

Healthy People

Working with the NHS through the Integrated Care System, digital technology will assist people throughout their lives, remotely monitoring their health, allowing participation in online consultations, enhancing data sharing, and ultimately creating more personalised medical care. Having a better-connected county, and a population that understands and is enabled to use digital technology, will help people to remain healthy for longer, while remaining in their own homes.

To ensure that the data the organisation holds, the software it operates, and the transactions it enters into are protected as effectively as possible against continually escalating cyber threats.

To encourage residents and Council staff to develop their ability to use technology and be comfortable doing so.

ICT and Digital Technology is the life-blood of any efficient organisation, and the improvements planned in this strategy will take council efficiency (and the quality of the services it delivers) to a new level, with digital end-to-end services, a more digitally-skilled workforce, and significantly better use of data.

Healthy Organisation

Healthy Environment

Shropshire's natural beauty and strong 'green' credentials give it a head start in this area, but the technology-enabled move to remote working has been a bonus in reducing road use and hence pollution. The continued move to cloud technologies will reduce energy use by the council and creating paperless transactions will reduce the impact on the environment.

To pursue and promote a 'digital county' in which as many transactions as possible are done through digitally enabled routes, while also accepting that some transactions and individuals will be better served in the traditional manner.

A strong local economy will depend on Shropshire being a well-connected county with digitally skilled workers. The council's work in improving connectivity, improving digital skills in the population, providing support to digital start-ups, and working to make the county an attractive place for high-tech businesses will play strongly into this agenda.

Healthy Economy
