Financial Monitoring 2021/22 Quarter 3

Responsible Officer James Walton

email: james.walton@shropshire.gov.uk Tel: 01743258915

1. Synopsis

1.1 This is the third quarterly Financial Monitoring Report for 21/22 covering the period October to December 2021. The main budget variances and mitigating plans are outlined to help bring expenditure within budget by year end.

2. Executive Summary

2.1 The report sets out the projected revenue expenditure for the financial year 2021/22 as at Quarter 3, and the Capital expenditure up to the end of Quarter 3.

The key issues highlighted by this report are:

- The projected revenue outturn position remains within the control corridor identified at Quarter 1 (£2.591m to £9.731m) and is estimated to be £4.346m.
- Action across the Council has reduced the projected overspend by £2.985m since Quarter 1, however, during Quarter 3 social care expenditure has continued to increase beyond the budgeted level, offsetting the impact of further management action taken in other areas during Quarter 2.
- The projected General Fund balance as at 31st March 2022 is currently below the recommended level, making it difficult to fund additional one-off overspends or shortfalls in income in-year.
- Without close monitoring and action there is a risk that savings proposals currently rated as "Amber" may be undelivered, which would have the effect of increasing any underlying overspend by up to £0.523m.
- All areas of spend are being reviewed by Budget Holders and Service Managers over the final months of the financial year to reduce the currently projected overspend as far as possible.
- The projected capital outturn is £79.974m, in line with the current budget.
- Current capital expenditure of £45.793m, representing 57.3% of the budget at Quarter 3, with 75% of the year elapsed.

- In 2021/22 capital receipts are currently projected to be sufficient to finance the capital programme, with a surplus of £14.270m currently projected at the year end.
- In 2022/23 and 2023/24 onwards capital receipts are currently projected to be lower than those required for the programme to values of £31.322m and £37.428m respectively. Therefore, urgent action is required to progress assets identified for disposal in both the current and future years.
- 2.2 The revenue monitoring within this report is based on financial information held for the first nine months of the year, extrapolated to year end to produce an estimated outturn position. As the year progresses and further financial information becomes available, the quality of the estimates used within this report are expected to increase.

3. Recommendations

- 3.1 It is recommended that Members:
 - A. Note that at the end of Quarter 3 (31st December 2021), the full year revenue forecast is a potential overspend of £4.346m;
 - B. Consider the impact of this on the Council's General Fund balance.

REPORT

4. Risk Assessment and Opportunities Appraisal

- 4.1 The management of the Council's Budget is a key process in ensuring the strategic risks are mitigated and the Council can carry out the business as intended and planned for within the Financial Strategy. One of the Council's strategic risks is the "Inability to Deliver a Balanced Budget" and full budget accountability across the Council with budget holders participating fully with the financial policies and monitoring is a key control in mitigating this risk.
- 4.2 When the Council set the Financial Strategy in February 2021, which underpins this report, it took into account the requirements of the Human Rights Act, any necessary environmental appraisals and the need for Equality and Social Inclusion Impact Assessments (ESIIA) and any necessary service user consultation.

5. Financial Implications

5.1 This report sets out the financial projections for the Council in the 2021/22 Financial Year. Full details of projected spend in both the revenue and capital budgets are detailed in sections 8 -12 of this report.

6. Climate Change Appraisal

6.1 The Council's Financial Strategy supports its strategies for Climate Change and Carbon Reduction in a number of ways. The future programme includes programmes to support a range of initiatives such as moving to LED street lighting, enabling agile and mobile working dramatically, reducing travel and support for Park and Ride schemes to reduce car emissions within the

town centres. A specific climate change revenue budget has been established in 2021/22 and further details about spend in this area is included in Appendix 1 to this report. The climate change schemes involving the Council's assets or infrastructure are included within the capital programme of which further detail can be found within Appendix 9.

7. Background

- 7.1 Budget monitoring reports are produced monthly for Executive Directors, and quarterly for Cabinet, reporting on the period from May (period 2) to February (period 11) of each financial year, highlighting the anticipated year end projection.
- 7.2 The monitoring reports track progress against agreed budget decisions, consider any budget changes (including re-profiling on Capital), forecast any significant variances to the budget, and enable corrective action to be taken to attempt to ensure a balanced budget at year end.
- 7.3 Capital schemes are also reported on an exception basis, based on being delivered within budget and the expectation of being delivered within scheme timeframe.

8 Revenue Monitoring 2021/22 Budget - Overall Position

- 8.1 The Council approved a gross revenue budget of £554.318m and a net budget of £208.647m at its meeting on 25th February 2021. This net budget is after approving a savings programme of £9.804m.
- 8.2 At Quarter 3, the Council is reporting a forecast overspend of £4.346m. This position includes the Covid-19 additional spending and income losses, which are being offset in full by emergency grant funding.
- 8.3 The table below summarises the position by service:

Table 1 - Projected Outturn Variance by Service

Directorate	Revised Budget (£m)	Forecast Outturn (£m)	(Under) / Overspend (£m)	RAGY Classifi cation
Corporate Budgets	(50.196)	(52.301)	(2.106)	Y
Health and Wellbeing	3.275	2.810	(0.465)	Y
People	186.267	190.700	4.433	R
Place	68.236	68.862	0.625	G
Resources	1.069	2.943	1.874	R
Strategic Management Board	(0.004)	(0.020)	(0.016)	Y
Total	208.647	212.993	4.346	R

- 8.4 The forecast year end position for the Council is revised and reported each month. Management action is already in train to reduce the projected year-end overspend and has delivered a number of savings from Quarter 2, however this has been offset by an increase in social care expenditure beyond the budgeted level. Further management action will continue and the effect of any management decisions taken will be reflected in the final outturn report.
- 8.5 The majority of the forecast overspend can be summarised as:
 - Children's social care pressures staffing, agency staff, direct payments, internal residential home costs, legal costs c£3.7m
 - Temporary housing costs and housing benefits subsidy loss c£1.6m
 - Commercial losses, unachieved income and market shifts Commercial investments, Shire Services, Corporate Landlord – c£1.7m
 - Unachieved historical digital transformation savings c£2.5m
 - Offset by one-off underspends across the Council staffing, supplies/services, MRP, use of grant funding - (£5.1m)
- 8.6 The movement from the forecast outturn position at Quarter 2 is summarised in Appendix 2.
- 8.7 The forecast impact of Covid-19 in 2021/22 is included within the monitoring position. The Council has received £7.632m unringfenced Covid-19 grant in 2021/22 and this is fully allocated to additional costs and loss of income incurred. At present, there is not forecast to be a revenue budget deficit in 2021/22 as a result of the pandemic. Additional costs and loss of income are detailed in Appendix 3. It should be noted that all Public Health costs of managing the response to the pandemic, for example testing and tracing costs, are being funded separately from the specific Contain Outbreak Management Fund grant.

9. Update on Savings Delivery

- 9.1 The savings projections for 2021/22 have been RAG rated and are presented in Appendix 4. These projections show that 52% of the 2021/22 savings required have been rated as green with a further 5% with plans in place to be delivered (rated amber).
- 9.2 Managers have provided assurance that plans are in place to deliver the savings that have been categorised as amber. There remains a risk that these savings could impact on the outturn position for 2021/22. As the year progresses, these amber savings should gradually turn to green as the evidence becomes available. However, if the amber rated savings are not delivered as planned, the effect on the outturn position is shown in Appendix 5,and would leave the General Fund balance at a more unsustainable level than currently forecast.

10 Analysis of Outturn Projections including Ongoing Budget Pressures

10.1 The forecast outturn position of £4.346m overspend (see paragraph 8.2 above) includes ongoing budget pressures identified, as well as new pressures identified and one-off solutions to reduce the projected overspend. Appendix 6 provides a list of the ongoing budget pressures that

the Council is facing, and Appendix 7 reconciles the monitoring position to savings delivery, including budget pressures, ongoing and one-off, as well as one-off solutions. Appendix 1 provides further analysis of the projected outturn position for each service area.

10.2 Further work is required within service areas to find compensatory savings during the remainder of the year to reduce the projected overspend and ensure that no additional ongoing pressures are identified that would cause a budgetary pressure for the 2022/23 budget year and beyond.

11 General Fund Balance

- 11.1 The effect on the Council's reserves of the outturn forecast is detailed below. The Council takes a risk-based approach to determining the target balance for the General Fund. These figures were significantly increased within the risk-based review a few years ago, reflecting the remaining funding gap in these years as set out in the current Financial Strategy, and the significant level of risk associated with the uncertainty over local government funding.
- 11.2 The General Fund reserve at 31st March 2021 stood at £14.091m, significantly below its optimum desired balance.
- 11.3 Based on the current monitoring position, the General Fund balance would reduce significantly by year-end, to just £9.745m. This is not considered sustainable and, as stated elsewhere in the report, actions are already agreed to mitigate the overspend in-year.

12 Movement in Capital Programme for 2021/22

- 12.1 The capital budget for 2021/22 is continuously being monitored and changed to reflect the nature of capital projects which can be profiled for delivery over several years. In Quarter 3, there has been a net budget decrease of £38.204m for 2021/22, compared to the position reported at Quarter 2 2021/22. Appendix 9 summarises the overall movement, between that already approved, changes for Quarter 3 and the programme financing.
- 12.2 Within the financing of the Capital Programme £3.331m is funded from revenue contributions. A breakdown of revenue contributions to capital is provided at Appendix 10.
- 12.3 The actual capital expenditure at Quarter 3 is £45.793m, which represents 57.3% of the revised capital budget at Quarter 3, 75% of the year. This is low in comparison to the total budget, but in line with the average expenditure percentage at this period in previous years.
- 12.4 The level of spend is low across the programme in some areas, but equal to the level of spend in the previous year at this period. In terms of the major areas the spend position is as follows: People 57.1% (budget £18.862m), Place 62.1% (budget £51.248m), Resources 1.4% (budget £0.593m) and HRA Major Repairs & New Build Programme 34.6% (budget £9.271m).

Capital Receipts Position

- 12.5 The current capital programme is heavily reliant on the Council generating capital receipts to finance the capital programme. There is a high level of risk in these projections as they are subject to changes in property and land values, the actions of potential buyers and being granted planning permission on sites. Appendix 11 summarises the current allocated and projected capital receipt position across 2021/22 to 2024/25. A RAG analysis has been included for capital receipts projected, based on the current likelihood of generating them by the end of each financial year.
- 12.6 The projected capital receipts for the next four years are set out in Appendix 11. Based on the current programme and capital receipts in hand and projected as Green for 2021/22, the programme is affordable and there will be a balance of £14.270m to carry forward.
- 12.7 In 2022/23 and 2023/24 onwards there are currently projected shortfalls of capital receipts of £31.322m and £37.428m respectively, which may need to be financed from Prudential Borrowing and will incur future year revenue costs that are not budgeted for in the revenue financial strategy. There is an urgent pressure to progress the disposals programmed for future years, to ensure they are realised, together with realising the revenue running cost savings from some of the properties.

2021/22 PROJECTED BUDGET VARIATIONS BY SERVICE

1.1 Summary

Revenue variances are reported on an exception basis depending on the total variance from budget, and the percentage change in projection in any one period.

- Green Variance +/- 1% (or £0.05m if budget less than £5m)
- Amber Overspend between 1%-2% (or £0.05m-£0.1m if budget less than £5m)
- Red Variance over 2% (or £0.1m if budget less than £5m)
- Yellow Underspend more than 1% (or £0.05m if budget less than £5m)

In addition, given the level of savings proposals identified for delivery in 2021/22, this report also includes a second RAG rating, specifically relating to the delivery of savings. The ratings are as follows:

- Green Saving identified, quantified and confirmed
- Amber Saving identified but not yet confirmed
- Red Saving not achieved or unachievable

Directorate	Budget £	Forecast £	Variance £	RAG

There is a projected underspend of (£0.409m) within the Regulatory Services section of Health and Wellbeing. The major variances across the service area as follows:

- £0.175m of unachieved savings in relation to restructuring the services and increasing income that are not expected to be achieved, partly due to resources being assigned to handling the Covid-19 outbreak.
- £0.119m additional supplies and services expenditure and loss of income
- (£0.190m) underspends due to delays in recruiting to vacant posts.
- (£0.503m) underspends as a result of staffing resources reassigned to handling the Covid-19 pandemic being funded by the Contain Outbreak Management Fund grant.

	Portfolio Holder				
People Directorate	Adult Social Care				
Management	and Public Health	3,217,500	3,290,934	73,434	Α

Due to senior management staffing changes in this area, there is a one-off monitoring pressure due to temporary vacancy cover via an agency and one-off recruitment and staff advertising expenditure.

Adult Social Care	Portfolio Holder				
Business Support	Adult Social Care				
and Development	and Public Health	3,750,920	3,462,918	(288,002)	Υ

There is a projected underspend within Business Support and Development of (£0.288m). A summary of the major variances is as follows:

- (£0.148m) underspend on Business Support. This is largely due to staffing and costs associated with posts and is due to a mixture of carrying vacancies and utilising one-off funding streams.
- \bullet (£0.036m) underspend on Joint Training and the Professional Development Unit. This is largely due to reduced staffing costs.
- (£0.066m) underspend within Enable, due to the generation of additional income from external contracts.

- (20.000m) underspend within Enable, due to the generation of additional income from external contracts.

Cabinet 16th February 2022 Financial Monitoring 2021/22 Quarter 3

	Portfolio Holder				
Adult Social Care	Adult Social Care				
Operations	and Public Health	107,236,610	107,723,783	487,173	G

There is a projected overspend within Social Care Operations of (£0.487m). The major variances are as follows:

- \bullet (£0.623m) underspend within the staffing budget due to delays in recruiting to vacant posts. This is mainly within the community social work teams. We have also utilised other one-off funding streams to fund salary costs.
- \bullet £0.172m overspend on delivery costs. The two main pressures are within assistive technology (telecare equipment) and void supported living costs, where the lease costs of a property are not covered by tenants' Housing Benefit income. This is partly offset by reduced transport costs.
- •£0.938m overspend across the purchasing budget. Adult Social Care experienced a significant movement in its purchasing ability that took place just after Quarter 1 reporting, whereby the Council experienced a shift in the care and support marketplace, resulting in increased costs in both domiciliary care and care home placements. The Council's ability to purchase within expected local price points has been further challenged, meaning that 40% of the care and support marketplace is operating within our local price points and 60% is not within our local price points and which, therefore, presents further pressures to expenditure. This challenging position is mirrored by a national shortage within the domiciliary care marketplace, and that also impacts on our local care providers, who are struggling to recruit and maintain staffing levels, following the direct impact of the pandemic, but also as a result of care staff making the decision to leave the sector. The result of this is that the Council is supporting people into short-term residential care placements which are more expensive than planned, and are as a direct result of the lack of availability in the domiciliary care market. It is widely believed that this unavailability in the domiciliary care market is a result of the Covid-19 "aftermath" and the impacts that Covid-19 is still having on workforce resources. The vulnerable older people entering social care now have more increased care needs, and so caution is required when reviewing ongoing growth assumptions, so to plan for any increase in cases, and the unprecedented nature in how the pandemic is impacting the marketplace and the people that the Council supports.

	Portfolio Holder				
	Adult Social Care				
Housing Services	and Public Health	3,175,260	3,971,314	796,054	R

There is a projected overspend within Housing Services of £0.796m. The major variances are as follows:

- \bullet (£0.332m) underspend on staffing due to in-year staff vacancies and the use of one-off funding streams where applicable.
- £0.110m net overspend relating to brought forward unachieved 2020/21 savings, following application of (£0.140m) Covid-19 grant. Growth has been allocated in 2022/23 budget to offset those savings that will not be achieved in the longer term.
- £0.011m overspend due to one-off income pressures offset by reduced service delivery costs across services such as the handyperson team.
- £1.007m anticipated overspend on temporary accommodation, due to an unprecedented number of homelessness cases. The nature of the demand also means that the Housing service is incurring large security and repair costs that are not being covered by Housing Benefit payments. Cost savings targets have been proposed by reducing the reliance on more expensive bed and breakfast usage and a review of security costs. However, this is an ongoing pressure and growth has been applied to the 2022/23 budget, meaning the service has a much greater chance of being able to deliver a balanced budget going forward.

Children's Social	Portfolio Holder				
Care and	Children's and				
Safeguarding	Education	42,974,600	46,410,673	3,436,073	R

A budget pressure of £0.963m is forecast across the service area in relation to staffing. Most of this pressure has continued from the previous financial year and relates to agency social workers covering social worker posts. It is necessary to ensure that children who are looked after, on a Child Protection Plan or children in need of a plan are adequately supported in line with statutory timescales and this will dictate that sickness, maternity or temporary vacancies must be covered in the interim through agency staff. Although significant growth of £1.667m was built into the budget for a number of social workers posts, those staff that are responding to our recruitment campaign tend to be inexperienced ASYE social workers, so agency workers will be required to stay in post for a limited time to support these new social workers until such time that they are able to take on full caseloads. The service remains focused on recruitment and retention but there is an issue around social worker recruitment and retention with national recognition that the number of social workers enrolling on to social worker courses remains static, the Department for Education data predicting an annual shortage of qualifying social workers compared to annual vacancies of 1,720 and rising across all Local Authorities, an increase in the number of qualified social workers leaving the profession compared to the number of new entrants and an increase in demand which is highly anticipated to only increase further as recent Covid-19 restrictions are lifted. Shropshire's geographical location and dispersed population and difference in neighbouring local authorities immediate pay and reward packages has exacerbated these national issues at a local level. The recruitment campaign for children's services has been continuous and we are engaged with the graduate programmes for social work Step Up. A recent decision has been made to commission a Media Agency to develop a recruitment campaign for the recruitment of Children's social workers in Shropshire. This approach has been successful in other Local Authorities. This media campaign will produce a long term set of recruitment materials to use for future campaigns. The service also embarked on an invest to save strategy to grow our own workforce by creating social workers that are local, with good knowledge of local issues and services, and have a long-term commitment to working in Shropshire. The programme of developing our own Social Work Hub aims to create a local pathway to qualification with preferred providers either being in Shropshire or within reasonable commuting distance. To date 8 social work apprentices were appointed in January 2020 and a further 6 started in January 2021. This strategy of training our own social workers is a long-term strategy that will ensure that the local supply of qualified social workers in the market will be sufficient when future vacancies are advertised.

At the end of the 2018/19 financial year, the Council embarked on a strategy to develop additional inhouse internal residential provision. There is an overspend of £0.523m across all of the Council's internal residential homes. This overspend relates to staffing pressures whereby existing staff have worked additional hours to provide additional support to the children accommodated at these homes.

There is a £0.062m budget pressure forecast within the Placements budget area. This relates to a shortfall in contributions received from Education and Health partners towards joint funded, Social Care led placements compared with the budgeted amount. What is not reflected in this figure is the £1.646m ongoing budget pressure on placements expenditure as this pressure has been offset by the Council's Covid-19 Support Grant this year. Expenditure growth has been built into the budget for 2022/23. The Stepping Stones Project Invest to Save strategy is a long term strategy with a system-wide transformation to provide an integrated service for young people who are either in care, edging to, or on the edge of care to ensure that the young person is not passed from service to service but instead supported by a dedicated operational team at a multi-disciplinary hub. This project is intended to build capacity in order to allocate resources more effectively. This project is designed to manage the predicted growth in expenditure within placements and to achieve the £2.000m savings outlined within the Council's Financial Strategy whilst enabling the Council to continue to fulfil its statutory duties.

There is a £0.566m budget pressure forecast in the Disabled Children's Team. The budget pressure relates to Direct Payments (£0.226m) and bespoke, short term care packages of prevention and support for Disabled Children (£0.339m). This is an area which has seen a significant increase in demand in 2021/22 though it is important to note that these high cost home care packages for disabled children, are in some cases a short term alternative to placing a child in a long term residential placement.

The remaining $\pounds 1.340$ m overspend relates to one-off monitoring pressures on non-staffing budgets such as legal/barrister fees, medical assessments, transport recharges and interpreting fees across several social work teams. Some growth was built into the budget for 2021/22 but these costs have increased significantly in line with the sharp increase in demand elsewhere in the service.

Cabinet 16th February 2022 Financial Monitoring 2021/22 Quarter 3

Children's Early	Portfolio Holder				
Help, Partnerships	Children's and				
and Commissioning	Education	2,599,350	2,458,551	(140,799)	Υ

(£0.121m) of the one-off budget saving relates to temporary vacancy managements savings, where there have been delays in recruiting staff to Family Support Worker roles at the Council's six Early Help family hubs.

The remaining (£0.020m) one-off budget saving also relates to temporary vacancy managements savings, but in the Parenting and Not in Education, Employment or Training (NEETS) teams.

	та тто ит шагаатан, шир		9 ()		
	Portfolio Holder				
	Children's and				
Learning and Skills	Education	18,891,600	18,935,556	43,956	G

The largest forecast overspend within Learning and Skills relates to home to school transport, with a $\pounds 0.030$ m overspend forecast against a $\pounds 12.703$ m budget. The main area of expenditure growth in home to school transport is within the SEND transport budgets. Here, we have seen a 20% increase in actual expenditure from 2017/18 to 2020/21. The reasons for this are a combination of increased SEND passenger numbers, increased complexity of passengers leading to more bespoke transport arrangements and increased parental expectations as a result of increased knowledge and awareness of the guidance. Within this budget area, we have seen a particularly large increase in relation to transport costs for the Council's pupil-referral unit. This is as a consequence of an unprecedented increase in passenger numbers and more bespoke transport arrangements.

There is also a £0.028m overspend in the Education Access Core Team relating to a shortfall in truancy penalty notice charge income collected in this financial year relative to the budget. These one-off budget monitoring pressures are partially offset by one-off monitoring savings in the Learning and Skills Business Support Team.

	Portfolio Holder				
	Children's and				
Central DSG	Education	-	-	-	G

There is a (£0.906m) surplus reported against Central Dedicated Schools Grant (DSG). This is due to an in-year projected underspend reported on the High Needs Block of DSG of £0.982m. Significant growth has been allocated to this budget for 2021-22; the High Needs Block DSG allocation was significantly increased by £3.781m from £28.016m in 2020-21 to £31.797m in 2021-22. This is partly due to the funding floor factor in the high needs national funding formula for 2021-22 providing for every local authority to receive an underlying increase of at least 8% per head of 2 to 18 population. The other explanation for the increase is that the High Needs Block DSG now incorporates the Teachers Pay and Pension grant for both special schools and alternative provision settings. While the expenditure continues to increase year on year, the forecasted spend has not increased by as much as the increase in High Needs Block DSG allocation. This is particularly true of expenditure on Post 16 FE College placements where this budget was increased by £0.581m in anticipation of significant growth in numbers of pupils and expenditure, however we are currently reporting a (£0.442m) underspend against this budget.

A small proportion of high-cost, low incident cases can disproportionally impact the High Needs Block DSG financial position. We know that many young people have been adversely impacted over the past 2 years and this is no different for SEND children, and may well be even more pronounced. The impact over this period has the potential to see the number of vulnerable children and young people presenting with complex mental health and behavioural needs requiring provision increasing and this will have a knock on effect on the High Needs Block DSG as we meet the needs of this cohort.

The in-year surplus or underspend being reported on the DSG, removes the cumulative DSG deficit carried forward from 2020/21 of £0.870m, leaving a forecast cumulative DSG surplus position of £0.036m at the end of the 2021-22 financial year. The forecast removal of the deficit is highly positive in terms of the Council meeting the Department for Education's requirement to reduce or manage down the DSG deficit.

Street Naming & Numbering and Land Charges:- It is currently estimated that net income will be slightly greater than budget by (£0.028m).

Building Control:- It is anticipated that there will be additional costs of £0.063m in dealing with enforcement issues and dangerous structures.

Natural and Historic Environment:- There is a variance of £0.032m associated with a reduction in expected income this year, and temporary staffing arrangements costing slightly more than budget.

Development Management:- It is currently estimated that the service will be over budget by £0.234m, mainly resulting from planning application income not reaching the revised income budget set for 2021/22. Highways Development Control:- It is anticipated that this service area will be over budget by £0.109m resulting from anticipated additional 'Part 1 claims' (whereby a resident can claim compensation from the Council as a result of Council initiated highway schemes), estimated at £0.006m, additional costs resulting from agency/contractor support of £0.068m and an anticipated reduction in inspection fee income of £0.035m.

£0.035m.

Shrewsbury Shopping Centres	Portfolio Holder Physical Infrastructure (Highways, Built				
(Commercial)	Housing, Assets)	(121,530)	(124,887)	(3,357)	Υ

As fundamental changes in the retail sector continue, Darwin shopping centre has been subject to several budget pressures including negotiating less favourable lease renewals, tenants leaving and delays to relocations from Pride Hill. These ongoing pressures on the budget have created an estimated projected reduction in income that totals £0.398m. This reduction in income is partially offset by savings of (£0.229m) on premises related expenditure and (£0.067m) on supplies and services. Other pressures of £0.015m on the shopping centre management are a result of additional on-shoring legal fees, this is completely offset by a saving of (£0.120m) of Crestbridge funds not required this year.

	Deputy Leader and Portfolio Holder				
Shrewsbury	Economic Growth,				
Shopping Centres	Regeneration and				
(Development)	Planning	512,770	470,770	(42,000)	Y

Whilst gaining vacant possession of the Pride Hill centre continues, ongoing enabling works continue to mitigate for rates liabilities. Savings projected are a result of savings in premises-related expenditure and supplies and services of (£0.034m), and an increase of income of (£0.013m). Meanwhile Riverside shopping centre retains some tenants on inclusive leases and there are estimated projected budget pressures on premises-related expenditure and supplies and services of £0.003m, as well as an estimated reduction in income of £0.005m.

Transport

Portfolio Holder
Communities,
Substitute of the second of

Public Transport:- It is currently estimated that there could be cost savings amounting to (£0.301m) (assuming no significant amendments to the current Covid/social distancing guidance).

Street Cleansing and Grounds Maintenance: There are some small variances resulting in an underspend, mainly due to staffing/resource issues, currently estimated at (£0.030m).

Parking:- It remains difficult to assess the continued impact of Covid-19, the speed of recovery and the new behaviours that are starting to emerge. In addition, there is also the loss of the Smithfield carpark in Bridgnorth (due to sale by the owner). A combination of these factors is anticipated to have a significant impact on net parking income in 2021/22, currently estimated at £1.475m. Covid-19 support grants of (£1.156m) reduce the net position to a shortfall of £0.319m. Work to track demand and assess behaviour changes continues and is constantly reviewed to inform the current forecast.

Strategic:- Currently it is estimated that recharging staff costs to capital projects will reduce net revenue costs by (£0.051m).

	Physical				
	Infrastructure				
	(Highways, Built				
Highways	Housing, Assets)	8,384,170	7,685,353	(698,817)	Υ

Highways (Operations) - Significant improvements have been made to reduce the cost per repair, and adopting a policy of permanent repairs (capital) wherever possible, so less repairs of a temporary nature (revenue). This approach is anticipated to deliver budget savings of (£0.505m) in the current financial year, however, it continues to remain a challenge to adequately resource the service within the current budgets (please refer to the Highways Governance note below).

Highways (Bridges, Structures and Drainage) - Again, with this service area, the focus is to deliver permanent (capital) improvements wherever possible, however there continues to be pressure to deliver the revenue activities within the current revenue budgets. It is anticipated that there will be additional costs of £0.100m. A significant proportion of this is associated with legal expenses, plus additional staff resource and support.

Highways (Streetworks) - For 2021/22 the net income target has been increased significantly. At this point there are encouraging signs that net income will be greater than budget, by (£0.527m).

Highways (Governance) - Further to the notes above (Highways Operations), it is anticipated that the service will require additional resource in the assessment of asset condition and planning/programming of works, currently estimated at £0.233m.

	Climate Change,				
Waste	Natural Assets and				
Management	the Green Economy	31,693,490	31,781,353	87,863	G

The forecast overspend of £0.088m is derived from estimates for the collection volume adjustment (directly related to the additional number of households waste is collected from compared to the base case model) and the landfill reconciliation payment, which is the difference between the expected landfill volume and the actual landfill volume in a financial year.

Cabinet 16th February 2022 Financial Monitoring 2021/22 Quarter 3

Elections	Portfolio Holder Resources	1,281,490	1,237,404	(44,086)	Υ			
Unachieved income has been more than offset against IER grant income (£0.046m) and minor one-off in- year savings.								
Legal Services	Portfolio Holder Resources	11,970	(114,904)	(126,874)	Υ			
In-year savings have been identified, mainly from vacancy management within the service and additional income. These savings are not sustainable for future years.								
Legal Services - Child Care	Portfolio Holder Resources	(40)	283,560	283,600	R			
The pressure against legal child care costs continues to increase and is being monitored closely. Unringfenced Covid-19 grant of (£0.249m) is forecast to be applied to offset some of the increased pressures. A review of options is currently being undertaken to establish the best way of addressing increasing costs in this area on an ongoing basis, and growth has been provided accordingly within the proposed 2022/23 budget.

UPDATE ON DELIVERY OF 2021/22 SAVINGS PROPOSALS

3.1 Summary

The savings projections for 2021/22 have been RAG rated in order to establish the deliverability of the savings and any potential impact on the outturn projection for the 2021/22 financial year. RAG ratings have been categorised as follows:

Red – Savings are not solved on an ongoing basis, nor have they been achieved in the current financial year. These are reflected as unachieved within this monitoring report.

Amber – Savings have been identified on an ongoing basis in the current financial year, however there is no clear evidence to support the delivery as yet. The projected outturn within this report assumes these savings will be delivered.

Green – Savings have been identified on an ongoing basis in the current financial year, with evidence of delivery. The RAG ratings are updated monthly to determine progress on delivery.

The table below summarises the position as at 31st December 2021.

Service Area	Red £'000	Amber £'000	Green £'000	Total Savings £'000
Corporate Budgets	-	-	-	1
Health and Wellbeing	350	-	-	350
People	208	149	3,859	4,216
Place	2,307	245	928	3,480
Resources	1,322	129	307	1,758
Strategic Management Board	-	-	-	ı
Council	4,187	523	5,094	9,804
	43%	5%	52%	

Within the 2020/21 outturn report presented to Council on 15th July 2021 there was a commitment to deliver £5.954m of undelivered 2020/21 red savings in 2021/22 on an ongoing basis, plus the £3.850m new savings in 2021/22; £9.804m in total.

The figures presented above show that 52% of the 2021/22 savings required have been rated as green with a further 5% with plans in place to be delivered (rated amber).

Managers have provided assurance that plans are in place to deliver the savings that have been categorised as amber. There remains a risk that these savings could impact on the outturn position for 2021/22. As the year progresses, these amber savings should gradually turn to green as the evidence becomes available. However, if the amber rated savings are not delivered as planned, the effect on the outturn position is shown in Appendix 5. Non-delivery of the amber rated savings would result in a projected outturn overspend of £5.035m, which would leave the General Fund balance at a more unsustainable level than currently forecast.

3.2 Breakdown of Red Savings

ONGOING BUDGET PRESSURES

At Quarter 2, £8.286m ongoing budget pressures were reported. £7.578m budget growth has been allocated to offset the majority of these budget pressures within the proposed 2022/23 budget, and management action has been taken within service areas to address some of the issues reported. Therefore, at Quarter 3, ongoing budget pressures highlighted in 2021/22 have reduced significantly to £0.372m.
