<i>Tree Comments Other Constraints:</i>	Agricultural land with scattered field trees and hedgerows
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan. Development density and layout needs to be considered so that it allows room for retention of exiting mature trees
<i>Tree Comments Opportunities:</i>	Tree planting opportunities across the site to ensure that development can meet tree cover targets in planning policy framework and help to improve urban forest resource within the town.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Noise from nearby rail and road.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation available and could include stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the south-west of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Whilst Shrewsbury's functional relationship and strong transport links to the Black Country means that this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, due to the sites size it is unlikely that in isolation it could accommodate a meaningful contribution.

Strategic Considerations:	<p>The site has potential to be part of a large strategic allocation, however in isolation this site is divorced from the existing built form of the town and would not represent sustainable development.</p> <p>Improvements to local highway network required and impact on Strategic road network will need to be assessed.</p> <p>Promoted land to the south, north and east between Hanwood Road up to Longden Road offers the opportunity to consider a strategic comprehensive proposal in this direction, although it is acknowledged there are a number of different landowners and there is no known promotion agreement.</p> <p>These sites are over 2.0km to the nearest primary school and convenience store as third party land would be required to make suitable improvements to the existing PRoW access to Radbrook Green. Frequent bus service operate along Hanwood Road but these are around 800m from the centre of the sites. It would therefore be preferable for this area to be developed as a sustainable urban extension to include local facilities and through route public transport services.</p> <p>The site performs poorly for employment in the context of the settlement within the Stage 2a Sustainability Appraisal. However, it performs fair for housing in the context of the settlement and fair for housing and employment in the context of the Black Country Contribution within the Stage 2a Sustainability Appraisal.</p> <p>Whilst Shrewsbury's functional relationship and strong transport links to the Black Country means that this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, due to the sites size it is unlikely that in isolation it could accommodate a meaningful contribution.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No</p>
Recommendation	<p>Do not allocate</p>
Reasoning	<p>Whilst the site has some potential to form part of a much larger strategic allocation between the Hanwood Road and Longden Road, it is considered the site in isolation does not represent sustainable development, largely by virtue of its physical separation from the existing built form.</p> <p>In addition heritage concerns have been raised as to potential impacts on listed buildings on site.</p> <p>In the context of the site to the north between Hanwood Road and Mytton Oak Road being preferred for significant and comprehensively planned new development, there is no requirement to release this land at this time in order to meet the proposed development needs of the town up to 2038. The preferred land to the north is considered to offer greater potential benefits to the town and can support the objectives of the Big Town Plan and to achieve a comprehensively planned development.</p> <p>Whilst Shrewsbury's functional relationship and strong transport links to the Black Country means that this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, due to the sites size it is unlikely that in isolation it could accommodate a meaningful contribution. It is considered that there are other more appropriate sites upon which to accommodate these proposed contributions. Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire. The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications required:	<p>No</p>

If proposed for Allocation, Potential Capacity:

<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>These sites represent a partial fill of the remaining undeveloped land between the Mytton Oak Road and the Radbrook Road. The majority of Nobold Lane (north of Mousecroft Lane) is not fronted by one of these sites so no improvements could be delivered without third party land. Together they would need to provide an new circular link road, between the existing radial roads, in order to facilitate public transport services to the new developments and improve accessibility by car. This is particular important as there is not direct access to the A5 bypass from Longden Road and there level of development that could be accommodated by the Longden Road route going north east to Roman Road will be limited by existing highway capacity.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none</p>
<i>Ecology Comments Other Constraints:</i>	<p>EclA required. A large pond is situated on the western boundary that may support breeding GCN and other protected species. The area of development may be reduced by any mitigation required for GCN. To the north there are another 2 large pools that may also support protected species like GCN. Both are within 200m. There are occasional mature trees bordering this site. The trees and hedgerows may support bats and nesting birds as well as being habitat in their own right. Hedgerow is Core / Priority Habitat.</p>

<i>Ecology Comments Management of Constraints:</i>	Protected species mitigation may be required if GCN or other protected species are found. The hedgerows and mature trees in the boundary should be retained. The pool on the western boundary should have a significant buffer even if GCN are not present.
<i>Ecology Comments Opportunities:</i>	The footpath and pool could be combined to create a biodiverse green corridor that links to the community woodland and Local Wildlife Site to the north.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Potential impacts on settings of Grade II Listed Nobold Hall (NHLE ref. 1270731) and Nobold Grange (NHLE ref. 1254531). Site would be detached from existing built edge of town and would potentially also impact on the setting of the historic hamlet of Nobold. Site includes a cropmark enclosure of likely Iron Age/ Roman date. (HER PRN 04730)
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on settings of LBs & CA, archaeological DBA + field evaluation).

<i>Ecology Comments Other Constraints:</i>	<p>Ecia required. One large pond and a few smaller ponds are situated within the site and another large pond appears to have recently destroyed by this may appear in wet weather. The ponds may support breeding GCN and other protected species. The area of development may be reduced by any mitigation required for GCN. To the north there are another 3 large pools that may also support protected species like GCN. All are within 200m and one is within 35m. There are several mature trees within and bordering this site. The trees and hedgerows are likely to support bats and nesting birds as well as being habitat in their own right. Hedgerow is Core / Priority Habitat.</p>

<i>Ecology Comments Management of Constraints:</i>	Protected species mitigation may be required if GCN or other protected species are found. The hedgerows and mature trees in the boundary and within the site should be retained. The hedgerow that has recently been removed should be re-instated as a useful corridor has been removed for agricultural reasons that do not apply to development. The pools should have a significant buffer and be enhanced even if GCN are not present.
<i>Ecology Comments Opportunities:</i>	The footpath should form part of a significant green corridor that links this site to sustainable transport routes into town. This could take in the pond. Woodland planting should be considered adjacent to the woodland block to the south west.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Possible impacts on settings of Grade II Listed Nobold Hall (NHLE ref. 1270731) and Nobold Grange (NHLE ref. 1254531). <i>Landscape Considerations (Employment) (from the LVSS):</i>	Medium
<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>This site represents a partial fill of the remaining undeveloped land between the Mytton Oak Road and the Radbrook Road. The majority of Nobold Lane (north of Mousecroft Lane) is not fronted by one of these sites so no improvements could be delivered without third party land. Together they would need to provide an new circular link road, between the existing radial roads, in order to facilitate public transport services to the new developments and improve accessibility by car. This is particular important as there is not direct access to the A5 bypass from Longden Road and there level of development that could be accommodated by the Longden Road route going north east to Roman Road will be limited by existing highway capacity.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none</p>
<i>Ecology Comments Other Constraints:</i>	<p>EclA required. Two large pools are present on site. One pond if found just north of the site near Newton Farm. These may support breeding GCN. A large proportion of the area may Environmental Network - Core Habitat and/or Corridor as the grassland is indicated as possibly being of interest. If the grassland is of interest only the north eastern arable field would be available for development. The network requires protection in accordance with CS17 Environmental Networks and MD12. There are a large number of mature trees within and bordering this site. The trees and hedgerows may support bats and nesting birds as well as being habitat in their own right. Hedgerow is Core / Priority Habitat. Any buildings being removed or altered should be checked for bats, birds and other protected species.</p>

<i>Ecology Comments Management of Constraints:</i>	If the grassland is of interest there is very space on site to mitigate for the loss of the network. If newts are present mitigation would be required for the loss of terrestrial habitat. Protected species mitigation may be required if GCN or other protected species are found. The hedgerows and mature trees in the boundary should be retained. The pools should have a significant buffer even if GCN are not present.
<i>Ecology Comments Opportunities:</i>	Work to enhance the ponds and the grassland if it isn't already of high value
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Site would be detached from existing built edge of town and includes historic farmstead of Day House (HER PRN 27747). Possible impact on setting of Grade II Listed Newton farmhouse (NHLE ref. 1176148). Site crossed by the projected line of a Roman roads (HER PRN 00098) and bounded to the north by a second possible Roman road (HER PRN 00057). Includes part of a cropmark enclosure of likely Iron Age/ Roman date (HER PRNs 00006).
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on settings of LBs; Level 2 historic building appraisal if demo of Day House farm proposed; archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Agricultural land with scattered field trees and hedgerows small copse.
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan. Development density and layout needs to be considered so that it allows room for retention of exiting mature trees
<i>Tree Comments Opportunities:</i>	Tree planting opportunities across the site to ensure that development can meet tree cover targets in planning policy framework and help to improve urban forest resource within the town.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Possible contaminated land around existing farm. Noise from road to southwest.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation available and could include stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources. Contaminated land remediation likely.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the south-west of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

<p>Strategic Considerations:</p>	<p>The site has potential to be part of a large strategic allocation, however in isolation this site is divorced from the existing built form of the town and would not represent sustainable development.</p> <p>Improvements to local highway network required and impact on Strategic road network will need to be assessed.</p> <p>Promoted land to the south, north and east between Hanwood Road up to Longden Road offers the opportunity to consider a strategic comprehensive proposal in this direction, although it is acknowledged there are a number of different landowners and there is no known promotion agreement.</p> <p>These sites are over 2.0km to the nearest primary school and convenience store as third party land would be required to make suitable improvements to the existing PRoW access to Radbrook Green. Frequent bus service operate along Hanwood Road but these are around 800m from the centre of the sites. It would therefore be preferable for this area to be developed as a sustainable urban extension to include local facilities and through route public transport services.</p> <p>The site performs poorly for housing and employment in the context of the settlement within the Stage 2a Sustainability Appraisal. However, it performs fair in the context of the Black Country Contribution within the Stage 2a Sustainability Appraisal.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No</p>
<p>Recommendation</p>	<p>Do not allocate</p>
<p>Reasoning</p>	<p>Whilst the site has some potential to form part of a much larger strategic allocation between the Hanwood Road and Longden Road, it is considered the site in isolation does not represent sustainable development, largely by virtue of its physical separation from the existing built form.</p> <p>In addition heritage concerns have been raised as to potential impacts on listed buildings on site.</p> <p>In the context of the site to the north between Hanwood Road and Mytton Oak Road being preferred for significant and comprehensively planned new development, there is no requirement to release this land at this time in order to meet the proposed development needs of the town up to 2038. The preferred land to the north is considered to offer greater potential benefits to the town and can support the objectives of the Big Town Plan and to achieve a comprehensively planned development.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
<p>Further Main Modifications required:</p>	<p>No</p>

<i>Highway Comments - Direct Access to Highway Network?</i>	<p>This site is part of a group of sites to the north of A49/A53 Battlefield Roundabout in a location where the local highway network is close to capacity at peak times. Specifically the development would add to the existing congestion on the A49 bypass between the A53 and Sundorne Road. It is unlikely that the congestion can be mitigated. Development of this scale in the location is unlikely to be acceptable in highways terms until the Shrewsbury North West Relief Road has been completed.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none</p>
<i>Ecology Comments Other Constraints:</i>	<p>EclA required. GCN have been recorded in a pond in the south west corner. GCN have also been recorded in the garden pond to the north of this site. Boundary and in-field trees may support bats and birds and should be assessed. The hedgerows are core / priority habitat and should be retained. Reptiles may be present including grass snake.</p>

<i>Ecology Comments Management of Constraints:</i>	Potentially large areas may be require here to mitigate for the loss of foraging habitat for GCN. EclA would be required. Boundary and in-field trees should be retained.
<i>Ecology Comments Opportunities:</i>	This entire area has been considered for use as a major SUDS scheme that would help free up development land further south and east and also reduce the risk of flooding of the main road (A5124). Large scale SUDS that are favourable for GCN should be considered here whatever the outcome.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Possible effect on setting of Shrewsbury Registered Battlefield (NHLE ref. 1000033). May have archaeological interest relating to the battle.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (settings of Battlefield; archaeological DBA). NB. Heritage Assessment for site completed in 2018.
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Occasional field tree
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan. Development density and layout needs to be considered so that it allows room for retention of exiting mature trees
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to increase woodland cover and integrate the development into the broader landscape
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Road noise from west, possible noise from commercial to the south.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation available and could include stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the north of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>This site is part of a group of sites to the north of A49/A53 Battlefield Roundabout in a location where the local highway network is close to capacity at peak times. Specifically the development would add to the existing congestion on the A49 bypass between the A53 and Sundorne Road. It is unlikely that the congestion can be mitigated. Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No</p>
Recommendation	<p>Do not allocate</p>
Reasoning	<p>The site is divorced from the settlement and should only come forward if SHR195 is preferred.</p> <p>There are also outstanding concerns relating to the heritage impact on the Registered Battlefield and the impact to the dense woodland to the north of the site. The Shrewsbury Battlefield Heritage Assessment shows that all or part of this site makes a positive contribution to the significance of the Registered Battlefield. In this respect, its sensitivity to change is moderate and whilst development is likely to cause harm to the designated heritage asset, this could be reduced or avoided through careful siting and sensitive design.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>

<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>These sites would access the highway directly onto the new route of Pulley Lane with the exception of SHR185 which is promoted with access to the old route of Pully Lane south of Lower Pulley Cottages - this section of old Pulley Lane in not suitable for new development traffic and improvements could not be achieved without third party land. The left only turn onto Hereford road (from new Pully Lane) works for the current users of the new Pulley Lane route as this accommodates Bayston Hill traffic that wants to access Shrewsbury. If these sites were developed those wanting to access the A5 bypass would need to take a detour to the Meole Brace retail park roundabout - this is not ideal.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Protection and enhancement of Environmental Network likely to reduce the developable area of the site. Otherwise none</p>
<i>Ecology Comments Other Constraints:</i>	<p>EclA required. The River Rea is environmental network and core habitat. It is used by otters and a wide range of other wildlife such as Kingfishers which could nest nearby. Hedgerow and some mature trees are present on the northern boundary with the River Rea.</p>

<i>Ecology Comments Management of Constraints:</i>	A large buffer (at least 50m) is require along the river with public access along the entire length. Trees and hedgerows should be retained. Surface water run-off needs to be carefully cleaned using effective SUDS features.
<i>Ecology Comments Opportunities:</i>	Significant river corridor enhancements could be made which could result in less sediments and agri-chemicals entering the water. Sustainable transport routes should be created by installing bike friendly bridges over the River Rea.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Site crossed by projected line of Roman road (HER PRN 00098) and site of coal workings towards its W end. NB DBA and walkover survey completed for part of site in 2008
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (archaeological DBA + field evaluation). NB DBA and walkover survey completed for part of site in 2008
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Agricultural land with scattered field trees and hedgerows
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan. Development density and layout needs to be considered so that it allows room for retention of exiting mature trees
<i>Tree Comments Opportunities:</i>	Tree planting opportunities across the site to ensure that development can meet tree cover targets in planning policy framework and help to improve urban forest resource within the town.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Road to the south is a noise source.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation available and could include stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources.
<i>Public Protection Comments Opportunities:</i>

<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none</p>
<i>Ecology Comments Other Constraints:</i>	<p>EclA required. The west and southern boundaries for part of the Environmental Network (corridor). A small water course runs along the far southern boundary.</p>

<i>Ecology Comments Management of Constraints:</i>	The west and southern boundaries should be buffered to protect the network. The water course along the southern edge of the site should be opened up and its capacity increased.
<i>Ecology Comments Opportunities:</i>	A feature could be made of the water course to the south. The corridor to the west could also be enhanced.
<i>Heritage Comments Significant Constraints:</i>	Site likely to harm setting of Shrewsbury Registered Battlefield (NHLE ref. 1000033) and Grade II* Battlefield Church (NHLE ref. 1246192) . May have archaeological interest relating to the battle.
<i>Heritage Comments Other Constraints:</i>	
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (settings of Battlefield and LBs; archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Agricultural land with curtilage hedges
<i>Tree Comments Management of Constraints:</i>	
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to increase woodland cover and integrate the development into the broader landscape
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Rail to west, road to south and east all noise sources. Road junction poss. air pollutant concern.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation available and could include stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources. Air quality assessment following suitable monitoring by land owner/applicant to verify any assessment. Likely to result in stand off distances to the junction.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the north of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

<p>Strategic Considerations:</p>	<p>The site adjoins the existing development boundary and has been considered to have long term potential in the SLAA subject to further assessment.</p> <p>The site is considered to have potential for adverse impacts on the Registered Battlefield and there are local and strategic highway concerns. The Shrewsbury Battlefield Heritage Assessment shows that all or part of this site makes a positive contribution to the significance of the Registered Battlefield. In this respect, its sensitivity to change is moderate and whilst development is likely to cause harm to the designated heritage asset, this could be reduced or avoided through careful siting and sensitive design.</p> <p>The site performs poorly for housing and employment in the context of the settlement within the Stage 2a Sustainability Appraisal. However, it performs fair in the context of the Black Country Contribution within the Stage 2a Sustainability Appraisal.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No</p>
<p>Recommendation</p>	<p>Do not allocate</p>
<p>Reasoning</p>	<p>The site adjoins the existing development boundary and has been considered to have long term potential in the SLAA subject to further assessment.</p> <p>The site is considered to have potential for adverse impacts on the Registered Battlefield and there are local and strategic highway concerns. The Shrewsbury Battlefield Heritage Assessment shows that all or part of this site makes a positive contribution to the significance of the Registered Battlefield. In this respect, its sensitivity to change is moderate and whilst development is likely to cause harm to the designated heritage asset, this could be reduced or avoided through careful siting and sensitive design.</p> <p>It is therefore not considered appropriate to prefer this site for allocation for either residential or employment development.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
<p>Further Main Modifications required:</p>	<p>No</p>

<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium-High
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>These sites represent a significant level of development in a location where the local highway network is close to capacity at peak times. Specifically the development would add to the existing congestion on the A49 bypass between the A53 and Sundorne Road. It is unlikely that the congestion can be mitigated. Development of this scale in the location is unlikely to be acceptable in highways terms until the Shrewsbury North West Relief Road has been completed.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none.</p>
<i>Ecology Comments Other Constraints:</i>	<p>EciA required. Three large ponds onsite and several ponds nearby could support GCN. Mature trees are within and bordering this site. The trees and hedgerows may support bats and nesting birds as well as being habitat in their own right. Hedgerow is Core / Priority Habitat.</p>

<i>Ecology Comments Management of Constraints:</i>	Protected species mitigation and enhancement. Retain and enhance all hedgerows/tree lines on boundaries and onsite. Retain mature trees in field. Protect, enhance and restore Env. Network around most of the site in accordance with CS17 Environmental Networks and MD12. Area of land available for development may be reduced due to mitigation required for GCN - if present.
<i>Ecology Comments Opportunities:</i>	Make a feature of the footpath to include an environmental corridor
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Possible effect on setting of Shrewsbury Registered Battlefield (NHLE ref. 1000033). May have archaeological interest relating to the battle and other archaeological potential.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (settings of Battlefield; archaeological DBA + evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Agricultural land with scattered field trees and hedgerows
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan. Development density and layout needs to be considered so that it allows room for retention of exiting mature trees
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to increase woodland cover and integrate the development into the broader landscape
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Road to north and west all noise sources. Road junction poss. air pollutant concern.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation available and could include stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources. Air quality assessment following suitable monitoring by land owner/applicant to verify any assessment. Likely to result in stand off distances to the junction.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair

<i>Highway Comments - Direct Access to Highway Network?</i>	<p>The variation proposal represents a moderately scaled level of development in a location where the local highway network is close to capacity at peak times. Whilst the development of a 9ha employment site would add to the existing congestion on the A49 bypass between the A53 and Sundorne Road, it is considered likely that at the level of development proposed, and resulting trip generation, any additional congestion can be mitigated through localised highway improvements. The development of the Shrewsbury North West Relief Road will further support this mitigation. This sites are over 2.5km to the nearest primary school and 1.0km to the nearest supermarket. Frequent bus service operate along the A49 and A53 and are less than 400m from the centre of the sites.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>

<i>Tree Comments Opportunities:</i>	Net gain for biodiversity - retain existing features and join green corridors
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Road to north and west all noise sources. Road junction poss. air pollutant concern.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation available and could include stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources. Air quality assessment following suitable monitoring by land owner/applicant to verify any assessment. Likely to result in stand off distances to the junction.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the north of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

<p>Strategic Considerations:</p>	<p>The proposal is for a 9ha employment site solely. This variation on SHR197 therefore does not include any element of residential. An updated Transport Statement (TS) has been prepared for the site by the site promoters on the basis of this revised site option, indicating a less than severe impact. Appropriate access can be achieved from the A53, although it is considered there will be a need for localised highway improvements. The TS also highlights the potential for non-car journeys, citing the presence of bus provision to the site. The site is located to the east of the A49 and would therefore represent a new direction of growth for the town. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Localised highway improvements will be required, but it is considered in principle these can be achieved given the scale and nature of the proposal. A heritage assessment will be required to inform the design and layout of the development.</p>
<p>Known Infrastructure Opportunities:</p>	
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No</p>
<p>Recommendation</p>	<p>Do not allocate</p>
<p>Reasoning</p>	<p>The site would represent a major new direction of growth for the town to the east of the A49 by-pass, which is considered to cause a significant degree of physical and perceived severance from the main urban area. It is not considered necessary to grow the town in this major new direction, especially in the light of the availability of more sustainable options to the west of the town. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions. Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire. The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
<p>Further Main Modifications required:</p>	<p>No</p>

<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none</p>
<i>Ecology Comments Other Constraints:</i>	<p>EclA required. Much of this area is arable farmland with few ecological constraints. The ponds (of which there are at least 9 on site and others nearby) are likely to be core / priority habitat and at least two support GCN. Grassland just north of Astley Park may be priority / core habitat. In-field and boundary trees are of interest. A few small blocks of woodland are likely to be core / priority habitat and may also support protected species like bats, birds, badgers, etc. The small block on the far west with the pools is protected under an area TPO. The area available for development could be restricted by the need to mitigate for GCN.</p>

<i>Ecology Comments Management of Constraints:</i>	EclA would be required early on for this site. All pools would require survey including for species like Tubular Water-dropwort which is UK Priority.
<i>Ecology Comments Opportunities:</i>	A site of this scale would have significant opportunities and could make the most of the existing features.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Possible effect on setting of Shrewsbury Registered Battlefield (NHLE ref. 1000033). May have archaeological interest relating to the battle and other archaeological potential.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (settings of Battlefield; archaeological DBA + evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Agricultural land one copse of mature trees central to site
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan. Development density and layout needs to be considered so that it allows room for retention of exiting mature trees
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to increase woodland cover and integrate the development into the broader landscape
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Commercial to south-west and east. Road to the south.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation available and could include stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Poor
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Poor
Relationship to the Black Country	This site is located to the north of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>Site is divorced from the town. Potential for employment use. The site performs poorly for housing and employment in the context of the settlement and the Black Country Contribution within the Stage 2a Sustainability Appraisal. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No</p>
Recommendation	<p>Do not allocate</p>
Reasoning	<p>The site would represent a major new direction of growth for the town to the north east of the A49 by-pass, which is considered to cause a significant degree of physical and perceived severance from the main urban area. There is concern the site is not self contained. Concern has also been raised regarding the impact on the highway network given existing levels of congestion on the A49/A53. It is not considered necessary to grow the town in this major new direction, especially in the light of the availability of more sustainable options to the west of the town. There is some potential for the site to be considered for employment purposes, although the landscape and visual impact considerations will need to be managed through design and layout. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions. Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire. The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications required:	<p>No</p>

<i>Visual Impact Considerations (Residential) (from the LVSS):</i>	Medium-High
<i>Landscape Considerations (Employment) (from the LVSS):</i>	High
<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	High
<i>Highway Comments - Direct Access to Highway Network?</i>	This employment site has potential for direct access onto the A5 bypass at Preston Boats roundabout. An new junction onto the A5 south of the roundabout might be difficult to achieve and unacceptable to Highways England. A scheme to create a new 4th arm at the roundabout could be very costly.
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	
<i>Ecology Comments Other Constraints:</i>	Mature trees are within and bordering this site. The trees and hedgerows may support bats and nesting birds as well as being habitat in their own right. Hedgerow is Core / Priority Habitat. The northern field is surrounded by the Env Network - buffer to the river to the west, line of trees alongside the A5 and the water course that runs through the site. The water course running through the site is buffered by the network. The majority of the site is arable which has low biodiversity interest but the buffers forming the network still require consideration under CS17 and MD12. Otters are very likely to use the water course. Development should not impact this.

<i>Ecology Comments Management of Constraints:</i>	Protected and priority species and habitats mitigation and enhancement. Retain and enhance all hedgerows/tree lines on boundaries. Retain mature trees in field. Protect, enhance and restore Env. Network to north, west and through the site in accordance with CS17 Environmental Networks and MD12
<i>Ecology Comments Opportunities:</i>	The water course could be enhanced to make a feature and its capacity increased to help address flooding issues. In-line pools and 'leaky dams' should be considered.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Site contains part of a rectangular cropmark enclosure of possible prehistoric/ Roman date (HER PRN 04472)
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Agricultural land divided by a liner group of trees or hedgerow
<i>Tree Comments Management of Constraints:</i>	
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to increase woodland cover and integrate the development into the broader landscape
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	
<i>Public Protection Comments Management of Constraints:</i>	
<i>Public Protection Comments Opportunities:</i>	No significant constraints assuming farm would be developed.
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the east of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>Available for employment uses only.</p> <p>The site performs poorly for housing and employment in the context of the settlement within the Stage 2a Sustainability Appraisal. However, it performs fair in the context of the Black Country Contribution within the Stage 2a Sustainability Appraisal.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No</p>
Recommendation	<p>Do not allocate</p>
Reasoning	<p>Access is a significant concern, with a new arm from the Preston Boats roundabout potentially undermining viability. Not considered a good location for mixed-use development which further undermines the viability of the site.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications required:	<p>No</p>

If proposed for Allocation, Potential Capacity:	
If proposed for Allocation Design Requirements:

<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>part of a group of promoted sites to the east of Ellesmere Road. Current levels of traffic on Ellesmere Road and on the A49 bypass north of Sundorne Road roundabout constrain major development in the north of Shrewsbury and these sites should only be brought forward once the Shrewsbury North West Relief Road has been secured. The scheme provide alternative routes for existing traffic which reduce the current pressures on Ellesmere Road and the A49 bypass creating additional capacity for major development in north Shrewsbury. The new road will also provide a strategic access route through these sites.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>HRA will be required due to road emissions from increased traffic (in-combination), possible drainage and recreational impacts on Hencott Pool Ramsar. See LPR HRA. Potentially on route of NWRR?</p>
<i>Ecology Comments Other Constraints:</i>	<p>Requires Ecla and surveys for bats (trees and transects), GCNs (ponds within 500m), badgers, reptiles and nesting birds. There are TPO'd trees in the northern boundary.</p>

<i>Ecology Comments Management of Constraints:</i>	Protected and priority species and habitats mitigation and enhancement, retain and enhance mature trees/hedgerows/tree lines. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	See accompanying document
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	No known archaeological interest but large size of site suggests it may have some archaeological potential.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Large field site some scattered mature curtilage hedge trees a number on TPO's to the north
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan.
<i>Tree Comments Opportunities:</i>	Retain existing trees and Use 20% canopy cover policy to increase woodland cover and integrate the development into the broader landscape
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Road noise to the east.
<i>Public Protection Comments Management of Constraints:</i>	Mitigate noise by location (separation distances to the road) of dwellings, orientation and room layout as well as glazing and boundary treatment.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Good
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Good
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Good
Relationship to the Black Country	This site is located to the north-west of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>Would form part of a new area of growth to the west of Ellesmere Road. In its own right the site is separated from the main built form on the west of Ellesmere Road. Significant highway constraints. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No</p>
Recommendation	<p>Do not allocate</p>
Reasoning	<p>In time this site may have some potential alongside the delivery of the proposed NWRR. However, ahead of this a sustainable access is not considered achievable and there are other ecological and noise impacts which make this site unsustainable. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions. Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire. The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications required:	<p>No</p>

<i>Highway Comments - Direct Access to Highway Network?</i>	Direct access onto the Battlefield Road in the vicinity of the Shillingston Drive Ghost Island Right Turn junction. The developer would need to be able to demonstrate that a staggered GIRT T-junction operated safely or provide a new roundabout junction to serve Shillingston Drive and the new development.
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none
<i>Ecology Comments Other Constraints:</i>	The lower part of the site is within the flood zones 2 and 3 and therefore in the environmental network. The western border along the rail line is also corridor. Significant in-field trees are likely to support birds and bats. The hedgerows / lines of trees and scrubby area near the entrance may also support nesting birds and perhaps reptiles. A pond 85m to the north west supports GCN.

<i>Ecology Comments Management of Constraints:</i>	EclA required. In-field and boundary trees should be retained. A GCN licence and some mitigation is likely due to the presence GCN in the nearby pond. The water course along the southern boundary should be opened up and the carrying capacity increased.
<i>Ecology Comments Opportunities:</i>	The Environmental Network could be enhanced around the western boundary and in particular on the southern boundary by making better use of the water course. SUDS features should consider the needs of GCN and may be required as mitigation.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Possible effect on setting of Shrewsbury Registered Battlefield (NHLE ref. 1000033) . .
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (settings of Battlefield.
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Scattered field trees
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan.
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to increase woodland cover and integrate the development into the broader landscape
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Odour and noise potential from commercial to the south.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation available and could include stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the north of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>Site is currently allocated for employment development. Part of site in flood zone 2 and within 1000 year surface flood risk zone. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No for housing</p>
Recommendation	<p>Retain as an employment allocation - 'saved site allocation'</p>
Reasoning	<p>The site is currently allocated for employment in the SAMDev Plan and there is no overarching need to move away from this position given the availability of other sites. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions. Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p>

<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium-High
<i>Highway Comments - Direct Access to Highway Network?</i>	Direct access onto Battlefield Road. Achieving a safe access onto Battlefield Road so close to the A49/A53 Battlefield Roundabout might be challenging.
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none
<i>Ecology Comments Other Constraints:</i>	The woodland block to the south is protected by and area TPO. Environmental corridor runs around most of the other boundaries. The grassland may be of interest and would require survey between May and August. A footpath runs across the site. The ponds south of the site may contain GCN.

<i>Ecology Comments Management of Constraints:</i>	EciA required. In-field and boundary trees should be retained. A buffer would be needed to the TPO trees as well as the in-field tree. Some mitigation may be required if the pond to the south of the site has GCN.
<i>Ecology Comments Opportunities:</i>	The Environmental Network could be enhanced around the boundary by additional woodland planting. In particular on the southern boundary.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Possible effect on setting of Shrewsbury Registered Battlefield (NHLE ref. 1000033). May have archaeological interest relating to the battle.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (settings of Battlefield; archaeological DBA + evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Well established hedges and occasional field trees
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan. Development density and layout needs to be considered so that it allows room for retention of exiting mature trees
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to increase woodland cover and integrate the development into the broader landscape
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Noise and air pollution from roads to the northwest through to southeast.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation available and could include stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources. Due to small site may be difficult to sort through separation. Separation likely to be required to ensure no air pollution concerns. Thorough assessment following air quality monitoring a prerequisite.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the north of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

<p>Strategic Considerations:</p>	<p>Site is currently allocated for employment development. Significant distance from town centre and residential use is not considered to offer opportunity to meet objectives of the Big Town Plan. The site performs poorly for housing and employment in the context of the settlement within the Stage 2a Sustainability Appraisal. However, it performs fair in the context of the Black Country Contribution within the Stage 2a Sustainability Appraisal. Noise and air quality mitigation needed which will be difficult to achieve due to the scale of the site. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No for housing</p>
<p>Recommendation</p>	<p>Retain as an employment allocation - 'saved site allocation'</p>
<p>Reasoning</p>	<p>The site is currently allocated for employment in the SAMDev Plan and there is no overarching need to move away from this position given the availability of other sites. This site benefits from an extant planning permission. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions. Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p>

<i>Highway Comments - Direct Access to Highway Network?</i>	These site are part of the Western Sustainable Urban Extension and vehicular access will be provided through the new Oxon Link Road and associated local highway network modifications.
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none
<i>Ecology Comments Other Constraints:</i>	EclA required. There are a large number of mature trees within and bordering this site. The trees and hedgerows may support bats and nesting birds as well as being habitat in their own right. Pasture may be species rich grassland that would be Core or corridor habitat. A pond is present 130m to the north east and over the road which may require survey or HSI for GCN.

<i>Ecology Comments Management of Constraints:</i>	Protected species mitigation and enhancement. Retain and enhance all hedgerows/tree lines on boundaries. Retain mature trees in field. Protect, enhance and restore Env. Network around most of the site in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	Enhance Environmental Network by additional tree planting. Creating pools, or designing SUDS feature, that are suitable for GCN.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	No known archaeological interest but medium size suggests it may have some archaeological potential.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (archaeological DBA).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Significant trees and groups of trees on and adjacent to the site. May limit developable land on the site.
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan. Development density and layout needs to be considered so that it allows room for retention of exiting mature trees
<i>Tree Comments Opportunities:</i>	Tree planting opportunities across the site to ensure that development can meet tree cover targets in planning policy framework and help to improve urban forest resource within the town.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Road to west and north (noise and air pollution)
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation available and could include stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources. Due to small site may be difficult to sort through separation. Separation likely to be required to ensure no air pollution concerns. Thorough assessment following air quality monitoring a prerequisite.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor

<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none
<i>Ecology Comments Other Constraints:</i>	EclA required. There are a large number of mature trees within and bordering this site. The trees and hedgerows may support bats and nesting birds as well as being habitat in their own right. Two ponds are found within 100m of the site and one found at 120m. Ponds in the area are known to have GCN. A licence may be required and fencing used during construction. The grassland may be species rich and could be defined as Core / Priority Habitat and therefore be considered in accordance with CS17 Environmental Networks and MD12.

<i>Ecology Comments Management of Constraints:</i>	Protected species mitigation and enhancement. Retain and enhance all hedgerows/tree lines on boundaries. Retain mature trees in field. Protect, enhance and restore Env. Network around most of the site in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	Creation of environmental networks - in particular along the southern boundary should be considered and the creation of pools and low nutrient areas by topsoil stripping.
<i>Heritage Comments Significant Constraints:</i>	N/A
<i>Heritage Comments Other Constraints:</i>	N/A
<i>Heritage Comments Management of Constraints:</i>	NB. DBA produced in 2013. Archaeological evaluation can be secured by condition.
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Agricultural land with some significant trees and groups of trees on and adjacent to the site and on the site boundaries.
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan. Development density and layout needs to be considered so that it allows room for retention of exiting mature trees
<i>Tree Comments Opportunities:</i>	Tree planting opportunities across the site to ensure that development can meet tree cover targets in planning policy framework and help to improve urban forest resource within the town.
<i>Public Protection Comments Significant Constraints:</i>	On site of proposed new road.
<i>Public Protection Comments Other Constraints:</i>	New road would place sig constraints and noise.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation through stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Good
Relationship to the Black Country	This site is located to the west of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p> <p>Site is currently allocated for employment development as part of Shrewsbury West SUE.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No for housing</p>
Recommendation	<p>Retain as an employment allocation - 'saved site allocation'</p>
Reasoning	<p>Site is currently allocated for employment development as part of Shrewsbury West SUE.</p> <p>Good employment location and important to the balanced development within the allocated SUE. No requirement to allocate for housing in light of other available options.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p>
Further Main Modifications required:	<p>No</p>

If proposed for Allocation, Potential Capacity:	
If proposed for Allocation Design Requirements:

<i>Landscape Considerations (Employment) (from the LVSS):</i>	Medium
<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium
<i>Highway Comments - Direct Access to Highway Network?</i>	These site are part of the Western Sustainable Urban Extension and vehicular access will be provided through the new Oxon Link Road and associated local highway network modifications.
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none
<i>Ecology Comments Other Constraints:</i>	EclA required. At least one pond is present on site. Two ponds are found on the site and these may support breeding GCN. Mitigation land required for GCN may impact the area of land available for development - in particular if GCN are found on site. The area required may impact the viability of any development here. Mature trees are present within and bordering this site. The trees and hedgerows may support bats and nesting birds as well as being habitat in their own right. The grassland may be species rich and could be defined as Core / Priority Habitat and therefore be considered in accordance with CS17 Environmental Networks and MD12.

<i>Ecology Comments Management of Constraints:</i>	Protected species mitigation and enhancement. Retain and enhance all hedgerows/tree lines on boundaries. Retain mature trees in field. Protect, enhance and restore Env. Network around most of the site in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	The north east corner of this area has already been developed. The opportunity should be taken to create a wide buffer alongside the planned route of the road which would incorporate the existing hedge lines and also build in sustainable transport routes. Pools should be created along this route and topsoil stripping would improve biodiversity and also help reduce maintenance costs.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Possible impacts on settings of Grade II Listed Oxon Hall (NHLE ref. 1366918).
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (setting of LB). NB. DBA produced in 2013. Archaeological evaluation can be secured by condition.

<i>Ecology Comments Significant Constraints:</i>	HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Otherwise none
<i>Ecology Comments Other Constraints:</i>	GCN may breed in a large pool (reedbed filter) 90m to the south. The woodland, scrub and individual trees to the south and east may be of significance for biodiversity and is protected by CS17 Environmental Networks and MD12. Existing vegetation (course grassland?) may retain some interest.

<i>Ecology Comments Management of Constraints:</i>	EclA required. Retain the environmental network and individual mature trees along the southern and eastern boundary. Provide mitigation for protected species if any found. Grassland / or tall herb vegetation currently present could be enhanced in areas left.
<i>Ecology Comments Opportunities:</i>	Enhancement of env. Network by tree planning alongside the southern or eastern boundary. For any areas of open space consider removing fertile topsoil to create low fertility conditions. Existing vegetation may have some value that could be enhanced by regular management.
<i>Heritage Comments Significant Constraints:</i>	N/A
<i>Heritage Comments Other Constraints:</i>	N/A
<i>Heritage Comments Management of Constraints:</i>	NB. DBA produced in 2013. Archaeological evaluation can be secured by condition.
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Significant shelter belt on boundary, some scattered trees across site and hedgerow boundaries.
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan. Development density and layout needs to be considered so that it allows room for retention of exiting mature trees
<i>Tree Comments Opportunities:</i>	Tree planting opportunities across the site to ensure that development can meet tree cover targets in planning policy framework and help to improve urban forest resource within the town.
<i>Public Protection Comments Significant Constraints:</i>	On site/near of proposed new road.
<i>Public Protection Comments Other Constraints:</i>	New road would place sig constraints and noise.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation through stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Good
Relationship to the Black Country	This site is located to the west of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Whilst Shrewsbury's functional relationship and strong transport links to the Black Country means that this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, due to the sites size it is unlikely that in isolation it could accommodate a meaningful contribution.

Strategic Considerations:	<p>Whilst Shrewsbury's functional relationship and strong transport links to the Black Country means that this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, due to the sites size it is unlikely that in isolation it could accommodate a meaningful contribution. Available for employment only.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>yes - for employment</p>
Potential for Allocation?	<p>No for housing</p>
Recommendation	<p>Do not allocate</p>
Reasoning	<p>The site could present a windfall opportunity to extend the existing commercial area of the towns West SUE. Whilst Shrewsbury's functional relationship and strong transport links to the Black Country means that this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, due to the sites size it is unlikely that in isolation it could accommodate a meaningful contribution. It is considered that there are other more appropriate sites upon which to accommodate these proposed contributions. Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire. The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications required:	<p>No</p>

If proposed for Allocation, Potential Capacity:	
If proposed for Allocation Design Requirements:	

Site Assessment - Stage 3 Updated

Site Reference:	SHR213
<i>Coal Authority Reference Area?</i>	No
<i>Mineral Safeguarding Area?</i>	Yes
<i>Wholly or Partly Grade 1, 2 and/or 3 Agricultural Land Quality:</i>	Yes
<i>Percentage of site in Flood Zone 3:</i>	88%
<i>Percentage of site in Flood Zone 2:</i>	89%
<i>Percentage of site in Flood Zone 1:</i>	11%
<i>Percentage of the site in the 30 year surface flood risk zone:</i>	1%
<i>Percentage of the site in the 100 year surface flood risk zone:</i>	2%

<i>Percentage of the site identified on the EA Historic Flood Map:</i>	47%
<i>Percentage of the site within 20m of an historic flood event:</i>	0%
<i>Percentage of the site within 20m of a detailed river network:</i>	0%
<i>All or part of the site within a Source Protection Zone:</i>	Yes
<i>Landscape Considerations (Residential) (from the LVSS):</i>	High
<i>Visual Impact Considerations (Residential) (from the LVSS):</i>	Medium-High
<i>Landscape Considerations (Employment) (from the LVSS):</i>	Very High
<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	High
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>Access arrangements onto Woodcote way will need to be carefully assessed due to the close proximity of the A5112 roundabout and the new Redwings development access. Modifications to the roundabout may be required or access could be incorporated into a modified roundabout.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Only a small area of this site is outside Flood Zone 3 (and, by definition, the Env Network) so very little of this area is likely to be viable.</p>
<i>Ecology Comments Other Constraints:</i>	<p>The north east boundary of this area is Local Wildlife Site and Priority habitat / Core Habitat in the Environmental Network. Mature trees and hedgerow border much of this site. The trees and hedgerows may support bats and nesting birds as well as being habitat in their own right. Hedgerow is Core / Priority Habitat. A water course runs along the south eastern boundary and would require a large buffer.</p>

<i>Ecology Comments Management of Constraints:</i>	Being in the flood plain would be difficult to mitigate for without having impacts further downstream. Buffers would be needed to the river and the water course to the south east. The small area outside the floodplain could be developed with few ecological impacts.
<i>Ecology Comments Opportunities:</i>	The water course could be enhanced to make a feature and its capacity increased to help address flooding issues. In-line pools and 'leaky dams' should be considered. For any areas of open space consider removing fertile topsoil to create low fertility conditions. Soil can be used elsewhere on site where amenity planting is required or to create interesting topography for kids and biodiversity features like hibernacula.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	No known archaeological interest but large size of site suggests it may have some archaeological potential.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Agricultural land with trees next to river creating a buffer
<i>Tree Comments Management of Constraints:</i>	
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to increase woodland cover and integrate the development into the broader landscape
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Nationally modelled Noise Action Zone to the south.
<i>Public Protection Comments Management of Constraints:</i>	Noise mitigation through stand off distance, glazing and ventilation consideration and layout and orientation of dwellings and combinations thereof to mitigate for all noise sources however may significantly constrain the site.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the east of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p> <p>Vast majority of site is in flood zones 2 and 3 leaving only around 1ha of developable land.</p> <p>High landscape sensitivity, and medium/high visual sensitivity.</p> <p>The site is approximately 1.0km from the nearest supermarket, 1.5km from the nearest school. Regular bus services operate along Woodcote Way which is adjacent to the site. There is a good pedestrian and cycle network in the vicinity.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No</p>
Recommendation	<p>Do not allocate</p>
Reasoning	<p>Vast majority of site is in flood zones 2 and 3 leaving only around 1ha of developable land.</p> <p>High landscape sensitivity, and medium/high visual sensitivity.</p> <p>More preferable sites elsewhere.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications required:	<p>No</p>

If proposed for Allocation, Potential Capacity:	
If proposed for Allocation Design Requirements:	

Site Assessment - Stage 3 Updated

<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	High and Medium
<i>Highway Comments - Direct Access to Highway Network?</i>	SHR216 has the potential to deliver 694 homes. Access would be onto Holy Head Road. Land would need to be protected to deliver the Shrewsbury North West Relief Road across the southern part of the site.
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	Possible HRA required due to road emissions from increased traffic (in-combination) on Hencott Pool Ramsar. See LPR HRA. If priority habitats are present then the site should not be developed. If priority habitats not present, the LWS, hedgerows and adjacent woodland will reduce the developable area.
<i>Ecology Comments Other Constraints:</i>	Part of the northern section of the site is within Shelton Rough Local Wildlife Site (and Env. Network core areas). The LWS is directly adjacent to the eastern boundary. The site may contain priority habitats - botanical survey required. Appropriate buffers from the LWS and adjacent woodland will be required. The central hedgerow should be retained and enhanced. Requires botanical survey, ECLA and surveys for bats (trees and transects), GCNs (ponds within 500m), badgers, reptiles, otters and nesting birds. PROWS cross the site.

<i>Ecology Comments Management of Constraints:</i>	If priority habitat, site should not be developed. If not priority habitat: protected and priority species and habitats mitigation and enhancement, retain and enhance mature trees/hedgerows/tree lines and protect adjacent priority habitats. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	Site could potentially be restored/enhanced as priority habitat. See accompanying document
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Potential impact on setting of Registered Park and Garden of Berwick Park (NHLE ref. 1001706) No known archaeological interest but large size of site suggests it may have some archaeological potential.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on setting of RPG; archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	Numerous scattered mature field trees adjacent to good woodland screening boundary to the river
<i>Tree Comments Other Constraints:</i>	Open field areas
<i>Tree Comments Management of Constraints:</i>	B55837 tree survey / constraints analysis. Arb Impact Assessment, Tree Protection Plan & Arb Method Statement.
<i>Tree Comments Opportunities:</i>	Particular attention to size, number and location of dwellings in order to create sustainable juxtaposition of houses and trees
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Possible road noise to southwest of the site and commercial noise to the south.
<i>Public Protection Comments Management of Constraints:</i>	Mitigate noise by location (separation distances to the road) of dwellings, orientation and room layout as well as glazing and boundary treatment.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Poor
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Poor
Relationship to the Black Country	This site is located to the west of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>The site offers an opportunity for a greenfield land release on the edge of Shrewsbury. It is recognised the site falls within Bicton parish. Access would be onto Holyhead Road.</p> <p>If allocated land would need to be protected to deliver the Shrewsbury North West Relief Road across the southern part of the site.</p> <p>The site performs poorly for housing and employment in the context of the settlement and the Black Country Contribution within the Stage 2a Sustainability Appraisal.</p> <p>It is recognised the site has a high visual sensitivity rating and a medium/high landscape sensitivity rating.</p> <p>Impact at Spring Coppice and to the east of the site at Shelton Rough adjacent to the River Severn are particular concerns. Some ecological concerns.</p> <p>Impact on Groundwater Source Protection Zone highlighted by EA as significant.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Land to the south to the south of the site should be protected for the potential future alignment of the NWRR.</p> <p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No</p>
Recommendation	<p>Do not allocate</p>
Reasoning	<p>This site was included as a proposed allocation for 300 dwellings in the Preferred Options document in November 2018. However, the site was subject to substantial objection, and in particular significant concern was raised by the Environment Agency regarding the potential impact from development on the Source Protection Zone in the area, and associated impacts on the quality of water supply for the town. Therefore whilst the site does offer some locational benefits, especially in terms of its broadly sustainable location on the edge of Shrewsbury, the weight of material objections weighing negatively in the balance of considerations alongside landscape concerns, and the fact there are other options in the town to deliver housing in a more sustainable manner, it is now considered this site should no longer be proposed for allocation and remain open countryside.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications required:	<p>No</p>

<i>Highway Comments - Direct Access to Highway Network?</i>	<p>Potentially 116 homes. Access arrangements onto Woodcote way will need to be carefully assessed due to the close proximity of the A5112 roundabout and the new Redwings development access. Modifications to the roundabout may be required or access could be incorporated into a modified roundabout. Access should be linked with SHR099. The site is approximately 1.0km from the nearest supermarket, 1.5km from the nearest school. Regular bus services operate along Woodcote Way which is adjacent to the site. There is a good pedestrian and cycle network in the vicinity.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>

<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others).
<i>Ecology Comments Other Constraints:</i>	Requires botanical survey, EclA and surveys for GCNs (ponds within 500m), bats, badgers, reptiles and nesting birds. Hedgerows and trees will need to be buffered.

<i>Ecology Comments Management of Constraints:</i>	Protected and priority species and habitats mitigation and enhancement, retain and enhance mature trees/hedgerows/tree lines and protect adjacent priority habitats. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Site includes historic farmstead of Underdale Hall Farm (HER PRN 26952), where both the farm house and the principal range of farm buildings survive. No other known archaeological interest but medium size suggests site may have some archaeological potential.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (buildings assessment; archaeological DBA + ?evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	Scattered mature trees and groups of trees on site
<i>Tree Comments Other Constraints:</i>	
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 tree survey / constraints analysis. Arboricultural Impact Assessment, Tree Protection Plan & Arboricultural Method Statement.
<i>Tree Comments Opportunities:</i>	Low density houses retaining existing trees
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Flood risk. Currently site of employment. Noise assessment required for road.
<i>Public Protection Comments Management of Constraints:</i>	
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Good
Relationship to the Black Country	This site is located to the east of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>Site would represent a significant growth area for the town. Highway access considered achievable. Landscape sensitivity considered high. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No</p>
Recommendation	<p>Do not allocate</p>
Reasoning	<p>It is considered more sustainable options exist elsewhere in the town to accommodate the planned level of growth to 2038. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions. Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire. The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications required:	<p>No</p>

If proposed for Allocation, Potential Capacity:	
If proposed for Allocation Design Requirements:	

Site Assessment - Stage 3 Updated

Site Reference:	SHR219
<i>Coal Authority Reference Area?</i>	Yes
<i>Mineral Safeguarding Area?</i>	Yes

<i>Landscape Considerations (Employment) (from the LVSS):</i>	Medium-High
<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium-High
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>These sites represent a partial fill of the remaining undeveloped land between the Mytton Oak Road and the Radbrook Road. The majority of Nobold Lane (north of Mousecroft Lane) is not fronted by one of these sites so no improvements could be delivered without third party land. Together they would need to provide an new circular link road, between the existing radial roads, in order to facilitate public transport services to the new developments and improve accessibility by car. This is particular important as there is not direct access to the A5 bypass from Longden Road and there level of development that could be accommodated by the Longden Road route going north east to Roman Road will be limited by existing highway capacity. These sites are over 2.0km to the nearest primary school and convenience store as third party land would be required to make suitable improvements to the existing PRoW access to Radbrook Green. Frequent bus service operate along Hanwood Road but these are around 800m from the centre of the sites. It would therefore be preferable for this area to be developed as a sustainable urban extension to include local facilities and through route public transport services.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>If priority habitats are present then these areas should not be developed. HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). Protection of ponds on the site will reduce the no. of houses possible.</p>
<i>Ecology Comments Other Constraints:</i>	<p>The site may contain priority habitats - botanical survey required. There are ponds on the site. Retention and protection of the ponds (with appropriate buffers) will reduce the no. of houses possible. A significant proportion of the site is made up of wet woodland / swamp which is almost certainly core / priority habitat. A large proportion of the area may Env. Network core habitat and/or corridor as the grassland is indicated as possibly being of interest. If the grassland is of interest, only the north eastern arable field would be available for development. Requires EclA and surveys for bats, GCNs (ponds within 500m), badgers, reptiles and nesting birds. Hedgerows, trees and ponds will need to be buffered.</p>

<i>Ecology Comments Management of Constraints:</i>	If priority habitats are present, those areas of the site should not be developed. Protected and priority species and habitats mitigation and enhancement, retain and enhance mature trees/hedgerows/tree lines and protect adjacent priority habitats. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	The wet woodland could be improved for wildlife and potentially for people with a boardwalk through the area created. Woodland planting along the southern boundary would help the network here and also reduce road noise. The footpath should form part of a significant green corridor that links this site to sustainable transport routes into town. Woodland planting should be considered adjacent to the woodland block to the south west.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Possible impacts on settings of Grade II Listed Nobold Hall (NHLE ref. 1270731) and Nobold Grange (NHLE ref. 1254531). Site detached from built edge of town and would potentially impact on the setting of the historic hamlet of Nobold and includes historic farmstead of Day House (HER PRN 27747). Potential impact on setting of Grade II Listed Newton farmhouse (NHLE ref. 1176148). Site crossed by the projected line of possible Roman road (HER PRN 00057) and includes the projected line of a Roman road (HER PRN 00098) and two cropmark enclosure of likely Iron Age/ Roman date. (HER PRNs 00006 & 00009). The site is also bounded to the north by a second possible Roman road (HER PRN 00057). No other known archaeological interest but large size of site and proximity to the Roman road suggests it may have some archaeological potential.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on settings of LBs & CA; Level 2 historic building appraisal if demo of Day House farm proposed; and archaeological DBA + field evaluation). NB part of the site previously used as site compound during A5 construction.
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Hedgerows and mature hedgerow trees, scattered mature field trees and areas of woodland around seasonal pond and adjacent to highway.
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 tree survey / constraints analysis. Arboricultural Impact Assessment, Tree Protection Plan & Arboricultural Method Statement.
<i>Tree Comments Opportunities:</i>	tree planting across the site, increase area of woodland along highway.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Noise from road, assessment required, more suitable for employment. Odours from cattle market.
<i>Public Protection Comments Management of Constraints:</i>	
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair

<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>These sites represent a partial fill of the remaining undeveloped land between the Mytton Oak Road and the Radbrook Road. Together they would need to provide an new circular link road, between the existing radial roads, in order to facilitate public transport services to the new developments and improve accessibility by car. These sites are over 1.5km to the nearest primary school and convenience store. Frequent bus service operate along Mytton Oak Road and Hanwood Road but these are around 800m from the centre of the sites. It would therefore be preferable for this area to be developed as a sustainable urban extension to include local facilities and through route public transport services.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>If priority habitats are present then these areas should not be developed.</p> <p>HRA may be required for NOx pollution from increased traffic, in-combination with other sites on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others).</p> <p>Protection of ponds on the site (one of which is a confirmed GCN breeding pond) will greatly reduce the no. of houses possible.</p>
<i>Ecology Comments Other Constraints:</i>	<p>There are ponds on the site (one of which is a confirmed GCN breeding pond) Retention and protection of the ponds (with appropriate buffers) will greatly reduce the no. of houses possible.</p> <p>. Requires EclA and surveys for bats, GCNs (ponds within 500m), badgers, reptiles and nesting birds.</p> <p>Hedgerows, trees and ponds will need to be buffered.</p>

<i>Ecology Comments Management of Constraints:</i>	If priority habitats are present, those areas of the site should not be developed. Protected and priority species and habitats mitigation and enhancement, retain and enhance mature trees/hedgerows/tree lines and protect adjacent priority habitats. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Site includes park like ground and may affect the setting of Ley Grange - a non-designated historic house of some status. No known archaeological interest but large size suggests site may have some archaeological potential.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (setting assessment; archaeological DBA + evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Numerous mature trees in hedgerows and across the existing fields, would limit development opportunities

Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the west of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>The site is adjacent to the proposed allocated land of SHR060/158/160.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No</p>
Recommendation	<p>Do not allocate</p>
Reasoning	<p>Whilst adjoining the proposed allocation of SHR060/158/160, the site has not been considered against the emerging site promotion and urban design considerations for the preferred site option.</p> <p>The site is not required for access from Mytton Oak Road, and there is no evidence of any joint land promotion with adjoining land. As such it is not considered necessary for this site to come forward as part of the proposed site allocation at Edgebold.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>

<i>Highway Comments - Direct Access to Highway Network?</i>	<p>The site benefits from direct access onto Berwick Road. Berwick road has sufficient capacity to accommodate potential development, but consideration would need to be given to the likely impact on the Berwick Road/Coton Hill Junction, and wider Highways network, depending on the scale of the development.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	<p>HRA may be required for NOx pollution from increased traffic, in-combination with other sites, on White Mere, Sweatmere and Crose Mere and Clarepool Moss, Hencott Pool (possibly others). See LPR HRA.</p> <p>The central and boundary hedgerows (Env. Network) should be retained and appropriately buffered.</p>
<i>Ecology Comments Other Constraints:</i>	<p>EclA and botanical survey required and surveys for badgers, bats, nesting birds, GCNs and reptiles</p>

<i>Ecology Comments Management of Constraints:</i>	Protected and priority species and habitats mitigation and enhancements. Protect, enhance and restore Env. Network in accordance with CS17and MD12.
<i>Ecology Comments Opportunities:</i>	Enhance Env. Network
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	A large site which includes a cropmark enclosure of likely Iron Age/ roman date (HER PRN 02209)
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	Significant curtilage trees and central belt of trees on site
<i>Tree Comments Other Constraints:</i>	
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 Tree Survey / Arb Impact Assessment and Tree Protection Plan. Development density and layout needs to be considered so that it allows room for retention of exiting mature trees
<i>Tree Comments Opportunities:</i>	Tree planting opportunities across the site to ensure that development can meet tree cover targets in planning policy framework and help to improve urban forest resource within the town.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Road noise.
<i>Public Protection Comments Management of Constraints:</i>	Noise assessment and ProPG design.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Poor
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Poor
Relationship to the Black Country	This site is located to the north-west of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>The site is significant in scale and therefore could offer an opportunity as an alternative to other large scale site options. The site has high landscape sensitivity and medium-high visual sensitivity for residential use. The site performs poorly for housing and employment in the context of the settlement and the Black Country Contribution within the Stage 2a Sustainability Appraisal.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Known Infrastructure Opportunities:	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
Potential for Windfall?	<p>No</p>
Potential for Allocation?	<p>No</p>
Recommendation	<p>Do not allocate</p>
Reasoning	<p>The site has a high landscape sensitivity and medium-high visual sensitivity for residential use. It is considered there are more appropriate options elsewhere in the town to accommodate significant growth. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions. Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire. The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications required:	<p>No</p>

<i>Highway Comments - Direct Access to Highway Network?</i>	SHR223 is part of SHR216 which has the potential to deliver 694 homes. Access would be onto Holyhead Road. Land would need to be protected to deliver the Shrewsbury North West Relief Road across the southern part of the site.
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
<i>Ecology Comments Significant Constraints:</i>	Possible HRA required due to road emissions from increased traffic (in-combination) on Hencott Pool Ramsar. See LPR HRA. If priority habitats are present then the site should not be developed. If priority habitats not present, the LWS, hedgerows and adjacent woodland will reduce the developable area.
<i>Ecology Comments Other Constraints:</i>	Part of the northern section of the site is within Shelton Rough Local Wildlife Site (and Env. Network core areas). The LWS is directly adjacent to the eastern boundary. The site may contain priority habitats - botanical survey required. Appropriate buffers from the LWS and adjacent woodland will be required. The central hedgerow should be retained and enhanced. Requires botanical survey, ECLA and surveys for bats (trees and transects), GCNs (ponds within 500m), badgers, reptiles, otters and nesting birds. PROWS cross the site.

<i>Ecology Comments Management of Constraints:</i>	If priority habitat, site should not be developed. If not priority habitat: protected and priority species and habitats mitigation and enhancement, retain and enhance mature trees/hedgerows/tree lines and protect adjacent priority habitats. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	Site could potentially be restored/enhanced as priority habitat. See accompanying document
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Potential impact on setting of Registered Park and Garden of Berwick Park (NHLE ref. 1001706) No known archaeological interest but large size of site suggests it may have some archaeological potential.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on setting of RPG; archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	Numerous scattered mature field trees adjacent to good woodland screening boundary to the river
<i>Tree Comments Other Constraints:</i>	Open field areas
<i>Tree Comments Management of Constraints:</i>	B55837 tree survey / constraints analysis. Arb Impact Assessment, Tree Protection Plan & Arb Method Statement.
<i>Tree Comments Opportunities:</i>	Particular attention to size, number and location of dwellings in order to create sustainable juxtaposition of houses and trees
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Road noise.
<i>Public Protection Comments Management of Constraints:</i>	
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the west of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

<p>Strategic Considerations:</p>	<p>Site proposed for retirement living accommodation is considered to be medium-high landscape and visual sensitivity. The entirety of the site is in source protection zone 2 and parts are in source protection zone 3, although it is noted that the extent of built form could avoid elements of the site in source protection zone 3.</p> <p>The site performs poorly for housing and employment in the context of the settlement within the Stage 2a Sustainability Appraisal. However, it performs fair in the context of the Black Country Contribution within the Stage 2a Sustainability Appraisal.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No</p>
<p>Recommendation</p>	<p>Do not allocate</p>
<p>Reasoning</p>	<p>Landscape and visual sensitivity is medium/high. It is considered there are more appropriate options elsewhere in the town to accommodate growth.</p> <p>Any future retirement residential proposals on this site, including affordable, can be considered against relevant policies of the Local plan.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>

Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located to the south-west of Shrewsbury. Shrewsbury is located in the centre of Shropshire, with a functional relationship to the Black Country. Shrewsbury benefits from being located on the A5/M54 corridor which provides links to the Black Country (which is some 22 miles away). Shrewsbury also benefits from a railway station which offers regular train services to the Black Country via the Shrewsbury to Wolverhampton line.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.

Strategic Considerations:	<p>A large strategic site located within and beyond the extent of the A5 by-pass. Site consists of numerous smaller sites: SHR025, SHR027, SHR157, SHR149, SHR188, SHR190 and SHR192. See strategic considerations for these sites. Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation.</p>
Known Infrastructure Requirements to make Development Suitable in Planning Terms:	Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.
Known Infrastructure Opportunities:	Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.
Potential for Windfall?	No
Potential for Allocation?	No
Recommendation	Do not allocate
Reasoning	<p>The extent of the site goes beyond the extent of the A5 by-pass, which is considered to cause a significant degree of physical and perceived severance from the main urban area. It is not considered necessary to grow the town beyond the A5 by-pass at this stage, especially in the light of the availability of more sustainable options to the west of the town.</p> <p>With regard to the remainder of the site, the site to the north between Hanwood Road and Mytton Oak Road is preferred for significant and comprehensive planned new development, there is no requirement to release this land at this time in order to meet the proposed development needs of the town up to 2038. The preferred land to the north is considered to offer greater potential benefits to the town and can support the objectives of the Big Town Plan and to achieve a comprehensively planned development.</p> <p>Given Shrewsbury's functional relationship and strong transport links to the Black Country, this site could be suitably located to accommodate some of the proposed contribution to the unmet development needs forecast to arise within the Black Country, should it be identified as a proposed site allocation. However, it is considered that there are other more appropriate sites upon which to accommodate these proposed contributions.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire. The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications required:	No

If proposed for Allocation, Potential Capacity:	
If proposed for Allocation Design Requirements:	

Shropshire Local Plan

Updated Stage 3 Site
Assessment: Potential Strategic
Sites including Strategic
Settlements

Site Assessment - Stage 3 Updated	
Site Reference:	BWU001
<i>Coal Authority Reference Area?</i>	Yes
<i>Mineral Safeguarding Area?</i>	Yes
<i>Wholly or Partly Grade 1, 2 and/or 3 Agricultural Land Quality:</i>	Yes
<i>Percentage of site in Flood Zone 3:</i>	2%
<i>Percentage of site in Flood Zone 2:</i>	3%
<i>Percentage of site in Flood Zone 1:</i>	97%
<i>Percentage of the site in the 30 year surface flood risk zone:</i>	3%
<i>Percentage of the site in the 100 year surface flood risk zone:</i>	4%
<i>Percentage of the site in the 1,000 year surface flood risk zone:</i>	9%
<i>Percentage of the site identified on the EA Historic Flood Map:</i>	0%
<i>Percentage of the site within 20m of an historic flood event:</i>	0%
<i>Percentage of the site within 20m of a detailed river network:</i>	4%
<i>All or part of the site within a Source Protection Zone:</i>	Yes
<i>Green Belt Considerations (from the GB Assessment/Review):</i>	The site is not located within the Green Belt.
<i>Landscape Considerations (Residential) (from the LVSS):</i>	Not Assessed
<i>Landscape Considerations (Employment) (from the LVSS):</i>	Not Assessed
<i>Visual Impact Considerations (Residential) (from the LVSS):</i>	Not Assessed
<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Not Assessed
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>If 66% of the site was housing this site could accommodate 2,713 homes. The site does not have highway frontage but it appears that links could be made across neighbouring land to the B4380 and B5061. If this land was available to make these links, of approximately 500m each then two suitable highway access junctions should be achievable.</p> <p>If developed as a strategic site it is assumed that some local services / facilities would be provided within a master plan that gave priority to sustainable modes of transport for local trips to these facilities. However, in the initial phases of the development it is likely that facilities and services from outside the locality will need to be used. The nearest convenience store of any significance would be in Wellington, over 8km from the site. The nearest bus service is on the A5061 around 800km from the centre of the site. It is unlikely that the scale of development would support a school or GP surgery and the nearest GP & School are over 6km from the site in Cressage via the B4380 which has no footways.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
Highways Accessibility Rating (Out Of 24) (Based on Primary School, GP Surgery, Convenience Store & Public Transport Service):	
<i>Ecology Comments Significant Constraints:</i>	Possible HRA required due to road emissions from increased traffic (in-combination) on Hencott Pool. See LPR HRA. Protection of the woodland, ponds and Env. Network will reduce the no. of houses possible.
<i>Ecology Comments Other Constraints:</i>	<p>Patches of woodland on the site (possibly priority habitats) will need to be retained and buffered.</p> <p>There is a watercourse along the northern boundary which forms an Env. Network corridor.</p> <p>There are ponds on the site. Retention and protection of the ponds (with appropriate buffers) will reduce the no. of houses possible.</p> <p>Requires EclA and surveys for bats, GCNs (ponds within 500m), otters, white-clawed crayfish, water voles, badgers and nesting birds.</p> <p>Trees, hedgerows, woodland, watercourse and ponds will need to be buffered.</p>

<i>Ecology Comments Management of Constraints:</i>	Protected and priority species and habitats mitigation and enhancement, retain and enhance mature trees/hedgerows/tree lines and protect adjacent priority habitats. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	
<i>Heritage Comments Significant Constraints:</i>	Site likely to have a substantial negative impact on setting of the Scheduled Monument of Site of Roman town of Wroxeter (Viroconium) (NHLE ref. 1003705). Number of known cropmark sites which may be associated with the Roman city situated within site boundary, whilst very large size of site and proximity to Wroxeter suggests it otherwise has high archaeological potential.
<i>Heritage Comments Other Constraints:</i>	
<i>Heritage Comments Management of Constraints:</i>	Do not allocate.
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	Important green corridor on northern curtilage two blocks of woodland and scattered trees and hedgerows between fields
<i>Tree Comments Other Constraints:</i>	
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 tree survey / constraints analysis. Arboricultural Impact Assessment, Tree Protection Plan & Arboricultural Method Statement.
<i>Tree Comments Opportunities:</i>	Net gain for biodiversity - retain existing features and join green corridors
<i>Public Protection Comments Significant Constraints:</i>	Distant noise source to north. No apparent history of contamination.
<i>Public Protection Comments Other Constraints:</i>	Distant noise source to north. No apparent history of contamination.
<i>Public Protection Comments Management of Constraints:</i>	
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	<i>Fair</i>
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	<i>Fair</i>
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	<i>Fair</i>
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	<i>Fair</i>
Relationship to the Black Country	Located in central Shropshire, an area with a functional relationship to the Black Country. Located south of but some distance from the A5 / M54 corridor from Shrewsbury to Wolverhampton. The site is linked to this corridor by rural roads. Nearest railway station providing direct links to the Black country is some distance away at Wellington.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	As a large potentially strategic site/settlement, it has capacity to accommodate a significant quantity of housing and employment, sufficient to contribute to the needs of both Shropshire and/or the Black Country.

<p>Strategic Considerations:</p>	<p>The site is sufficiently large that it could form a strategic settlement. The site is located between Shrewsbury and Telford, south of the A5. The site is located in proximity to but some distance from the M54/A5 strategic corridor and any connection to it would be via B roads. Given the distance from the strategic corridor and nature of potential connections, it is unclear whether the site would be attractive as a centre for employment or whether it would be sustainable or attractive as a location to accommodate all or part of the proposed contribution to the unmet housing and/or employment contributions forecast to arise within the Black Country. The site does not have a highway frontage but it appears that links could be made across neighbouring land to the B4380 and B5061. If this land was available to make these links, of approximately 500m each then two suitable highway access junctions should be achievable. Around half of the site is located within a source protection zone (primarily zone 3, however part of the north-west of the site is located in zone 2). Possible HRA required due to road emissions from increased traffic (in-combination) on Hencott Pool. The site contains woodland, mature trees, ponds and the stream brook along the northern boundary forms an environmental network corridor. Site likely to have a substantial negative impact on setting of the Scheduled Monument of Site of Roman town of Wroxeter (Viroconium). There are a number of known cropmark sites which may be associated with the Roman city situated within site boundary and due to its very large size and proximity to Wroxeter it is likely to have high archaeological potential.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Ensuring future occupiers have appropriate access to services and facilities and employment opportunities. Ensuring appropriate pedestrian and cycle links and connections to public transport. Ensuring necessary works to the highway network are undertaken (including achieving appropriate site accesses and improvements to Tern Hill roundabout). Provision of green infrastructure.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Formation of a new settlement through a mixed used development to provide local services and facilities; employment land; new homes; and extensive green infrastructure. Infrastructure provision on and to support the site. Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No</p>
<p>Recommendation</p>	<p>Retain as Countryside</p>

<p>Reasoning</p>	<p>The site is located in proximity to but some distance from the M54/A5 strategic corridor. Given the distance from the strategic corridor, it is unclear whether the site would be attractive as a centre for employment.</p> <p>The site is located in proximity to but some distance from the M54/A5 strategic corridor and any connection to it would be via B roads. Whilst the site is large, given the distance from the strategic corridor and nature of potential connections, it is unclear whether the site would be attractive as a centre for employment or whether it would be sustainable or attractive as a location to accommodate all or part of the proposed contribution to the unmet housing and/or employment contributions forecast to arise within the Black Country. Development of alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site likely to have a substantial negative impact on setting of the Scheduled Monument of Site of Roman town of Wroxeter (Viroconium). There are a number of known cropmark sites which may be associated with the Roman city situated within site boundary and due to its very large size and proximity to Wroxeter it is likely to have high archaeological potential.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
<p>Further Main Modifications Required</p>	<p>No</p>

<p>If proposed for Allocation Design Requirements:</p>	<p>N/A</p>

Site Assessment - Stage 3 Updated	
Site Reference:	P26 (Amended)
<i>Coal Authority Reference Area?</i>	No
<i>Mineral Safeguarding Area?</i>	Yes
<i>Wholly or Partly Grade 1, 2 and/or 3 Agricultural Land Quality:</i>	Yes
<i>Percentage of site in Flood Zone 3:</i>	2%
<i>Percentage of site in Flood Zone 2:</i>	2%
<i>Percentage of site in Flood Zone 1:</i>	98%
<i>Percentage of the site in the 30 year surface flood risk zone:</i>	1%
<i>Percentage of the site in the 100 year surface flood risk zone:</i>	2%
<i>Percentage of the site in the 1,000 year surface flood risk zone:</i>	4%
<i>Percentage of the site identified on the EA Historic Flood Map:</i>	0%
<i>Percentage of the site within 20m of an historic flood event:</i>	0%
<i>Percentage of the site within 20m of a detailed river network:</i>	3%
<i>All or part of the site within a Source Protection Zone:</i>	Yes
<i>Green Belt Considerations (from the GB Assessment/Review):</i>	<p>Within the Green Belt Assessment undertaken for Shropshire this site is considered within three Green Belt Parcels (P4, P8 and P25). The assessment indicates that these parcels make no contribution against purposes 1a and 1b; make no contribution or perform weakly against purposes 2 and 4; and perform either moderately or strongly against purpose 3.</p> <p>Within the Green Belt Review undertaken for Shropshire elements of this site is considered within the two parcels (Parcel P4 was not specifically assessed) and the majority is also considered within opportunity area (J3-1).</p> <p>The review of the relevant parcels indicates that there would be either moderate-high or high harm to the Green Belt resulting from release (it is considered likely that there would be high harm to the Green Belt resulting from release, associated with Parcel P4). Release would lead to significant encroachment on the countryside; could affect the integrity of neighbouring Green Belt land; and would also lead to the creation of a new area inset into the Green Belt.</p> <p>The review of the relevant opportunity area indicates there would be high harm to the Green Belt resulting from release.</p>
<i>Landscape Considerations (Residential) (from the LVSS):</i>	Medium
<i>Landscape Considerations (Employment) (from the LVSS):</i>	Medium-High
<i>Visual Impact Considerations (Residential) (from the LVSS):</i>	Medium
<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium-High
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>The site is adjacent to the A41 immediately north of junction 3 of the M54 and the views of Highways England would need to be sought. This section of the A41 is subject to the national speed limit. The site controls sufficient land to facilitate new and/or improved access points onto the A41 together with appropriate speed limits and pedestrian crossing facilities.</p> <p>If this site was developed as a strategic settlement it is assumed that local services / facilities would be provided within a master plan that gave priority to sustainable modes of transport for local trips to these facilities. However, in the initial phases of the development it is likely that facilities and services from outside the locality will need to be used. In these circumstances the nearest schools are over 4.0km from the site in Shifnal or Albrighton to which school transport would need to be provided. The nearest GP surgeries are also in Shifnal or Albrighton and a similar distance away. The site is adjacent to the A41 which has no pedestrian crossing facilities. An hourly bus service (891) operates along the A41 and Stanmore Lane between Shifnal (Telford) and Albrighton (Wolverhampton) but some parts of these sites would be 3.0km from the existing service route. The site is not linked to Albrighton or Shifnal by a continuous footway or cycle route.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
Highways Accessibility Rating (Out Of 24) (Based on Primary School, GP Surgery, Convenience Store & Public Transport Service):	
<i>Ecology Comments Significant Constraints:</i>	<p>Only reduced numbers of housing possible as protection of Environmental Network (two water courses and south eastern tip unlikely to be fully possible in open space provision). Due to the large size of the proposed development area, HRA may be required for recreational impacts, particularly on Cannock Chase - this will need to be checked with NE. HRA may also require bespoke modelling for traffic emissions and water cycle.</p>
<i>Ecology Comments Other Constraints:</i>	<p>EclA required. Surveys for GCN (in ponds on site and within 500m), Dormice, Badgers (known records), Bats (records on site), nesting birds, vascular plants, reptiles, Otters, Water Voles and White-clawed Crayfish (many records along watercourse). Hedges, tree lines and water courses provide valuable ecological networks. Environmental Network crosses the site and lies adjacent to it.</p>

<i>Ecology Comments Management of Constraints:</i>	Protected species mitigation and enhancement. Retain and enhance all hedgerows/tree lines within the site and on boundaries. Retain mature trees in field. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12. Wooded corridors along the streams, including Church Pool, are to be retained, protected and buffered. Retain good quality habitat within the south-eastern tip. Maintenance of dark commuting routes, linked to water courses. Protection/mitigation for White-clawed crayfish if any drainage connections to the water courses. Pollution prevention including oil and silt interceptors.
<i>Ecology Comments Opportunities:</i>	Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12. Include major footpaths within connections. Provide a network of open space and green corridors connecting with the Env. Network and buffer the wooded banks of the streams to minimise recreational and other impacts.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Very large site that incorporates numerous designated (7 GII Listed Buildings) and non-designated heritage assets (including those with archaeological interest). Site also in close proximity to the Boundary of the Tong Conservation Area which contains a further cluster of listed buildings (including 1 GI and 1 GII* LB), and site also has some potential to affect the setting of the Grade II* Registered Park and Garden and Conservation Area of Weston Park/Weston-under-Lizard. Substantial number of metal detectorists finds. Development will potentially directly and indirectly impact on the significance of a range of these assets.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on settings of LBs; impacts on non-designated parklands and historic landscape character; archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	Well designed development might offer opportunities to improve/ restore the non-designated parkland settings of some LBs. S106 agreements could be used to secure enhancements (including management, access and interpretation) for SMs and other heritage assets.
<i>Tree Comments Significant Constraints:</i>	TPO trees to rear of the Bell Inn / filling station.
<i>Tree Comments Other Constraints:</i>	Corridor of mature woodland runs north / south through site and block of woodland to southern corner. Connectivity to the south interrupted by M54. Numerous trees, groups of trees and hedgerows around and within site. Large water body and areas of mature woodland within south-eastern corner of site.
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 tree survey / constraints analysis. Arb Impact Assessment, Tree Protection Plan & Arb Method Statement. Ensure reasonable development stand-off from woodland. Development stand-offs required from the water and woodland habitats.
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to enhance tree cover in association with future development. Incorporate good trees and tree groups as part of open space within development and plan strategically for a network of connected green infrastructure. Extend woodland cover and create suitable buffer with built development. Look to connect to large block of woodland to the north / west of the site. Seek to expand woodland cover by new planting to extend and link existing woodland where suitable.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Possible land contamination where land has been previously developed. Noise and air quality concerns where the site adjoins the M54 and A41.
<i>Public Protection Comments Management of Constraints:</i>	Remediation likely to be available for contaminated land. Appropriate assessments will be necessary. Noise mitigation likely to be available. As a first option it is recommended that noise sensitive receptors (residential properties) are provided with sufficient distance from noise sources to avoid issues. Where this is not possible good design and layout including orientation and layout of development, glazing barriers including fencing and bunding, mechanical ventilation. Air quality concerns can be removed by ensuring there is appropriate distance between proposed residential properties and main roads.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Poor
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Poor
Relationship to the Black Country	Located in eastern Shropshire, an area with a functional relationship to the Black Country. Located on the A5 / M54 corridor from Shrewsbury to Wolverhampton and as such benefits from good links onto this corridor and into the Black Country. The site is in proximity of railway stations at Cosford, Albrighton and Shifnal, although all are separated from the site by the M54 corridor (it is noted that there are underpasses that could service such movements) and would likely require some other form of transport to access them (it is noted that the site promoters have proposed a number of mechanisms to facilitate this, including a shuttle bus).
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	As a large potentially strategic site/settlement, it has capacity to accommodate a significant quantity of housing and employment, sufficient to contribute to the needs of both Shropshire and/or the Black Country.

<p>Strategic Considerations:</p>	<p>The site is sufficiently large that it could form a strategic settlement. The site is located on the M54/A5 strategic corridor. The site has been promoted for the formation of a planned settlement containing around 50ha (or 75ha) of employment, around 3,000 dwellings, and a local centre to provide services, facilities and infrastructure. It is understood that extensive areas of land within the site promotion are not proposed for development but represent opportunity areas for providing public benefit - this includes land to the east of the A41 and land at and in proximity to Lizard's Hill, relevant proposals for this land could occur whilst it remains in the Green Belt. As such the extent of the site promotion for development/release from the Green Belt is substantially smaller than the total site area, being around 370ha. This has been recognised within the assessment. The opportunity associated with this corridor is recognised within the Economic Growth Strategy for Shropshire and the M54 corridor study. The M54 corridor benefits from good access to transport infrastructure; its proximity to existing international businesses dominant in growth sectors such as advanced manufacturing and engineering; and proximity to higher education and training institutions including key assets such as RAF Cosford, Wolverhampton University and Harper Adams University. The sites location (proximity and connectivity to the Black Country) could mean that it is an appropriate location to meet cross-boundary needs arising in the Black Country. All or part of the site is located within a source protection zone. The site is located within the Green Belt. The review of the relevant parcels indicates that there would be either moderate-high and/or high harm to the Green Belt resulting from release, dependent on the extent of release - if the total site promoted were released it would result in high harm to the Green Belt. It is considered that the site controls sufficient land to provide an access onto the A41. There is also a need to consider pedestrian crossing facilities and speed limits. Furthermore, Highways England views will be required on the relationship between the site and Junction 3 of the M54 / the M54 itself. Services and facilities would need to be provided on the site to create a sustainable community. The site performs poorly for residential and employment within Stage 2a: Sustainability Appraisal in the context of potential strategic sites/settlements and the contribution to the Black Country. It is acknowledged that this in part relates to the fact that the site promotion includes land which is not proposed for development but to provide wider public benefit, this has informed overarching conclusions. It is also acknowledged that this rating is also in part as a result of the limited access to services and facilities, which could of course be provided on the site, this has also informed overarching conclusions. HRA will be required due to site size. Parts of the site are within an environmental network (two watercourses and the southern tip of the site). The site contains hedgerows, mature trees, wooded corridors, a large water body and blocks of woodland (some of these trees are subject to TPO protection). The site may also contain protected species and priority habitats. The site contains and/or is in proximity of many designated and non-designated heritage assets including listed buildings, scheduled monuments, a conservation area and a registered park. The site is also of archaeological interest and there is a need to consider non-designated parkland and historic landscape character. Elements of the site may be subject to contamination. Noise and air quality will need to be considered due to proximity to the M54 and A41.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Ensuring future occupiers have appropriate access to services and facilities and employment opportunities. Ensuring appropriate pedestrian and cycle links and connections to public transport. Ensuring necessary works to the highway network are undertaken (including achieving appropriate site accesses and improvements to Tern Hill roundabout). Provision of green infrastructure. Relevant supporting studies should be undertaken and their recommendations implemented. Infrastructure capacity assessment to identify key impacts and investment requirements. See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Formation of a new community focused on a 50ha strategic employment site and supported by a skills hub and a series of residential neighbourhoods. Provision of local services and facilities. Infrastructure and a range of on-site facilities would be provided as part of the site. Significant amount of Open Space. Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No</p>
<p>Recommendation</p>	<p>Retain as Green Belt</p>

Reasoning	<p>In weighing up the site specific considerations, both positive and negative, and giving consideration to the consultation responses on this matter, it is considered there is insufficient justification to progress an exceptional circumstances argument for the release of this land from the Green Belt.</p> <p>Whilst the site's size and location (proximity and connectivity to the Black Country) could mean that it is an appropriate location to meet cross-boundary needs arising in the Black Country, it is considered that there are other non-Green Belt locations/more appropriate locations to accommodate the proposed contributions to unmet needs forecast to arise within the Black Country.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications Required	No
If proposed for Allocation, Potential Capacity:	N/A
If proposed for Allocation Design Requirements:	N/A

Purpose 1 (checking the unrestricted sprawl of large built up areas - only applies to parcels adjacent to large built up areas);
 Purpose 2 (merging of neighbouring towns);
 Purpose 3 (regularising countryside from encroachment);
 Purpose 4 (preserving setting/character of historic towns); and
 Purpose 5 (assisting urban regeneration by encouraging re-use of brownfield land - applies consistently across all parcels).

*Green Belt Purposes (where applicable):

Site Assessment - Stage 3 Updated

<i>Coal Authority Reference Area?</i>	No
<i>Mineral Safeguarding Area?</i>	Yes
<i>Wholly or Partly Grade 1, 2 and/or 3 Agricultural Land Quality:</i>	Yes
<i>Percentage of site in Flood Zone 3:</i>	2%
<i>Percentage of site in Flood Zone 2:</i>	2%
<i>Percentage of site in Flood Zone 1:</i>	98%
<i>Percentage of the site in the 30 year surface flood risk zone:</i>	1%
<i>Percentage of the site in the 100 year surface flood risk zone:</i>	2%
<i>Percentage of the site in the 1,000 year surface flood risk zone:</i>	3%
<i>Percentage of the site identified on the EA Historic Flood Map:</i>	0%
<i>Percentage of the site within 20m of an historic flood event:</i>	0%
<i>Percentage of the site within 20m of a detailed river network:</i>	2%
<i>All or part of the site within a Source Protection Zone:</i>	Yes
<i>Green Belt Considerations (from the GB Assessment/Review):</i>	<p>The Green Belt Assessment undertaken for Shropshire indicates that this site is considered within two Green Belt Parcels (P8 and P25). The assessment indicates that these parcels make no contribution against purposes 1a and 1b; perform weakly against purposes 2; make either no contribution and perform weakly against purpose 4; and perform either moderately or strongly against purpose 3. Within the Green Belt Review undertaken for Shropshire this site is considered within the two parcels and was also considered within opportunity area (J3-1).</p> <p>The review of the relevant parcels indicates that there would be either moderate-high or high harm to the Green Belt resulting from release. Release would lead to significant encroachment on the countryside; could affect the integrity of neighbouring Green Belt land; and would also lead to the creation of a new area inset into the Green Belt.</p> <p>The review of the relevant opportunity area indicates there would be high harm to the Green Belt resulting from release.</p>
<i>Landscape Considerations (Residential) (from the LVSS):</i>	Medium
<i>Landscape Considerations (Employment) (from the LVSS):</i>	Medium-High
<i>Visual Impact Considerations (Residential) (from the LVSS):</i>	Medium
<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium-High
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>The site is adjacent to the A41 immediately north of junction 3 of the M54 and the views of Highways England would need to be sought. This section of the A41 is subject to the national speed limit. The site controls sufficient land to facilitate new and/or improved access points onto the A41 together with appropriate speed limits and pedestrian crossing facilities.</p> <p>The site is adjacent to the A41 which has no pedestrian crossing facilities. An hourly bus service (891) operates along the A41 and Stanmore Lane between Shifnal (Telford) and Albrighton (Wolverhampton) but some parts of these sites would be 3.0km from the existing service route. The site is not linked to Albrighton or Shifnal by a continuous footway or cycle route.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
Highways Accessibility Rating (Out Of 24) (Based on Primary School, GP Surgery, Convenience Store & Public Transport Service):	
<i>Ecology Comments Significant Constraints:</i>	<p>Only reduced amounts of development possible as protection of Environmental Network (two water courses and south eastern tip unlikely to be fully possible in open space provision). Due to the large size of the proposed development area, HRA may be required for recreational impacts, particularly on Cannock Chase - this will need to be checked with NE. HRA may also require bespoke modelling for traffic emissions and water cycle.</p>
<i>Ecology Comments Other Constraints:</i>	<p>EclA required. Surveys for GCN (in ponds on site and within 500m), Dormice, Badgers (known records), Bats (records on site), nesting birds, vascular plants, reptiles, Otters, Water Voles and White-clawed Crayfish (many records along watercourse). Hedges, tree lines and water courses provide valuable ecological networks. Environmental Network crosses the site and lies adjacent to it.</p>

<i>Ecology Comments Management of Constraints:</i>	Protected species mitigation and enhancement. Retain and enhance all hedgerows/tree lines within the site and on boundaries. Retain mature trees in field. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12. Wooded corridors along the streams, including Church Pool, are to be retained, protected and buffered. Retain good quality habitat within the south-eastern tip. Maintenance of dark commuting routes, linked to water courses. Protection/mitigation for White-clawed crayfish if any drainage connections to the water courses. Pollution prevention including oil and silt interceptors.
<i>Ecology Comments Opportunities:</i>	Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12. Include major footpaths within connections. Provide a network of open space and green corridors connecting with the Env. Network and buffer the wooded banks of the streams to minimise recreational and other impacts.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Very large site that incorporates designated (GII Listed Buildings) and non-designated heritage assets (including those with archaeological interest). Site also in close proximity to the Boundary of the Tong Conservation Area which contains a further cluster of listed buildings (including 1 GI and 1 GII* LB), and site also has some potential to affect the setting of the Grade II* Registered Park and Garden and Conservation Area of Weston Park/Weston-under-Lizard. Substantial number of metal detectorists finds. Development will potentially directly and indirectly impact on the significance of a range of these assets.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on settings of LBs; impacts on non-designated parklands and historic landscape character; archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	Well designed development might offer opportunities to improve/ restore the non-designated parkland settings of some LBs. S106 agreements could be used to secure enhancements (including management, access and interpretation) for SMs and other heritage assets.
<i>Tree Comments Significant Constraints:</i>	TPO trees to rear of the Bell Inn / filling station.
<i>Tree Comments Other Constraints:</i>	Corridor of mature woodland runs north / south through site and block of woodland to southern corner. Connectivity to the south interrupted by M54. Numerous trees, groups of trees and hedgerows around and within site. Large water body and areas of mature woodland within south-eastern corner of site.
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 tree survey / constraints analysis. Arb Impact Assessment, Tree Protection Plan & Arb Method Statement. Ensure reasonable development stand-off from woodland. Development stand-offs required from the water and woodland habitats.
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to enhance tree cover in association with future development. Incorporate good trees and tree groups as part of open space within development and plan strategically for a network of connected green infrastructure. Extend woodland cover and create suitable buffer with built development. Look to connect to large block of woodland to the north / west of the site. Seek to expand woodland cover by new planting to extend and link existing woodland where suitable.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Possible land contamination where land has been previously developed. Noise and air quality concerns where the site adjoins the M54 and A41.
<i>Public Protection Comments Management of Constraints:</i>	Remediation likely to be available for contaminated land. Appropriate assessments will be necessary. Noise mitigation likely to be available. As a first option it is recommended that noise sensitive receptors (residential properties) are provided with sufficient distance from noise sources to avoid issues. Where this is not possible good design and layout including orientation and layout of development, glazing barriers including fencing and bunding, mechanical ventilation. Air quality concerns can be removed by ensuring there is appropriate distance between proposed residential properties and main roads.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Poor
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Poor
Relationship to the Black Country	Located in eastern Shropshire, an area with a functional relationship to the Black Country. Located on the A5 / M54 corridor from Shrewsbury to Wolverhampton and as such benefits from good links onto this corridor and into the Black Country. The site is in proximity of railway stations at Cosford, Albrighton and Shifnal, although all are separated from the site by the M54 corridor (it is noted that there are underpasses that could service such movements) and would likely require some other form of transport to access them (it is noted that the site promoters have proposed a number of mecnahsims to facilitate this, including a shuttle bus).
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	As a large potentially strategic site/settlement, it has capacity to accommodate a significant quantity of housing and employment, sufficient to contribute to the needs of both Shropshire and/or the Black Country.

<p>Strategic Considerations:</p>	<p>The site is sufficiently large that it could form a strategic settlement. The site is located on the M54/A5 strategic corridor. The site has been promoted for a strategic employment site of around 50ha or 75ha. The opportunity associated with this corridor is recognised within the Economic Growth Strategy for Shropshire and the M54 corridor study. The M54 corridor benefits from good access to transport infrastructure; its proximity to existing international businesses dominant in growth sectors such as advanced manufacturing and engineering; and proximity to higher education and training institutions including key assets such as RAF Cosford, Wolverhampton University and Harper Adams University. The sites location (proximity and connectivity to the Black Country) could mean that it is an appropriate location to meet cross-boundary needs arising in the Black Country. All or part of the site is located within a source protection zone. The site is located within the Green Belt. The review of the relevant parcels indicates that there would be either moderate-high and/or high harm to the Green Belt resulting from release, dependent on the extent of release - if the total site promoted were released it would result in high harm to the Green Belt. It is considered that the site controls sufficient land to provide an access onto the A41. There is also a need to consider pedestrian crossing facilities and speed limits. Furthermore, Highways England views will be required on the relationship between the site and Junction 3 of the M54 / the M54 itself. Services and facilities would need to be provided on the site to create a sustainable community. The site performs poorly for residential and employment within Stage 2a: Sustainability Appraisal in the context of potential strategic sites/settlements and the contribution to the Black Country. It is acknowledged that this in part relates to the fact that the site promotion includes land which is not proposed for development but to provide wider public benefit, this has informed overarching conclusions. It is also acknowledged that this rating is also in part as a result of the limited access to services and facilities, which could of course be provided on the site, this has also informed overarching conclusions. HRA will be required due to site size. Parts of the site are within an environmental network (two watercourses and the southern tip of the site). The site contains hedgerows, mature trees, wooded corridors, a large water body and blocks of woodland (some of these trees are subject to TPO protection). The site may also contain protected species and priority habitats. The site contains and/or is in proximity of many designated and non-designated heritage assets including listed buildings, scheduled monuments, a conservation area and a registered park. The site is also of archaeological interest and there is a need to consider non-designated parkland and historic landscape character. Elements of the site may be subject to contamination. Noise and air quality will need to be considered due to proximity to the M54 and A41.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Ensuring appropriate pedestrian and cycle links and connections to public transport. Ensuring necessary works to the highway network are undertaken (including achieving appropriate site accesses and improvements to Tern Hill roundabout). Provision of green infrastructure. Relevant supporting studies should be undertaken and their recommendations implemented. Infrastructure capacity assessment to identify key impacts and investment requirements. See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Formation of a 50ha/75ha strategic employment site and supported by a skills hub. Provision of appropriate supporting local services, facilities and infrastructure. Significant amount of Open Space. Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No</p>
<p>Recommendation</p>	<p>Retain as Green Belt</p>

Reasoning	<p>In weighing up the site specific considerations, both positive and negative, and giving consideration to the consultation responses on this matter, it is considered there is insufficient justification to progress an exceptional circumstances argument for the release of this land from the Green Belt.</p> <p>Whilst the sites size and location (proximity and connectivity to the Black Country) could mean that it is an appropriate location to meet cross-boundary needs arising in the Black Country, it is considered that there are other non-Green Belt locations/more appropriate locations to accommodate the proposed contributions to unmet needs forecast to arise within the Black Country.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications Required	No
If proposed for Allocation, Potential Capacity:	N/A
If proposed for Allocation Design Requirements:	N/A

Purpose 1 (checking the unrestricted sprawl of large built up areas - only applies to parcels adjacent to large built up areas);
 Purpose 2 (merging of neighbouring towns);
 Purpose 3 (regularising countryside from encroachment);
 Purpose 4 (preserving setting/character of historic towns); and
 Purpose 5 (assisting urban regeneration by encouraging re-use of brownfield land - applies consistently across all parcels).

*Green Belt Purposes (where applicable):

Site Assessment - Stage 3 Updated

Landscape Considerations (Employment) (from the LVSS):	Low and Medium High
Visual Impact Considerations (Residential) (from the LVSS):	Low and Medium
Visual Impact Considerations (Employment) (from the LVSS):	Low and Medium High
Highway Comments - Direct Access to Highway Network?	
Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?	
Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?	The sites lie either side of the A41, but primarily to the west. The section of the A41 is subject to a 40mph speed limit and existing development on either side of the A41 is served by a major traffic signal controlled junction. The sites control sufficient land to facilitate new and/or improved access points onto the A41. The sites are immediately south of junction 3 of the M54 and the views of Highways England would need to be sought.
Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?	If these sites were developed as a strategic settlement it is assumed that additional local services / facilities would be provided within a master plan that gave priority to sustainable modes of transport for local trips to these facilities. These sites already benefits from a convenience store. However, in the initial phases of the development it is likely that other facilities and services from outside the locality will need to be used. In these circumstances the nearest school is over 4.0km from the site in Albrighton to which school transport would be provided. The nearest GP is also in Albrighton and a similar distance away. The site is divided by the A41 which benefits from a controlled pedestrian crossing to cater for pedestrian movements across the A41. An hourly bus service (891) operates along the A41 between Telford and Wolverhampton but some parts of these sites would be 2.0km from the A41. The sites are linked to Albrighton by National Cycle Route 81.
Highway Comments - Could the Development Occur Without Off-Site Works?	
Highway Comments - Are Envisaged Off-Site Works Achievable?	
Highways Accessibility Rating (Out Of 24) (Based on Primary School, GP Surgery, Convenience Store & Public Transport Service):	
Ecology Comments Significant Constraints:	<p>Reduction in no. of houses due to presence of GCNs in ponds on site. Mitigation land will be required. Env Network crosses the site and lies immediately adjacent, particularly in the south and west. need to buffer, protect and enhance the Network may reduce the number of dwellings possible.</p> <p>Due to the large size of the proposed development area, HRA may be required for recreational impacts, particularly on Cannock Chase - this will need to be checked with NE. HRA may also require bespoke modelling for traffic emissions and water cycle.</p>
Ecology Comments Other Constraints:	EclA required. Surveys for GCN (known records for GCN on site and ponds within 500m), Badgers, Bats (presence recorded on site), nesting birds, vascular plants, reptile, otters, water vole, white clawed crayfish (recorded in stream at southern end of site). Partly within and adjacent to Env. Network. Priority habitats are likely to be present on site, particularly grasslands around buildings and runways and possibly on hangers. Full phase 2 botanical survey required to assess presence of priority habitat. General conclusion is based on little or no priority grassland being present.

<i>Ecology Comments Management of Constraints:</i>	Protected species mitigation and enhancement. Retain and enhance hedgerows/tree lines on boundaries. Retain mature trees on site. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12. Reduced numbers of housing as protection of Environmental Network and any priority habitat unlikely to be fully possible in open space provision. Protection of ponds and provision of mitigation land for GCN. Either protection of bat roosts or compensation roosts provided, together with maintenance of dark commuting routes. Protection/mitigation for White-clawed crayfish if any drainage connections to the southern water course.
<i>Ecology Comments Opportunities:</i>	Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12. Protect and enhance any priority habitat, particularly species-rich grassland if present. Provide a network of open space and green corridors connecting with the Env. Network and buffer the wooded banks of the stream to the south to minimise recreational and other impacts.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Site incorporates the majority of the expansion period airfield of RAF Cosford (HER PRN 08519), including the Grade II listed Fulton Building (NHLE ref. 1407287) and a range of other military buildings which are considered to be non-designated heritage assets.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on LBs and non-designated heritage assets [including their settings]).
<i>Heritage Comments Opportunities:</i>	Good quality, well planned and designed develop could better reveal and enhance the significance of the heritage assets on the site.
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	numerous trees and groups of woodland within developed area north of railway line. Trees within museum site and a linear belt of woodland at extreme south of site.
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 tree survey / constraints analysis. Arb Impact Assessment, Tree Protection Plan & Arb Method Statement. Ensure reasonable development stand-off from woodland.
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to enhance tree cover in association with future development. Incorporate good trees and tree groups as part of open space within development and plan strategically for a network of connected green infrastructure. Particular attention to size, number and location of dwellings in order to create sustainable juxtaposition of houses and trees. Extend woodland cover and create suitable buffer with built development.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Contaminated land due to past military land use. Noise from A41 (including a Noise Action Zone found on the boundary of the site) and railway. Possible odour sources close to site. E.g. sewage works to south of the site.
<i>Public Protection Comments Management of Constraints:</i>	Remediation likely to be available for contaminated land. Appropriate assessments will be necessary. Noise mitigation likely to be available. As a first option it is recommended that noise sensitive receptors (residential properties) are provided with sufficient distance from noise sources to avoid issues. Where this is not possible good design and layout including orientation and layout of development, glazing barriers including fencing and bunding, mechanical ventilation. Odour mitigation through separation distances to odour sources.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	<i>Fair</i>
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	<i>Fair</i>
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	<i>Fair</i>
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	<i>Fair</i>
Relationship to the Black Country	Located in eastern Shropshire, an area with a functional relationship to the Black Country. Located on the A5 / M54 corridor from Shrewsbury to Wolverhampton and as such benefits from good links onto this corridor and into the Black Country. The site contains the Cosford railway station and as such benefits from direct access to it.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Whilst a large site, it is already occupied by the Ministry of Defence and a range of other organisations including the Midland Air Ambulance and RAF Museum Cosford. Remaining land at the site is more limited in scope and directly associated with the future aspirations of the existing occupiers. As such, it is unlikely that this site would be suitable for accommodating all or part of the proposed contributions to the unmet needs of the Black Country.

<p>Strategic Considerations:</p>	<p>The site is sufficiently large that it could form a strategic site.</p> <p>RAF Cosford is located on the M54/A5 strategic corridor. The opportunity associated with this corridor is recognised within the Economic Growth Strategy for Shropshire and the M54 corridor study.</p> <p>RAF Cosford is a major part of the Defence College of Technical Training (DCTT). It has been identified as being at the centre of the RAF mission to deliver flexible, affordable, modern and effective technical training now and in the future. Cosford Air Museum has also outlined plans to intensify and expand the museum on the site.</p> <p>Whilst the sites location (proximity and connectivity to the Black Country) could mean that it is an appropriate location to meet cross-boundary needs arising in the Black Country, due to the range of existing occupiers and land uses and the known aspirations for the site from these occupiers, it is not considered that the site would be suitable for accommodating all or part of the proposed contributions to the unmet needs of the Black Country.</p> <p>It is a predominantly brownfield site.</p> <p>The site is located within a source protection zone, mainly zone 3, however small parts to the west of the site are located within zone 2.</p> <p>The site is located within the Green Belt. The review of the relevant parcels indicates that there would be either low or low-moderate harm to the Green Belt resulting from release. If the entirety of the site was released it would result in low-moderate harm to the Green Belt.</p> <p>Majority of the site is located within the low landscape and visual sensitivity area. Only a small portion of the site is medium landscape and visual sensitivity.</p> <p>Highways England views will be required on the relationship between the site and Junction 3 of the M54 / the M54 itself.</p> <p>Services and facilities are currently available on the site, these would need to be retained and/or enhanced to create a sustainable community.</p> <p>HRA will be required due to the large site size.</p> <p>An environmental network crosses and is immediately adjacent to the site.</p> <p>The site contains hedgerows and mature trees/wooded corridors. It also contains protected species (Great Crested Newts) and may contain priority habitats.</p> <p>The site contains listed buildings and non-designated heritage assets including expansion period airfield and military buildings.</p> <p>The site is likely to contain contaminated land associated with past military uses.</p> <p>Potential noise associated with the A41, railway and airfield.</p> <p>Possible odour sources in proximity to the site e.g. sewage works.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Upgrade of Cosford railway station facilities and parking.</p> <p>Necessary upgrades to highway services.</p> <p>Provision of green infrastructure.</p> <p>Any necessary decontamination of the site undertaken.</p> <p>Relevant supporting studies should be undertaken and their recommendations implemented.</p> <p>See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Existing sustainable site offering homes, employment and services and facilities. Potential to enhance these offers.</p> <p>Opportunity to upgrade Cosford railway station facilities and parking.</p> <p>Upgrades to highway services.</p> <p>Decontamination.</p> <p>Green infrastructure provision.</p> <p>Relevant supporting studies should be undertaken and their recommendations implemented.</p> <p>See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No</p>
<p>Recommendation</p>	<p>Continue to identify the built form of RAF Cosford as a major developed site within the Green Belt. Define the extent of the major developed site within the Green Belt as including part of CFD001, part of P28, part of P30 and part of P40.</p>

Reasoning	<p>This conclusion is responsive to the Interim Findings of the Planning Inspectors within document ID28. Within ID28 the Planning Inspectors concluded that exceptional circumstances do not exist for the release of RAF Cosford from the Green Belt. This was at least in part informed by the fact that this status has not prevented development in a manner consistent with its use as an RAF base or indeed related activities such as training facilities and domestic accommodation.</p> <p>Continued identification of RAF Cosford as a major developed site within the Green Belt will ensure that the sites Green Belt status is considered in a manner consistent with that currently undertaken. The aspirations of the existing sites occupiers that require new development will therefore be facilitated where they are able to demonstrate that very special circumstances exist for such development or occur within the Green Belt. When determining if very special circumstances exist within the extent of the RAF Cosford major developed site, positive consideration will be given to the sites predominantly brownfield nature and any contribution proposals make to the long-term sustainability of the complementary uses of the site.</p>
Further Main Modifications Required	<p>Yes: Draft Policy S21 and its explanation will need to be deleted. Other draft Policies and associated explanations (including SP11 and S1) will need to be amended to reflect the changed proposed status of RAF Cosford from a Strategic Site inset within the Green Belt to a major developed site within the Green Belt.</p>
If proposed for Allocation, Potential Capacity:	N/A
If proposed for Allocation Design Requirements:	N/A

Purpose 1 (checking the unrestricted sprawl of large built up areas - only applies to parcels adjacent to large built up areas);
 Purpose 2 (merging of neighbouring towns);
 Purpose 3 (regularising countryside from encroachment);
 Purpose 4 (preserving setting/character of historic towns); and
 Purpose 5 (assisting urban regeneration by encouraging re-use of brownfield land - applies consistently across all parcels).

Highway Comments - Could the Development Occur Without Off-Site Works?	
Highway Comments - Are Envisaged Off-Site Works Achievable?	
Highways Accessibility Rating (Out Of 24) (Based on Primary School, GP Surgery, Convenience Store & Public Transport Service):	
Ecology Comments Significant Constraints:	<p>Reduction in no. of houses due to presence of GCNs in ponds on site. Mitigation land will be required. Env Network crosses the site and lies immediately adjacent, particularly in the south and west. need to buffer, protect and enhance the Network may reduce the number of dwellings possible.</p> <p>Due to the large size of the proposed development area, HRA may be required for recreational impacts, particularly on Cannock Chase - this will need to be checked with NE. HRA may also require bespoke modelling for traffic emissions and water cycle.</p>
Ecology Comments Other Constraints:	EclA required. Surveys for GCN (known records for GCN on site and ponds within 500m), Badgers, Bats (presence recorded on site), nesting birds, vascular plants, reptile, otters, water vole, white clawed crayfish (recorded in stream at southern end of site). Partly within and adjacent to Env. Network. Priority habitats are likely to be present on site, particularly grasslands around buildings and runways and possibly on hangers. Full phase 2 botanical survey required to assess presence of priority habitat. General conclusion is based on little or no priority grassland being present.

<i>Ecology Comments Management of Constraints:</i>	Protected species mitigation and enhancement. Retain and enhance hedgerows/tree lines on boundaries. Retain mature trees on site. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12. Reduced numbers of housing as protection of Environmental Network and any priority habitat unlikely to be fully possible in open space provision. Protection of ponds and provision of mitigation land for GCN. Either protection of bat roosts or compensation roosts provided, together with maintenance of dark commuting routes. Protection/mitigation for White-clawed crayfish if any drainage connections to the southern water course.
<i>Ecology Comments Opportunities:</i>	Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12. Protect and enhance any priority habitat, particularly species-rich grassland if present. Provide a network of open space and green corridors connecting with the Env. Network and buffer the wooded banks of the stream to the south to minimise recreational and other impacts.
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Site incorporates the majority of the expansion period airfield of RAF Cosford (HER PRN 08519), including the Grade II listed Fulton Building (NHLE ref. 1407287) and a range of other military buildings which are considered to be non-designated heritage assets.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on LBs and non-designated heritage assets [including their settings]).
<i>Heritage Comments Opportunities:</i>	Good quality, well planned and designed develop could better reveal and enhance the significance of the heritage assets on the site.
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	numerous trees and groups of woodland within developed area north of railway line. Trees within museum site and a linear belt of woodland at extreme south of site.
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 tree survey / constraints analysis. Arb Impact Assessment, Tree Protection Plan & Arb Method Statement. Ensure reasonable development stand-off from woodland.
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to enhance tree cover in association with future development. Incorporate good trees and tree groups as part of open space within development and plan strategically for a network of connected green infrastructure. Particular attention to size, number and location of dwellings in order to create sustainable juxtaposition of houses and trees. Extend woodland cover and create suitable buffer with built development - particularly alongside the railway line and in connection with the block of mixed woodland to the north west of CFD001.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Contaminated land due to past military land use. Noise from A41 (including a Noise Action Zone found on the boundary of the site) and railway. Possible odour sources close to site. E.g. sewage works to south of the site.
<i>Public Protection Comments Management of Constraints:</i>	Remediation likely to be available for contaminated land. Appropriate assessments will be necessary. Noise mitigation likely to be available. As a first option it is recommended that noise sensitive receptors (residential properties) are provided with sufficient distance from noise sources to avoid issues. Where this is not possible good design and layout including orientation and layout of development, glazing barriers including fencing and bunding, mechanical ventilation. Odour mitigation through separation distances to odour sources.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	<i>Fair</i>
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	<i>Fair</i>
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	<i>Fair</i>
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	<i>Fair</i>
Relationship to the Black Country	Located in eastern Shropshire, an area with a functional relationship to the Black Country. Located on the A5 / M54 corridor from Shrewsbury to Wolverhampton and as such benefits from good links onto this corridor and into the Black Country. The site contains the Cosford railway station and as such benefits from direct access to it.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	Whilst a large site, it is already occupied by the Ministry of Defence and a range of other organisations including the Midland Air Ambulance and RAF Museum Cosford. Remaining land at the site is more limited in scope and directly associated with the future aspirations of the existing occupiers. As such, it is unlikely that this site would be suitable for accommodating all or part of the proposed contributions to the unmet needs of the Black Country.

<p>Strategic Considerations:</p>	<p>The site is sufficiently large that it could form a strategic site.</p> <p>This site consists of RAF Cosford and part of an agricultural field located to the north-west of the site, promoted for a new headquarters for the Midlands Air Ambulance Charity (MAAC) one of the current occupiers of the RAF Cosford site.</p> <p>RAF Cosford is located on the M54/A5 strategic corridor. The opportunity associated with this corridor is recognised within the Economic Growth Strategy for Shropshire and the M54 corridor study.</p> <p>RAF Cosford is a major part of the Defence College of Technical Training (DCTT). It has been identified as being at the centre of the RAF mission to deliver flexible, affordable, modern and effective technical training now and in the future. Cosford Air Museum has also outlined plans to intensify and expand the museum on the site. The MAAC require a new headquarters in order to combine two of their existing airbases (one of which is located at RAF Cosford) and integrate supporting and ancillary services.</p> <p>Whilst the sites location (proximity and connectivity to the Black Country) could mean that it is an appropriate location to meet cross-boundary needs arising in the Black Country, due to the range of existing occupiers and land uses and the known aspirations for the site from these occupiers, it is not considered that the site would be suitable for accommodating all or part of the proposed contributions to the unmet needs of the Black Country.</p> <p>It is a predominantly brownfield site. The area of the site identified as a potential location for the new MAAC headquarters is a greenfield site.</p> <p>The site is located within a source protection zone, mainly zone 3, however small parts to the west of the site are located within zone 2.</p> <p>The site is located within the Green Belt.</p> <p>The review of the relevant parcels indicates that the release of the existing RAF Cosford site would have either low or low-moderate harm to the Green Belt. If the entirety of the existing RAF Cosford site was released it would result in low-moderate harm to the Green Belt.</p> <p>The review of the relevant parcels indicates that the release of the MAAC element of the site would have moderate-high harm to the Green Belt.</p> <p>The majority of existing RAF Cosford Site (including the entirety of the existing site proposed for release from the Green Belt as part of the RAF Cosford Strategic Site) has low landscape and visual sensitivity to housing and employment development. The MAAC element of the RAF Cosford Strategic Site has medium-high landscape sensitivity to housing and employment and medium visual sensitivity to housing and employment.</p> <p>Highways England views will be required on the relationship between the site and Junction 3 of the M54 / the M54 itself.</p> <p>Services and facilities are currently available on the site, these would need to be retained and/or enhanced to create a sustainable community.</p> <p>HRA will be required due to the large site size.</p> <p>An environmental network crosses and is immediately adjacent to the site.</p> <p>The site contains hedgerows and mature trees/wooded corridors. It also contains protected species (Great Crested Newts) and may contain priority habitats.</p> <p>The site contains listed buildings and non-designated heritage assets including expansion period airfield and military buildings.</p> <p>The site is likely to contain contaminated land associated with past military uses.</p> <p>The site is likely to be impacted in parts by security requirements.</p> <p>Potential noise associated with the A41, railway and airfield.</p> <p>Possible odour sources in proximity to the site e.g. sewage works.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Upgrade of Cosford railway station facilities and parking.</p> <p>Necessary upgrades to highway services.</p> <p>Provision of green infrastructure.</p> <p>Any necessary decontamination of the site undertaken.</p> <p>Relevant supporting studies should be undertaken and their recommendations implemented.</p> <p>See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Existing sustainable site offering homes, employment and services and facilities. Potential to enhance these offers.</p> <p>Opportunity to upgrade Cosford railway station facilities and parking.</p> <p>Upgrades to highway services.</p> <p>Decontamination.</p> <p>Green infrastructure provision.</p> <p>Relevant supporting studies should be undertaken and their recommendations implemented.</p> <p>See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No</p>
<p>Recommendation</p>	<p>Continue to identify the built form of RAF Cosford as a major developed site within the Green Belt. Define the extent of the major developed site within the Green Belt as including part of CFD001, part of P28, part of P30 and part of P40.</p>

Reasoning	<p>This conclusion is responsive to the Interim Findings of the Planning Inspectors within document ID28. Within ID28 the Planning Inspectors concluded that exceptional circumstances do not exist for the release of RAF Cosford from the Green Belt. This was at least in part informed by the fact that this status has not prevented development in a manner consistent with its use as an RAF base or indeed related activities such as training facilities and domestic accommodation.</p> <p>Continued identification of RAF Cosford as a major developed site within the Green Belt will ensure that the sites Green Belt status is considered in a manner consistent with that currently undertaken. The aspirations of the existing sites occupiers that require new development will therefore be facilitated where they are able to demonstrate that very special circumstances exist for such development or occur within the Green Belt. When determining if very special circumstances exist within the extent of the RAF Cosford major developed site, positive consideration will be given to the sites predominantly brownfield nature and any contribution proposals make to the long-term sustainability of the complementary uses of the site.</p>
Further Main Modifications Required	<p>Yes: Draft Policy S21 and its explanation will need to be deleted. Other draft Policies and associated explanations (including SP11 and S1) will need to be amended to reflect the changed proposed status of RAF Cosford from a Strategic Site inset within the Green Belt to a major developed site within the Green Belt.</p>
If proposed for Allocation, Potential Capacity:	N/A
If proposed for Allocation Design Requirements:	N/A

Purpose 1 (checking the unrestricted sprawl of large built up areas - only applies to parcels adjacent to large built up areas);
 Purpose 2 (merging of neighbouring towns);
 Purpose 3 (regularising countryside from encroachment);
 Purpose 4 (preserving setting/character of historic towns); and
 Purpose 5 (assisting urban regeneration by encouraging re-use of brownfield land - applies consistently across all parcels).

*Green Belt Purposes (where applicable):

Site Assessment - Stage 3 Updated	
Site Reference:	IRN001
<i>Coal Authority Reference Area?</i>	Yes
<i>Mineral Safeguarding Area?</i>	Yes
<i>Wholly or Partly Grade 1, 2 and/or 3 Agricultural Land Quality:</i>	Yes
<i>Percentage of site in Flood Zone 3:</i>	12%
<i>Percentage of site in Flood Zone 2:</i>	16%
<i>Percentage of site in Flood Zone 1:</i>	84%
<i>Percentage of the site in the 30 year surface flood risk zone:</i>	2%
<i>Percentage of the site in the 100 year surface flood risk zone:</i>	3%
<i>Percentage of the site in the 1,000 year surface flood risk zone:</i>	8%
<i>Percentage of the site identified on the EA Historic Flood Map:</i>	12%
<i>Percentage of the site within 20m of an historic flood event:</i>	0%
<i>Percentage of the site within 20m of a detailed river network:</i>	3%
<i>All or part of the site within a Source Protection Zone:</i>	No
<i>Green Belt Considerations (from the GB Assessment/Review):</i>	The site is not located within the Green Belt.
<i>Landscape Considerations (Residential) (from the LVSS):</i>	Low, Medium and Medium-High
<i>Landscape Considerations (Employment) (from the LVSS):</i>	Low, Medium and Medium-High
<i>Visual Impact Considerations (Residential) (from the LVSS):</i>	Low, Medium-Low and Medium-High
<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Low, Medium and High
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>The site has two existing highway access points. A simple priority junctions onto the A4169 Wenlock Road and a simple priority junction with acceleration and deceleration lanes onto the Buildwas Road. These junction may need to be upgraded to Ghost Island right turn and/or roundabout junctions. The site appears to include land that would enable these improvements to be delivered if needed. The site also has frontage onto the A4169 south of the existing junction opposite Hill view Farm.</p> <p>If developed as a strategic site it is assumed that local services / facilities would be provided within a master plan that gave priority to sustainable modes of transport for local trips to these facilities.</p> <p>However, in the initial phases of the development it is likely that facilities and services from outside the locality will need to be used. In these circumstances the nearest schools is in Buildwas less than 2km from the centre of the site and are linked by a continuous footway. The nearest convenience store and GP is in Coalbrookdale are approximately 1.7km from the centre of the site and are linked by a continuous footway.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
Highways Accessibility Rating (Out Of 24) (Based on Primary School, GP Surgery, Convenience Store & Public Transport Service):	
<i>Ecology Comments Significant Constraints:</i>	<p>Buildwas Sand Quarry SSSI and Local Geological Site is partly on the site.</p> <p>Adjacent to Tick Wood and Benthall Edge SSSI and Ancient Woodland.</p> <p>Adjacent to River Severn Local Wildlife Site.</p> <p>Protection of these sites and priority habitats will reduce the developable area available.</p> <p>May trigger Natural England's SSSI IRZ.</p>
<i>Ecology Comments Other Constraints:</i>	<p>This site supports a large population of GCNs, a number of bat roosts and priority habitats. There are a number of Env. Network corridors on the site.</p> <p>Requires botanical survey, Kecia and surveys for bats, GCNs (ponds within 500m), badgers, reptiles, otters, water voles, white-clawed crayfish and nesting birds.</p> <p>PROWs cross the site.</p>

<i>Ecology Comments Management of Constraints:</i>	Priority habitats must not be developed. Protected and priority species and habitats mitigation and enhancement, retain and enhance mature trees/hedgerows/tree lines. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	Habitats could potentially be restored as priority habitat .
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Site adjacent to boundary, and within settings, of Ironbridge Gorge World Heritage Site (NHLE ref. 1000090) and The Gorge Conservation Area. Also has potential to affect settings of the Scheduled Monument of Buildwas Abbey (NHLE ref. 1015813) and possibly also a range of listed buildings within the wider vicinity of the site. Grade II listed Albert Edward railway bridge (NHLE ref. 1054151) on site boundary, Buildings and structures associated with the Ironbridge A interwar power station (HER PRN 06710) will be retained on site.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on settings of designated heritage assets including WHS; Level 2 recording of historic buildings recording of retained structures from Ironbridge A). Site master planning with high quality design approach that addresses sites relationship with designated heritage assets around it necessary. Redevelopment should also adaptively reuse retained structures from Ironbridge A.
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	abuts ancient woodland to south
<i>Tree Comments Other Constraints:</i>	numerous belts of trees and areas of woodland within site
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 tree survey / constraints analysis. Arb Impact Assessment, Tree Protection Plan & Arb Method Statement. Particular attention to size, number and location of dwellings in order to create sustainable juxtaposition of houses and trees. Development stand-off from woodland around the site
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover policy to enhance tree cover in association with future development. Incorporate internal trees and woodland in open space and plant to connect to / expand adjoining wooded areas.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Con land noise.
<i>Public Protection Comments Management of Constraints:</i>	Remediation available.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Poor
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Poor
Relationship to the Black Country	Located in eastern Shropshire, an area with a functional relationship to the Black Country. The site is located on the A4169 which links to the A5 / M54 corridor and the A458 corridor. However, the site is some distance from these corridors. Nearest railway stations providing direct links to the Black Country is at Telford and Wellington and would likely require some other form of transport to access them (it is noted that the site contains a former railway station and active investigations are ongoing regarding establishing a passenger service).
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	As a large potentially strategic site/settlement, it has capacity to accommodate a significant quantity of housing and employment, sufficient to contribute to the needs of both Shropshire and/or the Black Country.

<p>Strategic Considerations:</p>	<p>The site consists of the Former Ironbridge Power Station site and greenfield land located to the west of the Power Station. Ironbridge Power Station closed in 2017. The site contains a large area of brownfield land, some of which is heavily contaminated. It is understood that the former quarry located to the east of the site is no longer promoted as part of the site.</p> <p>Outline Planning Permission has been granted for the formation of a new strategic settlement on the site. Reserved Matters Applications for first phases have subsequently been received.</p> <p>The Former Ironbridge Power Station is located in close proximity to the village of Buildwas.</p> <p>The Economic Growth Strategy for Shropshire identifies the opportunity to "capitalise on opportunities arising from the redevelopment of the former Ironbridge Power Station".</p> <p>The site is sufficiently large that it could form a strategic settlement.</p> <p>Whilst the site does not directly adjoin the A5 / M54 or A458 strategic corridors it is connected to them by an A road (A4169). There is also an opportunity to provide railway links to Telford, which would allow onward connections to the Black Country and even without this Telford station is accessible via A roads. As such, given the sites location (proximity to the Black Country) and connectivity it could be an appropriate location to meet cross-boundary needs arising in the Black Country.</p> <p>Elements of the site are located within flood zones 2 and/or 3 and within the 1,000 year surface flood risk zone. Some of the site is also located within an area identified on the EA Historic Flood Map.</p> <p>Part of the site is located within an area of high visual sensitivity for employment uses.</p> <p>Existing access points may need to be upgraded to Ghost Island right turn and/or roundabout junctions. It is considered that the site includes sufficient land to achieve this.</p> <p>Services and facilities would need to be provided on the site to create a sustainable community.</p> <p>The site performs poorly for residential and employment both within the context of a potential strategic site/settlement and the Black Country Contribution, within Stage 2a of the Sustainability Appraisal.</p> <p>The site contains a SSSI and RIG. It contains also numerous belts of trees and areas of woodland and is in proximity of a SSSI, ancient woodland and a Local Wildlife Site.</p> <p>There are a number of environmental network corridors on the site. The site also contains priority habitats and species (including Great Crested Newts and bat roosts).</p> <p>The site) particularly the greenfield element) is in proximity of the Shropshire Hills AONB.</p> <p>The site contains listed buildings and other buildings considered non-designated heritage assets.</p> <p>The site is within the setting of the Ironbridge Gorge World Heritage Site and the Gorge Conservation Area. It is also in proximity of a scheduled monument and listed buildings.</p> <p>The site contains contaminated land.</p> <p>The retained National Grid and Western Power Distribution substations.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Ensuring future occupiers have appropriate access to services and facilities and employment opportunities.</p> <p>Provision of a new nursery, primary school and community facilities/buildings.</p> <p>Need to retain the National Grid and Western Power Distribution substations and utilities infrastructure over and under the site.</p> <p>Necessary decontamination of the site undertaken.</p> <p>Necessary works to the highway network undertaken.</p> <p>Provision of green infrastructure.</p> <p>Relevant supporting studies should be undertaken and their recommendations implemented.</p> <p>See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Opportunity to provide a railway station and re-use the existing rail link from the site.</p> <p>Opportunity to provide enhancements to the leisure offer and support the visitor economy (including linking to uses on the River).</p> <p>Provision of a park and ride facility.</p> <p>Provision of new medical facilities.</p> <p>Decontamination.</p> <p>Green infrastructure provision.</p> <p>Relevant supporting studies should be undertaken and their recommendations implemented.</p> <p>See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>Yes</p>
<p>Recommendation</p>	<p>Majority of the Site is allocated as a new Strategic Settlement.</p> <p>Site to meet needs arising in Shropshire and provide 600 dwellings as part of the proposed contribution to the unmet housing need forecast to arise within the Black Country.</p>

Reasoning	<p>Much of the site is vacant and brownfield land. Extensive areas of this brownfield land is also subject to contamination. The Economic Growth Strategy for Shropshire and the current Local Plan (Core Strategy) identified the opportunity to capitalise on the significant strategic opportunity arising from the redevelopment of the Former Ironbridge Power Station site.</p> <p>Whilst the site does not directly adjoin the A5 / M54 or A458 strategic corridors it is connected to them by an A road (A4169). There is also an opportunity to provide railway links to Telford, which would allow onward connections to the Black Country and even without this Telford station is accessible via A roads. As such, given the sites location (proximity to the Black Country), connectivity, scale and status it would be an appropriate location to meet a component of the cross-boundary needs arising in the Black Country.</p> <p>Development of the site would be considered to constitute sustainable development, informed by careful consideration of identified opportunities and constraints (including the fact that it is not located within the Green Belt).</p> <p>Outline Planning Permission has been granted for the formation of a new strategic settlement on the site. Reserved Matters Applications for first phases have subsequently been received. The mixed-use redevelopment of the Former Ironbridge Power Station site presents an opportunity to support the local economy, create jobs, provide housing to meet needs arising in Shropshire and accommodate 600 houses as part of the proposed contribution to the unmet housing need forecast to be arise within the Black Country. It also provides the opportunity to sympathetically remediate the site and as such represents a sustainable option for its future use.</p> <p>It is therefore considered appropriate to identify the Former Ironbridge Power Station site (apart from the former quarry area which it is understood no longer forms part of the site and will creaste a buffer to Buildwas Abbey) as a strategic settlement, the redevelopment of which will contribute to meeting the development needs of Shropshire and accommodate 600 dwellings of the proposed contribution to the unmet housing need forecast to arise within the Black Country.</p> <p>Accommodating part of the proposed contribution to the Black Country on this site will contribute to the achievement of the wider spatial strategy for Shropshire.</p>
Further Main Modifications Required	<p style="text-align: center;">Yes:</p> <p>Draft Policies SP2 and S20 to be amended to reflect the fact that 600 of the dwellings proposed on the site form part of the proposed contribution towards the unmet housing needs forecast to arise within the Black Country.</p>
If proposed for Allocation, Potential Capacity:	<p>Formation of a new settlement through a comprehensive mixed-use redevelopment of the site to provide a range of local services and facilities, around 1,000 dwellings, around 6ha of employment land and extensive green infrastructure. Of these 1,000 dwellings, 600 dwellings form part of the proposed contribution towards the unmet housing needs forecast to arise within the Black Country.</p>
If proposed for Allocation Design Requirements:	<p>a. The quantity, quality, design, mix and layout of housing provided on the site will be informed by site constraints and opportunities, identified local needs and relevant policies of this Local Plan.</p> <p>b. Employment provision will represent an intrinsic element of the site’s redevelopment, occurring alongside the provision of housing. Employment provision will be of an appropriate quantity and quality to contribute towards the objectives of the Shropshire Economic Growth Strategy.</p> <p>c. The village centre will comprise of an appropriate range of commercial uses to serve the new settlements community. As the local centre will ensure future occupiers of the site benefit from access to local facilities, its timely provision is an important consideration and will be directly linked to provision of housing on the site.</p> <p>d. Green infrastructure provision will be of an appropriate quantity and quality. Its location will protect and enhance key green infrastructure corridors and networks on and around the site and existing areas of public open space. Existing playing fields should be retained.</p> <p>e. Appropriate community facilities and buildings will be provided on the site, such as a community hall, art gallery and heritage centre. 2ha of land will be provided for a primary school to serve the needs of the new community on the site. If required by the relevant CCGs, a medical centre will also be provided on the site. These facilities and buildings will tap-into the heritage of the site.</p> <p>f. A suitable number of appropriately designed and constructed pedestrian, cycle and vehicular access/egress points will be provided. If current access/egress points to the site are retained, they may need to be upgraded to ghost island right turn and/or roundabout junctions, as determined through appropriate modelling and engagement.</p> <p>g. Appropriate pedestrian and cycle links will be provided to and through the site, particularly to the proposed nursery, primary school and village centre.</p> <p>h. Site design and layout will be high-quality, reflecting and respecting the sites proximity to the Shropshire Hills Area of Outstanding Natural Beauty and minimising landscape and visual impact. This is particularly important to the development of the greenfield elements of the site.</p> <p>i. The high-quality design and layout of the site will also reflect and respect the sites heritage, heritage assets on the site and its relationship with heritage assets within the wider area, including the Ironbridge Gorge World Heritage site, Buildwas Abbey Scheduled Monument, the Severn Gorge Conservation Area and Listed Buildings.</p> <p>j. The Grade II listed Albert Edward railway bridge on the sites boundary and buildings and structures associated with the Ironbridge A interwar power station will be sympathetically retained, enhanced/maintained and adaptively reused.</p> <p>k. Natural environment assets on and in proximity of the site, including Buildwas Sand Quarry Site of Special Scientific Interest (SSSI), Local Wildlife Site and Local Geological Site, Buildwas River Section SSSI, Tick Wood and Benthall Edge SSSI, three areas of ancient woodland, other Local Wildlife Sites and any priority habitats will be retained and appropriately buffered. A sustainable juxtaposition will be created between built form and trees.</p> <p>l. Acoustic design, layout and appropriate building materials (including where necessary appropriate glazing, ventilation and acoustic barriers) will be used to appropriately manage noise associated with retained National Grid and Western Power Distribution substations and equipment and nearby roads.</p> <p>m. A sustainable juxtaposition will be created between built form and trees. Where possible trees and woodland should be incorporated into areas of open space and planting should occur to connect to / expand adjoining wooded areas.</p> <p>n. The site supports a large population of Great Crested Newts; bat roosts and is likely home to other protected species. Appropriate assessment and provision on the site will be required for these species.</p> <p>o. Any contaminated land on the site will be appropriately managed.</p> <p>p. Mineral extraction opportunities associated with the site will be investigated and where appropriate extraction works undertaken.</p> <p>q. The site will incorporate appropriate sustainable drainage, informed by a sustainable drainage strategy. Any residual surface water flood risk will be managed by excluding development from the affected areas of the site, which will form part of the Green Infrastructure network. Development will also be excluded from the small portions of the site located in Flood Zones 2 and/or 3. Flood and water management measures must not displace water elsewhere.</p>

Site Assessment - Stage 3 Updated	
Site Reference:	Madeley
<i>Coal Authority Reference Area?</i>	No
<i>Mineral Safeguarding Area?</i>	No
<i>Wholly or Partly Grade 1, 2 and/or 3 Agricultural Land Quality:</i>	Yes

<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	N
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	Mitigation works are likely to be required, depending on the scale of development. Consideration should also be given to the sustainability of the site and connectivity with adjacent settlements.
Highways Accessibility Rating (Out Of 24) (Based on Primary School, GP Surgery, Convenience Store & Public Transport Service):	
<i>Ecology Comments Significant Constraints:</i>	The woodland (and ponds) should be retained and appropriately buffered. A buffer of at least 50m will be required for any ponds that contain GCNs, reducing the developable area available.
<i>Ecology Comments Other Constraints:</i>	EclA and botanical survey required and surveys for badgers, bats, nesting birds, GCNs and reptiles

<i>Ecology Comments Management of Constraints:</i>	Protected and priority species and habitats mitigation and enhancements. Protect, enhance and restore Env. Network in accordance with CS17 and MD12.
<i>Ecology Comments Opportunities:</i>	Enhance Env. Network
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Site includes historic farmstead of Sutton Hill (HER PRN 26358). No known archaeological interest but large size suggests it may have archaeological potential.
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on Sutton Hill, including the setting of the farmhouse; archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	
<i>Tree Comments Other Constraints:</i>	Patchy network of hedgerows and field trees within site. Block of mature plantation to northern boundary that connects to T&WC woodland extending northwards.
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 tree survey / constraints analysis. Arboricultural Impact Assessment, Tree Protection Plan & Arboricultural Method Statement
<i>Tree Comments Opportunities:</i>	Use 20% canopy cover approach to enhance tree cover in association with future development. Incorporate good trees as part of open space within development and plan strategically for a network of connected green infrastructure. Extend woodland cover and create suitable buffer with built development. Look to connect to large block of woodland to the north of the site.
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	A442 Road noise.
<i>Public Protection Comments Management of Constraints:</i>	Noise assessment and ProPG design.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Good
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Fair
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Good
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	Located in eastern Shropshire, an area with a functional relationship to the Black Country. The site is located on the A442 which links to the A5 / M54 corridor and the A458 / A454 corridors. However, the site is some distance from these corridors. Nearest railway station providing direct links to the Black country is at Telford and would likely require some other form of transport to access them.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	As a large potentially strategic site/settlement, it has capacity to accommodate a significant quantity of housing and employment, sufficient to contribute to the needs of both Shropshire and/or the Black Country.

<p>Strategic Considerations:</p>	<p>The site lies adjacent to the built form of Telford.</p> <p>The site is sufficiently large that it could form a strategic site.</p> <p>Whilst the site does not directly adjoin the A5 / M54, A458 or A454 strategic corridors it is connected to them by an A road (A442). Telford railway station is also accessible via A roads. As such, given the sites location (proximity to the Black Country) and connectivity it could be an appropriate location to meet cross-boundary needs arising in the Black Country.</p> <p>The site is located within the Green Belt and performs an important role against purpose 1, checking the unrestricted sprawl of large built-up areas.</p> <p>Site includes the historic farmstead of Sutton Hill and may have archaeological potential.</p> <p>Development of the site would likely require off-site highway works/mitigation, depending on the scale of development.</p> <p>The site contains woodland and ponds. The site may also contains priority habitats and/or protected species.</p> <p>The site contains a patchy network of hedgerows and field trees. The block of mature plantation to the sites northern boundary connects to woodland extending northwards.</p> <p>Noise associated with the A442 requires due consideration and mitigation.</p> <p>Consideration should also be given to the sustainability of the site and connectivity with adjacent settlements.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Necessary improvements to the highway network.</p> <p>Provision of green infrastructure.</p> <p>Relevant supporting studies should be undertaken and their recommendations implemented.</p> <p>See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Relevant supporting studies should be undertaken and their recommendations implemented.</p> <p>See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No</p>
<p>Recommendation</p>	<p>Retain as Green Belt</p>

Reasoning	<p>Whilst the sites size and location (proximity and connectivity to the Black Country) could mean that it is an appropriate location to meet cross-boundary needs arising in the Black Country, it is considered that there are other non-Green Belt locations/more appropriate locations to accommodate the proposed contributions to unmet needs forecast to arise within the Black Country.</p> <p>The site lies adjacent to the built form of Telford.</p> <p>The site is located within the Green Belt and performs an important role against purpose 1, checking the unrestricted sprawl of large built-up areas. As such it is considered important to retention the site within the Green Belt.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications Required	No
If proposed for Allocation, Potential Capacity:	N/A
If proposed for Allocation Design Requirements:	N/A

Purpose 1 (checking the unrestricted sprawl of large built up areas - only applies to parcels adjacent to large built up areas);

Purpose 2 (merging of neighbouring towns);

Purpose 3 (regularising countryside from encroachment);

Purpose 4 (preserving setting/character of historic towns); and

Purpose 5 (assisting urban regeneration by encouraging re-use of brownfield land - applies consistently across all parcels).

*Green Belt Purposes (where applicable):

Site Assessment - Stage 3 Updated	
Site Reference:	SHF024
<i>Coal Authority Reference Area?</i>	Yes
<i>Mineral Safeguarding Area?</i>	Yes
<i>Wholly or Partly Grade 1, 2 and/or 3 Agricultural Land Quality:</i>	Yes
<i>Percentage of site in Flood Zone 3:</i>	0%
<i>Percentage of site in Flood Zone 2:</i>	0%
<i>Percentage of site in Flood Zone 1:</i>	100%
<i>Percentage of the site in the 30 year surface flood risk zone:</i>	1%
<i>Percentage of the site in the 100 year surface flood risk zone:</i>	2%
<i>Percentage of the site in the 1,000 year surface flood risk zone:</i>	6%
<i>Percentage of the site identified on the EA Historic Flood Map:</i>	0%
<i>Percentage of the site within 20m of an historic flood event:</i>	0%
<i>Percentage of the site within 20m of a detailed river network:</i>	4%
<i>All or part of the site within a Source Protection Zone:</i>	No
<i>Green Belt Considerations (from the GB Assessment/Review):</i>	<p>The Green Belt Assessment undertaken for Shropshire indicates that this site is located within a Green Belt parcel which perform strongly against purposes 1a and 2; perform moderately against purposes 1b and 3; and perform weakly against purpose 4. The Green Belt Review undertaken for Shropshire indicates that this Green Belt parcel, if released for development would have a high level of harm to the Green Belt.</p> <p>The Green Belt Review also considers this parcel within opportunity area (J4-1). The review of the relevant opportunity area indicates that there would be high harm to the Green Belt resulting from release.</p>
<i>Landscape Considerations (Residential) (from the LVSS):</i>	Medium
<i>Landscape Considerations (Employment) (from the LVSS):</i>	Medium-High
<i>Visual Impact Considerations (Residential) (from the LVSS):</i>	Medium
<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Medium-High
<i>Highway Comments - Direct Access to Highway Network?</i>	Y
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	A464 & Priorslee Road
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	Y
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	Preferred access option would be to replace the existing service area roundabout on Priorslee road with a new roundabout junction that also served SHF024.
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	Y
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
Highways Accessibility Rating (Out Of 24) (Based on Primary School, GP Surgery, Convenience Store & Public Transport Service):	N/A
<i>Ecology Comments Significant Constraints:</i>	HRA may be required for any employment use that generates airborne pollution or road traffic including HGVs. Detailed emissions modelling would be required due to proximity of designated wildlife sites. See LPR HRA.
<i>Ecology Comments Other Constraints:</i>	<p>There is a patch of priority habitat woodland on the site that is TPO'd and within the Env. Network. This area should be retained and appropriately buffered. The eastern and southern boundaries form Env. Network corridors. There is a pond within the woodland and many others within 500m</p> <p>Requires additional surveys for bats, GCN (ponds within 500m), badgers and nesting birds.</p>

<i>Ecology Comments Management of Constraints:</i>	Protected and priority species and habitats mitigation and enhancement, retain and enhance mature trees/hedgerows/tree lines and protect adjacent priority habitats. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	No known archaeological interest but site is of a large size, so may have some archaeological potential
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (archaeological DBA + field evaluation).
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	block of mature TPO woodland to centre western side of site
<i>Tree Comments Other Constraints:</i>	hedgerows within and around site
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 tree survey / constraints analysis. Arb Impact Assessment, Tree Protection Plan & Arb Method Statement
<i>Tree Comments Opportunities:</i>	utilise and perhaps extend blocks of existing woodland to screen development and provide useable amenity space for employees. Create 15m development stand-off with the existing and any future woodland
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Landfill within 250 to the east.
<i>Public Protection Comments Management of Constraints:</i>	Contaminated land remediation likely to be available.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Poor
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Poor
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	Located in eastern Shropshire, an area with a functional relationship to the Black Country. Located on the A5 / M54 corridor from Shrewsbury to Wolverhampton and as such benefits from good links onto this corridor and into the Black Country. The site is in proximity of railway station at Telford.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	As a large potentially strategic site/settlement, it has capacity to accommodate a significant quantity of housing and employment, sufficient to contribute to the needs of both Shropshire and/or the Black Country.

<p>Strategic Considerations:</p>	<p>The site lies adjacent to the built form of Telford. The site is sufficiently large that it could form a strategic site. The site is located within the Green Belt and forms an important component of the gap between the settlements of Telford and Shifnal. The review of the relevant parcels indicates that there would be high harm to the Green Belt resulting from release of this site. The site is located on the M54/A5 strategic corridor. The opportunity associated with this corridor is recognised within the Economic Growth Strategy for Shropshire and the M54 corridor study. Telford railway station is also in close proximity. As such, given the sites location (proximity to the Black Country) and connectivity it could be an appropriate location to meet cross-boundary needs arising in the Black Country. A HRA may be required for employment uses that generate airborne pollution or road traffic. The site contains a pond, hedgerows and woodland (identified priority habitat which is also subject to TPO protection). The site also contains areas within an environmental network. The site may be of archaeological interest. The site may contain contaminated land. The site performs poor for housing within the context of a potential strategic site/settlement and the Black Country Contribution, within Stage 2a Sustainability Appraisal. However, it performs fair for employment in the context of a potential strategic site/settlement and the Black Country Contribution</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Necessary improvements to the highway network. Provision of green infrastructure. Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Relevant supporting studies should be undertaken and their recommendations implemented. See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>No</p>
<p>Recommendation</p>	<p>Retain as Green Belt</p>

Reasoning	<p>Whilst the sites size and location (proximity and connectivity to the Black Country) could mean that it is an appropriate location to meet cross-boundary needs arising in the Black Country, it is considered that there are other non-Green Belt locations/more appropriate locations to accommodate the proposed contributions to unmet needs forecast to arise within the Black Country.</p> <p>The site is located within the Green Belt and forms an important component of the gap between the settlements of Telford and Shifnal. As such it is considered that the retention of this site within the Green Belt is important to avoid the actual or perceived coalescence of these two settlements.</p> <p>Development of the alternative sites identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is considered to constitute sustainable development and accommodating parts of these proposed contributions on them would contribute to the achievement of the wider spatial strategy for Shropshire.</p> <p>The site is therefore not proposed for inclusion within the draft Shropshire Local Plan.</p>
Further Main Modifications Required	No
If proposed for Allocation, Potential Capacity:	N/A
If proposed for Allocation Design Requirements:	N/A

Purpose 1 (checking the unrestricted sprawl of large built up areas - only applies to parcels adjacent to large built up areas);

Purpose 2 (merging of neighbouring towns);

Purpose 3 (regularising countryside from encroachment);

Purpose 4 (preserving setting/character of historic towns); and

Site Assessment - Stage 3 Updated	
Site Reference:	BNT002
<i>Coal Authority Reference Area?</i>	No
<i>Mineral Safeguarding Area?</i>	Yes
<i>Wholly or Partly Grade 1, 2 and/or 3 Agricultural Land Quality:</i>	Yes
<i>Percentage of site in Flood Zone 3:</i>	0%
<i>Percentage of site in Flood Zone 2:</i>	0%
<i>Percentage of site in Flood Zone 1:</i>	100%
<i>Percentage of the site in the 30 year surface flood risk zone:</i>	1%
<i>Percentage of the site in the 100 year surface flood risk zone:</i>	1%
<i>Percentage of the site in the 1,000 year surface flood risk zone:</i>	2%
<i>Percentage of the site identified on the EA Historic Flood Map:</i>	0%
<i>Percentage of the site within 20m of an historic flood event:</i>	0%
<i>Percentage of the site within 20m of a detailed river network:</i>	0%
<i>All or part of the site within a Source Protection Zone:</i>	No
<i>Green Belt Considerations (from the GB Assessment/Review):</i>	The site is not located within the Green Belt.
<i>Landscape Considerations (Residential) (from the LVSS):</i>	Low
<i>Landscape Considerations (Employment) (from the LVSS):</i>	Low
<i>Visual Impact Considerations (Residential) (from the LVSS):</i>	Low
<i>Visual Impact Considerations (Employment) (from the LVSS):</i>	Low
<i>Highway Comments - Direct Access to Highway Network?</i>	<p>The site is divided into two parts one to the northeast of the A41 and one to the southwest. The section of A41 between the two parts is subject to a 40mph. The sites controls sufficient land to facilitate new and/or improved access points onto the A41.</p> <p>If developed as a strategic site it is assumed that additional local services / facilities would be provided within a master plan that gave priority to sustainable modes of transport for local trips to these facilities.</p> <p>However, in the initial phases of the development it is likely that other facilities and services from outside the locality will need to be used. In these circumstances the nearest convenience store is approximately 1.5km from the site at Tern Hill Roundabout and is linked by a continuous footway. The nearest GP is in Hodnet or Market Drayton over 5km away. Two existing uncontrolled refuge crossings cater for pedestrian movements across the A41. The site already benefits from an hourly bus service (64) to Shrewsbury and Market Drayton via the A53. There is a more direct road link to Market Drayton but this is private road with no continuous PRoW access.</p>
<i>Highway Comments - If No Direct Access, Can One Reasonably Be Achieved? And How?</i>	
<i>Highway Comments - Existing Highway Suitable for Traffic Associated with the Development at the Access Point?</i>	
<i>Highway Comments - If Existing Highway at Access Point is Not Suitable, Can It Reasonably be Made So?</i>	
<i>Highway Comments - Could the Development Occur Without Off-Site Works?</i>	
<i>Highway Comments - Are Envisaged Off-Site Works Achievable?</i>	
Highways Accessibility Rating (Out Of 24) (Based on Primary School, GP Surgery, Convenience Store & Public Transport Service):	
<i>Ecology Comments Significant Constraints:</i>	<p>There is a patch of Ancient Woodland on the site.</p> <p>Adjacent to River Tern and RAF Tern Hill Local Wildlife Sites.</p> <p>Protection of these sites and priority habitats will reduce the developable area available.</p>
<i>Ecology Comments Other Constraints:</i>	<p>There are Env. Network core areas on and adjacent to the site and corridors on the site. There may be priority habitats on the site - if so, these areas must not be developed.</p> <p>Requires botanical survey, Kecia and surveys for bats, GCNs (ponds within 500m), badgers, reptiles, otters, water voles, white-clawed grayfish and nesting birds.</p>

<i>Ecology Comments Management of Constraints:</i>	Priority habitats must not be developed. Protected and priority species and habitats mitigation and enhancement, retain and enhance mature trees/hedgerows/tree lines. Protect, enhance and restore Env. Network in accordance with CS17 Environmental Networks and MD12.
<i>Ecology Comments Opportunities:</i>	Habitats could potentially be restored as priority habitat .
<i>Heritage Comments Significant Constraints:</i>	
<i>Heritage Comments Other Constraints:</i>	Possible impact on setting of Scheduled Monument of Ringwork and bailey castle 390m west of Buntingsdale Hall (NHLE Ref. 1019659) and Grade II* listed Buttingsdale Hall (NHLE ref. 1293695). Site includes The site of the former RAF Ternhill now Clive Barracks (HER PRN 29121).
<i>Heritage Comments Management of Constraints:</i>	Heritage Assessment required with application (impact on settings of SM and LBs; Level 2 recording of historic buildings recording of WWII and pre-1960s military buildings). Site master planning with high quality design approach that addresses sites relationship with designated heritage assets around it necessary. Site should also seek to adaptively reuse any significant 20th century military buildings identified where possible.
<i>Heritage Comments Opportunities:</i>	
<i>Tree Comments Significant Constraints:</i>	The former barracks are set in well tree'd landscaped grounds with linear groups along access roads scattered individual trees and 2 significant woodland copses - one central west and one far NE of site
<i>Tree Comments Other Constraints:</i>	
<i>Tree Comments Management of Constraints:</i>	Standard BS5837 tree survey / constraints analysis. Arb Impact Assessment, Tree Protection Plan & Arb Method Statement. Particular attention to size, number and location of dwellings in order to create sustainable juxtaposition of houses and trees
<i>Tree Comments Opportunities:</i>	Development density and layout needs to be low so that it is sustainably integrated into and compliments existing natural environment features and mature trees and woodlands retained
<i>Public Protection Comments Significant Constraints:</i>	
<i>Public Protection Comments Other Constraints:</i>	Possible con land and noise from sources on site and road running through middle.
<i>Public Protection Comments Management of Constraints:</i>	Remediation available. Noise mitigation possible. Need to look at on a detailed basis once plans come in but possible to have residential.
<i>Public Protection Comments Opportunities:</i>	
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Residential):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Residential):	Poor
Settlement Conclusion - Stage 2a Sustainability Appraisal Site Assessment (Employment):	Fair
Black Country Conclusion - Stage 2a Sustainability Appraisal (Employment):	Fair
Relationship to the Black Country	This site is located in north Shropshire and as such it has a limited relationship to the Black Country.
Potential to Accommodate Housing As Part Of Proposed Contribution to Black Country	As a large potentially strategic site/settlement, it has capacity to accommodate a significant quantity of housing and employment, sufficient to contribute to the needs of both Shropshire and/or the Black Country.

<p>Strategic Considerations:</p>	<p>The Ministry of Defence (MOD) have announced plans to relocate the regiment based at Clive Barracks, Tern Hill and dispose of the Barracks for redevelopment. The site contains a large area of brownfield land, some of which is contaminated.</p> <p>The Economic Growth Strategy for Shropshire identifies the opportunity associated with Clive Barracks, Tern Hill, which is located on the A41 strategic corridor. The site is sufficiently large that it could form a strategic settlement.</p> <p>The site is located near to Market Drayton.</p> <p>This site is located in north Shropshire and as such it has a limited relationship to the Black Country.</p> <p>The site is divided into two components by the A41.</p> <p>Services and facilities would need to be provided on the site to create a sustainable community.</p> <p>The site is located within a landscape parcel with low landscape and visual sensitivity.</p> <p>The sites is considered to control sufficient land to facilitate new and/or improved access points onto the A41. Improvements may also be required to the A41/A53 roundabout.</p> <p>The site contains ancient woodland. It is also in proximity of Local Wildlife Sites.</p> <p>The site is well tree'd and landscaped.</p> <p>The site contains and is in proximity of environmental network core areas and corridors. The site may also contain priority habitats and protected species.</p> <p>The site contains Clive Barracks, a non-designated heritage asset.</p> <p>The site performs fair for housing and employment within the context of a potential strategic site/settlement within Stage 2a Sustainability Appraisal. It also performs fair for employment in the context of the Black Country Contribution, but poor for housing in the context of the Black Country Contribution.</p> <p>The site is in proximity of designated and non-designated heritage assets - including listed buildings and scheduled monuments.</p> <p>The site may contain contaminated land associated with past military uses.</p> <p>Noise associated with the A41 and nearby airfield.</p>
<p>Known Infrastructure Requirements to make Development Suitable in Planning Terms:</p>	<p>Ensuring future occupiers have appropriate access to services and facilities and employment opportunities.</p> <p>Provision of a new primary school. This will enable Buntingsdale School and Stoke on Tern Primary School to merge on the site and ensure future residents have access to a primary school.</p> <p>Ensuring necessary works to the highway network are undertaken (including achieving appropriate site accesses and improvements to Tern Hill roundabout).</p> <p>Pedestrian and cycle connectivity through the site and in particular between the north-eastern and south-western portions of the site - through enhancement of an underpass of the A41.</p> <p>Provision of green infrastructure.</p> <p>Any necessary decontamination of the site undertaken.</p> <p>Relevant supporting studies should be undertaken and their recommendations implemented.</p> <p>See comments from relevant service areas.</p>
<p>Known Infrastructure Opportunities:</p>	<p>Formation of a new settlement through a mixed used development to provide local services and facilities; employment land; new homes; and extensive green infrastructure.</p> <p>Provision of a new primary school to serve future residents of the site.</p> <p>Improvements to Tern Hill roundabout.</p> <p>Pedestrian and cycle connectivity through the site and in particular between the north-eastern and south-western portions of the site.</p> <p>Decontamination.</p> <p>Green infrastructure provision.</p> <p>Relevant supporting studies should be undertaken and their recommendations implemented.</p> <p>See comments from relevant service areas.</p>
<p>Potential for Windfall?</p>	<p>No</p>
<p>Potential for Allocation?</p>	<p>Yes</p>
<p>Recommendation</p>	<p>The Site is allocated as a new Strategic Settlement</p>

Reasoning	<p>Much of the site is brownfield land and will be vacated during the Local Plan Review period (2016-2038). Areas of this brownfield land are subject to contamination.</p> <p>The Economic Growth Strategy for Shropshire identifies an objective to prioritise investment along strategic corridors and growth zones, including the A41 corridor.</p> <p>The mixed-use redevelopment of Clive Barracks, Tern Hill will provide a productive use for a large brownfield site which will be vacated during the Local Plan Review period (2016-2038). The site is on a strategic corridor and will provide economic opportunities in the form of local employment. It will also provide social and environmental opportunities resulting from the provision of additional new homes, local services and facilities and extensive green infrastructure.</p> <p>As such, Shropshire Council considers that emerging proposals for the mixed-use redevelopment of Clive Barracks, Tern Hill represent a sustainable option for the future use of a large predominantly brownfield site on a strategic corridor.</p> <p>It is therefore considered appropriate to identify Clive Barracks, Tern Hill as a proposed strategic site, the redevelopment of which will contribute to meeting the development needs of Shropshire in the medium to long term.</p> <p>Whilst the site is large, it is located in north Shropshire and as such it has a limited relationship to the Black Country, as such it is not considered an appropriate location to accommodate any of the proposed contribution to the unmet needs forecast to arise within the Black Country.</p>
Further Main Modifications Required	No
If proposed for Allocation, Potential Capacity:	Formation of a new settlement through a comprehensive mixed-use redevelopment of the site to provide a range of local services and facilities, around 750 dwellings, around 6ha of employment land and extensive green infrastructure.
If proposed for Allocation Design Requirements:	<p>a. The quantity, quality, design, mix and layout of housing provided on the site will be informed by site constraints and opportunities, identified local needs and relevant policies of this Local Plan.</p> <p>b. Employment provision will represent an intrinsic element of the site's redevelopment, occurring alongside the provision of housing. Employment provision will be of an appropriate quantity and quality to contribute towards the objectives of the Shropshire Economic Growth Strategy.</p> <p>c. The local centre will comprise of an appropriate range of commercial uses (likely to include a family pub plus convenience store and a small number of modest retail units) to serve the new settlements community on land fronting the A41. The local centre will ensure future occupiers of the site benefit from access to local facilities, as such its timely provision is an important consideration and will be directly linked to provision of housing on the site.</p> <p>d. Green infrastructure provision will be of an appropriate quantity and quality. Its location will integrate and enhance key green infrastructure corridors and networks on and around the site. Existing playing fields should be retained.</p> <p>e. 1ha of land will be provided for a primary school. This will enable Buntingsdale School and Stoke on Tern Primary School to merge on the site and crucially serve the needs of the new development.</p> <p>f. Any necessary improvements will be undertaken in order to achieve appropriate access points into both the eastern and western portions of the site. Any necessary improvements to the A41/A53 Tern Hill roundabout will also be undertaken including any recommendations from an air quality assessment of the impact of increased vehicular movements from this development on Tern Hill roundabout.</p> <p>g. Appropriate pedestrian and cycle links will be provided to and through the site, particularly to the proposed primary school and local centre. This will include enhancement of an underpass of the A41, to ensure pedestrian and cycle connectivity between the north-eastern and south-western portions of the site.</p> <p>h. Acoustic design, layout and appropriate building materials (including where necessary appropriate glazing, ventilation and acoustic barriers) will be used to appropriately manage noise arising from the adjacent airfield and nearby roads.</p> <p>i. Any contaminated land on the site will be appropriately managed.</p> <p>j. The nearby River Tern and RAF Tern Hill Local Wildlife Sites will be appropriately buffered. Ancient woodland and priority habitats on the site will be retained and an appropriately buffered. A sustainable juxtaposition will be created between built form and trees.</p> <p>k. Site design and layout will reflect and respect the sites heritage and heritage assets within the wider area.</p> <p>l. The site will incorporate appropriate sustainable drainage, informed by a sustainable drainage strategy. Any residual surface water flood risk will be managed by excluding development from the affected areas of the site, which will form part of the Green Infrastructure network. Development will also be excluded from the small portions of the site located in Flood Zones 2 and/or 3. Flood and water management measures must not displace water elsewhere.</p>

Summary.....	62

2. Introduction

- 2.1. On 15th February 2023, the Planning Inspectors examining the draft Shropshire Local Plan issued an Interim Findings document (ID28). This followed the completion of the Stage 1 Hearing Sessions, which focused on legal, procedural and strategic issues (including strategic policies). These Hearing Sessions were primarily undertaken in July 2022, with a further session specifically regarding the Duty to Cooperate in January 2023.
- 2.2. ID28 addresses a range of matters, including a number related to housing and employment. This included:
 - a. The housing and employment land needs of Shropshire.
 - b. Proposed contributions to unmet housing and employment land needs forecast to arise within the Black Country.
 - c. The proposed housing and employment land requirements within the draft Shropshire Local Plan.
- 2.3. With specific regard to the housing and employment land needs of Shropshire, Paragraph 13 of ID28 states *“The Council’s approach to identifying the housing and employment land needs derived within Shropshire itself is sound.”*
- 2.4. With regard to the unmet housing and employment land needs forecast to arise within the Black Country, the Planning Inspectors have acknowledged that the draft Shropshire Local Plan is proposing to provide 1,500 new homes and 30ha of employment land over the plan period in order to contribute the unmet housing and employment land needs forecast to arise in the Black Country and concluded that these contributions are appropriate.
- 2.5. Specifically, within paragraph 13 of ID28 the Planning Inspectors conclude: *“In principle, the Council’s intention to address some of the Association of Black Country Authorities (ABCA) unmet needs (1500 homes and 30ha of employment land), aligns with the spirit of the DtC. It is clear that the Council and the ABCA authorities are all content with this contribution and this is set out in a Statement of Common Ground (SoCG), signed prior to the submission of the Plan for examination. We recognise that there is a lack of any prescribed formula in national planning policy for calculating any uplift to Shropshire’s housing need to meet some of this externally derived unmet need.”*
- 2.6. With regard to the housing and employment land requirements, the Planning Inspectors have indicated within paragraph 11 that *“we are concerned that there has been a conflation of housing need and housing requirement and also employment land need and*

employment land requirement – but these are two distinctly different things.”

- 2.7. Within paragraph 12 of ID28 the Planning Inspectors continue, stating *“You will appreciate that we need clarity on this point, and the Plan itself must also be equally clear. We therefore ask that the Council provides us with a Topic Paper that unambiguously sets out the need for housing over the plan period and the local plan’s housing requirement and the same for employment land.”*
- 2.8. Within Paragraph 21 of ID28, the Planning Inspectors address the proposed housing and employment land contributions to the Black Country. It explains that if the intention remains to provide these contributions to the unmet housing and employment land needs of the Black Country, then *“the Council will also need to consider which site or sites in the Plan will be identified to meet that need. This also needs to be subject to sustainability appraisal to reflect the objectives and geographical scope of the Plan.”*
- 2.9. ID28 also addresses Sustainability Appraisal (SA), and concludes that additional SA assessment should be undertaken regarding the housing and employment land requirements.

3. Purpose of this Document

- 3.1. The purpose of this document is to positively respond to the Planning Inspectors’ request for a clear and unambiguous Topic Paper regarding the housing and employment land needs and requirements in Shropshire. In doing so it makes a clear distinction between defined need and requirements.
- 3.2. In seeking to positively respond to the conclusions of the Planning Inspectors within ID28, Shropshire Council has also undertaken additional Sustainability Appraisal (SA) work regarding the housing and employment land requirement. This additional SA assessment work has directly informed the preparation of this Topic Paper.
- 3.3. A range of previously published material prepared by the Council has also informed this Topic Paper, including the Local Housing Need Assessment (EV069), the Strategic Housing Market Assessment (EV097.01 and EV097.02), the Housing Topic Paper (GC4i), the Five Year Housing Land Supply (GC4j), the Housing Trajectory (GC4p), Productivity Growth Forecasts (EV090), the Economic Development Needs Assessment (EV043), the Economic Growth Strategy (EV044), the Employment Topic Paper (EV112), the Strategic Employment Topic Paper (GC4n), the Authority Monitoring Report (EV012); and the Local Plan Viability Study (EV115.01).

4. Housing Need and Requirement

Local Housing Need

- 4.1. The National Planning Policy Framework (NPPF) specifies that *“To determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals...”*¹
- 4.2. Shropshire Council considers it is appropriate to utilise Government's Standard Methodology to determine local housing need in Shropshire.
- 4.3. The Local Housing Need Assessment (2020) underpinned the housing requirement when the Regulation 19: Pre-Submission Consultation Draft Shropshire Local Plan was prepared, at the time of the Regulation 19 Consultation, and when Shropshire Council made the decision to submit the draft Shropshire Local Plan for examination. As such, it is considered appropriate to continue to utilise the 2020 Assessment when establishing baseline local housing need.
- 4.4. This calculation of local housing need is summarised within the Local Housing Need Assessment (2020) (EV069). In summary, this assessment concludes that the Local Housing Need for Shropshire was some **25,894 dwellings** over the 22-year plan period from 2016-2038. This equates to an annual average of **1,177 dwellings**.
- 4.5. However, it should be recognised that more up-to-date assessments of housing need in Shropshire have recently become available, and it is felt appropriate to consider this within the context of wider material considerations when determining an appropriate housing requirement. This will be discussed further later in this paper.

Initial Identification: Reasonable Housing Requirement Options

- 4.6. Within the Issues and Strategic Options Consultation Document (EV003.01) prepared to inform the draft Shropshire Local Plan, three reasonable options for the housing requirement over the plan period were identified. It should be noted that at this time the Plan period was 2016-2036.
- 4.7. The baseline for the three reasonable options was the local housing need; identified at that time in the Full Objectively Assessed Housing Need (FOAHN). Each option then included a different percentage

¹MHCLG, (2021), The NPPF – Paragraph 61

uplift above identified local housing need. These uplifts were intended to ensure local housing need was achieved, whilst also providing varying levels of flexibility to respond to changes to local housing need over the plan period, and varying levels of opportunity to respond to identified issues and opportunities in Shropshire.

- 4.8. These options informed identification of the proposed housing requirement within the draft Shropshire Local Plan. This is summarised within the Housing Topic Paper (GN4i).

Updated Identification: Reasonable Housing Requirement Options

- 4.9. In response to ID28, the reasonable options for the housing requirement have been updated and expanded. However, the methodology used to identify these updated options is consistent with that used to identify the initial options.
- 4.10. Specifically, the baseline was local housing need (2020 base date). A series of percentage uplifts were then identified. These uplifts are intended to ensure that local housing need is achieved, whilst also providing varying levels of flexibility to respond to changes to local housing need over the plan period, and varying levels of opportunity to:
- a. Respond positively to specific sustainable development opportunities.
 - b. Increase the delivery of family and affordable housing to meet the needs of local communities and support new families coming into Shropshire.
 - c. Support the delivery of specialist housing for older people, people with disabilities and the needs of other groups within the community.
 - d. Support the diversification of Shropshire's labour force.
 - e. Support wider aspirations, including increased economic growth and productivity.
- 4.11. Further information on these factors is provided within the evidence base prepared to inform the draft Shropshire Local Plan, including the Strategic Housing Market Assessment (EV097.01 and EV097.02), the Housing Topic Paper (GC4i), the Economic Development Needs Assessment (EV043), the Economic Growth Strategy (EV044), the Employment Topic Paper (EV112), and the Strategic Employment Topic Paper (GC4n).

4.12. An explicit contribution of 1,500 dwellings towards the unmet housing need forecast to arise within the Black Country has also been specifically included within each option.

Proposed Contribution to the Black Country

4.13. The proposed contribution to the unmet housing need forecast to arise within the Black Country of 1,500 dwellings has been informed by careful consideration of the relationship between Shropshire and the Black Country as summarised within the Housing Topic Paper (GC4i) and detailed duty to cooperate discussions, culminating within the completion of a Statement of Common Ground (SoCG) (EV041) within which the proposed contribution was agreed.

4.14. Within ID28, the Planning Inspectors conclude that *“In principle, the Council’s intention to address some of the Association of Black Country Authorities (ABCA) unmet needs (1500 homes and 30ha of employment land), aligns with the spirit of the DtC.”*

4.15. Within ID28, the Planning Inspectors also state *“It is clear that the Council and the ABCA authorities are all content with this contribution and this is set out in a Statement of Common Ground (SoCG), signed prior to the submission of the Plan for examination. We recognise that there is a lack of any prescribed formula in national planning policy for calculating any uplift to Shropshire’s housing need to meet some of this externally derived unmet need.”*

4.16. As such, Shropshire Council considers that it is appropriate for each of the updated reasonable options for the housing requirement to include a specific uplift of 1,500 dwellings (equating to an annual average of 68 dwellings over the 22-year plan period from 2016-2038) to reflect the proposed contribution to the unmet housing need forecast to arise within the Black Country.

Updated Reasonable Housing Requirement Options

4.17. Using the methodology described above, five reasonable options for the housing requirement have been identified. These options are:

Table 4.1: Reasonable Housing Requirement Options

Option	Percentage Uplift Above Local Housing Need	1,500 Dwelling Black Country Contribution?
Housing Requirement Option 1: Moderate Growth	Around a 5% uplift	Yes
<p>Summary: Responsive to and represents a consistent uplift on baseline need to the Moderate Growth Option within the Issues & Strategic Options Document. Incorporates a further 1,500 dwelling contribution to unmet housing need forecast to arise in the Black Country.</p> <p>Housing Requirement: The housing requirement resulting from this option would be 28,700 dwellings. This equates to around 1,305 dwellings per annum.</p>		

Option	Percentage Uplift Above Local Housing Need	1,500 Dwelling Black Country Contribution?
Housing Requirement Option 2: Significant Growth	Around a 10% uplift	Yes
<p>Summary: Responsive to and represents a consistent uplift on baseline need to the Significant Growth Option within the Issues & Strategic Options Document. Incorporates a further 1,500 dwelling contribution to unmet housing need forecast to arise in the Black Country. Results in a housing requirement comparable to that within the adopted Development Plan.</p> <p>Housing Requirement: The housing requirement resulting from this option would be 30,000 dwellings. This equates to around 1,364 dwellings per annum.</p>		
Housing Requirement Option 3: High Growth (Variation 1)	Around a 13% uplift	Yes
<p>Summary: Responsive to the High Growth Option within the Issues & Strategic Options Document. Incorporates a further 1,500 dwelling contribution to unmet housing need forecast to arise in the Black Country. Results in a housing requirement consistent with that proposed within the draft Shropshire Local Plan.</p> <p>Housing Requirement: The housing requirement resulting from this option would be 30,800 dwellings. This equates to around 1,400 dwellings per annum.</p>		
Housing Requirement Option 4: High Growth (Variation 2)	Around a 15% uplift	Yes
<p>Summary: Responsive to and represents a consistent uplift on baseline need to the High Growth Option within the Issues & Strategic Options Document. Incorporates a further 1,500 dwelling contribution to unmet housing need forecast to arise in the Black Country.</p> <p>Housing Requirement: The housing requirement resulting from this option would be 31,300 dwellings. This equates to around 1,423 dwellings per annum.</p>		
Housing Requirement Option 5: High Growth (Variation 3)	Around a 19% uplift	Yes
<p>Summary: Responsive to the High Growth Option within the Issues & Strategic Options Document. Incorporates a further 1,500 dwelling contribution to unmet housing need forecast to arise in the Black Country. Results in a housing requirement equating to the housing requirement proposed within the draft Shropshire Local Plan plus an additional 1,500 dwellings, which is comparable to the proposed contribution to the unmet housing need forecast to arise within the Black Country.</p> <p>Housing Requirement: The housing requirement resulting from this option would be 32,300 dwellings. This equates to around 1,468 dwellings per annum.</p>		

Identifying the Proposed Housing Requirement

- 4.18. The decision regarding which of the reasonable housing requirement options should form the basis for the proposed housing requirement within the draft Shropshire Local Plan is ultimately one of planning judgement.
- 4.19. There is however an extensive range of information that informs this planning judgement. This includes:
 - a. The additional SA assessment work.
 - b. Local housing need in Shropshire – 2020 base date, which formed the baseline for the various housing requirement options; and 2023 base date, which represents the most recent calculation.

- c. The ability to:
 - i. Provide flexibility to respond to changes to local housing need over the proposed plan period.
 - ii. Respond positively to specific sustainable development opportunities.
 - iii. Increase the delivery of family and affordable housing to meet the needs of local communities and support new families coming into Shropshire.
 - iv. Support the delivery of specialist housing for older people, people with disabilities and the needs of other groups within the community.
 - v. Support the diversification of our labour force.
 - vi. Support wider aspirations, including increased economic growth and productivity.
 - d. The ability to accommodate an appropriate contribution of 1,500 dwellings towards the unmet housing need forecast to arise within the Black Country.
 - e. The relationship between the identified issues and opportunities in Shropshire and a proposed contribution to the unmet housing need forecast to arise within the Black Country.
 - f. Deliverability, including through consideration of past trends on housing completions.
 - g. Responses to the Regulation 18 consultations undertaken to inform the draft Shropshire Local Plan and representations received during the Regulation 19 consultation on the draft Shropshire Local Plan.
 - h. The conclusion that the housing requirement should be expressed as 'a minimum' rather than 'around'.
- 4.20. Dealing with each in turn:

Additional Sustainability Appraisal Assessment Work

- 4.21. The additional SA assessment work provides a crucial source of information to inform the planning judgement regarding which of the reasonable housing requirement options should form the basis for the proposed housing within the draft Shropshire Local Plan.
- 4.22. This work assesses each option against the SA objectives and in this way informs judgements about their relative sustainability.
- 4.23. In general terms, the additional SA assessment work can be summarised as concluding that the greater the level of housing proposed within the option, the greater the likelihood of positive impacts on social and economic factors. Conversely the greater the level of housing proposed within the option, the greater the likelihood

of negative impacts on environmental factors. It is important to recognise that the principle of sustainable development is about achieving balance across all three pillars – social, economic, and environmental.

- 4.24. The additional SA assessment work also concludes that none of the options are likely to result in a strongly negative effect. Conversely, it concludes that options 3, 4 and 5 are likely to result in a strongly positive effect on SA objective 3 (provision of a sufficient amount of good quality housing which meets the needs of all sections of society in the short, medium and long term), whilst options 4 and 5 also potentially result in a strongly positive effect on SA objective 4 (promoting access to services for all sections of society).
- 4.25. Further detail on the outcomes of this additional SA assessment work is provided within the Additional SA Report.

Local Housing Need

- 4.26. The Local Housing Need Assessment (2020) formed the baseline for the identified reasonable housing requirement options. As each of these options include a percentage uplift above this baseline, all are sufficient to meet this local housing need.
- 4.27. However, whilst the Local Housing Need Assessment (2020) formed the baseline for the options because it underpinned the housing requirement when the Regulation 19: Pre-Submission Consultation Draft Shropshire Local Plan was prepared, at the time of the Regulation 19 Consultation, and when Shropshire Council made the decision to submit the draft Shropshire Local Plan for examination; the overall planning judgement also needs to take account of the most recent assessments of local housing need.
- 4.28. The most recent assessment of local housing need has a 2023 base date and is summarised within the Local Housing Need Assessment (2023). This assessment concludes that local housing need has reduced from the 1,177 dwellings per annum within the 2020 base date assessment to 1,085 dwellings per annum.
- 4.29. This equates to around an 8% reduction to the annual local housing need, which requires careful consideration when determining which of the options should form the basis for the proposed housing within the draft Shropshire Local Plan.

The Ability to Respond to Identified Issues and Support Identified Opportunities

- 4.30. The evidence base and consultation responses that have informed the preparation of the draft Shropshire Local Plan identified a range of issues and opportunities that exist in Shropshire. Key issues and opportunities identified include:
- a. Provide flexibility to respond to changes to local housing need over the proposed plan period.
 - b. Sustainable development opportunities.
 - c. The need for family and affordable housing to meet the needs of local communities and support new families coming into Shropshire.
 - d. The need for adaptable and specialist housing for older people and people with disabilities.
 - e. Housing to meet the needs of other groups within the community.
 - f. The need to supplement and diversify our labour force, including through the provision of appropriate housing to meet the needs of this labour force.
 - g. Wider aspirations for Shropshire, including increased economic growth and productivity, which can be supported through the provision of appropriate housing opportunities.
- 4.31. Key evidence which has informed the identification of these issues and opportunities include assessments of local housing need (including EV069), the various iterations of the Authority Monitoring Report (including EV012), the Strategic Housing Market Assessment (EV097.01 and EV097.02), Productivity Growth Forecasts (EV090), the Economic Development Needs Assessment (EV043), the Economic Growth Strategy (EV044), and the Local Plan Viability Study (EV115.01).
- 4.32. The material prepared to facilitate and subsequent responses / representations to consultations also informed the identification of these issues and opportunities. This includes the Issues & Strategic Options Consultation (EV003.01 and EV003.02), the Preferred Scale and Distribution of Development Consultation (EV004.01 and EV004.02), the Regulation 18: Pre-Submission Consultation (EV007.01 and EV007.03), and the Regulation 19: Pre-Submission Consultation (SD002, SD014.01-SD014.02; representations A0001-A0682 and GC4o).
- 4.33. Further information is provided within the Housing Topic Paper (GC4i).

- 4.34. Each of the reasonable options for the housing requirement include a percentage uplift above local housing need in order to support addressing the identified issues and the achievement of the identified options.
- 4.35. However, the level of housing is only one mechanism within the scope of the draft Shropshire Local Plan which can contribute to addressing identified issues and achievement of identified objectives. Policies that address the resultant location, type, tenure, and quality of housing, in order to ensure new housing is responsive to the identified issues and opportunities is equally important.

Contributing to Unmet Housing Need Forecast to Arise in the Black Country

- 4.36. Each of the reasonable options for the housing requirement include an explicit contribution of 1,500 dwellings towards the unmet housing need forecast to arise within the Black Country (above identified local housing need and the various percentage uplifts above it). As such, each option would provide a contribution of 1,500 dwellings towards the unmet housing need forecast to arise within the Black Country.

Relationship between identified issues and opportunities in Shropshire and a proposed contribution to unmet housing need forecast to arise in the Black Country.

- 4.37. Whilst provision of flexibility to respond to changes to local housing need in Shropshire and provision of a contribution to the unmet housing need forecast to arise within the Black Country are mutually exclusive, both are complementary to and will facilitate the achievement of the wider identified issues and opportunities in Shropshire.
- 4.38. The ability to positively respond to sustainable development opportunities is generally increased as the amount of development proposed rises (as more development provides more opportunities). This increase can be as a result of an uplift to local housing need for flexibility to respond to potential future changes to local housing need, in response to other identified issues / opportunities in Shropshire, or to provide a contribution to unmet housing need forecast to arise in the Black Country.
- 4.39. Increasing overall housing numbers is one mechanism available to provide more family and affordable housing, adaptable and specialist

housing for older people and people with disabilities, and housing to meet the needs of other groups within Shropshire communities.²

- 4.40. The source of this increase can be to provide flexibility to respond to changes to local housing need, respond to other identified issues / opportunities in Shropshire, or as part of a contribution to unmet housing need forecast to arise in the Black Country.
- 4.41. With regard to the aspiration of attracting new families into Shropshire, one source is the Black Country. Indeed, migration patterns between the two areas are already established (which informed consideration of the relationship between the two areas, as documented within the Housing Topic Paper GC4i). These migration patterns directly inform the sub-national population projections and associated sub-national household projections which underpin calculations of local housing need.
- 4.42. As such, the contribution to the unmet housing need forecast to arise in the Black Country and the aspiration of attracting more families into Shropshire is entirely compatible.
- 4.43. One way the labour force of Shropshire can be supplemented and diversified is by retaining and attracting more working-aged people into Shropshire, including through provision of appropriate housing to meet their needs³.
- 4.44. One way of supporting the delivery of appropriate housing for working-aged people, is increasing overall housing provision⁴. This increase can be to provide flexibility to respond to changes to local housing need, a response to identified issues / opportunities in Shropshire, or a proposed contribution to the unmet housing need forecast to arise within the Black Country.
- 4.45. Furthermore, the Black Country is a potential source of labour supply for Shropshire. Indeed, there are already established migration and commuting patterns between the two areas (both migration and commuting patterns informed consideration of the relationship

² It is important to note that increased housing provision is only one mechanism available to provide the types of housing required to meet the needs of families, older people and other groups within our communities. The draft Shropshire Local Plan includes a range of draft policies that address the location, type, tenure, and quality of housing, to ensure new housing more effectively supports the ability to meet the needs of our communities and all the groups within them.

³ It is important to note that increased housing provision is only one of the mechanisms available to supplement and diversity the labour force. Provision of appropriate employment opportunities and lifestyles that people aspire to are other such mechanisms.

⁴ It is important to note that increased housing provision is only one mechanism available to provide appropriate housing for working-aged people. The draft Shropshire Local Plan includes a range of draft policies that address the location, type, tenure, and quality of housing, which will ensure new housing more effectively contributes to this aspiration.

between the two areas, as documented within the Housing Topic Paper GC4i).

- 4.46. As such, supplementing and diversifying the Shropshire labour supply is entirely compatible with the proposed contribution to the unmet housing need forecast to arise within the Black Country - as residents of these properties move from the Black Country to Shropshire.
- 4.47. One means of supporting the range of wider aspirations for Shropshire, including increased economic growth and productivity, is the provision of appropriate housing opportunities. A mechanism to increase the amount of appropriate housing provided is increasing overall housing provision.⁵
- 4.48. This increase can be to provide flexibility to respond to changes to local housing need, a response to identified issues / opportunities in Shropshire, or a proposed contribution to the unmet housing need forecast to arise within the Black Country.
- 4.49. Each of the reasonable options for the housing requirement include both a percentage uplift above local housing need to provide flexibility to respond to changes to local housing need and a specific 1,500 dwelling contribution (above local housing need) to the unmet housing need forecast to arise within the Black Country. However, both of these adjustments can support the ability to address wider identified issues and achieve identified opportunities in Shropshire.
- 4.50. This 'overlap' must be recognised and considered when determining the appropriate housing requirement for inclusion within the draft Shropshire Local Plan.

Deliverability

- 4.51. The proposed housing requirement should support the achievement of local housing need, whilst also supporting the ability to respond to identified issues and support the achievement of identified opportunities in Shropshire, and the provision of 1,500 dwellings toward the unmet housing needs forecast to arise within the Black Country. However, importantly the housing requirement also needs to be deliverable.

⁵ It is important to note that increased housing provision is only one mechanism available to provide housing to support wider aspirations including economic growth. The draft Shropshire Local Plan includes a range of draft policies that address the location, type, tenure, and quality of housing, which will ensure new housing more effectively contributes to these aspirations.

4.52. Past trends on housing completions are inevitably influenced by a range of factors. However, they form a useful indicator of deliverability.

4.53. Figure summarises annual housing completion rates over the current plan period thus far (from 2006/07-2021/22). It illustrates that over this period, housing completions experienced both significant peaks (particularly 2016/17-2021/22) and significant troughs (particularly 2009/10-2014/15). This is not surprising and is a common pattern within the housing market, reflecting the range of known and unknown local, regional, national and international factors that influence it.

Figure 4.1: Housing Completions in Shropshire for 2006/07-2021/22

Financial Year	Housing Completions
2006/07	1,228
2007/08	1,106
2008/09	1,265
2009/10	1,112
2010/11	984
2011/12	724
2012/13	847
2013/14	1,079
2014/15	1,155
2015/16	1,402
2016/17	1,910
2017/18	1,876
2018/19	1,843
2019/20	1,554
2020/21	1,586
2021/22	1,485

4.54. Over the longer term period (2006/07-2021/22), the annual average housing completion rate was some 1,322 dwellings, which is lower than the annual average associated with all of the identified options, although generally comparable to that associated with option 1.

4.55. Over the shorter term (most recent five year period from 2017/18-2021/22) which represents a peak in the housing market, the annual average housing completion rate was some 1,668 dwellings, which is higher than all of the identified options.

4.56. This past trend data clearly indicates that it is possible, in an individual year, to achieve/exceed the annual average housing requirement associated with all of the identified options.

4.57. However, this past trend data also suggests that ensuring the consistent achievement of the annual average housing requirement associated with all of the identified options over the proposed plan period will require proactive implementation of the draft Shropshire Local Plan by Shropshire Council and the effective operation of the housing market. It is acknowledged that the higher the annual average housing requirement associated with the option, the more

challenging it becomes to ensure delivery over the entirety of the proposed plan period.

- 4.58. In terms of factors that could impact on future deliverability, it is recognised that there are a myriad of known and unknown local, regional, national and international factors that can influence the housing market and housing completion rates in Shropshire. As a result, there will inevitably be fluctuations to housing completion rates over the proposed plan period – similar to those identified within the past delivery trends.
- 4.59. As such, it is important that the proposed housing requirement is responsive to the potential for such fluctuations and the potential for peaks and troughs in the housing market and housing completion rates. This ensures that it is deliverable, whilst also being sufficiently aspirational to support the ability to contribute to addressing identified issues and opportunities in Shropshire.
- 4.60. There is also a need to ensure that an appropriately robust housing land supply (with an appropriate buffer) is identified to provide confidence regarding the deliverability of the proposed housing requirement.

Consultation Responses

- 4.61. As documented within paragraph 4.32 of this document, consultation material and responses/representations directly informed the identification of key issues and opportunities in Shropshire, which can be contributed to through the proposed housing requirement.
- 4.62. Consultation responses/representations also directly informed the identification of the housing requirement proposed within the draft Shropshire Local Plan (at the point of submission).
- 4.63. Recognising that there is a need to re-consider the proposed housing requirement in order to effectively respond to the Planning Inspectors findings within ID28, it remains important that the responses/representations received during the various consultations undertaken to inform the draft Shropshire Local Plan are given due consideration when undertaking the planning judgement regarding an appropriate housing requirement for inclusion within the draft Shropshire Local Plan.

Expression of the Housing Requirement

- 4.64. Throughout the preparation of the draft Shropshire Local Plan, the reasonable options for the housing requirement and the proposed

housing requirement within the draft Shropshire Local Plan were expressed as 'around'.

- 4.65. Within ID28, the Planning Inspectors concluded that the housing requirement should be expressed as 'a minimum' *"for both monitoring and effectiveness."*
- 4.66. Shropshire Council accepts this principle. However, the implications do require careful consideration in the context of identifying which of the reasonable housing requirement options should form the basis for the proposed housing within the draft Shropshire Local Plan.
- 4.67. This is because when a housing requirement is expressed as 'around' it does not constitute either a definitive minimum or a definitive maximum, but a general target. However, when a housing requirement is expressed as 'a minimum' it does constitute a definitive minimum, although there is flexibility for it to be exceeded - subject to consideration of wider policy requirements.

The Proposed Housing Requirement

- 4.68. Shropshire Council has carefully considered the extensive range of information available regarding an appropriate housing requirement for inclusion within the draft Shropshire Local Plan in undertaking the planning judgement regarding which of the reasonable options for the housing requirements should form the basis for the housing requirement within the draft Shropshire Local Plan.
- 4.69. In conclusion, Shropshire Council considers that **Option 3**, should form the basis for the proposed housing requirement within the draft Shropshire Local Plan.

4.70. **Option 3: High Growth (Variation 1), consists of local housing need (2020 base date), plus a 13% uplift, plus a 1,500 dwelling contribution to unmet housing need forecast to arise in the Black Country. This equates to a total uplift above local housing need (2020 base date) of around 19%.**

4.71. **The resultant proposed housing requirement is 30,800 dwellings over the proposed plan period from 2016-2038. This equates to an annual average of around 1,400 dwellings.**

Reasons for the Proposed Housing Requirement

- 4.72. As documented within paragraph 4.68 in applying planning judgement to determine which of the reasonable options for the housing requirement should form the basis for the housing

requirement within the draft Shropshire Local Plan, detailed consideration of extensive information has been undertaken.

4.73. Key considerations included:

- a. The level of housing associated with Option 3 is considered to be **responsive to the principle of and will deliver High Growth**, which underpins the level of growth proposed within the draft Shropshire Local Plan, as it is:
 - i. Sufficient to meet local housing need.
 - ii. Provides a buffer above local housing need thereby providing confidence that it will be achieved.
 - iii. Allows an appropriate level of flexibility above local housing need to respond to changes over the proposed plan period.
 - iv. Includes a specific contribution of 1,500 dwellings towards unmet housing need forecast to arise in the Black Country.
 - v. Positively supports the ability to address identified issues and opportunities in Shropshire – including through the uplift to provide flexibility to respond to changes to local housing need, the specific uplift to support addressing identified issues and opportunities, and the proposed contribution to the unmet housing need forecast to arise within the Black Country.
- b. The level of housing associated with Option 3 is sufficient to **meet local housing need (2020 base date)** and provides flexibility to respond to changes to local housing need. However, it is also responsive to:
 - i. Available information on short and longer term **delivery trends**.
 - ii. Recognition that there is likely to be a myriad of known and unknown local, regional, national and international **factors that can influence the housing market and housing completion rates** in Shropshire and the need to provide sufficient flexibility to respond to these factors.
 - iii. The **most recent calculation of local housing need (2023 base date)**, which concludes need has reduced by 8%. Shropshire Council considers Option 3 strikes an appropriate balance on these considerations.
- c. Based on the additional SA assessment work undertaken, it is considered that Option 3 strikes an appropriate balance across the three pillars (social, economic, and environmental) of sustainable development and will contribute towards the achievement of the long term sustainability of Shropshire.

- d. The additional SA assessment work concluded that Option 3 was likely to result in a strongly positive effect on SA objective 3 (provision of a sufficient amount of good quality housing which meets the needs of all sections of society in the short, medium and long term). It also concluded that Option 3 was unlikely to result in any strongly negative effects on any SA objectives.
- e. Option 3 includes a specific uplift of 1,500 dwellings as a contribution to the unmet housing need forecast to arise within the Black Country. As documented within 4.13-4.16 of this document, this is considered an appropriate contribution to the unmet housing need forecast to arise within the Black Country.
- f. The level of housing associated with Option 3 is sufficient to allow for a significant positive contribution to the various identified issues and opportunities in Shropshire (when considered in the context of specific policies to positively influence the location, type, tenure, and quality of housing).
- g. It is also specifically responsive to the fact that there is a clear 'overlap' between the way in which an uplift to local housing need and a contribution to the unmet housing need forecast to arise within the Black Country can contribute to supporting the identified issues and opportunities in Shropshire, given that one method of contributing to their achievement is more housing.
- h. A series of consultations have been undertaken regarding the proposed level of residential development to include within the draft Shropshire Local Plan (as summarised within paragraph 4.32). Having carefully reflected upon these responses, Shropshire Council considers that the level of housing associated with Option 3 positively responds and balances the range of issues, considerations and differing perspectives raised.
- i. The level of housing proposed is consistent with that currently proposed within the draft Shropshire Local Plan. As such, it is a level of development that has been subject to public consultation and to which communities are familiar.
- j. As documented within ID28, the proposed housing requirement is to be expressed as a 'minimum' rather than as 'around'. This means there is significantly more certainty about the minimum level of housing to be provided, but equally less flexibility to deliver less than the proposed housing requirement (although flexibility continues to exist to exceed the proposed housing requirement). Shropshire Council considers that Option 3 positively responds to the fact that the housing requirement is a 'minimum'.

4.74. In conclusion having considered the available evidence, responses to previous consultation and the results of technical assessment in applying planning judgement, Shropshire Council considers that the housing requirement within the draft Shropshire Local Plan should be based on **Option 3** of the reasonable options identified.

4.75. **The proposed housing requirement is therefore a minimum of 30,800 dwellings (including a 1,500 dwelling contribution to the unmet housing need forecast to arise within the Black Country), which equates to an annual average of around 1,400 dwellings.**

Implications of the Proposed Housing Requirement

4.76. The proposed housing requirement is consistent with that previously proposed within the draft Shropshire Local Plan. As such, Shropshire Council considers that the strategy for achieving the proposed housing requirement proposed within the draft Shropshire Local Plan remains appropriate.

4.77. As a result, only minimal modifications would be required to reflect this proposal. Specifically, draft Policy SP2 will require a main modification to expressly state the proposed housing requirement of 30,800 dwellings includes a 1,500 dwelling contribution to the unmet housing need forecast to arise within the Black Country.

Housing Land Supply

4.78. Based on the proposed housing requirement identified within this Topic Paper, Shropshire Council considers that an appropriate and robust housing land supply exists, both over the next five years and over the entirety of the proposed local plan period. As such, it is not considered that additional allocations are required in order to ensure the achievement of the proposed housing requirement.

4.79. The most recent assessment of housing land supply in Shropshire, based on the proposed housing requirement, is summarised within the **Five Year Housing Land Supply Statement (2022) - Draft Shropshire Local Plan**. Shropshire Council considers the assessment summarised within this document represents a cautious and robust assessment of housing land supply.

4.80. With regard to the five year period from 2022/23-2026/27, the assessment concludes that a **6.52 years' supply of deliverable housing land is available**.

- 4.81. With regard to the proposed plan period from 2016-2038, the assessment concludes that given existing completions of 10,254 dwellings from 2016/17 to 2021/22, **sufficient deliverable or developable housing land is available to deliver 34,842 dwellings.**
- 4.82. This is sufficient to achieve the proposed housing requirement of 30,800 dwellings, with sufficient additional supply available to provide for **around 10% flexibility** within the supply above the proposed housing requirement. This is summarised within Table 4.2.

Table 4.2: Housing Land Supply across the Proposed Plan Period

Category	Net Dwellings
<i>Completions 2016/17 – 2021/22:</i>	10,254
<i>Years 1 - 5 Supply:</i>	10,044
<i>Year 6 - 10 Supply:</i>	8,591
<i>Years 11 - 15 Supply:</i>	4,782
<i>Years 16+ Supply:</i>	1,171
Total:	34,842

- 4.83. The spatial distribution of this supply is summarised within Table 4.3 which addresses the Strategic, Principal and Key Centres, Table 4.4 which addresses the Strategic Settlements, Table 4.5 which addresses Community Hubs, and Table 4.6 which addresses Community Clusters and the wider rural area.
- 4.84. It should be noted that the windfall allowance to achieve proposed settlement guidelines and the windfall allowance within the housing land supply differ in that the allowance within the housing land supply is responsive to and informed by past trends rather than being limited to that specifically required to achieve proposed development guidelines. However, the nature of the windfall allowance within the housing land supply is that it is not identified to specific locations, rather it is across the entirety of the Shropshire geography.
- 4.85. Ultimately, it is apparent that sufficient housing land supply exists to provide significant confidence regarding the deliverability of the proposed housing requirement for inclusion within the draft Shropshire Local Plan.

Summary

4.86. Figure provides a succinct summary of local housing need, the uplift above need to the proposed housing requirement, and the identified housing land supply:

Figure 4.2: Overarching Summary of the identified Housing Need, proposed Housing Requirement and identified Housing Land Supply

5. Employment

Local Employment Land Need – process

- 5.1. National Planning Practice Guidance (NPPG) advises strategic policy making authorities: *“to develop an idea of future [employment land] needs on a range of data which is current and robust, such as:*
- *sectoral and employment forecasts and projections which take account of likely changes in skills needed (labour demand);*
 - *demographically derived assessments of current and future local labour supply (labour supply techniques);*
 - *analysis based on the past take-up of employment land and property and/or future property market requirements.”*
- [NPPG Paragraph: 027 Reference ID: 2a-027-20190220]
- 5.2. Shropshire Council commissioned economic forecasts for the County from Oxford Economics in 2016. These forecasts were considered to underestimate the performance of the County but informed the commission of the Economic Development Needs Assessment (EDNA) (EV042) finalised in 2021. The EDNA provided an Experian Baseline Forecast (2020 base date) of ‘labour demand’, as one of five growth scenarios including employment needs for our ‘labour supply’ due to changes in our housing supply, to indicate Shropshire’s employment land needs.
- 5.3. The EDNA assessed our ‘labour supply’ need to be at least 140.9 hectares (ha), to balance the housing growth indicated by the Standard Methodology. The EDNA also assessed our ‘labour demand’ need to be at least 161.9ha of land, from the Experian baseline forecast of our economic growth.
- 5.4. The EDNA recognised that Shropshire’s employment land need must be adjusted upwards to contribute towards unmet employment land need forecast to arise in the Black Country. Consequently, the EDNA increased each of the five growth scenarios by an additional 30ha (EDNA, paragraphs 9.28-9.29, page 121) to recognise the Duty to Cooperate discussions with the Black Country Authorities.
- 5.5. The employment land need for Shropshire, consequently considered the job needs of our growing population, the labour demands of the expanding business base of our local economy and a contribution towards unmet employment land needs in the Black Country.
- 5.6. These assessments of need, even with the contribution to the Black Country, were lower than anticipated from the past performance of the County. This was due in part, to the density assumptions applied in the EDNA, and when compared to past trends in Shropshire, were found to be unrealistically high for most employment locations. The

Employment Topic Papers (EV112/GC4n) consequently adjusted the assessments of need from a 40% density applied in the EDNA, to a density of 26% for Shropshire.

- 5.7. This lower density required an additional amount of land to achieve the floorspace output assumed in the EDNA growth scenarios. This adjustment reflected the actual density of commercial development identified from data used in the Shropshire Authority Monitoring Report 2020 (EV012). This shows how the density of commercial development varies from 'whole County' to delivery in the principal settlements on the strategic corridors. This is set out in Employment Topic Paper (EV112) in paragraphs 5.24 to 5.36.
- 5.8. This consideration of local evidence is advocated in the NPPG (NPPG Paragraph: 025 Reference ID: 2a-025-20190220) and was a finding in the EDNA in paragraph 9.8 (EV043). This consideration of local evidence is explained in Employment Topic Paper (EV112) in paragraphs 5.4 to 5.7 which notes: '*The EDNA finds the Council's own evidence from monitoring past take up and delivery of developed land and floorspace provide an equally strong method for assessing the further employment land needs of the [County]*'.

Local Employment Land Need – conclusions

- 5.9. The EDNA (Table 8.17, page 115) found the Shropshire 'only' employment land need from growth in the 'labour supply' to be 140.9ha (in '*Current Standard Methodology*') and from growth in the 'labour demand' to be 161.9ha (in '*Experian June 2020 Baseline*').
- 5.10. The Employment Topic Paper (EV112) adjusted these levels of need to reflect the density of development across Shropshire. The 'labour supply' need increased to 217ha (at 9.9ha each year), and the 'labour demand' need increased to 250ha (at 11.4ha each year). The baseline employment land needs for the Plan period therefore ranged from 217ha to 250ha.
- 5.11. The adjustments to the density assumptions reflected the variations in the density of development across Shropshire in the Employment Topic Paper (EV112 in paragraphs 5.24 to 5.36). These adjustments are also consistent with evidence of historical need in the Employment Topic Paper (EV112 in paragraphs 4.4 to 4.7, pages 20-21). This shows the regional spatial strategy identified 216ha, adjusted upwards to 288ha. The Core Strategy identified a need for 249ha from evidence of past take up, adjusted upwards to 290ha recognising that it constituted a 'high growth' plan.
- 5.12. This historical evidence indicates the proposed assessments are generally consistent. However, the proposed plan period is different

covering an additional 2 years. The proposed employment land requirement would therefore be higher than the historical requirements.

- 5.13. This response to the Inspector's Interim Findings also proposes an adjustment to the assumption about the 30ha contribution towards unmet employment land needs in the Black Country.
- 5.14. The identification of a specific site to satisfy the unmet employment needs, to be located at the Key Centre of Shifnal in the M54 Strategic Corridor, will guarantee a higher density of development for the 30ha contribution. The expectation of this higher density is already included in the development guidelines for the proposed site allocation, which is employment allocation SHF018b & SHF018d at Shifnal. This proposed employment allocation for 39ha seeks a net delivery at 40% equal to 15.6ha of built development (Gross External Area).
- 5.15. This assumes the delivery of the 30ha contribution will reflect the historical delivery in Principal Settlements on Strategic Corridors shown in Table 25 of EV112 (page 41). This reflects some key facts explained in this Topic Paper, that:
- Shropshire will not simply meet its own needs rather it recognises and responds to 'neighbouring' unmet needs and also seeks the benefits of pursuing its aspirations for economic growth. The 30ha contribution to the Black Country unmet need will be met along with Shropshire's local employment land need;
 - Shropshire's local employment land need will also be buffered for flexibility and in response to local economic aspirations, by a percentage uplift on the local need for 250ha;
 - Identification of a specific employment allocation for the unmet need in the Black Country will commit a high quality, strategic employment land allocation comprising:
 - a site of 39ha which provides an implicit buffer of 9ha (+30%) above the proposed 30ha contribution;
 - a site with a development guideline for the provision of 40% built development from the 39ha to be delivered to an agreed masterplan with a design code for matters of detail;
 - Employment land supply (31st March 2020) totals 413ha and already exceeds the proposed 300ha employment land requirement in the draft Shropshire Local Plan by an additional 113ha or +38% above the current proposed requirement.
- 5.16. The inclusion of the 30ha contribution in this way presents an employment land need ranging from growth in the 'labour supply' equal to **250ha** (217+30ha) **at an annual average of 11.4ha**

each year to growth in the 'labour demand' equal to **280ha** (250+30ha) **at an annual average of 12.7ha each year.**

- 5.17. Shropshire Council wishes to ensure the employment land requirement meets the employment needs of its growing population, demand from changes in the size and performance of the business base and from those seeking employment in the County as a result of growth in the local economy. **The 'labour demand' employment land need of 280ha, at an annual average of 12.7ha each year, is therefore considered to be the key determinant for the employment land requirement.**
- 5.18. This is consistent with paragraph 4.20 of the Employment Topic Paper (EV112) which indicates that the minimum employment land requirement would be around 274ha. The annual average of 12.7ha each year (from 280ha) also reflects the evidence of delivery in Shropshire at 12.45ha each year over the four years of the Draft Shropshire Local plan from 2016 to 2020. This is shown in Employment Topic Paper (EV112) at paragraphs 4.17 – 4.20 on pages 22-23.

Local Employment Land Need – implications

- 5.19. The Employment Topic Paper (GC4n) examined the strategic relationships between Shropshire and the Black Country. This considered the geography of adjoining Functional Economic Market Areas (FEMA), the close proximity of strategic investment opportunities and the strategic road and rail network. These functional relationships established that the unmet need in the Black Country is a relevant strategic matter for Shropshire Council.
- 5.20. Duty to Co-operate discussions between Shropshire and the Black Country Association led to the presentation of a Statement of Common Ground (SoCG) (EV041). This SoCG summarised the agreement to a 30ha contribution from Shropshire towards the unmet need forecast in the Black Country.
- 5.21. In ID28, the Planning Inspectors concluded that *"In principle, the Council's intention to address some of the Association of Black Country Authorities (ABCA) unmet needs (1500 homes and 30ha of employment land), aligns with the spirit of the DtC."*
- 5.22. In ID28, the Planning Inspectors also state *"It is clear that the Council and the ABCA authorities are all content with this contribution and this is set out in a Statement of Common Ground (SoCG), signed prior to the submission of the Plan for examination."*

- 5.23. Employment Topic Paper (GC4n) explains the methodology to determine the 30ha contribution (at 1.4ha each year from 2016 to 2038) towards the unmet employment land need. This contribution, which was known when the EDNA was prepared, forms part of the five scenarios for Shropshire's employment land need, in the EDNA.
- 5.24. The updated reasonable options for the employment land requirement, are based on employment land needs which include this 30ha contribution. This contribution is a discrete component of the combined employment land need in the employment land requirement (for its delivery as part of the strategic approach) and the employment land supply (for the location of the development). This fact, and the explanations in paragraphs 5.11-5.15, removes any necessity to uplift the 30ha contribution to the Black Country.

Initial Identification: Reasonable Employment Land Requirement Options

- 5.25. The progress towards an employment land requirement was explained in the Employment Topic Papers (EV112/GC4n). The initial direction for the employment land requirement in the draft Shropshire Local Plan came from the Issues and Strategic Options. This set out broad growth options, to inform the EDNA and other evidence, to help define the employment land requirement for the County.
- 5.26. The Strategic Options identified three reasonable growth options for the employment land requirement over the (then shorter) plan period to 2036. The baseline option sought to maintain the levels of aspiration in the emerging draft Shropshire Local Plan strategy to 2026. This proposed to sustain the existing employment land requirement at 290ha and to deliver similar levels of employment growth.
- 5.27. The first alternative option sought a higher level of growth with a greater number of jobs than the baseline option. The second alternative, sought to positively influence 'productivity' outputs by seeking a greater proportion of higher value investment and higher value jobs using a similar or lower employment land requirement.
- 5.28. This second, 'productivity growth', option sought to influence the structure of the economy, the range and type of employment and the distribution of opportunity to favour locations capable of attracting investment. Whilst initially, a very attractive option, the process of delivering 'productivity' growth is a longer term strategy for Shropshire and not an option to be delivered in a single plan period.

- 5.29. The initial identification of options for a reasonable employment land requirement was therefore a matter of the degree of aspiration for local economic growth. This considered the growth of the business base, the range and scale of employment opportunities, the distribution to communities across the County and the potential to improve the performance of the local economy.
- 5.30. This defined the principal objective for preparing the Draft Shropshire Local Plan. This was to deliver a high growth option which would boost the economic performance of the County and support the implementation of the Shropshire Economic Growth Strategy.

Updated Identification: Reasonable Employment Land Requirement Options

- 5.31. In response to ID28, the reasonable options for the employment land requirement have been updated and expanded. The methodology used here to identify these updated options remains consistent with that used to identify the initial options in the Issues and Strategic Options (EV003.01) and with the evidence in the EDNA (EV043).
- 5.32. The baseline for the updated reasonable options was the 'labour demand' need of 161.91ha in the EDNA. This was adjusted for the lower density of development in Shropshire to 250ha. The addition of a 30ha contribution towards unmet employment land need forecast in the Black Country, totalled to 280ha.
- 5.33. A series of percentage uplifts were identified. These uplifts sought to achieve various levels of economic aspiration for the County. This approach looks beyond simply meeting the employment needs of Shropshire's growing population to include the aspirations of the business community, the unmet needs of 'neighbouring' authorities and demands from those likely to seek employment in Shropshire from the many adjoining, and mostly smaller, local authorities.
- 5.34. The options to achieve Shropshire's broader economic aspirations also provide different levels of flexibility to respond to changing local, regional, national and international economic circumstances. This will help to ensure that the strategic approach for the plan will create opportunities to improve the:
- a. inward investment potential of Shropshire by increasing the number and choice of strategic development opportunities and their distribution around the County;
 - b. sustainability and accessibility of this employment offer by focusing a significant proportion of development into the strategic corridors and principal settlements;

- c. quality, range and choice of floorspace by increasing the supply and distribution of modern business units and commercial premises;
 - d. demand into Shropshire for employment land from a range of business types and sizes supported by:
 - i. promotion of the County as a good investment location and an attractive place for business and enterprise;
 - ii. provision of services to businesses and individuals to build their confidence and skills to make successful investments or encourage entrepreneurship;
 - e. workforce availability within Shropshire through opportunities for education, training and support to build confidence to enter the employment market and to provide the skills needed by businesses.
- 5.35. Further information on these factors is provided in the evidence base prepared to inform the draft Shropshire Local Plan, including the Economic Growth Strategy (EV044), Economic Development Needs Assessment (EV043), Employment Land Review (EV046), Shropshire Authority Monitoring Report (EV012), Employment [Requirement] Topic Paper (EV112), Employment Strategy Topic Paper (GC4n) and the Housing Topic Paper (GC4i).

Updated Reasonable Employment Land Requirement Options

- 5.36. Using the methodology described above, five reasonable options for the employment land requirement have been identified. These are shown in Table 5.1 below.

Identifying Proposed Employment Land Requirement

- 5.37. A planning judgement has been made by the Council to determine which employment land requirement option should form the proposed employment land requirement in the draft Shropshire Local Plan.
- 5.38. There is an extensive range of information to inform this planning judgement which includes the:
- a. responses to the Regulation 18 consultations to inform the draft Shropshire Local Plan and representations to the Regulation 19 consultation on the draft Shropshire Local Plan;
 - b. employment land needs identified in the EDNA;
 - c. purpose and strategy for accommodating the 30ha contribution towards unmet employment land needs in the Black Country;

- d. economic spatial strategy objectives to:
 - i. support an expanding business base to deliver an increasing range and type of investment and employment opportunities;
 - ii. deliver a greater proportion of higher value employment;
 - iii. provide greater choice and competition for employment sites;
 - iv. greater efficiency in the development of employment land;
 - v. broader range of employment generating uses;
 - vi. modernise the commercial building stock and employment floorspace across the County;
 - vii. support the growth and diversification of our labour force;
 - viii. deliver a 'step change' in the growth and productivity of the local economy;
- e. additional SA assessment work;
- f. conclusion that the employment land requirement should be expressed as 'a minimum' rather than 'around';
- g. deliverability of the employment land requirement including matters set out in the Employment Topic papers (EV112/GC4n).

Table 5.1: Updated Reasonable Employment Land Requirement Options

Option	Percentage Uplift Above Minimum Employment Land Need	30 hectare Black Country Contribution
Employment Land Requirement Option 1: Productivity Growth	Uplift around 0%	Yes
<p>Consisting of the identified baseline need of 161.91ha, adjusted from the density standard in the EDNA (at 40%) to the lower density of development at 26% in Shropshire, to give a need of 250ha. This option has the addition of 30ha to contribute towards unmet employment land need forecast in the Black Country. These factors combined would require a minimum of 280ha of land at an annual average of 13ha/yr. This represents the Productivity Growth Option (Option 3) in the earlier SA assessment undertaken for the draft Shropshire Local Plan. This would establish a new strategic approach for the 22-year period from 2016 to 2038. This seeks to capture the potential for higher quality investment in Shropshire and to influence the structure of the economy, the productivity of its sectors and the range, type and quality of new employment. This represents an aspiration for more 'higher value' jobs with a lower employment land requirement and a lower overall provision of new jobs.</p>		
Employment Land Requirement Option 2: Significant Growth	Uplift around 5%	Yes
<p>Consisting of a 5% uplift on the adjusted need for employment land in Shropshire of 250ha over the 22-year period from 2016-2038. This option has the addition of 30ha to contribute towards unmet employment land need forecast in the Black Country. These factors combined would require a minimum of 290ha of land at an annual average of 13.5ha/yr. This represents an uplift on baseline need consistent with Significant Growth Option (Option 1) in the earlier SA assessment undertaken for the draft Shropshire Local Plan. This would provide a significant uplift on the baseline employment land need for the County, with the contribution to the Black Country, to meet some of the demands expressed in Shropshire over the 22-year plan period.</p>		
Employment Land Requirement Option 3: High Growth - Variation 1	Uplift around 10%	Yes
<p>Consisting of a 10% uplift on the adjusted need for employment land in Shropshire of 250ha over the 22-year period from 2016-2038. This option has the addition of 30ha to contribute towards unmet employment land need forecast in the Black Country. These factors combined would require a minimum of 300ha of land at an annual average of 14ha/yr. This would be High Growth Variation 1 which provides an uplift on baseline need consistent with the High Growth Option (Option 2) in the earlier SA assessment undertaken for the draft Shropshire Local Plan. This option would provide an employment land requirement that is the same as the current requirement proposed in the draft Shropshire Local Plan.</p>		
Employment Land Requirement Option 4: High Growth - Variation 2	Uplift around 15%	Yes
<p>Consisting of a 15% uplift on the adjusted need for employment land in Shropshire of 250ha over the 22-year period from 2016-2038. This option has the addition of 30ha to contribute towards unmet employment land need forecast in the Black Country. These factors combined would require a minimum of 315ha of land at an annual average of 14.5ha/yr. This would be High Growth Variation 2 which represents a continuation of the current rate of development in the adopted Development Plan at 14.5ha/yr.</p>		
Employment Land Requirement Option 5: High Growth - Variation 3	Uplift around 20%	Yes
<p>Consisting of a 20% uplift on the adjusted need for employment land in Shropshire of 250ha over the 22-year period from 2016-2038. This option has the addition of 30ha to contribute towards unmet employment land need forecast in the Black Country. These factors combined would require a minimum of 330ha of land at an annual average of 15ha/yr. This would be High Growth Variation 3 following the stepped increases in the uplift above baseline need and including the Black Country contribution. This identifies a scale of development not considered in any preceding stage of the draft Shropshire Local Plan or any preceding Development Plan for Shropshire.</p>		

5.39. Dealing with each in turn:

Consultation Responses

- 5.40. The evidence base and consultation responses that have informed the preparation of the draft Shropshire Local Plan identified a range of issues and opportunities that exist in Shropshire. Key issues and opportunities identified include:
- a. promote the County at national and regional levels to capture greater levels of investment, support key growth sectors and deliver a 'high growth' strategy;
 - b. deliver balanced, mixed use development in key locations to manage travel patterns and promote sustainable travel options;
 - c. deliver sustainable economic growth which increases the size and diversification of the business base and delivers improvements to Shropshire's economic performance and productivity;
 - d. deliver an urban focused strategy to locate opportunities where investment is most likely to be delivered;
 - e. provide a good range and choice of suitably located and deliverable employment land and premises with attractive and accessible strategic investment sites;
 - f. deliver high quality education and training opportunities in further education (FE), higher education (HE) and vocational training;
 - g. deliver good quality housing to meet the full range of housing needs supported by modern retail and leisure services;
 - h. improve the highway and public transport networks especially along the Strategic Corridors including the A49, A5, A458;
 - i. deliver the North West Relief Road to complete the by-passes around Shrewsbury and to facilitate contemporary regeneration investments to support the role and function of the County town.
- 5.41. Key evidence to inform these issues and opportunities includes the local housing need assessments (with EV069), Authority Monitoring Reports (including EV012), Strategic Housing Market Assessment (EV097.01 and EV097.02), Productivity Growth Forecast (EV090), Economic Development Needs Assessment (EV043), Economic Growth Strategy (EV044), Employment Land Review (EV046) and Local Plan Viability Study (EV115.01).
- 5.42. These issues and opportunities were identified in response to the Issues & Strategic Options Consultation (EV003.01 and EV003.02), Preferred Scale and Distribution of Development Consultation (EV004.01 and EV004.02), Regulation 18: Pre-Submission Consultation (EV007.01 and EV007.03), and Regulation 19: Pre-

Submission Consultation (SD002, SD014.01-SD014.02 and formal representations A0001-A0682 and GC4o).

Employment Land Need and Options in the EDNA

- 5.43. The EDNA provided two assessments of need based on the Shropshire 'only' employment land need from growth in the 'labour supply' at 140.9ha and growth in the 'labour demand' at 161.9ha.
- 5.44. These were adjusted to the actual density of development in Shropshire to give a 'labour supply' need of 217ha and a 'labour demand' need of 250ha. The further provision of a 30ha contribution to unmet need in the Black Country indicated final combined needs for 'labour supply' at 250ha and for 'labour demand' at 280ha.
- 5.45. The economic aspirations of the Council required that a number of objectives be considered in determining which of these needs should inform the employment land requirement options shown in Table 5.1.
- 5.46. It was concluded that, it is necessary to ensure the employment land requirement meets the employment needs of the growing population, demand from changes in the size and performance of the business base and from those seeking employment in the County as a result of growth in the local economy. **Therefore, the 'labour demand' employment land need of 280ha, at an annual average of 12.7ha each year, is therefore considered to be the key determinant for the employment land requirement.**
- 5.47. The employment land requirement options now identified within the additional SA assessment work, from the calculated need, range through a rising scale of growth from: Productivity Growth - 280ha, Significant Growth - 290ha, High Growth – Variation 1 – 300ha, High Growth – Variation 2 – 315ha and High Growth – Variation 3 – 330ha.
- 5.48. The EDNA also considered three intrinsic growth options to determine the implications of identifiable growth scenarios for the County. The implications of the identifiable growth scenarios are, the:
- a. Housing Requirement at 30,800dws indicated 151.4ha which adjusted for density and with the addition of the 30ha contribution to unmet need equalled a requirement for 265ha;
 - b. Regeneration Scenario comprising the Economic Growth Strategy (2017) and the programmes, projects and services of the Economic Growth Service supported by The Marches LEP indicated:
 - i. 166.9ha adjusted for density with the addition of the 30ha contribution to unmet need equalled a requirement of 285ha;

- c. Past Take-up over the long term in Shropshire indicated 233.8ha which adjusted for density and with the addition of the 30ha contribution to unmet need equalled a requirement for 390ha.

- 5.49. The intention for the preferred employment land requirement is principally to accommodate the aspirations of the business community and the need to improve Shropshire’s economic performance and productivity. To achieve this principal objective, it is necessary to meet the employment needs of the growing population and demand from those seeking employment in the County, following changes in the size and performance of the business base.
- 5.50. A measure of this objective would be to compare the employment land requirement options to the Regeneration Scenario (as described in paragraph 5.48b above) identified in the EDNA (at paragraph 9.5). This is shown in Table 5.2 below with the reasonable employment land requirement options and a proposed employment land requirement at 300ha.

Table 5.2: Reasonable Employment Land Requirement Options compared with EDNA Regeneration Scenario

Reasonable Options	Employment Land Requirement	Regeneration Scenario indicative requirement	Comparison with Regeneration Scenario	
	hectares		hectares	%
Productivity Growth	280	285	-5	-2%
Significant Growth	290	285	5	2%
High Growth - Variation 1	300	285	15	5%
High Growth - Variation 2	315	285	30	11%
High Growth - Variation 3	330	285	45	16%

- 5.51. This proposed employment land requirement of 300ha allows for a further degree of flexibility above the indicative Regeneration Scenario at 285ha. The preferred employment land requirement over the Plan period would be 14ha/yr or +1.5ha/yr above the current average rate of 12.5ha/yr.

Purpose and Strategy for Co-operating with Unmet Need

- 5.52. The Employment Topic Paper (GC4n in Section 6: ABCA Unmet Employment Needs) explains that Shropshire Council recognised the need to safeguard against the labour market effects of an ageing population in Shropshire, and the effects of significant levels of older in-migrants moving into the County.
- 5.53. It was further recognised that unmet employment needs in the Black Country Authorities would likely create a surplus supply of labour in these four, centrally located, urban authorities which comprise an accessible, vibrant economic area in the centre of the region. These

unmet needs would change the supply, availability and movement of labour in a combined population of around 1.25 million persons.

- 5.54. Shropshire's response to these issues sought in part, to retain more of the County's resident working population, by managing out-commuting, to help drive its own economic growth strategy. A first step towards this, was to achieve a 'net commuting balance' by reducing out-commuting to a level of 'equilibrium' with in-commuting. However, an increase in the number of commuters from the Black Country into Shropshire would also be welcomed.
- 5.55. A critical element of this approach was to recognise the likely impacts of commuting patterns between Shropshire and the Black Country Authority areas. The significant employment opportunities in the Black Country, combined with the proximity of Shropshire, and the connectivity between the two areas, were considered to be contributory factors to the significant unmet employment land need in the Black Country. It was considered that steps to relieve these commuting pressures would have longer term benefits both for Shropshire and for the Black Country Authorities.
- 5.56. A further matter to be considered in this relationship, was addressed by the Examining Authority for the West Midlands Interchange in South Staffordshire. The Examining Authority accepted that the Black Country "*labour pool should support the scale of growth at [the] WMI including residents who are unemployed and those who are not currently economically active but want a job*". However, the Examining Authority wished to ensure: "*there would be an adequate labour pool to support the Proposed Development without a significant adverse effect on the ability of existing businesses [in the Black Country] to fulfil their employment needs*".
- 5.57. In seeking to assist the Black Country Authorities with their unmet need, Shropshire wished to support their capacity to continue to meet their own labour needs. This objective meets the obligations in NPPF, paragraph 81 to "*allow each area to build on its strengths, counter any weaknesses and address the challenges of the future*".
- 5.58. To achieve this objective, Shropshire sought to support the unmet employment need in the Black Country by seeking to influence commuting between Shropshire and the Black Country. This would be achieved in addition to the migration of some labour to new housing in Shropshire. This would also be achieved by managing the scale of the contributions to the Black Country Authorities at 1,500 dwellings and 30ha of employment land, to effectively '*share*' an element of the Black Country labour pool.

5.59. This approach sought primarily to meet the duty to cooperate in satisfying unmet needs across the region but also to ensure that each participating authority would still have the resources necessary to deliver effective planning strategies for their administrative areas.

Issues and Opportunities and the Economic Spatial Strategy

5.60. The consultation responses that informed the preparation of the draft Shropshire Local Plan identified a range of issues and opportunities in Shropshire which are identified above.

5.61. These helped to inform the preparation of the Economic Growth Strategy which sought to capture the broad spectrum of activity required to improve the performance and productivity of the local economy. The strategy also considered how growth might be delivered through a range of further related initiatives including the provision of housing, improvements to the communications networks, support from the public sector and promotion of Shropshire as a good location for investment and enterprise.

5.62. The Economic Growth Strategy is considered to provide the pathway for Shropshire to deliver qualitative improvements to the local economy. It is important for the employment land requirement in the draft Shropshire Local Plan to be of a sufficient scale to achieve these objectives whilst being realistic and deliverable in relation to the evidence in the EDNA and local plan evidence base.

5.63. The Employment Strategy Topic Paper (GC4n in Economic Spatial Strategy paragraph 4.14) captures these objectives including the:

- a. **'step change' in growth and productivity** – to achieve a 'step change' in Shropshire's economic performance by offering higher quality investment opportunities and improving the quality of the employment offer to retain skilled and qualified people;
- b. **expanding business base of investment and employment** – to improve Shropshire's economic investment potential particularly in significant commuting locations from vibrant urban markets with higher concentrations of labour, skills and qualifications offering opportunities for higher quality investment and employment uses;
- c. **growth and diversification of labour force** - to balance new economic development and employment generation with the delivery of new housing especially in urban centres to help achieve the key economic objectives of Shropshire's strategic approach;
- d. **range of employment generating uses** – to reflect the changes to the Use Classes Order and the introduction of Class E to capture the broader contribution to the employment offer in the County;
- e. **delivery of more higher value employment** - to support the working age population especially professionals and key workers to

live and work in Shropshire by offering good quality job opportunities with career advancements and to reduce the under-employment of skilled people;

- f. **choice and competition for employment sites** – to deliver an employment land requirement that improves Shropshire’s investment potential and job opportunities, shaping an employment land supply offering a range, choice and quality of locations and opportunities;
- g. **greater efficiency in the development of employment land** - to deliver more effective planning of development on employment land to improve the density of land use, delivery of floorspace and out-turn of jobs to meet Shropshire’s economic needs;
- h. **modernise the supply of commercial premises** - to replenish the building stock with modern premises and reduce the loss of good quality employment land and floorspace to other uses.

Additional Sustainability Appraisal Assessment Work

- 5.64. The additional SA assessment work provides a crucial source of information to inform the planning judgement regarding which reasonable employment land requirement option should form the basis for the strategic approach in the draft Shropshire Local Plan.
- 5.65. The additional SA Assessment assessed each option against the SA objectives to reach a conclusion about their relative sustainability. These options ranged through five scales of growth comprising 280ha, 290ha, 300ha, 315ha and 330ha as shown in Table 5.1.
- 5.66. In general terms, the additional SA assessment work concludes that a greater scale of growth in any option would increase the likelihood of positive impacts on social and economic factors. Conversely a greater scale of growth would increase the likelihood of negative impacts on environmental factors. It is important to seek a balance across the social, economic, and environmental objectives of the SA process to satisfy the principle of ‘sustainable development’.
- 5.67. The additional SA assessment work concluded that:
 - a. Option 5 High growth -Variation 3 might result in negative and positive impacts on a number of SA objectives. These conclusions arise from the proposed scale of growth being far greater than any employment land requirement previously proposed for Shropshire;
 - b. Options 1 and 2 for Productivity Growth and Significant Growth respectively would be deliverable as they achieve or exceed the identified local employment land need and provide a 30 hectare contribution to the unmet employment needs forecast in the

Black Country. These options also have many positive benefits (Option1) or neutral impacts (Option 2) on the environmental SA objectives. However, it is questionable whether the scale of growth proposed in either Option 1 or 2 would provide an appropriate strategy for Shropshire and to deliver SA objective 2: to encourage a strong and sustainable economy;

- c. Options 3 and 4 for High Growth – Variations 1 and 2 respectively propose a scale of employment development similar to that in the draft Shropshire Plan (Option3) and similar to the rate of development in the adopted Development Plan (Option4). The SA assessment would suggest:
 - i. Option 4 with its higher scale of growth would positively encourage a strong and sustainable economy. This would however, negatively affect a number of SA Objectives including objective 1 to protect biodiversity and the quality and extent of habitats; objective 6 by increasing car usage and distances travelled; and objectives 10, 14, 15 and 16 to reduce flood risk, manage the demand for natural resources, protect heritage assets and their settings and conserve landscape character and distinctiveness.
 - ii. Option 3 with its slightly lower scale of growth as the central option in the 5 options, still positively encourages a strong and sustainable economy. Further, Option 3 is comparable to the scale of growth (also at 300ha and around 14ha/yr) in the draft Shropshire Local Plan. The draft Shropshire Local Plan also provides a strategic approach with a strategic and local policy framework to achieve this scale of growth. This would provide confidence that Option 3 is consistent with the economic growth aspirations and capable of being delivered within the environmental objectives for Shropshire. Option 3 provides largely positive, neutral or anticipated neutral impacts across the SA objectives. This achieves a balance across the social, economic, and environmental objectives as the three pillars for achieving 'sustainability'.

5.68. Further detail on the outcomes of this additional SA assessment work is provided within the Additional SA Report.

Expression of the Employment Land Requirement

5.69. Throughout the preparation of the draft Shropshire Local Plan, it was expected that the scale of development to be delivered would be 'around' the scale of the proposed employment land requirement in the draft Shropshire Local Plan.

- 5.70. In ID28, the Planning Inspectors concluded that the employment land requirement should actually be expressed as 'a minimum' *"for both monitoring and effectiveness"* of the Local Plan.
- 5.71. Shropshire Council accepts this principle. However, the implications require careful consideration in the context of identifying which of the reasonable employment land requirement options should form the basis for the proposed requirement in the draft Shropshire Local Plan.
- 5.72. Where the employment land requirement is expressed as 'around', this would not provide a definitive minimum or a definitive maximum, but rather, a general target for the scale of development to be delivered. Where the requirement is to be expressed as 'a minimum' it would constitute a definitive minimum. This would caution against proposing an employment land requirement with a scale of growth that might be regarded as being too high and instead, support a realistic and achievable scale of aspirational growth. It is considered that this objective is achieved in Table 5.2.
- 5.73. The assumption would follow that, the scale of development to be delivered would not fall short of the requirement but may reasonably exceed this requirement. This may of course be subject to consideration of the wider policy objectives and the economic circumstances that prevailed through the Plan period. However, this approach would be supported by Shropshire Council and a greater scale of employment development would be supported by the Shropshire Economic Growth Strategy.

Deliverability

- 5.74. The proposed employment land requirement should meet local need and facilitate the contribution towards unmet needs in the Black Country. In addition, the requirement should accommodate the aspirations of the business community and the need to improve Shropshire's economic performance and productivity.
- 5.75. To achieve these objectives the employment land requirement must be deliverable and there should be evidence to justify the level of aspiration indicated by the requirement. This would again suggest proposing an employment land requirement that provided a reasonable and deliverable scale of growth.
- 5.76. In Employment Topic Paper (EV112), the Shropshire Authority Monitoring Report (2020) was found to indicate that the:
- a. average development rate in Shropshire from 2016 to 2020 has increased and regained the historical rate of 12.5 ha each year only previously achieved from 1989 to 2006;

- b. Employment development in Shropshire from 2016 continued to fluctuate with a lower level of 10.5ha in 2016-17 and 6.8ha in 2018-19 reflecting changes in the regional and national economy;
 - c. However, development in 2017-18 (15.2ha) and particularly in 2019-20 (17.4ha) significantly exceeded any historical records and on average saw the rate of development in Shropshire return to rates only previously experienced before 2006;
 - d. This occurred despite the anticipated effects of Brexit and the emergence of the coronavirus Covid-19. In fact since 2016, Shropshire has seen the average rate of development increase by +30% from 9.6ha each year to 12.5ha each year;
 - e. This positive response in Shropshire to the recent economic circumstances, coincided with the publication of the first Shropshire Economic Growth Strategy (2017) and the restructure of the County Economic Growth Service;
 - f. the experience of the business community in Shropshire since 2016, supported by their partnership with the public sector, appears to have encouraged investment confidence contrary to the anticipated outcomes;
 - g. the evidence of recent, higher annual completions in Shropshire, which took the average rate of development to 12.5 ha each year, would indicate the deliverability of a higher aspirational option for the employment land requirement;
- 5.77. Shropshire has an average rate of delivery of 12.5ha/yr from 2016 to 2020. It is reasonable to propose that Option 3 – High Growth - Variation 2 at 300ha, would represent an aspirational and deliverable employment land requirement to support economic growth in Shropshire. This 300ha requirement would have an annual rate of development of 14ha each year which would be +1.5ha/yr above the current average rate of delivery at 12.5ha/yr in Shropshire.

The Proposed Employment Land Requirement

- 5.78. Shropshire Council has carefully considered the findings and conclusions of the EDNA. This includes the economic forecasting undertaken to inform the economic growth options for the employment land needs in Shropshire to 2038. This also includes the agreed 30ha contribution in Shropshire towards unmet employment land needs forecast to arise in the Black Country. Shropshire Council has also considered local evidence of the needs in Shropshire including evidence of the density of development in the County.
- 5.79. Shropshire Council proposes to uplift local need at 250ha by 10% to deliver an employment land requirement that recognises the extensive range of information about the economic needs and

opportunities in the County and also makes a contribution to unmet need in the Black Country. This also takes account of the local evidence and conclusions in the Employment Topic Papers (EV112/GC4n).

5.80. All these considerations underpin the assessments of the reasonable options for the employment land requirement and the planning judgement of the appropriate employment land requirement for the draft Shropshire Local Plan and its employment strategy.

5.81. In conclusion, Shropshire Council proposes that **Option 3** provide the employment land requirement for the draft Shropshire Local Plan.

5.82. **Option 3: High Growth – Variation 1, comprises the EDNA employment land need in the Experian economic baseline forecast (2020) with a contribution towards unmet employment land needs forecast in the Black Country.**

5.83. **The Shropshire employment land need of 161.9ha was adjusted for the density of development in Shropshire to 250ha.**

5.84. **A 10% uplift of 25ha above the Shropshire need of 250ha with a 30ha contribution to the Black Country, gives a proposed, 'minimum' employment land requirement of 300ha for the Plan period from 2016-2038, at an annual average of 14ha/yr.**

Reasons for the Proposed Employment Land Requirement

5.85. The Council's planning judgement to determine the proposed employment land requirement for the draft Shropshire Local Plan required a detailed consideration of the evidence base and objectives for the Council's preferred employment strategy.

5.86. Key considerations included:

- a. **Option 3 delivers High Growth - Variation 1.** The level of employment land proposed in Option 3 is considered to be **responsive to the principle of and will deliver High Growth.** This is the same as the proposed requirement in the draft Shropshire Local Plan and is consistent with the strategic approach of the draft Shropshire Local Plan and the strategic and local policy framework. This employment land requirement is considered to be consistent with the objectives of the economic spatial strategy as it:
 - i. meets the local need for employment land at 250ha anticipated from growth in the business base;

- ii. includes an additional buffer above local need of 25ha to provide flexibility at an appropriate level above local need;
 - iii. includes an additional contribution of 30ha towards unmet employment land need in the Black Country;
 - iv. ensures the flexibility to provide confidence in the delivery of the local and 'neighbouring' unmet needs within Shropshire;
 - v. positively supports the ability to address identified issues and opportunities in Shropshire and particularly to achieve the objectives of the Shropshire Economic Growth Strategy.
- b. The level of employment land required in Option 3 is responsive to the:
- i. employment needs of the growing population of Shropshire and from those seeking employment in the County;
 - ii. demands from increases in the size and performance of the business base of the local economy
 - iii. need to co-operate with neighbouring Functional Economic Market Areas by contributing towards unmet need and to address changing circumstances including the limitations in the strategic land supply in some key areas of the West Midlands region
 - iv. available information on delivery trends in the County where shorter term delivery identifies an increasing demand for employment land compared to longer term trends;
 - v. the need to provide sufficient flexibility to respond to the uncertainty in the performance of the local, regional, national and international economy.
- c. Option 3 for 300ha as an aspirational but deliverable requirement responds to the historical assessments of employment land need and requirements as indicated in the Employment Topic Paper (EV112 in paragraphs 4.3-4.7 and 4.19-4.20). This identified that the employment land requirement would likely exceed 274ha at 12.7ha/yr. This is reflected in the recent delivery of 12.45ha/yr in the first four years of the draft Shropshire Local Plan from 2016 to 2020. This period includes years where delivery far exceeded the average as a result of increasing demand in Shropshire.
- d. Option 3 for 300ha with a scale of growth that defines the central point of the 5 reasonable requirement options, still positively encourages a strong and sustainable economy. The draft Shropshire Local Plan also provides a strategic approach with a strategic and local policy framework to achieve this scale of growth. This would provide confidence that Option 3 is

consistent with the economic growth aspirations and capable of being delivered within the environmental objectives for Shropshire. Option 3 provides largely positive, neutral or anticipated neutral impacts across the SA objectives. This achieves a balance across the social, economic, and environmental objectives as the three pillars for achieving 'sustainability'.

- e. The intention for the preferred employment land requirement is principally to accommodate the aspirations of the business community and the need to improve Shropshire's economic performance and productivity. To achieve this principal objective it is necessary to meet the employment needs of the growing population and demand from those seeking employment in the County, following changes in the size and performance of the business base. Therefore, it is considered appropriate to identify an employment land requirement of 300ha which would be supported by evidence provided by the EDNA.
- f. Employment Topic Paper GC4n in paragraphs 6.16 and 6.17 identifies that Shropshire and the Black Country recognise their mutual objectives under paragraph 26 of the NPPF where:
 - i. Shropshire and the Black Country have mutual objectives for their emerging Local Plans and these strategic policy-making authorities are working towards the "production of a positively prepared and justified strategy" for their respective administrative areas;
 - ii. This 'mutuality' seeks to counter challenges created by the more limited development capacity of the Black Country which is proposed to be achieved in Shropshire by:
 - further facilitating the Black Country Authorities to access the strategic corridors, principal settlements and land resources in the adjacent sub-regional area; and
 - using the land resource capacity of Shropshire to support the sustainable growth of their local economy;
 - helping to meet some of the investment demands in the business markets and some of the employment needs in the labour markets of the Black Country;
- g. The requirement for 300ha includes a specific contribution of 30ha towards the unmet employment land needs in the Black Country. This is considered to be an appropriate contribution at this time and would also support further co-operation with neighbouring Functional Economic Market Areas (FEMA) in order to strengthen the strategic relationships between Shropshire and neighbouring authorities.

- h. The evidence base and consultation responses that have informed the preparation of the draft Shropshire Local Plan identified a range of issues and opportunities for Shropshire. In response to these matters, it is important to recognise that Option 3 for 300ha is the same scale of growth previously proposed in the draft Shropshire Local Plan. This employment land requirement is consistent with the strategic approach and the robust policy framework in the draft Shropshire Local Plan. This will support the delivery of a sustainable pattern of development in Shropshire.
- i. This provides confidence that a requirement of 300ha is consistent with the economic growth aspirations for the County and can be delivered within the environmental objectives for Shropshire. This will ensure the strategic approach in the draft Shropshire Local Plan, with this employment land requirement, will address the issues, considerations and perspectives identified in the formal consultation responses.
- j. Shropshire Council accepts the principle of the employment land requirement being a 'minimum' that should be achieved. The proposed requirement of 300ha is considered to be deliverable as a 'minimum'. It is recognised that where the 'minimum' requirement might be exceeded, as a result of additional demand being expressed in Shropshire, it is possible to deliver a higher level of employment development.

5.87. In conclusion, considering the available evidence, responses to previous consultation and the technical assessments to support the planning judgement, Shropshire Council considers the employment land requirement in the draft Shropshire Local Plan should be **Option 3 for 300ha** from the updated reasonable options in this Topic Paper.

5.88. The proposed employment land requirement is a minimum of 300ha (including a 30ha contribution to unmet employment land need forecast in the Black Country), which equates to an annual average of around 14 hectares each year.

Implications of Proposed Employment Land Requirement

5.89. The proposed employment land requirement of 300ha is the same as the scale of development previously proposed within the draft Shropshire Local Plan. As such, Shropshire Council considers the strategy in the draft Shropshire Local Plan, for achieving this

employment land requirement, remains appropriate and is consistent with the requirement.

- 5.90. As a result, only minimal modifications would be required to reflect this proposal. Specifically, draft Policy SP2 will require a main modification to expressly state, the proposed employment land requirement of 300ha assumes the employment land needs of the County include a 30ha contribution towards unmet employment land needs forecast in the Black Country.
- 5.91. Policy SP2 will be modified to show the employment land requirement is proposed as a minimum level of employment development in Shropshire to 2038. The Shropshire Local Plan therefore anticipates the employment land requirement may be exceeded over the Plan period to 2038. This provides an implicit flexibility in the employment strategy in the Shropshire Local Plan.

Employment Land Supply

- 5.92. Shropshire Council has identified an employment land supply of 413 hectares (ha) which will meet the needs of the County and the demands of the local economy over the proposed local plan period.
- 5.93. This employment land supply captures the benefits of the committed land supply (102ha) and the 'saved' employment allocations (128ha) and proposed allocations (134ha) to address distribution shortfalls in the centre, east and south of the County.
- 5.94. The most recent assessment of the employment land supply in Shropshire, is in the Authority Monitoring Report (2020) (EV012). Shropshire Council has summarised this in Table 5.3 below. This is considered to represent a suitable and sustainable employment land supply for the Plan period to 2038.
- 5.95. The employment land supply in **Error! Reference source not found.** would facilitate the following distribution of employment development shown in Figure 5.1:

Figure 5.1: Distribution of Employment Development

Location	hectares	%
Strategic Centre (Shrewsbury)	105	25.4
Principal Centres	155	37.5
Key Centres	84	20.4
Strategic Settlements	12	2.9
Community Hubs	10	2.4
Community Clusters	4	1.0
Rural Areas	44	11.0
SHROPSHIRE	413	100

- 5.96. It should be noted that for the plan period 2016 to 2038, with existing completions from 2016/17 to 2019/20 at just below 50ha, there is still **sufficient deliverable or developable employment land to deliver 363ha of employment development to meet the residual requirement for 252ha at around 14ha each year.**
- 5.97. The employment land supply of 363ha is more than sufficient to achieve the residual employment requirement of 252ha. This provides an additional supply for **around 44%** above the residual employment land requirement.
- 5.98. It is recognised that proposed allocation SHR166 Land to the west of the A49, Shrewsbury (45ha) has now been Scheduled as a Monument by Historic England. Whilst yet to be discussed at the Examination, it is recognised this may affect the developable supply of 363ha by reducing it towards 318ha. However, employment development of 48ha from 2016 to 2020 has also reduced the proposed requirement from 300ha to 252ha. Where the County had a supply closer to 318ha (rather than 363ha) there would still be a surplus of 66ha (+26%) to deliver the residual 252ha requirement.

Table 5.3: Strategic Employment Land Supply (31st March 2020)

Location	Completions	Permissions	Allocations		SUMMARY OF SUPPLY
			Saved without Permission	Proposed in Draft Plan	
			hectares

Former Ironbridge Power Station				6.0	6.0
Rural Settlements & Countryside	20.2	23.0	0.3		43.5

Delivery of Labour

- 5.99. A key step towards sustaining the growth of the local economy and achieving the levels of employment growth will be the provision of sufficient labour within or accessible to the County.
- 5.100. Further to the Council's submissions on labour supply in the Stage 1 Hearings on Matter 4, the Council presents in Table 5.2 an update of the Shropshire Labour Supply Balance. This would adjust the forecast jobs growth in Table 5.2 from the previous 19,667 jobs to 20,382 jobs from the proposed employment land requirement.
- 5.101. The proposed employment land requirement of 300ha based on the adjusted Experian Baseline Forecast of 250ha would deliver 16,700 jobs (EDNA Tables 8.1 and 8.3 pages 98 and 100). The uplift of the Experian Baseline Forecast by 10% to 275ha would increase the delivery of employment to 18,370 jobs (16,700+1,670). The addition of a 30ha contribution to unmet employment land needs in the Black Country would increase the delivery of employment by 2,012 jobs to 20,382 jobs (18,370+2,012). This expects that 16,700 jobs on 250ha (249ha actual) would deliver around 67.07 jobs/ha.
- 5.102. The provision of Class B or equivalent jobs would provide 6,591 jobs from a total of 16,700 jobs. A 10% uplift of 1,670 jobs would provide a further 659 jobs in Class B or equivalent uses. A contribution of 2,012 jobs to unmet need in the Black Country would provide a further 794 jobs. This would total to 8,044 jobs in Class B or equivalent uses. This anticipates that 16,700 jobs providing 6,591 jobs in Class B or equivalent uses is 39.46% of the total jobs.
- 5.103. The proposed employment land requirement of 300ha using the Experian Baseline Forecast is expected to deliver around 20,382 jobs with 8,044 jobs in Class B or equivalent land uses. The EDNA anticipates that past take up might extend this provision upwards towards 29,178 jobs or even higher to 35,637 jobs.
- 5.104. This update responds to the discussion on this issue at the Matter 4 Hearing. This relates to the forecast in the EDNA (paragraph 8.55 and Table 8.11 on page 108) that the housing requirement of 30,800dws (around 1,400dws each year) would provide sufficient labour in Shropshire to support 12,145 jobs.
- 5.105. This update to the Labour Supply Balance further sets out the Shropshire response to the national challenge of delivering a sustainable labour supply in a population with an increasingly older demographic. This would draw on sources of labour currently affected by unemployment, commuting patterns and economic inactivity due to family or personal circumstances or retirement.

- 5.106. These further considerations include opportunities to improve the labour supply that are being explored and addressed by HM Government. The effect on the Shropshire labour force balance at June 2023 can be explored using the NOMIS Labour Market Profile for Shropshire at 2021.
- 5.107. HM Government policy and initiatives are considered to have contributed to changes and improvements in the labour force in Shropshire. The position from the previous NOMIS Profile 2020, sought to reduce unemployment from 3.6% at 5,400 persons to 2.6% at 3,900 persons. NOMIS 2021 shows unemployment reduced to 3.0% at 4,600 persons giving Shropshire a Labour Market Premium of +800 persons with a prospect for a further 0.5% reduction with an additional +766 persons.
- 5.108. The labour force balance in **Error! Reference source not found.** identifies the unemployment premium and the following further characteristics of the Shropshire response to the labour force balance to sustain the projected growth in the local economy:
- a. the proposed employment land requirement with the contribution to the Black Country is expected to influence commuting patterns between Shropshire and the Black Country with the effect of retaining or drawing a further 2,300 persons into the Shropshire labour force:
 - a. the proposed employment land requirement would require a significant degree of draw down of labour from those currently economically inactive who wish to secure work. This may require all those people who are economically inactive and seeking work to enter the labour force
 - b. the effect of a higher provision of employment would require a significant degree of drawdown of labour from those currently excluded from the labour force for reasons of health or other matters that result in their exclusion. This would require a fuller degree of inclusion for the highest levels of jobs growth;
 - c. the effect of achieving the highest provision of employment would further require a significant drawdown of older people choosing to defer their retirement to sustain their income.
 - d. the effect of achieving the highest provision of employment would provide a further labour force premium in attracting further migrant or commuting labour into the County either to access work or to live and work in Shropshire.

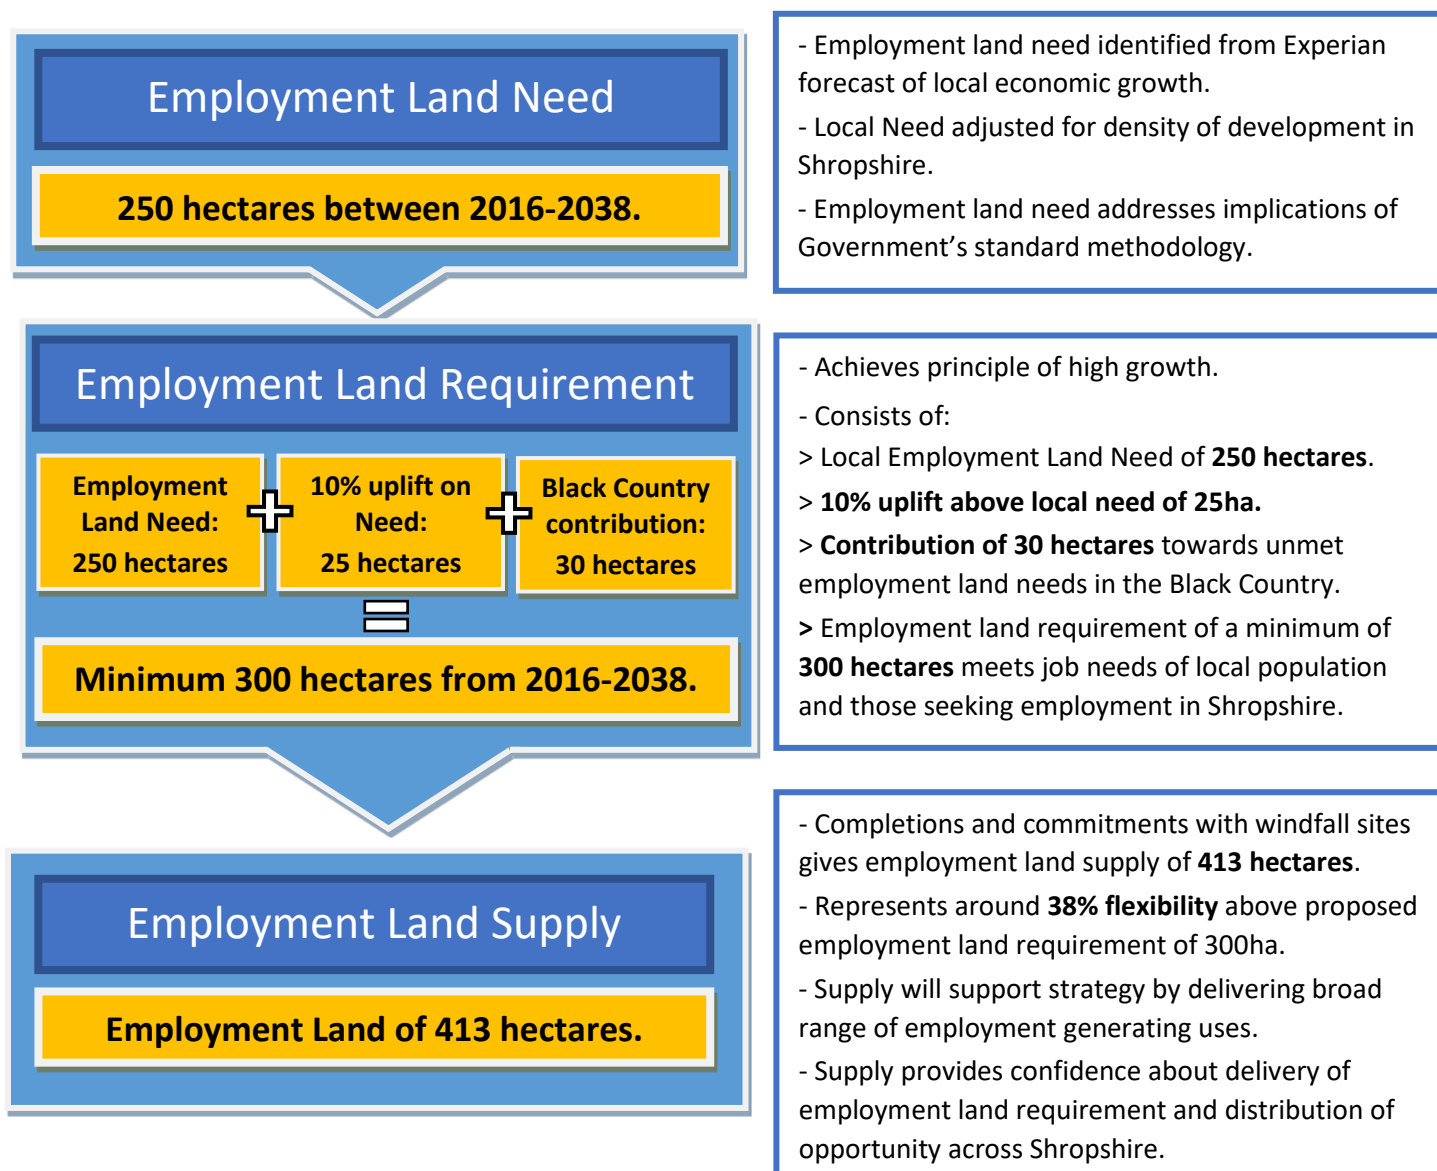

Table 5.4: Shropshire Labour Supply Balance (June 2023)

Factors	Influences	Employment and Labour Projections						
		Experian Baseline uplifted 10% PLUS 30ha	Lower Range		Upper range			
			Future Projection		Future Projection with Actual Development		Future Projection	
			low	high	low	low	high	
numbers								
PROJECTED EMPLOYMENT GROWTH	Overall Employment Generation	20,382	29,178		35,637			
	- Office, Industrial, warehousing/logistics	8,044	14,035	17,944	14,047	14,041	17,961	
Migrant Labour Force Growth (projected)	- working age migrants from anticipated trends including: in-migration from ABCA through meeting 1,500 dwellings of unmet housing need	12,145	12,145		12,145			
Moving from Net Out-Commuting to Net In-Commuting	- to reduce out-commuting towards equilibrium		5,665		5,665			
	- in-commuting from ABCA through meeting 30 hectares of unmet employment land need	2,300	2,300		2,300			
Managing Unemployment and <i>NOMIS Labour Market Profile 2021</i>	- Unemployment 2020 (4,600 persons reduce from 3.0% to 2.5%)	766	766		766			
	- Economic Inactivity: 4,800 persons want a job	4,371	4,800		4,800			
	- Health & Well-Being Agenda: reducing inactivity by 15%		2,702		2,895			
	- Social Inclusion Programme: from 19,300 persons				1,660			
Labour Force Premium	- Extended Careers: 20% defer retirement from 8,300							
	- reduced unemployment by 0.6% from 5,600 persons in 2020 to 4,800 persons in E302021 (NOMIS)	800	800		800			
	- employment growth attracting more in-commuters and /or - improving housing choice attracting more working migrants				4,606			
TOTAL LABOUR SUPPLY		20,382	29,178		35,637			

Summary

5.109. Figure 5.2 provides a summary of local employment land need, the contribution towards unmet need in the Black Country and the uplift above local need to identify the proposed employment land requirement. Figure 5.2 also identifies the employment land supply.

Figure 5.2: Summary of Employment Land Needs, proposed Employment Land Requirement and Employment Land Supply

6. Strategic Distribution of Planned Development

Introduction

- 6.1. This section of the Topic Paper addresses the proposed strategic distribution of planned development, which establishes the overarching approach to the distribution of development across Shropshire.
- 6.2. The proposed strategic distribution of planned development forms an important component of the proposed spatial strategy.

Initial Identification: Reasonable Options for the Strategic Distribution of Planned Development

- 6.3. Within the Issues and Strategic Options Consultation Document prepared to inform the draft Shropshire Local Plan, three reasonable options for the strategic distribution of planned development were identified.
- 6.4. These reasonable options were identified based on various approaches to the distribution of the total proposed development between three broad 'settlement categories'. In effect, category 1 consisted of Shrewsbury; category 2 consisted of the other urban settlements; and category 3 consisted of the rural settlements and wider rural area.
- 6.5. These options and the associated SA assessment of these options informed the identification of the proposed approach to the strategic distribution of planned development within the draft Shropshire Local Plan.
- 6.6. The overall process undertaken to identify the strategic distribution of planned development proposed within the draft Shropshire Local Plan is summarised within the Housing Topic Paper (GN4i) and the Strategic Employment Topic Paper (GC4n).

Updated Identification: Reasonable Options for the Strategic Distribution of Planned Development

- 6.7. As part of the additional SA assessment work undertaken in order to positively respond to ID28, three updated reasonable options for the strategic distribution of planned development were appraised.
- 6.8. Consistent with the methodology utilised to identify reasonable options for the strategic distribution of planned development within the SA assessment already undertaken to inform the draft Shropshire Local Plan, reasonable options for the strategic distribution of planned development within this additional SA assessment work were

identified based on various approaches to the distribution of the total development between three identified 'settlement categories'.

Updated Reasonable Options for the Strategic Distribution of Planned Development

- 6.9. Using the methodology described above, three reasonable options for the strategic distribution of planned development were identified. These options were:

Table 6.1: Reasonable Strategic Distribution of Planned Development Options

Option	Strategic Distribution of Planned Development	Summary
Option A: Rural Rebalance	Around 25% of housing in the Strategic Centre of Shrewsbury. Around 40% of housing in the Principal Centres, Key Centres and Strategic Settlements. Around 35% of housing in the rural area. Employment development to reflect the principles of this distribution, with a significant component in the rural areas.	'Rural rebalance' is underpinned by the principle of allowing a high proportion of planned development within the rural area (particularly the larger rural settlements) to enhance the sustainability of rural settlements. This is complemented by development within 'urban areas'.
Option B: Urban Focus	Around 28% of housing in the Strategic Centre of Shrewsbury. Around 46% of housing in the Principal Centres, Key Centres and Strategic Settlements. Around 26% of housing in the rural area. Employment development to reflect the principles of this distribution, with the majority concentrated in urban areas.	'Urban focus' is underpinned by the principle of accommodating a significant proportion of development within the urban settlements that have the infrastructure available to best support development. This is complemented by development in 'rural areas' (particularly the larger rural settlements) to maintain and enhance sustainability.
Option C: Balanced Growth	Around 30% of housing in the Strategic Centre of Shrewsbury. Around 40% of housing in the Principal Centres, Key Centres and Strategic Settlements. Around 30% of housing in the rural area. Employment development to reflect the principles of this distribution, approximately balancing provision across the three broad categories.	'Balanced growth' is underpinned by the principle of seeking to evenly distribute development across all categories of settlement in Shropshire in order to support their long term sustainability.

The Proposed Strategic Distribution of Planned Development

- 6.10. The decision regarding which of the reasonable options for the strategic distribution of planned development should form the basis for the distribution of development within the spatial strategy of the draft Shropshire Local Plan is ultimately one of planning judgement.

6.11. Shropshire Council has carefully considered the extensive range of information available in undertaking this planning judgement, including the evidence base produced to inform the draft Shropshire Local Plan (particularly the additional SA assessment work) and consultation responses received during the various stages of consultation undertaken to inform preparation of the draft Shropshire Local Plan.

6.12. In conclusion Shropshire Council considers the proposed strategic distribution of planned development within the draft Shropshire Local Plan should be underpinned by: **Option B: 'Urban Focus'**.

6.13. 'Urban focus' means the majority of development is directed towards urban areas. Urban areas consist of the Strategic Centre of Shrewsbury, proposed Principal Centres, proposed Key Centres and proposed Strategic Settlements.

6.14. Development within urban areas is complemented by appropriate development within rural areas.

6.15. Appropriate development in rural areas will primarily be directed towards proposed Community Hubs, which represent significant rural service centres, and to a lesser extent proposed Community Clusters, which consist of settlements with aspirations to maintain or enhance sustainability.

6.16. Other development in rural areas will consist of specific forms of development within the wider rural area, which constitutes 'countryside' for planning policy purposes.

Reasons for the Proposed Strategic Distribution of Planned Development

6.17. As documented within paragraph 6.11, in applying planning judgement to determine which of the reasonable options for the strategic distribution of planned development should form the basis for the distribution of development within the spatial strategy of the draft Shropshire Local Plan, detailed consideration of extensive information has been undertaken.

6.18. The proposed approach is considered appropriate for a number of reasons, including:

- a. It positively responds to the Council's understanding of housing needs across the area, with development being concentrated within those settlements considered to form part of the 'urban area' that have the largest populations, whilst also allowing complementary development within settlements considered to form part of the 'rural area' that have smaller populations.

- b. Is positively responds to the Council’s understanding of the availability of services, facilities and infrastructure necessary to support new development.
 - c. By directing the majority of development towards urban areas that have the services, facilities and infrastructure best able to support new development, whilst also allowing complementary development within the rural area, it is considered to positively respond to the principles and achievement of sustainable development and the long term sustainability of our communities.
 - d. It is responsive to and aligns with the Council’s understanding of the economic growth needs and opportunities in Shropshire.
 - e. It aligns with the economic aspirations identified for Shropshire, including within the economic growth strategy, which are underpinned by more significant levels of development within the urban areas.
 - f. It is considered to be responsive to the geographic size, diversity, demographics and characteristics of Shropshire (including presence of area of land within the Shropshire Hills Area of Outstanding Natural Beauty (AONB) and the West Midlands Green Belt).
 - g. It is considered to align with the principles and requirements of the National Planning Policy Framework (NPPF).
 - h. It is positively responsive to past housing delivery trends and existing housing commitments.
 - i. It is responsive to the various policy objectives and opportunities identified during the preparation of the draft Shropshire Local Plan.
 - j. It is responsive to cross-boundary relationships and interactions with adjacent areas.
- 6.19. Importantly, the proposed approach to the strategic distribution of planned development is supported by the conclusions of the additional SA assessment, which included that *“focusing a higher proportion of development within urban areas achieves more positive impacts on social, economic and environmental factors.”*
- 6.20. Furthermore, it also concluded that Option B was unlikely to result in any strongly negative effect on SA objectives, but conversely was *“likely to result in a strongly positive effect on SA objectives:*
- 2: Encouraging a strong and sustainable economy throughout Shropshire.*
 - 3: Providing a sufficient amount of good quality housing which meets the needs of all sections of society.*
 - 4: Promoting access to services for all sections of society.*

- 5: Encouraging the use of sustainable means of transport.
- 6: Reducing the need of people to travel by car.
- 7: Supporting active and healthy communities.”

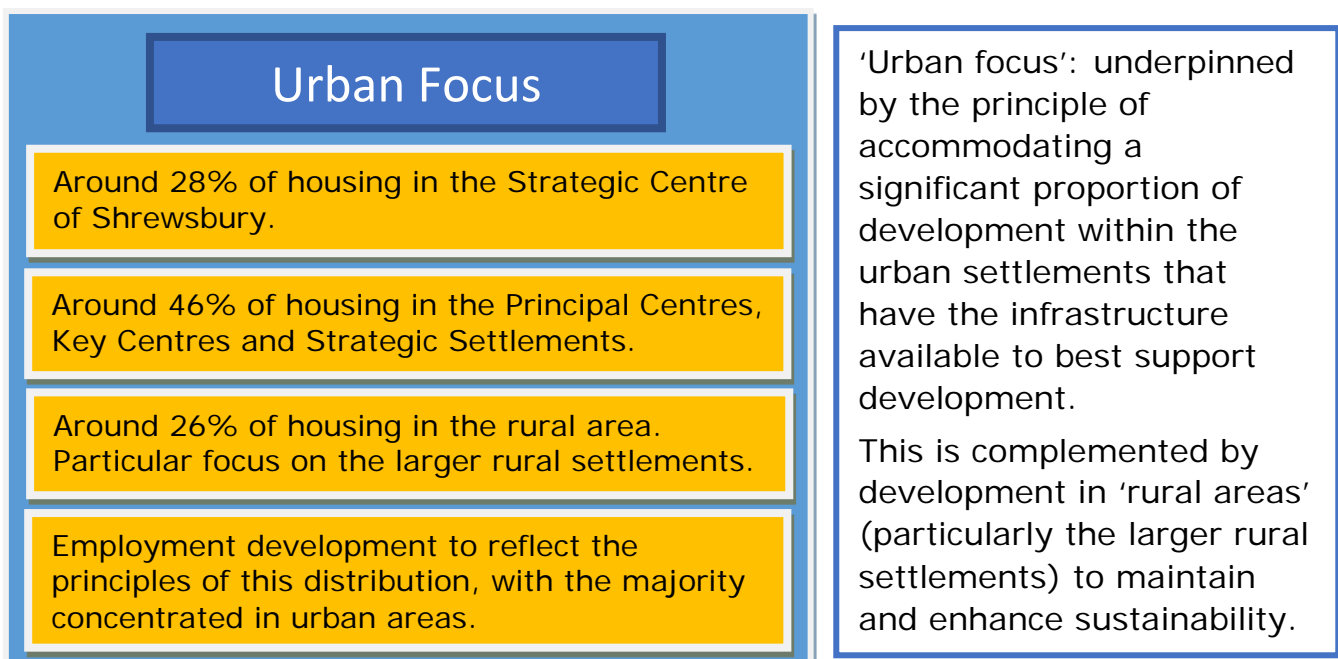

Implications of the Proposed Approach to the Strategic Distribution of Planned Development

- 6.21. This proposed approach to the strategic distribution of planned development is consistent with that which was previously proposed within the draft Shropshire Local Plan.
- 6.22. As a result, it is not considered that any main modifications are required to support the achievement of the proposed approach to the strategic distribution of planned development.
- 6.23. The housing and employment land supply identified to achieve the proposed housing and employment land requirements are summarised within Sections 4 and 5 of this Topic Paper. It is considered that the housing and employment land supply is consistent with the proposed approach to the strategic distribution of planned development.

Summary

- 6.24. **Figure** Figure 6.1 provides a succinct and unambiguous summary of the proposed approach to the strategic distribution of planned development:

Figure 6.1: Overarching Summary of the approach to the strategic distribution of planned development:

7. Spatial Strategy

Overview

- 7.1. The spatial strategy provides a spatial framework for achieving the vision and spatial objectives of an area. It therefore underpins and is in turn achieved by the policies within the Local Plan.
- 7.2. The proposed spatial strategy for the level and distribution of residential development across Shropshire is primarily captured within draft Policy SP2 of the draft Shropshire Local Plan, which is then expanded upon within wider draft Policies
- 7.3. The key components of any spatial strategy are the level and distribution of development.

The Proposed Spatial Strategy

- 7.4. Sections 4 and 5 of this Topic Paper address the proposed housing and employment land requirements, which form the basis for the proposed level of development within the spatial strategy.
- 7.5. Section 6 of this Topic Paper addresses the proposed strategic distribution of planned development, which establishes the overarching approach to the distribution of development within the spatial strategy.
- 7.6. Reflecting the conclusions summarised within Sections 4-6 of this Topic Paper, the proposed spatial strategy for the level and distribution of development across Shropshire includes:
 - a. **Over the proposed plan period from 2016 to 2038, a minimum of 30,800 new dwellings and a minimum of 300 hectares of employment land will be delivered, of which 1,500 dwellings and 30ha of employment land are to contribute towards the unmet needs forecast to arise within the Black Country. The proposed housing and employment land requirements equate to around 1,400 dwellings and around 14ha of employment land per annum.**
 - b. **To achieve a sustainable and appropriate pattern of development which also maximises investment opportunities, new development will be focused in the 'urban areas', which consist of Strategic Centre of Shrewsbury, proposed Principal Centres, proposed Key Centres and proposed Strategic Settlements.**
 - c. **Recognising the rurality of much of Shropshire and the importance of ensuring the long-term sustainability of rural communities, growth in 'urban areas' will be complemented**

by appropriate new development within Community Hubs, which are considered significant rural service centres; and to a lesser extent Community Clusters, which consist of settlements with aspirations to maintain or enhance their sustainability. Outside these settlements, new development in the wider rural area will consist of affordable housing where there is evidenced local needs and appropriate rural employment and economic diversification.

- 7.7. This proposed spatial strategy is generally consistent with that previously proposed within the draft Shropshire Local Plan. As such, Shropshire Council considers that:
- The proposed spatial strategy is consistent and complementary to the draft policies within the draft Shropshire Local Plan.
 - The draft policies within the draft Shropshire Local Plan will contribute to the achievement of the proposed spatial strategy.
 - The proposed spatial strategy establishes an appropriate spatial framework for the achievement of the vision and spatial objectives for Shropshire within the draft Shropshire Local Plan.

Summary:

7.8. Table 7.1 provides a summary of the level and distribution of development across Shropshire:

Table 7.1: Distribution of Development Resulting from the Proposed Spatial Strategy

Settlement Category	Residential Development Guidelines	Employment Land Allowances*
Strategic Centre:	8,625 dwellings (around 28.0% of the proposed Housing Requirement)	100ha (around 33.0% of the proposed Employment Land Requirement)
Principal Centres:	7,500 dwellings (around 24.5% of the proposed Housing Requirement)	172ha (around 46.0% of the proposed Employment Land Requirement)
Key Centres:	5,150 dwellings (around 17.0% of the proposed Housing Requirement)	91ha (around 24.0% of the proposed Employment Land Requirement)
Strategic Settlements:	1,350 dwellings (around 4.5% of the proposed Housing Requirement)	12ha (around 3.0% of the proposed Employment Land Requirement)
Community Hubs**	4,988 dwellings (around 16.0% of the proposed Housing Requirement)	0ha (no specific allowance)
Community Clusters & Wider Rural Area**	No specific guidelines (around 10.0% of the proposed Housing Requirement)	0ha (no specific allowance)

Please Note: Percentages are rounded to one decimal place.

**The approach to settlement employment land allowances varies dependent on the role and function of a settlement in Shropshire, the nature of existing employment opportunities, and the nature of the employment land supply in a settlement. Specifically:*

-Larger settlements which perform a strategic role in Shropshire include an indication of land made available for employment uses, rather than specific development guidelines as exist in smaller settlements which perform a less strategic role.

-Settlements with large employers with potential growth aspirations include allocations solely for their future expansion. Such land will be retained for this purpose and as such is not available for other employment opportunities.

-Employment land allowances in some instances include land to offset anticipated future losses, meaning net employment land provision is lower than the specified allowance.

***No specific employment land allowances are made in Community Hubs, Community Clusters or the wider rural area. However, the draft Shropshire Local Plan provides flexibility for appropriate employment provision to meet local needs.*

2. Introduction

Interim Findings

- 2.1. On 15th February 2023, the Planning Inspectors examining the draft Shropshire Local Plan issued an Interim Findings document (ID28). This followed the completion of the Stage 1 Hearing Sessions, which focused on legal and strategic issues (including strategic policies). These Hearing Sessions were primarily undertaken in July 2022, with a further session specifically regarding the Duty to Cooperate in January 2023.
- 2.2. Within ID28, the Planning Inspectors requested a further Green Belt Topic Paper to document the exceptional circumstances for releasing Green Belt to meet Shropshire needs and separately the exceptional circumstances for releasing Green Belt to accommodate any of the proposed contributions to the housing and employment needs forecast to arise within the Black Country.
- 2.3. Specifically, paragraph 23 of ID28 stated *“Given the Council were planning on releasing Green Belt land to meet its own needs, it seems unlikely that the unmet needs of the Black Country could be met without the release of Green Belt land. Can the Council please provide a revised Green Belt Topic Paper setting out the exceptional circumstances for releasing Green Belt land to meet its own needs and as a separate exercise the exceptional circumstances for releasing land to meet the unmet needs of the Black Country.”*

Purpose of this Document

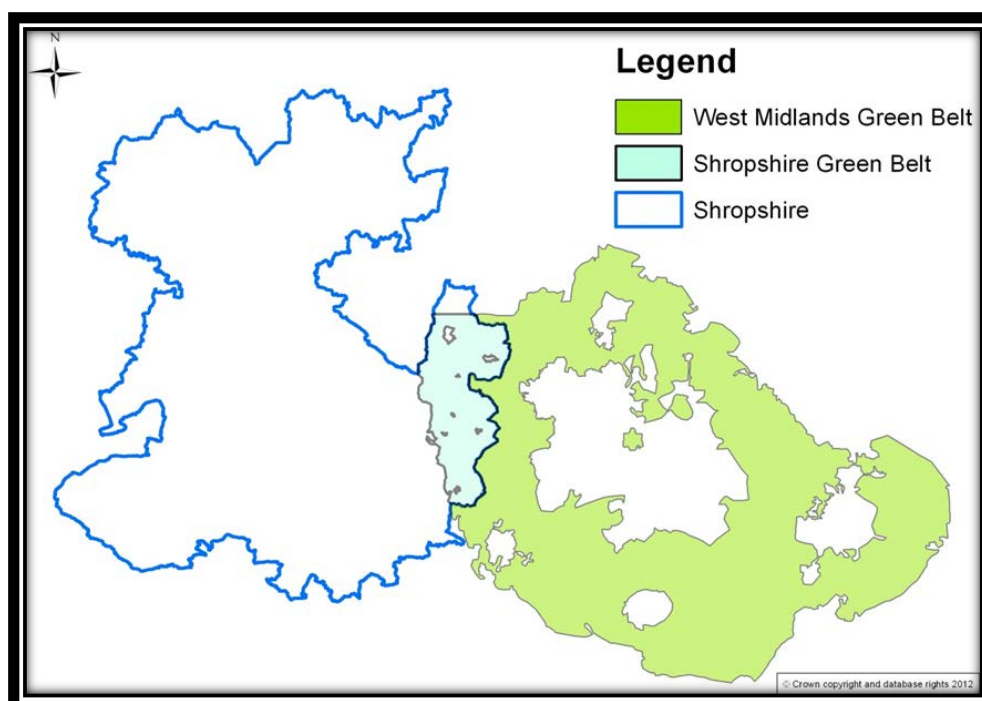

- 2.4. The purpose of this document is to summarise the exceptional circumstances identified for releasing Green Belt to meet Shropshire housing and employment land needs and identify the exceptional circumstances for releasing Green Belt to accommodate any of the proposed contributions to the housing and employment needs forecast to arise within the Black Country.
- 2.5. Importantly and in order to avoid duplication, this document seeks to summarise and heavily cross-references the extensive evidence base prepared to support the draft Shropshire Local Plan in the context of proposed Green Belt release. In particular the:
 - a. Green Belt Assessment (EV049.01-EV049.02).
 - b. Green Belt Review (EV050.01-EV050.08).
 - c. Green Belt Revised Exceptional Circumstances Statement (EV051).
 - d. Initial Green Belt Topic Paper (GC4g).
 - e. Housing Topic Paper (GC4i).
 - f. Employment Strategy Topic Paper (GC4n).

- 2.6. This Topic Paper has also been directly informed by other work and associated conclusions resulting from ID28. In particular with regard to the proposed housing and employment land requirements and the strategic distribution of development, which together form the basis for the proposed spatial strategy within the draft Shropshire Local Plan. Another important conclusion relevant to this Topic Paper is the site assessment work undertaken to identify the sites considered appropriate to accommodate proposed contributions to the unmet need forecast to arise within the Black Country.
- 2.7. Relevant documents which address these issues include:
- a. The Additional Sustainability Appraisal (SA) Assessment.
 - b. The Housing and Employment Topic Paper.

3. Green Belt in Shropshire

- 3.1. The Green Belt in Shropshire lies in the south-east of the County, to the east of the River Severn and south of the A5. It forms part of the wider West Midlands Metropolitan Green Belt which surrounds the West Midlands conurbation and Coventry. Figure 3.1 shows the general location and extent of the West Midlands Green Belt.

Figure 3.1: General Location and Extent of the West Midlands Green Belt

- 3.2. Further information on the Green Belt in Shropshire is provided within paragraphs 1.2-1.13 of the Green Belt Revised Exceptional Circumstances Statement (EV051) and paragraphs 2.1-2.6 of the initial Green Belt Topic Paper (GC4g).

4. Background

National Policy

- 4.1. The National Planning Policy Framework (NPPF) provides information on the overall importance of Green Belts; their characteristics and purposes; and the conditions needed to justify alterations to existing Green Belt boundaries. This is comprehensively summarised within paragraphs 3.1-3.7 of the Green Belt Revised Exceptional Circumstances Statement (EV051)¹ and paragraphs 3.1-3.6 of the initial Green Belt Topic Paper (GC4g).

The Need for a Green Belt Review

- 4.2. The adopted Development Plan includes a commitment to undertake a Green Belt Review to inform the next review of the Local Plan. This is explained in detail within paragraphs 6.1-6.9 of the initial Green Belt Topic Paper (GC4g).

Green Belt Assessment and Review

- 4.3. Responding to the commitment to undertake a Green Belt Review, important components of the evidence base prepared to inform the draft Shropshire Local Plan are the Green Belt Assessment (EV049.01-EV049.02) and Green Belt Review (EV050.01-EV050.08).
- 4.4. An effective summary of these evidence base documents is provided within paragraphs 7.1-7.32 of the initial Green Belt Topic Paper (GC4g). The Green Belt Revised Exceptional Circumstances Statement (EV051) provides information on these evidence base documents and how they informed the identification of proposed site allocations, on a settlement by settlement basis (including paragraphs 5.20-5.28 (Albrighton); 6.12-6.22 (Alveley); 7.41-7.48 (Bridgnorth); and 8.45-8.53 (Shifnal).

The Proposed Spatial Strategy

- 4.5. The proposed spatial strategy for Shropshire within the draft Shropshire Local Plan has been confirmed through the additional Sustainability Appraisal work and the Housing and Employment Topic Paper prepared in response to ID28.

¹ Please Note: The NPPF has been updated since the Green Belt Revised Exceptional Circumstances Statement (EV051) was prepared. As such paragraph referencing is not consistent with the latest version of the NPPF. However, the principles remain the same.

- 4.6. The proposed spatial strategy is underpinned by the principles of 'high growth' and 'urban focus'.
- 4.7. 'High growth' consists of a significant uplift above local housing and employment needs in order to contribute to the achievement of wider objectives. It also includes a specific contribution of 1,500 dwellings and 30ha of employment land towards the unmet needs forecast to arise in the Black Country.
- 4.8. 'Urban focus' means that the majority of development is directed towards urban areas, which consist of the proposed Strategic Centre of Shrewsbury, proposed Principal Centres, proposed Key Centres and proposed Strategic Settlements. These settlements have the most extensive range of services, facilities and infrastructure to support new development.
- 4.9. However, recognising the rurality of much of Shropshire and the importance of ensuring the long-term sustainability of rural communities, growth in 'urban areas' will be complemented by appropriate new development within Community Hubs, which are considered significant rural service centres; and to a lesser extent Community Clusters, which consist of settlements with aspirations to maintain or enhance their sustainability. Outside these settlements, new development in the wider rural area will consist of affordable housing where there is evidenced local needs and appropriate rural employment and economic diversification.
- 4.10. A comprehensive summary of the development and content of the proposed spatial strategy is provided within the Housing Topic Paper (GN4i), the Strategic Employment Topic Paper (GC4n), and the new Housing and Employment Topic Paper.
- 4.11. The proposed spatial strategy constituted the starting point for determining the role and levels of development necessary and appropriate within settlements across Shropshire. This then informed decisions regarding potential site allocations. This process is effectively summarised within the diagram in Chapter 5 of the initial Green Belt Topic Paper (GC4g).

Sites to Accommodate Proposed Contributions to Unmet Needs Forecast to Arise in the Black Country

- 4.12. Within ID28, the Planning Inspectors concluded that for the purpose of effectiveness, there is a need to identify sites to accommodate any proposed contributions to unmet needs forecast to arise in the Black Country. This should be informed by additional SA and site assessment work.

- 4.13. Specifically, paragraph 21 of ID28 states “...the Council will also need to consider which site or sites in the Plan will be identified to meet that need. This also needs to be subject to sustainability appraisal to reflect the objectives and geographical scope of the Plan.”
- 4.14. Consistent with this conclusion, Shropshire Council has undertaken additional SA and site assessment work, as summarised within the Additional SA Assessment. Through this work, four sites have been identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country.
- 4.15. It is considered that accommodating the proposed contributions upon these sites represents sustainable development and will contribute to the achievement of the proposed spatial strategy within the draft Shropshire Local Plan. Further information on the process undertaken and the conclusions reached is provided within the Additional SA Assessment.
- 4.16. These sites and whether they require Green Belt release to allow for their development is summarised within Table 4.1:

Table 4.1: Sites Identified to Accommodate the Proposed Contributions to the Unmet Needs Forecast to Arise in the Black Country

Site Name	Total Capacity	Black Country Contribution	Green Belt Release Required
Tasley Garden Village, Bridgnorth (BRD030)	1,050 dwellings 16ha employment land New local centre and other infrastructure	600 dwellings	No
Land east of Shifnal Industrial Estate, Shifnal (SHF018b & SHF018d)	39 hectares employment land (15.6ha net development)	30ha of employment land	Yes
Land between Mytton Oak Road and Hanwood Road, Shrewsbury (SHR060, SHR158 & SHR161)	1,500 dwellings 5ha of employment land New local centre and other infrastructure	300 dwellings	No
Former Ironbridge Power Station	1,000 dwellings 6ha of employment land New local centre and other infrastructure	600 dwellings	No

- 4.17. It is apparent from Table 4.1 that only one of the proposed site allocations identified to accommodate the proposed contributions to the unmet needs forecast to arise within the Black Country is located within the Green Belt – SHF018b & SHF018d.
- 4.18. SHF018b & SHF018d has been identified to accommodate the entirety of the proposed 30ha contribution towards the unmet employment land needs forecast to arise within the Black Country.

5. Green Belt Release Proposed within the draft Shropshire Local Plan

Overview

5.1. Table 5.1 provides a succinct summary of the Green Belt release proposed within the draft Shropshire Local Plan. This is presented as hectares of land and number of sites by both location and type.

Table 5.1: Green Belt Release by Location and Type

Location	Housing		Mixed Use		Employment		Safeguarded Land		Total	
	Ha	Sites	Ha	Sites	Ha	Sites	Ha	Sites	Ha	Sites
Albrighton	-	-	-	-	-	-	19.9	3	19.9	3
Alveley	1.4	1	2.4	1	-	-	3.6	1	7.4	3
Shifnal	-	-	-	-	39.0	1	82.4*	5*	121.4	6
Stanmore (Bridgnorth)	-	-	-	-	11.4	2	-	-	11.4	2
Total	1.4	1	2.4	1	50.4	3	105.9	9	160.1	14

**A further 10.4ha of safeguarded land which was previously removed from the Green Belt is located at Shifnal on the site identified as 'Land between Revells Rough, Lamledge Lane and the eastern rail line' which consists of part of SHF023.*

5.2. It is important to note that Table 5.1 reflects the conclusions reached by the Planning Inspectors, as summarised within ID28, with regard to the RAF Cosford site.

5.3. Specifically, within ID28 the Planning Inspectors' concluded that exceptional circumstances did not exist to justify the proposed release of the RAF Cosford site from the Green Belt. ID28 explains in paragraphs 29-32 that this conclusion has been informed by three key factors:

- a. The numerous and complementary uses occurring on the site can, based on past activity at the site, occur whilst the site remains in the Green Belt.
- b. The potential harm to the openness of the surrounding Green Belt if undeveloped land within the site is developed.
- c. The reduced ability to control future non-military use on the site if it is removed from the Green Belt.

5.4. It is also important to note that Table 5.1 reflects the conclusions reached by Shropshire Council following the completion of the additional work requested by the Planning Inspectors within ID28, in

particular with regard to the housing and employment land requirements and the strategic distribution of development, which together form the basis for the proposed spatial strategy within the draft Shropshire Local Plan.

- 5.5. For context, according to the 2021/22 Green Belt Statistics released by the Department for Levelling Up, Housing & Communities (DLUHC)², there were 24,500ha of land designated as Green Belt in Shropshire at 31st March 2022. As such, the proposed releases totals around 6.5% of the total Green Belt in Shropshire.
- 5.6. It is apparent from Table 5.1 that 6 of the 14 sites proposed to be removed from the Green Belt, which constitutes 66.2% of the Green Belt release proposed within the draft Shropshire Local Plan, is in order to 'safeguard' land for future development.
- 5.7. Of the remaining proposed Green Belt releases, 3 sites equating to 31.5% of the total hectareage is for employment development; whilst just 2 sites equating to 2.4% of the total hectareage is for residential or residential-led mixed use development.

Assessment of Reasonable Alternatives

- 5.8. In determining an appropriate proposed spatial strategy and identifying appropriate proposed site allocations there was a careful consideration of reasonable alternatives.
- 5.9. Such consideration represents an important component of plan making. The Sustainability Appraisal and Site Assessment Environmental Report (SD006.01-SD006.22) and the additional Sustainability Appraisal Assessment work undertaken provide an effective summary of the consideration of reasonable alternatives.
- 5.10. Consistent with paragraph 141 of the NPPF, the assessment of reasonable alternatives is also an important part of the process of determining whether Green Belt release is appropriate. Specifically, paragraph 141 states *"Before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the strategic policymaking authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development..."*
- 5.11. In so doing, consideration should be given to whether the plan "...a) *makes as much use as possible of suitable brownfield sites and*

² DLUHC (2022), <https://www.gov.uk/government/statistics/local-authority-green-belt-statistics-for-england-2021-to-2022>

underutilised land; b) optimises the density of development...; and c) has been informed by discussions with neighbouring authorities..."

- 5.12. Consistent with this requirement, before concluding that exceptional circumstances exist to justify the release of any site from the Green Belt, Shropshire Council comprehensively considered alternative options.
- 5.13. This is documented on a settlement by settlement basis, in a manner that is responsive to the requirements of paragraph 141 of the NPPF, within the Green Belt Revised Exceptional Circumstances Statement (EV051).

Exceptional Circumstances for Proposed Green Belt Releases

- 5.14. Paragraph 140 of the NPPF states "*Green Belt boundaries should only be altered where exceptional circumstances are fully evidenced and justified, through the preparation or updating of plans...*" This paragraph goes on to state "*...where a need for changes to Green Belt boundaries has been established through strategic policies, detailed amendments to those boundaries may be made through nonstrategic policies, including neighbourhood plans.*"
- 5.15. The following sections of this Topic Paper summarise the Exceptional Circumstances for the Green Belt releases proposed within the draft Shropshire Local Plan.
- 5.16. The presentation of these exceptional circumstances is undertaken on a settlement by settlement basis, as the role of each settlement within the proposed spatial strategy is an important component of the exceptional circumstances justification for all sites.

Meeting Shropshire Housing and Employment Land Needs

- 5.17. Where a settlement includes Green Belt release to meet Shropshire housing and employment land needs the Green Belt Revised Exceptional Circumstances Statement (EV051) and the initial Green Belt Topic Paper (GC4g) already provides a comprehensive explanation of the exceptional circumstances identified.
- 5.18. As such, this Topic Paper provides a high-level summary and should be read alongside the Green Belt Revised Exceptional Circumstances Statement (EV051) and the initial Green Belt Topic Paper (GC4g).

Accommodating Contributions to the Unmet Needs Forecast to Arise in the Black Country

- 5.19. Where a settlement also includes Green Belt release to accommodate part of the proposed contribution to the unmet needs forecast to arise within the Black Country (as documented within Section 6 of this Topic Paper, this only applies to Shifnal) a clear distinction is

drawn between the exceptional circumstances which apply to meet Shropshire housing and employment land needs and the exceptional circumstances which apply to accommodate part of the proposed contribution to the unmet needs forecast to arise within the Black Country.

The Role of Safeguarded Land

- 5.20. As already documented within paragraph 5.6 above, the vast majority of the land proposed to be released from the Green Belt within the draft Shropshire Local Plan is to be 'safeguarded' for future development. This land is associated with the settlements of Alveley, Albrighton and Shifnal.
- 5.21. This land is not allocated for development within the draft Shropshire Local Plan, rather it is removed from the Green Belt and 'safeguarded' from development, so that it can provide future development opportunities beyond the time period addressed within the draft Shropshire Local Plan.
- 5.22. Consistent with paragraph 143(d) of the NPPF, "*planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development*". In effect safeguarded land should only be developed once allocated for development within a future Local Plan.
- 5.23. Such land is therefore not intended to be developed in order to achieve the proposed vision, objectives and spatial strategy within the draft Shropshire Local Plan. However, the release of such land is considered important in order to provide future development opportunities and ensure the long term sustainability of the associated settlements and their communities.
- 5.24. At this time, it is expected that any future development on the 'safeguarded' land (which should only occur once it is allocated for development within a future Local Plan) would be to meet the needs of Shropshire. The exceptional circumstances identified within the Green Belt Revised Exceptional Circumstances Statement (EV051) and summarised within this Topic Paper reflect this position.

6. Albrighton

Introduction

- 6.1. Albrighton is a large urban village located within the M54/A5 corridor, a key road and rail transport corridor, linking Shropshire to the West Midlands. It is inset within the West Midlands Metropolitan Green Belt, meaning it is surrounded by Green Belt (with the exception of

an area of land on the eastern edge of the settlement which was previously removed from the Green Belt and safeguarded for future development).

- 6.2. Within the draft Shropshire Local Plan, Albrighton is proposed to be identified as a Key Centre (this is in effect a continuation of the role that the settlement plays within the adopted Development Plan).
- 6.3. Reflecting on the wider proposed spatial strategy, the role of Albrighton within this spatial strategy and in east Shropshire, constraints present, and identified issues and opportunities; draft Policy S1.1 of the draft Shropshire Local Plan which establishes the proposed settlement strategy for Albrighton proposes to deliver *“around 500 dwellings and around 5 hectares of employment development.”* It also indicates that *“New housing and employment development will respond to local needs.”*
- 6.4. The proposed settlement strategy seeks to support Albrighton’s long-term sustainability and ensure that local housing and employment need is achieved, whilst also respecting the settlement’s location in the Green Belt and other known constraints.

Green Belt Release Proposed

- 6.5. Having reflected on the proposed spatial strategy, the strategic role of the settlement, known development constraints, identified issues and opportunities, and having reviewed the site promotions received within the settlement, the draft Shropshire Local Plan proposes that in Albrighton:
 - a. New residential development will primarily be delivered through existing commitments (including the proposed ‘saved’ SAMDev Plan allocations which now either benefit from Planning Permission or are subject to a current Planning Application) and a further residential allocation (ALB017 & ALB021), consisting of the remaining safeguarded land to the east of the settlement. This will be complemented by any appropriate small-scale windfall residential development within the Albrighton development boundary and appropriate exception development.
 - b. New employment development will primarily be delivered at the nearby RAF Cosford major developed sites. This will be complemented by appropriate small-scale windfall employment development within the Albrighton development boundary shown on the draft Policies Map, where it is consistent with relevant policies of this Local Plan.

6.6. **As such, for the avoidance of doubt, no land is proposed to be removed from the Green Belt at Albrighton in order to achieve the proposed settlement strategy for the settlement or the proposed spatial strategy for Shropshire within the draft Shropshire Local Plan.**

6.7. However, it is recognised that the proposed allocations within the draft Shropshire Local Plan will exhaust the supply of safeguarded land that exists around the settlement.

6.8. As such, 3 areas of land totalling some 19.9ha are proposed to be removed from the Green Belt and 'safeguarded' for future development (ALB014, P32a and part of P35). Further information on these areas is provided within paragraph 5.19 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

Accommodating Proposed Contributions to the Unmet Needs Forecast to Arise Within the Black Country

6.9. Albrighton was identified as one location where it may be appropriate to accommodate all or part of the proposed contribution to the unmet needs forecast to arise within the Black Country.

6.10. This was informed by a comprehensive consideration of the functional relationship between the Black Country and sub-geographies within Shropshire, as summarised within the additional Sustainability Appraisal assessment work.

6.11. This conclusion was reached as Albrighton is located in east Shropshire and has a functional relationship to the Black Country. It also benefits from strong road links to the Black Country via the M54/A5 corridor and the Shrewsbury-Wolverhampton Railway line.

6.12. Whilst proximity and connectivity to the Black Country could suggest that Albrighton is an appropriate location to meet cross-boundary needs arising in the Black Country, due to the settlement's size and role within the proposed spatial strategy, it is unlikely that it could make a significant contribution.

6.13. Through the additional SA and site assessment work, it was ultimately concluded that there were more appropriate locations and sites upon which to accommodate proposed contributions to the unmet needs forecast to arise within the Black Country.

6.14. It is considered that accommodating the proposed contribution to the Black Country in these alternative locations and on these alternative sites will contribute to the achievement of the wider spatial strategy for Shropshire.

Assessment of All Other Reasonable Alternatives

- 6.15. Consistent with paragraph 141 of the NPPF, before concluding that exceptional circumstances existed, consideration of all other reasonable alternatives was undertaken. This is comprehensively documented within paragraphs 5.34-5.47 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

Exceptional Circumstances: Green Belt Releases to Contribute to Meeting Shropshire Housing and Employment Land Needs

- 6.16. It is considered that there are a number of exceptional circumstances which support the proposed release of 3 areas of land from the Green Belt at Albrighton, to be 'safeguarded' for future development beyond the draft Shropshire Local Plan period.
- 6.17. **These are comprehensively documented within paragraphs 5.48-5.63 of the Green Belt Revised Exceptional Circumstances Statement (EV051) and paragraphs 8.30-8.37 of the initial Green Belt Topic Paper (GC4g).**
- 6.18. In summary, these exceptional circumstances include:
- a. **Supporting the Role and Function of Albrighton in the Future:**
 - i. Albrighton is a Key Centre in Shropshire and benefits from a highly sustainable location on the M54/A5 strategic road corridor and with a station on the Shrewsbury-Wolverhampton Railway Line.
 - ii. There is a need to ensure future development opportunities in order to support the settlement to continue to effectively perform its role as a Key Centre; ensure the long-term sustainability of its services and facilities; and meet the economic, social and environmental needs of its community and those within its extensive hinterland in the future.
 - iii. This cannot be achieved without providing further safeguarded land. As such, it is considered this represents an exceptional circumstance to justify releasing the land from the Green Belt.
 - iv. This issue is responsive to Paragraph 143c) of the NPPF includes "*When defining Green Belt boundaries, plans should: ... c) where necessary, identify areas of safeguarded land between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period; ...*".

b. Meeting Local Needs in the Future:

- i. Given the location of Albrighton and its distance from any 'urban area' in a Shropshire context, it is considered that there are limited other locations beyond Albrighton where the economic, social and environmental needs of its community and those of its rural hinterland can be met.
- ii. These needs will, in the future, require additional development beyond that planned for within the draft Shropshire Local Plan.
- iii. This cannot be achieved without providing further safeguarded land. As such, it is considered this represents an exceptional circumstance to justify releasing the land from the Green Belt.
- iv. This issue is again responsive to Paragraph 143c) of the NPPF.

c. Sustainable Patterns of Development

- i. Paragraph 142 of the NPPF recognises the need to "...*promote sustainable patterns of development...*" when reviewing Green Belt boundaries. It is considered unsustainable to restrict the potential for new development in Albrighton, beyond the proposed plan period.
- ii. Further safeguarded land in sustainable locations is required in order to provide for development options beyond the proposed plan period. As such, it is considered this represents an exceptional circumstance to justify releasing the land from the Green Belt.

d. Ensuring Long-Term defensible Green Belt Boundaries

- i. Paragraph 143e) of the NPPF specifies that "*when defining Green Belt boundaries, plans should... e) be able to demonstrate that Green Belt boundaries will not need to be altered at the end of the plan period*".
- ii. Given the role and function of Albrighton, it is not considered that this can be achieved without identifying safeguarded land for future development beyond the proposed plan period at the settlement.

e. Green Belt Performance

- i. In identifying proposed safeguarded land, the performance against Green Belt purposes and the harm to the remaining Green Belt was given due consideration.
- ii. Whilst this in and of itself is not considered a defining exceptional circumstance, it does complement the wider exceptional circumstances identified.

Site Boundaries and Compensatory Improvements to the Green Belt

- 6.19. In identifying the three proposed areas of safeguarded land to be removed from the Green Belt, due consideration was given to resultant Green Belt boundaries and the ability to provide for compensatory improvements to the Green Belt. This is consistent with the requirements of paragraphs 142 and 143 of the NPPF.
- 6.20. These matters are addressed within paragraphs 5.64-5.69 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

7. Alveley

Introduction

- 7.1. Alveley is a large village located to the south-east of Bridgnorth, off the A442. It is inset within the West Midlands Metropolitan Green Belt, meaning it is surrounded by Green Belt.
- 7.2. Within the draft Shropshire Local Plan, Alveley is proposed to be identified as a Community Hub. Community Hubs are considered significant rural service centres, where appropriate new development that complements the proposed 'urban focus' will occur. This development will contribute to the long-term sustainability of rural communities.
- 7.3. Reflecting the proposed spatial strategy and the role of Alveley within it, constraints present, and identified issues and opportunities including the limited development that has occurred in the settlement over recent years; draft Policy S3.2 of the draft Shropshire Local Plan which establishes the proposed settlement strategies for Community Hubs in the Bridgnorth Place Plan Area (including Alveley) proposes to deliver "*around 130 dwellings*".
- 7.4. The proposed settlement strategy seeks to support Alveley's long-term sustainability and ensure that local housing need is achieved, whilst also respecting the settlement's location in the Green Belt and other known constraints.

Green Belt Release Proposed

- 7.5. Having considered the role of the village as a Community Hub, known development constraints, identified issues and opportunities, and having reviewed the site promotions received, the draft Shropshire Local Plan proposes the following Green Belt release in

Alveley in order to contribute to the achievement of the proposed settlement strategy:

- a. Mixed use allocation with provision for community sports and recreation facilities and around 35 dwellings, at Land north of Daddlebrook Road and West of A442 (ALV006/ALV007).
 - b. Residential allocation with provision for around 35 dwellings, on Land Adjacent to The Cleckars, Alveley (ALV009).
- 7.6. This will be complemented by any appropriate small-scale windfall residential development within the Alveley development boundary and appropriate exception development.
- 7.7. The proposed strategy for Alveley does not include any specific guideline for employment provision, simply acknowledging that if a local need arises it will be delivered through appropriate small-scale windfall employment development within the settlement's development boundary.
- 7.8. **As such, for the avoidance of doubt, two sites are proposed to be removed from the Green Belt in order to contribute to the achievement of the proposed settlement strategy for Alveley and the proposed spatial strategy for Shropshire within the draft Shropshire Local Plan.**
- 7.9. **These sites consist of a residential allocation and a residential-led mixed use allocation.**
- 7.10. It is recognised that to provide longer term development opportunities beyond the period addressed within the draft Shropshire Local Plan and ensure that the Green Belt boundaries will not require further amendment within the next review of the Local Plan, one area of land totalling some 3.6ha (ALV002) is also proposed to be removed from the Green Belt and 'safeguarded' for future development.
- 7.11. Further information on the two proposed site allocations and the proposed area of safeguarded land is provided within paragraphs 6.32-6.36 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

Accommodating Proposed Contributions to the Unmet Needs Forecast to Arise Within the Black Country

- 7.12. Alveley was not identified as a location where it may be appropriate to accommodate all or part of the proposed contribution to the unmet needs forecast to arise within the Black Country.

- 7.13. This was informed by a comprehensive consideration of the functional relationship between the Black Country and sub-geographies within Shropshire, as summarised within the additional Sustainability Appraisal assessment work.
- 7.14. Whilst the settlement is located within an area with a functional relationship to the Black Country, it was considered that given the scale and role envisioned for the settlement within the proposed spatial strategy, it would not be appropriate or sustainable to accommodate any of the proposed contribution to unmet needs forecast to arise in the Black Country at Alveley.
- 7.15. It is considered that accommodating the proposed contribution to the Black Country in alternative locations will contribute to the achievement of the wider spatial strategy for Shropshire.

Assessment of All Other Reasonable Alternatives

- 7.16. Consistent with paragraph 141 of the NPPF, before concluding that exceptional circumstances existed, consideration of all other reasonable alternatives was undertaken. This is comprehensively documented within paragraphs 6.28-6.31 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

Exceptional Circumstances: Green Belt Releases to Contribute to Meeting Shropshire Housing and Employment Land Needs

- 7.17. It is considered that there are exceptional circumstances which support the proposed release of 2 sites from the Green Belt at Alveley for residential and residential mixed-use development respectively, and the release of 1 area of land from the Green Belt at Alveley to be 'safeguarded' for future development beyond the draft Shropshire Local Plan period.
- 7.18. In summary, these exceptional circumstances include:
- a. Meeting Existing Local Development Needs:**
 - i. Alveley village is a highly performing Community Hub in the settlement hierarchy assessment process, reflecting good access to a number of services and facilities, yet it has had relatively low levels of residential development over many years (notably from 2006-2019). It is considered that this reflects constraints on development opportunities as set out in paragraphs 6.5 and 6.6 and also 6.28 and 6.29 of the Green Belt Revised Exceptional Circumstances Statement (EV051).
 - ii. Evidence also suggested unmet need for local housing, which includes affordable housing and the provision of

accommodation types which are not readily available in the village as set out in para 6.7 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

- iii. In order to ensure long-term rural community sustainability in line with strategic aim of draft Policy SP2, there is an expectation that growth in urban areas will be complemented by appropriate new development within Community Hubs, such as Alveley.
- iv. Given the location of Alveley and its distance from Bridgnorth, the closest town in Shropshire (or other 'urban area'), it is considered that there are local community development needs which are required to be met by development within the settlement itself rather than further afield. This includes opportunities to provide for the development of a range of house types, including smaller lower cost homes, with supporting infrastructure, to help to provide choice and support community sustainability.
- v. The proposed Green Belt releases for two separate site allocations provide for a choice of delivery options in locations which are both well connected to Alveley.
- vi. As such, it is considered this represents an exceptional circumstance to justify releasing the land from the Green Belt.

b. Meeting Local Needs in the Future:

- i. Given the location of Alveley and its distance from any 'urban area' in a Shropshire context, it is considered that there are limited other locations beyond Alveley where the local housing and supporting local infrastructure needs of its community can be met.
- ii. The draft Shropshire Local Plan proposes allocations which provide for a for a level of residential development which is relatively modest in housing numbers but of a scale which can be assimilated into the village within the timescale provided for by the draft Shropshire Local Plan. The allocations also provide for additional sports and leisure provision which could support any future growth. However, given that the village is inset in the Green Belt with limited scope for new development within its settlement boundary, residential development needs will, in the future, require additional development beyond that planned for within the draft Shropshire Local Plan.
- iii. This cannot be achieved without providing further safeguarded land. As such, it is considered this represents an exceptional circumstance to justify releasing the land from the Green Belt.

- iv. This issue is also responsive to Paragraph 143c) of the NPPF.
- c. Community benefit of the proposed mixed use allocation:**
- i. Alveley provides a rural service centre within a Green Belt location that lies between the larger settlements of Bridgnorth and Kidderminster (outside Shropshire) which provide the higher-level services and facilities.
 - ii. Bridgnorth, the closest town is about 7 miles away and the Key Centre of Highley, with some services including leisure facilities, is around 1.5 miles away. Although geographically closer the Key Centre of Highley, lies across the River Severn and there is no vehicular access from the Alveley side. Therefore, facilities in Highley are not easily accessible to serve the local needs of Alveley and the associated rural area.
 - iii. The Green Belt Revised Exceptional Circumstances Statement (EV051) sets out that there is scope for additions and improvements to existing leisure facilities and activities to target the needs of a wider range of people so that as many residents as possible have access to appropriate and attractive leisure opportunities within the area.
 - iv. It is intended that the site that has been identified at Daddlebrook Road (Proposed allocation ALV006 /ALV007 in the draft Shropshire Local Plan) which constitutes a residential-led mixed-use allocation would help deliver improved community facilities for sports and recreation, replacing and enhancing the more limited provision that currently exists at Alveley Sports Club. This would be a valuable community benefit which would help to support social sustainability and this forms part of the exceptional circumstances case.
 - v. Whilst this in and of itself is not considered a defining exceptional circumstance, it does complement the wider exceptional circumstances identified.
- d. Supporting the Role and Function of Alveley Now and in the Future:**
- i. Alveley is a proposed Community Hub and as such is considered a significant rural service centre. To ensure that the settlement continues to fulfil its role as a Community Hub and remains sustainable (including by supporting the long-term sustainability of its services and facilities), there is a need for appropriate quantities of the right types, tenures and quality of residential development over the short, medium and long term.

- ii. Such development will also meet the economic, social and environmental needs of Alveley's community and those within its rural hinterland.
- iii. The amount and type of development will in the short and medium term be constrained without providing further site allocations and in the longer term without further safeguarded land. As such, it is considered this represents an exceptional circumstance to justify releasing the land from the Green Belt.
- iv. This issue is also responsive to Paragraph 143c) of the NPPF which includes, "*When defining Green Belt boundaries, plans should:... c) where necessary, identify areas of safeguarded land between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;...*".

e. Sustainable Patterns of Development

- i. Paragraph 142 of the NPPF recognises the need to "*...promote sustainable patterns of development...*" when reviewing Green Belt boundaries. It is considered unsustainable to restrict the potential for new development in Alveley, both during and beyond the proposed plan period.
- ii. Further site allocations and safeguarded land in sustainable locations is required in order to provide for development options during and beyond the proposed plan period. As such, it is considered this represents an exceptional circumstance to justify releasing the land from the Green Belt.

f. Ensuring Long-Term defensible Green Belt Boundaries

- i. Paragraph 143e) of the NPPF specifies that "*when defining Green Belt boundaries, plans should... e) be able to demonstrate that Green Belt boundaries will not need to be altered at the end of the plan period*".
- ii. Given the role and function of Alveley, it is not considered that this can be achieved without identifying safeguarded land for future development beyond the proposed plan period at the settlement.

g. Green Belt Performance

- i. In identifying proposed allocations and safeguarded land, the performance against Green Belt purposes and the harm to the remaining Green Belt was given due consideration.
- ii. Whilst this in and of itself is not considered a defining exceptional circumstance, it does complement the wider exceptional circumstances identified.

- 7.19. **Further information is provided within the Green Belt Revised Exceptional Circumstances Statement (EV051) and paragraphs 8.30-8.37 of the initial Green Belt Topic Paper (GC4g).**

Site Boundaries and Compensatory Improvements to the Green Belt

- 7.20. In identifying the three proposed areas of safeguarded land to be removed from the Green Belt, due consideration was given to resultant Green Belt boundaries and the ability to provide for compensatory improvements to the Green Belt. This is consistent with the requirements of paragraphs 142 and 143 of the NPPF.
- 7.21. These matters are addressed within paragraphs 6.37-6.42 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

8. Bridgnorth

Introduction

- 8.1. Bridgnorth is an attractive market town located in the east of Shropshire on the junction of the A458 and A442. It has an unusual relationship to the West Midlands Green Belt in that the town is not fully inset within the Green Belt, rather it wraps around the eastern built form of the settlement (known as the Low Town).
- 8.2. Stanmore Business Park (formerly known as Stanmore Industrial Estate) is a significant employment site associated with Bridgnorth, located to the east of the Low Town and inset within the Green Belt. It constitutes a 'centre of excellence for engineering and advanced manufacturing' and a key employment location in Shropshire.
- 8.3. Within the draft Shropshire Local Plan, Bridgnorth is proposed to be identified as a Principal Centre (this is in effect a continuation of the role that the settlement plays within the adopted Development Plan).
- 8.4. Reflecting on the wider proposed spatial strategy, the role of Bridgnorth within this spatial strategy and in east Shropshire, constraints present, and identified issues and opportunities; draft Policy S3.1 of the draft Shropshire Local Plan which establishes the settlement strategy for Bridgnorth proposes to deliver "*around 1,800 dwellings*" and make available "*around 49ha of employment land to create choice and competition in the market.*"

- 8.5. It also indicates that *“New housing and employment will make provision for the needs of the town and surrounding hinterland, including attracting inward investment and allowing existing businesses to expand.”*
- 8.6. The proposed settlement strategy seeks to support Bridgnorth’s role as a Principal Centre and strategic focus in east Shropshire; the long-term sustainability of the settlement; ensure that the housing and employment needs of Bridgnorth’s community and those within the wider rural area (including a proportion of the unmet housing need forecast to arise within the Black Country) is achieved; whilst also respecting the settlement’s location relative to the Green Belt and other known constraints.

Green Belt Release Proposed

- 8.7. Having reflected on the proposed spatial strategy, the strategic role of the town, known development constraints, identified issues and opportunities, and having reviewed the site promotions received within the settlement, the draft Shropshire Local Plan proposes that in Bridgnorth:
- a. New residential development will be delivered through:
 - i. Existing commitments (including proposed saved SAMDev Plan allocations which are the subject of a current Planning Application with a resolution to grant Planning Permission).
 - ii. A further significant mixed-use sustainable urban extension allocation (BRD030) which is located outside of the Green Belt.
 - iii. Complementary small-scale windfall residential development considered appropriate within the town’s development boundary and appropriate exception development outside town’s development boundary.
 - b. New employment development will be delivered through:
 - i. Existing commitments (including proposed saved SAMDev Plan allocations which are the subject of a current Planning Application with a resolution to grant Planning Permission)³.

³ Please Note: Around 6.6 hectares of proposed saved SAMDev Plan employment allocations are specifically for the relocation of the existing Livestock Market. These allocations also include substantial areas for landscaping.

- ii. The previously referenced mixed-use sustainable urban extension allocation (BRD030) which is located outside of the Green Belt.
- iii. Two extensions to the successful Stanmore Business Park (P58a and STC002). These extensions total some 11.4ha and comprise land that is currently located within the Green Belt.
- iv. Complementary windfall employment development, where it is considered appropriate and consistent with relevant policies of the Shropshire Local Plan.

8.8. As such, for the avoidance of doubt, two sites are proposed to be removed from the Green Belt in order to contribute to the achievement of the proposed settlement strategy for Bridgnorth and the proposed spatial strategy for Shropshire within the draft Shropshire Local Plan.

8.9. Both these sites are for employment uses and seek to facilitate expansion of the strategically important Stanmore Business Park.

8.10. Further information on the two sites proposed to be removed from the Green Belt is provided within paragraph 7.39 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

8.11. It is recognised that there is also a need to consider whether longer term development opportunities beyond the period addressed within the draft Shropshire Local Plan exist and to ensure that the Green Belt boundaries will not require further amendment within the next review of the Local Plan.

8.12. Having reflected on this matter, given the unique relationship that Bridgnorth has with the Green Belt, it is considered that sufficient development options exist at the town without the need to identify areas of safeguarded land. This is supported by the identification of a potential future direction of growth associated with the proposed mixed-use sustainable urban extension allocation (BRD030).

Accommodating Proposed Contributions to the Unmet Needs Forecast to Arise Within the Black Country

8.13. Bridgnorth was identified as one location where it may be appropriate to accommodate all or part of the proposed contribution to the unmet needs forecast to arise within the Black Country.

8.14. This was informed by a comprehensive consideration of the functional relationship between the Black Country and sub-

geographies within Shropshire, as summarised within the additional Sustainability Appraisal assessment work.

- 8.15. This conclusion was reached as Bridgnorth is located in south-east Shropshire and has a functional relationship to the Black Country. It also benefits from strong road links to the Black Country via the A454/A458 corridors.
- 8.16. Through the additional SA and site assessment work, the proposed allocation at Bridgnorth (BRD030) was identified as one site upon which it is considered appropriate to accommodate 600 dwellings of the proposed contribution towards the unmet housing need forecast to arise in the Black Country.
- 8.17. This conclusion was informed by a range of factors, including:
- a. Bridgnorth has a functional relationship to the Black Country and strong road links via the A454 and A458 corridors.
 - b. Bridgnorth is a Principal Centre and performs a strategic role in the east of Shropshire.
 - c. The site constitutes a proposed sustainable urban extension, with the capacity to accommodate a significant volume of development, including a range of house types to meet different needs.
 - d. The site can accommodate a sizeable contribution towards the unmet housing needs forecast to arise in the Black Country.
 - e. Development of the site would be considered to constitute sustainable development, informed by careful consideration of identified opportunities and constraints (including the fact that it is not located within the Green Belt).
 - f. Accommodating the proposed contribution to the Black Country on this site will contribute to the achievement of the wider spatial strategy for Shropshire.
- 8.18. **Importantly in the context of this Topic Paper, the proposed Sustainable Urban Extension at BRD030 is not located within the Green Belt.**

Assessment of All Other Reasonable Alternatives

- 8.19. Consistent with paragraph 141 of the NPPF, before concluding that exceptional circumstances existed, consideration of all other reasonable alternatives was undertaken. This is comprehensively documented within paragraphs 7.53-7.65 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

8.20. This is structured around two key components, alternative options to the expansion of Stanmore Business Park and alternative options for the expansion of Stanmore Business Park.

Exceptional Circumstances: Green Belt Releases to Contribute to Meeting Shropshire Housing and Employment Land Needs

8.21. It is considered that there are a number of exceptional circumstances which support the proposed release of 2 areas of land from the Green Belt at Stanmore Business Park, Bridgnorth, to be allocated for employment development in order to allow for the expansion of this important employment site, to contribute to the achievement of the proposed settlement strategy for Bridgnorth and to contribute to the proposed spatial strategy for Shropshire within the draft Shropshire Local Plan.

8.22. **These are comprehensively documented within paragraphs 7.66-7.94 of the Green Belt Revised Exceptional Circumstances Statement (EV051) and paragraphs 8.30-8.37 of the initial Green Belt Topic Paper (GC4g).**

8.23. In summary, these exceptional circumstances include:

a. Supporting the Role of Stanmore Business Park

- i. Stanmore Business Park represents a 'centre of excellence for engineering and advanced manufacturing', hosting a range of businesses within and associated with engineering and advanced manufacturing that benefit from their co-location on the site⁴.
- ii. The Business Park is a key employment location for Bridgnorth and Shropshire. It also represents a regionally significant site which strongly complements the wider engineering and advanced manufacturing sector in the West Midlands.
- iii. To ensure Stanmore Business Park continues to perform and expand on its role as a 'centre of excellence for engineering and advanced manufacturing', there is a need to provide appropriate opportunities for the expansion of existing businesses and the co-location of other businesses, particularly those within the engineering and advanced manufacturing sector.

⁴ *The Marches Centre for Manufacturing and Technology CIC (MCMT) has now left the Business Park. However, this unit has been granted Planning Permission to facilitate the installation and operation of innovative processing plant to recover high value metals from small end of life electronic equipment. This use is similar in character to 'advanced manufacturing' uses.*

- iv. Given the high-occupancy rates on the site and the limited remaining land for development within the existing site, it is considered critical to provide further opportunities for the expansion of the site in the short, medium and long term in order to allow for this to occur.
 - v. As such, facilitating the expansion of the Business Park in order to ensure that it continues to perform and expand its role as a 'centre of excellence for engineering and advanced manufacturing' is considered an exceptional circumstance that contributes to the justification for the release of the two parcels of land from the Green Belt, specifically for the expansion of the Business Park itself.
- b. Supporting the medium- and long-term needs of existing businesses on Stanmore Business Park**
- i. Stanmore Business Park is host to a significant number of businesses, including a particular concentration within and associated with engineering and advanced manufacturing.
 - ii. In order to support the medium- and long-term needs of the site occupiers', appropriate opportunities are required for any necessary expansion – particularly as the operation from a single site brings many efficiency benefits, to an organisation.
 - iii. Given the high-occupancy rates on the site and the limited remaining land for development within the existing site, it is considered critical to provide further opportunities for the expansion of the site, to allow for the expansion of existing businesses in the medium- and long-term.
 - iv. As such, facilitating expansion of the Business Park to provide opportunities for existing businesses on the site to expand in the medium- and long-term is also considered an exceptional circumstance that contributes to the justification for the release of the two parcels of land from the Green Belt, specifically for the expansion of the Business Park itself.
- c. Attracting new businesses, particularly those in the 'engineering and advanced manufacturing' sector**
- i. As a locally and regionally significant site and a 'centre for excellence for engineering and advanced manufacturing', Stanmore Business Park provides an opportunity to attract other businesses into Shropshire, particularly those in the engineering and advanced manufacturing sectors that will benefit from 'clustering' on the site.
 - ii. Given the high-occupancy rates on the site and the limited remaining land for development within the existing site, to provide opportunities to accommodate new businesses there

is a need to provide further opportunities for the expansion of the site.

- iii. As such, facilitating expansion of the Business Park to provide opportunities to attract new businesses onto the site, which will benefit from the 'cluster' of business within the engineering and advanced manufacturing sectors, is considered an exceptional circumstance that contributes to the justification for the release of the two parcels of land from the Green Belt, specifically for the expansion of the Business Park itself.

d. Supporting the Strategic Role of Bridgnorth

- i. Bridgnorth is a Principal Centre and performs a strategic role in the east of Shropshire.
- ii. Within the proposed spatial strategy of the draft Shropshire Local Plan, Bridgnorth constitutes a significant focus for development.
- iii. The two sites proposed for release from the Green Belt would allow for the expansion of Stanmore Business Park, a key location for engineering and advanced manufacturing. This expansion will support the strategic role of the town in east Shropshire by enhancing employment opportunities and in this way contribute to the achievement of the proposed settlement strategy for Bridgnorth and the wider spatial strategy for Shropshire.
- iv. This is considered an exceptional circumstance that contributes to the justification for the release of the two parcels of land from the Green Belt, specifically for the expansion of the Business Park itself.

e. Supporting the Aspirations of the Economic Growth Strategy for Shropshire and the Marches Local Enterprise Partnership (LEP)

- i. Advanced manufacturing (including engineering, agri-food and agri-tech) is one of the key growth sectors for the Shropshire economy identified within the Economic Growth Strategy.
- ii. Stanmore Business Park is a key location for engineering and advanced manufacturing within Shropshire and the West Midlands.
- iii. Furthermore, the Marches LEP identifies Bridgnorth as an 'opportunity town' linked to its "*large manufacturing sector with supply chain links into the West Midlands*" within its Strategic Economic Plan (EV109).
- iv. It is considered that facilitating the expansion of Stanmore Business Park, will contribute towards the achievement of the

aspirations of both the Economic Growth Strategy for Shropshire and the Strategic Economic Plan for the Marches.

- v. This is considered an exceptional circumstance that contributes to the justification for the release of the two parcels of land from the Green Belt, specifically for the expansion of the Business Park itself.

f. Green Belt Performance

- i. In identifying proposed employment land allocations, the performance against Green Belt purposes and the harm to the remaining Green Belt was given due consideration.
- ii. Whilst this in and of itself is not considered a defining exceptional circumstance, it does complement the wider exceptional circumstances identified.

Site Boundaries and Compensatory Improvements to the Green Belt

8.24. In identifying the three proposed areas of safeguarded land to be removed from the Green Belt, due consideration was given to resultant Green Belt boundaries and the ability to provide for compensatory improvements to the Green Belt. This is consistent with the requirements of paragraphs 142 and 143 of the NPPF.

8.25. These matters are addressed within paragraphs 7.95-7.104 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

9. Shifnal

Introduction

9.1. Shifnal is a town located on the M54/A5 corridor, a key road and rail transport corridor, linking Shropshire to the West Midlands. The town has experienced significant growth over recent years, much of which has occurred during the period addressed within the draft Shropshire Local Plan.

9.2. Shifnal is inset within the West Midlands Metropolitan Green Belt, meaning it is surrounded by Green Belt (with the exception of areas of land on the towns north-eastern and south-eastern edges, which were previously removed from the Green Belt and safeguarded for future development).

9.3. Within the draft Shropshire Local Plan, Shifnal is proposed to be identified as a Key Centre (this is in effect a continuation of the role

that the settlement plays within the adopted Development Plan). Indeed, the settlement represents the largest of the proposed Key Centres in Shropshire.

- 9.4. Reflecting on the wider proposed spatial strategy, the role of Shifnal within this spatial strategy and in east Shropshire, constraints present, and identified issues and opportunities; draft Policy S15.1 of the draft Shropshire Local Plan which establishes the proposed spatial strategy for Shifnal proposes that:
- 9.5. *“the town will deliver around 1,500 dwellings and make available around 41 hectares of employment land to provide choice and competition in the market.”* It also indicates that *“New housing and employment will provide for the needs of the town and surrounding hinterland, including attracting inward investment, allowing existing businesses to expand and encouraging new businesses to establish in Shifnal.”*
- 9.6. The nature and scale of development within the proposed settlement strategy is designed to maintain and enhance Shifnal’s role as a Key Centre and ensure that local housing and employment land needs (and a contribution to unmet employment need forecast to arise in the Black Country) are achieved, whilst also respecting the settlement’s location in the Green Belt and other known constraints. It is also responsive to past trends and existing commitments.

Green Belt Release Proposed

- 9.7. Having reflected on the proposed spatial strategy, the strategic role of the town, known development constraints, identified issues and opportunities, and having reviewed the site promotions received within the settlement, the draft Shropshire Local Plan proposes that in Shifnal:
 - a. New residential development will be delivered through:
 - i. Existing commitments (including proposed saved SAMDev Plan allocations which benefit from Planning Permission).
 - ii. Three further residential allocation (SHF013; SHF015 & SHF029; and SHF022 & SHF023) all of which are located outside of the Green Belt on land that was previously ‘safeguarded’ for future development.
 - iii. Complementary small-scale windfall residential development considered appropriate within the town’s development boundary and appropriate exception development outside town’s development boundary.

- b. New employment development will be delivered through:
 - i. A new strategic employment allocation (SHF018b & SHF018d), which due to its size and location will represent a significant new investment opportunity and has the potential to form both a locally and regionally important employment centre.
 - ii. Existing commitments and complementary windfall employment development within the settlement's development boundary, where it is considered appropriate and consistent with relevant policies of the Shropshire Local Plan.
- 9.8. **As such, for the avoidance of doubt, one site is proposed to be removed from the Green Belt in order to contribute to the achievement of the proposed settlement strategy for Shifnal and the proposed spatial strategy for Shropshire within the draft Shropshire Local Plan.**
- 9.9. **This site is for employment uses and seeks to establish a new investment opportunity with the potential to form both a locally and regionally important employment centre.**
- 9.10. It is also recognised that the proposed allocations within the draft Shropshire Local Plan will exhaust much of the remaining supply of safeguarded land that exists around the settlement.
- 9.11. As such, to complement the 1 remaining area of 'safeguarded land' which totals some 10.4ha located at Land between Revells Rough, Lamledge Lane and the eastern rail line (part of SHF023); 5 further areas of land totalling some 82.4ha are proposed to be removed from the Green Belt and 'safeguarded' for future development (SHF018a; P14; SHF019 & part of P15b; part of SHF017 & P16 and another part of SHF017).
- 9.12. Further information on each of the sites proposed to be removed from the Green Belt for employment purposes and to form new areas of 'safeguarded' for future development is provided within paragraph 8.44 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

Accommodating Proposed Contributions to the Unmet Needs Forecast to Arise Within the Black Country

- 9.13. Shifnal was identified as one location where it may be appropriate to accommodate all or part of the proposed contribution to the unmet needs forecast to arise within the Black Country.
- 9.14. This was informed by a comprehensive consideration of the functional relationship between the Black Country and sub-

geographies within Shropshire, as summarised within the additional Sustainability Appraisal assessment work.

- 9.15. This conclusion was reached as Shifnal is located in east Shropshire and has a functional relationship to the Black Country. It also benefits from strong road links to the Black Country via the M54/A5 corridor and strong rail links to the Black Country via the Shrewsbury-Wolverhampton railway line.
- 9.16. Through the additional SA and site assessment work, the proposed allocation at Shifnal (SHF018b & SHF018d) was identified as the site upon which it is considered appropriate to accommodate the entirety of the 30ha proposed employment land contribution towards the unmet employment land need forecast to arise in the Black Country.
- 9.17. This conclusion was informed by a range of factors, including:
- a. Shifnal has a functional relationship to the Black Country and strong road and rail links via the M54/A5 corridor and Shrewsbury-Wolverhampton railway line respectively.
 - b. Shifnal is a Key Centre and a focus for investment, employment, housing and development on the M54/A5 strategic corridor.
 - c. The site constitutes a proposed strategic employment allocation which due to its size and location has the potential to form both a local and regionally important employment centre.
 - d. The site can accommodate a sizeable contribution towards the unmet employment land needs forecast to arise in the Black Country.
 - e. Development of the site would be considered to constitute sustainable development, informed by careful consideration of identified opportunities and constraints. Whilst the site is located within the Green Belt, it is considered that exceptional circumstances exist to justify the release of this land for employment, as documented within this Green Belt Topic Paper.
 - f. Accommodating the proposed contribution to the Black Country on this site will contribute to the achievement of the wider spatial strategy for Shropshire.
- 9.18. **Importantly in the context of this Topic Paper, the proposed Strategic Employment Allocation SHF018b & SHF018d is currently located within the Green Belt.**

Assessment of All Other Reasonable Alternatives

- 9.19. Consistent with paragraph 141 of the NPPF, before concluding that exceptional circumstances existed, consideration of all other reasonable alternatives was undertaken. This is comprehensively

documented within paragraphs 8.64-8.87 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

- 9.20. In the context of accommodating the proposed contribution to the unmet employment land need forecast to arise within the Black Country, consideration of all other reasonable alternatives is documented within the additional Sustainability Appraisal assessment work.

Exceptional Circumstances: Green Belt Releases to Contribute to Meeting Shropshire Housing and Employment Land Needs

- 9.21. It is considered that there are a number of exceptional circumstances which support the proposed release of 3 areas of land from the Green Belt at Shifnal, to be 'safeguarded' for future development beyond the draft Shropshire Local Plan period.

- 9.22. **These are comprehensively documented within paragraphs 8.88-8.149 of the Green Belt Revised Exceptional Circumstances Statement (EV051) and paragraphs 8.30-8.37 of the initial Green Belt Topic Paper (GC4g).**

- 9.23. In summary, these exceptional circumstances include:

a. Sustainable Patterns of Development

- i. Paragraph 142 of the NPPF recognises the need to “...*promote sustainable patterns of development...*” when reviewing Green Belt boundaries. In Shropshire, the Green Belt Review offers the potential to respond to the circumstances, character, needs and opportunities in the east of the County.
- ii. Proposals to release Green Belt land for development seek to achieve the preferred spatial strategy which seeks to deliver an urban focussed distribution of development.
- iii. This has enabled the spatial strategy to focus development opportunities particularly to deliver new employment into the most sustainable settlements in the east of the County.
- iv. This also enables the safeguarding of land to provide options for the future development of these settlements beyond the current plan period, as advised in NPPF paragraph 143(c) “When defining Green Belt boundaries, plans should: ... c) where necessary, identify areas of safeguarded land between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;...”.

- v. These opportunities help to meet the needs of these key communities and their hinterlands during the proposed plan period and into the future.
- vi. This strategy also helps to deliver a 'step change' in the performance and productivity of the Shropshire economy.
- vii. It is considered this represents an exceptional circumstance to justify the release of land from the Green Belt.

b. Supporting the Role and Function of Shifnal:

- i. Shifnal is the largest Key Centre in Shropshire and benefits from a highly sustainable location on the M54/A5 strategic road and rail corridor. Shifnal provides a station on the Shrewsbury-Wolverhampton Railway Line in the town and is close to stations in Telford and at Cosford and Albrighton.
- ii. Shifnal performs a key role within the east of the County. Shifnal supports the role of the principal market town at Bridgnorth and complements the function of the adjacent 'built up area' of Telford.
- iii. The strategy for Shifnal should support the role and function of the town as an important Key Centre. This should increase the self-containment and sustainability of the community; ensure the longer-term sustainability of its services and facilities; and deliver housing and employment to meet the needs of the town and other communities in the Green Belt.
- iv. This cannot be achieved without delivering new development opportunities particularly to provide new employment to reduce the 'dormitory' character of the settlement and to deliver new investment in critical infrastructure to continue to meet the needs of the community.
- v. It is considered this represents an exceptional circumstance to justify the release of land from the Green Belt.

c. Supporting the Community Vitality of Shifnal:

- i. Shifnal has a lower average age profile than the Shropshire average, but has some sensitivities that affect the robustness of the community particularly a smaller cohort of young people.
- ii. Due to the settlement's location within the Green Belt, past Development Plans have planned for only limited levels of development which have constricted the ability to address identified sensitivities. The adopted Development Plan and draft Shropshire Local Plan seek to redress this imbalance by promoting significant levels of growth with periods of assimilation.

- iii. This provides for progressive growth to improve the vitality of the community with some assimilation of these changes rather than sudden and unexpected growth of the settlement, community and local economy.
- iv. The draft Shropshire Local Plan proposes a significant allocation of land for employment development to 2038 and to safeguard land beyond 2038 as future option for mixed housing and employment growth. The continued enclosure of the town in the Green Belt without any future provision for growth may prevent Shifnal sustaining its community and its economic potential.
- v. It is considered this represents an exceptional circumstance to justify the release of land from the Green Belt.

d. Improving Employment Opportunities in Shifnal:

- i. Improving the employment land offer is an important component of changing the economy in Shifnal and sustaining its role in Shropshire's settlement hierarchy. This will sustain Shifnal as a key settlement in the strategic corridor which is accessible to the M54 and rail network despite being 'inset' into the Green Belt.
- ii. This objective is identified in the draft Shropshire Local Plan evidence where Shifnal is identified as a key investment location in the M54 Strategic Corridor where it is:
 - Located between Shrewsbury to the west and Wolverhampton to the east within the West Midlands conurbation offering opportunities as part of the Midlands Engine growth strategy;
 - Located close to the international investment site at i54 occupied by key growth sector industries for the West Midlands in advanced manufacturing;
 - Accessible to higher education and training institutions including key assets like RAF Cosford, Harper Adams University and University Centre Shrewsbury;
 - Expected to benefit from critical local infrastructure investment and strategic investment in the road and rail networks.
- iii. It is considered this represents an exceptional circumstance to justify the release of land from the Green Belt.

e. Changing the Dormitory Character of Shifnal:

- i. Shifnal has the opportunity to manage and improve the vitality of the community and the performance and productivity of the local economy. This can be achieved

through the settlement strategy for the town and the scale and delivery of development opportunities.

- ii. The settlement strategy for Shifnal should achieve three key objectives to achieve these benefits:
 - To manage the delivery of new housing and meet the needs of local communities for affordable homes and to enable people to live and work in Shifnal;
 - To create new employment opportunities to improve the performance of the local economy, reduce out-commuting and improve the vitality of the local community;
 - To increase demand for retailing, services and facilities within the town and to improve the service offer and capacity to meet the needs of the town and other communities in the Green Belt.
- iii. It is considered this represents an exceptional circumstance to justify the release of land from the Green Belt.

f. Improving the Investment Programme for Shifnal:

- i. Shifnal has been constrained by its location within the Green Belt. This constraint to development has also limited investment in the infrastructure of the town and in the range and quality of the retailing, services and facilities available to the resident population.
- ii. Shifnal requires a progressive and steady rate of growth to permit the infrastructure of the town to be improved in response to the requirements of new development. This will refresh and upgrade the infrastructure of the settlement to the benefit of the whole community.
- iv. The enclosure of the town in the Green Belt without further provision for future growth will prevent Shifnal from benefitting from these objectives. It is considered this represents an exceptional circumstance to justify the release of land from the Green Belt.

g. Investment Potential and Business Needs

- i. The need to refresh and improve the employment land offer is an important component of changing the capacity of Shifnal to fulfil the role of the town in the settlement hierarchy of Shropshire in particular to enable the town to function as a key settlement within the M54 strategic corridor.

- ii. This objective has been addressed in the evidence for the Local Plan in the M54 Strategic Corridor Study which concluded this location should be considered for investment due to:
 - the strategic corridor location between Wolverhampton to the east and Shrewsbury to the west closely related to the West Midlands conurbation and the associated opportunities of the Midlands Engine;
 - the adjacent international occupiers in target growth sectors for Shropshire i.e. advanced manufacturing / automotive / engineering;
 - the accessible infrastructure network and the benefits of pipeline infrastructure investment in road/rail over the coming years; and
 - the higher education and training institutions including key assets like RAF Cosford, Harper Adams University, University Centre Shrewsbury.
- iii. Employment in Shifnal is limited by the reliance of the town on 'service' industries. Employment opportunities therefore provide a limited choice for economically active people of working age who commute out of town to work in other areas.
- iv. A key limiting factor in the employment offer is the quality and quantity of land available to businesses wishing to settle or to expand in the town. The employment areas that exist have operated for many decades and these commercial premises no longer meet modern businesses requirements.
- v. The Local Plan review seeks to address these shortfalls through the release of Green Belt land to create a new employment area with high quality, modern business floorspace. This land release seeks to provide commercial development to meet the needs of strategic and local business demands.
- vi. It is considered this represents an exceptional circumstance to justify the release of land from the Green Belt.

h. Green Belt Performance

- i. In identifying the proposed employment allocation and safeguarded land, the performance against Green Belt purposes and the harm to the remaining Green Belt was given due consideration.
- ii. Whilst this in and of itself is not considered a defining exceptional circumstance, it does complement the wider exceptional circumstances identified.

Exceptional Circumstances: Green Belt Releases to Accommodate Contributions to the Unmet Needs Forecast to Arise in the Black Country

9.24. In summary, these exceptional circumstances include:

a. Functional Relationship with the Black Country

- i. The Employment Topic Paper (GC4n) examined the strategic relationships between Shropshire and the Black Country considering the geography of adjoining Functional Economic Market Areas (FEMA), the close proximity of strategic investment opportunities and the strategic road and rail network.
- ii. This assessment identified the following conclusions:
 - the proximity and connectivity to the Black Country Authorities would enable Shropshire to support the strategic planning objectives of these four authorities;
 - there are significant strategic employment developments and proposals on the M54/A5/A41 and A458/A454 through Shropshire and extending into the Black Country area;
 - these corridors link together the Shropshire Functional Economic Market Area (FEMA) with the Black Country / Southern Staffordshire FEMA, connecting to the M6 on the national motorway network within the Black Country area;
 - the proximity of the two FEMA and the focus of investment into the strategic corridors that link them together enhances the strategic relationships between Shropshire Council and the Black Country Authorities in the discharge of their duties as 'strategic policy making authorities'.
- iii. Whilst this in and of itself is not considered a defining exceptional circumstance, it does complement the wider exceptional circumstances identified.

b. Meeting the Needs of the Black Country

- i. In accordance with paragraph 26 of the NPPF, Shropshire and the Black Country Authorities recognise a 'mutuality' between the objectives of their Local Plans that will assist each of the strategic policy-making authorities in the "production of a positively prepared and justified strategy" for their respective Local Authority areas.
- ii. This 'mutuality' seeks to counter the challenges created by the more limited development capacity of the Black Country Authority areas. This is proposed to be achieved in Shropshire by further facilitating the Black Country Authorities to access

the strategic corridors, principal settlements and land resources in the adjacent subregional area.

- iii. Shropshire Council seeks to use the land resource capacity of the County to support the sustainable growth of the Shropshire economy. This will be achieved in part, by helping to meet both the investment demands in the business markets and the employment needs in the labour markets within the Black Country. This will help to deliver a larger, relatively younger and more reliable supply of labour to meet the needs of businesses operating within the Shropshire functional economic market area.
- iv. The authority seeks to ensure their strategy will build a strong and competitive economy in Shropshire and will also facilitate its neighbours to achieve the same objectives in their own administrative areas.
- v. It is considered this represents an exceptional circumstance to justify the release of land from the Green Belt.

c. Strategic Matter for Shropshire

- i. The Employment Topic Paper (GC4n) examined the strategic relationships between Shropshire and the Black Country. These functional relationships established that the unmet need in the Black Country is a relevant strategic matter for Shropshire Council.
- ii. The assessment of these relationships concluded that assisting the Black Country Authorities would meet the objectives of NPPF paragraphs 24 and 25 that: *'Local planning authorities...are under a duty to cooperate with each other..., on strategic matters that cross administrative boundaries'*, and to *'collaborate to identify relevant strategic matters which they need to address in their plans'*.
- iii. In seeking to assist the Black Country Authorities, Shropshire Council wished to ensure they retained the capacity to meet their own labour needs. This objective would meet the obligation in NPPF, paragraph 81 to *"allow each area to build on its strengths, counter any weaknesses and address the challenges of the future"*.
- iv. Shropshire will support the Black Country Authorities by seeking to influence commuting between Shropshire and the Black Country. This would be achieved in addition to accommodating the migration of some labour to new housing in Shropshire. The scale of the contributions to the Black Country Authorities at 1,500 dwellings and 30ha of employment land

would both redistribute some labour and also share an element of the Black Country labour pool.

- v. This approach sought to both meet the duty to cooperate by satisfying unmet needs in the region and also to ensure each participating authority would have the resources to deliver effective planning strategies for their administrative areas.
- vi. It is considered this represents an exceptional circumstance to justify the release of land from the Green Belt.

d. Shropshire Economic Growth Strategy

- i. Shropshire set out its economic growth vision in the Shropshire Economic Growth Strategy (2021 – 2025). Shifnal, located on the M54/A5 strategic corridor through Shropshire, has the potential to make a significant contribution to this strategy:
 - Shifnal can build on its strategic location and accessibility from its two junctions with the M54 motorway and its rail links into the metropolitan area. This indicates the investment potential of the town with the provision of new employment land to support existing businesses and to attract new investment into the town.
 - Shifnal can perform a key role in support of Bridgnorth as the principal centre in east Shropshire. The town can support supply chain companies for key growth sectors in the County and become an important source of labour by improving the self-containment of the town,
 - Shifnal might also provide support for further growth at key locations on the M54 corridor through the provision of strategic employment land to attract significant inward investment, linked to future housing provision.
- ii. A strategy to deliver more sustainable development with an improving level of self-containment, would help Shifnal to support strategic investment locations including i54 and the proposed West Midlands Interchange and to support key urban centres at Shrewsbury, Telford, Wolverhampton, Dudley and Walsall.
- iii. It is considered this represents an exceptional circumstance to justify the release of land from the Green Belt.

e. Premium Value for Investors

- i. The designation of employment allocation SHF018b & SHF018d in Shifnal as the preferred location to satisfy the unmet need in the Black Country places a premium value on this investment location.

- ii. This premium value arises from its location on the M54, the proximity to the Black Country, the size and capability of the investment site to accommodate both strategic and local business investment and the recognition of the allocation as the preferred location to support the unmet needs in the Black Country.
- iii. The sensibility of the location, the scale of the land provision, the character and setting of the site and the strategic function of the proposed development constitute a sound and marketable investment prospect in a regional, commercial property market, that is experiencing a growing demand for new, higher quality, business locations.
- iv. It is considered this represents an exceptional circumstance to justify the release of land from the Green Belt.

Site Boundaries and Compensatory Improvements to the Green Belt

- 9.25. In identifying the two proposed areas of safeguarded land to be removed from the Green Belt and the remaining safeguarded land, due consideration was given to resultant Green Belt boundaries and the ability to provide for compensatory improvements to the Green Belt. This is consistent with the requirements of paragraphs 142 and 143 of the NPPF.
- 9.26. These matters are addressed within paragraphs 8.150-8.161 of the Green Belt Revised Exceptional Circumstances Statement (EV051).

SHROPSHIRE COUNCIL

LOCAL DEVELOPMENT SCHEME

June 2023

1. Introduction

What is the Shropshire Development Plan

- 1.1 The Shropshire Development Plan identifies a vision and framework for the future development of Shropshire.
- 1.2 The adopted Development Plan for Shropshire currently comprises of the Core Strategy (adopted 2011); the Site Allocations and Management of Development (SAMDev) Plan (adopted 2015), together with the adopted formal Neighbourhood Plans.
- 1.3 The Shropshire Core Strategy (2011) establishes the Council's vision, strategic objectives and broad spatial strategy to guide future development and growth in Shropshire to 2026. The Core Strategy is available on the Shropshire Council website via:
<https://www.shropshire.gov.uk/planning-policy/local-planning/core-strategy-2006-2026/>
- 1.4 The SAMDev Plan seeks to deliver the vision, strategic objectives and broad spatial strategy identified within the Core Strategy (2011), through the identification of site allocations for development and policies to appraise development proposals.
- 1.5 The SAMDev Plan is accompanied by a Policies Map which illustrates geographically the scope of policies within the Development Plan, including the location and extent of site allocations.
- 1.6 The SAMDev Plan and associated Policies Map is available on the Shropshire Council website via:
<https://www.shropshire.gov.uk/planning-policy/local-planning/samdev-plan-2006-2026/>
- 1.7 Adopted Neighbourhood Plans for Shropshire currently comprise those for Much Wenlock, Shifnal, Stoke Upon Tern, Woore and Broseley. Further information on these Neighbourhood Plans and any in development is available on the Shropshire Council website at:
<https://www.shropshire.gov.uk/planning-policy/neighbourhood-and-community-led-plans/>

What is the draft Shropshire Local Plan

- 1.8 Shropshire Council is currently at an advanced stage of a Local Plan Review. Specifically, a draft Shropshire Local Plan has been prepared and submitted to Government for examination. This examination is currently ongoing.
- 1.9 The draft Shropshire Local Plan identifies a vision and framework for the future development of Shropshire to 2038; addresses needs and opportunities in relation to housing, the local economy, community facilities and infrastructure; and seeks to safeguard the environment, enable adaptation to climate change and helps to secure high-quality and accessible design.

1.10 It contains:

- Draft strategic policies which set the priorities and framework for the Local Plan
- Draft 'strategic' implementation policies and more 'detailed' draft policies for managing development
- Draft settlement policies which provide draft strategies and draft guidelines for the settlements of Shropshire, including where appropriate identifying draft proposed site allocations
- Draft strategic settlement and draft strategic site policies which identify these draft proposed sites and provide draft strategies and draft guidelines for their development

1.11 Upon adoption the policies of the Shropshire Local Plan will replace the policies of the Core Strategy and SAMDev Plan, except for the SAMDev site allocations which have yet to be delivered, which will be 'saved' and therefore continue to form part of the Development Plan. The policies and proposals within adopted Neighbourhood Plans which conform with the Shropshire Local Plan will also continue to apply.

What is a Local Development Scheme?

1.12 The Local Development Scheme (LDS) is the 'Project Plan' that identifies the documents Shropshire Council will prepare as part of the Development Plan over the next 3-year period. The LDS explains:

- The purpose of the Local Plan documents;
- The resources the Council will require; and
- Timescales for producing Local Plan documents, including when public consultation will take place.

1.13 This LDS will cover the period 2023 to 2026. The LDS will be kept up to date by considering the need to revise it on at least an annual basis.

1.14 The LDS can be viewed:

- On the Shropshire Council website at:
[http://shropshire.gov.uk/planning-policy/local-plan/local-development-scheme-\(lds\)/](http://shropshire.gov.uk/planning-policy/local-plan/local-development-scheme-(lds)/)
- At the Council's Shropshire Local Hubs and Community Access points in Shrewsbury via their computer/tablet facilities (subject to availability) during their specified opening times. Further information on the Local Hubs and Community Access points is available via:
www.shropshire.gov.uk/customer-services/customer-access-points/
- At public libraries via their computer/tablet facilities (subject to availability) during their specified opening times. Further information on the location, facilities and opening times of public libraries is available on the Shropshire Council website at:
www.shropshire.gov.uk/libraries/find-a-library/

- 1.15 Individual documents may be reviewed as directed in regulations or when monitoring indicates that this is required.

Why is the LDS being amended?

- 1.16 The LDS is reviewed at least annually and amended when it is considered necessary and appropriate to do so. The July 2023 update it primarily to reflect the timescales of the ongoing examination of the draft Shropshire Local Plan.

If I need further information about the LDS, who should I contact?

- 1.17 Further advice on this LDS or other planning policy documents can be obtained from:

The Shropshire Council Planning Policy Website at:

<https://www.shropshire.gov.uk/planning-policy/>

By contacting Shropshire Council's Planning Policy team by:

Phone: 0345 678 9004 or

Email: planningpolicy@shropshire.gov.uk

2. Preparation of the Development Plan and Related Documents

2.1. The statutory Development Plan for Shropshire comprises:

- The Local Plan which is prepared by Shropshire Council and is subject to independent examination by the Planning Inspectorate; and
- Neighbourhood Plans prepared by local communities and subject to testing by an independent examiner.

2.2. More detailed advice or guidance on the policies in the Development Plan may be provided through the preparation of Supplementary Planning Documents (SPD's) which are subject to rigorous community involvement, but are not subject to independent testing and do not form part of the statutory Development Plan.

2.3. The stages of preparing a Local Plan comprise:

Stage	Summary
1. Pre-Production	Evidence gathering stage to develop the evidence base to inform the preparation of a 'sound' Local Plan.
2. Production	Preparation of Issues and Options and potentially additional Preferred Option stages, by involving the community and other stakeholders and consultation on these. A final or Pre-Submission draft version of the Local Plan is prepared for gathering representations on 'soundness' for the Examination. Should significant new issues be raised there is the opportunity to go back to a previous stage before submitting the Local Plan for Examination to the Secretary of State in the light of the representations received.
3. Examination	Independent examination by a Planning Inspector to consider the 'soundness' and legal compliance of the Plan;
4. Adoption	The Inspector prepares a report possibly with modifications to make the Local Plan sound which may require further consultation. Once undertaken if required the Council adopted and publish the Local Plan.

2.4. The stages of preparing a Neighbourhood Plan comprise:

Stage	Summary
1. Designation	The qualifying body submits an application to designate a neighbourhood area to the local planning authority, which publicises and consults on the area application for minimum of 6 weeks;
2. Production	The qualifying body develops proposals advised by the local planning authority. This comprises: <ul style="list-style-type: none"> • gathering baseline information and evidence; • engaging and consulting with those living and working in the neighbourhood area and those with an interest in or affected by the proposals (e.g. service providers) • talking to land owners and the development industry • identifying and assessing options • determining whether a plan or an Order is likely to have significant environmental effect • starting to prepare proposals documents
3. Pre-Submission Consultation	The qualifying body invites representations on the draft plan and considers consultation responses and amends it if appropriate. The qualifying body prepared a consultation statement.
4. Submission to the Local Planning Authority	The qualifying body submits the plan to the local planning authority, which checks that submitted proposal complies with all relevant legislation. If the local planning authority finds that the plan or order meets the legal requirements it: <ul style="list-style-type: none"> • publicises the proposal for minimum 6 weeks and invites representations; • notifies consultation bodies referred to in the consultation statement; • appoints an independent examiner (with the agreement of the qualifying body)
5. Independent Examination	The local planning authority sends the draft plan and representations to the independent examiner, who undertakes examination and issues a report to the local planning authority and qualifying body. The local planning authority publishes the report and reaches its own view on whether to send the plan to referendum.
6. Referendum and Making the Neighbourhood Plan	Shropshire Council publishes an information statement and a notice of referendum. Polling takes place and the results are declared. Subject to the results, the local planning authority 'makes' the neighbourhood plan, bringing it into force.

2.5. The process of preparing Supplementary Planning Documents (SPDs) is shorter and does not involve independent examination:

Stage	Summary
1. Preparation of Draft SPD	Includes evidence gathering and the involvement of the community and stakeholders from an early stage.
2. Consultation on Draft SPD	Representations invited on a published draft.
3. Adoption	Council considers representations received and finalises SPD before adoption.

2.6. Accompanying the Local Plan documents will be additional documents describing:

- The sustainability implications of the new documents (*Sustainability Appraisal* or SA which incorporates *Strategic Environmental Assessment* or SEA).
- A *Habitat Regulations Assessment* or HRA, assessing the implications of development for European sites in and adjoining the Plan Area. This will include *Appropriate Assessment* as necessary.
- A *Statement of Community Involvement* or SCI which shows how Shropshire Council intends to achieve continuous and meaningful community involvement in the production of Local Plans to help build consensus regarding their content.
- The results of monitoring (including the *Authority Monitoring Report* or AMR).

3. Purpose and content of the Local Development Scheme

3.1 This document is the Council's 'Project Plan' for the period from 2023 to 2026. Its main purposes are:

- To inform the community and other stakeholders of the Local Plan documents for the area and the timescales they can expect for their preparation and subsequent review, and;
- To establish the Council's priorities for the preparation of the Local Plan and its associated work programme.

3.2 The LDS sets out:

- The Local Plan documents that are to be prepared over the forthcoming 3-year period to replace existing policies;
- The current Local Plan documents which make up the statutory Development Plan for Shropshire and any existing policies that will be saved;

- The subject matter and the geographical area to which each document relates;
- Supplementary Planning Documents (SPDs) that are to be prepared over the forthcoming 3-year period to clarify and provide further guidance;
- Which organisation is to lead the process of each document preparation and which, if any, are to be prepared jointly with other local planning authorities;
- The arrangements for monitoring of the Local Plan.

4. Structure and Operation of the Shropshire Local Plan

Local Plan Review

- 4.1 The Council considers that to provide further certainty and clarity for development and investment, it is sensible and pragmatic to carry out an early review of the Local Plan. This is responsive to Paragraphs 11 and 31-33 of the National Planning Policy Framework (NPPF) and the commitment within Paragraph 1.13 of the adopted SAMDev Plan.
- 4.2 The timetable in this LDS may change further in response to changes in the evidence base; changes in national government policy and guidance; and the availability of Council resources. The LDS will therefore be kept under regular review.
- 4.3 The content and programme for review and production of the Local Plan and associated evidence base are set out in the Schedule of Proposed Documents (Table 1) which follows this section and the Individual Document Profiles in Appendix 1.

Table 1: SCHEDULE OF PROPOSED DEVELOPMENT PLAN DOCUMENTS

<i>Document Title</i>	<i>Status</i>	<i>Brief Description</i>	<i>Chain of Conformity</i>	<i>Date of Issues & Options Consultation</i>	<i>Date for Submission to Secretary of State</i>	<i>Proposed Date for Adoption</i>
Draft Shropshire Local Plan (2016-2038)	Development Plan Document	Document identifying revised growth requirements and additional sites proposed to deliver this growth during the revised plan period.	General conformity with National Planning Policy Framework (NPPF) and National Planning Practice Guidance (PPG)	January 2017	September 2021	June 2024
Neighbourhood Plans	Development Plan Document	Neighbourhood Plans setting out local objectives, development management policies and allocations	Core Strategy, SAMDev Plan, future Local Plan documents	Preparation of Neighbourhood Plans are prepared by qualifying bodies that represent the local community (appropriately supported by Shropshire Council). The document is subject to testing by an independent examiner. Timescales for this process are responsive to timescales for preparation of draft Neighbourhood Plans by local communities and subsequent submission to Shropshire Council.		

Page 18 of 25

5. The adopted Local Plan for Shropshire

4.4 The adopted Local Plan for Shropshire comprises:

Core Strategy

4.5 The Core Strategy sets out the approach and strategic framework for development in Shropshire. It incorporates the spatial elements of the Sustainable Community Strategy and other corporate strategies. The Core Strategy underwent independent examination during 2010 and was found to be “sound” and adopted by Shropshire Council in March 2011. The Core Strategy:

- Sets out the broad community vision and spatial strategy;
- Identifies key strategic sites for development;
- Sets out a settlement strategy, with criteria-based policies to enable development to come forward;
- Provides strategic guidance for development management in conjunction with national and other guidance but does not contain numerous development control policies; and
- Sets out an investment/implementation plan, including priorities and mechanisms for infrastructure delivery.

4.6 Further information on the adopted Core Strategy can be found via: <http://shropshire.gov.uk/planning-policy/local-plan/core-strategy-2006-2026>

Site Allocations and Management of Development (SAMDev)

4.7 Although strategic site allocations are set out in the Core Strategy, it is necessary to ensure that sufficient land is allocated specifically to meet Shropshire’s needs for housing employment, retail and services. In particular, it is imperative that we can meet housing needs and the government requirement to identify a 5 year supply of available housing land. It is also important to ensure that the range of strategic policies in the Core Strategy is complemented by a suite of more detailed policies in this Local Plan document. This is to make sure there are no ‘gaps’ with national and regional policies and that a suitable policy framework is in place to enable a ‘development management’ approach to be delivered.

4.8 Therefore a single Site Allocations and Management of Development (SAMDev) Local Plan document for Shropshire was prepared. It was not the intention to identify every single site for development over the next 15-20 years, as criteria-based policies within the Core Strategy and SAMDev provide a framework for additional sites to

come forward. The SAMDev was examined during 2014 and adopted in December 2015.

- 4.9 Further information on the SAMDev Local Plan document can be found via: <http://shropshire.gov.uk/planning-policy/local-plan/samdev-plan-2006-2026/>

Neighbourhood Plans

- 4.10 Town and Parish Councils can prepare Neighbourhood Plans (Neighbourhood Development Plans) putting in place policies to guide the future development of the area.
- 4.11 Shropshire Council has a legal duty to support the preparation of any Neighbourhood Plans, including the provision of information and evidence, advice on sustainability assessment, the appointment of a suitable person who will publicly examine the Neighbourhood Plans and holding a referendum within the area covered by the Neighbourhood Plans.
- 4.12 Shifnal, Much Wenlock, Woore, Stoke-upon-Tern, and Broseley have adopted Neighbourhood Plans. A number of other areas have been designated Neighbourhood Areas and are working on their respective Neighbourhood Plans.
- 4.13 Any Neighbourhood Plan must be in general conformity with 'strategic policies' in the Local Plan and with national policy.
- 4.14 Neighbourhood Plans are not able to propose lower levels of development than those set out in up to date Local Plans but could propose higher levels.
- 4.15 Before a Neighbourhood Plan is adopted it must be subject to a referendum. If over 50% of the votes are in favour the local planning authority would have a duty to 'make' (adopt) the NDP.
- 4.16 Further information on neighbourhood planning can be found via <https://www.shropshire.gov.uk/planning-policy/neighbourhood-and-community-led-plans/>

Authority Monitoring Report

- 4.17 An Authority's Monitoring Report (AMR) is one of the key mechanisms utilised by the Council to monitor annually how effective its policies and proposals are in meeting the vision and objectives set out in the Core Strategy – or any subsequent Local Plan.

- 4.18 Shropshire Council will aim to prepare an AMR covering the previous financial year (1 April to 31 March) before the end of the subsequent financial year.
- 4.19 The task of monitoring and producing the AMR forms a part of the process of maintaining an up-to-date evidence base and tracking plan-making progress.
- 4.20 The AMR will include:
- A survey and review of the area's characteristics, including: published statistics that help paint a social, environmental, economic, physical and demographic background; and local indicators on particular local issues, concerns or policy objectives;
 - Whether the Council is meeting, or is on track to meet, the targets and milestones set out in the LDS, and if not the reasons why;
 - An assessment of the extent to which policies in the Local Plan are being implemented and, if not, the reasons why;
 - The actions required to address any identified issues (the AMR itself will not revise or amend policies, but it will set out the steps the Council will take to address those issues, e.g. bring forward a review); and
 - Indicate whether any new Local Plan documents need to be prepared.
- 4.21 The latest AMR covers the financial year 2019-2020, covering the period prior to the Formal Regulation 19 Consultation on the draft Shropshire Local Plan for examination. It is supported by other documents which monitor the effects of the adopted Local Plan and informed the preparation of the draft Shropshire Local Plan.
- 4.22 Further information on monitoring and site assessment is available on the Shropshire Council website at:
<https://www.shropshire.gov.uk/planning-policy/monitoring-and-site-assessment/>

Supplementary Planning Documents

- 4.23 Supplementary Planning Documents (SPDs) are intended to expand upon policy or provide further detail to policies in adopted Local Plan Documents. SPDs give further information to the policies contained in the Development Plan, and can cover a wide variety of issues.
- 4.24 The Council currently has three adopted SPDs: the Developer Contributions SPD, the Sustainable Design SPD (both adopted in

2011); and the Type and Affordability of Housing SPD (adopted in 2012).

- 4.25 Whilst SPD's have also been drafted to provide additional guidance to support Local Plan policies on the Historic Environment and the Natural Environment, further progress with these documents is currently a lower priority than the Local Plan Review.
- 4.26 Further SPD's are likely to be prepared following the adopted of the draft Shropshire Local Plan, in order to support its implementation.
- 4.27 Further information on Shropshire Council's SPD's can be found via: <https://www.shropshire.gov.uk/planning-policy/supplementary-planning-documents-spds/>

5 Community Infrastructure Levy

- 5.1 The Community Infrastructure Levy (CIL) is a charge on new development to help fund supporting infrastructure. The CIL process is closely related to but not part of the statutory planning framework. Statute for the CIL is provided by Community Infrastructure Levy Regulations 2010 (as amended).
- 5.2 Shropshire Council's CIL levy is based on the size, type and location of new development. A CIL liability is calculated using the Gross Internal Area of a development.
- 5.3 In order to secure the necessary infrastructure funding, Shropshire Council have an adopted Charging Schedule in place and have been implementing the CIL since 1st January 2012. The Charging Schedule sets out CIL rates per square metre of floorspace for all open market residential development only.
- 5.4 No review of the Council's CIL Charging Schedule is currently proposed, but this may be required in future in response to changes in national legislation and local viability evidence.
- 5.5 Further information on CIL can be found via: <http://shropshire.gov.uk/CIL>

- 5 - Examination Hearing
- 6 - Proposed Adoption

6 Risk Management

- 6.1 The Risk Management Log (Appendix 2) contains analysis of the areas of uncertainty and risk facing production of the Local Plan, with risks of a critical or significant potential impact and of a very high or high likelihood including for example: staff turnover and recruitment difficulties or receipt of large numbers of objections.
- 6.2 There are significant risks that could impact upon delivery of the Local Plan to the schedules set out within this Local Development Scheme. In order to minimise possible impacts, risk management has been embedded in the Local Plan production processes in order that risk can be evaluated and where possible eliminated. Whilst proposed responses or mitigation measures have been set out, seeking where possible to manage these risks, some areas of risk are outside the Council's control. In addition, financial pressures could curtail many of the proposed mitigation measures.
- 6.3 In conclusion, the risk assessment would suggest that the Local Plan programme remains extremely challenging. For example, where individual document production milestones are missed it could be difficult to get "back on track" without impacts on other elements of the overall programme. The most fundamental overall mitigation measure that can be made is to ensure sufficient resources are available throughout the timescale of the LDS and to build-in realistic document production timescales into this LDS at the outset.

Appendix 1: Document Profiles

Shropshire Local Plan Review 2016 - 2038	
Document Overview	
<i>Role & subject:</i>	Sets out the vision, objectives, targets and spatial strategy for the development of Shropshire together with site allocations to meet development requirements for this period and detailed development management policies.
<i>Geographical area:</i>	Shropshire
<i>Status:</i>	Statutory Local Plan document
<i>Conformity:</i>	General conformity with NPPF and NPPG
Timetable	
<i>Commence preparation</i>	June 2016
<i>Consultation on Issues & Options</i>	January 2017
<i>Targeted engagement on Preferred Options</i>	October 2017 – September 2019
<i>Publication of Pre-Submission draft Plan</i>	December 2020
<i>Submission to S of S</i>	September 2021
<i>Examination</i>	September 2021 – May 2024
<i>Inspector's Report</i>	May 2024
<i>Adoption</i>	June 2024
Arrangements for Production	
<i>Lead for production process</i>	Planning Policy & Strategy Manager
<i>Political Management arrangements</i>	Local Plan Member Group, Cabinet & Council

Shropshire Local Plan Review 2016 - 2038

<i>Resource requirements</i>	Core Planning Policy staff supported by contractors and by staff across a wide range of other council services
<i>Habitat Regulations Assessment (HRA) and Sustainability Appraisal (SA) (incorporating Strategic Environmental Assessment or SEA).</i>	HRA and combined SA incorporating SEA carried out in-house
<i>Evidence Base</i>	Resource data held by Councils, statutory bodies, consultation responses
<i>Involvement of stakeholders & the community</i>	Compliance with the published Statement of Community Involvement (SCI) and Duty to Co-operate requirements
Monitoring and Review	
<i>Monitoring requirements</i>	Monitored on an annual basis (AMR) and subject to review if the monitoring highlights a need
<i>Review timescale</i>	The document will be formally reviewed at least once every five years or linked to the implications of new evidence.

Appendix 2: Local Plan production Risk Management Log

Area of Uncertainty/Risk		Effect	Likelihood	Impact	Total Risk Score	Response / Counter Measures
1	Revision/change of LDS	<ul style="list-style-type: none"> Approval of LDS delayed. Causes slippage in overall Local Plan programme 	4	3	12 (medium)	<ul style="list-style-type: none"> Close relationship and advocacy with members and directors
2	Constrained Council financial resources – insufficient budgetary provision to adequately finance Local Plan Review project Rising Inspectorate fees are also noted	<ul style="list-style-type: none"> Work cannot be progressed to published timescales Objectives on quality compromised 	3	4	12 (medium)	<ul style="list-style-type: none"> A strong a case for setting an appropriate budget to deliver Local Plan and costs/budget kept under review. Use of funding for Service improvements. Maximise use of matrix management to draw on suitable staff resources within the Council Expand partnership working to draw upon the skills and resources within other organisations Review LDS timetables where necessary
Page 1874	Lack of in-house skills for specialised areas of policy work/background studies	<ul style="list-style-type: none"> Slow progress causing a slippage in programme Evidence base challenged or undermined Quality compromised 	4	3	12 (medium)	<ul style="list-style-type: none"> Obtain training for areas where expertise is lacking. Review the adequacy of staffing as part of annual service reviews. Expand partnership working In some cases it will be more efficient to engage consultants where specialist skills are required to short timescales and in-house development is unrealistic.
4.	Project Team required to contribute to other work priorities (eg: Planning Appeals, Infrastructure planning)	<ul style="list-style-type: none"> Diverts Team from Local Plan causing a slippage in programme. 	4	3	12 (medium)	<ul style="list-style-type: none"> Make Local Plan a Corporate Priority Identify key staff to be 'shielded' from other work Increase size of team
5.	Staff turnover and recruitment difficulties – Some staff turnover might be expected over the LDS period and this could have a considerable impact.	<ul style="list-style-type: none"> Reduced capacity causing slippage in programme or failure to prepare Local Plan 	3	4	12 (medium)	<ul style="list-style-type: none"> Take prompt action to fill vacancies with staff with the required skills Pay recruitment/ retention incentives Where recruitment difficulties are encountered, consider interim arrangements such as temporary appointments, use of agency staff or secondment of staff.

Area of Uncertainty/Risk		Effect	Likelihood	Impact	Total Risk Score	Response / Counter Measures
6.	Staff absence e.g. long term sickness, maternity leave.	<ul style="list-style-type: none"> Reduced capacity causing slippage in programme or failure to prepare Local Plan 	4	3	12 (medium)	<ul style="list-style-type: none"> Consider interim arrangements such as temporary appointments, buying in agency staff or secondment of staff. The adequacy of staffing levels will be evaluated through the monitoring of the preparation of the Local Plan.
7.	Joint working with other internal departments and / or external authorities causes delay	<ul style="list-style-type: none"> Causes a slippage in programme 	4	3	12 (medium)	<ul style="list-style-type: none"> Ensure that timescales for the Local Plan Review realistically reflect partner organisations ability to contribute to joint working Ensure commitment to milestone dates and resource allocation is obtained from relevant parties in advance in particular HE, NE and EA Consider involvement mechanisms carefully, seeking to ensure stakeholders feel engagement is worthwhile. Consider ways to help improve the ability of local stakeholders to get involved and where possible will look to achieve efficiencies by linking with Community Enablement Team processes for example.

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM007	Page 17	Policy SP2 Explanation Paragraph 3.6	The housing requirement for Shropshire of around a minimum of <u>around a minimum of</u> 30,800 dwellings over the plan period from 2016 to 2038 will meet housing need and support the long-term sustainability of the County. It also provides some flexibility to respond to changes to LHN over the plan period and an opportunity to: a. Respond positively to specific sustainable development opportunities; b. Increase the delivery of family and affordable housing to meet the needs of local communities and support new families coming into Shropshire; c. Support the delivery of specialist housing for older people, people with disabilities and the needs of other groups within the community; d. Support the diversification of our labour force; and e. Support wider aspirations, including increased economic growth and productivity.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM008	Page 15	Policy SP2 Explanation Paragraph 3.7	Effective and on-going joint working between strategic policy-making authorities is an important part of plan-making and delivered through the Duty to Cooperate. With this in mind, and further to discussions with the Black Country Authorities as part of their ongoing plan making process, Shropshire's housing requirement of around a minimum of <u>around a minimum of</u> 30,800 dwellings incorporates 1,500 dwellings to support the housing needs of the emerging Black Country Plan, where evidence indicates housing delivery opportunities are constrained. This reflects a positive approach to cross boundary cooperation and responds to the functional relationship between the two areas. This cross-boundary housing need will be accommodated through the distribution of growth outlined in this policy and delivered through policies S1-S2 <u>04</u> of this Local Plan.	Responds to Planning Inspectors Interim Findings Clarification Reflecting the cessation of the Joint Black Country Local Plan	Responds to Planning Inspectors Interim Findings and Shropshire Council
MM009	Page 15	Policy SP2 Explanation Paragraph 3.17	To achieve the aspirations in the Economic Growth Strategy for Shropshire, it is important to encourage appropriately located and high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable. The employment requirement for Shropshire of around a minimum of <u>around a minimum of</u> 300ha of employment land over the plan period from 2016 to 2038 seeks to implement the aspirations of the Economic Growth Strategy for Shropshire and provide a sufficient scale of employment land to deliver enough jobs to achieve a sustainable balance with the housing requirement.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM010	Page 19	Policy SP2 Explanation Paragraph 3.18	As already stated, effective and on-going joint working between strategic policy-making authorities is an important part of plan-making and delivered through the Duty to Cooperate. With this in mind, and further to discussions with the Black Country Authorities as part of their ongoing plan making process, Shropshire's employment requirement of around a minimum of <u>around a minimum of</u> 300ha of employment land incorporates up to <u>up to</u> 30ha of employment land to support the employment needs of the emerging Black Country Plan, where evidence indicates employment delivery opportunities are constrained. This again reflects a positive approach to cross boundary cooperation and responds to the functional relationship between the two areas. This cross-boundary employment land need will be accommodated through the distribution of growth outlined in this policy and delivered through policies S1-S2 <u>04</u> of this Local Plan.	Responds to Planning Inspectors Interim Findings Clarification Reflecting the cessation of the Joint Black Country Local Plan	Responds to Planning Inspectors Interim Findings Shropshire Council

MM014	Page 23	Policy SP3 Paragraph 4 (d)	Integrating water efficiency measures <u>(in accordance with Policy DP20)</u> to mitigate the impact of drought and reduce resource and associated energy consumption	Clarification	Shropshire Council A0347
MM015	Page 25	Policy SP4	<u>SP4. Sustainable Development</u> 1. Shropshire Council takes a positive approach to considering development proposals, reflecting the presumption in favour of sustainable development contained in the National Planning Policy Framework (NPPF). Where appropriate, Shropshire Council will work proactively with applicants to jointly find solutions which mean that proposals can be approved wherever possible. 2. Planning law requires planning applications to be determined in accordance with the development plan unless material considerations indicate otherwise. Planning applications that accord with the policies in the development plan (including, where relevant, with policies in Neighbourhood Plans) will be approved without delay, unless material considerations indicate otherwise. Proposed development that conflicts with the development plan will be refused, unless other material considerations indicate otherwise. 3. Where there are no policies relevant to a planning application or the policies which are most important to determining the application are out of date at the time of making the decision, then planning permission will be granted unless material considerations indicate otherwise – taking into account whether: a. The application of policies in the NPPF that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or b. Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole. MM016	Page 25	Policy SP4 Explanation	Explanation 3.32. Government has placed a presumption in favour of sustainable development at the heart of its approach to planning, this presumption is articulated in the National Planning Policy Framework (NPPF) (2019). 3.33. This policy aims to ensure that decisions in Shropshire are taken in line with this presumption. It will also help to achieve the core objectives of this Local Plan.	Delete Policy Explanation Agreed during the Stage 1 Hearing Sessions and responds to Planning Inspectors Interim Findings	Agreed during the Stage 1 Hearing Sessions and responds to Planning Inspectors Interim Findings
MM017	Page 26	Policy SP5 Paragraph 2	Development must maintain and enhance the character, appearance and historic interests of settlements, streetscenes, groups of buildings, individual buildings and the landscape and, reinforce the hierarchy of networks and spaces in accordance with national planning policy <u>and national design guidance</u> , and the design principles set out in the West Midlands Design Charter <u>and any local design codes</u> . MM021	Page 31	Policy SP6 Explanation New paragraphs after paragraph 3.45	<p><u>The Shropshire Strategic Infrastructure and Investment Plan includes a list of critical infrastructure needs to support development, including critical health facilities and other critical health infrastructure.</u></p> <p><u>Health Impact Assessments, including Health Impact Assessment screening and full Health Impact Assessments perform an important role in ensuring that a new development is sustainable and positively contributes to the long-term sustainability of individuals, communities and places. A Health Impact Assessment screening is a way of determining whether a full Health Impact Assessment is required. Health Impact Assessment screening is a high-level consideration of the potential impacts on the health and well-being of individuals, communities and places (within and neighbouring the site) arising from the construction of the development and the development itself, both in isolation and cumulatively. A Health Impact Assessment beginning with the screening process is required for all major development in Shropshire. In this context, major development consists of residential developments of 10 or more new dwellings, or developments with 1,000m2 or more of additional commercial or visitor floorspace.</u></p> <p><u>The Health Impact Assessment screening, and any resulting full Health Impact Assessment must be proportionate to the development proposal, robust and responsive to the wider requirements of this policy and other relevant policies of the Local Plan.</u></p> <p><u>A Health Impact Assessment screening template is available on the Shropshire Council website⁽⁵⁾. The Public Health England Guidance: Health Impact Assessment in Spatial Planning: A Guide for Local Authority Public Health and Planning Teams (2020)⁽⁶⁾ provides a useful guide on undertaking Health Impact Assessment screening.</u></p> <p><u>The purpose of a Health Impact Assessment screening is to identify whether there is any potential for significant negative health and well-being affects, having due regard to the requirements of this policy. Where it is concluded that there is a potential significant negative effect, then a full Health Impact Assessment must be undertaken.</u></p> <p><u>Importantly, a Health Impact Assessment screening also provides opportunities to identify and enhance any significant positive health and well-being affects associated with a proposed development on individuals, communities and places.</u></p> <p><u>The pre-application process offered by Shropshire Council is an ideal mechanism to discuss the outcomes of a Health Impact Assessment screening and reach agreement about whether there is a need for a full Health Impact Assessment.</u></p> <p><u>A full Health Impact Assessment is a systematic and comprehensive assessment of the potential impacts on the health and well-being (including social, psychological and physical health and well-being) of individuals, communities and places (within and neighbouring the site) arising from the construction of the development and the development itself, both in isolation and cumulatively.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM022	Page 31	Policy SP6 Explanation New paragraphs after paragraph 3.45 (continued)	<p><u>A full Health Impact Assessment is an important tool for determining whether development proposals are likely to have a significant effect on health and well-being. In this way, it can be used to inform the reduction and mitigation of any adverse effects and maximise positive effects on health and well-being.</u></p> <p><u>A full Health Impact Assessment is only required in circumstances where it is concluded that there is a potential significant negative effect through the screening process, or one is required under other policy or legislative requirements. Where a full Health Impact Assessment is required, the methodology utilised should be robust and responsive to the wider requirements of this policy and other relevant policies of the Local Plan.</u></p> <p><u>A full Health Impact Assessment template is available on the Shropshire Council website⁽⁵⁾. The Public Health England Guidance: Health Impact Assessment in Spatial Planning: A Guide for Local Authority Public Health and Planning Teams (2020) provides a useful guide on undertaking full Health Impact Assessments.</u></p> <p><u>Where a full Health Impact Assessment concludes that development has a significant negative effect on health and well-being, Shropshire Council may require applicants to provide for the reduction and/or mitigation of such effects through planning conditions and/or financial/other contributions secured via planning obligations and/or the Council's CIL Charging Schedule.</u></p> <p><u>Conversely, where a full Health Impact Assessment concludes that development has a significant positive effect on health and well-being, Shropshire Council may require applicants to provide for the provision of such effects through planning conditions and/or financial/other contributions secured via planning obligations.</u></p> <p><u>Ultimately the full Health Impact Assessment will inform the Planning Application decision making process.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM024	Page 32	Policy SP7 Explanation Paragraph 3.47	Delivery of the Shropshire wide housing requirement of around a minimum of <u>30,800 dwellings</u> between 2016 and 2038 is essential for the long-term prosperity of Shropshire. The settlement and strategic settlement policies covered in Policies S1-S20 indicate how the residential development guidelines are to be met, through combinations of Local Plan allocations, 'saved' SAMDev Plan allocations, completions already achieved since the start of the Local Plan period, existing commitments, appropriate windfall development, affordable and cross-subsidy exception schemes, entry level and single plot exception schemes.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM025	Page 32	Policy SP7 Explanation Paragraph 3.48	Both the NPPF and Policy SP4 of the Local Plan identify <u>identifies</u> the <u>circumstances where there is a</u> need to apply the presumption in favour of sustainable development, <u>whilst also emphasising</u> This emphasises the statutory status of the development plan as the starting point for taking decisions. The NPPF and NPPG also emphasise the importance of ensuring housing delivery, expressed through the Housing Delivery Test, as well as requiring that plans remain flexible and adaptable to changing circumstances. Policy SP7 is designed to address these issues in a positive manner, whilst retaining the importance of the plan-led approach to development.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM026	Page 39	Policy SP10 Paragraph 1	1. The management of development in the countryside will reflect the Plan's urban focused development strategy which seeks to direct the majority of new development to the Strategic, Principal and Key Centres and new Strategic Settlements. <u>This policy does not apply to sites in the countryside that are allocated for development in this Plan or any other adopted Development Plan.</u> Within the rural area, the Plan identifies Community Hubs and Community Clusters as the focus for new development, whilst also supporting new affordable housing provision for evidenced local needs and fostering appropriate rural employment opportunities, subject to the further controls over development that apply to the Green Belt, the AONB and other designated areas.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM027	Page 39	Policy SP10 Paragraph 2	Employment, business, operational defence, renewable energy, and <u>community and infrastructure</u> development in the countryside will be considered against national policy and the criteria in other relevant policies of this Local Plan which together recognise the need for flexibility in delivering development to support and meet economic, community and associated needs whilst ensuring that development does not result in unacceptable adverse impacts.	Clarification	Shropshire Council A0671
Page 188 MM028	Page 42	Policy SP10 Explanation Paragraph 3.75 and subsequent new paragraph	The policy reflects the Local Plan's overall approach of focusing growth in strategically agreed –locations (as identified and set out in Strategic Approach Policy SP2) whilst supporting rural communities by enabling some controlled development to maintain local sustainability. <u>For policy purposes 'Countryside' consists of the wider rural area located outside of settlement development boundaries identified on the Policies Map or within a Neighbourhood Plan, which has either not been specifically allocated for development or which constitutes a suitable location for development within the context of a Community Cluster, as defined within Policy SP9. It can be noted, as set out in Policy SP11, that the villages of Beckbury, Claverley and Worfield are inset within the Green Belt but function as countryside.</u> Although identified Community Hubs and Community Clusters provide the main opportunities for the delivery of local housing and employment opportunities and the foci for sustainable development in rural areas, this policy clarifies what types of development are appropriate in the countryside beyond these settlements. In particular the policy considers requirements for: affordable and specialist housing needs; rural land uses and employment opportunities and tourism and community infrastructure. It considers how beneficial development can be achieved which, together with other Local Plan policies, optimises opportunities to re-use land and buildings, conserves the natural and historic environment, considers climate change and is sympathetic to local character and landscape setting whilst supporting economic and community needs. This recognises the countryside as a 'living-working' environment, where appropriate development to facilitate its various functions and the wider sustainability of rural communities will be needed.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM029	Pages 46-47	Policy SP10 Explanation Paragraph 3.80	The changing needs and effects of agricultural and other related businesses in the countryside are a particular local issue, in particular the impacts of large-scale agricultural buildings. General sustainable design criteria and development management considerations are as relevant to this type of development as other proposals in the countryside and the Plan seeks to balance the needs of the countryside as a working environment with its role as a place to live and enjoy. The policy defines the primary considerations that will be taken into account in considering agricultural development proposals which require planning consent. Additional criteria set out in other relevant policy such as: SP5 (High Quality Design); Policy DP17 (Landscape and Visual Amenity), DP18 (Pollution and public amenity), DP19 (Water Resources and quality), Policy DP23 (Historic Environment); SP4 (Sustainable Design); DP12 (The Natural Environment) and DP24 (Shropshire Hills Area of Outstanding Natural Beauty) which highlights special requirements in the Shropshire Hills AONB, will also be taken into account in considering applications. It should be noted that where appropriate, planning conditions will be attached to a permission to control the quality of the development and to ensure the scheme incorporates appropriate agreed mitigation measures such as coloured external cladding, landscaping and waste management.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM030	Page 48	Policy SP11 Paragraph 2	Land within the development boundaries for the settlements of: Albrighton, Alveley, Bridgnorth (which is enclosed on its eastern side by Green Belt) and Shifnal; the Strategic Site at RAF Cosford; and the Industrial Estates at: Alveley and Stanmore is excluded from the Green Belt. The villages of Beckbury, Claverley and Worfield are also inset in the Green Belt but function as countryside, as such Policy SP10 (Countryside) applies. Safeguarded land, being land removed from the Green Belt for future development needs beyond the current Local Plan period, is shown on the Policies Map.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM031	Page 48	Policy SP11 Paragraph 6	Proposals for limited affordable housing to meet a proven local affordable housing need that is demonstrated through an up-to-date and robust local housing needs survey, in the locations identified in <u>accordance with</u> Policy DP4 (Affordable Exception Sites) and DP6 (Single Plot Exception Sites), which meet the other requirements of Affordable Housing Policies DP3, DP4 and DP6 and other relevant Local Plan policies will be supported.	Clarification	Shropshire Council

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)																																																																												
MM032	Pages 48-49	Policy SP11 Paragraph 7	<p>RAF Cosford is a strategic site inset within the Green Belt to facilitate defence and charity operational and development needs. Future additional development at this strategic site would be expected to take place within the area of land inset within the Green Belt unless it is one of the exceptions to inappropriate development within the Green Belt identified within national policy or very special circumstances can be demonstrated.</p> <p><u>RAF Cosford is the most extensive, developed site within the Shropshire Green Belt. Providing for defence, charitable and other activities, this major developed area consists of predominantly developed brownfield elements with an associated mainly undeveloped airfield – the entirety of the site is located within and ‘washed over’ by Green Belt. The extent of the RAF Cosford major developed site and location of the associated airfield are identified on the Policies Map.</u></p> <p><u>a. Additional development to facilitate the enhancement and intensification of defence and charitable activities will need to demonstrate either very special circumstances, or that proposals do not constitute inappropriate development within the Green Belt and do not otherwise conflict with the purposes of the Green Belt.</u></p> <p><u>b. When determining if very special circumstances exist within the extent of the RAF Cosford major developed site, positive consideration will be given to the site’s predominantly brownfield nature and any contribution proposals make to the long-term sustainability of the complementary uses of the site.</u></p> <p><u>c. The undeveloped area between the RAF Cosford major developed site and nearby Albrighton is important, forming a strategic gap that must be retained. Specific consideration will be given to whether development proposals undermine the locally important role of the Green Belt in this location.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings																																																																												
MM033	Pages 50-51	Policy SP11 Explanation Paragraph 3.100	<p>Subsequent to this review the Local Plan has identified areas of land for release from the Green Belt at Albrighton, Alveley, Cosford, Shifnal and Stanmore (Bridgnorth) as shown in the table below, discussed further under the relevant settlement policies and shown on the Policies Map. Green Belt release includes: 50.4 ha land specifically released for employment purposes, with 11.4 ha of land at Stanmore and 39.0 ha at Shifnal; 1.4 ha solely for housing and a 2.4 ha mixed use <u>site</u> incorporating housing at Alveley; the RAF Cosford Strategic Site of around 214.2 ha for military and charity operational and development needs; and a total of some <u>105.9</u> 146.3 ha of safeguarded land with 19.9 ha at Albrighton, 3.6 ha at Alveley and <u>82.4</u> 92.8 ha at Shifnal <u>(to complement the 10.4 ha of safeguarded land that exists at Shifnal and is not proposed to be allocated within this Local Plan).</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

MM035	Page 52	Policy SP11 Explanation Paragraph 3.107 and subsequent new paragraphs	<p>For the purpose of this policy, RAF Cosford consists of the Ministry of Defence (MoD) facility, the RAF Museum and the Midlands Air Ambulance headquarters. has been identified as a strategic site inset within the Green Belt. Local Plan Policy S21 sets out the proposals for the site and relevant considerations. It is a predominantly brownfield site located entirely within and 'washed over' by the Green Belt. The site is occupied by a range of organisations, including the MOD forming a major part of their Defence College of Technical Training (DCTT), RAF Museum Cosford and the Midland Air Ambulance Charity. These complementary uses benefit from their co-location. Recognising the importance of this site to its occupiers, the significant built form present on the site, the aspirations of many of the sites occupiers, and the role the site plays in providing existing and facilitating future employment opportunities in the east of the County; RAF Cosford is identified as a major developed site within the Green Belt, with an associated airfield. The extent of the RAF Cosford major developed site and the location of the associated airfield are identified on the Policies Map.</p> <p><u>Known growth plans and aspirations for the site include the enhancement and intensification of facilities to support consolidation of DCTT activities, potential wider MOD activities, aspirations for the growth of RAF Museum Cosford, and the ongoing construction of the new headquarters for the Midlands Air Ambulance Charity.</u></p> <p><u>Additional development to facilitate these growth plans and other opportunities to enhance or intensify defence and charitable activities on the site will need to demonstrate either very special circumstances, or that proposals do not constitute inappropriate development within the Green Belt and do not otherwise conflict with the purposes of the Green Belt.</u></p> <p><u>In determining whether very special circumstances exist within the extent of the RAF Cosford major developed site, positive consideration will be given to the sites predominantly brownfield nature and any contribution proposals make to the long-term sustainability of the complementary uses of the site.</u></p> <p><u>The existing airfield, as a predominantly undeveloped part of the site, is excluded from the identified major developed area. This area is likely to be more vulnerable to the impact of development on the openness of the Green Belt.</u></p> <p><u>Beyond the extent of the major developed site, any development proposals would also need to demonstrate either very special circumstances, or that proposals do not constitute inappropriate development within the Green Belt and do not otherwise conflict with the purposes of the Green Belt. However, the strategic gap between the RAF Cosford major developed site and Albrighton will be retained.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM036	Pages 53-54	Policy SP12	<p>SP12. Shropshire Economic Growth Strategy—</p> <p>1. Shropshire will be the best place to do business and invest. The County will promote its economic potential by positively supporting enterprise, developing and diversifying the local economy, targeting growing and under-represented sectors and by using its high-quality assets and special environment. It will increase its productivity by improving digital and transport connectivity, making productive use of low carbon energy sources, meeting skills needs, and by using the benefits of its local talent and business expertise.</p> <p>2. The spatial strategy to achieve these objectives is to deliver sustainable economic growth and investment in our strategic and principal settlements, strategic corridors, new strategic settlements and sites and appropriate rural locations. This will take into account the special considerations in the Green Belt, Area of Outstanding Natural Beauty and the need to protect and improve areas of higher landscape value and the natural and historic environment.</p> <p>3. Economic growth and investment will be supported in:</p> <p>a. Shrewsbury to develop its role as the County Town and Strategic Centre;</p> <p>b. The Principal Centres and Key Centres as the key employment and service centres;</p> <p>c. The 'Strategic Corridors' and 'Strategic Settlements' identified in the Plan;</p> <p>d. Community Hubs on saved allocations or windfall development on established employment areas or suitable sites or buildings for small scale employment generating uses; and</p> <p>e. Community Clusters and the Countryside through windfall development where the location, scale, land use and impacts of the proposals will conform with the existing land uses, settlement form and environmental qualities in accordance with relevant Policies of the Local Plan.</p> <p>4. Economic development proposals will be supported that deliver employment through:</p> <p>a. Provision of serviced land and buildings for the types of employment generating uses identified in SP13;</p> <p>b. Provision of additional floorspace for expansion of existing businesses;</p> <p>c. Provision of opportunities and facilities for mobile/agile/home working;</p> <p>d. Existing businesses that relocate into and / or expand in the County especially those within Shropshire's key business sectors and clusters;</p> <p>e. New businesses that start in the County or which seek to invest and grow; and</p> <p>f. Rural economic enterprises through:</p> <p>i. Agriculture, horticulture, forestry, food production and processing, rural diversification, tourism and leisure; and</p> <p>ii. Opportunities created by improving digital connectivity for home working or to re-use previously developed land, appropriate rural buildings or to replace suitably located rural buildings for small scale economic development / employment generating uses subject to policies SP8, SP9, SP10, SP14 and DP24.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

MM037	Pages 53-54	Policy SP12 (continued)	<p>5. The delivery of employment will be supported by investment in:</p> <p>a. Housing of the right type, quality, tenure and affordability that will support the move towards increased home/agile working, in the right locations with jobs, services, facilities and leisure to make Shropshire a good place to live, work and play;</p> <p>b. Renewable and low carbon energy generation including decentralised energy sources and to promote the productive use of this energy by businesses to reduce energy costs and increase energy 'independence' in the local economy;</p> <p>c. Digital connectivity to broadband, mobile and fixed wireless networks to improve the links between businesses, their employees and their customers and suppliers;</p> <p>d. Education, training, apprenticeships and centres of excellence to provide the skills needed by existing companies, and our future business activities;</p> <p>e. Transport and utilities infrastructure and the adoption of new and more sustainable transport options to improve accessibility in Shropshire, remove capacity constraints to future business investments and to contribute to climate management objectives; and</p> <p>f. Public services and assets, culture, leisure, not gains in the natural environment and heritage led regeneration to continue to shape the County and to attract people and businesses to locate in Shropshire.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM038	Pages 54-56	Policy SP12 Explanation	<p>Explanation</p> <p>3.109. Shropshire set out its economic growth vision in the Shropshire Economic Growth Strategy 2017 to 2021 that seeks "To be the best place to do business and invest, renowned for its pool of local talent and expertise. We will strive to maximise our economic potential and increase productivity by fully utilising the benefits of our special environment and high quality assets".</p> <p>3.110. The strategy of the Local Plan is to achieve an urban focus to development. The primary focus for employment investment is Shrewsbury, and the Principal and Key Centres of the County with their employment land offer, housing, services and accessibility. Creating a sustainable pattern of development will mean that employment development should be directed to Shrewsbury, our Principal Centres and our Key Centres. A portfolio of employment sites has been identified to provide a range and choice of sites to meet the requirements of the development strategies for these settlements.</p> <p>3.111. Shropshire and The Marches have a number of business sectors and clusters that are performing well with extremely successful companies operating in and around the County. Our strategy for these sectors is to work with companies investing in these enterprises and to support their growth in the competitive national and international economy. It will be important to ensure these companies find the locations and expansion opportunities they seek and can invest in the following activities:</p> <p>a. Advanced manufacturing including engineering, agri-food, and agri-tech;</p> <p>b. Visitor economy and heritage based businesses;</p> <p>c. Environmental sciences and technologies;</p> <p>d. Creative and digital industries;</p> <p>e. Food and drink processing; and</p> <p>f. Health and social care.</p> <p>3.112 The support for Shropshire's key business sectors and clusters must be balanced with the need to protect Shropshire's natural and historic environment and to achieve climate management objectives, by ensuring that development is properly located, will respect the character of the locality and will enable businesses and their employees to both increase their productivity and to reduce their carbon footprint.</p> <p>3.113. A key element of this aim is to move towards a 'zero-carbon' economy by encouraging greater use of renewable and 'low carbon energy sources' (i.e. wind, solar, hydro, biomass or nuclear energy) as an economic opportunity. This has the potential to offer lower energy costs and energy 'independence' provided by decentralised energy generation. This economic opportunity may translate into lower production costs, greater 'added value' and a stronger asset base where the business owns or has a stake in decentralised energy generation technologies. This will assist the Shropshire economy by translating cleaner and greener energy usage into improved productivity and greater resilience of businesses to withstand changes in our economic circumstances.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

MM039	Pages 54-56	Policy SP12 Explanation (continued)	<p>3.114 The Shropshire economy is fuelled by the creation and growth of small to medium sized companies. This reflects a capacity for entrepreneurship and the creation of significant numbers of new businesses. Shropshire Council actively supports new business formation, identifying companies with growth potential that can increase their output and employee numbers. The Council wishes to support the development needs of new businesses and to provide opportunities for companies to continue to grow in size, expand their physical operations where this is necessary or to relocate within the County.</p> <p>3.115 A key element of entrepreneurship is the capacity to build a business from concept and prove its effective operation. This requires support for appropriate home based enterprises and the appropriate use of residential properties or rural buildings for home working supported by the development of business hubs to deliver support services for these growing businesses.</p> <p>3.116 The Council also supports the business and environmental benefits to be obtained from mobile / agile / home working for employees of businesses that still maintain fixed business premises. This change in working patterns will influence our travel behaviour in favour of many more sustainable choices over the need to travel, the type of transport mode, the type of energy used and the basis on which future travel and transport services may be provided. It is recognised that this will require investment to deliver more and new infrastructure both for fixed and mobile electronic communications and for travel and transport to firstly, remove the need to travel for work, goods and services as well as for leisure and social interaction and secondly, to change the ways in which we travel and how we may access transport services.</p> <p>3.117 To facilitate sustainable economic growth, a 'step change' is needed in Shropshire's economic productivity because the County has the potential to do more and to do it better. Shropshire Council is focused and committed to achieving maximum economic productivity from the assets and opportunities across the County. This is based on four key objectives to: support and grow new and existing businesses; attract inward investment to the County, develop and retain workforce talents and skills and to facilitate new ways of working that transform business environments into digital 'workplaces', reducing the need to travel, changing the requirements for business premises and contributing towards a more sustainable work/life balance.</p> <p>3.118. To support the 'step change' in the economy, 'strategic corridors' comprising those principal settlements located on transport corridors will be important in providing further investment opportunities. These have the potential to support the economic growth of the County in two key areas: they are the preferred locations for business investment on allocated employment sites in Shrewsbury and the Principal and Key Centres and they may provide further significant sites for larger windfall development opportunities that are suitable and accessible for inward investment. The need for a supply of sites for business investment and the development of business premises in the County and the rate at which the supply of these sites is developed for these purposes will be kept under review through the Local Plan period to 2038.</p> <p>3.119. Some 'strategic corridors' pass through protected areas including Green Belt and the Area of Outstanding Natural Beauty. Here 'very special' or 'exceptional' circumstances' for development will need to be proven to justify further employment development in these locations beyond the sites allocated for this purpose. The Council recognise the need to protect and maintain these special environments but will give careful consideration to the needs of communities in these locations and to the needs of businesses wishing to invest in the sustainability of settlements in these areas.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings			
			MM040	Page 57	Policy SP13 Paragraph 1	Shropshire will deliver around a minimum of 300 hectares of employment development from 2016 to 2038 and will protect established employment areas for employment uses to achieve the objectives of Policy SP42 SP2 . MM055	Page 61	Policy SP13 Explanation Paragraph 3.138	<p>The protection of existing employment areas is based on evidence of the purpose, viability and redevelopment potential of the sites. This evidence is set out in the Shropshire Strategic Sites and Employment Areas Study for Shrewsbury (Phase 1) and the Market Towns and Key Centres (Phase 2) which identify a hierarchical ranking of existing employment areas in the principal settlements of the County which is shown in Figure SP13.1 below. <u>This hierarchy provides protection to employment sites and premises in proportion to the significance of the employment site as follows:</u></p> <p><u>a. Regional Sites – inward investment sites of regional or national significance. The unique qualities, scale and setting of the location and any existing buildings create a prospect for significant inward investment with the potential to influence the economic profile of the County. The purpose of these sites is to provide higher quality primary employment uses;</u></p> <p><u>b. Sub-Regional Sites – high quality, premium investment sites. The location, scale, quality and setting of the site will attract inward and local investment from a range of high quality, employment uses. The purpose of these sites is to provide higher quality primary employment uses;</u></p> <p><u>c. Key Shropshire Sites – good quality, prime sites in the local market. The location, scale and setting are appropriate for key local employers, expanding businesses and aspirational or image-conscious companies;</u></p> <p><u>d. Key Local Sites – good quality, business and industrial sites in the local market. The location, scale and setting are appropriate for key local employers and expanding businesses.</u></p> <p><u>e. Mixed Commercial Sites – traditional affordable sites for mixed commercial uses offering a range of older premises in less accessible locations but meeting the needs of a range of existing and start up businesses. Modern or redeveloped sites offering broad spectrum Class E uses with a mix of building formats in both urban and rural settings.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

MM059	Page 63	Policy SP14 Paragraph 3 (b)	On the identified ' Strategic Sites ' <u>Strategic Settlements</u> in the Local Plan;	Correction	Shropshire Council A0137
MM060	Page 64	Policy SP14 Explanation Paragraph 3.141	This approach responds to the Council's objective to prioritise significant new development and infrastructure investment into the Strategic, Principal and Key Centres and identified Strategic Sites <u>Strategic Settlements</u> to create <u>This will</u> create 'growth zones' along the 'strategic corridors' through Shropshire and making <u>make</u> effective use of the rail and road routes <u>routes</u> through these corridors. The sequential release of additional employment land for development in the 'strategic corridors' may also help to attract major employment development into the County.	Correction Responds to Planning Inspectors Interim Findings	Shropshire Council A0137 Responds to Planning Inspectors Interim Findings
MM061	Page 65	Policy SP14 Explanation Paragraph 3.143	The Shropshire Economic Growth Strategy seeks to promote a 'step change' in the capacity and productivity of the local economy. The 'strategic corridors' have the potential to support this economic objective in two key areas: they are the preferred locations for business investment on allocated employment sites in Strategic, Principal and Key settlements; and they may function as the location for the release of significant sites that are suitable and accessible for inward investment on identified 'Strategic Sites' at RAF Cosford, at Clive Barracks, Tern Hill and Ironbridge Power Station and on larger windfall sites. <u>Settlements</u> at RAF Cosford, at Clive Barracks, Tern Hill and Ironbridge Power Station and on larger windfall sites.	Correction	Shropshire Council
MM062	Page 65	Policy SP14 Explanation Paragraph 3.144	Development proposals in 'strategic corridors' should respond positively to the presence of environmental constraints particularly in the Shropshire Green Belt and the Shropshire Hills AONB. In these locations there will be a need to prove the 'very special circumstances' for development in the Green Belt and the 'exceptional circumstances' for development in the AONB in accordance with relevant policies including as required in Policy SP13. This requires further justification for those types of development that are not considered appropriate under national policy. These types of development will be determined against the requirements of national and local policy <u>in accordance with relevant policies including</u> as required in Policy SP13. This requires further justification for those types of development that are not considered appropriate under national policy. These types of development will be determined against the requirements of national and local policy	Clarification	Shropshire Council
MM063	Page 66	Policy SP14 Explanation Paragraph 3.147	It will be essential when promoting development in the 'Strategic Corridors' to sequentially promote the 'Strategic Sites' Settlement <u>Settlement</u> identified at Clive Barracks, Tern Hill on the A41 and RAF Cosford at the junction of the A41 with the M54 Junction 3 where development cannot reasonably be accommodated on existing allocated sites in the Strategic, Principal or Key Settlements. The sequential release of windfall sites will prefer brownfield windfall development opportunities which respond to a clearly identifiable, investment demand, are in locations close to a settlement and which benefit from accessibility to the rail and road network through the 'strategic corridor' and in accordance with national and local policy.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM064	Page 68	Policy SP16 New Paragraph Between Existing Paragraphs 3 & 4	<u>The supply of sand and gravel during the Plan period should be provided in the first instance from existing permitted sites and then from the development of mineral working at the saved SAMDev Plan mineral allocations identified within Appendix 2 of this document and identified on the Proposals Map. This will be complemented by appropriate extensions to existing quarries that are consistent with the requirements of Policies DP30, DP31 and other relevant policies of the Local Plan;</u>	Responds to Minerals & Waste Hearing Session	ID29 Response /Hearing (Q39) ID29 Response /Hearing (Q40)
MM065	Page 68	Policy SP16 Paragraphs 4-6	4-5. Only supporting proposals for sand and gravel working outside these broad locations saved SAMDev Plan mineral allocations identified within Appendix 2 of this document and identified on the Proposals Map <u>saved SAMDev Plan mineral allocations identified within Appendix 2 of this document and identified on the Proposals Map</u> and existing permitted reserves, where this would prevent the sterilisation of resources, or where significant environmental benefits would be obtained, or where the proposed site would be significantly more acceptable overall than the allocated sites <u>this would be consistent with the wider requirements of this policy and other relevant policies of the Local Plan, including DP30 and DP31;</u> 5-6. Supporting environmentally acceptable development which facilitates the production of other mineral resources such as clay and building stone to meet both local needs, including locally distinctive materials, and to help meet cross boundary requirements; 6-7. Priority will be given to environmentally acceptable restoration and aftercare proposals which can deliver targeted environmental or community benefits consistent with Policies DP12, DP14, DP16, DP17, DP19 and any other relevant policies within this Local Plan.	Responds to Minerals & Waste Hearing Session	Shropshire Council A0144 Identified Main Modification (MaM005) ID29 Response / Hearing (Q38)
MM066	Page 70	Policy SP16 Explanation Paragraph 3.156	National policy requires strategic planning to secure an adequate and steady supply of mineral aggregates. Shropshire is an important source of mineral aggregates, particularly crushed rock. Mineral planning is co-ordinated at a sub-national level by the West Midlands Aggregates Working Party, which has been chaired by Shropshire Council since 2014. Best available evidence indicates that aggregate production in Shropshire remains above both the 10 year rolling average and the landbank of permissions for both sand and gravel and crushed rock have remained consistently above the minimum level required by national policy. <u>The landbank of permissions for crushed rock working has remained consistently above the minimum required level and no additional provision therefore needs to be made during the Plan period. Further information about crushed rock and other mineral resources produced in Shropshire is available in the Minerals Technical Background Document.</u>	Responds to Minerals & Waste Hearing Session	Shropshire Council A0677 Identified Main Modification (MaM093) ID29 Response / Hearing (Q14)
MM067	Page 71	Policy SP17 Paragraph 2	Supporting the development of sites to deliver additional waste recycling and recovery facilities in accessible locations close to the Strategic, Principal and Key Centres and Strategic Settlements <u>and Strategic Settlements</u> having regard to other relevant policies of this Local Plan. Outside these locations, Shropshire Council will support applications for smaller scale waste facilities capable of meeting local needs in locations which are consistent with the principles and site identification criteria set out in national and regional policy;	Responds to Minerals & Waste Hearing Session	Hearing (Q82) ID29 Response / Hearing (Q84)

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM068	Page 71	Policy SP17 Paragraph 5	Ensuring that the continued operation of existing waste management facilities in locations which are consistent with the site identification criteria for new sites <u>as identified in paragraph 2 of this policy</u> is safeguarded, including against the encroachment of incompatible uses, in a way consistent with national guidance.	Responds to Minerals & Waste Hearing Session	ID29 Response / Hearing (Q89)
MM069	Page 71	Policy SP17 Explanation Paragraph 3.163	Addressing these targets may require the expansion or alteration of existing waste management facilities or the construction of additional facilities in Shropshire. <u>This policy and other relevant policies within the Local Plan provide the framework for the safeguarding and expansion of existing waste management facilities and provision of new waste management facilities. Consistent with paragraph 2 of this policy, the majority of additional waste recycling and recovery facilities will be directed towards accessible locations close to the Strategic, Principal and Key Centres. Outside these locations, Shropshire Council will support applications for smaller scale waste facilities capable of meeting local needs in locations which are consistent with the principles and site identification criteria set out in national and regional policy. Smaller scale waste facilities to meet local needs are those intended to and capable of meeting the needs of the local area, rather than being intended to and capable of meeting a wider County or strategic need. The specific function, tonnage and geography of such waste facilities is dependent on the type and waste and process entailed.</u>	Responds to ID34	Responds to ID34
MM070	Page 72	Policy SP17 Explanation Paragraph 3.166	The best available information suggests that there were around 139 <u>around 139</u> about 136 consented waste sites in Shropshire in 2023 <u>2018</u> . Of these sites, about <u>71%</u> 70% are classed as operational. In theory, these sites provide almost <u>around 1.2</u> million tonnes of capacity, although they only handled approximately 893,000 <u>613,000</u> tonnes of locally generated waste and imported materials in 2021 <u>2018</u> . The new facilities which have been permitted between 2018/19 and 2022/2023 <u>during 2017-18</u> will deliver around 40,000 <u>50,000</u> tonnes of additional annual waste management capacity for commercial waste recycling and recovery. Increases in energy costs and changes in international trade policy may be responsible for the continued increase in applications for new commercial waste management capacity, particularly farm-based anaerobic digesters and this will help local businesses to mitigate their energy costs and secure improved resource efficiency. The wider trend is that, during the period 2013- 2023 <u>2018</u> , applications for new waste management facilities, once operational, will deliver around <u>about</u> 5,000 tonnes of additional municipal waste management capacity and around 350,000 <u>310,000</u> tonnes of additional business waste management capacity.	Responds to ID34	Responds to ID34
MM071	Page 73	Policy SP17 Explanation Paragraph 3.168	Shropshire Council will safeguard existing waste management facilities and employment land suitable for waste infrastructure in appropriate locations in accordance with Policies SP13. <u>Consistent with national guidance, where the operation of a waste management facility could have a significant adverse effect on new development, the 'agent of change' is the new development and as such should include suitable mitigation.</u> Facilities designed to treat biodegradable wastes should generally be located away from sensitive land uses such as housing and schools in order to control potential environmental impacts.	Responds to Minerals & Waste Hearing Session	ID29 Response/Hearing (Q91)
MM072	Page 74	Policy DP1 Paragraph 2	On sites of 5 or more dwellings: a. In locations where in the last 5 years a Local Housing Need Survey has been undertaken through the 'Right Home Right Place' initiative or an equivalent survey endorsed by Shropshire Council, at least 50% of open market dwellings will reflect the profile of housing need established within the survey. The remainder of the open market dwellings <u>and all the affordable dwellings</u> will include a suitable mix and variety of dwelling sizes; or b. At least 25% of open market dwellings will be dwellings with 2 bedrooms or less. At least a further 25% of open market housing will be dwellings with 3 bedrooms or less. The remainder of the open market dwellings <u>and all the affordable dwellings</u> will include a suitable mix and variety of dwelling sizes.	Clarification	Shropshire Council
MM073	Page 74	Policy DP1 Paragraphs 4-6	4. All dwellings specifically designed for older people or those with disabilities or special needs will be built to the M4(3) (wheelchair user dwellings) standard within Building Regulations. 5. On sites of 5 or more dwellings, at least 5% of the dwellings will be built to the M4(3) (wheelchair user dwellings) standard within Building Regulations and a further 70% of the dwellings will be built to the M4(2) (accessible and adaptable dwellings) or higher standard within Building Regulations, unless site-specific factors indicate that step-free access cannot be achieved. 6. On sites of 50 or more dwellings: a. An appropriate range of specialist housing designed to meet the diverse needs of older people, such as: age-restricted general market housing; retirement living or sheltered housing; extra care housing or housing with care; and/or residential care homes and nursing homes will be provided. b. An appropriate range of specialist dwellings to meet the needs of those with disabilities and special needs will be provided.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM074	Page 74	Policy DP1 Explanation Paragraph 4.1	Achieving an appropriate dwelling mix is an important element in seeking to create sustainable, inclusive and mixed communities. The key source of evidence for determining housing mix are the Strategic Housing Market Assessment (SHMA) for Shropshire, the Draft Housing Strategy for Shropshire, the Shropshire HomePoint Housing Waiting List and the 'Right Home Right Place' Local Housing Need Surveys <u>and other Shropshire Council Housing Need Surveys</u> being undertaken across Shropshire.	Clarification	Shropshire Council

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM075	Pages 75-81	Policy DP1 Explanation Paragraphs 4.17-4.42	<p>Access and Use of Dwellings</p> <p>4.17. Government's reform of Health and Adult Social Care is underpinned by a principle of sustaining people at home for as long as possible. This was reflected in the recent changes to Building Regulations relating to adaptations and wheelchair accessible homes within the approved Part M of the Building Regulations, available to view on the GOV.UK website at: www.gov.uk/government/publications/access-to-and-use-of-buildings-approved-document-m</p> <p>4.18. This introduces three categories of dwellings:</p> <p>a. M4(1) Category 1: Visitable dwellings.</p> <p>b. M4(2) Category 2: Accessible and adaptable dwellings.</p> <p>c. M4(3) Category 3: Wheelchair user dwellings.</p> <p>4.19. M4(1) is mandatory for all new dwellings unless one of the optional requirements M4(2) or M4(3) applies. M4(2) and M4(3) apply where a Local Plan introduces such a requirement.</p> <p>4.20. Growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the Local Plan period from 2016 to 2038. According to analysis of projections within the SHMA, during the Local Plan period:</p> <p>a. Households with a Household Reference Person aged 65-84 years are projected to increase by 42.8%. This level of growth is well above estimated growth nationally and regionally (41.0% and 32.8% respectively).</p> <p>b. Households with an elderly Household Reference Person (85 years and over) are projected to significantly increase by 130.5%, more than doubling in size from 6,900 households in 2016 to 15,900 by 2038. This growth is substantially higher than that projected regionally and nationally (99.7% and 94.5% respectively).</p> <p>c. The balance of households with a working age Household Reference Person (16-64 years) to those with an older Household Reference Person (65 years and over) will change from 64.6% and 35.4% in 2016 to 51.9% and 48.1% in 2038. This suggests in the long-term there will be approaching as many working age independent households as older dependent households in Shropshire.</p> <p>d. Much of the household growth projected is driven by increases in households with an older Household Reference Person (65 years and over).</p> <p>4.21. At the time of the 2011 Census, 8.4% of people in Shropshire had a long-term health problem or disability that 'limited day-to-day activities a lot' and 10.2% of people had a disability or long-term health problem that 'limited day-to-day activities a little'. The prevalence rates of people living with a long-term health problem or disability was also much higher amongst the older population, with 54.6% of people in households with a long-term health problem or disability in the 65 years and over age category.</p> <p>4.22. According to the Projecting Older People Population Information (POPPI) System, the number of people aged 65 years and over who are unable to manage at least one activity on their own is projected to increase in Shropshire by around 63.3% between 2017 and 2035 (data not available for 2016 and after 2035).</p> <p>4.23. Nationally, the English Household Survey estimated that:</p> <p>a. In 2007/08, 2.8% of households had at least one wheelchair user;</p> <p>b. In 2011/12, 3.3% of households had at least one wheelchair user; and</p> <p>c. In 2013/14, 3.4% of households had at least one wheelchair user.</p> <p>4.24. It is perhaps unsurprising given the demographics of the Country that the percentage of households that had at least one wheelchair user increased during this period and is likely to have increased further since.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM076	Pages 75-81	Policy DP1 Explanation Paragraphs 4.17-4.42 (continued)	<p>4.25. Furthermore, the English Household Survey data from 2007/08 and 2013/14 estimated that the number of households that had at least one wheelchair user was notably higher for households living in affordable housing, at 7.1% in 2007/08 and 6.7% in 2013/14 (data not available for 2011/12).</p> <p>4.26. The SHMA estimates that for the total projected growth in households in Shropshire during the Local Plan period, 13% will require wheelchair accessible dwellings, M4(3) standard and 33% will require accessible and adaptable dwellings to M4(2) standard.</p> <p>4.27. However closer inspection of household growth by the age of Household Reference Person, reveals a significantly higher level of household growth in households with a Household Reference Person aged 65 years and over. With a higher prevalence of long-term health problems or disabilities amongst older people, the importance of ensuring that the Local Plan does not underestimate the level of need for accessible housing that meets M4(3) and M4(2) standards is very much apparent.</p> <p>4.28. As such, the SHMA considers the number of older households (with a Household Reference Person aged 65 years and over) with a long-term health problem or disability that impacts on their housing needs. It estimates that such households will increase by an amount equivalent to 77% of the total growth in older households over the Local Plan period, requiring either M4(2) or M4(3) standard dwellings.</p> <p>4.29. The SHMA also estimates that the number of older wheelchair user households is projected to increase by an amount equivalent to 10% of the total growth in older households, requiring M4(3) standard dwellings. This suggests the remaining 67% of older households with a long-term health problem or disability that impacts on their housing needs will require M4(2) standard dwellings, although it is acknowledged that a proportion of this need will be met within specialist older person accommodation.</p> <p>4.30. Therefore, it is considered appropriate to require that on sites of 5 or more dwellings 5% of dwellings meet M4(3) standard and a further 70% of dwellings meet M4(2) standard, unless site specific factors indicate that step free access cannot be achieved, given:</p> <ul style="list-style-type: none"> a. Government's aspirations to sustain people at home for as long as possible; b. The projected growth in older households and the contribution that this growth makes to total household growth in Shropshire; c. The higher prevalence of long-term health problems or disabilities amongst older people; and d. The identified need for M4(2) and M4(3) standard dwellings to accommodate older households in Shropshire with a long term health problem or disability that impacts on their housing needs over the Local Plan period. <p>4.31. It is also considered appropriate to require all dwellings specifically designed for the elderly or those with disabilities to meet M4(3) (wheelchair user dwellings) standard within Building Regulations. If site specific factors indicate that step free access cannot be achieved, it is questionable as to whether the site or element of the site should be identified for dwellings specifically to meet the needs of the elderly or those with disabilities.</p> <p>4.32. This policy requirement is consistent with the National Planning Practice Guidance advice on Housing: Optional Technical Standards, which specifies in Paragraph 5 (ID: 56-005-20150327) "The National Planning Policy Framework (NPPF) is clear that local planning authorities should plan to create safe, accessible environments and promote inclusion and community cohesion. This includes buildings and their surrounding spaces. Local planning authorities should take account of evidence that demonstrates a clear need for housing for people with specific housing needs and plan to meet this need".</p> <p>4.33. It should be noted that M4(3) (wheelchair user dwellings) standard within Building Regulations sets a distinction between wheelchair accessible (a home readily useable by a wheelchair user at the point of completion) and wheelchair adaptable (a home that can be easily adapted to meet the needs of a household including wheelchair users) dwellings.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM077	Pages 75-81	Policy DP1 Explanation Paragraphs 4.17-4.42 (further continued)	<p>4.34. Where dwellings are required to meet M4(3) (wheelchair user dwellings) standard within Building Regulations to comply with this policy, they will normally consist of wheelchair adaptable homes. Wheelchair accessible homes will only be required where Shropshire Council is responsible for nominating a person to live in the dwelling.</p> <p>4.35. This approach is consistent with National Planning Practice Guidance advice on Housing: Optional Technical Standards, which specifies in Paragraph 9 (ID: 56-009-20150327) "Wheelchair accessible homes will only be required where the Council is responsible for nominating a person to live in the dwelling",</p> <p>4.36. It should also be noted that where references to the Building Regulations in this policy change, the requirement shall be taken to refer to the most up-to-date standard. Housing for Older People and those with Disabilities or Special Needs</p> <p>4.37. The policy approach which enables people to remain in their own homes for longer, is complemented by policies which support the provision of specialist accommodation for the elderly. The National Planning Practice Guidance on Housing for Older People recognises that there is a significant amount of variability in the types of specialist accommodation for older people, identifying four main categories which can be summarised as:</p> <p>a. "Age-restricted general market housing;</p> <p>b. Retirement living or sheltered housing;</p> <p>c. Extra care housing or housing with care; and</p> <p>d. Residential care homes and nursing homes".</p> <p>4.38. Ultimately access to care in these facilities enables provision to be sustainable for older people as physical and mental capacities diminish. As such provision of appropriate care is crucial to ensure that facilities can meet the changing needs of older people.</p> <p>4.39. Developers are encouraged to seek pre-application advice to establish whether their proposal may be classified as Use Class C2 or C3. When determining the Use Class of housing for older people, Shropshire Council considers that it is most appropriate to apply the Office for National Statistics and Ministry of Housing, Communities and Local Government definition of a dwelling. Specifically, where a unit is self-contained, with its own living space, bedroom, bathroom and kitchen behind their own front door, they are considered to represent Use Class C3. Generally:</p> <p>a. Developments which align with the definition of age-restricted general market housing, retirement living or sheltered housing; and extra care housing or housing with care are considered Use Class C3. These types of facilities seek to maintain a balance between independent living and providing varying scales of care.</p> <p>b. Developments which align with the definition of residential care homes and nursing homes are considered Use Class C2. These types of facilities provide a high level of care but do not usually include support services for independent living.</p> <p>4.40. The SHMA projects that over the Local Plan period, there will be a need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision.</p> <p>4.41. Given these projections and the significant growth in older households in Shropshire projected to occur over the Local Plan period, it is considered appropriate to ensure that larger development sites include specialist housing designed to meet the diverse needs of older people, whilst also providing flexibility about types and levels of such accommodation to respond to site specific circumstances.</p> <p>4.42. Appropriate accommodation is also required by people with disabilities or special needs. As such it is also considered appropriate to ensure that larger development sites include specialist housing designed to meet the needs of people with disabilities or special needs, whilst also providing flexibility about types and levels of such accommodation to respond to site specific circumstances.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

MM079	Page 81	New Policy Between Current Policies DP1 and DP2 (continued)	<p>b. Nursing homes providing high-level care for those with dementia and/or complex needs; or c. A combination of the above. <u>9. All specialist housing provision will integrate into rather than be apart (gated-off) from existing and new communities, recognising the social and sustainability benefits of multi-generational and inclusive communities.</u> <u>10. Ideally, specialist housing should be located where future occupiers can benefit from access to existing services and facilities. Where appropriate services and facilities are not already available, a range of supporting services and facilities will need be provided on sites where specialist housing is provided. Any services and facilities provided should be proportionate in scale to the type of specialist housing and ensure the scheme remains affordable.</u> <u>11. When providing specialist housing, opportunities to provide appropriate key worker accommodation for any associated care staff should be proactively considered.</u> <u>12. Specialist housing designed to meet the diverse needs of older people or those with disabilities and special needs that is consistent with the requirements of Paragraph 8 of this Policy and the requirements of other relevant Local Plan Policies (particularly Policies SP3-SP10, DP3, DP11 and Policies S1-S20) will be supported in appropriate locations within the development boundaries identified on the Policies Map.</u> <u>13. Specialist housing schemes that consist of 100% local needs affordable specialist housing for older people or those with disabilities and special needs that is consistent with the requirements of Paragraph 8 of this Policy, the requirements of Policy DP4 and the requirements of other relevant Local Plan Policies will be positively considered.</u> <u>14. Specialist housing that is consistent with the requirements of Paragraph 8 of this Policy and is agreed to be Use Class C2 development, will in addition to meeting the housing needs of older people also constitute a secondary employment use. These forms of specialist housing will therefore be considered an appropriate secondary employment use on mixed-use employment sites, where they are consistent with the requirements of Policy SP13; complement the existing and planned wider employment uses of the site; are served by appropriate infrastructure; and facilitate the delivery of the wider employment site, including through the provision of accesses, servicing and other infrastructure.</u> <u>15. On site allocations for 250 or more dwellings and all development sites for 250 or more dwellings (irrespective of whether such sites are brought forward through a series of phases or planning permissions), at least 20% of houses must constitute a form of specialist housing for older people and/or those with disabilities and special needs documented within Paragraph 8 of this Policy.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM080	Page 81	New Policy Between Current Policies DP1 and DP2 (further continued)	<p><u>16. On site allocations for 150-249 dwellings and all development sites for 150-249 dwellings (irrespective of whether such sites are brought forward through a series of phases or planning permissions), at least 15% of houses must constitute a form of specialist housing for older people and/or those with disabilities and special needs documented within Paragraph 8 of this Policy. At the lower end of this category, it is likely that this provision will consist of age-restricted housing or retirement/sheltered housing in the form of apartments or a small group of bungalows which can be delivered in smaller numbers, as they generally have lower operational and staffing costs and requirements.</u></p> <p><u>17. On site allocations for 50-149 dwellings and all development sites for 50-149 dwellings (irrespective of whether such sites are brought forward through a series of phases or planning permissions), at least 10% of houses must constitute a form of specialist housing for older people and/or those with disabilities and special needs documented within Paragraph 8 of this Policy. It is likely that this provision will consist of age-restricted housing or retirement/sheltered housing in the form of apartments or a small group of bungalows which can be delivered in smaller numbers as they generally have lower operational and staffing costs and requirements.</u></p> <p><u>18. Specialist housing provided in accordance with Paragraphs 15-17 of this Policy that is consistent with the definition of affordable housing can also represent all or part of the contribution to affordable housing required in accordance with Policy DP4 of the Local Plan. However:</u></p> <p><u>a. The mix of specialist housing provided across Shropshire should include both open market and affordable housing.</u></p> <p><u>b. Affordable housing provision should not be concentrated only in affordable specialist housing, as it is important that the other forms of affordable housing are delivered, including for key workers such as the care staff for specialist housing.</u></p> <p><u>c. As such, if it is considered that completions and commitments of specialist housing is concentrated in affordable tenures or if it is considered that affordable housing completions and commitments are concentrated in forms of specialist housing, specialist housing provision on a site may be required to be open market and similarly the affordable housing provision may be required to be general housing.</u></p> <p><u>19. On site allocations, provision of a level of housing which results in the relevant settlements housing guideline being exceeded and/or the site allocations approximate site provision figure within the relevant Settlement Policy (S1-S20) being exceeded will be positively considered where:</u></p> <p><u>a. This over-provision is a direct result of the provision of a significant quantity of specialist housing in excess of that required within Paragraphs 15-17 of this Policy,</u></p> <p><u>b. Over provision is specialist housing of a type documented within Paragraph 8 of this Policy,</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM081	Page 81	New Policy Between Current Policies DP1 and DP2 (further continued 2)	<p><u>c. The development proposed remains an appropriate form of development on the site having regard to its characteristics and the character of the surrounding area, and</u></p> <p><u>d. The proposed development complies with the wider policies of the Local Plan, particularly Policies SP3, SP5, SP6, DP1, DP2, DP3, DP11, DP12, DP14-DP17, DP25, DP27, and DP28.</u></p> <p><u>20. Proposals that result in the loss of existing specialist housing designed to meet the needs of older people or those with disabilities and special needs will be resisted unless:</u></p> <p><u>a. There is no longer an identified need for the existing form of specialist housing in the settlement and Shropshire as a whole; or</u></p> <p><u>b. The needs will be met elsewhere within the settlement, preferably close to the existing specialist housing or in a preferential location for specialist housing; or</u></p> <p><u>c. Redevelopment would provide an improved quality of a comparable category of specialist housing and associated facilities; or</u></p> <p><u>d. Redevelopment would provide an alternative form of specialist housing which is identified within Paragraph 8 of this policy, demonstrably of greater need in Shropshire, and the provision of the specialist housing and associated facilities is of a high quality.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM082	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2	<p><u>Explanation</u> <u>Introduction</u> <u>The Strategic Housing Market Assessment (SHMA) for Shropshire demonstrates that there is a higher proportion of older people living in Shropshire than the national average. Furthermore, it anticipates that over the plan period to 2038, the proportion of older people living in Shropshire and the number of single person households will increase at a faster rate than the national average.</u> <u>The health and lifestyles of older people living within our communities inevitably varies and it is expected that this will remain the case in the future. Similarly, the housing needs and aspirations of older people in our communities will also inevitably differ.</u> <u>Those with disabilities and special needs can include those with physical and/or mental health needs. Like older people, their health and lifestyles are diverse and this is reflected in their housing needs and aspirations.</u> <u>The housing needs and aspirations of older people and those with disabilities and special needs will likely include:</u> <u>a. The provision of appropriate adaptations to their homes.</u> <u>b. Moving to new accessible and adaptable general needs housing.</u> <u>c. Moving to an appropriate form of specialist housing.</u> <u>Further information on accessible and adaptable general needs housing and specialist housing is provided later within this Explanation.</u> <u>National Planning Practice Guidance on Housing for Older and Disabled People specifies that “Offering older people a better choice of accommodation to suit their changing needs can help them live independently for longer, feel more connected to their communities and help reduce costs to the social care and health systems.” It also specifies that “The provision of appropriate housing for people with disabilities, including specialist and supported housing, is crucial in helping them to live safe and independent lives.”</u> <u>People’s Strategy for Shropshire</u> <u>The People’s Strategy for Shropshire includes the strategy for meeting the care and support needs of older people and those with disabilities and special needs. This strategy is underpinned by the key principle of:</u> <u>Wherever possible, seeking to support older people and those with disabilities and special needs living in Shropshire to remain independent within their own homes, within their existing communities and with access to their established support networks.</u> <u>This key principle is considered to be consistent with Government’s reform of Health and Adult Social Care, which is underpinned by a principle of sustaining people at home for as long as possible.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM083	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2 (continued)	<p>Importantly, this key principle has also been directly informed by and is responsive to our understanding of the needs and aspirations of the older people living in our communities, including through consideration of the Housing Need Survey undertaken for Shropshire and the ‘Right Home, Right Place Surveys’ undertaken for Parishes in Shropshire.</p> <p>Furthermore, this key principle is responsive to the geography and characteristics of Shropshire. Specifically, Shropshire is a large, diverse and predominantly rural County with a very low population density across much of its geography. As such, the vast majority of our settlements are small both in terms of population and number of households. In these settlements it is not always appropriate to provide new adaptable and accessible housing or specialist housing – due to their size and location.</p> <p>However, older people and those with disabilities and special needs living within these small rural settlements often have a very strong connection to their community and a clear preference to remain within it. In circumstances where these individuals have support or care needs, the only practicable means of meeting these needs, whilst also respecting their preference to remain within their existing community, it to provide support within their existing home.</p> <p>As such, in implementing the People’s Strategy, where older people and those with disabilities and special needs require support, in the first instance this will be achieved thorough the provision of appropriate adaptations, equipment, assistive technology and if necessary domiciliary care to support them to continue to live independently within their existing home.</p> <p>Given the rapid advancements to assistive technologies, it is considered that over the plan period to 2038, the ability to effectively provide support in this way will expand.</p> <p>These various measures are generally outside the scope of the planning system. However, by seeking to positively influence the types of housing delivered in the future, the planning system can positively facilitate this strategy moving forwards.</p> <p>Specifically, to facilitate this strategy in the future and also provide genuine choice for those older people and people with disabilities and special needs that require support and do wish to move to alternative general housing, it is essential that new development includes a significant quantity of properties designed to M4(2) (accessible and adaptable dwellings) or M4(3) (wheelchair user dwellings) standard within Building Regulations.</p> <p>The National Planning Practice Guidance on Housing for Older and Disabled People explains that “Accessible and adaptable housing enables people to live more independently, while also saving on health and social costs in the future. It is better to build accessible housing from the outset rather than have to make adaptations at a later stage – both in terms of cost and with regard to people being able to remain safe and independent in their homes.”</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM084	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2 (further continued)	<p>It is considered that this strategy can also be complemented by the provision of appropriate quantities and forms of specialist housing that support independent living, as such provision allows support and care to be provided within the home, albeit not the current home. It also provides genuine choice for those older people and people with disabilities and special needs that require support and wish to move to a form of specialist housing whilst still maintaining independence.</p> <p>However, if accessible and adaptable housing and specialist housing provision is to be capable of accommodating those that require support they must be of the right size, type, tenure and affordability. Crucially it must also be in appropriate locations.</p> <p>Whilst the key principle of the strategy for meeting the care and support needs of older people and those with disabilities and special needs is to seek to support them to remain independent within their own homes (generally their existing home unless the individuals preference is either new adaptable and accessible housing or specialist housing including for such reasons as moving closer to their wider family or moving to more accessible locations with better provision of services and facilities), the strategy equally recognises that unfortunately this is not always possible.</p> <p>As such, there remains an important role for nursing homes, which provide high level care (including dementia care) for those individuals who cannot be supported to remain independent within their own home.</p> <p>However, conversely it is considered that there will be a reduced role for residential homes that do not provide high level care (including dementia care) in the future – as increasingly more older people and people with disabilities and special needs that would have moved to residential homes will be supported within their own home.</p> <p><u>Accessible and Adaptable Housing</u></p> <p><u>Part M of the Building Regulations addresses the access to and use of dwellings. It identifies three categories of dwelling, these are:</u></p> <p><u>a. M4(1) Category 1: Visitable dwellings.</u></p> <p><u>b. M4(2) Category 2: Accessible and adaptable dwellings.</u></p> <p><u>c. M4(3) Category 3: Wheelchair user dwellings.</u></p> <p><u>M4(1) is mandatory for all new dwellings. M4(2) and M4(3) only apply in instances where a Local Plan introduces such a requirement, as is the case with this policy. The M4(2) and M4(3) standards can be summarised as follows:</u></p> <p><u>M4(2): Accessible and adaptable housing provides safe and convenient approach routes into and out of the home and outside areas, suitable circulation space and suitable bathroom(s) and kitchen within the home.</u></p> <p><u>M4(3): Wheelchair user dwellings achieve the accessibility and adaptability requirements of M4(2) housing, but also include additional features to meet the needs of occupants who use wheelchairs, or allow for adaptations to meet such needs.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM085	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2 (further continued 2)	<p><u>Guidance on how to achieve these requirements is provided within Part M of the Building Regulations*.</u></p> <p><u>M4(2) and M4(3) requirements have been introduced in Shropshire for a number of reasons, including:</u></p> <p><u>a. There is a higher proportion of older people living in Shropshire than the national average.</u></p> <p><u>b. It is anticipated that over the plan period to 2038, the proportion of older people living in Shropshire will increase at a faster rate than the national average.</u></p> <p><u>c. The anticipated contribution that growth in older households makes to total household growth in Shropshire.</u></p> <p><u>d. The higher prevalence of long-term health problems and/or disabilities amongst older people;</u></p> <p><u>e. Within the People’s Strategy for Shropshire, a key principle for meeting the care needs of older people and those with disabilities and special needs is supporting them to remain independent within their own homes, within their existing communities and with access to their established support networks wherever possible. Provision of M4(2) and M4(3) housing will directly facilitate this in the future, whilst also providing genuine choice for those older people and people with disabilities and special needs that do wish to move to alternative general housing; and</u></p> <p><u>f. Government’s aspiration for adult social care is to sustain people at home for as long as possible. Provision of M4(2) and M4(3) housing directly facilitates this strategy.</u></p> <p><u>The need for M4(2) and M4(3) housing was specifically considered within the SHMA. It estimated that for the total projected growth in households in Shropshire during the Local Plan period, 13% will require wheelchair accessible dwellings, M4(3) standard and 33% will require accessible and adaptable dwellings to M4(2) standard.</u></p> <p><u>However closer inspection of household growth by the age of Household Reference Person, reveals a significantly higher level of household growth in households with a Household Reference Person aged 65 years and over. With a higher prevalence of long-term health problems and/or disabilities amongst older people, the importance of ensuring that the Local Plan does not underestimate the level of need for accessible housing that meets M4(3) and M4(2) standards is very much apparent.</u></p> <p><u>As such, the SHMA considers the number of older households (with a Household Reference Person aged 65 years and over) with a long-term health problem or disability that impacts on their housing needs. It estimates that such households will increase by an amount equivalent to 77% of the total growth in older households over the Local Plan period, requiring either M4(2) or M4(3) standard dwellings.</u></p> <p><u>The SHMA also estimates that the number of older wheelchair user households is projected to increase by an amount equivalent to 10% of the total growth in older households, requiring M4(3) standard dwellings. This suggests the remaining 67% of older households with a long-term health problem or disability that impacts on their housing needs will require M4(2) standard dwellings, although it is acknowledged that a proportion of this need will be met within specialist housing.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM086	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2 (further continued 3)	<p>Therefore, it is considered appropriate to require that on sites of 5 or more dwellings 5% of dwellings meet M4(3) standard and a further 70% of dwellings meet M4(2) standard, unless site-specific factors indicate that step-free access cannot be achieved.</p> <p>There will be an expectation that M4(3) dwellings within a development will be sited nearest to service provision and maximise the ease of which the household can access public transport and open space. An updated Type and Affordability of Housing Supplementary Planning Document will provide detailed guidance on the siting and integration of M4(3) dwellings into a development.</p> <p>It is also considered appropriate to require all dwellings specifically designed for the elderly or those with disabilities, including specialist housing, to meet M4(3) (wheelchair user dwellings) standard within Building Regulations. If site-specific factors indicate that step-free access cannot be achieved, it is questionable as to whether the site or element of the site should be identified for dwellings specifically to meet the needs of the elderly or those with disabilities and special needs.</p> <p>This policy requirement is consistent with the National Planning Practice Guidance advice on Housing: Optional Technical Standards, which specifies in Paragraph 5 (ID: 56-005-20150327) "The National Planning Policy Framework (NPPF) is clear that local planning authorities should plan to create safe, accessible environments and promote inclusion and community cohesion. This includes buildings and their surrounding spaces. Local planning authorities should take account of evidence that demonstrates a clear need for housing for people with specific housing needs and plan to meet this need".</p> <p>It should be noted that M4(3) (wheelchair user dwellings) standard within Building Regulations sets a distinction between wheelchair accessible (a home readily useable by a wheelchair user at the point of completion) and wheelchair adaptable (a home that can be easily adapted to meet the needs of a household including wheelchair users) dwellings.</p> <p>Where dwellings are required to meet M4(3) (wheelchair user dwellings) standard within Building Regulations to comply with this policy, they will normally consist of wheelchair adaptable homes. Wheelchair accessible homes will only be required where Shropshire Council is responsible for nominating a person to live in the dwelling.</p> <p>This approach is consistent with National Planning Practice Guidance advice on Housing: Optional Technical Standards, which specifies in Paragraph 9 (ID: 56-009-20150327) "Wheelchair accessible homes will only be required where the Council is responsible for nominating a person to live in the dwelling".</p> <p>It should also be noted that where references to the Building Regulations in this policy change, the requirement shall be taken to refer to the most up-to-date standard.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as bold and underlined and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM087	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2 (further continued 4)	<p><u>Dementia Friendly Housing</u> <u>Dementia friendly housing is designed to support the independence of and provide a comfortable environment for those living with dementia. The SHMA indicates that as a result of the increase in older people in Shropshire over the plan period, there will also be a significant rise in the number of people with dementia. Specifically, the SHMA concludes that between 2017 and 2035 the number of people aged 65 years and over with dementia is expected to increase by 80%.</u> <u>As a result, it is considered appropriate to require all housing, including specialist housing, designed to M4(3) standard to be dementia ‘friendly’ and to strongly encourage all housing designed to M4(2) standard to be dementia ‘friendly’.</u> <u>Guidance on achieving dementia ‘friendly’ housing is available through such organisations as the Alzheimer’s Society which has produced a Dementia-friendly housing guide available at: https://www.alzheimers.org.uk/sites/default/files/2020-06/Dementia%20Friendly%20Housing_Guide.pdf</u> <u>This guide addresses such issues as consideration of layout, décor, lighting, flooring, furnishings, seating, signage, toilets, navigation, parking, noise and quiet spaces.</u> <u>These measures generally have only a very minimal (if any) additional cost compared to the design requirements to achieve M4(2) and particularly M4(3) housing, but can make a significant difference to the quality of life and independence of those living in the home with dementia.</u> <u>Types of Specialist Housing for Older People and those with Disabilities and Special Needs</u> <u>The National Planning Practice Guidance on Housing for Older and Disabled People recognises there is a significant amount of variability in the types of specialist housing available to meet the housing needs of older people and those with disabilities and special needs. It identifies four main categories of specialist housing, whilst equally acknowledging that this list is not definitive.</u> <u>The forms of specialist housing identified are as follows:</u> <u>“Age-restricted general market housing: This type of housing is generally for people aged 55 and over and the active elderly. It may include some shared amenities such as communal gardens, but does not include support or care services.</u> <u>Retirement living or sheltered housing: This usually consists of purpose-built flats or bungalows with limited communal facilities such as a lounge, laundry room and guest room. It does not generally provide care services, but provides some support to enable residents to live independently. This can include 24 hour on-site assistance (alarm) and a warden or house manager.</u> <u>Extra care housing or housing-with-care: This usually consists of purpose-built or adapted flats or bungalows with a medium to high level of care available if required, through an onsite care agency registered through the Care Quality Commission (CQC).</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Page 1906

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM088	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2 (further continued 5)	<p><u>Residents are able to live independently with 24 hour access to support services and staff, and meals are also available. There are often extensive communal areas, such as space to socialise or a wellbeing centre. In some cases, these developments are known as retirement communities or villages - the intention is for residents to benefit from varying levels of care as time progresses.</u></p> <p><u>Residential care homes and nursing homes: These have individual rooms within a residential building and provide a high level of care meeting all activities of daily living. They do not usually include support services for independent living. This type of housing can also include dementia care homes.</u></p> <p><u>The key distinctions between the different categories of specialist housing are the level of on-site care and the level of communal facilities available.</u></p> <p><u>Developers are encouraged to seek pre-application advice to establish whether their proposal may be classified as Use Class C2 or C3. When determining the Use Class of housing for older people, due consideration will be given to the level of care and scale of communal facilities provided.</u></p> <p><u>However, it is important to note that irrespective of the Use Class of the development, all specialist housing constitutes residential accommodation and housing which is subject to all relevant housing policies within the Local Plan. This is clear within the approach taken in the Local Plan itself to such specialist housing, the National Planning Policy Framework and the National Planning Practice Guidance, including the National Planning Practice Guidance on Housing for Older and Disabled People.</u></p> <p><u>Provision of new Specialist Housing for Older People and those with Disabilities and Special Needs</u></p> <p><u>The SHMA projects that over the Local Plan period, there will be a need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision in order to maintain current prevalence rates (this being the amount of specialist houses for older people compared to the number of older people).</u></p> <p><u>As already documented, the People’s Strategy for Shropshire includes the strategy for meeting the care and support needs of older people and those with disabilities and special needs. This strategy is underpinned by the key principle of wherever possible seeking to support older people and those with disabilities and special needs living in Shropshire to remain independent within their own homes, within their existing communities and with access to their established support networks.</u></p> <p><u>As also already documented, there are numerous reasons for this approach, including responding to our understanding of the needs and aspirations of older people and those with disabilities and special needs living in Shropshire and importantly the geography and characteristics of Shropshire.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM089	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2 (further continued 6)	<p>This strategy inevitably means that the ‘prevalence rates’ for specialist housing in Shropshire will be lower than in other areas with either a different strategy for meeting the needs of older people and those with disabilities and special needs and/or with a different geography and characteristics – for instance more urban and densely populated geographies.</p> <p>However, it is recognised that this strategy can be complemented by the provision of appropriate quantities and forms of specialist housing that support independent living (particularly in our larger settlements), which can provide genuine choice for those older people and people with disabilities and special needs that require support. There also remains an important role for nursing homes which provide high level care (including dementia care), for those individuals who cannot be supported to remain independent within their own home.</p> <p>The strategy is however likely to reduce the need for residential homes that do not provide high-level care. This role will be increasingly met by the provision of support within the home.</p> <p>As such, it is considered both necessary and appropriate to introduce a series of measures to ensure the delivery of appropriate types and quantities of specialist housing in Shropshire – particularly within our larger settlements, which will complement (but importantly must not undermine) the strategy for meeting the care and support needs of older people and those with disabilities and special needs.</p> <p>These measures include providing support for the provision of appropriate forms of specialist housing (as documented within Paragraph 14 of this Policy) that is consistent with the requirements of the Local Plan (particularly Policies S1-S20) in appropriate locations within identified development boundaries. Such locations are more likely to benefit from appropriate access to services and facilities and can be integrated into existing communities, enhancing the social and sustainability benefits of multi-generational and inclusive communities.</p> <p>These measures also include providing support for the provision of appropriate forms of 100% local needs affordable specialist housing, where this provision is consistent with the requirements of the Local Plan (particularly Policy DP4). Provision of affordable (particularly social rent) specialist housing is of particular importance in Shropshire.</p> <p>This is because a significantly higher proportion of households living in social rent properties in Shropshire contain people with long-term health problems or disabilities than other tenures of housing. Specifically, the SHMA concludes that 27.8% of households living in social rent properties contain a person with a long-term health problem or disability, compared to 17.1% of households living in owner-occupied properties, 13.6% living in private rented properties, and 17.9% of households living in any property tenure.</p> <p>Furthermore, older people and those with disabilities and special needs with care and support needs that occupy social rented properties may be more inclined to move to specialist housing than owner-occupiers.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM090	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2 (further continued 7)	<p><u>Another measure is the provision of support for appropriate forms of Use Class C2 specialist housing being provided as a secondary employment use on mixed use employment sites. Provided that this provision is consistent with the requirements of the Local Plan (particularly Policy SP13) and that such provision complements other existing and proposed employment uses on the site and facilitates the delivery of the wider employment site, including through the provision of accesses, servicing and other infrastructure.</u></p> <p><u>Such provision provides the dual benefit of providing appropriate forms of specialist housing and also facilitating the delivery of the wider employment site. Furthermore, these employment sites are generally well-located, allowing appropriate access to services and facilities. The elements of mixed use employment sites that are likely appropriate for specialist housing are also likely to be those closest to other forms of housing, thereby providing opportunities to integrate the specialist housing into existing communities.</u></p> <p><u>Another measure is the requirement for proportionate quantities of appropriate forms of specialist housing to be provided on larger development sites, in a way that integrates this provision into the wider development site. Such an approach facilitates the achievement of the social and sustainability benefits of multi-generational and inclusive communities.</u></p> <p><u>The thresholds identified for the 'categories' of housing within which proportionate provision of appropriate forms of specialist housing is required are responsive to both our understanding of the nature of development schemes that occur in Shropshire and the concept of achieving multi-generational and inclusive communities.</u></p> <p><u>Specifically, developments of 50 or more dwellings are generally considered to represent a 'large-scale' development in a Shropshire context. Development at this scale benefits from economies of scale and have the potential to integrate specialist housing as part of a wider housing mix that encourages multi-generational and inclusive communities.</u></p> <p><u>Developments of over 150 dwellings constitute 'significant-scale' development in a Shropshire context. Developments of this scale benefit from significant economies of scale and have the potential to integrate specialist housing as part of a wider housing mix that encourages multi-generational and inclusive communities. Many developments above 150 dwellings will have the potential to provide those forms of specialist housing that require larger numbers of units due to their operating model and the requirement for economies of scale, such as extra-care housing and nursing homes offering high end care (including dementia care).</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

MM091	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2 (further continued 8)	<p>Developments of 250 or more dwellings represent 'strategic-scale' development in a Shropshire context. Developments of this scale benefit from significant economies of scale and the potential to integrate much larger forms of specialist housing provision as part of a wider housing mix, that encourages multi-generational and inclusive communities. On such sites there are particular opportunities for the provision of those forms of specialist housing that require larger numbers of units due to their operating model and the requirement for economies of scale, such as extra-care housing and nursing homes offering high end care (including dementia care). It is expected that these opportunities would be fully explored. The specific thresholds identified for the proportionate 'quantities' of specialist housing are responsive to our understanding of the 'critical mass' required for the various forms of specialist housing, development viability, the level of 'need' that exists in Shropshire, and the concept of achieving multi-generational and inclusive communities.</p> <p><u>New specialist housing should ideally be located where residents can benefit from access to existing services and facilities. This has the dual benefit of supporting the integration of the specialist housing development and its residents into the wider community and also supports the long-term sustainability of these existing services and facilities.</u></p> <p><u>Where services and facilities are not already available, or there is a need for specific services and facilities on the specialist housing site, this provision should be responsive to the types of services and facilities already available and be proportionate in scale to the type of specialist housing. It is important to ensure that specialist housing remains affordable – recognising that specialist housing occupiers will have to pay both service-charges and care-costs in addition to any rent/mortgage. The greater the level of services and facilities on the site, the greater the risk that the resultant specialist housing becomes unaffordable to many of the older people or people with disabilities and special needs in Shropshire whose needs it is intended to meet.</u></p> <p><u>It is important that specialist housing is supported by the provision of an appropriate quantity and quality of open space. Consistent with Policy DP15, consideration will be given to reducing the quantity of open space provided, where a specialist housing development is able to provide a particularly high quality of open space on site which meets the needs of all residents. High quality open space is particularly important for specialist housing as residents may be less able or willing to travel to other open space in the area and recognising the wider value and health benefits of the ability to both access and view open space.</u></p> <p><u>Furthermore, any new specialist housing scheme should also give consideration to the potential for the provision of appropriate key worker accommodation for any associated care staff. This is a particularly important consideration in Shropshire, as one of the barriers to the care worker labour force is the availability of affordable housing and yet many specialist housing facilities require a significant number of care workers to ensure their operation.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM092	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2 (further continued 9)	<p>Such provision has the potential to complement the provision of smaller open market housing consistent with the requirements of Policy DP1 and affordable housing consistent with the requirements of Policies DP3-DP7.</p> <p>As documented above, the provision of affordable (particularly social rent) specialist housing is of particular importance in Shropshire. However, there is also a need for market specialist housing and crucially there is a need for affordable general housing.</p> <p>As such, whilst the specialist housing provision required within Paragraphs 15-17 of this Policy can, where it is consistent with the definition of affordable housing, also constitute all or part of the affordable housing required from the development - consistent with the requirements of Policy DP4 of the Local Plan, there is a need to ensure this does not undermine the provision of either market specialist housing or affordable general housing.</p> <p>Therefore, this policy includes the ability to require specialist housing provided in accordance with Paragraphs 15-17 of this Policy to be market provision, if this is considered necessary in order to ensure the appropriate provision of market specialist housing or affordable general housing. It is recognised that many forms of specialist housing present opportunities to achieve a denser form of development than general housing, whilst still achieving a high-quality design that it complementary to the development site, surrounding character and importantly consistent with wider policies within the Local Plan – including those relating to high-quality design (SP5) and health and wellbeing (SP6).</p> <p>It is also recognised that some forms of specialist housing require a ‘critical-mass’ in order to ensure operational efficiency and viability, which may mean that opportunities arise to provide a significant quantity of specialist housing in excess of that required within Paragraphs 15-17 of this Policy.</p> <p>As such, it is considered important and appropriate to provide further flexibility regarding the approximate site provision figure and overall settlement housing guideline in circumstances where a site allocation is proposing to significantly over-provide the amount of specialist housing provision, above that required within this Policy. Provided that the resultant development remains appropriate to the site having regard to its characteristics and the character of the surrounding area, and the resultant development complies with the wider policies of the Local Plan, particularly Policies SP3, SP5-SP6, DP1, DP2, DP3, DP11, DP12, DP14-DP17, DP25 and DP27-DP28.</p> <p>Such an approach also incentivises the provision of specialist housing as an important and valued component of the housing mix on site allocations and supports the achievement of multi-generational communities.</p> <p>Retention of Existing Specialist Housing for Older People and those with Disabilities and Special Needs</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM093	Page 81	Explanation to New Policy Between Current Policies DP1 and DP2 (further continued 10)	<p>In addition to addressing the provision of new forms of specialist housing for older people and those with disabilities and special needs, this policy also introduced an important requirement for the retention of existing specialist housing, unless any loss is offset through the appropriate replacement with equivalent or better provision or it can be demonstrated that there is no longer a need for the particular for of specialist housing within the relevant settlement and Shropshire as a whole. This approach is considered important given that:</p> <p>a. There is a higher proportion of older people living in Shropshire than the national average.</p> <p>b. There is an expectation that the proportion of older people living in Shropshire will increase at a faster rate than the national average.</p> <p>c. Specialist housing can complement the strategy for meeting the care and support needs of older people and those with disabilities and special needs in Shropshire.</p> <p>d. Many of the sites containing specialist housing are well integrated into their community and as such support the principle of multi-generational communities and provide good access to services and facilities. As such, it is important that these locations are retained for specialist housing, even if it is ultimately an alternative form of specialist housing.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

MM095	Page 88	Policy DP4 Explanation Paragraph 4.60	Evidence provided in respect of sites adjoining Strategic, Principal and Key Centres is likely to demonstrate high affordable housing need. The scale of any affordable housing exception scheme should be responsive and proportionate to the settlement and contribute to the long-term sustainability of the community, including through achievement of multi-generational and inclusive communities, which should not automatically translate into larger-exception sites. There is an expectation that exception sites will not exceed 25 dwellings. Where it is exceptionally considered appropriate for an exception-site of more than 25 dwellings, sSignificant emphasis will also be placed on achieving an appropriate mix of house types, sizes and tenures, to ensure a balanced development. Further guidance will be included in the Housing Supplementary Planning Document (SPD).	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

MM097	Page 94	Policy DP8 Paragraph 1(d)	Transit provision in close proximity to the main established travelling routes in the area to meet any additional -evidenced need.	Clarification	Shropshire Council
MM098	Pages 95-96	Policy DP8 Explanation Paragraph 4.83 and associated new paragraphs	<p>The GTAA <u>2019 update</u> identified a total of 148 authorised pitches across Shropshire as well as a temporary showpersons yard. It looks <u>looks</u> at existing provision and occupancy of local authority sites and likely levels of future need, including population growth from emerging households. Using this information, the assessment considers both 5 year need and that over the Plan period to 2038. The gross needs identified by the GTAA are 24 pitches over the initial 5-year period and 113 pitches (43 PPTS definition) to 2038 based on a cultural interpretation of need.</p> <p><u>The total cultural pitch need figure of 113 in the GTAA 2019 is made up from an initial 5-year pitch shortfall and a longer term need over the remainder of the Plan period to 2038. Additional work was carried out in 2022 to supplement the GTAA 2019 update and provide additional evidence to support the Examination of the draft Shropshire Local Plan. Although not a full GTAA, this produced updated information in respect of the need and supply of pitches and provided a mechanism for the initial 5 year period to be rolled forward to a 2022 baseline.</u></p> <p><u>It was identified that, as of March 2022, there were 162 authorised Gypsy and Traveller pitches across Shropshire an increase in supply of 14 pitches since the GTAA 2019 update. As a measure of the level of cultural need the number of households in 2022 was considered against supply.</u></p> <p><u>The data obtained in 2022 indicated that the total pitch need, when considered against supply, had reduced to 13 pitches in 2022 compared to a shortfall of 24 pitches identified in the GTAA 2019 update. Therefore, there was no evidence in 2022 of any additional requirement for pitches.</u></p> <p>However, a Comprehensive site management data on the occupancy and re-occupancy of Shropshire Council pitches (described as turnover in the GTAA report) is considered in detail by the <u>GTAA 2019 update</u> study alongside the previous study survey results. This provides information on the significant, ongoing role of turnover in meeting identified needs based on a methodology employing a cautious interpretation of information to exclude turnover which does not result in the genuine release of pitches or that which may occur on private sites which cannot be evidenced by the Local Authority. In the light of this evidence the GTAA <u>2019 update</u> concludes that there is no current requirement for site allocations or evidence of the need for the identification of sites for longer term provision for Gypsies and Travellers.</p> <p><u>Taking into account updated information from 2022, and assuming turnover continuing at the same level as that identified by the GTAA 2019 update, it is considered that expected turnover on the Local Authority's pitches will continue to address need and that the conclusions reached by the GTAA 2019 update regarding strategic need and requirements for the Local Plan remain applicable.</u></p> <p>Although there is a The separate requirement identified <u>by the GTAA 2019 update</u> for permanent provision for Travelling Showpeople, the need for a plot for has been met by <u>a family plot in Oswestry which was granted</u> the grant of planning permission (reference 19/04688/FUL) in Oswestry in May 2020.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM099	Page 96	Policy DP8 Explanation Paragraph 4.84 and associated new paragraphs	<p>There is also a requirement in national policy to identify and address the likely transit needs of the <u>in</u> Shropshire and these are also considered in the GTAA <u>2019 update</u>. This evidence highlights that past unauthorised encampment activity provides an indicator of transit provision needs but that <u>a further period of monitoring of the impact of private transit provision (permitted in 2018)</u> it is too soon to fully assess the effect on levels of unauthorised encampment of a planning permission granted in November 2018 for 3 transit pitches. The GTAA therefore concludes that a period of monitoring is <u>was</u> required.</p> <p><u>Consistent with this recommendation, there has been ongoing monitoring of unauthorised encampments since the GTAA 2019 update. The data presented in 2022 showed reduced numbers of unauthorised encampments since a peak in 2017. However, it is considered that movement in 2020 and 2021 may not be typical due to lockdowns and other potential impacts of the Covid 19 pandemic on the ability and desire to travel. Therefore, monitoring will continue to establish whether the reduction in encampments in 2020 and 2021 represent a longer-term trend.</u></p> <p>It is <u>The GTAA 2019 update</u> recognised however that additional Council provision would support transit capacity and the ability to manage unauthorised encampments. <u>Therefore, therefore</u> the Council is <u>has</u> actively exploring complementary transit provision outside the Local Plan process <u>and is progressing work to deliver this opportunity.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM100	Page 96	Policy DP8 Explanation Paragraph 4.85	The GTAA <u>2019 update</u> does conclude that non-strategic needs for small sites will nevertheless arise where available supply does not meet need a specific requirement and makes a recommendation for criteria-based policy to provide a basis for the consideration of planning applications sites and to facilitate additional pitch provision where required. These requirements are reflected in Policy DP8 which allows for the positive consideration of appropriate planning applications and ensures that there is flexibility and a mechanism to provide for arising needs. The use of a policy framework to guide and enable the provision of sites would provide for a continuation of the current approach which has resulted in the delivery of: small sites in Shropshire through the development management process; provision of additional pitches at existing Shropshire Council managed sites and a site for Travelling Showpeople.	Clarification	Shropshire Council
MM101	Page 96	Policy DP8 Explanation New paragraph following 4.86	<u>It is however, important to note that in light of the Court of Appeal's judgment in Lisa Smith v SSLUHC [2022] EWCA Civ 1391 of 31st October 2022 about the interpretation and application of the Planning Policy for Traveller Sites that any potentially discriminatory impacts of the application of the Annexe A planning definition of Gypsies and Travellers will be taken into account in the consideration of planning applications.</u>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

MM103	Page 111	Policy DP13 Paragraph 1	To protect the integrity of the r River Clun Special Area of Conservation (SAC) and to comply with the Habitats Regulations and policy DP12, development within the catchment of the r River Clun will only be permitted if it can demonstrate either nutrient neutrality or <u>a reduction in nutrient levels.</u> betterment.	Clarification	Shropshire Council A0349
MM104	Page 111	Policy DP13 Paragraph 2	All measures relied on to deliver either nutrient neutrality or <u>a reduction in nutrient betterment levels</u> must demonstrate with sufficient certainty that they: a. Meet the required <u>Will achieve either nutrient neutrality or a reduction in nutrient levels</u> or improvement; and b. They can be secured and funded for the lifetime of the development's effects; <u>and</u> c. <u>Do not compromise the ability of the River Clun SAC to reach favourable conservation status.</u>	Correction to ensure compliance with Habitat Regulations	Shropshire Council A0349
MM105	Page 112	Policy DP13 Explanation Paragraph 4.136	Notwithstanding these improvements, the Habitat Regulations Assessment (HRA) for this Plan shows that most ⁸ development in the river Clun catchment is likely to have an adverse effect on the river Clun SAC. Practical mitigation measures which would remove this effect for larger applications have yet to be proposed, but this is not to say that they will not come forward during the Plan period. Accordingly, to comply with the requirements of the Conservation of Habitats and Species Regulations 2017 <u>as amended,</u> this policy restricts development to that which is either nutrient neutral in terms of its effect on the SAC or results in a <u>reduction in the level of nutrients entering the SAC.</u> betterment. This is in anticipation of measures to achieve either of these criteria being found in the future for the majority⁸ of development in the catchment. Such measures could include an updated Nutrient Management Plan and sufficiently robust Action Plan to provide the level of certainty required by the Habitats Regulations that the SAC restoration targets can be achieved in an appropriate timescale	Clarification	Shropshire Council A0349
MM106	Page 112	Policy DP13 Explanation Paragraph 4.137 (e)	Not directly use or double count measures that are in place, to meet the Habitats Directive article 6(1)(2) requirements <u>or must be put in place, to protect, conserve or restore the SAC</u> in order to justify new growth	Clarification	Shropshire Council A0349
Page 1913 MM107	Page 112	Policy DP13 Explanation New paragraphs after paragraph 4.137	<u>Consequently, mitigation measures to support development in achieving nutrient neutrality or a nutrient reduction will be set out in a River Clun Catchment Supplementary Planning Document (SPD). This SPD will be prepared once a River Clun SAC Restoration Plan is in place. The River Clun SAC Restoration Plan will set out the measures needed to bring the river Clun SAC back to favourable conservation status. Once these restoration measure have been determined, the mitigation measures needed to remove the impact of development on the SAC can be identified. Mitigation measures to remove an adverse effect from development must be in addition to, and must not prevent, the delivery of restoration measures for the SAC. If the SAC Restoration Plan identifies that developer contributions are also necessary to make development in the Clun catchment acceptable in planning terms; are directly related to the development; and are fairly and reasonably related in scale and kind to the development; then these will be sought in line with Policy DP25. The Council will support the statutory agencies and other relevant stakeholders in the preparation of the River Clun SAC Restoration Plan at the earliest opportunity in this Local Plan period, and to an agreed timescale. This, and the subsequent River Clun Catchment SPD will give the necessary certainty that the SAC can be protected from the adverse effects of development and will provide clarity and certainty for applicants on how to meet the requirements of this policy. The River Clun Catchment SPD will also include a nutrient calculator. This will enable applicants to assess the amount of nutrients currently entering the river Clun SAC from their site and compare this with those projected to arise once development has taken place. Where development would increase nutrient levels, applicants will then be able to determine the most appropriate mitigation measures for achieving nutrient neutrality or a reduction in nutrient levels.</u>	Clarification	Shropshire Council A0349
MM108	Page 113	Policy DP14 Paragraph 3	For significant new development, including the <u>site allocations and</u> strategic sites and the settlements identified in Policies S1-204, green infrastructure should be an integral part of a masterplan showing good quality and appropriate on-site provision which:	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM109	Page 113	Policy DP14 Paragraph 5	Development proposals that result in a significant fragmentation or loss to the green infrastructure network will be resisted. In such instances <u>where significant fragmentation or loss does occur</u> mitigation and compensatory measures will be expected with the aim of delivering a net gain in provision.	Clarification	Shropshire Council
MM110	Page 114	Policy DP14 Explanation Paragraph 4.138	Infrastructure is a term typically applied to things like roads, sewers and telecommunications, which are necessary to support our way of life. The term "green infrastructure" has been introduced to raise the profile of other things considered necessary to support our way of life, especially one that is sustainable, healthy and enjoyable. As such, green infrastructure (GI) refers to the network of natural and semi natural spaces and includes parks, playing fields, woodlands, allotments and street trees. These spaces can be in the urban and rural areas and also include 'blue infrastructure' such as ponds, streams and rivers. In Shropshire, green infrastructure also encompasses the environmental and ecological networks. <u>Although playing fields can form part of the GI network, they are covered by Policy DP15, rather than this policy.</u>	Clarification	Shropshire Council A0124
MM111	Page 125	Policy DP18 Paragraph 11	Planning decisions should take wider security and defence requirements into account. Development proposals, <u>in particular those</u> within a designated Ministry of Defence Safeguarding Zone, must ensure that they have no adverse effect on an operational defence site <u>or activities.</u>	Clarification	Shropshire Council A0600

MM112	Page 126	Policy DP18 Explanation Paragraph 4.172	Potentially noisy developments will be expected to be accompanied by an appropriate noise assessment. Developers will be required to demonstrate the potential impact of proposals on the environment and on residential amenity and the ability to mitigate to an acceptable level. An appropriate noise assessment will also be needed where new development would be sensitive to existing noise sources. This should consider noise arising from all sources. The Ministry of Defence should be consulted where the existing noise source is related to defence activities. <u>Where relevant, sales information for new dwellings should specify that military aircraft may be seen and heard operating in the area and aircraft may overfly the site.</u>	Clarification	Shropshire Council A0600
MM113	Page 126	Policy DP18 Explanation Paragraph 4.176	Planning decisions should take public safety, security and defence requirements into account. Wider public safety issues are covered in Policy SP6, but Shropshire contains has a number of military establishments <u>and the whole of the County is covered by Low Flying Area 9, a dedicated training area for military helicopters.</u> where the Ministry of Defence (MOD) have designated a <u>There are also defence sites in Shropshire for which statutory safeguarding zones have been designated in accordance with Town and Country Planning (Safeguard aerodromes, technical sites and military explosives storage areas) Direction 2002.</u> Development <u>close to MOD sites and development within</u> these <u>safeguarding</u> zones has the potential to affect defence activities and the MOD should be consulted on all applications affecting these areas. Permission will not be granted where adverse effects on operational defence sites cannot be avoided.	Clarification	Shropshire Council A0600
MM114	Page 127	Policy DP19 Paragraph 1	Development proposals which would lead to deterioration <u>in class under the Water Framework Directive (WFD)</u> or compromise the ability of those water bodies covered by the WFD (Water Framework Directive) to <u>maintain or</u> meet good status standards, both during construction and when operational, will not be supported.	Clarification	Shropshire Council A0347
MM115	Page 128	Policy DP19 Explanation Paragraph 4.178	Water is an important and essential resource that needs to be managed in a sustainable way, so that it may continue to support Shropshire's homes, farms, industry, recreation and biodiversity. The mains supply provides most of Shropshire's drinking water, but private water supplies are a significant feature of some remoter rural areas. These private supplies are sourced from ground water and surface water <u>and should be taken into account, particularly in relation to non-mains foul drainage.</u> Surface and ground water are important to people and the wider natural environment, so their use needs to be sustainable, sources need to be safeguarded from pollution and over-abstraction and development needs to avoid contamination or obstruction.	Clarification	Shropshire Council A0347
MM116	Page 130	Policy DP21 Paragraph 2 (a)	The Sequential Test is not needed for: a. Development on land allocated in this plan unless the <u>proposed</u> use of the site <u>has either a greater vulnerability than the allocated use</u> or is not in accordance with the use specified in this Plan.	Correct an omission	Shropshire Council A0347 A0608
MM117	Page 131	Policy DP21 Paragraph 7	Where development in Flood Zones 3a and 3b is permitted it should be designed and constructed to remain operational and safe in times of flood <u>and where possible, to reduce flood risk or provide a betterment.</u> Development permitted in Flood Zone 3b should also be designed and constructed so that it does not: a. Impede water flows; and/or b. Increase flood risk elsewhere; and/or c. Result in a net loss of floodplain storage.	Clarification	Shropshire Council A0347
MM118	Page 133	Policy DP21 Explanation Paragraph 4.191	The Sequential Test is applied at all stages in the planning application process, both between different flood zones, and within a flood zone, <u>and within a site so that areas at least risk of flooding are preferentially developed.</u> All opportunities to locate new developments (except Water Compatible) in reasonably available areas of little or no flood risk should be explored, prior to any decision to locate them in areas of higher risk.	Clarification	Shropshire Council A0347
MM119	Page 133	Policy DP21 Explanation Paragraph 4.193	This policy sets out when a site-specific Flood Risk Assessment (FRA) is needed to inform a planning proposal. In considering the safety of the development, the FRA must demonstrate the occupants of any new dwellings will have access to an area of safe refuge. Where prior evacuation is the safest option, the refuge should be an area outside of 1% annual exceedance probability flood event from all sources. Where prior evacuation is not preferred, internal safe refuge must be provided. The FRA should <u>follow the guidance in the Flood and Coastal Erosion section of the NPPG and</u> provide an evidence base for the Council to determine which option is the safest for that particular proposal.	Responds to Planning Inspectors Interim Findings	Shropshire Council A0347 Responds to Planning Inspectors Interim Findings
MM120	Page 133	Policy DP21 Explanation Paragraph 4.194	The effects of flooding are expected to worsen with climate change and this needs to be taken into account when considering development. The Environment Agency has produced guidance on the allowances for climate change for each river basin district, <u>which are regularly updated.</u> Shropshire falls within the Severn river basin district. Depending on the vulnerability of development proposed, and the flood risk classification, different allowances should be taken into account as set out in the Shropshire SFRA-1, <u>and any updates from the Environment Agency.</u>	Responds to Planning Inspectors Interim Findings	Shropshire Council A0347 Responds to Planning Inspectors Interim Findings
MM121	Page 134	Policy DP22 Paragraph 6	All development must avoid increasing flood risk elsewhere. Runoff from the site post development must not exceed pre-development rates for all storm events up to and including the 1% Annual Exceedance Probability (AEP)1 storm event with an allowance for climate change. The appropriate climate change allowances <u>for peak rainfall</u> should be defined using relevant Environment Agency guidance.	Clarification	Shropshire Council A0347

MM122	Page 135	Policy DP22 Explanation Paragraph 4.199	Schemes for SuDS need to avoid causing contamination of watercourses and groundwater. Soakaways in contaminated land will not be appropriate. Infiltration SuDS techniques should: only dispose of clean roof water into clean, uncontaminated ground; not be used for foul discharges or trade effluent; and may not be suitable within are not appropriate within either Source Protection Zone 1 (inner zone) or Source Protection Zone 2 (outer zone) of groundwater sources such as wells, boreholes and springs used for public drinking water supply, as defined by the Environment Agency (see also Policy DP19).	Clarification	Statement of Common Ground with Severn Trent Water
MM123	Page 139	Policy DP24 Paragraph 3	Where major development is permitted in the Shropshire Hills AONB, mitigation and compensation measures to offset any residual environmental, landscape or recreational impacts will be required in line with policies DP12, DP14, DP15, DP16, DP17, DP18, DP19, and DP22 and DP23 . These measures should be compatible with the conservation of the designated area and the priorities set out in Shropshire Hills AONB Management Plan and must be demonstrably capable of being implemented to ensure that harm is minimised.	Clarification	Shropshire Council A0348
MM124	Page 142	Policy DP25 Explanation Paragraph 4.224	The Shropshire Place Plans are documents which bring together a range of information about a defined area, including the identified infrastructure needs of settlements and their relative priority. They are developed in collaboration with local parish and town council and infrastructure providers. They include a focus on local needs such as highways, flood defences, educational facilities, medical facilities, emergency service facilities , sporting and recreational facilities and open spaces. The Shropshire Local Infrastructure Strategic Infrastructure and Investment Local Infrastructure Plan provides a composite of the needs identified in the Place Plans with a focus on the highest priority issues, including those critical needs necessary to ensure development can happen.	Responds to Planning Inspectors Interim Findings	Shropshire Council A0113 Responds to Planning Inspectors Interim Findings
MM125	Pages 142-143	Policy DP25 Explanation Paragraph 4.225	Since 2012 the Council has operated a Community Infrastructure Levy (CIL) on new market housing development. The rates imposed on liable new development are captured in the adopted CIL Charging Schedule which applies two rates for the County: urban and rural. These rates can only be changed through a formal review of the CIL Charging Schedule. A key benefit of CIL is that funding from several developments can be pooled to support the delivery of a single piece of infrastructure in recognition of the cumulative impact of development. However, in the first instance it is expected that the use of CIL funds will be used to meet the needs of new development and should not be used to remediate any existing infrastructure constraints, except where these are exacerbated by the new development. It should be noted that consistent with the national CIL Regulations (as amended), CIL funds may be passed to bodies outside the area to deliver infrastructure that will benefit the development of the area.	Clarification	Shropshire Council A0662
MM126	Page 143	Policy DP25 Explanation Paragraph 4.227	In some cases it is likely that the CIL derived from a development will be insufficient to meet the specific infrastructure needs of that proposal. In these instances the Council will consider applying additional Section 106 contributions to development where these are necessary to make the development acceptable in planning terms; are directly related to the development; and are fairly and reasonably related in scale and kind to the development. It is expected this is generally only likely to be necessary on larger proposals of over 50 dwellings (this of course excludes the circumstances where Section 106 contributions are required for provision of affordable housing, which is separate to the CIL process) . Where this is considered necessary, consideration will be given to the viability of the proposal.	Clarification	Shropshire Council A0347
MM127	Page 144	Policy DP26 Paragraph 2.(i)	Hydropower applications should pay attention to fish stocks, migratory fish impact and normally be accompanied by a Flood Risk Assessment (see also Policy DP21), a Water Framework Directive Assessment, and geomorphological assessment;	Clarification	Shropshire Council A0347
MM128	Page 144	Policy DP26 Paragraph 2 (j)	Biomass, energy from waste, biogas and anaerobic digestion proposals should also address the impact on vibration, odour, bio-aerosols and dust (the latter for biomass and energy from waste only). Opportunities to recover heat and power are encouraged in accordance with Policy SP3; and	Clarification	Shropshire Council A0347
MM129	Page 146	Policy DP26 Explanation Paragraph 4.236	The National Planning Policy Framework (February 2019) states that applications for new wind energy development involving one or more turbines should not be considered acceptable unless they are in an area identified as suitable for wind energy development in the development plan (this can be either the Local Plan or a Neighbourhood Plan). This Local Plan does not identify such areas, but Neighbourhood Plans are encouraged to do so. Where one or more wind turbines are proposed in an area identified within a Neighbourhood Plan, consistent with the National Planning Practice Guidance on Renewable and Low Carbon Energy, risks to safety must be assessed and appropriately mitigated.	Clarification	Shropshire Council A0600
MM130	Page 147	Policy DP27 Paragraph 1	Shropshire businesses and communities require quality broadband provision and mobile network connectivity to support economic growth, service delivery , social inclusion, and community safety and individual health, well-being and quality of life.	Clarification	Shropshire Council
MM131	Page 148	Policy DP27 Explanation Paragraph 4.237	Delivering high quality, digital infrastructure that meets the needs of businesses and communities is a key priority within Shropshire's Economic Growth Strategy. This recognises that the provision of the best available digital connectivity is also an essential utility for businesses, and communities and individuals . The intention is to ensure that mobile connectivity and broadband provision across Shropshire meets the needs of employers, service providers and residents, supports how they choose to work, operate and live and will enable them to lower the 'carbon footprint' of their business operation or lifestyle.	Clarification	Shropshire Council
MM132	Page 148	Policy DP27 Explanation Paragraph 4.239	The provision of new digital infrastructure and gigabit-capable access will support agile working, a reduction in commuting and the growth of smart home technology to enable businesses, and communities and individuals to contribute towards a cleaner and healthier environment and a reduction of their 'carbon footprint'.	Correction	Shropshire Council

MM142	Page 155	Policy DP29 Explanation Paragraph 4.264	4.264. Non-mineral development which is exempt from the requirements of this Policy comprises: a. Applications for householder development; b. Applications for alterations and extensions to existing buildings and for change of use of existing development, unless intensifying activity on site; c. Applications that are in accordance with the development plan and site allocations where the assessment of site options took account of potential mineral sterilisation and determined that prior extraction was not required; dc. Applications for advertisement consent; ed. Applications for Reserved Matters, including subsequent applications after Outline consent has been granted; fe. Prior notifications (telecoms, forestry, agriculture, demolition); gf. Certificates of Lawfulness of Existing Use or Development (CLEUD) and Certificates of Lawfulness of Proposed Use or Development (CLOPUD); hg. Applications for works to trees; ih. Applications for temporary planning permission; ji. Development types already specified in the Local Development Plan as exempt from the need for consideration on safeguarding grounds; and kj. Applications for development of national, regional or local significance which outweighs the value of the mineral.	Responds to Minerals & Waste Hearing Session	Hearing (Q49)
MM143	Page 156	Policy DP30 Paragraph 1	1. The supply of sand and gravel during the Plan period should be provided in the first instance from existing permitted sites and then from the development of mineral working at the saved SAMDev Plan mineral allocations identified within Appendix 2 of this document and identified on the Proposals Map.	Responds to Minerals & Waste Hearing Session	Hearing (Q42)
MM144	Page 156	Policy DP30 Paragraph 2	2.1. Consistent with the requirements of Policy SP16, P proposals for mineral working <u>that falling outside the allocated areas will be considered positively where they complement existing permitted reserves and the saved SAMDev Plan mineral allocations, and where they will be permitted where developers can demonstrate that:</u> a. The proposal would meet an unmet need or would prevent the sterilisation of the resource; and, b. The proposal would not prejudice the development of <u>permitted sites or the saved SAMDev Plan mineral allocations; and</u> <u>c. The proposal supports the comprehensive working of the site</u> the allocated sites; or ed. Significant environmental benefits would be obtained as a result of the exchange or surrender of existing permissions or the site might be significantly more acceptable overall than the allocated sites <u>saved SAMDev Plan mineral allocations</u> allocated sites, and would offer significant environmental benefits.	Responds to Minerals & Waste Hearing Session	Hearing (Q42)
MM145	Page 156	Policy DP30 Explanation Paragraph 4.266	National policy guidance requires Shropshire to maintain an adequate and steady supply of sand and gravel during the Plan period, taking account of the existing production guideline established by the West Midlands Aggregate Working Party. The latest approved Local Aggregates Assessment (2019) indicates that, at 0.71mt, sand and gravel production in Shropshire and Telford & Wrekin in 2018 is slightly above both the 10 year rolling average for sand gravel sales (0.68mt) and the same as the 3 year average (0.71mt). The landbank of permissions for sand and gravel working has remained consistently above the minimum level required by NPPF. The permitted landbank was equivalent just over 16 years' production in 2018. The LAA also notes that record levels of housing delivery in 2017 and 2018 mean that annual demand for construction aggregates is not expected to increase demand above the level experienced in those years. <u>Unmet need is that which is unforeseen, exceeds the forecasted production figures and cannot be satisfied from existing sand and gravel sites.</u>	Responds to Minerals & Waste Hearing Session	Hearing (Q43)
MM146	Page 156	Policy DP30 Explanation Paragraph 4.268	The majority of the material produced is currently used locally within Shropshire to supply the construction industry with building sand, concrete and concrete products. In 2018 there were 10 permitted sand and gravel sites in the Plan area, 6 of which were operational. <u>In May 2023, an additional sand and gravel site was operational in Shropshire. Further information on existing permitted quarries in Shropshire, including those for sand and gravel, can be found in Appendix 8 of the Local Plan.</u>	Responds to ID34	Responds to ID34

MM170	Page 202	Policy S7.1 Paragraph 3	Residential development will be delivered through the saved allocations comprising greenfield and brownfield sites shown in Appendix 2 and on the Policies Map. These sites will deliver around 325 dwellings along with current commitments. The residential allocations comprise two groups on Watling Street to the west of the town. To the north <u>end of Watling Street</u> are two sites located at Greenfield Road (CRAV003 and CRAV009). To the south <u>end of Watling Street</u> are three sites extending from Watling Street to Clun Road (CRAV004, CRAV010 and CRAV024). The saved allocations also include land at Newington Farmstead (CRAV030) for key worker accommodation for the proposed new abattoir.	Clarification	Shropshire Council
MM171	Page 207	Policy S8.1 Schedule S8.1(i) Site ELL005 & ELL008 & ELL033 3rd paragraph	Any necessary improvements to the local and strategic road network will be undertaken, informed by consultation with Highways England and an appropriate Transport Assessment (including consideration of cumulative impact).	Clarification	Shropshire Council A0482
MM172	Page 211	Policy S9.1 Schedule S9.1(i) Site HNN016 3rd paragraph	<u>Any planning application will be accompanied by a heritage assessment. This will inform the S</u> site design and layout <u>which</u> will reflect and respect the site's heritage and heritage assets within the wider area, including Grade II listed Hazelwell's Farm House	Clarification	Shropshire Council A0348
MM173	Page 212	Policy S9.1 Schedule S9.1(i) Site HNN016 5th paragraph	A pedestrian crossing of Bridgnorth Road should be provided at an appropriate location in proximity of the site. The public right of way through the site should be retained and enhanced. <u>All necessary highway improvements will be undertaken, informed by an appropriate Transport Assessment.</u>	Clarification	Shropshire Council A0101
MM174	Page 214	Policy S10.1 Paragraph 3	Ludlow will contribute to the strategic growth objectives in the south of the County to deliver around 1,000 dwellings and around 11ha of employment land <u>development</u> . New housing and employment will make provision for the needs of the town and surrounding hinterland, including attracting inward investment and allowing existing businesses to expand. Development of site allocations will be in accordance with the development guidelines and approximate site provision figures and all relevant policies of this Local Plan.	Correction	Shropshire Council
Page 192 MM175	Page 214	Policy S10.1 Paragraph 4	New residential development will primarily be delivered through the saved SAMDev mixed use and residential allocations in Appendix 2 and Local Plan residential allocations in Schedule S10.1(i). This will be complemented by appropriate windfall residential development within the Ludlow development boundary shown on the Policies Map, where it is consistent with relevant policies of this Local Plan. New residential development will also be delivered on appropriate cross-subsidy and exception development sites , where it <u>this</u> is consistent with relevant policies of this Local Plan.	Correction	Shropshire Council
MM176	Page 215	Policy S10.1 Schedule S10.1(i) Site LUD056 2nd paragraph	Any necessary improvements to the local and strategic road network will be undertaken, informed by consultation with Highways England and an appropriate Transport Assessment (including consideration of cumulative impact).	Clarification	Shropshire Council A0482
MM177	Page 216	Policy S10.1 Schedule S10.1(ii) Site LUD052 4th paragraph	Any other necessary improvements to the local and strategic road network will also be undertaken, informed by consultation with Highways England and an appropriate Transport Assessment (including consideration of cumulative impact). Landscaping and open space to protect trees (west and south-east) with buffering and additional structural planting. Site design to allow passage, foraging and habitat for species and improve green infrastructure around the town. Structural planting to screen buildings from distant views and reduce impacts of development on the landscape.	Clarification – Division of guideline into two separate points.	Shropshire Council A0482
MM178	Page 216	Policy S10.1 Schedule S10.1(ii) Site LUD052 6th paragraph	A proportionate Heritage Impact Assessment (HIA) will be needed to consider cumulative impacts on the significance of the heritage assets in the historic town (west) including their settings, and the significance of the scheduled monument Caynham Camp (east), including its setting. The findings of the HIA should be taken into account in the design of the development <u>and should pay particular attention to building height, layout and materials</u>	Clarification	Shropshire Council A0348
MM179	Page 217	Policy S10.1 Schedule S10.1(ii) Site LUD052 8th paragraph	The development should consider the relative isolation of this larger proposed employment area from services in Ludlow and the effect of the A49 on access to facilities at the Sheet Road/Foldgate Lane services. Improved access over the A49 or some limited <u>'ancillary'</u> service provision in the development should be considered to serve the employment uses.	Clarification	Shropshire Council
MM180	Page 220	Policy S10.2 Schedule S10.2(i) Site BUR002 New paragraph at end of site guidelines	<u>The designation of Burford and the scale of the proposed housing development reflects the additional service provision in the adjacent town of Tenbury. Consequently, where development in Burford is required to make a contribution towards sustaining key local services, this might also include services located in Tenbury.</u>	Clarification	Shropshire Council A0656
MM181	Page 220	Policy S10.2 Schedule S10.2(i) Site BUR004 5th paragraph	Open space to the north west will contain an area of potential ground contamination requiring further investigation (north-west) , <u>this area will</u> provide amenity and recreation uses and provide access to the route of the Tenbury – Bewdley Railway as a Green Infrastructure corridor.	Correction to remove repeat and clarification of text	Shropshire Council

MM184	Page 223	Policy S10.4 Explanation Paragraph 5.143	Clee Hill is the other Community Hub in the Ludlow Place Plan Area and was first identified as a Community Hub in the SAMDev Plan (2015). The village lies in the uplands of the Shropshire Hills Area of Outstanding Natural Beauty (AONB) on the moors below the heights of Titterstone Clee Hill (533 metres / 1,749 feet) where it provides a key link south to Worcestershire and Herefordshire. The highest and most sensitive design standards will be sought for all forms of new development in Clee Hill to minimise any adverse effects on the environment, landscape and recreational opportunities in the AONB in line with Policies DP12, DP14, DP15, DP16, and DP17 <u>and DP24</u> . Guidance on how new development can conserve and enhance the distinctive characteristics of the town and its surroundings is provided in the AONB Management Plan.	Correction	Shropshire Council
MM185	Page 225	Policy S11.1 Paragraph 3	3. The relocation of Market Drayton Sports facilities from its current site on Greenfields Lane to land at Longford Turning, identified on the Policies Map, to enable the delivery of new facilities to at least equitable standard, <u>quantity and quality</u> , is a central objective of the Strategy. Housing development (MDR39 and MDR43) has been identified specifically to support and enable the delivery of the relocation through the provision of an appropriate vehicular access into the site. Should the relocation of the sports facilities to land at Longford Turning prove to be unviable, appropriate consideration will be given to alternative sites on land adjoining the A53 to deliver the proposed relocation, where this meets the requirements of other relevant policies of the Local Plan, and would offer a viable opportunity to support effective pedestrian and cycling movements with the rest of the town. In this scenario the Council will positively consider the release of further land for residential development outside the defined development boundary where this can be clearly shown to provide cross-subsidy support for the proposed relocation.	Clarification	Shropshire Council A0124
MM186	Page 226	Policy S11.1 Schedule S11.1(i) Site MDR012 2nd paragraph	Pedestrian and cycle links will be enhanced or provided through the site and linking into the town and to the <u>existing canal towpath and</u> proposed marina in order to improve the site's overall sustainability.	Clarification	Shropshire Council A0378 A0402

Clarification	Shropshire Council A0482
MM192	Page 245	Policy S14.1 Explanation Paragraph 5.192	Due to the limitations surrounding Oswestry for development, no housing allocations have been made in the town as part of this Local Plan Review. Oswestry's housing requirement is therefore allocated in Park Hall to the north-east. It is acknowledged that Oswestry has a strong need for affordable and specialist dwelling types, and therefore suitable sites are encouraged for affordable exception and cross-subsidy schemes to help meet the unmet need, rather than assign very small housing allocations. Further growth of the town is therefore expected to come through appropriate windfall sites in addition to previously adopted allocations. <u>The need for a comprehensive approach to the development of the Park Hall allocations, across the different land parcels and ownerships, will ensure that appropriate vehicular and pedestrian access links are made between each land parcel and identify appropriate phasing, and that appropriate flood alleviation schemes are developed from the outset and not in a piecemeal manner.</u>	Clarification	Shropshire Council

Clarification	Shropshire Council A0482
MM227	Page 276	Policy S16.1 Schedule S16.1(ii) Site SHR166 7th paragraph	A heritage assessment will be required to inform the site's layout and massing, and the site must be read within the context of its <u>location within the settings of a number of designated heritage assets on</u> Haughmond Hill, including <u>and Queen Eleanor's Bower ringwork, both Scheduled Monuments. A masterplan should be prepared to guide the design of development, including building height and materials, based on the outcome of this heritage assessment.</u> The heritage assessment will also address any impact on non-designated archaeology potentially on site. <u>Any loss of, or harm to, non-designated archaeological features will be mitigated by a comprehensive excavation of the site prior to the commencement of development, the results of which should be made publicly accessible.</u>	Clarification	Shropshire Council A0348
Page 1926 MM228	Page 278	Policy S16.1 Explanation Paragraph 5.225	The strategy also reflects the potential development opportunities presented by the delivery of the North West Relief Road (NWRR). The NWRR is proposed to deliver a new single carriageway road linking the northern and western parts of the town between the Ellesmere Road and Churncote roundabouts. The NWRR will be subject to a planning application in 2021, and whilst the Local Plan does not pre-determine the outcome of these considerations, it is appropriate for the NWRR to provide important context regarding the delivery of development given the extent of the plan period to 2038. Of most direct consequence, development allocated at Ellesmere Road (SHR173) will only commence when the NWRR is operational, in light of the direct traffic mitigation the proposed NWRR is forecast to achieve as a result of the reduction in cross town movements. Policy S16 also identifies the potential for additional windfall commercial development between the development boundary and the NWRR once constructed, where an appropriate access can be achieved. In looking at commercial windfall opportunities in this area particular regard will be had to the objectives of relevant Whole Estate Plans where they have been endorsed by the Council as a material planning consideration in line with Policy SP15. It is also recognised given the role of the town as a strategic centre, there may be other commercial opportunities arising during the lifetime of the Plan on land not allocated for this purpose. In these circumstances the Plan supports commercial windfall development where this is in line with Policy <u>ies SP12 and SP13.</u>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM229	Page 279	Policy S16.2 Paragraph 6	Mitigation measures will be required to remove any adverse effect from increased recreational pressure arising from development in Bayston Hill and Cross Houses on the Bomere and Shomere Pools Ramsar site and for Cross Houses on the Berrington Pool Ramsar site in accordance with Policies PD12, DP14 and DP15. Mitigation measures will be required to remove any adverse effect from increased recreational pressure arising from development in Baschurch on the Cole Mere Ramsar site in accordance with Policies DP12, DP14 and DP15 and for water quality and quantity on the Fenemere Ramsar site. Mitigation measures will be required to remove any adverse effect from increased recreational pressure arising from development in Hanwood and Longden on Stiperstones and Hollies SAC in accordance with Policies DP12, DP14 and DP15. Mitigation measures for recreational and water quality and quantity impacts are identified in the Plan Habitat Regulations Assessment (HRA) and supporting documents.	Clarification	Shropshire Council
MM230	Page 276	Policy S16.2 Schedule S16.2(i) Site BAY039 1st paragraph	The development will incorporate an appropriate access and make any necessary improvements to the local and strategic road network, informed by consultation with Highways England and an appropriate Transport Assessment (including consideration of cumulative impact). MM241	Page 303	Policy S19 Paragraph 3 (h)	Acoustic design, layout and appropriate building materials (including where necessary appropriate glazing, ventilation and acoustic barriers) will be used to appropriately manage <u>the impact of</u> noise arising from the adjacent airfield and nearby roads <u>on residents and other users of the site.</u>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM242	Page 303	Policy S19 Paragraph 3 (j)	Any contaminated land on the site will be appropriately <u>remediated and</u> managed.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM243	Page 303	Policy S19 Paragraph 3 (k)	The nearby River Tern and RAF Tern Hill Local Wildlife Sites will be appropriately buffered. Ancient woodland and priority habitats on the site will be retained and an appropriately buffered. A sustainable juxtaposition will be created between <u>the</u> built form and trees <u>and hedgerows.</u>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM244	Page 303	Policy S19 Paragraph 3 (m)	The site will incorporate appropriate sustainable drainage, informed by a sustainable drainage strategy. Any residual surface water flood risk will be managed by excluding development from the affected areas of the site, which will <u>then</u> form part of the Green Infrastructure network. Development will also be excluded from the small portions of the site located in Flood Zones 2 and/or 3. Flood and water management measures must not displace water elsewhere.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
Page 128 MM245	Page 303	Policy S19 Explanation New Paragraphs between existing paragraphs 6.5 and 6.6	<p><u>Clive Barracks, Tern Hill will be the subject of a comprehensive mixed-use redevelopment to provide a range of local services and facilities, around 750 dwellings, around 6ha of employment land and extensive open space and green infrastructure. It is important that this mix of uses is achieved in order to create a sustainable and thriving new settlement. Paragraphs 3a-3d of this policy provide further detail on this mix of uses and document specific requirements for each; Paragraphs 3e-3m then address other key requirements of the development. These requirements are consistent with and intended to be read and applied alongside the requirements of the other policies of the Local Plan.</u></p> <p><u>Paragraph 3a of this policy addresses housing, which will represent a significant component of the development of the site. It specifies that the quantity, quality of design, mix and layout of housing must respond to the site and the constraints and opportunities that it presents – many of which are drawn out within the subsequent site guidelines. In so doing, regard must be given to the requirements of other relevant policies within the Local Plan, including SP3, SP5-SP7, DP1-DP3, DP11, DP12, DP14-DP23, DP25, DP27 and DP28. (plus the new policy on meeting the housing needs of older people and those with disabilities and special needs).</u></p> <p><u>Paragraph 3a also requires new housing provision on the site to respond to identified local needs, recognising that one of the primary reasons that Shropshire Council seeks to facilitate appropriate new housing development is to meet the diverse housing needs of our communities. This requirement is consistent with and complementary to the requirements of other Local Plan policies, including Policies SP5-SP7 and DP1-DP3. (plus the new policy on meeting the housing needs of older people and those with disabilities and special needs).</u></p> <p><u>Paragraph 3b of this policy addresses employment, which also represents an intrinsic element of the future development of the site. Paragraph 3b specifies that the delivery of employment will occur alongside the housing development. The phasing will be agreed through the Phasing Strategy during the masterplanning stage and subsequent planning application process.</u></p> <p><u>Paragraph 3b also requires the employment provision on the new Strategic Settlement to be of an appropriate quantity and quality to contribute towards the objectives of the Shropshire Economic Growth Strategy. Paragraph 2 of the policy specifies the quantity of employment land required, specifically around 6ha. With regard to the appropriate quality of employment development, this is defined within relevant policies of the Local Plan, including SP3, SP5, SP6, SP13, SP14, DP11, DP12, DP14-DP23, DP25, DP27 and DP28.</u></p> <p><u>Recognising the need for flexibility to respond to arising opportunities and changing markets; the lead-in period prior to the development of the Clive Barracks, Tern Hill, Strategic Settlement; and the period of time over which this development will occur, the policy provides a level of flexibility about the specific forms of employment to be provided. However, to reiterate, the employment provision will be expected to contribute towards the objectives of the Shropshire Economic Growth Strategy and will also comply with the requirements of the wider policies of the Local Plan, including Policies SP13-SP14.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM246	Page 303	Policy S19 Explanation New Paragraphs between existing paragraphs 6.5 and 6.6 (continued)	<p><u>Paragraph 3c of this policy addresses the new local centre, which will provide a focal point for the new and nearby communities. This local centre will include an appropriate range of commercial uses (likely to include a family pub plus convenience store and a small number of modest retail units) to serve the new settlement's community on land fronting the A41. The specific range of facilities will be determined through the masterplanning and subsequent planning application process. However, it will be sufficient to ensure that the future occupiers benefit from access to a range of local facilities.</u></p> <p><u>Furthermore, as specified within Paragraph 3c, the delivery of the local centre will occur alongside and directly linked to the housing development. Specific phasing will be agreed during the masterplanning and subsequent planning application process, however it will be important for these facilities to be available early in the development process.</u></p> <p><u>Paragraph 3d of this policy addresses green infrastructure and open space. The policy requires green infrastructure provision and open space provision to be of an appropriate quantity and quality. An appropriate quantity and quality of green infrastructure and open space will be responsive to the site and its specific constraints and opportunities, informed by the masterplanning process. It will also be consistent with the requirements of other relevant policies within the Local Plan, including Policies SP3, and DP14-DP17.</u></p> <p><u>Paragraph 3e of this policy addresses primary school provision, which is necessary to meet the future needs of the sites occupiers and also provides an opportunity to enhance provision to the communities in the wider area. This policy specifically requires the provision of 1ha of land for the provision of a primary school on the site. The formation of this new primary school will be funded via developer contributions consistent with Policy DP25 of the Local Plan and potentially complemented by any other identified relevant funding sources. Developer contributions may also be required for other education provision. However, this will be determined through the future masterplanning and planning application process.</u></p> <p><u>It is understood that there is currently no requirement for the provision of new healthcare facilities within the site. Should this position change, consideration will be given to the provision of facilities through the masterplanning process and at the planning application stage.</u></p> <p><u>Paragraph 3f of this policy addresses highway matters. It requires development of the Strategic Settlement to be accompanied by any necessary improvements in order to achieve appropriate access points into both the eastern and western portions of the site (which is sub-divided by the A41) and any necessary improvements to the local and strategic road network. One particular improvement that will be required to the strategic road network is an upgrade to the A41/A53 Tern Hill roundabout. Improvements to highway infrastructure will be informed by and positively respond to an appropriate transport assessment Local Plan Policy DP28 provides guidance on what constitutes an appropriate transport assessment. In summary, this is an assessment which employs a methodology and reaches conclusions that are agreed by the Local Highway Authority and where relevant, National Highways.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM247	Page 303	Policy S19 Explanation New Paragraphs between existing paragraphs 6.5 and 6.6 (further continued)	<p><u>Paragraph 3f of this policy also requires an air quality assessment of the impact of increased vehicular movements from this development on Tern Hill roundabout. The scope and suitability of this assessment and any necessary mitigation resulting from its recommendations must be consistent with the requirements of Local Plan Policy DP18 and will be considered through the planning application process.</u></p> <p><u>Paragraphs 3h and 3i also both relate to pollution and public amenity matters. Specifically, Paragraph 3h relates to noise and Paragraph 3i relates to contaminated land.</u></p> <p><u>Noise is an important consideration on the Clive Barracks, Tern Hill, Strategic Settlement due to its location adjoining an active airfield and in proximity to both the A41 and A53. Paragraph 3h of this policy identifies a number of mechanisms that will be utilised to appropriately manage noise, these are acoustic design, layout and appropriate building materials (including where necessary appropriate glazing, ventilation and acoustic barriers). However, other mechanisms may be appropriate to complement those identified within the policy. The specific package of measures and their appropriateness will be informed by a noise assessment, which must be consistent with the requirements of Policy DP18 and will be considered during the planning application process.</u></p> <p><u>Contaminated land is also an important consideration on this site, given the past defence uses that have taken place. Paragraph 3j of this policy specifies that any contaminated land will be appropriately remediated and managed. The identification and appropriate remediation and management of contaminated land will be informed by an appropriate assessment, which must be consistent with the requirements of Policy DP18 and will be considered during the planning application process.</u></p> <p><u>Paragraph 3g of this policy relates to pedestrian and cycle infrastructure. The policy specifies that appropriate pedestrian and cycle links will be provided to and through the site, with particular links to the proposed primary school and local centre. Provision will also specifically include the enhancement of the underpass of the A41 in order to provide effective and attractive pedestrian and cycle link between the north-eastern and south-western components of the Strategic Settlement. These links must be consistent with the requirements of other relevant policies within the Local Plan, including Policies SP3, DP25 and DP28.</u></p> <p><u>Appropriate pedestrian and cycle links to and from the site will provide connectivity into the wider pedestrian and cycle network, allowing residents of the Strategic Settlement and those living in the surrounding area to walk and cycle between the Strategic Settlement and the surrounding area.</u></p> <p><u>Appropriate pedestrian and cycle link within the site will provide future residents (and those coming into the Strategic Settlement) with the opportunity to utilise these active modes of transport to access the local centre, employment provision, open space, and any other key locations within the Strategic Settlement.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM248	Page 303	Policy S19 Explanation New Paragraphs between existing paragraphs 6.5 and 6.6 (further continued 2)	<p><u>Paragraph 3i of this policy recognises the relationship between the Clive Barracks, Tern Hill, Strategic Settlement and the adjoining Airfield. It provides certainty that development of the Strategic Settlement will not impede the operation of the airfield and associated transmitter/receiver facilities. This will be informed by engagement with the MOD during the masterplanning and planning application process.</u></p> <p><u>The Clive Barracks, Tern Hill, Strategic Settlement contains and is in proximity to a wide range of natural environment assets. As specified within Paragraph 3k of this policy, it is important for these assets to be protected and appropriately buffered when development occurs. The protection and appropriate buffering of a natural environment asset must be responsive to the relevant asset and consistent with the requirements of other relevant Policies in this Local Plan, including Policies DP12 and DP14-DP16.</u></p> <p><u>Paragraph 3k also requires a sustainable juxtaposition between built form and trees and hedgerow to be created, which will be informed by the masterplanning and planning application process. In so doing, the development must be consistent with the requirements of other relevant Policies in this Local Plan, including Policies DP12 and DP14-DP16.</u></p> <p><u>Paragraph 3l of this policy requires the design and layout of new development to reflect and respect the sites heritage, heritage assets on the site and any relationship to heritage assets in the wider area. Other Local Plan policies also address the protection of our historic environment and the requirements of these policies must also be complied with, including Policy DP23.</u></p> <p><u>Paragraph 3m of this policy requires the development of the Clive Barracks, Tern Hill, Strategic Settlement to incorporate appropriate sustainable drainage. Appropriate sustainable drainage will be informed by a sustainable drainage strategy prepared for the site which is compliant with the requirements of other policies in the Local Plan, including Policy DP22.</u></p> <p><u>Paragraph 3m of this policy also specifies that new development will be excluded from areas where residual surface water flood risk remains and area located within flood zones 2 and/or 3. This requirement is consistent with and complementary to the requirements of Policy DP21 of the Local Plan.</u></p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM249	Page 304	Policy S20 Paragraph 2	The new settlement will be formed through a comprehensive mixed-use redevelopment of the site to provide a range of local services and facilities, around 1,000 dwellings, around 6ha of employment land and extensive green infrastructure. <u>600 of the dwellings on this site form part of the contribution to the unmet housing need forecast to arise in the Black Country.</u>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Clarification	Shropshire Council A0482
MM252	Page 307	Policy S21 Introduction	7. Strategic Site Policy 7.1. This section of the Local Plan contains the policy relating to the Strategic Site at RAF Cosford.	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM253	Pages 307-308	Policy S21	<p>S21. Strategic Site: RAF Cosford</p> <p>1. RAF Cosford will become a strategic site, complementing and enabling growth aspirations in the east of the County. Employment and training provision on this strategic site will facilitate the sustainable growth of the local economy and contribute to meeting the employment needs of nearby Albrighton.</p> <p>2. The strategic site consists of around 221ha of land, over half of which is previously developed. The site is inset in the Green Belt, in recognition of its existing and future operational areas and requirements. However, Green Belt is retained between Cosford and Albrighton to maintain a strategic gap, in recognition of their unique identities and characteristics and the operational requirements of the Strategic Site. The location and extent of the site is identified on the Policies Map.</p> <p>3. The strategic site will build upon its existing role as a centre of excellence for both UK and International Defence Training, host a specialist aviation academy, support opportunities to co-locate other Ministry of Defence units and activities, facilitate the intensification and expansion of the RAF Museum Cosford and allow the formation of a new headquarters for the Midland Air Ambulance Charity. These complementary uses will each benefit from their co-location and support the establishment of an internationally renowned facility.</p> <p>4. Development of the various elements of this site will be coordinated and complementary. This will be informed by the preparation of detailed masterplans for each element of the site, informed by proactive engagement, including with relevant landowners/occupiers of the wider Strategic Site; and will subsequently be adopted by Shropshire Council. These masterplans and any resultant development will comply with the following site guidelines:-</p> <p>a. Any new development required to support Ministry of Defence activities will through their design, layout and use of green infrastructure, complement the high quality character of the existing site.</p> <p>b. The element of the site identified on Figure S21.1 for the Midlands Air Ambulance Charity headquarters and its ancillary uses will be used only for this purpose. Development and use of this element of the site must not adversely impact on Ministry of Defence operations at RAF Cosford. The northern boundary of this component of the site will be subject to substantial appropriate boundary landscaping in order to create a defensible Green Belt boundary. The headquarters building and ancillary uses will be of high quality and sustainable design, creating a fitting home for this much valued charity.</p> <p>c. Any new development required to support the expansion of The RAF Museum Cosford will be of a high quality design and layout which will complement existing iconic museum buildings and the relationship with an operational airfield.</p> <p>d. Where development increases use of Cosford Railway Station, commensurate and viable improvements to the railway station, station cycle parking and station car parking will be provided to support sustainable travel to and from the development and the wider strategic site.</p> <p>e. Appropriate improvements to existing access points will be undertaken and any additional access points and vehicular links within the site will be appropriately designed and constructed.</p> <p>f. Any necessary improvements to the local and strategic road network will be undertaken, informed by consultation with Highways England and an appropriate Transport Assessment (including consideration of cumulative impact).</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

Main Modification Reference	Page Number	Policy / Paragraph (within the Submission Draft Shropshire Local Plan)	Modified text: deleted text shown as struck through additional text shown as <u>bold and underlined</u> and explanations provided within <i>Italics</i>	Reasons for Modification	Source(s) of Modification(s)
MM254	Pages 307-308	Policy S21 (continued)	<p>g. Appropriate pedestrian and cycle links will be provided through the site, taking into account that public access is restricted within parts of the site. This should include improvements to the existing links between the railway station, The RAF Museum Cosford and new Midlands Air Ambulance Charity headquarters. Consideration should also be given to opportunities for improvements to pedestrian and cycle links into Albrighton.</p> <p>h. Existing open space, sports and recreational buildings and land, including playing fields, will be maintained, unless an assessment concludes that it is clearly surplus to requirements or equivalent/better provision is made, in terms of quantity and quality in a suitable location.</p> <p>i. Appropriate green infrastructure provision will be made, including areas of public open space (taking into account that public access is restricted within parts of the site). Green infrastructure provision will incorporate and enhance the key green infrastructure corridors and networks within and in proximity of the site.</p> <p>j. Natural environment assets on and in proximity to the site, including mature trees, hedgerows and priority habitats will be retained and appropriately buffered. Appropriate provision will also be made for protected species, where relevant.</p> <p>k. The high quality design and layout of new development proposals will reflect and respect the site's heritage, heritage assets on the site and any relationship with heritage assets within the wider area. Listed and locally important buildings on the site will be sympathetically retained, enhanced/maintained and adaptively reused.</p> <p>l. Noise, odour and any contaminated land will be appropriately considered and if necessary mitigated.</p> <p>m. Any new development on the site will incorporate appropriate sustainable drainage, informed by a sustainable drainage strategy. Any residual surface water flood risk will be managed by excluding new development from the affected areas. New development will also be excluded from the very small portion of the site located in flood zones 2 and/or 3. Flood and water management measures must not displace water elsewhere.</p> <p>n. Opportunities to reinforce Green Belt boundaries, reduce and mitigate impacts on the Green Belt and enhance beneficial use of the Green Belt will be included as part of any new development proposals as set out in Green Belt Policy SP11. Compensatory provision to the Green Belt will include appropriate additional planting to improve visual amenity and biodiversity and creation of linkages to green infrastructure networks and corridors beyond the site.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
Page 1932 MM255	Pages 308-311	Policy S21 Explanation	<p>Explanation</p> <p>7.2. RAF Cosford is a military base and airfield located wholly in the Green Belt, to the north west of Albrighton. The site is also occupied by the Midlands Air Ambulance Charity, West Midlands Police and the renowned RAF Museum Cosford.</p> <p>7.3. RAF Cosford is currently a major part of the Defence College of Technical Training (DCTT). It is at the centre of the RAF's mission to deliver flexible, affordable, modern and effective technical training that meets the needs of the UK's Armed Forces now and into the future.</p> <p>7.4. The Ministry of Defence (MOD) is undertaking a 'Defence Optimisation Programme' the aim of which is to create a smaller and significantly better estate that effectively supports our armed forces, and their role in protecting the security, independence and interests of the UK at home and abroad.</p> <p>7.5. Within this review, as a result of its strategic location, existing built estate, the important role the site plays in defence training and its future potential, RAF Cosford has been designated a 'receiver site' and will have an important role to play in the future optimisation of the MOD estate.</p> <p>7.6. Cosford has since been referenced within the 'Better Defence Estate Strategy' as centre of excellence for both UK and International Defence Training. The document also refers to the relocation of 4 School of Technical Training from MOD St Athan to RAF Cosford.</p> <p>7.7. Furthermore, as part of its future strategy, the DCTT is reviewing capacity at RAF Cosford, linked to their aspiration to exploit opportunities for technical training consolidation. Whilst this work is ongoing, estimates from DCTT high level strategic estate planning indicate that over the next 10+ years RAF Cosford would see in the region of an additional 1,500 people (staff and student population), although this could potentially increase further dependant on the outcome of the ongoing work.</p> <p>7.8. Work is also being undertaken by the MOD to capture and consolidate information on the feasibility of other potential non-DCTT moves to RAF Cosford.</p> <p>7.9. To support these various activities, there will be a need to intensify the use of existing facilities and undertake new development to provide additional necessary facilities. This will likely include additional training facilities, technical accommodation and domestic accommodation.</p> <p>7.10. Plans to form a specialist aviation academy, called the Whittle Engineering Academy, at RAF Cosford have recently been announced by the Aviation Skills Partnership in collaboration with Midlands Engine, the RAF, Air Cadets and Telford College. This is a major initiative to address demand for trained entrants to the Aviation Industry across all jobs, roles and skills in accordance with the Government's Green Paper Aviation 2050: The Future of UK Aviation. It also further elevates the importance of this location for UK aviation and potentially creates hundreds of new jobs at the site.</p> <p>7.11. The RAF Museum Cosford is dedicated to the history of aviation and in particular the RAF. As such the museum provides an important record of our aviation and RAF history, whilst also representing a nationally significant visitor attraction. The RAF Museum Cosford also hosts the ever popular Cosford Air Show. The RAF Museum Cosford have announced ambitious plans for a £40 million investment programme over 10 years to intensify and expand the museum site.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings

MM256	Pages 308-311	Policy S21 Explanation (continued)	<p>7.12. The Midlands Air Ambulance Charity (MAAC) currently operates and funds three air ambulances covering six Midlands counties including Gloucestershire, Herefordshire, Shropshire, Staffordshire, Worcestershire and the West Midlands. The area is home to around 6 million people and since 1991, the Charity have undertaken over 50,000 missions, making them one of the busiest ambulance services in the UK.</p> <p>7.13. The charity responds to some of the most traumatic incidents including cardiac arrests, road traffic collisions and sports injuries. The aircraft reaches remote locations to attend to patients unreachable by land ambulance. The air ambulance is an essential and emergency public service.</p> <p>7.14. The MAAC require a new headquarters in order to combine two of their The MAAC requires a new headquarters to future proof the region's essential helicopter led emergency services and accommodate the projected 4% annual increase in demand for the service. The co-location of facilities at this new headquarters will enable the charity to optimise all aspects of its operations, including medical, training and charitable ancillary services.</p> <p>7.15. The new MAAC headquarters will act as the hub for operations, supplemented by a series of regional sites across the six Counties of Gloucestershire, Herefordshire, Shropshire, Staffordshire, the West Midlands and Worcestershire. When combined, the service network will maximize the efficiency of the charity and increase capacity via extended operating schedules. Alongside providing enhanced service provision, the new MAAC headquarters will support the sustainability of the charity, for example by increasing potential for community engagement and events, whilst providing a high-quality modern training facility and permanent office accommodation.</p> <p>7.16. The location identified for the new MAAC headquarters and associated facilities within the RAF Cosford Strategic Site is identified on Figure S21.1 below. This area is defined by Neachley Lane to the east, the railway line to the south, a wooded area to the west and runs through an agricultural field to the north. The Strategic Site guidelines require the establishment of an appropriate northern boundary for this element of the site.</p>	Responds to Planning Inspectors Interim Findings	Responds to Planning Inspectors Interim Findings
MM257 Page 1933	Page 315	Appendix 2 Paragraph A2.2	<p>Where a SAMDev Plan allocation is 'saved' it will continue to form part of the Local Plan for Shropshire. The 'saved' status applies to the site location, extent, development guidelines and approximate provision figures identified within the SAMDev Plan. <u>The location and extent of these sites is identified on the Policies Map, the development guidelines and approximate provision figures are summarised within the following table.</u></p>	Clarification - for clarity and convenience of all parties relevant aspects of the SAMDev Plan – specifically the development guidelines and approximate provision figures for all proposed 'saved' site allocations are provided.	Shropshire Council

Please Note: Within this track changes document, all Policy/Paragraph references are as within the Submission draft Shropshire Local Plan. However, within the Track Changes Version of the Draft Shropshire Local Plan, policy references will display as at the policy reference at the time of the proposed main modification. This is because policy references constitute hyperlinks to aid navigation of the draft Shropshire Local Plan.

Draft Shropshire Local Plan: Appendix 1: Sub-Schedule of Proposed Main Modifications

Page 1939

June 2023

Sub-Schedule Summarising Main Modifications (MM) 255 and 256							
Main Policy Reference	Site Allocation	Settlement	Place Plan	Type	Status	Development Guidelines	Provision
MD5: Sites for Sand and Gravel Working	Wood Lane North Extension	Rural	Ellesmere	Mineral	Saved	<p>Development subject to:</p> <p>1. The completion of a project-level Habitats Regulations Assessment (HRA) in accordance with Policy MD12. Particular regard should be paid to effects on water quality and to impacts arising from sedimentation, hydrological changes and dust on the Cole Mere Ramsar site and the White Mere Ramsar site. Permission will not be granted if adverse effects on the integrity of either site cannot be avoided or mitigated in line with Policy MD12;</p> <p>2. The effects of the development on hydrogeology and hydrology will be a key consideration requiring the submission of detailed measurements and analysis to give an accurate understanding of issues and allow the development of avoidance or mitigation measures;</p> <p>3. Further assessment and mitigation measures to adequately control adverse impacts on the natural environment including dust, sediment and pollution;</p> <p>4. further assessment and appropriate mitigation measures to address potential impacts on protected or priority habitats and species and ecological networks;</p> <p>5. a site restoration scheme which will be designed to deliver significant wildlife and recreation benefits, particularly in relation to the nearby Colemere Ramsar Site;</p> <p>6. further assessment and appropriate mitigation measures to address potential impacts on heritage assets since a there is a Scheduled monument and listed buildings within 700m;</p> <p>7. further consultation and appropriate mitigation measures to reflect the fact that the site is within an airfield safeguarding zone to address the potential safety impact of any plant structures and bird strike issues;</p>	<u>N/A</u>
MD5: Sites for Sand and Gravel Working	Gonsal Extension	Rural	Shrewsbury	Mineral	Saved	<p>Development subject to:</p> <p>1. the creation of a new access to the A49 which would deliver significant local transport benefits over current access arrangements;</p> <p>2. further assessment and appropriate mitigation measures to address potential impacts on residential amenity for properties along the site boundary and the edge of the village of Condover which would be in the prevailing wind (dust and noise issues would require mitigation);</p> <p>3. further assessment and appropriate mitigation measures to address potential impacts on protected or priority habitats and species and ecological networks;</p> <p>4. a site restoration scheme which will be designed to deliver significant wildlife and recreation benefits;</p> <p>5. further assessment and appropriate mitigation measures to address potential impacts on the setting of historic environment assets, including Condover Hall listed building and school (700m) and Condover registered park and garden (100m).</p>	<u>N/A</u>
MD5: Sites for Sand and Gravel Working	Morville Extension	Rural	Bridgnorth	Mineral	Saved	<p>Development subject to:</p> <p>1. further assessment and appropriate mitigation measures to address potential impacts on adjacent residential properties;</p> <p>2. measures to control any potential cumulative impacts associated with concurrent or sequential mineral extraction operations served by the same highway access;</p> <p>3. further assessment and appropriate mitigation measures to address potential impacts on protected or priority habitats and species and ecological networks;</p> <p>4. a site restoration scheme which will be designed to deliver significant wildlife benefits.</p>	<u>N/A</u>
S1: Albrighton	Land at White Acres (ALB003)	Albrighton	Albrighton	Residential	Saved	<p>Development to deliver housing that is capable of occupation by people of retirement age. A proportion of one and two-bed units is sought within the development. Development proposals should respect and enhance the character and significance of the Conservation Area and its setting, and provide an attractive pedestrian route between the High Street and Garridge Close. Vehicular access should accord with the 'Manual for Streets' concept of shared streets with very low vehicular speeds.</p>	<u>20 dwellings</u>
S1: Albrighton	Land east of Shaw Lane (ALB002)	Albrighton	Albrighton	Residential	Saved	<p>The provision of affordable housing as part of the development should have particular emphasis on intermediate affordable housing for local needs, assisting any innovative forms of community-led provision as appropriate. Amongst the market housing, a proportion of one or two bed units will be sought. Development proposals should help provide additional parking in the vicinity of Albrighton railway station. As part of the development, land will be provided on or adjoining the site for open space and leisure facilities including a children's play area, adult football pitch, youth shelter, multi-use games area and leisure centre/sports hall, with good pedestrian connections to the village. Proposals must provide for the long term comprehensive development of this site and facilitate an eventual through-road between Kingswood Road and the northern end of Shaw Lane. The site layout should allow for integration with future development on the safeguarded land over the longer term.</p>	<u>180 dwellings</u>

Main Policy Reference	Site Allocation	Settlement	Place Plan	Type	Status	Development Guidelines	Provision
S2: Bishop's Castle	Schoolhouse Lane East (BISH013)	Bishop's Castle	Bishop's Castle	Residential	Saved	<u>Subject to suitable and satisfactory vehicular access via the B4384, sensitive and careful landscaping to minimise the visual impact when viewed from the AONB and the retention of existing tree and hedge lines where possible.</u>	<u>40 dwellings</u>
S2: Bishop's Castle	Land at Bishops Castle Business Park, Phase 2	Bishop's Castle	Bishop's Castle	Employment	Saved	<u>Site has been re-allocated as the most sustainable location for new employment development and will extend the successful Phase 1 Bishop's Castle Business Park which is reaching full capacity. Committed with detailed permission SS1989/01127 for Class B2 uses the land requires to be made readily available through the provision of highway accesses from Phase 1 and through the servicing of the land into development plots to be marketed to end users.</u>	<u>2.8 hectares of employment land</u>
S2: Bishop's Castle	Timber Yard / Station Yard (BUCK001)	Bucknell	Bishop's Castle	Residential	Saved	<u>Development to deliver a mixed use residential and employment development to provide: i) 70 new houses (including 30 houses already permitted in principle) with new employment units and new premises for the existing village shop; ii) new employment units to accommodate existing / new businesses in the town possibly including existing timber yard enterprises.</u>	<u>70 dwellings</u>
S2: Bishop's Castle	Land to the rear of Horseshoe Road (CHIR001)	Chirbury	Bishop's Castle	Residential	Saved	<u>The Parish Council prefer that development should be in at least two phases, be accessed suitably and appropriately from the A490 and that an area of open space, to act as a buffer to the existing properties on Horseshoe Road, is provided.</u>	<u>30 dwellings</u>
S2: Bishop's Castle	Land at Turnpike Meadow (CLUN002)	Clun	Bishop's Castle	Residential	Saved	<u>Development to deliver a minimum of 60 dwellings on a site area with the capacity to deliver an appropriate mix, layout and design of housing and acceptable landscaping and open space provision. Access will be from the B4368 Clun Road forming a suitable junction on the southern boundary of the site. The development should link with the footpath on the northern boundary of the site providing pedestrian access to community facilities and services in the town. There is a need for a specific Flood Risk Assessment to determine whether the development can be delivered within the Flood Zone 1 area on the proposed site. This assessment should investigate the need to reposition the eastern boundary of the site to accommodate the proposed scale of development.</u>	<u>60+ dwellings</u>
S2: Bishop's Castle	South of Telephone Exchange (LYD007)	Lydbury North	Bishop's Castle	Residential	Saved	<u>LYD007 is an undeveloped site within the countryside adjoining the village with frontage to the local access road and bounded by the operational telephone exchange. The site is proposed for the development of smaller 2 or 3 bed dwellings in a terraced layout. The design seeks to provide lower cost, open market housing along with the required affordable housing contribution to satisfy local needs. The design of the development should respect the countryside setting in the AONB and existing residential amenity.</u>	<u>8 dwellings</u>
S2: Bishop's Castle	North of Telephone Exchange (LYD008)	Lydbury North	Bishop's Castle	Residential	Saved	<u>LYD008 is a similar site to LYD007 but is smaller and more closely associated with the built form of the village to the north and west. The site is proposed for the development of larger 3 or 4 bed dwellings in a mixed semi-detached / detached layout. The design seeks to contribute to the mix of dwellings types and sizes to be delivered across the allocations in the village. The design of the development should respect the countryside setting in the AONB and existing residential amenity.</u>	<u>5 dwellings</u>
S2: Bishop's Castle	Former Garage (LYD009)	Lydbury North	Bishop's Castle	Residential	Saved	<u>Brownfield redevelopment opportunity on an under used and visually intrusive former garage site including an existing residential bungalow, which is expected to remain on the site. LYD009 has the benefit of direct vehicular access from the B4385 and should provide a gateway development to enhance the character of the village and its setting within the AONB. The site could accommodate 2 new dwellings subject to dwelling type and size and the impacts of a covenant affecting part of the site.</u>	<u>2 dwellings</u>
S2: Bishop's Castle	Land adjacent to Church Close (LYD011)	Lydbury North	Bishop's Castle	Residential	Saved	<u>LYD011 is a discreet greenfield site enclosed within the built form of the village and located close to the edge of the Conservation Area in the setting of St Michael's and All Angels Church. This site offers the potential for a small, higher value housing development to provide 4 bed detached dwellings. This development is expected to reflect the character of the settlement in terms of plot sizes and dwelling type and design.</u>	<u>4 dwellings</u>
S3: Bridgnorth	Land north of Wenlock Road, Tasley (BRID001/BRID020 b)	Bridgnorth	Bridgnorth	Mixed-Use	Saved	<u>Mixed development of dwellings; retirement or supported housing accommodation; hotel; recreation space and neighbourhood centre comprising local facilities such as a petrol station with small convenience store, day care, health & fitness facilities (this is subject to the relocation of the livestock market and provision of a fully serviced business and industrial estate on sites ELR011b and ELR011a respectively).</u>	<u>200 dwellings</u>
S3: Bridgnorth	Land north of Church Lane, Tasley (BRID020a)	Bridgnorth	Bridgnorth	Residential	Saved	<u>Residential development, subject to the provision of public open space that extends the environmental network and provision of direct access to a new roundabout on the A458 and the protection of Church Lane as a quiet lane shared with pedestrians.</u>	<u>300 dwellings</u>
S3: Bridgnorth	Land at Tasley south of the A458 bypass (ELR011/a)	Bridgnorth	Bridgnorth	Employment	Saved	<u>Development to deliver a business park comprising offices, industrial and warehousing uses (use classes B1, B2, B8 and appropriate sui generis uses) subject to access by means of a new roundabout on the A458 and adequate landscaping.</u>	<u>6.7 hectares of employment land (Net of landscaping)</u>

Main Policy Reference	Site Allocation	Settlement	Place Plan	Type	Status	Development Guidelines	Provision
S3: Bridgnorth	Land at Tasley south of A458 at Tasley (ELR011/b)	Bridgnorth	Bridgnorth	Employment	Saved	<u>Allocated for the relocation of the existing livestock market together with its existing or alternative ancillary uses only. Suitable landscaping and woodland planting will be provided along the site edge.</u>	<u>6.6 hectares of employment land (Net of landscaping)</u>
S3: Bridgnorth	Land at Old Worcester Road (W039)	Bridgnorth	Bridgnorth	Employment	Saved	<u>Allocated for employment uses with a presumption in favour of the development of recycling and environmental industries. A specific Flood Risk Assessment will be required to investigate surface water flow paths within the site, with the objective of implementing appropriate surface water management measures to keep the affected areas in open use.</u>	<u>1.5 hectares of employment land</u>
S3: Bridgnorth	Land opposite 6 Station Road (DITT005)	Ditton Priors	Bridgnorth	Residential	Saved	<u>Development to be small scale and in keeping with the surrounding village character.</u>	<u>12 dwellings</u>
S3: Bridgnorth	Pheasant Inn (NEE001)	Neenton	Bridgnorth	Residential	Deleted		
S3: Bridgnorth	Morville Quarry Extension	Rural	Bridgnorth	Mineral	Saved	<u>Development is subject to appropriate measures to control potential cumulative impacts associated with concurrent or sequential mineral extraction operations in the local area and further assessment and appropriate mitigation measures to address potential adverse impacts on biodiversity and residential amenity.</u>	<u>20.8 (0.7 million tonnes)</u>
S4: Broseley	Land south of Avenue Road ELR017	Broseley	Broseley	Employment	Saved	<u>Site allocated for employment-related development: small scale office, workshop and light industrial uses (B1 use class) with access directly off Avenue Road. Development is subject to the completion of an archaeological assessment and appropriate mitigation measures as required and the layout and design must respect the character and significance of the Conservation Area.</u>	<u>1.3 hectares of employment land</u>
S5: Church Stretton	School Playing Fields (CSTR018)	Church Stretton	Church Stretton	Residential	Deleted		
S5: Church Stretton	Battlefield to rear of Oaks Road/Alison Road (CSTR019)	Church Stretton	Church Stretton	Residential	Saved	<u>Development is subject to satisfactory and appropriate vehicular access which must safeguard protected trees. The design and layout of development must have regard to the setting of the Conservation Area. A site specific Flood Risk Assessment must also be carried out to confirm residual risk arising from the watercourse on the site's northern boundary.</u>	<u>50 dwellings</u>
S5: Church Stretton	Springbank Farm (ELR078)	Church Stretton	Church Stretton	Employment	Saved	<u>Development of class B1 uses will be subject to satisfactory and appropriate vehicular access and ecological assessment. The design and layout of development will need to satisfactorily address topographical, drainage and flood risk issues to be investigated through a specific Flood Risk Assessment to determine the developable area of the site.</u>	<u>1.3 hectares of employment land</u>
S6: Cleobury Mortimer	Land off Tenbury Road (CMO002)	Cleobury Mortimer	Cleobury Mortimer	Residential	Deleted		
S6: Cleobury Mortimer	Land at New House Farm (CMO005)	Cleobury Mortimer	Cleobury Mortimer	Residential	Saved	<u>Development subject to access off Tenbury Road or via adjoining site off Tenbury Road (CMO002). Subject to sensitive design, landscape buffering and screening between new housing development and the Brewery on adjacent land to the south, and an appropriate drainage scheme.</u>	<u>7 dwellings</u>
S6: Cleobury Mortimer	Land adjacent to Cleobury Mortimer Industrial Estate, New House Farm (ELR068CM)	Cleobury Mortimer	Cleobury Mortimer	Employment	Saved	<u>Suitable for the full range of Class B1, B2, B8 employment uses. Development subject to appropriate access off Tenbury Road or via existing estate access and appropriate drainage scheme (part of site with planning permission 12/00782/OUT).</u>	<u>0.7 hectares of employment land</u>
S6: Cleobury Mortimer	Land off Little Stocks Close (KLT001)	Kinlet	Cleobury Mortimer	Residential	Saved	<u>Development subject to access off the B4194. To incorporate foot path connection to existing footpath on Little Stocks Close and sensitive design compatible with existing housing in the village. A 50/50 split of market/affordable housing is sought.</u>	<u>20 dwellings</u>
S6: Cleobury Mortimer	Land adjacent to adjacent to Old Station Business Park (ELR071)	Rural	Cleobury Mortimer	Employment	Saved	<u>Sensitive growth of Class B1, B2, B8 employment uses at Old Station Business Park. Development subject to appropriate access. Should include compensatory screening.</u>	<u>0.3 hectares of employment land</u>
S7: Craven Arms	Land off Watling Street, Craven Arms (CRAV002)	Craven Arms	Craven Arms	Residential	Deleted		

Main Policy Reference	Site Allocation	Settlement	Place Plan	Type	Status	Development Guidelines	Provision
S7: Craven Arms	Land between Watling Street and Brook Road (CRAV003 & CRAV009)	Craven Arms	Craven Arms	Residential	Saved	<u>CRAV003 is the larger site with frontage to Watling Street and will be developed in conjunction with the adjoining site CRAV009 situated to the rear to provide up to a total of 235 dwellings. These combined sites require significant landscaping to ensure the development conserves the landscape and scenic beauty of the surrounding AONB. The proposals should conserve the mature trees within the site. These two sites will require an appropriate scheme for surface water drainage to accommodate runoff from the estate lands to the west. This will necessitate the exclusive use of site CRAV009 for surface water attenuation measures as part of the masterplanning and structural landscaping to facilitate flood storage and discharge/infiltration. This masterplanning may also facilitate pedestrian and emergency vehicular access into the adjoining Craven Arms Business Park to the north. The development is required to widen Watling Street from the current widened highway to the south extending northwards to CRAV003 and potentially to the junction with Long Lane.</u>	<u>235 dwellings</u>
S7: Craven Arms	Land off Watling Street (east) (CRAV004 & CRAV010)	Craven Arms	Craven Arms	Residential	Saved	<u>Site CRAV004 (35 dwellings) is in an elevated position and will require significant landscaping to ensure the development conserves the landscape and scenic beauty of the surrounding AONB. The development of the adjoining site CRAV010 (25 dwellings) will replace the partially finished care home with dwellings to meet local needs. The archaeological significance of both sites must be investigated.</u>	<u>60 dwellings</u>
S7: Craven Arms	Land adjoining Clun Road / Sycamore Close (CRAV024)	Craven Arms	Craven Arms	Residential	Saved	<u>Allocation requires a suitable access from Clun Road with pedestrian and cycling access to the site and ideally linking with site CRAV004 and the adjoining residential development. This steeply sloping site must address surface water runoff to prevent discharge to the highway.</u>	<u>25 dwellings</u>
S7: Craven Arms	Land at Newington Farmstead (CRAV030)	Craven Arms	Craven Arms	Residential	Saved	<u>Allocation will provide key worker accommodation tied to the new EQL abattoir on Newington Food Park to the north. Newington Farmstead and The Lodge (Grade II Listed) are expected to be served from the proposed new junction to the A49 with their existing accesses then being closed to vehicular traffic. Redevelopment and conversion of the farmstead must respect the architectural value of the buildings and conserve the setting of the listed Lodge. Development is also subject to the completion of an archaeological assessment and appropriate mitigation measures as required. Development of this land must also provide significant landscaping to ensure the development conserves the landscape and scenic beauty of the surrounding AONB.</u>	<u>5 dwellings</u>
S7: Craven Arms	Land at Newington Farm (ELR053)	Craven Arms	Craven Arms	Employment	Saved	<u>Allocation dedicated solely for the development of a Class B2 abattoir and processing plant for Euro Quality Lambs (EQL). This is intended to create the Newington Food Park which will also include support services for the operation of the new abattoir and a strategic highway junction with the A49 trunk road constructed in conjunction with the development of site ELR055. This extensive strategic employment allocation requires appropriate schemes for design and materials, flood alleviation, drainage, tree and woodland protection and ecological, archaeological and landscape character mitigation recognising the situation of the site in relation to the strategic flood plain, the Grove parkland and the Area of Outstanding Natural Beauty.</u>	<u>8 hectares of employment land</u>
S7: Craven Arms	Land west of A49 (ELR055)	Craven Arms	Craven Arms	Employment	Saved	<u>Allocation for offices, industrial and warehousing (use classes B1, B2, B8 and appropriate sui generis uses). This site is required to accommodate in part, the proposed new strategic highway junction on the A49 and to help address access issues around the Long Lane level crossing. This site might also afford the opportunity to accommodate other existing employment uses from Corvedale Road. Development of this site should provide services capable of supporting employment development including the provision of the strategic highway junction with the A49 trunk road (in conjunction with site ELR053) and a commercial standard electricity supply. The proposed employment site requires investigation of the ecological and archaeological value of the land and appropriate schemes for surface water and highway drainage and significant landscaping to ensure the development conserves the landscape and scenic beauty of the surrounding AONB.</u>	<u>2.5 hectares of employment land</u>
S7: Craven Arms	Land North of Long Lane	Craven Arms	Craven Arms	Employment	Saved	<u>Site committed for employment uses which is capable of accommodating the development of recycling and environmental industries</u>	<u>3.5 hectares of employment land</u>
S8: Ellesmere	Land South of Ellesmere (ELL003a)	Ellesmere	Ellesmere	Residential	Saved	<u>Development of site is subject to: appropriate impact assessments where necessary, satisfactory access, layout and design. The design of the site will need to satisfactorily address drainage and flood risk issues (in conjunction with ELL003b), including adopting a sequential approach to ensure that more vulnerable uses occupy areas of lowest flood risk, and the character, setting and significance of the Conservation Area will be protected and conserved whilst retaining and enhancing existing ecological features.</u>	<u>250 dwellings</u>
S8: Ellesmere	Land off Grange Road (ELR075)	Ellesmere	Ellesmere	Employment	Saved	<u>Site has been re-allocated to support a key local employer which has a current detailed permission LN2003/00036 for a Class B2 expansion of their existing enterprise on 1.2 hectares of the site. The full extent of the allocated land at 3 hectares may be developed subject to evidence to show the developability of the additional 1.8 hectares of land over and above the current commitment. A specific Flood Risk Assessment is required to investigate the developable area of the site.</u>	<u>3 hectares of employment land</u>

Main Policy Reference	Site Allocation	Settlement	Place Plan	Type	Status	Development Guidelines	Provision
S8: Ellesmere	Ellesmere Business Park, Phase 2 (ELR074)	Ellesmere	Ellesmere	Employment	Saved	Site has been re-allocated as the most sustainable location for new employment development and will extend the successful Phase 1 Ellesmere Business Park which is reaching full capacity. Committed with outline permission 12/01562/OUT for Class B1/B2/B8 uses the land requires to be made readily available through the provision of a highway access from Phase 1 and through the servicing of the land into development plots to be marketed to end users. Committed for employment uses the site is capable of accommodating the development of recycling and environmental industries.	6.2 hectares of employment land
S8: Ellesmere	Land South of Ellesmere (ELL003b)	Ellesmere	Ellesmere	Leisure / Tourism	Saved	Development of site is subject to: appropriate impact assessments where necessary. The design of the site will need to satisfactorily address drainage and flood risk issues (in conjunction with ELL003a), whilst where possible retaining and enhancing existing ecological features ; and respect the setting of the Ellesmere Conservation area, the proximity of listed buildings at Ellesmere Yard and the setting and character of the Shropshire Union and Llangollen Branch canals. Land allocation is for the purpose of leisure and tourism and comprising various related uses suitable for canalside rather than town centre, such as hotel, marina, leisure centre, touring caravan and log cabin sites, and a garden centre.	18 hectares of employment land
S8: Ellesmere	Land to the West of Cockshutt (CO002a and CO002b)	Cockshutt	Ellesmere	Residential	Saved	Development is subject to further assessment of groundwater flooding issues and appropriate drainage design and measures to avoid the potential for adverse impacts on either the playing field or the Jubilee field, suitable in principle for 10 homes on 2 separate sites of around 5 dwellings.	10 dwellings
S8: Ellesmere	Land at Cockshutt House Farm (CO005) and Land South of Kenwick Road (CO023)	Cockshutt	Ellesmere	Residential	Saved Deleted		
S8: Ellesmere	Land South of Chapel House Farm (CO018)	Cockshutt	Ellesmere	Residential	Saved Deleted		
S8: Ellesmere	Ravenscroft Haulage Site (DUDH006)	Dudleston Heath	Ellesmere	Residential	Saved	Development is subject to satisfactory access, layout and design, suitable in principle for up to 29 dwellings including an existing consent for 9 homes. The layout of the site will need to reflect the presence of a public sewer crossing the site.	20 dwellings
S8: Ellesmere	Land South of Cairndale (TET001)	Tetchill	Ellesmere	Residential	Saved Deleted

S11: Market Drayton	Land to rear of Shrewsbury Street (HOD009)	Hodnet	Market Drayton	Residential	Saved	<u>Subject to the provision of a new access off Station Road, the provision of a village green fronting Station Road, the enhancement of the public footpath which runs along the back of the existing properties and the provision of a footway between the new road junction at Station Road and Shrewsbury Street. Site is within the Hodnet Conservation Area and development will need to have regard to this in accordance with national and local policy.</u>	<u>10 dwellings</u>
S11: Market Drayton	Land off Station Road (HOD010)	Hodnet	Market Drayton	Residential	Saved	<u>Low density development subject to the provision of a new access off Station Road, the provision of a village green fronting Station Road, the enhancement of the public footpath which runs along the back of existing properties and the provision of a new footway between the new road junction at Station Road and Shrewsbury Road. Sustainable drainage techniques should be used in accordance with Policy CS18 for the disposal of surface water from the site and any surface water draining to a watercourse should be limited by on site storage, if necessary.</u>	<u>30 dwellings</u>
S11: Market Drayton	Shrewsbury Street Farm (HOD011)	Hodnet	Market Drayton	Residential	Saved	<u>Development of terraced dwellings. Site is within the Hodnet Conservation Area and development will need to have regard to this in accordance with national and local policy.</u>	<u>10 dwellings</u>
S11: Market Drayton	Part of land off Dutton Close (STH002)	Stoke Heath	Market Drayton	Residential	Saved	<u>Development of northern part of site, adjoining Dutton Close and incorporating redevelopment of disused social club. A mix of housing is sought. Subject to retention of existing trees and retention and enhancement of existing recreation facilities.</u>	<u>20-25 dwellings</u>
S12: Minsterley – Pontesbury	MIN002/MIN015 Hall Farm, Minsterley	Minsterley	Minsterley and Pontesbury	Mixed-use	Saved	<u>Mixed use development: New build housing is allocated, as part of a mixed use development, subject to it forming part of a comprehensive development scheme for the whole site which secures the appropriate re-use and conservation of historic farmstead and layout at Hall Farm. Development, including dwelling capacity, will be subject to the need to respect and enhance the character of the heritage asset, including the adjoining listed building and its setting, also to ecological, open space and other requirements. A roadside footway to provide improved pedestrian access is sought. Appropriate small scale, light industrial/commercial and business uses will be preferred for buildings retained on the site, with retail, other than farm shop enterprises or small scale ancillary retail, limited except as allowed by permitted development provisions.</u>	<u>17 dwellings</u>
S12: Minsterley – Pontesbury	MIN007 Callow Lane Minsterley	Minsterley	Minsterley and Pontesbury	Residential	Saved Deleted		

Main Policy Reference	Site Allocation	Settlement	Place Plan	Type	Status	Development Guidelines	Provision
S12: Minsterley – Pontesbury	Hall Bank- Pontesbury PBY018/29	Pontesbury	Minsterley and Pontesbury	Mixed-use	Saved	<u>Housing is allocated, as part of a mixed use development on the site, for approximately 60 dwellings and a small scale convenience retail store to serve the needs of the key centre/village and its rural hinterland. Development proposals will need to be in line with the key centre role identified in CS3 and CS15 and meet the requirements of Policies MD10a and MD10b. The scheme for this site should deliver a comprehensively planned and sensitively designed development for the site integrating housing, retail, open space and community uses. The development should include provision for public parking and may require relocation of the existing nursery premises within the site. Increased local affordable housing provision of up to 25% dependent on viability assessment will be sought to deliver additional community benefits. The development, including housing capacity, will take into account and make provision for flood zone, topography, trees and hedgerows and other site constraints. The planning application for development of the site should be informed by and supported by an appropriate Flood Risk Assessment. As part of the development, linkages to the recreation area and footpath will be retained and where appropriate improved. Phasing to facilitate appropriate local delivery of housing and to allow required improvements to local infrastructure will be sought. Development should be phased to secure delivery of development first at the western end of the site, subject to constraints such as nursery relocation.</u>	<u>60 dwellings</u>
S12: Minsterley – Pontesbury	Land off Minsterley Road- Pontesbury PBY019	Pontesbury	Minsterley and Pontesbury	Residential	Saved	<u>Development subject to satisfactory access off the A488, layout and design. A sensitively designed and laid out development will be required to reflect the topography and sensitivity of the site and residential amenities of adjoining dwellings.</u>	<u>16 dwellings</u>
S14: Oswestry	Land off Whittington Road (OSW004)	Oswestry	Oswestry	Residential	Saved	<u>Development subject to the access, layout and landscaping of the site, securing high quality design and appropriate integration of development within the sensitive historic landscape. Development should demonstrate appropriate regard to the significance and setting of the Old Oswestry Hill Fort. A master plan is required for the development of the site which will apply the following design principles: 1. To inform the layout of the site, full archaeological assessment will be required to enhance the understanding and interpretation of the significance of the Hillfort and its wider setting; 2. Ensuring long distance views to and from the Hillfort within its wider setting are conserved; 3. Development should be designed to allow views and glimpses of the Hillfort from within the site; 4. The layout of development, in its form, massing, height and roofscape design will be designed to minimise the landscape impact; 5. A landscape plan will be required to design a landscape buffer aligning the northern and eastern boundaries of the site, to create a clear settlement boundary between the built form and open countryside. The landscape buffer will retain important views to and from the Hillfort, including from Whittington Road. The landscape plan should also include detail on appropriate vegetation and screening to ensure high quality design across the site; 6. Street lighting should be designed to minimise light pollution and sky glow; 7. The opportunity should be taken to consider measures to improve the access, interpretation and enjoyment of the Hillfort and the wider historic landscape. In addition to these design principles, development to be subject to pedestrian and cycle path links to the former railway and a new footpath link between Whittington Road and Gobowen Road to improve access towards the Hill Fort. Development also to be subject to improvements to the Whittington and Gobowen Roads junction and the junction of Whittington Road with the A5/A483, and the incorporation of appropriate buffer areas/uses to existing businesses on Whittington Road.</u>	<u>117 dwellings</u>
S14: Oswestry	Eastern Gateway Sustainable Urban Extension (OSW024)	Oswestry	Oswestry	Residential	Saved	<u>Development to deliver comprehensively planned, integrated and phased development of the SUE having regard to the SUE Land Use Plan (Figure S14.1.1) and an adopted SUE masterplan. Development to include: a mix of new housing; land for community facilities and public open space; a network of open space and green infrastructure; a new link Road between Shrewsbury Road and Middleton Road; facilitation through provision of land, if required, of improvement to the A5/A483 trunk road junction and sustainable transport improvements associated with the site; and on site pedestrian/cycle provision to facilitate linkages to the Town Centre and proposed employment land at Mile End East. Drainage/flood alleviation measures requiring a specific Flood Risk Assessment to investigate flood risk across the site to accommodate the proposed development within the developable area of the site.</u>	<u>900 dwellings</u>

Public

PROPOSED DESIGNATION OF A CONSERVATION AREA FOR WEST FELTON – CONFIRMATION OF DESIGNATION FOLLOWING FORMAL CONSULTATION

Responsible Officer:	Mark Barrow		
email:	mark.barrow@shropshire.gov.uk	Tel:	01743 258916
Cabinet Member (Portfolio Holder):	Cllr Richard Marshall		

1. Synopsis

This report considers the proposal to designate West Felton as a conservation area and seeks approval to finalise the designation following formal consultation.

2. Executive Summary

2.1. The four priorities within the Shropshire Plan 2022-2025 includes a Healthy Environment, and a strategic objective whereby the Council “...will maintain, protect, and enhance our outstanding natural and historic environment, promoting positive behaviours and greater biodiversity and environmental sustainability”.

- 2.2 Section 69 of the Planning (Listed Buildings & Conservation Areas) Act 1990 defines a conservation area and imposes a duty on local planning authorities to "from time to time...determine whether any parts or any further parts of their area should be designated as conservation areas". The same section of the Act confers the power upon local planning authorities to designate conservation areas where they think they are merited.
- 2.3 The Council was approached by West Felton Parish Council with a request to designate as a conservation area within the village on the basis of its historic significance and built heritage. Following approval from Cabinet in December 2022 to formally consult on the proposal, which was undertaken earlier in 2023, this report sets out the issues raised through the consultation and a revised boundary in Appendix 1 which takes account of the representations received.

3. Recommendations

- 3.1 Confirm the designation of West Felton as a Conservation Area, based on the revised amended area boundary, included in Appendix 1, following formal consultation.

Report

4. Risk Assessment and Opportunities Appraisal

- 4.1. Without the designation of a Conservation Area in West Felton there is a risk that development proposals that are poorly designed will erode the historic and architectural interest of the village. This links directly to the Healthy Environment priority within the Shropshire Plan 2022-25, and the corresponding strategic objective to maintain, project and enhance the county's outstanding natural and historic environment.
- 4.2. An updated Equality Social Inclusion and Health Impact Assessment (ESHIA) has been updated following the consultation and is attached in Appendix 2 of this report. This indicates that designating the conservation area would have a low or neutral impact upon people in Protected Characteristic groupings in the community given that the designation would not have a specific impact on the groups listed and the nature of the designation is intended to enhance the local environment in relation to creating a well-cared for natural and historic environment that helps to promote good mental health. This would not therefore limit people in Protected Characteristic Groupings.
- 4.3. The updated ESHIA indicates that there is potential for the impact to in fact be Low Positive with regard to the Disability grouping, as the designation will promote the protection, and enhancement of the local environment, aiming to thereby create a well-cared for natural and historic environment that helps to promote good mental health.
- 4.4. The recommendations contained within this report are compatible with the provisions of the Human Rights Act 1988.

5. Financial Implications

- 5.1. The proposed conservation area has no financial implications for the Council since all additional workload produced as a result would be accommodated within current working practices and current budgets.
- 5.2. There will be a minimal fee for the cost of advertising the completion of the designation process in the local newspaper and the London Gazette, as required by legislation.

6. Climate Change Appraisal

- 6.1. Given the nature of the designation, there is not considered to be a notable change to energy/fuel consumption, renewable energy generation, carbon offsetting or mitigation, or climate change adaptation. Therefore it is considered that there would be a 'no effect' outcome.

7. Background

- 7.1. Section 69(1) of the Planning (Listed Buildings & Conservation Areas) Act 1990 defines a conservation area as "...an area of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance".
- 7.2. Local planning authorities have a duty, under section 69(2) of the same Act, to "from time to time ... determine whether any parts or any further parts of their area should be designated as conservation areas". The same section of the Act confers the power upon local planning authorities to designate conservation areas where they think they are merited.
- 7.3. Section 72(1) of the same Act imposes a duty on the local planning authority in respect of relevant planning decisions to pay special attention to the preservation or enhancement of the conservation area, providing additional planning protection from unsympathetic development which might otherwise be detrimental to the area's special character and appearance, including the safeguarding of important trees and open spaces.
- 7.4. Paragraph 191 of the National Planning Policy Framework further requires that local planning authorities should ensure that "...an area justifies such status because of its special architectural or historic interest" (our emphasis).
- 7.5. The above legislation emphasises the importance of the character of an area as a key consideration when decisions are made in respect of development proposals. Upon designation the Historic Environment team will be a consultee on all planning applications within and adjacent to the conservation area to ensure this historic interest, character and quality of place is retained.

7.6. Other consequences of conservation area status of note:

- In most circumstances outline planning applications are not acceptable. This is because it is not possible to “pay special attention” to the desirability of preserving or enhancing the character or appearance of the area without seeing the details of what is proposed.
- Planning permission is required for demolition of buildings and structures over 115 cubic metres in size.
- It is an offence to cut down, top, lop, uproot, wilfully damage or destroy a tree in a conservation area without having given 6 weeks’ notice to the Local Planning Authority. During this period, the LPA may consider whether to make a Tree Preservation Order. That are some restrictions on Permitted Development rights
- Rights to display advertisements are more limited.

7.7. At the present time there are 129 conservation areas designated within the County.

Background to the proposed Conservation Area designation

7.8. The Council was initially approached by West Felton Parish Council, with a request to designate a conservation area on the basis of the historic significance of the village and its built heritage. The Parish Council made this approach after a heritage consultant had undertaken research on their behalf and following an informal consultation with residents that included a questionnaire and an all-day exhibition in the Parish Hall. These responses were largely positive, whereby 58 out of 64 residents who responded supported designation.

7.9. The significance of West Felton lies in its origins as an early medieval/Saxon settlement set in a series of enclosures, further colonised by a late Norman motte and bailey castle and Norman church. Its historically significant layout, visible in the modern street pattern with a series of enclosures defined by the roads in the old village (to the west of the A5), and linear street pattern along the Old Holyhead Road (to the east of the A5), having its origin in three early farmsteads visible on the 1771 map. There is a well documented manorial complex, and emergence of the higher status farming classes from the 16th and 17th centuries; 18th and 19th century development relating to the malting economy and inns/public houses in response to the coach traffic also contribute to its significance; along with larger 19th century domestic development along this side of the village.

7.10. Having considered the Parish Council’s request and the information provided by their heritage consultant, Officers took the proposal to consultation following approval from Cabinet. The results of this are discussed below.

8. Additional Information – Results of formal consultation

8.1. The consultation on the proposed Conservation Area for West Felton took place between the 27th January 2023 and the 24th February 2023. Letters were sent to all affected properties, three sets of laminated notices and plans were erected in

the village, two sets near public facilities (the village hall and shop), and another in the west part of the village next to the Church of St Michael. Furthermore, details of the consultation were posted on the Council's website. Relevant Council departments were emailed and made aware of the consultation including Trees, Ecology, Planning Policy and Development Management. External consultees included Historic England, CPRE and the Diocese of Lichfield. The local member and portfolio holder were also consulted.

- 8.2. 8 consultation responses were received from West Felton residents and 2 responses from organisations or consultees (CPRE, SC Ecology).
- 8.3. In terms of the 8 public responses received, these can be summarised as follows:
 - 7 objections to the designation.
 - 1 general enquiry relating to clarification over listing designation of their property.

However, of the 7 objections received, 4 related primarily to the inclusion of the area along Woolston Road beyond the church and the junction to the south west, with 3 of these objections not objecting to the principle of a conservation area designation overall.

- 8.4. In light of this officers have given further consideration to the character and appearance of this part of the proposed conservation area. It was noted that two of the historic buildings along this part of Woolston Road had recently been demolished under a planning permission granted on 18 May 2022, and others significantly altered and modernised. Furthermore, modern infill development has further diluted the historic and architectural significance of this part of West Felton. It is also considered to be somewhat detached from the west part of the village given the junction to the south west of the church with the first property (which is a modern building) approximately 40 metres from the junction and with open fields opposite. Officers have therefore now concluded that this part of the village no longer possesses the special architectural and historic interest that would merit inclusion within the proposed conservation area therefore questioned if this part of the proposed boundary would be justified in terms of its special architectural and historic interest as part of the conservation area given the limited level of its significance and detached nature and as such has been removed from the proposed boundary following consideration of the consultation responses.
- 8.5. The Parish Council was asked for comment in this regard, and they responded that they opposed the amendment to remove this section of the proposed boundary, as they considered that the designation should be carried forward with the original intended boundary as this area is also considered of historic significance by their heritage consultant, and wish us to proceed with the boundary as per the original consultation.
- 8.6. However, this Council's position is to take full account of representations made from residents to the formal consultation on the boundary, and to establish a robust and defensible position for designation as required under Paragraph 191 of the National Planning Policy Framework. In this regard Officer's considered that the removal of this cluster of properties to the south west corner of the conservation area boundary is necessary and the proposed boundary has been amended on this basis.

- 8.7. Two objections received were also concerned over the additional bureaucratic and cost implications of the designation. However, whilst there are additional instances where planning permission is required, for the most part permitted development rights aren't unduly affected for standard works such as rear extensions, changing windows and doors, or outbuildings. It is only where for example works are proposed to extend or place an outbuilding to the side of the property, or the external materials are proposed to change, that permitted development becomes more restricted, but it does not limit all the permitted development of the residents.
- 8.8. Furthermore, conservation is a dynamic approach which allows change, but manages it such that the character and appearance of a place is maintained. Upon designation the Historic Environment team will be a consultee on all planning applications within and adjacent to the conservation area to ensure this historic interest, character and quality of place is retained. In this regard, the main considerations will relate to siting, design, appearance and materials, and may not incur additional cost to standard proposals if considered from the outset (other than the application fee which for householder applications is relatively small). Residents will be able to contact the Historic Environment team for some initial free advice in this regard. Lastly, it is also not considered unnecessary bureaucracy given that the designation is protecting the historic significance of West Felton which has been considered as worthy of protection given its special historic and architectural interest.
- 8.9. Two objectors have also queried the inclusion of the area surrounding Stone House to the east of the village. However, whilst there has been some 20th century residential development on the front of the site, this area makes up part of the historic curtilage and driveway of the 19th century stone villa and as such is part of its significance albeit altered by the more modern development. In this regard, its inclusion is considered to be merited, with the impact on the owners of the modern properties here relatively limited given that they would still hold a variety of permitted development rights, and in fact offered an enhanced level of consideration should further development be proposed on some of the plots surrounding these houses. The objectors have pointed to more significant buildings being excluded such as the school and those on Bishop's Corner. However, this issue was addressed previously with the Parish Council, where Officers consider that these buildings are too detached to be included within the boundary of the conservation area, and are insufficient in number to represent a separate character area. Furthermore, intervening modern infill housing development means that these part of the village do not possess the necessary special architectural and historic interest to justify the inclusion of this part of West Felton in the conservation area.
- 8.10. A detailed response was also received from CPRE. Their comments were wholly supportive of the designation but raised issues with regards to the advertisement of the consultation on the Council's website (this was corrected immediately on the first day of the consultation). There was also a query regarding semantics in relation to the boundary map title.
- 8.11. There was further commentary as to why the conservation area boundary had not included all of Holyhead Road, all the local buildings considered of significance within the area and its surrounds including a listed milepost further to the south.

The representation also suggested areas of daffodils along the Holyhead Road should be included, along with all areas of sandstone walling.

8.12. Whilst it is appreciated that there are some buildings and structures of significance that aren't included in the proposed conservation area boundary, the inclusion of all outlying buildings and structures of historic significance would lead to a fragmented and unworkable boundary. In this regard it is Officers opinion that this would not be a robust and defensible position with regards to the designation of a cohesive area of 'special architectural and historic interest' as required by Paragraph 191 of the National Planning Policy Framework. As such, and for the reasons also set out above, the boundary was amended from that originally put forward by the Parish Council at the informal exhibition undertaken by the heritage consultant (It should also be noted that the Council were not party to this and were not invited to attend).

8.13 Whilst the consultation has led officers to make what it considers to be a minor amendment to the proposed boundary, overall it is considered that the areas of West Felton included within the revised boundary shown on the plan in Appendix 1 have a strong and distinctive character, and sufficient historic and architectural interest to merit designation as a conservation area, as set out in the draft Conservation Area Appraisal included at Appendix 3. This position is considered to be strengthened by the removal of the area to the south west of the church, for the reasons set out above. The proposed boundary contains all but three of the eighteen listed buildings in the village, together with the earthwork remains of the Norman motte that is designated as a Scheduled Monument, and the main concentration of non-designated historic buildings. The remaining three listed buildings lie at the edge of the village and, together with a number of undesignated historic buildings, are separated from the proposed conservation area boundary by intervening modern infill housing developments. In addition, the proposed conservation area boundary does not include, and will not affect, the proposed housing site allocation (site code WEF025) contained within the Draft Shropshire Local Plan 2016-38.

9. Conclusions

- 9.1. Taking account of sections 7 and 8 above, it is considered that the historic significance of West Felton is such that designation of the conservation area as shown on the plan boundary in Appendix 1 should proceed and it is politely requested that Cabinet approves its designation.
- 9.2. The proposed conservation area would ultimately seek to retain and enhance the quality of the local environment and its local distinctiveness, permitting appropriate new development which takes account of the area's special character. It also provides for greater opportunity to engage with the local community in managing the historic environment that they value.
- 9.3. Should Cabinet recommend this endorsement a Notice of Designation will be drafted and advertised, as per the statutory requirements.

Shropshire Council
Equality, Social Inclusion and Health Impact Assessment (ESHIA)
Initial Screening Record 2021-2022

A. Summary Sheet on Accountability and Actions

Name of proposed service change
Proposed designation of a Conservation Area for West Felton – Confirmation of designation following formal consultation

Name of lead officer carrying out the screening
Andy Wigley

Decision, review, and monitoring

Decision	Yes	No
Initial (part one) ESHIA Only?	X	
Proceed to Full ESHIA or HIA (part two) Report?		X

If completion of an initial or Part One assessment is an appropriate and proportionate action at this stage, please use the boxes above. If a Full or Part Two report is required, please move on to full report stage once you have completed this initial screening assessment as a record of the considerations which you have given to this matter.

Actions to mitigate negative impact or enhance positive impact of the service change in terms of equality, social inclusion, and health considerations
<p>The impact of the proposal in equality terms is likely to overall be neutral across Protected Characteristic groupings as defined in the Equality Act 2010, as the proposal relates to the designation of a conservation area where the primary impact is to protect the character and appearance of the village and manage development within the designated area such that it does not impact adversely on this. The creation of the conservation area is not considered likely to impact adversely on any specific Protected Characteristic groupings of people within the designated area, as defined in the Equality Act 2010, or those who may work in or visit the area.</p> <p>There is considered to be potential for the impact to in fact be Low Positive with regard to the Disability grouping, as the designation will promote the protection, and enhancement of the local environment aiming to thereby create a well-cared for natural and historic environment that helps to promote good mental health.</p> <p>Following formal consultation, no issues were raised with regard to the above matters within the context of Protected Characteristic Groupings.</p>

Actions to review and monitor the impact of the service change in terms of equality, social inclusion, and health considerations

Given the nature of the designation it was not considered that there would be impacts, either negative or positive, in regard to equality and social inclusion.

A 28 day period of formal public consultation was carried out using a range of communication methods including local advertisement, the Council's website and letters to affected properties, in order to identify as far as possible whether or not there were any likely impacts including equality impacts. Changes have not been found to be necessary as no such issues were raised through this consultation. Equality, social inclusion and health and well being impacts will be kept under review as a matter of good practice.

The Local SC councillor has continued to be appraised of the proposal and progress made, along with the portfolio holder.

Associated ESHIAs

A similar ESHIA was carried out in relation to the designation of a Conservation Area at Tilley, whilst ESHIAs in relation to the Local Plan Partial Review also indicate the overall strategic planning policy context for this proposal.

Actions to mitigate negative impact, enhance positive impact, and review and monitor overall impacts in terms of any other considerations. This includes climate change considerations

Climate change

The proposed West Felton Conservation Area seeks to protect the character and appearance of the village and manage development accordingly though this would not limit renewable energy or energy efficiency measures as such, where consideration to the siting, scale and design of proposals would be considered within the context of the designation where the local planning authority would work with applicants pro-actively in this regard.

Therefore the proposal is considered to have a neutral outcome on the climate change impacts listed below:

- energy and fuel consumption (buildings and/or travel)
- renewable energy generation
- carbon offsetting or mitigation, and
- climate change adaptation.

None of the consultation responses received addressed this matter.

Health and well being

From a health and well-being perspective, it is anticipated that the proposed conservation area will encourage the submission of well-designed development that will protect the character and appearance of the area. In this regard it would contribute to improved consideration given to local spaces, built and natural environment providing the potential for enhanced environmental experiences which contribute to health and wellbeing. However, given the nature of the designation it is likely this will be a neutral/minor beneficial impact overall.

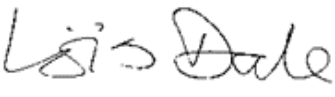

None of the consultation responses received addressed these matters.

Economic and societal/wider community

See above in respect of the protection and enhancement of local character and well designed sustainable development, and its potential contribution to local ownership and community. The designation has some potential to increase tourism in the local area, and in so doing links in with the wider aspirations of the Council around culture and leisure, as well as the national Levelling Up policy agenda for local communities.

None of the consultation responses received addressed these matters.

B. Detailed Screening Assessment

Aims of the service change and description
<p>Proposal to formally designate West Felton conservation area.</p> <p>West Felton is a village in the north west of the County, located to the south of Oswestry and of early Medieval/Saxon origin, and further colonized in the late Norman era, and features a motte and bailey castle and Norman church. Its layout, enclosures and development from the 16th to 19th centuries also contributes to its historic significance.</p> <p>Designation of a conservation area would place a duty in respect of relevant planning decisions to pay special attention to the preservation or enhancement of the conservation area, providing additional planning protection from unsympathetic development which might otherwise spoil the area's special character and significance, including the safeguarding of important trees and open spaces.</p> <p>Conservation area legislation emphasises the importance of the character of an area as a key consideration when decisions are made in respect of development proposals. A conservation area is defined as 'an area of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance'. Conservation is a more dynamic approach which allows change, but change that is managed so that the character and appearance of a place is maintained or enhanced</p>

Other consequences of conservation area status of note:

- In most circumstances outline planning applications are not acceptable. This is because it is not possible to “pay special attention” to the desirability of preserving or enhancing the character or appearance of the area without seeing the details of what is proposed to enable assessment and surety regarding acceptability of proposed development.
- Planning permission is required for demolition of buildings and structures over 115 cubic metres in size.
- It is an offence to cut down, top, lop, uproot, wilfully damage or destroy a tree in a conservation area without having given 6 weeks’ notice to the Local Planning Authority. During this period, the LPA may consider whether to make a Tree Preservation Order.
- Some restrictions on Permitted Development rights which result in slightly more restriction with regard to proposals than elsewhere (outside of conservation areas).
- Rights to display advertisements are more limited.

Intended audiences and target groups for the service change

The proposed designation will affect those living in the village should they come forward with development proposals. Planning applications will be subject to statutory consultations including a site notice.

Evidence used for screening of the service change

-Shropshire Council adopted Development Plan (consisting of the Core Strategy; Site Allocations and Management of Development (SAMDev) Plan; and any adopted formal Neighbourhood Plans).

- A 28 day period of formal public consultation was carried out using a range of communication methods including:

- Written letter notification of the proposed conservation area to all buildings affected including proposed boundary plan and information sheet.
- Advertisement via the Shropshire Council website.
- Laminated posters put up near the village shop, as well as the Parish Council’s notice board in the village.
- The Local Member has been informed of the proposals by email.
- Relevant Council departments were consulted including Trees, Planning Policy and Development Management.

•Historic England were consulted.

8 consultation responses were received from West Felton residents and 2 responses from organisations or consultees (CPRE, SC Ecology).

Specific consultation and engagement with intended audiences and target groups for the service change

See above.

Initial equality impact assessment by grouping (Initial health impact assessment is included below)

Please rate the impact that you perceive the service change is likely to have on a group, through stating this in the relevant column.

Please state if it is anticipated to be neutral (no impact) and add any extra notes that you think might be helpful for readers.

Protected Characteristic groupings and other groupings in Shropshire	High negative impact Part Two ESIIA required	High positive impact Part One ESIIA required	Medium positive or negative impact Part One ESIIA required	Low positive, negative, or neutral impact (please specify) Part One ESIIA required
<u>Age</u> (please include children, young people, young people leaving care, people of working age, older people. Some people may belong to more than one group e.g., a child or young person for whom there are safeguarding concerns e.g., an older person with disability)				Y This service change is not anticipated to impact specifically on any of these groups listed
<u>Disability</u> (please include mental health conditions and syndromes; hidden disabilities including autism and Crohn's disease; physical and sensory disabilities or impairments; learning disabilities; Multiple Sclerosis; cancer; and HIV)				√ Low Positive (The designation will promote the protection, and enhancement of the local environment aiming to thereby create a well-cared for natural and historic environment that helps to promote good mental health).
<u>Gender re-assignment</u> (please include associated aspects: safety, caring responsibility, potential for bullying and harassment)				√Neutral

Marriage and Civil Partnership (please include associated aspects: caring responsibility, potential for bullying and harassment)				√Neutral
Pregnancy and Maternity (please include associated aspects: safety, caring responsibility, potential for bullying and harassment)				√Neutral
Race (please include ethnicity, nationality, culture, language, Gypsy, Traveller)				√Neutral
Religion and belief (please include Buddhism, Christianity, Hinduism, Islam, Jainism, Judaism, Nonconformists; Rastafarianism; Shinto, Sikhism, Taoism, Zoroastrianism, and any others)				√Neutral
Sex (this can also be viewed as relating to gender. Please include associated aspects: safety, caring responsibility, potential for bullying and harassment)				√Neutral
Sexual Orientation (please include associated aspects: safety; caring responsibility; potential for bullying and harassment)				√Neutral
Other: Social Inclusion (please include families and friends with caring responsibilities; households in poverty; people for whom there are safeguarding concerns; people you consider to be vulnerable; people with health inequalities; refugees and asylum seekers; rural communities; veterans and serving members of the armed forces and their families)				√Neutral

Initial health and wellbeing impact assessment by category

Please rate the impact that you perceive the service change is likely to have with regard to health and wellbeing, through stating this in the relevant column.

Please state if it is anticipated to be neutral (no impact) and add any extra notes that you think might be helpful for readers.

Health and wellbeing: individuals and communities in Shropshire	High negative impact <i>Part Two HIA required</i>	High positive impact	Medium positive or negative impact	Low positive negative or neutral impact (please specify)
Will the proposal have a <i>direct impact</i> on an individual's health, mental health and wellbeing? For example, would it cause ill health, affecting social inclusion, independence and participation?				√Neutral
Will the proposal <i>indirectly impact</i> an individual's ability to improve their own health and wellbeing?				√ Low Positive (The designation will promote the protection, conservation and enhancement of

For example, will it affect their ability to be physically active, choose healthy food, reduce drinking and smoking?				the local environment aiming to thereby create a well-cared for environment that helps people maintain active lifestyles and good mental health).
<p>Will the policy have a <i>direct impact</i> on the community - social, economic and environmental living conditions that would impact health?</p> <p>For example, would it affect housing, transport, child development, education, employment opportunities, availability of green space or climate change mitigation?</p>				√Low Positive (The conservation area will promote well-designed, sustainable development that seeks to conserve and enhancing the local area and its associated green spaces, cultural heritage and encouraging visitor attraction.)
<p>Will there be a likely change in <i>demand</i> for or access to health and social care services?</p> <p>For example: Primary Care, Hospital Care, Community Services, Mental Health, Local Authority services including Social Services?</p>				√Neutral

Identification of likely impact of the service change in terms of other considerations including climate change and economic or societal impacts

It is considered that the designation will have a positive impact on the character and appearance of the village in terms of helping inform future development, a neutral impact in considering climate change and a low positive impact in terms of economic and societal impacts.

It is not considered that the human rights of any individuals will be affected as a consequence of these proposals.

Guidance Notes

1. Legal Context

It is a legal requirement for local authorities to assess the equality and human rights impact of changes proposed or made to services. It is up to us as an authority to decide what form our equality impact assessment may take. By way of illustration, some local authorities focus more overtly upon human rights; some include safeguarding. It is about what is considered to be needed in a local authority's area, in line with local factors such as demography and strategic objectives as well as with the national legislative imperatives.

Carrying out these impact assessments helps us as a public authority to ensure that, as far as possible, we are taking actions to meet the general equality duty placed on us by the Equality Act 2010, and to thus demonstrate that the three equality aims are integral to our decision making processes.

These are: eliminating discrimination, harassment and victimisation; advancing equality of opportunity; and fostering good relations.

These screening assessments for any proposed service change go to Cabinet as part of the committee report, or occasionally direct to Full Council, unless they are ones to do with Licensing, in which case they go to Strategic Licensing Committee.

Service areas would ordinarily carry out a screening assessment, or Part One equality impact assessment. This enables energies to be focussed on review and monitoring and ongoing evidence collection about the positive or negative impacts of a service change upon groupings in the community, and for any adjustments to be considered and made accordingly.

These screening assessments are recommended to be undertaken at timely points in the development and implementation of the proposed service change.

For example, an ESHIA would be a recommended course of action before a consultation. This would draw upon the evidence available at that time, and identify the target audiences, and assess at that initial stage what the likely impact of the service change could be across the Protected Characteristic groupings and our tenth category of Social Inclusion. This ESHIA would set out intended actions to engage with the groupings, particularly those who are historically less likely to engage in public consultation eg young people, as otherwise we would not know their specific needs.

A second ESHIA would then be carried out after the consultation, to say what the feedback was, to set out changes proposed as a result of the feedback, and to say where responses were low and what the plans are to engage with groupings who did not really respond. This ESHIA would also draw more upon actions to review impacts in order to mitigate the negative and accentuate the positive. Examples of

this approach include the Great Outdoors Strategy, and the Economic Growth Strategy 2017-2021

Meeting our Public Sector Equality Duty through carrying out these ESHIAs is very much about using them as an opportunity to demonstrate ongoing engagement across groupings and to thus visibly show we are taking what is called due regard of the needs of people in protected characteristic groupings

If the screening indicates that there are likely to be significant negative impacts for groupings within the community, the service area would need to carry out a full report, or Part Two assessment. This will enable more evidence to be collected that will help the service area to reach an informed opinion.

In practice, Part Two or Full Screening Assessments have only been recommended twice since 2014, as the ongoing mitigation of negative equality impacts should serve to keep them below the threshold for triggering a Full Screening Assessment. The expectation is that Full Screening Assessments in regard to Health Impacts may occasionally need to be undertaken, but this would be very much the exception rather than the rule.

2. Council Wide and Service Area Policy and Practice on Equality, Social Inclusion and Health

This involves taking an equality and social inclusion approach in planning changes to services, policies, or procedures, including those that may be required by Government.

The decisions that you make when you are planning a service change need to be recorded, to demonstrate that you have thought about the possible equality impacts on communities and to show openness and transparency in your decision-making processes.

This is where Equality, Social Inclusion and Health Impact Assessments (ESHIA) come in. Where you carry out an ESHIA in your service area, this provides an opportunity to show:

- What evidence you have drawn upon to help you to recommend a strategy or policy or a course of action to Cabinet.
- What target groups and audiences you have worked with to date.
- What actions you will take in order to mitigate any likely negative impact upon a group or groupings, and enhance any positive effects for a group or groupings; and
- What actions you are planning to review the impact of your planned service change.

The formal template is there not only to help the service area but also to act as a stand-alone for a member of the public to read. The approach helps to identify whether or not any new or significant changes to services, including policies, procedures, functions, or projects, may have an adverse impact on a particular group of people, and whether the human rights of individuals may be affected.

This assessment encompasses consideration of social inclusion. This is so that we are thinking as carefully and completely as possible about all Shropshire groups and communities, including people in rural areas and people or households that we may describe as vulnerable.

Examples could be households on low incomes or people for whom there are safeguarding concerns, as well as people in what are described as the nine 'protected characteristics' of groups of people in our population, e.g., Age. Another specific vulnerable grouping is veterans and serving members of the Armed Forces, who face particular challenges with regard to access to Health, to Education, and to Housing.

We demonstrate equal treatment to people who are in these groups and to people who are not, through having what is termed 'due regard' to their needs and views when developing and implementing policy and strategy and when commissioning, procuring, arranging, or delivering services.

When you are not carrying out an ESHIA, you still need to demonstrate and record that you have considered equality in your decision-making processes. It is up to you what format you choose.-You could use a checklist, an explanatory note, or a document setting out our expectations of standards of behaviour, for contractors to read and sign. It may well not be something that is in the public domain like an ESHIA, but you should still be ready for it to be made available.

Both the approaches sit with a manager, and the manager has to make the call, and record the decision made on behalf of the Council. Help and guidance is also available via the Commissioning Support Team, either for data, or for policy advice from the Rurality and Equalities Specialist. Here are some examples to get you thinking.

Carry out an ESHIA:

- If you are building or reconfiguring a building.
- If you are planning to reduce or remove a service.
- If you are consulting on a policy or a strategy.
- If you are bringing in a change to a process or procedure that involves other stakeholders and the wider community as well as particular groupings

For example, there may be a planned change to a leisure facility. This gives you the chance to look at things like flexible changing room provision, which will maximise positive impacts for everyone. A specific grouping that would benefit would be people undergoing gender reassignment

Carry out an equality and social inclusion approach:

- If you are setting out how you expect a contractor to behave with regard to equality, where you are commissioning a service or product from them.
- If you are setting out the standards of behaviour that we expect from people who work with vulnerable groupings, such as taxi drivers that we license.

- If you are planning consultation and engagement activity, where we need to collect equality data in ways that will be proportionate and non-intrusive as well as meaningful for the purposes of the consultation itself.
- If you are looking at services provided by others that help the community, where we need to demonstrate a community leadership approach

For example, you may be involved in commissioning a production to tour schools or appear at a local venue, whether a community hall or somewhere like Theatre Severn. The production company should be made aware of our equality policies and our expectation that they will seek to avoid promotion of potentially negative stereotypes. Specific groupings that could be affected include: Disability, Race, Religion and Belief, and Sexual Orientation. There is positive impact to be gained from positive portrayals and use of appropriate and respectful language in regard to these groupings in particular.

3. Council wide and service area policy and practice on health and wellbeing

This is a relatively new area to record within our overall assessments of impacts, for individual and for communities, and as such we are asking service area leads to consider health and wellbeing impacts, much as they have been doing during 2020-2021, and to look at these in the context of direct and indirect impacts for individuals and for communities. A better understanding across the Council of these impacts will also better enable the Public Health colleagues to prioritise activities to reduce health inequalities in ways that are evidence based and that link effectively with equality impact considerations and climate change mitigation.

Health in All Policies – Health Impact Assessment

Health in All Policies is an upstream approach for health and wellbeing promotion and prevention, and to reduce health inequalities. The Health Impact Assessment (HIA) is the supporting mechanism

- Health Impact Assessment (HIA) is the technical name for a common-sense idea. It is a process that considers the wider effects of local policies, strategies and initiatives and how they, in turn, may affect people's health and wellbeing.
- Health Impact Assessment is a means of assessing both the positive and negative health impacts of a policy. It is also a means of developing good evidence-based policy and strategy using a structured process to review the impact.
- A Health Impact Assessment seeks to determine how to maximise health benefits and reduce health inequalities. It identifies any unintended health consequences. These consequences may support policy and strategy or may lead to suggestions for improvements.
- An agreed framework will set out a clear pathway through which a policy or strategy can be assessed and impacts with outcomes identified. It also sets out the support mechanisms for maximising health benefits.

The embedding of a Health in All Policies approach will support Shropshire Council through evidence-based practice and a whole systems approach, in achieving our corporate and partnership strategic priorities. This will assist the Council and partners in promoting, enabling and sustaining the health and wellbeing of individuals and communities whilst reducing health inequalities.

Individuals

Will the proposal have a *direct impact* on health, mental health and wellbeing?

For example, would it cause ill health, affecting social inclusion, independence and participation?

Will the proposal directly affect an individual's ability to improve their own health and wellbeing?

This could include the following: their ability to be physically active e.g., being able to use a cycle route; to access food more easily; to change lifestyle in ways that are of positive impact for their health.

An example of this could be that you may be involved in proposals for the establishment of safer walking and cycling routes (e.g., green highways), and changes to public transport that could encourage people away from car usage. and increase the number of journeys that they make on public transport, by foot or on bicycle or scooter. This could improve lives.

Will the proposal *indirectly impact* an individual's ability to improve their own health and wellbeing?

This could include the following: their ability to access local facilities e.g., to access food more easily, or to access a means of mobility to local services and amenities? (e.g. change to bus route)

Similarly to the above, an example of this could be that you may be involved in proposals for the establishment of safer walking and cycling routes (e.g. pedestrianisation of town centres), and changes to public transport that could encourage people away from car usage, and increase the number of journeys that they make on public transport, by foot or on bicycle or scooter. This could improve their health and well being.

Communities

Will the proposal directly or indirectly affect the physical health, mental health, and wellbeing of the wider community?

A *direct impact* could include either the causing of ill health, affecting social inclusion, independence and participation, or the promotion of better health.

An example of this could be that safer walking and cycling routes could help the wider community, as more people across groupings may be encouraged to walk more, and as there will be reductions in emission leading to better air quality.

An *indirect impact* could mean that a service change could indirectly affect living and working conditions and therefore the health and well being of the wider community.

An example of this could be: an increase in the availability of warm homes would improve the quality of the housing offer in Shropshire and reduce the costs for households of having a warm home in Shropshire. Often a health promoting approach also supports our agenda to reduce the level of Carbon Dioxide emissions and to reduce the impact of climate change.

Please record whether at this stage you consider the proposed service change to have a direct or an indirect impact upon communities.

Demand

Will there be a change in demand for or access to health, local authority and social care services?

For example: Primary Care, Hospital Care, Community Services, Mental Health and Social Services?

An example of this could be: a new housing development in an area would affect demand for primary care and local authority facilities and services in that location and surrounding areas. If the housing development does not factor in consideration of availability of green space and safety within the public realm, further down the line there could be an increased demand upon health and social care services as a result of the lack of opportunities for physical recreation, and reluctance of some groupings to venture outside if they do not perceive it to be safe.

For further information on the use of ESHIAs: please contact your head of service or contact Mrs Lois Dale, Rurality and Equalities Specialist and Council policy support on equality, via telephone 01743 258528, or email lois.dale@shropshire.gov.uk.

For further guidance on public health policy considerations: please contact Amanda Cheeseman Development Officer in Public Health, via telephone 01743 253164 or email amanda.cheeseman@shropshire.gov.uk

 - To be completed.

1. Introduction

Background to the Conservation Area

The West Felton Conservation Area appraisal has been produced following local consultation over the designation of a Conservation Area for West Felton. An approach to the local authority was made by West Felton Parish Council along with their heritage consultant regarding consideration of this designation due to the historic significance of the village. A variety of information was supplied to the local authority including details of informal local consultation and a drop in exhibition. Historic Environment Officers visited West Felton following the submission of this information and concurred that the area was worthy of designation in this regard.

It is a statutory duty of local authorities to determine areas it is desirable to preserve and enhance and designate them as Conservation Areas, and part of this process is to produce a Conservation Area appraisal in order to set out the character and significance of the area designated.

The document therefore intends to set out the significance of West Felton (i.e. the value that the Conservation Area has to this and future generations because of its heritage interest) and its character and appearance, its historical development and those features which contribute to its special character. It also reviews the existing condition of the area and sets out some principles and actions for its future management.

Policy and legal context

Section 69 of the 1990 Planning (Listed Buildings and Conservation Areas) Act (as amended) requires Local Planning Authorities to determine which parts of their area are 'areas of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance'. Following designation of the Conservation Area, the local authority has a statutory duty to ensure that those elements that form its character or appearance should be preserved or enhanced, specifically when considering planning applications under Section 72(1) of the same Act. It is therefore necessary to define and analyse those qualities or elements that contribute to, or detract from, the special interest of the area and to assess how they combine to justify its designation as a Conservation Area.

The National Planning Policy Framework (NPPF) 2021 sets out the overarching requirement for local planning authorities to identify and protect areas of special interest (Section 16) along with the appropriate consideration of new conservation areas (paragraph 191) such areas should justify its status.

Conservation area appraisals are based upon best practice guidelines set out by Historic England in their publication Advice Note 1: Conservation Area Appraisal, Designation and Management (Second Edition Feb 2019).

Designated heritage assets

There are a total of 16 designated heritage assets located in West Felton. In the west village these comprise the Scheduled monument: Motte castle adjacent to St Michael's Church (NHLE no. 1019296) and the Grade II* listed Church of St Michael, Woolston Road (NHLE no. 1367365). A further 10 buildings and structures are Grade II listed:

- Lodge Farmhouse with attached stables and malthouse, Fox Lane (NHLE no. 1307262)
- Old Farmhouse, Fox Lane (NHLE no. 1054235)
- Barn approximately 10 metres to the east of Old Farmhouse, Fox Lane (NHLE no. 1177812)
- Manor Farmhouse and attached garden wall, Manor Lane (NHLE no. 1307270)
- Outbuilding and privy attached to wall to right of Manor Farmhouse, Manor Lane (NHLE no. 1054237)
- Barn approximately 15 metres south west of Manor Farmhouse, Manor Lane (NHLE no. 1295248)
- Threadneedle Cottage, Threadneedle Street (NHLE no. 1054203)
- Threadneedle Well, Threadneedle Street (NHLE no. 1367364)
- Sundial and steps approximately 20 metres south of nave of Church of St Michael, Woolston Road (NHLE no. 1295213)
- Bentley memorial approximately 1 metre north east of north aisle of Church of St Michael, Woolston Road (NHLE no. 1054206)

A further fourth Grade II listed buildings are located in the east village:

- Felton Grange, The Avenue (NHLE no. 1177799)
- Wall approximately 20 metres north of Felton Grange and attached outbuilding at south west end, The Avenue (NHLE no. 1054234)
- The Brick House, A5 (NHLE no. 1054232)
- Old Plough Cottage, A5 (NHLE no. 1177790)

Summary of the special interest of the area

To be completed.

2. Assessment of the special interest of the area

Location and setting

West Felton is a village and civil parish located in the north-west of Shropshire, and approximately 5 miles to the south-east of the town of Oswestry. It is formed of two areas to east and west, divided by the modern A5 road which runs north to south. The west village is the site of the earliest historic core, whilst the east village straddles the Holyhead Road, formerly the principal route linking Shrewsbury and Oswestry, and beyond that London and Holyhead. Both areas of the village are bounded by open fields. The hamlets of Queen's Head and Rednal are nearby, along with the estates of Tedsmore, Woodhouse and Pradoe. The Pradoe Registered Park and Garden (grade II) is located approximately half a mile to the south-east of the village.

The topography is relatively flat with a gentle rise on the Holyhead Road on approach to the village, and gentle slope down towards the A5 and west part of the village where the Scheduled Motte and grade II* listed Church of St Michael are located.

Historic development

Background

The manor of West Felton is first mentioned in Domesday Book (1086), when it formed part of Merset Hundred. The placename means 'settlement in open ground', possibly a specific reference to open field agriculture (Gelling and Foxall 1990: 307). The placename infers there was a settlement focal point here by the mid-11th century.

At the time of the Norman Conquest the manor of West Felton was held by Siward, one of five manors in Merset Hundred held by him. Much of Merset Hundred was waste before 1086, probably the result of Welsh incursions under Gruffydd ap Llywelyn, and the Domesday Book records that it was still waste in 1086. By 1086 the manor formed part of the holdings of Roger of Montgomery, Earl of Shrewsbury, being held from him by his Sheriff, Reginald Balliol, and from him by an unnamed man at arms (Hannaford, 1995; Thorn, 1986).

The Hundred of Merset ceased to exist in the early 13th century being broken up into a series of Marcher lordships or Welshries (Thorn 1986: Note 4). By 1160 West Felton formed one of the townships of Ruyton of the Eleven Towns, held by the Lestranges of Ness under the FitzAlan lordship of Oswestry. Three tenants are recorded in the manor are John Fitz Philip in 1255 and Thomas de Lee and Stephen son of Thomas de Felton in 1305 (Hannaford, 1995).

In 1536 the marcher lordship of Oswestry was restored to the county as part of the new Hundred of Oswestry. In 1580 the last FitzAlan died without male heir, and in 1603 the Lordship of Oswestry was granted by James I to Thomas Howard, Earl of Suffolk. West Felton passed eventually to the Lords Craven (Lords of the Manor of Ruyton). The Manor

House was bought from the Cravens in around 1771 by the Frank family, although it was possibly rented to the Fitzherbert family in the late 18th century.

West village

The substantial motte standing west of Manor Farm, likely dates to the late 11th–early 12th century, and the earliest fabric of St Michael’s Church lying immediately west of the motte dates to the 12th century. Together the motte and church form the seignorial and spiritual heart of the post-Conquest settlement.

Manor Farm likely represents the site of a medieval manor house probably established following the abandonment of the motte. This is perhaps supported by the recent identification of a surviving 17th century timber-framed gatehouse during an historic building survey (Morriss, 2012). The present farmhouse dates to the mid-18th century, the farm buildings comprise a mid-17th to early-18th century threshing barn and late 18th-early 19th century stables and a cowhouse range (Morriss, 2012).

Within the remainder of the west village historic mapping suggests substantial change within the settlement between the late 18th and late 19th century. This was probably driven by the significant improvements in agricultural practices at this time. These improvements are reflected in the built form of the agricultural working buildings. Several farmsteads were either replaced or remodelled during this period, especially along Threadneedle Street. The historic mapping also indicates settlement contraction along the eastern side of Threadneedle Street and the south side of Fox Lane between the late 18th and early 19th century. A new farmstead, Lodge Farm, was established to the south of Fox Lane during this same period. This was counterbalanced by the loss of what appears to have been a large farmstead at the junction of Threadneedle Street and Fox Lane, lost between the 1837 tithe map and the first edition 25” Ordnance Survey map of 1877.

By the late 18th century, the land between Old Rectory Gardens and Threadneedle Street to the south was principally occupied by The Rectory, a large, detached property standing within substantial grounds. The Rectory may have occupied this site from at least the 17th century or possibly earlier. It was rebuilt in the late 18th–early 19th century; photographs taken circa 1900 show a late Georgian brick building. It was demolished in circa 1970 and the site and its grounds were gradually redeveloped between the late 20th and early 21st century. A range of working buildings, possibly stables, associated with The Rectory survive to the south-west on Threadneedle Street.

Documentary evidence suggests that a National School was built in the 1830s; this may be the former St Michael’s Hall, which certainly existed by the time of the 1837 tithe map. By the late 19th century, it was the Sunday School. It was built in the centre of the junction of what is now The Avenue and Old Rectory Gardens on what had probably been common land shown as an *outgang*¹ on the 1777 Craven estate map. The areas of common land shown on this map had all been enclosed by the mid-19th century.

¹ *Outgang*: a holding area for stock before they were funnelled into the surrounding fields/common land/meadows designated for grazing

East village

The earliest evidence for the development of the east village is the 1771 Craven estate map. This map shows two farmsteads sited on Holyhead Road. The first stood opposite Hickson's Lane (now Old Plough Cottage) and the second stood at the junction of Holyhead Road and Fox Lane/Tedsmore Road, now The Old Smithy and the site of The Fox and Hounds Public House, since demolished. The 1771 Craven estate map does not, however, include large sections of the eastern side of the Holyhead Road. It is possible that the Brick House which stands opposite Old Plough Cottage, and dates to at least the late 18th century, may have originated as a third farmstead standing on Holyhead Road. Similarly, it is not possible to determine whether settlement existed at this date to the south of The Cross, on the site of the present The Punch Bowl public house and Village Stores.

The establishment of the coaching route along the Holyhead Road during this period may have stimulated further development associated with the provision of refreshments and other accompanying trades such as a smithy and ~~wheelwrights~~ wheelwright's shop. Documentary sources indicate that wealthy farmers invested heavily in providing facilities in the form of Coaching Inns. The mid-17th century Old Plough Cottage had been a public house prior to 1819 (SRO 5216/2/F/2/1).

In the 18th and 19th century, this part of the village came to be dominated by two minor estates, Orange Grove (latterly Felton Grange) and Dovaston. Dovaston House, originally known as The Nursery, was built or rebuilt in the mid-18th–early 19th-century in substantial grounds to the north-east of the village. The house was demolished, and the site redeveloped in the 1980s, although a number of structures and other features survive including a row of trees and a low stone wall marking the boundary of the estate with the Holyhead Road.

The Holyhead Road continued to be the principal focus for development throughout the 19th century when several properties were built or rebuilt. These included detached properties such as Stone House and The Yews, as well as rows of brick cottages such as those to the south of The Cross and what is now the Village stores. The Punch Bowl public house probably also dates to the mid-19th century.

Several key public buildings were constructed in the early 20th century. This included the Hazelhurst Memorial Institute in 1908 and built in remembrance of W.C. Hazelhurst, the Rector between 1891 and 1905, for the purposes of promoting reading and education. In the aftermath of the First World War (1914–1918) a further two memorial structures were erected, the West Felton Public Hall dated 1923 and the War Memorial, both located on the west side of Holyhead Road.

Archaeological significance and potential

Across the wider parish there is currently limited evidence for human activity prior to the Bronze Age. Eight Bronze Age burnt mounds² have been recorded associated with the former wetland areas to the north-east of the parish and to the south of the village. Bronze Age funerary activity has been indicated from aerial photography in the form of 12 ring ditches located on the elevated land towards the centre and at the southern edge of the parish. Three Bronze Age finds have been recorded from the village itself, these include an axehead (palstave) found in 1865 or 1867 as well as a spearhead whose find date is unknown. These two finds were reportedly found either on the Dovaston estate or just to its north. A Bronze Age perforated stone axe was also found at Manor Farm before 1958. There is consequently the potential for further stray finds, or possibly archaeological features, of later prehistoric date to be encountered within and around the village. Any archaeological remains present within the village itself are likely to have been truncated by subsequent agricultural and development activities.

There are numerous enclosures visible as cropmarks on aerial photography across the parish which are likely to relate to late prehistoric–Romano-British activity. There is currently no evidence for Iron Age or Roman activity focused within the village itself.

In the west village the earliest detailed map, the 1771 Craven estate map, shows the extant road pattern which forms a roughly oval enclosure (Rectory Gardens to the north, Threadneedle Street curving round to the east and the western extension of Fox Lane to the south). This enclosure is subdivided by a straight section of Threadneedle Street. This oval enclosure may have formed the focal point of settlement established in the early medieval period. The motte was constructed after the Norman Conquest, and alongside it stands the broadly contemporary St Michael's Church. These two structures represent the physical imposition of Norman lordship upon the local population. The motte and church appear to have been laid out over and adjacent to the north-western extent of the oval enclosure. The historic settlement is likely to have been dispersed across and/or around the enclosure. Archaeological investigations on the site of The Rectory in the north-western corner of the oval enclosure, found evidence for probable medieval ditches likely associated with agricultural activity (Taverner, 2002; Kenney 2003). This finding may be evidence of a dispersed settlement pattern within the village during this period.

Scholars have long suggested that at least one castle bailey was established adjacent to the motte, although to date no physical evidence has been found. The preferred location is given as east-north-east of the motte, which would have incorporated what is now Manor Farm. An alternative, or possibly second, bailey has been suggested to the west of the motte encompassing St Michael's Church. The limited archaeological investigations at Manor Farm in 2017 and 2020 did not identify any evidence for medieval activity associated with either a bailey or other medieval settlement activity (Frost 2017; Frost 2020).

² Burnt mound: A mound of fire-cracked stones, normally accompanied by a trough or pit which may have been lined with wood, stone or clay. Their function remains uncertain but may have been used as hearths for cooking and/or as sweat lodges/saunas.

It is likely that the motte was abandoned at an early date in the medieval period and was probably replaced by more commodious accommodation. Manor Farm may be located on the site of a later medieval manor house. The recently identified gatehouse has been broadly dated to the 17th century and would lend support to the presence of a substantial property at this location by at least this date.

The land around the motte and St Michaels Church is of very high archaeological potential. The remainder of the old village is an area of high archaeological potential, particularly in areas which have seen limited development such as the area to the south of Fox Lane or east of Threadneedle Street. Archaeological remains associated with early settlement activity within the village core itself are likely to have been truncated by later development.

There is a low potential for later medieval and/or early post medieval settlement activity to be present along the Holyhead Road. It is possible that the three properties indicated on the 1771 estate map near the two junctions of Holyhead Road with Hickson's Lane and with Fox Lane/Tedsmore Road have earlier origins. Any archaeological remains present are, however, likely to have been truncated by subsequent development.

Form and layout

West Felton comprises two historic settlement cores, that to the west focused upon the church and motte, and that to the east focused upon the Holyhead Road. The origins and development of the two halves of the village has shaped their differing character. The two halves are now physically separated by the construction of the A5 road in the later 20th century. This road was constructed in a deep cutting and is not visible from either portion of the village. Its presence is indicated by a mature tree belt which flanks both sides of the cutting.

West village

The historic character of the west village retains a sense of its origins as a farming community. It comprises clusters of farmsteads set within and around the old lanes forming the oval enclosure which makes up the historic core. Set around the groups of historic farmsteads are late 20th and early 21st century houses, infilling on the site of former buildings and gardens.

The oldest building in the village is the Grade II* listed St Michael's Church whose earliest fabric dates from the 12th century, with a late 18th century tower and further 19th century additions.

Most of the historic buildings date from the mid-18th century onwards and comprise a mix of domestic and formerly agricultural buildings. The largest houses, The Court and The Hollies, date to the last two decades of the 19th century.

Five large farmsteads survive, three of which have regular courtyard plan forms with one or more yards, suggesting they were built or rebuilt in the late 18th–early 19th century. These buildings reflect the agricultural improvements, which were occurring at this time. The latest of these is Lodge Farm built in the early 19th century. The farmstead comprises large

stone built working buildings, including a malthouse. The red brick farmhouse stands to the south and east of the working buildings. Manor Farm and Old Farm display a more dispersed plan form perhaps indicating their early origins. Both contain surviving working buildings of at least 17th to early 18th century date.

Several lanes radiate out from this historic core including The Avenue and Fox Road, which leave the eastern side of the west village and cross the A5 road cutting to ultimately join the east village at Holyhead Road. The other lanes lead north, south and west into the surrounding rural landscape which is dominated by isolated farms and mixed arable and pasture fields, subdivided by hedgerows.

The southern side of The Avenue is lined by hedged paddocks whilst to the north there are four detached houses standing within extensive grounds. Avenue House stands immediately adjacent to The Avenue, but all the others are set back off the road.

East village

The oldest part of the east village clusters around The Cross, although the remainder of the village reflects its origins as a piecemeal ribbon development. The section of Holyhead Road to the north of The Cross forms the main approach into the village from Oswestry. The eastern side retains a sense of open space lined only by a row of mature trees. These are just set back from a low wall, comprising one course of large sandstone blocks and coping stones, beyond which there is a grassed area.

The sense of enclosure intensifies, at least initially, to the south of The Cross where buildings on both sides of Holyhead Road stand either directly onto or just back from the roadside. These buildings comprise The Punch Bowl public house to the east, and to the west is the village shop and a row of brick cottages. Beyond The Punch Bowl is its car park and gardens where the sense of enclosure recedes. On the opposite side of the road are further 19th century houses (detached and semi-detached) as well as the West Felton Public Hall, built gable end onto the road.

Beyond these properties to the south the historic buildings were originally constructed at intervals and were surrounded by small fields. These fields have largely been lost to infilling on both sides of the Holyhead Road throughout the later 20th and early 21st century. Most of the modern houses and bungalows within the proposed Conservation Area are detached. They are generally set back at least 10m from the roadside, within sizable gardens fronted by very low stone or brick walls.

The principal surviving historic properties are the mid-17th century timber framed Old Plough Cottage and the late 18th century The Brick House, both Grade II listed, which stand opposite one another on the Holyhead Road. The Brick House is bounded to the north by Hickman Lane, now a footpath, which links Holyhead Road with School Road. The blank walls of its associated single storey outbuildings back onto Hickman Lane. To the south of The Brick House are two access lanes for mostly modern detached houses standing in

generous gardens. The most southerly access lane leads, after 115m, to the Stone House constructed in the late 19th century. The eastern and southern sides of the house are enclosed by a stone wall. The property had originally been built towards the centre of a field with a wooded area to its north-east, which by circa 1900 may have formed a small orchard. The remains of the wooded area/orchard survive, and beyond them the remainder of the field forms part of the Stone House grounds where there is now a tennis court and lawns.

At the southern extent of the proposed Conservation Area is the Haslehurst Memorial Institute built in 1909 and the War Memorial erected in the 1920s. The latter is enclosed on its northern, western, and southern sides by a beech hedge with a low brick wall and iron pedestrian gate to the east.

The Avenue forms the principal road leading from the west village into The Cross. Just to the east of the A5 road cutting the southern side of The Avenue is initially lined by a mature shelter belt of trees, which historically form part of the landscaped grounds belonging to Felton Grange. This small country house is not visible from this part of The Avenue, being enclosed firstly by a stone wall and planting into which is set the principal gateway for the property and its grounds. To the north of the stone wall is a tall brick wall with stone copings. The wall curves round to the north of Felton Grange whose upper storeys and roofs can just be glimpsed.

Beyond the property boundary of Felton Grange are modern houses and the much altered 19th century Grange Cottage. These properties are all set back from the road within gardens mostly bounded by stone walls.

Architectural quality and built form

The historic built form of both halves of the village is dominated by red brick buildings of 18th and 19th century date. In the west village the built form reflects the rural origins of the settlement where there are a high number of surviving agricultural buildings, although the majority have since been converted to residences. There are very few agricultural or outbuildings in the east village; the exception being the small brick and stone outbuildings located to the rear of The Brick House.

The farmhouses in the west village, The Manor House, Lodge Farm, Old Farm and Felton Farm are all three bay, two storey red brick buildings with central doorways, although they all differ in their massing and architectural detailing. Felton Farm has a fourth bay set back from the main building line probably a later addition. The Brick House, on Holyhead Road, is a three-bay, three storey house with central doorway. The southern end bay may be an addition or rebuilding of an earlier bay. All these properties were built, or rebuilt, between the mid-18th and mid-19th centuries.

The Yews, at The Cross, is also a two-storey, three bay house albeit constructed on a more modest scale than the others. Only its frontage is of red brick, both gables are constructed of local sandstone. Historic mapping suggests it dates to the mid-late 19th century. Of a similar period are the semi-detached red brick houses (The Hollies and Nesscliffe House)

located not far to the south of The Yews. To the north of The Yews there are two rows of red brick cottages. The first row comprises four houses although the northern two have been rendered. The second row, which terminates with the Village Stores, comprises a further four smaller houses set back from the predominant building line. Documentary evidence suggests that these properties may have existed by 1837 (Kenyon, 1904: 330).

The three largest red brick houses in the village are Felton Grange set to the west of The Cross, originally constructed in the mid-18th century, substantially extended in the mid-19th century, and the late 19th century The Court and The Hollies in the west village.

Threadneedle Cottage in west village and The Old Plough on Holyhead Road, are the only domestic dwellings with substantial surviving timber-framing. The rear of one of the bays at The Brick House, also on Holyhead Road, comprises a light timber frame perhaps indicating an earlier origin. Church Cottage, located to the south-west of the Church, also reportedly retains half-timbering in its rear portion. The remaining timber framed buildings are all agricultural buildings of late 17th or early 18th century date located at Manor Farm and Old Farm.

A small number of buildings constructed out of the local sandstone (Ruyton Stone) are also present dotted around the west village. The earliest, and largest, stone building is St Michael's Church. The most prominent stone-built property within the village is the large agricultural range, incorporating a former malthouse, part of the Grade II listed Lodge Farm. The remainder are mostly small buildings such as 'The Barn House' and the former St Michael's Hall. In the east village the most substantial stone building is the late 19th century Stone House, which is set back from the Holyhead Road behind modern houses.

There are three single storey public buildings located within both halves of the village; the former St Michael's Hall in west village, and the former Haslehurst Memorial Institute and the West Felton Public Hall on Holyhead Road. The Haslehurst Memorial Institute is the only example of an Arts and Crafts building in the proposed Conservation Area.

Stone and red brick boundary walls are a prominent feature of the west village and The Avenue, used to enclose gardens and some of the larger properties such as Lodge Farm, The Court and The Hollies as well as St Michael's church yard. A key feature of the stone wall on the west side of Threadneedle Street, now enclosing a modern house and garden, is the square opening to a Grade II listed well of probable medieval origin. The boundary wall enclosing Felton Grange is a significant feature on the southern side of The Avenue.

At the northern entrance to the east village the eastern side of Holyhead Road is lined by a low stone wall which demarcates the former Dovaston estate. It likely represents the remaining course of the original boundary wall. Low stone-built boundary walls are also occasionally present further south along Holyhead Road, often enclosing modern properties. Red brick walls are also present, although the majority are of modern construction.

Landscape character and open space

West village

The road network around the west village retains its rural settlement character with narrow winding lanes with limited street lighting and sections of narrow grass verges. There are very few hard kerbs and no footpaths, other than that leading down the south side of The Avenue and continuing for a short section of Threadneedle Street. The approach into the west village along Fox Lane from the A5 bridge and the lane, Old Rectory Gardens, which are both bounded by fields, are particularly evocative of this rural character. There are long views north from Old Rectory Gardens across the fields towards the hills to the west of Oswestry. There are also views into the surrounding countryside from various points along Fox Lane, and across the paddocks east of Threadneedle Lane where the views terminate at the tree belt flanking the A5 road cutting.

The key public open spaces within the village are the churchyard around St Michael's Church with the motte to its west, and the modern burial ground to the east. The fields to the north and west of Manor Farm are historically associated with this property and with the motte. The fields to the north may have comprised part of the former castle bailey. These fields, therefore, form a key part of the setting of this cluster of designated heritage assets which also includes St Michael's Church.

St Michael's churchyard contains many mature deciduous trees, and there are further mature trees within the gardens of The Court at the junction of Fox Lane and Threadneedle Lane. Several yew trees are present at the western end of Fox Lane two of which stand behind a stone boundary wall and may be associated with an episode of landscaping at Lodge Farm. Across the remainder of the village there are very few mature trees.

Several of the historic properties sit within gardens as do the modern houses. Many of these properties are set behind walls, sometimes topped by hedging, contiguous with the principal lanes. The majority of the historic farm buildings, even where converted, are not so frequently associated with spacious gardens, and these examples retain a greater sense of their origins as working buildings.

The four properties at the west end of The Avenue are situated within generous plots backing onto fields which enhance the rural character of this part of the road. On the opposite side of The Avenue are paddocks enclosed behind a mature hedgerow.

East village

The Cross retains its character as the heart of the east village formed by the road junction and the presence of The Punch Bowl, and the rows of properties opposite. This cluster of buildings reflects the history of Holyhead Road as the former key route linking London with the port at Holyhead.

The key open space within the east village is located on the approach from Oswestry to the north. This comprises a grassed area set behind the low stone wall and is backed by a line of mature trees. To the south beyond The Cross the road is bordered by mostly modern houses

stood within generous front gardens. The War Memorial stands alone separated from the buildings to the north by the presence of a large yew. The War Memorial stands within in its own enclosure and there is a sense of space around it which is respected by the modern housing development to the south (beyond the proposed Conservation Area boundary). The sense of space around the War Memorial is further enforced by the field to its rear, which ultimately terminates at the tree belt flanking the modern A5 road cutting. This is the only section of the road where the wider rural landscape is experienced along the Holyhead Road section of the proposed Conservation Area.

From its western end The Avenue initially retains its rural character with fields enclosed by mature hedgerows to the north and south. Further east the lane is bounded by the stone wall enclosing Felton Grange which is topped by a hedge and backed by mature tree belts; beyond this the stone wall gives way to the tall red brick wall. Behind the wall the garden trees of Felton Grange are visible. On the north side of The Avenue there are modern single storey bungalows, standing beyond the proposed Conservation Area boundary, which are set back from the road behind front gardens. In views west along The Avenue the mature tree belt along the modern A5 road cutting is visible above the bungalows providing a treed backdrop to both the north and south sides of the road.
