

Responses to matters raised at Cabinet 9th November 2022 in relation to Site Security at TMBSS Bridgnorth

Funding has been secured for fencing and electronic gates at the Bridgnorth Education Centre, a contractor has been appointed and an installation date of February half-term agreed. This will provide improved security and safety for the students and staff at the centre. Following the completion of these works, there will be discussions between the Tuition Service (who operate the centre), the academy trust who control Oldbury Wells School and the local authority, to consider the options for increasing and fencing off part of the school's playing field for use by the centre.
