A0014	B033	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14(4a)	Not Specified	Not Specified	Not Specified	To achieve a 'sustainable pattern of development', balance is needed between delivery of housing, employment and environmental growth. It is not sustainable if the environment is not considered on an equal footing to the other two issues.
A0014	B034	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 3.142	Not Specified	Not Specified	Not Specified	Question the ability for A5 West, A41 and A49 corridors to provide true sustainable growth. Oppose HS2 at a national level as the environmental costs outweigh any benefits.
A0014	B035	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 3.144	Not Specified	Not Specified	Not Specified	Refers to 'environment constraints'. These are not constraints, but assets, and should not be referred to in this negative connotation. Dubious about inclusion of reference to development being supported under 'very special circumstances'.
A0060	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	No	No	Not Specified	Policy SP14 reiterates that development in the 'strategic corridors through the Green Belt or Shropshire Hills Area of Outstanding Natural Beauty will be subject to appropriate national and local policy. We consider that the proposed 41ha of employment land at Shifnal is at conflict with paragraph 137 of the NPPF, because exceptional circumstances to justify the Green Belt release in the area, has not been provided throughout the review process. The Pre-Submission Draft SLP refers to the role that Shifnal would play to provide strategic economic development in the M54 strategic corridor. The employment land proposed at RAF Cosford has not been included in the overall calculations to assess the need and it should be acknowledged that there is a plentiful supply of already committed employment land in neighbouring authorities in this corridor. It is an unsustainable assumption that Shifnal would attract such strategic employment development to justify the release of such large areas of Green Belt. Policies SP12, SP13 and SP14 allow for unplanned development (employment development supported by new housing and infrastructure) outside settlements particularly adjacent to settlements in a strategic corridor and strategic sites (including RAF Cosford) and in the Green Belt, despite presence of proposed allocations. Plan proposals are subject to Sustainability Appraisal, sites under this proposed policy approach would not. Public entitled to some certainty about development. Consider these is no need for this flexibility as this would undermine/conflict with policies for specific settlements and the Green Belt and are also contrary to the legal requirement in Section 39 of the Planning & Compulsory Purchase Act 2004 that a Plan must be prepared with the objective of contributing to the achievement of sustainable development. Where a need is identified that cannot be accommodated within the plan this can be considered on its own merits.
A0088	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13. Much Wenlock Place Plan Area	No	No	No	Lack of rationale for and locational definition (plan) of Eastern Belt M54/A45, A41/A464 and A4169/A458/A454 strategic corridor appears to be a collection of all A roads within Shropshire. Inclusion of Much Wenlock in a 'strategic growth corridor' is not explained or underpinned with evidence. Inappropriate to include Much Wenlock at junction of A4169 and A458 – already under significant pressure from movement & unsuitable to accommodate the potential development pressures that will come with being identified as within a 'Strategic Corridor'. Conflicts with need to encourage employment growth, 'soft' tourism, and sustainable development as identified in the MWNP, NPPF and LPR Reg. 19. Proposals for a strategic corridor running through Much Wenlock supports dormitory growth dependent on private car transport & contradict policies for balanced growth
A0123	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	No	No	Yes	Draft Policy SP14 appears to indicate creation of development corridors along infrastructure routes. Whilst it is understandable to focus developments in areas which are accessible and well connected, concerned this could lead to additional development in and around Oxon Hall Caravan Park, which already faces significant disturbance associated with the Shrewsbury Sustainable Urban Extension (SUE) West and potentially the North West Relief Road (NWRR) and flood alleviation schemes. Would not like to see further development which could undermine its viability (noise, dust, pollution and disturbance created both during construction and operation could discourage visitors). Would object to any proposals for a strategic corridor in the vicinity of Oxon Hall, and there are no safeguards that such developments will not be forthcoming.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0014	B033	Para 4a of draft Policy SP14 needs to achieve a balance between housing, employment and environmental growth.	SP14 criterion 4a does require that the delivery of employment development should be generally balanced with the provision of housing to ensure a sustainable pattern of development in any particular location to help deliver a sustainable growth strategy in Shropshire. However, prior to these consideration being accorded weight in any decision whether to grant approval to develop, criterion 4c requires the impacts of the proposals on a series of environmental characteristics to also be considered. SP14 criterion 4 therefore requires the three dimensions of sustainability to be taken into account as required in national policy.	No	SP14. Strategic Corridors
A0014	B034	1. Remove reference to the A5 West, A41 and A49 corridors in para 3.142. 2. Remove reference to HS2 in para 3.142.	The draft Shropshire Local Plan is supported by and has regard to a number of other strategies produced by the Council and other bodies, including the Economic Growth Strategy for Shropshire and Government proposals for formation of HS2. Proposals such as HS2 cannot be ignored and would represent an economic opportunity for Shropshire, although it is important to note that none of the proposals in the draft Shropshire Local Plan are dependent on the delivery of this project. The Economic Growth Strategy for Shropshire identifies a series of strategic corridors, which are considered the principal rail and/or strategic road routes through the County, which it identifies as the primary focus for major employment development. One such corridor is the A5 West corridor, upon which Oswestry, the largest Principal Centre and second largest settlement is located; another such corridor is the North East Shropshire and the A41 corridor, upon which Whitchurch and Market Drayton are located, both of which are considered Principal Centres within the Shropshire Local Plan; as is the A49 corridor, upon which Ludlow, a Principal Centre is located. The draft Shropshire Local Plan seeks to prioritise significant new development and infrastructure investment into the Strategic, Principal and Key Centres and identified Strategic Sites to create 'growth zones' along the identified 'strategic corridors' through Shropshire and make effective use of the rail and road routs through these corridors. This is considered a sustainable approach to the development of Shropshire.	No	SP14. Strategic Corridors
A0014	B035	1. Amend para 3.144 to amend reference to environmental constraints. 2. Remove reference to development being supported under 'very special circumstances'.	The reference to "environmental constraints" in paragraph 3.134 of the Explanation to Policy SP13 does not imply any judgements on the significance and benefits of any environmental considerations to be addressed in the development of employment land in the County. The guidance in the policy seeks to ensure that whilst these environmental considerations might have the effect of reducing the developable area of the site, any reduction in the proposed site and any consequent treatment of environmentally sensitive areas, will make a positive contribution to the quality and utility of the proposed employment development. Whilst the opportunity to undertake development in the Green Belt may be considered less than desirable, national policy does make provision for this to occur. This may happen where development accords with a prescribed lists in national policy of 'appropriate' land uses or development operations in the Green Belt. This may also occur where a landowner or a developer can show that a development is required through 'very special circumstances' defined by them in an application to develop Green Belt land. SP14 recognises that development may be permitted in 'very special circumstances' and this will ensure there is sufficient flexibility in the Local Plan to respond to changes in circumstances within the Green Belt.	No	SP14. Strategic Corridors
A0060	B014	Draft Policies SP12, SP13 and SP14 should be replaced with a general economic development policy stating any windfall/significant development that cannot be accommodated within a settlement, would be considered on its own merits having regard to the need for the development, the availability of alternative sites and other development policies in the Plan specifically relating to sustainable development, climate change and any protected status of the land.	Shropshire Council considers that the proposed strategy for supporting economic growth, development and business investment in Shropshire within the draft Shropshire Local Plan is appropriate, effective, sustainable and deliverable. It is also considered that the draft Policies of the draft Shropshire Local Plan are consistent, sufficiently flexible and positively contribute to the achievement of this strategy. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic.	No	SP14. Strategic Corridors
A0088	B006	•Much Wenlock should be deleted from being within a 'strategic growth corridor'	The A458 between Shrewsbury and Bridgnorth and leading on to connect with the Black Country is undoubtedly a strategic corridor through Shropshire as part of the principal road network. The town of Much Wenlock would also appear to support this designation lying on the junction of the A458 with the A4169 linking to Ironbridge and the redevelopment of the site of the former power station, and with Telford, Shifnal on to the M54 corridor principally through Junction 4. Nevertheless, SP14 does require consideration of the sequential preference for development in criterion 3 and the need to consider the sustainability of development proposals and their proposed location in criterion 4. It is considered that the matters raised in relation to the suitability of Much Wenlock to perform as a location for development on the A458 strategic corridor are addressed in SP14 which is considered to be consistent, sufficiently flexible and positively contribute to the achievement of the Local Plan strategy.	No	SP14. Strategic Corridors
A0123	B010	Provide safeguards that a strategic corridor will not be identified near Oxon Hall caravan site.	SP14 defines a strategic corridor along the A5 by-pass to the south and west of Shrewsbury. This places a 'strategic corridor' to the west of the Oxon Hall caravan park. It is expected that development associated with a strategic corridor should be closely located and have ready access to the corridor. In relation to the Oxon Hall caravan park, this site is already closely bounded by the existing Western Sustainable Urban Extension where the proposed Oxon Link Road is intended to link the proposed North West Relief Road to the existing A5. These current land allocations and proposed highway infrastructure projects should serve to protect the Oxon Hall caravan park from any further development proposals around the caravan site.	No	SP14. Strategic Corridors

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0286	B013	See summary of main issues.	Shropshire Council has undertaken a robust and proportionate site assessment process to inform the identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. A summary of this assessment, including an explanation of why proposed allocations and proposed safeguarded land have been identified for development is provided as an appendix to the Sustainability Appraisal of the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt including land at Shifnal proposed to be allocated for employment development and land proposed to be safeguarded for consideration in future plans for the growth and development of the town. The draft Local Plan should seek to achieve sustainable development for those areas where a planned strategy is presented in the Local Plan including Shifnal. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered to be appropriate for the draft Local Plan to address the need for new employment to be generated in Shifnal within the planned strategy for the town.	No	SP14. Strategic Corridors
A0305	B008	Delete this policy to allowing development outside settlements on greenfield and Green Belt land and delete the inclusion of RAF Cosford as a Strategic Site. Replace this policy with a general economic policy stating that any windfall/significant development that cannot be accommodated within a settlement would be considered on its own merits having regard to the need for the development, the availability of alternative sites and other development policies in the Plan specifically relating to sustainable development, climate change and any protected status of the land.	Shropshire Council considers that the proposed strategy for supporting economic growth, development and business investment in Shropshire within the draft Shropshire Local Plan is appropriate, effective, sustainable and deliverable. It is also considered that the draft Policies of the draft Shropshire Local Plan are consistent, sufficiently flexible and positively contribute to the achievement of this strategy. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local Plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0362	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Not Specified	Yes	Not Specified	Draft Policy SP14 states that the Economic Growth Strategy seeks to deliver a step change in capacity and productivity of the local economy and to contribute to this strategic corridors will be the primary focus for major development. Supporting text to draft Policy SP14 identifies Craven Arms as a Key Centre on a Strategic Corridor. As such support draft Policy SP14 as it recognises the importance of Craven Arms socially and economically.
A0363	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Not Specified	Yes	Not Specified	Policy SP14 is supported as it identifies the importance of Oswestry as a significant centre for growth in Shropshire, both socially and economically.
A0379	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Yes	No	Yes	<p>Understand the draft Shropshire Local Plan is intended to contains mechanisms (draft Policies SP12, SP13 and SP14) to address change/shortfall in demand for employment land to be addressed on windfall sites, such as SHR197VAR. However, do not consider as worded these policies (draft Policy SP14 in particular) would provide necessary flexibility to allow delivery of a multi-premises employment development of any sort of strategic scale, if a likely need were to be identified. Instead, they are only fit to secure either large single-user premises or unsustainable smaller premises, due to the requirement to identify end users from the outset. Specifically:</p> <ul style="list-style-type: none"> <li>-Draft Policy SP13 is overly restrictive other than for small-scale proposals. Major employment development (as proposed on SHR197VAR and required by the Council to supplement the short-term shortfall in supply) requires compliance with draft Policy SP14 (it must be located in a Strategic Corridor) and must also serve a named end user.</li> <li>-Draft Policy SP14 is the key draft policy in respect of delivery of additional strategic scale employment development, providing greater detail on the approach to major employment development in draft Policy SP13. It sensibly prioritises locations in close proximity to Shrewsbury/Principal/Key Centres. Of the sites in these locations it then first prioritises brownfield site with direct access to road/rail routes, these are considered very rare and if they exist should be allocated for development. It then discusses greenfield sites, but is overly restrictive, particularly with regard to the need for the proposal to deliver the greenfield site as a fully serviced and developed employment area and to meet the needs of the proposed 'end user' or occupiers. As the vast majority of enquiries are speculative (local employment market report appended to this representation confirms businesses only express interests in vacant/consented premises or for larger end users sites with outline consent/allocation where they can then specify design/layout. This is to ensure certainty that commercial needs can be met quickly), this will:</li> <li>-Not allow the Council to deliver identified shortfalls in employment land.</li> <li>-Limits prospects of successfully attracting the commercial partners sought.</li> <li>-Is cumbersome and unattractive to the development industry.</li> <li>-Would take years to see any delivery, due to the need to secure partnerships between a developer/end user.</li> <li>-Would not provide the smaller hi-tech serviced premises for which a need is identified within the Shropshire Economic Development Needs Assessment (EDNA), as these are very offer for start-ups or smaller research and development firms working on longer term projects with limited up-front cashflow.</li> <li>-Would not allow for delivery of a scheme with commercial variety (which often provides the funding for less profitable but needed types of units).</li> </ul> <p>Therefore, businesses require choice and certainty that commercial needs can be met swiftly. This will only come from the provision of a greater number of allocations or flexibility within draft Policy SP14 to allow larger sites to come forward on a more speculative basis within the burden of either a secured end user or the need for the scheme to be built out immediately. Ideally the draft Shropshire Local Plan would include both. As drafted, the strategy proposed will fail to secure step-change in the local jobs market required by Shropshire's Economic Growth Strategy or secure the minimum gross employment land requirement of 100ha at Shrewsbury over the plan period and is not sufficiently flexible to accommodate needs not anticipated in the plan so is contrary to para 81 of the NPPF and is not sound.</p> <p>The draft Shropshire Local Plan is therefore: -Not positively prepared: The plan fails to provide a strategy which, as a minimum, seeks to meet the area's objectively assessed needs in respect of employment land and jobs growth. It also fails to seize a clear opportunity to allocate a deliverable and entirely suitable commercial site at one of its key employment hubs (SHR197VAR at Shrewsbury); -Not justified: In providing a strategy which fails to meet both the quantitative and qualitative needs of the local commercial market, and in avoiding the allocation of sites such as SHR197VAR that would significantly overcome this deficit, the strategy cannot be concluded as appropriate or one which has fully taken into account reasonable alternatives. Most importantly the strategy fails to respond to the challenges identified in the EDNA; -Not effective: The employment strategy of the plan does not effectively meet the identified needs of the local commercial market on either a qualitative or quantitative basis; and -Not consistent with national policy: Fails to provide the certainty or flexibility required by the NPPF (including para 81) that would ensure that both the immediate and long term needs of the local commercial market can be met over the lifetime of the plan.</p>
A0393	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	No SP14 specific comment
A0455	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Yes	Yes	Yes	Support identification of the A41 as a strategic corridor. This road provides a vital link in the West Midlands road network. Clear merit in identifying existing important routes, in both the delivery of the Plan and also in identifying future strategies of improvement, such as junction improvements, or where deemed appropriate, road widening. Clive Barracks, Tern Hill, sits either side of the A41. Initial highways evidence collected in support of the site confirms that safe and suitable access to the site can be achieved. Improvements to the A41/A53 roundabout are proposed to improve capacity at this junction.
A0497	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Not Specified	Yes	Not Specified	Support Bridgnorth being within the eastern belt strategic corridor as a recognised location to attract inward investment and support growth. Draft Policy SP14 is however considered to be over complicated and should focus on allocated sites.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0362	B002	N/A	Shropshire Council welcomes the support for Policy SP14 as part of the employment development strategy for Shropshire which is considered to be appropriate, effective, sustainable and deliverable.	No	SP14. Strategic Corridors
A0363	B004	n/a	Shropshire Council welcomes the support for Policy SP14 as part of the employment development strategy for Shropshire which is considered to be appropriate, effective, sustainable and deliverable.	No	SP14. Strategic Corridors
A0379	B002	Amend paras 3 and 4 of draft Policy SP14 to more easily allow windfall employment development on greenfield sites either: -where it is demonstrated it clearly responds to the needs of the wider market rather than specifically a named end user; or -Where a major investment opportunity is identified that would otherwise be frustrated by adherence to the sequential approach. Proposed changes documented within appendix to representation.	Shropshire Council considers that Policy SP14 and the employment development strategy for Shropshire is appropriate, effective, sustainable and deliverable. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local Plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic. In relation to the release of additional greenfield sites through the Local Plan, it is considered that sufficient flexibility has been accorded to the release of such sites along the strategic corridors. In articulating the strategic approach for the Local Plan, Policy SP14 recognises that the County has significant areas within the Green Belt and the Shropshire AONB, and a high quality environment with a rich biodiversity, landscape and historical heritage that must be afforded appropriate protection. Consequently, further development in the 'Strategic Corridors' beyond those sites already committed or proposed to be allocated for development will be determined through a sequential preference for principal settlements, strategic sites (and strategic settlements see Minor Modifications) and brownfield redevelopment opportunities with greenfield land releases to be considered only in exceptional circumstances where the benefits of the proposal will clearly justify the development of greenfield land.	No	SP14. Strategic Corridors
A0393	B012	Para 3.144 and 3.145 Replace "should" with "must" to make this enforceable	The wording of Policy SP14 reflects the provisions in NPPF paragraph 2 that the development plan and its policies are the primary consideration for determining development proposals. Therefore, the wording of Policy SP14 does not alter the effect or enforceability of the policy where it is appropriate to approve or refuse permission for development. The policy does however, provide sufficient flexibility for circumstances where other material circumstances indicate that development may be approved contrary to the policy objectives. The wording of SP14 therefore satisfies the requirements in NPPF in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policy also recognises the need for flexibility due to the presumption in paragraph 10 in favour of sustainable development to allow for circumstances where the benefits of a proposal clearly justify development that otherwise would be considered contrary to policy.	No	SP14. Strategic Corridors
A0455	B005	N/A	Shropshire Council welcomes the support for Policy SP14 as part of the employment development strategy for Shropshire which is considered to be appropriate, effective, sustainable and deliverable.	No	SP14. Strategic Corridors

A0609	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Not Specified	Yes	Not Specified	Support identification of the 'Eastern Belt' Strategic Corridor which includes the A458 and Bridgnorth. Such an approach is justified as set out in relation to draft Policy SP14.
A0621	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Not Specified	Yes	Not Specified	Support this policy. Sites SHF018c and SH032 have been identified as potential development opportunities in the M54 Growth Corridor Strategic Options Study which forms part of the Council's Local Plan evidence base. The study undertakes a review of the extent of the opportunity associated with the M54 corridor, key opportunity sites within the corridor and draws out the economic rationale for bringing forward strategic sites. With sites located in the Green Belt, the study findings will ultimately assist with forming a case to enable release of land, on the basis of exceptional circumstances. The Council should review their decision to withdraw SHF032 when this was previously deemed acceptable for Green Belt release.
A0623	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Not Specified	Not Specified	Not Specified	In considering the implications of the strategic M54 growth corridor for Albrighton, the 'M54 Growth Corridor – Strategic Options Study' (June 2019), identifies RAF Cosford as one of the key strategic sites considering the existing levels of employment it provides and also future expansion and opportunities. This reinforces our view that the employment growth proposed for Cosford is significant and therefore a greater provision of housing is needed in close proximity to sustainably realise the employment allocation's potential.
A0629	B007-12	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	No SP14 specific comment
A0636	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	No	No	No	Policy SP14 reiterates that development in the 'strategic corridors through the Green Belt or Shropshire Hills Area of Outstanding Natural Beauty will be subject to appropriate national and local policy. We consider that the proposed 41ha of employment land at Shifnal is at conflict with paragraph 137 of the NPPF, because exceptional circumstances to justify the Green Belt release in the area, has not been provided throughout the review process. The Pre-Submission Draft SLP refers to the role that Shifnal would play to provide strategic economic development in the M54 strategic corridor. The employment land proposed at RAF Cosford has not been included in the overall calculations to assess the need and it should be acknowledged that there is a plentiful supply of already committed employment land in neighbouring authorities in this corridor. It is an unsustainable assumption that Shifnal would attract such strategic employment development to justify the release of such large areas of Green Belt.
A0637	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	No	No	No	Policy SP14 reiterates that development in the 'strategic corridors through the Green Belt or Shropshire Hills Area of Outstanding Natural Beauty will be subject to appropriate national and local policy. We consider that the proposed 41ha of employment land at Shifnal is at conflict with paragraph 137 of the NPPF, because exceptional circumstances to justify the Green Belt release in the area, has not been provided throughout the review process. The Pre-Submission Draft SLP refers to the role that Shifnal would play to provide strategic economic development in the M54 strategic corridor. The employment land proposed at RAF Cosford has not been included in the overall calculations to assess the need and it should be acknowledged that there is a plentiful supply of already committed employment land in neighbouring authorities in this corridor. It is an unsustainable assumption that Shifnal would attract such strategic employment development to justify the release of such large areas of Green Belt.
A0646	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Yes	Yes	Yes	The Estate considers the Councils approach to development in Shrewsbury as set out within SP14 is sound when considered against the tests set out in para 35 of the NPPF.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0609	B010	N/A	Shropshire Council welcomes the support for Policy SP14 as part of the employment development strategy for Shropshire which is considered to be appropriate, effective, sustainable and deliverable.	No	SP14. Strategic Corridors
A0621	B014	Allocate SHF032	Shropshire Council welcomes the support for Policy SP14 as part of the employment development strategy for Shropshire which is considered to be appropriate, effective, sustainable and deliverable. The matter of the decision not to release sites SHF018c and SHF032 from the Green Belt are considered in relation to Policy S15.1 Shifnal.	No	SP14. Strategic Corridors
A0623	B012	The employment growth proposed for Cosford is significant and therefore a greater provision of housing is needed in close proximity to sustainably realise the employment allocation's potential.	The draft Shropshire Local Plan identifies that RAF Cosford will be considered for employment development related to "its existing role as a centre of excellence for both UK and International Defence Training, host a specialist aviation academy, support opportunities to co-locate other Ministry of Defence units and activities, facilitate the intensification and expansion of the RAF Museum Cosford and allow the formation of a new headquarters for the Midland Air Ambulance Charity". There is no intention to locate employment development on the site beyond its use by the military and charitable organisations. In this instance, it is not considered necessary to further increase the level of new housing provision in Albrighton since the use of RAF Cosford for employment purposes will only create a housing need for military accommodation and not for further open market housing development.	No	SP14. Strategic Corridors
A0629	B007-12	Para 3.144 and 3.145 Replace "should" with "must" to make this enforceable	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	SP14. Strategic Corridors
A0636	B013	See summary of main issues.	Shropshire Council has undertaken a robust and proportionate site assessment process to inform the identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. A summary of this assessment, including an explanation of why proposed allocations and proposed safeguarded land have been identified for development is provided as an appendix to the Sustainability Appraisal of the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt including land at Shifnal proposed to be allocated for employment development and land proposed to be safeguarded for consideration in future plans for the growth and development of the town. The draft Local Plan should seek to achieve sustainable development for those areas where a planned strategy is presented in the Local Plan including Shifnal. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered to be appropriate for the draft Local Plan to address the need for new employment to be generated in Shifnal within the planned strategy for the town.	No	SP14. Strategic Corridors
A0637	B013	See summary of main issues. A0682	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Not Specified	Not Specified	Not Specified	<p>Welcome upgrade of draft Policy SP14 to a 'strategic' one.</p> <p>Support purpose of this draft policy to enable Shropshire to respond positively to demand from new businesses and note recognition that such inward investment needs to be supported by delivery of housing.</p> <p>Proposed large employment allocation in Shifnal is strongly supported as a means of sustainably accommodating inward investment, enabling local business to grow, providing an opportunity to balance housing and employment, and using advantages of the M54 corridor. However, realistic prospect that housing delivery will be curtailed by the proposed housing requirement in parallel with delivery of this employment allocation. Some displacement of people living in Shifnal but working elsewhere could occur, but enhancement in provision of rail transport services, alongside other factors, is likely to make it challenging to realise this quickly. Creation of jobs will elevate demand for housing, therefore to fully realise opportunities associated with the M54 corridor, greater flexibility regarding advancement of safeguarded land within the proposed Plan period should be provided. Shifnal's location on the M54/A5 East growth corridor, and the strong connectivity benefits this creates (enhanced by recent improvements to rail services part stimulated by development), are important factors in current/future demand.</p> <p>Land between Park Lane and the A464 is sustainably located with good access to services and facilities and is suitable for 175-200 dwellings, it can assist in accommodating sustainable growth of Shifnal as part of a Strategic Corridor. The vision framework (appended to this representation) demonstrates consideration of constraints and opportunities and deliverability of the site.</p>
A0006	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	No	No	No	<p>Much Wenlock Neighbourhood Plan ignored - SC have failed to offer any meaningful direct consult the community on an important topic such as the designation of the main route through Much Wenlock (including the conservation area) The A458 and the A4169 into a commercial strategic corridor to support economic growth within the county.</p>
A0028	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Not Specified	Not Specified	Not Specified	<p>It is difficult to connect M54/A5, A41/A464 and A4169/A458/A454</p> <p>The Council's inclusion of the A4169 and A458 points to Much Wenlock as being part of the 'Eastern Belt Strategic Corridor'. It should be clear that this section of those two roads is unsuitable to accommodate the potential development pressures that will come with being identified as within a 'Strategic Corridor'.</p>
A0137	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	No	No	No	<p>Support overall aims of draft Policy SP14. However, object to its current wording and consider it renders the draft Shropshire Local Plan unsound, on the basis that it does not identify that development on strategic corridors will be located on identified 'Strategic Settlements' in the draft Shropshire Local Plan.</p> <p>As such, it does not positively or effectively respond to identified strategic priorities, notably of the Shropshire Economic Growth Strategy which seeks to deliver a 'step-change' in capacity and productivity of the local economy and to focus major employment development on strategic corridors. It also does not positively or effectively respond to relevant cross-boundary strategic matters which include the significant unmet needs of the Black Country.</p>
A0014	B036	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Not Specified	Not Specified	Not Specified	<p>What constitutes an 'Estate'; how small or large an enterprise?</p> <p>'Estates' have great potential to contribute to Nature Recovery Networks and so there should be reference to the forthcoming Nature Recovery Strategy.</p>
A0060	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	No	No	Not Specified	<p>There is no justification for Policy SP15 to support the non-statutory plans of larger estate owners. The implementation of Policy SP15 would support the long-term vision and objectives of Bradford Estates to promote a new settlement at Tong providing support in principle for a development not currently proposed in the Local Plan housing requirement or housing supply projection (support decision not to include this site). This would prejudice the ability of the public to comment on the specific development proposal and to influence the degree of future flexibility in permitting further development. This is despite the intention to have "meaningful public consultation" which could be open to wide interpretation depending on the point of view of the promoters or planning authority etc. Accordingly, there is a concern that Policy SP15 allows Bradford Estates to promote this scheme without any justification for the special privileges given to larger landowners in the County. SP15 prejudices the community against larger landowners which can be argued as being contrary to the Equality Act.</p> <p>There is little explanation for this policy and consider Estate proposals could be considered under wider draft Policies.</p> <p>No estate plans are provided as part of the Key evidence for the draft Shropshire Local Plan, contrary to Gunning principles.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0682	B014	Land proposed to be safeguarded for future development should instead be allocated for development. If these sites remain as safeguarded land, a mechanism should be included that allows for them to come forward during the proposed Plan period, if the need arises.	Shropshire Council has undertaken a robust and proportionate site assessment process to inform identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. A summary of this assessment, including an explanation of why proposed allocations and proposed safeguarded land have been identified for development is provided as an appendix to the Sustainability Appraisal of the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan. With regard to the proposed safeguarded land, it is noted that the NPPF states Plans should "make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development".	No	SP14. Strategic Corridors
A0006	B001	SC need to carry out its own traffic assessments and consult with those within the town whose concern would not be just the increase in traffic along the route but the congestion caused at the Gaskell corner with dangerous pedestrian crossing points. SC are relying on an inadequate assessment by the developers of Ironbridge Power Station. There has been absolutely no consultation on this point.	The A458 between Shrewsbury and Bridgnorth and leading on to connect with the Black Country is undoubtedly a strategic corridor through Shropshire as part of the principal road network. The town of Much Wenlock would also appear to support this designation lying on the junction of the A458 with the A4169 linking to Ironbridge and the redevelopment of the site of the former power station, and with Telford, Shifnal on to the M54 corridor principally through Junction 4. Nevertheless, SP14 does require consideration of the sequential preference for development in criterion 3 and the need to consider the sustainability of development proposals and their proposed location in criterion 4. It is considered that the matters raised in relation to the suitability of Much Wenlock to perform as a location for development on the A458 strategic corridor are addressed in SP14 which is considered to be consistent, sufficiently flexible and positively contribute to the achievement of the Local Plan strategy.	No	SP14. Strategic Corridors
A0028	B001	Clarification on how M54/A5, A41/A464 and A4169/A458/A454 all connect is needed. A4169 and A458 should not be included.	The A458 between Shrewsbury and Bridgnorth and leading on to connect with the Black Country is undoubtedly a strategic corridor through Shropshire as part of the principal road network. The town of Much Wenlock would also appear to support this designation lying on the junction of the A458 with the A4169 linking to Ironbridge and the redevelopment of the site of the former power station, and with Telford, Shifnal on to the M54 corridor principally through Junction 4. Nevertheless, SP14 does require consideration of the sequential preference for development in criterion 3 and the need to consider the sustainability of development proposals and their proposed location in criterion 4. It is considered that the matters raised in relation to the suitability of Much Wenlock to perform as a location for development on the A458 strategic corridor are addressed in SP14 which is considered to be consistent, sufficiently flexible and positively contribute to the achievement of the Local Plan strategy.	No	SP14. Strategic Corridors
A0137	B010	Include reference to 'Strategic Settlements' within para 3 of draft Policy SP14. Consider Land at Junction 3 should be included as a Strategic Settlement in the draft Shropshire Local Plan and is located in the M54 Strategic Corridor.	It is considered that an employment land provision at Junction 3 of the M54 Motorway is not required during this Plan period to 2038. The employment policies SP12, SP13 and SP14 would still be sufficiently flexible to accommodate such an outcome in the event that the circumstances determining the strategy for the Local Plan were to change considerably during the Plan period. It is recognised that the term 'strategic settlements' is used within the Local Plan and SP14 criterion 3b and paragraph 3.141 should recognise this through the insertion of these words.	Yes	SP14. Strategic Corridors
A0014	B036	Provide a definition of an estate. Include reference to Nature Recovery Networks within the policy.	Noted. It is not considered that a definition of an Estate need to be specifically provided within the draft Shropshire Local Plan. The draft Shropshire Local Plan should be read as a whole. Draft Policy DP12 addresses biodiversity net gain, it includes "Ensuring that all development delivers at least a 10% net gain for biodiversity in accordance with the Environment Act, any future Local Nature Recovery Strategy (LNRS) and policies DP14, DP15, DP16 and DP22."	No	SP15. Whole Estate Plans
A0060	B015	There is a strong objection to policy SP15 and its potential interpretation which may prejudice the future protection of the Green Belt and public participation on future development proposals and the Council must address the omission of the Estate Plans in the Local Plan evidence base by making them available on the public.	Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Draft Policy SP15 recognises that Whole Estate Plans will be endorsed by the Council and used as a material consideration in decision making where the objectives, policies and land use proposals of the Whole Estate Plan complement and are consistent with the objectives and policies of the Local Plan; and it has been prepared in collaboration with relevant external organisations, including statutory bodies; and it has been subject to meaningful public consultation.	No	SP15. Whole Estate Plans

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0094	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Not Specified	No	Not Specified	Draft Policy SP15 is positive in that it provides a framework for long term vision of estate land within Shropshire. However, it is considered to be unsound in that other than a broad statement it does not recognise the relationship to other draft policies in the draft Shropshire Local Plan and does not set out a positive framework for how this draft Policy should work in conjunction with other policies. It is therefore not considered effective. In particular, draft Policy SP15 needs to be clear on the relationship with other rural settlements, particularly Community Hubs (and draft Policy SP8). Draft Policy SP15 risks spreading and merging development between defined development boundaries of Community Hubs and neighbouring estate land, significantly increasing housing numbers beyond proposed guidelines, which have been set and consulted upon as the most appropriate on sustainability and character grounds. The Policy needs to reflect the distinction between Community Hubs and Estate Land to ensure these policies work in combination and do not result in a sprawl of inappropriate rural development.
A0137	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	No	No	No	Support principle of draft Policy SP15, but object to current wording and consider it renders the draft Shropshire Local Plan unsound as it is not clearly written, contrary to para 16 of the National Planning Policy Framework (NPPF). For example, it is not clear how to interpret what is meant by 'meaningful' public consultation. In addition, sections (b) and (c) could easily be combined into one criteria.
A0149	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Not Specified	No	Not Specified	The amended wording of the Whole Estate Plan policy (SP15) does not adequately address the concerns raised in our previous representation. The policy as written will continue to prevent the Estate using a Whole Estate Plan to bring forward projects that conflict with Local Plan, undermining proposals that could contribute to the achievement of locally led sustainable development.
A0286	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	No	No	No	There is no justification for Policy SP15 to support the non-statutory plans of larger estate owners. The implementation of Policy SP15 would support the long-term vision and objectives of Bradford Estates to promote a new settlement at Tong providing support in principle for a development not currently proposed in the Local Plan housing requirement or housing supply projection. This would prejudice the ability of the public to comment on the specific development proposal and to influence the degree of future flexibility in permitting further development. This is despite the intention to have "meaningful public consultation" which could be open to wide interpretation depending on the point of view of the promoters or planning authority etc. Accordingly, there is a concern that Policy SP15 allows Bradford Estates to promote this scheme without any justification for the special privileges given to larger landowners in the County. SP15 prejudices the community against larger landowners which can be argued as being contrary to the Equality Act.
A0305	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	No	No	Yes	Local Plan Appendix 3 states 'Key' evidence supporting this policy are final or draft Estate Plans and the Sustainability Appraisal but no such estate plans are included in the Plan evidence base to justify Policy SP15 and on 20 <sup>th</sup> January, a Planning Officer confirmed "no estate plans have been prepared and agreed". There is also no Sustainability Appraisal to support Policy SP15 as there are no sites proposed for development in this policy and with no supporting evidence the policy is unsound. Where proposals were to be made by an Estate they could be considered as and when they arise under the other policies of the Plan. Policy SP15, in approving a "long term vision objectives" which may not be development specific, could provide future flexibility that prejudices the public's ability to comment on development proposals and imply consent 'in principle' for estates development. There are many objections to proposal by Bradford Estates for a Garden Village in the Green Belt at Junction 3 of the M54. This is not part of the Local Plan, but SP15 would permit this proposal to be submitted for planning approval to override Green Belt policy and the public's involvement in major development proposals. Policy SP15 favours a small section of the community i.e. large landowners at the behest of all other landowners in the County – and is unfair, unequal and contrary to equality legislation.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0094	B004	Policy SP15 should explicitly reflect the relationship to Policies SP8, making clear that any land within whole estate plans falling within defined Community Hubs or Clusters needs to be consistent with the relevant settlement policy requirements and those of SP7 in relation to housing guidelines and development boundaries.	Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Draft Policy SP15 recognises that Whole Estate Plans will be endorsed by the Council and used as a material consideration in decision making where the objectives, policies and land use proposals of the Whole Estate Plan complement and are consistent with the objectives and policies of the Local Plan; and it has been prepared in collaboration with relevant external organisations, including statutory bodies; and it has been subject to meaningful public consultation.	No	SP15. Whole Estate Plans
A0137	B011	Update para 1b. of draft Policy SP15 to include preparation in collaboration with 'the local community'. Delete para 1c. of draft Policy SP15 regarding meaningful public consultation. As it is unclear and can be addressed through the proposed change to para 1b.	Noted. Shropshire Council considers that it is appropriate to require Whole Estate Plans to be endorsed by Shropshire Council and used as a material planning consideration to have been subject to meaningful public consultation. Meaningful public consultation will depend on the nature, scope and context of the Whole Estate Plan.	No	SP15. Whole Estate Plans
A0149	B004	Add additional wording (in asterisks) to section a) so that it reads: 1. Whole Estate Plans are a method by which Estates can articulate their long-term vision for their land and premises interests and how these will be achieved. In recognition of the nature of Shropshire, and the potentially important role they play in managing land within the County, Whole Estate Plans prepared by Estates will be endorsed by the Council *and will be given significant weight* in decision making where they have demonstrated all of the following: a. The objectives, policies and land use proposals of the Whole Estate Plan *are in general conformity* with the strategic policies of the Local Plan; b. It has been prepared in collaboration with relevant external organisations, including statutory bodies; and c. It has been subject to meaningful public consultation.	Noted. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. However, Shropshire Council also considers that it is appropriate for Whole Estate Plans to be endorsed by the Council and used as a material consideration in decision making to have objectives, policies and land use proposals that complement and are consistent with the objectives and policies of the Local Plan. The amount of weight that can be applied to Whole Estate Plans that represent material considerations within the Planning process will be determined by the decision taker as it depends on the nature, scope and context of the Whole Estate Plan.	No	SP15. Whole Estate Plans
A0286	B014	There is a strong objection to policy SP15 and its potential interpretation which may prejudice the future protection of the Green Belt and public participation on future development proposals and the Council must address the omission of the Estate Plans in the Local Plan evidence base by making them available on the public.	Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Draft Policy SP15 recognises that Whole Estate Plans will be endorsed by the Council and used as a material consideration in decision making where the objectives, policies and land use proposals of the Whole Estate Plan complement and are consistent with the objectives and policies of the Local Plan; and it has been prepared in collaboration with relevant external organisations, including statutory bodies; and it has been subject to meaningful public consultation.	No	SP15. Whole Estate Plans
A0305	B009	Policy SP15 should be deleted from the Plan.	Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Draft Policy SP15 recognises that Whole Estate Plans will be endorsed by the Council and used as a material consideration in decision making where the objectives, policies and land use proposals of the Whole Estate Plan complement and are consistent with the objectives and policies of the Local Plan; and it has been prepared in collaboration with relevant external organisations, including statutory bodies; and it has been subject to meaningful public consultation.	No	SP15. Whole Estate Plans

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0312	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	No	No	Yes	Local Plan Appendix 3 states 'Key' evidence supporting this policy are final or draft Estate Plans and the Sustainability Appraisal but no such estate plans are included in the Plan evidence base to justify Policy SP15 and on 20 <sup>th</sup> January, a Planning Officer confirmed "no estate plans have been prepared and agreed". There is also no Sustainability Appraisal to support Policy SP15 as there are no sites proposed for development in this policy and with no supporting evidence the policy is unsound. Where proposals were to be made by an Estate they could be considered as and when they arise under the other policies of the Plan. Policy SP15, in approving a "long term vision objectives" which may not be development specific, could provide future flexibility that prejudices the public's ability to comment on development proposals and imply consent 'in principle' for estates development. There are many objections to proposal by Bradford Estates for a Garden Village in the Green Belt at Junction 3 of the M54. This is not part of the Local Plan, but SP15 would permit this proposal to be submitted for planning approval to override Green Belt policy and the public's involvement in major development proposals. Policy SP15 favours a small section of the community i.e. large landowners at the behest of all other landowners in the County – and is unfair, unequal and contrary to equality legislation.
A0313	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	No	No	Not Specified	There is no justification for Policy SP15 to support the non-statutory plans of larger estate owners. The implementation of Policy SP15 would support the long-term vision and objectives of Bradford Estates to promote a new settlement at Tong providing support in principle for a development not currently proposed in the Local Plan housing requirement or housing supply projection. This would prejudice the ability of the public to comment on the specific development proposal and to influence the degree of future flexibility in permitting further development. This is despite the intention to have "meaningful public consultation" which could be open to wide interpretation depending on the point of view of the promoters or planning authority etc. Accordingly, there is a concern that Policy SP15 allows Bradford Estates to promote this scheme without any justification for the special privileges given to larger landowners in the County. SP15 prejudices the community against larger landowners which can be argued as being contrary to the Equality Act.
A0348	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Not Specified	Yes	Not Specified	Historic England welcomes the requirement in this policy that 'Whole Estate Plans' must be prepared by Estates in collaboration with relevant external organisations, including statutory bodies and is keen to work with landowners to ensure sustainable estate management with regard to the historic environment.
A0355	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Not Specified	No	Not Specified	Welcome proposed use of Whole Estate Plans as a material consideration in draft Policy SP15, but concerned wording renders it ineffective and fails the 'justified', 'effective' and 'consistent with national policy' tests of soundness, as the requirement for the objectives, policies and land use proposals of Whole Estate Plans to be consistent with the objectives and policies of the draft Shropshire Local Plan for it to be considered a material planning consideration: - Renders Whole Estate Plan's marginal in terms of added value in the planning process, will result fewer coming forward, make them of low value and as such renders the policy ineffective. - Para 3.153 of the explanation notes Whole Estate Plans may add value to decision making but do not replace the primacy of the Local Plan. Do not disagree, but planning law allows for consideration of material considerations (para 2 of the National Planning Policy Framework (NPPF)), including material considerations not consistent with the Local Plan, such flexibility is necessary. As such it is poorly justified and does not wholly capture the statutory position. - Context and national policy will change during the proposed Plan period. A Whole Estate Plan that reflects such change might well not be consistent with the objectives and policies of the Local Plan, and as such would not be eligible to be endorsed by the Council. - It unnecessarily ties the Council's hands in making future decisions on Whole Estate Plans and renders the policy ineffective. - Is contrary to para 11a of the NPPF regarding positively seeking opportunities to meet development needs and be sufficiently flexible to adapt to rapid change." Overview document for a Sansaw Whole Estate Plan provided as an appendix to the representation. Example of a policy cross-referencing Whole Estate Plans from the recently adopted South Downs Local Plan provided within the representation.
A0410	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Not Specified	No	Not Specified	Priority for land use policy should be mitigating against the effects of both the climate emergency and ecological emergency. This should be achieved through Whole Shropshire Plans rather than Whole Estate Plans. If many Estates are preparing Whole Estate Plans, they should have been considered as part of the Local Plan Review. Further, Estates like any developer, can put in planning applications tested against the policies in the Local Plan. Draft Policy SP15 does not offer any certainty as to what constitutes (1) an "Estate" or (2) "meaningful consultation". The Council normally only adopts/endorse documents as material considerations, where they cover a substantial area and have been subject to statutory consultation. As such, draft Policy SP15 seems to not be justified by reference to other parts of the draft Shropshire Local Plan, and is superfluous. It would be better omitted.
A0445	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Not Specified	No	Not Specified	Although Policy SP15 provides a framework for a long term vision of estate land within Shropshire, it is considered to be unsound because it does not recognise its relationship to other policies in the Plan and does not set out a framework for how this Policy relates to other policies in the Plan. It is therefore not considered effective. This Policy needs to be clear on the relationship between other rural settlements in the Plan, particularly Community Hubs. Without being specific on the relationship to Policy SP8, the Policy provides no framework for development for rural areas and poses the risk of the spreading and merging of development between the defined development boundaries of Community Hubs and neighbouring estate land. This would significantly increase housing numbers beyond the housing guideline for these settlements which has been set and consulted upon as the most appropriate on sustainability and character grounds. The Policy needs to reflect the distinction between Community Hubs and Estate Land to ensure these policies work in harmony and do not result in inappropriate rural development.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0312	B012	Policy SP15 should be deleted form the Plan.	Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Draft Policy SP15 recognises that Whole Estate Plans will be endorsed by the Council and used as a material consideration in decision making where the objectives, policies and land use proposals of the Whole Estate Plan complement and are consistent with the objectives and policies of the Local Plan; and it has been prepared in collaboration with relevant external organisations, including statutory bodies; and it has been subject to meaningful public consultation.	No	SP15. Whole Estate Plans
A0313	B014	There is a strong objection to policy SP15 and its potential interpretation which may prejudice the future protection of the Green Belt and public participation on future development proposals and the Council must address the omission of the Estate Plans in the Local Plan evidence base by making them available on the public.	Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Draft Policy SP15 recognises that Whole Estate Plans will be endorsed by the Council and used as a material consideration in decision making where the objectives, policies and land use proposals of the Whole Estate Plan complement and are consistent with the objectives and policies of the Local Plan; and it has been prepared in collaboration with relevant external organisations, including statutory bodies; and it has been subject to meaningful public consultation.	No	SP15. Whole Estate Plans
A0348	B014	n/a	Noted; no actions proposed.	No	SP15. Whole Estate Plans
A0355	B004	Modify section 1a of draft Policy SP15 to remove reference to the objectives, policies and land use proposals of Whole Estate Plans being consistent with objectives and policies of the Local Plan.	Noted. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. However, Shropshire Council also considers that it is appropriate for Whole Estate Plans to be endorsed by the Council and used as a material consideration in decision making to have objectives, policies and land use proposals that complement and are consistent with the objectives and policies of the Local Plan.	No	SP15. Whole Estate Plans
A0410	B009	Draft Policy SP15 is unnecessary and should be deleted. If not: Para 1c should be updated to state "It has been subject to the same level of public consultation as is required for Neighbourhood Plans." A definition of what minimum size constitutes an Estate should be included in the text.	Noted. It is not considered that a definition of an Estate need to be specifically provided within the draft Shropshire Local Plan. Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Draft Policy SP15 recognises that Whole Estate Plans will be endorsed by the Council and used as a material consideration in decision making where the objectives, policies and land use proposals of the Whole Estate Plan complement and are consistent with the objectives and policies of the Local Plan; and it has been prepared in collaboration with relevant external organisations, including statutory bodies; and it has been subject to meaningful public consultation. Meaningful public consultation will depend on the nature, scope and context of the Whole Estate Plan.	No	SP15. Whole Estate Plans
A0445	B004	Policy SP15 should explicitly reflect the relationship to Policies SP8, making clear that any land within whole estate plans falling within defined Community Hubs or Clusters needs to be consistent with the relevant settlement policy requirements and those of SP7 in relation to housing guidelines and development boundaries.	Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0446	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Not Specified	No	Not Specified	Although Policy SP15 provides a framework for a long term vision of estate land within Shropshire, it is considered to be unsound because it does not recognise its relationship to other policies in the Plan and does not set out a framework for how this Policy relates to other policies in the Plan. It is therefore not considered effective. This Policy needs to be clear on the relationship between other rural settlements in the Plan, particularly Community Hubs. Without being specific on the relationship to Policy SP8, the Policy provides no framework for development for rural areas and poses the risk of the spreading and merging of development between the defined development boundaries of Community Hubs and neighbouring estate land. This would significantly increase housing numbers beyond the housing guideline for these settlements which has been set and consulted upon as the most appropriate on sustainability and character grounds. The Policy needs to reflect the distinction between Community Hubs and Estate Land to ensure these policies work in harmony and do not result in inappropriate rural development.
A0495	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Not Specified	No	Not Specified	Support the aim of draft Policy SP15 and fully endorse the benefits of a Council endorsed Whole Estate Plan for the future of those living and working within the rural areas of Shropshire. However, concerned about the requirement for public consultation. Specifically, very much support the need for public consultation, without which the degree of weight that can be applied to a Whole Estate Plan is limited, however neither draft Policy SP15 or its Explanation is provided on what this means, so it is open to interpretation. Consider the level of public consultation should be reasonable and proportionate to the relevant Whole Estate Plan, recognising that the scope, detail and nature of the strategy varies between them. Consider that whilst consultation with the residents of the land owned by the Estate is reasonable, it is not considered wider public consultation would be reasonable or appropriate.
A0607	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Not Specified	No	Not Specified	Although Policy SP15 provides a framework for a long term vision of estate land within Shropshire, it is considered to be unsound because it does not recognise its relationship to other policies in the Plan and does not set out a framework for how this Policy relates to other policies in the Plan. It is therefore not considered effective. This Policy needs to be clear on the relationship between other rural settlements in the Plan, particularly Community Hubs. Without being specific on the relationship to Policy SP8, the Policy provides no framework for development for rural areas and poses the risk of the spreading and merging of development between the defined development boundaries of Community Hubs and neighbouring estate land. This would significantly increase housing numbers beyond the housing guideline for these settlements which has been set and consulted upon as the most appropriate on sustainability and character grounds. The Policy needs to reflect the distinction between Community Hubs and Estate Land to ensure these policies work in harmony and do not result in inappropriate rural development.
A0629	B027	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Yes	No	Yes	Draft Policy SP15 does not encourage estate owners to consider opportunities in low carbon energy generation. This is of particular concern in that the largest proportion of Shropshire land area comes under such ownership.
A0633	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	No	No	No	Appendix 3 of the Plan states that "Key" evidence supporting this policy are Estate Plans prepared and in preparation and sustainability appraisal. However, no such estate plans are on the supporting evidence base and when challenged on this, in an e-mail of 20th January, the Planning Officer confirmed that "no estate plans have been prepared and agreed". Also, as there are no sites proposed, there can be no sustainability appraisal to support this policy. The inclusion of this policy is unsound with no evidence to support its inclusion. There is no reason why any proposals by an Estate could not be considered as and when they arise under the other policies of the Plan. By approving a "long term vision and objectives" which by definition may not be development specific, could allow for a degree of future flexibility that would prejudice the public's ability to have a say on a specific development proposal, as a decision in principle would already have been allowed. There were many objections to a proposal from Bradford Estates for a Garden Village in the Green Belt at Junction 3 of the M54. The Council have not included this proposal in the Plan, but by including this policy, it would allow the same proposal to be submitted as being in accord with this policy, overriding Green Belt policy concerns and the public's involvement in major development proposals. The policy by favouring a small section of the community – large landowners at the behest of all other landowners in the County – is an unfair and unequal policy contrary to equality legislation.
A0636	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	No	No	No	There is no justification for Policy SP15 to support the non-statutory plans of larger estate owners. The implementation of Policy SP15 would support the long-term vision and objectives of Bradford Estates to promote a new settlement at Tong providing support in principle for a development not currently proposed in the Local Plan housing requirement or housing supply projection. This would prejudice the ability of the public to comment on the specific development proposal and to influence the degree of future flexibility in permitting further development. This is despite the intention to have "meaningful public consultation" which could be open to wide interpretation depending on the point of view of the promoters or planning authority etc. Accordingly, there is a concern that Policy SP15 allows Bradford Estates to promote this scheme without any justification for the special privileges given to larger landowners in the County. SP15 prejudices the community against larger landowners which can be argued as being contrary to the Equality Act.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0446	B004	Policy SP15 should explicitly reflect the relationship to Policies SP8, making clear that any land within whole estate plans falling within defined Community Hubs or Clusters needs to be consistent with the relevant settlement policy requirements and those of SP7 in relation to housing guidelines and development boundaries.	Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Draft Policy SP15 recognises that Whole Estate Plans will be endorsed by the Council and used as a material consideration in decision making where the objectives, policies and land use proposals of the Whole Estate Plan complement and are consistent with the objectives and policies of the Local Plan; and it has been prepared in collaboration with relevant external organisations, including statutory bodies; and it has been subject to meaningful public consultation.	No	SP15. Whole Estate Plans
A0495	B001	Criterion c) of draft Policy DP15 should be amended as follows: c) it has been subject to an appropriate level of public consultation, to be agreed with the Local Planning Authority. The explanation of draft Policy DP15 should also be updated to reflect this change, to state: With regard to public consultation, it is recognised that not all plans will contain equivalent levels of detail and may focus upon different aspects of setting out and delivering their long-term vision. As such, the nature and scope of any public consultation should be tailored to reflect the nature of the Whole Estate Plan. This should be agreed with the Local Planning Authority prior to the consultation taking place.	Noted. Shropshire Council considers that it is appropriate to require Whole Estate Plans to be endorsed by Shropshire Council and used as a material planning consideration to have been subject to meaningful public consultation. Meaningful public consultation will depend on the nature, scope and context of the Whole Estate Plan.	No	SP15. Whole Estate Plans
A0607	B004	Policy SP15 should explicitly reflect the relationship to Policies SP8, making clear that any land within whole estate plans falling within defined Community Hubs or Clusters needs to be consistent with the relevant settlement policy requirements and those of SP7 in relation to housing guidelines and development boundaries.	Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Draft Policy SP15 recognises that Whole Estate Plans will be endorsed by the Council and used as a material consideration in decision making where the objectives, policies and land use proposals of the Whole Estate Plan complement and are consistent with the objectives and policies of the Local Plan; and it has been prepared in collaboration with relevant external organisations, including statutory bodies; and it has been subject to meaningful public consultation.	No	SP15. Whole Estate Plans
A0629	B027	Add an additional sub-para to draft Policy SP15 stating: "That they can demonstrate that that they have fully and properly considered opportunities for low carbon energy generation and can demonstrate good long term economic reasons why this is or is not possible."	Noted. Consideration of opportunities for renewable and low carbon energy generations can clearly form part of the scope of Whole Estate Plans. However, it is not considered appropriate to include specific considerations for these documents, as this list could be very extensive and the documents themselves will inevitably be diverse and varied.	No	SP15. Whole Estate Plans
A0633	B006	Delete. No evidence has been submitted to justify this policy.	Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Draft Policy SP15 recognises that Whole Estate Plans will be endorsed by the Council and used as a material consideration in decision making where the objectives, policies and land use proposals of the Whole Estate Plan complement and are consistent with the objectives and policies of the Local Plan; and it has been prepared in collaboration with relevant external organisations, including statutory bodies; and it has been subject to meaningful public consultation.	No	SP15. Whole Estate Plans
A0636	B014	There is a strong objection to policy SP15 and its potential interpretation which may prejudice the future protection of the Green Belt and public participation on future development proposals and the Council must address the omission of the Estate Plans in the Local Plan evidence base by making them available on the public. No	SP15. Whole Estate Plans

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0637	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	No	No	No	There is no justification for Policy SP15 to support the non-statutory plans of larger estate owners. The implementation of Policy SP15 would support the long-term vision and objectives of Bradford Estates to promote a new settlement at Tong providing support in principle for a development not currently proposed in the Local Plan housing requirement or housing supply projection. This would prejudice the ability of the public to comment on the specific development proposal and to influence the degree of future flexibility in permitting further development. This is despite the intention to have "meaningful public consultation" which could be open to wide interpretation depending on the point of view of the promoters or planning authority etc. Accordingly, there is a concern that Policy SP15 allows Bradford Estates to promote this scheme without any justification for the special privileges given to larger landowners in the County. SP15 prejudices the community against larger landowners which can be argued as being contrary to the Equality Act.
A0646	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP15	Yes	Yes	Yes	The Estate considers the Councils approach to development in Shrewsbury as set out within SP15 is sound when considered against the tests set out in para 35 of the NPPF. Suggest that the policy wording could be more ambitious to ensure that the policy does not stifle the ambition or the particular needs and aspirations of an Estate, where the WEP remains complementary to the overall strategic aspirations of the Local Plan, but perhaps goes beyond what the local plan policies anticipate more generally for the rural areas .
A0014	B037	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 3.159	Not Specified	Not Specified	Not Specified	Restoration and aftercare of mineral sites should follow Biodiversity Net Gain principles as a minimum.
A0137	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP16	No	No	No	Note that part of Land at Junction 3 falls within a Mineral Safeguarding Area for sand and gravel, as illustrated on Figure SP16.1. Draft Policy SP16 seeks to safeguard mineral resources. Mineral extraction opportunities associated with Land at Junction 3 would be investigated and where appropriate extraction works undertaken.
A0144	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP16	Yes	No	Yes	Point 3 of draft Policy SP16 explains Shropshire Council plans to maintain a productive capacity for aggregates based on the 3 year average production in 2018 plus 20%. Para 207 of the National Planning Policy Framework (NPPF) requires that "Minerals planning authorities should plan for a steady and adequate supply of aggregates by: (a) preparing an annual Local Aggregate Assessment, either individually or jointly, to forecast future demand, based on a rolling average of 10 years' sales data and other relevant local information, and an assessment of all supply options (including marine dredged, secondary and recycled sources)". In this case, the other relevant local information is explained under paragraph 3.156 and 3.157. Consider that to be consistent with national policy, level of provision should be based on 10 years sales average of 0.68 million tonnes and the adjustment based on "other relevant local information" is explained thereafter. The amount of the increased adjustment is possibly sound but should be justified on robust evidence e.g. rather than using a 20% uplift factor on the basis of the increased demand demonstrated by the most recent 3 years sales average, the increase needs to be assessed on the need for replacement production capacity required (noting in 2008 there were 7 operational sites and a recent permission for a new site will provide for capacity that could not be found in a neighbouring area) and any significant future increases in demand that can be forecast with reasonable certainty (refer to Para: 084 Reference ID: 27-084-20140306 of the National Planning Practice Guidance).
A0144	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP16(4)	Yes	No	Yes	Point 4 of draft Policy SP16 refers to 'broad locations', should this be replaced with 'saved allocated sites'? This policy appears to be largely duplicated by point 2 of draft Policy DP30 except that the latter also allows flexibility where a proposal can be demonstrated to meet an unmet need. Care will also be needed to ensure that these draft policies do not unduly restrict the potential for windfall sites, on which the plan depends, to come forward.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0637	B014	There is a strong objection to policy SP15 and its potential interpretation which may prejudice the future protection of the Green Belt and public participation on future development proposals and the Council must address the omission of the Estate Plans in the Local Plan evidence base by making them available on the public.	Noted. The draft Shropshire Local Plan, including draft Policy SP15, has been subject to public consultation and sustainability appraisal. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. Draft Policy SP15 recognises that Whole Estate Plans will be endorsed by the Council and used as a material consideration in decision making where the objectives, policies and land use proposals of the Whole Estate Plan complement and are consistent with the objectives and policies of the Local Plan; and it has been prepared in collaboration with relevant external organisations, including statutory bodies; and it has been subject to meaningful public consultation.	No	SP15. Whole Estate Plans
A0646	B011	We would suggest the policy could be re-written as follows (suggested amendments in asterix): Whole Estate Plans are a method by which Estates can articulate their long-term vision for their land and premises interests and how these will be achieved. In recognition of the nature of Shropshire, and the potentially important role they play in managing land within the County, Whole Estate Plans prepared by Estates will be endorsed by the Council and used as a material consideration in decision making where they have demonstrated all of the following: a. The objectives, policies and land use proposals of the Whole Estate Plan complement *and do not conflict with* the *strategic* objectives and policies of the Local Plan; b. It has been prepared in collaboration with relevant external organisations, including statutory bodies; and c. It has been subject to meaningful public consultation.	Noted. Shropshire Council considers that it is appropriate to support the preparation of Whole Estate Plans, which provide a positive opportunity for Estates to cover a number of issues based around the central principle of ensuring sustainable land management. The intention is these are used to express a long-term vision and objectives for the way an Estate manages and utilises its land and assets. However, Shropshire Council also considers that it is appropriate for Whole Estate Plans to be endorsed by the Council and used as a material consideration in decision making to have objectives, policies and land use proposals that complement and are consistent with the objectives and policies of the Local Plan.	No	SP15. Whole Estate Plans
A0014	B037	Para 3.159 should indicate that restoration and aftercare of mineral sites should follow biodiversity net gain principles.	Para 3.159 recognises that restoration and aftercare of mineral sites provides positive opportunities to deliver environmental or community benefits. Draft Policy DP12. The Natural Environment addresses biodiversity net gain, it includes "Ensuring that all development delivers at least a 10% net gain for biodiversity in accordance with the Environment Act, any future Local Nature Recovery Strategy (LNRS) and policies DP14, DP15, DP16 and DP22."	No	SP16. Strategic Planning for Minerals
A0137	B012	N/A	Noted.	No	SP16. Strategic Planning for Minerals
A0144	B003	To be consistent with national policy, the level of provision of aggregates should be based on the 10 years sales average of 0.68 million tonnes and that any adjustment based on the "other relevant local information" should be explained thereafter.	Consider the approach as proposed is sound in that it reflects local circumstances and well-rehearsed industry concerns that planning on the basis of a 10 year average does not properly reflect local circumstances in the West Midlands. The rationale for the proposed approach is clearly identified as part of the LAA / Minerals Technical Background report (Para 17) and paragraph 3.157 of the supporting text to draft Policy SP16. As such, no change is proposed.	No	SP16. Strategic Planning for Minerals
A0144	B004	Replace 'broad locations' with 'saved allocated sites' Clarify duplication between SP16 point 4 and DP 30 point 2.	The concern raised is noted, draft Policies SP16 and DP30 are intended to be complementary. As such a minor modification is proposed to para 4 of draft Policy SP16 to clarify this matter, as follows: "Only supporting proposals for sand and gravel working outside saved SAMDev Plan mineral allocations identified within Appendix 2 of this document and identified on the Proposals Map and existing permitted reserves, where this would be consistent with the requirements of Policy DP30;" A minor modification is also proposed regarding reference to broad locations, which should reference saved SAMDev Plan mineral allocations.	Yes	SP16. Strategic Planning for Minerals

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0347	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP16	No	No	Not Specified	Ensuring appropriate restoration measures are key in terms of protecting water resources. Restoration with soils will require a waste exemption or may require an appropriate environmental permit. Dual-tracking of the planning and permitting process for mineral sites, with waste recovery/landfilling, is advisable (See <a href="https://www.gov.uk/guidance/waste-recovery-plans-and-permits">https://www.gov.uk/guidance/waste-recovery-plans-and-permits</a> ).
A0348	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP16	Not Specified	Yes	Not Specified	The reference to locally distinctive materials is noted and welcomed
A0419	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP16 and Figure SP16.1	Yes	Yes	Yes	Inclusion of draft Policy SP16 and the associated Mineral Safeguarding Areas is noted.
A0608	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP16	Not Specified	Not Specified	Not Specified	SHR173 is included within a mineral safeguarding area for sand and gravel. A Mineral Resource Assessment report has been prepared for the site (appended to this representation), which demonstrates minerals cannot be extracted from this Site in an economically viable way, and is constrained further by existing residential properties, the railway line and a gas pipeline. Also prior extraction is infeasible. The report also demonstrates there is an abundance of high-quality Sand & Gravel deposits within the County and that the seven-year landbank required by the National Planning Policy Framework has been exceeded. As such safeguarding SHR173 for mineral extraction would be inappropriate to take forward within the draft Shropshire Local Plan.
A0677	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP16	Yes	No	Yes	The explanation of draft Policy SP16 states aggregate production remains above the 10 year average and landbanks for sand and gravel have remained above minimum levels required by national policy. It also explains a precautionary approach is being taken to the production requirement for sand and gravel using the 3 year average plus a growth allowance of 20%. However, no specific numbers/explanation is provided, nor does it cross-reference other sections of the draft Shropshire Local Plan which contain the detailed information. Para 3.158 states for sand and gravel "further significant windfall applications are expected". This appears at odds with part 4 of draft Policy SP16 which only supports sand and gravel working outside saved unimplemented allocations and existing permitted reserves where it would prevent sterilisation, significant environmental benefits would be obtained or proposed sites would be significantly more acceptable overall than the allocated sites. Para 4.269 supporting policy DP30 (Sites for Sand and Gravel Working) shows the windfall allowance of 10.5 million tonnes is significantly higher than the saved local plan allocations (of 4 million tonnes). Within the strict policy context of draft Policy SP16, can the Council be confident about relying on this scale of windfall development? Concerned this could lead to unplanned cross-boundary implications for the supply of sand and gravel if windfall development does not come forward as anticipated.
A0014	B038	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP17 and Para 3.161	Not Specified	Not Specified	Not Specified	Welcome reference to Government's 25 Year Environment Plan, but there should be greater reference to this throughout the document, especially in relation to Policies SP3, SP4, and SP9.
A0014	B039	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 3.164	Not Specified	Not Specified	Not Specified	Policies should encourage and enable reduction of waste akin to the waste management hierarchy. This policy seems to accommodate 'inevitable' increase in waste.
A0347	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP17	No	No	Not Specified	Explanatory text. Could include; Where developments are subject to an Environmental Permit from the Environment Agency, the EA would encourage pre-application discussions. These applications should provide an appropriate level of detail to inform a reasonable degree of certainty on the planning application and to ensure the principle of the development and use of the land is acceptable with cross reference to permitting constraints".
A0393	B044	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	Welcome reference to the government's 25 Year Environment Plan in Para 3.161 SP17 but there should be greater reference to this throughout the document, especially in sections SP3, SP4, and SP9 The Nature Recovery Strategy is about much more than just Biodiversity Net Gain and thus, it should be a constant theme throughout the plan.
A0629	B007-44	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	Welcome reference to the government's 25 Year Environment Plan in Para 3.161 SP17 but there should be greater reference to this throughout the document, especially in sections SP3, SP4, and SP9 The Nature Recovery Strategy is about much more than just Biodiversity Net Gain and thus, it should be a constant theme throughout the plan.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0347	B018	n/a	Noted. The draft Shropshire Local Plan should be read as a whole. Para 4.274 of the explanation to draft Policy DP31 already recognises the need for environmentally sensitive design and site restoration proposals. It is also considered that the minor modification proposed to para 4.280 of the explanation to draft Policy DP32 addresses opportunities for twin-tracking with waste permitting.	No	SP16. Strategic Planning for Minerals
A0348	B015	n/a	Noted, no actions proposed.	No	SP16. Strategic Planning for Minerals
A0419	B002	N/A	Noted.	No	SP16. Strategic Planning for Minerals
A0608	B007	Respectfully request proposed allocation SHR173 be excluded from the need to be safeguarded further with a Mineral Safeguarding Area, as the Mineral Resource Assessment prepared demonstrates extraction of minerals on the Site would be unpractical and unviable; and is in compliance with the Minerals Plan and its release for development would not conflict with it.	Noted. Proposed allocations, including SHR173, have been informed through a proportionate and robust site assessment process, which included consideration of mineral safeguarding. Ultimately site SHR173 has been proposed for allocation and para 4.264 of draft Policy DP29 (to which draft Policy SP16 cross-references in the context of mineral safeguarding) states "Non-mineral development which is exempt from the requirements of this Policy comprises:... Applications that are in accordance with the development plan and site allocations where the assessment of site options took account of potential mineral sterilisation and determined that prior extraction was not required".	No	SP16. Strategic Planning for Minerals
A0677	B002	Explanatory text supporting draft Policy SP16, should cross-reference appropriate section(s) and the minerals technical background report to ensure soundness, rather than necessarily requiring significant alterations to the text.	Noted. For the purpose of clarity a minor modification is proposed to the proposed explanation to draft Policy SP16 to cross-reference the appropriate section of the Minerals Technical Background Paper. With regard to para 4 of draft Policy SP16, we would note that draft Policy DP30 clarifies that mineral working falling outside allocated areas will also be permitted where developers can demonstrate that the proposal would meet an unmet need/prevent sterilisation of resources; and not prejudice development of allocated sites/result in significant environmental benefits as a result of the exchange or surrender of existing permissions or the site might be significantly more acceptable overall than the allocated sites, and would offer significant environmental benefits. Shropshire Council is confident the scale of windfall development proposed will be delivered since this largely comprises extensions to existing sites. Reinforcing this, a new site for 1.9mt at Ironbridge / Buildwas has recently benefitted from a resolution to grant planning consent.	No	SP16. Strategic Planning for Minerals
A0014	B038	Include more reference to Government's 25 Year Environment Plan within the document. Particularly draft Policies SP3, SP4, and SP9.	Noted. It is considered that the principles of the Government's 25 Year Environment Plan are appropriately embedded within the draft Shropshire Local Plan. The draft Shropshire Plan should be read as a whole.	No	SP17. Waste Management Infrastructure
A0014	B039	Policies should encourage and enable reduction of waste.	Noted. Where evidence indicates that waste production will increase draft policies are required to ensure that there is sufficient capacity to manage this additional waste, as recognised within para 3.164 of the Explanation to draft Policy SP17. Waste Management Infrastructure.	No	SP17. Waste Management Infrastructure
A0347	B010	n/a	Noted. It is considered that this issue is more appropriately addressed within the explanation to draft Policy DP32, to which a minor modification is proposed.	No	SP17. Waste Management Infrastructure
A0393	B044	n/a- see comments	Noted. It is considered that the principles of the Government's 25 Year Environment Plan are appropriately embedded within the draft Shropshire Local Plan. The draft Shropshire Plan should be read as a whole.	No	SP17. Waste Management Infrastructure
A0629	B007-44	n/a- see comments	Noted. It is considered that the principles of the Government's 25 Year Environment Plan are appropriately embedded within the draft Shropshire Local Plan. The draft Shropshire Plan should be read as a whole.	No	SP17. Waste Management Infrastructure

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0036	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	Not Specified	Not Specified	Draft Policy DP1 largely reflect the findings of the Council's Strategic Housing Market Assessment (SHMA). However, criterion 6 requires (on sites of 50 or more dwellings) the provision of an appropriate range of specialist housing to meet the diverse needs of older people such as age restricted general market housing, retirement living or sheltered housing, extra care housing and residential care/nursing homes. Whilst such provision is an important component of the residential market, no justification or evidence document has been provided for such a requirement.
A0073	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	Not Specified	Not Specified	<p>The Strategic Housing Market Assessment (SHMA) (2020) analyses housing need broken down by size, type and tenure, however there are several problems with this:</p> <ul style="list-style-type: none"> <li>-Assessment is based on the 2014-based sub-national household projections (SNHP), this does not correlate with the proposed housing requirement (which is just over 400 dwelling per annum higher). Cannot assume the need for this additional housing is a similar mix to the elements of household growth assessed.</li> <li>-It does not assess housing need by size, type and tenure for different settlements.</li> <li>-It fails to adequately consider market trends and demand.</li> </ul> <p>With regard to use of the Right Home Right Place Surveys in para 2a, they are innovative but not considered sufficiently robust to determine the mix of 50% of housing on a site.</p> <p>With regard to para 2b, the mix proposed does not reflect the SHMA, with too high a level of 2 bed housing proposed. It is also unclear why a similar proportion is not proposed for 4+ houses, given their important role in meeting need.</p> <p>As such the dwelling mix in draft Policy DP1 should be a starting point only, to be applied flexibly, reflecting local needs and market demand. For the Plan to be sound, sound, a far more flexible policy approach is needed which properly reflects the nature of the evidence base, which has inherent demographic limitations and cannot fully reflect market demand and people's aspirations.</p> <p>The SHMA does not support the proposed requirement for 70% of new dwellings to meet M4(2) standard as it indicates that some of the need for M4(2) standard can be met within M4(1) standard housing (standard building control requirement). Furthermore the SHMA also assumes that only 53% of Shropshire households in current or future housing need due to a long-term health or physical disability (LTHPD) could be absorbed by converting existing properties to bring them up to M4(1) standard, however it fails to recognise that part of the remaining need can be met within existing M4(1) housing or properties which can be brought up to M4(1) standard. The SHMA also recognises part of this need can be met within specialist accommodation. Even if the upper need identified is realised and none of this need is met within existing stock, building new homes to M4(2) or (3) standard, does not mean they meet these needs, as there is significant demand for new housing from other elements of the population and many households may choose to stay in existing homes anyway. Other Local Authorities (Central Lincolnshire 30% and Harrogate 25%) have set much lower requirements.</p> <p>Draft Policy DP1's requirements for M4(3) housing is inconsistent with the NPPG which states wheelchair accessible homes (i.e. M4(3) standard) should only be applied to dwellings where the local authority is responsible for allocating or nominating a person to live in that dwelling (i.e. certain types of affordable housing). Policy should only apply to this element of affordable housing. The Shropshire Viability Study assumes that this is the case. However the Viability Study also illustrates viability in many parts of the county is challenging, with the level of affordable housing proposed based on 'on-the-ground' experience before these sort of policy requirements, rather than the result of the assessment.</p> <p>Do not consider that the tests of necessity and viability as set out in the NPPG have been met in relation to the proposed requirements for M4(2) and M4(3) standard dwellings.</p> <p>Draft Policy DP1(6) requires housing, including older persons accommodation and specialist dwellings to meet the needs of those with disabilities and special needs, on all sites of 50 or more dwellings. Recognise the need for specialist accommodation in Shropshire, as demonstrated by the SHMA, but have concerns as to how the draft policy would operate in practice. It does not specify an amount for specific sites and achieving a range on sites of less than 200-250 would be very challenging. Sites of less than 250 would likely be developed by a single developer unlikely to be able to deliver a care home or extra care accommodation, although this could be balanced by some small sites being developed specifically by care providers and being 100% of this type. Therefore consider that the draft policy should be amended so that on sites of below 250 dwellings, the provision of specialist housing is not obligatory, but could be encouraged, whilst for large strategic sites of 250+ dwellings the requirement for specialist housing to be provided as part of an appropriate mix could be retained. Specific requirements could also be set out for sites where specialist accommodation would be appropriate in part or whole, having regard to the suitability of individual sites and any specific locational needs.</p>
A0078	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1(2b)	Not Specified	No	Not Specified	<p>Understand and support requirement to provide a mix of dwelling types to satisfy local needs and in most cases (unless evidence indicates otherwise) at least 50% 3 bedroom dwellings. However, object to the proposal that a minimum of 25% of dwellings should be 2 bedroom or less as this does not meet Shropshire's development needs and is not justified by proportionate evidence:</p> <ul style="list-style-type: none"> <li>-Our experience is that in most parts of Shropshire demand for 2 bedroomed houses is limited and has diminished further in recent years (examples of development schemes provided within representation).</li> <li>-Demand for 2 bedroom properties is generally from investors who perceive their rent yield as better than larger properties. Not suggesting this does not contribute to the overall housing market, but Government policy is to increase home ownership.</li> <li>-Registered Providers generally require a minimum of 65% 3 bed homes with the balance being 2 bed homes for affordable housing provided under S106 legal agreements.</li> <li>-Understand Council wants a large provision of 2 bedroom properties to ensure homes are affordable to lower income earners, however the difference between 2 and 3 bedroom properties is around 10% and most were willing to pay the higher amount to secure the extra bedroom.</li> <li>-Trends in working from home (accelerated by Covid 19) increase the need for the additional space.</li> <li>-2 bedroom properties are less efficient use of land.</li> </ul>
A0078	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1(3)	Not Specified	No	Not Specified	<p>Support principle of requiring national space standards. However consider para 3 of draft Policy DP1 is unsound in differentiating between market and affordable dwellings. The draft Policy should be more prescriptive for open market dwellings, stating national space standards will apply unless specific considerations justify otherwise (such as conversion schemes or developments targeted at specific user groups).</p> <p>The proposed requirement that affordable homes should comply with space standards and that open market housing does not have to, contradicts draft Policy DP3 which requires affordable and open market homes to be indistinguishable. In this respect policy DP1.3 is also unsound.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0036	B003	Criterion 6 should be deleted as it cannot be justified. The provision of accommodation for the elderly should be market led and justified at the development management/application stage based on a demonstrable need for such a facility.	<p>Noted. The National Planning Policy Framework (NPPF) specifies that housing needed for different groups in the community should be assessed and reflected in planning policies, this includes the needs of older people. The Strategic Housing Market Assessment (SHMA) indicates that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the proposed Local Plan period from 2016 to 2038. It also identifies a specific need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision. In order to ensure the needs of older people are met it is considered that there is a need to provide accessible and wheelchair user dwellings and an appropriate range of specialist housing designed to meet the diverse needs of older people.</p> <p>With regard to specialist designed housing (for older people and those with disabilities), it is recognised that sites of 50 or more dwellings will be diverse in nature. It is for this reason that a specific type/quantity of these properties is not specified. This provides appropriate flexibility to respond to site specific/location specific factors.</p>	No	DP1. Residential Mix
A0073	B002	<p>A far more flexible policy approach is needed in relation to the dwelling size mix aspect of draft Policy DP1.</p> <p>Do not consider that the tests of necessity and viability as set out in the NPPG have been met in relation to the proposed requirements for M4(2) and M4(3) standard dwellings within draft Policy DP1. Rates should be removed or reduced.</p> <p>Specialist Housing aspect of draft Policy DP1 should be amended so that on sites of below 250 dwellings, the provision of specialist housing is not obligatory, but could be encouraged. The requirement could be maintained for sites of 250+ dwellings and for appropriate specific sites/locations.</p>	<p>Noted. Shropshire Council considers that the Strategic Housing Market Assessment (SHMA) (2020) is a robust and proportionate evidence base for informing policies on housing need. The SHMA concludes that Shropshire represents a self-contained housing market area (HMA) and as such an appropriate geography for assessing housing need (both in terms of total need and needs of different groups within the community). However, it is recognised that Shropshire is diverse, hence the Right Home, Right Place initiative, which is referenced within draft Policy DP1.</p> <p>Furthermore, whilst the assessment within the SHMA is based on housing need rather than the policy on proposed housing requirement, it is considered appropriate to assume the profile of housing need by size, type and tenure would be consistent, indeed there is no evidence available to suggest otherwise.</p> <p>It is considered that para's 2a/b of draft Policy DP1 provide an appropriate balance between ensuring that new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand.</p> <p>The threshold for housing with 2 bedrooms or less with para 2b of draft Policy DP2 of course includes both 1 and 2 bedroom properties, which together represent more than 25% of the housing need, as identified within the SHMA.</p> <p>With regard to the requirements for M4(2) housing, the SHMA identifies that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the Local Plan period from 2016 to 2038. It then calculates a total need for M4(2) and M4(3) housing equivalent to 77% of total household growth (of which M4(3) constitutes around 13%). Need for these forms of properties would not be met by existing or new M4(1) housing (within the assessment a precautionary approach is taken when considering the ability to adapt existing dwelling stock. Specifically as no information is available either locally or nationally on the proportion of existing dwelling stock that can be adopted to M4(2) standard and no information is available locally on the proportion of existing dwelling stock that can be adopted to M4(1) standard, we have considered national data on the proportion of existing dwellings that can be adopted to M4(1) standard and assumed that these same dwellings could be converted to M4(2) standard, however this is in no way implying that M4(1) standard housing would meet the needs of those requiring M4(2) standard housing. It is acknowledged that this approach is likely to over-estimate the amount of existing dwelling stock that can actually be adapted to M4(2) standard, but represents best available information. It is also acknowledged that the cost of adapting existing properties can be extremely high, which emphasises the importance of ensuring that an appropriate proportion of new dwellings are constructed to M4(2) and M4(3) standard). It is recognised that part of the identified need can be met within specialist accommodation, however Government's reform of Health and Adult Social Care is underpinned by a principle of sustaining people at home for as long as possible. It is also acknowledged that building properties to M4(2) standard will not mean they are necessarily occupied by those in need, but it is important to ensure that the opportunity exists for households in need to access appropriate properties.</p> <p>With regard to the requirements for M4(3) housing, the SHMA clearly evidences need for M4(3) housing, the threshold proposed within draft Policy DP1 reflect this need and considerations of development viability. The NPPG stipulates that Local Authorities should only require wheelchair accessible homes to those dwellings they are responsible for allocating/nominating a person to live in that dwelling. This is recognised within the Explanation to draft Policy DP1 which states in paras 4.33 and 4.34 "It should be noted that M4(3) (wheelchair user dwellings) standard within Building Regulations sets a distinction between wheelchair accessible (a home readily useable by a wheelchair user at the point of completion) and wheelchair adaptable (a home that can be easily adapted to meet the needs of a household including wheelchair users) dwellings. Where dwellings are required to meet M4(3) (wheelchair user dwellings) standard within Building Regulations to comply with this policy, they will normally consist of wheelchair adaptable homes. Wheelchair accessible homes will only be required where Shropshire Council is responsible for nominating a person to live in the dwelling."</p> <p>As such Shropshire Council considers that the SHMA justifies the proposed thresholds for M4(2) and M4(3) standard dwellings.</p> <p>With regard to specialist designed housing (for older people and those with disabilities), it is recognised that sites of 50 or more dwellings will be diverse in nature. It is for this reason that a</p>	No	DP1. Residential Mix
A0078	B001	<p>Object to the inclusion of a minimum provision of 2 bedroom houses and suggest this aspect of the policy is removed.</p> <p>If it is thought desirable that a minimum proportion of homes should be 2 bedroom, this should be reduced to 10%.</p>	<p>Noted. The housing mix proposed within para 2b of draft Policy DP1 is informed by the Strategic Housing Market Assessment (SHMA) undertaken to inform the Local Plan Review. Analysis within the SHMA indicates a significant proportion of the new dwellings required during the proposed Plan period will be 1, 2 and 3 bedrooms in size. Specifically, the SHMA indicates around 32.7% of the dwellings needed will be 1 or 2 bedrooms in size and a further 43.5% will be 3 bedrooms in size. This demand for 1, 2 and 3 bedroom dwellings also reflects the view often expressed by local communities when discussing their local housing needs.</p> <p>As such, where an appropriate Local Housing Need survey has not been undertaken in the last 5 years, it is considered appropriate that developments of 5 or more dwellings include at least 25% of open market dwellings as 2 bedroom or less and a further 25% to be three bedroom or less, on sites of 5 or more dwellings. The remainder of the open market dwellings will include a suitable mix and variety of dwelling sizes.</p>	No	DP1. Residential Mix
A0078	B002	Policy should require all dwellings to comply with national space standards unless specific considerations justify a departure.	<p>Noted. The approach to nationally described space standards proposed within Para 3 of draft Policy DP1 is considered to positively respond to the evidence available within the Strategic Housing Market Assessment (SHMA) and other sources. Providing dwellings with sufficient internal floorspace positively contributes to the future occupier's ability to achieve a high-quality of life and is responsive to changing household requirements, by increasing the ability to include adaptations at a later date.</p> <p>It is not considered that the proposed requirements of draft Policy DP1 and draft Policy DP3 are contradictory, indeed these proposed requirements are considered complementary.</p>	No	DP1. Residential Mix

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0078	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1(5)	Not Specified	No	Not Specified	Object to the proposed requirement within para 5 of draft Policy DP1, that 70% of dwellings should comply with M4(2) and 5% M4(3) standard. This is above and beyond current Building Regulations and is not based on proportionate evidence, so is unsound. This requirement will undermine development viability and query whether there is real demand for this type of provision. Suggest use of mandatory space standards instead, which provide a reasonable level of wheelchair and disabled accessibility.
A0078	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1(6a)	Not Specified	No	Not Specified	Strongly object to para 6 of draft Policy DP2 as it will undermine viability, delivery and adversely affect the ability of the Local Plan to meet its housing targets. It is not based on proportionate evidence and will not be effective or deliverable and as such it is unsound. Do not believe it appropriate, logical or viable to require specialist housing of this type to be provided on general market housing sites. This proposed policy requirement is not necessary to ensure adequate provision of specialist housing, which is usually developed and operated by specialist organisations. Suggest the following factors should be considered in respect of this proposed policy: -Generally, due to ability to pay higher residual land values, a supply of suitable sites is likely to be provided by the market. -Many sites are not suitable for provision of specialist housing due to location (access to services), site specific conditions or level of demand. The Council should be required to provide evidence of need for sites. -These forms of specialist housing may qualify as affordable housing and reduce wider affordable housing provision. -It will deter small and medium enterprises from delivering medium sized sites, undermining the ability of the Local Plan to achieve requirements. -For schemes of less than 200 dwellings, to be viable, this would represent a large proportion of the site.
A0118	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Yes	Yes	Yes	In Para 2a of draft Policy DP1 it is considered that wording should refer to the need for an up to date Local Housing Need Survey, to ensure housing delivery reflects need at that point in time, rather than a snapshot in time, sometime over the 22 year Plan period. In Para 2b of draft Policy DP1 it is considered the proposed split should be the starting point which schemes should have due regard to, not a definitive requirement. Para 2a and 2b should also recognise that the mix of the remaining open market housing provision should have regard to housing market demand. The masterplan for proposed allocating BUR004 (provided within the representation) show how a range of different housing types can be accommodated on the site.
A0148	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	Not Specified	Not Specified	Should the Council wish to apply the optional nationally described space standards ('NDSS') to both market and affordable new-build dwellings, this should be done in accordance with Footnote 46 of NPPF Paragraph 127(f). Whilst the justification makes reference to the SHMA, at paragraph 4.11-4.12, it is noted that the SHMA itself undertakes no assessment or analysis of the need for NDSS on either affordable or market new-build dwellings. Consequently, it is understood that justification for this policy requirement is set out solely through the DSLP at paragraphs 4.7-4.16. Para 4.11 refers to a finding of the SHMA which identified overcrowding in 11% of social rented accommodation. Clearly, social rented accommodation represents only one tenure of affordable housing; such a finding disregards other affordable housing tenures, whereby households in Shropshire may not necessarily experience overcrowding, and thus does not represent the overall trend. The Council also speculates on the impact of the 'bedroom tax' on overcrowding within the social rented sector; it provides no further evidence otherwise justifying the need for NDSS on new-build affordable housing.
A0201	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Yes	No	Yes	Object to Part 2a of draft Policy DP1 as it is not considered effective and is therefore unsound and should be deleted. It states on sites of 5 or more dwellings, at least 50% must reflect the profile of a Local Housing Need Survey undertaken and endorsed by Shropshire Council. Understand the need for a mix of house types, sizes and tenures but it is important that any policy in this regard is effective and ensures that housing delivery will not be compromised or stalled due to overly prescriptive requirements. Further, the Strategic Housing Market Assessment (SHMA) is a critical part of the plan's evidence base and are concerned this would allow the findings of the SHMA to be effectively overruled on a settlement-by settlement basis outside of the normal plan-making exercise, creating uncertainty for developers, stakeholders and decision makers. If a settlement-specific approach to housing mix is justified by evidence, this should be incorporated into a Neighbourhood Development Plan rather than a housing needs survey (not subject to consultation or independently tested). Consider Part 6 of draft Policy DP1 is not justified or effective and as such is unsound and should be deleted. It relates to the provision of specialist housing for older people and those with disabilities and special needs on sites of 50 or more dwellings. Cannot see any evidence for how this threshold has been arrived at or how it responds to the quantum of need for such housing, the only justification relates to an ageing population (in common with England), and for those with disabilities, no information has been provided regarding arising needs. Also the draft Policy does not specify the proportion of a site that should consist of specialist housing, creating uncertainty for developers, stakeholders and decision makers. There is also no mention of viability nor is it clear how draft Policy DP1 has been viability tested.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0078	B003	<p>This draft Policy should be deleted.</p> <p>If the Inspector is minded to require a provision of M4(2) housing consider this should be at a much lower level (10%) to ensure adequate provision without undermining viability and deliverability.</p> <p>If the Inspector is minded to require provision of M4(3) housing, the site size threshold should be increased to 20 dwellings, unclear how 5% be applied to sites of less than 20 dwellings?</p>	<p>Noted. The Local Plan Review is informed by a Strategic Housing Market Assessment (SHMA) (2020) and Viability Assessment (2020) which are considered proportionate and robust evidence. Thresholds proposed within draft Policy DP1 reflect consideration of need and development viability. With regard to need, the SHMA identifies that growth the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the Local Plan period from 2016 to 2038. It calculates a total need for M4(2) and M4(3) housing equivalent to 77% of total household growth (of which M4(3) constitutes around 13%). It is recognised that part of this need can be met within specialist accommodation, however Government's reform of Health and Adult Social Care is underpinned by a principle of sustaining people at home for as long as possible.</p> <p>As such Shropshire Council considers that the SHMA justifies the proposed thresholds for M4(2) and M4(3) standard dwellings.</p>	No	DP1. Residential Mix
A0078	B004	<p>This draft policy should be deleted.</p> <p>If the inspector is minded to retain this draft Policy, the threshold for provision of specialist housing should be increased to 200 dwellings and subject to evidence of need.</p>	<p>Noted. The National Planning Policy Framework (NPPF) specifies that housing needed for different groups in the community should be assessed and reflected in planning policies, this includes the needs of older people. The Strategic Housing Market Assessment (SHMA) indicates that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the proposed Local Plan period from 2016 to 2038. It also identifies a specific need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision. In order to ensure the needs of older people are met it is considered that there is a need to provide an appropriate range of specialist housing designed to meet the diverse needs of older people.</p> <p>With regard to specialist designed housing (for older people and those with disabilities), it is recognised that sites of 50 or more dwellings will be diverse in nature. It is for this reason that a specific type/quantity of these properties is not specified. This provides appropriate flexibility to respond to site specific/location specific factors.</p>	No	DP1. Residential Mix
A0118	B004	<p>Amend para 2a of draft Policy DP1 to reference up to date Local Housing Need Survey.</p> <p>Amend para 2b of draft Policy DP1 so that the proposed split is the starting point and not a definitive requirement.</p> <p>Amend para 2a/2b of draft Policy DP1 to include reference to the mix of the remaining open market housing provision having regard to housing market demand.</p>	<p>Noted. It is considered that para's 2a/b of draft Policy DP1 provide an appropriate balance between ensuring that new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand.</p> <p>Specifically with regard to para 2a, it references the need for a Local Housing Need Survey to be undertaken within the last 5 years (reflecting the review cycle for the 'Right Home Right Place' Local Housing Need Survey) and as such ensures that the evidence informing the housing mix on a site is up to date.</p>	No	DP1. Residential Mix
A0148	B007	<p>NDSS assists in mitigating impacts from overcrowding and does not in itself reduce the level of overcrowding. Whilst overcrowding in the region may be an issue requiring tackling, the Council should consider it a symptom of an under-supply of housing.</p> <p>Before adopting the NDSS, the Council should provide an accurate local assessment evidencing the case for Shropshire as this has not been demonstrated, and thus the policy requirement fails the test of soundness and should be removed.</p>	<p>Noted. The approach to nationally described space standards proposed within Para 3 of draft Policy DP1 is considered to positively respond to the evidence available within the Strategic Housing Market Assessment (SHMA) and other sources. Providing dwellings with sufficient internal floorspace positively contributes to the future occupier's ability to achieve a high-quality of life and is responsive to changing household requirements, by increasing the ability to include adaptations at a later date.</p>	No	DP1. Residential Mix
A0201	B002	<p>Delete Part 2a of draft Policy DP1.</p> <p>Delete Part 6 of draft Policy DP1.</p>	<p>Noted. It is considered para's 2a/b of draft Policy DP1 provide an appropriate balance between ensuring new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand.</p> <p>Specifically with regard to para 2a, it is considered that this approach allows for the housing mix proposed on a site to positively respond to the most recent information on local housing need for communities where in the last 5 years a Local Housing Need Survey has been undertaken under either the Right Home Right Place Council-led initiative or an equivalent survey endorsed by Shropshire Council.</p> <p>The National Planning Policy Framework (NPPF) specifies that housing needed for different groups in the community should be assessed and reflected in planning policies, this includes the needs of older people and those with disabilities. The Strategic Housing Market Assessment (SHMA) indicates that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the proposed Local Plan period from 2016 to 2038. It also identifies a specific need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision. In order to ensure the needs of older people and those with disabilities are met it is considered that there is a need to provide accessible and wheelchair user dwellings and an appropriate range of specialist housing designed to meet their diverse needs.</p> <p>With regard to specialist designed housing (for older people and those with disabilities), it is recognised that sites of 50 or more dwellings will be diverse in nature. It is for this reason that a specific type/quantity of these properties is not specified. This provides appropriate flexibility to respond to site specific/location specific factors.</p> <p>The draft Shropshire Local Plan has been informed by a whole Plan Viability Assessment which is considered a robust and proportionate assessment.</p>	No	DP1. Residential Mix

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0350	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	<p>Seriously concerned that draft Policy DP1 fails the 'effective' and 'justified' tests of soundness.</p> <p>-Particularly concerned about the 50 dwelling threshold proposed within section 6 of draft Policy DP1. The benefit of specialist housing is having a significant number of units in one location. Therefore, on sites of 50 dwellings the majority would need to be specialist housing to achieve necessary concentrations required by specialist housing models. Sites of 50-100 dwellings would be significantly impacted, are often in edge of settlement locations inappropriate for these types of units and unattractive to specialist housing providers, and general market developers would not be interested in acquiring them when specialist housing is an entirely different business model normally delivered by a different housing provider. In consequence, this section of draft policy DP1, mis-understands the nature of specialist housing, will greatly reduce housebuilder interest in medium-sized sites in Shropshire, and will seriously harm deliverability of the draft Shropshire Local Plan, meaning it fails the 'effective' test. Further, no evidence has been presented for the threshold, therefore the policy fails the 'justified' test of soundness.</p> <p>-Section 2b requires provision of smaller units. This may result in higher densities, in order to achieve sufficient saleable floorspace to make a development viable (the Viability Assessment undertaken to inform the draft Shropshire Local Plan finds a high-proportion of typologies are not viable with the residential mix and other policy requirements in the draft Shropshire Local Plan - the total burden on development is substantial (extract provided in representation)), altering local character (especially in low density areas). Pressure to achieve sufficient saleable floorspace will also result in pressure to exceed housing guidelines for proposed allocations and settlements, contrary to 'caps' in other draft policies and proposed allocation guidelines. This may render development unviable as flexibility is required to achieve sufficient saleable floorspace and to match housing provision to current market demand. Section 2b of draft Policy DP1 will create serious deliverability problems and cause the draft Shropshire Local Plan to fail the 'effective' test of soundness. It is also not 'justified', Para 4.5 of the proposed explanation to draft Policy DP1 refers to the Strategic Housing Market Assessment (SHMA) which translates household projections into housing need, however this confuses/over-simplifies 'need' and 'demand', as the majority want larger dwellings than need dictates and does not consider 'need' for home offices/guest room(s). Covid-19 highlights reasons larger dwellings are wanted. 3-bed dwellings are the most popular size, therefore a 25% requirement for 2-bed or less dwellings does not match demand, which is for larger dwellings.</p>
A0354	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	<p>Welcome the new draft Shropshire Local Plan, but consider it currently fails all four tests of soundness in relation to older persons' accommodation in relation to draft Policies SP2, DP1, SP9 and S16.1, as:</p> <p>-Draft policies do not set a target for provision of specialist housing for the elderly or specifically seek to meet this identified need, despite the clear and acknowledged (para 4.20 of the draft Shropshire Local Plan) need, as such it is not 'positively prepared'.</p> <p>-The draft Shropshire Local Plan evidence base illustrates Shropshire's ageing population profile (particularly the Strategic Housing Market Assessment (SHMA) which is summarised in Para 4.40 of the draft Shropshire Local Plan as identifying a need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision), as do the 2018-based household projections (which forecasts higher growth of the elderly than the 2016-based household projections that underpin the SHMA (the majority in the 75-84 and 85+ age groups) - table provided summarising difference within representation). However the draft Shropshire Local Plan makes no specific provision to deliver housing to meet this need, apart from a proposed requirement to provide an appropriate mix of housing within draft Policy DP1. This is inadequate (particularly given the challenges identified in Para 4.20 of the draft Shropshire Local Plan) and will not deliver the quantity or quality of older persons' housing needed in Shropshire. Draft Policy DP1's focus on housing mix considers only the mix of new build developments. It appears blind to the overall mix of housing in a local area, namely the combination of the new and existing housing stock. Where a planning application is received for a 100% specialist housing scheme to help re-balance the local housing stock, draft Policy DP1 does not provide any guidance on how such planning applications will be considered. Unless there is specific policy support, specialist housing has to compete with general market housing when acquiring sites. To significantly boost provision requires positive policies in the Local Plan that enable specialist housing to obtain planning consent in locations barred to more profitable family housing. There is also no justification for why the needs can be met entirely on large sites. As such it is 'not justified'.</p> <p>-The draft Shropshire Local Plan will fail to deliver sufficient specialist housing and does not help delivery on smaller sites, as such is not 'effective' at meeting needs for older persons accommodation. Policy DP1 encourage older persons' housing on sites of 50 or more dwellings, but is unlikely to fully meet Shropshire's needs for this type of housing, due to the limited number of large developments. Schedule A7 of the draft Shropshire Local Plan identifies 76 allocations, of which 36 are for 50+ dwellings. However, 20 of these are for up to 100 dwellings and as such unlikely to make significant contributions amongst the normal housing mix, leaving only 16 sites to make any significant contribution to the need for at least 6,000 units. Furthermore, few of the promoters of proposed allocations have provided evidence they will make significant specialist housing provision on what are largely general housing sites. Quantity and quality of units needed will only be delivered if the proposed approach is supplemented by specialist housing allocations and includes support for 100% specialist housing sites.</p> <p>-Para 61 of the National Planning Policy Framework (NPPF) states the size, type and tenure of housing for different groups in the community (including older people) should be assessed and reflected in policy. National Planning Practice Guidance (NPPG) supports this and also encourages specific allocations for specialist housing and a positive approach to 100% specialist housing. However, the draft Shropshire Local Plan does not include a specific targets for specialist housing within its policies, does not allocate any sites specifically for this purpose and is silent on Planning Applications for specialist housing not part of a larger site. As such it is not consistent with national policy in failing to adequately plan for this category of housing.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0350	B004	<p>The site size threshold for specialist housing referenced in para 6 of draft Policy DP1 should be increased to 500 dwellings.</p> <p>The threshold for 2-bedroom or less dwellings referenced within para 2b of draft Policy DP1 should be reduced to 10%.</p> <p>Para 2 of draft Policy DP1 should include a third approach to establishing an appropriate residential mix, specifically "the developer demonstrates a mix appropriate to market conditions and/or the site's characteristics."</p>	<p>Noted. Shropshire Council considers that draft Policy DP1 is justified, effective and consistent with national policy. It is also considered that other relevant draft policies are complementary.</p> <p>With regard to para 2 (including 2b) of draft Policy DP1, it is considered that this provides an appropriate balance between ensuring that new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry), and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand.</p> <p>The mix proposed within para 2b is informed by the Strategic Housing Market Assessment (SHMA) of the draft Shropshire Local Plan, which is considered a robust and proportionate assessment.</p> <p>With regard to para 6 of draft Policy DP1, the Strategic Housing Market Assessment (SHMA) indicates that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the proposed Local Plan period from 2016 to 2038 and also identifies a specific need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision. With regard to specialist designed housing for older people, the National Planning Practice Guidance (NPPG) on Housing for Older People recognises that there is a significant amount of variability in the types of specialist accommodation for older people, identifying four main categories which can be summarised as: a. "Age-restricted general market housing; b. Retirement living or sheltered housing; c. Extra care housing or housing-with-care; and d. Residential care homes and nursing homes". Reflecting the need for and variety of types of specialist accommodation, it is considered that the threshold of 50 or more dwellings proposed within para 6 of draft Policy DP1. However, it is recognised that sites of 50 or more dwellings will be diverse in nature, as such a specific type/quantity of these properties is not specified. This provides appropriate flexibility to respond to site specific/location specific factors.</p>	No	DP1. Residential Mix
A0354	B003	<p>Draft Policy DP1 should specify that: specialist housing developments will be considered positively on sites within settlement development boundaries. Where there is a shortage of specialist housing relative to recognised needs, proposals outside but adjoining development boundaries will be considered positively.</p>	<p>It is considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate. Specifically:</p> <ul style="list-style-type: none"> <li>-Draft Policy DP1 requires all residential development to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. It also specifically requires the provision of an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings.</li> <li>-Settlement policies (S1-S19) allow for appropriate windfall development within identified development boundaries (or in the case of Community Clusters on specified types of sites) where they comply with other policy requirements, which can of course include accommodation for older people.</li> <li>-Draft Policy SP10 allows for affordable exception, entry level exception and cross subsidy exception housing schemes which meet evidenced local housing needs and other policy requirements. This again can include appropriate tenures of older person accommodation.</li> </ul>	No	DP1. Residential Mix

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0357	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Yes	No	Not Specified	<p>Have very serious concerns about impact of Policy DP1 on deliverability of the Plan, when combined with draft Policies SP7, SP8 and SP9. These policies together limit the size and number of houses, undermining the viability of many developments. As such, consider draft Policy DP1 in combination with other proposed policies prevents the draft Shropshire Local Plan from meeting the 'effective' test of soundness.</p> <p>-Section 2b of draft Policy DP1 provides a default housing mix, however it is not clear why it does not estimate the percentage of 4-bed plus housing, which is the most popular (a trend that is likely to be accentuated to accommodate working from home following the Covid pandemic). This mix is reflected in the Viability Study for the draft Shropshire Local Plan, which finds a high proportion of typologies unviable. The natural solution is to increase saleable floorspace to make development more viable, however draft Policies SP7, SP8 and SP9 seek to avoid exceeding residential guidelines, limiting numbers and making a high proportion of development unviable and undeliverable.</p> <p>The proposed housing mix in section 2b of draft Policy DP1 is also not 'justified' or 'effective', as Para 4.5 of the proposed explanation to draft Policy DP1 refers to the Strategic Housing Market Assessment (SHMA) which translates household projections into housing need, however this confuses/over-simplifies 'need' and 'demand', as the majority want larger dwellings than need dictates and does not consider 'need' for home offices/guest room(s). 3-bed dwellings are the most popular size, therefore a 25% requirement for 2-bed or less dwellings does not match demand, which is for larger dwellings.</p> <p>-Section 5 of draft Policy DP1 requires set percentages of M4(3) wheelchair user dwellings (5%) and M4(2) accessible and adaptable dwellings (further 70%). Para 4.26 of the explanation to draft Policy DP1 seeks to justify this through references to the Strategic Housing Market Assessment (SHMA), however the figures identified (13% M4(3) and 33% M4(2)) are completely different to the proposed requirements. The explanation seeks to justify this by referencing the ageing nature of Shropshire's existing population, however this population already occupies existing dwellings, the bulk of which can be adapted (the SHMA estimates 53%), reducing need for new build stock to meet higher standards. Also, even if older households increase, this does not mean they will occupy new housing. As such the requirement for M4(2) housing fails the justified test of soundness.</p> <p>The requirements of section 2b and 5 of draft Policy DP1 also potentially conflict (requirement for small 2 bedroom houses) and raise issues of viability (based on figures in the Viability Study undertaken to inform the draft Shropshire Local Plan, it is considered that the requirements of section 5 would cost £48,150/ha), flexibility about housing types is required to reflect these costs, meaning a relaxation of section 2 is required.</p> <p>-Seriously concerned that section 6 of draft Policy DP1 has too low a threshold and will render many sites undeliverable. Specialist housing normally consists of blocks of at least 50 units to allow delivery of specialist services, representing the entirety of 50 dwelling schemes and half of 100 dwelling schemes. Many allocated sites for 50 or more dwellings are on edges of settlements, not ideal for specialist housing and it is questionable whether providers would be interested in such locations. Also, specialist housing is outside the business model for many developers and they would therefore be delivered by a different provider, reducing general housebuilder interest in medium sized sites, so the policy fails the effective test of soundness. There may be a role for specialist housing on larger urban extensions but not medium sized sites.</p>
A0385	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	<p>Whilst supportive of the principle of addressing the specific local housing needs of Shropshire in draft Policy DP1, consider further site and scheme flexibility should be provided as well as evidence for the standards, if it is to be found sound.</p> <p>The National Planning Practice Guidance (NPPG) identifies evidence to support nationally described space standards should consist of need (including what is currently being built), viability and timing; whilst evidence to support accessibility optional technical standards should include detailed information on the accessibility and adaptability of the existing stock and the size, location, type and quality of dwellings needed. It is not clear if the explanation to draft Policy DP1 and the Strategic Housing Market Assessment (SHMA) undertaken to inform the draft Shropshire Local Plan include all relevant considerations.</p> <p>The draft Shropshire Local Plan is supported by a Viability Assessment (which notes the challenging viability picture across Shropshire), however this needs to be kept under review and there is a need for site/scheme flexibility (as per para 8.10 of the Viability Assessment para 57 of the National Planning Policy Framework), which is not provided for in draft Policy DP1.</p>
A0386	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	<p>Whilst supportive of the principle of addressing the specific local housing needs of Shropshire in draft Policy DP1, consider further site and scheme flexibility should be provided as well as evidence for the standards, if it is to be found sound.</p> <p>The National Planning Practice Guidance (NPPG) identifies evidence to support nationally described space standards should consist of need (including what is currently being built), viability and timing; whilst evidence to support accessibility optional technical standards should include detailed information on the accessibility and adaptability of the existing stock and the size, location, type and quality of dwellings needed. It is not clear if the explanation to draft Policy DP1 and the Strategic Housing Market Assessment (SHMA) undertaken to inform the draft Shropshire Local Plan include all relevant considerations.</p> <p>The draft Shropshire Local Plan is supported by a Viability Assessment (which notes the challenging viability picture across Shropshire), however this needs to be kept under review and there is a need for site/scheme flexibility (as per para 8.10 of the Viability Assessment para 57 of the National Planning Policy Framework), which is not provided for in draft Policy DP1.</p>
A0387	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	<p>Whilst supportive of the principle of addressing the specific local housing needs of Shropshire in draft Policy DP1, consider as drafted the policy is unsound as it is not justified, effective or consistent with national planning policy.</p> <p>The National Planning Practice Guidance (NPPG) identifies evidence to support nationally described space standards should consist of need (including what is currently being built), viability and timing; whilst evidence to support accessibility optional technical standards should include detailed information on the accessibility and adaptability of the existing stock and the size, location, type and quality of dwellings needed. It is not clear if the explanation to draft Policy DP1 and the Strategic Housing Market Assessment (SHMA) undertaken to inform the draft Shropshire Local Plan include all relevant considerations.</p> <p>The draft Shropshire Local Plan is supported by a Viability Assessment (which notes the challenging viability picture across Shropshire and the implications of policies requirements in draft Policy DP1), however this needs to be kept under review and there is a need for site/scheme flexibility (as per para 8.10 of the Viability Assessment para 57 of the National Planning Policy Framework), which is not provided for in draft Policy DP1.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0357	B004	<p>Para 2a and b of draft Policy DP1 should be replaced with the following: "2. On sites of 5 or more dwellings residential development will be expected to provide a mix of dwelling sizes, types and tenures in order to meet the identified needs of local communities, having regard to surveys undertaken in the last 5 years through the 'Right Home Right Place' initiative, evidence from the SHMA, market demand and any other local evidence".</p> <p>Para 5 of draft Policy DP1 should be modified to require 33% M4(2) housing on sites of 5 or more dwellings.</p> <p>Para 6 of draft Policy DP1 should be modified to increase the threshold to 500 dwellings.</p>	<p>Noted. Shropshire Council considers that draft Policy DP1 is justified, effective and consistent with national policy. It is also considered that other relevant draft policies are complementary.</p> <p>With regard to para 2 (including 2b) of draft Policy DP1, it is considered that this provides an appropriate balance between ensuring that new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry), and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand. Given this approach, it is not considered necessary to prescribe a set amount of 4 bedroom plus properties, as these will form part of the suitable mix achieved on the remaining 50% of the site. The mix proposed within para 2b is informed by the Strategic Housing Market Assessment (SHMA) of the draft Shropshire Local Plan, which is considered a robust and proportionate assessment.</p> <p>With regard to para 5 of draft Policy DP1, the SHMA identifies that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the Local Plan period from 2016 to 2038. It then (as explained in para 4.26 and 4.27 of the draft Shropshire Local Plan) calculates a total need for M4(2) and M4(3) housing, which when account is taken of the significant growth in households with a Household Reference Person aged 65 years and over, equates to 77% of total household growth (of which M4(3) constitutes around 13%). These figures have been informed by consideration of the ability of existing properties to be reasonably adapted. As such Shropshire Council considers that the SHMA justifies the proposed thresholds for M4(2) and M4(3) standard dwellings. It is acknowledged that building properties to M4(2) standard will not mean they are necessarily occupied by those in need, but it is important to ensure that the opportunity exists for households in need to access appropriate properties.</p> <p>With regard to para 6 of draft Policy DP1, the Strategic Housing Market Assessment (SHMA) indicates that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the proposed Local Plan period from 2016 to 2038 and also identifies a specific need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision. With regard to specialist designed housing for older people, the National Planning Practice Guidance (NPPG) on Housing for Older People recognises that there is a significant amount of variability in the types of specialist accommodation for older people, identifying four main categories which can be summarised as: a. "Age-restricted general market housing; b. Retirement living or sheltered housing; c. Extra care housing or housing-with-care; and d. Residential care homes and nursing homes". Reflecting the need for and variety of types of specialist accommodation, it is considered that the threshold of 50 or more dwellings proposed within para 6 of draft Policy DP1. However, it is recognised that sites of 50 or more dwellings will be diverse in nature, as such a specific type/quantity of these properties is not specified. This provides appropriate flexibility to respond to site specific/location specific factors.</p>	No	DP1. Residential Mix
A0385	B005	<p>Additional policy wording should be incorporated to provide specific site and scheme flexibility.</p> <p>If no evidence having regard to National Planning Practice Guidance (NPPG) criteria can be provided to justify requirements for optional technical standards, this part of the policy should be deleted.</p>	<p>Noted. It is considered that para's 2a/b of draft Policy DP1 provide an appropriate balance between ensuring that new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand.</p> <p>It is also considered that a proportionate and robust evidence base, including the Strategic Housing Market Assessment (SHMA) and Viability Study is provided to support the proposed requirements and considerations within draft Policy DP1.</p>	No	DP1. Residential Mix
A0386	B003	<p>Additional policy wording should be incorporated to provide specific site and scheme flexibility.</p> <p>If no evidence having regard to National Planning Practice Guidance (NPPG) criteria can be provided to justify requirements for optional technical standards, this part of the policy should be deleted.</p>	<p>Noted. It is considered that para's 2a/b of draft Policy DP1 provide an appropriate balance between ensuring that new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand.</p> <p>It is also considered that a proportionate and robust evidence base, including the Strategic Housing Market Assessment (SHMA) and Viability Study is provided to support the proposed requirements and considerations within draft Policy DP1.</p>	No	DP1. Residential Mix
A0387	B006	<p>Additional policy wording should be incorporated to provide specific site and scheme flexibility.</p> <p>Requirements for optional technical standards should be fully justified by the evidence base, having regard to National Planning Practice Guidance (NPPG) criteria.</p>	<p>Noted. It is considered that para's 2a/b of draft Policy DP1 provide an appropriate balance between ensuring that new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand.</p> <p>It is also considered that a proportionate and robust evidence base, including the Strategic Housing Market Assessment (SHMA) and Viability Study is provided to support the proposed requirements and considerations within draft Policy DP1.</p>	No	DP1. 1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0393	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon;DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan.
A0450	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	Demographic-based projections produced by the SHMA fail to consider the full picture and do not accurately reflect market demand, this should be recognised in DP1. Do not consider the Right Home Right Place process has a robust method for determining the housing mix of 50% of dwellings on a site. It is not clear what justification there is for setting these requirements. Justification for the housing mix of 50% of dwellings specified in circumstances where there is no Right Home Right Place is unclear and does not correlate with the SHMA. The need for higher accessibility, adaptability and wheelchair housing standards is addressed at paragraphs 6.267 – 6.294 of the SHMA. However, the evidence does not appear to support the proposed requirement for 70% of all new dwellings to meet M4(2) standard. The proposed policy is inconsistent with the NPPG, which is clear that the requirement for wheelchair accessible homes (i.e. M4(3) standard) should only be applied to dwellings where the local authority is responsible for allocating or nominating a person to live in that dwelling (i.e. certain types of affordable housing). The policy states that ‘a range’ of specialist housing will be provided, but it does not specify how much specialist housing that entails on an individual proposal. But in any event, achieving ‘a range’ of specialist housing on many sites of less than 200-250 dwellings would be extremely challenging. Most sites within the range of 50-250 dwellings would be acquired and developed by a single developer, which would be unlikely to be able to deliver specialist housing such as a care home or extra care accommodation.
A0455	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Yes	Yes	Yes	In Para 2a of draft Policy DP1 it is considered that wording should refer to the need for an up to date Local Housing Need Survey, to ensure housing delivery reflects need at that point in time, rather than a snap shot in time, sometime over the 22 year Plan period. In Para 2b of draft Policy DP1 it is considered the proposed split should be the starting point which schemes should have due regard to, not a definitive requirement. Para 2a and 2b should also recognise that the mix of the remaining open market housing provision should have regard to housing market demand and individual site viability. Delivery of open market housing should reflect individual site character, design and accessibility as well as current market demand. Overly prescriptive requirements could compromise the viability of allocated sites. Suitability of the proposed housing mix should also have regard to the commitment to support unmet needs arising in the Black Country and whether the mix will meet these needs. Discussions should be had with neighbouring authorities to establish what their housing need composition looks like, and this should be reflected in Shropshire housing mix policies.
A0461	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	Not Specified	Not Specified	Support the general approach of the policy, particularly section 2 which allows flexibility within the mix and variety of dwellings sizes for market dwellings.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0393	B013	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP1. Residential Mix
A0450	B001	Draft Policy DP1 should be amended to: -Make clear the dwelling mix set out in the SHMA is a starting point only, and to be applied flexibly, reflecting local needs and market demand. -Amended the housing mix to state that, where appropriate, residential development will be expected to provide a mix of dwelling sizes, types and tenures in order to meet the identified needs of local communities, having regard to evidence from the SHMA, market demand and any other local evidence (including the Council's Right Home Right Place survey). -With regard to M4(2) housing, the evidence and policy should be reviewed, and more realistic assumptions applied. -With regard to M4(3) housing, the policy needs to make clear that the 5% requirement only applies to the element of affordable housing.	Noted. Shropshire Council considers the proposed requirements of draft Policy DP1 positively respond to the housing need evidence within the Strategic Housing Market Assessment (SHMA), which is considered a robust and proportionate evidence base for informing policies on housing need. It also positively responds to housing need evidence arising from the Right Home Right Place Surveys, which are considered an appropriate means of identifying housing need within communities. With regard to the bedroom size mix, it is considered para's 2a/b of draft Policy DP1 provide an appropriate balance between ensuring new development includes an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factors as site specific characteristics, local need and market demand. The housing mix proposed within para 2b of draft Policy DP1 is informed by the SHMA, which indicates a significant proportion of new dwellings required during the proposed Plan period will be 1, 2 and 3 bedrooms in size. Specifically, the SHMA indicates around 32.7% of the dwellings needed will be 1 or 2 bedrooms in size and a further 43.5% will be 3 bedrooms in size. This demand for 1, 2 and 3 bedroom dwellings also reflects the view often expressed by local communities when discussing their local housing needs. With regard to M4(2) and M4(3) housing, the SHMA identifies that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the Local Plan period from 2016 to 2038. It calculates a total need for M4(2) and M4(3) housing equivalent to 77% of total household growth (of which M4(3) constitutes around 13%). It is recognised that part of this need can be met within specialist accommodation, however Government's reform of Health and Adult Social Care is underpinned by a principle of sustaining people at home for as long as possible. As such Shropshire Council considers the SHMA justifies the proposed thresholds for M4(2) and M4(3) standard dwellings. With regard to M4(3) housing, it is acknowledged that NPPG stipulates Local Authorities should only require wheelchair accessible homes for those dwellings they are responsible for allocating/nominating a person to live in that dwelling. The explanation to draft Policy DP1 states in paras 4.33 and 4.34 "It should be noted that M4(3) (wheelchair user dwellings) standard within Building Regulations sets a distinction between wheelchair accessible (a home readily useable by a wheelchair user at the point of completion) and wheelchair adaptable (a home that can be easily adapted to meet the needs of a household including wheelchair users) dwellings. Where dwellings are required to meet M4(3) (wheelchair user dwellings) standard within Building Regulations to comply with this policy, they will normally consist of wheelchair adaptable homes. Wheelchair accessible homes will only be required where Shropshire Council is responsible for nominating a person to live in the dwelling."	No	DP1. Residential Mix
A0455	B006	Amend para 2a of draft Policy DP1 to reference up to date Local Housing Need Survey. Amend para 2b of draft Policy DP1 so that the proposed split is the starting point and not a definitive requirement. Amend para 2a/2b of draft Policy DP1 to include reference to the mix of the remaining open market housing provision having regard to housing market demand and individual site viability. Ensure proposed housing mix responds to unmet needs arising in the Black Country that are to be met in Shropshire.	Noted. It is considered that para's 2a/b of draft Policy DP1 provide an appropriate balance between ensuring that new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand. Specifically with regard to para 2a, it references the need for a Local Housing Need Survey to be undertaken within the last 5 years (reflecting the review cycle for the 'Right Home Right Place' Local Housing Need Survey) and as such ensures that the evidence informing the housing mix on a site is up to date.	No	DP1. Residential Mix
A0461	B006	Suggest further clarity is required to justify the inclusion of the WMS (2015) requirements, notably those included in Paragraph 5 of Policy DP1. Although it appears the impact of applying such standards has been assessed within the Viability Study, it is difficult to ascertain the conclusions of the study and therefore how the policy requirements have been derived. A blanket policy approach relating to optional standard and specifically wheelchair accessible properties may not be appropriate across the whole plan area and therefore the requirements may need to vary across locations, sites and schemes.	With regard to M4(2) and M4(3) housing, the Strategic Housing Market Assessment (SHMA) identifies that growth in the number of older persons' households is a key feature in the population and household change projected to occur in Shropshire over the Local Plan period from 2016 to 2038. It calculates a total need for M4(2) and M4(3) housing equivalent to 77% of total household growth (of which M4(3) constitutes around 13%). It is recognised that part of this need can be met within specialist accommodation, however Government's reform of Health and Adult Social Care is underpinned by a principle of sustaining people at home for as long as possible. As such Shropshire Council considers the SHMA justifies the proposed thresholds for M4(2) and M4(3) standard dwellings. It is also considered appropriate to provide the explanation of the distinction between wheelchair accessible and wheelchair adaptable housing within the proposed explanation rather than the draft policy.	No	DP1. Residential Mix

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0487	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	<p>If the Council wishes to apply the optional NDSS to new build dwellings, this should only be done in accordance with para 127f &amp; Footnote 46 of the National Planning Policy Framework (NPPF). Footnote 46 states “policies may also make use of the NDSS where the need for an internal space standard can be justified”. As set out in the NPPF, all policies should be underpinned by relevant and up to date evidence, which should be adequate, proportionate and focussed tightly on supporting and justifying the policies concerned (para 31). Therefore, a policy requirement for NDSS for all affordable housing must be justified by credible and robust evidence.</p> <p>Before adopting the NDSS for all affordable housing, the Council should provide a local assessment evidencing its case. The Council has not demonstrated in its supporting evidence the need for all affordable housing to meet NDSS. The Council’s evidence only identified overcrowding in 11% of social rented accommodation (para 4.11) as opposed to all affordable housing tenures. The Council also suggested that such overcrowding may be an unintended consequence of the “bedroom tax” (para 4.13) rather than a systemic problem to resolve. The NDSS should only be introduced on a “need to have” rather than a “nice to have” basis. An inflexible policy approach to NDSS for all affordable housing will impact on affordability and effect customer choice for affordable homeownership products such as First Homes. The introduction of the NDSS for all dwellings may lead to customers purchasing larger homes in floorspace but with bedrooms less suited to their housing needs. This may lead to the unintended consequences of potentially increasing overcrowding and reducing the quality of their living environment. The Council should assess any potential adverse impacts on meeting demand for First Homes and other affordable homeownership products, which may adversely slowdown affordable housing delivery rates of sites included in the housing trajectory.</p> <p>If the Government implements proposed changes to Part M of the Building Regulations as set out in the “Raising Accessibility Standards for New Homes” consultation, which closed on 1 December 2020, the Council’s amendment to Bullet Points 4 &amp; 5 of Policy DP1 will be unnecessary. In the meantime, if the Council wishes to adopt the optional standards for accessible &amp; adaptable dwellings, then this should only be done in accordance with para 127f &amp; Footnote 46 NPPF and National Planning Practice Guidance (NPPG). The existing housing stock (146,126 dwellings in 2019) is considerably larger than the new build sector (only 0.8% annual addition to existing stock) so adapting the existing stock is likely to form part of the solution. The optional standards should only be introduced on a “need to have” rather than a “nice to have” basis. It is important to note that not all health problems affect a household’s housing needs therefore not all health problems require adaptations to homes. New housing standards are not usually available in the older existing housing stock and benefit less able-bodied occupants. M4(1) standards are likely to be suitable for most residents.</p> <p>The Council state that the requirement for M4(3) is for a wheelchair adaptable home (which includes features to make a home easy to convert to be fully wheelchair accessible) rather than a wheelchair accessible home (which includes the most common features required by wheelchair users) (para 4.34). This distinction should be set out in the policy wording rather than in the supporting text.</p> <p>The LPR should ensure that suitable sites are available for a wide range of developments across a wide choice of appropriate locations. There is no rationale for the selection of 50 dwellings as the threshold for qualifying development proposals. The policy approach to the proportion, type and tenure of older persons housing is unclear, ambiguous and defers negotiation of the precise scale and type of older persons and specialist housing on all developments of 50 or more dwellings to the planning application process. The vagueness of this Bullet Point causes uncertainty and means that neither the applicant nor the decision maker know the Council’s expectations from a development proposal.</p>
A0490	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	<p>Not always feasible to deliver specialist housing for older persons on schemes of over 50 units. Extra care or retirement housing (esp. those with care elements) can generally only be delivered in volume and operators tend to deliver such accommodation as bespoke schemes in their own right. This policy objective might be possible on sites exceeding 200+ units but on smaller schemes such an obligation is likely to render many schemes undeliverable if compelled to deliver this type of accommodation due.</p> <p>Providing lifetime homes or accessible/adaptable dwellings is quite a different objective.</p>
A0491	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	Not Specified	Not Specified	<p>Not always feasible to deliver specialist housing for older persons on schemes of over 50 units. 1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0487	B001	<p>With regard to draft Policy DP1:</p> <p>-The requirement for NDSS for all affordable housing is unjustified and Bullet Point 3 should be deleted. If this retained, the Council should include transitional arrangements as land deals underpinning residential sites may have been secured prior to any proposed introduction of NDSS and these sites should be allowed to move through the planning system before any proposed policy requirements are enforced. As such NDSS should not be applied to Planning Applications approval prior to a specified date.</p> <p>-Bullet Points 4 &amp; 5 of Policy DP1 should be deleted.</p> <p>-Bullet Point 6 should be deleted. An alternative policy approach to support older persons and specialist housing, where it's well-located in respect of services &amp; facilities, would be a positive, proactive and proportionate ways of meeting need for older persons housing. It is also noted that the SHMA Report identifies that 14.3% of Shropshire's existing housing stock are bungalows (para 3.144) substantially exceeding the national (England 9.4%) and regional (West Midlands 7.6%) provision of bungalows, which are often occupied by older households.</p>	<p>Noted. The approach to nationally described space standards proposed within Para 3 of draft Policy DP1 is considered to positively respond to the evidence available within the Strategic Housing Market Assessment (SHMA) and other sources. Providing dwellings with sufficient internal floorspace positively contributes to the future occupier's ability to achieve a high-quality of life and is responsive to changing household requirements, by increasing the ability to include adaptations at a later date.</p> <p>With regard to M4(2) and M4(3) housing, the SHMA identifies that growth in the number of older persons' households is a key feature in the population and household change projected to occur in Shropshire over the Local Plan period from 2016 to 2038. It calculates a total need for M4(2) and M4(3) housing equivalent to 77% of total household growth (of which M4(3) constitutes around 13%). It is recognised that part of this need can be met within specialist accommodation, however Government's reform of Health and Adult Social Care is underpinned by a principle of sustaining people at home for as long as possible. As such Shropshire Council considers the SHMA justifies the proposed thresholds for M4(2) and M4(3) standard dwellings. It is also considered appropriate to provide the explanation of the distinction between wheelchair accessible and wheelchair adaptable housing within the proposed explanation rather than the draft policy.</p> <p>With regard to the requirement to provide housing for older people, the National Planning Policy Framework (NPPF) specifies that housing needed for different groups in the community should be assessed and reflected in planning policies, this includes the needs of older people. The SHMA indicates that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the proposed Local Plan period from 2016 to 2038. It also identifies a specific need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision. In order to ensure the needs of older people are met all residential development is expected to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. However it is considered appropriate to specifically require larger sites of 50 or more dwellings to include an appropriate range of specialist housing designed to meet the diverse needs of older people as this will ensure inclusive and sustainable communities. However, it is recognised that sites of 50 or more dwellings will be diverse in nature. It is for this reason that a specific type/quantity of these properties is not specified. This provides appropriate flexibility to respond to site specific/location specific factors.</p>	No	DP1. Residential Mix
A0490	B001	<p>The Council accept a need to deliver specialist (care) housing but fail to make provision in their draft allocations.</p> <p>A separate policy to deliver specialist housing is considered necessary as NPPF Para 61 guides and NPPG recommends (ID63).</p>	<p>Noted. Draft Policy DP1 ensures that provision of an appropriate range of specialist housing designed to meet the diverse needs of older people is included within all sites of 50 or more dwellings, this includes proposed allocations. As it is recognised that sites of 50 or more dwellings will be diverse in nature, the specific type/quantity of these properties is not specified, this provides appropriate flexibility to respond to site specific/location specific factors.</p> <p>It is also considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate. Specifically:</p> <p>-Draft Policy DP1 requires all residential development to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. It also specifically requires the provision of an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings.</p> <p>-Settlement policies (S1-S19) allow for appropriate windfall development within identified development boundaries (or in the case of Community Clusters on specified types of sites) where they comply with other policy requirements, which can of course include accommodation for older people.</p> <p>-Draft Policy SP10 allows for affordable exception, entry level exception and cross subsidy exception housing schemes which meet evidenced local housing needs and other policy requirements. This again can include appropriate tenures of older person accommodation.</p>	No	DP1. Residential Mix
A0491	B001	<p>The Council accept a need to deliver specialist (care) housing but fail to make provision in their draft allocations.</p> <p>A separate policy to deliver specialist housing is considered necessary as NPPF Para 61 guides and NPPG recommends (ID63).</p>	<p>Noted. Draft Policy DP1 ensures that provision of an appropriate range of specialist housing designed to meet the diverse needs of older people is included within all sites of 50 or more dwellings, this includes proposed allocations. As it is recognised that sites of 50 or more dwellings will be diverse in nature, the specific type/quantity of these properties is not specified, this provides appropriate flexibility to respond to site specific/location specific factors.</p> <p>It is also considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate. 1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0582	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	<p>The rationale for the stated 50% of housing meeting a prescribed housing mix is not set out. The requirement is considered to be overly restrictive and unjustified. With regard to use of Right Home Right Place Surveys, these represent only snapshots of need and the majority of Key Centres (focus for housing delivery) do not have surveys available. There is also a need for clarity about when such evidence is up to date.</p> <p>DP1 is considered to be overly prescriptive and will impact on the viability and marketability of residential schemes. As such it is requested that reference to a specific housing mix be removed from the policy. Wording should be added enabling a developer to put forward a case for a certain mix of units, based on evidence of the local market, local circumstance or other relevant issues.</p> <p>Nationally described space standards (NDSS) should only be required where the need is justified (as per footnote 46 of the National Planning Policy Framework (NPPF)). The Council's evidence, as set out within the Delivery and Viability Study (paragraph 8.6 and Appendices 6 and 7), is inconclusive in relation to the level of housing currently achieving the nationally described space standards (NDSS) and whether there is persistent significant under-delivery to provide a compelling need for NDSS. Impact on viability also unclear. Welcome recognition of the need to consider the cost of M4(2) and M4(3) requirements. However, the costs included in the Viability Assessment have not been informed by relevant local stakeholders and developers, they are simply derived from 'Housing Standards Review – Final Implementation Impact Assessment' and indexed to Dec 2019. When determining if specialist housing is appropriate within a new development, consideration should be given to locational factors, such as proximity to essential community services specifically for those who would occupy such specialist housing. Impact on viability also needs to be considered.</p>
A0584	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Yes	No	Yes	<p>There is an absence in the LPR of an objectively assessment requirement for C2 / care provision and effective strategy to meet this need. There are five key reasons for major concern about the shortfall in retirement and care housing, all of which support our representations to this Local Plan:</p> <p>First, the rapidly increasing elderly portion of the UK population, which is an even greater feature in the Shropshire population, rising swiftly and significantly over future years.</p> <p>Second, increasing under-occupation of the housing stock caused by a rapidly ageing population has created a dysfunctional housing market. First time buyers find it difficult to get on the housing ladder and families find moving to larger homes expensive. Older households are only 40% to 60% efficient based on space usage, whereas space is at a premium in younger households.</p> <p>Third, far too few homes are being built that cater for older people, providing opportunities to down size and / or with access to current or later care. The vast majority of homes built are not designed for retirement living or downsizing. Elderly persons housing has only accounted for about 125,000, or 2%, of all new homes built since 2000, but each year around 700,000 people turn 65 years of age.</p> <p>Fourth, the net result is that the number of households will continue to grow at a faster rate than the population and average household size will continue to reduce, resulting in increasingly inefficient use of the housing stock. Without change, the number of 'surplus' bedrooms will grow to over 20m by 2040, 60% of which will be in older persons' households.</p> <p>Fifth, whilst care homes can cater for people with high needs, the provision of age appropriate housing, with flexible access to communal services and personal care, must become part of mainstream housing policy. This should be integrated with tackling the social and healthcare needs of an ageing population.</p>
A0595	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Yes	No	Yes	<p>The Policy requires that residential development includes a mix of dwelling sizes, types and tenures in order to meet the identified needs of local communities. This should be in accordance with the councils Strategic Housing Market Assessment (SHMA). Specific provisions are made for at least 25% of open market dwellings to be 2bedrooms or less; a further 25% of open market housing should be 3bedrooms or less, but there is a need for this policy to be applied flexibly. Any housing survey relied on needs to be up to date and the policy should highlight this. Consideration should also be given to the expertise of house builders who have a strong understanding of housing market needs and demands in an area. Consideration also needs to be given to the relevant planning context and suitability of the site to accommodate the needs identified. Similarly the urban context - locality and suitability for a particular housing mix in urban design terms needs to be considered.</p> <p>Criterion 6 of the policy specifically requires on schemes of 50 dwellings or more an appropriate range of specialist housing for older people. This aspect of the policy is not justified by evidence and is not clear or effective. It is not understood why it only applies to schemes of 50 dwellings or more, or what "appropriate" provision is.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0582	B002	<p>Part 2 of draft Policy DP1 relating to the unit size mix is considered to be overly prescriptive and may impact on the viability and marketability of residential schemes. It is requested that reference to a specific housing mix be removed from the policy. Wording should be added to Part 2 of draft Policy DP1 enabling a developer to put forward a case for a certain mix of units, based on evidence of the local market, local circumstance or other relevant issues.</p> <p>The introduction of NDSS into the SLP policy requirements is not considered to be justified by evidence of a persistent significant under delivery against NDSS in Shropshire. The costs of compliance with the NDSS needs to be fully understood in terms of the SLP viability.</p> <p>The costs involved in the adoption of the optional access standards is not fully justified by the evidence base for the SLP. As such Policy DP1 does not accord with paragraph 31 of the NPPF and should be removed from the SLP.</p> <p>The location of specialist housing should be based on proximity to specific facilities that future residential-dents of such housing would require.</p> <p>If parts 1-6 are retained, an additional part 7 should be included in policy DP1, stating that 'housing schemes which do not comply with the requirements sets out in 1-6 due to viability concerns but represent otherwise sustainable development will be considered where evidence is clearly presented and agreed by the Council'.</p>	<p>Noted. It is considered para's 2a/b of draft Policy DP1 provide an appropriate balance between ensuring new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand.</p> <p>Noted. The approach to nationally described space standards proposed within Para 3 of draft Policy DP1 is considered to positively respond to the evidence available within the Strategic Housing Market Assessment (SHMA) and other sources. Providing dwellings with sufficient internal floorspace positively contributes to the future occupier's ability to achieve a high-quality of life and is responsive to changing household requirements, by increasing the ability to include adaptations at a later date.</p> <p>It is recognised that sites of 50 or more dwellings will be diverse in nature and it is for this reason that a specific type/quantity of these properties is not specified. This provides appropriate flexibility to respond to site specific/location specific factors.</p> <p>This draft Policy was informed by the Viability Assessment undertaken to inform the draft Shropshire Local Plan. this is considered a proportionate and robust assessment.</p> <p>Shropshire Council does not consider it is appropriate or necessary to include the proposed text regarding non-compliance with the various requirements of draft Policy DP1.</p>	No	DP1. Residential Mix
A0584	B003	<p>The allocation of sites for specialised accommodation is required in the form of purpose built and managed care communities to deliver a range of accommodation incorporating staged, flexible and responsive levels of supporting healthcare and well-being. Suitably located sites should be allocated for this type of development, providing managed facilities that cater for older people's care and related needs and requirements as they evolve over time. These are distinct from market housing sites and will differ in their character and location from land that is suitable for market housing. Alternatively, a criteria based policy should be included in the plan setting out appropriate criteria for such sites to be identified and brought forward. A highly suitable location is that proposed by us on behalf of the landowner at Hencote vineyard and winery, for a high quality specialised care community adjacent to the vineyard, still retaining the vineyard and its openness. This site is adjacent to the proposed SHR 173 housing allocation, and located within the line of the North West Relief Road.</p> <p>In order for the Draft Shropshire Local Plan to be found sound, the identified needs of the older population must be met with a justified, effective strategy consistent with national policy – expecting strategic housing sites to deliver the quantum of specialist accommodation for the older population to achieve this is not realistic and is unsound.</p>	<p>Noted. The Local Plan Review is informed by a Strategic Housing Market Assessment (SHMA) which is considered proportionate and robust evidence. The SHMA indicates that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the proposed Local Plan period from 2016 to 2038. It also identifies a specific need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision.</p> <p>It is considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate. Specifically:</p> <ul style="list-style-type: none"> <li>-Draft Policy DP1 requires all residential development to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. It also specifically requires the provision of an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings.</li> <li>-Settlement policies (S1-S19) allow for appropriate windfall development within identified development boundaries (or in the case of Community Clusters on specified types of sites) where they comply with other policy requirements, which can of course include accommodation for older people.</li> <li>-Draft Policy SP10 allows for affordable exception, entry level exception and cross subsidy exception housing schemes which meet evidenced local housing needs and other policy requirements. This again can include appropriate tenures of older person accommodation.</li> </ul>	No	DP1. Residential Mix
A0595	B001	<p>The policy should allow for additional flexibility to recognise how varying mix could be influenced by other evidence and material planning considerations. Justification is required for the 50 dwelling trigger and additional precision is required in respect of requirements for older persons specialist accommodation.</p>	<p>Noted. With regard to the bedroom size mix, it is considered that para's 2a/b of draft Policy DP1 provide an appropriate balance between ensuring that new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand.</p> <p>With regard to the requirement to provide housing for older people, the National Planning Policy Framework (NPPF) specifies housing needed for different groups in the community should be assessed and reflected in planning policies, this includes the needs of older people. The Strategic Housing Market Assessment (SHMA) indicates that growth in the number of older persons' households is a key feature in the population and household change projected to occur in Shropshire over the proposed Local Plan period from 2016 to 2038. It also identifies a specific need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision. In order to ensure the needs of older people are met, all residential development is expected to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. However it is considered appropriate to specifically require larger sites of 50 or more dwellings to include an appropriate range of specialist housing designed to meet the diverse needs of older people as this will ensure inclusive and sustainable communities. However, it is recognised that sites of 50 or more dwellings will be diverse in nature, as such a specific type/quantity of these properties is not specified. This provides appropriate flexibility to respond to site specific/location specific factors.</p>	No	DP1. Residential Mix

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0598	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	<p>With regard to the proposed optional technical standards (nationally described space standards and accessible and adaptable/wheelchair user dwellings) in draft Policy DP1, the draft Shropshire Local Plan relies on information regarding wheelchair use in households nationally, as well as the demographics of Shropshire, as justification for the proposed Policy requirements in draft Policy DP1. However, Question whether this is a sufficient evidential basis for the draft Policy, given there is no locally-specific evidence presented beyond broad demographic projections. As such, suggest the 'requirement' for such provision should be loosened to reflect the lack of specific justification in Shropshire for need for such properties, in accordance with national policy.</p> <p>Draft Policy DP1 also seeks to establish a requirement for sites of 50 or more dwellings to provide an appropriate range of specialist housing for the elderly. Object to this proposal as there is a lack of justification (no specific supporting evidence) it is necessary and deliverable/viable, Furthermore, such a requirement is contrary to national policy, which does not specifically require provision of such housing to meet specific needs akin to an affordable housing policy (para 62 of the National Planning Policy Framework).</p> <p>Draft Policy DP1 also required the mix of housing delivered on sites to be in accordance with the Strategic Housing Market Assessment (SHMA) and other local needs survey evidence. However, this only relates to needs of Shropshire-based residents) and does not reflect the needs of those households who would form part of the housing element over-and-above that which relates to 'Shropshire-only' housing needs, including the unmet need element emanating from outside the area. As such this wording is not justified or consistent with national policy and is unsound.</p>
A0601	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	No	<p>Draft Policy DP1 requires an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings. However, it is important to ensure specialist housing is appropriately delivered where need/demand arises. National research prepared by the Associated Retirement Community Operators (ARCO) identified a 6-mile market catchment radius for later living/specialist care facilities from last place of residence. As such, the proposed blanket approach that all sites of 50 or more dwellings should provide specialist later living housing is unjustified/ineffective and could result in delivery of facilities in the wrong locations to meet housing needs and location preferences. The location of specialist housing accommodation should be informed by evidence of localised housing needs and existing supply as opposed to large site location.</p>
A0608	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	<p>Part 6a and 6b of draft Policy DP1 should include "where need is demonstrated," at the start of each sentence.</p> <p>In order for this policy to be reasonably applied and found sound, it needs to be justified through preparation of needs assessments to evidence the specialist and specific types of properties sought. Without this, the viability evidence required to underpin the policy is not robust and potentially places an unreasonable financial burden upon developments as build costs are higher due to specific design criteria to serve older people. This policy should, therefore, be amended to include 'where need is demonstrated' to be found sound, be justified and compliant with national policy.</p>
A0609	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	No	Not Specified	<p>Support the aims of draft Policy DP1 and the need to provide a mix of homes that meet local needs.</p> <p>However, to ensure draft Policy DP1 is positively prepared, effective and justified, Part 1 needs to offer more flexibility to account for the changing requirements in housing needs over the proposed Plan period. Agree size, type and tenure of new dwellings should have regard to Shropshire Council's Strategic Housing Market Assessment (SHMA), however this should only apply where the SHMA is up-to-date reflects the needs of the County and individual settlements. Also consider draft Policy DP1 should be amended to account for localised and site specific evidence to support a departure from the district wide requirements set out in the SHMA. Flexibility within this policy is of utmost importance to ensure delivery of housing is not frustrated as a result of an overly prescriptive policy, or a policy which does not reflect the specific needs of the distinct settlements within Shropshire.</p> <p>Welcome clarification in Part 2 of draft Policy DP2 as to when a Local Housing Need Survey would be applicable and that it should have occurred within the last 5 years. This is considered appropriate and effective in ensuring proposed development meets locally identified needs.</p> <p>With regards to Part 2b of draft Policy DP2, acknowledge Part 2 of the SHMA has been published (September 2020) which it is assumed to be the evidence that informs the requirements of part 2b. However, this is liable to change as subsequent SHMA's are prepared and published and therefore it is recommended for the policy to be effective and justified, this is amended to make reference to an up-to-date SHMA (or equivalent survey endorsed by Shropshire Council). A failure to do this could mean that the policy requirements become outdated through the lifetime of the Plan.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0598	B009	Requirements relating to nationally described space standards and accessible and adaptable/wheelchair user dwellings in draft Policy DP1 should be relaxed. Requirements for sites of 50 or more dwellings to provide an appropriate range of specialist housing for the elderly within draft Policy DP1 should be removed. Requirements for bedroom dwelling mixes should be significantly amended.	<p>With regard to the proposed requirements for accessible and adaptable/wheelchair user dwellings (M4(2) and M4(3) dwellings), the Strategic Housing Market Assessment (SHMA) undertaken to inform the draft Shropshire Local Plan identifies that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the Local Plan period from 2016 to 2038. It then calculates a total need for M4(2) and M4(3) housing equivalent to 77% of total household growth (of which M4(3) constitutes around 13%). As such Shropshire Council considers that the SHMA justifies the proposed thresholds for M4(2) and M4(3) standard dwellings.</p> <p>With regard to the proposed requirements for provision of specialist housing for the elderly, the National Planning Policy Framework (NPPF) specifies that housing needed for different groups in the community should be assessed and reflected in planning policies, this includes the needs of older people. The SHMA indicates that growth in the number of older persons' households is a key feature in the population and household change which is projected to occur in Shropshire over the proposed Local Plan period from 2016 to 2038. It also identifies a specific need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision. In order to ensure the needs of older people are met it is considered that there is a need to provide an appropriate range of specialist housing designed to meet the diverse needs of older people, including through such provision on sites of 50 or more dwellings. It is recognised that such sites will be diverse in nature and it is for this reason that a specific type/quantity of these properties is not specified. This provides appropriate flexibility to respond to site specific/location specific factors.</p> <p>With regard to the proposed criteria on bedroom dwelling mix, it is considered that para's 2a/b of draft Policy DP1 provide an appropriate balance between ensuring that new development will include an appropriate mix of dwellings to meet the needs of communities (based on either the results of Local Housing Need Surveys or the SHMA), providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factor as site specific characteristics, local need and market demand.</p>	No	DP1. Residential Mix
A0601	B001	Para 6 of draft Policy DP25 should be amended to state "Unless robust evidence is provided demonstrating there is no localised need and demand, on sites of 50 or more dwellings:...."	Noted. The National Planning Policy Framework (NPPF) specifies housing needed for different groups in the community should be assessed and reflected in planning policies, this includes the needs of older people. The Strategic Housing Market Assessment (SHMA) indicates growth in the number of older persons' households is a key feature in the population and household change projected to occur in Shropshire over the proposed Local Plan period from 2016 to 2038. It also identifies a specific need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision. In order to ensure the needs of older people are met it is considered that there is a need to provide an appropriate range of specialist housing designed to meet the diverse needs of older people. It is considered that the distribution of sites of 50 or more dwellings will appropriately align with and contribute to meeting this need and as such this is considered an appropriate mechanism. However, it is recognised that sites of 50 or more dwellings will be diverse in nature and it is for this reason that a specific type/quantity of these properties is not specified. This provides appropriate flexibility to respond to site specific/location specific factors.	No	DP1. Residential Mix
A0608	B008	Part 6a and 6b of draft Policy DP1 should include "where need is demonstrated," at the start of each sentence.	Noted. A Strategic Housing Market Assessment (SHMA) has been undertaken to inform the draft Shropshire Local Plan, this is considered a comprehensive and robust assessment of housing need. With regard to specialist designed housing for older people, the SHMA projects that over the Local Plan period, there will be a need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision. It is recognised that sites of 50 or more dwellings will be diverse in nature and it is for this reason that a specific type/quantity of these properties is not specified. This provides appropriate flexibility to respond to site specific/location specific factors.	No	DP1. Residential Mix
A0609	B011	Part 1 of draft Policy DP1 should be updated to state 'in accordance with an up to date SHMA' and to 'account for localised and site specific evidence to support a departure from the district wide requirements', to ensure that it remains effective in addressing local housing needs. Par 2b of draft Policy DP1 should be updated to reference an up to date SHMA.	<p>Noted. Shropshire Council considers that the Strategic Housing Market Assessment (SHMA) (2020) is a robust and proportionate evidence base for informing policies on housing need. It is also considered that draft Policy DP1 provides an appropriate level of flexibility whilst also providing certainty to decision makers, communities and the development industry.</p> <p>Specifically with regard to para's 2a/b of draft Policy DP1, they provide an appropriate balance between ensuring that new development will include an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) about housing mix requirements, and also allowing flexibility for innovation within development. Specifically flexibility and innovation exists in that the specific housing mix is defined for 50% of open market housing, with the remaining 50% to include a suitable mix and variety of dwelling sizes. This mix can respond to such factors as site specific characteristics, local need and market demand.</p> <p>The mix defined for 50% of open market dwellings in para 2b is informed by the SHMA which indicates that a significant proportion of the new dwellings required during the proposed Plan period will be 1, 2 and 3 bedrooms in size. Specifically, the SHMA indicates around 32.7% of the dwellings needed will be 1 or 2 bedrooms in size and a further 43.5% will be 3 bedrooms in size.</p> <p>This demand for 1, 2 and 3 bedroom dwellings also reflects the view often expressed by local communities when discussing their local housing needs.</p>	No	DP1. Residential Mix

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0622	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Yes	No	Yes	Agree a mix of dwellings should be provided to meet the needs of local communities. Whilst also agree with the general sentiment that larger development sites could include specialist housing designed to meet the needs of older people, there may also be opportunities to provide one-off specialist care and retirement facilities. The current Covid crisis has gravely highlighted the shortcomings in the nation's approach to elderly care through the distinct lack of age-related housing options. The new local plan needs to revisit its policy guidelines to take account of this.
A0623	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	Not Specified	Not Specified	The draft Shropshire Local Plan should not include a prescriptive policy on housing mix, size, types or tenure as needs will change over the proposed Plan period. Such a policy would potentially undermine viability and delivery of sites. Consider any such policy should be dealt with as a supplementary planning document which can be regularly updated and, in addition, there should be no 'blanket' policy – standards should reflect the needs of specific settlements and areas.
A0624	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Yes	No	Yes	The Local Plan should not include a prescriptive policy on housing mix, size, types or tenure. Precise housing needs will change over the plan period. Such a policy would potentially undermine viability and delivery of sites and present the risk that changes in housing need arising in later years of the plan period are not met. This presents a risk of the plan being ineffective in this regard. An alternative approach would be to deal with such matters through a supplementary planning document which can be regularly updated.
A0628	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	No	No	Yes	Para 3 of draft Policy DP1 states "all affordable dwellings will achieve the nationally described space standard. All open market dwellings are strongly encouraged to comply with the nationally described space standard". Object to this as a requirement for open market residential units. Footnote 46 of the National Planning Policy Framework (NPPF) requires justification for application of nationally described space standards, consider the evidence provided (over-crowding) is insufficient. Parts of the draft Policy could inadvertently undermine delivery of much needed affordable housing. For instance requirements for minimum floor to ceiling heights would likely increase costs and is unjustified. This can be discussed during the Planning Application process and appropriate flexibility provided to meet differing needs/aspirations. Requirements relating to Nationally Described Space Standards (NDSS) are not justified and given potential to lead to viability issues and reduced delivery of affordable housing, these elements of draft Policy DP1 should, without further evidence, be removed or re-worded to advise the use of the NDSS rather than demand it.
A0629	B007-13	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon. DPs 1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan.
A0663	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	Not Specified	Not Specified	Support introduction of the Nationally Described Space Standard (NDSS) where there is a proven need for such a technical standard. However, we ask the Council to strongly consider applying this standard across all tenures to ensure Registered Providers are competing on an equal basis for land purchases. Currently, introduction of draft Policy DP1, implementing the Nationally Described Space Standards, does not meet the tests set out in the Planning Practice Guidance (Paragraph: 002 Reference ID: 56-002-20160519) and as originally set out in a Written Ministerial Statement (WMS, 2015), each of which set out a requirement to address a clearly evidenced need. The Council has not published any evidence which shows the need for adopting the standards, and nor is this demonstrated in the Submission Draft. As a result, the introduction of NDSS is not consistent with national planning guidance.
A0664	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	No	No	No	If Government implements proposed changes to Part M of the Building Regulations as set out in the "Raising Accessibility Standards for New Homes" consultation, which closed on 1 December 2020, Bullet Points 4 & 5 of Policy DP1 will be unnecessary. In the meantime, if the Council wishes to adopt the optional standards for accessible & adaptable dwellings, then this should only be done in accordance with the 2019 NPPF (para 127f & Footnote 46) and the NPPG. The Retirement Housing Consortium would ask it to be noted that: a) Whilst not all its apartments are necessarily built to wheelchair adaptability standards, they will incorporate a very high degree of accessibility and features not least (a) level and step free access throughout (b) wheelchair and mobility scooter storage meaning that it is no then necessary to have storage facilities in each apartment - thereby addressing aspects of M4(3) compliance, albeit indirectly. Such schemes therefore do much to address need without full compliance. b) Any proposal for an additional requirement, particularly for specialised housing for older people must be very carefully assessed in viability terms. Whilst the exact impact remains to be seen, coronavirus is likely to give a considerable shock to the viability of such housing and also, particularly incorporating M4(3) requirements in such schemes is likely to be additionally costly given not only the actual costs of doing so but also this will impact on the density and efficiency of a development which is usually made up of small units (as desired by older people moving to housing more suited to their needs) in a single building
A0674	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	Not Specified	Not Specified	Note and support the aspiration to deliver a mix of properties on a development. However, within para 2 of draft Policy DP1, the threshold proposed of 5 units is too low and too hard to implement on a practical scale. Suggest a threshold of 20 or more dwellings is implemented.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0622	B002	Suggest draft Policy DP1 is revisited to cover these concerns regarding provision of accommodation for the elderly. Also question figures in Para 4.40. There is now both regionally and nationally a clear demand for housing with care options and a new approach is required towards the retirement community sector. Government is wishing to widen housing options for older people with almost three quarters interested in an alternative to a care home if they need initial support. An extra bullet needs to be added to DP1.1 to allow for one-off specialist care living.	It is also considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate. Specifically: -Draft Policy DP1 requires all residential development to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. It also specifically requires the provision of an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings. -Settlement policies (S1-S19) allow for appropriate windfall development within identified development boundaries (or in the case of Community Clusters on specified types of sites) where they comply with other policy requirements, which can of course include accommodation for older people. -Draft Policy SP10 allows for affordable exception, entry level exception and cross subsidy exception housing schemes which meet evidenced local housing needs and other policy requirements. This again can include appropriate tenures of older person accommodation.	No	DP1. Residential Mix
A0623	B001	Consider housing mix, size, types or tenure should be dealt with as a supplementary planning document which can be regularly updated and, in addition, there should be no 'blanket' policy – standards should reflect the needs of specific settlements and areas.	Noted. Shropshire Council considers the proposed requirements of draft Policy DP1 positively respond to the housing need evidence within the Strategic Housing Market Assessment (SHMA), which is considered a robust and proportionate evidence base for informing policies on housing need. It is considered that the draft Policy provides an appropriate balance between providing certainty to all parties (the decision maker, local communities and the development industry) and flexibility to allow for innovation and site specific/location specific factors.	No	DP1. Residential Mix
A0624	B004	Deal with matters of housing mix, size, types or tenure through a supplementary planning document rather than Policy.	Noted. Shropshire Council considers the proposed requirements of draft Policy DP1 positively respond to the housing need evidence within the Strategic Housing Market Assessment (SHMA), which is considered a robust and proportionate evidence base for informing policies on housing need. It is considered that the draft Policy provides an appropriate balance between providing certainty to all parties (the decision maker, local communities and the development industry) and flexibility to allow for innovation and site specific/location specific factors.	No	DP1. Residential Mix
A0628	B002	Requirements relating to Nationally Described Space Standards (NDSS) are not justified and given potential to lead to viability issues and reduce delivery of affordable housing, these elements of draft Policy DP1 should be removed or re-worded to advise the use of the NDSS rather than demand it.	Noted. The approach to nationally described space standards proposed within Para 3 of draft Policy DP1 is considered to positively respond to the evidence available within the Strategic Housing Market Assessment (SHMA) and other sources. Providing dwellings with sufficient internal floorspace positively contributes to the future occupier's ability to achieve a high-quality of life and is responsive to changing household requirements, by increasing the ability to include adaptations at a later date.	No	DP1. Residential Mix
A0629	B007-13	Explicitly identify within the policy how it will assist in achieving net zero carbon. Re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP1. Residential Mix
A0663	B004	Concerned that applying the NDSS could potentially result in fewer affordable homes being delivered across Shropshire as optional technical standards have implications for build costs and sales values, with implications in turn for development viability. It is possible that many eligible households in Shropshire may not desire, or require housing that meets the NDSS, as it may result in for example, higher rental and heating costs. Not as to hinder the delivery of much needed affordable housing, we recommend that the requirement for all affordable dwellings to achieve NDSS is removed unless it can be demonstrated that there is a clear need for such a standard in all residential properties in Shropshire.	Noted. The approach to nationally described space standards proposed within Para 3 of draft Policy DP1 is considered to positively respond to the evidence available within the Strategic Housing Market Assessment (SHMA) and other sources. Providing dwellings with sufficient internal floorspace positively contributes to the future occupier's ability to achieve a high-quality of life and is responsive to changing household requirements, by increasing the ability to include adaptations at a later date.	No	DP1. Residential Mix
A0664	B002	Detailed information on the accessibility and adaptability of the existing housing stock, the size, location, type and quality of dwellings needed and variations in needs across different housing tenures in the County should be incorporated into the Council's supporting evidence.	Noted. Shropshire Council considers that the Strategic Housing Market Assessment (SHMA) (2020) is a robust and proportionate evidence base for informing policies on housing need. Shropshire Council also consider that its proposed requirements in relation to M4(2) and M4(3) housing are appropriate, justified and consistent with national guidance and policy. It is considered appropriate to require all dwellings specifically designed for the elderly or those with disabilities to meet M4(3) (wheelchair user dwellings) standard within Building Regulations. If site-specific factors indicate that step-free access cannot be achieved, it is questionable as to whether the site or element of the site should be identified for dwellings specifically to meet the needs of the elderly or those with disabilities.	No	DP1. Residential Mix
A0674	B007	Amend the threshold in para 2 of draft Policy DP1 to 20 dwellings.	Noted. Shropshire Council considers that it is appropriate for draft Policy DP1 to require all residential development to provide a mix of dwelling sizes, types and tenures in order to meet the identified needs of local communities. It is also considered appropriate for sites of 5 or more dwellings to include a mix which specifically responds to evidence of local need either through a recent 'Right Home Right Place' or equivalent survey or the need identified within the Strategic Housing Market Assessment (SHMA) undertaken to inform the draft Shropshire Local Plan.	No	DP1. Residential Mix

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0674	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1(6)	Not Specified	No	Not Specified	Plan fails to adequately provide for the need for the growing older person population. Specific allocations should be made for retirement living.
A0682	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1	Not Specified	Not Specified	Not Specified	Consider paras 2-6 of draft Policy DP1 should acknowledge the final housing mix of any development will be subject to further negotiation between the applicant and Council during the Planning Application process. This approach is justified in that demography and market signals will change over the plan period to 2038 and consistent with para 122b of the National Planning Policy Framework (NPPF). Detailed prescription should be avoided in order to not undermine market demand and financial viability, which can put delivery at great risk.
A0036	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	Not Specified	Not Specified	Policy DP2 requires the provision of 10% of plots on residential schemes (over 5 or more dwellings) to be provided as serviced plots for Self-Build and Custom-Build developers where there is an identified need on the Self-Build Register. No justification is provided for this requirement and there is no indication within the policy as to how developments that don't provide serviced plots will be considered and assessed. As a result, the policy cannot be justified. Whilst demand for Self-Build and Custom Build properties is increasing, consider these are best provided on dedicated plots rather than as part larger development schemes.
A0040	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	No	Not Specified	Draft Policy SP2 addresses mostly only self-build development on larger sites and provides no real support for self-build development on small plots, where the bulk of self-build development has occurred. As such it is not effective. Para 4.46 of the draft Shropshire Local Plan estimates that around 9% of Local Housing Need is for self-build and custom-build plots. Rural areas are well placed to meet this need due to strong market demand. As such, small-scale self-build and custom-build development adjoining the development boundaries of proposed Community Hubs should be allowed, this is consistent with para 78 of the National Planning Policy Framework (NPPF). Draft Policy DP10 should be updated for consistency.
A0073	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	Not Specified	Not Specified	Support part 1 of draft Policy DP2. Object to part 2 of draft Policy DP2. The requirement at part 2 of the policy for all sites of 10 or more dwellings to provide 10% of houses as serviced plots for self-build or custom-build development, as the SHMA demonstrates that the likely supply of self-build housing exceeds need. It is also unclear as to whether self-build or custom-build plots on large sites would be attractive to self-builders. This was concluded to be the case in the examination of the Cornwall Local Plan. Smaller sites are better suited to meeting the needs of self-builders and custom-builders. The requirement to market self-build plots for 36 months at a fair valuation is not a reasonable timeframe.
A0118	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Yes	Yes	Yes	Note proposed requirement of part 2 of draft Policy DP2. Consider proposed allocation BUR004 is able to provide 10% of the total 100 dwellings as plots for Self-Build/Custom-Build homes.
A0357	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Yes	No	Not Specified	Consider section 2 of draft Policy DP2 fails the 'justified' and 'effective' tests of soundness, as: -It is unclear whether failure to provide the encouraged 10% self-build/custom-build housing would constitute a reason for refusal of a Planning Application. -The 10% requirement does not match evidence. The Strategic Housing Market Assessment (SHMA) identifies that total forecast supply is likely to meet total forecast demand without any existing self-build policies. -The Self-Build Register covers all of Shropshire, which is very large. Provision in one part will not meet identified need arising in another, so this is not an appropriate strategy. -Section 2b relating to providing access to self-build plots is very problematic as access to self-build plots via adopted/adoptable roads mean they need to be central to a site rather than discrete from housebuilder activities and simultaneous construction (housebuilder and self-builder) is impractical as management of the construction site becomes complicated. No evidence/justification is provided. -Section 2d relating to marketing of plots for 24 months means occupants of the wider site may be living next to a marketed plot/self-build developed plot for some time. Purchasers of new build homes want certainty about build timescales/design around them, this lack of certainty will significantly reduce sales values and undermine viability. -Impact of self-build plots is not considered within the Viability Assessment undertaken to inform the draft Shropshire Local Plan. -There is no evidence self-builders want to live on large estates, but anecdotally preference is individual plots. The policy would be better framed to take a positive approach towards small scale self-build plots across the County.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0674	B008	Allocate specific sites to meet the needs of the older population.	It is considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate. Specifically: -Draft Policy DP1 requires all residential development to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. It also specifically requires the provision of an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings. -Settlement policies (S1-S19) allow for appropriate windfall development within identified development boundaries (or in the case of Community Clusters on specified types of sites) where they comply with other policy requirements, which can of course include accommodation for older people. -Draft Policy SP10 allows for affordable exception, entry level exception and cross subsidy exception housing schemes which meet evidenced local housing needs and other policy requirements. This again can include appropriate tenures of older person accommodation.	No	DP1. Residential Mix
A0682	B001	Amend draft Policy DP1 so that paras 2-6 acknowledge that the final housing mix is subject to negotiation at the Planning Application stage.	Noted. Shropshire Council considers the proposed requirements of draft Policy DP1 positively respond to the housing need evidence within the Strategic Housing Market Assessment (SHMA), which is considered a robust and proportionate evidence base for informing policies on housing need. It is also considered that the proposed policy requirements within draft Policy DP1 provide an appropriate balance between ensuring new development includes an appropriate mix of dwellings to meet the needs of communities, providing certainty to all (the decision maker, local communities and the development industry) and also allowing flexibility for innovation within development.	No	DP1. Residential Mix
A0036	B004	Remove the requirement for 10% of plots on residential schemes (over 5 or more dwellings) to be provided as serviced plots for Self-Build and Custom-Build developers.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position.	No	DP2. Self-Build and Custom-Build Housing
A0040	B002	Para 1 of draft Policy DP2 should include "and small-scale self-build and custom-build of up to 3 dwellings on sustainable sites adjoining settlement development boundaries,". The explanation to Policy DP2 should include "In its decision-making, the Council will consider the provision of self-build plots as a positive benefit of development in the planning balance when applying policy SP7 (Managing Housing Development)." Draft Policy SP10, should be amended for consistency to state under section 3 "g. Self-build and custom-build housing on suitable sites adjoining Community Hub settlements."	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. It is considered that the proposed approach within draft Policy DP2, alongside other relevant policies relating to residential development in the draft Shropshire Local Plan, will effectively meet the diverse need for self-build and custom-build development. It is important to note that open market self-build and custom-build development is a form of open market residential development. It is also important to note that Shropshire is already delivering significant volumes of self-build plots, using a policy approach which is generally consistent in relation to small sites, whilst the proposed approach in relation to large sites creates an opportunity to complement this provision both in terms of numbers and types of plots, again to effectively meet the diverse need for self-build and custom-build development.	No	DP2. Self-Build and Custom-Build Housing
A0073	B003	Remove requirement for all sites of 10 or more dwellings to provide 10% of houses as serviced plots for self-build development. If the above requirement is retained, reduce the timescales required for marketing such plots.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position. The marketing timescales proposed within the policy are 24 months, rather than 36 months. This is considered appropriate.	No	DP2. Self-Build and Custom-Build Housing
A0118	B005	n/a	Noted.	No	DP2. Self-Build and Custom-Build Housing
A0357	B005	Modify draft Policy DP2 to: -In para 2, remove the encouragement to make 10% of dwellings available as serviced plots for self-build / custom-build development to considering making some provision. -In para 2, clarify that this is particularly encouraged where there is an identified need on the Self-Build Register 'for plots in the settlement' rather than just where there is an identified need on the Self-Build Register. -In para 2a, clarify that the range of plot sizes respond to the needs identified on the Self-Build Register 'for plots in the settlement' rather than just the need identified on the Self-Build Register. -In para 2b, delete the text relating to: prior to 25% occupation of the relevant phase in which the serviced plots are located as agreed at planning application stage. -In para 2d, reduce the marketing period for self-build/custom-build plots from at least 24 months to at least 6 months.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position. It is also considered that this draft Policy provides appropriate flexibility to respond to the differing circumstances of specific sites and communities and as such will not impact on development viability. The 24 month marketing timescales proposed within the draft Policy and point at which the plots become accessible are considered appropriate and balance the need to provide an appropriate opportunity for potential self-builders/custom-builders to secure the plot, whilst also recognising the relationship to the wider development of the site and its future occupiers.	No	DP2. Self-Build and Custom-Build Housing

A0385	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	No	Not Specified	Whilst supportive of the principle of draft Policy DP2, consider it should be amended to remove the percentage requirement to ensure it is justified, effective and consistent with national planning policy. Whilst National Planning Practice Guidance (NPPG) states policies should be supportive, there is no requirement for a specific threshold. The percentage requirement (10%) is based on estimated demand via the Self-Build Register. Query if this is an appropriate basis, given criteria for registration is limited and does not determine if it is a realistic ambition. The draft Shropshire Local Plan should consider and make reference to the use of other mechanisms such as site-specific allocations or publicly owned land, rather than relying solely upon a percentage -based policy to be met by developers. The potential impact upon delivery timescales of a percentage requirement also need to be considered - time is needed to sell individual self-build plots and this should be considered in terms of the effectiveness of the draft Policy.
A0386	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	No	Not Specified	Whilst supportive of the principle of draft Policy DP2, consider it should be amended to remove the percentage requirement to ensure it is justified, effective and consistent with national planning policy. Whilst National Planning Practice Guidance (NPPG) states policies should be supportive, there is no requirement for a specific threshold. The percentage requirement (10%) is based on estimated demand via the Self-Build Register. Query if this is an appropriate basis, given criteria for registration is limited and does not determine if it is a realistic ambition. The draft Shropshire Local Plan should consider and make reference to the use of other mechanisms such as site-specific allocations or publicly owned land, rather than relying solely upon a percentage-based policy to be met by developers. The potential impact upon delivery timescales of a percentage requirement also need to be considered - time is needed to sell individual self-build plots and this should be considered in terms of the effectiveness of the draft Policy.
A0387	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	No	Not Specified	Whilst supportive of the principle of draft Policy DP2, consider as drafted it is unsound as it is not fully justified, effective or consistent with national planning policy. Whilst National Planning Practice Guidance (NPPG) states policies should be supportive, there is no requirement for a specific threshold. The percentage requirement (10%) is based on estimated demand via the Self-Build Register. Query if this is an appropriate basis, given criteria for registration is limited and does not determine if it is a realistic ambition. The draft Shropshire Local Plan should consider and make reference to the use of other mechanisms such as site-specific allocations or publicly owned land, rather than relying solely upon a percentage-based policy to be met by developers. Any requirement for self-build needs to be carefully worded to reflect viability constraints and potential for non-delivery (and flexibility for this to revert to market/affordable housing).
A0393	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon. DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan.
A0450	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	No	Not Specified	Object to the requirement at part 2 of draft Policy DP2 for all sites of 10 or more dwellings to provide 10% of houses as serviced plots for self-build, as a need has not been demonstrated for this type and scale of provision. Table 131 of the SHMA suggests that around 2,390 applications will be made for inclusion on the Self-Build Register during the plan period. However, the evidence at tables 132 and 133 of the SHMA shows that the supply of such units is exceeding additions to the Self-Build Register. Without prejudice to our in-principle concerns, the draft policy also contains a requirement to market plots for 36 months at a 'fair plot valuation'. Do not consider this to be a reasonable timeframe for marketing the site, as if there is an immediate need then we would expect the plot to require only a very limited marketing period.
A0455	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Yes	Yes	Yes	In relation to the 10% on-site self-build/custom-build proposals within Draft Policy DP2, the flexibility from the use of the word "encouraged" rather than "required" or "expected" is supported. Consider that on some sites, such as Clive Barracks, Tern Hill, this level of provision would be inappropriate. It should be recognised that in respect of large-scale developments, it is often very difficult to accommodate such plots without having a negative impact on viability. In the case of Clive Barracks, it is not clear whether the implications of such a requirement have been fully assessed by the Council. Promoter of Clive Barracks, Tern Hill, do not rule out providing self-build/custom-build plots, however this must be seen as part of the proposals for the whole site, including all aspects such as planning obligations, abnormal costs of development and the overall character and design of the scheme. Key practical considerations for self-build/custom-build plots are: purchasers tend to want to be in remote / private settings, difficult to accommodate on large strategic sites; sales rate for such plots tends to be very slow due to the restricted nature of the market; mainstream developers tend to take a very risk-averse attitude to such plots offering low values for them; on a large strategic sites with high levels of infrastructure investment, accommodating self-build plots in a remote part of the development is very difficult without incurring high initial infrastructure costs – which is anticipated to make the sales of plots, at best, cost neutral. Concerned about use of the self-build register as the basis for need, as registry is not means tested and people can be on multiple registers meaning need could be over-estimated. Any attempt to alter the draft Policy to make such provision a requirement would be considered unsound for the above reasons.
A0461	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	Not Specified	Not Specified	General support for this policy. However, there is no reference to the figures in DP2 within the SHMA. The conclusions on the viability for self-build plots is not clear in the assessment as no further reference to such housing types is given within the rest of the study or indeed, the findings. In addition, without the SHMA analysing the need for self-build plots it is unclear why viability has been tested against a 10% requirement for self-build plots.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0385	B006	Remove reference to the specified percentage of 10% and continue to encourage provision of self build housing where it is appropriate and viable, with reference to the most up to date evidence of need within the Self Build Register. Insert clause allowing reversion of the self build plots to the site developer for market housing after 12 months of marketing for self build.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position. The Self-Build Register is considered a robust source of information for determining self-build housing need and is referenced as such within National Planning Practice Guidance (NPPG). Draft Policy DP2 includes a 24 month marketing timescale, which is considered appropriate.	No	DP2. Self-Build and Custom-Build Housing
A0386	B004	Remove reference to the specified percentage of 10% and continue to encourage provision of self build housing where it is appropriate and viable, with reference to the most up to date evidence of need within the Self Build Register. Insert clause allowing reversion of the self build plots to the site developer for market housing after 12 months of marketing for self build.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position. Draft Policy DP2 includes a 24 month marketing timescale, which is considered appropriate.	No	DP2. Self-Build and Custom-Build Housing
A0387	B007	Remove reference to the specified percentage of 10% and continue to encourage provision of self build housing where it is appropriate and viable, with reference to the most up to date evidence of need within the Self Build Register. Insert clause allowing reversion of the self build plots to the site developer for market housing after 12 months of marketing for self build.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position. Draft Policy DP2 includes a 24 month marketing timescale, which is considered appropriate.	No	DP2. Self-Build and Custom-Build Housing
A0393	B014	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP2. Self-Build and Custom-Build Housing
A0450	B002	n/a	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position. Draft Policy DP2 includes a 24 month marketing timescale, which is considered appropriate.	No	DP2. Self-Build and Custom-Build Housing
A0455	B007	Recognise that in respect of large-scale developments, it is often very difficult to accommodate such plots without having a negative impact on viability. Query use of self-build register to establish need.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. It is considered that the proposed approach within draft Policy DP2, alongside other relevant policies relating to residential development in the draft Shropshire Local Plan, will effectively meet the diverse need for self-build and custom-build development. It is also considered that the proposed approach with draft Policy DP2 provides appropriate flexibility regarding provision of self-build and custom-build plots on large development sites. The Self-Build Register is considered a robust source of information for determining self-build housing need and is referenced as such within National Planning Practice Guidance (NPPG).	No	DP2. Self-Build and Custom-Build Housing
A0461	B007	Do not oppose such a policy but highlight that further evidence should be made available within the SHMA to justify the inclusion of Policy DP2. Recommend any policy specific requirement to include a mechanism whereby if the self-build plots are not taken up within a given time period, then these revert back to market housing to be provided as part of the wider scheme.	As documented within the proposed explanation to draft Policy DP2, the SHMA concludes that over the proposed Plan period, around 2,400 applications will be made for inclusion on the Self-Build Register. Although not directly comparable, this equates to around 9% of the calculated local housing need. As such it is considered appropriate to encourage larger development sites to make 10% of dwellings available for Self-Build developers, where there is an identified need on the Self-Build Register. Draft Policy DP2 includes a 24 month marketing timescale, which is considered appropriate.	No	DP2. Self-Build and Custom-Build Housing

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0582	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	No	Not Specified	The SLP draft requirements are not considered to be justified or consistent with national policy. In particular, on major housing sites brought forward by a single developer there is a real risk that this approach could slow down the delivery of housing. It is our experience that those seeking to self-build are not generally seeking a plot within a larger residential development, they would prefer a stand-alone plot. There is also the potential for conflict on larger sites between those seeking to self-build versus the requirements of a Design Code approved for the wider site. Those wishing to self-build and custom-build are unlikely to want to comply with a Design Code developed for a large housing development. It is also noted that the self-build register does not provide confirmation of the ability of registered parties to be able to deliver their own homes and this could result in uncertainty and delays to delivery of the full capacity of a site. This uncertainty is highlighted by the proposed inclusion of 2d of the policy. In accordance with the marketing requirements of 2d, several plots within a developed-out housing scheme could remain vacant for more than 2 years. If these plots are not acquired by a self-builder, then the main developer may need to re-commence construction works on site, which would have significant financial implications. As self-build and custom houses can only be occupied by the individuals or groups who actually build (or commission the building) of those specific units, such individuals are not generally acquainted with the wider development process. Therefore, entering into the numerous contracts for self-build construction would represent a significant burden to the developer of the wider land parcel, and potentially slow housing delivery on major sites. There are potential health and safety issues related to having 10 or more individual construction sites operating within a development site. It is maintained that the provision of such plots should be left to the discretion of the developer based on market trends and needs, which are liable to change over the plan period. It would be more appropriate to provide for self-build and custom-build housing through the delivery of small windfall sites
A0583	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Yes	No	Yes	Support the aim of the delivery of self-build or custom build housing under DP2. Note the policy does not seek provision as an absolute requirement and, compared to the Regulation 18 version (August 2020), the necessary marketing period has been reduced from 36 to 24 months. Nevertheless, remain of the view that a 24 month period represents a significant length of time, particularly in the context of small-medium scale development and this could extend beyond actual completion of development works associated with the main site delivery. A reduced marketing period of 18 months is considered more appropriate to account for the above concern. In turn, DP2 does not identify a 'return mechanism' for sites should uptake of plots not come forward within the relevant marketing period. This should be address in line with commentary in the following section.
A0608	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	Not Specified	Not Specified	The sentiment of prescribing that 10% of plots on sites of 10 or more dwellings are for self-build purposes is supported. However, suggest the spatial strategy that underpins this amended. The Home Builder Federation (HBF) consider self-build customers seeking self-build opportunities seek smaller more rural sites rather than serviced plots within a larger strategic allocation. Suggest rural housing sites are encouraged to be proposed as self-build sites, which may be more attractive and thus more deliverable/achievable, resulting in a successful policy. Furthermore, the National Planning Policy Framework (NPPF) indicates regard should be given to the self-build register and give enough suitable development permissions to meet identified demand. The NPPF does not however provide a specific percentage of self-build plots to be provided. Draft Policy DP2 should be amended to solely reference the Self-Build Register in order to be found sound. There is no justification for the prescribed level of 10% serviced plots and as it currently reads is not compliant with national policy.
A0609	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	No	Not Specified	Generally supportive of draft Policy DP2 and the provision of self-build and custom-build housing. However, consider the requirement for all sites over 10 dwellings to provide 10% of dwellings as serviced self-build/custom-build plots is inappropriate and unjustified. This provision does not reflect current need; or evidence from the Council's Self-Build Register, which shows applications are reducing (62 for October 2018-2019, 127 and 136 in the previous two years and just 36 in the most recent period, although this may be impacted by the Covid-19 pandemic). All proposed Local Plan allocations and SAMDev allocations (without planning permission) appear to be subject to this proposed requirement, which would generate around 1,250 plots (average 57 per annum). Whilst this is less than the identified average annual number that will register on the Self-Build Register (107 per annum), the SHMA demonstrates the average annual supply without this policy is some 144 self-build properties. Combined these two sources would result in 201 plots per annum, almost double identified annual need. Clearly this evidence suggests this current requirement is a significant over estimation of the demand and requirement for self-build plots. This requirement is a particular issue for larger sites such as Tasley Garden Village (BRD030), with the development expected to deliver a full years' worth of supply for the whole County on a single site. Whilst the suggested 10% could be deemed an appropriate amount for smaller sites, to ensure the draft policy does not result a supply that far exceeds demand, recommend a cap on provision is applied. This cap should be informed by detailed assessment of expected supply, building upon the work prepared as part of the SHMA. In Part 2d of draft Policy DP2, welcome change to the length of time for marketing plots, however still consider 'at least 24 months' to be overly restrictive and would hamper wider delivery. To ensure the draft Policy is effective in ensuring continued delivery, would suggest the marketing period is reduced to 12 months. This is particularly relevant on larger sites, noting that these will continue to deliver new homes, and therefore new self-build plots, over the entire plan period, which could easily result in new self-build plots being ready to be marketed before the sale of existing plots, or the end of their mandatory marketing period.
A0623	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	Not Specified	Not Specified	In line with response to Policy DP1, imposition of an inflexible requirement for the delivery of serviced plots on sites could again undermine the viability and deliverability of sites.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0582	B003	Requested Change: Policy DP2: Self-Build and Custom-Build Housebuilding, should be revised to address identified issues. Self-Build and Custom-Build houses should be encouraged on smaller sites (e.g. 10 units or below) which are more likely to be attractive to those seeking to self-build. Additionally, when carrying out 'Call of Sites' exercises, a question should be included asking for sites to be put forward which could specifically accommodate self-build and custom-build units. Again, these would generally be smaller sites.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position. It is considered that the proposed approach within draft Policy DP2, alongside other relevant policies relating to residential development in the draft Shropshire Local Plan, will effectively meet the diverse need for self-build and custom-build development. It is important to note that open market self-build and custom-build development is a form of open market residential development. It is also important to note that Shropshire is already delivering significant volumes of self-build plots, using a policy approach which is generally consistent in relation to small sites, whilst the proposed approach in relation to large sites creates an opportunity to complement this provision both in terms of numbers and types of plots, again to effectively meet the diverse need for self-build and custom-build development.	No	DP2. Self-Build and Custom-Build Housing
A0583	B001	Bullet 2d of Policy DP2 to be replaced with: 'When marketed, be serviced, available for purchase and ready for development by a Self or Custom-Builder. This marketing should occur for at least 18 months at a fair plot calculation and in accordance with a marketing strategy to be approved by Shropshire Council.' Additional text added to the effect: Should interest not be forthcoming through the 18 month marketing period then plots are considered to form part of the overall development and can be delivered by the Developer without the Self of Custom Build requirement.	As documented within the proposed explanation to draft Policy DP2, the SHMA concludes that over the proposed Plan period, around 2,400 applications will be made for inclusion on the Self-Build Register. Although not directly comparable, this equates to around 9% of the calculated local housing need. As such it is considered appropriate to encourage larger development sites to make 10% of dwellings available for Self-Build developers, where there is an identified need on the Self-Build Register. Draft Policy DP2 includes a 24 month marketing timescale, which is considered appropriate.	No	DP2. Self-Build and Custom-Build Housing
A0608	B009	Draft Policy DP2 should be amended to solely reference the Self-Build Register in order to be found sound.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position. It is considered that the proposed approach within draft Policy DP2, alongside other relevant policies relating to residential development in the draft Shropshire Local Plan, will effectively meet the diverse need for self-build and custom-build development. It is important to note that open market self-build and custom-build development is a form of open market residential development. It is also important to note that Shropshire is already delivering significant volumes of self-build plots, using a policy approach which is generally consistent in relation to small sites, whilst the proposed approach in relation to large sites creates an opportunity to complement this provision both in terms of numbers and types of plots, again to effectively meet the diverse need for self-build and custom-build development.	No	DP2. Self-Build and Custom-Build Housing
A0609	B012	Requirement for 10% of plots to be self-build/custom-build on sites of 10 or more dwellings should be removed. Alternatively an appropriate cap could be identified for larger sites. The 24 month marketing period for self-build/custom-build plots provided under this draft Policy should be reduced to 12 months.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above the specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position. It is also considered that this draft Policy provides appropriate flexibility to respond to the differing circumstances of specific sites and communities. The 24 month marketing timescales proposed within the draft Policy are considered appropriate and balance the need to provide an appropriate opportunity for potential self-builders/custom-builders to secure the plot, whilst also recognising the relationship to the wider development of the site.	No	DP2. Self-Build and Custom-Build Housing
A0623	B002	In line with response to Policy DP1, imposition of an inflexible requirement for the delivery of serviced plots on sites could again undermine the viability and deliverability of sites.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above the specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position. It is also considered that this draft Policy provides appropriate flexibility to respond to the differing circumstances of specific sites and communities. The 24 month marketing timescales proposed within the draft Policy are considered appropriate and balance the need to provide an appropriate opportunity for potential self-builders/custom-builders to secure the plot, whilst also recognising the relationship to the wider development of the site.	No	DP2. Self-Build and Custom-Build Housing

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0628	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	No	No	Yes	Support draft Policy DP2 as only an encouragement rather than a requirement for provision of self-build and custom-build development, but disagree with the sentiment that such a policy justified. There is no evidence that self-build homes are desired by residents who live within development sites. Also self-build homes are more commonly found on individual plots and not within development sites. Consider draft Policy DP2's encouragement for development of self-build houses on sites larger than 0.5 ha could be problematic for several reasons. If the self-build house is designed in such a way that it is not in keeping with the general vernacular of the rest of the site then it will be noticeably out of character; unsuitable and jarring for residents. If the design of the self-build is similar to the other homes on the site, then the development of the self-build home is aesthetically open to debate, as it is for all intents and purposes the same as the houses, with the only difference being it was erected by an independent construction team. The construction of a self-build house is likely to be slower than the construction of houses which are being developed by a housebuilder who is carrying out works with a consortium of specialised workmen who have a wealth of experience erecting similar homes. This approach is neither justified, sensible or practical. Recommend removal of section 2 of draft Policy DP2.
A0629	B007-14	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon. DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan.
A0682	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP2	Not Specified	Not Specified	Not Specified	Consider a key consideration in relation the self/custom-build is whether providing such homes in large scale new build developments meets needs and aspirations of registered self/custom-builders. To avoid self/custom-build plots being left undeveloped, a mechanism should included to enable plots to be delivered by the developer if a self/custom-builder is not found after a certain period. Phasing and legal agreements will have to ensure provision of 10% of homes on a development for self/custom-build does not have an impact on the delivery and occupation of the wider development.
A0014	B040	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	Not Specified	Not Specified	There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield.
A0020	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	Not Specified	Not Specified	We support the differentiation in the affordable housing requirement on those sites in the north of the County to sites in the south and welcome the lower threshold for sites in the north.
A0078	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3.1c	Not Specified	No	Not Specified	Generally support the proposed Affordable Housing policies but believe para 1.c. of draft Policy DP3 is unsound in that it conflicts with para 1.h. of draft Policy DP3, particularly on larger sites. It may also distort build programmes on smaller sites and be particularly difficult for SME's to accommodate.
A0118	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Yes	Yes	Yes	Do not object to the proposed requirement for 20% affordable housing on proposed allocation BUR004. Requirements c. to f. of draft Policy DP3 are noted. However consider these are detailed matters for S106 Agreements and should be considered on a site by site basis e.g. it may not be appropriate on every site to deliver all the affordable dwellings by completion of 50% of the market dwellings, and for some areas depending on housing need the tenure split of the affordable may need to be varied from the 70/30 split proposed.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0628	B004	Recommend removal of section 2 of draft Policy DP2.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. The needs of self-build and custom-build developers are diverse and as such providing a range of appropriate plot opportunities is considered the most effective means of meeting these needs. Encouraging the provision of 10% of plots on sites above specified thresholds, particularly where there is an identified need on the Self-Build Register, reflects this position.	No	DP2. Self-Build and Custom-Build Housing
A0629	B007-14	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP2. Self-Build and Custom-Build Housing
A0682	B002	Consider whether self/custom-build plots on large developments meet need. Include a mechanism for self/custom-build plots to revert to the developer if not taken up. Require phasing/legal agreements to ensure self/custom build plots do not have an adverse impact on delivery/occupation of the wider development.	Noted. Shropshire Council as one of the Self-Build Vanguard Authorities, promotes the provision of appropriately located individual and group Self-Build and Custom-Build dwellings. It is considered that the proposed approach within draft Policy DP2, alongside other relevant policies relating to residential development in the draft Shropshire Local Plan, will effectively meet the diverse need for self-build and custom-build development. Draft Policy DP2 includes appropriate timescales for marketing of self/custom-build plots and the phasing of these plots within a development.	No	DP2. Self-Build and Custom-Build Housing
A0014	B040	Draft Policy DP3 should require more accessible natural greenspace should be provided for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield.	Noted. Draft Policy DP3. Affordable Housing Provision includes a policy requirement of "Ensuring that affordable housing is appropriately distributed within the site, their locations maximise opportunities for future residents to access services and facilities by walking, cycling or public transport and minimises the exposure of future residents to sources of noise or reduced air quality." Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole.	No	DP3. Affordable Housing Provision
A0020	B005	N/A	Noted.	No	DP3. Affordable Housing Provision
A0078	B005	Suggest introducing a graduated requirement - e.g. 50% of affordable dwellings to be provided before 50% general market occupancy and 100% before 80% general market occupancy.	Noted. Shropshire Council consider that the proposed Policy requirement of "ensuring applications for development with a requirement to provide affordable housing secure the interest of a Registered Provider, and that the affordable dwellings will be transferred to a Registered Provider as soon as possible, and no later than at completion of 50% of the consented market housing" reflects the current established approach, is appropriate, provides certainty to all parties (including the community, development industry and decision maker) and ensures the timely delivery of affordable housing. Implementation is able to reflect the phased development of larger sites.	No	DP3. Affordable Housing Provision
A0118	B006	Requirements c. to f. of Policy DP3 should be deleted to ensure flexibility and enable the Authority to best respond to its housing need at that time.	Noted. Shropshire Council consider requirements identified within paras 1.c. to 1.f. of draft Policy DP3 are appropriate and provide certainty to all including the decision maker, development industry and local communities.	No	DP3. Affordable Housing Provision

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0137	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	No	No	No	Support draft Policy DP3. There should be flexibility within the draft Shropshire Local Plan to respond to changing housing needs over the proposed Local Plan period. Consideration of individual site circumstances and the circumstances of a local area should be taken into account to determine the appropriate type of housing for development sites.
A0357	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Yes	No	Not Specified	Policy DP3 is not considered deliverable and fails the 'justified' and 'effective' tests of soundness, as: -The Viability Study for the draft Shropshire Local Plan concludes that (even with the very low benchmark land value applied, consider landowners expectations are at least £1m/Ha) the proposed policy requirements set by draft Policies DP1, DP2, DP3 and DP11 make viability very challenging for all sites over 60 dwellings in the south of the county (76% of planned development in the south) and unviable for affordable housing contributions of more than 10%. As such the proposed affordable housing contribution from sites in the south is too high. -Para 1d requires a split in affordable housing tenures of 70% affordable or social rent and 30% intermediate housing. This is inflexible and likely to be problematic over the lifespan of the Plan. Government has recently published a consultation proposing 25% of affordable units must be First Homes. If this change is introduced, the tenure split will need to reflect Government policy. The most effective response is to ensure the policy is flexibly worded to enable change over the lifespan of the Local Plan.
A0386	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	No	Not Specified	Support the approach proposed in draft Policy DP3. The affordable housing requirement (10% in the north and 20% in the south) is supported by the Strategic Housing Market Assessment (SHMA) and Viability Assessment. However, consider the Council should ensure all anticipated development costs associated with draft Policies in the draft Shropshire Local Plan have been taken into account (in accordance with the National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG). This will ensure the draft Shropshire Local Plan is justified, effective and consistent with national planning policy. Whilst the Viability Assessment undertaken to inform the draft Shropshire Local Plan appears to reflect these considerations it notes the need for the assessment to be kept under review, particularly in light of the COVID-19 pandemic and Brexit. Recognise viability is to be considered 'up front' as part of the Local Plan process, nevertheless, as the Viability Assessment undertaken represents primarily a typology-based approach, draft policies should continue to offer site and scheme specific flexibility (as per para 57 of the NPPF). As such, reference within draft Policy DP3 to site specific viability assessments being taken into account in exceptional circumstances is considered to meet the tests of soundness in para 35 of the NPPF, in that it is consistent with national policy. It is therefore supported.
A0455	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Yes	Yes	Yes	Clive Barracks, Tern Hill lies in the lower north affordable housing zone, this level is welcomed in comparison to the higher south affordable housing zone. However, there appears to be a disconnect between these levels and the Shropshire Dynamic Viability Index 2013 (SDVI) which suggests rates between 0% and 5%. The Shropshire Viability Study notes "very little development is shown as viable, even without affordable housing" in the north but that from "on the ground' experience there is a strong case to have a minimum requirement of 10% affordable housing." It is considered that on the ground evidence is limited, sites identified in the Shropshire Viability Study are far smaller, date from 2015-2017 with historic planning obligations, and are not comparable with those proposed within the draft Shropshire Local Plan. The few examples provided cannot form a reliable body of evidence on which to base a policy for a blanket 10% affordable contribution in the north. Therefore the 10% rates should be revisited. Recognise part 2 of draft Policy DP3 provides for reduced rates of affordable housing if exceptional circumstances are evidenced. However, if the 10% affordable provision is progressed in the northern zone, evidence suggests all sites in the north of the Authority will have to go through the process of evidencing exceptional circumstances to reduce the affordable housing provision. This is not considered a suitable or appropriate methodology, and will have implications for housing delivery, particularly in the early years of the Plan. Furthermore, it is misleading to members of the public and Councillors who will expect the delivery of 10% affordable housing, but on most occasions will not see this delivered. Strategic Brownfield Sites, such as Clive Barracks are viable and deliverable, but they have more significant site clearance and remediation costs, so are viable at lower levels of affordable housing provision than their greenfield counterparts. As such they will automatically fall under part 2 of draft Policy DP3. Sites of this nature require flexibility of approach in respect of viability but some certainty is required. In this case that needs to be that the starting point for affordable housing provision will not be a percentage requirement which is already evidenced as undeliverable. Para 63 of the National Planning Policy Framework (NPPF) states "To support the re-use of brownfield land, where vacant buildings are being reused or redeveloped, any affordable housing contribution due should be reduced by a proportionate amount". Policy wording requires review to better reflect the evidence base and the nature of sites which are to be brought forward within the northern zone. Alternatively, the policy needs to omit strategic sites entirely from the Spatial Zones, and instead for these to be considered separately and not in comparison with small, greenfield schemes.
A0461	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	Not Specified	Not Specified	Support for this policy

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0137	B013	N/A	Noted.	No	DP3. Affordable Housing Provision
A0357	B006	Modify draft Policy DP3 to: -In para 1aii. Reduce the proposed affordable housing contribution in the south of Shropshire to 10%. -in para 1d. Expand the text regarding the tenure split of affordable housing to specify 'or unless an alternative mix is considered appropriate and agreed with the developer'.	Noted. Shropshire Council considers that the proposed affordable housing contributions are appropriate. They respond to the significant affordable housing need identified in Shropshire and best available information on development viability, from within the Shropshire Viability Study. Shropshire Council also considers that the proposed tenure split effectively responds to evidence on affordable housing needs, as summarised within para 4.52 of the explanation to draft Policy DP3 of the draft Shropshire Local Plan. It also provides flexibility for alternative tenure splits where local need would support this.	No	DP3. Affordable Housing Provision
A0386	B005	N/A	Noted.	No	DP3. Affordable Housing Provision
A0455	B008	Review 10% affordable housing contributions for development in the north of Shropshire. Review policy wording to better reflect the evidence base and the nature of sites which are to be brought forward within the northern zone. Alternatively, the policy needs to omit strategic sites entirely from the Spatial Zones, and instead for these to be considered separately and not in comparison with small, greenfield schemes.	Noted. Shropshire Council considers that the proposed affordable housing contributions are appropriate. They respond to the significant affordable housing need identified in Shropshire and best available information on development viability, from within the Shropshire Viability Study. With regard to the north of Shropshire, it is important to note that significant levels of development currently occurs and that this development does provide the current affordable housing contributions in this area which is a minimum of 10%. Within the Shropshire Viability Study 'strategic sites' including Clive Barracks, Tern Hill, are separately assessed. The assessment concludes that "these sites have capacity to bear both affordable housing and developer contributions. There is no doubt that the delivery of any large site is challenging so, rather than draw firm conclusions at this stage, it is recommended that that the Council engages with the owners in line with the advice set out in the Harman Guidance". Shropshire Council is committed to positive engagement with these site promoters and draft Policy DP3 provides appropriate flexibility on this matter.	No	DP3. Affordable Housing Provision
A0461	B008	n/a	Noted	No	DP3. Affordable Housing Provision

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0582	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	No	Not Specified	The policy aims to provide well designed, high quality affordable homes of the right type and tenure, is welcomed. However, the requirements set out in part 1 of the policy are considered to be inflexible. It is maintained that the number, size, type, tenure and distribution of affordable dwellings to be provided should be subject to negotiation with the applicant, dependent on recognised local housing need, specific site and location factors and development viability. Part 2 of the policy refers to the use of an overage clause in order to secure the potential for future contributions towards affordable housing, where a scheme's affordable housing provision has been reduced in accordance with a viability case demonstrating that a compliant level of affordable housing cannot be provided. No further clarity is included in the policy as to what parameters would be included in overage clauses.
A0609	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	Yes	Not Specified	Fully support this policy and the need to deliver affordable housing. Draft Policy DP3 is considered sound as we find it to be consistent with national policy, positively prepared and justified.
A0663	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	Not Specified	Not Specified	Concerned that the affordable housing thresholds listed in points 1(a) of policy DP3 for the northern and southern regions are exceptionally low. There are in excess of 5,000 households on the Councils Choice based housing register who are looking for homes and the Shropshire SHMA (2020) concluded that an estimated 799 households per year will require affordable housing over the plan period. In addition, linking the proposed 10% and 20% affordable housing thresholds to sub-section 3 of policy SP2, it is unlikely that the Council will achieve an overall housing delivery of 25% of the total housing requirement stated in the local plan's strategic vision. Section 1(e) is acceptable as long as the guidance within the MHCLG policy statement on Rents for Social Housing is applied, which permits annual rent increases on both social rent and affordable rent properties of up to CPI+1% point from 1 April 2020. Rental caps would give the effect of a rent cut for RPs. The significant concern is that this scenario would be highly unsustainable and uncompetitive for Housing Associations and could potentially severely threaten delivery of affordable housing across Shropshire. Sub-section 1(h) of policy DP3, encouraging pepper potting across a scheme makes management more difficult as the properties are more spread out. Securing affordable housing in perpetuity more widely is not supported for a number of reasons, foremost of which is that it restricts lenders appetite to fund development, as mortgage provision becomes more difficult with greater restrictions on individual properties. Private companies will not typically invest in developments if there is no prospect of realising the original investment and any returns. Therefore suggest the Council remove any references to retaining affordable housing in perpetuity unless explicitly referring to rural exception sites.
A0682	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	Not Specified	Not Specified	Consider the terminology in para 1b of draft Policy DP3 regarding off-site provision of affordable housing is not in accordance with para 62 of the National Planning Policy Framework (NPPF). Specifically, para 62 of the NPPF states affordable housing can be provided off-site or an appropriate financial contribution paid in-lieu if it can be robustly justified. As such it does not specify "exceptional circumstances" for off-site provision or an appropriate financial contribution in lieu.
A0148	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	Not Specified	Not Specified	The Council should afford further consideration to an uplift of its LHN to account for acute affordable housing need, and subsequently adjusts its housing requirement to reflect this.
A0393	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield. Playing Pitch strategy indicates new facilities on new sites are a last resort. Thus, in addition to existing lack of infrastructure for cycling and pedestrians there is also a lack of infrastructure in the design of new facilities including public open spaces for family access.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0582	B004	Requested Change: Part 1 of Policy DP3 is considered to be inflexible and overly prescriptive in relation to the types and mix of affordable housing to be delivered. The policy should also include reference to discussions between the Council and applicant to reach the most appropriate affordable housing solution for individual sites, this should consider flexibility of the mix and types of affordable homes based on appropriate evidence provided.	Noted. Shropshire Council consider requirements identified within paras 1.c. to 1.f. of draft Policy DP3 are appropriate and provide certainty to all including the decision maker, development industry and local communities. The proposed tenure split effectively responds to evidence on affordable housing needs, as summarised within para 4.52 of the explanation to draft Policy DP3 of the draft Shropshire Local Plan. It also provides flexibility for alternative tenure splits where local need would support this. A Housing Supplementary Planning Document will support housing policies and provide further guidance.	No	DP3. Affordable Housing Provision
A0609	B013	N/A	Noted.	No	DP3. Affordable Housing Provision
A0663	B005	Given the level of need, strongly encourage the Council to review the thresholds and set ambitious targets for affordable housing as a mechanism to significantly increase delivery and improve affordability across the Authority. The scale of need means the Council is justified in seeking to secure as much affordable housing as viability allows. Nonetheless, such thresholds must be realistic and viable for most development scenarios, so must therefore undergo rigorous testing. The requirement for the staircasing to be capped at 80% is not warranted or justified and should be removed. Recommend affordable housing is clustered across larger sites, with policy expressing a maximum group size or range; 10 to 15 dwellings forming each cluster on larger sites is commonly favoured. Clustering can be achieved while delivering visually indistinguishable housing products that are well dispersed throughout developments. First Homes are required to be remained as such in perpetuity. Stress the difference between First Homes and other forms of affordable housing principally social and affordable rent and shared ownership and how the requirement for First Homes to be maintain in perpetuity is appropriate and set out in the Government's draft regulations.	Noted. Shropshire Council considers that the proposed affordable housing contributions are appropriate. They respond to the significant affordable housing need identified in Shropshire and best available information on development viability within the Whole Plan Viability Study, undertaken to inform the draft Shropshire Local Plan. Requirements for affordability in perpetuity and limitations on staircasing reflect that significant need and established approaches, securing a range of affordable housing which is meeting continuing need beyond that of initial occupants. It is considered appropriate to require affordable housing to be appropriately pepper-potted through a site. Inclusion of specific policies in the Draft Shropshire Local Plan setting out requirements for a range of affordable delivery options provides greater clarity for the development industry to bring appropriate schemes forward. A Housing Supplementary Planning Document (SPD) will support housing policies and will be used appropriately to provide further guidance and detail regarding matters such as use of legal agreements, affordability in perpetuity, staircasing and affordable housing distribution and set out how mechanisms may reflect individual site circumstances, where this is required	No	DP3. Affordable Housing Provision
A0682	B003	Remove reference to demonstrating exceptional circumstances where off-site affordable housing or financial contributions are provided in lieu of on-site affordable housing provision.	Shropshire Council considers that the proposed terminology in para 1b of draft Policy DP3 is appropriate and consistent with national policy. The preference locally and nationally is for on-site provision of affordable housing in order to create sustainable and vibrant communities, furthermore in a Shropshire context there is a significant need for affordable housing and on-site provision allows earliest delivery of these much needed dwellings. An updated Type and Affordability of Housing Supplementary Planning Document (SPD) will define the relevant exceptional circumstances which will represent robust justification for off-site affordable housing or a financial contribution. It will also define the methodology for calculating financial contributions in lieu of on-site affordable housing in circumstances where relevant exceptional circumstances are justified.	No	DP3. Affordable Housing Provision
A0148	B008	The Council should afford further consideration to an uplift of its LHN to account for acute affordable housing need, and subsequently adjusts its housing requirement to reflect this.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. The draft Shropshire Local Plan introduces a range of mechanisms to support the delivery of affordable housing.	No	DP3. Affordable Housing Provision
A0393	B015	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period; modify for greater recognition of the need to supply more accessible natural greenspace for affordable housing developments	Noted. Draft Policy DP3. Affordable Housing Provision includes a policy requirement of "Ensuring that affordable housing is appropriately distributed within the site, their locations maximise opportunities for future residents to access services and facilities by walking, cycling or public transport and minimises the exposure of future residents to sources of noise or reduced air quality." Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP3. Affordable Housing Provision

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0450	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	No	Not Specified	The policy sets a requirement for 10% in the north and 20% in the south. The figure for the south does not appear to be supported by the Viability Study. We are not aware that landowners have been contacted or have confirmed that 20% is deliverable. It should be noted that this could also have implications for existing allocations.
A0487	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	No	Not Specified	Policy DP3 requires new residential development of 5 or more dwellings in Designated Rural Areas and 10 or more dwellings elsewhere to provide onsite affordable housing of 10% in the north and 20% in the south as defined by geographical areas in Figure DP3.1. Onsite affordable housing tenure to comprise of 70% social or affordable rent accommodation and 30% intermediate or other affordable housing unless local need evidence indicates otherwise. The Council's own viability assessment identified viability challenges across the County and the cumulative impact of proposed policy requirements threatens housing delivery (see HBF response under Deliverability & Viability). A differentiated policy approach to affordable housing provision across the County is justified. The 2019 NPPF promotes affordable home ownership by requiring at least 10% of new dwellings built to be available for this tenure leaving only the remainder for other affordable housing tenures (para 64). The Council's policy approach to affordable housing tenure is inconsistent with national policy. The Government's Changes to the Current Planning System (ended on 1st October 2020) and The Government's consultation on Draft Revisions to the NPPF (ending on 27th March 2021) also propose further changes to delivering First Homes.
A0586	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	No	No	Not Specified	No assessment of the impact of Right to Buy on the supply and pool of affordable housing has been undertaken, particularly in less affordable settlements like Shifnal.
A0595	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Yes	No	Yes	Simplification of approach to provision of affordable housing to two bands of 10 and 20% across Shropshire is generally welcomed. Reference to viability review is also in line generally with the approach set out within national policy. However, the policy is overly detailed and prescriptive on the type of affordable housing to be provided with elements which would be better included within an SPD. Affordable housing needs change over time and such prescription on tenure split, rent caps and equity share is inappropriate in a Local Plan policy intended to apply for a 22 year plan period. Notably the broader definition of affordable housing with the NPPF Annex to the Framework and the policy should allow for a more flexible approach to the provision of a wider range of affordable housing. The Government are also consulting on further changes to the provision of wider affordable housing types and the policy should allow flexibility for this, including within the affordable housing definition.
A0598	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	Not Specified	Not Specified	Acknowledges the criteria-based approach to securing on-site provision of affordable housing as a matter principle, with caveats to allow for circumstances where viability may impact on the ability of schemes to deliver the policy-compliant provision on site. However, object to proposed insertion of a planning condition into the policy regarding the need to transfer affordable dwellings prior to completion of 50% of the consented open market housing. Firstly, this criteria is not necessary as such requirements are set out in planning conditions that accompany a grant of approval. Secondly, it may not be appropriate or viable to apply this criteria in such a prescriptive manner. Therefore, the issue of how such triggers should be applied to individual schemes should form part of the planning application process including how best to proceed in consultation with the applicant and any relevant Registered Provider also involved. Thirdly, circumstances or events may occur through the life of a consent and/or the build out of a site which may necessitate changes to such triggers.
A0608	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	Not Specified	Not Specified	Support the requirement for 10 or more dwellings or sites of 0.5ha or more to provide 10% affordable housing in the north of the District. Also support that reduced rates of affordable housing will be considered in exceptional circumstances, where evidence is presented demonstrating viability concerns. Part 1j of draft Policy DP3 states affordable housing will be allocated in accordance with Shropshire Council's Allocation Policy. Assume this is the Shropshire Affordable Housing Allocation Policy and Scheme (March 2014). However, the purpose of this document is to determine the degree of housing need and priority for Registered Providers and Landlords, for the benefit of applicants on the Housing Register. Reference to the Shropshire Council's Allocation Policy should be removed as it is not relevant to planning as the primacy of this policy is to secure affordable housing, rather than advise how it should be allocated, and to whom, thereafter.
A0614	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	No	Not Specified	In relation to DP3 (1)(d), the policy states that where affordable housing is to be secured on site, its tenure should comprise 70% social or affordable rent accommodation and 30% intermediate or other affordable housing, unless evidence of local need indicates otherwise. However, there is no clarity provided in either the policy or the supporting text on whether "other affordable housing" includes First Homes or the other tenures included in the definition provided in the Glossary to the NPPF. The stated approach is currently not justified or consistent with national policy and therefore unsound. The approach should be amended to ensure consistency with the Government's policy changes. 2.26 In relation to DP3 (1)(e), the policy seeks to restrict affordable rents to 80% of market rent, noting that this should not exceed the Local Housing Allowance Housing Benefit. It is currently unclear whether this policy allows for annual rent increases on both social rent and affordable rent properties. It is often the case that affordable rent properties are capped on first let which prevents rents increasing in line with Government policy. Preventing such inflation can have critical impacts on Registered Providers, as rising costs would give the effect of a rent cut for these businesses. There is a significant concern that this scenario could potentially threaten the delivery of affordable housing in the borough. As currently worded the policy is not justified or consistent with national policy and therefore unsound. The approach should be amended to ensure consistency with the Government's policy on rents for social housing.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0450	B003	We consider that the requirement for larger sites in the south of the borough should be reduced to a level that is demonstrably viable.	Noted. Shropshire Council considers that the proposed affordable housing contributions are appropriate. They respond to the significant affordable housing need identified in Shropshire and best available information on development viability, from within the Shropshire Viability Study.	No	DP3. Affordable Housing Provision
A0487	B002	The Council's affordable housing tenure mix set out in Policy DP3 should be amended to accord with national policy.	Noted. Shropshire Council considers that the proposed tenure split effectively responds to evidence on affordable housing needs, as summarised within para 4.52 of the explanation to draft Policy DP3 of the draft Shropshire Local Plan. It also provides flexibility for alternative tenure splits where local need would support this. It is evidenced that there is significant need for affordable housing for rent in Shropshire, the delivery of which would be prejudiced by the application of a standard 10% affordable home ownership requirement. The draft policy approach to tenure thus complies with NPPF (para 64) which expects at least 10% of the homes to be available for affordable home ownership, "unless this would exceed the level of affordable housing required in the area, or significantly prejudice the ability to meet the identified affordable housing needs".	No	DP3. Affordable Housing Provision
A0586	B001	Assess the impact of Right to Buy on the supply/pool of affordable housing.	Affordable housing need in Shropshire has been calculated within the Strategic Housing Market Assessment (SHMA) which is considered an appropriate and robust assessment. This calculation of affordable housing need includes consideration of units to be taken out of management, including demolitions, sales/transfers to other RSLs, tenant's right to buy, other sales and loss of affordable shared equity housing.	No	DP3. Affordable Housing Provision
A0595	B002	The specific requirements within the policy should be deferred to an SPD or further flexibility should be provided for within the policy to ensure the policy remains relevant and appropriate over the plan period	Noted. Shropshire Council considers that the policy approach to proposed affordable housing contributions is appropriate. It responds to the significant affordable housing need identified in Shropshire and best available information on development viability, from within the Shropshire Viability Study. Shropshire Council also considers that the proposed tenure split effectively responds to evidence on affordable housing needs, as summarised within para 4.52 of the explanation to draft Policy DP3 of the draft Shropshire Local Plan. It also provides flexibility for alternative tenure splits where local need would support this. A Housing Supplementary Planning Document will support housing policies and provide further guidance.	No	DP3. Affordable Housing Provision
A0598	B010	Delete the wording "...and no later than at completion of 50% of the consented market housing..." from para 1c of draft Policy DP3.	Shropshire Council consider that the proposed Policy requirement of "ensuring applications for development with a requirement to provide affordable housing secure the interest of a Registered Provider, and that the affordable dwellings will be transferred to a Registered Provider as soon as possible, and no later than at completion of 50% of the consented market housing" is appropriate, provides certainty to all parties (including the community, development industry and decision maker) and ensures the timely delivery of affordable housing.	No	DP3. Affordable Housing Provision
A0608	B010	Reference to the Shropshire Council's Allocation Policy should be removed as it is not relevant to planning as the primacy of this policy is to secure affordable housing, rather than advise how it should be allocated, and to whom, thereafter.	Noted. Shropshire Council considers that it is appropriate to specify that affordable housing provided onsite will be allocated in accordance with Shropshire Councils Allocations Policy.	No	DP3. Affordable Housing Provision
A0614	B003	The approach should be amended to ensure consistency with Government's policies on affordable housing and guidance on rents for social housing.	Noted. Affordable housing is defined within the National Planning Policy Framework. Shropshire Council considers that the policy approach to proposed affordable housing contributions is appropriate. It responds to the significant affordable housing need identified in Shropshire and best available information on development viability, from within the Shropshire Viability Study. Shropshire Council also considers that the proposed tenure split effectively responds to evidence on affordable housing needs, as summarised within para 4.52 of the explanation to draft Policy DP3 of the draft Shropshire Local Plan. It also provides flexibility for alternative tenure splits where local need would support this. A Housing Supplementary Planning Document will support housing policies and provide further guidance.	No	DP3. Affordable Housing Provision

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0623	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Not Specified	Not Specified	Not Specified	Paragraph 20 of the NPPF states that strategic policies should make provision for housing, including affordable housing. Paragraph 62 of the NPPF goes further to distinguish that affordable housing can be provided off-site or an appropriate financial contribution paid in-lieu if it can be robustly justified.
A0624	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Yes	No	Yes	Paragraph 20 of the NPPF states that strategic policies should make provision for housing, including affordable housing. Paragraph 62 of the Framework goes further to distinguish that affordable housing can be provided off-site or an appropriate financial contribution paid in-lieu if it can be robustly justified. Reference to the identification of 'exceptional circumstances' in part 1B of Policy DP3 directly conflicts with guidance contained within the Framework
A0628	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3-DP7	No	No	Yes	Generally support proposed approach towards affordable housing. Urge the Council to take notice of the potential for open-book viability assessments to be used for determining the provision of affordable housing expected within developments. Shrewsbury South Sustainable Urban Extension underwent detailed assessment with regard to affordable housing and it was subsequently found the site could only provide 15% (rather than 20%). This approach was effective in ensuring that the scheme provided affordable housing whilst also being viable. It would be proactive of the Council to include reference to Viability Assessments.
A0629	B007-15	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield. Playing Pitch strategy indicates new facilities on new sites are a last resort. Thus, in addition to existing lack of infrastructure for cycling and pedestrians there is also a lack of infrastructure in the design of new facilities including public open spaces for family access.
A0647	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3	Yes	No	Yes	The draft Shropshire Local Plan does not reconcile the differing figures in DP3 (799 per year) and SP2.3 (350 per year). The term "Affordable Housing" is not used consistently throughout the draft Shropshire Local Plan. Unclear if DP3 and DP4 address all affordable housing, or just affordable housing to rent. The Affordable Housing Target and within this an Affordable Rent target are not quantified. DP1.2 indicates Residential Mix for open market dwellings should follow SHMA estimates – no corresponding policy for affordable dwellings.
A0664	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1 & DP3	No	No	No	Policy DP3 has not been fully considered in how it will apply to specialist housing proposals. There is no recognition of the unique characteristics of specialist housing for older people. In general retirement living and extra care proposals are not capable of accommodating affordable housing on site. Far from convinced that the necessary viability testing has been undertaken within the Viability Assessment (undertaken to inform the draft Shropshire Local Plan), to demonstrate that specialist housing for older people can provide for the equivalent policy requirement sought for affordable housing. The viability testing does not provide a robust position whereby site-specific negotiations can refer back to the viability supporting the local plan in line with requirements of the NPPG. From our review of the Local Plan viability evidence base it is not obvious that any of specific viability assumptions agreed as part of the review of the Churchill sites in Bridgnorth have been factored into the plan wide study. The plan fails to test reasonable standardised, industry acceptable inputs to viability.
A0627	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP3, DP4, DP5, DP6 and DP7	Not Specified	No	Not Specified	Whilst draft Policies DP3, DP4, DP5, DP6 or DP7 require reasonable access to local services by walking, cycling or public transport (where access is via public transport this should be 7 days a week for services like GP's, dentists and pharmacies appointments for which are often not available during peak times), none refer to daily access to employment. Sustainable travel to work is key for the suitability of developments, meeting Climate Emergency aims, aims of draft Policy SP3, and Sustainability Objectives SO5, SO6, & SO12. If employment is not available in the settlement then there must be daily peak time public transport - as these draft Policies aim to assist lower income households, this needs to be 7 days week and cover early starts late finishes (e.g. 6.00am 10.00pm), as many low paid jobs involve weekend work and shifts. Public transport links to services are key if lower income households in affordable properties are not to become burdened with additional costs/isolated.
A0627	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP4, DP5 and DP7	Not Specified	No	Not Specified	Draft Policies DP4, DP5 and DP7 must include limitations on cumulative exception sites. Cumulative impact from development occurring under these draft policies (multiple or phased "exception" developments) would be the same or arguably greater than the impact of a large development on rural settlements, over the course of time. Particularly relevant to smaller settlements where different landowners promote development on adjoining fields. Do not consider this is the intention of the National Planning Policy Framework (NPPF) in allowing rural exceptions.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0623	B003	Part 1B of Policy DP3 and its reference to 'exceptional circumstances' must therefore be deleted as it directly conflicts with guidance contained within the NPPF.	Noted. It is considered that the Policy complies with national policy. The exceptional circumstances requirement wording reflects Para 62 NPPF requirements which expect on site provision unless a financial contribution in lieu can be robustly justified or that "the agreed approach contributes to the objective of creating mixed and balanced communities".	No	DP3. Affordable Housing Provision
A0624	B005	Reference to the identification of 'exceptional circumstances' in part 1B of Policy DP3 should be removed.	Noted. It is considered that the Policy complies with national policy. The exceptional circumstances requirement wording reflects Para 62 NPPF requirements which expect on site provision unless a financial contribution in lieu can be robustly justified or that "the agreed approach contributes to the objective of creating mixed and balanced communities".	No	DP3. Affordable Housing Provision
A0628	B006	Include reference to Viability Assessments within draft affordable housing policies	Noted, para 2 of Draft Policy DP3 states "The provision of reduced rates of affordable housing due to viability concerns on otherwise sustainable schemes will be considered in exceptional circumstances where evidence is clearly presented and agreed by the Council. In these circumstances an overage clause will be sought in order to secure the potential for future contributions towards affordable housing."	No	DP3. Affordable Housing Provision
A0629	B007-15	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period; modify for greater recognition of the need to supply more accessible natural greenspace for affordable housing developments	Noted. Draft Policy DP3. Affordable Housing Provision includes a policy requirement of "Ensuring that affordable housing is appropriately distributed within the site, their locations maximise opportunities for future residents to access services and facilities by walking, cycling or public transport and minimises the exposure of future residents to sources of noise or reduced air quality." Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP3. Affordable Housing Provision
A0647	B003	This comment covers the structure of the Local Plan and the inconsistencies in it. It is therefore not possible to recommend the correct structure and which are the correct interpretations.	Noted. Affordable housing is defined within the National Planning Policy Framework. The affordable housing figure referenced within the proposed explanation of draft Policy DP3 is the affordable housing need, calculated within the Strategic Housing Market Assessment (SHMA). The figure referenced within draft Policy SP2 is not a statement of affordable housing need, but rather an affordable housing delivery target (this does not distinguish between the different types/tenures of affordable housing as it is not considered appropriate or necessary to do so). It is considered that the proposed affordable housing delivery target effectively responds to the significant affordable housing need identified in Shropshire and best available information on development viability, from within the Shropshire Viability Study. Draft Policy DP3 specifies the tenure mix expected from affordable housing provision as part of market housing development. Draft Policies DP4, DP5 and DP7 indicate that the type, size and tenure of affordable housing should meet local housing needs evidenced in housing need surveys. Whilst Draft Policy DP6 is a mechanism for delivering affordable dwellings for the specific applicant and such dwellings are expected to be designed to meet the current and future households needs (within a maximum dwelling size). Shropshire Council considers that the policy approach to proposed affordable housing is appropriate, effective, sustainable and deliverable.	No	DP3. Affordable Housing Provision
A0664	B001	DP3 should be amended to include reference to specialist housing for older people, acknowledging that in most cases it is recognised that affordable housing cannot be accommodated on the development site. In most cases it should be recognised that an off site payment in lieu should be agreed where viable. The council should amend the policy to explicitly set out that viability of specialist housing for older people is generally restricted and that the local authority will apply flexibility on a site by site basis as required to ensure that such housing comes forward to meet a clearly established housing need locally.	The draft Shropshire Local Plan is intended to be read as a whole. Draft Policy DP1 and its supporting text specifically references housing for older people and those with disabilities or special needs. Shropshire Council considers that the proposed affordable housing contributions are appropriate. They respond to the significant affordable housing need identified in Shropshire and best available information on development viability, from within the Shropshire Viability Study. Draft Policy DP3 does make provision for consideration of reduced rates of affordable housing due to viability concerns in exceptional circumstances where clear evidence is presented and agreed. A Housing Supplementary Planning Document will support housing policies and will be used appropriately to provide further guidance and detail	No	DP3. Affordable Housing Provision
A0627	B001	Add a requirement to have access to employment and secondary services & facilities into DP3-DP7.	Shropshire Council recognises that the settlements across Shropshire with an identified affordable housing need are diverse. It is considered that the proposed requirements of draft Policies DP3-DP7 are appropriate and balance the need to ensuring affordable housing provision occurs on appropriate sites and in appropriate locations with the need to effectively contribute to meeting needs for affordable housing.	No	DP3-DP7
A0627	B002	Add wording into Policy DP4, DP5, & DP7 to address cumulative impact from multiple "small" Affordable Exception developments	Shropshire Council considers that draft Policies DP4-DP7 are appropriate and will effectively contribute to meeting needs for affordable housing. These draft Policies include a requirement to demonstrate a proven local affordable housing need and where appropriate, include cross-reference to para 4(a-d) of draft Policy SP9, which identify considerations for developments including scale, design and layout of development (in the context of the site and its surroundings) and infrastructure capacity.	No	DP4, DP5 and DP7

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0127	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 - Oswestry place plan area: Trefonen Hub	Not Specified	No	Not Specified	Important to guard against the cumulative impact of developments
A0388	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10(4a)	Not Specified	No	Not Specified	Issues raised and detailed at Regulation 18 stage for SP9 (now SP10) and the associated DP3, DP4, DP5, DP6 and DP7 have not been addressed. There remain concerns that developers could bring forward exception sites that would be unsustainable for those requiring affordable housing. Where a settlement included a school or had access to a school via sustainable transport modes (a very subjective criteria), these could be targeted for multiple sites that could adversely change their character and not be supported by local services. Concerns raised at Reg 18 for SP9 (now SP10) DP3, DP4, DP5, DP6 and DP7 need to be addressed to ensure a good mix of housing in an area, sustainable and viable access to schools, services and employment for those without cars, change in character from multiple and adjacent sites and erosion of gaps between settlements.
A0388	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10(4a)	Not Specified	No	Not Specified	Issues raised and detailed at Regulation 18 stage for SP9 (now SP10) and the associated DP3, DP4, DP5, DP6 and DP7 have not been addressed. There remain concerns that developers could bring forward exception sites that would be unsustainable for those requiring affordable housing. Where a settlement included a school or had access to a school via sustainable transport modes (a very subjective criteria), these could be targeted for multiple sites that could adversely change their character and not be supported by local services. Concerns raised at Reg 18 for SP9 (now SP10) DP3, DP4, DP5, DP6 and DP7 need to be addressed to ensure a good mix of housing in an area, sustainable and viable access to schools, services and employment for those without cars, change in character from multiple and adjacent sites and erosion of gaps between settlements.
A0393	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield. Playing Pitch strategy indicates new facilities on new sites are a last resort. Thus, in addition to existing lack of infrastructure for cycling and pedestrians there is also a lack of infrastructure in the design of new facilities including public open spaces for family access.
A0432	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP4	Not Specified	No	No	As with other parts of the document – too woolly, lacking clear criteria that can be considered when overriding development areas. Example – “reasonable access to” – this means properly reasoned i.e. taking account of relevant factors, not considering irrelevant factors, applying appropriate weight to relevant factors – without clarity about what are the relevant criteria in considering reasonableness it allows a coach and horses to be driven through the development areas. No account taken of the Shrewsbury Big Town Plan on rural bus services. Lack of clarity prejudices other public bodies e.g. Parish Councils.
A0517	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP4	Not Specified	No	Not Specified	The explanation text to DP4 (paragraph 4.60) says that there is an expectation that exception sites will not exceed 25 dwellings. The policy wording itself needs to say the same rather than leave it open to debate. Paragraph 16 of the NPPF says plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. DP4 is not clear and therefore is not sound because it is not consistent with national policy. Exception sites are supposed to be just that, an exception. If you let them be any size then they should be defined in the local plan as specific allocations. 25 is a reasonable number under this policy, and as the plan thinks this is the right amount, it needs to be enshrined in the actual policy.
A0627	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP4	Not Specified	No	Not Specified	Draft Policy DP4 does not include a definition of scale. This is only set out in the proposed explanation to the draft Policy (para 4.57), which says there is an “expectation” sites will not exceed 25 dwellings adjacent to Strategic, Principal & Key Centres. That is very open to interpretation/not binding and there is no threshold for other settlements (normally locations for such sites), so gives no confidence to local residents. Note that draft Policies DP5 and DP7 include limitations/guides on the scale of development and believe draft Policy DP4 requires the same (particularly for Community Hubs & Clusters and other rural settlements). There is also no cumulative impact limitation on multiple developments adjacent to settlements, which is also required (particularly for Community Hubs & Clusters and other rural settlements).

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0127	B003	guard against the cumulative impact of developments by the additional wording within the affordable exception policies DP4,5,6 and 7.	All Local Plan policy requirements which are relevant are taken into account in the consideration of development proposals. Policy SP7 'Managing housing development' requires consideration be given to cumulative impacts for settlements identified in Policies S1-S20. Where development facilitated by Policy DP4 relates to a Community Hub or Community Cluster all aspects of these Policies, including the cumulative consideration of development set out in SP8 (part g) for Community Hubs & SP9 ( part f) for Community Clusters is relevant. Residential development outside identified settlements, in the countryside, is strictly controlled in accordance with Policy SP10 which further requires that development proposals do not lead to an adverse cumulative impact on the character of communities.	No	DP4. Affordable Housing Exception Schemes
A0388	B004	<ul style="list-style-type: none"> <li>Change the paragraphs that state “reasonable access to local services by walking, cycling or public transport” to “reasonable access to local services, schools and employment by walking, cycling or public transport that can be shown to be safe and viable” in DP3, DP4, DP5 and DP7.</li> <li>In DP3, remove the word “appropriately” which is subjective from Para 1.h so that it reads” Ensuring that affordable housing is distributed within the site....”</li> </ul>	Noted. It is considered that the proposed wording of the policy is effective. The requirements of draft Policies DP3-DP7 balance the need to ensure affordable housing provision occurs on appropriate sites and in appropriate locations with the need to effectively contribute to meeting needs for affordable housing. Draft Policies DP4 -DP7 include a requirement to demonstrate a proven local affordable housing need and include cross-reference to a range of other relevant policies of the Plan which set out other development considerations. These include SP5 ( High Quality Design) , and, where relevant, SP10 which expects that development proposals in the countryside ‘ do not lead to an adverse cumulative impact on the character of communities’ and para 4(a-d) of draft Policy SP9, which identify considerations for developments including scale, design and layout of development (in the context of the site and its surroundings) and infrastructure capacity. An updated Type and Affordability of Housing Supplementary Planning Document will provide an opportunity to provide definition and further context on detailed considerations.	No	DP4. Affordable Housing Exception Schemes
A0388	B005	<ul style="list-style-type: none"> <li>Change the paragraphs that state “reasonable access to local services by walking, cycling or public transport” to “reasonable access to local services, schools and employment by walking, cycling or public transport that can be shown to be safe and viable” in DP3, DP4, DP5 and DP7.</li> <li>In DP4, DP5 and DP7, change 1.a.iii from “Another settlement with a school or the ability to access a school by public transport” to “Another settlement with access to both primary and secondary schooling by safe and viable means for those without their own transport.</li> </ul>	Noted. It is considered that the proposed wording of the policy is effective. The requirements of draft Policies DP3-DP7 balance the need to ensure affordable housing provision occurs on appropriate sites and in appropriate locations with the need to effectively contribute to meeting needs for affordable housing. Draft Policies DP4 -DP7 include a requirement to demonstrate a proven local affordable housing need and include cross-reference to a range of other relevant policies of the Plan which set out other development considerations. These include SP5 ( High Quality Design) , and, where relevant, SP10 which expects that development proposals in the countryside ‘ do not lead to an adverse cumulative impact on the character of communities’ and para 4(a-d) of draft Policy SP9, which identify considerations for developments including scale, design and layout of development (in the context of the site and its surroundings) and infrastructure capacity. An updated Type and Affordability of Housing Supplementary Planning Document will provide an opportunity to provide definition and further context on detailed considerations.	No	DP4. Affordable Housing Exception Schemes
A0393	B016	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period; modify for greater recognition of the need to supply more accessible natural greenspace for affordable housing developments	<p>Noted.</p> <p>Draft Policy DP3. Affordable Housing Provision includes a policy requirement of "Ensuring that affordable housing is appropriately distributed within the site, their locations maximise opportunities for future residents to access services and facilities by walking, cycling or public transport and minimises the exposure of future residents to sources of noise or reduced air quality."</p> <p>Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace.</p> <p>The Local Plan should be read as a whole</p> <p>The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.</p>	No	DP4. Affordable Housing Exception Schemes
A0432	B001	Specific criteria to be taken into account stated wherever there is a qualitative judgement to be made.	Noted. Shropshire Council consider the criteria and requirements identified within draft Policy DP4 are appropriate. The terminology used within policies is generally consistent with that used in national policy. The Plan is intended to be read as a whole and therefore in addition to the criteria set out in draft Policy DP4 the relevant requirements of all other applicable policies will need to be taken into account in decision making on planning applications along with other material considerations. A Housing SPD will also support housing policies and provide further guidance	No	DP4. Affordable Housing Exception Schemes
A0517	B001	DP4 should be revised to state that exception sites should be a maximum of 25 dwellings.	Noted. Shropshire Council considers that it is appropriate to include the general expectation of the maximum size of exception sites within the proposed explanation to draft Policy DP4. It is also considered appropriate to recognise that exceptional circumstances will exist that justify larger sites within the proposed explanation to draft Policy DP4.	No	DP4. Affordable Housing Exception Schemes
A0627	B003	<p>Add limitations of scale into draft Policy DP4: "Adjacent to Strategic, Principal or Key Centres the scale of the development will solely be dictated by the evidence of local affordable housing need, but will not normally exceed 25 dwellings. Adjacent to Community Hub or Community Cluster or other Settlements the scale of the development will solely be dictated by the evidence of local affordable housing need, but will not normally exceed 10 dwellings".</p> <p>Add wording into draft Policy DP4 to address cumulative impact from multiple “small” Affordable Exception developments – particularly relevant to smaller settlements where this would have a greater impact if different landowners promote development on adjoining fields.</p>	<p>Noted. As specified within draft Policy DP4, the primary factor that determines the size threshold for affordable housing exception sites is local need, which for most rural settlements is likely to be less than 25 dwellings. However, draft Policy DP4 also includes a cross-reference to para 4(a-d) of draft Policy SP9, which identify considerations for developments including scale, design and layout of development (in the context of the site and its surroundings) and infrastructure capacity. It is considered that this effectively manages cumulative impact.</p> <p>Para 4.60 of the proposed explanation to draft Policy DP4 recognises that Strategic, Principal and Key Centres are likely to demonstrate high affordable housing need, which should not automatically translate into larger exception sites. As such para 4.60 of the proposed explanation to draft Policy DP4 also indicates a general expectation that the maximum size for affordable exception sites will not exceed 25 dwellings, although there is also recognition that there may be circumstances where exceeding this size threshold are appropriate. This general expectation on site size is not intended to be limited to Strategic, Principal and Key Centres, as such a minor modification is proposed to this paragraph to clarify this matter. It is also intended that further information on affordable exception schemes will be provided within the updated Type and Affordability of Housing Supplementary Planning Document.</p>	Yes	DP4. Affordable Housing Exception Schemes

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B007-16	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield. Playing Pitch strategy indicates new facilities on new sites are a last resort. Thus, in addition to existing lack of infrastructure for cycling and pedestrians there is also a lack of infrastructure in the design of new facilities including public open spaces for family access.
A0647	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP4	Yes	No	Yes	25% to be affordable housing, but on SAMDev sites in N Shropshire it is 10%, so the majority of affordable housing is needed to come through Exception Sites. There is an implication that housing in the wider rural area is required to support rural employment, in spite of agricultural declining nationally. DP4 may be used to justify developments in open countryside because they access a school via public transport.
A0663	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP4	Not Specified	Not Specified	Not Specified	Support the Council's decision to include Policy DP4, enabling the development of affordable housing on various types of exception sites. Exception sites can be an effective way of creating a steady stream of affordable built homes in areas of need.
A0014	B041	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP4	Not Specified	Not Specified	Not Specified	There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield.
A0014	B042	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP5	Not Specified	Not Specified	Not Specified	There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield.
A0127	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 - Oswestry place plan area: Trefonen Hub	Not Specified	No	Not Specified	Important to guard against the cumulative impact of developments
A0388	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP5(1.c.iii)	Not Specified	No	Not Specified	Inconsistency, possibly a typo, in wording in DP5 compared to DP4 & DP6. DP5 ciii states 'Another settlement with a school or appropriate access to a school by sustainable modes of transport' whereas DP4 & DP6 state, 'Another settlement with a school or the ability to access a school by public transport' Support change to public transport as this enables families without access to private cars to live in affordable houses.
A0388	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10(4a)	Not Specified	No	Not Specified	Issues raised and detailed at Regulation 18 stage for SP9 (now SP10) and the associated DP3, DP4, DP5, DP6 and DP7 have not been addressed. There remain concerns that developers could bring forward exception sites that would be unsustainable for those requiring affordable housing. Where a settlement included a school or had access to a school via sustainable transport modes (a very subjective criteria), these could be targeted for multiple sites that could adversely change their character and not be supported by local services. Concerns raised at Reg 18 for SP9 (now SP10) DP3, DP4, DP5, DP6 and DP7 need to be addressed to ensure a good mix of housing in an area, sustainable and viable access to schools, services and employment for those without cars, change in character from multiple and adjacent sites and erosion of gaps between settlements.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B007-16	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period; modify for greater recognition of the need to supply more accessible natural greenspace for affordable housing developments	Noted. Draft Policy DP3. Affordable Housing Provision includes a policy requirement of "Ensuring that affordable housing is appropriately distributed within the site, their locations maximise opportunities for future residents to access services and facilities by walking, cycling or public transport and minimises the exposure of future residents to sources of noise or reduced air quality." Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP4. Affordable Housing Exception Schemes
A0647	B001	DP4 1aiii should be deleted. If it is kept, then DP4 should be made consistent with DP5 in terms of the size of development and number of dwellings	Noted. Shropshire Council considers that it is appropriate to allow for appropriate exception sites within/immediately adjoining the built form of a settlement with a school or the ability to access a school by public transport, where such proposals meet the wider requirements of draft Policy DP4, including that there is a proven local affordable housing need, and the wider draft Policies of the draft Shropshire Local Plan.	No	DP4. Affordable Housing Exception Schemes
A0663	B006	1(e) Affordable housing should only be retained in perpetuity on rural exception sites as referenced in the glossary to the NPPF. Any references to retaining affordable housing in perpetuity unless explicitly referring to rural exception sites should be removed from the pre-submission draft.	Requirements for affordability in perpetuity reflect significant need for affordable housing and established approaches, securing a range of affordable housing which is meeting continuing need beyond that of initial occupants. Inclusion of specific policies in the Draft Shropshire Local Plan setting out requirements for a range of affordable delivery options provides greater clarity for the development industry to bring appropriate schemes forward.	No	DP4. Affordable Housing Exception Schemes
A0014	B041	Draft Policy DP4 should require more accessible natural greenspace should be provided for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield.	Noted. Draft Policy DP4. Affordable Housing Exceptions Schemes states such schemes will be positively considered where they meet all of a series of policy requirements, including "It is served by an adequate access and infrastructure and has reasonable access to local services by walking, cycling or public transport". Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole.	No	DP4. Affordable Housing Exceptions Schemes
A0014	B042	Draft Policy DP5 should require more accessible natural greenspace should be provided for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield.	Noted. Draft Policy DP5. Entry Level Exception Sites states such schemes will be positively considered where they comply with a series of policy requirements, including "It is served by an adequate access and infrastructure and has reasonable access to local services by walking, cycling or public transport". Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole.	No	DP5. Entry Level Exception Sites
A0127	B004	guard against the cumulative impact of developments by the additional wording within the affordable exception policies DP4,5,6 and 7.	All Local Plan policy requirements which are relevant are taken into account in the consideration of development proposals. Policy SP7 'Managing housing development' requires consideration be given to cumulative impacts for settlements identified in Policies S1-S20. Where development facilitated by Policy DP5 relates to a Community Hub or Community Cluster all aspects of these Policies, including the cumulative consideration of development set out in SP8 (part g) for Community Hubs & SP9 (part f) for Community Clusters is relevant. Residential development outside identified settlements, in the countryside, is strictly controlled in accordance with Policy SP10 which further requires that development proposals do not lead to an adverse cumulative impact on the character of communities.	No	DP5. Entry Level Exception Sites
A0388	B001	Change DP5 wording to match that in DP4 & DP6 'Another settlement with a school or the ability to access a school by public transport'	Noted. The wording is considered appropriate as sustainable modes of transport includes public transport and other sustainable options such as cycling. Policies DP4,DP5,DP6 & DP7 all reference the need for development to be 'served by an adequate access and infrastructure and has reasonable access to local services by walking, cycling or public transport'	No	DP5. Entry Level Exception Sites
A0388	B006	<ul style="list-style-type: none"> <li>Change the paragraphs that state "reasonable access to local services by walking, cycling or public transport" to "reasonable access to local services, schools and employment by walking, cycling or public transport that can be shown to be safe and viable" in DP3, DP4, DP5 and DP7.</li> <li>In DP4, DP5 and DP7, change 1.a.iii from "Another settlement with a school or the ability to access a school by public transport" to "Another settlement with access to both primary and secondary schooling by safe and viable means for those without their own transport."</li> </ul>	Noted. It is considered that the proposed wording of the policy is effective. The requirements of draft Policies DP3-DP7 balance the need to ensure affordable housing provision occurs on appropriate sites and in appropriate locations with the need to effectively contribute to meeting needs for affordable housing. Draft Policies DP4 -DP7 include a requirement to demonstrate a proven local affordable housing need and include cross-reference to a range of other relevant policies of the Plan which set out other development considerations. These include SP5 ( High Quality Design) , and, where relevant, SP10 which expects that development proposals in the countryside ' do not lead to an adverse cumulative impact on the character of communities' and para 4(a-d) of draft Policy SP9, which identify considerations for developments including scale, design and layout of development (in the context of the site and its surroundings) and infrastructure capacity. An updated Type and Affordability of Housing Supplementary Planning Document will provide an opportunity to provide definition and further context on detailed considerations.	No	DP5. Entry Level Exception Sites

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0393	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield. Playing Pitch strategy indicates new facilities on new sites are a last resort. Thus, in addition to existing lack of infrastructure for cycling and pedestrians there is also a lack of infrastructure in the design of new facilities including public open spaces for family access.
A0603	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP4, DP5, DP6 and DP7	Yes	No	Yes	Clauses defining site suitability contain a number of loosely worded definitions which are capable of widely different interpretation e.g. "isolated location", "reasonable access to local services by walking, cycling or public transport", "appropriate access to a school" and "meaningful community engagement". Imprecise definitions such as these are unhelpful both for prospective developers and for development management officers in reaching proper judgements in relation to the suitability or otherwise of exception site proposals. This lack of clarity is likely to lead to speculative applications, inconsistent decision making and in all probability an increase in Appeals. In particular there are inconsistencies between the wording used for site definition in DP5 and the amended definitions in the other policies within this suite of policies.
A0629	B007-17	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield. Playing Pitch strategy indicates new facilities on new sites are a last resort. Thus, in addition to existing lack of infrastructure for cycling and pedestrians there is also a lack of infrastructure in the design of new facilities including public open spaces for family access.
A0663	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP5	Not Specified	Not Specified	Not Specified	Pleased the Council has included this form of policy approach in the emerging plan following its introduction in the revised NPPF. Our members support the opportunity to meet local housing needs including first time buyers or those looking to rent their own home.
A0674	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP5	Not Specified	Not Specified	Not Specified	Support the Council's aspirations in line with the National Planning Policy Framework (NPPF) for the delivery of modest entry level homes schemes to assist first buyers or renters.
A0014	B043	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP6	Not Specified	Not Specified	Not Specified	There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0393	B017	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period; modify for greater recognition of the need to supply more accessible natural greenspace for affordable housing developments	Noted. Draft Policy DP3. Affordable Housing Provision includes a policy requirement of "Ensuring that affordable housing is appropriately distributed within the site, their locations maximise opportunities for future residents to access services and facilities by walking, cycling or public transport and minimises the exposure of future residents to sources of noise or reduced air quality." Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole. The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation.	No	DP5. Entry Level Exception Sites
A0603	B001	All of the clauses defining site suitability should be couched in terms that are, as far as possible, unambiguous.	Noted. The terminology used within these policies is generally consistent with that used in national policy and there is also significant case law available to define such terms as an 'isolated dwelling'. An updated Type and Affordability of Housing Supplementary Planning Document also provides an opportunity to provide further context on these issues, particularly what is meant by 'meaningful consultation'. Ultimately, Shropshire is a diverse county with diverse and distinct settlements and draft Policies DP4 - DP7 need to appropriately reflect this diversity.	No	DP5. Entry Level Exception Sites
A0629	B007-17	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period; modify for greater recognition of the need to supply more accessible natural greenspace for affordable housing developments	Noted. Draft Policy DP3. Affordable Housing Provision includes a policy requirement of "Ensuring that affordable housing is appropriately distributed within the site, their locations maximise opportunities for future residents to access services and facilities by walking, cycling or public transport and minimises the exposure of future residents to sources of noise or reduced air quality." Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole. The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation.	No	DP5. Entry Level Exception Sites
A0663	B007	Concerned by the statement that the 'All the dwellings will be retained as affordable in perpetuity'. Paragraph 71 of the NPPF makes no reference to affordable housing being retained in perpetuity on entry level exception sites. Nor is it included in the Glossary in Annex 2. Government policy only requires affordable housing be secured in perpetuity on rural exception sites. Entry level exception sites are distinctly different to rural exception sites as they are aimed at first time buyers or young households wishing to rent their first property.	Requirements for affordability in perpetuity reflect significant need for affordable housing and established approaches, securing a range of affordable housing which is meeting continuing need beyond that of initial occupants. Inclusion of specific policies in the Draft Shropshire Local Plan setting out requirements for a range of affordable delivery options provides greater clarity for the development industry to bring appropriate schemes forward. A Housing Supplementary Planning Document will support housing policies and will be used appropriately to provide further guidance and detail regarding matters such as use of legal agreements, affordability in perpetuity staircasing and affordable housing distribution and set how out mechanisms may reflect individual site circumstances, where this is required.	No	DP5. Entry Level Exception Sites
A0674	B009	N/A	Noted.	No	DP5. Entry Level Exception Sites
A0014	B043	Draft Policy DP6 should require more accessible natural greenspace should be provided for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield.	Noted. Draft Policy DP6. Single Plot Exception Sites states such schemes will be considered where they comply in circumstances where factors including "It is served by an adequate access and infrastructure and has reasonable access to local services by walking, cycling or public transport" occur. Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole.	No	DP6. Single Plot Exception Sites
A0127	B005	guard against the cumulative impact of developments by the additional wording within the affordable exception policies DP4,5,6 and 7.	All Local Plan policy requirements which are relevant are taken into account in the consideration of development proposals. Policy SP7 'Managing housing development' requires consideration be given to cumulative impacts for settlements identified in Policies S1-S20. Where development facilitated by Policy DP6 relates to a Community Hub or Community Cluster all aspects of these Policies, including the cumulative consideration of development set out in SP8 (part g) for Community Hubs & SP9 ( part f) for Community Clusters is relevant. Residential development outside identified settlements, in the countryside, is strictly controlled in accordance with Policy SP10 which further requires that development proposals do not lead to an adverse cumulative impact on the character of communities.	No	DP6. Single Plot Exception Sites

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0388	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10(4a)	Not Specified	No	Not Specified	Issues raised and detailed at Regulation 18 stage for SP9 (now SP10) and the associated DP3, DP4, DP5, DP6 and DP7 have not been addressed. There remain concerns that developers could bring forward exception sites that would be unsustainable for those requiring affordable housing. Where a settlement included a school or had access to a school via sustainable transport modes (a very subjective criteria), these could be targeted for multiple sites that could adversely change their character and not be supported by local services. Concerns raised at Reg 18 for SP9 (now SP10) DP3, DP4, DP5, DP6 and DP7 need to be addressed to ensure a good mix of housing in an area, sustainable and viable access to schools, services and employment for those without cars, change in character from multiple and adjacent sites and erosion of gaps between settlements.
A0393	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield. Playing Pitch strategy indicates new facilities on new sites are a last resort. Thus, in addition to existing lack of infrastructure for cycling and pedestrians there is also a lack of infrastructure in the design of new facilities including public open spaces for family access.
A0432	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP6	Not Specified	No	No	As with other parts of the document – too woolly, lacking clear criteria that can be considered when overriding development areas. Example – “reasonable access to” – this means properly reasoned i.e. taking account of relevant factors, not considering irrelevant factors, applying appropriate weight to relevant factors – without clarity about what are the relevant criteria in considering reasonableness it allows a coach and horses to be driven through the development areas. No account taken of the Shrewsbury Big Town Plan on rural bus services. Lack of clarity prejudices other public bodies e.g. Parish Councils.
A0457	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP6	Not Specified	Not Specified	Not Specified	Many communities dispute the way the interpretation of the policy has changed since it was first introduced
A0610	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP6	Not Specified	Yes	Not Specified	The proposed policy for single plot affordable dwellings has worked very well in delivering a significant number of good quality affordable housing for Shropshire. Whilst it is evident that isolated development should be avoided, the proposed policy seems overly restrictive and goes against the spirit of the original policy to afford more opportunity for affordable homes, rather than restrict. Proposed policy advises that a suitable “site is within and well related to the built form of a settlement and has permanent and substantial buildings on at least one side”. It is considered that flexibility should be maintained in this policy to allow sites to be assessed against the spatial pattern of each individual settlement.
A0629	B007-18	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield. Playing Pitch strategy indicates new facilities on new sites are a last resort. Thus, in addition to existing lack of infrastructure for cycling and pedestrians there is also a lack of infrastructure in the design of new facilities including public open spaces for family access.

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0388	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10(4a)	Not Specified	No	Not Specified	Issues raised and detailed at Regulation 18 stage for SP9 (now SP10) and the associated DP3, DP4, DP5, DP6 and DP7 have not been addressed. There remain concerns that developers could bring forward exception sites that would be unsustainable for those requiring affordable housing. Where a settlement included a school or had access to a school via sustainable transport modes (a very subjective criteria), these could be targeted for multiple sites that could adversely change their character and not be supported by local services. Concerns raised at Reg 18 for SP9 (now SP10) DP3, DP4, DP5, DP6 and DP7 need to be addressed to ensure a good mix of housing in an area, sustainable and viable access to schools, services and employment for those without cars, change in character from multiple and adjacent sites and erosion of gaps between settlements.
A0393	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield. Playing Pitch strategy indicates new facilities on new sites are a last resort. Thus, in addition to existing lack of infrastructure for cycling and pedestrians there is also a lack of infrastructure in the design of new facilities including public open spaces for family access.
A0430	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP7	Not Specified	No	Not Specified	Draft Policy DP7 now introduces a maximum site size of 'normally 10 dwellings', and an increased percentage of affordable housing (from 66% to 70%). With these more onerous additions to the draft policy, it is difficult to comprehend how the development it is seeking to encourage will be delivered, when the current policy which is less restrictive failed to generate new development of this nature. Furthermore, this policy is not supported by any evidence to demonstrate that these improvements will lead to the delivery of local needs affordable housing across the county, thereby undermining its ability to ensure there is adequate housing opportunities for households with a local connection. The proposed housing guidelines of 55 new dwellings for Trefonen rely entirely on new development proposals satisfying this policy. Given the lack of development being delivered under the current 'cross-subsidy' policy, we strongly question whether a more onerous policy as currently drafted will lead to the delivery of 55 new homes in the village.
A0457	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP7	No	No	No	The Reg 19 consultation is the first time that this policy has been subject to consultation on the detailed criteria for where and how cross-subsidy housing can be delivered. This is a procedural flaw and stakeholders should have had prior opportunity to comment on the detail of the policy at earlier stages in the Local Plan preparation process. The Parish Council is concerned that Part a.iii. of the policy states that cross-subsidy housing can be built in "Another settlement {i.e. an unclassified settlement} with a school or the ability to access a school by public transport". A school alone is not an indication of whether a location is unsustainable. In Ford, the village is not sustainable (see our comments on S16.2) and the school is at capacity. Further development would put excessive pressure on its finite resources.
A0517	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP7	Not Specified	No	Not Specified	Part (e) of DP7 says the scale of the development will solely be dictated by the evidence of local affordable housing need but will not normally exceed 10 dwellings. Paragraph 16 of the NPPF says plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. DP7(e) is not unambiguous because in theory it could be any number above 10 and therefore is not sound because it is not consistent with national policy.
A0610	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP7	Not Specified	Yes	Not Specified	The cross subsidy policy is an opportunity to deliver a significant number of affordable dwellings and recognises the difficulty in getting landowners to make sites available. The proposed mix of 70% affordable to 30% open market, appears an logical mix which should be welcomed by local communities whilst ensuring the landowners receive a suitable return.
A0610	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP7	Not Specified	Yes	Not Specified	The cross subsidy policy is an opportunity to deliver a significant number of affordable dwellings and recognises the difficulty in getting landowners to make sites available. The proposed mix of 70% affordable to 30% open market, appears an logical mix which should be welcomed by local communities whilst ensuring the landowners receive a suitable return.
A0627	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP7	Not Specified	No	Not Specified	Do not consider draft Policy DP7 is required, as para 77 of the National Planning Policy Framework (NPPF) allows for viability discretion on 100% Affordable Housing Rural Exception developments in 'Countryside' outside existing settlements. Land value is a key factor in the viability of 100% Affordable Exception schemes, if landowners foresee higher values via cross-subsidy exception, they will hold out for such schemes, reducing the overall percentage of affordable housing provision. Without prejudice to the above, if draft Policy DP7 is retained, disagree with the minimum 70% Affordable Homes requirement in DP7.1(f). Consider this should mirror open market affordable housing requirements (so 90% affordable in the north and 80% affordable in the south), to reflect identified local needs. Unclear how viability (as referenced within DP7.1(a)) will be determined or what is an acceptable level of profit?
A0627	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP7	Not Specified	No	Not Specified	Para 1a of Draft Policy DP7 refers to unviability of 100% Affordable Exception schemes – how will this be determined and what is an acceptable level of profit (how and by who will this be assessed)? Is this legally a consideration under the Planning Act? Without public grant, viability is synonymous with profitability. Developers are profit led and will seek to maximise Open Market housing within any development to maximise profit. Clearly, every development differs in terms of land values and build costs related to site factors, and saleability of Open Market housing.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0388	B008	<ul style="list-style-type: none"> <li>Change the paragraphs that state "reasonable access to local services by walking, cycling or public transport" to "reasonable access to local services, schools and employment by walking, cycling or public transport that can be shown to be safe and viable" in DP3, DP4, DP5 and DP7.</li> <li>In DP4, DP5 and DP7, change 1.a.iii from "Another settlement with a school or the ability to access a school by public transport" to "Another settlement with access to both primary and secondary schooling by safe and viable means for those without their own transport."</li> </ul>	Noted. It is considered that the proposed wording of the policy is effective. The requirements of draft Policies DP3-DP7 balance the need to ensure affordable housing provision occurs on appropriate sites and in appropriate locations with the need to effectively contribute to meeting needs for affordable housing. Draft Policies DP4-DP7 include a requirement to demonstrate a proven local affordable housing need and include cross-reference to a range of other relevant policies of the Plan which set out other development considerations. These include SP5 (High Quality Design), and, where relevant, SP10 which expects that development proposals in the countryside 'do not lead to an adverse cumulative impact on the character of communities' and para 4(a-d) of draft Policy SP9, which identify considerations for developments including scale, design and layout of development (in the context of the site and its surroundings) and infrastructure capacity. An updated Type and Affordability of Housing Supplementary Planning Document will provide an opportunity to provide definition and further context on detailed considerations.	No	DP7. Cross-Subsidy Exception Schemes
A0393	B019	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period; modify for greater recognition of the need to supply more accessible natural greenspace for affordable housing developments	Noted. Draft Policy DP3. Affordable Housing Provision includes a policy requirement of "Ensuring that affordable housing is appropriately distributed within the site, their locations maximise opportunities for future residents to access services and facilities by walking, cycling or public transport and minimises the exposure of future residents to sources of noise or reduced air quality." Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole. The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation.	No	DP7. Cross-Subsidy Exception Schemes
A0430	B004	In order for the draft SLP to be justified, effective and consistent with national planning policy we suggest the following changes are necessary: <ul style="list-style-type: none"> <li>Reduce the percentage of 70% to less than 66% to ensure greater flexibility is built in respond to Shropshire's diverse range and type of settlements and to ensure cross subsidy exception sites come forward over the course of the Local Plan period.</li> <li>Any percentage should be fully justified by the evidence base to ensure its effectiveness.</li> </ul>	Noted. There is significant need for affordable housing. Inclusion of specific policies in the Draft Shropshire Local Plan setting out requirements for a range of affordable delivery options provides greater clarity for the development industry to bring appropriate schemes forward. The cross subsidy exception scheme draft policy is primarily intended as a delivery mechanism for affordable housing and not the provision of open market dwellings. This is reflected in the need to deliver at least 70% affordable housing tenures and directly reflect the needs outlined in a housing need survey based on tenure and size of dwellings. A Housing Supplementary Planning Document will support housing policies and will be used appropriately to provide further guidance and detail.	No	DP7. Cross-Subsidy Exception Schemes
A0457	B004	Policy DP7 should be subject to further consultation and cross-subsidy housing should not be allowed outside of designated settlements and should be focused in or on the edge of Strategic Key and Principal areas where there is an appropriate range of facilities. Criteria a.ii & iii of the policy should be removed to ensure such development is not allowed in village/rural locations.	Noted. A version of draft Policy DP7 was consulted upon within the Regulation 18: Pre-Submission Draft Consultation. Shropshire Council considers that it is appropriate to allow for cross-subsidy exception sites within/immediately adjoining the built form of a settlement with a school or the ability to access a school by public transport, where such proposals meet the wider requirements of draft Policy DP4, including that there is a proven local affordable housing need and it is served by an adequate access and infrastructure and has reasonable access to local services by walking, cycling or public transport; and the wider draft Policies of the draft Shropshire Local Plan (including draft Policy DP25 regarding infrastructure provision).	No	DP7. Cross-Subsidy Exception Schemes
A0517	B002	DP7(e) needs to be more precise and there should be no room for ambiguity. The words "not normally" should therefore be deleted from the policy.	Noted. Shropshire Council consider requirements identified within draft Policy DP7 are appropriate reflecting National Policy and the wide range of situations where cross subsidy housing may be delivered. An updated Type and Affordability of Housing Supplementary Planning Document also provides an opportunity to provide further context.	No	DP7. Cross-Subsidy Exception Schemes
A0610	B001	n/a	Noted.	No	DP7. Cross-Subsidy Exception Schemes
A0610	B002	n/a	Noted.	No	DP7. Cross-Subsidy Exception Schemes
A0627	B004	Remove DP7 completely; Or, if not, change DP7.1.f wording Delete at least 70% and require it should mirror the Open Market development Affordable Homes requirements for its location within the county i.e. it should be at least 90%AH in the North and 80%AH in the South to reflect identified local needs.	Shropshire Council considers that draft Policy DP7 is consistent with the National Planning Policy Framework (NPPF) and provides beneficial supplementary local policy on Cross-Subsidy Schemes. The affordable housing thresholds referenced in draft Policy DP3 for Open Market Housing and the proposed minimum amount of affordable housing on Cross-Subsidy Schemes in draft Policy DP7 are consistent as they are both reflective and responsive to development viability. Development viability will be determined through open book appraisal at the Planning Application stage.	No	DP7. Cross-Subsidy Exception Schemes
A0627	B005	Add wording into draft DP7 defining how "unviable" will be assessed – submission information and process for review & assessment. Add wording into draft DP7 defining "viability" e.g. possibly by maximum profitability margin limits over development costs.	Shropshire Council considers that draft Policy DP7 is consistent with the National Planning Policy Framework (NPPF) and provides beneficial supplementary local policy on Cross-Subsidy Schemes. Development viability will be determined through open book appraisal at the Planning Application stage.	No	DP7. Cross-Subsidy Exception Schemes

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B007-19	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield. Playing Pitch strategy indicates new facilities on new sites are a last resort. Thus, in addition to existing lack of infrastructure for cycling and pedestrians there is also a lack of infrastructure in the design of new facilities including public open spaces for family access.
A0663	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP7	Not Specified	Not Specified	Not Specified	The West Midlands HAPC strongly supports the allowance of some market housing under this preferred option to support the delivery of affordable housing in locations where it may not be possible otherwise.
A0014	B044	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP7	Not Specified	Not Specified	Not Specified	There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield.
A0040	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP7	Not Specified	No	Not Specified	Only a very limited number of exception sites are coming forward as evidenced by the low delivery of exception sites in Shropshire in the past few years. To increase delivery requires a significant change to the current situation and that means providing landowners with more incentive to make land available for affordable housing.
A0506	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP7	Not Specified	No	Not Specified	Concerned draft Policy DP7 which allows for cross-subsidy development immediately adjoining the built form of Community Hub and Community Cluster settlements, will encourage development outside the proposed development boundary for Longden (as experienced between 2014 and 2020 when the Parish Council and Longden residents withstood development pressure, resulting in four appeal being dismissed, but with a settlement guideline which is unrealistic to achieve within the village) and ensure any development within the proposed development boundary is purely open market housing. Support submission made by Longden Parish Council and Longden Village Action Group. Submission supported by other residents (documented within an Appendix to this representation).
A0347	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP8	No	No	Not Specified	1.The Local Authority should ensure that it has fully taken into account the availability of water in new developments, particularly in areas of water stress (Shropshire is moving towards serious water stress). 2. There is the need for appropriate foul drainage arrangement, to avoid extensive proliferation of non-mains drainage. Suggest reference to DP19 should be included to make it more effective.
A0393	B020	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B007-19	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period; modify for greater recognition of the need to supply more accessible natural greenspace for affordable housing developments	Noted. Draft Policy DP3. Affordable Housing Provision includes a policy requirement of "Ensuring that affordable housing is appropriately distributed within the site, their locations maximise opportunities for future residents to access services and facilities by walking, cycling or public transport and minimises the exposure of future residents to sources of noise or reduced air quality." Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation.	No	DP7. Cross-Subsidy Exception Schemes
A0663	B008	n/a	Noted	No	DP7. Cross-Subsidy Exception Schemes
A0014	B044	Draft Policy DP7 should require more accessible natural greenspace should be provided for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield.	Noted. Draft Policy DP7. Cross-Subsidy Exception Schemes states such schemes will be positively considered where all of a series of policy requirements are satisfied, including "The affordable housing is appropriately distributed within the site, their locations maximise opportunities for future residents to access services and facilities by walking, cycling or public transport and minimises the exposure of future residents to sources of noise or reduced air quality" and "It is served by an adequate access and infrastructure and has reasonable access to local services by walking, cycling or public transport". Draft Policy DP15. Open Space and Recreation provides standards for open space provision within residential development (including all forms of residential development involving affordable housing), this includes accessible natural greenspace. The Local Plan should be read as a whole.	No	DP7. Cross-Subsidy Exception Sites
A0040	B001	Remove: "and that an affordable exception scheme is unviable," from DP7 1a	Shropshire Council consider the requirements identified within para 1.a. of draft Policy DP7 are appropriate. The policy is intended as a delivery mechanism for affordable housing and not the provision of open market dwellings. Requirements respond to the significant affordable housing need identified in Shropshire and reflect the expectation that affordable exception schemes are the first delivery mechanism considered. Inclusion of a specific policy in the Draft Plan provides greater clarity for the development industry to bring appropriate schemes forward.	No	DP7: Cross-Subsidy Exception Schemes
A0506	B004	Longden should not be identified as a Community Hub, rather it should form a Community Cluster. Draft Policy SP7 should be modified to ensure large scale development proposals for affordable housing outside Community Clusters will not be approved.	Noted. Shropshire Council considers that draft Policy DP8 complements other mechanisms for achieving affordable housing delivery. Requirements for its application include demonstration that no public grant is available and an affordable exception scheme is unviable and a proven local affordable housing need. With regard to development within the proposed Longden development boundary, any affordable housing provision would be calculated in accordance with draft Policy DP3. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Longden. As such it is considered appropriate for Longden to be identified as a proposed Community Hub. However recognising the level of development that has occurred over recent years within the settlement, and its characteristics, constraints and opportunities the draft Shropshire Local Plan has identified a low residential development guideline of some 50 dwellings (equating to just over 2 dwellings per annum) for the settlement. Completions already achieved within the draft Shropshire Local Plan period from 2016-2038 and current commitments achieve around half of this proposed residential guideline. As such, it has been concluded that no specific site allocations are required to achieve the proposed residential development guideline and the remaining windfall allowance is some 27 dwellings (as at 31st March 2019). This is considered an appropriate, effective, sustainable and deliverable approach. Shropshire Council also considers that draft Policy SP7, alongside other relevant draft Shropshire Local Plan policies, is an appropriate and effective means of managing housing development.	No	DP7: Cross-Subsidy Exception Schemes
A0347	B001	n/a	1.No Traveller site allocations are proposed in the Draft Plan. The Shropshire Water Cycle Study shows that there is sufficient water to accommodate the growth in the Local Plan and Policy DP20 sets out water efficiency standards for new housing and major development. No change proposed. 2. The Plan should be read as a whole. SC do not consider that a cross reference is necessary here.	Yes	DP8. Gypsy and Traveller Accommodation
A0393	B020	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP8. Gypsy and Traveller Accommodation

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0510	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP8	Not Specified	No	Not Specified	Draft Policy DP8 states support for Gypsy and traveller sites will be forthcoming for suitable development proposals for sites within or close to Shrewsbury, Principal or Key Centres and Community Hubs or Clusters, or for exception sites which 'relate well' to those settlements and other allowable for exception sites or in accordance with draft Policy SP10. While draft Policy DP8.1 sets out a general presumption of support, it does not indicate how the effect of a gypsy or traveller development on other existing/proposed development or the natural/built environment should be taken into account. Often, the detailed effects of such development on local visual amenity, landscape character or residential property(ies), commercial operations or leisure facilities, that cause problems. These ought to be referred to in the criteria for considering the suitability of any particular site for such development. Draft Policy DP8.1.b and c refer to demonstrating a clear need, presumably against assessed needs for the County. However, need for such development ought to be demonstrated in relation to the particular site proposed, in the same way a scheme involving a rural workers dwelling has to be, and should only be permitted if there is a specific need for the particular site chosen. Para 4.83 of the explanation to draft Policy DP8 indicates the gross need identified by the GTAA is 24 pitches over the initial 5 year period with 113 pitches to 2038. The draft Shropshire Local Plan does not, however, indicate what should happen to proposals for further development, should those targets be reached before the end of the proposed Plan period. The Council's policy on over-provision should be made clear in the draft Policy DP8. Policy DP8.2 says all new sites should be in a sustainable location, reasonably accessible to education, health and welfare infrastructure and meet a number of facilities. This tends to push gypsy sites towards developed settings, but no evidence is presented to indicate those persons who would occupy permitted units would prefer to live in a developed setting - indeed, many may prefer to live a little way away from developed areas where the pressures for conformity do not exist to the same degree. This ought to be acknowledged in the draft Policy and advice given for situations where 'developed' and undeveloped locations are proposed.
A0629	B007-20	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan.
A0014	B045	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP9 and Para 4.91	Not Specified	Not Specified	Not Specified	Support town centre development proposals which promote ethical, sustainable, and low-carbon consumer opportunities.
A0348	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP9	Not Specified	Yes	Not Specified	The content of draft Policy DP9 is noted and would offer opportunities to conserve and enhance the historic environment, including projects such as Oswestry High Street Heritage Action Zone.
A0393	B021	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan.
A0609	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP9	Not Specified	No	Not Specified	Generally supportive of draft Policy DP9, however to ensure the draft policy is effective and consistent with national policy, the retail hierarchy should include any planned local centres at proposed strategic sites, including that proposed at Tasley Garden Village (BRD030). This would provide appropriate policy support for the uses and protection from future out-of-centre proposals which would affect the viability and deliverability of planned local centres. By including the planned centres within the retail hierarchy, it would ensure this draft policy is positively prepared and effective and therefore it would be considered to be sound.
A0629	B007-21	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. There should be a greater recognition of the need to supply more accessible natural greenspace for affordable housing developments, as residents tend to have more difficulty sustainably accessing this further afield. Playing Pitch strategy indicates new facilities on new sites are a last resort. Thus, in addition to existing lack of infrastructure for cycling and pedestrians there is also a lack of infrastructure in the design of new facilities including public open spaces for family access.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0510	B003	Draft Policy DP8 should be modified to indicate that the effect of a gypsy site on local visual amenity, landscape character, the natural environment and on residential, commercial and leisure facilities will be taken into consideration in considering the merits of an application for a Gypsy and Traveller site. Draft Policy DP8 should also be modified to make clear how the Council will deal with proposals for such development in the event that the assessed need has been provided.	Noted. Draft Policy DP8 reflects national policy in respect of Traveller sites, including locational and other expectations for sustainable development. National policy expects that, local planning authorities should 'very strictly limit new traveller site development in open countryside' and sets out relevant considerations. Draft Policy DP8 sets out the specific policy context in respect of Gypsy and Traveller development. However, the draft Shropshire Local Plan is intended to be read as a whole and therefore in addition to the criteria set out in draft Policy DP8, notably those set out in 2(a) to (h) , the relevant considerations, including those relating to amenity, environmental and other matters, of all other applicable policies will need to be taken into account in decision making on planning applications along with other material considerations. Evidence in the form of the GTAA indicates that there is no strategic identified need and therefore no specific need for allocations. The GTAA does however recognise that some need for small sites will nevertheless arise where available supply does not meet need a specific requirement. National policy requires that where there is no identified need, criteria-based policies be included to provide a basis for decisions on any planning applications which are submitted. Draft Policy DP8 provides such a criteria-based policy to ensure that: there is a suitable mechanism to assess planning applications and a mechanism to consider non-strategic, arising needs for small sites. Since need must be considered on a planning application specific basis and matters such as alternative accommodation availability and the personal circumstances of applicants are relevant considerations, it would not be appropriate to impose limits on provision. There is however monitoring of planning applications and draft policy DP8 part 4(d) recognises the need to review evidence regularly, reconsider strategic requirements and progress allocations for new sites if required.	No	DP8. Gypsy and Traveller Accommodation
A0629	B007-20	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP8. Gypsy and Traveller Accommodation
A0014	B045	N/A	Noted.	No	DP9. Managing and Supporting Town Centres
A0348	B016	N/A	Noted.	No	DP9. Managing and Supporting Town Centres
A0393	B021	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP9. Managing and Supporting Town Centres
A0609	B014	Include planned local centres at proposed strategic sites within the retail hierarchy.	If the Local Centres are under 300sqm then no RIA will be required. Locally the issue of protecting Town Centres is important and the current approach is consistent with how the Retail Hierarchy has been applied to Local Centres as part of SUEs	No	DP9. Managing and Supporting Town Centres
A0629	B007-21	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. 1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0676	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP9	Yes	No	Yes	Draft Policy DP9 which relates to managing and supporting town centres is not sound as it has not been positively prepared, it is not justified or effective, and it is not consistent with national policy as it fails to recognise local centres such as Bicton Heath as suitable and appropriate locations for new main town centre uses. Bicton Heath is a defined local centre identified for expansion in both the adopted SAMDev Plan and Shrewsbury West Sustainable Urban Extension (SUE) Masterplan (Masterplan specifically identifies land to expand the local centre). Recognise draft Policy DP9 appears to support neighbourhood based local shopping within the new residential developments such as SUE's, however, the draft Policy only refers to a preference to accommodate retailing within Town Centres, Principal Centres and Key Centres, adding that proposals outside these centres will need to satisfy the sequential and impact test. In short, a Planning Application on the site identified for the expansion of Bicton Heath Local Centre might need to demonstrate there are no sites within Town Centres, Principal Centres and Key Centres. This cannot be correct, and it is inconsistent with the National Planning Policy Guidance (NPPG), which confirms Local Centres (which have an important role in meeting needs) should be treated as Town Centres in retail policy. As such, Local Centres such as Bicton Heath which is earmarked for expansion should be recognised in draft Policy DP9 as a suitable location for retail and main town centre uses to help serve and provide services/facilities for existing and new residents within the SUE.
A0014	B046	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP10	Not Specified	Not Specified	Not Specified	Developers should be required to contribute to the upkeep of natural assets to maintain and enhance the tourism offer.
A0014	B047	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP10(f)	Not Specified	Not Specified	Not Specified	The natural environment has been recognised as the major draw for tourists to the County. Retaining and enhancing natural features is therefore key to the long-term success of the tourism industry. Stronger wording is recommended.
A0123	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP10	No	No	Yes	Welcome support for the growth and expansion of new and existing tourist related developments within Shropshire in draft Policy DP10. However, para 8 of draft Policy DP10 includes reference to applications for static caravans, chalets and log cabins being of appropriate scale and capacity, but no indication of what that means is provided. This lack of clarity will raise concern for operators and business owners as to whether applications to grow their enterprise could be inhibited.
A0348	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP10	Not Specified	Yes	Not Specified	Supports the aim of draft Policy DP10 and welcome recognition of the role that the historic environment plays in the tourist industry. In particular: Emphasis on promoting and preserving the distinctive historic, heritage brand and values of Shrewsbury, the Market Towns and rural areas is welcomed. Support for canal side development that enhances the role of canals as a multifunctional resource and heritage asset is welcomed. Requirement for proposals for new and extended touring caravan and camping sites to have strong regard to the cumulative impact of visitor accommodation on the historic assets of the area is also welcomed.
A0393	B022	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon;DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. DP10 fails to recognise the importance of shifting tourism car trips as much as possible to public transport and bikes. This is unacceptable. Part f) Although the natural environment as a major tourism draw is recognised, retaining and enhancing natural features is key to the long-term success of the tourism industry. Stronger policy wording required.
A0402	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP10	Yes	Yes	Yes	Welcome requirement in Para 5 of draft Policy DP10 that proposals for new marinas be required to demonstrate capability of the canal network to accommodate the development. To physically connect to the canal network, new marinas must obtain necessary connection agreement from the Canal & River Trust, consideration of which is based on the ability of the network to accommodate the proposal in terms of availability of water resources, navigational safety considerations and potential impacts on SSSIs. However, consider minor changes to the proposed explanation of draft Policy DP10, consistent with National Planning Policy Framework (NPPF), are required to aid clarity of how this requirement can be met and how applicants can demonstrate capability of the canal network to accommodate development. This will improve the draft Policies effectiveness.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0676	B001	Amend paras 1-5 of draft Policy DP9 (representation lays out proposed changes). In summary: Para 1: Include "and new and existing Local Centres" as locations to maintain and enhanced the vitality and viability. Para 2: At the end of the paragraph add "as well as within and adjacent to new and existing Local Centres where they are proposed to be expanded." Para 3: Include "Principal Centres" and "new and existing Local Centres including where they are proposed to be expanded" as a locations for main town centre uses and locations that need to be considered when undertaking sequential assessment. Para 4: Include "Principal Centres" and "new and existing Local Centre" as locations the Council consider in the context of protecting against adverse impacts from proposals in edge and out of centre locations and locations to be considered in the context of Impact Assessments. Also with regard to Para 4 criteria C include "if they not within a defined centre" at the end of the existing sentence. Para 5: Include reference to "Principal Centres" and "new and existing Local Centre" as areas that Meole Brace and Sundorne Retail Parks are not located.	If the Local Centres are under 300sqm then no RIA will be required. Locally the issue of protecting Town Centres is important and the current approach is consistent with how the Retail Hierarchy has been applied to Local Centres as part of SUEs. As indicated on the Policy Maps, areas defined as "Town Centre," are located in the Principal Centres only.	No	DP9. Managing and Supporting Town Centres
A0014	B046	Draft Policy DP10 should require developers to contribute to the upkeep of natural assets to maintain and enhance the tourism offer.	Noted, however the upkeep of natural assets to maintain and enhance the tourism offer is outlined under DP10 1c and 1f: "emphasis will be placed on]": Supporting development that promotes opportunities for accessing, understanding and engaging with Shropshire's landscape, cultural and historic assets including the Shropshire Hills AONB, rights-of-way network, canals, rivers, meres and mosses. Development must also meet the requirements of Policy DP14 [Green Infrastructure];" and "Supporting schemes aimed at diversifying the rural economy for tourism, cultural and leisure uses that are appropriate in terms of their location, scale and nature, which retain and enhance existing natural features where possible, and do not harm Shropshire's tranquil nature;"	No	DP10. Tourism, Culture and Leisure
A0014	B047	The wording of draft Policy DP10 should be strengthened to more effectively retain and enhance natural features.	Noted, however the upkeep of natural assets to maintain and enhance the tourism offer is outlined under DP10 1c and 1f: "emphasis will be placed on]": Supporting development that promotes opportunities for accessing, understanding and engaging with Shropshire's landscape, cultural and historic assets including the Shropshire Hills AONB, rights-of-way network, canals, rivers, meres and mosses. Development must also meet the requirements of Policy DP14 [Green Infrastructure];" and "Supporting schemes aimed at diversifying the rural economy for tourism, cultural and leisure uses that are appropriate in terms of their location, scale and nature, which retain and enhance existing natural features where possible, and do not harm Shropshire's tranquil nature;" There is also emphasis throughout the policy on protection with developments relating to the AONB.	No	DP10. Tourism, Culture and Leisure
A0123	B011	Provide an explanation of para 8 of draft Policy DP10.	An "appropriate scale and capacity" would be relevant on a case-by-case basis, as there may be sites of much larger caravans or log cabins etc and others with smaller ones, or sites with numerous caravans or log cabins and other sites with very few. Therefore such a matter would be dealt with at the planning application stage	No	DP10. Tourism, Culture and Leisure
A0348	B017	N/A	Noted.	No	DP10. Tourism, Culture and Leisure
A0393	B022	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period ;Developers should be required to contribute to the upkeep of natural assets to maintain and enhance the tourism offer; Stronger policy wording required in respect of part f) relating to natural environment; policy needs to recognise importance of shifting tourism car trips as much as possible to public transport and bikes.	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP10. Tourism, Culture and Leisure
A0402	B001	Advise applicants of new marinas to either undertake pre-application discussions on this matter with the Canal & River Trust, consistent with para 40 of the National Planning Policy Framework (NPPF), or provide evidence of the Canal & River Trust agreement to any necessary connection.	Noted, however the proposals suggested are already expressed in the NPPF and so it is unnecessary to repeat these in the Local Plan (i.e. para 40, NPPF: "Local planning authorities have a key role to play in encouraging other parties to take maximum advantage of the pre-application stage. They cannot require that a developer engages with them before submitting a planning application, but they should encourage take-up of any pre-application services they offer. They should also, where they think this would be beneficial, encourage any applicants who are not already required to do so by law to engage with the local community and, where relevant, with statutory and non-statutory consultees, before submitting their applications.").	No	DP10. Tourism, Culture and Leisure

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B007-22	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon;DPs1-10 inclusive should be re-written to align them with the urgent need to make significant progress towards achieving net zero carbon over the lifetime of the plan. DP10 fails to recognise the importance of shifting tourism car trips as much as possible to public transport and bikes. This is unacceptable. Part f) Although the natural environment as a major tourism draw is recognised, retaining and enhancing natural features is key to the long-term success of the tourism industry. Stronger policy wording required.
A0646	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP10	Yes	No	Yes	The Estate supports the objectives of Policy DP10 to deliver high quality, sustainable tourism and leisure offers including those which are sensitive to but also respond to the opportunities presented by the natural and built, including the historic environment of the district. The acknowledgment of the value of these sectors to the local economy is also welcomed. The Estate already contributes to the leisure opportunities in the district, being an important enabler of access to the countryside through the public access available to a network of rights of way and areas of woodland at Haughmond Hill, which provides a major amenity for Shrewsbury. There is potential to further enhance this, which will be explored as part of the Whole Estate Plan process. The Estate is therefore pleased to see support for new tourism, culture and leisure developments in the district, including appropriate development in rural areas. The Estate also supports the acknowledgment of the appeal to people of rural locations for holiday stays and supports the opportunities for the delivery of new visitor accommodation in rural areas. However the Estate considers the Council's policy for managing tourism, culture and leisure developments is partially unsound when considered against the tests set out within Paragraph 35 of the NPPF. The change is considered necessary to ensure that Policy DP10 is consistent with Paragraph 83 of the NPPF, which supports sustainable rural and leisure development which respect the character of the countryside with no proviso that this relates to an already existing enterprise.
A0014	B048	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	Not Specified	Not Specified	Welcome this policy but feel that it needs both greater ambition and strength.
A0014	B049	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11(1c)	Not Specified	Not Specified	Not Specified	Welcome para 1c, but would like to see a commitment to an increased level of on-site renewable energy sources.
A0014	B050	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11(2)	Not Specified	Not Specified	Not Specified	Consider large commercial/industrial development must provide a percentage of their predicted energy needs through on-site renewable and low carbon sources (consistent with proposed requirements for residential development). Believe only the BREEAM assessment should be used, as this is the leading assessment tool available.
A0014	B051	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11(4)	Not Specified	Not Specified	Not Specified	Disappointing that profit wins against reducing carbon emissions and addressing climate change in para 4.
A0073	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	Not Specified	Not Specified	1(b), 1(c) and 1(d)) are clearly well intentioned, they are inconsistent with national planning policy and guidance
A0078	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11(1b, 1c and 1d)	Not Specified	No	Not Specified	Para 1b, 1c and 1d of draft Policy DP11 appear to go beyond the requirements of current building regulations and are unsound. Previous guidance in 'The Code for Sustainable Homes' was withdrawn as that document required dwellings to perform thermally in excess of Building Regulations. Subsequent government guidance confirmed that compliance with the Building Regulations should be considered as appropriate.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B007-22	Explicitly identify within the policy how it will assist in achieving net zero carbon; re-write policy to align with the urgent need to make significant progress towards achieving net zero carbon over the plan period ;Developers should be required to contribute to the upkeep of natural assets to maintain and enhance the tourism offer; Stronger policy wording required in respect of part f) relating to natural environment; policy needs to recognise importance of shifting tourism car trips as much as possible to public transport and bikes.	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP10. Tourism, Culture and Leisure
A0646	B001	Amend as follows (adding "and/or"): 1g) Development of high-quality visitor accommodation in accessible locations served by a range of services and facilities, which enhances the reputation of Shropshire as a tourist destination to stay. In rural areas, proposals must be of an appropriate scale and character for their surroundings, be close to or within settlements, or close to an established and/or viable tourism enterprise where accommodation is required, whilst meeting the requirements of DP24 where appropriate. Where possible, existing buildings should be re-used (development must also accord with Policy SP11).  Remove point 9 as it is too restrictive and may not allow for innovative accommodation offers to come forward.	Noted. Shropshire Council considers that the existing wording under 1g) is appropriate as the tourism enterprise should be established AND viable rather than just one of those two. To add "and/or" here may result in unviable tourism which will ultimately lead to a backdoor entrance for inappropriate residential dwellings in the countryside.  Para 9 will remain as it protects the countryside from inevitable holiday let units which ultimately seek to become residential dwellings	No	DP10. Tourism, Culture and Leisure
A0014	B048	The wording of draft Policy DP11 should be strengthened.	The Council considers that this policy introduces effective and appropriate policy requirements for new development to contribute to reducing impact on climate change, whilst also ensuring compliance with national policy and legislation and ensuring the continued viability of development.	No	DP11. Minimising Carbon Emissions
A0014	B049	Increase the requirement for on-site renewable energy generation within para 1c of draft Policy DP11.	Subsection 1 (a) of the 2008 Planning and Energy Act states that Local Authorities may include policies imposing reasonable requirements for 'a proportion of energy used in development in their area to be energy from renewable sources in the locality of the development' provided these are consistent with national policy. National policy is the 2015 Written Ministerial Statement which allows Local Planning Authorities to set Code for Sustainable Homes level 4 energy standards. The policy reflects this standard. No change proposed.	No	DP11. Minimising Carbon Emissions
A0014	B050	1. Require large commercial/industrial development. 2. In para 2 of draft Policy DP11, only allow use of BREEAM assessment to measure the energy performance of non-residential development.	The Council considers that this policy introduces effective and appropriate policy requirements for new development to contribute to reducing impact on climate change, whilst also ensuring compliance with national policy and legislation and ensuring the continued viability of development.	No	DP11. Minimising Carbon Emissions
A0014	B051	1. Remove reference to the requirements of draft Policy DP11. Minimising Carbon Emissions not applying where it would make development unviable.	The Council considers that this policy introduces effective and appropriate policy requirements for new development to contribute to reducing impact on climate change, whilst also ensuring compliance with national policy and legislation and ensuring the continued viability of development.	No	DP11. Minimising Carbon Emissions
A0073	B003	These elements of the policy should therefore be deleted	The Council considers that this policy introduces effective and appropriate policy requirements for new development to contribute to reducing impact on climate change, whilst also ensuring compliance with national policy and legislation	No	DP11. Minimising Carbon Emissions
A0078	B006	Policy should be amended to require all development to comply with the requirements of the Building Regulations prevailing at the time.	Although the government announced its intention to amend Subsection 1 (c) of the 2008 Planning and Energy Act in 2015 - which states that Local Planning Authorities may include policies imposing reasonable requirements for 'development in their area to comply with energy efficiency standards that exceed the energy requirements of the building regulations' - these amendments have not yet been enacted. The intention of the amendment was to introduce higher energy performance requirements through building regulations, rather than the planning system. The performance increase was expected to be a 19% improvement. This improvement is also referenced in national policy through the 2015 Written Ministerial Statement - being equivalent to the Code for Sustainable Homes level 4 energy criteria which the Statement permits. However, the government's 2015 Productivity Plan subsequently stated that 'the government does not intend to proceed with .....the proposed increase in on-site energy efficiency standards, but will keep energy efficiency standards under review recognising that existing measures to increase energy efficiency of new buildings should be allowed time to become established.' Recent government consultations on the Future Homes Standard and Future Buildings Standard indicate that such a review is ongoing with the outcome forming part of changes to Part L of the Building Regulations. However, these changes have not yet been made. Thus the Council believes that the powers afforded to LPAs through the 2008 Planning and Energy Act to set energy efficiency standards in new homes still exist and that this policy's requirements are appropriate. Provision is also made in the policy for higher Building Regulations standards to apply if/when these are implemented.	No	DP11. Minimising Carbon Emissions

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0349	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	Not Specified	Not Specified	Natural England also strongly supports DP11 Minimising Carbon Emissions.
A0357	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Yes	No	Not Specified	<p>Generally support proposed measures to minimise carbon emissions in draft Policy DP11, but note its explanation makes little reference to its impact on viability and deliverability. To pass the 'effective' test, impact on viability should be explicitly acknowledged in the explanation, as should the significant ask placed on developers and the fact that some development may become difficult to deliver without reductions to other obligations such as affordable housing.</p> <p>Consider that draft Policy DP11 fails the 'justified' and 'effective' tests of soundness as the Viability Study undertaken to inform the draft Shropshire Local Plan identifies that draft Policy DP11 will increase development costs significantly and acknowledges a challenging viability context with many scales of development in different parts of Shropshire unviable (even with the very low benchmark land value applied, consider landowners expectations are at least £1m/Ha). Section 4 of draft Policy DP11 acknowledges that there may be viability problems for some sites.</p> <p>It may be necessary to identify 125% of the land needed in order to deliver 100% of the housing required, given the high percentages of sites that the Viability Study concludes are unviable, but this is not done.</p> <p>Section 1d of draft Policy DP11 seeks district heating systems and zero net-carbon on sites of 50 or more dwellings. Consider district heating systems are not deliverable or feasible at the threshold specified (district heating systems are commonly for much larger scale development) and no evidence is provided to justify it. Connection costs are also higher for lower density housing. Therefore this is not justified or effective.</p>
A0385	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	No	Not Specified	<p>Whilst the principle of addressing climate change via design of new dwellings is supported, consider in order for the policy to be sound it should be amended to align with the national timetable for enhanced building performance (Future Homes Standards). This will also ensure consistency with the national approach and is more effective in terms of viability.</p> <p>Support provision of flexibility in the case of viability issues resulting in the requirement being unachievable and higher standards being 'encouraged', but still have concerns about viability implications/deliverability of proposed policy requirements, given the Viability Study undertaken to inform the draft Shropshire Local Plan notes the challenging picture of viability across Shropshire and identifies the additional costs associated with these requirements.</p> <p>Consider the 10% on-site renewable energy/low-carbon energy generation requirement contradicts the energy hierarchy which prioritises energy efficiency in the first instance and will increase costs.</p> <p>It is not clear from the supporting text what evidence has informed all of these requirements e.g. local evidence on the availability, feasibility and viability of district heating and cooling systems. There are locational issues with some requirements which may mean they are not suitable in all locations (e.g. level of heat demand).</p>
A0386	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	No	Not Specified	<p>Whilst the principle of addressing climate change via design of new dwellings is supported, consider in order for the policy to be sound it should be amended to align with the national timetable for enhanced building performance (Future Homes Standards). This will also ensure consistency with the national approach and is more effective in terms of viability.</p> <p>Support provision of flexibility in relation to viability issues and higher standards being 'encouraged', but still have concerns about deliverability implications of proposed policy requirements, given the Viability Study undertaken to inform the draft Shropshire Local Plan notes the challenging picture of viability across Shropshire and identifies the additional costs associated with these requirements.</p> <p>Consider the 10% on-site renewable energy/low-carbon energy generation requirement contradicts the energy hierarchy which prioritises energy efficiency in the first instance.</p> <p>It is not clear from the supporting text what evidence has informed all of these requirements e.g. local evidence on the availability, feasibility and viability of district heating and cooling systems. There are locational issues with some requirements which may mean they are not suitable in all locations (e.g. level of heat demand) and consider district heating is only potentially viable on low-rise schemes of 800 or more dwellings and physical/ownership/take-up barriers exist that should be recognised in the supporting text. As such further flexibility should be provided stating such technologies will only be encouraged where they are clearly viable, based on local evidence, in order to make the policy effective, justifiable and in line with national policy.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0349	B008	n/a	Response noted.	No	DP11. Minimising Carbon Emissions
A0357	B007	Delete para 1d of draft Policy DP11. Include an additional paragraph in the explanation to draft Policy DP11 stating "Minimising carbon emissions will add significantly to the cost of construction and on some sites this may require a reduction in affordable housing and/or other contributions".	A Whole Plan Viability Assessment has been undertaken to inform policy requirements with the intention of ensuring the viability and deliverability of the draft Shropshire Local Plan. Draft Policy DP11 has been subject to due consideration within this assessment. It is considered appropriate to encourage development of 50 or more dwellings to maximise the use of on-site district heating and cooling, although it is recognised that this may not always be feasible. No change proposed	No	DP11. Minimising Carbon Emissions
A0385	B007	Remove proposed percentage requirement in relation to energy performance and renewable/low carbon energy supply and align the draft policy with emerging national Building Regulation as per the Future Homes Standard.	Subsection 1 (a) of the 2008 Planning and Energy Act states that Local Planning Authorities may include policies imposing reasonable requirements for 'a proportion of energy used in development in their area to be energy from renewable sources in the locality of the development', provided these are consistent with national policy. National policy is the 2015 Written Ministerial Statement which allows Local Planning Authorities to set Code for Sustainable Homes level 4 energy standards. The policy reflects this standard. No change proposed.	No	DP11. Minimising Carbon Emissions
A0386	B006	Remove proposed percentage requirement in relation to energy performance and renewable/low carbon energy supply and align the draft policy with emerging national Building Regulation as per the Future Homes Standard.	Subsection 1 (a) of the 2008 Planning and Energy Act states that Local Planning Authorities may include policies imposing reasonable requirements for 'a proportion of energy used in development in their area to be energy from renewable sources in the locality of the development', provided these are consistent with national policy. National policy is the 2015 Written Ministerial Statement which allows Local Planning Authorities to set Code for Sustainable Homes level 4 energy standards. The policy reflects this standard. No change proposed. Although the government announced its intention to amend Subsection 1 (c) of the 2008 Planning and Energy Act in 2015 - which states that Local Planning Authorities may include policies imposing reasonable requirements for 'development in their area to comply with energy efficiency standards that exceed the energy requirements of the building regulations' - these amendments have not yet been enacted. The intention of the amendment was to introduce higher energy performance requirements through building regulations, rather than the planning system. The performance increase was expected to be a 19% improvement. This improvement is also referenced in national policy through the 2015 Written Ministerial Statement - being equivalent to the Code for Sustainable Homes level 4 energy criteria which the Statement permits. However, the government's 2015 Productivity Plan subsequently stated that 'the government does not intend to proceed with .....the proposed increase in on-site energy efficiency standards, but will keep energy efficiency standards under review recognising that existing measures to increase energy efficiency of new buildings should be allowed time to become established.' Recent government consultations on the Future Homes Standard and Future Buildings Standard indicate that such a review is ongoing with the outcome forming part of changes to Part L of the Building Regulations. However, these changes have not yet been made. Thus the Council believes that the powers afforded to LPAs through the 2008 Planning and Energy Act to set energy efficiency standards in new homes still exist and that this policy's requirements are appropriate. Provision is also made in the policy for higher Building Regulations standards to apply if/when these are implemented. No change proposed.	No	DP11. Minimising Carbon Emissions

A0387	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	No	Not Specified	<p>Whilst the principle of addressing climate change via design of new dwellings is supported, consider the current proposed policy approved is unsound as it is not justified, effective or consistent with national planning policy.</p> <p>The draft policy should be amended to align with the national timetable for enhanced building performance (Future Homes Standards). This will also ensure consistency with the national approach and is more effective in terms of viability.</p> <p>Support provision of flexibility in the case of viability issues resulting in the requirement being unachievable and higher standards being 'encouraged', but still have concerns about viability implications/deliverability of proposed policy requirements, given the Viability Study undertaken to inform the draft Shropshire Local Plan notes the challenging picture of viability across Shropshire and identifies the additional costs associated with these requirements.</p> <p>Consider the 10% on-site renewable energy/low-carbon energy generation requirement contradicts the energy hierarchy which prioritises energy efficiency in the first instance and will increase costs.</p> <p>It is not clear from the supporting text what evidence has informed all of these requirements e.g. local evidence on the availability, feasibility and viability of district heating and cooling systems. There are locational issues with some requirements which may mean they are not suitable in all locations (e.g. level of heat demand).</p>
A0393	B023	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	<p>All DPs do not &amp; should contain an explicit link to the ways they will assist in achieving net zero carbon.</p> <p>Policy weak &amp; limited to referencing minimising emissions – not road to net zero. Policy does not form basis for a coherent plan for supporting the county's contribution towards the national target of net zero by 2050. Unacceptable that evidence in the Local Plan that transport carbon is responsible for 37% of Shropshire's total carbon, is not used to support policies that explicitly and tangibly reduce car use. Transport carbon reduction is not mentioned in 1a-1d or sections 2, 3 and 4</p> <p>DP11 (1 C ) We welcome this but we would like to see a commitment to an increased level of on-site renewable energy sources</p> <p>Large commercial/industrial developments must have the same commitment to providing a percentage of their predicted energy needs through on-site renewable and low carbon sources. (cross references comment on 3.134. but no 3.134 in the submission)</p> <p>DP11(4) Disappointing that when reducing carbon emissions and addressing climate change is balanced against profit, profit wins. Given climate emergency this must be the priority.</p>
A0410	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	No	Not Specified	<p>General aims of draft Policy DP11 are supported, but it does not go far enough. If Shropshire is to achieve zero carbon by 2030 (its stated aim), or even by 2050 (national policy), it must begin now to require new building to be zero carbon.</p> <p>Government's response to the Future Homes Standard consultation has been published and confirms their resolve to tighten Building Regulations. This includes an interim standard of a 31% reduction in carbon emissions above Building Regulations from 2021. The interim standards will act as the 'regulatory floor' and would encourage the Council to tighten draft Policy DP11 to require an overall 35% on-site carbon reduction (via fabric energy efficiency standards, on-site renewables, zero/ low carbon heat), with remaining emissions being offset by contributions into a carbon offset fund, to pay for off-site carbon reduction or sequestration.</p> <p>The wording "strongly encouraging" could be tightened up considerably, along the lines of the London Plan, which states that "major development should be zero carbon".</p> <p>Para 4, by allowing reference to "open book" accounting and viability, may in practice offer a get-out clause to any and all development. Ways must be found to make zero carbon building viable.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0387	B008	Remove proposed percentage requirement in relation to energy performance and renewable/low carbon energy supply and align the draft policy with emerging national Building Regulation as per the Future Homes Standard.	<p>Subsection 1 (a) of the 2008 Planning and Energy Act states that Local Planning Authorities may include policies imposing reasonable requirements for 'a proportion of energy used in development in their area to be energy from renewable sources in the locality of the development', provided these are consistent with national policy. National policy is the 2015 Written Ministerial Statement which allows Local Planning Authorities to set Code for Sustainable Homes level 4 energy standards. The policy reflects this standard. No change proposed.</p> <p>Although the government announced its intention to amend Subsection 1 (c) of the 2008 Planning and Energy Act in 2015 - which states that Local Planning Authorities may include policies imposing reasonable requirements for 'development in their area to comply with energy efficiency standards that exceed the energy requirements of the building regulations' - these amendments have not yet been enacted. The intention of the amendment was to introduce higher energy performance requirements through building regulations, rather than the planning system. The performance increase was expected to be a 19% improvement. This improvement is also referenced in national policy through the 2015 Written Ministerial Statement - being equivalent to the Code for Sustainable Homes level 4 energy criteria which the Statement permits. However, the government's 2015 Productivity Plan subsequently stated that 'the government does not intend to proceed with .....the proposed increase in on-site energy efficiency standards, but will keep energy efficiency standards under review recognising that existing measures to increase energy efficiency of new buildings should be allowed time to become established.' Recent government consultations on the Future Homes Standard and Future Buildings Standard indicate that such a review is ongoing with the outcome forming part of changes to Part L of the Building Regulations. However, these changes have not yet been made. Thus the Council believes that the powers afforded to LPAs through the 2008 Planning and Energy Act to set energy efficiency standards in new homes still exist and that this policy's requirements are appropriate. Provision is also made in the policy for higher Building Regulations standards to apply if/when these are implemented. No change proposed.</p>	No	DP11. Minimising Carbon Emissions
A0393	B023	<p>See issues summary. Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed.</p> <p>Specific amendments identified :</p> <p>Explicitly identify within the policy how it will assist in achieving net zero carbon; Modify policy to reflect comments; Include commitment to an increased level of on-site renewable energy sources.</p> <p>Reference information that transport carbon is responsible for 37% of Shropshire's total carbon;</p> <p>Reference transport carbon reduction in 1a-1d &amp; sections 2, 3 and 4</p> <p>DP11 (2) Include requirement for large commercial/industrial developments to have the same commitment to providing a percentage of their predicted energy needs through on-site renewable and low carbon sources;</p> <p>Policy to prioritise addressing Climate Change over profit</p>	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP11. Minimising Carbon Emissions
A0410	B010	<p>Para 1b of draft Policy DP11 should be amended to refer to all proposals (not just for 10 or more dwellings) and to refer throughout to the latest Building regulations.</p> <p>The opening words "strongly encouraging" of Para 1d of draft Policy DP11 should be replaced with "ensuring".</p> <p>"of 1,000m2 or more floorspace or with a gross site area of 1ha or more" should be deleted from para 2 of draft Policy DP11.</p> <p>Para 4 of draft Policy DP11 should be deleted.</p>	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP11. Minimising Carbon Emissions

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0450	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	No	Not Specified	Parts 1(b), 1(c) and 1(d) of Policy DP11 are inconsistent with national planning policy and guidance, which makes clear that the only additional technical requirements exceeding the minimum standards required by Building Regulations that can be sought are the optional technical standards as detailed in the NPPG. These elements of the policy should therefore be deleted.
A0524	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	No	Not Specified	Para 4 of draft Policy DP11 and para 4.112 of the explanation to draft Policy DP11 are unsound. Concept that a development cannot be rendered energy efficient because it would make it economically unviable has been used many times in the past to avoid environmental responsibilities whilst minimising costs and maximising profit. People who occupy affordable housing are those who would benefit most from energy efficient homes with low energy costs. It is discriminatory to permit housing to be provided for the less well off which do not have the energy efficient features of houses occupied by the better off.
A0582	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	No	Not Specified	Part 1b. of DP11 states that all proposals for 10 or more dwellings will need to achieve a minimum of 19% improvement in the energy performance requirement in Part L of the 2013 Building Regulations. The costs for such measures are considered in the Local Plan Delivery and Viability Study and are taken from the 'Energy Cost of carbon Reduction in New Buildings' report (Centre for Sustainable December 2018). These costs have not been informed by local stakeholders and do not necessarily reflect local circumstances. Part 1c of the policy goes on to require all proposals for the formation of one or more dwellings provide a minimum of 10% of the predicted energy needs of the development from on-site renewable and low carbon energy sources. Again, the costs of this requirement and the ability of specific sites to deliver on-site energy needs to be considered in terms of local circumstances. Policy 1d. strongly encourages all proposals for one or more dwellings and in particular those of 50 or more dwellings to: i. Achieve zero net-carbon emissions; ii. Maximise the use of on-site district heating and cooling systems, especially where these utilise renewable energy and iii. Maximise opportunities to connect to wider heating and cooling networks both for energy supply and export, especially where these utilise renewable energy These aims are considered to be extremely ambitious. It is highlighted that the Government's latest target is to bringing all greenhouse gas emissions to 'net zero' by 2050. The policy does not take into account that the national grid now generates more energy from zero carbon sources than from fossil fuels, a figure that is increasing due to the ability to generate electricity through large scale renewable energy facilities across the country. As such, in terms of increasing the use of renewable energy, it may be more efficient and cost effective for new development to plug into the national grid than for piecemeal energy generation measures to be installed on individual sites.
A0598	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	No	Not Specified	Note reference in Criterion 1b of draft Policy DP11 to requirements for new residential comprising 10 or more dwellings to achieve a minimum of 19% improvement in the energy performance requirement in Part L of the 2013 Building Regulations. However, it is not the purpose of development plans to repeat or restate standards that are applied through separate legislation. Similarly, whilst the Council considers that setting local standards or requirements for building sustainability is justified as a matter of principle, the Council presents no evidence to support the inclusion of standards already sought through Building Regulation, as is the case in criterion 1b. Consequently, it is not appropriate or necessary to include specific reference to Building Regulations in a development plan policy and express this as a criteria to be applied to new development if such standards are sought in any event. Criterion 1b is not soundly-based as it goes beyond the remit of planning policy, and should therefore be deleted.
A0600	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Yes	Yes	Yes	Support reference to equivalent standards to BREEAM in part 2 of draft Policy DP11 - changed from an earlier draft. This will enable Shropshire Council to consider proposals assessed with the Defence Related Environmental Assessment Method (DREAM) which is an environmental assessment tool developed by the DIO for new build and refurbishment projects on the defence estate.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0450	B004	The parts referred to should be deleted	<p>Subsection 1 (a) of the 2008 Planning and Energy Act states that Local Planning Authorities may include policies imposing reasonable requirements for 'a proportion of energy used in development in their area to be energy from renewable sources in the locality of the development', provided these are consistent with national policy. National policy is the 2015 Written Ministerial Statement which allows Local Planning Authorities to set Code for Sustainable Homes level 4 energy standards. The policy reflects this standard. No change proposed.</p> <p>Although the government announced its intention to amend Subsection 1 (c) of the 2008 Planning and Energy Act in 2015 - which states that Local Planning Authorities may include policies imposing reasonable requirements for 'development in their area to comply with energy efficiency standards that exceed the energy requirements of the building regulations' - these amendments have not yet been enacted. The intention of the amendment was to introduce higher energy performance requirements through building regulations, rather than the planning system. The performance increase was expected to be a 19% improvement. This improvement is also referenced in national policy through the 2015 Written Ministerial Statement - being equivalent to the Code for Sustainable Homes level 4 energy criteria which the Statement permits. However, the government's 2015 Productivity Plan subsequently stated that 'the government does not intend to proceed with .....the proposed increase in on-site energy efficiency standards, but will keep energy efficiency standards under review recognising that existing measures to increase energy efficiency of new buildings should be allowed time to become established.' Recent government consultations on the Future Homes Standard and Future Buildings Standard indicate that such a review is ongoing with the outcome forming part of changes to Part L of the Building Regulations. However, these changes have not yet been made. Thus the Council believes that the powers afforded to LPAs through the 2008 Planning and Energy Act to set energy efficiency standards in new homes still exist and that this policy's requirements are appropriate. Provision is also made in the policy for higher Building Regulations standards to apply if/when these are implemented. No change proposed.</p>	No	DP11. Minimising Carbon Emissions
A0524	B001	Economic viability clauses in para 4 of draft Policy DP11 and para 4.112 of the explanation to draft Policy DP11 should be removed. All housing should in future be energy efficient.	The Council considers that this policy introduces effective and appropriate policy requirements for new development to contribute to reducing impact on climate change, whilst also ensuring compliance with national policy and legislation and ensuring the continued viability of development.	No	DP11. Minimising Carbon Emissions
A0582	B005	Requested Change: The potential costs involved in the delivery of the measures set out in Policy DP11, as included in the Local Plan Delivery and Viability Study should be informed by local stakeholders and should reflect local circumstances. The benefits of using renewable energy provided by the wider national grid, as opposed to piecemeal onsite generation should be fully understood. Flexibility is required in the policy to address site specific issues.	The Council considers that this policy introduces effective and appropriate policy requirements for new development to contribute to reducing impact on climate change, whilst also ensuring compliance with national policy and legislation and ensuring the continued viability of development.	No	DP11. Minimising Carbon Emissions
A0598	B011	Delete para 1b of draft Policy DP11.	<p>Although the government announced its intention to amend Subsection 1 (c) of the 2008 Planning and Energy Act in 2015 - which states that Local Planning Authorities may include policies imposing reasonable requirements for 'development in their area to comply with energy efficiency standards that exceed the energy requirements of the building regulations' - these amendments have not yet been enacted. The intention of the amendment was to introduce higher energy performance requirements through building regulations, rather than the planning system. The performance increase was expected to be a 19% improvement. This improvement is also referenced in national policy through the 2015 Written Ministerial Statement - being equivalent to the Code for Sustainable Homes level 4 energy criteria which the Statement permits. However, the government's 2015 Productivity Plan subsequently stated that 'the government does not intend to proceed with .....the proposed increase in on-site energy efficiency standards, but will keep energy efficiency standards under review recognising that existing measures to increase energy efficiency of new buildings should be allowed time to become established.' Recent government consultations on the Future Homes Standard and Future Buildings Standard indicate that such a review is ongoing with the outcome forming part of changes to Part L of the Building Regulations. However, these changes have not yet been made. Thus the Council believes that the powers afforded to LPAs through the 2008 Planning and Energy Act to set energy efficiency standards in new homes still exist and that this policy's requirements are appropriate. Provision is also made in the policy for higher Building Regulations standards to apply if/when these are implemented. No change proposed.</p>	No	DP11. Minimising Carbon Emissions
A0600	B001	N/A	Noted.	No	DP11. Minimising Carbon Emissions

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0608	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	No	Not Specified	<p>With regard to the requirements of draft Policy DP11:</p> <p>-As stated in para 34 of the National Planning Policy Framework (NPPF), requirements for fabric energy efficiency, minimum energy performance requirements and low carbon energy systems should not undermine the deliverability of the Plan.</p> <p>-There is no justification for why 10% of energy needs is required to come from onsite renewable and low carbon energy sources. As long as power comes from renewable and low carbon sources, it should not matter whether this is sourced on or off-site. Para 151 of the NPPF promotes use and supply of renewable and low carbon energy and heat, but does not specify this must be met onsite. Therefore, this policy is not justifiable as the delivery mechanism should be flexible to enable developers to provide their own solutions rather than providing onerous requirements that are too prescriptive and may stifle development from being delivered.</p> <p>-District wide heating/cooling systems, may be unsuitable as they may be unreliable, expensive, may also attract high management and repair costs, the prevalent technology is gas combined heat and power plants and some customers are less satisfied than standard gas/electricity customers. Given there are other options such as solar and alternative off-site generation of carbon neutral energy, which may be more reliable maintenance free, there is no justification for an emphasis on on-site district heating.</p> <p>-Building regulations (recently updated with regard to energy efficiency standards) already considers the energy efficiency of buildings and this policy, as worded, adds no material value and will potentially stymie development that accords with government/building regulation standards. Any requirement that goes beyond building regulations is unsound or must be full justified - informed by detailed evidence, as to viability, when evidenced with the objectives of the Plan when read as a whole.</p> <p>-The policy should be flexible, not prescriptive, so that it can keep pace with technology which is dynamic, whilst the local plan process is not. It should reflect the flexible nature of low carbon energy sources and should not direct developments to a specific type, whether on or offsite, which may in fact be less 'green' than alternatives available.</p>
A0609	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	No	Not Specified	<p>Support draft Policy DP11 overall and the need to minimise carbon emissions.</p> <p>However, whilst Part 1d contains some flexibility within the text, stating 'strongly encouraging', would highlight that it may not be possible on all sites of 50 dwellings plus to achieve zero net-carbon. The draft Shropshire Local Plan runs until 2038, 12 years before 2050, the date Government is seeking to achieve zero-net carbon emissions. Over time, technology will advance meaning achieving net zero-carbon emissions will be more achievable. To make this policy justified and effective, recommend a subtle change to the wording to 'encourage'. This will ensure zero net-carbon emissions are achieved where possible, but will also not render some developments unviable or not possible due to being unable to achieve zero net-gain.</p> <p>Throughout the proposed Plan period, we agree there should be a marked shift to providing zero net-carbon developments, but enforcements now, when technology is still catching up, could halt development.</p> <p>In Part 2 of draft Policy DP11 consider the BREEAM Excellent or equivalent rating to be too high a bar for developments to achieve. The Local Plan Review Viability Assessment noted the 5.5% increased costs associated with the delivery of a BREEAM Excellent standard. However it is unclear whether these were actually built into the assessment, which in any case highlighted concerns regarding the viability of employment developments. As such, the requirement to achieved BREEAM Excellent could cause viability concerns for some forms of non-residential development. As such, to ensure draft Policy DP11 is justified and effective, request wording is amended to require non-residential developments to be delivered to a minimum BREEAM 'very good' standard. This will allow some developments to be delivered to a BREEAM 'excellent' standard if it is viable however there is the flexibility to deliver the development to a 'very good' standard.</p>
A0623	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	Not Specified	Not Specified	<p>The 2019 Spring Statement included a commitment that by 2025 the Government will introduce a Future Homes Standard for new build homes to be future-proofed with low carbon heating and 'world-leading levels of energy efficiency'. The Consultation document (October 2019) highlighted that changes to Part L, Part 6 and Part F of the Building Regulations are anticipated to come into force by mid/late 2020.</p>
A0628	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	No	No	Yes	<p>Support that draft Policy DP11 does not exceed 2013 building regulations, but it should be noted these regulations are not permanent. For example, consultation occurred on The 'Future Homes Standard' - Part L of the Building Regulations in Feb 2020 (targeted for publication by 2025 so unlikely to have any bearing on draft Policies in the draft Shropshire Local Plan).</p> <p>The 'Future Homes Standard' consultation noted energy performance requirements increase the costs for home builders and proposes to remove the ability of local authorities to set higher energy efficiency standards than those in the Building Regulations.</p> <p>Important that Shropshire ensure that local policy aligns with national guidance.</p> <p>Draft Policy DP11 requires 10% of renewable energy to be generated from on-site renewable and low carbon energy technologies. The cost of this can significantly impact on viability making it unworkable for some developments. The draft Shropshire Local Plan does state these measures can be avoided by demonstrating via "open book accounting" that they would make development unviable. Support this clause but submit that it would be helpful if further guidance was given with regard to the relationship between affordable housing, climate change measures and viability; namely which matter should be prioritised within viability assessments.</p>

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Yes	No	Yes	Draft Policy DP11 is not sound because it will not achieve stated carbon emission reduction objectives. Amendments are proposed to enable the Policies of the council overall to achieve stated objectives in terms of the carbon performance of developments. Evidence will be presented that demonstrates the Council is able to make its policies sound by the proposed amendments.
A0629	B007-23	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon. Policy weak & limited to referencing minimising emissions – not road to net zero. Policy does not form basis for a coherent plan for supporting the county’s contribution towards the national target of net zero by 2050. Unacceptable that evidence in the Local Plan that transport carbon is responsible for 37% of Shropshire’s total carbon, is not used to support policies that explicitly and tangibly reduce car use. Transport carbon reduction is not mentioned in 1a-1d or sections 2, 3 and 4 DP11 (1 C ) We welcome this but we would like to see a commitment to an increased level of on-site renewable energy sources Large commercial/industrial developments must have the same commitment to providing a percentage of their predicted energy needs through on-site renewable and low carbon sources. (cross references comment on 3.134. but no 3.134 in the submission) DP11(4) Disappointing that when reducing carbon emissions and addressing climate change is balanced against profit, profit wins. Given climate emergency this must be the priority.
A0629	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5 and Para 3.40	Yes	No	Yes	Para 3.40 of the explanation to draft Policy SP5 should reference the need to comply with para d of draft Policy DP11. There is an inconsistency between para 3a of draft Policy SP5 (designed to maximise fabric energy efficiency), para 1b of draft Policy DP11 (19% improvement on building regs) and para 1d of draft Policy DP11 (strongly encouraging zero carbon). Shropshire Council has declared a climate change emergency a clear justification for the draft Shropshire Local Plan to ensure the zero carbon standard is met and use of energy networks maximised.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B002	<p>Series of additional requirements proposed for addition to draft Policy DP11 (documented within representation). These include a section on energy use in new development, stipulating development will be expected to minimise demand for heating, cooling, hot water, lighting and power through energy efficiency measures; then meet its remaining heat/cooling demand sustainably; then maximise on-site renewable energy generation; and then meet any outstanding reduction in residual emissions through carbon offsetting.</p> <p>Development will be expected to achieve a minimum 10% reduction in regulated CO2 emissions through energy efficiency measures; and a minimum 35% reduction in regulated CO2 emissions through a combination of energy efficiency measures and on-site renewable energy generation. After applying on site measures, development is expected to achieve a 100% reduction in remaining regulated and unregulated emissions through use of carbon offsetting.</p> <p>The policy should also require new development to demonstrate through an Energy Strategy set out as part of its Sustainability Statement how these requirements will be met. Where existing buildings are being converted into new uses and it is not feasible for the full CO2 emission reduction to be met, the Energy Strategy should show that energy demand has been reduced to the lowest practical level using energy efficiency measures, heating/cooling systems have been selected sustainably and that on-site renewable energy will be installed where feasible, aiming for a 20% reduction in regulated CO2 emissions on site and exceeding this whenever possible.</p> <p>The policy should also include a section on carbon offsetting stating once on-site CO2 reduction requirements for energy efficiency and renewable energy measures have been met, the remaining emission reductions will be met by carbon offsetting measures such as providing the residual emission reduction through a financial contribution to renewable energy, low-carbon energy and energy efficiency schemes elsewhere in the Shropshire area; or agreeing acceptable directly linked or near-site provision. The financial contribution required will be equivalent to the cost of mitigating the residual CO2 emissions off-site, at a rate of £95 per tonne of CO2 that would be emitted over a period of 30 years.</p> <p>The policy should also include a section on PassivHaus buildings, stating where buildings are proposed to be certified PassivHaus standard, the % CO2 reduction targets above relating to energy efficiency measures, on-site renewables and Allowable Solutions will not need to be met. In these cases, a full Energy Strategy will not be required and it will be sufficient to submit the technical information required to demonstrate that the PassivHaus standard can be achieved and for the Sustainability Statement to demonstrate that the residual heat/cooling demand for the development has been met sustainably as set out below.</p> <p>The policy should also include a section on heating and cooling systems, stating new development will be expected to demonstrate through its Energy Strategy that the most sustainable heating and cooling systems have been selected. This should include consideration of the proposed system as a whole, including the impact of its component materials on greenhouse gas emissions. New development will be expected to demonstrate that heating systems have been selected in accordance with the following approach: Where possible, connection to an existing classified heat network or a new classified heat network from the point of occupation; Where it is likely that existing or proposed heat networks will grow, designing development with a communal heating system which could connect in the future; Elsewhere, employing sustainable alternatives to heat networks such as individual renewable heat or communal renewable/low carbon heat. New development will be expected to demonstrate that cooling systems have been designed in accordance with the following steps: minimise excessive solar gain through orientation, built form, massing, fixed, mobile and seasonal shading and green infrastructure; then maximise passive cooling through natural ventilation, diurnal cooling, placement of thermal mass and green and blue infrastructure; and then meet residual cooling load renewably, and consider opportunities for seasonal cooling/heating.</p>	<p>The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed</p>	No	DP11. Minimising Carbon Emissions
A0629	B007-23	<p>See issues summary. Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed.</p> <p>Specific amendments identified :</p> <p>Explicitly identify within the policy how it will assist in achieving net zero carbon; Modify policy to reflect comments; Include commitment to an increased level of on-site renewable energy sources.</p> <p>Reference information that transport carbon is responsible for 37% of Shropshire's total carbon;</p> <p>Reference transport carbon reduction in 1a-1d &amp; sections 2, 3 and 4</p> <p>DP11 (2) Include requirement for large commercial/industrial developments to have the same commitment to providing a percentage of their predicted energy needs through on-site renewable and low carbon sources;</p> <p>Policy to prioritise addressing Climate Change over profit</p>	<p>The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed</p>	No	DP11. Minimising Carbon Emissions
A0629	B018	<p>Revise para 1d of draft Policy DP11 to state: "Ensuring all proposals for one or more dwellings and in particular residential development of 50 or more dwellings to:</p> <p>i. Achieve zero net-carbon emissions;</p> <p>ii. Maximise the use of on-site district heating and cooling systems, especially where these utilise renewable energy and</p> <p>iii. Maximise opportunities to connect to wider heating and cooling networks both for energy supply and export, especially where these utilise renewable energy."</p> <p>This is supported by the Future Homes Standard - The wording, "strongly encouraging" could be tightened up considerably, along the lines of the London Plan: "major development should be zero carbon".</p>	<p>The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed</p>	No	DP11. Minimising Carbon Emissions

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Yes	No	Yes	The term “unviable” in para 4 of draft Policy DP11 is too poorly defined to prevent low quality development in an otherwise very well defined sound policy. All the well stated aspirations laid out within the policy are too easily ignored by the unscrupulous use of “value engineering” and “viability tests” that have undermined many similar aspirational policies in the past.
A0647	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Yes	No	Yes	There is no content in the Plan which considers how SP3 or DP11.1 will be implemented. Infrastructure costs of aspects such as Ground Source heating and Community Heat Networks will be less attractive to developers. DP11.4 gives developers the opportunity to opt-out of Low-Carbon developments.
A0658	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	No	No	Not Specified	We consider that the interim uplift proposed by the government in their recent proposals for the Buildings Regulations should be required by Policy DP11. The PPG states that there is no restriction on requiring an uplift in standards for non-residential property and in our view, it is not necessary nor appropriate to apply the viability test to non-residential development and therefore Paragraph 4 should not apply to the requirements of Paragraph 2. Our experience from the operation of the previous version of the SAMDev Local Plan was that where policies were optional based on words like encouraging and maximising, such uplifts in environmental performance standards rarely happened. We recognise that viability of the development is an issue, including affordable housing but the future viability of our planet has to be considered as a first priority and it should be recognised that mitigating climate change is a statutory requirement. In our experience, with hundreds of existing homes it is very difficult and sometimes practically impossible to raise energy efficiency standards of buildings constructed under the many previous energy efficiency codes. To carry on building developments that do not meet improved standards would be damaging to our climate and not in accordance with the overall statutory duty to mitigate climate change. For Policy DP11 two criteria are put forward, amongst others, that will not provide any future data as they rely on Feed in Tariffs which were abolished at the end of March 2019. It is clear that the monitoring arrangements for this Policy which has no targets for reductions in carbon dioxide emissions nor production of renewable energy need to be reviewed and improved. We submit that without the modifications we have put forward, Policy DP11 is unsound and not in compliance with statutory duty contained in Section 19 of the Planning and Compulsory Purchase Act 2004 as amended as it would not adequately mitigate climate change.
A0663	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	Not Specified	Not Specified	While we are pleased to see that Shropshire has a strong agenda in promoting renewable energy and its use in development in line with paragraph 51 of the NPPF, there are concerns regarding the costs for housing associations to implement such an increase in renewable energy generation across their sites. We appreciate that more efficient technologies have become available in recent years, nonetheless robust viability testing should be carried out to ensure that applicants continue to be able to deliver affordable housing schemes with such an increase.
A0676	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Yes	No	Yes	Draft Policy DP11 relates to minimising carbon emissions, stating that new non-residential development of 1,000m2 or more floorspace or with a gross site area of 1ha or more will achieve the BREEAM Excellent rating or equivalent standard within an alternative assessment endorsed by Shropshire Council. Support the need to minimise carbon emissions, however, such a blanket requirements will potentially impact on the viability of future proposals. Vital the planning system encourages business/investment and employment as a result of factors such as Covid 19 and economic recession. As such request the draft Policy is amended to state that the BREEAM Excellent rating will be achieved where this is feasible and/or viable or the draft Policy could use wording such as 'seek to achieve'. This would mean that in cases where it is not technically possible to meet this or it would impact on the viability of a scheme, the Council would be agreeable to a lower BREEAM rating.
A0682	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP11	Not Specified	Not Specified	Not Specified	Consider draft Policy DP11 is not required as the Council’s ambitions to minimise Carbon Emissions are set out in draft Policy SP3 and any new homes will have to be in compliance with the proposed changes to Building Regulations within the Future Homes Standard. This policy should therefore be deleted.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B019	Revise para 4 of draft Policy DP11 to include: "This demonstration shall at the minimum include a clear calculation of predicted carbon emissions, the cost of mitigation of those emissions through good design or through offsetting by on site renewable generation. Where the viability test is accepted then all sales literature or public promotion of the development should include the facts as to why the development fails to meet expected carbon standards."	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP11. Minimising Carbon Emissions
A0647	B002	Ideally, DP11.4 would be removed. If not, the changes should be: 1.Any developers submission must include all government grants which are available to offset capital costs of low-carbon projects 2.Developer submissions must show a 10-year cost of ownership model 3.Selling prices in the submission should be those of similar low carbon homes 4.The annual Carbon emissions of the two alternative developments must be presented.	The Council considers that this policy introduces effective and appropriate policy requirements for new development to contribute to reducing impact on climate change, whilst also ensuring compliance with national policy and legislation and ensuring the continued viability of development. Appendix 4 of the Local Plan shows how policies will be delivered. No change proposed.	No	DP11. Minimising Carbon Emissions
A0658	B001	Modify Paragraphs 1(a) and 1(b) to read: "1. New residential development will contribute to reducing the impact of climate change in accordance with Policy SP3 by: a. Being designed to achieve levels of energy efficiency higher than the 2013 Building Regulations including such measures as: building orientation; high levels of insulation of roofs, floors and walls; airtightness and using solar gain through window/door orientation whilst avoiding overheating and: b. Ensuring all proposals for dwellings achieve a minimum of 31% reduction in the generation of carbon emissions compared to the requirement in Part L of the 2013 Building Regulations and improve fabric efficiency as set out in the proposed interim uplift to Building Regulations, until such time as the Building Regulations are increased to a level which meets or exceeds this uplift and:" Modify Paragraph 4 to read: "4. The requirements expressed in paragraphs 1 (c) and 1(d) and paragraph 3 of this policy will apply unless it is demonstrated through open book accounting that they would make the development unviable, having regard to the policy requirements of the Local Plan, in particular the delivery of affordable housing."	Although the government announced its intention to amend Subsection 1 (c) of the 2008 Planning and Energy Act in 2015 - which states that Local Planning Authorities may include policies imposing reasonable requirements for 'development in their area to comply with energy efficiency standards that exceed the energy requirements of the building regulations' - these amendments have not yet been enacted. The intention of the amendment was to introduce higher energy performance requirements through building regulations, rather than the planning system. The performance increase was expected to be a 19% improvement. This improvement is also referenced in national policy through the 2015 Written Ministerial Statement - being equivalent to the Code for Sustainable Homes level 4 energy criteria which the Statement permits. However, the government's 2015 Productivity Plan subsequently stated that 'the government does not intend to proceed with .....the proposed increase in on-site energy efficiency standards, but will keep energy efficiency standards under review recognising that existing measures to increase energy efficiency of new buildings should be allowed time to become established.' Recent government consultations on the Future Homes Standard and Future Buildings Standard indicate that such a review is ongoing with the outcome forming part of changes to Part L of the Building Regulations. However, these changes have not yet been made. Thus the Council believes that the powers afforded to LPAs through the 2008 Planning and Energy Act to set energy efficiency standards in new homes still exist and that this policy's requirements are appropriate. Provision is also made in the policy for higher Building Regulations standards to apply if/when these are implemented. No change proposed.	No	DP11. Minimising Carbon Emissions
A0663	B009	Such a policy should ensure that while schemes are future proofed this should not prejudice the delivery of affordable housing which remains one of the most critical priorities for the Council, understanding the level of need identified in the SHMA and the housing register.	A Whole Plan Viability Assessment has been undertaken to inform policy requirements with the intention of ensuring the viability and deliverability of the draft Shropshire Local Plan. Draft Policy DP11 has been subject to due consideration within this assessment. No change proposed.	No	DP11. Minimising Carbon Emissions
A0676	B002	Para 2 of draft Policy DP11 should be amended as follows "New non-residential development of 1,000m2 or more floorspace or with a gross site area of 1ha or more will achieve the BREEAM Excellent rating or equivalent standard within an alternative assessment endorsed by Shropshire Council unless it can be demonstrated that it is not feasible or would impact on the viability of the proposal." Alternatively "seek to achieve" could be added to the para.	A Whole Plan Viability Assessment has been undertaken to inform policy requirements with the intention of ensuring the viability and deliverability of the draft Shropshire Local Plan. Draft Policy DP11 has been subject to due consideration within this assessment. No change proposed.	No	DP11. Minimising Carbon Emissions
A0682	B004	Delete this policy.	Shropshire Council considers that draft Policy SP3 and draft Policy DP11 are complementary. Subsection 1 (a) of the 2008 Planning and Energy Act states that Local Authorities may include policies imposing reasonable requirements for 'a proportion of energy used in development in their area to be energy from renewable sources in the locality of the development' provided these are consistent with national policy. National policy is the 2015 Written Ministerial Statement which allows Local Planning Authorities to set Code for Sustainable Homes level 4 energy standards. Shropshire Council considers the proposed site guideline for on-site renewable and low-carbon energy generation to be consistent with the proposed requirement in draft Policy DP11, and for this draft policy to be reasonable. This requirement in draft Policy DP11 has been subject to due consideration within the Viability Assessment undertaken to inform the draft Shropshire Local Plan.	No	DP11. Minimising Carbon Emissions

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0014	B052	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12(3)	Not Specified	Not Specified	Not Specified	10% gain for nature is not ambitious enough. Government proposals indicate at least 10% and both Wildlife Trusts and UN have identified a need for 30% of land to be protected and in recovery for nature. The Nature Recovery Strategy is about much more than just Biodiversity Net Gain and should be a constant theme throughout the plan.
A0014	B053	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP13(4)	Not Specified	Not Specified	Not Specified	Add areas within any future Nature Recovery Network into the list of natural assets.
A0014	B054	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP13(5)	Not Specified	Not Specified	Not Specified	Proposals which are shown to have an adverse effect, directly, indirectly or cumulatively, to those natural assets listed in para 4 should be refused.
A0014	B055	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP13(7)	Not Specified	Not Specified	Not Specified	The 'bigger' element of the Lawton principle is missing here. Policies should seek to maximise the size of environmental assets.
A0014	B056	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP13(8)	Not Specified	Not Specified	Not Specified	Reference should be made to the Marches Woodland Strategy.
A0014	B057	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP13(8c and 8e)	Not Specified	Not Specified	Not Specified	Greater emphasis should be placed on protecting existing trees/woodland/hedgerow assets. Phrases such as 'overriding reasons/benefits for development to proceed' are unclear and will result in the loss of existing trees and hedgerows. Replace hedgerows with hedgerows at least as diverse, or ideally more, in conjunction with biodiversity enhancement and gain.
A0014	B058	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.116	Not Specified	Not Specified	Not Specified	Priority habitats and species, as outlined by Natural England, should be added to the list of triggers for assessment.
A0014	B059	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.121	Not Specified	Not Specified	Not Specified	There is a high level of subjectivity and scope for how biodiversity net gain will be determined. Most schemes will require Local Authority ecologists to determine biodiversity net gain. However, partner organisations such as Natural England and Shropshire Wildlife Trust should be consulted in some circumstances. Assume the biodiversity net gain assessments will be done using the latest Defra metric. There needs to be explicit mention of how biodiversity net gain will be monitored and assessed to ensure long-term net gain is delivered.
A0014	B060	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.123	Not Specified	Not Specified	Not Specified	Understand the Nature Recovery Network (under the Local Nature Strategy) will supersede Shropshire Environmental Network (SEN). This should be made clear.
A0014	B061	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.124	Not Specified	Not Specified	Not Specified	How are public benefits and the value of effected assets going to be measured and assessed against each other?
A0014	B062	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.133(c)	Not Specified	Not Specified	Not Specified	Reference to biodiversity net gain as part of compensation measures.
A0014	B063	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.127	Not Specified	Not Specified	Not Specified	Mitigation/compensation measures need to be delivered in a timely manner, in accordance with biodiversity net gain principles. A 'timely manner' means the measure is in place prior to loss of assets. Concerned delivery of measures in unclear in para 4.127 (text references both 4.137 and 4.127, however comments appear to relate to 4.127).
A0014	B064	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.128	Not Specified	Not Specified	Not Specified	It should be made clear that para 4.128 is a last resort, given the current state of the natural environment and best practice.
A0014	B065	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.132	Not Specified	Not Specified	Not Specified	Greater emphasis should be placed on protecting existing trees/woodland/hedgerow assets. Phrases such as 'overriding reasons/benefits for development to proceed' are unclear and will result in the loss of existing trees and hedgerows. Replace hedgerows with hedgerows at least as diverse, or ideally more, in conjunction with biodiversity enhancement and gain.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0014	B052	1. In para 4 of draft Policy DP12, increase the level of biodiversity net gain to in excess of 10%. 2. Recognise that the Nature Recovery Strategy is about much more than just Biodiversity Net Gain and should be a constant theme throughout the plan.	1. The requirement for a 10% net gain for biodiversity reflects the provisions of the Environment Bill and the Council thus considers it to be appropriate. 2. The Environment Bill makes it clear that biodiversity net gain will be delivered through the Local Nature Recovery Strategy so the Council considers the policy requirement to be appropriate.	No	DP12. The Natural Environment
A0014	B053	In para 4 of draft Policy DP12, add areas within any future Nature Recovery Network into the list of natural assets.	This comment is identified as relating to para 4 of draft Policy DP13, however it appears to relate to para 4 of draft Policy DP12 (DP12 was referenced as DP13 within the earlier consultation on the Regulation 18: Pre-Submission Draft of the Shropshire Local Plan). The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that neither of these support this proposed amendment. No change proposed.	No	DP12. The Natural Environment
A0014	B054	Para 5 of draft Policy DP12 should stipulate that proposals which are shown to have an adverse effect, directly, indirectly or cumulatively, to those natural assets listed in para 4 should be refused.	This comment is identified as relating to para 5 of draft Policy DP13, however it appears to relate to para 5 of draft Policy DP12 (DP12 was referenced as DP13 within the earlier consultation on the Regulation 18: Pre-Submission Draft of the Shropshire Local Plan). The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that neither of these support this proposed amendment. No change proposed.	No	DP12. The Natural Environment
A0014	B055	Para 7 of draft Policy DP12 should include maximising the size of environmental assets.	This comment is identified as relating to para 7 of draft Policy DP13, however it appears to relate to para 7 of draft Policy DP12 (DP12 was referenced as DP13 within the earlier consultation on the Regulation 18: Pre-Submission Draft of the Shropshire Local Plan). The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that neither of these support this proposed amendment. No change proposed.	No	DP12. The Natural Environment
A0014	B056	Para 8 of draft Policy DP12 should include reference to the Marches Woodland Strategy.	Noted. It is identified as relating to para 8 of draft Policy DP13, however it appears to relate to para 8 of draft Policy DP12 (DP12 was referenced as DP13 within the earlier consultation on the Regulation 18: Pre-Submission Draft of the Shropshire Local Plan). The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that neither of these support this proposed amendment. No change proposed.	No	DP12. The Natural Environment
A0014	B057	Paras 8(c) and 8(e) of draft Policy DP12 should be clarified, to place greater emphasis on protecting existing trees, woodland and hedgerows and require that where hedgerows are lost they are replaced with other equally or more diverse hedgerows.	This comment is identified as relating to para 8 of draft Policy DP13, however it appears to relate to para 8 of draft Policy DP12 (DP12 was referenced as DP13 within the earlier consultation on the Regulation 18: Pre-Submission Draft of the Shropshire Local Plan). The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that neither of these support this proposed amendment. No change proposed.	No	DP12. The Natural Environment
A0014	B058	Para 4.116 should include reference to priority habitats and species, as outlined by Natural England.	The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that this proposed amendment is not necessary. No change proposed.	No	DP12. The Natural Environment
A0014	B059	Para 4.121 should be explicit about how biodiversity net gain will be monitored and assessed. It should also reference the latest Defra metric and acknowledge that in some circumstances partner organisations should be consulted.	These issues are set out in the Environment Bill and as such, are outside the remit of the Local Plan. No change proposed.	No	DP12. The Natural Environment
A0014	B060	Para 4.123 should clarify that the Nature Recovery Network (under the Local Nature Strategy) will supersede SEN.	The Council does not consider this change to be necessary.	No	DP12. The Natural Environment
A0014	B061	Para 4.124 should clarify how public benefits and the value of effected assets are to be measured and assessed against each other?	These issues are set out in the Environment Bill and as such, are outside the remit of the Local Plan. No change proposed.	No	DP12. The Natural Environment
A0014	B062	Para 4.133(c) should reference biodiversity net gain as part of the compensation measures.	This issue is set out in the Environment Bill and as such, is outside the remit of the Local Plan. No change proposed.	No	DP12. The Natural Environment
A0014	B063	Para 4.127 should be clearer about delivery of mitigation/compensation measures.	The Council does not consider this change to be necessary.	No	DP12. The Natural Environment
A0014	B064	Para 4.128 should be clear that this option is a last resort.	The Council does not consider this change to be necessary.	No	DP12. The Natural Environment
A0014	B065	Paras 4.132 should be clarified, to place greater emphasis on protecting existing trees, woodland and hedgerows and require that where hedgerows are lost they are replaced with other equally or more diverse hedgerows.	The Council does not consider this change to be necessary.	No	DP12. The Natural Environment

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0347	B044	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	No	No	Not Specified	The local plan provides a hook to the provision for Biodiversity net gain which is to be mandated by the forth coming Environment Bill. Evidence is not provided that there will be sufficient space on or off site to meet the 10% biodiversity net gain obligation. If Biodiversity net gain provision is planned together with the development allocations within the local plan then more coherent nature networks could be achieved.
A0349	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	Not Specified	Not Specified	Natural England strongly supports this policy. It should provide protection to the most aspects of the natural environment we are pleased to see net gain has been incorporated into the plan, in our view this could contribute to significant improvements for biodiversity and contribute to wider environmental benefits such as clean air and water and to help restore, buffer and connect existing environmental assets. We look forward to working with your authority on the scheme as it develops
A0385	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	No	Not Specified	Consider Point 3 of draft Policy DP12 should be amended to align with national requirements in order for the policy to be consistent with national planning policy. The National Planning Policy Framework (NPPF) only encourages developers to provide net gains and whilst the draft Environment Bill has proposed mandating 10% biodiversity net gain it should be recognised that this remains subject to Parliamentary debate, processes and Royal Assent.
A0386	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	No	Not Specified	Consider Point 3 of draft Policy DP12 should be amended to align with national requirements in order for the policy to be consistent with national planning policy. The National Planning Policy Framework (NPPF) only encourages developers to provide net gains and whilst the draft Environment Bill has proposed mandating 10% biodiversity net gain it should be recognised that this remains subject to Parliamentary debate, processes and Royal Assent.
A0387	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	No	Not Specified	Consider Point 3 of draft Policy DP12 is unsound as it is not consistent with national policy. It should be amended to align with national requirements in order for the policy to be consistent with national planning policy. The National Planning Policy Framework (NPPF) only encourages developers to provide net gains and whilst the draft Environment Bill has proposed mandating 10% biodiversity net gain it should be recognised that this remains subject to Parliamentary debate, processes and Royal Assent.
A0393	B024	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; 10% gain for nature target is not ambitious enough it is the minimum when Government proposals are for at least 10% gain; does not align with the Wildlife Trusts & UN who have identified a need for 30% of land to be protected and in recovery for nature. Given the import of the natural environment in Shropshire's attractiveness as a place to live, do business and visit, protecting the natural environment needs to be at the core of the Local Plan. The Nature Recovery Strategy is about much more than just Biodiversity Net Gain and thus, it should be a constant theme throughout the plan.
A0450	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	No	Not Specified	Policy DP12(3) requires all developments to 'achieve a 10% net gain in biodiversity in accordance with the Environment Act'. However, the provisions of the Environment Act relating to biodiversity net gain (BNG) have only been consulted upon (numerous objections have been raised) and at this point there is no certainty that it will be carried forward into law. The Framework sets out a requirement at paragraph 170(d) for planning policies and decisions to contribute to and enhance the natural and local environment by minimising impacts on and providing net gains for biodiversity. Therefore, to be consistent with national planning policy the draft plan should specify that development should achieve a BNG. There is no justification for the figure to be 10%. We are also concerned as to whether the Council has fully assessed the implications of applying 10% BNG on development within Shropshire, including the impact upon the developable areas of site allocations, and potentially development yield. It is not clear how the Council's assumptions in the Viability Study for achieving a 10% BNG have been derived.
A0487	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	No	Not Specified	Under Bullet Point 3, all development delivers at least a 10% net gain for biodiversity in accordance with the Environment Act, any future Local Nature Recovery Strategy (LNRS) and Policies DP14, DP15, DP16 and DP22. It is the HBF's opinion that the Council should not deviate from the Government's proposals on biodiversity gain as set out in the Environment Bill. This legislation will require development to achieve a 10% net gain for biodiversity. It is the Government's opinion that 10% strikes the right balance between the ambition for development and reversing environmental decline. 10% gain provides certainty in achieving environmental outcomes, deliverability of development and costs for developers. 10% will be a mandatory national requirement, but it is not a cap on the aspirations of developers who want to voluntarily go further. The Government will use the DEFRA Biodiversity Metric to measure changes to biodiversity under net gain requirements established in the Environment Bill. The mandatory requirement offers developers a level playing field nationally and reduced risks of unexpected costs and delays. The Council should not specify a requirement above 10%. The prefix "at least" in Bullet Point 3 of Policy DP12 should be deleted. The Council's policy approach should not compromise the viability of development (see detailed HBF comments on Deliverability & Viability). The Government will make provision in the Environment Bill to set a transition period of two years. The Government will work with stakeholders on the specifics of this transition period, including accounting for sites with outline planning permission, and will provide clear and timely guidance on understanding what will be required and when.
A0582	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	No	Not Specified	Part 3 of the policy introduces the requirement for 10% Biodiversity Net Gain. It is noted that the Government's impact assessment accompanying the Biodiversity Net Gain strategy suggests an average cost in the region of circa £21,000 per hectare and that this is used in the assessment. However, this figure needs to be based on local data reflecting the biodiversity situation in Shropshire and the likely new habitats required. In particular, the implications of having to acquire additional land on which to provide some of a scheme's net gain needs to be fully understood in terms of land availability and cost.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0347	B044	n/a	Noted. No change proposed	No	DP12. The Natural Environment
A0349	B009	n/a	Noted.	No	DP12. The Natural Environment
A0385	B008	Remove reference to the requirement for a 10% net gain and instead make reference to a requirement for net gain in accordance with the most up to date legislative requirements.	The Queens Speech of 11th May 2021 indicated Government's intention to introduce the Environment Bill in the upcoming Parliamentary year. The key element of the Environment Bill is at least 10% biodiversity net gain. The Council is confident that this will be carried forward into law and that it is appropriate to include it in Policy DP12 to give clarity to developers, communities and the decision maker on requirements. Therefore no amendment is proposed.	No	DP12. The Natural Environment
A0386	B007	Remove reference to the requirement for a 10% net gain and instead make reference to a requirement for net gain in accordance with the most up to date legislative requirements.	The Queens Speech of 11th May 2021 indicated Government's intention to introduce the Environment Bill in the upcoming Parliamentary year. The key element of the Environment Bill is at least 10% biodiversity net gain. The Council is confident that this will be carried forward into law and that it is appropriate to include it in Policy DP12 to give clarity to developers, communities and the decision maker on requirements. Therefore no amendment is proposed.	No	DP12. The Natural Environment
A0387	B009	Remove reference to the requirement for a 10% net gain and instead make reference to a requirement for net gain in accordance with the most up to date legislative requirements.	The Queens Speech of 11th May 2021 indicated Government's intention to introduce the Environment Bill in the upcoming Parliamentary year. The key element of the Environment Bill is at least 10% biodiversity net gain. The Council is confident that this will be carried forward into law and that it is appropriate to include it in Policy DP12 to give clarity to developers, communities and the decision maker on requirements. Therefore no amendment is proposed.	No	DP12. The Natural Environment
A0393	B024	Explicitly identify within the policy how it will assist in achieving net zero carbon; More ambitious target than 10% for nature gain as per summary of comments; DP12 (4) Add areas within any future Nature Recovery Network to the list to be assessed; DP12 (5) Proposals which are shown to have an adverse effect, directly, indirectly or cumulatively, to those natural assets listed should be refused. Exceptions should only be made in the most exceptional circumstances and there is a for clear methodology on how you compare the value of a natural asset to economic or social benefit.	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP12. The Natural Environment
A0450	B005	To be consistent with national planning policy the draft plan should specify that development should achieve a BNG	The Queens Speech of 11th May 2021 indicated Government's intention to introduce the Environment Bill in the upcoming Parliamentary year. The key element of the Environment Bill is at least 10% biodiversity net gain. The Council is confident that this will be carried forward into law and that it is appropriate to include it in Policy DP12 to give clarity to developers, communities and the decision maker on requirements. Therefore no amendment is proposed.	No	DP12. The Natural Environment
A0487	B003	It is the HBF's opinion that the Council should not be setting biodiversity gains greater than 10% or deviating from Government proposals set out in the Environment Bill including transitional arrangements. The cross referencing to other Development Management Policies is confusing, which should be deleted. Policy DP12 should be modified by the Council.	The requirement for a 10% net gain for biodiversity reflects the provisions of the Environment Bill and the Council thus considers it to be appropriate	No	DP12. The Natural Environment
A0582	B006	Requested Change – The costs and full implications of requiring development to deliver 10% biodiversity net gain must be understood at a local level and considered in the Local Plan Delivery and Viability Study. Further guidance is required as to how such net gain could be provided off-site so as not to compromise the ability to make best use of a sustainable development site and to also provide truly effective biodiversity gains for the wider area.	A Whole Plan Viability Assessment has been undertaken to inform policy requirements with the intention of ensuring the viability and deliverability of the draft Shropshire Local Plan. Draft Policy DP12 has been subject to due consideration within this assessment. No change proposed.	No	DP12. The Natural Environment

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0598	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	No	Not Specified	Object to proposed criterion 3 of draft Policy DP12 (and relevant explanatory text) regarding a 10% biodiversity net gain (BNG), as: -The draft policy seeks provision of 'at least 10%' net gains for biodiversity on 'all development'. However, emerging legislation set out in the Environment Bill clearly states the biodiversity value percentage attributed to development is '10%', and not 'at least 10%' as suggested by the Council. The Council has therefore mis-interpreted and contradicts the intentions in the draft Bill, so is not legally compliant. -No evidential basis is provided for requiring a percentage increase above 10% in BNG on any development sites in Shropshire, so it is not justified. -No reference is made to the potential use of biodiversity credits as a means to secure the 10% BNG as part of new development proposals to be required under the Environment Act (once enacted). The Biodiversity Credits approach will offer applicants the ability to off-set on-site measures by purchasing 'credits' to meet the gain objective. -More fundamentally, question whether it is a sound approach to include references to emerging legislation that will, in any event, set down legal requirements for provision of 10% BNG on all qualifying developments. Contend that, once enacted, there will be sufficient legal controls placed on development to allow the Council to determine applications without the need for separate criterion as drafted under draft Policy SP12, so it is unnecessary. Therefore criterion 3 is not necessary with regards to addressing future requirements for BNG and its retention unsound.
A0600	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Yes	Yes	Yes	Support reference in para 4.130 of the explanation to draft Policy DP12 to the need for habitat enhancement and creation measures within designated safeguarding zones to avoid creating an environment that would attract large or flocking bird species - changed from an earlier draft. The inclusion of this wording helps to protect defence interests, particularly with regards to aviation safety.
A0608	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	Not Specified	Not Specified	Part 1 of draft Policy DP12 identifies a requirement that development which has a significant effect on an internationally designated sites should be subject to a project level Habitats Regulations Assessment (HRA). Consider that for site allocations, this requirement should be specifically identified as part of the development guidelines of an allocation, to provide further clarity. Part 3 of draft Policy DP12 requires 10% net gain for biodiversity, referencing the Environment Act. However, the Environment Act (1995) does not require this. The proposed explanation to this draft Policy refers to the Environment Bill that has yet to achieve royal assent, as such it may be subject to change and cannot be relied on. Para 174b of the National Planning Policy Framework (NPPF) promotes identification/pursuit of opportunities to secure measurable net gain for biodiversity in Local Plans, however para 34 of the NPPF indicates requirements must not undermine viability. Therefore, any request for biodiversity gain must be made through a proportionate and detailed evidence base.
A0609	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	Yes	Not Specified	Fully support draft Policy DP12, which seeks to avoid harm to Shropshire's natural assets and ensure that the assets are conserved, enhanced and restored. The draft Policy is consistent with national policy, in particular with the requirement to deliver 10% biodiversity net gain and the protection of natural assets. As such, this policy is considered to be sound.
A0624	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Yes	No	Yes	The 2019 Spring Statement included a commitment that by 2025 the Government will introduce a Future Homes Standard for new build homes to be future-proofed with low carbon heating and 'world-leading levels of energy efficiency'. The Consultation document (October 2019) highlighted that changes to Part L, Part 6 and Part F of the Building Regulations are anticipated to come into force by mid/late 2020.
A0629	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Yes	No	Yes	The ecological emergency and loss of nature is as significant as climate change, and the importance of this is not recognised by the policy and the plan overall. The natural environment keeps us alive and is vital to people's health and wellbeing as well as supporting the economy. Development needs to support nature recovery, not just 'avoid harm' as draft Policy DP12 says.
A0629	B007-24	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; 10% gain for nature target is not ambitious enough it is the minimum when Government proposals are for at least 10% gain; does not align with the Wildlife Trusts & UN who have identified a need for 30% of land to be protected and in recovery for nature. Given the import of the natural environment in Shropshire's attractiveness as a place to live, do business and visit, protecting the natural environment needs to be at the core of the Local Plan. The Nature Recovery Strategy is about much more than just Biodiversity Net Gain and thus, it should be a constant theme throughout the plan.
A0663	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	Not Specified	Not Specified	The requirement for 10% biodiversity net gain is expected to be a mandatory requirement when the Environment Bill is enacted.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0598	B012	Delete para 3 oof draft Policy DP12.	The Queens Speech of 11th May 2021 indicated Government's intention to introduce the Environment Bill in the upcoming Parliamentary year. The key element of the Environment Bill is at least 10% biodiversity net gain. The Council is confident that this will be carried forward into law and that it is appropriate to include it in Policy DP12 to give clarity to developers, communities and the decision maker on requirements. Therefore no amendment is proposed.	No	DP12. The Natural Environment
A0600	B002	N/A	Noted.	No	DP12. The Natural Environment
A0608	B012	Draft Policy DP12 should be amended to reflect a strategy that accords with the emerging direction of national policy but does not exceed it.	The Queens Speech of 11th May 2021 indicated Government's intention to introduce the Environment Bill in the upcoming Parliamentary year. The key element of the Environment Bill is at least 10% biodiversity net gain. The Council is confident that this will be carried forward into law and that it is appropriate to include it in Policy DP12 to give clarity to developers, communities and the decision maker on requirements. This requirement has been given due consideration as part of the Viability Assessment undertaken to inform the draft Shropshire Local Plan. Therefore no amendment is proposed.	No	DP12. The Natural Environment
A0609	B016	N/A	Noted.	No	DP12. The Natural Environment
A0624	B006	Policy DP12 should be deleted as it will be a duplication of national guidance	The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that this proposed amendment is not necessary. No change proposed.	No	DP12. The Natural Environment
A0629	B003	The ecological emergency and loss of nature is as significant as climate change, and the importance of this is not recognised by the policy and the plan overall. The natural environment keeps us alive and is vital to people's health and wellbeing as well as supporting the economy. Development needs to support nature recovery, not just 'avoid harm' as draft Policy DP12 says.	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP12. The Natural Environment
A0629	B007-24	Explicitly identify within the policy how it will assist in achieving net zero carbon; More ambitious target than 10% for nature gain as per summary of comments; DP12 (4) Add areas within any future Nature Recovery Network to the list to be assessed; DP12 (5) Proposals which are shown to have an adverse effect, directly, indirectly or cumulatively, to those natural assets listed should be refused. Exceptions should only be made in the most exceptional circumstances and there is a for clear methodology on how you compare the value of a natural asset to economic or social benefit.	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP12. The Natural Environment
A0663	B010	If the Council is looking to mandate biodiversity net gain through the Local Plan, guidance must be provided (or signposted) on how to practically achieve net gain in development. This would allow for net gain to be designed into processes at early stages and for any design issues to be detected and resolved without causing delay to development.	This is set out in the Environment Bill and as such, is outside the remit of the Local Plan. No change proposed.	No	DP12. The Natural Environment

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0073	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP12	Not Specified	Not Specified	Not Specified	To be consistent with national planning policy the draft plan should specify that development should achieve a Biodiversity net gain (BNG). Concerned as to whether the Council has fully assessed the implications of applying 10% BNG on development within Shropshire, including the impact upon the developable areas of site allocations, and potentially development yield.
A0014	B066	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP13	Not Specified	Not Specified	Not Specified	Welcome this policy and would not like to see it compromised in any way.
A0347	B040	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP14	No	No	Not Specified	Do not agree that development policy and settlement policy wording and the statutory requirement for a project level HRA for development (as outlined in the HRA) will prevent adverse effects on the integrity of the River Clun SAC. Measures to ensure that developments achieve nutrient neutrality cannot yet be calculated and therefore there is no guarantee that nutrient neutrality can be achieved for the scale of development in the Local Plan. Suggest that development is not allocated in the Clun catchment. There may be scope for windfall proposals to be assessed on an individual basis but there needs to be some discussion on that to ensure that mitigation has a reasonable prospect of delivery.
A0349	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP13	No	No	Not Specified	<ol style="list-style-type: none"> <li>1. In addition to the difficulties of applying the principle of nutrient neutrality in the River Clun catchment as set out in para 3.29 of the HRA (the need to re-wild a percentage of the landscape) this policy does not give enough detail to be certain of what is required to meet the requirement of nutrient neutrality or nutrient betterment. Although residential development generates less nitrogen than agricultural use, it could still contribute to the failure of the SAC through an in-combination effect. Additionally, the wording of the policy may have unintended consequences as landowners could apply higher levels of fertiliser to land in advance of applying for planning permission in order to reduce the requirements for mitigation measures linked to the development.</li> <li>2. This policy may not be deliverable without additional work to inform the evidence underpinning the SAC restoration scheme.</li> <li>3. We do not believe the policy is compatible with the Dutch Nitrogen Judgement at the present stage although you may want to seek your own legal advice.</li> <li>4. The explanatory text to the policy is correct.</li> </ol>
A0393	B025	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0512	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP13 (BUCK001)	Not Specified	No	Not Specified	<p>Support proposed allocation of BUCK001. This is an important brownfield site for Bucknell, it can comply with all requirements of draft Policies S2.2 (although note S2.2.6 relates to impact on the River Clun SAC) and SP8, however draft Policy DP13 places significant obstacle in the way of its development. Every effort should be made by the Local Planning Authority (LPA) to bring it forward for development as quickly as possible.</p> <p>The site has also been allocated for development for 22 years, most recently in the SAMDev Plan (2015) for 70 dwellings. There have also been a number of Planning Applications on the site, the most recent remains undetermined. However, delivery has been delayed for numerous reasons but not willingness of the landowner.</p> <p>The SAMDev Plan states development in the Bishop's Castle area may "adversely affect the integrity of the River Clun SAC. Mitigation measures are required to remove harm arising from hydrological and water quality impacts on this internationally designated site ..... ", no readily available/understandable advice has been provided on what mitigation measures might be suggested and this remains unresolved. It also requires project level Habitats Regulations Assessment (HRA) for proposals where a likely significant effect on an internationally designated site may occur (the HRA was to be prepared by the LPA). It also specified proposals likely to have a significant effect on factors including priority species and priority habitats, would only be permitted "where it could be demonstrated that there is no satisfactory alternative means of avoiding such impacts and the social or economic benefits of the proposal outweigh the harm to the asset". No advice has ever been forthcoming from the LPA on the measures that might be regarded as mitigating effects on natural assets.</p> <p>A River Clun SAC Nutrient Management Plan (NMP) was prepared by Natural England (NE), the Environment Agency (EA) and the LPA, to identify those issues threatening the freshwater pearl mussels in the River Clun. It concluded the freshwater pearl mussel population was 'functionally extinct' (declining population and little evidence of recruitment), and estimated mussels would only survive for another 20 years if nothing was done. Therefore a series of targets for water quality in the River Clun should be adopted, although even if achieved, there was no guarantee the colony would be rejuvenated. Three main causes of problems for the mussels were phosphates, nitrates and silt, of which development was a major factor for only phosphate (majority associated with Waste Water Treatment Works (WWTW)). The NMP contained no specific actions a developer might take to make residential development acceptable. The LPA advised development cannot occur unless it demonstrates no phosphates generated would enter the River and it should also demonstrate betterment.</p> <p>Discharge from Bucknell WWTW into the River Clun is controlled by Severn Trent Water (STW) and the EA. In 2017, STW indicated they intended to solve the problem by diverting discharge to another watercourse. However, this did not occur, instead, STW installed additional phosphate stripping facilities. Understand this has improved water quality, but has not improved it to a level that would mean targets set in the NMP are achieved.</p> <p>Most recently, the LPA in association with NE have produced a document indicating that development will only be permitted which would involve discharge to the River Clun or its tributaries, if it can be shown that the development would be "nutrient neutral". There is no indication given as to how this could be measured, how it could be achieved, what effect it might have on the water quality in the River, or whether it would produce a situation where the pearl mussel colony might be rescued and rejuvenated.</p> <p>The Local Plan Review continues this situation. Bucknell is identified as a Community Hub and BUCK001 is reallocated, however is still constrained by the necessity to ensure that the freshwater pearl mussels in the River Clun are unharmed by the development. Draft Policy DP13 specifies the restrictions in the Clun catchment, but no advice is provided as to how identified objectives can be achieved. Clear that simply preventing development is not the answer, but very little appears to be happening that would help in other directions. One suggestion a refresh of the NMP, but these are clearly ineffective unless they include definitive/measurable actions on the part of those bodies responsible for water quality and comprise more than just preventing development.</p> <p>This situation effects more than just BUCK001. The River Clun catchment includes Bishop's Castle (Key Centre), Clun (Community hub) and Lydbury North (Community Cluster) amongst others. Allocations for residential development have not come forward due to the same problem. These allocations are to be saved and there is a clear need/demand for development, which continues to be recognised. As such, the draft Shropshire Local Plan should tackle the issue of the water quality in the River Clun in a pro-active manner, and bring forward positive proposals to be put into action by the various authorities that have responsibility for watercourses in the catchment in order that the development that is planned, wanted and needed can be delivered. Until the draft Shropshire Local Plan includes such proposals it cannot be regarded as being "sound" as it is not effective or been developed in a positive manner, fails to meet the responsibility of ensuring the survival of the pearl mussel colony and will also fail to deliver the dwellings (514) planned in the Clun catchment.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0073	B004	Policy DP12(3) should be amended to remove reference to 10%. Clearly if the requirement for 10% BNG is introduced through the Environment Bill, then it will be covered by separate legislation in any event and will not need to be addressed within the Local Plan	A Whole Plan Viability Assessment has been undertaken to inform policy requirements with the intention of ensuring the viability and deliverability of the draft Shropshire Local Plan. Draft Policy DP12 has been subject to due consideration within this assessment. No change proposed.	No	DP12. The Natural Environment
A0014	B066	N/A	Support welcomed.	No	DP13. Development in the River Clun Catchment
A0347	B040	n/a	These comments are addressed in the Statement of Common Ground with EA	Yes	DP13. Development in the River Clun Catchment
A0349	B005	none specified.	These comments are addressed in the Statement of Common Ground with EA	Yes	DP13. Development in the River Clun Catchment
A0393	B025	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP13. Development in the River Clun Catchment
A0512	B004	The draft Shropshire Local Plan should be modified to include specific, positive, measures that will: i. Ensure the longevity of the freshwater pearl colony, and ii. Ensure that the development that is assessed as being necessary in the River Clun catchment can be delivered immediately upon the adoption of the draft Shropshire Local Plan.	Shropshire Council must comply with the Habitats Regulations and subsequent legal judgments (including the Dutch Nitrogen case) when determining planning applications which are likely to have an adverse effect on the River Clun SAC. This means that development in the river Clun catchment can only be permitted if it can be demonstrated that no adverse effect on the River Clun SAC will occur. The Council is unable to consent to planning applications in Bucknell (and the wider river Clun catchment) which do not meet this requirement. Policy DP13 plans positively for development in the Clun catchment whilst safeguarding the SAC, by setting out the criteria which planning proposals must meet to comply with the Habitats Regulations. A series of minor modifications to this policy and its explanation (see schedule of minor modifications) are proposed to provide additional clarity on legal compliance with the Habitats Regulations and Dutch Nitrogen Judgement and on processes to support policy implementation, including the assessment of nutrient neutrality and determination of mitigation measures.	No	DP13. Development in the River Clun Catchment

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0521	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP13	Not Specified	No	No	Proposals for significant pockets of development (totalling over 500 dwellings) within the River Clun catchment is patently unsound, given lack of any commitment within draft Policy DP13 as to how goals of nutrient neutrality/betterment shall be achieved. Without such a commitment, development proposals are, un-cooperatively, being set up to fail, developers are wasting money and residents' lives are being needlessly upset. Shropshire Council's 'Development within the River Clun Catchment: Guidance Note 12 (Revision A) February 2020' charts a way forward via production of a revised nutrient management plan (at para 2.5 of the Note), which 'must be produced' but draft Policy DP13 includes no commitment to carrying out that work – the key to unlock the Gaudian knot of Clun SAC development. There is a mis-match between draft Policy DP13 and the above mentioned Guidance Note as to the standards to be achieved: one refers to 'neutrality' the other to 'reduction'.
A0521	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.136	Not Specified	No	No	Proposals for significant pockets of development (totalling over 500 dwellings) within the River Clun catchment is patently unsound, given lack of any commitment within draft Policy DP13 as to how goals of nutrient neutrality/betterment shall be achieved. Without such a commitment, development proposals are, un-cooperatively, being set up to fail, developers are wasting money and residents' lives are being needlessly upset. Shropshire Council's 'Development within the River Clun Catchment: Guidance Note 12 (Revision A) February 2020' charts a way forward via production of a revised nutrient management plan (at para 2.5 of the Note), which 'must be produced' but draft Policy DP13 includes no commitment to carrying out that work – the key to unlock the Gaudian knot of Clun SAC development.
A0629	B007-25	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0014	B067	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP14	Not Specified	Not Specified	Not Specified	Welcome this policy and would not like to see it compromised in any way.
A0014	B068	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP14(4)	Not Specified	Not Specified	Not Specified	Green space should be managed and maintained for at least the lifetime of any development.
A0014	B069	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.144	Not Specified	Not Specified	Not Specified	Question the infeasibility of producing a green infrastructure opportunity map around Community Hubs and Community Clusters. If this is purely due to a lack of resources, partnership with other organisations should be explored to develop a map? Paragraph 174 of the NPPF suggests maps are needed for restoration/creation areas.
A0124	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP14	Yes	Yes	Yes	It is not clear whether this policy is intended to provide a criteria based policy for the protection of playing fields. Parts of the policy elude to this and para 4.138 expressly states that GI includes playing fields. However, if this is the case, the policy wording is not consistent with NPPF para 97.
A0349	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP14	Not Specified	Not Specified	Not Specified	Natural England supports this policy. Well designed multi-functional green infrastructure contributes greatly to a number benefits both for people and nature. Your green infrastructure should dovetail with your biodiversity net gain strategies in order to maximise benefits.
A0393	B026	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; Question the infeasibility of producing a green infrastructure opportunity map. Resources to do so could be achieved via partnership with other organisations. NPPF paragraph 174, suggests that maps are needed for restoration/creation areas.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0521	B010	Add the following additional para to draft Policy DP13: "Recognising the urgent need to improve and guarantee water quality as key to the Freshwater Mussels' viability – and thence for the proposed growth in housing, businesses and employment in the river Clun catchment – the Planning Authority, in association with statutory agencies and other stakeholders, will, as a priority, produce a revised nutrient management plan (NMP)."	The Council has proposed minor modifications to Policy DP13 in response to comments received from the Environment Agency and Natural England. These address the production of a River Clun SAC Restoration Plan.	No	DP13. Development in the River Clun Catchment
A0521	B011	Revise para 4.136 of the explanation to draft Policy DP13 to state "Notwithstanding these improvements, the Habitat Regulations Assessment (HRA) for this Plan (in the light of the 'Dutch Nitrogen Case') shows that much development in the river Clun catchment is likely to have an adverse effect on the river Clun SAC. The urgent need for practical mitigation measures, which would remove this effect for larger applications, have yet to be proposed. Accordingly, to comply with the requirements of the Conservation of Habitats and Species Regulations 2017, this policy currently restricts development to that which is either nutrient neutral in terms of its effect on the SAC or results in a betterment. This is in anticipation of measures to achieve either of these criteria being found in the future for the majority of development in the catchment. Such measures will include work to produce a revised Nutrient Management Plan in association with statutory agencies and other stakeholders. The revised NMP, along with a robust Mitigation Action Plan, will provide the level of certainty required by the Habitats Regulations that the SAC restoration targets can be achieved in an appropriate timescale. These actions will additionally clarify the standards to be achieved by developers encouraged within this Plan to bring forward schemes in the SAC, but currently frustrated in their wish to unlock economic and housing development."	The Council has proposed minor modifications to Policy DP13 in response to comments received from the Environment Agency and Natural England. These address the production of a River Clun SAC Restoration Plan.	No	DP13. Development in the River Clun Catchment
A0629	B007-25	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP13. Development in the River Clun Catchment
A0014	B067	N/A	Support welcomed	No	DP14. Green Infrastructure
A0014	B068	Para 4 of draft Policy DP14 should	The Council does not consider these amendments are necessary.	No	DP14. Green Infrastructure
A0014	B069	Green Infrastructure Opportunity Mapping should be undertaken for proposed Community Hubs and Community Clusters.	The Council considers the approach taken to the mapping of Green Infrastructure is proportionate and appropriate and does not preclude work being carried out in the future.	No	DP14. Green Infrastructure
A0124	B001	Amend para 4.138 lines 5-6 to clarify that Policy DP14 is not intended to apply to playing fields. Clarify that Policy DP15 should be applied in respect of playing fields.	A minor modification to paragraph 4.138 to clarify that playing fields are covered by Policy DP15 is proposed	Yes	DP14. Green Infrastructure
A0349	B010	n/a	Support welcomed	No	DP14. Green Infrastructure
A0393	B026	Explicitly identify within the policy how it will assist in achieving net zero carbon; DP14 (4) Green space should be managed and maintained for at least the lifetime of any development; partnership with other organisations to develop a green infrastructure opportunity map should be explored	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP14. Green Infrastructure

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0402	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP14	Yes	Yes	Yes	Generally supportive of the principles set out in draft Policy DP15. Consider a minor modification to para 4.138 of the proposed explanation of this draft Policy, consistent with the National Planning Policy Framework (NPPF), should be amended to aid clarity and understanding and improve effectiveness of the Policy. Specifically it should include reference to the canal network in its examples of blue infrastructure as a subset of Green Infrastructure to assist with clarity and understanding.
A0608	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP14	Not Specified	Not Specified	Not Specified	Support aim of maximising green infrastructure and expanding the current network. However, it should be recognised that existing local strategies, such as the Shrewsbury Big Town Plan that has a vision for Green Networks across Shrewsbury, must accord with the Development Plan which takes precedent as policy. Where there is conflict, the Development Plan will provide the prevailing policy.
A0609	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP14	Not Specified	No	Not Specified	Support the aims of draft Policy DP14 to provide better green infrastructure within Shropshire and to enforce all new developments to make a reasonable contribution to green infrastructure wherever possible. Part 1a refers to the need to provide a Green Infrastructure Assessment in support of development proposals. Whilst supportive of the provision of green infrastructure within new developments, would welcome clarity and further details as to what would be required as part of a Green Infrastructure Assessment. To ensure that the policy is effective, and ensures applicants provide suitable Green Infrastructure Assessments as part of development proposals, further guidance should be provided on when these assessments would be required and what they would need to contain.
A0629	B007-26	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; Question the infeasibility of producing a green infrastructure opportunity map. Resources to do so could be achieved via partnership with other organisations. NPPF paragraph 174, suggests that maps are needed for restoration/creation areas.
A0014	B070	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.148	Not Specified	Not Specified	Not Specified	Both quality and quantity of open space is important and perhaps need to be considered more equally.
A0124	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP15	Yes	Yes	Yes	Support the modifications made at Reg 18 to parts 2 and 7 of the policy and to paragraphs 4.148 - 4.151 of the explanation.
A0201	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP15 / DP16	Yes	No	Yes	Object to Part 2 of draft Policy DP15 as it is not justified or effective. It states new development should provide on-site open space provision equivalent to 30m2 per person (assuming one person per bedroom). Recognise this is a continuation of the current policy requirement, but the current policy specifically allows for delivery through off-site financial contributions, but this flexibility is removed from draft Policy DP15. Mandating such a high requirement without regard to local variation in need/provision and with no option to make off-site contributions in lieu of on-site provision could have a significant effect on site capacity and therefore delivery of the draft Shropshire Local Plan's requirement for market and affordable housing.
A0393	B027	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; Quality and quantity are important and need to be considered more equally
A0582	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP15	Not Specified	Yes	Not Specified	It is noted that the proposed wording of the policy states that there is an 'expectation' to deliver 30sqm of open space per person and that 'consideration will be given to reducing this level of provision in instances where the development is able to provide a particularly high quality of open space on site which meets the needs of all residents'. The new policy wording will allow for wider site circumstances to be taken into consideration and for the notion of 'quality over quantity' to be realised, as set out in paragraph 4.158. Shropshire Council's recognition that the provision of open space should not be driven purely by mathematical calculation is welcomed
A0598	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP15	Not Specified	Not Specified	Not Specified	Draft Policy DP15 sets out specific requirement for provision of at least 30sqm of open space per person assuming one person per bedroom. Question the evidential basis for this requirement given lack of any specific evidence in the draft Shropshire Local Plan to justify the policy. Suggest rather than applying arbitrary standards across all developments to the provision of open space in a prescriptive manner as is being proposed, a 'design-led' approach specific to the locality would be a better approach to ensuring appropriate access to open space is incorporated and addressed as part of the wider design and layout of sustainable places.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0402	B002	In para 4.138 of the proposed explanation of draft Policy DP15, include reference to the canal network in the examples of blue infrastructure as a subset of Green Infrastructure to assist with clarity and understanding.	The Council does not consider this amendment to be necessary	No	DP14. Green Infrastructure
A0608	B013	Recognise that existing local strategies, such as the Shrewsbury Big Town Plan that has a vision for Green Networks across Shrewsbury, must accord with the Development Plan which takes precedent as policy. Where there is conflict, the Development Plan will provide the prevailing policy.	Noted. The draft Shropshire Local Plan, if adopted, would represent the starting point for decision making in accordance with Planning law, but that the specific proposals within or resulting from the Big Town Plan would be material in decision making.	No	DP14. Green Infrastructure
A0609	B017	Provide further guidance on when Green Infrastructure Assessments are required and what they would need to contain.	The Council considers that the policy and explanation provide an appropriate level of detail. No change proposed.	No	DP14. Green Infrastructure
A0629	B007-26	Explicitly identify within the policy how it will assist in achieving net zero carbon; DP14 (4) Green space should be managed and maintained for at least the lifetime of any development; partnership with other organisations to develop a green infrastructure opportunity map should be explored	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP14. Green Infrastructure
A0014	B070	Para 4.148 should recognise that both quantity and quality of open space need to be considered equally.	The Council does not consider this amendment is necessary.	No	DP15. Open Space and Recreation
A0124	B002	n/a	Support welcomed	No	DP15. Open Space and Recreation
A0201	B003	Reword the policy to allow local need to be taken into account and delete the phrase "on-site" from the draft Policy.	Paragraph 5 of this policy allows for off-site provision where sufficient open space is not possible on site. No change proposed.	No	DP15. Open Space and Recreation
A0393	B027	Explicitly identify within the policy how it will assist in achieving net zero carbon; Quality and quantity need to be considered more equally	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP15. Open Space and Recreation
A0582	B007	n/a	Support welcomed	No	DP15. Open Space and Recreation
A0598	B013	Rather than applying arbitrary standards across all developments to the provision of open space in a prescriptive manner as proposed in draft Policy DP15, a 'design-led' approach specific to the locality would be a better approach to ensuring appropriate access to open space is incorporated and addressed as part of the wider design and layout of sustainable places.	The Shropshire Open Space Needs Assessment (2018) undertaken to inform the draft Shropshire Local Plan identifies the need for 30sq.m per person, which is reflected within draft Policy DP15. This requirement is consistent with the adopted Local Plan. Draft Policy DP15 is also considered to provide appropriate flexibility in instances where the development is able to provide a particularly high quality of open space on site which meets the needs of all residents.	No	DP15. Open Space and Recreation

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0608	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP15	Not Specified	Not Specified	Not Specified	<p>Delivery of quality open space is considered an essential part of new development and is supported in principle.</p> <p>Expectation in draft Policy DP15 that for new housing development open space provision will equate to 30sqm per person, assuming one person per bedroom. However, the policy also allows for a reduced level where provision is particularly high-quality which meets the needs of all residents. Consider clarity is required with regard to the meaning of 'good' quality open space, 'high' quality open space is delivered and what developments are expected to deliver.</p> <p>Example is provided (Epping Forest) where their Green Infrastructure (GI) Strategy notes GI provision is often based on individual typologies (often bland spaces that do not encourage people to use the,) and wider benefits through provision of multifunctional spaces are missed. Therefore the quality of GI is as important as the quantity of GI, whilst recognising that the quantity of provision forms the backbone of many typologies - but there will be occasions, particularly where there are deficiencies in the quality rather than the quantity of a typology, that greater benefits can be achieved by investing in existing spaces rather than in creating additional space. Therefore, an approach that simply follows space standards is not enough.</p> <p>Suggest a flexible approach is taken to open space by the Council, similar to the Epping Forest example above, where well developed schemes can positively help in meeting the requirements for open space and rigid adherence to formulaic standards have the potential to stifle good design.</p>
A0609	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP15	Not Specified	No	Not Specified	<p>Note the additional text within draft Policy DP15 which protects existing open space.</p> <p>Fully support Part 2 of draft Policy DP15 regarding the need to protect public open space, whilst recognising there are some circumstances where development of it would be considered acceptable. Consider this part of the draft Policy to be justified and positively prepared.</p> <p>Part 6 of draft Policy DP15 refers to the need for new housing developments to provide functional areas of play and recreation. Although we do not disagree that areas of play are required for new housing developments, the draft Policy should acknowledge the specific open space needs for each settlement. At present, the policy is considered to be ineffective as it does not acknowledge that each settlement has specific open space needs, nor does it require new developments to provide the specific open space requirements for each settlement.</p> <p>Appendix D of the Open Space Recreation Needs Assessment and Appendix C of the Green Infrastructure Strategy Document provide a settlement breakdown of current open space provision and recommendations for future provision. To ensure draft Policy DP15 is effective in addressing the open space requirements of each distinct settlement, suggest Part 6 is amended to state that new developments should consider the findings within the most up to date open space assessment and engage with the local planning authority when determining provision. This would make the draft Policy positively prepared, effective and justified and therefore could be considered sound.</p> <p>Part 7 of draft Policy DP15, refers to the outcomes of the Shropshire Playing Pitch and Open Space Strategy (PPOSS). This document was published in October 2020, providing guidance to understand and assess the need for playing pitches. Have no specific comments to make on the findings of the PPOSS and support the needs to provide playing pitches and open space, in line with this strategy. Part 6 is considered to be positively prepared and justified and therefore sound.</p>
A0628	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP15	No	No	Yes	<p>In draft Policy DP15 support proposed notion of 'quality over quantity', when it comes to open space. However, concerned by the specific 30sqm per person figure which is set out in part 2 of the draft Policy.</p> <p>Consider this approach is unjustified. The 30sqm per person figure seems to be chosen at random with no evidence provided as to how it has been calculated or come to. There is also no evidence the provision of open space is an issue in Shropshire (there are a range of parks and open countryside that residents will be able to take advantage of).</p> <p>Open space which is shared should not be calculated on the same basis as an individual garden. Shared open space, of say a block of flats, would be used by multiple residents of different flats, whereas a garden would be private to only that house. If the council can evidence that there is a need for a specific figure of open space per person then request a lower figure is designated per person when it comes to shared open space.</p> <p>Furthermore, request the policy takes a view that all open space should first and foremost be design-led, informed by the character and context of the development proposed. Shropshire should use flexibility in its approach towards open space, and judge each site's provision on a case-by-case basis.</p>
A0629	B007-27	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	<p>All DPs do not &amp; should contain an explicit link to the ways they will assist in achieving net zero carbon; Quality and quantity are important and need to be considered more equally</p>
A0635	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP15	Not Specified	Not Specified	Not Specified	<p>DP15 gives very limited recognition of the value of open space for informal recreation such as walking. We recognise that this can be provide by green infrastructure under DP14 policies. However, where green infrastructure provision is not possible (Policy DP15 5), it is important that some of the open space should include areas suitable for informal recreation such as walking.</p>
A0014	B071	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP16	Not Specified	Not Specified	Not Specified	<p>Species for landscaping should be of local provenance wherever possible, unless there are other environmental justifications.</p> <p>Landscaping opportunities afforded by green roofs and facades should be encouraged.</p>
A0348	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP16	Not Specified	Yes	Not Specified	<p>Reference to heritage assets and setting in Criterion 3d of draft Policy DP16 is welcomed.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0608	B014	Suggest a flexible approach is taken to open space by the Council, similar to the Epping Forest example (see summary of main issues), where well developed schemes can positively help in meeting the requirements for open space and rigid adherence to formulaic standards have the potential to stifle good design.	The Council considers that this policy approach provides consistency and certainty to developers and notes that Draft Policy DP15 provides appropriate flexibility in instances where the development is able to provide a particularly high quality of open space on site which meets the needs of all residents. No change proposed	No	DP15. Open Space and Recreation
A0609	B018	Part 6 of draft Policy DP15 should be amended to state require new development to consider the findings within the most up to date open space assessment and engage with the local planning authority when determining provision of functional areas of play and recreation.	The Council does not consider the proposed amendment is necessary.	No	DP15. Open Space and Recreation
A0628	B003	Reduce the open space per person required in draft Policy DP15. The draft Policy should take the view that all open space should first and foremost be design-led, informed by the character and context of the development proposed, judging each site's provision on a case-by-case basis.	The Council considers that this policy approach provides consistency and certainty to developers and notes that Draft Policy DP15 provides appropriate flexibility in instances where the development is able to provide a particularly high quality of open space on site which meets the needs of all residents. No change proposed	No	DP15. Open Space and Recreation
A0629	B007-27	Explicitly identify within the policy how it will assist in achieving net zero carbon; Quality and quantity need to be considered more equally	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP15. Open Space and Recreation
A0635	B001	Policy DP15. 5 Relating to where green infrastructure provision cannot be achieved. This should be amended to state that "open space provision should aim to include areas of natural greenspace for informal recreation such as walking and should be located appropriately within the site in order to offer the best opportunity for access to all residents"	The Council considers that all open space provision within development will be publicly accessible and that therefore, there is no need to specifically reference opportunities for walking.	No	DP15. Open Space and Recreation
A0014	B071	1. Draft Policy DP16 should specify that planting should be of local provenance wherever possible, unless there are other environmental justifications. 2. Landscaping opportunities afforded by green roofs and facades should be encouraged.	1. Paragraph 4 of the Policy states that native species of local provenance are preferred. 2. This amendment is not considered necessary.	No	DP16. Landscaping of New Development
A0348	B018	N/A	Support welcomed	No	DP16. Landscaping of New Development

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0393	B028	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0608	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP16	Not Specified	No	Not Specified	Draft Policy DP16 should be amended in order to be found sound, be fully justified, effective and compliant with national policy: Part 2 of draft Policy DP16 should be amended to reference minimising harm rather than avoiding harm to existing features of landscape or ecological value or with heritage significance. With reference to heritage and conservation, the degree of harm and the importance attached to it should be consistent with Chapter 16 of the National Planning Policy Framework (NPPF), which requires the harm to the significance of any heritage asset to be taken into account. Part 6 of draft Policy DP16 regarding trees within adoptable areas should be amended to recognise that tree planting on adoptable areas will require County Highways agreement.
A0609	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP16	Not Specified	Yes	Not Specified	Supportive draft Policy DP16 which seeks to create and maintain attractive and well-designed environments. Endorse the provision of landscaping within new developments. Draft Policy SP16 lists a number of criteria that landscape schemes should meet, the criteria provided within Part 3 is akin to paragraph 127c of the National Planning Policy Framework (NPPF). Policy DP16 is considered to be consistent with national policy, positively prepared and therefore is considered to be sound.
A0629	B007-28	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0005	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18	Not Specified	No	Not Specified	Section from the Shropshire Landscape Visual Sensitivity Study referenced in the local plan has contradictory statements and makes no reference to the visual impact of existing properties adjacent to or overlooking the proposed development. "Views from dispersed individual properties and farmsteads and recreational users of the PRoW network are typically highly susceptible to changes to their surroundings". Contradicted by Summary: "The potential to accommodate new development within the parcel with appropriate mitigation, combined with the type of receptors present, means views experienced are of medium sensitivity to change arising from new housing"
A0060	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17	No	No	Not Specified	The strategic housing and employment allocations in Shifnal do not conform with Policy DP17 because they are not properly assessed against other sites in the Sustainability Appraisal nor are reasons given for rejecting alternative sites contrary to Section 13 of the NPPF (Protecting Green Belt Land). The Sustainability Appraisal (pages 91 – 96) finds Sites SHF018b and P15b score poorly for overall sustainability and much of the proposed 'safeguarded land also gets lowish scores but are included in the proposed sites. The extension east of Upton Lane (SHF018d) is contrary to national policy, as no exceptional circumstances are provided for its release. SC do not correctly apply the findings of the Green Belt Review Assessment to SHF018d which constitutes an unacceptable encroachment into the countryside, with no recognisable, permanent boundary, causing High Harm to the Green Belt and extending east of Upton Lane which is a clearly defined Green Belt boundary. This indicates no exceptional circumstances for this land release given the availability of alternative sites causing Less Harm particularly SHF018a now proposed as safeguarded land. SC state the Green Belt land releases for employment use (SHF018b and SHF018d) are of Moderate to High Harm but land east of Upton Lane has a High Harm to the Green Belt and landscape. SHF018d is part of Broad Area 29 In the Green Belt Review containing the proposed MAAC site intended to be removed from the Green Belt further causing moderate to high harm with no justification for these Green Belt land releases.
A0286	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17	No	No	No	The strategic housing and employment allocations in Shifnal do not conform with Policy DP17 because they are not properly assessed against other sites in the Sustainability Appraisal nor are reasons given for rejecting alternative sites contrary to Section 13 of the NPPF (Protecting Green Belt Land). The Sustainability Appraisal (pages 91 – 96) finds Sites SHF018b and P15b score poorly for overall sustainability and much of the proposed 'safeguarded land also gets lowish scores but are included in the proposed sites. The extension east of Upton Lane (SHF018d) is contrary to national policy, as no exceptional circumstances are provided for its release. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0393	B028	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP16. Landscaping of New Development
A0608	B015	Part 2 of draft Policy DP16 should be amended to reference minimising harm rather than avoiding harm to existing features of landscape or ecological value or with heritage significance. Part 6 of draft Policy DP16 should be amended to state "Trees within adoptable areas should be, where practical and in agreement with County Highways, incorporated as part of the infrastructure planning and design stage in accordance with current best practice".	Paragraph 2 of Policy DP16 requires landscaping to be in accordance with Policy DP23, the Historic Environment, so the Council considers the proposed amendments are not necessary. The Council also does not consider the proposed change to paragraph 6 to be necessary.	No	DP16. Landscaping of New Development
A0609	B019	N/A	Support welcomed.	No	DP16. Landscaping of New Development
A0629	B007-28	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP16. Landscaping of New Development
A0005	B003	These contradictions should be investigated and clarified, with reference made to the impact on adjacent properties. There is also no reference to the loss of green space and associated wildlife corridor this area currently affords, or the additional traffic that would be created on an already highly congested local road network.	The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that as such, the proposed amendments are not necessary. No change proposed.	No	DP17. Landscape and Visual Amenity
A0060	B016	See summary of main issues.	Policy DP17 requires development proposals to assess their impact on landscape and visual amenity and will apply to any planning applications on sites SHF018b, P15b and SHF018d. The principles behind policy DP17 have been applied through the Sustainability Appraisal and Site Assessment process which considered the landscape and visual sensitivity of all SHLAA sites based on the Council's Landscape and Visual Sensitivity Study.	No	DP17. Landscape and Visual Amenity
A0286	B015	See summary of main issues.	Policy DP17 requires development proposals to assess their impact on landscape and visual amenity and will apply to any planning applications on sites SHF018b, P15b and SHF018d. The principles behind policy DP17 have been applied through the Sustainability Appraisal and Site Assessment process which considered the landscape and visual sensitivity of all SHLAA sites based on the Council's Landscape and Visual Sensitivity Study.	No	DP17. Landscape and Visual Amenity

A0313	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17	No	No	Not Specified	The strategic housing and employment allocations in Shifnal do not conform with Policy DP17 because they are not properly assessed against other sites in the Sustainability Appraisal nor are reasons given for rejecting alternative sites contrary to Section 13 of the NPPF (Protecting Green Belt Land). The Sustainability Appraisal (pages 91 – 96) finds Sites SHF018b and P15b score poorly for overall sustainability and much of the proposed 'safeguarded land also gets lowish scores but are included in the proposed sites. The extension east of Upton Lane (SHF018d) is contrary to national policy, as no exceptional circumstances are provided for its release. SC do not correctly apply the findings of the Green Belt Review Assessment to SHF018d which constitutes an unacceptable encroachment into the countryside, with no recognisable, permanent boundary, causing High Harm to the Green Belt and extending east of Upton Lane which is a clearly defined Green Belt boundary. This indicates no exceptional circumstances for this land release given the availability of alternative sites causing Less Harm particularly SHF018a now proposed as safeguarded land. SC state the Green Belt land releases for employment use (SHF018b and SHF018d) are of Moderate to High Harm but land east of Upton Lane has a High Harm to the Green Belt and landscape. SHF018d is part of Broad Area 29 In the Green Belt Review containing the proposed MAAC site intended to be removed from the Green Belt further causing moderate to high harm with no justification for these Green Belt land releases.
A0348	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17	Not Specified	Yes	Not Specified	Reference to the Shropshire Landscape Typology within draft Policy DP17 is welcomed as aware this typology includes historic landscape character information.
A0393	B029	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0609	B020	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17	Not Specified	Yes	Not Specified	Fully support draft Policy DP17. It recognises the need to respect, safeguard and wherever possible, restore or enhance landscape character and visual amenity in Shropshire. Have no concerns regarding the soundness of this draft Policy.
A0629	B007-29	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0636	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17	No	No	No	The strategic housing and employment allocations in Shifnal do not conform with Policy DP17 because they are not properly assessed against other sites in the Sustainability Appraisal nor are reasons given for rejecting alternative sites contrary to Section 13 of the NPPF (Protecting Green Belt Land). The Sustainability Appraisal (pages 91 – 96) finds Sites SHF018b and P15b score poorly for overall sustainability and much of the proposed 'safeguarded land also gets lowish scores but are included in the proposed sites. The extension east of Upton Lane (SHF018d) is contrary to national policy, as no exceptional circumstances are provided for its release. SC do not correctly apply the findings of the Green Belt Review Assessment to SHF018d which constitutes an unacceptable encroachment into the countryside, with no recognisable, permanent boundary, causing High Harm to the Green Belt and extending east of Upton Lane which is a clearly defined Green Belt boundary. This indicates no exceptional circumstances for this land release given the availability of alternative sites causing Less Harm particularly SHF018a now proposed as safeguarded land. SC state the Green Belt land releases for employment use (SHF018b and SHF018d) are of Moderate to High Harm but land east of Upton Lane has a High Harm to the Green Belt and landscape. SHF018d is part of Broad Area 29 In the Green Belt Review containing the proposed MAAC site intended to be removed from the Green Belt further causing moderate to high harm with no justification for these Green Belt land releases.
A0637	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17	No	No	No	The strategic housing and employment allocations in Shifnal do not conform with Policy DP17 because they are not properly assessed against other sites in the Sustainability Appraisal nor are reasons given for rejecting alternative sites contrary to Section 13 of the NPPF (Protecting Green Belt Land). The Sustainability Appraisal (pages 91 – 96) finds Sites SHF018b and P15b score poorly for overall sustainability and much of the proposed 'safeguarded land also gets lowish scores but are included in the proposed sites. The extension east of Upton Lane (SHF018d) is contrary to national policy, as no exceptional circumstances are provided for its release. SC do not correctly apply the findings of the Green Belt Review Assessment to SHF018d which constitutes an unacceptable encroachment into the countryside, with no recognisable, permanent boundary, causing High Harm to the Green Belt and extending east of Upton Lane which is a clearly defined Green Belt boundary. This indicates no exceptional circumstances for this land release given the availability of alternative sites causing Less Harm particularly SHF018a now proposed as safeguarded land. SC state the Green Belt land releases for employment use (SHF018b and SHF018d) are of Moderate to High Harm but land east of Upton Lane has a High Harm to the Green Belt and landscape. SHF018d is part of Broad Area 29 In the Green Belt Review containing the proposed MAAC site intended to be removed from the Green Belt further causing moderate to high harm with no justification for these Green Belt land releases.
A0014	B072	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18	Not Specified	Not Specified	Not Specified	Welcome this policy and hope it will address concerns about the number of intensive livestock unit developments in the County. Special Areas of Conservation, other than the River Clun, and the majority of sensitive habitats are beyond critical thresholds.

A0636	B015	See summary of main issues.	Policy DP17 requires development proposals to assess their impact on landscape and visual amenity and will apply to any planning applications on sites SHF018b, P15b and SHF018d. The principles behind policy DP17 have been applied through the Sustainability Appraisal and Site Assessment process which considered the landscape and visual sensitivity of all SHLAA sites based on the Council's Landscape and Visual Sensitivity Study.	No	DP17. Landscape and Visual Amenity
A0637	B015	See summary of main issues.	Policy DP17 requires development proposals to assess their impact on landscape and visual amenity and will apply to any planning applications on sites SHF018b, P15b and SHF018d. The principles behind policy DP17 have been applied through the Sustainability Appraisal and Site Assessment process which considered the landscape and visual sensitivity of all SHLAA sites based on the Council's Landscape and Visual Sensitivity Study.	No	DP17. Landscape and Visual Amenity
A0014	B072	Draft Policy DP18 should recognise that Special Areas of Conservation, other than the River Clun, and the majority of sensitive habitats are beyond critical thresholds.	The Plan should be read as a whole. Policy DP12 sets out requirements for HRA of development proposals so the Council does not consider it necessary to make the suggested change.	No	DP18. Pollution and Public Amenity

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0014	B073	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18(4)	Not Specified	Not Specified	Not Specified	Welcome greater protection for the County's best agricultural land. Additional consideration should be given to peatland areas where development should be further resisted to prevent loss of future opportunities for restoration, biodiversity gain and carbon sequestration.
A0123	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18	No	No	Yes	Support provisions of draft Policy DP18, and they are addressed and implemented in relation to the assessment of the current planning application relating to the Shrewsbury Sustainable Urban Extension (SUE) West and the upcoming application on the NWWR. Both applications raise significant concerns in relation to impact on the environment including air, water, light and noise pollution and impact on the protected species and given current and draft policies expect sufficient documentation on these matters to support these applications and suitable safeguard secured.
A0124	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18	Yes	Yes	Yes	Support the modifications made at Reg 18 to part 10g of the policy and to paragraph 4.174.
A0255	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 (STC002 and P58a)	Not Specified	No	Not Specified	Consider the draft Shropshire Local Plan is unsound. The proposed employment development at Stanmore (STC002 and P58a) conflicts with most of the issues set out in draft Policy DP18 because they are in "countryside", in the Green Belt and distant from significant areas of residential development. The local environment is relatively calm/quiet, it is identified as Grade 3 agricultural land (adjoining Grade 2 so likely Grade 3a) and there is good air quality. Note Appendix 6 of the draft Shropshire Local Plan includes a note indicating Bridgnorth is a preferred site (though unspecified) for 'recycling and environmental industries'. This is very concerning if it is intended to imply Stanmore would be a suitable place to locate recycling or environmental industries. This site is entirely inappropriate for such industries (Green Belt and open countryside). There is current experience in the near vicinity of such operations causing difficulties. The proposed employment development at Stanmore is unjustified and un-evidenced. It will, in fact add to local pollution issues and would harm public amenity.
A0349	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18	Not Specified	Not Specified	Not Specified	Natural England supports this policy especially with regard to requirements for air quality assessments and consideration of tranquillity within the Shropshire Hills Area of Outstanding Natural Beauty (AONB).
A0393	B030	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0402	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18	Yes	Yes	Yes	Generally supportive of draft Policy DP18 and in particular reference to land instability in para 6. Paras 178a and 179 of the National Planning Policy Framework (NPPF) require consideration of site suitability to take account of risks arising from land instability and places the responsibility for securing safe development on the developer. Land stability/ground conditions are also material considerations. Consider the proposed explanation of draft Policy DP18, consistent with the National Planning Policy Framework (NPPF), could be expanded to provide further clarification on this matter, including examples of where such requirements could apply to aid understanding and increase effectiveness. This would also be more consistent with the approach taken in respect of other elements of the policy. For example it is often not recognised that construction in proximity to canals can adversely affect stability of cuttings and embankments, impacting on the structural integrity of canal corridors and associated infrastructure, which could result in a breach of the canal. The title of the policy may also need to be extended to include reference to ground conditions to reflect issues addressed and aid navigation.
A0419	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18	Yes	Yes	Yes	Pleased to see draft Policy DP18 includes consideration of unstable land and identifies that appropriate information will be required to support development proposals where land instability poses a potential risk.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0014	B073	1. N/A 2. Para 4 of draft Policy DP18 should provide further protection of peatland areas.	1. Support welcomed. 2. The Plan should be read as a whole. Policy DP12 sets out requirements to protect habitats so the Council does not consider it necessary to make the suggested change.	No	DP18. Pollution and Public Amenity
A0123	B012	N/A	Noted.	No	DP18. Pollution and Public Amenity
A0124	B003	n/a	Support welcomed	No	DP18. Pollution and Public Amenity
A0255	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). They are consistent with relevant draft Policies within the draft Shropshire Local Plan. Identification of proposed allocations was informed by a proportionate and robust site assessment, which included consideration of public protection issues, agricultural land quality and Green Belt. Within the adopted SAMDev Plan (2015), allocation W039 (Land at Old Worcester Road), which is a proposed Saved Allocation within the draft Shropshire Local Plan, has a presumption in favour of the development of recycling and environmental industries. Proposed allocations STC002 and P58a are proposed to be targeted towards the engineering and advanced manufacturing sectors, complement the employment offer on the existing Industrial Estate and contribute towards the objectives of the Shropshire Economic Growth Strategy. Any amenity and other impacts would be a material planning consideration taken into account in decision making in any future Planning Applications.	No	DP18. Pollution and Public Amenity
A0349	B011	n/a	Support welcomed.	No	DP18. Pollution and Public Amenity
A0393	B030	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP18. Pollution and Public Amenity
A0402	B003	Amend the proposed explanation of draft Policy DP18, to include examples of where land instability requirements/considerations could apply. For example it is often not recognised that construction in proximity to canals can adversely affect stability of cuttings and embankments, impacting on the structural integrity of canal corridors and associated infrastructure, which could result in in a breach of the canal. Revise the title of draft Policy DP18 to include reference to ground conditions.	The Council considers that the policy addresses all relevant issues appropriately. No change proposed.	No	DP18. Pollution and Public Amenity
A0419	B001	N/A	Noted.	No	DP18. Pollution and Public Amenity

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0444	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18	Not Specified	No	Not Specified	There are just two short paragraphs addressing air quality impacts from proposed development which recommend proportionate assessment should be undertaken. However this policy does not differentiate between the range of potential air quality concerns and impacts that developments may give rise to. I have been researching intensive poultry units and major air pollution concerns include odour, ammonia, particulate matter, diesel emissions from HGVs, or other noxious air borne emissions generated by such agricultural processes as described in the government Clean Air Strategy or EA air pollution publications. Concerns here include the impacts on biodiversity and also effects on people's health and amenity in the vicinity. The document treats air pollution as if it was a singular phenomenon, whereas in fact it is more complex than noise pollution or light pollution both of which are given more space in this section of the plan. There is also no reference (unlike in paragraphs 7 & 8 on noise) to guidance documents such as the Council's own ammonia emissions guidance or industry guidance on the assessment of odour for planning published by the Institute of Air Quality Management in 2018. A proposed development such as an IPU may require several different air quality assessments. They also need to take into account cumulative effects of existing operations, including any just over county boundaries. Paragraph 2.27 of the HRA document states intensive livestock units may pollute sites up to 10km away. Paragraph 2.28 implies the council does not know where all these facilities currently are, which seems very worrying and would also imply that cumulative impacts could not be assessed effectively. I am aware of a number of planning applications where cumulative impacts of other IPUs very close by have been ignored/omitted and this wording does not give confidence that this will be addressed in future.
A0600	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18	Yes	No	Yes	Noise sensitive development proposals close to areas where defence activities create noise can lead to noise complaints being submitted to the MOD. These can in turn result in MOD having to alter the way in which operational activity is undertaken or, at worst, lead to MOD having to withdraw from a site. This clearly has the potential to adversely impact on national defence interests and is contrary to para 95 of the National Planning Policy Framework (NPPF). Shropshire includes a number of MOD sites and the whole of Shropshire is covered by Low Flying Area 9 (LFA9), which is a dedicated helicopter training area for military helicopters. This means defence operations have the potential to impact on noise-sensitive development (examples provided) of which increasing numbers are being seen and in many cases they fail to adequately assess noise arising from defence activities. Welcome changes to draft Policy DP18 from an earlier draft, including inclusion of Part 11. However, consider wording does not go far enough to protect national defence interests as it only refers to development proposals "within a designated Ministry of Defence Safeguarding Zone" not having an adverse effect on an operational defence site, but there are other operational activities beyond these areas (for example LFA9 and Nesscliffe Training Area) and there may be occasions where development has the potential to impact on them. As such, to fully protect defence interests in accordance with para 95 of the NPPF, suggest the text is updated to recognise this. Welcome reference to requirement for noise assessments for development that would be sensitive to existing noise sources and a requirement for the MOD to be consulted where the existing noise source is related to defence activities in para 4.172 of the explanation to draft Policy DP18. However, to ensure that the risk of future noise complaints is reduced as far as possible (and consistent with reference to SHA019) consider a requirement to make future occupiers aware of the presence of military flying activities in the area should also be included. In principle support para 4.176 of the explanation to draft Policy DP18. However, it requires clarification, as it is not completely accurate, does not fully protect national defence interests due to the reliance on safeguarding zones and lack of reference to LFA9. Changes will also ensure the wording is appropriately justified and effective.
A0609	B021	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18	Not Specified	Yes	Not Specified	Supportive draft Policy DP18 which seeks to safeguard environmental quality and public amenity, minimise pollution, mitigate adverse effects and maximise opportunities for improvements where practicable. The criteria listed therein are considered to generally reflect the aims of the National Planning Policy Framework (NPPF) to prevent development from contributing to, or being put at risk from, unacceptable levels of soil, air, light or noise pollution or land instability. Have no concerns regarding the soundness of this draft Policy.
A0629	B007-30	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0005	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP19	Not Specified	No	No	Assurances should be sought from the appropriate utilities that the infrastructure will be sufficient to support any developments, together with any necessary funding obtained from both the utilities and developers prior to any development being considered. Any infrastructure changes or additions should be in place prior to further development, not after.
A0014	B074	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP19(3)	Not Specified	Not Specified	Not Specified	Proposals with any potential to effect water quality in Source Protection Zone 1 should be refused.
A0014	B075	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP19(6)	Not Specified	Not Specified	Not Specified	An explicit hierarchy of measures for conserving and enhancing watercourses and riverside habitats should be provided, with management the highest priority and compensation the lowest.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0444	B001	Council officers expert in air quality issues, should review the wording and add more detail to cover the issues identified, to the same level of detail as other pollution effects. In particular odour should be identified separately. The fact that air quality raises concerns about environmental, health and amenity impacts should be noted. 'Cumulative' should either be spelt out more specifically or a cross reference included to where cumulative impacts are defined elsewhere in the plan.	The Council considers that the requirements and level of detail of this policy are consistent with national planning policy and guidance and that as such, the proposed amendments are not necessary. No change proposed.	No	DP18. Pollution and Public Amenity
A0600	B003	Amend para 11 of draft Policy DP18 to state "Planning decisions should take wider security and defence requirements into account. Development proposals, in particular those within a designated Ministry of Defence Safeguarding Zone, must ensure that they have no adverse effect on an operational defence sites or activities." Amend para 4.172 of the explanation of draft Policy DP18 to include "Development for residential uses should ensure that future occupiers are aware that military aircraft may be seen and heard operating in the area and that aircraft may fly overhead." Amend para 4.176 of the explanation of draft Policy DP18 to include reference Low Flying Area 9 (LFA9) and clarify references to safeguarding zones.	Noted. Draft Policy DP18 recognises the importance of ensuring MOD operations are adequately considered in the context of new development proposals. For the purpose of clarity a series of minor modifications are proposed to Policy DP18 paragraph 11, the explanation to the policy paragraphs 4.172 and 4.176	Yes	DP18. Pollution and Public Amenity
A0609	B021	N/A	Noted.	No	DP18. Pollution and Public Amenity
A0629	B007-30	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP18. Pollution and Public Amenity
A0005	B001	Assurances should be sought from the appropriate utilities that the infrastructure will be sufficient to support any developments , together with any necessary funding obtained from both the utilities and developers prior to any development being considered. Any infrastructure changes of additions should be in place prior to further development, not after.	The Council's Statements of Common Ground with Severn Trent Water and Dwr Cymru Welsh Water show that the water infrastructure requirements identified in the Councils Water Cycle Study can be delivered.	No	DP19. Water Resources and Water Quality
A0014	B074	Para 3 of draft Policy DP19 should stipulate that proposals with any potential to effect water quality in Source Protection Zone 1 will be refused.	Amendment not accepted. Any discharge of pollutants which enter groundwater directly, or may enter into the soil and reach groundwater, is a groundwater activity. Such an activity requires an environmental permit which is administered by the Environment Agency. The planning system should not duplicate other regulatory regimes. No change proposed.	No	DP19. Water Resources and Water Quality
A0014	B075	Para 6 of draft Policy DP19 should provide a hierarchy of measures for conserving and enhancing watercourses and riverside habitats, ranging from management (highest) to compensation (lowest).	The Plan should be read as a whole. Policy DP12 sets out requirements for the conservation of habitats so the Council does not consider it necessary to make the suggested change.	No	DP19. Water Resources and Water Quality

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0014	B076	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP19(6 and 7)	Not Specified	Not Specified	Not Specified	Welcome aim to conserve, enhance, and restore river course and riverside habitats.
A0123	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP19	No	No	Yes	Note draft Policy DP19 seeks to protect the water environment and secure appropriate drainage. Trust necessary assessments and mitigations will be put in place in line with the provisions of the draft policy when reviewing the proposals associated with the Shrewsbury Sustainable Urban Extension (SUE) West and NWRR, to ensure that there will be no detrimental impacts on water storage capacity, water quality and the drainage requirements to protect adjacent land owners from surface water flooding.
A0347	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP19	No	No	Not Specified	Suggested amendments to make the policy more effective 1. Para 6: Proposals should help to conserve and enhance existing watercourses and riverside habitats in line with Policy DP12 wherever possible. Management, mitigation and compensation measures will be included should aim to improve water quality and create or enhance riverine and aquatic habitats 2. Point 1 should be amended to say "maintain" or to meet good status. 3. Point 2b should be revised to: "Prevented hazardous substances from entering groundwater and limit non-hazardous pollutants from entering groundwater." This applies to all groundwater, not just within SPZ1 / SPZ's. 4. Within Shropshire there are many people who rely on private water supply wells, boreholes and springs for their potable water. Proposals in rural settings not served by mains foul drainage must consider the issue of appropriate foul drainage provision. Private potable groundwater should be considered as part of the planning process – such might be apparent through a water features survey and you might seek a default '50m radius' from any such supply to ensure this potential risk is covered. 5. Paragraph 3. We agree as there are certain development proposals (uses or design aspects) within a SPZ1, or the protection zone of a private potable groundwater supply, which will result in an 'Objection in Principle' from us. We suggest you could add 'Development within SPZ2 and 3 will only be permitted where an appropriate risk assessment is provided'. 6. Paragraph 4. Notwithstanding the commitment to high levels of water efficiency in new development, the Local Authority should ensure that it has fully taken into account the availability of water for new developments, particularly in areas of water stress. 7. Paragraph 5c: Non mains drainage should assess water quality impacts. 8. Paragraph 7: (re river restoration...) move to flood risk section (doesn't really sit with water resource/quality).
A0393	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	In respect of blue networks, referenced in Shropshire Test Policy SP1 we agree with policy DP19 (water resources and water quality) however promotion of the Shrewsbury North West Relief Road (NWRR) by Shropshire Council within the Local Plan is inconsistent with Para 3 of this policy as the proposed road includes a major roundabout across the inner Source Protection Zone (SPZ1) of the Shelton Water Supply. All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0609	B022	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP19	Not Specified	Yes	Not Specified	Draft policy DP19 seeks to ensure development does not adversely affect the quality, quantity of flow of both of ground and surface water and ensure that there is adequate water infrastructure in place to meet the development's demand. Have no concerns regarding the soundness of this policy.
A0629	B007-6	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	In respect of blue networks, referenced in Shropshire Test Policy SP1 we agree with policy DP19 (water resources and water quality) however promotion of the Shrewsbury North West Relief Road (NWRR) by Shropshire Council within the Local Plan is inconsistent with Para 3 of this policy as the proposed road includes a major roundabout across the inner Source Protection Zone (SPZ1) of the Shelton Water Supply. All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0671	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP19	Not Specified	Not Specified	Not Specified	United Utilities' strong preference is for development to take place outside any Environment Agency designated Source Protection Zone 1 (SPZ1). Welcome the provision within your adopted development plan policy relating to groundwater, recommend this is strengthened - draft Policy provided within representation. Also, development proposals (particular reference to wind) on water catchment land can have an impact on water supply resources. Recommend inclusion of a policy which identifies the need to engage with the statutory undertaker for water to determine whether any proposal is on land used for public water supply catchment purposes.

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0014	B077	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP20(1)	Not Specified	Not Specified	Not Specified	Complying with building regulations should be a minimum requirement.
A0014	B078	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP20(2)	Not Specified	Not Specified	Not Specified	Do not consider that achieving BREEAM 'good' status is ambitious enough (this is the second worst standard).
A0148	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP20	Not Specified	Not Specified	Not Specified	Should the Council wish to adopt the higher optional standard for water efficiency of 110 litres per person per day, a clear need for this should be established based on the following, as also advised by the PPG – existing sources of evidence, consultations with the local water and sewerage company, the Environment Agency and catchment partnerships and consideration of the impact on viability and housing supply of such a requirement. The Shropshire Water Cycle Study (2020), which forms part of the Council's evidence base, confirms that the regions served by Severn Trent and United Utilities are areas of 'moderate' water stress and that Shropshire is not in an area of high water stress compared with the south and east of England.
A0347	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP20	No	No	Not Specified	1. Support. 2. Update: we published our consultation on the updated method and initial outcomes for determining areas of 'water stress' in England on 11 February 2021. The final assessment will provide the Environment Agency's advice to the Secretary of State on the water company areas that should be determined to be in areas of serious water stress. 3. Note: Shropshire is showing as an area of water stress.
A0393	B031	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0598	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP20	Not Specified	No	Not Specified	With regard to criterion 1 of draft Policy DP20, regarding requirements for water efficiency requirements in exceeds of Building Regulations, consider it is not the purpose of development plans to repeat or restate standards applied through separate legislation. Similarly, whilst the Council considers that setting local standards or requirements for building sustainability is justified as a matter of principle, the Council presents no evidence to support the inclusion of standards already sought through Building Regulation. Consequently, contends it is not appropriate or necessary to include specific reference to Building Regulations in a development plan policy and express this as a criteria to be applied to new development if such standards are sought in any event. The policy is therefore not soundly-based (not effective and positively prepared).
A0600	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP20	Yes	Yes	Yes	Support reference to equivalent standards to BREEAM in part 2 of draft Policy DP20 - changed from an earlier draft. This will enable Shropshire Council to consider proposals assessed with the Defence Related Environmental Assessment Method (DREAM) which is an environmental assessment tool developed by the DIO for new build and refurbishment projects on the defence estate.
A0608	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP20	Not Specified	No	Not Specified	If the Council wishes to adopt the optional standard for water efficiency of 110 litres per person per day, as specified within draft Policy DP20, then this should be justified against the criteria in National Planning Policy Guidance (ID 56-013-20150327 to 56-017-20150327). Also, under current Building Regulations, all new dwellings achieve a mandatory level of water efficiency of 125 litres per day per person, which is a higher standard than that achieved by much of the existing housing stock. Expectation of a programme of water efficiency promotion and consumer education in draft Policy DP20 is not required if minimisation of water use through the development construction is being implemented. This part of the policy requires further justification and clarity as to what this entails and how long it is expected for. This policy should be amended to provide further justification and clarity in order to be found sound, needs to be positively prepared so it can be fully justified and effective.
A0629	B007 - 31	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0014	B077	Para 1 of draft Policy DP20 should recognise that compliance with Building Regulations standards on water efficiency should be a minimum.	As explained within the para 4.185 of the Explanation of draft Policy DP20, Government has introduced an optional new Building Regulation standard that can be required through a Local Plan policy if it addresses a clearly evidenced need and its impact on viability has been considered. The Council can then apply the optional requirement as a planning condition on residential development proposals. This will be overseen by Building Control bodies (local authorities or approved inspectors). The optional requirement set out in the Building Regulation restricts water use to 110 litres per person per day whereas the normal requirement is 125 litres per person per day. The Shropshire Water Cycle Study recommends that new residential development in Shropshire adopts the 110 litres per person per day standard. This has been considered through the Shropshire Viability Study and forms the basis for this policy. It can be met through either a fittings-based approach, which imposes maximum consumption rates for various fittings such as WCs, basin taps, and showers, or by calculating the whole house water consumption using a 'water efficiency calculator' for new dwellings. As such para 1 of draft Policy DP20 is not suggesting that development can fail to comply with Building Regulations, rather it offers flexibility regarding the achievement of the optional standard introduced within the draft Policy, in circumstances where it is demonstrated how and why it cannot be attained.	No	DP20. Water Efficiency
A0014	B078	Para 2 of draft Policy DP20 should require the achievement of a higher BREEAM standard than 'Good' for non-domestic buildings in relation to water efficiency.	The Council considers that a 'Good 'BREEAM standard is appropriate for non-domestic properties.	No	DP20. Water Efficiency
A0148	B009	The requirement for the higher water efficiency standard is unsound because it is unjustified and inconsistent with national policy. This policy requirement should be deleted.	The government has introduced an optional new Building Regulation standard that can be required through a Local Plan policy if it addresses a clearly evidenced need and its impact on viability has been considered. The Shropshire Water Cycle Study provides the evidence for a standard of 110 litres per day per person and this has been assessed through the Shropshire Viability Study. No change proposed.	No	DP20. Water Efficiency
A0347	B003	n/a	1. Support welcomed. 2. Noted. No change proposed. 3. Noted. No change proposed.	No	DP20. Water Efficiency
A0393	B031	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP20. Water Efficiency
A0598	B014	Delete para 1 of draft Policy DP20.	Noted. As explained within the para 4.185 of the Explanation of draft Policy DP20, Government has introduced an optional new Building Regulation standard that can be required through a Local Plan policy if it addresses a clearly evidenced need and its impact on viability has been considered. The Council can then apply the optional requirement as a planning condition on residential development proposals. This will be overseen by Building Control bodies (local authorities or approved inspectors). The optional requirement set out in the Building Regulation restricts water use to 110 litres per person per day whereas the normal requirement is 125 litres per person per day. The Shropshire Water Cycle Study recommends that new residential development in Shropshire adopts the 110 litres per person per day standard. This has been considered through the Shropshire Viability Study and forms the basis for this policy. It can be met through either a fittings-based approach, which imposes maximum consumption rates for various fittings such as WCs, basin taps, and showers, or by calculating the whole house water consumption using a 'water efficiency calculator' for new dwellings.	No	DP20. Water Efficiency
A0600	B004	N/A	Noted.	No	DP20. Water Efficiency
A0608	B016	Adoption of the optional standard for water efficiency of 110 litres per person per day, within draft Policy DP20, needs justified against the criteria in National Planning Policy Guidance. Expectation of a programme of water efficiency promotion and consumer education is not necessary.	The government has introduced an optional new Building Regulation standard that can be required through a Local Plan policy if it addresses a clearly evidenced need and its impact on viability has been considered. The Shropshire Water Cycle Study provides the evidence for a standard of 110 litres per day per person and this has been assessed through the Shropshire Viability Study. The Council considers that it is reasonable to expect major development to contribute to raising awareness of the need to use water wisely. No change proposed.	No	DP20. Water Efficiency
A0629	B007 - 31	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP20. Water Efficiency

A0014	B079	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP21(7c)	Not Specified	Not Specified	Not Specified	How can development in Flood Zone 3 achieve no net loss of floodplain storage.
A0014	B081	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.190	Not Specified	Not Specified	Not Specified	A potential failure of the Sequential Test is it identifies the 'least bad' option, highlighted by the fact some allocated sites are in flood zone 2/3.
A0060	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP21	No	No	Not Specified	Policy DP21 sets out that, "the safeguarding of people and property and mitigation of the effects of climate change, will be achieved by directing development to areas at least risk of flooding". SC's Strategic Flood Risk Assessment sets out that the majority of Shifnal is located within Flood Zone 1, with the area immediately around the Wesley Brook located within Flood Zones 2 and 3 (1 being low risk and 3 being high). This report has also identified that Shifnal has one of the highest surface water flood risks in the county and would be the most vulnerable to cumulative increases in flood risk due to new development. With most of this risk coming from Wesley Brook being a source to its confluence with River Worfe. In accordance with paragraph 157 of the NPPF it should be noted that the Sequential and Exception Test of Shifnal's proposed allocated sites in the Pre-Submission Draft Local Plan does not fully recognise Shifnal's identified surface water flood issues.
A0123	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP21	No	No	Yes	Accept flood risk management proposed in Shropshire are evolving, and the recent proposals relating to the potential for flood alleviation schemes as part of the North West Relief Road (NWRR) have been published following the publication of this consultation. Assume these matters will be presented for consultation in future and relevant stakeholders potentially affected will be contacted directly by the Council. Concerned that flood alleviation proposals created as part of the NWRR do not risk the future operation/increase potential flood risk at Oxon Hall caravan park.
A0286	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP21	No	No	No	Policy DP21 sets out that, "the safeguarding of people and property and mitigation of the effects of climate change, will be achieved by directing development to areas at least risk of flooding". SC's Strategic Flood Risk Assessment sets out that the majority of Shifnal is located within Flood Zone 1, with the area immediately around the Wesley Brook located within Flood Zones 2 and 3 (1 being low risk and 3 being high). This report has also identified that Shifnal has one of the highest surface water flood risks in the county and would be the most vulnerable to cumulative increases in flood risk due to new development. With most of this risk coming from Wesley Brook being a source to its confluence with River Worfe. In accordance with paragraph 157 of the NPPF it should be noted that the Sequential and Exception Test of Shifnal's proposed allocated sites in the Pre-Submission Draft Local Plan does not fully recognise Shifnal's identified surface water flood issues.
A0313	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP21	No	No	Not Specified	Policy DP21 sets out that, "the safeguarding of people and property and mitigation of the effects of climate change, will be achieved by directing development to areas at least risk of flooding". SC's Strategic Flood Risk Assessment sets out that the majority of Shifnal is located within Flood Zone 1, with the area immediately around the Wesley Brook located within Flood Zones 2 and 3 (1 being low risk and 3 being high). This report has also identified that Shifnal has one of the highest surface water flood risks in the county and would be the most vulnerable to cumulative increases in flood risk due to new development. With most of this risk coming from Wesley Brook being a source to its confluence with River Worfe. In accordance with paragraph 157 of the NPPF it should be noted that the Sequential and Exception Test of Shifnal's proposed allocated sites in the Pre-Submission Draft Local Plan does not fully recognise Shifnal's identified surface water flood issues.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0014	B079	An explanation should be provided as to how development in Food Zone 3 achieve no net loss of floodplain storage.	This policy follows national planning policy and as such is considered appropriate.	No	DP21. Flood Risk
A0014	B081	Unclear.	This policy follows national planning policy and as such is considered appropriate.	No	DP21. Flood Risk
A0060	B017	See summary of main issues.	The application of the Sequential and Exception Tests to all proposed site allocations is based on the information contained in the Council's Strategic Flood Risk Assessments (Levels 1 and 2) and follows national planning policy and guidance. As such the Council feels it is accurate and appropriate.	No	DP21. Flood Risk
A0123	B014	Consult/liaise with relevant stakeholders on proposals regarding flood risk management schemes.	Noted. This goes beyond the scope of the draft Shropshire Local Plan.	No	DP21. Flood Risk
A0286	B016	See summary of main issues.	The application of the Sequential and Exception Tests to all proposed site allocations is based on the information contained in the Council's Strategic Flood Risk Assessments (Levels 1 and 2) and follows national planning policy and guidance. As such the Council feels it is accurate and appropriate.	No	DP21. Flood Risk
A0313	B016	See summary of main issues.	The application of the Sequential and Exception Tests to all proposed site allocations is based on the information contained in the Council's Strategic Flood Risk Assessments (Levels 1 and 2) and follows national planning policy and guidance. As such the Council feels it is accurate and appropriate.	No	DP21. Flood Risk

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0347	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP21	No	No	Not Specified	<p>Suggestions to make the policy sound and more effective</p> <ol style="list-style-type: none"> <li>The policy is quite long and seems to duplicate some parts of the NPPF and NPPG guidance.</li> <li>Paragraph 7: We previously advised to focus on specific local Shropshire flood risk requirements linked to the SFRA e.g. flood risk reduction and betterment for 'all' proposals in flood zone 3 'including climate change' (rather than just those subject to the Exception Test).</li> <li>Flood risk reduction and betterment opportunities should be sought for all proposals in flood zone 3 (including climate change) not just part 10 of the policy... but specifically...In those catchments where the cumulative effect of development is likely to have the greatest impact on flood risk, (as set out in the SFRA Level 2)</li> <li>Paragraph 2: This part is confusing - 2. The Sequential Test is not needed for; a) Development on land allocated in this plan unless the use of the site (is a greater vulnerability that that allocated) or is not in accordance with the use specified in this Plan.</li> <li>Paragraph 4.191: The sequential approach is still necessary at FRA level e.g. specific proposals on site to guide development to the best, lowest risk areas and to avoid flood risk.</li> <li>Paragraph 4.194. New climate change figures for peak river flow are coming out and we will provide an update in due course. Maybe include a line at the end of this paragraph to refer to future EA updates.</li> <li>Paragraph 4.195. A separate (FRAP) permit or (LA permit) may be required.</li> <li>Paragraph 10 of the policy. We would welcome an inclusion to say that all development provides flood risk contributions to help bring forward new or existing flood defence improvement schemes.</li> <li>Introductory sentence to policy. The recognised flood risk policy hierarchy is to appraise, manage and reduce flood risk approach. This is normally looked at in terms of 'assess' – avoid, substitute (Sequential Test or Sequential Approach/Alternative uses), then control measures and mitigation (as a final option). Presumably by minimise flood risk in the first instance you mean avoid? And managing residual risk are those risks that remain after the usual appropriate design control mitigation has been fully considered/incorporated.</li> <li>Para 4.188. SFRA also considered/ included a level of 'climate change allowance' – appropriate 'at that time' (in line with government guidance) note to new emerging update to peak river flows (fluvial).</li> <li>Para 4.193. Suggested amendments in bold. This policy sets out when a site-specific Flood Risk Assessment (FRA) is needed to inform a planning proposal. In considering the safety of the development, the FRA must demonstrate the occupants of any new dwellings will have access to an area of "dry ground above the 1% river flood level plus climate change" or safe refuge.</li> <li>Where prior evacuation is the safest option, the refuge should be an area outside of 1% annual exceedance probability with climate change flood event from all sources. Where prior evacuation is not preferred, internal safe refuge must be provided at an appropriate level above the 1% with climate change, with appropriate freeboard, flood level. The FRA should provide an evidence base for the Council to determine which option is the safest for that particular proposal. This should include: FRA should demonstrate that the development has safe, pedestrian access above the 1% river flood level plus climate change. Pedestrian access should preferably remain flood free in a 1% river flood event plus climate change. However, in cases where this may not be achievable, the FRA may demonstrate that pedestrian access is acceptable based on an appropriate assessment of 'hazard risk' including water depth, velocity and distance to higher ground (above the 1% river flood level plus climate change). Reference should be made to DEFRA Hazard risk (FD2320) – 'Danger to People for Combinations of Depth &amp; Velocity' (see Table 13.1 – DEFRA/EA Flood Risk Assessment Guidance for New Development FD2320 at: <a href="http://evidence.environment-agency.gov.uk/FCERM/Libraries/FCERM_Project_Documents/FD2320_3364_TRP_pdf.sflb.ashx">http://evidence.environment-agency.gov.uk/FCERM/Libraries/FCERM_Project_Documents/FD2320_3364_TRP_pdf.sflb.ashx</a></li> </ol>
A0393	B032	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0608	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP21	Not Specified	Not Specified	Not Specified	Draft Policy DP21 is supported as it does not require sequential tests to be provided for allocated sites, unless the use proposed is not in accordance with the Plan, with further detail provided within Development Guidelines for allocated sites. However, the wording of para 2a of draft Policy DP21 should be tweaked to read: "a. Development on land allocated in this plan, unless the use of the site is not in accordance with the use specified in this Plan and falls within Flood Zones 2 and/or 3."
A0629	B007-32	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0636	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP21	No	No	No	Policy DP21 sets out that, "the safeguarding of people and property and mitigation of the effects of climate change, will be achieved by directing development to areas at least risk of flooding". SC's Strategic Flood Risk Assessment sets out that the majority of Shifnal is located within Flood Zone 1, with the area immediately around the Wesley Brook located within Flood Zones 2 and 3 (1 being low risk and 3 being high). This report has also identified that Shifnal has one of the highest surface water flood risks in the county and would be the most vulnerable to cumulative increases in flood risk due to new development. With most of this risk coming from Wesley Brook being a source to its confluence with River Worfe. In accordance with paragraph 157 of the NPPF it should be noted that the Sequential and Exception Test of Shifnal's proposed allocated sites in the Pre-Submission Draft Local Plan does not fully recognise Shifnal's identified surface water flood issues.
A0637	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP21	No	No	No	Policy DP21 sets out that, "the safeguarding of people and property and mitigation of the effects of climate change, will be achieved by directing development to areas at least risk of flooding". SC's Strategic Flood Risk Assessment sets out that the majority of Shifnal is located within Flood Zone 1, with the area immediately around the Wesley Brook located within Flood Zones 2 and 3 (1 being low risk and 3 being high). This report has also identified that Shifnal has one of the highest surface water flood risks in the county and would be the most vulnerable to cumulative increases in flood risk due to new development. With most of this risk coming from Wesley Brook being a source to its confluence with River Worfe. In accordance with paragraph 157 of the NPPF it should be noted that the Sequential and Exception Test of Shifnal's proposed allocated sites in the Pre-Submission Draft Local Plan does not fully recognise Shifnal's identified surface water flood issues.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0347	B004	n/a	<p>1. No change proposed. The policy is designed to synthesise national policy and guidance to provide clarity for all those involved in the Development Management process.</p> <p>2. Minor modification for clarity to Para 7 of policy proposed</p> <p>3. Noted. Minor modification in point 2 above addresses this point. No change proposed.</p> <p>4. Text omitted in error so minor modification proposed to paragraph 2a</p> <p>5. Agree that parts of a site at lowest risk of flooding should be preferred. Minor modification to paragraph 4.191 proposed.</p> <p>6. Agree that future updates to climate change allowances should be considered in the planning process. Propose minor modification to para 4.194.</p> <p>7. Noted. No change proposed.</p> <p>8. Paragraph 56 of the National Planning Policy Framework (NPPF) states "Planning obligations must only be sought where they meet all of the following tests: a) necessary to make the development acceptable in planning terms; b) directly related to the development; and c) fairly and reasonably related in scale and kind to the development". It is considered that the requirements of draft Policy DP21 are consistent with the requirements of the NPPF (including paragraph 56), having been informed by the NPPF itself, the Strategic Flood Risk Assessment (SFRA) undertaken to inform the draft Shropshire Local Plan, any Flood Risk Assessments (FRA) necessary for specific development proposals and any other relevant information. It is not considered that a requirement for all development (irrespective of its location and the conclusions within available evidence) to make contributions toward flood warning services or new/existing flood defence maintenance is appropriate, nor is it considered to comply with paragraph 56 of the NPPF.9. Noted. The phrase, 'minimise flood risk' is intended to include avoidance through the sequential approach whilst recognising that it isn't always possible to completely eliminate all risk of flooding. This is consistent with national policy which requires a sequential approach followed by an exception test. Confirm that managing residual risk is as the representation suggests.</p> <p>10. Noted. No change proposed.</p> <p>11 and 12. Minor modifications to paragraph 4.193 proposed:</p>	Yes	DP21. Flood Risk
A0393	B032	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP21. Flood Risk
A0608	B017	Para 2a of draft Policy DP21 should be tweaked to read: "a. Development on land allocated in this plan, unless the use of the site is not in accordance with the use specified in this Plan and falls within Flood Zones 2 and/or 3."	Noted. An appropriate minor modification is proposed to para 2a of draft Policy DP21.	Yes	DP21. Flood Risk
A0629	B007-32	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP21. Flood Risk
A0636	B016	See summary of main issues.	The application of the Sequential and Exception Tests to all proposed site allocations is based on the information contained in the Council's Strategic Flood Risk Assessments (Levels 1 and 2) and follows national planning policy and guidance. As such the Council considers it is accurate and appropriate.	No	DP21. Flood Risk
A0637	B016	See summary of main issues.	The application of the Sequential and Exception Tests to all proposed site allocations is based on the information contained in the Council's Strategic Flood Risk Assessments (Levels 1 and 2) and follows national planning policy and guidance. As such the Council considers it is accurate and appropriate.	No	DP21. Flood Risk

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0014	B080	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP22(12)	Not Specified	Not Specified	Not Specified	Welcome this policy.
A0347	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP22	No	No	Not Specified	<p>1. We consider any infiltration Sustainable Drainage System (SuDS) greater than 2.0 m below ground level to be a deep system and are generally not acceptable. All infiltration SuDS require a minimum of 1.2 m clearance between the base of infiltration SuDS and peak seasonal groundwater levels. All need to meet the criteria in our approach to managing and protecting groundwater: <a href="https://www.gov.uk/government/publications/groundwater-protection-position-statements">https://www.gov.uk/government/publications/groundwater-protection-position-statements</a>. In addition, they must not be constructed in ground affected by contamination. Also SuDS attenuation basins should normally be located outside of the 1% annual probability fluvial, with climate change, floodplain to avoid operational issues. (e.g. from the system flooding out during a flood event).</p> <p>2. Paragraph 6. This could say 'The appropriate climate change allowances 'for peak rainfall' should...</p> <p>3. It may be worth a line on rural SuDS and sedimentation control here. For guidance on Water Storage Reservoirs and Rural SuDS to help meet Water Framework Directive objectives please see <a href="https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/291508/scho0612buwh-e-e.pdf">https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/291508/scho0612buwh-e-e.pdf</a> and <a href="http://www.ukia.org/">http://www.ukia.org/</a></p>
A0393	B033	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; The construction of the NWRR on an embankment on the floodplain of the River Severn will increase flood risk upstream. Changed construction to columns to reduce this risk (but increase noise and visual intrusion) was covered adequately in the public consultation and will need to be repeated resulting in timescale implications.
A0608	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP22	Not Specified	No	Not Specified	Part 5 of draft Policy DP22 requires an additional unspecified, allowance to reduce impact of urban creep (noting guidance for this is provided by the Lead Local Flood Authority (LLFA)). However, it is not clarified what the guidance is and places an onus upon the LLFA to engage with developers at the pre-submission stage. Clarity should be provided by more specific reference to the guidance within the policy in order for the draft Policy to be fully justified, viable and found sound.
A0629	B007-33	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon; The construction of the NWRR on an embankment on the floodplain of the River Severn will increase flood risk upstream. Changed construction to columns to reduce this risk (but increase noise and visual intrusion) was covered adequately in the public consultation and will need to be repeated resulting in timescale implications.
A0671	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP22	Not Specified	Not Specified	Not Specified	Welcome approach proposed in draft Policy DP22 and site specific policies in Market Drayton regarding sustainable drainage. Also welcome draft Policy DP22 reference to links between sustainable drainage and green infrastructure - consider Local Plans should proactively and holistically address Climate Change by including a requirement for sustainable management of surface water through multi-functional benefits which are part of a high quality green/blue water environment.
A0655	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP24	Not Specified	Not Specified	Not Specified	DP24 seeks to conserve and enhance designated and non-designated heritage assets. This policy recognises the importance of Shropshire's heritage assets. However, it too lacks the specification or illustration that is needed to clarify issues such as degrees of harm to an asset and loss of significance. It states how proposals that will deliver positive benefits to heritage assets will be supported. However, it lacks a facility for robust refusal where harm will affect the asset and instead discusses mitigation measures. Nevertheless, there is reference to more detailed supplementary planning guidance.
A0014	B082	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23(1)	Not Specified	Not Specified	Not Specified	Remove 'wherever possible' from para 1, as it is weak wording.
A0060	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	No	No	Not Specified	To date no strategic plan has been presented to illustrate how the Development Strategy for Shifnal will ensure the historic character of the town will be preserved or enhanced after the towns proposed extension in accordance with the objectives of Policy SP23. Evidence for the strategic allocations advised that heritage assessments were produced to inform the site selection process but it remains unclear as to how the historic environment was considered in the evidence base or from the Sustainability Appraisal contrary to Paragraph 185 of the NPPF which would question the soundness of the Plan. The Landscape and Visual Sensitivity Assessment also confirms the majority of parcels have visual and landscape sensitivity issues for existing landscapes, listed buildings and conservation areas. The allocations will change the appearance of the historic character of Shifnal, there will be intensification of traffic flows through the centre of Shifnal which is a factor that Historic England regards as affecting historic towns with development of transport infrastructure also affecting historic landscapes and damaging heritage assets.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0014	B080	N/A	Noted.	No	DP22. Sustainable Drainage Systems
A0347	B006	n/a	1. and 3. Technical details on the design of SuDS, whether urban or rural is covered in the Shropshire Council's Surface Water Management: Interim Guidance for Developers, Shropshire Council's SuDS Handbook (upcoming) and/or the Construction Industry Research and Information Association (CIRIA) SuDS Manual. Paragraph 1 of Policy DP22 requires all major development to be in accordance with these documents. No change proposed 2. Minor modifications to DP22 paragraph 6 proposed.	Yes	DP22. Sustainable Drainage Systems
A0393	B033	See issues summary. Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP22. Sustainable Drainage Systems
A0608	B018	Draft Policy DP22 should be amended to provide an evidence base and reference specific guidance.	The Council considers it appropriate to reference LLFA guidance rather than a specific part of it a document as this allows updates to the guidance to be made during the lifetime of the Local Plan which keep it current.	No	DP22. Sustainable Drainage Systems
A0629	B007-33	See issues summary. Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP22. Sustainable Drainage Systems
A0671	B002	N/A	Noted.	No	DP22. Sustainable Drainage Systems
A0655	B007	DP24 lacks the specification or illustration that is needed to clarify issues such as degrees of harm to an asset and loss of significance. It states how proposals that will deliver positive benefits to heritage assets will be supported. However, it lacks a facility for robust refusal where harm will affect the asset and instead discusses mitigation measures	The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that the policy thus makes appropriate provision for the effect of development outside the AONB on the designated area. No change proposed.	No	DP23. Conserving and Enhancing the Historic Environment
A0014	B082	Remove 'wherever possible' from para 1 of draft Policy DP23.	The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that this proposed amendment is not necessary. No change proposed.	No	DP23. Conserving and Enhancing the Historic Environment
A0060	B018	The heritage assessments informing these decisions should be published to show the mitigation for the future conservation and preservation of heritage assets in Shifnal town centre.	Policy DP23 will ensure that heritage assets in Shifnal are safeguarded in response to development proposals. The Sustainability Appraisal and Site Assessment process considered heritage assets throughout and the results are available on the Council's website. No change proposed.	No	DP23. Conserving and Enhancing the Historic Environment

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0286	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	No	No	No	To date no strategic plan has been presented to illustrate how the Development Strategy for Shifnal will ensure the historic character of the town will be preserved or enhanced after the towns proposed extension in accordance with the objectives of Policy SP23. Evidence for the strategic allocations advised that heritage assessments were produced to inform the site selection process but it remains unclear as to how the historic environment was considered in the evidence base or from the Sustainability Appraisal contrary to Paragraph 185 of the NPPF which would question the soundness of the Plan. The Landscape and Visual Sensitivity Assessment also confirms the majority of parcels have visual and landscape sensitivity issues for existing landscapes, listed buildings and conservation areas. The allocations will change the appearance of the historic character of Shifnal, there will be intensification of traffic flows through the centre of Shifnal which is a factor that Historic England regards as affecting historic towns with development of transport infrastructure also affecting historic landscapes and damaging heritage assets.
A0313	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	No	No	Not Specified	To date no strategic plan has been presented to illustrate how the Development Strategy for Shifnal will ensure the historic character of the town will be preserved or enhanced after the towns proposed extension in accordance with the objectives of Policy SP23. Evidence for the strategic allocations advised that heritage assessments were produced to inform the site selection process but it remains unclear as to how the historic environment was considered in the evidence base or from the Sustainability Appraisal contrary to Paragraph 185 of the NPPF which would question the soundness of the Plan. The Landscape and Visual Sensitivity Assessment also confirms the majority of parcels have visual and landscape sensitivity issues for existing landscapes, listed buildings and conservation areas. The allocations will change the appearance of the historic character of Shifnal, there will be intensification of traffic flows through the centre of Shifnal which is a factor that Historic England regards as affecting historic towns with development of transport infrastructure also affecting historic landscapes and damaging heritage assets.
A0348	B020	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	Not Specified	Yes	Not Specified	Inclusion of Policy DP23 is welcomed. It is considered that the policy sets out a positive strategy for the conservation and enjoyment of the historic environment. Note that the explanation to the policy (at para. 4.203) includes a list of what constitutes designated and non-designated heritage assets, which is also welcomed, but all references to 'Scheduled Ancient Monuments' should be revised to 'Scheduled Monuments' in line with National Planning Policy Framework (NPPF) terminology.
A0393	B034	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0410	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	Not Specified	No	Not Specified	Para 1(g) of draft Policy SP3 promotes fabric energy efficiency retrofits of existing buildings, yet no support is given for the responsible energy retrofitting of historic and listed buildings within draft Policy DP23 (there are many such buildings in Shropshire which are poorly insulated). In meeting Climate Emergency requirements, reducing carbon emissions from existing buildings (particularly leaky historic buildings), is at least as big a challenge as ensuring new development is zero carbon. Given officers advise that over 80% of domestic housing in 2030 already exists, measures to foster the retrofit of existing property are essential if we are to achieve our collective goal. It would be beneficial to develop supplementary planning guidance setting out how homeowners could improve the energy efficiency of their own homes without detracting from their heritage significance.
A0608	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	Not Specified	No	Not Specified	Heritage policy is clearly set out in the National Planning Policy Framework (NPPF). There is a significant risk paras 1-4 of draft Policy DP23 are seeking to reframe the language of national policy. Whilst there is a need for a historic environment policy as part of the local plan, this need only comprise paras 2 and 3 of draft Policy DP23. Part 7 of draft Policy DP23 states applications for development affecting designated/non-designated heritage assets are to be determined in line with more detailed supplementary planning guidance (SPG) where applicable (appears this is yet to be prepared). However, applications must be determined in accordance with the development plan, unless material considerations indicate otherwise. Decisions made on applications can only be made in accordance with relevant policies of the development plan that have gone through the scrutiny of public examination, with supplementary planning guidance being a material consideration. This part of the draft Policy is vague and imprecise, and it is not clear how the SPG will differ from the NPPF. There is no justification for the SPG to depart from the NPPF and it should therefore be removed.
A0609	B023	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	Not Specified	Yes	Not Specified	Fully agree with draft Policy DP23 and the recognition that Shropshire's heritage assets should be protected, conserved, sympathetically enhanced and restored. Draft Policy DP23 recognises that the likely loss, or harm to, the significance of a designated heritage asset should be determined in line with the National Planning Policy Framework (NPPF). Have no concerns regarding the soundness of this policy.
A0621	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	Not Specified	No	Not Specified	This policy is generally supported, however, the wording of part 4) represents a departure from the NPPF. Para 197 states that 'in weighing applications that directly or indirectly affect non-designated heritage assets, a balanced judgement will be required having regard to the scale of any harm or loss and the significance of the heritage asset.' By contrast, part 4) states that 'proposals which are likely to result in loss of, or harm to, the significance of a non-designated heritage asset and/or its setting, either directly or indirectly, will only be permitted if it can be clearly demonstrated that the benefits of the proposal outweigh that loss or harm.' There are clear and demonstrable public benefits resulting from the inclusion of SHF032. Site allocation SHF032 has been removed from the current draft Local Plan following heritage concerns raised by Historic England. In the context of the balanced judgement outlined in draft DP23 it is considered this position should be reviewed as part of the draft Local Plan consultation. It is highlighted that the Council had previously considered the site suitable for Green Belt release due to its limited harm. When balanced against the significant public benefits associated with this allocation and the robust mitigation measures put in place with regard to the heritage asset, there is a clear and demonstrable case for this allocation to be reinstated.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0286	B017	The heritage assessments informing these decisions should be published to show the mitigation for the future conservation and preservation of heritage assets in Shifnal town centre.	Policy DP23 will ensure that heritage assets in Shifnal are safeguarded in response to development proposals. The Sustainability Appraisal and Site Assessment process considered heritage assets throughout and the results are available on the Council's website. No change proposed.	No	DP23. Conserving and Enhancing the Historic Environment
A0313	B017	The heritage assessments informing these decisions should be published to show the mitigation for the future conservation and preservation of heritage assets in Shifnal town centre.	Policy DP23 will ensure that heritage assets in Shifnal are safeguarded in response to development proposals. The Sustainability Appraisal and Site Assessment process considered heritage assets throughout and the results are available on the Council's website. No change proposed.	No	DP23. Conserving and Enhancing the Historic Environment
A0348	B020	References to Scheduled Ancient Monuments should be updated to Scheduled Monuments, in lined with the National Planning Policy Framework (NPPF).	Agreed. The reference to Scheduled Ancient Monuments occurs elsewhere in the Plan as well, so the Council proposes to make minor modifications to paragraphs 2.9 and 4.203 to remove the word Ancient.	Yes	DP23. Conserving and Enhancing the Historic Environment
A0393	B034	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP23. Conserving and Enhancing the Historic Environment
A0410	B011	Text should be added to draft Policy DP23 similar to the following: The Council will seek to encourage and enable the sensitive retrofitting of energy efficiency measures and the appropriate use of micro-renewables in historic buildings (including listed buildings and buildings of solid wall or traditional construction) and in conservation areas, whilst safeguarding the special characteristics of these heritage assets for the future. Proposals will be considered against national planning policy. The policy will be supported by the Council's Sustainable Construction and Retrofitting Supplementary Planning Document."	Proposals for the retrofitting of energy efficiency measures and for the installation of renewable energy systems on or affecting heritage assets would be assessed against this policy as and when they come forward. The Council does not consider it necessary to encourage such proposals and as such does not propose any changes to the policy.	No	DP23. Conserving and Enhancing the Historic Environment
A0608	B019	Draft Policy DP23 should comprise only paras 2 and 3. Reference to Supplementary Planning Guidance should be deleted.	The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that as such, this proposed amendment is not necessary. No change proposed.	No	DP23. Conserving and Enhancing the Historic Environment
A0609	B023	N/A	Noted.	No	DP23. Conserving and Enhancing the Historic Environment
A0621	B001	Part 4 to more align with Paragraph NPPF 197	The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that as such, this proposed amendment is not necessary. No change proposed.	No	DP23. Conserving and Enhancing the Historic Environment

A0629	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23 and SP5	Yes	No	Yes	Clause 1(g) draft Policy SP3 promotes fabric energy efficiency retrofits of existing buildings, yet no support is given for responsible energy retrofitting of historic and listed buildings within draft Policy DP23. Shropshire has a large stock of poorly insulated buildings. In meeting the Council's climate emergency declaration, reducing carbon emissions from existing building stock is at least as significant as ensuring new development is zero carbon. Draft Policy DP23 should be amended to reflect this. Consider potential for preparation of supplementary planning guidance setting out how homeowners could improve the energy efficiency of their own homes without detracting from their heritage significance.
A0629	B007-34	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0636	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	No	No	No	To date no strategic plan has been presented to illustrate how the Development Strategy for Shifnal will ensure the historic character of the town will be preserved or enhanced after the towns proposed extension in accordance with the objectives of Policy SP23. Evidence for the strategic allocations advised that heritage assessments were produced to inform the site selection process but it remains unclear as to how the historic environment was considered in the evidence base or from the Sustainability Appraisal contrary to Paragraph 185 of the NPPF which would question the soundness of the Plan. The Landscape and Visual Sensitivity Assessment also confirms the majority of parcels have visual and landscape sensitivity issues for existing landscapes, listed buildings and conservation areas. The allocations will change the appearance of the historic character of Shifnal, there will be intensification of traffic flows through the centre of Shifnal which is a factor that Historic England regards as affecting historic towns with development of transport infrastructure also affecting historic landscapes and damaging heritage assets.
A0637	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	No	No	No	To date no strategic plan has been presented to illustrate how the Development Strategy for Shifnal will ensure the historic character of the town will be preserved or enhanced after the towns proposed extension in accordance with the objectives of Policy SP23. Evidence for the strategic allocations advised that heritage assessments were produced to inform the site selection process but it remains unclear as to how the historic environment was considered in the evidence base or from the Sustainability Appraisal contrary to Paragraph 185 of the NPPF which would question the soundness of the Plan. The Landscape and Visual Sensitivity Assessment also confirms the majority of parcels have visual and landscape sensitivity issues for existing landscapes, listed buildings and conservation areas. The allocations will change the appearance of the historic character of Shifnal, there will be intensification of traffic flows through the centre of Shifnal which is a factor that Historic England regards as affecting historic towns with development of transport infrastructure also affecting historic landscapes and damaging heritage assets.
A0646	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	Yes	Yes	Yes	The Estate considers the Councils approach to conserving and enhancing the historic environment as set out within DP23 is sound when considered against the tests set out in para 35 of the NPPF.
A0658	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP23	No	No	Not Specified	There is no requirement in this Policy to incorporate energy efficiency and renewable energy into works relating to Shropshire's heritage assets. While it could be inferred that Policy DP11 applies to these proposals, it should be made explicit by the inclusion of an additional paragraph to this effect: All such proposals will incorporate wherever appropriate the sensitive retrofitting of energy efficiency measures and renewable energy and heat sources. A revised supplementary planning document should positively guide the incorporation of such measures. This change is necessary in the context of the Guidance in the NPPF paragraphs 149 and 151 and in accordance with statutory duty set out in Section 19 of the Planning and Compulsory Purchase Act 2004 as amended to ensure that, taken as a whole, the plan policy contributes to the mitigation of climate change.
A0348	B021	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP24	Not Specified	Yes	Not Specified	Welcome reference to consideration of historic assets as part of the considerations to be encompassed within an assessment required to be provided for all major development within the AONB. Consider draft Policy DP23 should be added to the list of policies specifically referred to.
A0349	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP24	Not Specified	Not Specified	Not Specified	Natural England welcomes the inclusion of a specific policy for the AONB. Great weight should be given to the comments of the AONB unit. You should also consider the setting of the AONB. Development in close proximity or adjacent to the AONB could have damaging impacts on the designated landscape.

A0646	B002	n/a	Noted.	No	DP23. Conserving and Enhancing the Historic Environment
A0658	B002	Insert additional Paragraph 8: All such proposals will incorporate, wherever appropriate, the sensitive retrofitting of energy efficiency measures and renewable energy and heat sources.	Proposals for the retrofitting of energy efficiency measures and for the installation of renewable energy systems on or affecting heritage assets would be assessed against this policy as and when they come forward. The Council does not consider it necessary to encourage such proposals and as such does not propose any changes to the policy.	No	DP23. Conserving and Enhancing the Historic Environment
A0348	B021	Include cross-reference to Policy DP23.	Agreed. For clarity a minor modification is proposed to Policy DP24, paragraph 3 to include a cross reference to Policy DP23.	Yes	DP24. Shropshire Hills Area of Outstanding Natural Beauty
A0349	B012	n/a	noted	No	DP24. Shropshire Hills Area of Outstanding Natural Beauty

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0393	B035	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0400	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP24	No	No	Yes	Draft Policy DP24 is neither legally compliant or sound as it: -Does not adequately reflect or apply AONB protection within the National Planning Policy Framework (NPPF). In particular it applies an incorrect mechanistic rather than landscape led test to determine major/minor development and fails to reference para 11 of the NPPF and para 41 of the National Planning Practice Guidance (NPPG on the Natural Environment). -Does not reflect the Court of Appeal Judgment in Monkhill v Secretary of State for Housing, Communities and Local Government and Waverley Borough Council. Including in relation to application of para 172 of the NPPF to minor development. -Ignores relevant legislation re Permitted Development Rights in AONBs - no acknowledgement that as Art 2(3) some Permitted Development Rights are not applicable or establishment of a determination under Art 4 that some Permitted Development Rights as deemed incompatible with the protection of the AONB are withdrawn. -Is contradicted/negated by other Council Policies/planning practices and does not clarify primacy of draft Policy DP24 (cross references to other draft Local Plan policies without specific AONB elements - what may be suitable outside the AONB may not be suitable within it; and conflict between DP24 and other policies (such as references to Key Centres such as Church Stretton being focus for development and accommodating significant development)). -Must be clear that the framework of legislation/policies/guidance that impact development in the AONB will be proactively and fully applied (plan and decision making). -Specific wording issues, including may rather than will in relation to the AONB being a material planning consideration and development 'likely to have a significant adverse effect' rather than development that 'have the potential to have a significant adverse effect'.
A0410	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP24	No	No	Not Specified	Shropshire Hills AONB with its iconic landscape and geology, covers almost a quarter of Shropshire. AONBs enjoy special protections under law and planning policy. Endorse separate submissions made by the AONB partnership and by the Save Snatchfield Group.
A0629	B007-35	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0634	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP24	Yes	No	Not Specified	The definition of major development in Annex 2 of NPPF is excepted by footnote 70 specifically with regard to paras 172 and 173 of the Framework – para 172 being the AONB policy. This definition does not therefore apply universally for development within AONBs, though it may be used as a guide. The policy needs to make provision for developments falling outwit this definition to be classed as ‘major’, which could be smaller developments than those in the NPPF definition. The AONB Management Plan on p33 sets out some criteria to guide judgements of whether a development affecting the AONB is major, and these should be referenced in the policy. The footnote 55 within NPPF states “For the purposes of paragraphs 172 and 173, whether a proposal is ‘major development’ is a matter for the decision maker, taking into account its nature scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined.” The fact that this says “ whether a proposal is major development... taking into account its nature, scale and setting”, etc suggests that a blanket application of the standard NPPF definition is not acceptable, since this cannot ‘take account’ of the particulars of the case.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0393	B035	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP24. Shropshire Hills Area of Outstanding Natural Beauty
A0400	B002	Update draft Policy DP24 and its explanation as documented within the representation. Or better in the medium/long term: Shropshire Council, the Shropshire Hills AONB Partnership and interested community groups to prepare a dedicated Development Plan Document (DPD) for the Shropshire Hills AONB.	The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that as such, the proposed amendment is not necessary. No change proposed. Furthermore, the Council considers that the Shropshire Local Plan is the most appropriate mechanism for safeguarding the Shropshire Hills AONB and does not propose to prepare a separate DPD.	No	DP24. Shropshire Hills Area of Outstanding Natural Beauty
A0410	B012	Text should be amended in line with the suggestions made by the AONB partnership and by the Save Snatchfield Group.	Noted. Consideration of and subsequent responses to representations from other parties will be provided in association with their representations.	No	DP24. Shropshire Hills Area of Outstanding Natural Beauty
A0629	B007-35	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP24. Shropshire Hills Area of Outstanding Natural Beauty
A0634	B001	Remove "(as defined within Annex 2 of the NPPF)" and add suggested additional text: "Whether a proposed development constitutes major development will be a matter for the relevant decision taker, taking into account the individual characteristics and circumstances of the proposal and the local context. In determining whether a proposed development constitutes major development the Councils will consider whether by reason of its location, scale or massing, form, character or nature, the proposal has the potential to have a significant adverse impact on the natural beauty of the AONB. Criteria set out in the AONB Management Plan will be used as a guide. The nature of the AONB landscape means that even some smaller-scale proposals may be considered to be major development depending on the local context." According to our understand of the National Planning Practice Guidance: Planning obligations, there is a further implication of the level that major development is defined at – as this determines for housing whether planning obligations can be sought from developers. Guidance on the question "Are there any specific circumstances where contributions through planning obligations should not be sought from developers?" states: "Planning obligations for affordable housing should only be sought for residential developments that are major developments.... In designated rural areas local planning authorities may instead choose to set their own lower threshold in plans and seek affordable housing contributions from developments above that threshold. Designated rural areas applies to rural areas described under section 157(1) of the Housing Act 1985, which includes National Parks and Areas of Outstanding Natural Beauty."	The Council considers it appropriate to use the definition of major development set out in the NPPF. This provides certainty and consistency for developers on the Council's approach to development in the AONB. No change proposed.	No	DP24. Shropshire Hills Area of Outstanding Natural Beauty

A0634	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP24	Yes	No	Not Specified	<p>Policy para 4 refers to development outside the designated area, but makes no reference to the 'setting' of the AONB. This is the established terminology in relation to development outside an AONB, as within the most recent Management Plan Policy P1 viii) and National Planning Practice Guidance: Natural Environment</p> <p>How should development within the setting of National Parks, the Broads and Areas of Outstanding Natural Beauty be dealt with?</p> <p>Land within the setting of these areas often makes an important contribution to maintaining their natural beauty, and where poorly located or designed development can do significant harm. This is especially the case where long views from or to the designated landscape are identified as important, or where the landscape character of land within and adjoining the designated area is complementary. Development within the settings of these areas will therefore need sensitive handling that takes these potential impacts into account.</p> <p>Paragraph: 042 Reference ID: 8-042-20190721 Revision date: 21 07 2019</p> <p>At present the Local Plan does not address this element of guidance.</p> <p>It is notable also that that one of the amendments currently being proposed to the NPPF in consultation by government is also to make explicit reference to the setting of AONBs.</p>
A0014	B083	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.226	Not Specified	Not Specified	Not Specified	Local strategic highway improvements should be aimed at improving provision of public transport, walking and cycling.
A0060	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	No	No	Not Specified	Shifnal has limited investment in infrastructure (including roads and footpaths, new medical centre, education and leisure facilities) to support the expansion of the town despite the recent 1,100 new dwellings recently approved and currently being built out, resulting in some 40% increase in the town's population. The Pre-Submission Draft SLP paragraph 5.215 highlights that the future housing extension to south and west of the town which is safeguarded) will provide improvements at Five Ways and Innage Road. However, S106 funding has already been obtained from developers of recent large housing developments for improvements to Fiveways to meet the increased traffic needs of the town. Further to this, no practical infrastructure improvements have been identified to accommodate the proposed growth of the town.
A0113	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25 and Para 4.224	Yes	No	Yes	<p>Consider draft Policy DP25 and para 4.224 of its explanation are inconsistent with the tests of soundness identified in para 35 of the National Planning Policy Framework (NPPF). Specifically:</p> <ul style="list-style-type: none"> <li>-The draft Shropshire Local Plan is not positively prepared, as it has not taken into account the requirement for emergency services infrastructure. This is of concern given that the requirement to deliver 30,800 dwellings during the proposed Plan period, without emergency services infrastructure being included within new large scale residential development, the service will ultimately become stretched.</li> <li>-There is no justified reason why the emergency services have been excluded from infrastructure provision. Development proposed during the proposed Plan period and the Planning White Paper proposals (300,000 new homes per annum across England), will clearly impact emergency services through a rise in the number of 999 and 101 calls in areas where new development takes place relative to existing levels; associated increases in the number of incidents that the emergency services will have to attend; and need for the delivery of day-to-day neighbourhood policing. Therefore, there is a demonstrated need for planning obligations to fund police equipment, vehicles and provision or upgrade of premises to maintain the delivery of community policing across the Local Authority area to promote safe and cohesive communities. Existing funding sources or the expanded Council Tax Base are insufficient to overcome this shortfall. This requirement is deemed fully compliant with statutory requirements for Community Infrastructure Levy (CIL) spend (Reg 122 of the CIL Regulations) and paras 54 and 56 of the NPPF. Appendix 1 of the representation includes 12 Secretary of State and 24 Planning Inspectorate decisions demonstrating precedent for this.</li> <li>-Regarding effectiveness, exclusion of the emergency services from para 4.224 of the Explanation to draft Policy DP25 means the draft Shropshire Local Plan will not provide an effective basis for work between Shropshire Council and West Mercia Police (WMP) on this matter. Nor will it provide the clarity needed for developers. This is detrimental to all parties, but most of all to WMP and the other emergency services, as they will be left unable to seek mitigation for the negative infrastructure impacts of development growth upon them.</li> <li>-Para 4.224 of the explanation to draft Policy DP25 as worded does not comply with paras 16, 26, 28, 32 and 41 of the NPPF, which emphasise the need for new schemes to be delivered through joint working of all partners involved with or affected by a development proposal. They are also not consistent with the NPPF in delivering safe and sustainable communities through new development. Para 91 and 127 of the NPPF seeks environments where crime and disorder and the fear of crime do not undermine of life, health of communities and community cohesion. Emergency services infrastructure is necessary to ensure that future development within Shropshire maintains a safe and secure environment through the provision of both social and security infrastructure (paras 8, 20, 26, 32 and 92 of the NPPF).</li> </ul> <p>Finally, para 95 of the NPPF states planning policies and decisions should promote public safety and security requirements by using the most up-to-date information available from the police; who are essential local workers providing frontline services to the public, according to Annex 2 of the NPPF.</p>
A0148	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	Not Specified	Not Specified	Not Specified	Support for this policy. L&Q Estates considers that its land interests at Shifnal are well situated to accommodate residential development, as new dwellings would be located close to existing green spaces and the proposed site layout will promote walking and cycling.
A0286	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	No	No	No	Shifnal has limited investment in infrastructure (including roads and footpaths, new medical centre, education and leisure facilities) to support the expansion of the town despite the recent 1,100 new dwellings recently approved and currently being built out, resulting in some 40% increase in the town's population. The Pre-Submission Draft SLP paragraph 5.215 highlights that the future housing extension to south and west of the town which is safeguarded) will provide improvements at Five Ways and Innage Road. However, S106 funding has already been obtained from developers of recent large housing developments for improvements to Fiveways to meet the increased traffic needs of the town. Further to this, no practical infrastructure improvements have been identified to accommodate the proposed growth of the town.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0634	B002	<p>Add text "Development in the area around the AONB should be assessed for its impacts on the AONB itself, and also take account of the landscape quality of the setting of the AONB."</p> <p>Add text to explanatory paragraphs "Measures to consider and mitigate such impacts should include where required Landscape and Visual Impact Assessments; care over orientation, site layout, height and scale of structures and buildings; consideration of the landscape, land uses and heritage assets around and beyond the development site; careful use of colours, materials and non-reflective surfaces; restraint and care in the and use of lighting."</p>	The Council considers that the requirements of this policy are consistent with current national planning policy and guidance and that as such, the proposed amendment is not appropriate or necessary. No change proposed.	No	DP24. Shropshire Hills Area of Outstanding Natural Beauty
A0014	B083	Para 4.226 should stipulate that local strategic highway improvements should be aimed at improving provision of public transport, walking and cycling.	Para 4.226 provides examples of statutory and critical infrastructure needs, including local and strategic highway improvements. Local and strategic highway improvements may of course include infrastructure associated with walking, cycling and public transport. The prioritisation of infrastructure is undertaken through the Strategic Infrastructure Implementation Plan and Place Plan process.	No	DP25. Infrastructure Provision
A0060	B019	The Council need to acknowledge the infrastructure needs of the community and their concerns at the infrastructure capacity of the town and where and when further infrastructure investment will be provided in advance of further developments in Shifnal.	The infrastructure needs of Shifnal will be taken into account through the Strategic Infrastructure Implementation Plan and Place Plan process.	No	DP25. Infrastructure Provision
A0113	B001	Revise para 4.224 of the Explanation for draft Policy DP25 to include reference to emergency services infrastructure.	For the purpose of clarity it is considered appropriate to include a minor modification to para 4.224 of the explanation of draft Policy DP25 to include reference to emergency service facilities.	Yes	DP25. Infrastructure Provision
A0148	B010	The proposed development is well located to existing and future planned employment opportunities, community facilities and transport connections, and should therefore be considered favourably in the context of Policy DP25.	Support noted.	No	DP25. Infrastructure Provision
A0286	B018	The Council need to acknowledge the infrastructure needs of the community and their concerns at the infrastructure capacity of the town and where and when further infrastructure investment will be provided in advance of further developments in Shifnal.	The infrastructure needs of Shifnal will be taken into account through the Strategic Infrastructure Implementation Plan and Place Plan process.	No	DP25. Infrastructure Provision

A0313	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	No	No	Not Specified	Shifnal has limited investment in infrastructure (including roads and footpaths, new medical centre, education and leisure facilities) to support the expansion of the town despite the recent 1,100 new dwellings recently approved and currently being built out, resulting in some 40% increase in the town's population. The Pre-Submission Draft SLP paragraph 5.215 highlights that the future housing extension to south and west of the town which is safeguarded) will provide improvements at Five Ways and Innage Road. However, S106 funding has already been obtained from developers of recent large housing developments for improvements to Fiveways to meet the increased traffic needs of the town. Further to this, no practical infrastructure improvements have been identified to accommodate the proposed growth of the town.
A0347	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	No	No	Not Specified	Where Section 106 is necessary your 4.227 of Policy DP25 suggests that "It is expected this is only likely to be necessary on larger proposals of over 50 dwellings". However a flood risk contribution (as we have done in the past for sites reliant upon/benefitting from defence and/or flood warning e.g. in Coleham, Shrewsbury for example) may be necessary and relevant to 'any' residential scheme.
A0393	B036	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0455	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	Yes	Yes	Yes	Fully support the need for a development to deliver or fund any critical or statutory infrastructure required as a result of a proposed development. However, Community Infrastructure Levy (CIL) and Section 106 contributions need to be at a level that enables development to take place and does not challenge viability. The Shropshire Viability Study notes "Viability should not compromise the quality of development. But it is important to ensure that the total cumulative cost of relevant policies, local and national standards, design requirements, any site-specific considerations and development contributions are not of a scale that will make development unviable." Part 4 of draft Policy DP25 advises Section 106 contributions will be used to 'top up' any additional infrastructure spend. Regard must be had for whether such an approach remains viable, and will not lead to non-delivery. In addition, strategic sites should not pay for infrastructure through S106 which is not necessitated by their development, in line with the tests in the CIL Regulations. Considered the blanket approach set out within the draft Shropshire Local Plan, with no reference of a CIL review or real flexibility on CIL/Section 106 and other planning obligations, is not appropriate for Strategic Sites which require greater flexibility. With regard to CIL, it is set at a rate which challenges development viability. The Council had previously indicated an intention to review CIL, however there is no such recognition with the draft Shropshire Local Plan. Such a review is recommended by the Shropshire Viability Study. There is real risk of an internally inconsistent Plan and CIL regime, with CIL being non-negotiable and thus viability discussions on the S106 needing to be progressed risking delay to delivery. CIL is outside of the remit of the Local Plan Examination, which means that any changes due to issues of viability will need to come from obligations, such as rates of affordable housing.
A0609	B024	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	Not Specified	Yes	Not Specified	Fully support draft Policy DP25 and its acknowledged that development should only occur where existing capacity allows or any shortfall can be addressed through reasonable conditions. Have no concerns regarding the soundness of this policy.
A0621	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	Not Specified	Yes	Not Specified	The location of housing on sites east of Shifnal is considered more favourable given that trips towards the M54 will route away from the town centre, and the proximity of the proposed development on SHF018b and SHF018d provides realistic opportunities for future residents and employees to travel by sustainable modes. Further, the proximity to schools, in particular Idsall School, and direct walking route to the station demonstrate additional sustainable benefits for the sites and the potential to minimise traffic movements through the town centre. As a result, inclusion of SHF032 and SHF018c, as an alternative to the south west safeguarded land, will provide greater potential to reduce level of traffic generated on the local highway network through effective behaviour change/mode shift initiatives ). In addition, it is further noted that proposed safeguarded land at 17a has now been removed to the south west of Shifnal. This will therefore not allow for delivery of a full bypass between the A462 south and west and across the railway line, as originally anticipated. The deliverable bypass based upon the extent of safeguarded land will now only be partial and is unlikely to present a significant benefit for through traffic using the A464. In addition, the inclusion of SHF018c would represent a highly sustainable extension to Shifnal with good access to existing services and facilities within the town centre, including walking distance to the train station and local schools. The option for this land to include a potential health/medical facility and/or day nursery (delivered at an earlier stage, if required) to serve existing and future residents (of adopted and proposed housing allocations) further demonstrates the benefits of this alternative option.
A0629	B007-36	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0313	B018	The Council need to acknowledge the infrastructure needs of the community and their concerns at the infrastructure capacity of the town and where and when further infrastructure investment will be provided in advance of further developments in Shifnal.	The infrastructure needs of Shifnal will be taken into account through the Strategic Infrastructure Implementation Plan and Place Plan process.	No	DP25. Infrastructure Provision
A0347	B005	n/a	Policy DP25 identifies the proposed approach to securing any infrastructure necessary to support development. Given this proposed approach it is considered likely that S106 Planning Obligations will, in most instances, only be associated with developments of 50 or more dwellings. Minor modification proposed to Policy DP25 explanation paragraph 4.227 to clarify circumstances for section 106.	Yes	DP25. Infrastructure Provision
A0393	B036	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP25. Infrastructure Provision
A0455	B009	Include a commitment to undertake a CIL Review within a defined time period (suggest 2 years).	New development should only take place where there is sufficient existing infrastructure capacity available or any shortfall in capacity is addressed. Draft Policy DP25 identifies the mechanism by which any developer contributions to infrastructure provision is to be secured, providing certainty to all parties (decision maker, local communities and development industry). The draft Policy provides certainty that 'double counting' will not occur between CIL and S106 obligations and that CIL funds will be prioritised towards meeting any critical or statutory infrastructure requirements resulting from the development. Furthermore, S016 obligations can only be used where they meet the tests defined within the National Planning Policy Framework (NPPF), these tests are directly referenced within the explanation to this draft Policy. The explanation to draft Policy DP25 recognises that CIL rates can only be amended through a CIL Review. However, the Shropshire Viability assessment is predicated on the assumption that CIL continues at current rates. Furthermore it is noted that Government is considering changes to the Developer Contributions process, which needs careful consideration. As such it is not considered either necessary or appropriate to commit to a CIL Review within the draft Shropshire Local Plan.	No	DP25. Infrastructure Provision
A0609	B024	N/A	Support noted.	No	DP25. Infrastructure Provision
A0621	B002	N/A	Noted	No	DP25. Infrastructure Provision
A0629	B007-36	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP25. Infrastructure Provision

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0636	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	No	No	No	Shifnal has limited investment in infrastructure (including roads and footpaths, new medical centre, education and leisure facilities) to support the expansion of the town despite the recent 1,100 new dwellings recently approved and currently being built out, resulting in some 40% increase in the town's population. The Pre-Submission Draft SLP paragraph 5.215 highlights that the future housing extension to south and west of the town which is safeguarded) will provide improvements at Five Ways and Innage Road. However, S106 funding has already been obtained from developers of recent large housing developments for improvements to Fiveways to meet the increased traffic needs of the town. Further to this, no practical infrastructure improvements have been identified to accommodate the proposed growth of the town.
A0637	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	No	No	No	Shifnal has limited investment in infrastructure (including roads and footpaths, new medical centre, education and leisure facilities) to support the expansion of the town despite the recent 1,100 new dwellings recently approved and currently being built out, resulting in some 40% increase in the town's population. The Pre-Submission Draft SLP paragraph 5.215 highlights that the future housing extension to south and west of the town which is safeguarded) will provide improvements at Five Ways and Innage Road. However, S106 funding has already been obtained from developers of recent large housing developments for improvements to Fiveways to meet the increased traffic needs of the town. Further to this, no practical infrastructure improvements have been identified to accommodate the proposed growth of the town.
A0662	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	Not Specified	Not Specified	Not Specified	Given the scale of development proposed at the former Ironbridge Power Station and around Shifnal, the Shropshire Local Plan should appropriately acknowledge the cross boundary implications for Telford & Wrekin Council, including impacts on the Princess Royal Hospital in Telford which is the nearest accident and emergency hospital to both locations. The Shropshire Strategic Infrastructure Implementation Plan (December 2020) refers to GP and primary care provision in Shrewsbury but does not consider the impacts on the Princess Royal Hospital of development adjacent to or east of Telford.
A0669	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP25	Not Specified	No	Not Specified	Support much of draft Policy DP25. It is consistent with regulations and national policy that where a new development would lead to a shortfall in infrastructure provision, the development will be required to fund necessary improvements through a suitable developer contribution (unless the identified shortfall is being addressed by other means). Given the many competing infrastructure needs arising from development, also agree with the proposed approach of prioritising using developer funds to support critical or statutory infrastructure requirements first. However, the policy states that details of the infrastructure requirements are set out in supporting documents. Documents referenced in para 3 of draft Policy DP25 (Shropshire Place Plans and Local Infrastructure Plan) and draft guidelines for proposed site allocations fail to identify the need for any specific critical NHS Trusts healthcare infrastructure, despite para 4.226 of the proposed explanation to draft Policy DP25 including specific reference to additional health facilities (also note the Annual Infrastructure Funding statement also makes specific reference to medical facilities). Consider this omission makes the draft Shropshire Local Plan unsound. Also consider it is important for the draft policy to make reference to details of infrastructure requirements also being identified in the site allocation policies S1 to S20 and in any associated forthcoming masterplan documents. The National Planning Policy Framework (NPPF) and associated National Planning Practice Guidance (NPPG) require viability of development to be robustly tested, therefore vital for significant additional critical NHS Trusts' healthcare infrastructure requirements to be specifically identified within the current the plan-making process. Disappointed no proactive engagement occurred with the NHS Trusts regarding the Viability Assessment undertaken to inform the draft Shropshire Local Plan - without inclusion of all known critical healthcare infrastructure in viability modelling, there is a risk the draft Shropshire Local Plan may not be deliverable (understand there is little headroom within development). The 'Planning for Patients: The Role of Section 106 Planning Contributions' report recognises CIL/S106 are sources of funding for healthcare estate. Also note Council Officers attended One Public Health (OPH) NHS Trusts' estates meetings to coordinate bids for central funds for development and discussed potential use of CIL/S106, but no request for healthcare infrastructure requirements or funding shortfalls was made. Proposals in the draft Shropshire Local Plan would result in around a 22.36% population increase over the proposed Plan period. To maintain current levels of healthcare service provision, NHS Trusts would need to build new, extend and/or replace healthcare facilities to provide greater capacity than currently required to serve the existing population numbers. As such, seeking a contribution of approximately 10% of the overall cost, equating to around £3,750,000 +VAT (excluding revenue costs not yet calculated and would not costs (need for indexation)/needs may change over time). Approximate cost estimates are: -Replacement of 71, Salop Road – Oswestry (community mental health services) £1.5M +VAT; -Replacement of 25, Corve Street – Ludlow (mental health clinic) £1.5M +VAT; -Development at Redwoods Centre – Shrewsbury (residential care for adults with acute mental health problems, dementia, rehabilitation needs, and as a low secure forensic unit) £2.5M +VAT -Development of Bishops Castle Community Hospital which has extensive lifecycle issues. £5M +VAT; -Ludlow Community Hospital – known to be past it's life span - replacement £17M +VAT; -Bridgnorth Community Hospital – development works - £3M +VAT; -Whitchurch Community Hospital – development works and upgrades £5M +VAT; -Dental surgeries – compliance and development £2M +VAT Existing alternative funding streams do not take account of the proposed scale of growth in population projected in the Draft SLP and therefore, without the necessary contribution from developers either through CIL and/or S106 agreements, it would be impossible for the level of service required to be provided and maintained. Consider these requirements meet the CIL/S106 eligibility tests (documented in representation). Fully support draft Policy SP6, however to achieve its objectives, it is vital that the council have a full understanding of the healthcare facilities required to serve an expanded population.
A0014	B084	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP26	Not Specified	Not Specified	Not Specified	Welcome this policy.
A0131	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP26	Not Specified	Not Specified	Not Specified	We note Policy DP26 (which supports policy SP3) sets out the criteria for renewable and low carbon infrastructure development with cross reference to other plan policies on the protection of the natural environment. We are satisfied with this approach should renewable energy come forward with the potential to impact the setting of the Clwydian Range and Dee Valley AONB. NRW should be consulted should any such schemes come forward.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0636	B018	The Council need to acknowledge the infrastructure needs of the community and their concerns at the infrastructure capacity of the town and where and when further infrastructure investment will be provided in advance of further developments in Shifnal.	The infrastructure needs of Shifnal will be taken into account through the Strategic Infrastructure Implementation Plan and Place Plan process.	No	DP25. Infrastructure Provision
A0637	B018	The Council need to acknowledge the infrastructure needs of the community and their concerns at the infrastructure capacity of the town and where and when further infrastructure investment will be provided in advance of further developments in Shifnal.	The infrastructure needs of Shifnal will be taken into account through the Strategic Infrastructure Implementation Plan and Place Plan process.	No	DP25. Infrastructure Provision
A0662	B005	Clarification of discussions with the Clinical Commissioning Group should be provided to ensure that the development impacts have been considered for this important cross-boundary service; any identified impacts should be acknowledged in the respective Local Plan policies.	Shropshire Council has engaged with strategic infrastructure providers, including the Clinical Commissioning Group, through the Place Plan process (the Place Plans have informed the Strategic Infrastructure Implementation Plan and together these documents form part of the evidence base for the draft Shropshire Local Plan). Draft Policy DP25 specifies that new development should only take place where there is sufficient existing infrastructure capacity available. Where a new development would lead to a shortfall in infrastructure provision, the development will be required to fund necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. This of course applies to cross-boundary infrastructure. However, for clarity a minor modification is proposed to the explanation of draft Policy DP25 regarding cross-boundary CIL spend where this is justified.	Yes	DP25. Infrastructure Provision
A0669	B001	Revise the Viability Assessment undertaken to inform the draft Shropshire Local Plan to include consideration of the need for developer contributions towards NHS Trusts' critical infrastructure requirements arising from growth in population proposed in the Draft Shropshire Local Plan. Update Place Plans, Infrastructure Plan, CIL, and all supporting infrastructure documents referred to by the draft Shropshire Local Plan draft Policies, include reference to the need for the NHS Trusts' infrastructure requirements with regular on-going engagement between the Council and the trusts. Add the NHS Trusts (Midlands Partnership Foundation NHS Trust (MPFT) and Shropshire Community Health NHS Trust (SCHT)), as critical infrastructure bodies, into the list of bodies the Council intent to work in partnership with to ensure essential infrastructure is delivered across the plan period. Amend para 1 of draft Policy DP25 to include the following additional paragraph after existing text: "The infrastructure requirements will be set out in the Local Infrastructure Plan, Shropshire Place Plans, Strategic Infrastructure Implementation Plan, Local Infrastructure List, Site Allocations Policies and masterplans." Amend para 4.226 of the proposed explanation to draft Policy DP25 to include "including critical healthcare infrastructure identified by the Midlands Partnership Foundation NHS Trust (MPFT) and Shropshire Community Health NHS Trust (SCHT)..." following existing reference to health facilities.	The Shropshire Viability Assessment includes consideration of CIL and an initial assumption of £5,000/unit of S106 contributions on sites of 50 or more dwellings towards infrastructure costs. It does not commit these funds to any specific infrastructure requirements and it is considered that these are reasonable assumptions to underpin this assessment. Draft Policy DP25 specifies that "For new development where the Community Infrastructure Levy (CIL) applies, priority will be given to using CIL funds to support any critical or statutory infrastructure requirements resulting from the development." As recognised within the representation, the explanation to draft Policy DP25 specifically includes reference to health care infrastructure as a form of critical infrastructure. Furthermore, draft Policy DP25 states that "On proposals where it is considered CIL funds will not be sufficient to meet the specific infrastructure needs of development, consideration will be given to applying additional Section 106 contributions for specific infrastructure items where this meets national requirements for planning obligations." Shropshire Council welcomes positive engagement with the NHS Trusts and would encourage them to join the strategic infrastructure forum established for Shropshire. We would also encourage engagement in the Place Plan process to identify critical statutory healthcare infrastructure requirements alongside all potential funding mechanisms (including national funding) available - particularly as much of the growth proposed within the draft Shropshire Local Plan is that resulting from natural change/migration captured within national population/household projections. Ultimately, the most appropriate funding source(s) will vary dependent on the nature of the scheme and this will allow for a coordinated approach to delivery of this critical infrastructure - for instance CIL funding must be used on infrastructure (capital projects, although associated revenue spending to maintain those capital items is also permissible) and cannot be used to resolve existing deficits unless needed to support new development) whilst S106 funding must be necessary to make the development acceptable in planning terms; directly related to the development; and fairly and reasonably related in scale and kind to the development. With regard to proposed changes to draft Policy DP25, it is not considered appropriate to reference specific sources of information in para 1 of the draft Policy, as this may limit the ability to respond to information emerging through the Planning Application process or other emerging sources of infrastructure requirements. However, the documents referenced within the representation are of course relevant sources of information in this context. With regard to proposed changes to the proposed explanation of draft Policy DP25, this already includes reference to health care infrastructure, which can of course include the critical statutory healthcare infrastructure requirements of the NHS Trusts, as such it is not considered necessary to make any amendments in order to recognise this. Furthermore the explanation does not make reference to specific infrastructure providers as this would be very extensive and of course often evolves over time. Rather the Place Plans (live documents), and the associated Strategic Infrastructure Implementation Plan, are considered the most effective means of identifying infrastructure requirements and providers.	No	DP25. Infrastructure Provision
A0014	B084	N/A	Support welcomed.	No	DP26. Strategic, Renewable and Low Carbon Infrastructure
A0131	B003	None specified	Support welcomed.	No	DP26. Strategic, Renewable and Low Carbon Infrastructure

1	2	3	4	5	6	7	8

A0347	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP26	No	No	Not Specified	1. Paragraph 2, point i – suggestions to make policy more effective. Hydropower applications should pay attention to fish stocks, “migratory fish impact”, and normally be accompanied by a Flood Risk Assessment (see also Policy DP21); “a Water Framework Directive (WFD) Assessment and Geomorphological assessment”. Hydropower schemes typically alter flow regimes, sediment movement and can impact geomorphological processes and habitats, and thus affect fish, macrophyte and invertebrate populations. 2. Paragraph 2, point j - suggestions to make policy more effective. Maybe include impact on noise/vibration, air quality emissions, odour and dust/bio-aerosols...
A0348	B022	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP26	Not Specified	Yes	Not Specified	Welcome reference in draft Policy DP26 to the need for assessments accompanying Planning Applications for non-wind renewable and low carbon development to comprise the consideration of historic assets (including the considerations within Policy DP23).
A0393	B037	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0410	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP26	Not Specified	No	Not Specified	Draft Policy DP26 is unsound. It lists negative impacts renewable energy could give rise to, rather than a positive strategy which maximises potential for renewable development, as required by para 151a of the National Planning Policy Framework (NPPF). Electricity usage in Shropshire is currently about 2,300 GWh per year and estimated to rise to about 4,800 GWh per year by 2030. Draft Policy DP26 is unrealistic and fails to recognize the scale of renewable energy required for decarbonisation from gas to renewable electricity. Neighbourhood Plans would not, indeed could not, produce the renewable potential required to follow the pathway to zero carbon, set in the Climate Change Act 2008, as updated. For this reason the policy is unsound. The deployable renewable energy resources in Shropshire should be identified and mapped to inform identification of areas of search, as required by para 151b of the NPPF and Planning Practice Guidance for renewable and low carbon energy. The draft Policy should encourage retro-fitting of solar PV on the roofs of existing industrial buildings, require them for all new industrial buildings and encourage other measures for development to generate renewable electricity on-site, as envisaged by para 151c of the NPPF. There should also be specific encouragement for community-led initiatives for renewable and low carbon energy as required by para 152 of the NPPF.
A0600	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP26	Yes	No	Yes	Welcomes reference to aircraft safety and defence operations within draft Policy DP26. With regard to wind turbines, these can have a considerable impact on both aviation safety and operation of radar and technical assets, so welcome requirement to take defence interests into account. However, to improve effectiveness of the draft Policy, ensure it is justified and the most appropriate strategy, additional wording consistent with NPPG should be included within either the draft Policy or its explanation stating “Where a proposed turbine is 11 metres to blade tip or taller, and/or has a rotor diameter of 2 metres or more, it will be necessary to ensure that it would offer no detriment to the operation of defence technical assets such as radar”. This would address the actual impact of wind turbines and would make prospective developers aware of the potential impacts of wind turbines.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0347	B007	n/a	1. Amendment to part (i) of policy accepted and minor modification proposed. 2. Assessments for noise and air quality emissions are covered by Policy DP18 and so do not need to be specified in this policy. Minor modification to part (j) of policy to cover bio-aerosols proposed	Yes	DP26. Strategic, Renewable and Low Carbon Infrastructure
A0348	B022	N/A	Noted	No	DP26. Strategic, Renewable and Low Carbon Infrastructure
A0393	B037	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP26. Strategic, Renewable and Low Carbon Infrastructure
A0410	B013	The draft Shropshire Local Plan should be referred back for further consideration and consultation of draft Policy DP26.	The Council considers that the requirements of this policy are consistent with national planning policy and guidance. No change proposed.	No	DP26. Strategic, Renewable and Low Carbon Infrastructure
A0600	B005	Include additional text either within draft Policy DP26 or its proposed explanation stating "Where a proposed turbine is 11 metres to blade tip or taller, and/or has a rotor diameter of 2 metres or more, it will be necessary to ensure that it would offer no detriment to the operation of defence technical assets such as radar".	Noted. Any development of wind turbines would be expected to comply with local and national policy and best practice guidance, including the National Planning Practice Guidance (NPPG). The NPPG identifies a number of safety considerations for wind turbines, as such for clarity this document will be cross-referenced with the explanation to draft Policy DP26.	Yes	DP26. Strategic, Renewable and Low Carbon Infrastructure

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP26	Yes	No	Yes	<p>Draft Policy DP26 is unsound. Whilst it mentions a wide range of forms of renewable energy, it just lists potential negative impacts, rather than providing a positive strategy which maximises potential for renewable energy development, as required by para 15 of the National Planning Policy Framework (NPPF). It also fails to achieve the intended low carbon transition, zero carbon Shropshire objectives (net zero carbon by 2030) and Government's minimum objectives for renewables set out in national policy/legislation (zero carbon by 2050 if not sooner). To achieve this and decarbonise heat and transport renewable energy generation must quadruple from current levels to meet demand.</p> <p>Shropshire Council is currently supporting mapping of the deployable renewable energy resources across the region and will develop more detailed policies identifying these (with maps identifying potentially suitable areas for development), with clear criteria for the assessment of planning applications, and encouragement for developers to take up these significant opportunities for the development of the Shropshire economy and self-sufficiency in energy by 2030. Shropshire Council is also giving specific encouragement to community energy projects, as suggested by para 152 of the NPPF.</p> <p>The policy needs to match Shropshire Council intentions by reference to the positive contribution of renewable energy to meeting carbon reduction commitments and to the potential benefits of renewable energy in terms of economic development.</p>
A0629	B007-37	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0629	B007-40	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B005	<p>Draft Policy DP26 should be completely re-written as follows: Decentralised renewable and low carbon energy schemes will be supported and encouraged, and will be approved where their impact is, or can be made, acceptable. In determining applications for renewable and low carbon energy, and associated infrastructure, the following issues will be considered:</p> <p>a) the contribution of the proposals, in the light of the Council's pledge to be net zero carbon by 2030, to cutting greenhouse gas emissions and decarbonising our energy system. b) the impact of the scheme, together with any cumulative issues, on landscape character, visual amenity, water quality and flood risk, heritage significance, recreation, biodiversity and, where appropriate, agricultural land use, aviation and telecommunications. c) the impact on users and residents of the local area, including where relevant, shadow flicker, air quality, vibration and noise. d) the direct benefits to the area and local community.</p> <p>Ground-mounted solar energy developments are more likely to be supported in areas identified as suitable in principle as set out on the maps currently under development on behalf of the council and their partners in Shropshire Climate Action Partnership. Outside these areas, applicants will need to provide a clear justification for the suitability of the chosen development site for solar development at the relevant scale. Proposals for renewable energy proposals within the AONB will be encouraged, however, where development proposals will affect the AONB, the benefits of development must demonstrably outweigh any harm to the designated area or its setting.</p> <p>Additionally, proposals for wind energy development:</p> <p>a) should be located within a suitable area as indicated on the Policies Map; b) are more likely to be supported if they fall within Landscape Character Areas of lower sensitivity to the relevant development scale; c) may also be suitable in principle if they are located in large new development sites, existing industrial estates or if they are proposed in neighbourhood plans or through community energy schemes; and d) it can be clearly demonstrated that the scale of the development is appropriate to the site and the regions energy needs, the benefits of the development outweigh any harm to the local community, and that the development complies with the relevant criteria.</p> <p>Where appropriate, provision should be made for the removal of the facilities and reinstatement of the site should it cease to be operational. Particular support will be given to renewable and low carbon energy generation developments that are led by, or meet the needs of local communities, and where this supports the development of local employment and the economy.</p>	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP26. Strategic, Renewable and Low Carbon Infrastructure
A0629	B007-37	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP26. Strategic, Renewable and Low Carbon Infrastructure
A0629	B007-40	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP26. Strategic, Renewable and Low Carbon Infrastructure

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B029	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP26	Yes	No	Yes	<p>Requirements of the Climate Change Act (CCA) are implicit in the National Planning Policy Framework (NPPF) (references the CCA in footnote 48 and para 149 and a more general reference in para 148). Extracts of these documents provided in representation. This should be carried through and reflected in the content of the draft Shropshire Local Plan, which also needs to support the objectives of the CCA.</p> <p>The definition of 'soundness' of a Local Plan requires consistency with the NPPF and for it to be 'justified – an appropriate strategy'.</p> <p>Having regard to paras 20 and 21 of the NPPF, the draft Shropshire Local Plan should regard provision of energy as a strategic planning item and therefore not bound to more local policy expressed, for instance, through neighbourhood plans.</p> <p>Draft Policy DP26 of the Shropshire Local plan is defective against these requirements and considerations and also introduces constraints not supported by the NPPF, as:</p> <ul style="list-style-type: none"> <li>-It limits Shropshire's ability to play its part in responding to national energy policy (as set out in the CCA) by placing differential limitations of the types of renewable energy that may be deployed (wind v non-wind renewables). This seems to follow from the NPPF and is not reflected in the CCA (makes no distinction between the types of technologies needed to reduce greenhouse gases), thus the limitation is weak.</li> <li>-It imposes limits of the scale of such deployment by linking it to neighbourhood plans, where such linkage is not supported by the NPPF. The requirement of footnote 40 of the NPPF, to consult the affected local community once suitable areas have been identified within the development plan (with regard to relevant wind turbine proposals) is ambiguous. It does not limit the scale of any such plan nor the implied scale of the 'affected local community'. Translation of this by para 4a of draft Policy DP26 into 'an adopted Neighbourhood plan', which has a specific geographic constraint, is thus not supported by the NPPF.</li> <li>-The Climate Change Committee Budget 6 and other considerations indicate need for electricity will double in the UK over the next 10 to 20 years. This implicit limitation of scale in draft Policy DP26 to the 'very local' makes it impossible for the draft Shropshire Local Plan to allow appropriate renewable energy deployment at a scale that will allow Shropshire to fully meet its implicit commitment to national energy policy. Further it is inconsistent with other parts of the draft Shropshire Local Plan (particularly draft Policy SP12) as it impacts on the ability to fully utilise natural resources for Shropshire regional economic development (as set out in para 5b of draft Policy SP12). Para 4.230 of the proposed explanation of draft Policy DP26 is more positive on this matter.</li> </ul>
A0634	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP26	Yes	No	Yes	<p>Given the clear importance during the period of the Plan of greatly increased capacity for renewable energy to address the Climate and Ecological Emergency and the urgent need to reduce carbon emissions to net zero, the Plan's content on renewable energy arguably does not provide adequate policy guidance. Since such developments have the potential to be in conflict with the purposes of AONB designation, the lack of policy in this area puts the special qualities of the AONB at risk, while also increasing the likelihood of conflict between proposed developments and the AONB designation, with the knock on effect of slowing and making more expensive the delivery of new renewable capacity. Clear policy can help to prevent such conflicts and enable good levels of new renewable energy generation while protecting the AONB. There is within the Local Plan no real evidence of a strategy for renewable energy, such as what quantity of generation might come from what sources, or any discussion at all of areas, sites or locations. The Management Plan policy and guidance would in fact allow a modest degree of wind generation, though the Local Plan policy more or less prevents this, since Neighbourhood Plans are so limited in coverage. There is also no policy to guide planning applications for wind microgeneration in the AONB. The AONB Partnership believes it is possible to achieve a very substantial increase in renewable energy generation in Shropshire without harm to the AONB, but has felt obliged given its statutory remit to object to both large scale solar and biomass enterprises within the AONB.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B029	<p>Draft Policy DP26 should be re-written as follows: The delivery of sustainable communities in Shropshire relies on the provision of new strategic infrastructure and the continued operation of existing strategic infrastructure. Proposals which are likely to affect an internationally designated wildlife site will require a project level HRA in accordance with Policy DP12. Existing Strategic Infrastructure: 1. Development will be expected to demonstrate that it will not adversely affect, either directly or indirectly, the continued operation and potential expansion of existing strategic infrastructure. New Strategic Infrastructure: 2. Renewable and low carbon development will be supported where its impact is, or can be made, acceptable. To aid in this determination, all applications should be accompanied by a strategic assessment, involving all affected communities, of the proposal's effect on the following during both the construction, operational and post operational stages: a. Visual amenity (including the considerations within Policy DP17); b. Landscape character (including the considerations within Policy DP17); c. Natural assets (including the considerations within Policy DP12); d. Historic assets (including the considerations within Policy DP23); e. Air quality, noise and public amenity (including the considerations within Policy DP18); f. Water quality and water resources noise (including the considerations within Policy DP19); g. Traffic generation and the nature of vehicle movements; h. The Shropshire Hills AONB (including the considerations within Policy DP24); i. Hydropower applications should pay attention to fish stocks and normally be accompanied by a Flood Risk Assessment (see also Policy DP21); j. Biomass, energy from waste, biogas and anaerobic digestion proposals should also address the impact on vibration, odour and dust (the latter for biomass and energy from waste only). Opportunities to recover heat and power are encouraged in accordance with Policy SP3; k. Large scale proposals should show how they have made effective use of previously developed and non-agricultural land. Where a proposal requires the use of agricultural land, poorer quality land should be used in preference to land of a higher quality (see also Policy DP18). Proposals should allow for continued agricultural use wherever possible and/or encourage biodiversity improvements around installations; and l. Consideration of aircraft safety, (including defence operations).</p> <p>3. In addition to the general provisions above at a-l above: a) For PV schemes the assessment should pay particular attention to the impact of glint and glare on neighbouring land uses and residential amenity. b) For wind schemes the assessment should pay particular attention to turbine generated noise and impact on bird movements.</p> <p>4. The scale of installations should be assessed as a strategic planning issue.</p> <p>5. The assessment should be proportionate to the development proposed and include sufficient information to allow for an accurate evaluation of all impacts, both negative and positive. It should cover necessary ancillary development such as security measures, lighting, access tracks and fencing. Impacts should be considered cumulatively against those existing or consented development types with similar impacts in the surrounding area. Mitigation measures to remove or reduce adverse impacts should be identified.</p> <p>6. Monitoring and Decommissioning: a) Where planning permission establishes performance standards, applicants will be expected to demonstrate compliance through the submission of regular monitoring reports. b) Proposals for temporary infrastructure will be expected to include measures for satisfactory restoration, including progressive restoration, of the site at the earliest practicable opportunity to an agreed after-use or to a state capable of beneficial after use. c) Where appropriate, planning obligations will be sought in order to secure the after-use, long term management and maintenance of the site.</p>	<p>The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed</p>	No	DP26. Strategic, Renewable and Low Carbon Infrastructure
A0634	B003	<p>The Plan should set out a Strategy for increasing renewable generation capacity in the county while protecting other interests such as the AONB. The Strategy should consider the potential for different technologies and ideally give policy guidance to locating larger developments.</p> <p>Planning Practice Guidance Paragraph: 005 Reference ID: 5-005-20150618 states: "Identifying areas suitable for renewable energy in plans gives greater certainty as to where such development will be permitted. For example, where councils have identified suitable areas for large scale solar farms, they should not have to give permission outside those areas for speculative applications involving the same type of development when they judge the impact to be unacceptable."</p>	<p>Any development proposals for renewable energy will be assessed against policy DP24 The Shropshire Hills AONB. The Council considers that the latter provides sufficient clarity and guidance on the protection of the special qualities of the designated area. No change proposed.</p>	No	DP26. Strategic, Renewable and Low Carbon Infrastructure

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0658	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP26	No	No	Not Specified	Policy DP26 does not define what is meant by microgeneration turbines but in a recent appeal decision in Wychavon District Council, turbines with a rotor diameter of 13.1 metres and a tip height of 25 metres were considered to be micro turbines. (Appeal ref APP/H1840/W/20/3249183). We assume in our statement that this is what Shropshire Council intended to be covered by the exemption as no definition is provided. On the face of it, it might appear that DP26 does conform to Paragraph 151-153 of the NPPF together with footnote 149. However, our case is that Shropshire Council had adequate time and opportunity to define which areas of the County might be suitable for wind power and provide positive strategy for energy from wind power as required by Paragraph 151 (a) rather than the negative and restrictive approach they have adopted. The potential for wind power in the County is high and it is a component of renewable energy in Shropshire that is so important that to exclude such development from the local Plan results in an unsound Plan. Furthermore, as Section 19 of the Planning and Compulsory Purchase Act 2004 as amended requires that taken as a whole, plan policy contributes to the mitigation of climate change. Clearly this duty does not mean just one plan policy contributes to the mitigation of climate change. Neither does it state that every plan policy must contribute to mitigating climate change. Our view is that the potential for generating wind power is of more than county wide significance, it is of regional significance and that effectively preventing its development in the Plan means that it is in breach of this statutory duty. It appears that the Council intend the policy as drafted to result in an effective ban on wind energy developments except for micro turbines but in practice it may result in some uncertainty if the Appeal decision in Wychavon is followed by other Inspectors. No early, proportionate and effective engagement between plan makers and local organisations has taken place with Shropshire Council re climate change. Our response was excluded from the previous consultation summary. Previous comments from us being ignored has ultimately seemed to us a deliberate policy to suppress any comments relating to climate change issues and ensure that members of the public and members of council were kept un-informed on this issue. On 3 August 2020 Shropshire Council published the Regulation 18 pre-submission draft of the Local Plan. The Plan contained no Policy in relation to wind power and there were no documents of evidence lodged relating to wind power. This was surprising in the context of the previous statements and we submitted a FOI Request on 1st September 2020 to discover how this omission had occurred. Of the potential renewable energy over 9GW was from wind power-mostly large-scale turbines in Shropshire. This shows that this resource is of regional importance as well as countywide importance. Without enabling the development of wind power in Shropshire it cannot be justified that the Shropshire Local Plan has a positive strategy for renewable energy as required by the relevant paragraphs of the NPPF and the PPG and the Local Plan should be assessed as unsound. Overall Policy DP26 has a negative approach to renewable energy with basically a checklist to set out all the reasons it should not proceed. This is not the required positive approach to mitigating climate change as required by Section 19 of the Planning and Compulsory Purchase Act 2004 as amended. We submit that the Plan as submitted is in breach of this statutory duty.
A0014	B085	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP27	Not Specified	Not Specified	Not Specified	Welcome the move away from less sustainable practices (reducing need to travel, etc.).
A0148	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP27	Not Specified	Not Specified	Not Specified	L&Q Estates consider the Council should not impose new electronic communications requirements beyond the provision of infrastructure as set out in the statutory Building Regulations. The Press Release confirmed the requirement will apply to all to new builds development, and that the new measures will place responsibilities on both developers and network operators. It also confirms that the legislation is to be laid as soon as parliamentary time allows and will be laid as secondary legislation so that it can be introduced quicker.
A0393	B038	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0487	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP27	Not Specified	No	Not Specified	Under Policy DP27 Bullet Point 3a, residential developments will be expected to deliver gigabit-capable broadband infrastructure using “fibre to the premises” technology wherever practical (provision in residential developments of less than 10 dwellings may be subject to viability constraints) or under Bullet Point 3b alternative gigabit-capable technologies where justified for reasons including viability, distance from the network or other constraints preventing “fibre to the premises”. Under Bullet Point 4, residential developments will also deliver passive ducting wherever possible, to facilitate the delivery of competitive fibre broadband services. The Council should not impose new electronic communications requirements beyond the provision of infrastructure as set out in statutory Building Regulations. In the Budget (11th March 2020), the Government confirmed future legislation to ensure that new build homes are built with gigabit-capable broadband. The Government will amend Part R “Physical Infrastructure for High Speed Electronic Communications Networks” of the Building Regulations 2010 to place obligations on housing developers to work with network operators to install gigabit broadband, where this can be done within a commercial cost cap. The Department for Culture, Media and Sport (DCMS) has outlined its intentions on the practical workings of this policy, which will apply to all to new builds. Any type of technology may be used, which is able to provide speeds of over 1000 Mbps. All new build developments will be equipped with the physical infrastructure to support gigabit-capable connections from more than one network operator.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0658	B003	To provide for the development of wind power in the Shropshire Local Plan could only be achieved by a resubmission of this part of the Shropshire Local Plan after necessary studies and consultations are carried out. Stretton Climate Care does not wish to delay adoption of the Local Plan if an urgent partial review of the Local Plan would be carried out to address the issue of wind power with adequate studies and consultation. We would need assurances that Shropshire Council would pursue this matter without delay and without a prior determination to prevent all or most wind power developments.	The Council considers that the requirements of this policy are consistent with national planning policy and guidance and that as such, no change is required.	No	DP26. Strategic, Renewable and Low Carbon Infrastructure
A0014	B085	N/A	Shropshire Council welcomes the support for Policy DP27 as evidence of the soundness of the Draft Local Plan. The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. This is especially promoted through Policy DP27 and the key objectives of the policy to deliver high quality, digital infrastructure that meets the needs of businesses and communities as an essential utility to support their quality of life, to facilitate social inclusion and reduce the need to travel to access work, services and leisure opportunities particularly to support how they choose to work, live and seek to lower the 'carbon footprint' of their business operation or lifestyle.	No	DP27. Broadband and Mobile Communications Infrastructure
A0148	B011	The proposed requirements of Policy DP27 are unnecessary and repetitive of Building Regulations and should therefore be deleted.	Shropshire Council is working to improve broadband connectivity across the County through its Connecting Shropshire programme to attract commercial superfast broadband infrastructure investment and to bring faster broadband to areas where it is not economically viable for commercial operators to provide these services. The purpose of these objectives for connecting Shropshire to the best electronic communications infrastructure into their business premises and homes is to ensure businesses, employees and residents can embrace and optimise the use of broadband in their everyday lives. Unless the development market also embraces these objectives in their development design schemes and build specifications through the provision of network infrastructure and fibre to premises technologies then the roll out of digital connectivity will not be achieved and Shropshire will struggle in its programme to move towards and achieve the broader objective of creating a zero carbon economy in the County.	No	DP27. Broadband and Mobile Communications Infrastructure
A0393	B038	Explicitly identify within the policy how it will assist in achieving net zero carbon	Shropshire Council welcomes the support for Policy DP27 as evidence of the soundness of the Draft Local Plan. The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. This is especially promoted through Policy DP27 and the key objectives of the policy to deliver high quality, digital infrastructure that meets the needs of businesses and communities as an essential utility to support their quality of life, to facilitate social inclusion and reduce the need to travel to access work, services and leisure opportunities particularly to support how they choose to work, live and seek to lower the 'carbon footprint' of their business operation or lifestyle.	No	DP27. Broadband and Mobile Communications Infrastructure
A0487	B004	The Council's approach in Policy DP27 is unnecessary and repetitive of Building Regulations, Bullet Points 3a, 3b & 4 should be deleted.	Shropshire Council is working to improve broadband connectivity across the County through its Connecting Shropshire programme to attract commercial superfast broadband infrastructure investment and to bring faster broadband to areas where it is not economically viable for commercial operators to provide these services. The purpose of these objectives for connecting Shropshire to the best electronic communications infrastructure into their business premises and homes is to ensure businesses, employees and residents can embrace and optimise the use of broadband in their everyday lives. Unless the development market also embraces these objectives in their development design schemes and build specifications through the provision of network infrastructure and fibre to premises technologies then the roll out of digital connectivity will not be achieved and Shropshire will struggle in its programme to move towards and achieve the broader objective of creating a zero carbon economy in the County. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0582	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP27	Not Specified	No	Not Specified	DP27.5 refers to residential and commercial developments being expected to maintain and improve the connectivity of mobile voice and data communications networks. Parts of Policy DP27.5 are overly onerous for site developers. The role of providing and maintaining communications networks is one for the community-cation infrastructure companies and not one for site developers.
A0608	B020	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP27	Not Specified	No	Not Specified	Part 3 of draft Policy DP27 requires residential developments to deliver gigabit-capable broadband infrastructure using 'fibre to the premises' technology wherever practical. Capacity to deliver gigabit-capable broadband is determinate upon broadband providers and cannot be guaranteed by developers. Furthermore Building Regulations require in-building infrastructure for copper or fibre-optic cables or wireless devices capable of delivering broadband speeds greater than 30 Mbps to be installed. Broadband infrastructure is already covered by Building Regulations and the requirement of this policy that is well above 30 Mbps, so not justified. This policy should be amended to require broadband installation without being more specific about the type of broadband required to be provided.
A0629	B007-38	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0674	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP27	Not Specified	No	Not Specified	Welcome aspirations to improve Broadband capacity. However, object to point 3 of draft Policy DP27 as it is hard for developers to deliver such requirements, as this has to be delivered by infrastructure providers who developers have little influence/control over.
A0004	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP28	Yes	No	Yes	The canal network between Shrewsbury, Uffington, Upton Magna and Withington should be restored.
A0014	B086	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP28(2 and 3(d, e and g))	Not Specified	Not Specified	Not Specified	1. Agree, we should respond positively to climate problems, but feel focus on unsustainable transport should be reconsidered. For example, DP28(3d, e and g) still promote road and other unsuitable transport links, i.e. HS2. 2. Explicit support of the NWRR is not supported.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0582	B008	Requested Change – Part 5 of Policy DP27 should be removed as the provision and maintenance of such communication networks are the responsibility of the relevant infrastructure providers.	Shropshire Council is working to improve broadband connectivity across the County through its Connecting Shropshire programme to attract commercial superfast broadband infrastructure investment and to bring faster broadband to areas where it is not economically viable for commercial operators to provide these services. The purpose of these objectives for connecting Shropshire to the best electronic communications infrastructure into their business premises and homes is to ensure businesses, employees and residents can embrace and optimise the use of broadband in their everyday lives. Unless the development market also embraces these objectives in their development design schemes and build specifications through the provision of network infrastructure and fibre to premises technologies then the roll out of digital connectivity will not be achieved and Shropshire will struggle in its programme to move towards and achieve the broader objective of creating a zero carbon economy in the County.	No	DP27. Broadband and Mobile Communications Infrastructure
A0608	B020	This policy should be amended to require broadband installation without being more specific about the type of broadband required to be provided.	Shropshire Council is working to improve broadband connectivity across the County through its Connecting Shropshire programme to attract commercial superfast broadband infrastructure investment and to bring faster broadband to areas where it is not economically viable for commercial operators to provide these services. The purpose of these objectives for connecting Shropshire to the best electronic communications infrastructure into their business premises and homes is to ensure businesses, employees and residents can embrace and optimise the use of broadband in their everyday lives. Unless the development market also embraces these objectives in their development design schemes and build specifications through the provision of network infrastructure and fibre to premises technologies then the roll out of digital connectivity will not be achieved and Shropshire will struggle in its programme to move towards and achieve the broader objective of creating a zero carbon economy in the County.	No	DP27. Broadband and Mobile Communications Infrastructure
A0629	B007-38	Explicitly identify within the policy how it will assist in achieving net zero carbon	Shropshire Council welcomes the support for Policy DP27 as evidence of the soundness of the Draft Local Plan. The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. This is especially promoted through Policy DP27 and the key objectives of the policy to deliver high quality, digital infrastructure that meets the needs of businesses and communities as an essential utility to support their quality of life, to facilitate social inclusion and reduce the need to travel to access work, services and leisure opportunities particularly to support how they choose to work, live and seek to lower the 'carbon footprint' of their business operation or lifestyle.	No	DP27. Broadband and Mobile Communications Infrastructure
A0674	B011	Review para 3 of draft Policy DP27.	Shropshire Council is working to improve broadband connectivity across the County through its Connecting Shropshire programme to attract commercial superfast broadband infrastructure investment and to bring faster broadband to areas where it is not economically viable for commercial operators to provide these services. The purpose of these objectives for connecting Shropshire to the best electronic communications infrastructure into their business premises and homes is to ensure businesses, employees and residents can embrace and optimise the use of broadband in their everyday lives. Unless the development market also embraces these objectives in their development design schemes and build specifications through the provision of network infrastructure and fibre to premises technologies then the roll out of digital connectivity will not be achieved and Shropshire will struggle in its programme to move towards and achieve the broader objective of creating a zero carbon economy in the County.	No	DP27. Broadband and Mobile Communications Infrastructure
A0004	B001	Modify DP28(3)(b) and para 4.253 to include the objective "To undertake the complete restoration of the Shrewsbury Canal to its original terminus at the Butter Market."	Shropshire Council recognises in Policy DP28 that the canal network provides a local travel option in communities with access to the network and for visitors and tourists in the County. Policy DP28 encourages this use of the canal network to influence individual travel choices and to reduce the cumulative impacts of travel and transport on the environment. Policy DP28 also encourages the protection and enhancement of the canal network to sustain these important local travel routes within and through the County. These aims are strengthened by their inclusion in Policy DP28 as part of the objectives for managing the scale and pattern of development in the Local Plan strategy to 2038. A modification to Policy DP28 promoting the complete restoration of the Shrewsbury Canal along its route to Newport, would not further strengthen the Council's policy objectives because there is no approved and costed scheme to completely restore this Canal. The objectives of Policy DP28 do support localised works to the Shrewsbury Canal and other canal routes and encourages the long term objective of sustaining the canal network for community use and for tourism and leisure.	No	DP28. Communications and Transport
A0014	B086	1. Reduce focus on unsustainable modes of transport within para 3d, e and g of draft Policy DP28. 2. Remove reference/support for the NWRR in para 3e of draft Policy DP28.	Policy DP28 recognises that a sustainable transportation system for Shropshire must include a range of transport networks and services and present a range of travel options to individuals, households, organisations and businesses. Policy DP28 constructs the transportation system into a hierarchy to promote sustainable choices by informing and encouraging those travelling or transporting goods to choose sustainable transport options to meet their needs. Although this hierarchy includes modes of transport considered to be unsustainable, these options are still part of the transportation system and may be the best or only means by which to travel or transport goods over long distances or to access less well connected places. Policy DP28 also recognises the need for more sustainable choices in looking towards the delivery of new travel and transport options, in advocating the Hierarchy of Sustainable Transport as a simple decision pathway for everyone to follow in making their choices about travel and transport and by encouraging everyone to consider how they can contribute to reversing adverse changes to our environment. <i>The objection to the inclusion of the Shrewsbury North West Relief Road in Policy DP28(3)(e) and paragraph 4.257 is addressed under representation A0014 B87.</i>	No	DP28. Communications and Transport

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0014	B087	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.257	Not Specified	Not Specified	Not Specified	Inclusion and support of the NWRR in the draft Shropshire Local Plan compromises any attempt at sustainability or addressing the climate and ecological emergency. The NWRR would be contrary to a number of policies in the plan including, SP3, DP1, DP5, DP15, DP16, DP17, DP18, DP20, DP23 and DP24.
A0393	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	<p>DP28 Includes vague aspirational statements not backed by tangibility &amp; therefore of no value. Question whether proposed demolition of Shrewsbury bus station contributes to widening transport choices.</p> <p>Para 4.249 The Hierarchy of Sustainable Transport is a prioritisation tool setting out important principles that will inform overall public policy. Inappropriate to reference the Hierarchy when Council funding &amp; decisions (20mph and bus station) have ignored hierarchy priorities.</p> <p>Reference to NWWR business case needs to reflect NWRR needs to be substantially re worked compared to the Outline Business Case to take into account falling rather than growing levels of traffic ( as detailed in other comments)</p> <p>Part 3e and para 4.257 The largest council promoted scheme detailed in the plan is the proposed North West Relief Road Based on information available at this time it is calculated that it will result in higher levels of car use and increased carbon emissions. It is therefore not appropriate for the Local Plan to include the promotion of this scheme.</p> <p>Para 4.257 Assumptions and justifications for the NWRR are no longer appropriate in light of government policy which will emerge in light of the Climate Emergency and Net Zero CO2 target &amp; result in traffic levels dropping. The business case and justification for the NWRR thus needs reassessment.</p> <p>Adoption of the NWRR in the plan &amp; effectively prioritising development opportunities over carbon emissions reduction is contrary to national net zero carbon objectives of net zero by 2050. It is accepted, including in 1994 Government report, that new roads like the NWRR generate additional traffic increasing transport's carbon emissions. Not acceptable that the Plan's reference to NWWR as the largest transport capital expenditure on undertaken by Shropshire Council does not reference &amp; is not explicitly linked to its carbon impacts. The NWRR is not approved. Independent evidence of the carbon impacts of NWRR needed which can be scrutinised &amp; evaluated. If this evidence indicates that the NWRR will reduce carbon, then this must be stated in the Local Plan, allowing evaluation for robustness and fitness for Local Plan purposes. If independent evidence shows that the NWRR will substantially increase carbon emission (both embodied carbon and use carbon) then it must form part of a realistic assessment of the ability of Shropshire Council to contribute to the achievement in net zero carbon.</p> <p>The existing Local Transport Plan, the existing plan - LPT3 which remains the relevant transport plan does not envisage that the NWRR will be needed during the lifetime of that plan. The NWRR is therefore not an essential part of the Local Plan.</p> <p>All DPs do not &amp; should contain an explicit link to the ways they will assist in achieving net zero carbon.</p> <p>Reference para 4.248 DP28 strategic developments are not located on existing rail infrastructure indicating additional road building which is inconsistent with the need to address the Climate Emergency</p>
A0401	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Transport	Not Specified	No	Not Specified	<p>References to sustainable transport provision are vague and do not sufficiently take into account the need to address climate change as evidenced in the Decarbonisation of Transport report.</p> <p>In draft Policy DP25: New road infrastructure provision will need to be minimised (taking into account embodied carbon emissions in concrete, steel and other components and increases in Co2e emissions).</p> <p>In draft Policy DP28: Para 1 is contradictory regarding widening choice of travel and reducing car dependency. Policies need to align with central government guidance of prioritising reduction of car use in terms of distance travelled, occupancy and in the timescale of this plan ownership.</p> <p>In draft Policy DP28: Para 2 is vague, the phrase 'best transport modes' could mean anything. Restate in terms of the hierarchy - best transport modes mean those with the lowest carbon output.</p> <p>In draft Policy DP28: Para 3 includes the phrase 'promotion of passenger transport', this is insufficient. It should be modified to stress the need to embrace 'integrated transport which includes provision of information, physical connectivity of modes of transport, integration of ticketing, interchange or co-mobility hubs and most importantly integration of planning so that housing developments have public transport provision and cycling and walking networks designed prior to commencement of development.</p> <p>Para 4.254 (explanation to DP28) The current Local Transport Plan does not do what it says here; there's no evidence to support these claims. The investment in major highways is in urgent need of review given the authority has declared a climate emergency.</p>
A0402	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP28	Yes	Yes	Yes	<p>Broadly welcomes para 3(b) of draft Policy DP28. However, the phrasing appears to indicate footways, cycleways, public rights of way and bridleways should be protected for active travel and canals to provide local transport routes to home, work, services and leisure. This should be amended so these routes are consistently addressed.</p> <p>Also, reference in para 4.252 of the explanation of draft Policy DP28 to developer contributions to improvements in transport networks should be expanded to include reference to canal towpaths. Development in proximity of canal towpaths can significantly increase their use which may require improvements to surfaces/access points to accommodate them. Keen to ensure new development mitigates any potential adverse impact on canal towpaths and maximise opportunities for use where appropriate and meeting necessary statutory tests for planning obligations. This will aid in clarity and effectiveness.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0014	B087	Remove reference/support for the NWRR in para 4.257.	Shropshire Council has set out in Policy DP28 the summary explanation for the North West Relief Road from the Outline Business Case for the construction of this new road. The primary purpose of the road is to link the urban highway network in both the north and the west of the town together to remove the need for local and through traffic to circumnavigate the east, south and west quadrants of the town or to travel through the town centre s opposed to simply traversing the north-west quadrant of the town. This strategic infrastructure proposal has been included in Policy DP28 to recognise a fundamental principal of the Hierarchy of Sustainable Transport which is the continuing need for private motor transport particularly with the national programme to move to vehicles with electronic power cells and other non-fossil fuel energy sources. This continuing need for private transport brings with it a need for essential improvements or new construction on the highway networks to support its use in order to properly serve the needs of the economy and the communities in Shropshire, the West Midlands and England. Shropshire Council considers that the principles and objectives of the Hierarchy of Sustainable Transport and the NWRR are mutually inclusive and contribute to the strengths and opportunities provided by a broad based, balanced and ambitious Local Plan. The Council considers that these two principles and objectives for the Hierarchy of Sustainable Transport and the provision of the NWRR are consistent with the strategy of the Local Plan. The policy framework is also internally consistent with the inclusion of the NWRR in Policy DP28 when the plan is read as a whole.	No	DP28. Communications and Transport
A0393	B004	See issues summary. Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed; Specific amendments identified : Do not include promotion of NWRR in Draft Local Plan; Omission of content re "widening travel and transport choices" in the Plan needs to be addressed; Explicitly identify within the policy how it will assist in achieving net zero carbon;	The need to reduce traffic and encourage alternative travel options is a theme running throughout the Plan and given particular emphasis in Policy DP28: Communications and Transport in relation to the Hierarchy of Sustainable Transport. The Local Plan places an emphasis on the location of new development in existing urban centres and the wording of many policies supports pedestrian, cycling and other sustainable transport options. This is supported and informed by the Sustainability Appraisal and site assessment process which contain criteria aimed at minimising car-based travel and encouraging walking and cycling or the use of public transport for longer journeys. Policy DP28 recognises that a sustainable transportation system for Shropshire must include a range of transport networks and services and present a range of travel options to individuals, households, organisations and businesses. Policy DP28 constructs the transportation system into a hierarchy to promote sustainable choices by informing and encouraging those travelling or transporting goods to choose sustainable transport options to meet their needs. Although this hierarchy includes modes of transport considered to be unsustainable, these options are still part of the transportation system and may be the best or only means by which to travel or transport goods over long distances or to access less well-connected places. Policy DP28 also recognises the need for more sustainable choices in looking towards the delivery of new travel and transport options and advocates the Hierarchy of Sustainable Transport as a simple decision pathway for everyone to follow in making their choices about travel and transport and by encouraging everyone to consider how they can contribute to reversing adverse changes to our environment. Shropshire Council has set out in Policy DP28 the summary explanation for the North West Relief Road from the Outline Business Case for the construction of this new road. The primary purpose of the road is to link the urban highway network in both the north and the west of the town together to remove the need for local and through traffic to circumnavigate the east, south and west quadrants of the town or to travel through the town centre s opposed to simply traversing the north-west quadrant of the town. This strategic infrastructure proposal has been included in Policy DP28 to recognise a fundamental principal of the Hierarchy of Sustainable Transport which is the continuing need for private motor transport particularly with the national programme to move to vehicles with electronic power cells and other non-fossil fuel energy sources. This continuing need for private transport brings with it a need for essential improvements or new construction on the highway networks to support its use in order to properly serve the needs of the economy and the communities in Shropshire, the West Midlands and England. Shropshire Council considers that the principles and objectives of the Hierarchy of Sustainable Transport and the NWRR are mutually inclusive and contribute to the strengths and opportunities provided by a broad based, balanced and ambitious Local Plan. The Council considers that these two principles and objectives for the Hierarchy of Sustainable Transport and the provision of the NWRR are consistent with the strategy of the Local Plan. The policy framework is also internally consistent with the inclusion of the NWRR in Policy DP28 when the plan is read as a whole.	No	DP28. Communications and Transport
A0401	B001	Draft Policy DP28 should be amended as follows: Para 1 needs to align with central government guidance of prioritising reduction of car use in terms of distance travelled, occupancy and in the timescale of this plan ownership. Para 2 should refer to the transport hierarchy. Para 3 should include embracing 'integrated transport which includes provision of information, physical connectivity of modes of transport, integration of ticketing, interchange or co-mobility hubs and most importantly integration of planning so that housing developments have public transport provision and cycling and walking networks designed prior to commencement of development.	The need to reduce traffic and encourage alternative travel options is a theme running throughout the Plan and given particular emphasis in Policy DP28: Communications and Transport in relation to the Hierarchy of Sustainable Transport. The Local Plan places an emphasis on the location of new development in existing urban centres and the wording of many policies supports pedestrian, cycling and other sustainable transport options. This is supported and informed by the Sustainability Appraisal and site assessment process which contain criteria aimed at minimising car-based travel and encouraging walking and cycling or the use of public transport for longer journeys. The Local Plan seeks to ensure that new development provides opportunities to use other more active modes of transport and that these networks of footways and cycleways will link into the existing pedestrian, cycling, public rights of way and canal networks. The wider issues relating to the management of the highways network and transport systems in the County are matters to be addressed through the Local Transport Plan. Shropshire Council is currently preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.	No	DP28. Communications and Transport
A0402	B004	Para 3(b) of draft Policy DP28 should be reworded to consistently reference: footways, cycleways, public rights of way, canal towpaths and bridleways as being protected for active travel and to provide local transport routes to home, work, services and leisure. Para 4.252 of the explanation of draft Policy DP28 should include reference to developer contributions to improvements to canal towpaths.	The wording of Policy DP28(3)(b) sets out the objective sought in the proposed modification in relation to the measures that need to be taken by developers and the Council to protect, extend and improve these networks but DP28(3)(b) would benefit from the identification of canal towpaths. It is proposed that DP28(3)(b) be modified through the insertion of the words "canal towpaths" in the list of local access routes and to clarify the role of the canal network. In relation to developer contributions to improve canal towpaths this would have a very specific locational application to developments located on or close to the canal network. In these instances the need for an investment in the canal network would have to be shown to be relevant and necessary to the proposed development. This requirement may not be placed on any and every development determined by the Council but where it is necessary it may be required under the proposed wording in Policy DP28(3)(b).	Yes	DP28. Communications and Transport

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0410	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP28	Not Specified	No	Not Specified	Draft Policy DP28 is not ambitious enough in aligning with the Council's declaration of a climate emergency or with carbon reduction goals. Reports looking at modal shift and vehicle mileage reductions needed to achieve net zero emissions in Bristol and by the Committee on Climate Change concluded the need for around 50% reduction in car miles and 40% reduction in van/lorry miles, driven by shifts to public transport, cycling and walking and behaviour/system change (freight consolidation, cargo/e-bikes, car clubs and mobility as a service initiatives). They also indicate Local Authorities have a key role in reducing emissions and facilitating these changes. There may be less scope for this in a largely rural county like Shropshire but the corollary of that is that development should be weighted more towards the urban centres, with the minimal amount being targeted at rural villages. Government has also produced a number of documents (may not yet have filtered through to policy) which stress ambitions for cycling and walking and support a more ambitious approach within Local Plans. The RTPI advise that to align with net zero commitments, local plans should: set ambitious requirements for trip reduction, mode share targets and 'zero carbon' outcomes; prioritise urban renewal that enables growth while reducing travel demand; maximise the potential for local living so people can meet their needs by walking and cycling; and all new development to be located and designed to generate zero transport emissions.
A0609	B025	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP28	Not Specified	Yes	Not Specified	Draft Policy DP28 seeks to improve transport networks, improve connectivity and accessibility, reduce car dependency and manage the impacts of transport movements. Agree this can be achieved through the delivery of a sustainable pattern of growth and development within the County which is endorsed within Chapter 9 of the National Planning Policy Framework (NPPF). Have no concerns regarding the soundness of this policy.
A0629	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP28	No	No	Yes	Draft Policy DP28 is not sound or legally complaint because it does not comply with government policy and will not achieve stated Council objectives for net zero carbon Shropshire by 2030, or the longer term objectives of the Climate Change Act (2008). The draft Policy has clearly not been informed by Governments proposals for de-carbonising transport, reducing car trips/promoting active travel and EV charging infrastructure is set out in 'Decarbonising Transport'; aspirations for increased cycling in 'Gear Change' and Local Transport Note 1/20 or RTPI advice to set ambitious requirements for trip reduction, mode share targets and 'zero carbon' outcomes; prioritise urban renewal that enables growth while reducing travel demand; maximise the potential for local living so people can meet their needs by walking and cycling; and all new development to be located and designed to generate zero transport emissions.
A0629	B007-4	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	DP28 Includes vague aspirational statements not backed by tangibility & therefore of no value. Question whether proposed demolition of Shrewsbury bus station contributes to widening transport choices. Para 4.249 The Hierarchy of Sustainable Transport is a prioritisation tool setting out important principles that will inform overall public policy. Inappropriate to reference the Hierarchy when Council funding & decisions (20mph and bus station) have ignored hierarchy priorities. Reference to NWR business case needs to reflect NWR needs to be substantially re worked compared to the Outline Business Case to take into account falling rather than growing levels of traffic ( as detailed in other comments) Part 3e and para 4.257 The largest council promoted scheme detailed in the plan is the proposed North West Relief Road Based on information available at this time it is calculated that it will result in higher levels of car use and increased carbon emissions. It is therefore not appropriate for the Local Plan to include the promotion of this scheme. Para 4.257 Assumptions and justifications for the NWR are no longer appropriate in light of government policy which will emerge in light of the Climate Emergency and Net Zero CO2 target & result in traffic levels dropping. The business case and justification for the NWR thus needs reassessment. Adoption of the NWR in the plan & effectively prioritising development opportunities over carbon emissions reduction is contrary to national net zero carbon objectives of net zero by 2050. It is accepted, including in 1994 Government report, that new roads like the NWR generate additional traffic increasing transport's carbon emissions. Not acceptable that the Plan's reference to NWR as the largest transport capital expenditure on undertaken by Shropshire Council does not reference & is not explicitly linked to its carbon impacts. The NWR is not approved. Independent evidence of the carbon impacts of NWR needed which can be scrutinised & evaluated. If this evidence indicates that the NWR will reduce carbon, then this must be stated in the Local Plan, allowing evaluation for robustness and fitness for Local Plan purposes. If independent evidence shows that the NWR will substantially increase carbon emission (both embodied carbon and use carbon) then it must form part of a realistic assessment of the ability of Shropshire Council to contribute to the achievement in net zero carbon. The existing Local Transport Plan, the existing plan - LPT3 which remains the relevant transport plan does not envisage that the NWR will be needed during the lifetime of that plan. The NWR is therefore not an essential part of the Local Plan. All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon. Reference para 4.248 DP28 strategic developments are not located on existing rail infrastructure indicating additional road building which is inconsistent with the need to address the Climate Emergency

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0410	B014	Draft Policy DP28 should include the following: "Major development shall incorporate or fund the provision of high quality segregated cycle routes and direct and safe pedestrian infrastructure commensurate with the scale of development and trip generation and designed in accordance with Local Transport Note 1 / 20 - Cycle Infrastructure Design. Cycling is or will become mass transit and must be treated as such."	Policy DP28 recognises that a sustainable transportation system for Shropshire must include a range of transport networks and services and present a range of travel options to individuals, households, organisations and businesses. Policy DP28 constructs the transportation system into a hierarchy to promote sustainable choices by informing and encouraging those travelling or transporting goods to choose sustainable transport options to meet their needs. Although this hierarchy includes modes of transport considered to be unsustainable, these options are still part of the transportation system and may be the best or only means by which to travel or transport goods over long distances or to access less well connected places. To address limitations to achieving modal shifts in a rural County like Shropshire the Local Plan strategy is structured around the strategic transport corridors through the County and seeks to achieve a higher level of urban development. Policy DP28 also recognises the need for more sustainable choices in looking towards the delivery of new travel and transport options and advocates the Hierarchy of Sustainable Transport as a simple decision pathway for everyone to follow in making their choices about travel and transport and by encouraging everyone to consider how they can contribute to reversing adverse changes to our environment. The need for further investment in the pedestrian and cycling networks is addressed in paragraph 4.252 which states "Developer contributions to improvements in our transport networks and infrastructure will be encouraged wherever possible, to increase the capacity, function and safety of our footways, cycleways, roads, rail and public transport networks".	No	DP28. Communications and Transport
A0609	B025	N/A	Shropshire Council welcomes the support for Policy DP28 Communications and Transport.	No	DP28. Communications and Transport
A0629	B006	Amend highway policies to reflect the shift in priority from car to cycling and walking, and where suitable seek introduction of low traffic neighbourhoods across Shropshire's towns and villages. -Require major development to incorporate/fund provision of high quality segregated cycle routes and direct and safe pedestrian infrastructure, commensurate with the scale of development and trip generation. -Across the existing highways network a priority and suitable ringfenced budget will be given to modifications to highways to incorporate suitable cycle infrastructure and incorporate measures such as default 20mph speed limits in urban areas to reduce road hazard and encourage cycling and walking. -Specify all infrastructure for cycling routes will be designed in accordance with Local Transport Note 1 / 20 - Cycle Infrastructure Design. Cycling is or will become mass transit and must be treated as such.	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. Policy DP28 recognises that a sustainable transportation system for Shropshire must include a range of transport networks and services and present a range of travel options to individuals, households, organisations and businesses. Policy DP28 constructs the transportation system into a hierarchy to promote sustainable choices by informing and encouraging those travelling or transporting goods to choose sustainable transport options to meet their needs. Although this hierarchy includes modes of transport considered to be unsustainable, these options are still part of the transportation system and may be the best or only means by which to travel or transport goods over long distances or to access less well connected places. To address limitations to achieving modal shifts in a rural County like Shropshire the Local Plan strategy is structured around the strategic transport corridors through the County and seeks to achieve a higher level of urban development. Policy DP28 also recognises the need for more sustainable choices in looking towards the delivery of new travel and transport options and advocates the Hierarchy of Sustainable Transport as a simple decision pathway for everyone to follow in making their choices about travel and transport and by encouraging everyone to consider how they can contribute to reversing adverse changes to our environment.	No	DP28. Communications and Transport
A0629	B007-4	See issues summary. Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed; Specific amendments identified : Do not include promotion of NWRR in Draft Local Plan; Omission of content re "widening travel and transport choices" in the Plan needs to be addressed; Explicitly identify within the policy how it will assist in achieving net zero carbon;	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. Policy DP28 recognises that a sustainable transportation system for Shropshire must include a range of transport networks and services and present a range of travel options to individuals, households, organisations and businesses. Policy DP28 constructs the transportation system into a hierarchy to promote sustainable choices by informing and encouraging those travelling or transporting goods to choose sustainable transport options to meet their needs. The policy framework is also internally consistent with the inclusion of the NWRR in Policy DP28 when the plan is read as a whole.	No	DP28. Communications and Transport

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0677	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP28	Yes	Yes	Yes	Due to the spatial distribution of development in the draft Shropshire Local Plan, some distance from Worcestershire, therefore have no concerns about the 'Duty to Cooperate' requirements or soundness of the draft Shropshire Local Plan from a transport perspective. Understandable the focus is on relationship to the Black Country given the location of the A5/M54 and the fact a large number of residents in Shropshire travel there to work. No mention is made to the Local Transport Plan (LTP) within the evidence base. This may be because the evidence base comprises documents solely to inform the draft Shropshire Local Plan. However, references are made to the LTP within the draft Shropshire Local Plan and its involvement in Policy delivery mechanisms and monitoring, particularly in relation to draft Policy DP28. Effectiveness of the draft Shropshire Local Plan will be determined by its deliverability. Note this has been considered in decisions to 'saved' or otherwise existing allocations. Cooperation with the Black Country Local Authorities in particular is in a large part based on the deliverability of housing and employment development given the interaction between the two areas. Throughout the document and in previous consultation documents, sustainability has been an underlying principle. This is in line with the National Planning Policy Framework (NPPF) and the presumption of sustainable development. The importance of a plan-led system is a central feature of the NPPF and the draft Shropshire Local Plan acknowledges the need to be flexible and to adapt to change to meet the development needs of the area. There is clear acknowledgement of the need for Shropshire to meet its housing need, tying into the delivery aspect of the 'effectiveness' test.
A0393	B039	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0609	B026	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP29	Not Specified	No	Not Specified	Part 1 of draft Policy DP29 confirms applications for non-mineral development within a Mineral Safeguarding Area (MSA) which could have the effect of sterilising mineral resources will not be granted unless at least one of the three named criteria is relevant. Criterion c. confirms an exemption policy will apply in accordance with the rest of the draft Policy wording. Having reviewed the rest of the policy, none of the identified exemptions takes into account proposals on sites allocated to deliver development. This is considered to be unsound as it clearly creates a conflict between policies. For a site to be allocated, the Council must have fully taken into consideration all aspects of the development and its suitability for development, including Mineral Safeguarding. As such, allocated sites within the development plan should be included as an exemption to this draft Policy. For this policy to be considered sound, allocated sites should be included within the exemption list at paragraph 4.264 of the Local Plan Review.
A0629	B007-39	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0144	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP30 and DP30.1	Yes	No	Yes	Table DP30.1 (supporting draft Policy DP30) provides information explaining why no additional allocations for sand and gravel are proposed, however figures for permitted reserves of sand and gravel are not consistent with the minerals technical background report - Table DP30.1 states 13.5 Mt, whilst the minerals technical background states 10.93Mt (19% lower). Regarding the 10.5Mt windfall allowance, this figure is very large in comparison with permitted reserves, and may need to be adjusted to 13.07 Mt if permitted reserves are adjusted back to 10.93Mt. 70% of permitted reserves are already stated to be contained within sites not worked for at least 5 years. Though the operators of 2 have stated an intention to recommence production during the Plan period, the reliability of the anticipated supply must be questioned. Also unclear whether likely windfall reserves are associated with sites that accord with the Plan, or to what extent they can be relied upon to meet production guidelines or required landbank.
A0144	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP30 (1)	Yes	No	Yes	Point 1 of draft Policy DP30 states the supply of sand and gravel during the Plan period should be provided in the first instance from existing permitted sites and then from the development of mineral working at the saved SAMDev Plan mineral allocations identified within Appendix 2 of this document and identified on the Proposals Map. It is considered that this policy provides a spatial strategy for the provision of sand and gravel that should be included in draft Policy SP16.
A0677	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP30	Yes	No	Yes	Draft Policy DP30 and its supporting explanatory text are useful in setting out the detailed policy and context for sand and gravel proposals. However, it is not clear why there is not an equivalent policy and supporting text for other types of mineral development, for example to clearly set out the levels of current permitted crushed rock reserves and allocations. Further to the above, draft Policy SP16 says "The broad extent of MSAs is defined on Figure SP15.1". Para 3.154 below this policy says they are shown on figure SP13.1. The figure below the policy showing the MSAs is titled Figure SP16.1. This may not be a soundness matter, but should be resolved for consistency.
A0377	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP29, DP30, DP31, DP32 and DP33	Not Specified	Not Specified	Not Specified	Evidence indicates facilities in Shropshire provide for both minerals and waste requirements arising in the Black Country. With regard to minerals, availability of aggregates has been in excess above minimum guidelines and the Plan does not propose any additional site allocations. With regard to waste, existing consented facilities are anticipated to provide sufficient capacity to accommodate forecast throughput negating the need for additional facilities.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0677	B003	N/A	Noted. Shropshire Council is currently preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.	No	DP28. Communications and Transport
A0393	B039	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP29. Mineral Safeguarding
A0609	B026	Include allocated sites within the list of exempted development in para 4.264 of the Explanation to draft Policy DP29.	Noted. Paragraph 4.264 of the Explanation of draft Policy DP29 states 4. Non-mineral development which is exempt from the requirements of this Policy comprises:..."Applications that are in accordance with the development plan and site allocations where the assessment of site options took account of potential mineral sterilisation and determined that prior extraction was not required". The assessment process for all proposed saved SAMDev Plan allocations and all proposed allocations within the draft Shropshire Local Plan took account of potential mineral sterilisation and determined that prior extraction was not required (unless otherwise specified). As such they are included within the specified list of exemptions (unless otherwise specified). As such it is considered that draft Policy DP29 is consistent with the wider proposed Policies of the draft Shropshire Local Plan.	No	DP29. Mineral Safeguarding
A0629	B007-39	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP29. Mineral Safeguarding
A0144	B001	The figure used for permitted reserves should be 10.93Mt as of 01.01.19 rather than 13.5Mt (see minerals technical background report) and confirmation should be also provided of the amount of permitted reserves anticipated to be worked during the Plan period or in sustaining a 7 year landbank at the end of the Plan period. Evidence should be provided to support the anticipated 10.5Mt contribution from windfall sites that accord with the Plan.	13.5mt is correct and based on returns to AM2018. Draft returns for AM2019 suggest an improvement on the previous year's reserves and production performance. Whilst it is acknowledged that the windfall allowance is high, it is based on the planned extension of existing sites (which accord with the Plan), with the exception of a single site which is subject to a current planning application (recommended for approval). As such, no change is proposed.	No	DP30. Sites for Sand and Gravel Working
A0144	B002	Point 1 of draft Policy DP30 should be included within draft Policy SP16, as it provides a spatial strategy for the supply of sand and gravel.	Draft Policies SP16 and DP30 are intended to be complementary. As such a minor modification is proposed to para 4 of draft Policy SP16 to clarify this matter, as follows: "Only supporting proposals for sand and gravel working outside saved SAMDev Plan mineral allocations identified within Appendix 2 of this document and identified on the Proposals Map and existing permitted reserves, where this would be consistent with the requirements of Policy DP30;"	Yes	DP30. Sites for Sand and Gravel Working
A0677	B004	Helpful for a similar level of information to be provided in relation to crushed rock as there is for sand and gravel. As a minimum, reference should be included to the minerals technical background report, as well as providing information about non-aggregate minerals (albeit the level of data available is likely to be less detailed).	Noted. For clarity a minor modification is proposed to the proposed explanation of draft Policy SP16 to provide further information in relation to crushed rock and cross-reference the Minerals Technical Background report. It is also proposed that incorrect references to Figure SP16.1 will be corrected as minor modifications in Paragraph 1 of the Policy and paragraph 3.154 of the explanation.	Yes	DP30. Sites for Sand and Gravel Working
A0377	B003	N/A	Noted.	No	DP30. Sites for Sand and Gravel Working DP32. Waste Management Facilities

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0673	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP29, DP30, DP31, DP32 and DP33	Not Specified	No	No	Evidence indicates facilities in Shropshire provide for both minerals and waste requirements arising in the Black Country. With regard to minerals, availability of aggregates has been in excess above minimum guidelines and the Plan does not propose any additional site allocations. With regard to waste, existing consented facilities are anticipated to provide sufficient capacity to accommodate forecast throughput negating the need for additional facilities.
A0014	B088	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP31 (4)	Not Specified	Not Specified	Not Specified	No justification for winning and working of coal when we are facing a Climate Emergency.
A0014	B089	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 4.274	Not Specified	Not Specified	Not Specified	Mineral aftercare potential should follow Biodiversity Net Gain principles.
A0347	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP31	No	No	Not Specified	1. Paragraph 1 point e. Mineral quarrying can cause adverse impacts to the water environment. A detailed and comprehensive water features survey should be undertaken for all sites. Additionally, detailed conceptual modelling of site specific geological and hydrogeological information over the course of a least one year will be needed to inform a comprehensive hydrogeological risk assessment. These requirements should be included in this part of the policy. 2. Paragraph 2. Restoration of sites may be constrained by the need to protect water resources. 3. General. Restoration with some materials may require an environmental permit. The permitting regime is independent of the planning system and we encourage applicants to dual-track the planning consent and permitting processes. 4. General. We would support opportunities for habitat creation to benefit white-clawed crayfish at Gonsal. Also, where appropriate, multi-functional flood storage. The policy could expand on this latter point.
A0348	B023	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP31	Not Specified	Yes	Not Specified	Note minerals safeguarded areas and site allocations carried forward in draft Policy DP29 and also the sites for sand and gravel working carried forward under draft Policy DP30. Welcome reference to the historic environment in draft Policy DP31 in respect of development proposals requiring particular consideration to protecting, conserving and enhancing the significance of heritage assets including archaeology.
A0393	B041	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0600	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP31	Yes	No	Yes	Welcome specific reference to taking care to avoid the creation of attractant environments for large and flocking bird species. However, this only relates to restoration proposals. To fully protect defence interests, the need to mitigate bird hazard should extend throughout development/operation. To ensure draft Policy DP31 is in accordance with Para 95 of the National Planning Policy Framework and is fully effective and justified, para 4.275 should be reworded.
A0609	B027	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP31	Not Specified	Yes	Not Specified	Supportive draft Policy DP31 which seeks to protect the local community and the natural/historic environment from any adverse impacts arising from mineral developments. Support sustainable mineral workings, however highlight the importance of controlling these sites to ensure they would not be to the detriment of the closest residential receptors or the natural/historical environment. Would also highlight importance of Part 2 of draft Policy DP31, which ensures land is restored following the working of the site to an agreed state which is capable of beneficial use. In light of this, consider draft Policy DP31 to be effective and positively prepared and therefore is considered to be sound.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0673	B003	N/A	Noted.	No	DP30. Sites for Sand and Gravel Working DP32. Waste Management Facilities
A0014	B088	Delete para 4 of draft Policy DP31.	Any Planning Application for the winning and working of coal will be determined in accordance with the NPPF. Para 211 of the NPPF states "Planning permission should not be granted for the extraction of coal unless: a) the proposal is environmentally acceptable, or can be made so by planning conditions or obligations; or b) if it is not environmentally acceptable, then it provides national, local or community benefits which clearly outweigh its likely impacts (taking all relevant matters into account, including any residual environmental impacts)." Para 4 of draft Policy DP31 establishes a policy requirement for any such application to also include proposals for the separation and stockpiling of fireclay so that its value as a mineral resource can be captured.	No	DP31. Managing Development and Operation of Mineral Sites
A0014	B089	Mineral restoration and aftercare references in Para 4.274 should be amended to follow Biodiversity Net Gain principles.	Para 4.274 recognises that restoration and aftercare of mineral sites provides positive opportunities to deliver environmental or community benefits. It also recognises that we therefore need to establish policies to support mineral working which helps to secure locally sensitive design and to ensure that high quality restoration and aftercare of mineral sites takes place at the earliest opportunity and, wherever possible, helps to secure green infrastructure or environmental and community benefits identified in the relevant local Place Plan. Draft Policy DP12. The Natural Environment addresses biodiversity net gain, it includes "Ensuring that all development delivers at least a 10% net gain for biodiversity in accordance with the Environment Act, any future Local Nature Recovery Strategy (LNRS) and policies DP14, DP15, DP16 and DP22."	No	DP31. Managing Development and Operation of Mineral Sites
A0347	B008	n/a	The detailed changes requested to para 1e of draft Policy DP31 are already addressed in para 4.272 of the proposed explanation to this draft Policy. Para 4.274 of the proposed explanation to draft Policy DP31 recognises the need for environmentally sensitive design and site restoration proposals. It is considered that site-specific proposals/opportunities would be more appropriately addressed as part of the Planning Application process for these sites. As such, no changes are proposed.	No	DP31. Managing Development and Operation of Mineral Sites
A0348	B023	N/A	Noted.	No	DP31. Managing Development and Operation of Mineral Sites
A0393	B041	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP31. Managing Development and Operation of Mineral Sites
A0600	B006	Amend para 4.275 of the explanation to draft Policy DP31 to state "Where a proposed development would result in mineral working or extraction falling within a designated safeguarding zone (Birdstrike zone / Plan B) it will be necessary for the applicant to provide and agree bird hazard management plans for the extraction, restoration and post restoration phases. It would also be necessary to agree details of the restoration of extraction sites to ensure that the development does not result in the creation of an attractant environment for large and flocking bird species that would reduce aviation safety."	Noted. For the sake of clarity a minor modification is proposed to ensure consideration of bird hazard as part of mineral working and subsequent site restoration.	Yes	DP31. Managing Development and Operation of Mineral Sites
A0609	B027	N/A	Noted.	No	DP31. Managing Development and Operation of Mineral Sites

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B007-41	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0347	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP32	No	No	Not Specified	1. Paragraph 1. Suggest amendment as follows Further to Policy SP17, the development of waste transfer, recycling and recovery facilities will be supported where applicants can demonstrate that potential adverse impacts on the local community and Shropshire's natural and historic environment can be satisfactorily avoided and subsequently controlled and managed. Particular consideration will be given (where relevant) to: 2. Paragraph 2 a. Maybe include odour, dust and bio-aerosols. 3. General. The policy could also include the following text. We would encourage the parallel (twin) tracking of an Environmental Permit application with the planning application to provide a greater degree of certainty (on the land use planning impacts and pollution control measures)." 4 Explanatory text. Could include: "Where developments are subject to an Environmental Permit from the Environment Agency, the EA would encourage pre-application discussions. These applications should provide an appropriate level of detail to inform a reasonable degree of certainty on the planning application and to ensure the principle of the development and use of the land is acceptable with cross reference to permitting constraints".
A0348	B024	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP32	Not Specified	Yes	Not Specified	Reference in draft Policy DP32 to the requirement for applicants to demonstrate that potential adverse impacts on Shropshire's historic environment can be satisfactorily controlled is welcomed by Historic England.
A0393	B047	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0629	B007-47	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.
A0347	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP33	No	No	Not Specified	1. Paragraph 2. Landfill/Landraising sites should be located appropriately with reference to relevant documents and policies e.g. ( <a href="https://www.gov.uk/government/publications/groundwater-protection-position-statements">https://www.gov.uk/government/publications/groundwater-protection-position-statements</a> and <a href="https://www.gov.uk/guidance/landfill-operators-environmental-permits/plan-the-environmental-setting-of-your-site">https://www.gov.uk/guidance/landfill-operators-environmental-permits/plan-the-environmental-setting-of-your-site</a> ). Cross reference to DP19 should be made. 2. General. EA normally objects to any proposed landfill site in SPZ1 and does not encourage such in any nominal SPZ for unregulated SPZ supplies. A detailed risk assessment to look at the nature, quantity, impacts and the water table is needed. 3. General. Parallel tracking is recommended. The hydrogeological risk assessment submitted with a landfill permit application can be used to determine how EA position statement E1 applies to the planning application. Sites below the water table in sensitive groundwater settings should be refused.
A0393	B042	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B007-41	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP31. Managing Development and Operation of Mineral Sites
A0347	B009	n/a	With regard to proposed amendments to para 1 of draft Policy DP32, it is considered unlikely that all potential adverse impacts can be avoided. Such a requirement would be inconsistent with national policy for waste and would impose an unreasonable constraint on this type of essential business and community infrastructure in circumstances where impacts can be satisfactorily controlled. As such, no change is proposed. With regard to para 2a of draft Policy DP32, it is acknowledged that this is a useful clarification as such an appropriate minor modification is proposed. With regard to paras 3 and 4 of draft Policy DP32, it is acknowledged that promoting opportunities for twin-tracking of an Environmental Permit application and Planning Application for a site would provide a greater degree of certainty to the applicant, although this is not a policy consideration. As such an appropriate minor modification is proposed to the explanation paragraph 4.280 of draft Policy DP32.	Yes	DP32. Waste Management Facilities
A0348	B024	N/A	Noted.	No	DP32. Waste Management Facilities
A0393	B047	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP32. Waste Management Facilities
A0629	B007-47	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP32. Waste Management Facilities
A0347	B011	n/a	It is considered that para 2a of draft Policy DP33 provides appropriate reference to the need for compliance with water management and water resource protection policy requirements. Furthermore the draft Shropshire Local Plan should be read as a whole and draft Policy DP19 specifically addresses water resources and water quality. For clarity a minor modification is proposed to cross reference draft Policy DP19 within para 2a of draft Policy DP33. The need to consider opportunities for parallel tracking is recognised. This is proposed to be addressed through a minor modification to para 4.280 of the explanation to draft Policy DP32.	Yes	DP33. Landfill and Landraising Sites
A0393	B042	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	DP33. Landfill and Landraising Sites
A0629	B007-42	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	DP33. Landfill and Landraising Sites

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0008	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S1: Albrighton	Not Specified	No	Not Specified	<p>Object to Albrighton Development Boundary, which restricts development opportunities. It should be amended to include ALB023.</p> <p>Query deliverability of adopted SAMDev Plan allocation ALB003.</p> <p>ALB023 should be taken out of the Green Belt and allocated for development to contribute to achieving the proposed development guideline for Albrighton (complementary to or instead of ALB003). The site is more suitable and sustainable than proposed safeguarded land to the east, benefits from good access to services and would 'round off the settlement'. Whilst ALB023 is located within a conservation area, it can be sensitively designed to enhance character and appearance. Three potential access points existing for the site, all suitable to serve the development.</p> <p>Disagree with the conclusions of the 2018 Green Belt Review regarding the contribution ALB023 makes to Green Belt purposes, rather consider it makes no/weak contributions. Also disagree with the conclusions relating to proposed safeguarded land.</p> <p>Disagree with the proposed safeguarded land and concerned about their availability and suitability. As a result also concerned about the permeance of proposed Green Belt boundaries.</p>
A0357	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S1.1 (ALB017)	Yes	No	Not Specified	<p>The strategic approach in draft Policy SP2 responds to the Shropshire Economic Growth Strategy by prioritising growth zones, including the M54 corridor upon which Albrighton (and the proposed strategic site at nearby RAF Cosford) is located. The potential of the M54 corridor is confirmed in the M54 Growth Corridor Strategic Option Study undertaken to inform the draft Shropshire Local Plan. Furthermore, the Association of Black Country Authorities (ABCA) note the close relationship and railway links (stops at Albrighton and RAF Cosford) between east Shropshire and the Black Country. However, despite this draft Policy S1.1 seeks to deliver only 500 dwellings in Albrighton over the proposed Plan period. This is unchanged from earlier drafts of the document which had a 20 year rather than 22 years proposed Plan period, therefore at the very least a proportionate increase (50 dwellings) should be made. However given the strategic location, range of services, rail links, range of employment opportunities and strong market demand, consider a higher guideline of some 700 dwellings would be deliverable, reflect evidence and be an appropriate strategy.</p> <p>As such, do not considered the proposed housing guideline for Albrighton represents an appropriate strategy and it is not justified.</p>
A0357	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	ALB017	Yes	No	Not Specified	<p>Can confirm that the site is viable and deliverable, having regard to the policy requirements in the draft Plan. Can also confirm the delivery timescales for this site shown in Appendix 7 of the draft Shropshire Local Plan are appropriate. The site is able to deliver in the early years of the plan period, a Pre-Application enquiry has already been undertaken (no objections from highways, affordable housing, drainage, conservation, archaeology, ecology, trees, contaminated land and public rights of way were received) and an Outline Planning Application will be submitted at the earliest opportunity once the draft Shropshire Local Plan has reached an advanced stage.</p> <p>A suite of technical documents, including a draft Masterplan, prepared in support of development proposals for ALB017 form appendices to the representation.</p> <p>Draft guidelines for proposed allocation ALB017 do not reflect evidence and therefore do not meet the 'justified' or 'effective' tests of soundness. Specifically:</p> <ul style="list-style-type: none"> <li>-Proposed guidelines include a roundabout access. However advice from the highways team on a Pre-Application Enquiry (PREAPP/20/00169) for the site expressed no concerns about a T-Junction access (see appendices to representation). A roundabout would result in loss of significantly more mature trees on Kingswood Road (see appendix to representation) which are a natural gateway feature and important to the character of the area.</li> <li>-Requirements for vehicular, cyclist and pedestrian links into the adjacent site saved SAMDev Plan Allocation ALB002 unreasonable. Such a link can be provided into the northern part of ALB002, but a vehicular connection to the site boundary for the southern part of ALB002 was not required within its Planning Application (despite representations which form an appendix to the representation). Consider the northern link, which will link Kingswood Road to Shaw Lane is sufficient (see appendix to representation).</li> <li>-Seeking on-site public car parking facilities to alleviate pressure on existing facilities is not justified or effective as few would choose to park 500m from the doctors or railway station.</li> <li>-Green Infrastructure providing public open space that links to the wider area and an ecological corridor along the railway line are very different and combining the two will result in difficult to effectively deliver either. The requirement to retain trees and hedges is sufficient to ensure that the railway corridor remains undisturbed. The guideline requiring an 'associated green infrastructure corridor' along the railway line conflicts with 'secured by design' guidelines and will result in public open space being located in sub-optimal locations. The guidelines' treatment of the railway line will make it difficult for development to achieve a satisfactory layout and fails the 'effective' test of soundness.</li> </ul>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0008	B002	Harp Land site should be removed from the Green Belt and allocated for development. Inclusion of adopted SAMDev Plan allocation ALB003 and proposed safeguarded land should be reconsidered.	<p>Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations and proposed safeguarded land. This was informed by a proportionate and robust Green Belt Review. A summary of this assessment, including an explanation of why proposed allocations and proposed safeguarded land have been identified for development.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p> <p>Shropshire Council considers that the Green Belt Assessment and Green Belt Review undertaken to inform the draft Shropshire Local Plan are appropriate and robust assessments.</p> <p>Shropshire Council also considers the proposed development boundary for the settlement to be appropriate and reflects the extent of Green Belt and built form.</p>	No	S1.1 Albrighton
A0357	B008	Increase the proposed housing guideline for Albrighton from 500 dwellings to 700 dwellings over the proposed Plan period.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the proposed development strategy for Albrighton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Furthermore, proposed allocations and proposed safeguarded land have been informed by a proportionate and robust site assessment process, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt, informed by a proportionate and robust Green Belt Review.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p>	No	S1.1 Albrighton
A0357	B009	<p>Amend the draft site guidelines for proposed allocation ALB017 as follows:</p> <ul style="list-style-type: none"> <li>-Require an appropriate access rather than roundabout at the point of access into the site.</li> <li>-Replace the requirement for a northern and southern vehicular, cyclist and pedestrian connection into the saved SAMDev Allocation ALB002, with seek to provide a connection into the saved SAMDev Allocation ALB002.</li> <li>-Delete the guideline relating to considering opportunities to provide on-site public car parking facilities.</li> <li>-Delete the requirement for green infrastructure to include an appropriate green buffer of the railway line and the associated green infrastructure corridor.</li> </ul>	<p>Noted. Shropshire Council considers that the proposed site guidelines for ALB017 are appropriate and sound.</p> <p>With regard to vehicular, cyclist and pedestrian connections into the adjoining SAMDev Plan allocation ALB002, the concerns raised are noted, but in order to ensure that access to services and facilities in the town and integrated communities are achieved, links between the two sites are considered essential. However, it is considered appropriate to propose a minor modification to proposed site guidelines to recognise the design and layout approved on the southern element of SAMDev Plan allocation ALB002.</p> <p>With regard to the proposed guideline for an appropriately designed roundabout at the point of access into the site, Shropshire Council continues to believe a roundabout remains the most appropriate means of access to the site and initial highway comments on the pre-application referenced in this representation are not considered to contradict this position. Indeed they note that "any future planning application should provide any and all details necessary to assist with the appropriate determination from a Highways and Transport perspective. This should include vehicular and pedestrian/cycle access and junction details with associated visibility splays, sustainable travel facilities, Transport Assessment and Travel Plans." It is also noted that this access point will also serve the ALB021 element of the proposed allocation and will connect to essential linkages through to the adjoining saved allocation ALB002.</p> <p>It is considered appropriate to include a guideline regarding consideration of the potential to provide on-site public car-parking, as it is noted that this is a matter of significant local interest.</p> <p>It is considered appropriate to require a green infrastructure buffer along the railway line/green infrastructure corridor, as such provision responds to ecology comments that this corridor forms an environmental network and as such should be buffered. It is also considered that such provision, alongside the wider design and layout of the development, will effectively respond to any issues of noise associated with the railway line, an issue raised within the public protection assessment of the site.</p>	Yes	S1.1 Albrighton

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0623	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S1.1	Not Specified	No	Not Specified	The draft Shropshire Local Plan does not fully realise the opportunities of RAF Cosford and the delivery of homes nearby to meet this significant economic growth. The draft Shropshire Local Plan fails to recognise the inherent sustainability of Albrighton and years of suppressed housing growth which have led to an ageing population, rising housing prices outstripping the Shropshire average, and an inability for first-time buyers to get onto the housing market. A more proportionate amount of safeguarded land should be proposed at Albrighton due to its inherent sustainability. There is significant concern regarding the suitability of the sites proposed for safeguarding at Albrighton. For consistency and clarity, It would be beneficial to allocate site reference numbers to each of the safeguarded sites so that the Policies Map can be cross referenced at the appropriate points within the Local Plan Review. Concerned that proposed safeguarded site at land bounded by Kingswood Road, High House Lane and the By-Pass (P35) will significantly alter the form and character of Albrighton. The site is on the periphery of the village and any development will materially change gateway views on a key approach route into the village, impacting upon the setting of the Albrighton Conservation Area, within which part of the site is located. The SA scoring for the site is also incorrect in relation to distances to facilities (Primary School, GP Surgery and Library). This site is not a suitable site for future housing development and should remain in the Green Belt. For it to be released from the Green Belt as safeguarded land is not justified, it will render the plan unsound.
A0623	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	Not Specified	Not Specified	The identified housing guideline for Albrighton is limited to 500 dwellings. This level of growth does not reflect its exceptional sustainability which is clearly evidenced within the Council's 'Hierarchy of Settlement Paper', including a railway station with services to Cosford, Wolverhampton, Birmingham, Telford and Shrewsbury, a wide range of services and facilities and also in close proximity to the Strategic Employment Site at RAF Cosford. Nor does it recognise the planned significant job creation at Cosford, contrary to NPPF paragraph 92. Indeed the artificial suppression of growth at Albrighton is exemplified by the plan's inconsistency in directing the same amount of new housing to Craven Arms, which is much further from employment opportunities and is a significantly reduced provision of services and amenities compared with Albrighton. As drafted Policy SP3 is therefore not positively prepared or consistent with national planning policy.
A0623	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Policy S1.1 Albrighton and DP28. Communications and Transport	Not Specified	Not Specified	Not Specified	Aligned to the three overarching objectives of sustainable development identified within paragraph 8 of the NPPF, Policy DP28 seeks to deliver a sustainable pattern of growth and development, investing in the necessary communications and transport infrastructure and services, providing remote access to services and employment and making available accessible, safe, reliable, low carbon transport modes and active travel choices.
A0596	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S1.1(i) ALB021 Albrighton	Yes	Yes	Not Specified	Supportive of the amended Site guideline wording in Policy S1.1(i). : 'Comprehensive masterplan required for ALB017 and ALB021. Design and layout will ensure vehicular, cyclist and pedestrian access from ALB017 into ALB021. Contributions to jointly required infrastructure will be proportional, based on the level of development forecast.' This makes it clear that access from ALB017 into ALB021 must be ensured through a comprehensive masterplan and that the developers of ALB017 cannot 'ransom' or otherwise hold up the development of ALB021, which is in separate land ownership. The landowners for ALB021 are also supportive of the principle of a pro-rata arrangement for developer contributions across the site. An indicative site plan for ALB021 supplied showing that it can comfortably accommodate 31 dwellings, SuDS and a 'buffer zone' within land along the railway line. The scheme contains a mix of housing and the required level of affordable housing. All dwellings meet or exceed NDSS. The site plan shows a link road into ALB017 – this is indicative and can be changed, depending on access road position into the site from ALB017.
A0014	B090	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S1-S18	Not Specified	Not Specified	Not Specified	More regard should be given to the Shropshire Environment Network (SEN), both in terms of limiting impacts on priority habitat areas (core areas of SEN) and identifying areas for biodiversity enhancement and net gain (restoration areas of SEN). Future allocations should reference the Nature Recovery map (when it becomes available) in the same way as the SEN. In addition to mitigation of impacts on Special Areas of Conservation, there is also a need to mitigate impacts on local wildlife sites, Shropshire Wildlife Trust (SWT) reserves and national and local nature reserves. The wording 'where possible' should consistently be strengthened. Concerned about the location and impact of windfall sites. Concerned about the proximity to SSSI's and the lack of mitigation of them in association with the saved mineral allocation at Wood Lane (near Colmere); CLV012/018; PH004; SHR173; and MIN007.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0623	B006	The proposed safeguarded site P35 is not a suitable site for future housing development and should remain in the Green Belt. For it to be released from the Green Belt as safeguarded land is not justified, it will render the plan unsound. Land east of Newport Road, Albrighton (ALB015), should be allocated for around 218 dwellings.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Albrighton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Furthermore, proposed allocations and proposed safeguarded land have been informed by a proportionate and robust site assessment process, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	S1.1 Albrighton
A0623	B009	Land east of Newport Road, Albrighton (ALB015), should be allocated for around 218 dwellings.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Albrighton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Furthermore, proposed allocations and proposed safeguarded land have been informed by a proportionate and robust site assessment process, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	S1.1 Albrighton
A0623	B005	As set out in response to Policy SP2, do not consider that the strategic approach aligns with the intent of Policy DP28 and specifically in the artificial suppression of Residential Growth in Albrighton, one of the county's most sustainable settlements which is closely related to both the GBBCAHMA and the strategic allocation proposed at RAF Cosford with high quality sustainable transport connections to both.	Shropshire Council considers that the proposed development strategy for Albrighton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.	No	S1.1 Albrighton and DP28. Communications and Transport
A0596	B001	None.	Noted.	No	S1.1(i) Albrighton ALB021
A0014	B090	1. Give more regard to the Shropshire Environment Network (SEN), both in terms of limiting impacts on priority habitat areas (core areas of SEN) and identifying areas for biodiversity enhancement and net gain (restoration areas of SEN). 2. Reference the Nature Recovery map (when it becomes available) for future allocations. 3. Identify mitigation for impacts on local wildlife sites, SWT reserves and national and local nature reserves. 4. Strengthen the wording 'where possible' throughout Policies S1-S18. 5. Concerned about the location and impact of windfall sites. 6. Concerned about the proximity to SSSI's and the lack of mitigation of them in association with the saved mineral allocation at Wood Lane (near Colmere); CLV012/018; PH004; SHR173; and MIN007.	The Council considers that draft Policy DP12 The Natural Environment appropriately addresses the issues raised.	No	S1-S18

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0598	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S1 and Schedule S1.1(ii)	Not Specified	No	Not Specified	<p>Albrighton is a highly sustainable settlement (Key Centre within the settlement hierarchy) and benefits from excellent accessibility to Telford and Wolverhampton, being linked by a railway station and the M54 and A41.</p> <p>Note that despite an increase to the overall housing requirement from earlier stages of the Local Plan Review, allocations in Albrighton have reduced by 15 dwellings. This limits potential to deliver additional growth in Albrighton, to support the wider draft Shropshire Local Plan growth agenda, tackle local infrastructure priorities and address chronic under-delivery at Albrighton since 2006 (between 2006 and 2019 Albrighton's had lowest delivery of any Principal/Key Centre, reflecting constraints of the Green Belt).</p> <p>Albrighton is also in close proximity to RAF Cosford (likely subject to MOD investment/housing need and identified as a strategic site in draft Policy S21). Therefore crucial to consider potential for Albrighton to accommodate additional growth emanating from RAF Cosford. Policy S21 recognises the need to maintain the Green Belt/strategic gap between Albrighton and RAF Cosford. Acknowledge this takes into account evidence in the Council's Green Belt Assessment and thus limits the potential for future growth to the north-west of Albrighton, so growth should be directed away from here. In this context ALB014 offers an appropriate location for development.</p> <p>Contend in order to deliver 'step change' in the scale of development, the proposed housing guideline should be increased for Albrighton and Green Belt land be released (supported in relation to ALB014) for allocation rather than safeguarding for future development, over and above the current proposed allocation. This would be wholly in line with Albrighton's expected role in an 'urban focused' strategy, respond to chronic past under-delivery, be consistent with the wider housing and economic agenda in Shropshire including in relation to focusing growth on major 'strategic corridors', as well as providing further flexibility and boosting the supply of housing in line with national policy. As such, the current strategy for Albrighton is not justified and has not been positively prepared, and therefore not soundly-based.</p> <p>Also consider approach to windfall development is unjustified/not sound. Para 70 of the National Planning Policy Framework (NPPF) identifies the need for compelling evidence for windfall allowances having regard to strategic housing land availability assessment, historic windfall delivery and expected future trends. The windfall assessment in the Strategic Land Availability Assessment (SLAA), looks at past trends borough-wide, but has not analyse distribution of past windfalls in settlements. This is important as proposals for windfall for each settlement are simply the residual of the headline allocation required minus the capacity of proposed allocations. Do not agree with this approach or that compelling evidence for windfall allowances at Albrighton are made and it is simply used to limit allocations of land. To be credible, any windfall allowance at the settlement-level should be based on an assessment of likely future supply at the settlement-level, in line with the NPPF - the supply of windfall sites in Albrighton since 2006 has been limited compared to other non-Green Belt settlements where boundaries are not so tightly drawn. As such, where opportunities exist to deliver new development in sustainable locations that do not undermine the purposes of the Green Belt (most notably ALB014) it should be allocated, before any allowance is made for windfalls. Windfalls will then represent a 'buffer' that can help ensure the required growth at Albrighton is achieved. This would be more consistent with a plan-led approach to meeting housing needs, rather than relying on windfall sites without sufficient justification.</p> <p>Also object to the proposed development boundary for Albrighton as it is not justified, does not represent positive planning and is not soundly based. The boundary around this highly sustainable settlement remains too tightly drawn in an attempt to limit alterations to the Green Belt. A tight boundary means it is less able to flex and adapt to rapid change, as required by paragraph 11a of the NPPF. Consequently, it would be sensible to provide more flexibility through identification of additional allocations, rather than drawing a boundary that restricts the Council's options in dealing with unforeseen circumstances in the future.</p> <p>ALB014 is a 7ha site which has well defined site boundaries (roads to north, east and west) and is in a highly sustainable location with access to a good range of services and facilities (including the adjacent primary school) and excellent accessibility to the strategic road (A41/M54) and rail network (Albrighton Railway Station links the village with Wolverhampton, Telford and Shrewsbury). Initial masterplanning shows the site could accommodate around 160 dwellings and 1.7ha of open space. Its development would deliver significant social, economic and environmental benefits and the site is truly deliverable as per para 73 of the National Planning Policy Framework (NPPF) - suitable, available and achievable (as documented within the vision document for the site which is appended to this representation).</p>
A0598	B001 Cont'd						<p>Consider the site could be removed from the Green Belt without compromising the purposes of the Green Belt as defined in the NPPF (representation supported by a landscape and Green Belt assessment for the site and a critique of Shropshire Council's Green Belt assessment which concludes ALB014 makes a low-moderate rather than moderate contribution to the Green Belt). Broadly agree with the Council's statement on exceptional circumstances in that there are 'strategic level' exceptional circumstances to justify release of Green Belt at Albrighton. However, consider increasingly pressing need to address the identified housing shortfall from the Black Country constitutes 'strategic exceptional circumstances' in addition to those identified, which also provides clear justification for increasing the amount of land to be released from the Green Belt at Albrighton for development. Consequently, contend the Council's approach to defining strategic exceptional circumstances ignores this factor and is not justified or sound. Agree with the Council that 'site-specific' exceptional circumstances justify removal of ALB014 from the Green Belt, however disagree with the decision to not propose the release of the site, or any site, from the Green Belt for development - the Council's evidence shows the site is capable of delivering sustainable development. Therefore, support proposed removal of ALB014 from the Green Belt and recognition that development of the Site has potential and is acceptable in principle. However, consider the draft Shropshire Local Plan should allocate ALB014 for residential development rather than proposing to safeguard if for development beyond the proposed Plan period. This will ensure the draft Shropshire Local Plan is sufficiently flexible in terms of the supply of sites, would ensure a range of sites are available to the local market and would also contribute towards the need for additional land to address, in part, shortcomings with the proposed housing requirements (including potential contribution of Albrighton to unmet cross-boundary needs) identified within the wider representation.</p> <p>With regard to the Sustainability Appraisal (SA), do not agree with the approach taken in the selection of the preferred allocations at Albrighton. The SA states that it seeks to make sure the plan proposals are the most appropriate, given reasonable alternatives. However, the Council's preference for proposed allocations ALB017 and ALB021 contradict this and has not been adequately justified based on the SA results (Stage 2a - ALB017 performs fair and ALB021 performs poor (assessed together they perform fair), whilst ALB014 performs good (although note the error in the assessment of ALB014 for proximity to a primary school, which is a - when should be ++, this would make it the highest scoring site in Albrighton)), site screening (stage 2b - disagree with the conclusion for ALB014 that the site is not suitable as the reasoning for this is based on the SLAA and identified site-specific factors could be resolved and the site made suitable. Note that ALB017 and ALB021 were identified as not currently suitable, but are still proposed for allocation, currently seems to be used interchangeably raising concerns about consistency/transparency) and subsequent detailed review (Stage 3 - agree within the conclusion for ALB014 that it should be removed from the Green Belt, but consider it should be allocated. Assessment of ALB017/021 shows an element of bias choosing a site which needs mitigation to address SA concerns), nor is it justified why they are proposed for allocation ahead of more appropriate alternatives, including ALB014. The proposed allocations score significantly worse than site ALB014 (and many other sites assessed) in sustainability terms and so should have been discounted at the screening stage (2b). Consider these sites have been preferred simply because they were safeguarded land and so have been treated differently to other SLAA sites. This raises concern as to fairness and transparency in the site selection process. As such, do not agree the most appropriate alternatives, or indeed appropriate alternatives at all, have been selected in respect of site ALB017 and ALB017, or that proposed allocation of these sites has been justified. Consider ALB014 is the most sustainable of the assessment sites (no evidence preventing its allocation), which provides clear justification to support its allocation.</p>

A0424	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	BKL008a	Not Specified	No	Not Specified	<p>BKL008a adjoins the South Shropshire Hills AONB and is outside the village envelop. Its development would have a detrimental visual impact and harm residential amenity, which are key considerations.</p> <p>Protection of the environment is a key aspiration for the local community as evidenced within the latest Parish Plan and responses to Parish Surveys.</p> <p>The views of local residents have been ignored.</p> <p>Population increase in Bucknell resulting from SAMDev Plan proposals will significantly change village character (graph of population/household growth appended to representation), this will be exacerbated by BKL008a, a further example of over development. Level of growth proposed in a short period cannot be absorbed by the settlement.</p>
A0424	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 5.37	Not Specified	No	Not Specified	<p>Para 5.37 of the draft Shropshire Local Plan specifies a need to continue to support the sustainable growth of Bucknell. Consider the residential guidelines proposed are too high and sustainable growth is an oxymoron - plans for growth in Bucknell are not sustainable as they run counter to the Climate Emergency declared by Shropshire Council.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0424	B001	Do not allocate BKL008a and reduce the proposed residential guideline for Bucknell.	Bucknell is appropriately designated as a Community Hub on the size of the settlement and the services and facilities it provides. Shropshire Council considers that the proposed development strategy for Bucknell and the existing and proposed allocations which contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Proposed site allocations have been informed by a proportionate and robust site assessment process. The settlement strategy for Bucknell, which is clearly explained in the Draft Local Plan, was consistently presented in consultations during its preparation. New housing allocation BKL008a for 20 dwellings was identified in the Preferred Sites consultation in 2018 and presented in subsequent consultations. Site BKL008a will supplement the saved SAMDev brownfield housing and employment allocation at BUCK001/BKL011 which already forms part of the housing land supply in Bucknell. The Council considered local representations recommending a further extension to BUCK001 but this site was extended to 70 dwellings in the SAMDev Plan and a further extension may affect its viability in the village of Bucknell. Further site options in Bucknell are influenced by the Area of Outstanding Natural Beauty and the Bucknell Conservation Area that cover the centre and west of the village. Site BKL008a on the east of the village lies beyond these two protective designations and provides an appropriate location for further modest housing development to meet a revised housing requirement for 110 dwellings which represents a modest increase from the previous figure of 100 dwellings. The delivery of BUCK001 and BKL008a is currently affected by the protection of the River Clun Special Area of Conservation (SAC) due to the water quality in the river. Site BKL008a could be delivered quickly as a smaller, greenfield allocation to refresh the housing market when the issues connected with the protection of the SAC are resolved but currently these issues will defer the delivery of new housing in Bucknell.	No	S2.2 Bucknell
A0424	B002	Reduce the proposed residential guideline for Bucknell.	Bucknell is appropriately designated as a Community Hub on the size of the settlement and the services and facilities it provides. Shropshire Council considers that the proposed development strategy for Bucknell and the existing and proposed allocations which contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Proposed site allocations have been informed by a proportionate and robust site assessment process. The settlement strategy for Bucknell, which is clearly explained in the Draft Local Plan, was consistently presented in consultations during its preparation. New housing allocation BKL008a for 20 dwellings was identified in the Preferred Sites consultation in 2018 and presented in subsequent consultations. Site BKL008a will supplement the saved SAMDev brownfield housing and employment allocation at BUCK001/BKL011 which already forms part of the housing land supply in Bucknell. The Council considered local representations recommending a further extension to BUCK001 but this site was extended to 70 dwellings in the SAMDev Plan and a further extension may affect its viability in the village of Bucknell. Further site options in Bucknell are influenced by the Area of Outstanding Natural Beauty and the Bucknell Conservation Area that cover the centre and west of the village. Site BKL008a on the east of the village lies beyond these two protective designations and provides an appropriate location for further modest housing development to meet a revised housing requirement for 110 dwellings which represents a modest increase from the previous figure of 100 dwellings. The delivery of BUCK001 and BKL008a is currently affected by the protection of the River Clun Special Area of Conservation (SAC) due to the water quality in the river. Site BKL008a could be delivered quickly as a smaller, greenfield allocation to refresh the housing market when the issues connected with the protection of the SAC are resolved but currently these issues will defer the delivery of new housing in Bucknell. 1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0512	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2 (BUCK001)	Not Specified	No	Not Specified	<p>Support proposed allocation of BUCK001. This is an important brownfield site for Bucknell, it can comply with all requirements of draft Policies S2.2 (although note S2.2.6 relates to impact on the River Clun SAC) and SP8, however draft Policy DP13 places significant obstacle in the way of its development. Every effort should be made by the Local Planning Authority (LPA) to bring it forward for development as quickly as possible.</p> <p>The site has also been allocated for development for 22 years, most recently in the SAMDev Plan (2015) for 70 dwellings. There have also been a number of Planning Applications on the site, the most recent remains undetermined. However, delivery has been delayed for numerous reasons but not willingness of the landowner.</p> <p>The SAMDev Plan states development in the Bishop's Castle area may "adversely affect the integrity of the River Clun SAC. Mitigation measures are required to remove harm arising from hydrological and water quality impacts on this internationally designated site ..... ", no readily available/understandable advice has been provided on what mitigation measures might be suggested and this remains unresolved. It also requires project level Habitats Regulations Assessment (HRA) for proposals where a likely significant effect on an internationally designated site may occur (the HRA was to be prepared by the LPA). It also specified proposals likely to have a significant effect on factors including priority species and priority habitats, would only be permitted "where it could be demonstrated that there is no satisfactory alternative means of avoiding such impacts and the social or economic benefits of the proposal outweigh the harm to the asset". No advice has ever been forthcoming from the LPA on the measures that might be regarded as mitigating effects on natural assets.</p> <p>A River Clun SAC Nutrient Management Plan (NMP) was prepared by Natural England (NE), the Environment Agency (EA) and the LPA, to identify those issues threatening the freshwater pearl mussels in the River Clun. It concluded the freshwater pearl mussel population was 'functionally extinct' (declining population and little evidence of recruitment), and estimated mussels would only survive for another 20 years if nothing was done. Therefore a series of targets for water quality in the River Clun should be adopted, although even if achieved, there was no guarantee the colony would be rejuvenated. Three main causes of problems for the mussels were phosphates, nitrates and silt, of which development was a major factor for only phosphate (majority associated with Waste Water Treatment Works (WWTW)). The NMP contained no specific actions a developer might take to make residential development acceptable. The LPA advised development cannot occur unless it demonstrates no phosphates generated would enter the River and it should also demonstrate betterment.</p> <p>Discharge from Bucknell WWTW into the River Clun is controlled by Severn Trent Water (STW) and the EA. In 2017, STW indicated they intended to solve the problem by diverting discharge to another watercourse. However, this did not occur, instead, STW installed additional phosphate stripping facilities. Understand this has improved water quality , but has not improved it to a level that would mean targets set in the NMP are achieved.</p> <p>Most recently, the LPA in association with NE have produced a document indicating that development will only be permitted which would involve discharge to the River Clun or its tributaries, if it can be shown that the development would be "nutrient neutral". There is no indication given as to how this could be measured, how it could be achieved, what effect it might have on the water quality in the River, or whether it would produce a situation where the pearl mussel colony might be rescued and rejuvenated.</p> <p>The Local Plan Review continues this situation. Bucknell is identified as a Community Hub and BUCK001 is reallocated, however is still constrained by the necessity to ensure that the freshwater pearl mussels in the River Clun are unharmed by the development. Draft Policy DP13 specifies the restrictions in the Clun catchment, but no advice is provided as to how identified objectives can be achieved. Clear that simply preventing development is not the answer, but very little appears to be happening that would help in other directions. One suggestion a refresh of the NMP, but these are clearly ineffective unless they include definitive/measurable actions on the part of those bodies responsible for water quality and comprise more than just preventing development.</p> <p>This situation effects more than just BUCK001. The River Clun catchment includes Bishop's Castle (Key Centre), Clun (Community hub) and Lydbury North (Community Cluster) amongst others. Allocations for residential development have not come forward due to the same problem. These allocations are to be saved and there is a clear need/demand for development, which continues to be recognised. As such, the draft Shropshire Local Plan should tackle the issue of the water quality in the River Clun in a pro-active manner, and bring forward positive proposals to be put into action by the various authorities that have responsibility for watercourses in the catchment in order that the development that is planned, wanted and needed can be delivered. Until the draft Shropshire Local Plan includes such proposals it cannot be regarded as being "sound" as it is not effective or been developed in a positive manner, fails to meet the responsibility of ensuring the survival of the pearl mussel colony and will also fail to deliver the dwellings (514) planned in the Clun catchment.</p>
A0521	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2 BKL008a	Not Specified	No	No	<p>Consider the draft Shropshire Local Plan is unsound as:</p> <p>It is unclear how the proposed housing guideline for Bucknell has been arrived at. Unsound to propose to increase development in Bucknell (up to 110 dwellings) when the October 2019 'Right Homes, Right Place' survey revealed just 14 respondents looking to move in the next 5 years (proposals are 8 times the 5 year demand).</p> <p>Unsound to encourage construction of 110 dwellings in Bucknell when 500 are planned at Craven Arms (within 7 miles) where there will be employment 'on the doorstep', and developments proposed at Bishops Castle (150) and Ludlow (1000).</p> <p>Plan to build on a greenfield site (BKL008a) because it allows quick delivery when there is a brownfield site in the village with many years' capacity, is unsound and contrary to SC's 'Brownfield First' policy. Also disingenuous and unsound to promote a greenfield site for quick delivery when it is allocated to the 'Long Term 2035/36-2037/38' window.</p> <p>Parish Council indicated in response to Regulation 18 consultations they are prepared to accept substantial development, but not at the unjustified expense of important agricultural greenfield, especially immediately adjacent to the Shropshire Hills AONB. However, despite repeatedly raising rational concerns regarding BKL008a (not preferred by residents) it remains a proposed allocation so there has been no substantive cooperation from Shropshire Council.</p> <p>Draft site guidelines for proposed allocation BKL008a in terms of contribution to historic character of the settlement, enhancement of the AONB and contributions to the countryside setting to the east are laughable and unachievable on the site.</p> <p>BUCK001 should be redeveloped and development kept out of site of the AONB if the Council truly want to protect the historic character of the settlement and enhance the AONB.</p>
A0521	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 5.35	Not Specified	No	Not Specified	The final sentence of para 5.35 of the explanation to draft Policy S2.2 under-values Bucknell's railway connections.
A0521	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 5.36	Not Specified	No	Not Specified	The geographic description of the AONB's relationship with Bucknell is incorrect in para 5.36 of the explanation to draft Policy S2.2.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0512	B003	The draft Shropshire Local Plan should be modified to include specific, positive, measures that will: i. Ensure the longevity of the freshwater pearl colony, and ii. Ensure that the development that is assessed as being necessary in the River Clun catchment can be delivered immediately upon the adoption of the draft Shropshire Local Plan.	Shropshire Council must comply with the Habitats Regulations and subsequent legal judgments (including the Dutch Nitrogen case) when determining planning applications which are likely to have an adverse effect on the River Clun SAC. This means that development in the river Clun catchment can only be permitted if it can be demonstrated that no adverse effect on the River Clun SAC will occur. The Council is unable to consent to planning applications in Bucknell (and the wider river Clun catchment) which do not meet this requirement. Policy DP13 plans positively for development in the Clun catchment whilst safeguarding the SAC, by setting out the criteria which planning proposals must meet to comply with the Habitats Regulations. A series of minor modifications to this policy and its explanation (see schedule of minor modifications) are proposed to provide additional clarity on legal compliance with the Habitats Regulations and Dutch Nitrogen Judgement and on processes to support policy implementation, including the assessment of nutrient neutrality and determination of mitigation measures.	No	S2.2 Bucknell
A0521	B006	Review Bucknell's proposed housing guideline collaboratively and provide a reasoned rationale for the proposed allocation. Actively support options for BUCK001 (incorporating BKL011) to allow it to be developed as a mixed site as flexibly and creatively as possible allowing for alternative employment and housing possibilities in addition to previous assumptions – including possibility of extending the site eastwards. Undertake to allow no greenfield sites to be promoted until it is clear that market demand would justify such action.	Bucknell is appropriately designated as a Community Hub on the size of the settlement and the services and facilities it provides. Shropshire Council considers that the proposed development strategy for Bucknell and the existing and proposed allocations which contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Proposed site allocations have been informed by a proportionate and robust site assessment process. The settlement strategy for Bucknell, which is clearly explained in the Draft Local Plan, was consistently presented in consultations during its preparation. New housing allocation BKL008a for 20 dwellings was identified in the Preferred Sites consultation in 2018 and presented in subsequent consultations. Site BKL008a will supplement the saved SAMDev brownfield housing and employment allocation at BUCK001/BKL011 which already forms part of the housing land supply in Bucknell. The Council considered local representations recommending a further extension to BUCK001 but this site was extended to 70 dwellings in the SAMDev Plan and a further extension may affect its viability in the village of Bucknell. Further site options in Bucknell are influenced by the Area of Outstanding Natural Beauty and the Bucknell Conservation Area that cover the centre and west of the village. Site BKL008a on the east of the village lies beyond these two protective designations and provides an appropriate location for further modest housing development to meet a revised housing requirement for 110 dwellings which represents a modest increase from the previous figure of 100 dwellings. The delivery of BUCK001 and BKL008a is currently affected by the protection of the River Clun Special Area of Conservation (SAC) due to the water quality in the river. Site BKL008a could be delivered quickly as a smaller, greenfield allocation to refresh the housing market when the issues connected with the protection of the SAC are resolved but currently these issues will defer the delivery of new housing in Bucknell.	No	S2.2 Bucknell
A0521	B012	Redraft the final sentence of para 5.35 of the explanation to draft Policy S2.2 as follows: "Bucknell's significance is also enhanced by its operational rail station, linking with the main line to Manchester, Birmingham and Cardiff and, via Knighton, to Swansea."	For clarity it is proposed to modify the final sentence of paragraph 5.35 of the policy statement for Bucknell to read: "Bucknell's significance is also enhanced by its operational rail station, linking with the main line to Manchester, Birmingham and Cardiff at Craven Arms and, via Knighton in Powys with stations to Swansea."	Yes	S2.2 Bucknell
A0521	B013	Redraft para 5.36 of the explanation to draft Policy S2.2 as follows: "The provision of land for development in Bucknell is affected by the centre, north and west of the village being within ...."	For clarity it is proposed to modify part of paragraph 5.36 of the policy statement for Bucknell to read: "The provision of land for development in Bucknell is affected by the centre, <b>north</b> and west of the village being within ...."	Yes	S2.2 Bucknell

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0521	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 5.37	Not Specified	No	No	The brownfield/eyesore sites BUCK001 / BKL011 are and have remained for upwards of 30 years, Bucknell's preferred development site, as strongly and regularly expressed by the community. Siting Bucknell's development at this location will respect the historic character of the village, replacing redundant buildings with a mixed gateway development – with easy access to village facilities east and west as well as to B4367 and A4113. The site's topography, along with its established hedges and trees, mean development will be characterful and benefit from mature screening, ensuring no impact on the AONB. If increased numbers are required the site can expand eastward. Ring-fencing development to this site (extended if necessary) would demonstrate Shropshire's duty to cooperate and its commitment to the county's improvement as Bucknell looks to develop as a Community Hub.
A0521	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 5.38	Not Specified	No	Not Specified	BKL008a's relationship with the AONB is described wrongly. Proposed extension of the village eastwards will not move development away from the AONB.
A0035	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2 Bucknell BKL008a	No	No	No	Not legally as brownfield sites are not being considered first as per NPPF para 118c. Unsound as site was removed then reintroduced but its implied delivery contradicts App 7. Fails DtC as there has been no cooperation with the Bucknell residents.
A0069	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2 Bucknell BKL008a	No	No	No	Not legally as brownfield sites are not being considered first as per NPPF para 118c. Unsound as site was removed then reintroduced but its implied delivery contradicts App 7. Fails DtC as there has been no cooperation with the Bucknell residents.
A0349	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Schedule S2.2(i) BKL008a	Not Specified	Not Specified	Yes	1. We welcome the Council's commitment (as set out in paragraph 3.30 of the HRA) to working with stakeholders to develop a restoration plan for the SAC with enough certainty of mitigation measures to unlock development. However, as NE does not yet know where any SAC restoration measures would be best located (para 3.29 of the HRA discusses the need to re-wild a percentage of the landscape) this site may be needed for these and thus it may be premature to include it as an allocation in the Local Plan. Also, this allocation may not be deliverable without additional work to inform the evidence underpinning the SAC restoration scheme. 2. Natural England notes that no acceptable nutrient neutrality or betterment schemes have been designed to date, to allow development to proceed, despite a planning application for 55 houses in Bishop's Castle having been in determination for more than a year. This lends credence to this allocation being premature. 3. We do not believe the allocation is compatible with the Dutch Nitrogen Judgement at the present stage, though you may wish to seek your own legal advice.
A0547	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2 BKL008a	Yes	Yes	Yes	We support the legal compliance and soundness of the Reg19 Draft. Site BKL008a is highly deliverable and I can confirm that an Option Agreement with a developer has been agreed and the site can be developed and delivered within a short time period.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0521	B014	Redraft para 5.37 of the explanation to draft Policy S2.2 so after "...at the southern edge of the village." the following additional sentence is included: "The village is keenly supportive of moves to clear and redevelop this eyesore site (incorporating BKL011) as a gateway addition to the village, melding into the topography of the site, avoiding any impact on the AONB and if necessary extending eastward to accept the requirement for any additional housing capacity."	Site BKL008a will supplement the saved SAMDev brownfield housing and employment allocation at BUCK001/BKL011 which already forms part of the housing land supply in Bucknell. The Council considered local representations recommending a further extension to BUCK001 but this site was extended to 70 dwellings in the SAMDev Plan and a further extension may affect its viability in the village of Bucknell. For the purposes of clarity add the following text to paragraph 5.37 after the words "...at the southern edge of the village." to read "The village community has expressed its support for the proposal to clear and redevelop site BUCK001 as a gateway addition to the village, melding into the topography of the site and avoiding any impacts on the AONB."	Yes	S2.2 Bucknell
A0521	B015	Redraft the first sentence of para 5.38 of the explanation to draft Policy S2.2 as follows: "The strategy for Bucknell is to meet the needs of the local communities, whilst recognising its landscape and historic significance, by extending the village to the east into countryside. This will move development away from the Conservation Area. It will however place additional development adjacent to the AONB, which lies directly to the north of the B4367."	The development of proposed housing allocation BKL008a from its road frontage with the B4367 will be oriented in a southerly direction into this larger parcel of land and towards the River Redlake to the south. The orientation of this development will move the new housing away from the AONB located to the north of B4367 and will help to lessen the impacts of this development on the adjacent AONB. For the purposes of clarity amend the first sentence of paragraph 5.37 to read "The strategy for Bucknell is to meet the needs of the local communities whilst recognising its landscape and historic significance by extending the village onto site BKL008a into the countryside to the east away from the Conservation Area and developing this site to the south of the B4367 away from the AONB."	Yes	S2.2 Bucknell
A0035	B001	Remove BKL008a and all references to it. Alternatively, as a less satisfactory alternative, a legally binding commitment be given that BKL008a will not be designated as a site until at least 2035-2038 as per appendix 7, or until BUCK001 has been completely developed. Paragraph 5.38 to include wording to that effect	Bucknell is appropriately designated as a Community Hub on the size of the settlement and the services and facilities it provides. Shropshire Council considers that the proposed development strategy for Bucknell and the existing and proposed allocations which contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Proposed site allocations have been informed by a proportionate and robust site assessment process. The settlement strategy for Bucknell, which is clearly explained in the Draft Local Plan, was consistently presented in consultations during its preparation. New housing allocation BKL008a for 20 dwellings was identified in the Preferred Sites consultation in 2018 and presented in subsequent consultations. Site BKL008a will supplement the saved SAMDev brownfield housing and employment allocation at BUCK001/BKL011 which already forms part of the housing land supply in Bucknell. The Council considered local representations recommending a further extension to BUCK001 but this site was extended to 70 dwellings in the SAMDev Plan and a further extension may affect its viability in the village of Bucknell. Further site options in Bucknell are influenced by the Area of Outstanding Natural Beauty and the Bucknell Conservation Area that cover the centre and west of the village. Site BKL008a on the east of the village lies beyond these two protective designations and provides an appropriate location for further modest housing development to meet a revised housing requirement for 110 dwellings which represents a modest increase from the previous figure of 100 dwellings. The delivery of BUCK001 and BKL008a is currently affected by the protection of the River Clun Special Area of Conservation (SAC) due to the water quality in the river. Site BKL008a could be delivered quickly as a smaller, greenfield allocation to refresh the housing market when the issues connected with the protection of the SAC are resolved but currently these issues will defer the delivery of new housing in Bucknell.	No	S2.2 Bucknell (BKL008a)
A0069	B001	None	Bucknell is appropriately designated as a Community Hub on the size of the settlement and the services and facilities it provides. Shropshire Council considers that the proposed development strategy for Bucknell and the existing and proposed allocations which contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Proposed site allocations have been informed by a proportionate and robust site assessment process. The settlement strategy for Bucknell, which is clearly explained in the Draft Local Plan, was consistently presented in consultations during its preparation. New housing allocation BKL008a for 20 dwellings was identified in the Preferred Sites consultation in 2018 and presented in subsequent consultations. Site BKL008a will supplement the saved SAMDev brownfield housing and employment allocation at BUCK001/BKL011 which already forms part of the housing land supply in Bucknell. The Council considered local representations recommending a further extension to BUCK001 but this site was extended to 70 dwellings in the SAMDev Plan and a further extension may affect its viability in the village of Bucknell. Further site options in Bucknell are influenced by the Area of Outstanding Natural Beauty and the Bucknell Conservation Area that cover the centre and west of the village. Site BKL008a on the east of the village lies beyond these two protective designations and provides an appropriate location for further modest housing development to meet a revised housing requirement for 110 dwellings which represents a modest increase from the previous figure of 100 dwellings. The delivery of BUCK001 and BKL008a is currently affected by the protection of the River Clun Special Area of Conservation (SAC) due to the water quality in the river. Site BKL008a could be delivered quickly as a smaller, greenfield allocation to refresh the housing market when the issues connected with the protection of the SAC are resolved but currently these issues will defer the delivery of new housing in Bucknell.	No	S2.2 Bucknell (BKL008a)
A0349	B003	none specified.	See the Statement of Common Ground with Natural England	No	S2.2 Bucknell (BKL008a)
A0547	B001	n/a	The support for the settlement strategy for Clun is welcomed and recognises that the town is appropriately designated as a Community Hub and has identified a suitable housing allocation on site CLU005 to extend the current, saved SAMDev housing allocation on site CLUN002.	No	S2.2 Bucknell (BKL008a)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0348	B025	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2 CLU005	Not Specified	Yes	Not Specified	Welcome recognition of Clun as historically significant in para 5.42 of the draft Shropshire Local Plan and the various heritage assets mentioned. With regard to proposed allocation CLU005, welcome development guideline for this site to undertake a heritage assessment to satisfy national and local heritage policies.
A0361	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2 CLU002 and CLU005	Not Specified	Yes	Not Specified	Support draft Policy S2.2, proposed allocation CLU005 (to extend existing allocation CLUN002)', proposed saved allocation CLUN002 and the draft Policy Map Inset S2 – 'Clun'. Note CLU005, together with saved allocation CLUN002, have been assessed by the Council as being unconstrained, viable and deliverable/developable. Combined these sites are large (around 80 dwelling capacity) and would make a significant contribution to the 95 dwellings proposed housing guideline for Clun. CLUN002 is currently subject to a Planning Application subject to positive discussions with Shropshire Council to address outstanding issues (relating to nitrogen) which consider can be resolved (methods of doing so documented in representation include a package treatment plant (with nitrogen scrubber and reed bed) and tree planting within the catchment (sufficient to demonstrate net gain in nitrogen removed), appendices including a site plan and wider land use plan relating to these matters appended to representation). As such, confident proposed allocation CLU005 and proposed saved allocation CLUN002 and viable and deliverable and are actively in discussion with housebuilders interested in developing the site. Note and support all the other development guidelines as set out in the supporting text.
A0349	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Schedule S2.2(i) CLU005	Not Specified	Not Specified	No	1. We welcome the Council's commitment (as set out in paragraph 3.30 of the HRA) to working with stakeholders to develop a restoration plan for the SAC with enough certainty of mitigation measures to unlock development. However, as NE does not yet know where any SAC restoration measures would be best located (para 3.29 of the HRA discusses the need to re-wild a percentage of the landscape) this site may be needed for these and thus it may be premature to include it as an allocation in the Local Plan. Also, this allocation may not be deliverable without additional work to inform the evidence underpinning the SAC restoration scheme. 2. Natural England notes that no acceptable nutrient neutrality or betterment schemes have been designed to date, to allow development to proceed, despite a planning application for 55 houses in Bishop's Castle having been in determination for more than a year. This lends credence to this allocation being premature. 3. We do not believe the allocation is compatible with the Dutch Nitrogen Judgement at the present stage, though you may wish to seek your own legal advice.
A0126	B004	Sustainability Appraisal	S2 Bishops Castle Place Plan Area WBR007/008/010	Not Specified	No	Not Specified	WBR 007 and 008 both scored POOR in the SA & notes that the site not within walking distance of services and facilities. A Transport Assessment should be carried out to determine appropriate measures for improving safe pedestrian and cycle access to local services and amenities, including provision of an attractive pedestrian route through the Site with the Public Right of Way retained. Vehicular access will be provided onto the B4386 with appropriate traffic calming measures, including extension of the 30mph limit. This Parish Council however has already advised that the proposed route is not safe with exit onto mainly single track lane itself exiting onto busy and fast B4386 with poor visibility to enable safe crossing. Speeding is a community concern and the village is part of the PACT priority for the local policing team. The village 30 mph limit is not adhered to with speed increasing near Worthen Hall Farm. In order to access a range of services new residents would require a car resulting in additional traffic/speeding on, poor rural roads. On the 20th January 2021 ( for the 3rd time since October 2019) the road along site WBR007/008 was flooded and impassable by car. WBR010 scored Good in SA but there is no safe pedestrian access to this site/adjoining road and the available footpath on the other side of the road are not regulation width. Speeding combined with poor visibility requires consideration of safe accessibility of residents to village services & a . private vehicle would be required to access services in closest towns Shrewsbury or Welshpool. Additional flooding, sewerage, uplift in road use must be a consideration when considering this inclusion of these two sites.
A0126	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2(i)WBR007/008 /010	Not Specified	No	Not Specified	Hierarchy of settlements points scoring is flawed. A one size fits all scoring system used in urban and rural settings not appropriate. Following consultation events carried across the parish, regarding the future settlement status overwhelming response & support for the parish as a whole to be returned from Cluster to countryside. A key driver for this is the volume of planning consents (as detailed in the response) across this parish in recent years with substantial over delivery of open market housing in this parish, especially executive 4 and 5 bedrooomed properties which are unaffordable & do not meet local need. Properties are largely purchased by 55+ demographic moving into the location & parish in danger of losing more schools & services due to nature of housing delivery. Supportive of appropriate development but inability to guarantee delivery of 2/3 bedroom houses which have been identified as a Parish priority . The parish as whole, and Worthen and Brockton individually, have exceeded the target figures for planning consents set in SAMDev. Currently 148 dwellings in Worthen & at least 90 plus new dwellings could be delivered permanently changing the rural village character of Worthen and Brockton to an urban site. This could put pressure on services and road usage in these villages and neighbouring villages located along the B4386.Sites, WBR007, WBR008 and WBR010, when combined with windfall development of further 10 dwellings would result excessive over-development Additional flooding, sewerage, uplift in road use must be a consideration when considering this inclusion of these two sites. B4386 poorly maintained dramatic uplift in usage, type and excessive speed in recent years. Fatality experienced & safe crossing already required in Worthen and more so if additional pedestrian usage of Back Lane. Essential services are located across both Brockton and Worthen and on either side of the very fast and busy B4386. A safe pavement for Brockton to Worthen is an urgent requirement. BOAT between the villages needs to be improved for pedestrian access. Issue with cars parking outside the school due to the unsafe vehicle and pedestrian routes through the villages. People forced to drive to local services which is not environmentally friendly. Sewerage facilities are already over capacity issue with raw sewerage entering properties in Worthen. Development could exacerbate flooding in the area. Issue with road flooding restricting access to & from the village.
A0126	B006	Habitats Regulations Assessment	Shropshire Hills AONB WBR007/008/010	Not Specified	No	Not Specified	The HRA states there will be no adverse effects on the integrity of The Stiperstones and Hollies SAC as a result of the Draft Local Plan. disagree due to impact of development neighbouring the AONB. Impact on the view from the AONB vantage points and on the beauty of this natural protected environment needs to be taken into full account. The Glover Report should be a consideration. Worthen is visible from the protected vantage points within the AONB and sits just outside of AONB & it would be impacted by development within the village & its urbanisation. Site WBR010 was refused at appeal in 2004 due to its impacts (decision details included) which concluded that there would be urbanisation of countryside which would be harmful to its intrinsic character and beauty.... with harm would be caused to the attractive landscape setting of the village

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0505	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4 WBR007	Not Specified	No	No	Cannot ask ordinary consultees if the Draft Shropshire Local Plan is legally compliant, frankly wont know. However, consider it is not sound and seems to be at odds with the Duty to Co-operate. Within the process site assessments of WBR007, WBR008 and WBR010, have not been considered together. Taken together, these sites would represent approximately a 50% increase in the number of dwellings within Worthen. It would seem reasonable that such a significant change to the community should be assessed and part of the appraisal. In addition there has to be an assessment of that if taken together would this represent Sustainable Development (SP4). This issue has not been considered, it therefore follows the issue strategic policy is not being followed which is part of the National Planning Policy Framework. I and my MP have asked this question of the council in writing and it has also been a subject raised in Cabinet questions by myself but has received no answer only the response to raise it here as part of this consultation response.
A0505	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4 WBR008	Not Specified	No	No	Not sure you can ask an ordinary consultee if the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan is legally compliant, frankly I do not know. It is however it's not sound and would seem to be at odds with the Duty to Co-operate. Within the process site assessments of WBR007, WBR008 and WBR010, have not been considered together. Taken together, these sites would represent approximately a 50% increase in the number of dwellings within Worthen. It would seem reasonable that such a significant change to the community should be assessed and part of the appraisal. In addition there has to be an assessment of that if taken together would this represent Sustainable Development (SP4). This issue has not been considered, it therefore follows the issue strategic policy is not being followed which is part of the National Planning Policy Framework. I and my MP have asked this question of the council in writing and it has also been a subject raised in Cabinet questions by myself but has received no answer only the response to raise it here as part of this consultation response.
A0505	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4 WBR010	Not Specified	No	No	The proposal for site WBR010 in the 'Reg 19 pre-submission draft local plan' does not take into account the previous planning appeal refusal (14/00398/out) which was upheld by the Planning Inspector. This approach is flawed in that the same issues that determined the Planning Inspectors decision in the last planning plan are prevalent in the current proposed plan so do they need to be taken into account in the assessment of site. I have had a response to a written question to the council that the previous planning appeal refusal was in the context of the previous plan and so has no bearing on the current plan. A "that was then, and this is now" attitude. I would argue that they whilst the decision may only be applicable to the previous plan, the issues raised considered in the Planning Inspectors review and assessment of the site are relevant and should be considered. Merely saying, because it was against the previous plan and is of no relevance to the proposed plan, prevents the issues seen by the Planning Inspector being considered, and so the assessment is incomplete. All the above are relevant to the current selection criteria in the management of Community Hubs (SP9 & 10) and have been ignored by the council's selection process. It should also be noted that the previous planning application was for 25 and in this Local Plan is for 20 houses. The plot in WBR010 is far bigger and could accommodate 40 or more dwellings. This does not make sense unless there is a plan to vary the number of dwelling it the WBR010 plot is included within the plan, so frustrating any objections to a larger development. Within the process site assessments of WBR007, WBR008 and WBR010, have not been considered together. Taken together, these sites would represent approximately a 50% increase in the number of dwellings within Worthen. It would seem reasonable that such a significant change to the community should be assessed and part of the appraisal. In addition there has to be an assessment of that if taken together would this represent Sustainable Development (SP4). This issue has not been considered, it therefore follows the issue strategic policy is not being followed which is part of the NPPF
A0126	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2(i) WBR 007- /008 Worthen and Brockton Policies Map	Not Specified	No	Not Specified	WBR 007 and 008 both scored POOR in the SA & notes that the site not within walking distance of services and facilities. A Transport Assessment should be carried out to determine appropriate measures for improving safe pedestrian and cycle access to local services and amenities, including provision of an attractive pedestrian route through the Site with the Public Right of Way retained. Vehicular access will be provided onto the B4386 with appropriate traffic calming measures, including extension of the 30mph limit. This Parish Council however has already advised that the proposed route is not safe with exit onto mainly single track lane itself exiting onto busy and fast B4386 with poor visibility to enable safe crossing. Speeding is a community concern and the village is part of the PACT priority for the local policing team. The village 30 mph limit is not adhered to with speed increasing near Worthen Hall Farm. In order to access a range of services new residents would require a car resulting in additional traffic/speeding on, poor rural roads. On the 20th January 2021 ( for the 3rd time since October 2019) the road along site WBR007/008 was flooded and impassable by car. Additional concerns that the size of the Land has a greater capacity ( at least 35) for development than the 25 indicated in the pre-submission draft and in light of Government White Paper would automatically be granted outline planning permission on Plan adoption. Plan proposal of 55 would mean housing stock/size of the village would be increased by 38%, rising alarmingly to 61% if all sites developed to their full potential. This site could accommodate at least 35 dwellings.
A0477	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2 WBR007 & WBR008	Not Specified	Not Specified	Not Specified	There is a need for 2 & 3 bedroomed properties in the area for families and younger people. There is a school, shop, pub, village hall and importantly a doctors here and it is important to keep these going and supported. But these families need safe pedestrian access to these places. If you need to cross the road at the Back Lane turning it is blind and there is already a severe speeding issue with traffic in the vicinity. There isn't a safe pavement for people to get to the above mentioned places and in a number of locations it does narrow to less than half a metre. People will have to cross the road around the vicinity of the Old Post Office due to a lack of pavement. There is limited vision and with speeding traffic there have been many near misses and earlier this year sadly a fatality. I would imagine that if there were not at least two safe crossings available then families would be forced into using cars for these short distances adding to local pollution and to traffic at busy times. There is already an issue with parked cars in the vicinity of the school on the B4386. The speeding traffic which enters Worthen from the Shrewsbury direction in the Little Worthen area would need some calming measures installed. Currently many vehicles ignore the 30 mph signs and don't slow down until the bend. Something needs to be done to help prevent collisions. Even extending the 30 mph zone might not have the desired effect. There has been significant flooding on the road between this site and just before Little Worthen. I feel that this proposed site will only add to the problem. I believe there were initially 30 properties allocated in this settlement of around 148 houses. With all the proposals on both sites and other infill areas it brings the total to around 55 which is exceptionally big for a small rural community to absorb.

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0478	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2 WBR007 & WBR008	Not Specified	Not Specified	Not Specified	Welcome new housing in the village, but the amount proposed is too many for the current size of the village to absorb. New families will be welcome, to keep the local amenities, like the doctor's, pub, village hall, shop, school and churches, thriving. To be able to move around the village safely to these different venues is difficult as pedestrians would have to cross the road and in most of the potential crossing places, there is very limited visibility. Speeding traffic has been a well documented issue over the last few years. The Road Safety Camera Van is a regular visitor to the village. As well as many near misses when crossing the road or even walking along the pavement, there has also been a recent fatality. Pavements are quite narrow in places, less than half a metre wide, so parents with child buggies etc, sometimes have to go into the road to negotiate their way along. It would possibly force many families to take to their vehicles to get the short distance from one end of the village to another, increasing air pollution and adding to already difficult and unsafe parking, especially in the vicinity of the school. Adding safe crossings is difficult as visibility for drivers is very limited due to the bends and the undulations of the road. Where would be a safe place ? Speeding traffic from the Shrewsbury direction into Little Worthen despite speed restrictions is still an issue. It is only the bend that slows traffic down. Some important traffic calming measures would need to be installed. Also there is a significant issue with flooding on the road between this site and Little Worthen. The site may add to this issue unless things are taken into consideration in the planning.
A0126	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2(i)WBR 010 Worthen and Brockton Policies Map	Not Specified	No	Not Specified	WBR010 scored Good in SA but there is no safe pedestrian access to this site/adjoining road and the available footpath on the other side of the road are not regulation width. Speeding combined with poor visibility requires consideration of safe accessibility of residents to village services & a private vehicle would be required to access services in closest towns Shrewsbury or Welshpool. Site WBR010 was refused at appeal in 2004 due to its impacts ( decision details included) which concluded that there would be urbanisation of countryside which would be harmful to its intrinsic character and beauty.... with harm would be caused to the attractive landscape setting of the village Whilst suggested that this site has "capacity" to provide 20 new dwellings, in reality it could up to 50 dwellings under the a more relaxed development regime outlined in the recent White Paper.
A0477	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2 WBR010	Not Specified	Not Specified	Not Specified	As with most rural communities there is a need for affordable housing and 2 / 3 bedroomed properties. Under new legislation I believe there will be no planning permission for developers to go through, therefore giving them the opportunity to build what they want and naturally the 4 / 5 bedroomed executive style housing would give them a greater profit. Of course we need new families in the area to support the school, doctors, village hall, shops, pub etc. Families in these new developments would need safe pedestrian access to the said establishments. In places the pavement is narrower than half a metre. Pedestrians would need to cross the busy road if they were to access facilities at either end of the village. There is a well documented speeding issue through the village which has deteriorated since the early part of this year during lockdown. Over the years the Road Safety Camera Van has visited regularly. This site includes the site next to Millfield House which has already been turned down on appeal by the planning inspector. It was deemed to be out of character with that part of the village. It would impact on the settlement view from the Area of Outstanding Natural Beauty. The planning appeal statement upheld refusal of planning application. The site originally was for 25 houses. This site is vast and could easily double or triple this number. If the developers had their own way I feel this could happen. It would be unacceptable. Safety and environmental issues could be overlooked in favour of profit if they were not included in the development. There have been several near misses and a recent fatality in the last year. There is a significant sewage problem in the village in this area. Water runs off the field using flooding and backing up towards Brockton and beyond. A large introduction of new housing would further add to this. If any development was to be introduced to the village on this site it should stay in character with this part of the village and be linear in nature. The site should be greatly reduced in order to prevent a sprawling development. I think the rest of the field is not included so this reduction should not be a problem. Without safe pavements and crossings it is feared that pedestrians will use their vehicles to get around to the various places in the village, adding to air pollution, adding to parking problems and adding to the risk of further accidents with the increased traffic.
A0478	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2 WBR010	Not Specified	Not Specified	Not Specified	Although the village does need infill housing of a 2/3 bedroomed nature, affordable housing, bungalows for the ageing population, the proposed level of up to 55 dwellings on this and another site within the village would be unacceptable. There would be far too many for this tiny village, which currently consists of less than 150 dwellings, to absorb. With the current situation where developers would not have to go through planning, there is always the case that developers would maximise the number of properties on the site for financial gain. There would be a high percentage of 4/5 bedroomed executive style houses, which is just what the village doesn't need. Obviously some housing is needed to continue to maintain the numbers of people in the village to allow the school, doctor's, pub, shop, village hall and pub to thrive. It would not be environmentally friendly to have all the extra vehicles within the village. As pedestrian access to all the above mentioned venues is limited and in places dangerous, it could force residents to take to their cars to drive from one end of the village to another to access amenities. Again parking these vehicles would be an issue. There is already a speeding issue in the village which has been well documented over the years. The Road Safety Camera Van regularly visits. Many near misses have occurred with pedestrians trying to cross the road and sadly there has been a recent fatality. There are not pavements on both sides of the road so crossing is inevitable. In several places the pavement is less than half a metre wide. Taking children to school, and walking with prams and buggies is also a safety issue. Parents need to hold their child's hands for safety and often have to walk in the road. There are people with mobility scooters who need access to the doctor's, village hall and shops. Where to site any crossings in the village is another issue, with high traffic speeds, overtaking and poor visibility for cars and pedestrians. This site next to Millstream House has already been turned down on appeal by the planning inspector as out of character with that part of the village and impacting on the settlement view from the AONB. Initially there were plans for 25 dwellings on this site. It could hold triple that number. With the recent government white paper recommending more housing and developer control on development sites, this could lead to even greater over-development of the village. This would be unacceptable. Far too many new dwellings for a tiny village to absorb. There is a flooding and sewerage issue from this site. There are well documented flooding problems with flood water and sewerage backing up to Brockton and beyond. This site, if used, therefore should be greatly reduced to prevent a sprawling development. Any development on this site should stay in character with this part of the village, which is linear. There would be safety issues for pedestrians and vehicles emerging from this site onto the main road. There is no space to put a pavement on that side of the road so pedestrians would have to cross the road immediately, to access the school, doctor's, village hall and pub. There would also be safety issues for emerging vehicles due to the speed of oncoming traffic. Safety and environmental issues should not be overlooked if these are not included in this development.

No	S2.2 Worthen and Brockton (WBR010)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0546	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2.2 WBR010	Yes	Yes	Yes	We support the legal compliance and soundness of the Reg-19 Draft. Site WBR010 is highly deliverable and will provide much needed pedestrian footway along the road frontage for the village and there is already strong interest from developers and to deliver the appropriate housing for the community in a short time period.
A0124	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	BRD030	Yes	Yes	Yes	Support the modification to require the provision of new playing fields and associated facilities within the site guidelines, made at Reg 18. However, the need is likely to be met by a combination of on- and off- site provision so we would like to see this referenced in the guidelines also. Additionally, we would like the guidelines to state that developers will be expected to demonstrate how the provision of new pitches and associated facilities will be managed and maintained.
A0023	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Bridgnorth	Not Specified	Not Specified	Not Specified	BRD030 is unacceptable as it will result in loss of agricultural land which is needed due to Brexit; loss of open space needed for physical & mental wellbeing; worsen pressure on Bridgnorth schools and medical facilities; and increase strain on road infrastructure. There has already been significant development and there is insufficient demand for new housing in Bridgnorth. Covid 19 will reduce demand for and affordability of housing and also demand for employment land. Development should be in Telford or the Black Country instead. Urbanising Bridgnorth would deter the tourist industry.
A0070	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them. The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.
A0070	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference? Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters? Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?
A0070	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published? Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated. There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth? BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0546	B001	n/a	Support noted.	No	S2.2 Worthen and Brockton (WBR010)
A0124	B011	Expand the wording of the developer guidelines to set out that the need for playing fields will be met through a combination of on-site provision and off-site contributions, and that developers will be expected to make appropriate provision for the management and maintenance of on-site playing field provision.	For the sake of clarity, it is proposed that a minor modification is made to the 13 <sup>th</sup> paragraph of the guidelines for site BRD030.	Yes	S3.1 (i) Bridgnorth BRD030
A0023	B001	Reduced the proposed housing guideline for Bridgnorth.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.	No	S3.1 Bridgnorth
A0070	B003	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth
A0070	B007	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators." Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.	No	S3.1 Bridgnorth
A0070	B008	Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional. Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat. Explain the measures to be taken to improve air quality in Bridgnorth. Explain how noise and odour will be mitigated. Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal. Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology. Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0071	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030 DP25. Infrastructure Provision	Not Specified	No	Not Specified	<p>Concerned whether the draft Shropshire Local Plan is effective and fully deliverable over the proposed Plan period. Following concerns represent a risk to delivery of planned level of housing/employment growth and their successful integration into Bridgnorth:</p> <ul style="list-style-type: none"> <li>-Allocation of either proposed allocation BRD030 (Tasley Garden Village) or previously proposed site at Stanmore Garden Village involve significant development over a prolonged period (during the Local Plan period and beyond) and beyond existing development boundaries.</li> <li>-Proposals involve significant re-shaping of Bridgnorth, but do not involve a whole town approach to shaping the towns future with regard to planning for facilities and infrastructure, as proposals largely seem to be viewed in isolation.</li> <li>-Local infrastructure is already strained (town and wider area) with lack of electrical capacity for employment sites, lack of high-speed broadband, poor mobile signal and traffic and transport issues including congestion, bottlenecks, connectivity issues, lack of town centre parking and high levels of pollution. Acknowledge a Strategic Transport Assessment is being undertaken for Bridgnorth, consider this will identify need for significant infrastructure improvements (town and wider area), if Bridgnorth growth is to be pursued successfully.</li> <li>-Expect a comprehensive infrastructure plan and local transport plan (identifying how sustainable transport - walking, cycling and public transport will be developed in the Bridgnorth area). Neither are available to support this consultation.</li> <li>-Lack of clearly identified demand for the scale of residential development proposed and for employers to base themselves in the town, given its lack of connectivity. Track record of housing delivery is 'patchy' at best and delivery of new employment low.</li> <li>-Bridgnorth's employment is concentrated on the east of the town (Stourbridge Road and Stanmore Industrial Estate). Welcome facilitation of further employment development in this area (capitalising on existing local skills in some sectors), albeit this involves release of Green Belt land and a creates a need for compensating measures. However, concerned that a significant element of planned employment delivery relies additional employment development at Tasley, to the west of the town, where there is no previous experience of significant employment development and further from links to the West Midlands conurbation and main (inadequate) links to Telford (north) and Kidderminster (south).</li> <li>-Consider making Tasley (where BRD030 is located) the major focus for residential development is less sustainable, in terms of the impact on local infrastructure, and more expensive in terms of improvements needed.</li> </ul>
A0091	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference?</p> <p>Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters?</p> <p>Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>
A0091	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p> <p>The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.</p>
A0091	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and if so why has it not been published?</p> <p>Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated.</p> <p>There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth?</p> <p>BRD030 is also within the impact risk zone for four SSSI's, contains environmental networks and has the potential to impact on habitats for European protected species (principally bats and great crested newt). It also has the potential to impact on the non-designated habitats formed under the Planning Permission for Bridgwalton Quarry and managed by Shropshire Wildlife Trust. Species surveys need to be undertaken. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.</p>
A0092	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. Shropshire Council should require and monitor compliance with them.</p> <p>The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0071	B002	<p>Undertake an analysis of infrastructure and urban capacity in Bridgnorth. Identify proposals to address any identified issues, including how improvements will be funded. Reduce the rate of planned housing and employment development. Rates can be increased in future iterations of the Local Plan once successful development and integration into the town have been demonstrated.</p> <p>Reflect preference of Bridgnorth Town Council for development of the site at BRD032 (Revised Stanmore Garden Village) rather than that of the proposed allocation at BRD030 (Tasley Garden Village).</p> <p>Reassess suitability of both the above sites for short to medium term development in the light of infrastructure and transport assessments.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It is acknowledged the proposed development strategy for Bridgnorth involves development beyond the current Development Boundary within the adopted Local Plan. However, the Local Plan Review is the appropriate mechanism for considering amendments to development boundaries and the amendments proposed are considered appropriate to achieve the proposed development strategy for the town. It should also be noted that proposed amendments to Development Boundaries are not unique to Bridgnorth and as already referenced proposed site allocations have been informed by a proportionate and robust site assessment process.</p> <p>Draft Policy DP25 proposes a policy approach to the provision of infrastructure to ensure that the infrastructure necessary to support development is delivered. Furthermore, where appropriate, proposed site guidelines identify some of the key infrastructure requirements/further studies which may need to be undertaken at the Planning Application stage, to inform development proposals for a site.</p> <p>As part of the Local Plan Review process, Shropshire Council has engaged with key infrastructure providers and prepared/considered evidence on infrastructure capacity and needs as appropriate to inform proposed policies, including development strategies for specific settlements, and proposed allocations. The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p> <p>The proposed development strategy for Bridgnorth provides an opportunity to expand and capitalise on the unique characteristics of Stanmore Industrial Estate. However it also proposes to allocated land for a new employment site to the west of the town, cross-subsidised by proposed residential development, in proximity to the current employment allocation.</p>	No	S3.1 Bridgnorth
A0091	B001	<p>Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030.</p> <p>Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision.</p> <p>Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators."</p> <p>Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.</p>	No	S3.1 Bridgnorth
A0091	B004	<p>The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p>	<p>Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of the site. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.
A0093	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them. The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.
A0093	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference? Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters? Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?
A0093	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published? Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated. There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth? BRD030 is also within the impact risk zone for four SSSI's, contains environmental networks and has the potential to impact on habitats for European protected species (principally bats and great crested newt). Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.
A0114	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them. The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0092	B007	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators." Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.	No	S3.1 Bridgnorth
A0092	B008	Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional. Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat. Explain the measures to be taken to improve air quality in Bridgnorth. Explain how noise and odour will be mitigated. Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal. Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology. Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.	No	S3.1 Bridgnorth
A0093	B003	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth
A0093	B007	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.
A0125	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 STC002/P58a Policy Map 3	Not Specified	No	Not Specified	Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a. The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth. Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0119	B007	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators." Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.	No	S3.1 Bridgnorth
A0119	B008	Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional. Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat. Explain the measures to be taken to improve air quality in Bridgnorth. Explain how noise and odour will be mitigated. Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal. Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology. Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.	No	S3.1 Bridgnorth
A0120	B003	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth
A0120	B007	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators." Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.	No	S3.1 Bridgnorth
A0120	B008	Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional. Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat. Explain the measures to be taken to improve air quality in Bridgnorth. Explain how noise and odour will be mitigated. Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal. Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology. Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.	No	S3.1 Bridgnorth
A0125	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0132	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	No	Not Specified	<p>Object to the draft Shropshire Local Plan as key evidence is missing, needed to make the draft Shropshire Local Plan legally sound; it fails to comply with the tests of soundness in the National Planning Policy Framework; the Gunning Principles and needs of the Local Community. The proposed strategy selected must be supported by proportionate evidence justifying it, all alternatives must be considered and it must be demonstrated that the selected strategy is truly community led. Do not feel there is evidence to support the proposition that the planned level of development in the Bridgnorth and surrounding Parishes is deliverable.</p> <p>To be justified as an appropriate strategy based upon credible evidence, including:</p> <ul style="list-style-type: none"> <li>-Justification for proposed housing and employment guidelines in Bridgnorth/Shropshire.</li> <li>-A Local Housing Needs Assessment for Bridgnorth Place Plan Area. Without this, consultees cannot reach informed decisions on appropriateness of housing proposals for Bridgnorth/surrounding Parishes or the draft Shropshire Local Plan.</li> <li>-Credible evidence demonstrating how significant shortfalls in past delivery of jobs, housing and businesses will be addressed. The Shropshire AMR (2017-18) indicates 6.5ha of employment development completed between 2006 and 2017, an average of 0.6ha. The AMR also anticipates "Bridgnorth and Shifnal could both perform stronger roles in the delivery of employment development to meet demands for economic growth arising in part from the rate of housing development in these settlements but this is currently constrained by the limited availability of land for employment development". No evidence to suggest Bridgnorth is an attractive location for new employment development and concerned about whether this is realistic given the town's relatively weak transport connectivity. Also note the Viability Study (VS) undertaken to inform the draft Shropshire Local Plan indicates Office and Industrial development is generally unviable (albeit "larger industrial" development on greenfield sites is marginal), it also indicates this is not unique to Shropshire and where development is coming forward (and it is coming forward), it tends to be from existing businesses for operational reasons, rather than purely for property investment reasons. The VS concludes hotels, prime retail, supermarkets and retail warehouses are viable but these are not the types of developments proposed on employment allocations at Bridgnorth. The VS also does not include separate viability calculations for employment development at Stanmore and Tasley Garden Villages (part of mixed use allocations), whilst the proposed extension to Stanmore Industrial Estate capitalises on existing on-site infrastructure.</li> <li>-Level of employment development proposed for Bridgnorth is unclear. Para 1 of draft Policy S3.1 states 49ha (this appears to comprise SAMDev allocations (13.3ha net developable - albeit part is for the relocation of the existing livestock market), Green Belt land adjacent to Stanmore Industrial Estate (11.4ha) and Tasley Garden Village (16ha), however this does not total 49ha. further Schedule A6 gives a figure of 37.7ha for Bridgnorth and surrounding Parishes. This comprises 9.1% of the County total, in contrast residential development guidelines for Bridgnorth comprise 5.8% of the County total.</li> <li>-A Highways Assessment. The draft Shropshire Local Plan states a highways assessment for Bridgnorth will be undertaken, however, this has not yet occurred and consider the draft Shropshire Local Plan cannot be sound without it. This assessment should also explain how Bridgnorth can be part of the Strategic Transport Corridor, a central strategic plank of the draft Shropshire Local Plan.</li> <li>-The strategic approach in the draft Shropshire Local Plan responds o the Economic Growth Strategy for Shropshire and specifically reflects objectives to prioritise investment in strategic locations/growth zones along strategic corridors, utilising existing road and rail connections. Growth assumptions for Bridgnorth are based on claims/assumptions that Bridgnorth is no a strategic corridor, which it is not. The document 'Investing in Strategic Transport Corridors in The Marches', which underpins 'The Marches Economic Growth Strategy for Shropshire' advises Bridgnorth is not positioned on a strategic transport corridor. This casts doubt on Shropshire Cabinet's ability to make an informed decision, as information is incorrect or unavailable.</li> <li>-An Infrastructure Plan, which we would expect to cover the necessary infrastructure to support the proposed/any level of growth.</li> <li>-Credible evidence demonstrating the sustainability of the draft Shropshire Local Plan, based upon past delivery of jobs from the current SAMDev allocation.</li> <li>-There is no Local Transport Plan available to inform Regulation 18/19 consultations or Shropshire Cabinet decisions. This casts doubts on the ability to make informed decisions about soundness.</li> </ul>
A0133	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth.</p> <p>Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0134	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0132	B001	<p>Shropshire Council must provide all credible evidence that is missing before Cabinet and Council are asked to submit the Local Plan to the inspectorate. The strategy selected must be backed up with proportionate credible evidence justifying the strategy, all alternatives must be considered and Shropshire Council must demonstrate that the selected strategy is truly community lead.</p> <p>Recommend the draft Shropshire Local Plan is modified, in line with the proposals in the 1st edition of the Bridgnorth Plan. In brief we recommend the scale of development around Bridgnorth be reduced over the plan period 2019 to 2036 to no more than 1,000 dwellings in total, no single site is selected, and the Regulation 18 Consultation is repeated ensuring community involvement.</p>	<p>Noted.</p> <p>Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p> <p>The evidence base assembled to inform the draft Shropshire Local Plan is considered proportionate and robust. It includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council; a Strategic Infrastructure Providers and a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans; an Economic Development Needs Assessment and an Employment Land Review.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review. A Strategic Transport Assessment for Bridgnorth is also being undertaken to inform infrastructure requirements in association with development proposals for the town.</p> <p>Shropshire Council also considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the Gunning Principles. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	S3.1 Bridgnorth
A0133	B004	<p>Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan.</p> <p>There is no requirement for an alternative site to be identified.</p>	<p>Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0135	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0136	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0137	B014	N/A	Noted. Shropshire Council is not proposing to identify specific sites to accommodate the proposed contribution to cross-boundary needs arising within the Black Country (1,500 dwellings and 30ha of employment land). Rather this is included within the proposed housing and employment land requirements subject to the proposed strategic approach for the level and distribution of development across Shropshire.	No	S3.1 Bridgnorth
A0140	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. A0142	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth. Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0143	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth. Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0145	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth. Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0151	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3	Not Specified	No	Not Specified	<p>The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p> <p>The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the “sustainable urban extension” stated in the Local Plan.</p>
A0151	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference?</p> <p>Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters?</p> <p>Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will ‘parking facilities’ and ‘dedicated park and ride service’ be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>
A0151	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 & S3	Not Specified	No	Not Specified	<p>Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published?</p> <p>Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated.</p> <p>There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth?</p> <p>BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0142	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0143	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0145	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0151	B003	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth
A0151	B007	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators." Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.	No	S3.1 Bridgnorth
A0151	B008	Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional. Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat. Explain the measures to be taken to improve air quality in Bridgnorth. Explain how noise and odour will be mitigated. Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal. Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology. Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.	No	S3.1 Bridgnorth

A0235	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference?</p> <p>Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters?</p> <p>Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>
A0255	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1(i)	Not Specified	Yes	Not Specified	<p>Proposals advanced in draft Policy S3.1(i) as far as the housing development in the proposed Garden Village at Tasley is concerned, are supported. The inclusion of employment land and community facilities and open amenity land in the project is also supported as this will ensure a sustainable development.</p> <p>Campaigned against the proposed Stanmore Garden Village, which is no longer proposed for allocation when a better site Tasley Garden Village (BRD030), outside the Green Belt and compliant with National Policy, emerged. Tasley Garden Village is included within the draft Shropshire Local Plan and whilst sceptical of the scale of growth proposed for Bridgnorth as a whole, support this proposal. The draft Shropshire Local Plan proposes only employment development at Stanmore, and so that is all we may comment upon. Appreciate other parties are likely to object to Tasley Garden Village and may attempt to re-open the prospect of Stanmore Garden Village and that this may be a topic at Examination. If the idea of "new village" should a) not be sited at Tasley and/or b) should again be sited at Stanmore, would expect an opportunity to make further written submissions/attend the Examination.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0232	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0233	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0235	B004	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators." Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.	No	S3.1 Bridgnorth
A0255	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0255	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Consider the draft Shropshire Local Plan is unsound.</p> <p>There does not appear to be any justification or evidence for the level of employment land provision proposed in the Review, for Bridgnorth:</p> <ul style="list-style-type: none"> <li>-No explanation is provided of the need for the total proposed employment land supply for Bridgnorth (40.5ha), how the stated capacity of saved SAMDev Plan allocations (8.25ha) was arrived at, or where proposed new allocations are to be located (27.4ha of new allocations) - as documented in Appendix 6 of the draft Shropshire Local Plan.</li> <li>-No explanation/justification of why employment land should be located at Bridgnorth and in particular Stanmore, which is dissociated from Bridgnorth, cannot be accessed (reasonably) on foot or cycle from the town, and is inadequately served by public transport (most accessing the existing site use the motor car). No suggestion that proposed employment allocations at Stanmore would do anything other than make the present situation worse. No justification exists.</li> <li>-No explanation of why a planned increase to the proposed housing guideline for Bridgnorth from (1,400 dwellings in the adopted Local Plan to 1,800 dwellings in the draft Shropshire Local Plan) should result in a requirement for 40.5ha of employment land (27.4ha of new allocations).</li> <li>-Also no explanation of why the increase in the number of dwellings at Shrewsbury (as the Strategic Centre) - 5 times the increase proposed at Bridgnorth, requires less than 3 times the increase in employment land proposed at Bridgnorth (especially as from 2016 to 2019 (first three years of the proposed Plan period) delivery of employment land in Shrewsbury was around 13 times greater than Bridgnorth, a clear indication of greater need and demand).</li> <li>-The Bridgnorth Market Towns Profile prepared by Shropshire Council (no doubt considered during preparation of the draft Shropshire Local Plan) revealed Bridgnorth was the third largest town in Shropshire and the Parishes population was projected to increase by 2,300 by 2026. But this increase has not resulted in increased pressure for employment land release/development. Indeed, if anything, Bridgnorth has been losing employment opportunities in the recent past, even though allocated land with ready access, has existed. Data from the Market Town Profile suggests why there is no great pressure for additional employment land (despite 9.2% reduction in numbers of jobs over the five years to 2017, whilst the Shropshire average was a rise of 2.9%) - lack of need rather than lack of land as: the population is generally older than the rest of Shropshire, thus there are less economically active persons living in the town; and those that are of working age are mostly in employment.</li> </ul> <p>There is no immediate need for new allocated employment sites, but Appendix 7 of the draft Shropshire Local Plan indicates land at Stanmore will come forward 2020/21-2024/25. No evidence to suggest this land is necessary in the short term, or that there is excessive and immediate demand that cannot be accommodated other than on the Green Belt land at Stanmore. There can be no certainty that, if allocated, the land would be developed (given a large percentage of the existing industrial estate has not been developed) or that it would generate significant job opportunities. The fact that the proposed allocations would also represent incursions into Green Belt and open countryside means the proposals conflict with national policy as set out in the NPPF.</p> <p>Does not appear that the proposed extensions to the Stanmore Industrial Estate have been based on an objectively assessed need for the development or that there is any evidence to support the allocations.</p> <p>The draft Shropshire Local Plan cannot be considered "sound" due to the proposed employment allocations at Stanmore (Sites STC002 and P58a). Consider the proposal to develop these sites for employment uses represents unjustifiable and unnecessary extensions of industrial development into the Green Belt, which conflicts with other draft policies in the draft Shropshire Local Plan which establish general development principles. There is a lack of evidence of need for these proposed allocations; nothing demonstrates that the provision of more employment development at Stanmore is so pressing that Green Belt principles should be set aside.</p>
A0256	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth.</p> <p>Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0257	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002/P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth. Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0267	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0265	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0266	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0309	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. A0314	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth. Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0315	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0320	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth.</p> <p>Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0321	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference?</p> <p>Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters?</p> <p>Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>
A0321	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p> <p>The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.</p>
A0321	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published?</p> <p>Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated.</p> <p>There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth?</p> <p>BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.</p>
A0322	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	No	No	No	<p>The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0320	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0321	B004	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators." Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.	No	S3.1 Bridgnorth
A0321	B006	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth
A0321	B007	Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional. Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat. Explain the measures to be taken to improve air quality in Bridgnorth. Explain how noise and odour will be mitigated. Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal. Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology. Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.	No	S3.1 Bridgnorth
A0322	B005	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth
A0322	B006	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators." Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.	No	S3.1 Bridgnorth

Has such an assessment been undertaken for BRD030 and is so why has it not been published?</p> <p>Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated.</p> <p>There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth?</p> <p>BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.</p>
A0323	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	Not Specified	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth.</p> <p>Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0324	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. A0328	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p> <p>The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.</p>
A0328	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference?</p> <p>Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters?</p> <p>Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0322	B007	<p>Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional.</p> <p>Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat.</p> <p>Explain the measures to be taken to improve air quality in Bridgnorth.</p> <p>Explain how noise and odour will be mitigated.</p> <p>Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal. Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.</p>	No	S3.1 Bridgnorth
A0323	B005	<p>Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan.</p> <p>There is no requirement for an alternative site to be identified.</p>	<p>Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p>	No	S3.1 Bridgnorth
A0324	B004	<p>Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan.</p> <p>There is no requirement for an alternative site to be identified.</p>	<p>Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p>	No	S3.1 Bridgnorth
A0325	B004	<p>Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan.</p> <p>There is no requirement for an alternative site to be identified.</p>	<p>Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p>	No	S3.1 Bridgnorth
A0328	B004	<p>The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p>	<p>Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."</p>	No	S3.1 Bridgnorth
A0328	B005	<p>Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030.</p> <p>Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision.</p> <p>Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators."</p> <p>Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.</p>	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0328	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published? Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated. There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth? BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.
A0338	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a. The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth. Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.
A0339	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002/P58a)	Not Specified	No	Not Specified	Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. A0396	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ.</p> <p>It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored.</p> <p>A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0343	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0347	B047	n/a	Noted. The draft Shropshire Local Plan should be read as a whole. Draft Policy DP19 comprehensively addresses the issue of water infrastructure and water quality.	No	S3.1 Bridgnorth
A0348	B026	In proposed site guidelines for BRD030 (Tasley Garden Village): With regard to settings for heritage assets, consider the word 'safeguard' instead of 'create' would ensure that the settings of heritage assets are conserved in an appropriate manner. Include a Development Guideline requiring that any Planning Application should be accompanied by a heritage statement and an archaeological assessment.	Noted. For clarity, two minor modifications are proposed to the 15th paragraph of the draft Site Guidelines for site BRD030 (Tasley Garden Village) in Schedule 3.1(i) to include need for heritage assessment including archaeological assessment.	Yes	S3.1 Bridgnorth
A0384	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0396	B001	Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored. Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.	Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.	No	S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0396	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030).</p> <p>At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'? In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?</p>
A0396	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p> <p>The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.</p>
A0396	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth.</p> <p>However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?</p>
A0396	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site.</p> <p>Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not compatible with one another re poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18.</p> <p>It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated?</p> <p>BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0396	B002	Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years). Provide evidence that Bridgnorth can sustain a 35% population increase.	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth
A0396	B003	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	<p>Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."</p>	No	S3.1 Bridgnorth
A0396	B004	What areas / units are already available for occupation and how long have they been vacant? What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19. If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?	<p>Noted. Shropshire Council has undertaken an Economic Development Needs Assessment and Employment Land Review to inform the Local Plan Review. The Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Specifically with regard to employment land, this proposed strategy provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Having a supply of land which creates choice and competition in the market provides flexibility to respond to changing circumstances.</p> <p>Employment allocations are specifically allocated for employment purposes. Draft Policy SP13 indicates that allocated employment land will be protected for employment generating uses and alternative uses will only be supported in specific circumstances, as documented within the draft Policy.</p>	No	S3.1 Bridgnorth
A0396	B005	Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing. Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences. Provide details of how noise and odour can be mitigated in these circumstances.	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0396	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan.</p> <p>Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment.</p> <p>Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458.</p> <p>Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network.</p> <p>The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.</p>
A0396	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP25 specifies development can only occur where there is sufficient infrastructure capacity available or where the development funds necessary improvements to infrastructure through a suitable developer contribution. What contributions are required of BRD030 and if there is a shortfall will Shropshire Council meet the difference?</p> <p>Draft Policy DP27 recognises businesses and communities require quality broadband provision/mobile network connectivity and also states development proposals will be expected to provide infrastructure for broadband and mobile communications as essential utilities. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters?</p> <p>Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>
A0396	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 & S3: Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published?</p> <p>Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated.</p> <p>There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth?</p> <p>BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0396	B006	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth
A0396	B007	<p>Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030.</p> <p>Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision.</p> <p>Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators."</p> <p>Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.</p>	No	S3.1 Bridgnorth
A0396	B008	<p>Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional.</p> <p>Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat.</p> <p>Explain the measures to be taken to improve air quality in Bridgnorth.</p> <p>Explain how noise and odour will be mitigated.</p> <p>Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.</p>	No	S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0397	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3 Bridgnorth Place Plan Area	Not Specified	No	Not Specified	<p>The plan is not effective as there is no evidence that it is deliverable over the plan period - particularly in relation to the planned level of development in the Bridgnorth area. The level of residential development proposed in Bridgnorth far exceeds previous delivery rates. Proposals equate to 92 dwellings per annum as at 31st March 2019 (and there has been little delivery since then, meaning the actual rate required now is higher), whereas the average for the 10-year period to 2016 was some 72.8 dwellings per annum. This means proposals are at least 26% higher than past delivery rate.) There is also no evidence that there is market capacity in Bridgnorth to sustainably absorb this level of development, particularly in competition with other settlements.</p> <p>The level of employment development proposed is unclear. Policy S3.1 states 49ha will be made available to "create choice and competition in the market" (this includes 13.3ha net developable on existing allocations, part of which is for the relocation of the livestock market, 11.4ha in the Green Belt adjoining Stanmore Industrial Estate and 16ha within the proposed Tasley Garden Village). However Schedule A6 gives a figure of 37.7ha as the employment land supply for Bridgnorth, this compromises 9.1% of the total supply for Shropshire. Whilst residential proposed consist of only 5.8% of the housing supply for Shropshire. The average completion rate for the 11-year period to 2017 was 0.6ha, the Shropshire Authority Monitoring Report (2017/18) states "It is anticipated that Bridgnorth and Shifnal could both perform stronger roles in the delivery of employment development to meet demands for economic growth arising in part from the rate of housing development in these settlements but this is currently constrained by the limited availability of land for employment development", however no evidence has been provided that Bridgnorth is an attractive location for new employment development and concerned whether this is realistic given weak connectivity.</p> <p>No infrastructure plan has been prepared and a strategic transport assessment for the Bridgnorth area has not yet been carried out/reported. Without these, it cannot be evidenced that local infrastructure is adequate or that necessary improvements can be made/funded through infrastructure contributions to support sustainable delivery of the development proposals.</p> <p>The Shropshire Viability Study suggests that the proposed allocation Tasley Garden Village (BRD030) and Stanmore Garden Village may be viable, however the study notes "the Council is still working up the assessment of the strategic infrastructure and mitigation requirements for these sites" and gives a "best estimate" of infrastructure contributions. As such, consider the evidential value of the Viability Study in supporting the deliverability of these sites is low in the absence of an infrastructure plan and (in particular) a strategic transport assessment for the Bridgnorth area.</p> <p>With regard to proposed employment allocations, the Shropshire Viability Study does not separately assess the viability of employment development at Stanmore or Tasley. In reality, the employment elements of the Tasley and Stanmore Garden Village schemes are part of mixed use allocations, whilst the proposed extension to Stanmore Industrial Estate capitalises on existing on-site infrastructure. The Shropshire Viability Study indicates Office and Industrial development is generally considered unviable and larger industrial development is only marginally viable on greenfield sites. Other forms of development appear to be viable on greenfield and brownfield sites, but these are not proposed on the new employment allocations.</p>
A0397	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3 Bridgnorth Place Plan Area	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan has not been justified as an appropriate strategy. It has not been demonstrated that all reasonable alternatives have been considered, and sufficient, proportionate credible evidence has not been provided. Many strategic documents are missing or lacking credible evidence. We therefore consider the plan to be "not sound".</p> <p>No community meetings have occurred during the Regulation 19 and Regulation 18 consultation period.</p> <p>No evidence that representations made during Regulation 18 consultations have been considered.</p> <p>A reasonable alternative to the proposed approach has been presented during the Reg 18 stage of consultation, but no consideration or feedback on this proposal has been provided.</p> <p>Consider that for the Local Plan to be justified as an appropriate strategy, the following is required:</p> <ul style="list-style-type: none"> <li>-A Local Housing Need Assessment for Bridgnorth and justification for the level of housing proposed, without this a decision on the appropriateness of levels of development proposed cannot be reached.</li> <li>-Local Economic Assessment of the Bridgnorth Place Plan Area and justification for the level of employment proposed.</li> <li>-Evidence of the deliverability and viability of the employment land supply (the Shropshire Viability Study does not specifically consider this).</li> <li>-Evidence demonstrating how significant shortfalls in past delivery of jobs, housing and businesses will be addressed.</li> <li>-Justification of the proposed housing requirement (30,800 dwellings) for Shropshire, when the local housing need calculation is some 25,894 dwellings.</li> <li>-Evidence on provision of single occupancy dwellings (sub-national housing projections predict a significant proportion of growth is associated with such households).</li> <li>-Strategic Highway Assessment for Bridgnorth and explanation of how Bridgnorth can be part of the Strategic Transport Corridor.</li> <li>-Infrastructure Plan.</li> <li>-Evidence that sustainable growth, addressing Bridgnorth's low level of employment self-containment would result from planned housing and employment allocations (it is unclear whether past employment completions have kept pace with past housing completions). Existing housing allocations remain to be delivered and there remains a significant shortfall in employment delivery.</li> </ul>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0397	B001	<p>Provide evidence of deliverability of the scale of development proposed for Bridgnorth, this should include:</p> <ol style="list-style-type: none"> <li>1. Evidence of the market capacity to absorb the housing and employment development proposed, which significantly exceeds past rates.</li> <li>2. Evidence of the ability of local infrastructure across the Bridgnorth area (such as transport and movement) to support the scale of development and prepare an appropriate infrastructure investment plan, with sources of funding clearly identified.</li> <li>3. Provide a detailed statement of what infrastructure contributions are required from the proposed Garden Village.</li> <li>4. Re-visit viability calculations for the Garden Village developments, so they clearly include both housing and employment elements and provide a statement of what planning obligations would be expected to ensure delivery of employment alongside policy compliant housing.</li> </ol> <p>Or reduce the scale of development to nearer those historically established levels and review/identify infrastructure (including transport) required to support revised proposals.</p> <p>Identify the actual level of overall new employment development proposed for the Bridgnorth.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 Development Strategy: Bridgnorth Principal Centre provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p> <p>Draft Policy DP25 proposes a policy approach to the provision of infrastructure to ensure that the infrastructure necessary to support development is delivered. Furthermore, where appropriate, proposed site guidelines identify some of the key infrastructure requirements or identify some of the further studies which may need to be undertaken at the Planning Application stage to identify infrastructure requirements, to inform any development proposals for a site.</p> <p>As part of the Local Plan Review process, Shropshire Council has engaged with key infrastructure providers and prepared/considered evidence on infrastructure capacity and needs as appropriate to inform proposed policies, including development strategies for specific settlements, and proposed allocations.</p> <p>The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans.</p> <p>A Strategic Transport Assessment for Bridgnorth is being undertaken to inform infrastructure requirements in association with development proposals for the town, as recognised within the proposed development guidelines for site BRD030 (Tasley Garden Village).</p> <p>The Shropshire Viability Study is based on cautious assumptions regarding infrastructure requirements and contributions associated with potential development sites. However inevitably until the detailed Planning Application stage, the full infrastructure requirements and contributions for a potential development cannot be finalised, as not all necessary information will be available until this stage. Nevertheless, Shropshire Council considers the Shropshire Viability Study is a robust assessment of viability based on the information available at the strategic plan making stage.</p>	No	S3.1 Bridgnorth
A0397	B002	<p>Prepare proportionate and credible evidence to justify the proposed strategy and consider all available alternatives.</p> <p>Provide all evidence missing before seeking approval for submission of the draft Shropshire Local Plan.</p> <p>Modify the draft Shropshire Local Plan so that it is consistent with the 1st Edition of the Bridgnorth Plan (appendix to the representation).</p> <p>Reduce the scale of development around Bridgnorth to no more than 1,000 dwellings (including the existing SAMDev Plan allocations), do not identify a single site for development and repeat the Regulation 18 stage to ensure community involvement.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, reasons for proposing to exceed this need are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Shropshire Council also considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and national legislation. Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation. Responses.</p> <p>All views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan. A summary of responses to each 'Regulation 18' stage consultation is available on the Shropshire Council website and form appendices of the Consultation Statement prepared for the draft Shropshire Local Plan.</p> <p>Shropshire Council considers that a proportionate and robust evidence base has been prepared to inform the Local Plan Review. This includes such evidence as a Viability Study, Local Housing Need Assessment, Strategic Housing Market Assessment, Place Plans and Strategic Infrastructure Implementation Plan, Economic Development Needs Assessment and Employment Land Review.</p> <p>A Strategic Transport Assessment for Bridgnorth is being undertaken to inform infrastructure requirements in association with development proposals for the town, as recognised within the proposed development guidelines for site BRD030 (Tasley Garden Village).</p>	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0397	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	General Comments	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan has not been positively prepared, and is therefore not sound, because:</p> <p>-An assessment of local housing need for the Bridgnorth Place Plan Area has not been undertaken. Without this, housing need for Bridgnorth cannot have been objectively assessed. The best assessment of housing need is that undertaken by Bridgnorth District Council in 2006. Extrapolating this to 2036, 15,168 dwellings are needed by 2036, compared with the 16,200 dwellings proposed by the version draft Local Plan at that time. This has been submitted to Shropshire Council in response to Regulation 18 consultation but no feedback has been provided.</p> <p>-'Statements of Common Ground' (SoCG), prepared under the Duty to Cooperate, have not been agreed with other Local Authorities. Paragraph 2.27 of the draft Shropshire Local Plan confirms that discussions have been held but that SoCG will only be available when the plan is submitted for Examination, as such they are not available for consideration as part of the Regulation 19 consultation.</p> <p>Such SoCG would include agreement on the housing needs of adjacent and other local authorities and the extent to which they anticipate not being able to meet them - we understand that not all the other local authorities have completed their own housing needs assessments.</p> <p>Shropshire Council is proposing to contribute 1,500 dwellings to meet the needs of the Association of Black Country Authorities (ABCA). However, we note that none of the members of ABCA are directly neighbouring authorities to Shropshire. It may be more appropriate for Telford and Wrekin Council to contribute to this need. Furthermore, we can find no evidence that any financial contribution has been agreed with these authorities to cover the additional infrastructure costs that will be needed to provide for the additional 1,500 dwellings. Again, without this information we consider that the Local Plan has not been positively prepared or objectively assessed.</p>
A0404	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p> <p>The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.</p>
A0404	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference?</p> <p>Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters?</p> <p>Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>
A0404	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and if so why has it not been published?</p> <p>Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated.</p> <p>There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth?</p> <p>BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.</p>
A0405	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p> <p>The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0397	B004	Reduce the housing requirement for Shropshire by removing the allocation for the Association of Black Country Authorities (ABCA) under the Duty to Cooperate. Under the Duty to Co-operate approach Telford and Wrekin Council to assess if housing and employment need can be met more sustainably by them. Information already provided by Bridgnorth Plan Steering Group, and others, should be taken into account during the plan-making process.	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Responses to Local Plan Review consultations have been given due consideration. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	S3.1 Bridgnorth
A0404	B003	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	<p>Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."</p>	No	S3.1 Bridgnorth
A0404	B007	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators."</p> <p>Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.</p>	No	S3.1 Bridgnorth
A0404	B008	Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional. Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat. Explain the measures to be taken to improve air quality in Bridgnorth. Explain how noise and odour will be mitigated. Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.</p>	No	S3.1 Bridgnorth
A0405	B003	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	<p>Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."</p>	No	S3.1 Bridgnorth

Bridgnorth (BRD030)	Not Specified	No	Not Specified	Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference? Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters? Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?
A0407	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published? Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated. There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth? BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.
A0410	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3	Not Specified	No	Not Specified	The proposed housing and employment guidelines for Bridgnorth have increased during the consultation process (1,500 dwellings to 1,800 dwellings and 16ha of employment land (based on the 'balanced' employment land calculation identified within the Preferred Scale and Distribution of Development Consultation) to 28ha of employment land to 49ha of employment land). Nowhere in the draft Shropshire Local Plan or in the Bridgnorth section of the Green Belt Exceptional Circumstances Statement is there any quantified justification for this massive proposed increase in the employment land guideline, or for the departure from balance with the housing guideline. The Council now propose allocation of 1,050 houses at Tasley Garden Village, rather than the previously proposed allocation of 850 houses on the Stanmore Garden Village. It is therefore not consistent to continue to propose an employment land allocation at Stanmore, the more so because it is Green Belt. With regard to Tasley Garden Village, response to the site promoters consultation can be summarised as: -There is no proven need for the scale of the proposals, either for housing numbers or for employment land, and -Not enough account has been taken of the climate emergency. As such consider the proposed employment land guidelines for Bridgnorth are unsound, because they are not supported by proportionate evidence.
A0411	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030). At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'? In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?
A0411	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them. The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0407	B007	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators." Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.	No	S3.1 Bridgnorth
A0407	B008	Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional. Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat. Explain the measures to be taken to improve air quality in Bridgnorth. Explain how noise and odour will be mitigated. Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth
A0410	B015	The quantum of employment land proposed for Bridgnorth, including that proposed to be released from the Green Belt, needs to be reappraised.	Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. The proposed employment land guideline for Bridgnorth provides appropriate choice and competition within the market, recognises the role of Bridgnorth and its contribution towards strategic growth objectives in the east of the County and meets the needs of the town and its surrounding hinterland, including attracting inward investment and allowing existing businesses to expand. In identifying proposed site allocations a proportionate and robust site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	S3.1 Bridgnorth
A0411	B002	Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years). Provide evidence that Bridgnorth can sustain a 35% population increase.	Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development. There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.	No	S3.1 Bridgnorth
A0411	B003	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0411	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?
A0411	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not compatible with one another re poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.
A0411	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458. Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network. The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.
A0411	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	Draft Policy DP25 specifies development can only occur where there is sufficient infrastructure capacity available or where the development funds necessary improvements to infrastructure through a suitable developer contribution. What contributions are required of BRD030 and if there is a shortfall will Shropshire Council meet the difference? Draft Policy DP27 recognises businesses and communities require quality broadband provision/mobile network connectivity and also states development proposals will be expected to provide infrastructure for broadband and mobile communications as essential utilities. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters? Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0411	B004	<p>What areas / units are already available for occupation and how long have they been vacant?</p> <p>What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19.</p> <p>If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?</p>	<p>Noted. Shropshire Council has undertaken an Economic Development Needs Assessment and Employment Land Review to inform the Local Plan Review. The Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Specifically with regard to employment land, this proposed strategy provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Having a supply of land which creates choice and competition in the market provides flexibility to respond to changing circumstances.</p> <p>Employment allocations are specifically allocated for employment purposes. Draft Policy SP13 indicates that allocated employment land will be protected for employment generating uses and alternative uses will only be supported in specific circumstances, as documented within the draft Policy.</p>	No	S3.1 Bridgnorth
A0411	B005	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth
A0411	B006	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth
A0411	B007	<p>Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030.</p> <p>Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision.</p> <p>Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators."</p> <p>Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.</p>	No	S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0411	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 and S3 (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published?</p> <p>Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated.</p> <p>There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth?</p> <p>BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.</p>
A0427	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002/P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth.</p> <p>Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth.</p> <p>Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0427	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3	Not Specified	No	Not Specified	<p>The plan is not effective as there is no evidence that it is deliverable over the plan period - particularly in relation to the planned level of development in the Bridgnorth area.</p> <p>The level of residential development proposed in Bridgnorth far exceeds previous delivery rates. Proposals equate to 92 dwellings per annum as at 31st March 2019 (and there has been little delivery since then, meaning the actual rate required now is higher), whereas the average for the 10-year period to 2016 was some 72.8 dwellings per annum. This means proposals are at least 26% higher than past delivery rate.) There is also no evidence that there is market capacity in Bridgnorth to sustainably absorb this level of development, particularly in competition with other settlements.</p> <p>The level of employment development proposed is unclear. Policy S3.1 states 49ha will be made available to "create choice and competition in the market" (this includes 13.3ha net developable on existing allocations, part of which is for the relocation of the livestock market, 11.4ha in the Green Belt adjoining Stanmore Industrial Estate and 16ha within the proposed Tasley Garden Village). However Schedule A6 gives a figure of 37.7ha as the employment land supply for Bridgnorth, this compromises 9.1% of the total supply for Shropshire. Whilst residential proposed consist of only 5.8% of the housing supply for Shropshire. The average completion rate for the 11-year period to 2017 was 0.6ha, the Shropshire Authority Monitoring Report (2017/18) states "It is anticipated that Bridgnorth and Shifnal could both perform stronger roles in the delivery of employment development to meet demands for economic growth arising in part from the rate of housing development in these settlements but this is currently constrained by the limited availability of land for employment development", however no evidence has been provided that Bridgnorth is an attractive location for new employment development and concerned whether this is realistic given weak connectivity.</p> <p>No infrastructure plan has been prepared and a strategic transport assessment for the Bridgnorth area has not yet been carried out/reported. Without these, it cannot be evidenced that local infrastructure is adequate or that necessary improvements can be made/funded through infrastructure contributions to support sustainable delivery of the development proposals.</p> <p>The Shropshire Viability Study suggests that the proposed allocation Tasley Garden Village (BRD030) and Stanmore Garden Village may be viable, however the study notes "the Council is still working up the assessment of the strategic infrastructure and mitigation requirements for these sites" and gives a "best estimate" of infrastructure contributions. As such, consider the evidential value of the Viability Study in supporting the deliverability of these sites is low in the absence of an infrastructure plan and (in particular) a strategic transport assessment for the Bridgnorth area.</p> <p>With regard to proposed employment allocations, the Shropshire Viability Study does not separately assess the viability of employment development at Stanmore or Tasley. In reality, the employment elements of the Tasley and Stanmore Garden Village schemes are part of mixed use allocations, whilst the proposed extension to Stanmore Industrial Estate capitalises on existing on-site infrastructure. The Shropshire Viability Study indicates Office and Industrial development is generally considered unviable and larger industrial development is only marginally viable on greenfield sites. Other forms of development appear to be viable on greenfield and brownfield sites, but these are not proposed on the new employment allocations.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0411	B008	<p>Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional.</p> <p>Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat.</p> <p>Explain the measures to be taken to improve air quality in Bridgnorth.</p> <p>Explain how noise and odour will be mitigated.</p> <p>Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal. Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.</p>	No	S3.1 Bridgnorth
A0427	B004	<p>Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan.</p> <p>There is no requirement for an alternative site to be identified.</p>	<p>Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p>	No	S3.1 Bridgnorth
A0427	B005	<p>Provide evidence of deliverability of the scale of development proposed for Bridgnorth, this should include:</p> <ol style="list-style-type: none"> <li>Evidence of the market capacity to absorb the housing and employment development proposed, which significantly exceeds past rates.</li> <li>Evidence of the ability of local infrastructure across the Bridgnorth area (such as transport and movement) to support the scale of development and prepare an appropriate infrastructure investment plan, with sources of funding clearly identified.</li> <li>Provide a detailed statement of what infrastructure contributions are required from the proposed Garden Village.</li> <li>Re-visit viability calculations for the Garden Village developments, so they clearly include both housing and employment elements and provide a statement of what planning obligations would be expected to ensure delivery of employment alongside policy compliant housing.</li> </ol> <p>Or reduce the scale of development to nearer those historically established levels and review/identify infrastructure (including transport) required to support revised proposals.</p> <p>Identify the actual level of overall new employment development proposed for the Bridgnorth.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 Development Strategy: Bridgnorth Principal Centre provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p> <p>Draft Policy DP25 proposes a policy approach to the provision of infrastructure to ensure that the infrastructure necessary to support development is delivered. Furthermore, where appropriate, proposed site guidelines identify some of the key infrastructure requirements or identify some of the further studies which may need to be undertaken at the Planning Application stage to identify infrastructure requirements, to inform any development proposals for a site.</p> <p>As part of the Local Plan Review process, Shropshire Council has engaged with key infrastructure providers and prepared/considered evidence on infrastructure capacity and needs as appropriate to inform proposed policies, including development strategies for specific settlements, and proposed allocations.</p> <p>The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans.</p> <p>A Strategic Transport Assessment for Bridgnorth is being undertaken to inform infrastructure requirements in association with development proposals for the town, as recognised within the proposed development guidelines for site BRD030 (Tasley Garden Village).</p> <p>The Shropshire Viability Study is based on cautious assumptions regarding infrastructure requirements and contributions associated with potential development sites. However inevitably until the detailed Planning Application stage, the full infrastructure requirements and contributions for a potential development cannot be finalised, as not all necessary information will be available until this stage. Nevertheless, Shropshire Council considers the Shropshire Viability Study is a robust assessment of viability based on the information available at the strategic plan making stage.</p>	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0427	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Bridgnorth	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan has not been justified as an appropriate strategy. It has not been demonstrated that all reasonable alternatives have been considered, and sufficient, proportionate credible evidence has not been provided. Many strategic documents are missing or lacking credible evidence. We therefore consider the plan to be “not sound”.</p> <p>No community meetings have occurred during the Regulation 19 and Regulation 18 consultation period.</p> <p>No evidence that representations made during Regulation 18 consultations have been considered.</p> <p>A reasonable alternative to the proposed approach has been presented during the Reg 18 stage of consultation, but no consideration or feedback on this proposal has been provided.</p> <p>Consider that for the Local Plan to be justified as an appropriate strategy, the following is required:</p> <ul style="list-style-type: none"> <li>-A Local Housing Need Assessment for Bridgnorth and justification for the level of housing proposed, without this a decision on the appropriateness of levels of development proposed cannot be reached.</li> <li>-Local Economic Assessment of the Bridgnorth Place Plan Area and justification for the level of employment proposed.</li> <li>-Evidence of the deliverability and viability of the employment land supply (the Shropshire Viability Study does not specifically consider this).</li> <li>-Evidence demonstrating how significant shortfalls in past delivery of jobs, housing and businesses will be addressed.</li> <li>-Justification of the proposed housing requirement (30,800 dwellings) for Shropshire, when the local housing need calculation is some 25,894 dwellings.</li> <li>-Evidence on provision of single occupancy dwellings (sub-national housing projections predict a significant proportion of growth is associated with such households).</li> <li>-Strategic Highway Assessment for Bridgnorth and explanation of how Bridgnorth can be part of the Strategic Transport Corridor.</li> <li>-Infrastructure Plan.</li> <li>-Evidence that sustainable growth, addressing Bridgnorth's low level of employment self-containment would result from planned housing and employment allocations (it is unclear whether past employment completions have kept pace with past housing completions). Existing housing allocations remain to be delivered and there remains a significant shortfall in employment delivery.</li> </ul>
A0428	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 and S3. Bridgnorth (BRD030)	Not Specified	No	No	<p>ONS growth forecasts equate to 799 dwellings, yet proposals are for a further 1,455 dwellings. How has this figure been arrived at? Dwelling completions will need to double to achieve this, is this sustainable?</p> <p>A steering group of members of local Town/Parish Councils consider no additional employment land and only a small number of additional dwellings are required in Bridgnorth, will these recommendations be accepted?</p> <p>Land in ownership of respondent (agricultural and riding area/menage) will be surrounded by proposed development (BRD030). Concerned about impact on use of this land (quite/safe space) and livestock (examples of how animals can be harmed by humans within representation). Consider BRD030 should be removed from the draft Shropshire Local Plan or will seek compensation and removal of the public right of way (PROW) which crosses their land.</p> <p>BRD030 is considered an unsustainable location; is not a garden village as it is not self-contained with community facilities, shops, school, petrol station etc - will the promoter sign up/implement garden village principles; is outside the development boundary; is away from main employment areas of the town/region (increasing commuting); and is contrary to planning policies/planning process. BRD030 is inappropriate post Covid 19 where a green recovery rather than business as usual is preferred. Also concerned about impact on the proposed relocation of the livestock market, sterilisation of mineral resources, impact of mineral winning on occupiers, flooding, social (given demographics need for additional schools needs to be assessed) and physical (particularly roads/transport which have numerous pinch-points and are subject to congestion with no plans for improvements, necessary improvements must be identified and implemented before development; broadband; and electricity) infrastructure; and the environment (Shropshire Wildlife Trust object to the proposals and the site is in proximity of Undertone Nature Reserve).</p> <p>BRD030 will not provide services/facilities until phase 4 of the development (9-14 years). How will residents of BRD030 access services/facilities during this period and beyond. A footbridge over the A458 is proposed but not illustrated, it is unclear if promoters own relevant land and a single crossing point is likely to be intimidating. Will this not encourage use of private transport/unsafe crossing of the A458.</p> <p>Consider affordable housing proposed on BRD030 will be unaffordable to local incomes.</p> <p>Concerned about cumulative impact of BRD030 and:</p> <ul style="list-style-type: none"> <li>-Existing allocations at Tasley. Would the existing allocation negate proposals on BRD030. Combined they will double the size of the town, this cannot be desirable or sustainable.</li> <li>-Wider development proposals across Shropshire in relation to limited water resources and climate change (construction/lifetime energy requirements - this does not align with the Climate Emergency).</li> </ul> <p>Will BRD030 result in a monopoly on housing development for the site promoter?</p> <p>Within the Regulation 18 Consultation on preferred sites, proposals involved release of land in the Green Belt (Stanmore Garden Village) and alternative ruled out due to factors including flood risk (significant past flooding in Bridgnorth and suitable measures must be put in place before development), landscape, accessibility constraints (including the A458) and impact on existing services/facilities. What has changed to allow consideration of BRD030?</p> <p>Consider Tasley should be identified as Green Belt due to landscape quality. Also can further expansion towards Morville be resisted in the future?</p> <p>Timing during Covid 19 gives insufficient time for residents and businesses to be made aware and respond.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0427	B006	<p>Prepare proportionate and credible evidence to justify the proposed strategy and consider all available alternatives.</p> <p>Provide all evidence missing before seeking approval for submission of the draft Shropshire Local Plan.</p> <p>Modify the draft Shropshire Local Plan so that it is consistent with the 1st Edition of the Bridgnorth Plan (appendix to the representation).</p> <p>Reduce the scale of development around Bridgnorth to no more than 1,000 dwellings (including the existing SAMDev Plan allocations), do not identify a single site for development and repeat the Regulation 18 stage to ensure community involvement.</p> <p>Delete proposed allocations STC002 and P58a.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, reasons for proposing to exceed this need are documented within the explanation to draft Policy SP2. Strategic Approach. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Shropshire Council also considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and national legislation. Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation. Responses.</p> <p>All views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan. A summary of responses to each 'Regulation 18' stage consultation is available on the Shropshire Council website and form appendices of the Consultation Statement prepared for the draft Shropshire Local Plan.</p> <p>Shropshire Council considers that a proportionate and robust evidence base has been prepared to inform the Local Plan Review. This includes such evidence as a Viability Study, Local Housing Need Assessment, Strategic Housing Market Assessment, Place Plans and Strategic Infrastructure Implementation Plan, Economic Development Needs Assessment and Employment Land Review.</p> <p>A Strategic Transport Assessment for Bridgnorth is being undertaken to inform infrastructure requirements in association with development proposals for the town, as recognised within the proposed development guidelines for site BRD030 (Tasley Garden Village).</p>	No	S3.1 Bridgnorth
A0428	B001	BRD030 should be removed from the draft Shropshire Local Plan.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt.</p> <p>The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans; and a Water Cycle Study, which considers availability of water and water infrastructure.</p> <p>Draft site guidelines for proposed allocation BRD030 would provide a framework for any future masterplanning and development of the site. They address such issues as infrastructure provision (including highways) and design and layout of the development.</p> <p>The consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	S3.1 Bridgnorth

A0443	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth. Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>

Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	S3.1 Bridgnorth
A0443	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	<p>Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p>	No	S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0449	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth.</p> <p>Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0458	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S3. Bridgnorth (BRD030)	Not Specified	Not Specified	No	<p>The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030).</p> <p>At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers ‘.. will make provision for the needs of the town and surrounding hinterland...’?</p> <p>In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?</p>
A0458	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Bridgnorth BRD030	Not Specified	No	Not Specified	<p>The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p> <p>The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the “sustainable urban extension” stated in the Local Plan.</p>
A0458	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth.</p> <p>However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0449	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0458	B002	Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years). Provide evidence that Bridgnorth can sustain a 35% population increase.	Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development. There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.	No	S3.1 Bridgnorth
A0458	B003	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth
A0458	B004	What areas / units are already available for occupation and how long have they been vacant? What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19. If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?	Noted. Shropshire Council has undertaken an Economic Development Needs Assessment and Employment Land Review to inform the Local Plan Review. The Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Specifically with regard to employment land, this proposed strategy provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Having a supply of land which creates choice and competition in the market provides flexibility to respond to changing circumstances. Employment allocations are specifically allocated for employment purposes. Draft Policy SP13 indicates that allocated employment land will be protected for employment generating uses and alternative uses will only be supported in specific circumstances, as documented within the draft Policy.	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0458	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site.</p> <p>Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not compatible with one another re poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18.</p> <p>It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated?</p> <p>BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.</p>
A0458	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan.</p> <p>Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment.</p> <p>Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458.</p> <p>Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network.</p> <p>The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.</p>
A0458	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference?</p> <p>Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters?</p> <p>Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>
A0458	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 and S3 (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published?</p> <p>Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated.</p> <p>There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth?</p> <p>BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0458	B005	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth
A0458	B006	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth
A0458	B007	<p>Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030.</p> <p>Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision.</p> <p>Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators."</p> <p>Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.</p>	No	S3.1 Bridgnorth
A0458	B008	<p>Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional.</p> <p>Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat.</p> <p>Explain the measures to be taken to improve air quality in Bridgnorth.</p> <p>Explain how noise and odour will be mitigated.</p> <p>Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.</p>	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0460	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3	Not Specified	No	Not Specified	The late emergence of the Tasley Garden Village proposal was limited to online consultation only due to the Covid 19 pandemic with no option for the public to examine the plans in person or discuss them at exhibitions and meetings. A substantial number of objections to the Bridgnorth Place Plan were made to Shropshire Council through the Regulation 18 consultation including objections from the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils. Despite this, it would appear that no account has been taken of these views and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils was formed in June 2019 to consider the issues facing Bridgnorth and to develop a plan for the settlement. Their draft report was published in May 2020, around the same time that the Tasley Garden Village proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all
A0460	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference? Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters? Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?
A0460	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?
A0460	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Bridgnorth BRD030	Not Specified	No	Not Specified	The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them. The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.
A0460	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458. Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network. The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0460	B001	Provide an explanation as to why the views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored. Delay any decision on the Legal Compliance and Soundness of the Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.	Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.	No	S3.1 Bridgnorth
A0460	B002	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators." Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.	No	S3.1 Bridgnorth
A0460	B003	What areas / units are already available for occupation and how long have they been vacant? What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19. If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?	Noted. Shropshire Council has undertaken an Economic Development Needs Assessment and Employment Land Review to inform the Local Plan Review. The Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Specifically with regard to employment land, this proposed strategy provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Having a supply of land which creates choice and competition in the market provides flexibility to respond to changing circumstances. Employment allocations are specifically allocated for employment purposes. Draft Policy SP13 indicates that allocated employment land will be protected for employment generating uses and alternative uses will only be supported in specific circumstances, as documented within the draft Policy.	No	S3.1 Bridgnorth
A0460	B004	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth
A0460	B005	What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur. Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458. Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.	No	S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0460	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 and S3 (BRD030)	Not Specified	No	Not Specified	Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published? Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated. There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth? BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.
A0460	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not compatible with one another re poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.
A0460	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S3. Bridgnorth (BRD030)	Not Specified	Not Specified	No	The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030). At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'? In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?
A0489	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a. The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth. Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.
A0493	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them. The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0460	B006	<p>Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional.</p> <p>Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat.</p> <p>Explain the measures to be taken to improve air quality in Bridgnorth.</p> <p>Explain how noise and odour will be mitigated.</p> <p>Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal. Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.</p>	No	S3.1 Bridgnorth
A0460	B007	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth
A0460	B008	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth
A0489	B004	<p>Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan.</p> <p>There is no requirement for an alternative site to be identified.</p>	<p>Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p>	No	S3.1 Bridgnorth
A0493	B003	<p>The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p>	<p>Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."</p>	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0493	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference?</p> <p>Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters?</p> <p>Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>
A0493	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published?</p> <p>Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated.</p> <p>There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth?</p> <p>BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.</p>
A0497	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Schedule S3.1(i) BRD030	Not Specified	No	Not Specified	<p>with regard to the Development Options Assessment undertaken for Bridgnorth.</p> <p>-Stanmore Garden Village benefits from direct access onto an A road, however the residential element of the Tasley Garden Village has no direct access to the A458 and access would have to be provided by a minor B road, entirely inappropriate for this scale of development. Furthermore Stanmore Garden Village is informed by a high-level highways appraisal which concludes appropriate mitigation of any impact on the highway network can be managed. Promoters of Tasley Garden Village have not given detailed consideration to highway impact of the development, particularly into Bridgnorth town centre (where there will be an increase in vehicle movements) where there is very limited capacity to undertake improvements physically within the town, due to proximity of buildings; and from a land availability point of view, as the extent of the adopted highway is very limited. Stanmore Garden Village and Tasley Garden Village are similar distances from Bridgnorth town centre, however connectivity must be considered. Stanmore Garden Village has been designed to promote sustainable modes of travel including adopting a design which promotes sustainable modes of travel; providing pedestrian and cycle links across Hermitage Ridge; providing public transport links (Appendix 6 of this representation summarises discussions with local bus operators); reducing dependence on private vehicles; and providing a Local Centre at an early stage of development, incorporating a 'park and choose' bus facility. Consider there are significant connectivity issues between Tasley Garden Village and Bridgnorth, as there is a lack of available land (in the control of the promoter) fronting onto A458, so pedestrian or cycle routes would require a significant diversion away from desire lines and result in potentially considerable connectivity challenges. There are also significant concerns about feasibility of creating a pedestrian footbridge over the A458, which is not possible along desire lines, without third party land which have declined to make it available. As such pedestrians and cyclists will be forced to use unsafe routes at grade over A458, which will be a major constraint to the development.</p> <p>-Stanmore Garden Village includes enhancement to the significance of the Scheduled Monument at The Hermitage, which is at risk from decay. Proposals can deliver improvements in terms of management, access, interpretation and in the circumstances of ongoing decay can provide a record of the past on location. As such it would represent a positive strategy for the conservation and enjoyment of the historic environment providing wider social and cultural benefits (consistent with paras 185 and 200 of the National Planning Policy Framework (NPPF). The assessment of development options gives no weight to the benefits the Stanmore proposal can bring and provides no evidence to show the benefits have been considered favourably. Historic England comments within the Masterplan are erroneous and have been superseded. It is concluded, with the favourable consideration of the proposed enhancement of The Hermitage, together with mitigation through masterplanning, Stanmore represents less risk to heritage assets than Tasley Garden Village. Furthermore, as The Hermitage is beyond the developed edge of Stanmore Garden Village, it is a logical and appropriate location for amenity space. Conversely, the Grade II listed Leasows Farm and The Leasows at Tasley Garden Village are located where mitigation leads to dissecting the site, making it difficult to provide a cohesive settlement in placemaking terms.</p> <p>-Consider that whilst both sites need assessment, Tasley Garden Village is more sensitive from an ecological perspective.</p> <p>-With regard to landscape, the assessment states that a very small part of the site falls within the medium-high landscape and visual sensitivity to housing and high landscape and visual sensitivity to employment, it is unclear which area this is referencing. Consider Tasley Garden Village, given the nature of the site, would have a far greater impact in terms of Landscape and Visual Impact than Stanmore Garden Village.</p> <p>-Consider the agricultural land quality of Stanmore Garden Village is either grade 3a or 3b, whilst it is grade 2 for Tasley Garden Village (based on sampling of land next to the garden village). Furthermore can confirm the viability of the remaining holding if Stanmore Garden Village is developed.</p> <p>-Stanmore Garden Village is sequentially preferred in regard to flood risk, given it is entirely located within flood zone 1 and vulnerability to other sources of flooding is low, whilst Tasley is primarily located in flood zone 1, but also has areas of flood zone 2 and 3 (high risk of flooding) and also has small areas in the 1 in 30, 1 in 100 and 1 in 1,000 year surface flood risk zones.</p> <p>-With the exception of preferred allocation (P58a) Stanmore Garden Village is located outside source protection zones, as is Tasley Garden Village.</p> <p>-Stanmore Garden Village is close to sources of noise from road and commercial development. However, Tasley Garden Village is also close to sources of noise from road (a more heavily trafficked road); commercial development (this will include a relocated livestock market. Noise and odour from the livestock market will not be mitigated by trees a necessary buffer will take out a good proportion of the site and if used as Green Infrastructure, user experience will be compromised); and also adjoins an operational quarry and a further site consent for mineral extraction.</p> <p>-Stanmore Garden Village offers potential to enhance the sustainability of the existing cluster of development at Stanmore and The Hobbins. Employment provision at Tasley Garden Village is not attractive to businesses (SAMDev allocation ELR011/a of 6.7ha will provide sufficient quantity to satisfy demand for the LPR period to 2038).</p> <p>Public consultation has resulted in Bridgnorth Town Council objections to Tasley Garden Village and supporting Stanmore Garden Village.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0493	B007	<p>Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030.</p> <p>Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision.</p> <p>Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators."</p> <p>Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.</p>	No	S3.1 Bridgnorth
A0493	B008	<p>Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional.</p> <p>Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat.</p> <p>Explain the measures to be taken to improve air quality in Bridgnorth.</p> <p>Explain how noise and odour will be mitigated.</p> <p>Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal. Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.</p>	No	S3.1 Bridgnorth
A0497	B002	<p>BRD030 should be deleted and Stanmore Garden Village (BRD032) (part) should be allocated for 70ha comprising 850 dwellings, 16ha employment land, new local centre and green space.</p>	<p>Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. In identifying proposed site allocations a proportionate and robust site assessment process has been undertaken, which included consideration of an appropriate range of factors used to identify constraints and opportunities.</p>	No	S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0497	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Schedule S3.1(ii) P58a and STC002	Not Specified	No	Not Specified	<p>Employment allocations (P58a and STC002) are supported as necessary extensions of Stanmore Business Park (formerly Stanmore Industrial Estate). However, amendments to their proposed site guidelines to remove use class B1, presumably to reflect changes to the Use Classes Order, mean it is unsound. Consider the proposed site guidelines should be amended to add new business use class E(g)(i) offices,(ii) research and development, and (iii) light industrial that superseded B1, as these are essential uses to allow the site to reach its potential and provides flexibility to ensure best chance of delivery and allow for market changes. Furthermore, each of these uses are already represented on Stanmore Business Park (existing uses are E (g), B2, B8 and Sui Generis). The E (g) uses are complementary of engineering and the advanced manufacturing businesses on site. Therefore whilst the proposed employment allocations P58a and STC002 will be focused towards the engineering and advanced manufacturing sectors, there needs to be the opportunity to complement these and allow the existing employment base in all use classes to grow and respond to market changes.</p> <p>The Shropshire Interim Economic Development Needs Assessment (EDNA) predicts structural changes to the employment sector over the plan period, with growth and decline in job sectors in Shropshire that in all scenarios forecast a workforce change with growth in office and light industrial class E (g), a fall in B2 and a near neutral position in B8. This is however Shropshire wide. Therefore, to allow for market changes and give employment land at Stanmore best chance of delivery over the plan period, use classes should be kept as broad as possible. There may also be long-term shifts in working patterns as a result of the Covid-19 that are not yet evident, a flexible and responsive policy is therefore the best option to ensure delivery.</p> <p>The policy should also be amended to reference Stanmore Business Park, rather than Stanmore Industrial Estate (renamed in 2017).</p> <p>In respect of need and exceptional circumstances for these employment allocations, previous representations by the site promoter demonstrate the success of Stanmore Business Park and the need for existing businesses to grow. Appendix 2 of this representation provides an updated position on occupation of the business park and alternative locations for employment in Bridgnorth. It confirms the business park is running at capacity with sites refurbished as they become available before being re-let.</p>
A0497	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Schedule S3.1(iii) Potential Future Direction of Growth	Not Specified	No	Not Specified	<p>Object to the development strategy for Bridgnorth including land west of Tasley Garden Village as a Potential Future Direction of Growth, it is not justified or effective as the evidence base does not support the strategy to allocate Tasley Garden Village (BRD030), taking into account reasonable alternative at Stanmore Garden Village (BRD032). Representations to the Regulation 18 Pre-Submission Draft Plan (Appendix 1 of this representation) remain relevant.</p>
A0497	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Bridgnorth	Not Specified	No	Not Specified	<p>Object to the development strategy for Bridgnorth which is not justified or effective as the evidence base does not support the strategy to allocate BRD030 (Tasley Garden Village), taking into account the reasonable alternative at BRD032 (Stanmore Garden Village).</p> <p>The Sustainability Appraisal (SA) shows the Tasley Garden Village performs poorly and there is a better alternative at Stanmore Garden Village. Furthermore Stanmore Garden Village is the only deliverable option.</p> <p>Agree that Bridgnorth is a Principal Centre. As the only Principal Centre in east Shropshire its role is serving not just its residents but also those in its hinterland that rely on it for its extensive range of services, facilities and employment opportunities. Proximity to the conurbation also offers considerable potential to attract investment into Shropshire and to trade into these larger urban markets.</p> <p>The increase in the level of housing and employment proposed needs to be justified.</p> <p>As the justification for additional employment land is attracting inward investment and providing for growth of existing businesses, it follows employment provision should be close to their existing locations.</p> <p>12ha of employment land at Stanmore Business Park (a successful well occupied site accommodating around 40 businesses many associated with engineering and advanced manufacturing and some major employers, with demand for expansion land. It also contains the Marches Centre for Manufacturing and Technology a state of the art training centre), to allow for growth of existing businesses is justified. A socio-economic study supports growth in this location, which forms an Appendix to this representation.</p> <p>Consider Stanmore Garden Village can address the evidential matters of why the growth is needed; why it is has to be in this location (links to the M54 strategic corridor and key opportunity to support the cluster of activities and key sectors in Bridgnorth and work with existing companies on future plans); provide balanced development of housing and employment supported by new community facilities and a local centre; can reduce out-commuting and enhancing sustainability of the existing development at The Hobbins and the Stanmore Business Park. The main constraint is Green Belt, but consider exceptional circumstances exist see wider representation.</p> <p>Representations to the Regulation 18 Pre-Submission Draft Plan (Appendix 1 of this representation) remain relevant.</p>
A0501	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth.</p> <p>Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth.</p> <p>Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0497	B003	The first paragraph of the proposed site guidelines for P58a and STC002 should be amended to specify development will be in B2, B8, E (g) (i) (ii) and (iii) and appropriate sui generis uses. References to Stanmore Industrial Estate should be updated to Stanmore Business Park.	Noted. Proposed allocations P58a and STC002 are targeted towards the engineering and advanced manufacturing sectors, reflecting the aspirations of the Shropshire Economic Growth Strategy and the opportunities that exist to build upon the critical mass of these uses present on the existing Industrial Estate. However, these allocations are also intended to complement the existing employment offer on the site, which includes elements within use class E (g) (i) (ii) and (iii) - complementary to the engineering and the advanced manufacturing businesses on site. Reflecting on this, it is considered appropriate to propose a minor modification to the draft site guidelines for proposed allocations P58a and STC002 captured within Schedule S3.1(ii), to allow for use classes E(g)(i), (ii) and (iii), where this is complementary to engineering and the advanced manufacturing activities and the primary use classes B2, B8 and sui generis.	Yes	S3.1 Bridgnorth
A0497	B004	Land west of Tasley Garden Village (41.5ha) should be deleted and Land Safeguarded for Future Development at Stanmore Garden Village (BRD032) (part) 33 ha should be allocated.	Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Specifically in relation to the identification of a potential future direction of growth, this approach is considered appropriate for Bridgnorth in order to provide certainty about the ability to meet future development needs.	No	S3.1 Bridgnorth
A0497	B007	The Strategy should set out the key issues for Bridgnorth, the constraints that are significant in determining a strategy to direct growth and identify a deliverable development to meet the identified need. Key issues are the need for more affordable housing; addressing imbalance between housing and employment; and improving access to community facilities and open space. Search for sites should be specified with the focus on the constraints of the settlement formed by the river and its floodplain; the landscape sensitivity to the north and south west; the physical barrier of the A458 southern by-pass; and the Green Belt to the east. Stanmore Garden Village should be recognised as a deliverable allocation for a garden village to address the key issues and have regard to the constraints of the settlement.	Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. In identifying proposed site allocations a proportionate and robust site assessment process has been undertaken, which included consideration of an appropriate range of factors used to identify constraints and opportunities.	No	S3.1 Bridgnorth
A0501	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0502	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0503	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0519	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0539	B001	The garden village at Tasley needs to be removed entirely from the plan; it is unnecessary there is an area already designated for 500 houses at Tasley. Bridgnorth would be turned into a dormitory town and not the attractive market town it currently is. There is no demand from the point of view of population growth in Shropshire; there is enough planned housing across the county more than adequate for any future growth in population.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. In identifying proposed site allocations a proportionate and robust site assessment process has been undertaken, which included consideration of an appropriate range of factors used to identify constraints and opportunities. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to infrastructure provision.	No	S3.1 Bridgnorth
A0544	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth

A0560	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0585	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 BRD030	Not Specified	No	Not Specified	BRD030 is not considered to be fully justified. It is considered that Shropshire Council has not fully taken the reasonable alternatives into account. The owners of Site STC003 are willing to promote this site for 100% affordable housing (potentially delivering c.200 dwellings) whilst also delivering low or even zero carbon development. The fact remains that Shropshire Council has already acknowledged the presence of exceptional circumstances for altering Green Belt boundaries at Stanmore through proposing to allocate 11.4ha employment land adjacent to the Stanmore Industrial Estate for employment purposes (S3.1(ii) Sites P58a and STC002). There is an therefore a real and tangible opportunity to capitalise on the sustainability benefits of this employment land allocation and the presence of existing employment opportunities through creating a new sustainable community in this location. strategic development in Bridgnorth should be directed to the east of the settlement, as previously proposed. Site BRD032 is shown to be better performing than Site BRD030 in the SA. Comprehensive strategic mixed use development in this location, incorporating Site STC003, will improve connectivity to locally important Stanmore Industrial Estate. Development to the east of Bridgnorth will also assist with rebalancing the growth of Bridgnorth, which has been focused to the west of the settlement during recent decades, whilst also offering good connectivity from new development at Bridgnorth to the Black Country conurbation.
A0606	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a. The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth. Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.
A0606	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030). At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '.. will make provision for the needs of the town and surrounding hinterland...'? In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?
A0606	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them. The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.
A0606	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0585	B001	It is contended that Shropshire Council should allocate land to the east of Bridgnorth at Stanmore, incorporating STC003.	Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. In identifying proposed site allocations a proportionate and robust site assessment process has been undertaken, which included consideration of an appropriate range of factors used to identify constraints and opportunities.	No	S3.1 Bridgnorth
A0606	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0606	B008	Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years). Provide evidence that Bridgnorth can sustain a 35% population increase.	Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development. There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.	No	S3.1 Bridgnorth
A0606	B009	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth
A0606	B010	What areas / units are already available for occupation and how long have they been vacant? What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19. If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?	Noted. Shropshire Council has undertaken an Economic Development Needs Assessment and Employment Land Review to inform the Local Plan Review. The Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Specifically with regard to employment land, this proposed strategy provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Having a supply of land which creates choice and competition in the market provides flexibility to respond to changing circumstances. Employment allocations are specifically allocated for employment purposes. Draft Policy SP13 indicates that allocated employment land will be protected for employment generating uses and alternative uses will only be supported in specific circumstances, as documented within the draft Policy.	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0606	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan.</p> <p>Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment.</p> <p>Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458.</p> <p>Why would SMEs and high paid workers wish to be located in Bridgnorth due to poor road link and slow access to the motorway network.</p> <p>The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.</p>
A0606	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP25 specifies development can only occur where there is sufficient infrastructure capacity available or where the development funds necessary improvements to infrastructure through a suitable developer contribution. What contributions are required of BRD030 and if there is a shortfall will Shropshire Council meet the difference?</p> <p>Draft Policy DP27 recognises businesses and communities require quality broadband provision/mobile network connectivity and also states development proposals will be expected to provide infrastructure for broadband and mobile communications as essential utilities. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters?</p> <p>Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>
A0606	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 and S3 (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and if so why has it not been published?</p> <p>Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated.</p> <p>There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth?</p> <p>BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.</p>
A0609	B028	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Bridgnorth	Not Specified	No	Not Specified	<p>Fully support the proposed level of housing growth attributed to Bridgnorth, which will help address the affordability issues within the town and will help to boost economic growth. This part of draft Policy S3.1 is considered sound.</p> <p>With regard to the level of employment land proposed, we have previously raised concerns about evidence to demonstrate how this had been calculated. Acknowledge the Council now have an Economic Development Needs Assessment (EDNA). The EDNA identifies a need for between 162ha and 264ha of gross employment land between 2016 and 2038 (allowing for the 30ha contribution to cross-boundary employment needs arising in the Black Country). This is compared with the planned 300ha of employment land proposed to be delivered through the Local Plan Review. Do not object to the identification of a figure for the whole of Shropshire above the identified need, noting the need for some flexibility and the economic growth opportunities that exist. However, do have concerns regarding the proposed Green Belt release at Stanmore and the impact this could have on the deliverability of other sites within Bridgnorth.</p> <p>Fully support and endorse Part 3 of draft Policy S3.1 which confirms a mixed use sustainable urban extension at Tasley will contribute to the residential and employment needs of Bridgnorth. Consider identification of Tasley as the main location to support the residential and employment development requirements for Bridgnorth to be an appropriate strategy and is supported by a robust and very detailed evidence base. As noted within para 72 of the National Planning Policy Framework (NPPF), the supply of large numbers of new homes can be best achieved through the planning for larger scale development such as new settlements or significant extensions.</p> <p>With regard to Part 7 of draft Policy S3.1, consider the planned local centre should be designated as a centre within the retail hierarchy of draft Policy DP9, to assist its delivery and protect it from the impact of any out of centre developments. The local centre will be a central point for the new development and will serve the needs of local people. As per Chapter 7 of the NPPF and in particular para 85, planning policies should define a network and hierarchy of centres and promote their long term vitality and viability.</p> <p>Part 8 of draft Policy S3.1 deals with the area identified as a 'Potential Direction of Growth'. Support identification of this broad area for potential future growth and consider it necessary in order to demonstrate that the Green Belt boundary, to the east of Bridgnorth, would endure well beyond the proposed Plan period. Suggest some alterations to the wording of this part of the draft Policy to allow for some flexibility in the delivery of the Tasley Garden Village site (BRD030) to allow (where necessary) for infrastructure and open space to be provided within this area and to take into account any necessary minor amendments to the boundary of BRD030 as the Masterplan evolves through preparation of the Supplementary Planning Document (SPD). This will ensure the proposed planning and design of BRD030 is not artificially hampered by the proposed site boundary and ensure the policy is effective in delivering a high quality development informed by the future SPD. This is important given that the current boundary of BRD030 is defined by the early masterplanning work carried out by the site promoter.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0606	B011	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth
A0606	B012	<p>Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030.</p> <p>Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision.</p> <p>Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators."</p> <p>Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.</p>	No	S3.1 Bridgnorth
A0606	B013	<p>Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional.</p> <p>Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat.</p> <p>Explain the measures to be taken to improve air quality in Bridgnorth.</p> <p>Explain how noise and odour will be mitigated.</p> <p>Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.</p>	No	S3.1 Bridgnorth
A0609	B028	<p>Remove proposed allocations STC002 and P58a.</p> <p>The proposed local centre within the proposed urban extension BRD030 should be included within the retail hierarchy as identified within draft Policy DP9.</p> <p>Para 8 of draft Policy SP3.1 should be amended to allow development within the identified Potential Future Direction of Growth where it would provide open space or infrastructure provision to support the development of BRD030 or in accordance with other policies in the plan.</p>	<p>Noted. Shropshire Council has undertaken an Economic Development Needs Assessment, Employment Land Review, Green Belt Assessment and Green Belt Review to inform the Local Plan Review. The Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Specifically with regard to employment land, this proposed strategy provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Having a supply of land which creates choice and competition in the market provides flexibility to respond to changing circumstances.</p> <p>With regard to sites STC002 and P58a, they are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page.</p> <p>With regard to the retail hierarchy, if the Local Centre at BRD030 is under 300sqm then no RIA will be required. Locally the issue of protecting Bridgnorth Town Centre is important and the current approach is consistent with how the Retail Hierarchy has been applied to Local Centres as part of Sustainable Urban Extensions within the SAMDev Plan.</p> <p>With regard to the future direction for growth, it is acknowledged that initial masterplanning indicates that the linear park referenced within the draft site guidelines for proposed allocation BRD030 extends onto this area. However it is considered that this and any other open space and infrastructure considerations would be best addressed as part of the development of the proposed Supplementary Planning Document for the site and ultimately the Planning Application processes.</p>	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0619	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	No	Not Specified	Not Specified	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth.</p> <p>Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>
A0642	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Bridgnorth is identified as the second largest Principal Centre, would challenge this as there are other towns at least the same size as Bridgnorth which should share the burden of the proposed housing increase.</p> <p>The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030).</p> <p>At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '.. will make provision for the needs of the town and surrounding hinterland...'? In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?</p>
A0642	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>The Town and Country Planning Association (TCPA) has produced a number of principles for the development of Garden Villages. The three main principles are reference in the development statement prepared by the promoters of BRD030 but there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.</p> <p>Challenge claim BRD030 is a garden village (it is not planned by the local planning authority or in consultation with the local community but rather by a developer) and does not comply with TCPA or MHCLG definition of a garden village. This term is being used to disguise the proposal for a very large housing estate. It is totally inappropriate, not needed, not supported locally and will damage the character of the town and surroundings.</p> <p>The size and location of BRD030 is more akin to a large suburban development on the outskirts of a market town rather than the "sustainable urban extension" stated in the Local Plan.</p>
A0642	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth.</p> <p>However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?</p> <p>Seems the promoter of BRD030 is using this as a means to hop the bypass and achieve housing that is totally disproportionate, undesirable and detrimental.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0619	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.	No	S3.1 Bridgnorth
A0642	B002	Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years). Provide evidence that Bridgnorth can sustain a 35% population increase, particularly with regard to highway capacity.	Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development. There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.	No	S3.1 Bridgnorth
A0642	B003	The development statement prepared by the promoters of BRD030 reference the three main principles for development of garden villages identified by the TCPA, however there is no indication of how they will be achieved. Shropshire Council should require and monitor compliance with them.	Noted. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This included consideration of highway and accessibility informed by comments from highway officers. Proposed site guidelines for BRD030 provide a framework for any future development of the site. They include that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."	No	S3.1 Bridgnorth
A0642	B004	What areas / units are already available for occupation and how long have they been vacant? What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19. If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used? What consideration has been given to work patterns/demographics following Covid 19, which will impact on demand for housing/commercial premises/other aspects of life?	Noted. Shropshire Council has undertaken an Economic Development Needs Assessment and Employment Land Review to inform the Local Plan Review. The Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Specifically with regard to employment land, this proposed strategy provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Having a supply of land which creates choice and competition in the market provides flexibility to respond to changing circumstances. Employment allocations are specifically allocated for employment purposes. Draft Policy SP13 indicates that allocated employment land will be protected for employment generating uses and alternative uses will only be supported in specific circumstances, as documented within the draft Policy.	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0642	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site.</p> <p>Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not compatible with one another re poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18.</p> <p>It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated?</p> <p>BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.</p> <p>No consideration appears to have been given to ground contamination caused by animal waste and run-off from market activities.</p>
A0642	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan.</p> <p>Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Roads area also difficult during busy times in the agricultural calendar (due to agricultural nature of the area), this can cause congestion, frustration (and associated accidents), increasing vehicles will exacerbate these issues.</p> <p>Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458.</p> <p>Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network.</p> <p>The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458, it will also remain a long walk (particularly for parents with children). Clarification required on feasibility of this or alternative means of achieving safe crossing points.</p>
A0642	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP25 specifies development can only occur where there is sufficient infrastructure capacity available or where the development funds necessary improvements to infrastructure through a suitable developer contribution. What contributions are required of BRD030 and if there is a shortfall will Shropshire Council meet the difference?</p> <p>Draft Policy DP27 recognises businesses and communities require quality broadband provision/mobile network connectivity and also states development proposals will be expected to provide infrastructure for broadband and mobile communications as essential utilities. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters?</p> <p>Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?</p>
A0642	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 and S3 (BRD030)	Not Specified	No	Not Specified	<p>Draft Policy DP17 requires landscape and visual sensitivity assessments for sensitive sites. Has such an assessment been undertaken for BRD030 and is so why has it not been published?</p> <p>Draft Policy DP18 addresses issues such as agricultural land, noise and odour. BRD030 is classified as grade 3 agricultural land, why is it proposed for development (food production in the UK is already under threat). BRD030 is close to and may generate noise, has a noise assessment been undertaken (if so why has it not been published), and this issue mitigated. BRD030 is also close to sources of odour, how will this be mitigated.</p> <p>There is an Air Quality Management Area (AQMA's) in Bridgnorth, which the draft Shropshire Local Plan states will be considered when assessing development proposals. Given the capacity of BRD030 and associated vehicle movements, what measures will be taken to improve the air quality in and around Bridgnorth?</p> <p>BRD030 is also within the impact risk zone for four SSSI's and contains environmental networks. Why is the site proposed for allocation, knowing the ecological damage development would cause and what safeguards for these are proposed.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0642	B005	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p> <p>Ground contamination should be assessed.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth
A0642	B006	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth
A0642	B007	<p>Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030.</p> <p>Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision.</p> <p>Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators."</p> <p>Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.</p>	No	S3.1 Bridgnorth
A0642	B008	<p>Prepare/publish a landscape and visual sensitivity assessment and noise assessment for BRD030, undertaken by a suitable professional.</p> <p>Explain why BRD030 should be allocated on grade 3 agricultural land at a time when food production in the UK is under threat (what assessment of implications of Brexit on imported foods and possible demand for food produced in the UK have been undertaken?).</p> <p>Explain the measures to be taken to improve air quality in Bridgnorth.</p> <p>Explain how noise and odour will be mitigated.</p> <p>Justify inclusion of BRD030 given known ecological damage it will cause and explain what measures will be put in place to safeguard SSSIs and environmental networks?</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal.</p> <p>Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.</p>	No	S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0645	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy DP18 states development should avoid best and most versatile agricultural land (BMV land), wherever possible. The National Planning Policy Framework (NPPF) also seeks to protect and enhance soils and recognise the economic and other benefits of BMV land. STC002 and P58a have not been subject to detailed agricultural land classification (ALC) surveys, so there is no definitive information on presence of BMV land, as required for decision making. The only ALC survey is the Natural England Regional Map, which indicates the sites are grades 2/3, but this is small scale and not suitable for identifying grading at site level and does not distinguish between grades 3a and 3b - vital for identifying BMV land. Natural England has also produced regional maps showing probability of BMV land, which shows STC002 and P58a have a moderate (20-60%) to high (>60% of the area) likelihood of BMV land. A post 1988 ALC survey on similar land near Barnsley shows an ALC ranging from 2 and 3a to 3b. As such, there is a high probability of BMV land, which should be given due consideration in planning decisions. Recent Covid 19 crisis highlighted need for food security and the climate crisis requires action to reduce carbon emissions - growing more food locally is necessary to address this. However, food self-sufficiency is declining in the UK (64% in 2019 compared to 78% in 1984) and currently only 58% of vegetables and 16% of fruit consumed in the UK are grown here. As such, inappropriate and not sustainable for BMV land to be permanently lost from production.
A0645	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 (BRD030)	Not Specified	No	Not Specified	Draft Policy DP18 states development should avoid best and most versatile agricultural land (BMV land), wherever possible. The National Planning Policy Framework (NPPF) also seeks to protect and enhance soils and recognise the economic and other benefits of BMV land. BRD030 has not been subject to detailed agricultural land classification (ALC) surveys, so there is no definitive information on presence of BMV land, as required for decision making. The only ALC survey is the Natural England Regional Map, which indicates the site is grade 3, but this is small-scale and does not distinguish between grades 3a and 3b - vital for identifying BMV land. Natural England has also produced regional maps showing probability of BMV land, which shows BRD030 has a high (>60% of the area) likelihood of BMV land. A post 1988 ALC survey on similar land to the west of BRD030 shows Grade 3a. As such, there is a high probability of BMV land, which should be given due consideration in planning decisions and retained for agricultural use wherever possible. Recent Covid 19 crisis highlighted need for food security and the climate crisis requires action to reduce carbon emissions - growing more food locally is necessary to address this. However, food self-sufficiency is declining in the UK (64% in 2019 compared to 78% in 1984) and currently only 58% of vegetables and 16% of fruit consumed in the UK are grown here. As such, inappropriate and not sustainable for BMV land to be permanently lost from production.
A0654	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13, DP25, DP27, DP28 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	Draft Policy DP25 addresses infrastructure. What contributions are required of BRD030 to ensure sufficient infrastructure is available and if there is a shortfall will Shropshire Council meet the difference? Draft Policy DP27 relates to provision of high quality broadband provision/mobile network connectivity within development. How will this be achieved for Bridgnorth/Shropshire and what guarantees do potential employers have on these matters? Draft Policy DP28 relates to communications and transport. The Local Transport Plan 2011-2026 notes provision of a comprehensive bus service in Shropshire is challenging and most local bus services rely on financial support from the Council. With regard to BRD030, where will 'parking facilities' and 'dedicated park and ride service' be located, how will public transport services be funded and how does this integrate into development north of the A458?
A0654	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Roads area also difficult during busy times in the agricultural calendar (due to agricultural nature of the area), this can cause congestion, frustration (and associated accidents), increasing vehicles will exacerbate these issues. Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458. Why would SMEs and high paid workers wish to be located in Bridgnorth due to poor road link and slow access to the motorway network. The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458, it will also remain a long walk (particularly for parents with children). Clarification required on feasibility of this or alternative means of achieving safe crossing points.
A0654	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable? Seems the promoter of BRD030 is using this as a means to hop the bypass and achieve housing that is totally disproportionate, undesirable and detrimental.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0645	B001	Undertake a detailed Agricultural Land Classification survey (with auger borings at an intensity of a least 1/ha allowing areas of 'Best and Most Versatile' land to be identified with confidence) for sites STC002 and P58a. Results of this survey should be taken into account in development proposals to "avoid Shropshire's Best and Most Versatile Agricultural Land (grades 1, 2 and 3a) wherever possible" as stated in draft Policy DP18. Where grade 3b or poorer quality land is present, these areas should be developed in preference to BMV land.	Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It identifying proposed allocations, a proportionate and robust site assessment process has been undertaken, including consideration of agricultural land quality (where a precautionary approach has taken place).	No	S3.1 Bridgnorth
A0645	B002	Undertaken a detailed Agricultural Land Classification survey (with auger borings at an intensity of a least 1/ha allowing areas of 'Best and Most Versatile' land to be identified with confidence) for site BRD030. Results of this survey should be taken into account in development proposals to "avoid Shropshire's Best and Most Versatile Agricultural Land (grades 1, 2 and 3a) wherever possible" as stated in draft Policy DP18.	Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It identifying proposed allocations, a proportionate and robust site assessment process has been undertaken, including consideration of agricultural land quality (where a precautionary approach has taken place).	No	S3.1 Bridgnorth
A0654	B001	Identify 'developer contributions' and any Shropshire Council funding for infrastructure required from BRD030. Identify plans for broadband provision in Shropshire/Bridgnorth and explain how new businesses in Bridgnorth will get appropriate broadband provision. Identify where 'parking facilities' and a 'dedicated park and ride service' will be located on BRD030, how it will integrate with development north of the A458 and how it will be funded.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policies DP25, DP27 and DP28, unless material considerations indicate otherwise. This is consistent with any development proposal. Furthermore, draft site guidelines for BRD030 identify a number of infrastructure requirements/assessments required to identify infrastructure requirements associated with any potential development of BRD030. Specifically with regard to parking/public transport, draft site guidelines for BRD030 include: "Appropriate public transport links will be provided to the site, this provision will be linked to parking facilities on the site to support wider use. The potential to operate a dedicated park and ride service from this facility will be investigated in partnership with appropriate local community groups and bus operators." Any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The Planning Application process allows for a more detailed consideration of infrastructure requirements and will establish the most appropriate mechanisms for their delivery.	No	S3.1 Bridgnorth
A0654	B002	What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur. Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458. Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.	No	S3.1 Bridgnorth
A0654	B003	What areas / units are already available for occupation and how long have they been vacant? What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19. If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used? What consideration has been given to work patterns/demographics following Covid 19, which will impact on demand for housing/commercial premises/other aspects of life?	Noted. Shropshire Council has undertaken an Economic Development Needs Assessment and Employment Land Review to inform the Local Plan Review. The Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Specifically with regard to employment land, this proposed strategy provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Having a supply of land which creates choice and competition in the market provides flexibility to respond to changing circumstances. Employment allocations are specifically allocated for employment purposes. Draft Policy SP13 indicates that allocated employment land will be protected for employment generating uses and alternative uses will only be supported in specific circumstances, as documented within the draft Policy.	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0654	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site.</p> <p>Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not compatible with one another re poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18.</p> <p>It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated?</p> <p>BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.</p> <p>No consideration appears to have been given to ground contamination caused by animal waste and run-off from market activities.</p>
A0654	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area (BRD030)	Not Specified	No	Not Specified	<p>Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ.</p> <p>It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored.</p> <p>A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.</p>
A0654	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S3. Bridgnorth (BRD030)	Not Specified	No	Not Specified	<p>Bridgnorth is identified as the second largest Principal Centre, would challenge this as there are other towns at least the same size as Bridgnorth which should share the burden of the proposed housing increase.</p> <p>The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030).</p> <p>At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '.. will make provision for the needs of the town and surrounding hinterland...'?</p> <p>In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0654	B004	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p> <p>Ground contamination should be assessed.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth
A0654	B005	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth
A0654	B006	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase, particularly with regard to highway capacity.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0661	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	No	No	<p>Concerned about how Shropshire Council changed their position regarding preferred allocations for Bridgnorth (from Stanmore Garden Village to BRD030).</p> <p>-Have deep concerns regarding scale of the proposed allocation Tasley Garden Village (BRD030). New housing developments in the Bridgnorth area need to be of a volume compatible with and sensitive to the historic town and both current and future residents. BRD030 is simply too big to be absorbed into a historic town the size of Bridgnorth, it is wholly inappropriate for the area and the environment, its location is problematic (wrong side of the A458 Bridgnorth bypass), uses proposed on BRD030 conflict with the proposed Industrial Poultry Unit (which the majority of residents oppose), there is a substantive lack of credible evidence justifying BRD030 'preferred site' status, and key assessments including assessments of 'reasonable alternatives' such as those proposed in the community-led Bridgnorth Plan are missing.</p> <p>-Consider preference for a single Garden Village, in keeping with the high growth strategy, is inappropriate and unsustainable for Bridgnorth and a split site approach would achieve sustainable growth with less environmental impact. Question whether only a garden village can deliver necessary infrastructure and amenities, policies could require funding to upgrade required amenities in central locations, retaining the integrity of Bridgnorth's town centre. Impact on infrastructure will always be significant but would be reduced if the approach in the community-led 2020 Bridgnorth Plan was applied - National Government wants decisions at the lowest level possible and has introduced the Neighbourhood Plans which, once in force, should inform decisions (Shropshire Council has embraced other Community Led Plans as material considerations).</p> <p>-Highway infrastructure in and around Bridgnorth is already showing signs of capacity constraints before existing/proposed allocations. It will need substantial improvements to accommodate traffic from these developments, but no Highways Assessment has been carried out.</p> <p>-Other infrastructure and amenities (such as schools, medical centre, shops, leisure areas and social housing) should be provided as needed not 9 years into the development as proposed by the promoters of BRD030.</p> <p>-Housing development should be initiated by need, not cash generation. Development needs to be viable but policies needs to ensure it is sustainable, sensitive to the local environment and ecology, and provides necessary infrastructure.</p> <p>-16ha of employment land is proposed on BRD030 (and a further 6.3ha on the current SAMDev Plan allocation), but there are only a few major employers (&gt;100 employees) in the town and no major employers have relocated to the town in the last 20 years, due to transport links compared with other nearby settlements likes Wolverhampton, Telford and Shrewsbury. Also unclear how many jobs will be provided on this site or how many economically active will live on the wider site.</p> <p>-No local housing need assessment or detailed infrastructure plan been carried out.</p> <p>-BRD030 agricultural land classification is based on the general agricultural land classification map, but consider likely graded at least 3a. A detailed agricultural land assessment should be undertaken for the site, which would likely demonstrate its high quality meaning it should be reserved for arable agricultural use on the grounds of sustainability and food security.</p> <p>-The SAMDev Plan proposed the relocation of the livestock market due to conflict with housing. BRD030 would result in housing in proximity of the site for the relocation of the livestock market.</p> <p>-BRD030 encompasses the site for a proposed Industrial Poultry Unit planning application (ref: 17/01033/EIA, which was previous granted and the decision quashed at the court of appeal), this will expel obnoxious odours and toxic dust containing hazardous PM2.5 and PM10 particulates untreated into the atmosphere. Prevailing winds will disperse this pollution for kilometres over Bridgnorth Town and surrounding communities. No one would want to live near this facility, as such BRD030 is unviable.</p>
A0678	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1	No	No	No	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth.</p> <p>Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth.</p> <p>Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0661	B002	<p>1. Adopt the community-led Bridgnorth Plan into the draft Shropshire Local Plan in lieu of unilaterally imposing a Garden Village model in the Bridgnorth area.</p> <p>2. Provide all the information requested by Bridgnorth Plan Steering Group in its Regulation 19 submissions.</p> <p>3. Fully engage with the community.</p> <p>4. Provide informative guidance on the draft Shropshire Local Plan, with a variety of realistic examples, to enable people to make an informed response to it.</p> <p>5. Improve usability of the Consultation Forms, and extend the Regulation 18 Form to allow space for ideas, opinions, and suggestions not necessarily tied to an existing policy/site/map in the SLP.</p> <p>6. Extend the consultation response summary for the last Regulation 18 consultation to include details of changes resulting from responses received during a consultation, and improve its usability by using a larger font size.</p> <p>7. Do not take on Black Country (ABCA) housing needs. All areas, including Shropshire should look first toward utilising empty office space instead.</p> <p>8. Remove or reduce Shropshire Councils policy of uplifting central government's housing requirement by 19%.</p> <p>9. If a Garden Village is required a realistic position could be the Charlton / Overly areas to the East of Shrewsbury as there are direct and excellent road links (A5) to Shrewsbury and the M54 to Telford and beyond to the West Midlands. The railway line is very close, and a new park and ride railway station would bring easy access to Shrewsbury, Telford and the West Midlands.</p>	<p>Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying this proposed development strategy consideration of the characteristics, constraints and opportunities associated with Bridgnorth and its surrounding area has been undertaken.</p> <p>Proposed site allocations have been informed by a comprehensive site assessment process, which included consideration of all promoted sites. This assessment considered factors such as highways, ecology, heritage, agricultural land quality, flood risk and water quality and public protection.</p> <p>The draft Shropshire Local Plan should be read as a whole. Draft Policy DP25 states development can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to infrastructure provision (including highway infrastructure). A draft site guideline proposed for proposal allocation BRD030 also relates to the potential intensive poultry units currently subject to a Planning Application within the extent of the BRD030 site promotion.</p> <p>The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans.</p> <p>Please also refer to the response to A0661-B001.</p>	No	S3.1 Bridgnorth
A0678	B004	<p>Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan.</p> <p>There is no requirement for an alternative site to be identified.</p>	<p>Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p>	No	S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0678	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3	No	No	No	<p>The plan is not effective as there is no evidence that it is deliverable over the plan period - particularly in relation to the planned level of development in the Bridgnorth area. The level of residential development proposed in Bridgnorth far exceeds previous delivery rates. Proposals equate to 92 dwellings per annum as at 31st March 2019 (and there has been little delivery since then, meaning the actual rate required now is higher), whereas the average for the 10-year period to 2016 was some 72.8 dwellings per annum. This means proposals are at least 26% higher than past delivery rate. There is also no evidence that there is market capacity in Bridgnorth to sustainably absorb this level of development, particularly in competition with other settlements.</p> <p>The level of employment development proposed is unclear. Policy S3.1 states 49ha will be made available to "create choice and competition in the market" (this includes 13.3ha net developable on existing allocations, part of which is for the relocation of the livestock market, 11.4ha in the Green Belt adjoining Stanmore Industrial Estate and 16ha within the proposed Tasley Garden Village). However Schedule A6 gives a figure of 37.7ha as the employment land supply for Bridgnorth, this compromises 9.1% of the total supply for Shropshire. Whilst residential proposed consist of only 5.8% of the housing supply for Shropshire. The average completion rate for the 11-year period to 2017 was 0.6ha, the Shropshire Authority Monitoring Report (2017/18) states "It is anticipated that Bridgnorth and Shifnal could both perform stronger roles in the delivery of employment development to meet demands for economic growth arising in part from the rate of housing development in these settlements but this is currently constrained by the limited availability of land for employment development", however no evidence has been provided that Bridgnorth is an attractive location for new employment development and concerned whether this is realistic given weak connectivity.</p> <p>No infrastructure plan has been prepared and a strategic transport assessment for the Bridgnorth area has not yet been carried out/reported. Without these, it cannot be evidenced that local infrastructure is adequate or that necessary improvements can be made/funded through infrastructure contributions to support sustainable delivery of the development proposals.</p> <p>The Shropshire Viability Study suggests that the proposed allocation Tasley Garden Village (BRD030) and Stanmore Garden Village may be viable, however the study notes "the Council is still working up the assessment of the strategic infrastructure and mitigation requirements for these sites" and gives a "best estimate" of infrastructure contributions. As such, consider the evidential value of the Viability Study in supporting the deliverability of these sites is low in the absence of an infrastructure plan and (in particular) a strategic transport assessment for the Bridgnorth area.</p> <p>With regard to proposed employment allocations, the Shropshire Viability Study does not separately assess the viability of employment development at Stanmore or Tasley. In reality, the employment elements of the Tasley and Stanmore Garden Village schemes are part of mixed use allocations, whilst the proposed extension to Stanmore Industrial Estate capitalises on existing on-site infrastructure. The Shropshire Viability Study indicates Office and Industrial development is generally considered unviable and larger industrial development is only marginally viable on greenfield sites. Other forms of development appear to be viable on greenfield and brownfield sites, but these are not proposed on the new employment allocations.</p>
A0678	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Bridgnorth	No	No	No	<p>The draft Shropshire Local Plan has not been justified as an appropriate strategy. It has not been demonstrated that all reasonable alternatives have been considered, and sufficient, proportionate credible evidence has not been provided. Many strategic documents are missing or lacking credible evidence. We therefore consider the plan to be "not sound".</p> <p>No community meetings have occurred during the Regulation 19 and Regulation 18 consultation period.</p> <p>No evidence that representations made during Regulation 18 consultations have been considered.</p> <p>A reasonable alternative to the proposed approach has been presented during the Reg 18 stage of consultation, but no consideration or feedback on this proposal has been provided.</p> <p>Consider that for the Local Plan to be justified as an appropriate strategy, the following is required:</p> <ul style="list-style-type: none"> <li>-A Local Housing Need Assessment for Bridgnorth and justification for the level of housing proposed, without this a decision on the appropriateness of levels of development proposed cannot be reached.</li> <li>-Local Economic Assessment of the Bridgnorth Place Plan Area and justification for the level of employment proposed.</li> <li>-Evidence of the deliverability and viability of the employment land supply (the Shropshire Viability Study does not specifically consider this).</li> <li>-Evidence demonstrating how significant shortfalls in past delivery of jobs, housing and businesses will be addressed.</li> <li>-Justification of the proposed housing requirement (30,800 dwellings) for Shropshire, when the local housing need calculation is some 25,894 dwellings.</li> <li>-Evidence on provision of single occupancy dwellings (sub-national housing projections predict a significant proportion of growth is associated with such households).</li> <li>-Strategic Highway Assessment for Bridgnorth and explanation of how Bridgnorth can be part of the Strategic Transport Corridor.</li> <li>-Infrastructure Plan.</li> <li>-Evidence that sustainable growth, addressing Bridgnorth's low level of employment self-containment would result from planned housing and employment allocations (it is unclear whether past employment completions have kept pace with past housing completions). Existing housing allocations remain to be delivered and there remains a significant shortfall in employment delivery.</li> </ul>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0678	B006	<p>Provide evidence of deliverability of the scale of development proposed for Bridgnorth, this should include:</p> <ol style="list-style-type: none"> <li>1. Evidence of the market capacity to absorb the housing and employment development proposed, which significantly exceeds past rates.</li> <li>2. Evidence of the ability of local infrastructure across the Bridgnorth area (such as transport and movement) to support the scale of development and prepare an appropriate infrastructure investment plan, with sources of funding clearly identified.</li> <li>3. Provide a detailed statement of what infrastructure contributions are required from the proposed Garden Village.</li> <li>4. Re-visit viability calculations for the Garden Village developments, so they clearly include both housing and employment elements and provide a statement of what planning obligations would be expected to ensure delivery of employment alongside policy compliant housing.</li> </ol> <p>Or reduce the scale of development to nearer those historically established levels and review/identify infrastructure (including transport) required to support revised proposals.</p> <p>Identify the actual level of overall new employment development proposed for the Bridgnorth.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 Development Strategy: Bridgnorth Principal Centre provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p> <p>Draft Policy DP25 proposes a policy approach to the provision of infrastructure to ensure that the infrastructure necessary to support development is delivered. Furthermore, where appropriate, proposed site guidelines identify some of the key infrastructure requirements or identify some of the further studies which may need to be undertaken at the Planning Application stage to identify infrastructure requirements, to inform any development proposals for a site.</p> <p>As part of the Local Plan Review process, Shropshire Council has engaged with key infrastructure providers and prepared/considered evidence on infrastructure capacity and needs as appropriate to inform proposed policies, including development strategies for specific settlements, and proposed allocations.</p> <p>The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans.</p> <p>A Strategic Transport Assessment for Bridgnorth is being undertaken to inform infrastructure requirements in association with development proposals for the town, as recognised within the proposed development guidelines for site BRD030 (Tasley Garden Village).</p> <p>The Shropshire Viability Study is based on cautious assumptions regarding infrastructure requirements and contributions associated with potential development sites. However inevitably until the detailed Planning Application stage, the full infrastructure requirements and contributions for a potential development cannot be finalised, as not all necessary information will be available until this stage. Nevertheless, Shropshire Council considers the Shropshire Viability Study is a robust assessment of viability based on the information available at the strategic plan making stage.</p>	No	S3.1 Bridgnorth
A0678	B007	<p>Prepare proportionate and credible evidence to justify the proposed strategy and consider all available alternatives.</p> <p>Provide all evidence missing before seeking approval for submission of the draft Shropshire Local Plan.</p> <p>Modify the draft Shropshire Local Plan so that it is consistent with the 1st Edition of the Bridgnorth Plan (appendix to the representation).</p> <p>Reduce the scale of development around Bridgnorth to no more than 1,000 dwellings (including the existing SAMDev Plan allocations), do not identify a single site for development and repeat the Regulation 18 stage to ensure community involvement.</p> <p>Delete sites STC002 and P58a as they represent employment allocations in excess of that needed in Bridgnorth.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, reasons for proposing to exceed this need are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Shropshire Council also considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and national legislation. Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation. Responses.</p> <p>All views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan. A summary of responses to each 'Regulation 18' stage consultation is available on the Shropshire Council website and form appendices of the Consultation Statement prepared for the draft Shropshire Local Plan.</p> <p>Shropshire Council considers that a proportionate and robust evidence base has been prepared to inform the Local Plan Review. This includes such evidence as a Viability Study, Local Housing Need Assessment, Strategic Housing Market Assessment, Place Plans and Strategic Infrastructure Implementation Plan, Economic Development Needs Assessment and Employment Land Review.</p> <p>A Strategic Transport Assessment for Bridgnorth is being undertaken to inform infrastructure requirements in association with development proposals for the town, as recognised within the proposed development guidelines for site BRD030 (Tasley Garden Village).</p>	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0678	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	No	No	<p>The draft Shropshire Local Plan has not been positively prepared, and is therefore not sound, because:</p> <p>-An assessment of local housing need for the Bridgnorth Place Plan Area has not been undertaken. Without this, housing need for Bridgnorth cannot have been objectively assessed. The best assessment of housing need is that undertaken by Bridgnorth District Council in 2006. Extrapolating this to 2036, 15,168 dwellings are needed by 2036, compared with the 16,200 dwellings proposed by the version draft Local Plan at that time. This has been submitted to Shropshire Council in response to Regulation 18 consultation but no feedback has been provided.</p> <p>-'Statements of Common Ground' (SoCG), prepared under the Duty to Cooperate, have not been agreed with other Local Authorities. Paragraph 2.27 of the draft Shropshire Local Plan confirms that discussions have been held but that SoCG will only be available when the plan is submitted for Examination, as such they are not available for consideration as part of the Regulation 19 consultation.</p> <p>Such SoCG would include agreement on the housing needs of adjacent and other local authorities and the extent to which they anticipate not being able to meet them - we understand that not all the other local authorities have completed their own housing needs assessments.</p> <p>Shropshire Council is proposing to contribute 1,500 dwellings to meet the needs of the Association of Black Country Authorities (ABCA). However, we note that none of the members of ABCA are directly neighbouring authorities to Shropshire. It may be more appropriate for Telford and Wrekin Council to contribute to this need (still below the target population of 220,000 and has significant areas of employment land available, also understand they rejected a request from ABCA for support due to lack of evidence). Furthermore, we can find no evidence that any financial contribution has been agreed with these authorities to cover the additional infrastructure costs that will be needed to provide for the additional 1,500 dwellings. Again, without this information we consider that the Local Plan has not been positively prepared or objectively assessed.</p>
A0679	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1	No	No	No	<p>Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a.</p> <p>The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth.</p> <p>Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0678	B009	<p>Reduce the housing requirement for Shropshire by removing the allocation for the Association of Black Country Authorities (ABCA) under the Duty to Cooperate.</p> <p>Under the Duty to Co-operate approach Telford and Wrekin Council to assess if housing and employment need can be met more sustainably by them.</p> <p>Information already provided by Bridgnorth Plan Steering Group and Save Bridgnorth Green Belt, and others, should be taken into account during the plan-making process.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Responses to Local Plan Review consultations have been given due consideration. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	S3.1 Bridgnorth
A0679	B004	<p>Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan.</p> <p>There is no requirement for an alternative site to be identified.</p>	<p>Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p>	No	S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0679	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3	No	No	No	<p>The plan is not effective as there is no evidence that it is deliverable over the plan period - particularly in relation to the planned level of development in the Bridgnorth area. The level of residential development proposed in Bridgnorth far exceeds previous delivery rates. Proposals equate to 92 dwellings per annum as at 31st March 2019 (and there has been little delivery since then, meaning the actual rate required now is higher), whereas the average for the 10-year period to 2016 was some 72.8 dwellings per annum. This means proposals are at least 26% higher than past delivery rate. There is also no evidence that there is market capacity in Bridgnorth to sustainably absorb this level of development, particularly in competition with other settlements.</p> <p>The level of employment development proposed is unclear. Policy S3.1 states 49ha will be made available to "create choice and competition in the market" (this includes 13.3ha net developable on existing allocations, part of which is for the relocation of the livestock market, 11.4ha in the Green Belt adjoining Stanmore Industrial Estate and 16ha within the proposed Tasley Garden Village). However Schedule A6 gives a figure of 37.7ha as the employment land supply for Bridgnorth, this compromises 9.1% of the total supply for Shropshire. Whilst residential proposed consist of only 5.8% of the housing supply for Shropshire. The average completion rate for the 11-year period to 2017 was 0.6ha, the Shropshire Authority Monitoring Report (2017/18) states "It is anticipated that Bridgnorth and Shifnal could both perform stronger roles in the delivery of employment development to meet demands for economic growth arising in part from the rate of housing development in these settlements but this is currently constrained by the limited availability of land for employment development", however no evidence has been provided that Bridgnorth is an attractive location for new employment development and concerned whether this is realistic given weak connectivity.</p> <p>No infrastructure plan has been prepared and a strategic transport assessment for the Bridgnorth area has not yet been carried out/reported. Without these, it cannot be evidenced that local infrastructure is adequate or that necessary improvements can be made/funded through infrastructure contributions to support sustainable delivery of the development proposals.</p> <p>The Shropshire Viability Study suggests that the proposed allocation Tasley Garden Village (BRD030) and Stanmore Garden Village may be viable, however the study notes "the Council is still working up the assessment of the strategic infrastructure and mitigation requirements for these sites" and gives a "best estimate" of infrastructure contributions. As such, consider the evidential value of the Viability Study in supporting the deliverability of these sites is low in the absence of an infrastructure plan and (in particular) a strategic transport assessment for the Bridgnorth area.</p> <p>With regard to proposed employment allocations, the Shropshire Viability Study does not separately assess the viability of employment development at Stanmore or Tasley. In reality, the employment elements of the Tasley and Stanmore Garden Village schemes are part of mixed use allocations, whilst the proposed extension to Stanmore Industrial Estate capitalises on existing on-site infrastructure. The Shropshire Viability Study indicates Office and Industrial development is generally considered unviable and larger industrial development is only marginally viable on greenfield sites. Other forms of development appear to be viable on greenfield and brownfield sites, but these are not proposed on the new employment allocations.</p>
A0679	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Bridgnorth	No	No	No	<p>The draft Shropshire Local Plan has not been justified as an appropriate strategy. It has not been demonstrated that all reasonable alternatives have been considered, and sufficient, proportionate credible evidence has not been provided. Many strategic documents are missing or lacking credible evidence. We therefore consider the plan to be "not sound".</p> <p>No community meetings have occurred during the Regulation 19 and Regulation 18 consultation period.</p> <p>No evidence that representations made during Regulation 18 consultations have been considered.</p> <p>A reasonable alternative to the proposed approach has been presented during the Reg 18 stage of consultation, but no consideration or feedback on this proposal has been provided.</p> <p>Consider that for the Local Plan to be justified as an appropriate strategy, the following is required:</p> <ul style="list-style-type: none"> <li>-A Local Housing Need Assessment for Bridgnorth and justification for the level of housing proposed, without this a decision on the appropriateness of levels of development proposed cannot be reached.</li> <li>-Local Economic Assessment of the Bridgnorth Place Plan Area and justification for the level of employment proposed.</li> <li>-Evidence of the deliverability and viability of the employment land supply (the Shropshire Viability Study does not specifically consider this).</li> <li>-Evidence demonstrating how significant shortfalls in past delivery of jobs, housing and businesses will be addressed.</li> <li>-Justification of the proposed housing requirement (30,800 dwellings) for Shropshire, when the local housing need calculation is some 25,894 dwellings.</li> <li>-Evidence on provision of single occupancy dwellings (sub-national housing projections predict a significant proportion of growth is associated with such households).</li> <li>-Strategic Highway Assessment for Bridgnorth and explanation of how Bridgnorth can be part of the Strategic Transport Corridor.</li> <li>-Infrastructure Plan.</li> <li>-Evidence that sustainable growth, addressing Bridgnorth's low level of employment self-containment would result from planned housing and employment allocations (it is unclear whether past employment completions have kept pace with past housing completions). Existing housing allocations remain to be delivered and there remains a significant shortfall in employment delivery.</li> </ul>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0679	B006	<p>Provide evidence of deliverability of the scale of development proposed for Bridgnorth, this should include:</p> <ol style="list-style-type: none"> <li>1. Evidence of the market capacity to absorb the housing and employment development proposed, which significantly exceeds past rates.</li> <li>2. Evidence of the ability of local infrastructure across the Bridgnorth area (such as transport and movement) to support the scale of development and prepare an appropriate infrastructure investment plan, with sources of funding clearly identified.</li> <li>3. Provide a detailed statement of what infrastructure contributions are required from the proposed Garden Village.</li> <li>4. Re-visit viability calculations for the Garden Village developments, so they clearly include both housing and employment elements and provide a statement of what planning obligations would be expected to ensure delivery of employment alongside policy compliant housing.</li> </ol> <p>Or reduce the scale of development to nearer those historically established levels and review/identify infrastructure (including transport) required to support revised proposals.</p> <p>Identify the actual level of overall new employment development proposed for the Bridgnorth.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 Development Strategy: Bridgnorth Principal Centre provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p> <p>Draft Policy DP25 proposes a policy approach to the provision of infrastructure to ensure that the infrastructure necessary to support development is delivered. Furthermore, where appropriate, proposed site guidelines identify some of the key infrastructure requirements or identify some of the further studies which may need to be undertaken at the Planning Application stage to identify infrastructure requirements, to inform any development proposals for a site.</p> <p>As part of the Local Plan Review process, Shropshire Council has engaged with key infrastructure providers and prepared/considered evidence on infrastructure capacity and needs as appropriate to inform proposed policies, including development strategies for specific settlements, and proposed allocations.</p> <p>The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans.</p> <p>A Strategic Transport Assessment for Bridgnorth is being undertaken to inform infrastructure requirements in association with development proposals for the town, as recognised within the proposed development guidelines for site BRD030 (Tasley Garden Village).</p> <p>The Shropshire Viability Study is based on cautious assumptions regarding infrastructure requirements and contributions associated with potential development sites. However inevitably until the detailed Planning Application stage, the full infrastructure requirements and contributions for a potential development cannot be finalised, as not all necessary information will be available until this stage. Nevertheless, Shropshire Council considers the Shropshire Viability Study is a robust assessment of viability based on the information available at the strategic plan making stage.</p>	No	S3.1 Bridgnorth
A0679	B007	<p>Prepare proportionate and credible evidence to justify the proposed strategy and consider all available alternatives.</p> <p>Provide all evidence missing before seeking approval for submission of the draft Shropshire Local Plan.</p> <p>Modify the draft Shropshire Local Plan so that it is consistent with the 1st Edition of the Bridgnorth Plan (appendix to the representation).</p> <p>Reduce the scale of development around Bridgnorth to no more than 1,000 dwellings (including the existing SAMDev Plan allocations), do not identify a single site for development and repeat the Regulation 18 stage to ensure community involvement.</p> <p>Delete sites STC002 and P58a as they represent employment allocations in excess of that needed in Bridgnorth.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, reasons for proposing to exceed this need are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Shropshire Council also considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and national legislation. Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation. Responses.</p> <p>All views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan. A summary of responses to each 'Regulation 18' stage consultation is available on the Shropshire Council website and form appendices of the Consultation Statement prepared for the draft Shropshire Local Plan.</p> <p>Shropshire Council considers that a proportionate and robust evidence base has been prepared to inform the Local Plan Review. This includes such evidence as a Viability Study, Local Housing Need Assessment, Strategic Housing Market Assessment, Place Plans and Strategic Infrastructure Implementation Plan, Economic Development Needs Assessment and Employment Land Review.</p> <p>A Strategic Transport Assessment for Bridgnorth is being undertaken to inform infrastructure requirements in association with development proposals for the town, as recognised within the proposed development guidelines for site BRD030 (Tasley Garden Village).</p>	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0679	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	No	No	<p>The draft Shropshire Local Plan has not been positively prepared, and is therefore not sound, because:</p> <ul style="list-style-type: none"> <li>-An assessment of local housing need for the Bridgnorth Place Plan Area has not been undertaken. Without this, housing need for Bridgnorth cannot have been objectively assessed. The best assessment of housing need is that undertaken by Bridgnorth District Council in 2006. Extrapolating this to 2036, 15,168 dwellings are needed by 2036, compared with the 16,200 dwellings proposed by the version draft Local Plan at that time. This has been submitted to Shropshire Council in response to Regulation 18 consultation but no feedback has been provided.</li> <li>-'Statements of Common Ground' (SoCG), prepared under the Duty to Cooperate, have not been agreed with other Local Authorities. Paragraph 2.27 of the draft Shropshire Local Plan confirms that discussions have been held but that SoCG will only be available when the plan is submitted for Examination, as such they are not available for consideration as part of the Regulation 19 consultation.</li> </ul> <p>Such SoCG would include agreement on the housing needs of adjacent and other local authorities and the extent to which they anticipate not being able to meet them - we understand that not all the other local authorities have completed their own housing needs assessments.</p> <p>Shropshire Council is proposing to contribute 1,500 dwellings to meet the needs of the Association of Black Country Authorities (ABCA). However, we note that none of the members of ABCA are directly neighbouring authorities to Shropshire. It may be more appropriate for Telford and Wrekin Council to contribute to this need (still below the target population of 220,000 and has significant areas of employment land available, also understand they rejected a request from ABCA for support due to lack of evidence). Furthermore, we can find no evidence that any financial contribution has been agreed with these authorities to cover the additional infrastructure costs that will be needed to provide for the additional 1,500 dwellings. Again, without this information we consider that the Local Plan has not been positively prepared or objectively assessed.</p>
A0680	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1	Not Specified	Not Specified	Not Specified	<p>Oppose proposed allocation of Tasley Garden Village (BRD030) rather than Stanmore Garden Village, as:</p> <ol style="list-style-type: none"> <li>1. Existing SAMDev Plan allocations already provide 500 dwellings in Tasley and relocation of the livestock market south of Shrewsbury Road.</li> <li>2. All of Stanmore Garden Village is in the ownership/has agreement with a developer, as opposed to Tasley Garden Village.</li> <li>3. Inescapable that large numbers commute from Bridgnorth to Birmingham/Black Country. New homes on the east of the town would aid in calming traffic in an already congested Bridgnorth.</li> <li>4. During previous consultation events, it was stated that development to the east of Bridgnorth was preferable to development to the west of Bridgnorth, due to repeated development in this location, which risked causing sprawl.</li> <li>5. Developers of Stanmore Garden Village have committed to a 0 carbon policy. Recognise this could be reciprocated at Tasley Garden Village but pertinent they have not yet.</li> <li>6. Concerned about potential conflict between housing on Tasley Garden Village and mineral deposits beneath Morville Heath.</li> <li>7. Consider approving a Plan without traffic survey work being completed would mean passing judgement without adequate information.</li> <li>8. Cannot ignore opposition from all the levels of local democracy: parish/town/unitary/parliamentary.</li> </ol> <p>Consider best means for providing housing is through release of Green Belt land at Stanmore Garden Village alongside saved SAMDev Plan allocations at Tasley (provides housing and allows for the relocation of the cattle market).</p>
A0681	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1	Not Specified	Not Specified	Not Specified	<p>Oppose proposed allocation of Tasley Garden Village (BRD030) rather than Stanmore Garden Village, as:</p> <ol style="list-style-type: none"> <li>1. 1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0235	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2, S3 & BRD030	Not Specified	No	Not Specified	Do not agree with development strategy for Bridgnorth. Question justification for Bridgnorth being second largest Principal centre as other towns at least same size which should be considered to share burden of significant housing increase. Taking into account land allocated for development, land earmarked post 2038 and existing SAMDev allocation there would be a total of 2250 dwellings built in Tasley resulting in some 4,500 new residents (conservative estimate) & a population increase of 35% to the population of Bridgnorth. No clear explanation provided for proposed dwelling numbers and how they will make provision for needs of town & surrounding hinterland. No local needs housing assessment has been carried out for Bridgnorth and no evidence that increase needed to meet need or that town can support proposed population increase. Explanation of rationale for housing numbers should be provided as part of consultation process.
A0235	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12, S3 & BRD030	Not Specified	No	Not Specified	Considering all allocations and approvals 29 ha, an extraordinary area, has been allocated to the Tasley area outside the Bridgnorth development boundary south of the A458. This is significantly larger than Stanmore Business Park (17ha) and constitutes a mechanism by developers to 'jump' the bypass and create huge housing estate that is disproportionate, undesirable & detrimental. Considering additional 11 ha Stanmore allocation – 40 ha total employment land earmarked for Bridgnorth. Question evidence for 40ha requirement & how predicted levels of employment growth are achievable given: Bridgnorth's poor infrastructure & accessibility; close proximity of Telford which has established industrial role and good transport connections; evidence of lack of demand for employment land ( only 10% of available land in Bridgnorth has been developed since 2000); current empty units with evidence needed of vacancy rates; impacts of Covid19 on businesses.
A0264	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Bridgnorth - STC002 / P58a	Yes	No	Yes	Stanmore and the proposed employment allocations STC002 and P58a at Stanmore are presented as being part of Bridgnorth town and to serve the needs of Bridgnorth. However the Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment, is located in open countryside and does not form a natural extension to Bridgnorth. Draft Policy S3.1 indicates Bridgnorth will deliver 1,800 houses and 49ha of employment land. However Appendix 6 indicates a total supply of 40.5ha for the Place Plan Area and only 37.7ha in Bridgnorth. Clearly there is a discrepancy in the figures, which seems to relate to proposals at Stanmore. These figures do not support proposed allocations STC002 and P58a. The draft Shropshire Local Plan does not explain why it is necessary to allocate 49ha of employment land in Bridgnorth. Draft Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.
A0033	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Bridgnorth BRD030	Not Specified	No	Not Specified	The Sustainability Appraisal (SA) for BRD030 is incorrect, as it omits a (-) for Criteria 15 (site wholly/partly classified as high landscape sensitivity for residential). If this minus is added, the site performs poorly within the SA. BRD030 is unsound and contravenes other proposed strategic policies as: -It is separated from the built form of Bridgnorth by the A458, to be sustainable pedestrian and cyclist links between them are essential, but there are no confirmed methods of providing them and it is considered impossible. -There is no information on how BRD030 can be integrated into the town and it is considered it would create a separate community. -Its development will substantially increase traffic volumes into Bridgnorth due to segregation by the A458, and through Bridgnorth Low Town due to commuters to Stanmore Business Park, Telford or Wolverhampton. -It is on a high point so widely visible, separated from Bridgnorth by the A458, would destroy approaches to Bridgnorth from Ludlow and represent a scar on the landscape. -It is in proximity of a Conservation Area at Bridgwalton which is not recognised.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0235	B002	Commission local housing needs assessment for Bridgnorth and hinterland & other similar size towns & hinterlands to establish actual needs for each. Provide evidence that Bridgnorth's infrastructure is able to sustain the significant impact of the population increase that would result.	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth
A0235	B003	SC needs to provide following information for discussion: details of vacancies, locations, time unoccupied etc; evidence that employment growth is achievable, including consideration of Covid 19; evidence to substantiate requirement for additional 27ha in addition to that already allocated; where employment growth not achieved what will the alternative use of land/buildings be & what consideration has been given to uncertainties re changing workplace /employment demands/demographics following Covid 19 on demand for housing, commercial premises and other aspects of life?	<p>Noted. Shropshire Council has undertaken an Economic Development Needs Assessment and Employment Land Review to inform the Local Plan Review. The Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Specifically with regard to employment land, this proposed strategy provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Having a supply of land which creates choice and competition in the market provides flexibility to respond to changing circumstances.</p>	No	S3.1 Bridgnorth
A0264	B001	Sites STC002 and P58a allocated for employment development at Stanmore - should be deleted from the Plan. There is no requirement to identify an alternative site.	<p>Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p>	No	S3.1 Bridgnorth
A0033	B001	Amend the Sustainability Appraisal for BRD030. Remove BRD030 from the plan. Stanmore Garden Village represents a reasonable alternative to the development of this site.	<p>The landscape and visual sensitivity scoring within the Sustainability Appraisal (SA) is based on the Landscape and Visual Sensitivity Assessment undertaken to inform the Shropshire Local Plan Review.</p> <p>This Assessment concludes that the parcel which covers the majority of BRD030 has medium landscape and visual sensitivity to residential development and medium-high landscape and visual sensitivity to employment - a portion of the site was beyond the area assessed. As such it is correctly scored within both the residential and employment SA.</p> <p>Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations and proposed safeguarded land.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0070	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ. It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.
A0070	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 & S3: Bridgnorth	Not Specified	No	Not Specified	The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030). At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'? In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?
A0070	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 & S3: Bridgnorth	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0070	B001	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)
A0070	B002	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Having a supply of land which creates choice and competition in the market provides flexibility to respond to changing circumstances.</p> <p>Employment allocations are specifically allocated for employment purposes. Draft Policy SP13 indicates that allocated employment land will be protected for employment generating uses and alternative uses will only be supported in specific circumstances, as documented within the draft Policy.</p>	No	S3.1 Bridgnorth (BRD030)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0070	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site.</p> <p>Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each other regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18.</p> <p>It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated?</p> <p>BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.</p>
A0070	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan.</p> <p>Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment.</p> <p>Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458.</p> <p>Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network.</p> <p>The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.</p>
A0091	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>Only very limited community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place. It should be noted that the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ.</p> <p>It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored.</p> <p>A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0070	B005	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)
A0070	B006	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth (BRD030)
A0091	B002	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0091	B003	Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years). Provide evidence that Bridgnorth can sustain a 35% population increase.	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)
A0091	B005	What areas / units are already available for occupation and how long have they been vacant? What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19. If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?	<p>Noted. Shropshire Council has undertaken an Economic Development Needs Assessment and Employment Land Review to inform the Local Plan Review. The Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Specifically with regard to employment land, this proposed strategy provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Having a supply of land which creates choice and competition in the market provides flexibility to respond to changing circumstances.</p> <p>Employment allocations are specifically allocated for employment purposes. Draft Policy SP13 indicates that allocated employment land will be protected for employment generating uses and alternative uses will only be supported in specific circumstances, as documented within the draft Policy.</p>	No	S3.1 Bridgnorth (BRD030)
A0091	B006	Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing. Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences. Provide details of how noise and odour can be mitigated in these circumstances.	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0091	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan.</p> <p>Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment.</p> <p>Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458.</p> <p>Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network.</p> <p>The B4364 (Ludlow Road) is the only direct access to the small area of land the promoter has under option at Round thorn Farm. This is narrow and unsuitable as the main access for the vehicular, cycle and pedestrian traffic associated with development of this scale. To create a central refuge for turning vehicles and pavements, mature hedgerows would need to be removed.</p> <p>The alternative access onto the A458 is through proposed industrial use which is unsuitable and unviable.</p> <p>The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458 - clarification required on its feasibility. Alternative means of crossing have been deemed unacceptable by Highway Officers.</p>
A0092	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. It should be noted that the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ.</p> <p>It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored.</p> <p>A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.</p>
A0092	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030).</p> <p>At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '.. will make provision for the needs of the town and surrounding hinterland...'?.</p> <p>In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0091	B007	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth (BRD030)
A0092	B001	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)
A0092	B002	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0092	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 & S3: Bridgnorth	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?
A0092	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each another regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 (or at least parts of it) could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.
A0092	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458. Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network. The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458 - clarification required on its feasibility. Alternative means of crossing have been deemed unacceptable by Highway Officers.
A0093	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. It should be noted that the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ. It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. A0093	B005	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0093	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan.</p> <p>Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment.</p> <p>Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458.</p> <p>Why would SMEs and high paid workers wish to be located in Bridgnorth due to poor road link and slow access to the motorway network.</p> <p>The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they be given they do not own land fronting the A458 - clarification required on its feasibility. Alternative means of crossing have been deemed unacceptable by Highway Officers.</p>
A0098	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Tasley Garden Village	Not Specified	No	Not Specified	<p>Proposed allocation BRD030 (Tasley Garden Village) would surround the relocated livestock market on three sides, constricting its operation and threatening viability. This contradicts the requirement to keep the market away from housing and incompatible uses.</p> <p>BRD030 has the appearance of 'deep countryside' rather than 'urban fringe', is divorced from the town, has an open parkland feel and is in the foreground of the Shropshire Hills AONB. Its development would destroy this setting.</p> <p>Development of BRD030 would impact on four SSSIs, two listed buildings and encroach on Grade 1 listed Morville Hall.</p> <p>BRD030 is on the opposite side of Bridgnorth from major towns to the north and east (Telford, Wolverhampton and Stourbridge), so commuting and business traffic will increase congestion, noise and pollution in and around Bridgnorth.</p> <p>Proposals for a pedestrian/cycle footbridge over the A458 is undeliverable as the site promoter does not own the relevant land, so residents will need to walk across the A458.</p> <p>BRD030 is not currently served by a bus service and the closest bus stop is one mile away.</p> <p>Development will initially (first 10 years) be served off the B4364 (Ludlow Road), a narrow country lane wholly inadequate for this purpose.</p> <p>Site promoters proposals do not follow Garden Village Principles.</p> <p>The level of consultation undertaken by the site promoter and subsequently Shropshire Council is minimal.</p> <p>Local Town and Parish Councils prefer an alternative site - Stanmore Garden Village.</p>
A0112	BTLU	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3	Not Specified	No	Not Specified	<p>Many reasons why proposals for large-scale housing and industrial development, at BRD030, are unsound.</p> <p>Agree with the detailed objections made by Tasley Parish Council and Bridgnorth Town Council and specified individuals.</p> <p>Object to the misleading description of 'Tasley Garden Village', when development proposals are for a high-density housing estate and a large amount of industrial units. The principles for development of Garden Settlements, established by the Town and Country Planning Association, will undoubtedly be ignored/not enforced and proposals will be unsustainable.</p> <p>Shropshire Council has disregarded the large number of responses to Regulation 18 consultation and the views of Bridgnorth's community.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0093	B006	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth (BRD030)
A0098	B001	<p>Proposed allocation BRD030 (Tasley Garden Village) should be removed from the draft Shropshire Local Plan and the alternative site BRD032 (Stanmore Garde Village) included.</p>	<p>Noted. In identifying proposed site allocations a proportionate and robust site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth.</p> <p>Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Shropshire Council also considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	S3.1 Bridgnorth (BRD030)
A0112	BTLU	<p>Remove any proposals for development (housing or employment) on BRD030, south of the A458.</p>	<p>Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Proposed site guidelines for BRD030 provide a framework for any future development of the site. They includes that "A comprehensive mixed-use sustainable urban extension. Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0114	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ. It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.
A0114	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 & S3: Bridgnorth	Not Specified	No	Not Specified	The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030). At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'? In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?
A0114	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 & S3: Bridgnorth	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0114	B001	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)
A0114	B002	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)
A0114	B004	<p>What areas / units are already available for occupation and how long have they been vacant?</p> <p>What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19.</p> <p>If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)

Why is development now proposed adjacent to the re-location site.</p> <p>Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each another regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18.</p> <p>It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated?</p> <p>BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0115	B002	Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years). Provide evidence that Bridgnorth can sustain a 35% population increase.	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)
A0115	B004	What areas / units are already available for occupation and how long have they been vacant? What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19. If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)
A0115	B005	Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing. Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences. Provide details of how noise and odour can be mitigated in these circumstances.	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0115	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan.</p> <p>Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment.</p> <p>Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458.</p> <p>Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network.</p> <p>The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.</p>
A0119	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ.</p> <p>It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored.</p> <p>A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.</p>
A0119	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030).</p> <p>At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'?</p> <p>In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0115	B006	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth (BRD030)
A0119	B001	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)
A0119	B002	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0119	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 & S3: Bridgnorth	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?
A0119	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each another regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.
A0119	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. A0120	B002	Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years). Provide evidence that Bridgnorth can sustain a 35% population increase.	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)
A0120	B004	What areas / units are already available for occupation and how long have they been vacant? What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19. If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)
A0120	B005	Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing. Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences. Provide details of how noise and odour can be mitigated in these circumstances.	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0120	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan.</p> <p>Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment.</p> <p>Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458.</p> <p>Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network.</p> <p>The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.</p>
A0151	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3	Not Specified	No	Not Specified	<p>Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ.</p> <p>It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored.</p> <p>A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.</p>
A0151	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 & S3	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030).</p> <p>At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'?</p> <p>In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0120	B006	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth (BRD030)
A0151	B001	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)
A0151	B002	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0151	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 & S3	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?
A0151	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each another regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.
A0151	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458. Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network. The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.
A0153	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ. It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.

A0153	B002	Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years). Provide evidence that Bridgnorth can sustain a 35% population increase.	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)
A0153	B004	What areas / units are already available for occupation and how long have they been vacant? What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19. If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)
A0153	B005	Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing. Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences. Provide details of how noise and odour can be mitigated in these circumstances.	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0153	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan.</p> <p>Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment.</p> <p>Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458.</p> <p>Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network.</p> <p>The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.</p>
A0226	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ.</p> <p>It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored.</p> <p>A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.</p>
A0226	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030).</p> <p>At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'?</p> <p>In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0153	B006	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth (BRD030)
A0226	B001	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)
A0226	B002	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0226	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 & S3: Bridgnorth	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?
A0226	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each another regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.
A0226	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458. Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network. The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.
A0235	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3 (BRD030)	Not Specified	No	Not Specified	Schedule S3.1(i) indicates that Tasley Garden Village (TGV) will meet Garden village principles. Evidence from 'Transport for New Homes – Garden Villages & Garden Towns: Reality & Vision' report confirms that the majority of such developments not successful because not appropriately located for sustainable travel & result in increased traffic. Considering definition & 3 key principles identified by the TCPA & existing true examples of garden villages – principles of garden village not met by TGV. In considering definition TGV not planned by the LPA in consultation with the local community but is wholly private developer led. Other important principles/requirements of garden villages highlighted by way of comparison to the proposal. Size & location of TGV that of unneeded, inappropriate, large 'bolted on' suburban type housing estate development to a market town, not a sustainable urban extension. Not supported by local people. Will cause irreparable damage to character of Bridgnorth and surrounding area. Does not meet CLG definition of Garden Village.

Development will comply with the principles of a 'garden village' identified within the Garden Communities Prospectus and the TCPA Garden City Standards guides or any updated equivalent guidelines, whilst also complementing Bridgnorth's character."</p>	No	S3.1 Bridgnorth (BRD030)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0235	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25, & S3 (BRD030)	Not Specified	No	Not Specified	<p>Road &amp; highways are fundamental to Local Plan decision making which needs robust up to date evidence. This was not available as the Transport Plan 2011-2016 is under current review and needs to be completed to inform Local Plan decisions.</p> <p>Existing A roads to surrounding larger towns are slow single carriageway. Poor road communications do not make it attractive for SME business set up. Bridgnorth is subject to significant topographical and landscape restraints and river crossing limitations which severely restrict development options and road improvement opportunities and impact on accessibility. Evidence from the Town Council &amp; Parish Council steering group planning for Bridgnorth identified in 2019 significant issues regarding the ability of local infrastructure, transport links and public services and facilities to support economic &amp; population growth without significant investment. Current Local Transport Plan confirms this view – sections 2.2 &amp; 4.6.3 illustrate.</p> <p>There are high levels of inward and outward commuting ( 60% Bridgnorth residents out &amp; similar number from outside in ) Proposed sites at Tasley separate residential development from main employment locations and , notwithstanding some employment provision, many will commute to better paid jobs elsewhere in the West Midlands where they may currently be resident. Current Local Transport Plan sections 2.3 &amp; 2.4 acknowledges commuting trend and increasing influence of Telford on Shropshire. No evidence for proposals encouraging highly paid workers to move to Bridgnorth.</p> <p>Estimate, conservatively that new developments at Tasley will increase vehicle movements through additional 2250 resident’s vehicles with additional commercial vehicle movements associated with employment at Tasley. Developers own transport review indicates that 75% of peak hour traffic from their site will travel east on A458 to Telford, Wolverhampton, Kidderminster and Stourbridge.</p> <p>Traffic increase despite long term lack of investment in roads &amp; public transport decline. Good communications necessary to support sustainable community but no strategic investment proposed. Increased traffic will impact on of environment &amp; quality of life as documented in section 2.7 Transport Plan to the detriment of attractiveness as location to attract workers &amp; businesses.</p> <p>Agricultural nature of locality generates traffic associated with this industry (with seasonal peaks) which will increase danger roads</p> <p>Footbridge essential to provide crossing of dangerous A458 but no certainty of delivery as developer does not have control of land needed.</p> <p>Site a long walk from town centre for parent with child.</p>
A0235	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP17, DP18 S3 & BRD030	Not Specified	No	Not Specified	<p>Response highlights requirements of parts 1 &amp; 2 of Policy DP17 (Landscape &amp; Visual Amenity) &amp; that Para 19 Appendix 2 to the 20th July 2020 Cabinet report stated that the garden village is located within an area of medium/medium- high landscape sensitivity. Parts 4, 7, 8 of DP18, paras 4.167, 4.171 of the pre-submission draft Plan in relation to the loss of agricultural land; potential noise, odour and air quality issues (AQMA) and ammonia/nitrate &amp; other ecological concerns ( including SSSI Impact Risk Zones, priority habitats and environmental network ) identified in paras 22, 23 &amp; 35 of Appendix 2; are also referenced.</p>
A0235	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3 BRD030	Not Specified	No	Not Specified	<p>Site residential allocation in contradiction with previous rationale for relocation of livestock market when previously stated in approving SAMDev Plan that livestock use incompatible with housing.</p> <p>Inconsistency between schedule S3.1 (1) which indicates that poultry units operating on the site will cease &amp; para 34, Appendix 2 of 20th July Cabinet report which indicates that planning permission for poultry units would not be implemented if site allocated. Additionally legal agreement to prevent residential development if poultry farm in operation, as referenced by officers at Regulation 18 Cabinet meeting, has not been made. Therefore, the Garden village residential development could proceed in vicinity of both livestock market &amp; poultry farm.</p> <p>Under DP18 intensive livestock units may require HRA.</p> <p>Para 35, Appendix 2 of 20th July Cabinet report references capacity for appropriate management of current and future noise and odour, including from road, relocated livestock market &amp; commercial uses, but no details of how this will be achieved ,what timescales are or consideration of animal waste/run off ground contamination or noise &amp; odour impacts of poultry units.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0235	B005	Clarify plans for road infrastructure improvements which are needed to support employment growth and reach stated targets. Clarification needed of how footbridge provision or alternative A458 crossing will be ensured, including necessary land purchase.	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458. Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.	No	S3.1 Bridgnorth (BRD030)
A0235	B006	Seek clarification as to: <ul style="list-style-type: none"> <li>•whether assessment of landscape and visual impacts by appropriately qualified professional has been carried out and published and if not why?</li> <li>•Why given, threat to local food production, grade 3 agricultural land being used for development &amp; what evidence of consideration given to likely increased demand for UK food production due to BREXIT?</li> <li>•whether noise assessment, particular in relation to additional vehicles on A458, by appropriately qualified specialist has been carried out and published and if not why?</li> <li>•What measures will be taken to improve Bridgnorth air quality in the light of increased vehicular movement?</li> <li>•How noise and odour can be successfully mitigated?</li> <li>•Justification for BRID010 in light of known ecological damage and what safeguarding measures can be put in place?</li> </ul>	Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, including those in DP17 and DP18, unless material considerations indicate otherwise. This is consistent with any development proposal. Proposed allocations within the draft Shropshire Local Plan have been informed by a proportionate and robust site assessment process. This considered issues such as landscape and visual sensitivity, agricultural land quality, noise/odour and air quality, and ecology. Proposed site guidelines for BRD030 provide a framework for any future development of BRD030, guidelines proposed address such issues as noise and odour, the requirement for and need to positively respond to local and strategic highway transport assessments and an air quality assessment and the need to safeguard and appropriately buffer natural environment assets on and around the site.	No	S3.1 Bridgnorth (BRD030)
A0235	B006	<ul style="list-style-type: none"> <li>•Provide explanation, given SAMDev rational for relocation of livestock market, why potential co-location of livestock use and residential use is now acceptable?</li> <li>•Clarify why any legal agreement relating to poultry units has not been made publicly available? If not in place how will poultry unit use be restricted once garden village development has started?</li> <li>•Provide full noise &amp; odour impact report &amp; details of mitigation.</li> <li>•Preparation of ground contamination study and impact report required</li> </ul>	Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection. Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity. Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market. Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0235	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3 BRD030	Not Specified	No	Not Specified	Community engagement has been limited compared to SCI requirements & was inadequate. Consultation on competing schemes at Tasley & Stanmore is not comparable. Unexpected late emergence of Tasley proposal and impact of Covid 19 relied on online consultation and prevented satisfactory engagement, involvement and consideration, including public debate in meetings and developer feedback. No account has been taken of large number of Reg 18 objections, including from elected bodies/ representatives, to Bridgnorth proposals and no feedback on reasons has been provided. Proposals do not take into account Draft Bridgnorth Steering Group Report published May 2020 which was prepared by Town and Parish Councils to consider settlement issues and develop plan for Bridgnorth.
A0321	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ. It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.
A0321	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 & S3: Bridgnorth	Not Specified	No	Not Specified	The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030). At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'? In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0235	B007	<ul style="list-style-type: none"> <li>•Explanation of why locally elected bodies and representatives have been ignored</li> <li>•Delay decision on legal compliance and soundness of the Local Plan until soundness issues raised are addressed and alternative options considered</li> </ul>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)
A0321	B001	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)
A0321	B002	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0321	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 & S3: Bridgnorth	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?
A0321	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458. Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network. The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.
A0321	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each another regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0321	B003	<p>What areas / units are already available for occupation and how long have they been vacant?</p> <p>What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19.</p> <p>If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)
A0321	B005	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth (BRD030)
A0321	B008	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. A0328	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	<p>Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ.</p> <p>It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored.</p> <p>A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.</p>
A0328	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 & S3: Bridgnorth	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030).</p> <p>At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'?</p> <p>In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0322	B004	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth (BRD030)
A0328	B001	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)
A0328	B002	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0328	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 & S3: Bridgnorth	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?
A0328	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each another regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.
A0328	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458. Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network. The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.
A0404	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ. It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0328	B003	<p>What areas / units are already available for occupation and how long have they been vacant?</p> <p>What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19.</p> <p>If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)
A0328	B007	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth (BRD030)
A0405	B001	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)
A0405	B002	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0405	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 & S3: Bridgnorth	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?
A0405	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each another regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.
A0405	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458. Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network. The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.
A0406	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ. It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.

Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)
