A further comment has been received which indicates:

The proposed site is connected to Whitchurch by 2 miles of winding single track minor road with limited stretches of clear visibility, then a reasonable B road after tilstock.

Their current site is connected to Whitchurch via a major A road (the A41) including a section of dual carriageway.

So while it is true that the proposed site is marginally closer, it still takes longer, and much more so in winter as the minor roads are not so well maintained.

Officer comment.

No further comment to that as set out in the report.
