

Shropshire Council Housing Strategy 2020

We welcome your feedback on Shropshire Council's Housing Strategy.

The need for a decent home in a location where the household can realise its potential is well documented. The issue is how the requirement is realised for all communities, both urban and rural. The high cost of housing and slower pace of earnings within the County has resulted in the cost of home ownership rising beyond the means of many individuals and families.

It is recognised that not all households will wish or indeed have the means to be home owners. All households should equally be provided for with public and private sector opportunities and that all households should also be able to live in a decent home.

There are those residents both old and young, who will require the assistance of the Council to secure the right home for them, whether that is through supported and assisted living or through residential care. There is a determination that by working together with the public and private sectors there can be creative solutions to the challenges. This strategy provides a focus for those interested and involved in supporting and influencing initiatives that provide the right home for all Shropshire residents.
