Lancashire in their Local Plan. This would negate the requirement to formally review and update the plan before safeguarded land is brought forward. In this case, it is also noted that the Site is depicted as falling outside of the proposed Shifnal settlement boundary. This does not have to be the case. The NPPF simply confirms that safeguarded sites should be located between the existing urban area and Green Belt land. This means the settlement boundary can lie either side of the safeguarded allocation. However, including the safeguarded sites within the settlement boundary, would provide a helpful visual indication that such sites are deemed to be suitable for development (even if this is at a point in time in the future).
A0457B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Object to planned growth of Shifnal and removal of land from Green Belt for housing and industry without assessing full environmental impacts: loss of openness, loss of farmland, CO2 generation, flooding and climate change. Green Belt must be retained especially to west to separate Shifnal from Telford. The planned scale of growth will increase the population by 54% (compared to average growth of 23% in the County) and swamp the town's highway, transport, health and education infrastructure. Housing growth increases the existing scale of new development but this is concealed on low density sites. Employment growth takes no account of other large employment sites around Shifnal (10 mile radius) and will exacerbate traffic congestion in the town centre. Safeguarded land (equal to 130 football pitches) exceeds Shifnal's future housing need and destroys the town's village character. The presentation of this plan is riddled with contradictions, missing evidence and limits to public involvement.
A0458B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Object to planned growth of Shifnal and removal of land from Green Belt for housing and industry without assessing full environmental impacts: loss of openness, loss of farmland, CO2 generation, flooding and climate change. A0573B09	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Support S15.1 proposal to safeguard land from the Green Belt for future development. Support Green Belt Exceptional Circumstances Statement to build on the strategic location and accessibility of Shifnal. Issues to consider in selecting land for safeguarding include: Housing Need - in Shifnal local need is driven by historical constraints with low rates of development, early completion of more recent ambitious growth targets, prevalent and significant affordability ratio, proposal to partially meet Black Country needs and final completion of historical safeguarded land around the town. SHF018c is proposed for safeguarding on eastern edge of town as strongest opportunity to meet Black Country needs. Green Belt Assessments - sites SHF032, SHF018b, SHF018c and SHF108d make only limited contributions to purposes of Green Belt designations. This shows that a materplanning approach to manage siting, massing and landscaping of development would permit all three sites to be released from the Green belt for development to enable a significant extension to the north-eastern quadrant of the town. Preferred SW Safeguarded Land - this actually has the greatest impact on the Green Belt if released for development including coalescence of Shifnal and Telford contrary to NPPF para 134. Removal of parcel P17a from safeguarding also prevents delivery of full by-pass of A464. This requires use of A4169 and Five Ways Roundabout without any significant benefit to the strategic road junction, further impacts on town centre and on traffic associated with school to the east. Potential safeguarded land to NE has good relationship to school and proposed new employment area. The issues with SW safeguarded land will affect confirmation of exceptional circumstances for releasing Green Belt land for development. Sustainability - comparative assessment of land to NE and SW through SA and Site Assessment Environment Report shows SHF018c has better numeric sustainability assessment but SW land preferred due to perceived benefits. Removal of parcel P17a challenges this through the effect on the proposed by-pass. Rationale for removing SHF032 residential allocation is unclear because only limited weight made of proximity to Grade II* Aston Hall and land considered less sensitive to housing use than to employment use. It is unclear whether SHF032 properly assessed as a housing allocation. Heritage - SHF032 assessed as being in open landscape close to Aston Hall. Submitted heritage Impact Assessment is relative, mature planting screens the asset, already residential uses in ancillary and farm buildings and Hall mainly open to SE on opposite side of Hall. Historic England GPA3 Setting of Historic Assets states that assessment of setting almost always considers effect of views. Appropriate analysis under GPA3 indicates site has a marginal and residual relationship to heritage asset, secondary level of contribution to significance and minimal legibility of Hall from SHF032 which should be safeguarded for residential development. Supporting documents provided for site promotion.
A0573B12	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Support S15 commitments to: Shifnal as a location for significant growth between Wolverhampton and Telford Between Juncs 3 & 4 of M54; as a Key Centre and primary development location in northern Green Belt serving many Green belt communities; as a significant focus for infrastructure and services to meet the needs of its growing community and wider catchment. Approach to allocations and safeguarded land is questioned for the following reasons: except for SHF018b and SHF018d employment allocations that meet a clear need for additional employment in Shifnal the other identified sites are not the most suitable, available or justified. Although single storey restriction on development of SHF018b and SHF018d for supply chain industries in A5, M54 M6 corridors will constrain capacity of these strategically important sites to meet market demands and requirements. Aspiration for campus development better served by more limited footprints of two storey or higher developments. Historically constrained housing development justifies the release of SHF032 as this was previously accepted and justified for release from the Green Belt being located close to new residential development and providing a sense of place on Coppice Green Lane. Safeguarding of SHF018c will also provide for highly sustainable extension to Shifnal in a strategically significant location with good accessibility, service provision and proximity for active travel that could deliver new health/medical facility and new day care nursery.
A0573B13	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Support S15.1 to release SHF018b and SHF018d as two inter-related employment sites to significantly improve employment land offer, commercial premises, business representation and to promote and replenish employment in Shifnal. Two sites will support significant housing growth in the town bringing new labour into the local market. Location adjoining existing Shifnal Industrial Estate will create strong edge of town employment area providing modern commercial premises. Shifnal IE and two new allocations can be linked through future planning application rather than being a precursor for development. Proximity of new allocations to Stanton Road and Upton Lane will provide for active travel between town and employment area without physical links to existing built form of town. S15.1 must allow for broader range of employment uses on new allocations reflecting new Class E uses including former Class B1(a) office uses. Development guidelines should use submitted design approach within indicative masterplan and delete requirement for vision, design code and masterplan prepared as Supplementary Planning Document in consultation with public. These requirements are considered overly restrictive in relation to NPPF paras 81 and 87. Submitted indicative masterplan already facilitates flexible and responsive approach to design and delivery recognising contemporary economic requirements due to impacts of Covid-19. Transport considerations address sustainable location and proximity to town enabling promotion of active travel. However, the requirement to investigate Park & Ride is too restrictive and can be met using a conventional bus offer. Forecast 2026 indicates insufficient vehicle flow (200-300 vehicles/hour) to ensure adequate vehicle capture to deliver a satisfactory passenger pool for a P&R site and requirement should be removed from S15.1. Requirement for improvements along Stanton Road as the primary access to the employment allocations should be removed and only considered at planning application stage in relation to an appropriate traffic safety and capacity assessment.
A0573B14	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Schedule 7A should record sites SHF018b and SHF018d as deliverable in short to medium term. Submitted Employment Land Study shows no reason to delay the delivery of these two employment sites that will meet a current identified need and contribute to economic regeneration of Shifnal and Shropshire.

The presentation of this plan is riddled with contradictions, missing evidence and limits to public involvement. Further emphasis given to the suggestion that infrastructure constraints affect the capacity of the town to support further development and the need to protect agricultural land around Shifnal.
A0711B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Object to planned growth of Shifnal and removal of land from Green Belt for housing and industry without assessing full environmental impacts: loss of openness, loss of farmland, CO2 generation, flooding and climate change. Green Belt must be retained especially to west to separate Shifnal from Telford. The planned scale of growth will increase the population by 54% (compared to average growth of 23% in the County) and swamp the town's highway, transport, health and education infrastructure. Housing growth increases the existing scale of new development but this is concealed on low density sites. Employment growth takes no account of other large employment sites around Shifnal (10 mile radius) and will exacerbate traffic congestion in the town centre. Safeguarded land (equal to 130 football pitches) exceeds Shifnal's future housing need and destroys the town's village character. The presentation of this plan is riddled with contradictions, missing evidence and limits to public involvement. Further emphasis given to the suggestion that infrastructure constraints affect the capacity of the town to support further development and the need to protect agricultural land around Shifnal.
A0712B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. Proposals do not account for existing and proposed employment areas within 10miles of the settlement. Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out. Proposed safeguarded land exceeds Shifnal's future housing needs and will destroy the village atmosphere. Employment proposals will exacerbate traffic problems/ gridlocks in the town centre. Additional commuters will inevitably use travel by car and use this route. Green Belt must be retained, particularly to the west. Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate. Support the decision not to proceed with development at Tong. 36 acre site for Air Ambulance appears excessive in comparison with other site:

A0889B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Nurton Developments Limited are actively promoting their landholdings at Upton Lane, Shifnal for residential development and associated supporting uses. The site has been considered within the Stage 2 and 3 Assessments undertaken by Shropshire Council's Local Plans Team (site ref. SHF035). These assessments form part of the Council's site identification process and are published within the Sustainability Appraisal prepared in support of the Local Plan Review. The key findings of this review are as follows: • The Authority has erred in the site assessment process and, as such, the identification of site SHF034 for safeguarding is considered inappropriate and unsound; • There are a number of inconsistencies, alterations and omissions contained within the Stage 2 and 3 site assessment process and, as such, the evidence base which has informed the site identification process for the Local Plan Review is not robust and should be reviewed prior to any Regulation 19 Consultation or formal submission of the plan for Examination in Public; • The evidence base upon which the Stage 2 and 3 site assessments were undertaken is inconsistently utilised, does not follow best practice in principle and unfairly favours the sites identified for allocation or safeguarding early in the local plan review process. Our client's site is therefore considered to have been disadvantaged by an inconsistent approach to the site assessments; • Nurton Developments Limited are concerned that the evidence base requested by the Authority, and duly provided by the promoter, for site SHF035 does not appear to have been taken into account in the site assessments which support the current Regulation 18 consultation; • Despite information requests made by Nurton Developments Limited, there is a lack of technical evidence to support the selection of site SHF034 for safeguarding. Should such evidence exist, the Authority should have published this for public consultation and made clear reference to the assumptions upon which judgements were based. Without this evidence base, it is not possible to confirm that the site has been properly and appropriately assessed, nor does it allow objectors and interested parties to consider the relative merits of promoted land alternatives; • The Authority has erred in its judgement in identifying a single additional site for safeguarding beyond the plan period which will fail to offer the opportunity to identify appropriate development options in future; thereby committing to a significant future allocation which may not be the most suitable or sustainable option for the future growth of Shifnal; • The Authority has erred in the site assessment process and, as such, the identification of site SHF034 for safeguarding is considered inappropriate and unsound. The site is not sequentially preferable from a flood risk perspective, whilst the apparent driver for its safeguarding (the delivery of a new link road) is neither suitably tested nor deliverable; and Site SHF035, as evidenced through the submission of a range of site assessments and technical reports, is considered to perform better than SHF034 and should, therefore, be safeguarded for future allocation beyond the current plan period. More land could be safeguarded to provide the Authority with greater choice and flexibility in the future, particularly given the 'need' and 'affordability' challenges surrounding Shifnal; and having regard to likely Green Belt review restrictions as a consequence of the current White Paper (albeit that the substance of this might be altered). On the basis of the above, it is considered that the current Draft Local Plan Review, as contained within the Regulation 18 Consultation, is unsound, the evidence base should be updated and made publicly available for consideration, and that policies DP25 (Green Belt and Safeguarded Land) and S15 (Shifnal Place Plan Area) need to be amended. 5.1 Summary Nurton Developments Limited are disappointed that the evidence base requested by the Authority, and duly provided by the promoter, for site SHF035 does not appear to have been taken into account in the site assessments which support the current Regulation 18 consultation, notwithstanding assurances by the Authority. Furthermore, despite information requests made by Nurton Developments Limited, there appears to be a lack of technical evidence base to support the selection of site SHF034 for safeguarding. Should such evidence exist, the Authority should have published this for public viewing and reference made to where these assumptions have been used to inform either the Stage 2 or 3 assessments. Without this evidence base, it is not possible to confirm that the site has been properly and appropriately assessed, nor does it allow objectors and interested parties to consider the relative merits of promoted land alternatives. On the basis of the above, this report seeks to outline Nurton Developments' principle concerns with the regard to the site assessment process from both a technical and compliance perspective. The key points raised within this report are as follows: • SHF035 has not been properly considered and the evidence submitted to date has not been fully considered by the Authority in undertaking the site assessment process; • There are clear inconsistencies in how the evidence base has been applied in undertaking the site identification process, leading to errors, omissions and inaccuracies in the Authority's consideration of the sites assessed for allocation and safeguarding, rendering the plan unsound; • There are a number of inconsistencies, alterations and omissions contained within the Stage 2 and 3 site assessment process and, as such, the evidence base which has informed the site identification process for the Local Plan Review is not robust and should be reviewed prior to any Regulation 19 Consultation or formal submission of the plan for Examination in Public; • The evidence base upon which the Stage 2 and 3 site assessments were undertaken is inconsistently utilised, does not follow best practice in principle and unfairly favours the sites identified for allocation or safeguarding; • The Authority has erred in judgement in identifying a single additional site for safeguarding beyond the plan period which will fail to offer the opportunity to identify appropriate development options in future; thereby committing to a significant future allocation which may not be the most suitable or sustainable option for the future growth of Shifnal; • The Authority has erred in the site assessment process and, as such, the identification of site SHF034 for safeguarding is considered inappropriate and unsound. The site is not sequentially preferable from a flood risk perspective, whilst the apparent driver for its safeguarding (the delivery of a new link road) is neither suitably tested nor deliverable; and • Site SHF035, as evidenced through the submission of a range of site assessments and technical reports, is considered to perform better than SHF034 and should, therefore, be safeguarded for future allocation beyond the current plan period. 5.2 Conclusion Why do we consider the plan as drafted is unsound? The Plan is considered to be unsound as the evidence base for the identification of SHF034, has not demonstrated that the site is deliverable and its release will lead to unsustainable development and will fail to address the Climate Emergency Agenda. Moreover, its allocation was predicated on the delivery of a link road which is now not part of the proposals. Furthermore, there are other more sustainable and appropriate sites which have not been considered on a level playing field and have been discounted without fully taking account of the evidence provided, namely SHF035. SHF035 has been demonstrated to be preferable to SHF034 through our submitted evidence base, when considered in its own right. Finally, the cumulative benefits of allocating/safeguarding SHF035 have not been considered, particularly in terms of its relationship with employment allocations SHF18b and SHF18d and development currently underway to the west which enables the provision of direct and dedicated green cycle and footpath accesses straight into the town centre. What changes do we propose? With regard to Policies DP25 (Green Belt and Safeguarded Land) and S15 (Shifnal Place Plan Area), we are seeking an amendment to the policies to allow the allocation (or safeguarding) of site ref. SHF035 for housing to be developed in association with the employment allocation sites SHF18b and SHF18d during this plan period. This might include some of the site being safeguarded for later in the plan period to ensure delivery aligns with housing need and to secure the early upgrade to Upton Lane and removal of an accident hotspot. This could either be in association with the safeguarding of SHF034 for later housing need, or in preference to this allocation, given the benefits and sustainability credentials of site SHF035 which are supported by a full evidence base. Representation then includes: Appendix 1 SHF035 Contextual drawings APPENDIX 2 Combined Summary Tables for Stage 2a Assessments APPENDIX 3 Transport Appraisal Report APPENDIX 4 Flood Risk Appraisal Report APPENDIX 5 Green Belt Appraisal Report APPENDIX 6 Landscape and Visual Appraisal Report APPENDIX 7 Heritage Appraisal Report APPENDIX 8 Ecology Appraisal Report

A0889B02	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	<p>Disappointed that the evidence base requested by the Authority, and duly provided by the promoter, for site SHF035 does not appear to have been taken into account in the site assessments which support the current Regulation 18 consultation. This is notwithstanding that the Authority have indicated that the reports have been fully reviewed, considered and taken into account in the most recent site assessments. Further contextual drawings regarding the potential delivery of SHF035 are provided within Appendix 1.</p> <p>Furthermore, despite information requests made by Nurton Developments Limited, there appears to be a lack of technical evidence to support the selection of site SHF034 for safeguarding. Should such evidence base exist, the Authority should have published this for public consultation and made clear reference to the assumptions upon which judgements were based. Without this evidence base, it is not possible to confirm that the site has been properly and appropriately assessed, nor does it allow objectors and interested parties to consider the relative merits of promoted land alternatives.</p> <p>Representation then includes an assessment of national policy and guidance (5 pages_ which is not included in this summary.</p> <p>In reviewing the Stage 2 and 3 Site Assessments contained within both the Strategic Site Assessments and Shifnal Place Plan Assessments, it is noted that there are a number of inconsistencies, alterations and/or omissions. In undertaking this review, we have also compared the Stage 2 and 3 Assessments published as part of the evidence base for the following consultations which have taken place as part of the Local Plan Review:</p> <ul style="list-style-type: none"> • Preferred Sites Consultation (November 2018); • Strategic Sites Consultation (July 2019); and • Local Plan Review Regulation 18 Consultation (August 2020). <p>As outlined within the sections below, it appears that there have been various amendments undertaken between the successive Stage 2 and 3 Assessments which have not been clarified and/or appear to be incorrect when compared against previous iterations. On this basis, we must raise significant concerns that the evidence base upon which the Local Plan Review is based is not robust and should be reviewed prior to any Regulation 19 Consultation or formal submission of the Plan for Examination in Public.</p> <p>In undertaking this review, we have also sought to sense check and compare the scoring results for Nurton Development's site (SHF035) with the site which has been identified for safeguarding (SHF034) within the current Local Plan Review Regulation 18 Consultation for Shifnal. In undertaking this comparison, we are of the view that SHF035 performs equally to or better than this competing site when errors, omissions or the correct evidence base information is taken into consideration.</p> <p>Inconsistencies, Alterations and Omissions: It is noted that whilst reference is made to Sustainability Objectives SO5 ('encouraging the use of sustainable means of transport') and SO6 ('Reduce the need of people to travel by car') that no relevant scoring criteria for this was included within either the Stage 2a assessments for the Preferred Sites Consultation (2018) or the Strategic Sites Consultation (2019). It is not until this latest Local Plan Review Regulation 18 Consultation Sustainability Appraisal that a new Criteria 6 has been introduced into the scoring matrices for 'Site boundary within 480m of a public transport node with regular service offered during peak times'.</p> <p>Furthermore, it is noted that the Local Plan Review Regulation 18 Consultation Sustainability Appraisal does not provide any explanation as to why the criteria was excluded from previous Stage 2a Assessments nor any confirmation that it has been introduced into this latest Stage 2a Assessment matrices and why. Indeed, we would also question whether this criteria meets the requirements of the Sustainability Objectives SO5 and SO6 as set out within the Sustainability Appraisal.</p> <p>As evidenced by the Combined Summary Tables provided within Appendix 2, it is also apparent that the Local Plan Review Regulation 18 Consultation Sustainability Appraisal Stage 2a Residential Assessments for the Strategic Sites (Appendix T) and those prepared for the Shifnal Place Plan Area (Appendix P) are inconsistent in their approach. Given that sites SHF034 and SHF035 are considered within both assessment tables, it is unclear why their scores would alter given that neither the site boundaries nor the basis for the scoring criteria have altered between these two Stage 2a Assessment documents. No adequate explanation has been provided for this altered scoring within the Sustainability Appraisal. The two sites scored as follows:</p> <ul style="list-style-type: none"> • SHF034: <ul style="list-style-type: none"> o Strategic Sites (Appendix T) - Score -2 (Good); o Shifnal Place Plan Area (Appendix P) – Score -9 (Poor); • SHF035: <ul style="list-style-type: none"> o Strategic Sites (Appendix T) - Score -7 (Fair); o Shifnal Place Plan Area (Appendix P) – Score -9 (Poor); <p>In this regard, we draw your attention to the following scoring inconsistencies within both the Local Plan Review Regulation 18 Consultation Sustainability Appraisal Stage 2a Residential Assessments for the Strategic Sites (Appendix T) and those prepared for the Shifnal Place Plan Area (Appendix P):</p> <ul style="list-style-type: none"> • Under Criteria 3 – 'Tree Preservation Order (single or group) within or on-site boundary' – Site SHF034 is scored incorrectly for this criterion within the Shifnal Place Plan Area (Appendix P); • Under Criteria 5 – 'Site boundary within 480m of one or more of the following (record all that apply)' – Site SHF034 is scored incorrectly for proximity to a primary school, children's playground, outdoor sports facility and amenity green space within the Shifnal Place Plan Area (Appendix P); • Under Criteria 5 – 'Site boundary within 480m of one or more of the following (record all that apply)' – Site SHF034 is scored incorrectly for proximity to a GP surgery within the Strategic Sites (Appendix T). This is due to the exclusion of land north of the railway line (formally site P17a) which therefore increases the distance to this community facility; • Under Criteria 9 – 'All or part of site within Flood Zones 2 or 3' – Site SHF034 is scored incorrectly for this criterion within the Shifnal Place Plan Area (Appendix P); • Under Criteria 11 – 'Site is wholly/partly classified as brownfield or is wholly/partly within an area with a previous industrial or potentially contaminative use' – Site SHF034 is scored incorrectly for this criterion within the Strategic Sites (Appendix T). In this regard, SLR notes that the mapping for SHF034 has been amended under the Local Plan Review Regulation 18 Consultation with land to the north of the railway line (formally site P17a) being excluded, whilst buildings at Lodge Hill Farm are included. The inclusion of the Lodge Hill Farm buildings within the site, and thereby ensuring a positive score under criteria 11, is disingenuous given that the publicly available promotional material submitted for site SHF034 clearly excludes this land and shows that these buildings are retained as part of the proposed Masterplan layout. On the basis of the site area being promoted for development (i.e. excluding the Lodge Hill Farm buildings) site SHF034 contains no land which would accord with Criteria 11 and it should be scored accordingly.
A0889B04	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	<p>Climate Change Emergency: Shropshire Council resolved to declare a 'Climate Emergency' at a Committee Meeting on the 16th May 2019, outlining that they would write to the Secretary of State for the Environment, Food & Rural Affairs to encourage Government to be ambitious in its plans for carbon reduction targets and aiming for Carbon Neutrality.</p> <p>In doing so, the Council committed to the preparation of Carbon Emissions Appraisals for all policy reports, the creation of a Climate Action Partnership of stakeholders and the wider community, and to review its progress on addressing the climate emergency on an annual basis.</p> <p>It is considered that the current Local Plan Review and the associated Sustainability Appraisal have not given due consideration to the aims and objectives of the Climate Emergency position adopted by Shropshire Council. The evidence base documents are insufficient in this regard and the site assessments undertaken do not adhere to the key sustainability objectives identified as part of this process.</p> <p>Furthermore, it is considered that site SHF035, as evidenced within the submitted reports and masterplan vision, would be an exemplar in sustainable development practises, aligning itself to achieve all 17 of the United Nations sustainable development goals and helping to overcome the global challenges we face. Each of the 17 sustainable development goals are interconnect and will build on each other to create a best practice scheme that is truly socially, economically and environmentally sustainable. Just some of the ways we will achieve these goals are through:</p> <ul style="list-style-type: none"> • Mixed-tenure homes and housing types that are genuinely affordable • A wide range of local jobs within easy commuting distance of homes • Beautifully and imaginatively designed homes with gardens, combining the best of town and country to create healthy communities • Educating the community about the natural environment and gaining an affiliation with nature, with opportunities to grow food within the neighbourhood • Development that enhances the ecological systems, providing a comprehensive green infrastructure network and net biodiversity gains • Zero-carbon development and energy-positive technology to ensure resilience against the climate emergency • Strong cultural, recreational and shopping facilities within a walkable, vibrant and sociable neighbourhood • Integrated and accessible transport systems with walking, cycling and public transport designed to be the most attractive modes of movement <p>The site has been carefully selected for its proximity to valuable existing services and amenities, to be able to work with Shifnal's existing assets and create a new sustainable community for all.</p>
A0889B04	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	<p>Affordability: Concerned that the affordability ratio for Shropshire could worsen in future were insufficient sites allocated or safeguarded for future development. This affordability issue is also highlighted at a submarket level when reviewing the Strategic Housing Market Assessment (2020).</p> <p>As highlighted by the tables below (taken from the Strategic Housing Market Assessment 2020), the Shifnal area has the 4th worst affordability ratio within the County based on median household income; house prices being 7.9 times the median gross household income. This is well in excess of the affordability ratio for the County as a whole which is identified as being 6.8 times the median gross household income.</p> <p>Only Bishop's Castle area (8.4 times the median gross household income), Church Stretton area (8.6 times the median gross household income) and Craven Arms area (8.3 times the median gross household income) have worse affordability ratios than Shifnal. (Figure 3: Median Household Income (2019) by Shropshire Place Plan Area not reproduced in this summary)</p> <p>This position is worsened when the affordability ratio is based against lower quartile household incomes, with the Shifnal area becoming the 2nd worst for affordability; house prices being 10.9 times the lower quartile household income. Again, this is well in excess of the affordability ratio for the County as a whole which is 8.7 times the lower quartile household income. Indeed, this trend is also true for Church Stretton area which becomes the least affordable area based on lower quartile household income which is 11.4 times lower quartile household income). (Figure 4: Lower Quartile Household Income (2019) by Shropshire Place Plan Area2 not reproduced in this summary)</p> <p>Identification of insufficient land for housing allocation and or safeguarding for beyond the plan period will worsen the affordability ratio within Shifnal. This pressure will be felt hardest by lower earning households who will be unfairly disadvantaged and likely be forced to move away from the Shifnal area.</p> <p>This does not meet either the sustainability or climate emergency agenda that has been adopted by Shropshire Council.</p> <p>On this basis, Shropshire Council should recognise the ongoing Housing Market pressures placed upon Shifnal and that restricting sufficient housing land provision within the town will place further pressure upon the affordability of the housing stock in this area of the County in the longer term.</p> <p>On this basis, SLR would recommend that further sites be identified for housing land supply and safeguarded for release from the Green Belt to ensure that such demand and housing market pressures are recognised both for the plan period (2016-2038) and beyond. Failure to safeguard sufficient sites for Green Belt release will only worsen the affordability position within Shifnal and fail to allow for the release of the necessary level of housing land at the appropriate time (i.e. allowing the Council differing options for allocation beyond the plan period).</p>
A0935B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	<p>Shifnal is identified as a focus for investment, employment, housing and development on the M54/A5 Strategic Corridor through Shropshire with access to Junctions 4 and 3 with proximity to Wolverhampton and the i54 major investment site.</p> <p>New employment is proposed to be provided through a significant new employment allocation on land east of Shifnal Industrial Estate. Consider this is only capable of meeting local needs.</p> <p>The SEA at Land at J3, should the Council consider it to be proposed as part of a Strategic Site Allocation in the Plan, would meet sub-regional and regional needs but, importantly, would also be complementary to the local employment offer at Upton Lane in Shifnal and assist in addressing its jobs/homes balance to 2038 as required under the Plan.</p>

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0950B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Agree	<p>The following representations have been prepared by Savills on behalf of Lord Stafford Estates, the owner of land at Admiral's Farm, Shifnal. The site is currently allocated as 'Safeguarded Land' in the adopted Shropshire SAMDev Plan. In the Proposed Submission Draft of the Shropshire Local Plan (SLP) it is identified as Site Allocation SHF013 Land adjoining Meadow Drive, Shifnal, which will provide residential development in the north of Shifnal. The inclusion of allocation SHF013 Land adjoining Meadow Drive, is welcomed. The background to the consideration of Admirals Farm is that it is safeguarded land, as set out in Policy S15 (Shifnal Area) of the SAMDev Plan 2006-2026. As such it is 'Land beyond the development boundary that is not part of the Green Belt is safeguarded for Shifnal's future development needs beyond the current Plan period' (part 4 Policy S15). This designation was brought forward from the Bridgnorth District Local Plan (2006), Policy S4. The Policy protected safeguarded land to meet the future development needs of Shifnal. The Inspector when considering Policy S15.1 of the SAMDev 2006-2026 noted that on Shifnal's northern and eastern sides a significant buffer of 'safeguarded land' existed between the town and the Green Belt and that the land was safeguarded for the town's long term future development. The Inspector went on to note that some of the safeguarded land had already been subject to a number of planning applications that had been determined favourably for residential development in the absence of the Council being able to demonstrate a five year supply of housing land. In relation to the undeveloped safeguarded land that still remained, which included the land adjoining Meadow Drive, the Inspector concluded 'it is appropriate to continue to safeguard it' (paragraph 252, Inspector's Report October 2015). Thus the Inspector considered the site was capable of delivering residential development to serve the future needs of Shifnal. The evidence of Shropshire Council. The land has therefore been safeguarded to meet residential needs as identified through the emerging SLP. The site is now identified as SHF013 (Land adjoining Meadow Drive, Shifnal) in the emerging SLP and contributes to the currently identified housing need in Shifnal. As set out in paragraph 5.209 of the SLP, the objective is now to 'place shape' the neighbourhoods in Shifnal by 'completing the pattern of development, creating a permeable townscape, enclosing the urban form, creating a strong and legible boundary between the town and the Green Belt, largely using existing safeguarded land.' The development of SHF013 will accord with these aims by 'filling-in' a relatively small piece of undeveloped land which is surrounded on all sides by development, including the M54 motorway. The motorway now forms a strong and defensible edge to the Green Belt and to the northern edge of Shifnal. It is noted that the Green Belt boundary and Development Boundary for Shifnal fall to the south of the M54, with the tree-covered bund which screens the northern edge of Shifnal from the motorway being located in the Green Belt. This accords with the existing adopted Green Belt boundary. This is considered to be an appropriate boundary for the Green Belt as the bund and associated trees are within the ownership of Highways England. The accompanying Vision Document (Appendix A), produced by Savills, identifies the key features of the site and surrounding area and how these inform the development of the site. This has been informed by the following assessments: - Flood Risk Assessment & Preliminary Drainage Strategy (Appendix B) - Noise Feasibility Assessment (Appendix C) - Air Quality Feasibility Assessment (Appendix D) - Access and Impact Assessment (Appendix E) The illustrative masterplan included in the Vision Document demonstrates one example of how a high quality development could be delivered on site. The masterplan includes usable areas of open space to provide a high quality environment for future residents as well as biodiversity corridors through the site. Allocation Boundary A revised allocation boundary to allocation SHF0013 is proposed. This entails minor changes to the western boundary of the allocation to enable the creation of an appropriate vehicular access from Admiral's Close. As shown in the access drawings created by Systra, the access is proposed to join into the site north of the existing field gate. This will pull the access away from the bungalow at the end of Admiral's Close, thus minimising any impact on the existing residents. The creation of the access will involve earthworks and the recontouring of the southern end of the existing bund. Requested change – A revision to the allocation boundary is requested, as set out in the accompanying masterplan in the Vision Document (attached as Appendix A). This will accommodate the necessary work required to provide a vehicular access to the site.</p> <p>The following documents are included in the representation but not summarised here:</p> <ul style="list-style-type: none"> Vision document Flood Risk Assessment & Preliminary Drainage Strategy Noise Feasibility Assessment Air Quality Feasibility Assessment Access and Impact Assessment
A0950B02	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	<p>The Development Strategy for Shifnal Town (S15.1) acknowledges the importance of the settlement by confirming it will be the focus for investment, employment, housing and development on the M54 / A5 Strategic Corridor, in accordance with Policies SP10 'Shropshire Economic Growth Strategy' and DP9 'Strategic Corridors'. Its proximity to Wolverhampton and the i54 major investment site, along with it being the largest town in the north of the Shropshire Green Belt, are all highlighted as key locational advantages. As set out in our representations to Policy SP2 it is considered that the overall housing requirement identified in the SLP does not represent a boost to the supply of homes in the area, as is required to support the economic growth aspirations of Shropshire Council. A higher housing requirement should be considered by the Council. In light of the locational importance of Shifnal, the provision of additional housing delivery within the town should be considered over the plan period. As set out in section 5 of the policy, it is agreed that new residential development should be delivered through new allocations and allocations saved from the SAMDev. With regards to the two saved allocations in the area, SHF006 and SHF004a/b, it is noted that both sites are consented for residential development and are in the process of being built out. As such the delivery of further housing to meet the identified need in Shifnal rests with the proposed allocations in the SLP, including the SHF013 (land adjoining Meadow Drive). As identified in Appendix 5 of the SLP, even with these new allocations, there is an identified 92 unit windfall allowance included for Shifnal, highlighting the need for further residential land to be identified during the plan period. Requested Change – To support the economic growth aspirations of Shropshire Council, higher housing requirement should be considered. Shifnal's housing delivery figure should be increased and further sites identified for allocation.</p>
A0950B03	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	<p>S15.1 (i) - Development Guidelines (SHF013 – Land Adjoining Meadow Drive, Shifnal) Housing Mix – In terms of the type of housing that would be appropriate on site and the likely demand, it is confirmed that in the opinion of Savills Development the site will be attractive to the market, both to housebuilders and house buyers. At this stage it can be confirmed that negotiations are close to being completed with a potential housing developer for the site. It is self-evident from the development and successful sale of properties at Coppice Green Lane to the east and Haughton Road to the west, with both of those neighbouring sites being similar to SHF013 in location and outlook, that this general location within Shifnal is attractive to both housebuilders and house buyers / occupiers. Market evidence of sales rates and sales values from four current active housing development sites in Shifnal evidences the strong levels of delivery and sales. A fact that is noted in paragraph 5.204 of the SLP, which states that 'the development of housing in Shifnal has achieved high rates of delivery at around 200 dwellings per annum from 2016'. Market evidence for Shifnal shows that over the past 1 to 1.5 years there has been significant take up of new build housing. The summary attached as Appendix A shows that across 4 active sites a total of 569 houses are being delivered. With sales rates of between 2 and 3.4 units per month on each site (11.3 units per month across the 4 sites) and healthy values being achieved. This evidences that there is clear demand for open market housing in the Shifnal area. The data suggests that the unit mix/type affects sales rates in the area, with sales rates being higher on units under £300,000 (circa 1,100 sq. ft.). The Bovis sales rate over the past year has been lower than the market average due to the large unit type being sold as part of the scheme. This makes the properties unaffordable for first time buyers, who are able to proceed quickly. The higher sales rate for smaller / lower cost units also reflects the findings of the Shropshire Strategic Market Assessment (Part 1) (March 2020), which highlights that the median household income in Shifnal falls below the Shropshire and national median household income (paragraph 3.281). However, conversely Shifnal saw the second highest median house prices in Shropshire in 2018 (paragraph 3.227). This imbalance means there is a need for market units, including units within the price range of those on lower incomes, such as first time buyers and young families. In terms of the market information above and the identified housing need in the area, it is considered that the text proposed in the Development Guidelines is appropriate: 'Site proposed for broad range of housing with dwelling types and sizes to help meet local housing needs with potential for lower cost housing, age specific housing and policy compliant affordable housing'. Highway Access – The accompanying Access and Impact Assessment produced by Systra considers three access options to serve allocation SHF013. The assessment and detailed plans demonstrates that the preferred access option is via the general location of the existing field gate, joining onto the spur road off Meadow Drive. In terms of the capacity of the local highways network, the assessment identifies that the development traffic will dissipate quickly within the local highways network beyond the site access. Off-Site Highways Works – The inclusion of specific reference to the consideration of off-site highways works and drainage work is not necessary within the policy. Any application for the development of the site would need to be accompanied by an appropriate highways assessment, which would consider the capacity of the existing highway network and would identify any highways works required to enable appropriate vehicular access of the site.</p> <p>The reference to highway drainage improvements to address existing surface water flooding constraints should also be removed. Any scheme for the development of the site should only be required to address drainage issues which would result from the proposals or would restrict the scheme from coming forward. The developer of the site should not be required to address an existing surface water issue in the area. Landscaping and Open Space – It is noted that the trees which surround the site do not form part of the Admiral's Farm site and are understood to be in the ownership of Highways England. It is recognised that a high quality landscape scheme would be a key element of bringing forward a residential scheme on site. Open Space – With regards to the creation of a new footpath link to the adjacent Coppice Green Lane scheme, the principle of this is supported. It is, however, stressed that there is a strip of land between SHF013 and the Coppice Green Lane scheme, which is in the ownership of a third party. As such it will not be possible for the developer of the Meadow Drive site to deliver a link into the Coppice Green Lane site. Any layout for the site would be able to include a footpath up to the site boundary. This would then allow Shropshire Council to deliver the short link over the third party land to the Coppice Green Lane scheme. Air Quality – The baseline air quality modelling carried out to date for the site (Appendix B) demonstrates that the whole site falls within Air Pollution Exposure Criteria (APEC) A, the lowest criteria category, as set out in the Air Quality and Planning Guidance. As such, as set out in the APEC, air quality should not be a ground for refusal. It is also noted that the site is not within an Air Quality Management Area (AQMA). In light of this it is not considered appropriate to include reference to mitigating any impact from emission from the M54. Requested change – Reference to the following is not considered necessary or appropriate for inclusion in the Development Guidelines: - Off-site highways works; - Off-site drainage works; - Air quality mitigation. The proposed development management policies of the SLP set out suitable and robust policy requirements for new residential development, to ensure that appropriate schemes come forward. These do not need to be repeated in the Development Guidelines for the site.</p> <p>The following appendices are included in the representation but not summarised here:</p> <ul style="list-style-type: none"> Appendix A – Shifnal Housing Sales (key sites) Air Quality Feasibility Assessment for site SHF013

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A1152B45	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	During the Preferred Scale and Distribution of Development consultation 1,500 dwellings and 16ha of employment land was proposed (based on the proposed balanced growth). During the Preferred Site consultation the housing guideline remained the same but the employment guideline increased by 24ha (250% increase) to 40ha to 'address local circumstances'. In the draft Local Plan the guidelines are substantially the same although employment land has increased to 41ha. Nowhere in the draft Local Plan or the Shifnal section of the Green Belt Release Exceptional Circumstances Statement does there seem to be any cogent justification for the massive proposed increase in the employment land allocation from 16ha to 41ha, or for the departure from balance with the housing guideline. The Green Belt Release Exceptional Circumstances Statement states "The level of need and opportunity is based on two key assumptions. Firstly that employment land is developed out to 40% of the total land area, which takes into account the need for suitable levels of buffering, landscaping, servicing, access arrangements, and other on-site issues contributing to the delivery of a sustainable employment development. In applying this approach, it is considered that about 40ha will deliver around 16ha of built development. Secondly, it is assumed that commercial buildings will be developed as single storey properties". This statement suggests double-counting of the 40% factor for Shifnal as this was also included in the balanced growth assumptions. The Council now seems to be incorrectly grossing up again at 40% for a second time in moving from the 16ha to 40ha. Do not agree that the proposed allocation of 39ha of employment land at SHF018b & SHF018d is needed, justified or sound. As we consider the need for housing and employment land at Shifnal is misjudged, also do not consider that any need has been soundly evidenced for the release of safeguarded land from the Green Belt, as listed in Schedule S15.1(iii). Note that no site references have been given for the land listed in Schedule S15.1(iii), which make it more difficult to cross-check to other evidence documents.
A1156B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Agree	We welcome and support the allocation of site SHF015 and SHF029 Land adjoining Beech House between A464 and Park Lane, Shifnal with the emerging Shropshire Local Plan. We consider the site has the capacity to accommodate approximately 65 dwellings and is well positioned and benefits from good connections to local services and facilities by non-car modes of travel resulting in the site being highly sustainable. A plethora of surveys have already taken place and further surveys will be instructed and revised to ensure the most accurate information is submitted to the Council when required. The landowners are keen to move forward with a planning application as soon as reasonably possible. We do not consider there are any constraints of the site that cannot be mitigated for when a planning application is submitted. The landowners are keen to create a new sustainable development delivering a range of new homes designed to the highest quality standards to suit local needs. We can confirm that our proposed housing scheme is in accordance with the draft strategic policy requirements identified within the Regulation 18 Pre-Submission Draft Local Plan. We have considered Draft Policies DP1, DP3, DP12, DP13, DP15, DP16, DP17, DP18 and DP24 which generally align with our proposals and that will be subject to detailed discussions on the specifics of the proposed scheme prior to submission. Given the location of the site adjacent to the current development boundary and to the north of the newly proposed safeguarded land, we consider the site is an obvious, appropriate and sustainable allocation to allow growth in Shifnal. However, we must stress the necessity to ensure a level of flexibility is applied to the delivery of allocated sites with regards to both the proposed timeframes for delivery of dwellings and in regards to the requirements imposed on sites as a result of the policies in the plan. It is important that the Council acknowledge the importance of viability in all developments. That being said, we do consider the site is highly viable and deliverable having regard to the policies set out in the Regulation 18- Pre- Submission Draft Shropshire Local Plan. In regards to the assumptions set out in Appendix 7 of the 'Regulation 18' Pre-Submission Draft of the Shropshire Local Plan we consider the assumptions are too late – delivery is likely to occur earlier in the Local plan period, within the Short term (2020/21-2024/25) timeframe. The land owners are committed to working with the Council to deliver residential development on the site.
A1200B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. Proposals do not account for existing and proposed employment areas within 10miles of the settlement. Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out. Proposed safeguarded land exceeds Shifnal's future housing needs and will destroy the village atmosphere. Employment proposals will exacerbate traffic problems/ gridlocks in the town centre. Additional commuters will inevitably use travel by car and use this route. Green Belt must be retained, particularly to the west. Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate. A1402B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. Proposals do not account for existing and proposed employment areas within 10miles of the settlement. Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out. Proposed safeguarded land exceeds Shifnal's future housing needs and will destroy the village atmosphere. Employment proposals will exacerbate traffic problems/ gridlocks in the town centre. Additional commuters will inevitably use travel by car and use this route. Green Belt must be retained, particularly to the west. Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate. Support the decision not to proceed with development at Tong. 36 acre site for Air Ambulance appears excessive in comparison with other site:

A1449B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Strong objection to remove the site from the Green Belt. RAF and museum have been able to develop already under the current designation so there is no need to make a major change here. The current local plan policies specifically permit specific developments proposed for the site through policy CS5 and MD6; The document mentions the Defence Review, but this occurred during the last Local Plan and didn't require a change to the green belt policy so there is no clear conclusion this review will require a change in policy; So no exceptional circumstances have been demonstrated to require a change to Green Belt policy; While the plan refers to development of military, museum and a complementary Aviation Academy being developed these will not be compromised by the site being in the Green Belt; it is noted that there are several policies and comments in the Plan that support unrelated economic development schemes to be allowed on the Base, through its definition as a new Strategic Site. It would appear, therefore, that the prime reason for the release of Green Belt is not for the specified developments outlined in the Plan, but to allow for future unplanned development to be allowed without having to first justify exceptional circumstances for such development if the Green Belt status was maintained. It would appear, therefore, that Shropshire Council had already pre-determined the site for removal from the Green Belt, as advertising its potential for development through its Invest in Shropshire brochure. In view of the current economic climate and effects of COVID-19 on the , economy. it is premature to remove such large areas of land from the Green Belt on the sole basis of an economic objective that is based on a policy that expires in 2021 and takes no regard of the likely long term impacts of Covid-19 on the scale of likely future new employment developments. Exceptional circumstances do not exist, therefore, to justify the release of 203ha of land from the Green Belt, especially for non-site related developments as proposed in the Plan. Additionally does not believe there is sufficient evidence for the Proposed Midlands Air Ambulance Charity site to be relocated, and if a move is required this could be accommodated through existing policies for the green belt as was the case with the M54 Service station at Shifnal. In conclusion the development proposals for the Costford site can be accommodated through existing policy and there is no need to remove the site through a change to Green Belt policy

Proposals do not account for existing and proposed employment areas within 10miles of the settlement. Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out. Proposed safeguarded land exceeds Shifnal's future housing needs and will destroy the village atmosphere. Employment proposals will exacerbate traffic problems/ gridlocks in the town centre. Additional commuters will inevitably use travel by car and use this route. Green Belt must be retained, particularly to the west. Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate. Shifnals desirability depends on staying a certain size and not being absorbed into priorsless/telford. Too many faceless housing estates will make idsall degenerate in anywheresvilles England and destroy the very character which makes it sought after. Road traffic systmes needs to be imaginatively rationalised and existing housing renovated and refurbished first where possible
A1494B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. Proposals do not account for existing and proposed employment areas within 10miles of the settlement. Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out. Proposed safeguarded land exceeds Shifnal's future housing needs and will destroy the village atmosphere. Employment proposals will exacerbate traffic problems/ gridlocks in the town centre. Additional commuters will inevitably use travel by car and use this route. Green Belt must be retained, particularly to the west. Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate. Support the decision not to proceed with development at Tong. 36 acre site for Air Ambulance appears excessive in comparison with other site:

A1609B10	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	In relation to an alternative scheme promoted by Nurton Developments, Shifnal Matters do not consider that the development of this large site in the Green Belt with an open vista to the south is acceptable. The size of the development is too large in the context of Shifnal taking into account the character and historic nature of the town. There is no adequate infrastructure to support the scheme which would be bounded by a major A road into Shifnal and the railway line to the east. There are no exceptional circumstances to justify releasing land from the greenbelt. Development proposed would cause significant traffic issues around the town, particularly given the existing poor conditions that are in places single carriageway. Several junctions in the town have reduced visibility and are very busy already. Very narrow footways along the busy roads. Pollution increase with housing numbers, as well as there already being a significant number of cars in and around the conservation area. Average peak time hourly flows surveys have been carried out, indicating that there is Street traffic, the subsequent right turn onto the A464, creates very significant queuing back up Aston Street as far as the first roundabout with Carriers Lane, a distance of over 0.5 km. This, amongst other readings, indicate significant existing traffic problems in the town. The proposed employment development land located off Stanton Road will create a substantial increase in traffic on Stanton Road and Aston Street even if commercial vehicles could be effectively restricted from using this route. We do not believe there to be justification for a bypass around the west of Shifnal - the excavation needed would significantly affect the stability of the bridge, Network Rail are unlikely to accept this, commercial traffic between Telford and Shifnal would have to be re-routed thus not alleviating the traffic at Five Ways roundabout, there would be a conflict of use of the underbridge with the high voltage National Grid electricity cables running between the pylon immediately to the north of the structure and the substation in Innage Road to the south of the railway, the gyratory would increase journey distance between Telford and Shifnal and it is likely that existing residential areas would be used as 'rat-runs.' No information has been provided within the LPR which enables the likely traffic impacts on Shifnal's highway infrastructure and environment to be assessed. The only information regarding highways assessment is a couple of slides from a presentation by Shropshire council officers given in Shifnal in December 2018.
A1609B11	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	We hope that Shropshire Council can please provide information on (1) the methodology applied when calculating Shifnal's employment need, (2) justification on how other sites in Shifnal were ruled out in the sustainability appraisal and (3) the heritage assessment used to inform their site selection process.
A1609B12	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The Shifnal Dental Practice does not offer an NHS service to adult patients. HSA score =3 should be 0, there is no petrol station in Shifnal. These scoring errors have been the case since at least Jan 2019 and were advised to Shropshire Council in previous consultations. When these errors are corrected Shifnal scores 90 instead of 97 and placing it towards the bottom end of the ranking of the "key centres".

Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate. Support the decision not to proceed with development at Tong. 36 acre site for Air Ambulance appears excessive in comparison with other sites. I support the decision not to develop land to the east of Coppice Green Lane. Development there would cause the removal of historic woodland, an SSI and cause a high level of harm to the ecological environment
A1834B11	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area		Consider that proposed site allocation SHF013; SHF015 & SHF029; SHF022 and SHF023 (part); and SHF018b & SHF023 (part) would result in a likely impact on the SRN, as such it should be subject to consultation with Highways England, and appropriately assessed in line with the Circular, to determine the extent of its potential impacts on the SRN. Depending on the scale of likely impact on the SRN, the applicant/developer may need to identify suitable mitigation measures. The type of potential impact on the SRN and immediate SRN junctions likely to be impacted by each site is summarised as follows: SHF013: traffic, boundary; M54 section, M54 J3 and M54 J4. SHF015 & SHF029: traffic; M54 J3 and M54 J4. SHF022 and SHF023 (part): traffic; M54 J3 and M54 J4. SHF018b & SHF023 (part): traffic; M54 J3 and M54 J4. Whilst we have identified the immediate SRN junctions in close proximity to the site allocations identified in the pre-submission version of the Local Plan, where a likely impact is anticipated, it should be noted that the assessments should not be limited to these junctions only and a wider extent needs to be considered based on the scale of the proposed development.
A1847B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. S15.1.1: The new Development Strategy is contrary to the views of the electorate & residents as correlated in the Shifnal Neighbourhood Plan (2014-2016) and ignores prior public consultations with preference to commercial interests. Refer to: http://www.shifnalplan.co.uk/B) Ref. S15.1.1, S15.1.4, 5.203, 5.204: The immediate implementation of the new Development Plan whilst building works are still on-going under the previous 2000-2016 plan, would, I consider, represent severe over development to one area. The proposed safeguarded land area is excessive and far exceeds Shifnal's future local housing needs. The result will be to replace Shifnal's unique "village" character with that of an urban fringe to a conurbation.C) It has been noted that the size of Shifnal housing growth may have been calculated utilising a low housing density which may not have included for housing already approved but not yet built. The corrected figure may therefore show Shifnal with a growth of 54% which would far exceed the 23% proposed for other Shropshire areas. The growth is also in excess of local needs with the inference that Shifnal is being proposed as an overflow settlement for other areas.D) Ref. 5.214d, 5.215: The proposed by-pass with sections of one-way traffic is impractical and would only provide a service road for any 'infill' housing developments. The use of the existing cartway bridge under the railway is also unrealistic due to its restrictive width which would therefore pose a risk to both traffic and pedestrians.E) Ref. 5.202, 5.212: The proposed extent of employment land to the East of Shifnal is unrealistic. If implemented it would result in an increase of both private and heavy commercial traffic through Shifnal & surrounding roads, exacerbating local air-borne pollution levels and posing new risk factors for the health & safety of Shifnal residents. Such an increase in traffic would not be alleviated by the proposed 'by-pass' (refer to item D above). The proposal for commercial traffic to be deterred from the centre of Shifnal and instead be encouraged to travel eastwards to Junction 3 on the M54 would be unenforceable due to the reduction in policing over the last ten years. The suggestion of deterrence also ignores that trade would be deterred with Telford making the increased travel times unviable for businesses.F) Ref. 5.202, 5.212: With the proximity of Telford there already exists extensive commercial developments, some presently unused and waiting for tenants. Also, the competition from similar zoning within 10 miles of Shifnal may make the proposed commercial sites redundant. By allocating the land proposed for commercial / industrial use does not guarantee that it would be used for this purpose; if left undeveloped or 'banked' it has been known, following commercial pressure, for a subsequent planning application for a change of use to housing to be allowed.G) Ref. 5.202, 5.212: For the reasons listed in items E and F above I would suggest that the largest extent of the employment land proposed for Shifnal should therefore not be considered both in terms of sustainability and the resulting detrimental effect upon the character of the town.H) Education & medical facilities are already severely compromised by a growing population. Waiting times at the medical practice continue to deteriorate; both due to a shortage of doctors nationally and appropriate premises. A permanent police presence in Shifnal was terminated in the early part of the last decade. Both of these factors, I suggest, pose a serious risk to the health, safety and security of Shifnal residents. The provision of all levels of school places will need to be extended heavily and will be dependent upon funding which in turn may become limited due to further economic restrictions nationally.I) Refs. S15.1.3 & 7; 5.214 & 5.216: Shifnal should not be extended towards Telford as agreed by the Development Strategy Plan of 2000-2016. This policy was to prevent an expansion into the Telford conurbation and to protect green belt land; the implementation of the proposed development boundary is counter to this original objective. The assessment of the environmental impact of the proposed loss of green belt and prime farmland is also inadequate, not taking into account the eradication of wildlife habitats, localised flooding, deterioration of air quality and other factors associated with CO2 generation and climate change in general.J) The allocation of 36 acres for the Midlands Air Ambulance at Tong appears surprisingly excessive. With no development plans available there is no way to justify the utilisation of such a large area. It is noted however, that the development of both the existing site at Cosford and other air ambulance sites amount only to 2-3 acres. Further clarifications are required.K) I support the decision NOT to proceed with the Bradford Estates proposals at Tong.L) Ref. 5.204 & 5.209 It is noted from these items that any 'respite' after 2025 is only a wish of Shropshire Council and not a promise. As construction works are still being implemented by planning applications made under the previous Development Strategy Plan of 2000-2016, it is unreasonable to allow any further developments under these new proposals without an immediate extended respite for the people of Shifnal. Such a respite would also allow investment to be made to offset problems already encountered by the rapid expansion of Shifnal's population. A delayed and unguaranteed respite until 2025 is unreasonable and any 'pipeline investments' in infrastructure should have already been implemented to accommodate the physical and social consequences of those developments recently built. Consequently, I would not support any further development unless balanced to local needs and growth together with a realistic assessment of the existing infrastructure of Shifnal.M) Ref. 5.209 This item states that 'The approach in the Local Plan is to seek new, additional housing allocations around the edge of Shifnal to complement new housing areas brought forward by the SAM Dev Plan which extend the footprint of the urban area'. Does this infer that Shropshire Council has decided to implement these proposals in the face of substantial opposition from the Residents and Electorate of Shifnal; and as such, are the people of Shifnal being told to accept these proposals as a fait accompli?
A1872B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. Proposals do not account for existing and proposed employment areas within 10miles of the settlement. Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out. Proposed safeguarded land exceeds Shifnal's future housing needs and will destroy the village atmosphere. Employment proposals will exacerbate traffic problems/ gridlocks in the town centre. Additional commuters will inevitably use travel by car and use this route. Green Belt must be retained, particularly to the west. Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate. Support the decision not to proceed with development at Tong. 36 acre site for Air Ambulance appears excessive in comparison with other site:

Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate. Natural England (Gov uk) state the importance of protecting our natural environment, helping protect England's nature and landscapes for people to enjoy. The plan for Shifnal will destroy areas that are essential for food production, or for use in agri-environments and green corridors to maintain biodiversity, wild life, flora and fauna essential for the whole UK! During COVID times the wonderful walks around Shifnal have directly supported mental and physical health of its residents and visitors. These open, car free areas help keep us fit and health in the long term, far outweighing short term monetary gain.....

A1914B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Object to Shifnal housing and employment needs because the Local Plan is seeking to meet needs imposed by central government. The consequent changes to the Local Plan will remove the current support for the Shifnal Neighbourhood Plan that is widely supported by the community of Shifnal. This housing need is created by an uncontrolled world population expansion, a barely controlled immigration and 'economic migration into the UK, an uncontrolled population increase in the UK (primarily from the immigrant population); and in Shifnal migration of UK residents westwards towards the town frequently from the West Midlands conurbation. It is NOT local need or even Shropshire need that is driving the proposed increase in development. summary, this is nearly all about migration and not need created by Shifnal and the residents of the town have had enough development as a result of a huge increase in residential development both on large site developments and as a result of there being no improvement in facilities to cope with the current 2014 Plan let alone further development in the town. Finally, where is the democracy in this consultation process? We know Shifnal Matters has campaigned alongside residents of Shifnal, and I see no effect on the proposals put forward by Shropshire Council. This Draft Local Plan is being IMPOSED not consulted upon. The sections of the Local Plan that are specifically objected to are as follows: P16 - C3.7: No evidence to support the need to provide housing for the Black Country because delivery opportunities are constrained'; P20 - Policy SP3: Building housing or industrial units on green belt land does the opposite of the intention of this Strategic Policy; P24: it destroys historic hedgerows and wetlands; it creates more damage to the environment as attracting people from the West Midlands creates more not less commuting; P90 Policy DP13: All development negatively impacts on the environment; P123 - Policy DP25 – para 4.218: This table indicates an excessive contribution of green belt land from 'the Shifnal area, even if sacrificing green belt was acceptable; Para 4.216: Green Belt Review outcomes should be repeated; Site P173 and SHF017: Grade 2 agricultural land with High harm to Green Belt; Sites SFH017 South and P16a: Grade 2 agricultural land with High harm to Green Belt; Sites P15b and SHF019: Grade 3 agricultural land with High harm to Green Belt; Re develop the environmental disaster at Shifnal Industrial Estate, not build more; P240 – para 315.1: The word WILL is used throughout this document. Is the draft plan a consultation or an imposition? P249 – para 5.204: The phrase long period of respite is used. How long and can the authorities be trusted? P249 – para 5.206: It is clearly acknowledged that the residents of Shifnal want no further development; P250 – para 5.209: Creating a strong and legible boundary is actually crudely drawing a ring around the town and proudly announcing that you have place shaped for future development by encroaching further into the Green Belt. This is so simplistic, gobble up some more land to complete a circle. It is not clever planning. it is contrary to the wishes of the residents of Shifnal; P250 - para 5.211: Recognises that high harm will occur. Also assumes that employment will be attracted away from Telford and the West Midlands, by council bureaucrats not business people. P250 – para 5.212: 'Assurance' that the land use is for employment only. Can this statement be trusted? P250 – para 5.213: Recognises that high harm will occur; P251 – para 5.216: The 'structural constraints' do not need to be addressed, just leave Shifnal alone. Who has decreed, in such an assertive manner that they need to be addressed, they only need to be addressed if additional development is forced upon the unwilling town residents.

A2097B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Despite many promises, pledges and proposals, no significant improvements have been made to the key roads and junctions in the town centre, nor to any of the basic infrastructure. The current Shropshire proposals to increase the size of the town can therefore be seen to be untenable and impractical, as well as being comprehensively rejected at public meetings held pre COVID 19. The Neighbourhood Plan has been ignored. There is no credible evidence that more houses or other development is needed in Shifnal or its surroundings. There are alternative areas for development, such as Priorslee, Stafford Park and Halesfield. There are no proposals in the Plan to ensure adequate provision of infrastructure, which should include highways, parking, school capacities, and medical demand. Promised improvements but never delivered. Shifnal has not had its fair share of funds – S106 monies only spent on roundabouts to support the developments, CIL has not come back into the community, and the New Homes Bonus should have provided funds. These funds must be being used to balance the council's books, to assist with the purchase of the town centre property and sale of Shire Hall. There is no evidence of need or demand for more development in the area.

Proposals do not account for existing and proposed employment areas within 10miles of the settlement. Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out. Proposed safeguarded land exceeds Shifnal's future housing needs and will destroy the village atmosphere. Employment proposals will exacerbate traffic problems/ gridlocks in the town centre. Additional commuters will inevitably use travel by car and use this route. Green Belt must be retained, particularly to the west. Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate. Support the decision not to proceed with development at Tong. 36 acre site for Air Ambulance appears excessive in comparison with other site:
A2109B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Schedule A7 sets out 'indicative' timescales for the developments, with sites SHF015 & SHF029 (Land adjoining Beech House between A464 and Park Lane, Shifnal) listed for the 'medium term'; 2025-2030. As the owner of site SHF029, and also on behalf of Guy Thomas as the owner of site SHF015, I would like to assure the Council that we know of no impediments to these sites being available for development very much sooner, and given Shifnal's key position as the preferred investment location in the M54 corridor and the significant growth in demand for housing, we believe these sites should certainly be considered for the short term, 2020-2025.
A2118B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. Proposals do not account for existing and proposed employment areas within 10miles of the settlement. Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out. A2304B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	Object to planned growth of Shifnal and removal of land from Green Belt for housing and industry without assessing full environmental impacts: loss of openness, loss of farmland, CO2 generation, flooding and climate change. Green Belt must be retained especially to west to separate Shifnal from Telford. The planned scale of growth will increase the population by 54% (compared to average growth of 23% in the County) and swamp the town's highway, transport, health and education infrastructure. Housing growth increases the existing scale of new development but this is concealed on low density sites. Employment growth takes no account of other large employment sites around Shifnal (10 mile radius) and will exacerbate traffic congestion in the town centre. Safeguarded land (equal to 130 football pitches) exceeds Shifnal's future housing need and destroys the town's village character. The presentation of this plan is riddled with contradictions, missing evidence and limits to public involvement.
A2305B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. A2323B13	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area		<p>Shifnal is an inherently sustainable location, indeed consider it is one of the most sustainable settlements in Shropshire, which we consider should receive a higher level of housing growth within the plan period, and that the safeguarded sites identified around Shifnal, should not be safeguarded but allocated for delivery within the plan period.</p> <p>If the proposed safeguarded land in Shifnal remains as such, there should be mechanisms built in to the plan for safeguarded sites to come forward during the plan period should the need arise. It would be beneficial to allocate site reference numbers to each of the safeguarded sites identified with the draft Plan so that the Policies Map can be cross referenced at the appropriate points within the Local Plan Review.</p> <p>Shifnal's location on the M54/A5 East growth corridor, and the strong connectivity benefits this creates, form an important context for understanding both current demand pressures but also the extent to which these are likely to continue to increase where the corridor's investment is realised. At a local level, there has evidently been success in recent years in elevating the regularity of rail services to Shifnal. This has reinforced its connectivity into the corridor and specifically the national rail infrastructure which itself will continue to be enhanced through the delivery of HS2. This investment in improvements to rail connectivity has also responded to Shifnal's own growth. This again forms important context to its ongoing credentials for accommodating sustainable growth.</p> <p>The Council's evidence indicates provision of new homes and employment space will serve to support existing businesses and public services in Shifnal, delivering benefits for current and future residents and ensuring the resilience of this part of its employment base.</p> <p>Proposed allocation of a large employment site in Shifnal is strongly supported as a means of sustainably accommodating inward investment and enabling local business to grow building on the advantages of the M54 corridor. This will, it is agreed, offer the opportunity to create a more sustainable balance between housing and employment in Shifnal over the plan period. However, it is important to recognise that there is a realistic prospect that where the provision of housing is curtailed on the basis of the proposed requirement for the town, this is likely to occur in parallel to a period in which new employment would be starting to be delivered on the allocation. Where some level of displacement of people living in Shifnal and working elsewhere to living and working in Shifnal could occur, the enhancement in the provision of rail transport services alongside other factors is likely to make it challenging to realise this quickly.</p> <p>Where the creation of jobs will elevate demand for housing locally this suggests that to realise the benefits in full associated with its location on the M54 corridor the Draft Plan should recognise the need for greater flexibility in the advancement of safeguarded land within the plan period.</p> <p>Site promotion for SHF019 and P15b. Supporting documents provided include a vision document, landscape visual assessment, transport note, A464 and Park Lane access proposals, initial heritage appraisal, preliminary ecological appraisal and flood risk assessment.</p> <p>The site is some 12.7ha and has been identified as proposed safeguarded land within the draft Local Plan. It has capacity for 175-200 dwellings and is in a single ownership.</p> <p>The site lies to the south of Shifnal and comprises two grass intermittently used grazing fields. The site is enclosed by hedgerows and vegetation and contains three mature oak trees.</p> <p>The A464 forms the site's north eastern boundary, beyond which are further agricultural fields and a large fishing pond. There are a number of trees along the north-west boundary, beyond which is a large residential property known as Beech House. To the south-west is The Terrace, a Grade II listed residential dwelling. Park Lane, the north to south route into Shifnal, forms the sites western boundary. The whole site is in the Green Belt.</p> <p>The site is located within close proximity of a range of local services and facilities. Indeed, consider the site meets each of the requirements of draft policy DP29. Shifnal is an inherently sustainable location which we consider should receive a higher level of housing growth within the plan period, and that the safeguarded sites identified around Shifnal, should not be safeguarded but allocated for delivery within the plan period. Consider the site is located in a highly sustainable location and benefits from good access to existing public transport with the opportunity for everyday activities to be made by use of existing active transport opportunities, thereby assisting in reducing carbon emissions. This therefore provides a strong evidence base for bringing forward residential development in this location.</p> <p>There is no formal vehicle access to the site but the site is well served by the strategic and local road network and would be accessed off the A464 Wolverhampton Road and Park Lane. A transport note has been prepared for the site and in conclusion safe access can be provided into the development, which itself will lead to a series of well-designed estate roads which will form an important part of the scheme's overall design. Furthermore to enhance pedestrian and cycle connectivity into Shifnal Village Centre, a new footpath is proposed to the west of the site access along the southern side of the A464. There are no formal PROW on the site.</p> <p>The site is not subject to any overriding environmental or physical designations or constraints that would prevent the site from delivering residential development.</p> <p>With regard to Heritage, an Initial Heritage Appraisal has been undertaken. This indicates the site is to the north-west and north-east of the grade II listed 'The Terrace', and therefore the setting of this asset is an important issue to be addressed as part of any emerging scheme. In considering the relationship between the site and grade II listed 'The Terrace', the Initial Heritage Appraisal informed the design of the Illustrative Masterplan through a range of design opportunities, including: Opportunity to establish a buffer of open space to the west and immediate north of the Terrace could be provided to maintain prominent views of the Terrace from within the western part of the site and from along Park Lane; A comprehensive landscaping scheme should be considered to screen and soften views of the proposed development from the grounds of The Terrace. The hedgerow to the western boundary with Park Lane could be enhanced with additional hedgerow trees; The existing mature trees contribute to the landscape character and parkland qualities of the site and should be retained where possible; The arrangement, scale, massing and design of the proposed development will also need to be carefully considered and opportunities to create a development that perpetuates the parkland characteristics of the site should be explored; and Access and highway interventions should be carefully considered, ensuring that engineering works and associated infrastructure are kept to a minimum where possible. There is an opportunity to reinstate estate railings along Park Lane and into the development to maintain the parkland character of the site.</p> <p>With regard to ecology, a Preliminary Ecological Appraisal has been undertaken, which identified that with the exception of boundary habitats, the site is of low ecological value. Provided appropriate mitigation measures (identified in the study) are incorporated into the final design, no significant impacts are envisaged as a result of the proposed development. The Illustrative Masterplan illustrates how these mitigation measures are integrated.</p> <p>A Flood Risk Assessment has been undertaken for the site. It is evident from the Flood Risk Assessment that there are no constraints to the development of the site for residential development, with the entirety of the site being located within Flood Zone 1 and located away from the identified flood risk within Shifnal, around Wesley Brook.</p> <p>Whilst the exact form of Surface Water Management Strategy will need to be confirmed in due course further to detailed site investigations, the proposed development has been designed to provide suitable space for Sustainable Urban Drainage infrastructure which can be incorporated into the wider open space network / strategy on site.</p> <p>The landscape assessment concludes that due to the site's location, within an enclosed landscape, it is considered to be appropriate for development in landscape and visual terms. This assessment has informed the vision document and illustrative masterplan prepared for the site, which include the following design principles: Opportunity to maintain some of the site's parkland character through an area offset from the southwest and western boundary of the site; Potential to retain existing trees and hedgerows within site; and Opportunity for residential properties along the south-eastern boundary of the site to be outward looking to create a positive edge to the countryside.</p> <p>The site is located within the Green Belt but is already proposed to be safeguarded for future development beyond the draft Local Plan period. The Council's evidence base demonstrates that it, together with preferred housing allocation SHF022 and part SHF023, are located in the least harmful direction of growth surrounding Shifnal.</p>
A2328B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	<p>The level of growth is too high for Shifnal – services would not be able to cope.</p> <p>Proposals do not account for existing and proposed employment areas within 10miles of the settlement.</p> <p>Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out.</p> <p>Proposed safeguarded land exceeds Shifnal's future housing needs and will destroy the village atmosphere.</p> <p>Employment proposals will exacerbate traffic problems/ gridlocks in the town centre. A2503B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	1. The plan for Shifnal demands a level of growth that will swamp available roads, health services, schools and rail services 2. The plan for Shifnal takes no account of huge employment zones already planned within 10 mile radius. (duty to cooperate). 3. The size of Shifnal housing growth is concealed by using low housing density and it comes on top of houses already approved and not built. This will give Shifnal growth of 54% compared with 23% for the Shropshire area. 4. The proposed safeguarded land area (equivalent to 130 football pitches) far exceeds Shifnals future local housing needs and will destroy Shifnal's villages character forever. 5. The suggested scale of the industrial development will exacerbate the traffic already experienced in the town centre at peak periods as the resulting additional commuters will inevitably travel by car using this route 6. The green belt must be retained, especially to the west side, and protected to prevent Shifnal becoming another suburb of Telford. 7. Most of the Shifnal land earmarked for housing and industrial is being removed from the green belt with inadequate assessment of flooding, traffic generation, climate change, air quality, loss of prime farmland & and other environmental considerations. 8 . Presentation of this draft plan is riddled with contradictions, missing evidence and an effective denial of public access. 9. Support the decision not to proceed with the Bradford Estates proposals at Tong. 10. The 36 acre provision for the Midlands Air Ambulance at Tong appears excessive. No current plans are available to justify the size of the development and both the existing site in Cosford and other air ambulance sites are 2-3 acre:
A2505B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. Proposals do not account for existing and proposed employment areas within 10miles of the settlement. Shifnal housing growth is concealed by using low housing density and is in addition to existing consents not yet built out. Proposed safeguarded land exceeds Shifnal's future housing needs and will destroy the village atmosphere. Employment proposals will exacerbate traffic problems/ gridlocks in the town centre. Additional commuters will inevitably use travel by car and use this route. Green Belt must be retained, particularly to the west. Site assessments have been inadequate, there are contradictions and missing evidence. The plan is contradictory and difficult to navigate. Support the decision not to proceed with development at Tong. 36 acre site for Air Ambulance appears excessive in comparison with other site:
A2506B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S15 Shifnal Place Plan Area	Disagree	The level of growth is too high for Shifnal – services would not be able to cope. Support the decision not to proceed with development at Tong. 36 acre site for Air Ambulance appears excessive in comparison with other site:
A0016B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Only Brownfield sites should be considered for Bayston Hill. traffic is too busy for proposed site. Don't agree that the Development boundary is being moved. Recently four different planning appeals, including one public enquiry, have refused building on farmland surrounding Bayston Hill. Each Inspector recognised that Bayston Hill is separate from other communities and is already a large settlement with poor access and few amenities for an existing community of 5,200 residents.
A0018B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	As a member of a Residents Group and are currently in the process of arranging a meeting with CEG, the main land agent developing the Master Plan for this area. A key area of immediate interest is how this development will fit in with the 2 new proposed schools within SHREW030/R due to begin construction in 2021(?). Access to these schools is already of concern when considering the current road layout of Squinter Pip and Red Deer Rd and the issues that even local traffic already has with the tight narrow bends and corners and parking issues which would pose significant concerns for the safety of the students. There have already been collisions on the stretch of road adjacent to the proposed school site. Access to Park and Ride from Myton Oak Rd in the North makes sense and it is assumed this will be the start point of any inner link road through to Hanwood Rd. Where this access will be is of great interest given traffic issues both roads see when in holiday season and there is congestion on the A5. Ideally nothing would begin until the NWRR is completed, which will hopefully reduce the volume of traffic travelling to the West of Shrewsbury. A local centre will be welcomed by all and the North of SHR158 could be the most suitable place for it to be considered central and accessible to new and existing residents. The schools are much needed and the suggestion of a Medical Centre is welcomed. A key area of interest for the residents Group is the consideration of green infrastructure corridors and the acknowledgement of the environmental network to the East of the site, particularly that bordering SHR060 and SHREW094 and SHREW019 is welcomed. This natural pond is teeming with wildlife and is a resting place for swans, wild geese, ducks, moorhens etc and therefore a wide green corridor is required between the pond and any further new development to prevent the loss of this natural haven. This would also neatly flow into the corridor already created between SHREWS030/R and SHREW094. A robust residual surface water plan are very much needed as we are already seeing levels of the current ponds and streams rising year by year, and this is while the area is able to flood and create temporary pools in the lower points before it is turned into hard standing.
A0020B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	Site Allocation: Land south of Sundome Road, Shrewsbury. There is a requirement for a planting "buffer to the former Shrewsbury Canal." I support this buffer, but it must not be such so as to interfere with the canal's restoration i.e. it should ensure that machinery and equipment can be utilised for the required restoration work without any undue impediment.
A0026B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	The Parish Council strongly supports the level of development for Cross Houses in the Local Plan. The residents, at two public meetings, let it be known that Cross Houses had received a large number of housing due to five year land supply issues and asked that this additional housing be taken into account when Shropshire Council in this refresh of the local plan. The 9 wind fall houses allocated to the proposed development boundary is considered acceptable.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0030B1	Viability and Deliverability of Proposed Site	Draft Policy Area S16 Shrewsbury Place Plan Area		Richborough Estates believe delivery is likely to occur earlier in the plan period than currently shown in Appendix 7. We believe delivery is more likely in the short term period 2020/21 – 2024/25.
A0037B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Not a suitable site as it experiences noise and pollution, which risks the health and wellbeing of residents. The local plan should not change for this area and new applications should be judged on the policies as they currently exist. To reduce future pandemic risks and fight climate change, it is essential that this site is retained as countryside and not developed. I am concerned that the developer has not fully taken into account the sources of noise and pollution relying on weekday peaks but ignoring key weekend periods where there are clashes between retail, football and seasonal holiday traffic using the A5 trunk road.
A0049B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to Longden being a Community Hub. The settlement is half the size of the next smallest proposed Community Hub with only 135 dwellings. The Longden Village Development Statement, endorsed by the Parish Council, reflects the view that half the residents want to stay as a Community Cluster. The Hierarchy of Settlements is flawed as there is no weighting to reflect the size of services and its capacity to cater for additional residents. Feel less points should have been given to Longden by the Hierarchy of Settlements because they only have a mobile library, very small village shop which doubles as Post Office (but both get points), the pub is very small and only opens part time, the primary school and nursery are very small, superfast broadband is only available by satellite link, outdoor sports facility should be grouped with childrens playground, the 546 bus service does not allow for connections to other public transport in Shrewsbury and Longden does not have sustainable transport links to other nearby settlements. A lack of employment opportunities means residents have to drive to work so, development in Longden would generate significant carbon emissions - this is against government and Shropshire Council policy. Having Longden as a Hub will have a negative impact on the climate whilst staying as a Community Cluster means growth would be by infill and minimise carbon emissions. New development would result in loss of mature hedgerows and replacement ones will take time to mature, thus reducing carbon capture and storage. The Right Home Right Place survey indicated 18 houses were needed so residents feel the guideline of 50 (27 after consideration of completions since 2016 and existing commitments) is a betrayal of trust in the Council. Future Local Plan reviews are likely to add more houses: this engenders mistrust from those residents who have engaged with the Council so far. Residents fear that exception sites will be identified on an ad hoc basis and valuable agricultural land will be lost. If agricultural land around the village were developed, flooding from tributaries of the Reabrook will occur. <u>Wish to remain a Community Cluster and not be a Community Hub.</u>
A0053B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to Longden being a Community Hub. The settlement is half the size of the next smallest proposed Community Hub with only 135 dwellings. The Longden Village Development Statement, endorsed by the Parish Council, reflects the view that half the residents want to stay as a Community Cluster. The Hierarchy of Settlements is flawed as there is no weighting to reflect the size of services and its capacity to cater for additional residents. Feel less points should have been given to Longden by the Hierarchy of Settlements because they only have a mobile library, very small village shop which doubles as Post Office (but both get points), the pub is very small and only opens part time, the primary school and nursery are very small, superfast broadband is only available by satellite link, outdoor sports facility should be grouped with childrens playground, the 546 bus service does not allow for connections to other public transport in Shrewsbury and Longden does not have sustainable transport links to other nearby settlements. The Right Home Right Place survey indicated 18 houses were needed so residents feel the guideline of 50 (27 after consideration of completions since 2016 and existing commitments) is a betrayal of trust in the Council. Future Local Plan reviews are likely to add more houses: this engenders mistrust from those residents who have engaged with the Council so far. Residents fear that exception sites will be identified on an ad hoc basis and valuable agricultural land will be lost. If agricultural land around the village were developed, flooding from tributaries of the Reabrook will occur. <u>Wish to remain a Community Cluster and not be a Community Hub.</u>
A0063B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Don't know / no opinion	Appeal to us to re-consider a site owned by the respondent in Preston Montford
A0068B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	There is an increasing need for open space as more green land is built on. When Shirehall is vacated the sports pitches at the back of the site could be a green lung. It would be a mistake to sell Shirehall for more housing and why is it not included in the Plan? Planning process is sadly lacking and should be better or there will not be a Shropshire to develop.
A0081B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Disagree with Longden's Hub status. Disagrees with the large-scale development this will bring, due to flooding, cycle and walking routes will be disrupted, roads would not be able to manage the development.
A0082B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Disagree with Longden's Hub status. Development would impact the roads, which are not fit for more cars than it already serves. Lack of, or insufficient public transport means reliance on cars from the village. Concerned change in status would result in development which Longden could not cope with. Acknowledges that development is needed, but Hub status would result in too much for the village.
A0085B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Disagree with Longden's Hub status. Limited existing infrastructure & services cannot support this. Roads are currently poor with regular horses. Primary school cannot take more numbers, small village reputation is its selling point - more houses would ruin this. Poor public transport. The village can sustain large growth.
A0087B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	We wish to have the Town Centre part of the map redrawn to exclude St Alkmunds Square in the same way as Town Walls, Belmont, St John's and Swan Hill, and designate it residential. I would point out that St Alkmund Square is bordered by Church St and over this boundary road is St Alkmund Place (this is not part of the Square; as designated on some old maps) which is Commercial and often confuses individuals.
A0088B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	The school is too small for the existing numbers and the roads in the village are poor. The public transport services are also too poor.
A0090B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to Longden being a Community Hub against local community wishes. Infrastructure inadequate to service additional population including capacity of local shop and unreliability of buses leading to dependence on private motor vehicles which is not climate change prevention compatible or affordable for some. Issues with amount of speeding traffic on road with 30mph limit. Longden's rural setting central to its character and would be lost by building standard modern estate housing on surrounding fields. Development would conflict with ecological requirements and addressing climate change. Proposed changes to central government planning combined with proposed Hub status for Longden will exacerbate the situation with resulting lack of opportunities for local community voice to be heard and result in inappropriate significant development levels which do not benefit the village or community simply to meet targets. Evidence from elsewhere demonstrates that development does not necessarily support the retention of local services and facilities such as schools. Broader perspective of impacts versus target requirements needed
A0098B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Allocation contrary to community view expressed at public meeting. New houses unnecessary. Lyth Hill Road access busy and inappropriate for additional use. Capacity of local infrastructure, dentists, schools, roads, including access to A49 etc an issue
A0100B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	New line for development boundary suggested. Objection to non-inclusion of promoted site (SHR185) north of Dobbies across A5 and separate promotion document provided. Sustainable, deliverable site, with no environmental or right of way designations, no listed buildings, outside conservation area, no flood risk in a mixed use area well connected to main growth centre of Shrewsbury and its amenities. Access available and potential for additional access. Could be considered with adjacent promoted land SHREW036 (as SHR182) and discussion ongoing with a view to master planned development (residential led with employment element) for greater site. Sustainable location for housing and commercial development which would benefit from prominent roadside location, infrastructure & connectivity. Would deliver infrastructure and sustainability benefits, help provide development needs in line with spatial strategy that focuses growth in Shrewsbury. Development in this location would retain the A5 as a strategic buffer between Shrewsbury and Bayston Hill. The A5 provides a fixed defensible and logical boundary. Development would have a positive impact on Shrewsbury town centre, Meole Brace Retail Park and the local services south of the A5 & an opportunity to provide fully integrated cycle and pedestrian routes through and around the site.
A0100B07	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Recognition of Shrewsbury as main Strategic Centre of Shropshire and primary focus for development in the County, is supported. In addition to main provision through residential allocations, well located, sustainable windfall sites within and on the edges of Shrewsbury should help meet housing and employment development needs.
A0108B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	This village voted to be a cluster. The scoring system does not take into account limited nature of the services. Poor roads in and around village, which are also fairly narrow. The parish has already had properties developed in excess of the current Local Plan
A0114B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Don't know / no opinion	Development site affects National Grid assets or are in close proximity including 400kV Overhead Transmission lines. A plan showing details of the site locations and details of National Grid's assets provided.
A0114B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Don't know / no opinion	Development site affects National Grid assets or are in close proximity including 400kV Overhead Transmission lines. A plan showing details of the site locations and details of National Grid's assets provided.
A0115B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to the proposed development of Longden village by the Local Plan. Hub status inappropriate, Longden a very small village with limited road and other infrastructure and not capable of supporting further development or vehicles. Existing issues with HGVs. Agricultural rural setting central to local leisure opportunities & the character of the village. Additional development will result in loss of village identity.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0119B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to development off Lyth Hill Road. Not supported locally. Access and pedestrian safety issues due to busy road & parked cars which would be exacerbated by additional development. Capacity of services (schools and GPs) is a significant issue together with limited access points to the A49 and additional congestion.
A0120B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Proposals offer the opportunity for the Council to rectify its maladministration of Darwins Walk development (SHREW019 and SHREW094) which has resulted highway and residential safety issues, in particular a 'rat run', through provision of a relief road and traffic calming. The proposed development should include appropriately located link road between Hanwood Road and Mytton Oak Road which does not impact on residents. The proposal for a school will exacerbate an already unacceptable situation.
A0121B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	The Parish Council supports the allocation of Nesscliffe village as a community hub and the policies, map and supporting text associated with this.
A0121B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	The Parish Council supports the rest of the parish, outside of the Nesscliffe development boundary being classed as "Open Countryside".
A0134B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	Support Baschurch being identified as a Community Hub. The settlement has a good range of services and facilities and good sustainability credentials. Indeed it is one of the higher serviced Community Hubs identified. Support proposed allocation BNP024. The site forms a natural extension of the existing allocation (BAS017) being developed by Galliers' Homes, which also allows for vehicular access. It is within short walking distance of all village facilities. Scores 'good' within the Sustainability Appraisal. Is highly deliverable and will provide a suitable mix of housing to meet the needs of families together with older and younger residents, improving the range and choice of housing in Baschurch. Can provide a generous area of open space and footpaths will link to open space on the adjacent Galliers' Homes site and to the wider PROW network. Development will improve the vitality of the village, support local services and increase the range and choice of housing available. There is a need to clarify the proposed site guideline regarding 'low-density', 'significant open space provision' and consider the proposed site capacity of 35 dwellings as this represents a density of only 11.7dph and could conflict with Policies SP1, SP3 and SP5 which require efficient use of land. Whilst Policy DP1 requires a higher proportion of smaller dwellings. The existing allocation (BAS017) being developed by Galliers' Homes is at a density of 17.5dph, although these are predominantly larger detached properties. Reflecting the proposed policies a density of 20dph would be more appropriate, with a minimum guideline of some 60 dwellings. This is still below assumptions in the SLAA. There is also a need to clarify the proposed site guideline regarding 'supporting delivery of the medical centre', wording is vague and not consistent with Para 34 of the NPPF (setting out contributions expected from development). Policy requirements 'squeeze' the viability of development, as demonstrated within the Local Plan Delivery and Viability Study. BNP024 can achieve policy requirements, however 'low-density' and 'significant open space provision' further limits saleable floorspace on the site relative to other proposed allocations. As such it is important that policy guidelines are realistic about the means by which the development might, "support the delivery of the medical practice". CIL is the best means of contributing to provision of a medical centre, such contributions should not be in addition to CIL, and policy guidelines should recognise this. The site is highly deliverable and viable. It is likely to be delivered earlier than the Local Plan's current forecast of 2020-2030 with the 2021-2025 period more appropriate in Local Plan Appendix 7: Forecast of Delivery Timescales for Local Plan Allocations. There are local housebuilders keen to deliver the site as soon as possible.
A0138B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area		Policy S16.1 makes no specific provision for Shrewsbury's significant need for specialist housing for the elderly. To make the Plan more robust and meet local needs, we would suggest a specialist Retirement Village comprising a range of types of older persons' housing including bungalows, assisted living and extra care housing, located opposite the recent development of retirement flats at Shire Living, the Coppice, Holyhead Road. Site promotion (5.5h) included in Rep. Site has an existing access, is well screened in the landscape, is served by public transport and close to the countryside and other older person accommodation and other complementary services. The site would complement the health/care development on the existing allocation (Shrewsbury West SUE). The site is outside the groundwater source protection zone and due to topography would not drain into the one to the north. The site is considered viable and deliverable within the time period 2020-2030. Retirement villages have proven to be a successful model, providing opportunities for residents to move from more independent accommodation to more supported accommodation as their needs change and enable couples to remain geographically close even when their needs differ. Furthermore, a concentration of older people better supports a good range of specialist services for the elderly, benefitting those on the site and wider area
A0146B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to the proposed Hub status of Longden village which will create extra traffic. Cluster status should be retained. Longden has limited road and other infrastructure and not capable of supporting further development or vehicles. Existing road safety and traffic issues. Attractive countryside setting should be retained
A0150B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to Longden being a Community Hub. The settlement is half the size of the next smallest proposed Community Hub with only 135 dwellings. The Longden Village Development Statement, endorsed by the Parish Council, reflects the view that half the residents want to stay as a Community Cluster. The Hierarchy of Settlements is flawed as there is no weighting to reflect the size of services and its capacity to cater for additional residents. Feel less points should have been given to Longden by the Hierarchy of Settlements because they only have a mobile library, very small village shop which doubles as Post Office (but both get points), the pub is very small and only opens part time, the primary school and nursery are very small, superfast broadband is only available by satellite link, outdoor sports facility should be grouped with childrens playground, the 546 bus service does not allow for connections to other public transport in Shrewsbury and Longden does not have sustainable transport links to other nearby settlements. A lack of employment opportunities means residents have to drive to work so, development in Longden would generate significant carbon emissions - this is against government and Shropshire Council policy. Having Longden as a Hub will have a negative impact on the climate whilst staying as a Community Cluster means growth would be by infill and minimise carbon emissions. New development would result in loss of mature hedgerows and replacement ones will take time to mature, thus reducing carbon capture and storage. The Right Home Right Place survey indicated 18 houses were needed so residents feel the guideline of 50 (27 after consideration of completions since 2016 and existing commitments) is a betrayal of trust in the Council. Future Local Plan reviews are likely to add more houses: this engenders mistrust from those residents who have engaged with the Council so far. Residents fear that exception sites will be identified on an ad hoc basis and valuable agricultural land will be lost. If agricultural land around the village were developed, flooding from tributaries of the Reabrook will occur. <u>Wish to remain a Community Cluster and not be a Community Hub.</u>
A0167B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area		Employment at both Castle Foregate and Sentinel Works is identified as protected employment land. It is assumed that protected employment land status is supportive of the expansion and improvement of existing employment operations. There is significant concern that proposals for the North West Relief Road, applications within the SUE West and other development in this locality will have a detrimental impact on the future viability of the Oxon Hall Caravan Park. Positive dialogue is very important.
A0167B13	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area		Policy S16.1 makes reference to the proposed alignment of the NWRR and the Councils principle of support for it. We have significant concern about the impact of the NWRR and similar concerns in relation to criteria 7 of this policy. Specifically the proposed support for potential commercial uses along the NWRR corridor. We would not support any proposals which increase the extent of development in proximity of Oxon Hall Caravan Park, particularly uses which would create noise and disturbance. Criteria 7 should be amended to reflect these concerns. Determination of Planning Applications on the SUE West should accord with the adopted Masterplan, as set out in policy
A0167B14	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area		Comprehensive information provided regarding a Planning Application on SUE West (SAMDev Plan allocation). This included consideration of local and national policy. Key considerations identified included: noise; safe crossing of existing and proposed roads; construction management; and safe access for caravans.
A0174B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	SHR060 is a greenfield site outside development boundary in open country so it's open market residential and is contrary to policy, there is no road frontage, no access via SHREW019. Viewed along with SHR158 & SHR161 a large proportion of SHR060 should be open greenspace. Towards western side of site sloping makes it less viable, developed it would have high impact on Violet Grove & Bluebell. This will also impact on pond, housing impacting on the ponds ecosystem. On the western side flocks of Canadian Geese, swans, moorhens feed. Rich biodiversity contacted with pond and reedbeds, greater spotted woodpecker, pied wagtail etc along with frogs toads & newts, dragonflies, mayflies a rich ecosystem well established also providing cover for hibernation. High value site that could contain protected species. The site is within 250meters of wildlife site. Impact was made when Darwin Walk was built and this is far larger development. Development would be contrary to SC policy. Country Park Estate was promoted by press and Peter Nutting planning committee 01/07/14 supported 37 acres of public open space. This was never carried out. There have been trees felled and a loss of habitat. Big town plan objectives support openspace & green corridors. SHR060 should be used to support this. SHR060 could be an ideal location for community recreation, education, bird hides, direct green access for planned primary school
A0182B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to Longden being a Hub. The village is small and has 135 residential dwellings and the thought of it becoming a Community Hub is total madness! We believe that the points system is severely flawed, when you compare Longden with Minsterley, Hanwood and Pontesbury. The pub is only open part-time and part of it has already been converted into 3 living spaces. The library is only in the village every 2 weeks for about 10 minutes. The shop/PO is very small. The school is full. The village isn't easily accessible from the main bypass in Shrewsbury and there is already a considerable traffic problem in the village and at Radbrook at school times. If Shropshire Council are so short of housing stock, why not tap into some of the 400,000 land banked that Developers have already got planning permission for?
A0192B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to the proposed designation of Ford as a community hub. Hierarchy of Settlements assessment scoring system has been misapplied to Ford and the correct score is 42 points this reflects <ul style="list-style-type: none"> •Inaccurate recording of available amenity green space at Quail Ridge which when identified non amenity or duplicate areas (detailed in rep) within it are deleted becomes less than 0.2ha threshold. •Peak Bus service – There is not a return service between 3pm and 6pm within the specified distance of the village (services & locations detailed in rep) •Outdoor sports facility- the former Bowling Green does not qualify as in private ownership, not accessible to the public & has no arrangements in place for use of the space as a Bowling Green. There is a planning application for storage units pending consideration. Additionally disagree that mobile libraries should only get 1 point less than permanent libraries as service is far more limited. Hub designation also inappropriate because of: Conservation Area, limiting potential for infill and potential harm to character of Conservation Area; Soil Grade 2 or 3 which is good or very good for agricultural & warrants protection; Ford village is in a mineral safeguarding area and development would therefore contravene policies SP13 and DP31; Right Home, Right Place Housing Survey (2020) showed that the scale of demand in Ford is low and it has been hard to find tenants for affordable housing recently completed at Cross Gates Meadow and this was reflected in officer comment; concerned that hub status will be permanent and lead to development beyond the boundary in the medium to longer term.
A0192B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Ridge and furrow soil pattern at FRD011 should be protected as per policy DP24; Ford village is in a mineral safeguarding area and development would contravene policies SP13 and DP31; EIA needed for site FRD011; Ford village is in a mineral safeguarding area and development would therefore contravene policies SP13 and DP31; the scale of housing demand in Ford is low

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0213B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Uffington has been removed as a Community Cluster without justification. This is surprising given the SAMDev housing requirement for Uffington has not been delivered. It is considered that Uffington should remain as a Community Cluster with further sites allocated to address the shortfall in delivery since the SAMDev was adopted and meet the growing need for the different types of housing identified in the NPPF and the draft Local Plan (Policies DP1 – DP7). This will become increasingly important if the revised housing methodology for Shropshire becomes national policy in late 2020
A0215B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to Longden being a Community Hub, as: There are already nearby Community Hubs at Pontesbury and Dorrington. Shropshire is a rural county, making Longden a Community Hub would change the nature of the village and surrounding area. Fields and PROWs around Longden village are essential to the health and wellbeing of residents. Development on greenfield sites around the village would negatively impact wildlife and their habitats, including mature trees. Traffic will increase and cause highway safety issues, particularly for pedestrian, cyclists and horse riders (Shrewsbury Road is well used and has many blind bends). There are also no pedestrian pavements between Longden and nearby villages. Increased traffic will also make journeys to Shrewsbury more difficult. Longden bank is virtually impassible in winter. Longden is prone to flooding and certain areas are therefore unsuitable for development. Development will also exacerbate flooding to existing properties and roads by removing natural drainage - increasing highway safety issues. There are few services and amenities in the village and little to occupy young adults
A0226B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Current main road through site is often dangerous: it is bendy, cars are parked on it and vehicles speed. School pupils commute through on foot and by bike. Building a new school will cause access issues with already problematic traffic. The Park and Ride is a good idea but again the main road will not cope. What will be done to protect the spectacular wildlife when the school is built?
A0229B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Vehicular access will be inadequate, especially if from the existing estate. I would hope that noise levels are carefully considered for new residents. New housing on the west of the town means that residents will have to commute through the town to employment in the north and the North West Relief Road seems crucial for this as is a better organised, easy to use and cost effective public transport system to reduce car usage. Quiet roads to the town centre should be put in place. A green gap between the new development and Bowbrook Meadows would be beneficial and likely to be highly used. It would be great if the wildlife returning to Bowbrook Meadows now construction has slowed down, had an area left for them on the new development site.
A0245B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Site promotion (part of BAY027) should be considered for development (low density / high-quality self-build housing, leisure/hospitality facilities or holiday lodges) The site is associated with the small settlement of Redhill, with access to services and facilities in Hook-a-Gate (part of a proposed Community Cluster) and a short journey to services and facilities in Shrewsbury. It benefits from an access off Longden Road, already used for railway maintenance and 15 or so houses. It is well screened, so will not overlook existing properties.
A0249B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Site BIT015 should be identified as a site allocation within the Local Plan. The site is in a sustainable location in the heart of Bicton, within easy walking or cycling distance to services and facilities. It is also under 2km from services and facilities in Bicton Heath, with regular bus services between Shrewsbury and Oswestry available from a nearby stop. Development of the site would help meet future housing requirements and support growth of Bicton Community Hub. The site is currently a semi-derelict farm. There is only one allocation (BIT022) which will intrude into the countryside and be a dominant feature when passing through the village. It appears that this site has only been allocated due to its location adjacent to the B4380 and will not provide any benefit to the village or contribute to the wider character of the area. The proposed development boundary is odd, excluding the historic centre of Bicton.
A0258B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	The parish council supports the Hanwood community hub, and support the separate classification of Hanwood Bank as Open Countryside. Development must not be allowed to encroach outside the development boundary of Hanwood
A0258B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Part of the site for this 1,500 home extension is within Great Hanwood parish. The parish council objects to its allocation for development as it encroaches into the parish and the increased traffic at Edgebold will have an adverse impact on Hanwood; Edgebold roundabout and the A488 are already high risk areas for accidents and speeding and this development will worsen this issue.
A0260B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	I support the approach outlined in policy S16.1 'Development Strategy: Shrewsbury Strategic Centre' including the allocations for new housing development identified in Schedules 16.1(i) and 16.1(ii), and on the Policies Map. This appears to provide a balanced provision which meets the development requirements for Shrewsbury over the Local Plan period. I also support the aims outlined in Para 12 of this Development Strategy which recognise the special character of the town and its particular environmental challenges. This aims to ensure that the development of the town will have regard to '...the promotion, conservation and enhancement of the town's natural and historic features, heritage assets, green corridors and spaces, and ...Environmental quality, including the corridors of the River Severn and its tributaries, the town centre and the registered battlefield...' I am particularly concerned that the Kingsland /Rad Valley which provides a priceless mature asset, should be recognised as a key element of the Green Infrastructure within Shrewsbury. This river corridor should not be vulnerable to entirely inappropriate development proposals, similar to the recent Planning application ref: 20/03270/FUL.
A0267B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Evidence submitted for inclusion of site BNP037 in Baschurch. Statement outlines that the site is available and deliverable, and is suitably located near road networks and local services including a medical practice. The site has the potential to also relocate Baschurch Bowling Club with access directly onto Yeaton Lane, which has previously been discounted by Shropshire Council. Whilst the new bowling green would require enabling works in the form of residential development between the northern boundary of the bowling green and properties to the rear of Perrfield Road, the land owner would be providing the land for the club on a peppercorn rent. Additional site plan information also submitted
A0268B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	Support proposed allocation of SHR197VAR. The site is ideally located to deliver vital employment land, adjacent to Shropshire main growth point, Shrewsbury. It is capable of expanding on the existing commercial focus of Shrewsbury towards its north east and the area around Hariescott whilst making the very most of two of the County's strategic transport corridors of the A49 and A53 (offering excellent transport links). It is also well located to allow access from/benefit from pedestrian and public transport links to the nearby range of employment, commercial and community uses as well as Shrewsbury Town Centre. It also benefits from PROWs that provide access into the Sandourne area of Shrewsbury, which could be diverted/upgraded to increase accessibility into town and from town into the countryside. There is a pressing need for more employment land in Shrewsbury, this has been consistently identified throughout the Local Plan review. Development of SHR197VAR can contribute to achieving the draft Spatial Strategy (urban focus and levels of employment land, identified within draft Policy SP2 and its explanation) and the objectives of the Economic Growth Strategy for Shropshire. In particular SHR197VAR can contribute to two specific objectives in the strategy, these being: directing economic growth towards a number of specified transport corridors and economic hubs in the County, two of which are identified as the Shrewsbury urban area and the A49 corridor; and targeting growing in under-represented sectors, including research and development and creative and digital technologies. Analysis identifies a steady decline in the delivery of Class B1(a), B2 and B8 since 2007, albeit it is acknowledged that there remains a demand for these uses. In parallel there has been an increase in both the delivery of and demand for Class B1(b) and B1(c) uses (this growth appears to have taken place across a network of 'Community Hubs' due to the ability to deliver more bespoke units at a lower market drawing a high proportion of start-ups and pioneer uses away from the current employment allocations and SUEs around Shrewsbury. There is therefore a need for sufficient sites at Shrewsbury to balance the delivery of traditionally popular, albeit space intensive, Class B2 and B8 uses with the emerging trend of new Class B1b and B1c uses. SHR197VAR can directly meet the qualitative needs of Shropshire, confirmed by an assessment of current market and employment trends undertaken by a local agent who concluded "likely to be a good demand for employment land in this location over the next 10 years. Considering the population of Shrewsbury and its status as the county town of Shropshire, the level of B1c users is generally low. There is a pent-up demand from employers who reside in Shrewsbury and wish to work in the town, but there is currently a complete lack of available sites and facilities", "a surge towards requirements from other employment sectors, in particular research and development, laboratories for the food industry and data storage, as well as some more general commercial uses for larger premises, which have been stymied through lack of opportunities", "available units in Shrewsbury are historically fairly small and therefore do not offer prospective occupiers the opportunity to expand in the future" and "demand for employment space in this location will increase over the next few years, specifically from the food industry. This would complement the start-up units at Shrewsbury Food Hub". SHR197VAR has a net developable area of 7ha and can accommodate approximately 20,000m2 of new employment floorspace (Gross Internal Area) comprising a mix of Class B1c, B2 and B8 uses - it is entirely flexible employment land that can respond to changing needs and help meet needs of Shrewsbury and Shropshire more widely. It will allow a rebalancing of employment growth at Shrewsbury away from the more traditional Class B2, B8 and office-based industries and provide more of a focus on information and technology industries. This will help effect the 'step change' required by the Economic Growth Strategy of the plan. SHR197VAR can also deliver structural landscaping and screening around the fringes of the site, including a landscaped drainage attenuation feature at its southern end, linkages to the existing road, footpath and public transport networks including enhanced footpath linkages across the site; and ecological enhancements throughout the site focused on the new landscaping features. SHR197VAR is immediately available, devoid of any environmental, infrastructure or legal constraints and demonstrably deliverable and developable. Development of SHR197VAR would be in full accordance with the wider suite of general policies of the emerging Local Plan - it has the ability to meet all of the standards set out in draft Policy DP12 and provide a range of employment units that deliver significant energy efficiencies was considered from the earliest point of the site's promotion. Site promoter has undertaken a thorough approach to site promotion and prepared significant assessments already which will allow for an early application and delivery to occur, this should provide confidence about deliverability. In terms of the specific merits of SHR197VAR there are no constraints that would hinder the development of the land - physical, commercial or otherwise. Market analysis has been undertaken by an agent and informed conclusion that the site would represent a highly attractive and sought-after location for a wide number of employment uses, especially those with a customer facing format. Due to the location of the site at what is effectively the northern gateway to Shrewsbury it will provide a high degree of immediate visual prominence from the strategic road network, maximising its attractiveness to commercial operators. It also benefits from good access to the strategic road network and potential to form part of a growing commercial hub, which adds to its attraction as a location. Due to the flexibility offered by proposed site guidelines (allowing Class B1, B2 and B8 uses), SHR197VAR there is flexibility to respond to needs and the market, although consider that it would be particularly well suited to Class B1(c) uses as targeted by the Economic Growth Strategy. It could similarly lend itself to a range of larger or even a single Class B2 unit in the sector of engineering, agri-food or agri-tech, helping to further the ambitions of the Big Town Plan. Also note continual need for Class B8 floorspace across Shropshire, particularly along the main distributor routes such as the A53 and A49 corridors. The site is well located, devoid of any barriers to delivery and resultantly would be subject of a high level of market demand. Appendix 7 of the Draft Local Plan suggests delivery between 2025 and 2035, however would expect delivery much more quickly in a maximum of two phases (based on market attractiveness of the location and site promoters commitment to delivery). Marketing will begin as early as possible once the allocation is secure with an expectation that it will be purchased by a commercial developer quickly. On this basis we would anticipate the quicker delivery of the site in its entirety, likely over the short to medium term of 2020 through to 2030 at the latest. There may be a need to clarify uses on the site given recent changes to the Use Class Order. An illustrative masterplan is provided as an appendix to this representation. Proposals respond to Council ambitions to create a more vibrant and diverse economy across Shropshire with Shrewsbury as its focus, whilst also delivering sensitive design that complements nearby existing and proposed uses. A viability report, access strategy, environmental opportunities and constraints technical note, heritage statement, Great Crested Newt survey and archaeological desk based assessment are also provided as appendices to this representation. SHR197VAR bolsters the Council's employment land strategy, one which would otherwise be partially reliant on two further allocations in Shrewsbury that are inflicted by a range of infrastructure and environmental constraints. It also offers flexibility and greater choice to the market. Consider delivery of SHR197VAR would complement the key requirements of draft policy SP1 entirely, specifically in the way in which it will provide a new modern employment development at a highly accessible location on the edge of Shropshire's key growth point, Shrewsbury. One of the key pillars of the strategy in draft Policy SP2 is the delivery of at least 15ha of employment land per annum over the plan period until 2038 focused primarily on Shrewsbury as the Strategic Centre of the County. SHR197VAR would help directly fulfil the spatial ambitions of the plan. SHR197VAR can also successfully and viably incorporate a range of low carbon energy systems and energy efficient fabrics and design. Its design and layout can also comfortably accommodate additional network of planting across the site as well as SUDs - masterplan provided as an appendix to this representation. SHR197VAR represent one of the most preferable locations for commercial development when assessed against the sequential approach described by draft Policy DP9. Major new employment development can be delivered at the site in such a way that does not have a harmful impact on the prevailing landscape character or nearby heritage assets. The orientation of the site, being bound by the strategic road network and both existing and proposed employment development beyond on two sides, would result in the delivery of a development that would both complement and strengthen the growing commercial hub at Battlefield Roundabout. SHR197VAR can be delivered in a way that is entirely sensitive to a combination of local habitats and existing trees and hedgerows. It does not contain any statutory or non-statutory ecological designations - the wider site features a number of potential habitats capable of supporting protected species, but none lie within the proposed allocation

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0272B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area		Promotion of an extension to site BNP035. The 2.15 acre site is a logical extension to BNP035 and would be directly accessed through this site. Development of the site could comply with guidelines proposed for BNP035 in that it would provide for a low density scheme which will include the delivery of a firm development edge to the eastern part of the site to ensure development is suitably contained, and would be served by a safe access through to Shrewsbury Road. The site would not encroach further north east than the adjacent estate to the north west and will result in a defined limit to the development in the area. Developer who is legally committed to develop BNP035 has indicated an intention to commit to this additional site, should it become a preferred option, demonstrating deliverability.
A0272B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	Confirmation that site is deliverable immediately and is adjacent to residential development and with safe access. It is considered this site represents the most suitable site for housing in the village. The site is well located adjacent to residential development and with safe access. It is also considered deliverable with developer interest - a legal agreement (subject to planning) has been completed with Shingler Group Ltd to purchase and develop the site. Concept layout plan prepared by Shingler Group Ltd indicating how 23 units of mixed house types including "affordable units" can be provided together with three areas of open space, one of which would act as a small village green is provided. A separate submission promotes the area of land immediately to the north east of the identified site for further development as a natural progression of the site BNP035.
A0299B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	Support the settlement strategy for Shrewsbury. Recognise the need to consider constraints to development, but consider its important that the Local Plan does not preclude opportunities to bring forward residential development on brownfield sites in the flood zone, particularly where an acceptable design solution can be identified that will ensure that new housing is not at risk of flooding and risk elsewhere is not increased/reduced.
A0306B064	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	We are concerned about firstly, the proximity of this site to a SSSI and secondly, the lack of mitigation measures mentioned in the plan:
A0313B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Alternative site promoted - as a hub Ford should have more than one allocation (FRD011 should also be allocated).
A0314B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Don't know / no opinion	Alternative site promoted - but not named. For a medical centre and dentist
A0316B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	The sprawl needs to end. Battlefield village is now encased by industrial development. Lion Coppice is the last remaining wild green space inside the A49. By allowing this development to spill out over the A49 it opens the floodgates to more development along the A49 and the A53. This development means that there can be no expansion of the capacity of the A49. With the proposed North West Road channelling traffic onto the A49 via the Battlefield Link Road from the Ellesmere Road Roundabout, the A49 (already prone to traffic jams) will need widening to accommodate this traffic. By building along the edge of it it's stopping the opportunity to solve this problem.
A0321B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Support the letter sent by Longden Village Action Group. This makes the following points. Object to Longden being a Community Hub. The settlement is half the size of the next smallest proposed Community Hub with only 135 dwellings. The Longden Village Development Statement, endorsed by the Parish Council, reflects the view that half the residents want to stay as a Community Cluster. The Hierarchy of Settlements is flawed as there is no weighting to reflect the size of services and its capacity to cater for additional residents. Feel less points should have been given to Longden by the Hierarchy of Settlements because they only have a mobile library, very small village shop which doubles as Post Office (but both get points), the pub is very small and only opens part time, the primary school and nursery are very small, superfast broadband is only available by satellite link, outdoor sports facility should be grouped with childrens playground, the 546 bus service does not allow for connections to other public transport in Shrewsbury and Longden does not have sustainable transport links to other nearby settlements. A lack of employment opportunities means residents have to drive to work so, development in Longden would generate significant carbon emissions - this is against government and Shropshire Council policy. Having Longden as a Hub will have a negative impact on the climate whilst staying as a Community Cluster means growth would be by infill and minimise carbon emissions. New development would result in loss of mature hedgerows and replacement ones will take time to mature, thus reducing carbon capture and storage. The Right Home Right Place survey indicated 18 houses were needed so residents feel the guideline of 50 (27 after consideration of completions since 2016 and existing commitments) is a betrayal of trust in the Council. Future Local Plan reviews are likely to add more houses: this engenders mistrust from those residents who have engaged with the Council so far. Residents fear that exception sites will be identified on an ad hoc basis and valuable agricultural land will be lost. If agricultural land around the village were developed, flooding from tributaries of the Reabrook will occur. Wish to remain a Community Cluster and not be a Community Hub.
A0326B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to any proposal to build new houses off Lyth Hill Road as such a development would lead to dangerous traffic conditions and a threat to public safety.
A0329B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	The site is unsuitable for development as it is prime agricultural land. Agricultural land is essential for ecological, sustainability and economic reasons. This will become more acute after we leave the E.U. Building on this agricultural land compromises the ability of future generations to meet their own needs. This site is currently outside the development boundary. Extending the development boundary would adversely affect the character and identity of the settlement of Bayston Hill. Development of this site will also be detrimental to wildlife as it forms a green extension to Lyth Hill Country Park. Light pollution would be particularly detrimental to nocturnal wildlife.
A0330B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	The site is unsuitable for development as it is prime agricultural land. Agricultural land is essential for ecological, sustainability and economic reasons. This will become more acute after we leave the E.U. Building on this agricultural land compromises the ability of future generations to meet their own needs. This site is currently outside the development boundary. Extending the development boundary would adversely affect the character and identity of the settlement of Bayston Hill. Development of this site will also be detrimental to wildlife as it forms a green extension to Lyth Hill Country Park. Light pollution would be particularly detrimental to nocturnal wildlife.
A0331B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	BAY039 should be removed from the draft Local Plan as: It is opposed by the local community, the previous Preferred Sites Consultation summary does not properly reflect this. It will result in unacceptable and dangerous increases to vehicles on Lyth Hill Road. There is no evidence of a comprehensive traffic survey having been undertaken, it had it would have noted existing traffic is considerable; numerous vehicles park on Lyth Hill Road obscuring vision - causing problems for pedestrians, cyclists, and vehicles (particularly large ones); a particularly obscured point is near the junction of Lyth Hill Road and Cornwall Drive/Clarkefields; and work on the A49 regularly disrupts traffic in Bayston Hill. These problems would be exacerbated by development of BAY039. Issues noted during the Preferred Sites consultation remain relevant, specifically: • The site is located beyond the current development boundary. • The level of traffic arising from development on surrounding unsuitable roads including Lyth Road. • Additional traffic will deter non-motorised users accessing the Country Park. • The site doesn't accord with the aspiration of the Bayston Hill Community Led Plan (2028) which desires small housing sites spread around the village and retention of the gap between Bayston Hill and Shrewsbury. • The site is remote from and has poor road access to most of the existing facilities in Bayston Hill. • Better alternative sites exist at the area to the northwest of BAY039. • Planning permission has already been refused for good reasons. • Would result in the loss of greenfield land.
A0345B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Hierarchy of Settlement Para 5.234 the criteria for designating hub status has been misapplied - querying the allocation of points for the size of the amenity space, bowling green, Library, Public Transport Forms 1 - 4
A0345B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Oppositor to building on site FRD011 - lack of infrastructure the village lies in a conservation area, is an ancient ridge, is a designated mineral safeguarding area, biodiversity present in and adjacent to the proposed site, following the recent housing needs survey the results found the demand for housing in Ford to be low with difficulty letting the recently built affordable housing Forms 5 - 9
A0346B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Hierarchy of Settlement Para 5.234 the criteria for designating hub status has been misapplied - querying the allocation of points for the size of the amenity space, bowling green, Library, Public Transport Forms 1 - 4
A0346B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Oppositor to building on site FRD011 - lack of infrastructure the village lies in a conservation area, is an ancient ridge, is a designated mineral safeguarding area, biodiversity present in and adjacent to the proposed site, following the recent housing needs survey the results found the demand for housing in Ford to be low with difficulty letting the recently built affordable housing Forms 5 - 9
A0347B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Regarding the recent plan review letter of objection sent to the Shropshire council by Longden Village Action Group. confirm total agreement with these views addressed in the letter of objection, which are widely shared by many locals.
A0349B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Disagree on designation of Ford as a community hub. Believes the calculation of points has been misapplied. Not an adequate bus service, no bowling green and restaurant is outside the village. Ford has suffered from over development and contrary to national policy.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0350B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Disagree on designation of Ford as a community hub. Believes the calculation of points has been misapplied. Not an adequate bus service, no bowling green and restaurant is outside the village. Ford has suffered from over development and contrary to national policy.
A0351B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Regarding the recent plan review letter of objection sent to the Shropshire council by Longden Village Action Group. confirm total agreement with these views addressed in the letter of objection, which are widely shared by many locals.
A0364B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Longden should remain a Community Cluster and not become a Community Hub. Longden cannot support more houses. The roads cannot cope with more vehicles or pedestrians. Residents want the village to remain peaceful and quiet. Development will destroy the way of life in the village. The character of other villages and towns has been destroyed by sprawling development and associated vehicles
A0374B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Wattlesborough is wholly sustainable with shops, school, village hall, employment and direct access to the A489 Trunk Road It is extremely frustrating to see the Parish Council maintain their open countryside status. A mixed residential development on WAH009 would ensure that young and old residents are able to stay in the village and contribute to the community. WAH009 is available and could come forward for development immediately
A0375B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Wattlesborough is wholly sustainable with shops, school, village hall, employment and direct access to the A489 Trunk Road. It is extremely frustrating to see the Parish Council maintain their open countryside status. WAH012 is available and could come forward for development immediately.
A0377B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Disappointed Halfway House is being classed as open countryside. The Parish Council should consider the benefits of Community Hub or Community Cluster status, especially given the availability of a superb road network, shops, school, employment etc. Site HYH004 is available and it can come forward immediately for development.
A0378B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Disappointed that sites STA005 has been identified as not having 'long term potential' for residential development within the SLAA. The site is available, adjoins existing built form within the settlement of Stapleton, with an established access to Council Road, is flat and wholly sustainable by virtue of Stapleton being part of a Community Cluster and as such presents a logical and suitable site for a modest residential development. Further evidence and layout plans can be provided as required.
A0379B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	Pleased to note that BIT015 has been identified as having Long Term Potential for residential development within the SLAA. Consider that the sites could be considered to have short term potential as The land is currently available. Adjacent land has recently been the subject of residential development. The site is deliverable. The site adjoins existing development (to its north) is level, brownfield and easily developable. It performs 'fair' within the SA, which is better than many of the sites in Bicton. The site has direct access onto Bicton Lane which in turn leads to Holyhead Road. Further evidence and layout plans can be provided as required.
A0380B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Disappointed to see that site MFB003 is classed as not having long term development potential. This site is ready for immediate development.
A0382B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	Pleased to see site NES012 is identified as a long term potential SLAA residential site. We feel the site should be considered for short term potential due to availability, deliverability, accessibility and sustainability having achieved a fair status rating and could be delivered in a two phase approach. We are keen to offer the site for mixed residential development. Site plans attached.
A0392B11	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Risk(s): The provision of a new Medical Centre has been identified as a priority by Baschurch Parish Council to support the development within the village and catchment area of the existing surgery, with work progressing on development of a Business Case. The provision of a road from Station Road to Eyton Lane has been identified as a priority by Baschurch Parish Council to alleviate the congestion and safety issues adjacent to the schools in Eyton Lane. Comment(s): The following to be added to support the proposed New Medical Centre: "Land has already been allocated through a 106 Agreement to support a new Medical Practice which is to be further supported by the requirement to allocate additional land to this project from the adjacent allocated site. The provision of a new Medical Centre is a priority for the residents of Baschurch and the catchment area of the existing Surgery due to the significant existing and planned development within the catchment area." The following to be added to support the link road: "A link road, suitable for use by coaches, between Station Road and Eyton Lane is a priority to alleviate the traffic and safety concerns adjacent to the schools in Eyton Lane. Any future development in adjacent sites will need to contribute towards this
A0392B12	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Risk(s): That the statement that Shrewsbury is the primary focus for new development in the County will be read across to the Community Hubs, Community Clusters and the Countryside within the Shrewsbury Place Plan area. These should be developed with the same priority as all other similar areas with the County. Comment(s): There is a risk that the whole of the Shrewsbury Place Plan will be deemed as the primary focus for new development instead of just the town itself as the strategic centre. The wording needs to be made clearer to prevent the whole place plan area being subject to a priority within the County.
A0392B13	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Risk(s): Experience has shown that numbers are being treated subjectively and the addition of the word "around" makes that even more subjective and open to interpretation to a much higher number. There is already the ability for the numbers to be increased through a process in SP6, so there is no need for an approximate value in this table. Comment(s): The settlements' residential guidelines show for Baschurch "Around 360 dwellings". The term "around" is too loose and open to a very wide interpretation without any limit in the upward direction. It is accepted that the Residential Guideline can be exceeded but this is in accordance with SP6 Paragraph 3 where additional considerations need to be addressed. Therefore, there is no reason for the word "about" or "approximately" to be used and a firm number will ensure that the requirements of SP6 Paragraph 3 will apply at that number and not at 110%, 120% or whatever number can be subjectively applied by an applicant at the time.
A0392B14	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Risk(s): That a solution to the junction onto Shrewsbury Road is not adequate for the traffic from the current and allocated development sites accessing Shrewsbury Road. Comment(s): The Development Guidelines state "All necessary highway improvements, including to the main access junction onto Shrewsbury Road will be undertaken." To make clear the improvements required, this shall include "....., where at least a mini roundabout shall be provided."
A0392B15	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Risk(s): That a solution to the junction onto Shrewsbury Road is not adequate for the traffic from the current and allocated development sites accessing Shrewsbury Road if BNP035 is developed before BNP024. That there is no community benefit from this site so therefore the provision of affordable housing should be increased to 20% instead. Comment(s): The Development Guidelines state "An appropriate highway access will be provided and all necessary improvements to the local highway network implemented." Should BNP035 be developed before BNP024, then the road improvements to the main access junction onto Shrewsbury Road shall be undertaken, where at least a mini roundabout shall be provided. This site allocation has no other community benefit within the guidelines and therefore a requirement for a minimum of 20% affordable housing in accordance with DP3 shall be provided on this site, even if this means enlarging the site to accommodate the additional Affordable Dwellings only. We appreciate that the target in DP3 is 10% in the north and 20% in the south, but we would like to ensure 20% in the north where no other community benefit is being provided
A0392B16	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Risk(s): To provide an additional allocated site within the already allocated Residential Guideline. Comment(s): This site is in the area of what was BAS034 in the previous plan period. Still being reviewed, to be presented at Parish Council Meeting 5 October 2020 and submitted separately. Note we have an informal extended deadline to accommodate our further work in this area. The submission will include a comment to stipulate the area allocated to parking for the station should be conditioned in S106 to be available for the duration of the plan period (2038

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0415B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	I am writing to say that I agree in its entirety with the "Objection from the Longden Village Action Group" to the "Shropshire Council Local Plan Review". I also agree with the "Longden Village Development Statement 2017-2027". 1. Also, connecting Longden to the rest of Shropshire are very poor. I understand that the best road, which is the main Shrewsbury road, was downgraded by the council in the 1960s to no longer be a B road. There are many blind corners on this Shrewsbury Road. This is a dangerous road. A little North of Hook A Gate is a weak railway bridge that it is not recommended to drive large lorries over. I understand that this Shrewsbury Road cannot be improved by for example building bypasses because it runs within a narrow valley. Longden is a gateway to the Shropshire Hills and so road building here is much more difficult and expensive than it would be in the North Shropshire Plain. Many people in Longden do not work in Shrewsbury because of the limited job opportunities there. Instead they work in Telford or Wolverhampton or beyond. The most important road out of Longden is the single track road to the A49. With increased traffic in recent years I have met far more oncoming cars on this road than I used to. This bottleneck would become much worse if a significant number of new houses was built in Longden parish. This road emerges onto a hill on the A49 with poor visibility of cars travelling North on the A49. It is not a good spot for a new improved road to emerge onto the A49. I do not believe that it would be viable to build more than a the number of houses proposed in the Longden Village Development Statement without a dramatic and expensive improvement to the roads around Longden. 2) The last bus from Shrewsbury to Longden is at 18:05 and the first bus from Longden in the morning is at 08:10. I believe that even for someone working in central Shrewsbury it would not be possible to commute to and from Longden using the bus service. Leaving work early each day at 17:30, especially if you had not got in until 09:30 that morning, would be unacceptable to most employers. For a commuting bus to be viable, the last bus would need to be at 19:00 or later. Commuting to a more likely centre of employment such as Telford would of course be impossible using the Longden bus service. 3) A number of "facilities" around Longden have been awarded a points score similar to that of Pontesbury to justify Longden also being defined as a hub for house building. Pontesbury Library is open for 4 days a week, including Saturday. The library bus that turns up infrequently in Longden offers a much poorer service. Similarly the opening hours for Longden shop are much shorter than those for the Coop in Pontesbury which unlike the shop in Longden has a good range of reasonably priced products. The Tankerville Arms in Longden seems to only be open erratically due to a lack of customers. I suspect that it will shut. Similarly the Church (when it was open) did not have weekly services. Annscroft Church is the only well attended Church in this group of parishes
A0423B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Condoover should be a Hub
A0423B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Policy 16.2 put forward in the Plan Review omits to include this significant settlement from the list of proposed Community Hubs in the Shrewsbury Place Plan. Condoover is a significant settlement in the rural area south of Shrewsbury and this proximity makes it more important that it should deliver a mix of housing based on identified land allocations in the Local Plan. We disagree with this omission. In our view it is not correct to rely on a Neighbourhood Plan given the clear housing need for the types of housing identified in the HNA.
A0439B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to proposed allocations BNP024 & BNP035 and consider BNP021 would represent a more preferable allocation. BNP021 is located adjacent the Corbett Secondary School, Pre-School, Baschurch Village Hall and Sports fields. It could be developed to accommodate the proposed housing growth for Baschurch, replacing the proposed allocations (BNP024 & BNP035). BNP021 would form a natural and logical addition to the built form of the village/committed developments and allowing comprehensive development and a 'rounding off' of the settlement. It performs 'good' within the SA and had 'long term potential' with the SLAA (consistent with the proposed allocations). It is considered misleading that the full extent of committed developments are not included within the development boundary. The committed residential sites to the north, afford the opportunity for access and linkage, thus limiting the impact/congestion on Eyton Lane and providing an opportunity to improve traffic links to Station Road. BNP021 could be phased to deliver across the plan period. BNP021 is largely void of substantial landscaping and has low ecological potential (owing to them being in active agricultural use). As such there is potential to enhance and improve the landscape and biodiversity of the site and its surroundings. BNP024 & BNP035 are too remote from core facilities of the village and can't provide the localised road network betterment that development of BNP021 can. The Parish Council are keen for ned development to deliver tangible community benefits. BNP021 affords the opportunity for improvements to Eyton Lane, which is busy with school traffic (both pedestrian and vehicular).
A0450B01	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Biton Parish Council object to scale of housing development in Shropshire and proportion of housing in Shrewsbury due to impacts on environment and urban infrastructure specifically the page 6, para 2.2 - proposed scale of housing development increases dependency on private vehicles and is not consistent with objective to achieve net zero carbon economy page 6, para 2.5 - housing requirement for over 30,000 dwellings is excessive (equal to 20% of current 138,000 households in Shropshire) page 8, para 2.19 - Local Transport Plan should have been deposited with the Local Plan to help assess the transport impacts of the scale of development page 10, para 2.25 - Infrastructure Plan should have been deposited with the Local Plan to help assess whether social and other infrastructure had been adequately improved before development commence
A0450B10	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Policy S16.1 and para should not require Shrewsbury and the surrounding rural area to achieve such a disproportionately large quantity of the housing development proposed in Shropshire. Shrewsbury could become so densely populated and developed that it deters further business growth and inward investment. In para 5.222, the development and infrastructure provision for Site SHR057/SHR177 cannot realistically be presented as necessary to support improvements to Shrewsbury's green infrastructure. In para 5.223 the detailed masterplanning of this development will also require a strategic planning input and investment from the local authority to avoid any adverse impacts from this development on Shrewsbury. The development guidelines for this site should also address the following impacts of the proposed housing development: 1,500 dwellings will accommodate over 2,500 private vehicles which will conflict with traffic on Mytton Oak Road especially ambulance movements traffic from the development will increase movements on the A5 by-pass and is likely to exceed existing capacities of some roundabout junctions and it is difficult to see how planned road improvements could mitigate for the growth in traffic movements the impacts on social and other infrastructure in the west of Shrewsbury should be mitigated by both site SHR057/SHR177 and by site but this latter development does not appear to be providing any additional infrastructure investment:
A0451B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Longden should not be designated as a Community Hub. The infrastructure of the village can only support a small number of new houses and cannot support the larger scale of development being proposed in the village.
A0455B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Development of BAY039 will result in the loss of agricultural land with an environmental value that is of value to the country. Where new housing is required it should be built on brownfield land. New housing on Lyth Hill Road will increase traffic use along this road (used to relieve flows along the A49) which is already heavily used and affected by speeding. This traffic will also increase volumes at the A49 junctions in Bayston Hill and at the Lyth Hill junction north of Dorrington. These traffic impacts will also be driven by residents accessing local services. The development of BAY039 will also increase pedestrian movements along Lyth Hill Road, increase the flood risk and impact on the capacity of local services. The development on this land has already been refused and this proposla must show how it is different, improved or better.
A0455B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Development of BAY050 which includes BAY012 The Glebelands will result in the loss of amenity land with habitat. Plans submitted for plannign approval for these sites indicate the proposed development provide only limited open space and a replacement vicarage whereas Bayston Hill still has a functioning vicarage. This will increase traffic at the heavily used and dangerous A49/Lyth Hill Road junction and increase demands on local services with limited capacity. Development and the increasing population in Bayston Hill will forever alter the character of Bayston Hill.
A0477B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to designation of Longden as a Community Hub as the village should remain a Community Cluster. In the Settlement Hierarchy assessment of Longden - the public house is struggling to remain open following recent temporary closures and broadband and mobile phone not-spots affect the village. School Lane in Longden is an unadopted, single lane road affected by inadequate passing places, severe flooding, increasing through traffic, increasing services vehicles to the Golden Arrow Court business park, traffic volumes damage roadway servoces including watrer pipes and further development will affect amenity uses along the lane.
A0488B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	I object to any Development on the land bounded by Longden Road to the west, the A49 to the east, the A5 to the south and the southern edge of Meole Village (Washford Road, Pendle Way, Milnthorpe Close and Waterside Gardens). This land should be designated 'open Countryside' and not subject to development, without full consultation with Meole Residents. I object to the Development on SHR 145 unless this includes additional vehicular access to Meole Brace Retail Park, sufficient to fully relieve traffic congestion on the Park and also to facilitate walking and cycling, consistent with Government Strategy (Strategy for Investment in Cycling and Walking 2017) and the recent update (Feb 2020) plus The Low Traffic neighbourhood and Shropshire Climate. Partnership Strategy (due for publication December 2020). The Meole Traffic Group requests a Professional Assessment of the provisions for traffic, including cycling & pedestrians for the Meole Area & adjacent roads and parking, as part of this review, to include consultation with Residents at all stages, including Terms of Reference, Scope of Assessment, publication and implementation. I formally request a review of the Meole Community infrastructure, including the need for a Doctors' Surgery or satellite of existing Surgery, Pharmacy provisions & a modern Community Centre immediately.I formally request that Shropshire Council should facilitate a Local Neighbourhood Plan for Meole, as it is an ancient village with fewer Community Facilities than neighbouring Wards, with multiple recent Housing Developments impacting on Meole, including traffic issues, and there is a pressing need to implement several Government Papers and both National and local Initiatives, including (among others) those described in Paragraph 2 of this page
A0501B18	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Paragraph 5.224 It is incompatible with the council's own declaration of climate emergency to make planning decisions that will increase carbon emissions. New roads bring more traffic as a result of the induced traffic effect. More cars and more car journeys results in more fossil fuel being burnt, and there is the carbon from the building and maintenance of the road, plus carbon sequestration lost in the destruction of habitats to make way for the road. Transport carbon emission are rising in Shropshire and now stand at 37%. This local plan needs to contain targets in every sector for % reduction in CO2 emissions year on year. As a direct consequence, the proposal to build a North West Relief Road is incompatible with a climate emergency and the requirement to reduce the county's carbon footprint. The large amount of tax payer money that the council has committed to this road should be spent on carbon reduction projects throughout the county. £17 million could be wisely spent in ways that benefit the whole county and genuinely support efforts to mitigate climate crisis. I disagree with paragraph 5.224 because the NWRR proposal should be abandoned. https://bettertransport.org.uk/roads-nowhere/induced-traffic
A0509B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Development of 125 new households in Ford contradicts the Council's stated aims on climate change and the environment 1. Ford does not have a regular bus service – and none at all in the evening and on Sundays 2. Ford no longer has a railway station 3. Ford does not have any local industry People moving to Ford, if they work, will need to drive to Shrewsbury or beyond, and return in the evening. ONS statistics show an average of 1.3 vehicles per household. 125 new dwellings will yield 162 new vehicles in the village. This is probably an underestimate because all working age people who move to Ford will need to drive. If environmental protection and tackling climate change were to be taken at all seriously by the Council, it would site new development near transport hubs and places of work
A0509B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Disagrees with Ford classification as a hub and questions scoring given to some services in Ford.
A0509B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to allocation of the site as 1. Lower Farm has been the centre of the village for centuries 2. It is home to bats, swallows, crested newts and many other endangered species 3. It is in the Ford 'Conservation' area Any building, other than for farming and improvement should never be allowed on this key environmental site at the heart of the village. Any attempt to build on it will meet with the strongest opposition at both local and national level
A0509B4	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Concern that there are insufficient school places at Ford Primary school to accommodate increase in pupils from the new housing being proposed
A0513B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	Supports proposed Development Boudnary, but would also be appropriate to include the MB park and Ride site within the dev boundary as a natural extension.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0513B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	MD&DP support the Council's approach of identifying Shrewsbury as the primary focus for new development within the County. This focus of growth would aid in meeting Shropshire's Strategic Objective of continuing to maintain Shrewsbury as the County's Strategic Centre and develop it into a sub-regional centre. Shrewsbury is already well established to manage the expected housing and economic growth and should be the focus of new homes, new jobs, further retail and leisure and where necessary infrastructure improvements. This is considered the most appropriate and sustainable area for the County to grow and MD&DP support the Council's approach to implementing this through the Reg 18 Local Plan.
A0513B6	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	MD&DP further supports the Council's allocation of Land to the south of Meole Brace Retail Park as Site SHR145 as a housing allocation within the Reg 18 Local Plan. It is considered that this site represents a sustainable location and should be kept as an allocation for new housing site with the capacity to include extra care/assisted living facilities. Notwithstanding the recent refusal of this site at planning application stage (19/04389/OUT) the application process established (and officers accepted) that there were no technical reasons why the site couldn't come forward for residential development. There were no technical objections from any Council Department nor any Statutory Consultee. No specific issues raised by highways, regulatory services, flooding and drainage, or archaeology, ecology and trees. The allocation is deliverable in the short term. In addition, as part of the planning application it was agreed that the development of the Site would provide a number of public benefits. However, would like to see site guidelines amended to... "Vehicular access will be provided off Hereford Road to serve the development and the adjacent park and ride site. Any mature trees, hedgerows and priority habitats will be retained and where appropriate be enhanced and expanded to form part of the green infrastructure network. Acoustic design, layout, green infrastructure and appropriate building materials will be used to manage noise arising, including from the adjacent Meole Brace Retail Park, Hereford Road, A5, the railway line and the Park and Ride. This will need to follow Good Acoustic Design principles set out in ProPG and associated supplementary guidance. The site will incorporate appropriate sustainable drainage, informed by a sustainable drainage strategy. Any residual surface water flood risk will be managed by excluding development from the affected areas of the site, which will form part of the Green Infrastructure network. Flood and water management measures must not displace water elsewhere."
A0518B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	The Council appears to have removed the community cluster status of Uffington without justification. This is all the more surprising in the circumstances that the SAMDev housing requirement for Uffington has not been delivered by the development of the allocated UFF006/10 site which has only provided a single dwelling. It is Les Stephan Planning's client's view that development status of Uffington should remain as a "cluster" with further sites being allocated to address the shortfall in delivery since the SAMDev was adopted and meet the growing need for the different types of housing identified in the NPPF and the draft Local Plan (Policies DP1 – DP7). This will become increasingly important if the revised housing methodology for Shropshire becomes national policy in late 2020
A0520B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Objects to designation of Longden as a hub. Further development should also be avoided as the road access to Longden is narrow and would create more traffic passing Meole and Priory schools in Shrewsbury; other small local roads are regularly used by large agricultural vehicles and not suitable for commuter traffic. Longden only has a limited number of services and parking for these is limited. Longden also has lack of employment opportunities and people would have to commute out of the village
A0526B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Proposes sites BNP033/BNP040 for housing allocation on the southern edge of Baschurch in Prescott further to the landowners submission to the Strategic Land Availability Assessment. BNP040 contains an equestrian centre with stables, menage and paddocks adjoining a single residential property fronting onto the B5067 and is contiguous with adjacent paddocks under BNP033. A planning appeal decision is submitted for a similar land use in Lavendon near Milton Keynes in Buckinghamshire. In the decision, the Inspector concludes an equestrian centre and the related paddocks may all be regarded as previously developed land. In the context of NPPF test of sustainable development, planning permission was granted for the redevelopment of the lands for housing. It is suggested BNP033/BNP040 also be allocated for housing development on the same grounds.
A0538B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Cross Houses should remain a Hub. Cross Houses has had enough house building in recent years. Cross Houses' residents should have had the option to remain as Open Countryside. The points scoring is flawed – only have mobile library, only 1 children's playground, 1 amenity green space, the outdoor play facility is just a field. The Inspector should inspect all the facilities to determine whether SC is correct.
A0557B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Disagree with Ford becoming a Community Hub as it doesn't have the infrastructure or amenities to support 125 new houses. Don't believe that the overgrown bowling green can be classes as a sports facility. Ford lies within a conservation area. Local housing survey 2019/20 showed demand for new housing is low. Also the site allocated for 75 dwellings FRD011 is an ancient ridge and furrow field that should be protected. Development on this land conflicts with DP24. This land should be protected.
A0571B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	Support allocation of site SHRD60 Hanwood Road Shrewsbury, along with neighbouring SHR158 and SHR161 which form a sustainable location for future development. Initial designs for the site suggest it can accommodate 439 properties, along with 0.5ha of employment land and a green wildlife corridor. Proposals for a local centre, medical centre and increased education capacity in this area of Shrewsbury will in close proximity to this site and easily accessible via sustainable forms of transport including walking and cycling. Highways reports indicate that Hanwood Road will provide adequate access to new development on the site. Whilst the SC viability study list the site as marginal we believe this is a worst case scenario and would welcome further discussion with SC on this matter. We consider the site is deliverable and viable within the plan period
A0572B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	The majority of the site allocation (SHR158) is promoted for development by CEG who are a strategic development and investment company operating across the UK. CEG have been leading discussions between the two other landowners forming the draft allocation; Mr Roger Parry (on behalf of Davies Parry (Oakfields) Limited Site SHRD60) and Shropshire Council (via their Estates Team Site SHRD61). CEG confirm that the proposed site allocation is both viable and deliverable. We have extensively reviewed the policy requirements and 'Development Guidelines' provided in respect of the Site's allocation in the Regional 18 Pre-Submission Draft Shropshire Local Plan and do not anticipate any issues in the Site's deliverability or viability in this respect. Notwithstanding the above, we would welcome the opportunity to discuss the assumptions made within the Study. The Study makes various assumptions regarding the delivery of the allocation, in particular a £17.38m cost of abnormal site infrastructure costs, which the Study's author states is a high level assumption provided by the Council. It would be most helpful to CEG to understand the assumptions behind this cost in more detail, and we would welcome a process of engagement with the Council over the coming months. CEG confirm that the assumptions made with regards to the timescales for the delivery of the proposed site allocation are correct, given the scale of the development proposed. In respect of deliverability CEG are committed to bringing forward an outline application as soon as possible and in advance of the Examination in Public. Some early discussions with housebuilders have taken place and it is expected that a proportion of the site will be available early in the plan period. Naturally, a site of this scale will be phased, and a phasing plan will form part of the outline application.
A0598B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Wishes to see Cross Houses designated as Open Countryside, not a community hub; concern Parish Council are not objecting to designation as a hub; concern about points given in hub status for library, playground, green space and outdoor sports facility
A0600B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Community consultations in Ford have shown that the general population do not support high growth in housing in the village. Greater consideration of community wishes should be reflected in the designation of Ford as a Hub
A0637B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	I am local to Longden and have lived in the Parish all of my life. I wish to write and tell you that I strongly agree with the objections that have been sent to you by the Longden Village Action Group. I feel certain my views are shared with many in our Rural community.
A0639B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to Ford being a Hub. Quail Ridge Amenity Green Space wrongly includes the play area and Advanti LPG gas tanks: the correct area is 0.19ha therefore 3 points should be deducted. The bus service arrives at 6.08pm and a service not in the parameters of the village arrives at 4.52pm; deduct 5 points. The outdoor sports facility is not publicly accessible and is subject to a planning application for storage: deduct 1 point. The library service is restricted and not accessible - 1 visit every 2 weeks for 20 minutes: deduct 1 point. Ford lies within a conservation area. Points have been wrongly allocated to "Make" the criteria suit. The criteria has been implemented to suit the Council not the residents. Soils within Ford as classed as good to very good and should remain as agricultural land. Ford is designated as a mineral safeguard area this conflicts with SP13. Field FRD011 is an ancient Ridge & Furrow field and this loss would conflict with Policy DP24. The loss of FRD011 would have detrimental impact of the local biodiversity especially the loss of hedgehogs and other hedgerow wildlife. The local Housing Survey reported a low demand for new housing with a lack of rental take up on existing properties. Field FRD011 lacks the infrastructure connections to facilitate a high density development. Access to the main road at peak times is difficult especially making a right turn towards Welshpool. Trinity School has no room for expansion for the development of Cross Gates Meadow. The 75 proposed dwellings would produce many more than 1 child Existing residents' children would be forced out of local education. Existing residents' mental health will be impacted as a result from building noise, builders working weekends, Builders working past 5pm, loss of privacy to rear gardens, loss of privacy to windows facing field FRD011. Loss of public footpath/common land as this has been used for many years as a green space. 75 houses is not low density this should not be allowed a figure of below 50 should be considered if at all. Access at peak times along Butt Lane does not support development, building or construction traffic. Loss of community.
A0641B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Concerned about infrastructure, lack of open space and play facilities, lack of bus routes, school and medical facility and community room to serve the additional population. Developments should be built in parallel with essential infrastructure. Green networks are essential (DP13 & DP15) so existing boundaries around site 060 should be retained. Full public consultation should be carried out on the master plan before finalising proposals.
A0642B50	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	The case for the NWRR is weak. It should be omitted from the Local Plan unless a revised business case and carbon assessment shows that it still makes economic and environmental sense. The Shrewsbury Place Plan Appears to allow commercial development but not residential in the area west of Ellesmere Rd but this is not clear. 10a: The reinforcement and enhancement of the local and strategic highway network: Investment in roads is not consistent with the Climate Emergency or Net Zero CO2 target. Shrewsbury Integrated Transport Strategy, the Big Town Plan Movement Strategy and the Shropshire Local Transport Plan: None of these documents are available for the consultation and it is not clear how they support or are supported by the NWRR
A0642B51	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	This seems to get the green light assuming NW road built – but traffic won't be included in NWR assessment. This needs to be included as understanding cumulative impacts of developments is essential.
A0642B53	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Para 5.224 The traffic implications of SHR173 need to be included in the NWRR traffic modelling to assess cumulative impacts.

A0651B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	<p>Petition objecting to the identification of Ford as a proposed Community Hub and the proposed allocation of FRD011.</p> <p>258 (84.9%) of dwellings responded and 46 (15.1%) were not at home/unoccupied. Of those available:</p> <p>2 (0.8%) were in favour of Ford being designated as a Community Hub and the subsequent housing development.</p> <p>15 (5.8%) refused to sign for other reasons.</p> <p>241 (93.4%) were in support of this petition.</p> <p>The results of the petition clearly show overwhelming support for its aims and objectives.</p> <p>Consider that the criteria for identification of Ford as a Community Hub are incorrect as:</p> <ul style="list-style-type: none"> -Amenity Greenspace at Quail Ridge: If the gas tank and play area (already allocated points) are excluded, then the amenity area is below the size threshold of 0.2ha. Meaning a reduction of 3 points. -Bus Service: There is no return service arriving between 3 and 6pm, it arrives at 6:08pm. There is one bus that arrives in Ford parish at 4:52pm but it only stops opposite the Smoke Stop, now within the parameters of the village/development boundary and not within a reasonable walking distance of the village. Meaning a reduction of 5 points. -Outdoor sports facility: The redundant bowling green is overgrown and not accessible to the public. Planning Application for storage units pending consideration. Meaning a reduction of 1 point. -Library: Mobile library for 20 minutes once a fortnight should not be allocated 1 point less than a permanent library open 6 days a week, as it is a far more limited service. <p>Object to identification of Ford as a proposed Community Hub and proposed development for the following additional reasons:</p> <ul style="list-style-type: none"> -The village lies within a Conservation Area (limiting potential for infill and potential harm to the character of the Conservation Area). -Soil types within and surrounding the area are good/very good (Grade 2 and 3) for agricultural use. -Ford is designated a Mineral Safeguarding Area and proposed development conflicts with draft Policy SP13. -FRD011 is an ancient Ridge and Furrow field that should be protected. Its proposed development conflict with draft Policy DP24. -The required Environmental Impact Assessment will highlight biodiversity present in and adjacent to FRD011 that should be protected. -A Local Housing Survey undertaken in 2019/20 showed scale of demand for new housing was low. This highlighted that it has been particularly difficult to find tenants for the recently completed affordable housing at Cross Gates Meadow (32 dwellings). Officer observed the results of this survey did not provide much evidence for a big increase in development. -Ford is a rural village that lacks infrastructure to support the level of extensive development resulting from Community Hub status. Concerned that if identified as a Community Hub, this status will be permanent and lead to development beyond the development boundary in the medium to long term.
A0652B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	agree in principal with some considerations - ensure that the wildlife pond is protected - consider green corridor. increased traffic along squinter Pip Way and Red Deer Road. consider parking and increased road traffic
A0674B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	<p>Object to Longden being a Community Hub.</p> <p>The settlement is half the size of the next smallest proposed Community Hub with only 135 dwellings.</p> <p>The Longden Village Development Statement, endorsed by the Parish Council, reflects the view that half the residents want to stay as a Community Cluster.</p> <p>The Hierarchy of Settlements is flawed as there is no weighting to reflect the size of services and its capacity to cater for additional residents.</p> <p>Feel less points should have been given to Longden by the Hierarchy of Settlements because they only have a mobile library, very small village shop which doubles as Post Office (but both get points), the pub is very small and only opens part time, the primary school and nursery are very small, superfast broadband is only available by satellite link, outdoor sports facility should be grouped with childrens playground, the 546 bus service does not allow for connections to other public transport in Shrewsbury and Longden does not have sustainable transport links to other nearby settlements.</p> <p>A lack of employment opportunities means residents have to drive to work so, development in Longden would generate significant carbon emissions - this is against government and Shropshire Council policy. Having Longden as a Hub will have a negative impact on the climate whilst staying as a Community Cluster means growth would be by infill and minimise carbon emissions.</p> <p>New development would result in loss of mature hedgerows and replacement ones will take time to mature, thus reducing carbon capture and storage.</p> <p>The Right Home Right Place survey indicated 18 houses were needed so residents feel the guideline of 50 (27 after consideration of completions since 2016 and existing commitments) is a betrayal of trust in the Council.</p> <p>Future Local Plan reviews are likely to add more houses: this engenders mistrust from those residents who have engaged with the Council so far.</p> <p>Residents fear that exception sites will be identified on an ad hoc basis and valuable agricultural land will be lost.</p> <p>If agricultural land around the village were developed, flooding from tributaries of the Reabrook will occur.</p> <p>Wish to remain a Community Cluster and not be a Community Hub.</p>
A0682B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	I am concerned yet again regarding the possibility of Longden village becoming a "hub" for housing development. Longden is on a B road and the already difficult traffic flow will only get worse and more dangerous. The road network in and around Longden does not support Longden becoming a "hub". Longden is surrounded by public footpaths, some of which will disappear if village be one a hub. Not only will recreational enjoyment be curtailed, the visual, and noise impact will be substantial to the village. The government is actively encouraging people to get fit and walk locally, but this development will significantly limit this.
A0684B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Opposes the designation of Longden as a hub settlement, and questions the scoring process of the hierarchy of settlements document - including why Longden is allocated 3 points for a library when its only a mobile, the same as Pontesbury which has a permanent new library
A0686B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Oppose allocation of BAY039. The site was turned down only three years ago. Shropshire Councils own criteria suggests BAY040, BAY042, and BAY048 are available and score as well or better in the Sustainability Appraisal and Site Assessment Environmental reports. Access to the site is poor and there are already issues with speeding on the road. Access from the A49 to the road to the site is also poor, and when accidents occur on the A49 this road is used as a cut through. Flooding on the site is a concern and drainage in the area could not cope with further increase in water. Bayston Hill Parish Council does not support the allocation of this site. Designation of Bayston Hill as a "preferred development area" and changing the boundary seems underhand and has not given people without social media information an issue. Consulting during a pandemic means people haven't been able to meet to discuss the process
A0686B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Other sites in Bayston Hill are more appropriate and better meet the Sustainability Appraisal and Site Assessment Environmental criteria; disputes that the site is within easy walking distance of the GP and shops services school and other facilities. The sites proximity to the Lyth Hill Country Park is also an issue that seems to have been overlooked. Concern that the site won't provide enough off street parking and excess cars will block up Lyth Hill Road affecting access to Lyth Hill for walkers, cyclists and horse riders
A0694B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Support objections to the identification of Longden as a Community Hub by community groups. Longden is only served by one relatively small road from Shrewsbury to Bishops Castle, going North to South and two small single track roads going East to West. Traffic on the North to South road is already restricted by having to pass through the village of Anncroft where many Properties have no off-street parking, resultant on-street parking at times causes vehicles to be held-up waiting to pass. Further development at Longden, one mile away would only exacerbate the problem.
A0716B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Longden should not be a Hub - roads a poor/narrow, limited pub access, limited library access, shop & post office are one building, broadband only available via satellite link.
A0717B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Roads are narrow and dangerous with school children - more houses will exacerbate this problem, the Shrewsbury-Longden road does not merit even a 'B' road status,
A0838B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	My comments relate to two issues connected with sites SHR 161, 158 and 060.1) Whilst I disagree with the scale of development proposed in the Local Plan in general, and these sites in particular, some development will inevitably take place in this part of Shrewsbury. Shropshire Council needs to ensure that it does not make the same mistakes that it made in the current DanlvsWalk/Bowbrook housing areas where it has allowed extensive housing to be built without ensuring that the necessary infrastructure was built at the same time. I refer in particular to proper footpath access to reasonable amounts of open space; to the lack of any play facilities for children; to the lack of a bus route; and to the lack of a school, medical facilities or community building to serve a population that is considerably greater than many of Shropshire's larger villages. It is within the control of the planning system to place conditions on planning consents to ensure that large scale developments are built in parallel with essential infrastructure. The draft Local Plan has a raft of policies dealing with these issues. but the policies are of no value if they are not used and enforced. Be bold, and don't let it be just another housing estate! 2) My second comment is more specific. It will need to be realised through the eventual Master Plan but is still relevant to this consultation. There is a need to ensure that extensive green networks and corridors are created for wildlife and to maintain open views, and this is reinforced in Local Plan policies DP 13 and DP 15 in particular. There are several swales and water features that run through the existing Darwins Walk/Bowbrook housing areas, and these, together with hedgerow continuity, offer the opportunity to make continuous habitat links which allow wildlife to flourish. In one area in particular there is the opportunity to create a network from the existing open space of the Community Woodland and ancient wells at Nobold Lane, across the A488 Hanwood Road, and along the line of the current water feature north of Violet Grove and Red Deer Road. Site 060 is adjacent to this area, and to fulfil the corridor concept it would be essential to keep the boundary of any building on this site well to the north of the current water area and nearby hedgerows. It would be very helpful if the Council could ensure that a full public consultation is carried out on the Master Plan before any of its proposals are finalised.
A0857B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Opposes inclusion of Valeswood, Great Ness, Little Ness and Hopton as a community cluster. Area has already had extensive development in the last 5 years, and significant development is planned in nearby Nesscliffe and Baschurch, and two large poultry farms have also been developed in the area. The road network is not suitable for increased levels of traffic and is also heavily used by large farm vehicles and HGV's. Public transport in the area is also poor, and few job opportunities. Nesscliffe Country Park is likely to be designated as a nature reserve and new housing will be detrimental to this designation
A0858B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Opposes inclusion of Valeswood, Great Ness, Little Ness and Hopton as a community cluster. A0859B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Don't know / no opinion	Form B1 completed but no comments attached

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0862B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area		Support draft Policy S16.1 and the settlement development boundary as now shown on the Policies Map. As the county's strategic centre, Shrewsbury is an appropriate location to accommodate growth. Land within the town's bypass offers some of the most sustainable locations for development anywhere in the county. Draft Policy S16.1 sets a housing requirement of 8,625 dwellings for Shrewsbury over the 22 year plan period 2016-2038. This equates to a growth rate of 1.17% per annum of Shrewsbury's estimated 33,597 dwellings. The compares positively to the overall growth of 1.13% per annum in the number of households in Shropshire over the plan period. However it is only marginally above the projected increase in households in Shropshire, so the town's growth is barely more than the county's as a whole. In light of this, the policy should seek 8,625 dwellings as a minimum figure. Expressing the housing guideline figure as a minimum figure will support the Plan's strategy to focus development in urban areas. Strongly support allocation of SHR054a as: <ul style="list-style-type: none"> • It provides better balance of residential development across the town, being one of only two sites north of the river and the only new allocation on east side of Shrewsbury; • It enhances Shrewsbury's ability to deliver its housing requirement of 8,625 dwellings; • It reduces the Plan's reliance on unidentified windfall sites (currently 505 dwellings); • It is sustainably located close to a range of existing services and facilities including schools, doctors, shops, public transport and a very good range of sports and health facilities; • It makes better use of currently under-utilised agricultural land separated from wider land by the bypass in accordance with paragraph 118d of the NPPF; • Allocation of the site is consistent with the allocation of site SHR166, which is also within the Shrewsbury bypass; • The Landscape Report provided to the Council in September 2019 confirms that the site will have an acceptable impact on wider landscape; • Development of the site will provide a pedestrian route from the Shropshire Way footpath along the river to Sundorne Road as part of the site's green infrastructure contribution, enhancing the town's network. Residential development will have to comply with draft Policy DP1 (Residential Mix) which requires sites of over 5 dwellings to include 25% of dwellings to be 2 bed or less and a further 25% 3 bed or less; and sites of over 50 dwellings to include a range of specialist housing to meet the needs of older people. These requirements will reduce the average size of dwellings significantly. The indicative layout plan for the site that was submitted with the 'Call for Sites' assumed an average floorspace of around 115sqm per dwelling. The emerging policies will bring the average floorspace down to around 85sqm. Smaller units require an increase in the number of dwellings by approximately 35% in order to achieve the same floorspace coverage. Therefore, in order to achieve the same floorspace as shown in the indicative layout plan at these smaller sizes, there would need to be at least 81 dwellings on the site. Draft Policy SP1 (The Shropshire Test) requires development which, "makes efficient use of land" and draft Policy SP5 (High-Quality Design) includes a requirement to make, "efficient and effective use of land and topography". Support these sections of Policies SP1 and SP5. SHR054a is 3.86 hectares in size, the proposed guideline figure of only 60 dwellings is equivalent to a density of only 15.5 dwellings per hectare. This is inconsistent with draft Policies SP1 and SP5 as the site is capable of accommodating 116 dwellings at a density of 30 dwellings per hectare. Acknowledge that some of the site will be needed for compensatory car parking for the Shrewsbury Club, however this does not justify a reduction from 116 dwellings to only 60 dwellings. 85 dwellings (net density of 22 dwelling/ha) would be more appropriate. Assuming the above guideline of around 85 dwellings, we can confirm that the site will be highly deliverable and viable. SHR054a is likely to be delivered earlier than the current timescale of 2025-2030 shown in Local Plan Appendix 7: Forecast of Delivery Timescales for Local Plan Allocations. This should be changed to the 2021-2025 period.
A0871B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Longden should remain a cluster not become Hub. Any new housing should be in keeping with the size and village rural character. Less points should have been given to Longden by the Hierarchy of Settlements because: they only have infrequent, little used, mobile library; very small pub which only opens part time & not well patronised; nursery affiliated with the school not a separate entity; no superfast broadband; Housing would result in increased carbon emissions contrary to legislation and Councils climate change policy. Hub proposal result in additional built development & suburbanisation in the Countryside eroding open and rural character of the area.
A0873B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	BIT023 promoted for allocation. It is identified as a site with long term potential which has no significant constraints identified by the SLAA. However considered site is has short term potential. Site is accessible and well located relative to village, school and facilities, the development boundary and has a favourable Fair sustainability rating. It is immediately available, fully deliverable with interest from developers. Identified site BIT022 has more significant identified highway issues, implications and requirements than proposed site BIT023 where SC Highways have accepted proposed access arrangements and identified no significant highway concerns relative to previous applications. BIT023 also well placed for safe access to school. Site can be fully self-contained to provide a phased housing if required, with a new access that will not have a negative impact on the existing infrastructure. Additional information can be provided as required to support bringing the site forward. Site location plan provided .
A0878B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	New Promotion / amended site part SHR110/SHR055 site is has short term potential because site; has no significant constraints; is immediately available, fully deliverable; well located, adjoining land has been developed for residential use and proposed development, including schools. There has been interest from developers in the site. Bringing site forward would help to deliver stated dwelling requirement
A0879B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Site WEY015 has short term potential for development for 30 dwellings because site; has no significant constraints; has existing access; is immediately available, fully deliverable; well positioned for village expansion located in the centre of Westbury, adjoining previously developed land and the development boundary; good access to village hall, church & pub. Site can be fully self-contained to provide a phased development if required, with an access that will not have a negative impact on the existing infrastructure. There has been interest from developers in the site. Site location plan provided. Additional information can be provided as required to support bringing the site forward.
A0879B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Site in Westbury promoted for development (see summary B1)
A0882B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	I am writing in response to the consultation for the Shropshire Strategic Land Availability Assessment, with regards to land to the west of Hanwood belonging to our clients. This site is currently an agricultural field. We are pleased to note this site has been identified as a 'Long Term Potential SLAA Residential Site' within the consultation. This finds the site to have no significant constraints. I am writing as we believe this land can be considered for short term potential due to the following: Availability Mr. & Mrs. Sandells have the benefit of full title to the land and are willing to make it immediately available for development. The land is adjoining the highway with good access via the existing residential estate and developed land and this site has received interest from developers. Deliverability and Sustainability We can confirm this is a well located and fully deliverable site. We believe this site is suitably placed to provide the development of 22 dwellings by 2038, being situated with an access off B488 and adjoining previously developed land and the development boundary, plus walking distance to the school, local amenities and playing fields. The land is well positioned with access to the highway on the western adjoining land that has already been developed. The land is well placed for the expansion of Hanwood in terms of its location to the school and facilities. There will be no requirement for children and parents to walk on a footpath on the very busy main road (A488), as the school would be accessed via the much safer route. The land is also well placed for access to the village hall, playing fields and school.
A0883B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Puts forward land in Dorrington for consideration as a suitable development site. Land on the Limes Paddock, currently an agricultural field located to the north of Dorrington, Shrewsbury ref. DGN018. We are pleased to note this site has been identified as a 'Long Term Potential SLAA Residential Site' within the consultation. This finds the site to have no significant constraints but has future potential. I am writing as we believe this land can be considered for short term potential due to the following = land is available and owner has full title to the land; it is a deliverable site within Dorrington which has excellent access to the A49; and the site is within walking distance of the centre of Dorrington and its shops and services.
A0895B8	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Fletcher Homes object to the Cross Houses settlement guideline figure which has reduced from 130 dwellings in the previous consultation to only 90 dwellings in the current draft Plan. The Council's Schedule A5(ii) on page 330 of the Plan shows 18 dwellings delivered in Cross Houses in the first 3 years of the plan period (2016-2019), equivalent to 6 dwellings per annum. If this rate of delivery were extrapolated for the whole plan period, ie. 6 dwellings per annum x 22 years, the village would deliver 132 dwellings. Fletcher Homes supports the designation of Cross Houses as a Community Hub. The village is a sustainable settlement with a good range of services and significant local employment, scoring 53 points on the Council's 'Hierarchy of Settlements' paper (August 2020), several points above the cut-off level of 48 points. Fletcher Homes' ongoing development in Cross Houses has proved very popular, with very strong demand the new houses largely from existing village residents keen to move to more suitable housing in the village. It has brought significant investment into Cross Houses and is prepared to continue to do so, helping secure a more sustainable future for the village. Shropshire will be required to have higher housing delivery, as a result of the latest household projections and the new standard methodology. Cross Houses is located on the Strategic Corridor off the A58 between Shrewsbury and Bridgnorth benefitting from access to the employment and service opportunities in these settlements. Cross Houses has benefitted from the successful delivery of Phases 1 and 2 of the large Fletcher Homes scheme in the village. Fletcher Homes suggest that site CSH006 is allocated in Cross Houses because the Sustainability Appraisal in the Site Assessments report shows that site CSH006 has the best sustainability score of all of the options in Cross Houses. It was only not selected by the Council because it was considered too large, however the field can easily be subdivided, with suitable landscaping to soften the south eastern boundary. The proposed line of a 2.5ha site that rounds off the Cross Houses development boundary could accommodate 30 - 60 dwellings, depending on density. Site CSH006 forms a natural extension of Fletcher Homes' existing development, from which access is available and fully achievable. It would be accessed through the existing Fletcher Homes Phase 1 development. Site CSH006 should have the following development guidelines: appropriate pedestrian, cycle and vehicular access will be provided to the site via Ridout Road; site to be developed at a low-density and to include significant open space to reflect the character of its 'edge of village' location; mature trees, hedgerows and priority habitats will be retained, forming part of the green infrastructure network.
A0896B03	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	Galliers Homes supports the designation of Bomere Heath as a Community Hub as a sustainable settlement with a good range of services and significant local employment. Additional housing is needed to retain the next generation, provide for resident workers and maintain a balanced community, to enhance the sustainability of the village. The natural direction for growth is to the south, towards Leaton Industrial Estate with employment opportunities on 22 let industrial units. The proposed allocations extend the village edge to meet Bomere Heath's cricket and football pitches, connected with a new pedestrian footway provided by the existing development. This direction of growth links the village with its leisure and employment opportunities and is strongly supported by Galliers Homes. Galliers Homes strongly supports the preferred housing allocation BOM019 as forming natural extension of Galliers Homes recent development of 34 dwellings on the adjoining site to the north. There are no technical difficulties and Galliers Homes will be able to deliver housing relatively quickly. We can confirm that the site is viable and that it is deliverable, with an option agreement in place with Galliers Homes that ensure that a planning application will be forthcoming shortly after allocation. It is likely to be delivered earlier than the Local Plan's current forecast of 2025-2030, with the 2021-2025 period more appropriate in the Local Plan Appendix 7: Forecast of delivery timescales for local plan allocations. The existing Galliers Homes development to the north was designed to provide access to a future extension on site BOM019. The new roundabout on Shrewsbury Road was oversized to cater for the planned later phases on the basis that it would cater for later phases of development. The proposed policy guidelines should be revised to reflect this, removing references to a new access off Shrewsbury Road and instead referring to the provision already made to access the next phase of development via Trinity View. Similarly a new footpath has recently been constructed along Shrewsbury Road as part of the previous development (17/00768/REM). It is unnecessary for the new allocations to duplicate this path. We therefore suggest the proposed changes to the policy guidelines shown below: "This site represents Phase 1 of the development. An appropriate highway access will be provided via the recently completed phase of development at the Wickets and Trinity View and any other necessary highway improvements undertaken including the extension of the 30mph zone and other relevant traffic calming measures. New pedestrian footpath links will be provided where necessary to link the site to the services in the village. Existing trees, hedgerows, public rights of way and priority habitats will be retained and enhanced. Acoustic design, layout, green infrastructure and appropriate building materials will be used to appropriately manage noise from Shrewsbury Road. The site will incorporate appropriate sustainable drainage, informed by a sustainable drainage strategy. Any residual surface water flood risk will be managed by excluding development from the affected areas of the site, which will form part of the Green Infrastructure network. Flood and water management measures must not displace water elsewhere." It should be noted that the existing development (17/00768/REM) included a surface outfall and pond under the high voltage electricity lines, close to the railway, that was oversized and designed to cater for these later phases of development. A sustainable surface water drainage strategy is therefore in place and the agreed outfall rate with Severn Trent Water will not need changing when allocations BOM019 and BOM020 are developed.
A0896B04	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	Galliers Homes supports the designation of Bomere Heath as a Community Hub as a sustainable settlement with a good range of services and significant local employment. Additional housing is needed to retain the next generation, provide for resident workers and maintain a balanced community, to enhance the sustainability of the village. The natural direction for growth is to the south, towards Leaton Industrial Estate with employment opportunities on 22 let industrial units. The proposed allocations extend the village edge to meet Bomere Heath's cricket and football pitches, connected with a new pedestrian footway provided by the existing development. This direction of growth links the village with its leisure and employment opportunities and is strongly supported by Galliers Homes. Galliers Homes strongly support the preferred housing allocation BOM020 as forming a natural extension to BOM019 and providing certainty for the direction of growth for the village over the longer term, joining up with recreational facilities and linking to local employment. We can confirm that the site is viable and that it is deliverable, with an option agreement in place with Galliers Homes that ensure that a planning application will be forthcoming shortly after allocation. Galliers Homes have a strong local reputation for high quality housing and are committed to ensuring that preferred allocation BOM019 comes forward quickly, with BOM020 following behind to meet the needs of the village across the plan period. As phase 2, the timescale of 2025-2030 is appropriate in the Local Plan Appendix 7: Forecast of delivery timescales for local plan allocations. The policy guidelines appear to reflect the footway that has recently been constructed by Galliers Homes as part of the previous development (17/00768/REM). We therefore support the proposed development guidelines.

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0896B05	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Object to preferred housing guideline of 200 dwellings over 2016-2038 as far too low. Bayston Hill has 2,024 dwellings and the level of growth over the 22 year plan period 2016-2038 represents annual growth of 0.45% well below the proposed rate of 1.01% per annum for Shropshire. Support the designation of Bayston Hill as a Community Hub, as a sustainable settlement with a good range of services and significant local employment attracting 80 points for its services and facilities as one of the top three scoring Community Hubs. Bayston Hill is on the A49 corridor with excellent access to nearby Shrewsbury. The A49 is a strategic corridor in paragraph 4.91e of the Plan and Policy SP2: Strategic Approach and explanatory paragraph 3.26. Despite the A49 being one of these strategic corridors, the Plan unjustifiably diminishes Bayston Hill's potential for growth. Bayston Hill's proposed growth rate is far lower than other Community Hubs with similar sustainability scores at Pontesbury with 80 points with 1.03% per annum growth; St Martins with 77 points with 1.66% per annum growth; Clun with 72 points with 1.1% per annum growth; Gobowen with 71 points with 1.2% per annum growth. This would call into question the basis by which the settlement growth figures have been determined. Galliers Homes made comments under Policy SP2 to increase Shropshire's overall housing needs and Bayston Hill can contribute more to meeting Shropshire's housing needs with an upward adjustment to the housing guideline figure to at least 1% per annum equal to 445 dwellings. Paragraph 5.228 of the Plan states, "Bayston Hill is a large urban village located to the south of Shrewsbury. Due to the proximity between these settlements, consistent with Community Hub Policy SP7, the retention of the Green Gap to the north of Bayston Hill is a key priority." There is however no evidence that supports the retention of a 'Green Gap'. It does not feature in either the Shropshire Open Space and Recreation Needs Assessment (September 2018) or in the Green Infrastructure Strategy for Shrewsbury (July 2020). The Council's Landscape & Visual Sensitivity Assessment (2018) identifies the southern side of Bayston Hill (on the opposite side to the Green Gap) as more visually sensitive than the northern side of the village. In addition to looking out towards the South Shropshire Hills Area of Outstanding Natural Beauty some 5 km to the east, south and south west, the southern end of the village is associated with the local beauty spot of Lyth Hill and is crossed by many well-walked Public Rights of Way. In contrast, the north side of Bayston Hill has lower landscape and visual sensitivity. In relation to parcel 20BYH-E to the north west of the village, the study states, "Views within this rural landscape are of variable quality taking in a farmed landscape of diverse scale and condition, major road infrastructure..... To the north, views are contained by hedgerows, A5 embankment and planting. This reduces its susceptibility as new development would be better screened by the existing landform and vegetation than in a more open landscape." It notes the potential benefits of development: "There is also potential to improve the settlement edge which is partially integrated. There is a low sense of tranquility due to frequent road noise and quarry traffic, however this could be buffered by screen mounding and planting which would be appropriate within the parcel." It is perfectly possible to improve the gap by utilising private investment to this end. The settlement strategy for Bayston Hill should actively promote sites that will provide additional planting and new areas of public open space that will benefit residents and improve the landscape and recreational potential of the gap. Galliers Homes have repeatedly suggested the allocation of site BAY005 to deliver an attractive area of public open space along the northern edge of Bayston Hill (fig 9 overleaf). The site is very well located for access to Bayston Hill's shops and facilities as well as being close to the Pulley Lane route into Shrewsbury. The Council already recognises the sustainability credentials of site BAY005, scoring it 'fair' (-4) in its Site Assessments (August 2020). The development of site BAY005 provides an opportunity for generous new landscaping along the ridgeline and public open space providing views north, similar in style to the popular Lyth Hill park that provides views south. The site can deliver an enhanced village edge with landscaped public open space on its northern edge. Galliers Homes commend site BAY005 to the Council for allocation in its Final Plan and propose the following development guidelines: "Development to provide public open space along the ridgeline with appropriate landscaping and viewpoints. Existing trees and hedges will be retained wherever possible. Appropriate highway improvements will be made to the junction of Gorse Lane and Pulley Lane". Paragraph 5.228 should be amended to read: "Bayston Hill is a large urban village located to the south of Shrewsbury. Due to the proximity between these settlements, consistent with Community Hub Policy SP7, the improvement of the Green Gap to the north of Bayston Hill is a key priority. Three Local Plan residential allocations have been identified in Bayston Hill, one of which represents the redevelopment of a former school, the other is located to the south of the existing bus form overlooking the South Shropshire Hills Area of Outstanding Natural Beauty, and the third provides infill development with new public open space and landscaping to improve the northern edge of the village."
A0901B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	development is allocated under the assumption that the North West Relief Road is built, regardless of the previous unsuitability rating at stage two. The induced traffic demand in building a ring road to the north of Ellesmere Road will in the medium to long term increase traffic congestion along this road. The NWRR is not the solution to this problem. Will have negative effects on the wildlife.
A0909B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Consideration should be given to allowing housing development at the northern end of the proposed NWRR in the vicinity of the Ellesmere Road/Baschurch Road junction (i.e. site SHR181). Access would be available in a short time-frame. Development of one or other or both of the areas of that to the east of the route of the NWRR, off Ellesmere Road or to the west of the route, off Baschurch Road could take place in the immediate future or phased to take place along with the construction of the NWRR. Development of this land would help alleviate journeys, thus helping to achieve the aims of DP12 and DP19.2. 16.1.4 indicates the "focus" of directing residential growth to the west of the town, particularly N & S of Mytton Oak Road. This will perpetuate the long-known issue of residential development being situated to the west of the town with the major employment areas being to the east and north of the town. More housing should be located north. It is considered short-sited that the land between the route of the road and the development boundary shown on the Proposals Map for Shrewsbury will remain regarded as "Countryside," as this area could assist with meeting the apparent shortfall in housing land supply. It appears that the housing requirement for the County has increased, but, in spite of the stated aim of the Plan to foster an "urban focus" the requirement for housing in Shrewsbury has not been increased, and now falls below the 30% target which was the Council's earlier objective. S16.1 confirms the requirement for Shrewsbury for 8,625 dwellings which appears to be 615 dwellings short of meeting the 30% target for housing in Shrewsbury. It is suggested that this shortfall should be rectified by further allocation(s) in Shrewsbury. SAMDev sites are not included in Appendix 7. SUEs are difficult to maintain – there may be a shortfall and so more sites should be allocated, as is the case with SHR173 being completed in the Plan period.
A0910B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Policy S16.2: Shrewsbury Place Plan – Community Hubs, is not supported because it does not include Cockshutt in the list of Community Hubs, even though Cockshutt has a larger population than 6 of the 10 villages listed.
A0920B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	This policy's aspiration to accommodate, "investment and new development that contributes to meeting needs and making its settlements more sustainable" is supported. The identification of Ford as a Hub settlement accords with the Local Plan's vision in this regard, given Ford's strategic location on the A458 corridor with excellent connections to a wide range of employment opportunities both in the rural area and Shrewsbury. However part 2 of Policy SP2 undermines these aims as it only proposes 1,400 dwellings per annum, which is below the figure set out in the Core Strategy and the 2018 household projection forecast. There is also a danger the plan will fail to be consistent with the NNPF. The Government's current consultation proposes changes to the standard method that would apply the 2018-based household projections and apply an affordability adjustment that would increase this figure to 2,124 households per annum. There is a strong case for the Council to re-consider its housing requirements in light of the Government's recent consultations on changes to the Framework and its direction of travel to increase housing delivery across the country. Policy SP2 will be more resilient if the housing requirement figure is increased to reflect the latest household projections and affordability data, replacing the current housing target of "around 30,800 dwellings" to "at least 46,700 new dwellings" over 22 years 2016-2038. The above change to policy SP2 should be reflected in the Community Hub policies, including policy S16.2 in relation to Ford, which can accommodate a much higher residential guideline figure.
A0920B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	The statement in Policy SP7 that "Community Hubs are considered significant rural service centres and the focus for development within the rural area" is supported. It is therefore very disappointing that Policy SP7 seeks to limit development in Community Hubs, only permitting development where it, "would not result in the settlement's residential guideline being exceeded" (section 1f of the policy). This section of the policy makes the guideline a ceiling figure, running counter to the National Planning Policy Framework's consistent use of housing numbers as minimums rather than maximums. It is contrary to the Government's key objective of, "significantly boosting the supply of homes" expressed in paragraph 59 of the Framework and in more recent Ministerial Statements. It makes the Local Plan's job of delivering the housing and employment development that Shropshire needs much more difficult than it needs to be. In our view, Community Hubs should be allowed the flexibility to respond to changing needs and not have artificial constraints such as a ceiling on numbers imposed on them. We therefore suggest that all residential guideline figures are expressed as minimums and that section 1f should be deleted from policy SP7 in its entirety.
A0920B3	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	The designation of Ford as a Community Hub settlement in Policy S16.2 is strongly supported as this is seen as vital to ensuring the village's long-term future. The settlement of Ford lies in close proximity to, and has a strong relationship with, Shrewsbury. It is also located on the A458, part of the strategic road network through the County. Ford is therefore one of relatively few villages in Shropshire that has significant potential for rural growth both socially and economically and development in the settlement will complement growth in urban areas, in accordance with Policy SP2: Strategic Approach. However we are disappointed that the services and facilities provided in the cluster of development at the west of Ford are not recognised, and that the policy relies on 60% of dwellings to be delivered on just one site. This is a missed opportunity to provide additional windfall opportunities in a highly sustainable location within the settlement. It also fails to recognise where the Council has previously considered development to be sustainable in the settlement of Ford, including the brownfield land surrounding the Smoke Stop that previously benefited from consent for travel lodge style accommodation and the new residential development being constructed on land to the north of the A458 (subject of planning consents 14/01819/OUT and 17/03865/FUL). The current consultation provides an opportunity for Shropshire Council to amend policy S16.2 and Inset Map S16 to acknowledge that the cluster of development around the junction of Back Lane with the A458 forms an important part of the settlement and is a sustainable location for future development and to include brownfield sites previously found by the Authority to be sustainable locations for new development and residential sites currently under construction
A0928B5	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	The overall analysis of Shrewsbury and its settlement strategy appears to be fair. It is welcomed that as Strategic Centre, Shrewsbury is the largest settlement in Shropshire. It contains the main commercial, cultural and administrative centre for Shropshire, offering most of its employment and a large range of services and facilities to the residents of the town and its large rural catchment. It is appropriately seen as a highly sustainable location to accommodate the largest proportion of Shropshire growth. Taylor Wimpey and Persimmon support its main focus to growth which would see the majority of growth directed towards Shrewsbury and the main Towns with more limited growth (albeit not to the total exception of growth) in the rural areas. This is important to support sustainable patterns of growth, but also support delivery. The approach has the real potential to be deliverable, but still allows for all parts of Shropshire to gain from the benefits of new housing and employment development. The approach for Shrewsbury in the Plan reflects the town's focus within the heart of the County and the excellent range of services and facilities the town already provides. It also reflects the opportunity to deliver on emerging growth aspirations, such as those expressed through the emerging Big Town Plan, as well as responding to specific development opportunities presented by a range of factors. Land is available in sustainable locations to support delivery at Shrewsbury. Our specific comments are as follows; • Shrewsbury is and should be the primary focus for development in the County. • Additional housing and employment development beyond the 8,625 development guideline is justified in Shrewsbury and deliverable. • The residual requirement to allocate additional sites, given our concerns highlighted in our representations elsewhere including an undue reliance on windfall will mean that further sites in Shrewsbury will be needed even to meet the currently proposed housing requirement of the plan. • More housing will be needed is the housing requirement is appropriately increased as we suggest. Equally Shrewsbury should be the first priority for any additional allocations should deficiencies be identified in any of the current Regulation 18 consultation sites to date. • Past rates of delivery in the town show that it is a strong market that could support a high level of provision reducing the extent of more dispersed growth around Shropshire • Whilst there are some significant historical and ecological constraints around the town, such as the setting of the Registered Battlefield to the north and areas of flood risk around the town there are equally relatively unconstrained sites which can accommodate the scale of development envisaged • Identified critical infrastructure priorities for Shrewsbury are identified but none represent an impediment to its future growth and can be addressed. • A greater range of medium sized sites upto 400 dwellings would better support delivery – the trajectory for the large Shrewsbury (and other large main centre sites) unrealistically expects some delivery for the period 2021 to 2026 (Phase 1). Given the timescales for adoption of the Local Plan Review, the needs for significant infrastructure to be put in place to support the large sites, the outline and Reserved Matters application process, means that such large scale sites are most unlike to deliver in the Phase 1 of the Plan, but more likely the latter part of Phase 2. Sites around 400 dwellings can be more easily delivered and maintain delivery in the early phases of the Plan period. In this context, whilst the allocation of strategic sites to help deliver the required level of growth within Shrewsbury, the proposed allocation of SHR158/SHR060/SHR161 concentrate a very large part of the total dwellings within the plan period. This represents a significant overreliance on a small number of large sites to achieve the required level of housing delivery, with some considerable risk particularly in the early years of the plan.

Page 315

Column 1: Respondent Reference	Column 2: Summary of Response to Q1. Relevant Document	Column 3: Summary of Response to Q2. Part of the Document (Grouped)	Column 4: Summary of Response to Q3. Agree or Disagree with Part of Document	Column 5: Summary of Response to Q4. Comments
A0928B9	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	<p>Taylor Wimpey and Persimmon have submitted proposals suggesting the allocation of land for housing at Weir Hill Phase 3. The site represents a suitable, sustainable and deliverable site for residential development and a logical extension to the settlement, adjoining the existing residential areas of the town to the north, west and south. Allocation of the site would create a strong and well-defined settlement edge, without extending out into the wider open countryside. The site is now further enclosed by the proposed employment allocation SHR166 to the north east of the site, across the River Severn, which is shown as a “standalone” development boundary. A previous Vision Statement for the site has been updated with the latest proposals which Taylor Wimpey and Persimmon propose for the site. It addresses comments and feedback about the proposals which have been raised through discussions with officers to date as well as issues and opportunities which have emerged through phases 1 and 2 of the development. The Vision Document confirms that the development can deliver a high quality scheme providing new homes as well as a new local centre with a range of uses which will support the sustainability of this phase and earlier phases of the development. The vision for the site is landscape led with much of the site being dedicated to open space and mixed recreation space with areas close to the river protecting existing ecology interests but also promoting new opportunities for enhanced biodiversity. Community use opportunities are presented in the development with new dedicated parking for local walkers and those enjoying the enhanced country park, as well as community space for local groups including potentially for the Scouts (who need a new facility), wildlife trust or other community groups. As a whole the development completes the final phase of the Weir Hill development with new and enhanced proposals for the existing and new community. It is our submission here that the site is suitable for allocation for around 400 dwellings. Evidential material in support of the allocation in respect of landscape, transport and traffic, ecology, drainage etc have been made available to the council in the past and are fully available on request to ensure that site is duly considered to its full merit. The site has not been allocated in the plan to date. It is our strong submission that the Council’s assessment of the site within the sustainability appraisal and site selection process to date has been misconceived and flawed. The Council have not judged the proposals fairly, have misunderstood the delivery of associated infrastructure including the delivery timeframe for the new London Road link which will be in place to serve this phase as well as earlier phases. They have not had appropriate empirical evidence to judge highway implications and traffic. They have also failed to appropriately and fairly consider localised, site specific landscape implications. The following is particularly highlighted with reference to attached supporting information comprising Vision Document (Septemeb 2020), Landscape and Visual Appraisal (PGLA, September 2020) and Transport Technical Note (Croft, September 2020); Landscape Sensitivity – the landscape review undertaken by Gillespies for the Council as part of the Local Plan evidence base, identified the development on this site as an area of landscape medium / high sensitivity. The assessment is not appropriate for the evaluation of small component parts of the wider landscape around the Town. Indeed the study itself highlights that it is “a strategic assessment which provides the context for more detailed studies of individual sites. It does not make judgements on the appropriateness of specific developments on individual sites (and does not consider specific development proposals where these might exist). More detailed studies relating to specific site allocations and development proposals will be undertaken at a local authority level as part of the Development Plan and development management process”. The character area classification of landscape sensitivity is therefore not a definitive factor in assessing site proposals, which have to be done in the context of the specific proposals themselves. Indeed, the Gillespies Report suggests as much in stating “In this study visual aspects are considered in relation to landscape character and quality and not in relation to specific views (although these will be noted where they are a key characteristic of a particular area). This is because views and visibility change over short distance and can only be assessed in relation to a particular development type as part of landscape and visual impact assessment.” Our own assessment previously submitted to the Council and now further updated as attached in a September 2020 update by PGLA here highlights that the lack of granularity within the parcels of the SLVSA combined with the methodology is providing an assessment with inaccurate and distorted broad brush gradings regarding landscape and visual sensitivity. Further in this context the sensitivity grading is therefore not reflective of the more fine granular nature of the wider character area which means it usefulness and effectiveness as a tool to inform or strongly influence an assessment for a specific site such as this site SHR176 is obviously flawed and will not provide the local authority with an accurate and helpful evidence base for making decisions on site allocations. A more appropriate and focused landscape assessment confirms significant less sensitivity, less than other sites around the Town which have been selected for allocation. The landscape sensitivity here is not medium high. It is self-evidence that by comparison to the Gillespies work (and no criticism of its approach and brief), the landscape assessment work we have submitted as part of our evidence in support of this site does appropriately assess the site and its sensitivity, which is in fact Medium Low and landscape impacts moderate to negligible.. This is noting particular proposal including the approach which safeguards as open space and landscape planting, those areas which may be more visually sensitive adjacent to the river. If the Officers assessment has been influenced by the Gillespies broad brush character assessment which it seemingly has and not the circumstances of this particular site and proposed development, then it is undoubtedly unfair and flawed. Masterplan/Uses – Some concern has been expressed about the proposals for Phase 3 (and indeed combined with Phases 1 and 2) not allowing for any additional supporting local social infrastructure, whether that be a local shop, community uses, or other social infrastructure. The development of Phases 1 and 2 will see the completion of 600 dwellings and with this further Phase 3, could see a total of 1000 dwellings coming forward as part of this overall development at Weir Hill. Reflecting this discussion, the updated masterplan and proposals for the site (see Vision Document, Septemeb 2020) provides for a logical location for such community and social infrastructure in the heart of the development, yet not necessarily compete with the facilities which are already at Column, or on Abbey Foregate. The site proposed could provide a valuable addition to the development, providing the opportunity for some small shop units, health use, community space or similar in combination – we have been in discussion with local groups such as the Scouts who also need new provision for community use and have the potential to accommodate their needs within the development either as a standalone facility or with joint provision. This is part of the updated vision for the site which builds on elements within phases 1 and 2, particularly expanding upon and completing the vision for the riverside park with an extensive array of wider mixed components for the park aligning with the Council’s own green infrastructure aspirations in the recent study as well as the Big Town Plan. Comments and feedback on matters of ecology have also focused particular proposals for the mixed community uses within the park, with considerable emphasis on biodiversity gains and complementarity with the river and its designation as a local wildlife site. None of the development proposals have ever proposed any development in such proximity to the river to impact on ecology interests, moreover the vision has always seen opportunity for gains. Likewise, that part of the site which adjoins the river and is located within Flood Zones 2 and 3 have never been proposed for development and all built development is within Flood Zone 1. London Road Access – a significant concern in the Council’s assessment of this site was a mis-understanding that the delivery of the London Road link (through Phases 1 and 2) would be provided much later in the Plan period such that the accessibility and traffic benefits of this link wouldn’t be available to Phase 3 in the short term. This is not the case. The delivery of the London Road link is conditioned in the current planning permission issued by the Council for Phases 1 and 2, such that no more than 175 homes within Phases 1 and 2 can be commenced construction and no more than 150 dwellings occupied before the London Road link is fully open to public use. In this regard, development is well underway in Phase 1 of the development. Reserved Matters have been approved for Phase 2. The London Road link has full planning permission as part of the hybrid planning permission and Phase 2 reserved matters and is under construction with a currently expected opening this year to tie in with wider construction and occupations. The road will easily be available to provide access to Phase 3 of the development in the short term and previous concerns this regard are misplaced. Equally no construction access whatsoever would be required to construct Phase 3 using Preston Street, which was a principal concern of the council in establishing the limits to occupations on Phase 1. Phase 3 is available for very early delivery in the Plan period and will support the plan housing delivery trajectory as other larger schemes will take some time to come forward. Further transport analysis has been undertaken on potential traffic implications for Phase 3 in the Attached Transport Technical Note (Croft September 2020). It highlights that the site is highly accessible including by non car means; vehicle access is available and safe; an assessment of traffic from the development (including a considered assessment of traffic distribution with the London Road link in place) shows that it would have a minimal impact on Preston Street, or the wider highway network; there will be no requirement whatsoever for construction traffic to use Preston Street as the London Road link will be in place and there is no highway or safety concerns that should prevent the site from being allocated. Overall, the Vision for Phase 3 of the Weir Hill development presents a high quality sustainable development which is supportable by clear evidence and should be allocated in the Local Plan Review.</p>
Page 316	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	<p>1. Cerda Planning Ltd is instructed to make representations to the Shropshire Local Plan Review – Consultation Regulation 18: Pre-submission Draft Local Plan on behalf of Gleeson Strategic Land Ltd. Relevant supporting evidence and assessments have been taken into account when forming the views below</p> <p>2. Gleeson Strategic Land Ltd has an interest in a significant parcel of land on the south-eastern edge of Bayston Hill. It is our client’s intention to bring this site forward for residential development through the plan led process as part of the Local Plan Review, and as such our responses will be primarily focussed on the settlement of Bayston Hill and the Shrewsbury Place Plan area in which it is located.</p> <p>See also representation on policy SP2 which concludes that the site should be allocated.</p> <p>SITE AND ITS LOCATION</p> <p>4. The site is 17.53 hectares in size and situated immediately adjacent to the settlement edge to the south-east as illustrated by the insert below. The site is bounded to the east by the Hereford Road the A49 distributor road and is accessed directly from the Hereford Road. The subject site is currently in use for agricultural purposes. It is generally free from trees and other vegetation save for the field boundary hedgerows. Land falls away across the site from the north east to the south west where it joins the A49 at grade.</p> <p>SITE HISTORY</p> <p>5. Outline proposals for residential development (access only) were refused in September 2015 under planning application 14/05556/OUT. Two reasons for refusal were cited as follows:</p> <ul style="list-style-type: none"> The proposed development is located within an area defined as open countryside where new dwellings are only permitted where required to accommodate key agricultural, forestry or other essential countryside workers or to meet a local need for affordable housing/accommodation. No such need has been demonstrated in this case and the proposal would lead to sporadic and unsustainable development, promoting rather than reducing the need for vehicular travel to access local services. Accordingly, the proposal fails to comply with adopted policies MD1 and MD7a of SAMDev, policies CS4, CS5, CS6 and CS17 of the Core Strategy; and Central Government Guidance advice contained in the National Planning Policy Framework. Insufficient detailing has been included within the application to provide the local Planning Authority or the Highways Agency to assess the impacts that an access at the proposed location would have upon the adjacent A49. As such the proposal cannot be adequately assessed in order to ascertain the likely impacts upon highways safety, and as there are concerns in regard to this issue the proposal in its current form is not considered to comply with policies CS6 and CS7 of the Core Strategy or the guidance contained within the NPPF. <p>6. The first reason for refusal could be overcome through the Local Plan process. If the Council came to a position whereby the development of the site could be supported, the settlement boundary could be re-drawn around the edges of the site. This would take the site out of its current countryside designation.</p> <p>7. In relation to the second reason – the officer report sets out that the Highways Agency had raised concerns in relation to the proposals and that requests were made to the applicant to provide a Stage 1 Safety Audit. This was never received. As neither the Local Planning Authority or the Highways Agency were confident that safe access or egress could be achieved without these details, the refusal on highway grounds was issued.</p> <p>8. Safe access would be possible into the site and any new proposals on the site would be accompanied by relevant audits and assessments.</p> <p>9. The planning officer concluded in all other matters that the proposals were acceptable: “the proposals would be closely related to the surrounding urban context and could provide a softer edge to the main village via a carefully considered reserved matters application. The impact on the landscape was not considered to be harmful and it was considered that a layout could be provided within the curtilage on the site without undue harm to the landscape character whilst also providing a more attractive settlement boundary via the provision of outward facing dwellings and a resultant soft edge to the village.” and</p> <p>“It is recognised that the views of neighbouring dwellings tight on the boundary would be restricted from what are currently open vistas of the surrounding countryside, however a sensitive design would ease the sense of enclosure that could be felt by neighbours to the site. It must also be considered that subject to suitable interface distances, a development of this nature could be accommodated on site without undue harm to residential amenity.”</p> <p>SLAA 2018</p> <p>10. The site was included in the Strategic Land Availability Assessment (SLAA) 2018, site reference BAY040 for residential use (with an indicative yield of 525). Through this process the Council considered the suitability of the site for residential purposes. The Residential Suitability Summary states:</p> <p>“The site is located adjacent to but outside of the settlement development boundary. Consequently, open market residential development on the site would be contrary to policy. However, the site may have long term potential subject to relevant changes to policy and management of any physical, heritage and environmental constraints.”</p> <p>11. The residential overall summary states:</p> <p>“The site is considered available; achievable; and viable (subject to any further necessary viability assessment). Furthermore, the associated settlement offers a range of services and facilities suitable to meet the needs of potential occupiers of the site. However, the site is not currently suitable for development as it is located in the countryside where open market residential development is currently contrary to policy. Additionally, the site is subject to a physical; environmental; or heritage constraint and the sites suitability is subject to appropriate assessment and management of any impact. Specifically, its proximity to a Ramsar site which means that an assessment under the Habitat Regulations will be needed. If the assessment is passed and/or suitable mitigation of this identified constraint were possible, the sites development potential would also depend on appropriate changes to policies affecting this location; and suitable management of any other physical, heritage and environmental constraints present (informed by input from relevant service areas and infrastructure providers) and the outcome of a visual impact and landscape sensitivity assessment. Such constraints include its proximity to one or more Listed Buildings and a Scheduled Monument.”</p> <p>12. It concludes that the site is not currently suitable but does have future potential subject to further detailed assessment. It is therefore right and proper that the site is considered in the plan making process.</p> <p>13. Gillespie’s have produced a Landscape and Sensitivity Assessment of Bayston Hill for the Council in order to inform the site selection process. The subject site falls within Area B. This document advises that the landscape is defined by the small upstanding hill (Bayston Hill) to the west and Lyth Hill to the south west.</p> <p>14. In terms of landscape value, the document concludes:</p> <p>“this landscape is of moderate scenic quality derived from the wider setting of the Shropshire Hills AONB however the rural character of the landscape has been weakened as result of agricultural intensification and extensive loss of hedgerows and tree cover. Landscape value is low with no distinctive features, sparse natural habitats and poor connectivity despite the presence of Lyth Hill and Country Park to the western boundary. Although the Shropshire Hills AONB lies some 5 kms to the east, south and south west, the low-lying landscape displays very few of the AONB’s special qualities and could not be considered to fall within its setting.”</p> <p>15. In terms of landscape sensitivity, the assessment concludes that overall, the sensitivity of the landscape to change arising from new housing is medium- low.</p> <p>16. In terms of visual susceptibility, the document states:</p> <p>“Agricultural intensification and loss of hedgerows and tree cover, has created an open often vast landscape with far reaching views that are particularly susceptible to new development. There is no relationship with the settlement edge and there are few sensitive receptors within the parcel. This reduction in susceptibility has however to be balanced against the highly scenic panoramic views that extend towards the Shropshire Hills AONB from Lyth Hill that could be vulnerable to change. Development would also be visible from higher elevated viewpoints including Lyth Hill and intervisibility with the AONB. The relative number of people likely to experience the view is high due to Paragraph 5.228 Policy SP7 and link to SP16.4 - explanation I welcome the statement that the green gap between Bayston Hill and Meole Village is seen as an important buffer Zone between the two areas. Securing this green gap has been a long standing policy of Shropshire Council and is very much supported by the residents of Meole village and Meole Village Residents Association. The area around the Rea brook south of Meole Village is seen as a green lung for the area and is used extensively by local people for recreational purposes. As the Rea brook south of Meole Village is an important tributary for the river severn and leads into the Rea valley conservation areas I believe permanent protection should be afforded to its length all the way to Hook-a-gate and would urge Shropshire Council to recognise its importance within its Strategic policy documents. It is also an important flood plain area reducing volume flows into the river Severn at Longden Coleham and is a valuable green corridor for wildlife movement and habitat protection which fits in with many policies identified in the partial plan review</p>

A0956B08	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Provide further evidence on housing delivery trajectory, including key assumptions for larger site allocations and lapse rates. Support for recognition of sustainable location of south-west area of Shrewsbury town. Direct further growth to the town of Shrewsbury, alongside sustainable growth of the Community Hubs and Clusters. Noting the constraints to housing growth around Shrewsbury town, further recognise the sustainable location of the south-west area of the town to which additional development could be directed. Our Client's Site represents a sustainable site option in this location which should be considered further(Alternative site promotion Bloor Homes in relation to land at Nobold) Delivery trajectories need to be provided for the Saved SAMDev allocations to reflect the most up to date position for these Saved allocations which are a key part of the housing delivery strategy. The delivery trajectory for the draft SLP housing allocation at Land between Mytton Oak Road and Hanwood Road is anticipated to medium-long term and potentially extend beyond the plan period. The Council should be clear on the assumptions that have been made to inform the delivery trajectories for these sites (no detailed commentary provided) & include further flexibility to ensure the housing requirements of Shrewsbury are met within the plan period at this sustainable location within the town. The Council should also consider the potential to provide a more sustainable strategy focused upon the town of Shrewsbury, alongside sustainable growth of the Community Hubs and Clusters. The risks to the delivery of smaller scale sites should also be factored into the Council's housing trajectory e.g. lapse rates, which can generally be higher for smaller scale schemes. It is not clear what lapse (or non-implementation rate) has been assumed in the housing trajectory overall for the plan period. This should be clearly identified and evidenced as per the NPPG (Paragraph 024 ID: 3-024-20190722) There is no justification provided for the 10% lapse rate assumed in the Five Year Supply Statement i.e. local evidence of implementation rates in recent years. Shrewsbury Alternative site promotion. Bloor Homes in relation to land at Nobold. Land at Nobold (the Site) has been assessed within the Strategic Housing Land Availability Assessment (SHLAA, 2018) under a number of separate parcels and site references. Whilst rejected for policy reasons, in light of accompanying commentary and the Site's proximity to existing draft SLP allocations, it is clear that there is potential for further consideration of strategic land release within the south west area of the town as a sustainable location. It is apparent that significant flood risk to east, centre and north west of town constraints further opportunities in those locations. Combined with existing allocations that have already been proposed around the town edges, the area to the south west represents the next logical area to examine further. Bloor homes have excellent track record of bringing forward strategic land including major urban extensions with significant infrastructure packages. Land at Nobold, Shrewsbury lies to the south west of the town of Shrewsbury in close proximity to the existing suburban neighbourhoods of Radbrook and Meole Brace, representing a sustainable location for residential development with access to a range of existing services and facilities. It provides the opportunity for a sustainable urban extension of approximately 138 hectares with residential development to the north of the A5 and employment development to the south (indicated on the accompanying Concept Plan). The development is capable of catering for a range of infrastructure needs including a primary school, local centre, green infrastructure and highways infrastructure. Land adjacent to the Site in separate ownership (to the west fronting Hanwood Road) is also considered as part of a comprehensive masterplan. In close proximity to the north lies the proposed draft SLP mixed use allocation (SHR060, SHR158 & SHR161) for 1,500 dwellings, 5ha of employment land (minimum) and a local centre, including potential education and medical facilities. There are also a number of Saved SAMDev Plan sites in close proximity, including SHREW212 for 175 dwellings and SHREW019, 094, 030/R and 210/09 for a total of 550 dwellings. These existing SAMDev allocations and the proposed draft SLP allocations demonstrate the overall sustainable nature of this location. Development of Land at Nobold would serve to complement these proposed developments, maximising the opportunity provided by the existing sustainable location with conceptplan/masterplan provided. Concept Plan retain existing and incorporate further green infrastructure provision, make use of and enhance existing connections within the area & help deliver on the objectives of the Shrewsbury Big Town Plan.
A0957B8	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area		Planned housing growth is too fast for Shrewsbury. It is very unpopular and infrastructure is lagging well behind the need, already reducing the quality of residents' lives. Furthermore, high growth will not help emissions targets, which are insufficiently well guarded (SP3) in the Plan The Big Town Plan is not now offering meaningful consultation. Shrewsbury residents have too little say and the draft Local Plan does not advance the importance of early public collaboration. While there are references to the Big Town Plan's Spacial Principle of the Green Network, that of "Balancing Growth" is missing, despite the early suggestions of some 1400 "windfall" homes, allocation. For Shrewsbury there may be other criteria that need to be tested since the Town has several unique features needing conservation and enhancement. Big Town Plan leaders wish to enable this rigour in some way more specific than a County wide set of broad principles. Specific comments on policy wording: Para 2. This paragraph suggests that "the Shropshire Test" is agreed in principle by the Big Town Plan although this has not been agreed. It seems to undermine any further attempt to detail features of acceptable developments within Shrewsbury town. Para 3 ignores the Big Town Plan principle of 'Balanced Growth'. Para 6 It seems right that there is an emphasis on employment opportunities and that some of this is in terms of allocated land. However, employment (post Covid) may be better provided by enhancing electronic 'highways' and the provision of free or wide band-width broadband in terms of employment opportunities is missing from the Local Plan. Para 7 accepts the so-called North West Relief Road as a factor in extending the pre-set "Development Boundary" for both ELR 67 and SHR 173. However, the new road is not necessary to extend these boundaries. In the case of SHR 173, the limitations concern the access from Ellesmere Road. Personal experience suggests that the NWRR traffic predictions for Ellesmere road are now inaccurate and that the NWRR will not reduce accessibility along that road. Para 11 lacks the definition that would ENSURE that desired outcomes are met. Para 12 is welcome and needs a degree of extrapolation. In terms of particular sites for development, the allocations are accepted but (previous experience suggests) a lack of degree of specification that might avoid the considerable public opposition to particular developments. Each of these sites needs a closer detailed specification of the local needs, how the local voice will be heard, the infrastructure implications and contributions, in addition to the Shropshire test and any Big Town Plan test requirements. The specifications for these sites have insufficient detail to avoid considerable local disquiet and long term sub-standard living
A0962B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Error in Consultation Inset Plan for Baschurch which should be corrected. Extract from Plan Review Extract Shropshire Local Plan Review extract approved for consultation at Cabinet 20th July 2020 contrasted with the Plan that formed part of the 3rd August to 30th September consultation. Developer request that the settlement boundary be amended to accommodate the extent of planning permissions for mixed use including residential development was reflected on Baschurch inset plan considered by the Cabinet Committee on the 20th July 2020 but not included in the consultation version plan. Understand that this is a cartographical error which will be rectified and if this is the case objection will not be relevant. Also object to the exclusion of additional area fully wrapped around & contained by the development boundary line from the settlement. Baschurch is identified as a Community Hub and focus for development within the rural area etc as set out in Policy SP7. SP9 references supporting rural communities by enabling some controlled development to maintain local sustainability & defines appropriate development. It is considered that the 2.3 ha land excluded is not open countryside, is effectively part of the settlement and serves no open countryside function. The Inset Plan development boundary lines should therefore be amended to clearly include the 2.3 ha site (BNP034a) as shown on the submitted Plan. This would allow developers with an option on the land to develop a phase 2 scheme linked to the phase optioned land with planning permission. The site assessment identifies that the site is available, sustainable & suitable. The site has also been established as viable by the prospective developer, available now, is a suitable location for development and should be considered deliverable as a windfall site within development boundary which will assist in meeting housing target.
A0974B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Support for inclusion of site Land between A5 and Holyhead Road, Montford Bridge SY4 1EG
A0975B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Supporting information for inclusion of Land at Underdale off Woodcote Way SY2 5TB in Shrewsbury

A0976B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Agree	It is considered that Site BAY048 should be allocated for housing in the Local Plan Review for the following reasons i. It meets the aspirations of the local community as it is a sustainable site on the edge of the settlement ii. The hatched area submitted on the attached plan extends to circa 0.7ha which would allow for 8-10 residential dwellings and this would meet the aspirations of the local community through the delivery of smaller sites on the edge of the settlement. The following sites have been graded as 'Future Potential', and in association with BAY048 could collectively achieve the residential housing need requirement of 100 dwellings (BAY008/BAY013/BAY019/BAY042). This approach would be more in line with the community's aspirations than the over reliance on one large site, namely BAY039. iii. Site BAY048 extends in total to 2.43ha which would facilitate circa 72 houses at 30dph. Should Shropshire Council disagree with the local community's aspirations for smaller sites, it is considered that the entire site would be suitable, achievable and deliverable for residential development. iv. In the round, the site provides for a contained continuation of ribbon development along Lyth Hill Road whilst not leading to an incursion into open countryside as the development will have the benefit of infilling the gap between Bayston Hill and The White House. v. The site is extremely well serviced in terms of access to the vast array of services and facilities in Bayston Hill. vi. The site is presently used for agricultural purposes and is not constrained by any statutory, historic or environmental designations or ownership issues. The site offers a relatively flat, un-prominent, neutral, well bounded sustainable site for housing development. vii. The site is sustainable, achievable and deliverable within the plan period
A0976B2	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	It is considered that the allocation of the 'Preferred Site' BAY039 is inappropriate for the settlement of Bayston Hill due to the following reasons: i. An outline planning application (17/02561/OUT) for residential development for 103 dwellings was refused on this site on 10/10/2017. The proposal met with a high level of objection from local residents, including the Parish Council. The following key reasons for objection remain relevant in contesting the allocation of the site: a. Prominent visual position. b. The application was accompanied by a flood risk assessment which concludes that extensive mitigation measures will be required to prevent the risk of flooding affecting properties outside the site. c. Furthermore, the south-east end of the site is at high risk of surface water flooding. ii. Bayston Hill are currently preparing a Community Led Plan (2028). The initial aspirations of the community can be summarised as follows: a. Desire for small housing sites geographically spread around the village. b. Smaller developments to provide opportunities for local builders and developers. c. Smaller sites will enable a greater level of individuality to come forward through design and materials. d. Mixed development size to meet the varying needs of the community and provide support for local services. e. The survey has found an identified need for all house types, including those suitable for downsizing and 4-5 bed executive homes. f. Local support to retain a gap between Bayston Hill and Shrewsbury to protect its unique character. iii. Further to the above points, Site BAY039 does not accord with the aspirations of the local community.

A0977B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Promotion of site HWD005 in Hanwood. Whilst agreeing with the principle of the upgrade of Hanwood to a community Hub from a community Cluster in the draft Local Plan, the owner of land west of Orchard Lane, Hanwood disagrees with the content of Policy SP7 as, in the case of Hanwood, the housing guideline for the settlement can not be delivered within the current, out of date, development boundary. In the light of the impossibility of the 15 required "windfall" dwellings being built within the Hanwood development boundary, our client suggests that Policy S16.2 is amended to propose an extension to the development boundary for Hanwood to include his land west of Orchard Lane (HWD005) as an allocated site. The HWD005 site has already been identified as a "Long Term Potential" residential site in the SLAA. (See attached Feb 2019 Supporting Statement). The attached Illustrative Site Plan demonstrates how this can be achieved on the lower part of the HWD005 site by the provision of twelve small to medium sized dwellings served by an upgrade to Orchard Lane and the unmade track to Highfield. This proposed enhancement of the Orchard Lane connection to the A488 represents a significant benefit (confirmed by the Council's Highways Officer) to the community by the provision of highway safety and drainage improvements to the Weir Road/Orchard Lane/A488 junction. The types and sizes of the dwellings can be agreed at the planning application stage in accordance with proposed Policies DP1 – DP7, but an early assessment of the capacity of the site indicates that a cross-subsidy/lower cost market/entry level/older persons' housing scheme may be the most appropriate.
A0981B24	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	The proposed development of 400 dwellings is of sufficient size to generate demand for playing fields, and whilst it would not be expected by Sport England that such provision should be delivered on-site for this proposed allocation, the policy should require that developers would be expected to make off-site developer contributions towards the delivery of playing field provision, in line with investment priorities identified the Council's Playing Pitch and Outdoor Sports Strategy (PPOSS) and that contributions will be calculated using Sport England's Playing Pitch Calculator. In the Central sub area (of which Shrewsbury forms part) there are currently shortfalls of capacity for cricket and rugby union, and there are predicted to be shortfalls for football, rugby union and cricket in the future taking into account participation and population growth. There is also an identified need for investment in additional 3G artificial grass pitches to meet existing and future needs. The demand from this proposed housing allocation using Sport England's Playing Pitch Calculator is set out on the separate sheet that accompanies this form. In summary, the development would generate demand for 1.01 playing pitches and 1.34 changing rooms. Within the Shrewsbury area, the PPS identifies a need for new full size 3G pitch and additional cricket provision. There is also a need to improve rugby provision. The ECB advise that several Shrewsbury based clubs including Shrewsbury CC, Pontebury CC and Beacon CC would most likely pick up the additional demand for cricket and have links to secondary schools on the west side of Shrewsbury. Growth in teams would generate the need for investment both in additional cricket pitches but also improved ancillary provision. The Football Foundation also comment regarding the need for additional 3G pitch provision on the west side of Shrewsbury as there are limited alternative opportunities to secure a suitable site to serve this demand. The RFU comment that the main priorities would be to secure contributions towards off-site improvements at Shrewsbury RFC, however there is also a need for a World Rugby compliant 3G pitch for training. Given the need for new provision, it is recommended that the wording of the proposed allocation is expanded to expressly reference the need to secure contributions towards off-site investment in playing pitch provision in Shrewsbury, which could be pooled with other contributions from other developments in Shrewsbury to deliver identified priorities for sports pitches. The policy should reference that developer(s) will be expected to work with NGB's to identify the most appropriate mix of sports facilities to address these identified needs and to secure their future management and maintenance where necessary. The additional sheet also sets out the demand for sports halls and swimming pools using Sport England's Sports Facilities Calculator. Whilst the development, of itself, would not generate sufficient demand to justify provision of additional sports halls and swimming pools, a contribution towards improving the quality of facilities would be justified. The Council's Built Sports Facilities Strategy identifies that whilst there is sufficient quantitative provision of swimming pools and sports halls to meet the existing and future needs of the population, the stock of facilities are aging and in need of investment. The focus for any developer contributions should therefore be on contributing towards qualitative improvements to existing built sports facilities including the Quarry Leisure Centre facility. The proposed allocation should therefore also make provision for a suitable developer contribution towards built sports facility investment in line with the priorities identified in the Built Sports Facilities Strategy. It is recommended that this is set out in the wording of the proposed allocation so that developer(s) are clear what is required to be provided to address the infrastructure needs generated by this development.
A0981B25	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	The proposed development of 450 dwellings is of sufficient size to generate demand for playing fields, and whilst it would not be expected by Sport England that such provision should be delivered on-site for this proposed allocation, the policy should require that developers would be expected to make off-site developer contributions towards the delivery of playing field provision, in line with investment priorities identified the Council's Playing Pitch and Outdoor Sports Strategy (PPOSS) and that contributions will be calculated using Sport England's Playing Pitch Calculator. In the Central sub area (of which Shrewsbury forms part) there are currently shortfalls of capacity for cricket and rugby union, and there are predicted to be shortfalls for football, rugby union and cricket in the future taking into account participation and population growth. There is also an identified need for investment in additional 3G artificial grass pitches to meet existing and future needs. The demand from this proposed housing allocation using Sport England's Playing Pitch Calculator is set out on the separate sheet that accompanies this form. In summary, the development would generate demand for 1.13 playing pitches and 1.51 changing rooms. Within the Shrewsbury area, the PPS identifies a need for new full size 3G pitch and additional cricket provision. There is also a need to improve rugby provision. The ECB advise that several Shrewsbury based clubs including Shrewsbury CC, Pontebury CC and Beacon CC would most likely pick up the additional demand for cricket and have links to secondary schools on the west side of Shrewsbury. Growth in teams would generate the need for investment both in additional cricket pitches but also improved ancillary provision. The Football Foundation also comment regarding the need for additional 3G pitch provision on the west side of Shrewsbury as there are limited alternative opportunities to secure a suitable site to serve this demand. The RFU comment that the main priorities would be to secure contributions towards off-site improvements at Shrewsbury RFC, however there is also a need for a World Rugby compliant 3G pitch for training. Given the need for new provision, it is recommended that the wording of the proposed allocation is expanded to expressly reference the need to secure contributions towards off-site investment in playing pitch provision in Shrewsbury, which could be pooled with other contributions from other developments in Shrewsbury to deliver identified priorities for sports pitches. The policy should reference that developer(s) will be expected to work with NGB's to identify the most appropriate mix of sports facilities to address these identified needs and to secure their future management and maintenance where necessary. The additional sheet also sets out the demand for sports halls and swimming pools using Sport England's Sports Facilities Calculator. Whilst the development, of itself, would not generate sufficient demand to justify provision of additional sports halls and swimming pools, a contribution towards improving the quality of facilities would be justified. The Council's Built Sports Facilities Strategy identifies that whilst there is sufficient quantitative provision of swimming pools and sports halls to meet the existing and future needs of the population, the stock of facilities are aging and in need of investment. The focus for any developer contributions should therefore be on contributing towards qualitative improvements to existing built sports facilities including the Quarry Leisure Centre facility. The proposed allocation should therefore also make provision for a suitable developer contribution towards built sports facility investment in line with the priorities identified in the Built Sports Facilities Strategy. It is recommended that this is set out in the wording of the proposed allocation so that developer(s) are clear what is required to be provided to address the infrastructure needs generated by this development.
A1011B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Concerned about level of development in Cross Houses and strongly suggest that should remain as Open Countryside and not a Community Hub. Housing needs assessment should be undertaken. Recent Parish Council Community Led Plan questionnaire was not sufficient in asking whether further development was required and the difference between Open Countryside and Community Hub. Believe Inspector should request PC to explain why this was not made clear and why they assumed Community Hub was a given. The proposed Hub status is based on a points system with several areas of contention in the scoring of services, facilities and employment for Cross Houses. Such as lack of library (mobile library does not constitute a library, single provision children's playground and amenity green space and outdoor sports facility, assumed to a playing field owned by PC which is just a field.

The proposed Hub status is based on a points system with several areas of contention in the scoring of services, facilities and employment for Cross Houses. Such as lack of library (mobile library does not constitute a library, single provision children's playground and amenity green space and outdoor sports facility, assumed to a playing field owned by PC which is just a field.
A1021B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Concerned about level of development in Cross Houses and strongly suggest that should remain as Open Countryside and not a Community Hub. Housing needs assessment should be undertaken. Recent Parish Council Community Led Plan questionnaire was not sufficient in asking whether further development was required and the difference between Open Countryside and Community Hub. Believe Inspector should request PC to explain why this was not made clear and why they assumed Community Hub was a given. The proposed Hub status is based on a points system with several areas of contention in the scoring of services, facilities and employment for Cross Houses. Such as lack of library (mobile library does not constitute a library, single provision children's playground and amenity green space and outdoor sports facility, assumed to a playing field owned by PC which is just a field.

A1092B1	Regulation 18: Pre-Submission Draft of the Shropshire Local Plan	Draft Policy Area S16 Shrewsbury Place Plan Area	Disagree	Wishes to see Cross Houses designated as Open Countryside following a period of significant housing development in Cross Houses, and the village needs time to assimilate this development. Increased volume and speed of traffic on the A458 is a concern for residents. Expresses concern that the Parish Council have not challenged the designation of Cross House as a community hub, and also questions scoring criteria in hierarchy of settlements assessment, particularly Mobile library score; Children's play area; Amenity green space and Outdoor sports facility
