A0015	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	No	No	Work on the Local Plan should pause for a year to allow the effects of COVID-19 to calm down. More regard needed to Carbon emissions
A0036	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	General Comments	Not Specified	Not Specified	Not Specified	The draft Shropshire Local Plan is too long and difficult to decipher in parts. Some policies are too long, overly prescriptive and in some cases conflicting. The draft Shropshire Local Plan references supplementary documents, including ones containing criteria which development proposals would need to be assessed against. Ensure conformity with recent changes to planning legislation/regulations including the changes to the Use Classes Order.
A0049	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	Yes	No	Yes	The plan has little consideration of the recently declared climate emergency and fails to deliver a plan for the sustainable development needed for the people of Shropshire
A0074	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	Yes	Yes	Yes	n/a
A0075	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	Not Specified	Not Specified	Not Specified	This plan is looking at sustainability and development. The actions of Shropshire Council have left behind unfinished housing sites and misery in some areas. This should be addressed before any further mistakes and misery occurs.
A0101	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	Not Specified	Not Specified	Not Specified	<p>Significant principal centres located near to Wyre Forest District which have been allocated development are Bridgnorth with a proposed residential development guideline of some 1,800 dwellings and 49ha or employment land and Ludlow with a proposed residential development guideline of some 1,000 dwellings and 11ha of employment land. Proposed developments close to Wyre Forest District include that within the settlements of Cleobury Mortimer (200 dwellings and 2ha of employment land), Alveley (130 dwellings), Ditton Priors (65 dwellings), Highley (250 dwellings and 3ha employment land), Burford (190 dwellings), Clee Hill (75 dwellings) and Craven Arms (500 dwellings and 5ha employment land).</p> <p>By allocating the majority of development within the strategic and principal centres, the preferred sites document appears to be consistent with sustainable development as outlined in the revised NPPF. However, have serious concerns that future development will result in adverse pressure on existing infrastructure important to Wyre Forest District, such as traffic levels on the A442 from Bridgnorth to Kidderminster and additional pressure on the Dowles Road/Welch Gate Air Quality Management Area junction in Bewdley and Stourport- on- Severn. Transport modelling work must identify highway improvements that may be necessary as a result of future development.</p> <p>In particular, the proposed allocation of 250 dwellings within Highley could adversely affect congestion in Bewdley town centre, because access from Highley would be via Dowles Road which leads to the heavily used junction with Welch Gate (an air quality management area).</p> <p>The Cleobury Mortimer Neighbourhood Plan will have to support the delivery of strategic policies contained in the Local Plan Review, as outlined in the revised NPPF.</p> <p>Welcome further employment land allocations in the Local Plan Review. Employment proposals combined with the existing strong links between Wyre Forest and Shropshire (638 out commuting and 1,037 inflowing to Wyre Forest per day) may increase these in and out migration trends (particularly as property prices in Wyre Forest are significantly lower than Shropshire).</p> <p>Strongly support protection of Shropshire Green Belt as part of the wider West Midlands Green Belt. Particularly opposed to any development within parcels BA5 and BA6.</p>
A0102	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	Not Specified	Not Specified	Not Specified	Do not consider proposals raise any cross-boundary strategic issues.
A0123	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	General Comments	No	No	Yes	<p>Statistics underpinning the draft Shropshire Local Plan are pre-Covid 19 and assumptions underpinning it need to be re-evaluated.</p> <p>Concerned the draft Shropshire Local Plan as drafted is not fit for purpose. Furthermore, it ignores feedback from earlier consultations.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0015	B001	Pause Local Plan process until COVID-19 issues are calmer. Greater consideration of carbon emissions.	No action needed - Shropshire Council must continue to develop the Local Plan. Measures have been put in place, such as extensions to the consultation, to assist with the limitations that the pandemic has caused.	No	General Comments
A0036	B001	The plan (policies and supporting text) would benefit from being shortened, to ensure that it focusses on its key objectives and provides a positive framework to encourage future development. References to other supplementary documents should be removed or their information included in the Plan itself.	Noted. The draft Shropshire Local Plan is considered to provide a positive vision for the future of Shropshire; a framework for addressing housing needs and other economic, social and environmental priorities; and a platform for local people to shape their surroundings. The draft Shropshire Local Plan has been informed by effective and proportionate engagement, including use of digital tools. Draft policies are considered succinct, clearly written, complementary and effective. They are considered positive and aspirational but deliverable. They have been prepared with the objective of achieving sustainable development. They avoid unnecessary duplication and provide certainty to decision makers, communities and the development industry. Supplementary documents are proposed/referenced where considered appropriate to add further detail to the policies in the draft Shropshire Local Plan. This approach also avoids unnecessary duplication. References to outdated use classes to be amended (in Policy DP9).	Yes	General Comments
A0049	B001	I would suggest a paragraph in every section detailing how the proposed developments will be carbon neutral and have a net gain for biodiversity	Shropshire Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation and does not propose any changes.	No	General Comments
A0074	B001	n/a	Noted.	No	General Comments
A0075	B001	n/a	It is considered that the draft Shropshire Local Plan provides an appropriate vision and framework for the future development of Shropshire to 2038; addresses needs and opportunities in relation to housing, the local economy, community facilities and infrastructure; and seeks to safeguard the environment, enable adaptation to climate change and helps to secure high-quality and accessible design.	No	General Comments
A0101	B001	Confirm transport modelling is to be undertaken.	Noted. Draft Policy DP25 states that new development should only take place where there is sufficient existing infrastructure capacity available or any necessary improvements are funded through developer contributions or other means. This of course applies to all development proposals and forms of infrastructure, including highways. -The draft site guidelines for proposed allocation BRD030 in Bridgnorth specifically reference the need to make any necessary improvements to the wider highway network informed by Strategic and Local Transport Assessments. Whilst the draft site guidelines for proposed allocations P58a and STC002 specifically reference the need to undertake necessary improvements to highways infrastructure. -The draft site guidelines for proposed allocations LUD056 and LUD052 in Ludlow specifically reference undertaking highway improvements informed by appropriate Transport Assessments. -No new allocations are proposed in Craven Arms. -A Neighbourhood Plan is being progressed for the Cleobury Mortimer Parish area. The Neighbourhood Plan will include the strategy for achieving the housing and employment guidelines for the Key Centre of Cleobury Mortimer. However as specified above, draft Policy DP25 would of course apply to any development proposed in this settlement. -As specified above, draft Policy DP25 would apply to any development, including of the proposed allocations, in Alveley, Buford, Ditton Priors and Clee Hill. -Draft Policy DP25 would also apply to all development in Highley. For the sake of clarity a minor modification is proposed to the draft site guidelines for proposed allocation HNN016 to confirm that of course all necessary highway improvements will be undertaken, informed by an appropriate Transport Assessment, in accordance with draft Policy DP25.	Yes	General Comments
A0102	B001	n/a	Noted.	No	General Comments
A0123	B016	Update statistics underpinning the draft Shropshire Local Plan to reflect the impact of Covid 19. Respond to previous consultation responses.	Noted. Shropshire Council considers that a proportionate and robust evidence base has been assembled to inform the draft Shropshire Local Plan. Shropshire Council also considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.	No	General Comments

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0131	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Sites of Special Scientific Interest (SSSIs)	Not Specified	Not Specified	Not Specified	Following our Reg.18 consultation response, which questioned the approach taken to the assessment of potential impacts upon Welsh SSSIs, your Authority confirmed that a 500m buffer was applied to assess indirect effects on SSSIs arising from sites promoted for housing and/ or employment use in the DLP. For project level assessment we would expect any SSSIs within 200m of a development site to be assessed for potential impacts upon air quality from housing/ commercial development e.g. as a result from dust during the construction stage or traffic generation. The approach taken goes over and above this screening distance and therefore appears appropriate for housing/ commercial development site allocations. You have confirmed that there is only one proposed allocation in Shropshire within 500m of a Welsh SSSI (Montgomery Canal SSSI). We are satisfied that any impacts upon that site have been adequately assessed. Other forms of development (e.g. intensive agricultural use or large-scale combustion processes) have the potential to impact Welsh designated sites. However, we understand that there is uncertainty as to where and when certain types of development which may result in point sources of air pollution will come forward within the local plan area. We note that the DLP includes relevant policies that would require assessment of the potential impacts of such development on Welsh designated sites (National Site network and SSSIs).
A0149	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	Not Specified	No	Not Specified	The Plan is unsound because it is: Not positively prepared – the plan does not fully meet the area’s objectively assessed needs, and does not adequately accommodate unmet need from neighbouring areas; -Unjustified – the plan’s strategic approach is not appropriate; it does not take account of reasonable alternatives and is not based on proportionate evidence; -Ineffective – the plan is undeliverable over the plan period and is based on ineffective joint working which does not properly deal with strategic matters; -Inconsistent with national policy – the plan prevents the delivery of sustainable development.
A0255	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	General Comments	Not Specified	Not Specified	Not Specified	Have chosen not to express concern about some of the draft general and strategic policies in the draft Shropshire Local Plan, but are concerned that these draft Policies appear to be ignored when in apparent conflict with more detailed draft Policies - such as the employment allocations at Stanmore. Remain incredulous that protection of the Green Belt is not expressed as a major strategy in the draft Shropshire Local Plan.
A0296	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	No	No	There is a common law duty to take the results of consultation "conscientiously into account". Therefore there is a need to investigate why the level of development proposed exceeds that required and is incompatible with/breaches Government's legally binding commitment to tackle the climate emergency.
A0296	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Paras 16.15 to 16.26	No	No	No	There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has been achieved, given consideration of how Covid 19 restrictions impact on the ability to have their say has not occurred. One stated means of viewing documents was local libraries, however these closed during consultation, meaning those without internet were unable to get involved (significant given Shropshire's demographics).

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0131	B010	None specified	Support welcomed.	No	General Comments
A0149	B001	[Confirmed policy by policy within wider representation]	Noted. Shropshire Council considers that the draft Shropshire Local Plan is positively prepared, justified, effective and consistent with national policy. Further comments are provided in response to the wider representation.	No	General Comments
A0255	B001	N/A	Noted. The draft Shropshire Local Plan has been informed by a proportionate and robust Green Belt Assessment and Green Belt Review. Draft Policy SP11 of the draft Shropshire Local Plan addresses the Green Belt. The proposed strategic approach to the level and distribution of development and proposed development strategies for individual settlements are considered to have given due consideration to the Green Belt. Proposed allocations have been informed by a proportionate and robust site assessment process, which, where appropriate, included consideration of the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	General Comments
A0296	B001	Investigate why the level of development proposed exceeds that required and is incompatible with/breaches Government's legally binding commitment to tackle the climate emergency.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers appropriate and effective consultation has been undertaken to inform the Local Plan Review and that all consultation responses have been given due consideration. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.	No	General Comments
A0296	B002	Review the consultation process during Covid 19 and the impact this has had on responses. Also review analysis of responses.	Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the 'Gunning Principles'. Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan. It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.	No	General Comments

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0296	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	No	No	There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has been achieved, given consideration of how Covid 19 restrictions impact on the ability to have their say has not occurred. One stated means of viewing documents was local libraries, however these closed during consultation, meaning those without internet were unable to get involved (significant given Shropshire's demographics).
A0296	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	No	No	The Draft Shropshire Local Plan: -Includes growth (housing and employment) beyond demographic need that is too high, which is not sustainable as it is at odds with the climate and ecological emergencies and based on questionable figures. -Will not deliver appropriate types of houses in the right locations. -Has been subject to flawed and undemocratic consultation.
A0305	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	No	Yes	The Local Plan does not comply with the law, national policy or national guidance on Plan Making and Sustainability and so it is not legally compliant and not sound in accordance with supporting technical and legal evidence submitted with this representation. The Plan fails to accord with the tests of soundness in NPPF para 35 as follows: Not Positively Prepared - proposals are not supported by objective assessments ensuring housing and employment allocations may withstand objective challenges and SA appraisals are inconsistent. Unmet need from the Black Country is not substantiated by any evidence and the quantum of overspill development is not justified. The Plan strategy is based principally on economic objectives with limited consideration of social and environmental objectives and inadequate consideration of infrastructure needs. Not Justified - evidence has not been published and so cannot be shown to be proportionate and a consideration of reasonable alternatives to the proposed sites has not been presented in consultations. Not Effective - the high housing growth and anticipated employment development is not shown to be deliverable especially given lower historical delivery rates and the effects of the Covid-19 pandemic. Not consistent with national policy - does not comply with NPPF or Plan Making guidance and Sustainability Appraisal Notes particularly in failing to consider alternative proposals, give evidenced responses to consultation representations and failing to justify Green Belt releases through exceptional circumstances. Whilst statements should be succinct, the extent of non-compliance with the law, policy and guidance, the failure to respond to objections raised in previous consultations and with no further submissions being permitted, it is essential that a fully detailed case be put to the Inspector. This includes objections referenced to supporting legislation and case law, planning policy, and Government Plan Making and Sustainable Appraisal guidance. It also includes objections supported with detailed technical reasons, the failure of the Council to respond contrary to the law, the NPPF, Government guidance and the Council's own Statement of Community Involvement. With the detailed supporting evidence in Appendix 1, the Inspector may properly assess legal, procedural and soundness issues.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0296	B005	Review the consultation process during Covid 19 and the impact this has had on responses. Also review analysis of responses.	<p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the 'Gunning Principles'.</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.</p>	No	General Comments
A0296	B006	Explain why level of growth exceeds demographic need and is too high. Assess whether the Local Plan will get the right sort of houses in the right locations. Review the consultation process.	<p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>The proposed employment land requirement seeks to support the achievement of the aspirations of the Economic Growth Strategy for Shropshire through the provision of sufficient appropriately located land to deliver high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable and also responds to key quantitative and qualitative evidence including that within the Economic Development Needs Assessments (EDNA), Employment Land Review (ELR) and Authority Monitoring Report (AMR) undertaken to inform the draft Shropshire Local Plan. The proposed employment land requirement also incorporates up to 30ha of employment land to support the employment needs of the emerging Black Country Plan.</p> <p>It is also considered that the draft policies within the draft Shropshire Local Plan would implement this proposed strategy and contribute to delivering the right types of houses in the right locations.</p> <p>Shropshire Council also considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the 'Gunning Principles'.</p>	No	General Comments
A0305	B001	See summary of main issues.	<p>Shropshire Council considers a proportionate and robust evidence base has been prepared to inform the Local Plan Review. Specifically with regard to the proposed housing and employment land requirements, this includes such evidence as a Viability Study, Local Housing Need Assessment, Strategic Housing Market Assessment, Five Year Housing Land Supply Statement, Place Plans and Strategic Infrastructure Implementation Plan, Economic Development Needs Assessment and Employment Land Review.</p> <p>Shropshire Council considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement, Gunning Principles and national legislation.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation.</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p> <p>The Council also considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.</p>	No	General Comments

Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p> <p>The Council also considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.</p>	No	General Comments

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0312	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	No	Yes	The Local Plan consultation processes do not comply with the law, national policy or national guidance on Plan Making and Sustainability and so it is not legally compliant and not sound in accordance with supporting technical and legal evidence submitted with this representation. The consultation processes fail to comply with the Gunning Principles for consultations to (1) publicise proposals at the 'formative' stage, (2) provide sufficient information for 'intelligent' consideration, (3) permit sufficient time to consider and respond and (4) to give 'conscientious' consideration to responses before reaching a decision. The Local Plan consultations fail to comply with the Council's Statement of Community involvement. In particular, they have not complied with the community involvement processes and have not shown how the views expressed by the public have been incorporated into the Plan nor how consultation responses have influenced the preparation of the Plan. The Council have failed to submit a Statement of Common Ground with either the Draft Reg 18 Pre-Submission Plan when a Black Country Housing Overspill was proposed, nor with the current Reg 19 Pre Submissions Plan when a further Black Country Employment Overspill was proposed. This is contrary to the requirements of NPPF paragraph 27 and Planning Guidance on Plan Making in paragraphs 009 and 020.
A0331	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	General Comments	No	No	No	Promotion of the Regulation 19 Consultation on the Draft Shropshire Local Plan has been inadequate, local Parish Council's were unaware of the consultation and local people only found out if they had computers and registered with Shropshire Council. Consider Regulation 19a of the Town and Country Planning Act (TCPA) has not been achieved. Consider the land use and environment elements of the Tenbury Wells and Burford Parish Plan have not been achieved.
A0348	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	General Comments	Not Specified	Yes	Not Specified	1.We raised concerns at previous consultation stages that the Plan was not sound because it was unclear how the historic environment had been considered in the Plan making process. Advice was given on how this might be rectified, with particular reference to the proposed allocation of SHR166. We note that the Council then produced a Supplementary Site Assessments paper and we now consider that sufficient analysis has been undertaken. We are satisfied that the Council's approach is consistent with Historic England Advice Note 3 and NPPF para 190 for sites LUD052, KCK007, LYH007, PPW025 and WHN024. 2. We have considered Heritage Impact Assessments and masterplans provided by the site promoters for BRD030, SHR166 and IRN001 ahead of this response, as requested by the Council. However, as the Council does not view these as part of the evidence base for the Plan, we are unclear what weight is being given to them.
A0348	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Shropshire's Character, para 2.9	Not Specified	Yes	Not Specified	Historic England welcomes the inclusion of paragraph 2.9, which focuses on the number of designated heritage assets and the wealth of non-statutory undesignated assets within Shropshire; creating a county with a rich historic environment.
A0349	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	General Comments	Not Specified	Yes	Yes	1. The Plan is largely considered sound, positively prepared, justified and consistent with national policy. Most of the policies are deliverable and flexible and therefore, the Plan should be effective. The exceptions are the site allocations within the river Clun catchment, Policy DP13 The Clun Catchment and the HRA Appropriate Assessment conclusions relating to the River Clun SAC. 2. Natural England can also confirm that they have been involved in discussions with the LPA during the Plan preparation process and with the Council as the HRA has emerged so they consider the Duty to Co-operate has been met.
A0349	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Sites of least Environmental Value	Not Specified	Not Specified	Not Specified	In accordance with the National Planning Policy Framework (NPPF), the plan's development strategy appears to avoid areas of high environmental value. Natural England notes the evidence in the HRA, which demonstrates that sites of least environmental value are allocated i.e. they avoid designated sites and landscapes. This is with the exception of the allocations within the catchment of the River Clun SAC as discussed in our other comments.
A0393	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	No	No	Not Specified	Whilst the NPPF does not make explicit the need for the Local Plan to proactively set out the route to a net zero society , as a result of climate change emergency declarations, it should form a core part of the definition of sustainable development. The plan needs to recognise importance of spatial planning in the transition to a net zero transport system and set out how planned developments will contribute to this. Given Plan time period & carbon reduction targets by 2050, together with consequences of failing to deliver reductions, every part of the Plan should consider whether it is reducing or adding to carbon emissions. it is inappropriate for the Local Plan to have exclusions from the requirement to contribute to the net zero pathway on the grounds of economic viability. Therefore, if a development cannot be economically developed in a way that contributes net zero pathway it should not proceed. Thus, references to such exemptions throughout the Plan should be removed. We welcome reference to the government's 25 Year Environment Plan in Para 3.161 SP17 but there should be greater reference to this throughout the document, especially in sections SP3, SP4, and SP9 The Nature Recovery Strategy is about much more than just Biodiversity Net Gain and thus, it should be a constant theme throughout the plan. strategic developments are not located on existing rail infrastructure and so this implies additional road building which is not consistent with the need to address the Climate Emergency
A0393	B040	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	All DPs do not & should contain an explicit link to the ways they will assist in achieving net zero carbon.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0312	B002	N/A	<p>Shropshire Council considers a proportionate and robust evidence base has been prepared to inform the Local Plan Review. Specifically with regard to the proposed housing and employment land requirements, this includes such evidence as a Viability Study, Local Housing Need Assessment, Strategic Housing Market Assessment, Five Year Housing Land Supply Statement, Place Plans and Strategic Infrastructure Implementation Plan, Economic Development Needs Assessment and Employment Land Review.</p> <p>Proposals within the draft Shropshire Local Plan have been subject to and informed by a proportionate and robust Sustainability Appraisal.</p> <p>Shropshire Council also considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the Gunning Principles. All consultation responses have been given due consideration. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. This is considered an appropriate contribution towards these unmet housing needs. It is also considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p>	No	General Comments
A0331	B001	Re-run the Regulation 19 consultation and notify the public through means other than computer (local media, leafleting, local radio etc), so they are aware of proposals and able to comment if they wish.	Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and Regulation 19 of the Town and Country Plan Act (TCPA).	No	General Comments
A0348	B002	n/a	Noted; no actions proposed.	No	General Comments
A0348	B003	n/a	Noted; no actions proposed.	No	General Comments
A0349	B001	n/a	Noted.	No	General Comments
A0349	B013	n/a	Noted.	No	General Comments
A0393	B003	<p>Any policy which cannot be evidenced to its outcome measured in terms of carbon reduction must be amended. Where a policy is evidenced as increasing carbon, it should be removed.</p> <p>Inappropriate for the Local Plan to have exclusions from the requirement to contribute to the net zero pathway on the grounds of economic viability-references to such exemptions throughout the Plan should be removed.</p> <p>Greater reference to Nature Recovery Strategy throughout the Plan .</p> <p>Include more reference to the 25 Year Environment Plan throughout the Draft Plan, especially in sections SP3, SP4, and SP9.</p> <p>Remove references to NWRR.</p>	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	General Comments
A0393	B040	Explicitly identify within the policy how it will assist in achieving net zero carbon	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	General Comments

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0410	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	No	Not Specified	<p>Consultation has not been carried out in conformity with an up-to-date and adopted Statement of Community Involvement (SCI), because such an SCI did not exist at the time of this consultation, and the Gunning principles of consultation.</p> <p>-The SCI (2011) is out of date from 6th April 2018, by virtue of regulation 10A of TCP (Local Planning) (England) (Amendment) Regulations 2017/1244 requiring it to be reviewed. In recognition of this, a new SCI has been prepared and is subject to consultation alongside the Regulation 19 consultation on the draft Shropshire Local Plan (Appendix to this representation includes response to the consultation on the new SCI).</p> <p>-Consider Shropshire Council have not conscientiously taken into account the product of consultation in a proper manner, as required by the Gunning Principles. Responses to the first two consultations show people and Town and Parish Council's were overwhelmingly against high option, yet this is pursued. The Council's response is the consultation was not a referendum; although the majority supported lower options, a good level of support existed for the highest option; the Council knows what is best for most people; the consultation was looking for good arguments; and if there is disagreement the case could be argued in front of an Inspector.</p> <p>-During the last Regulation 18 consultation availability of evidence was queried. The Council indicated these documents would be available for the Regulation 19 consultation, however key documents listed in Appendix 3 of the draft Shropshire Local Plan (notably an up-to-date Authority Monitoring Report, last publication was 2017) remain missing. Without this, no up-to-date evidence on performance during the first four years of the proposed Plan period, as such consultees do not have before them sufficient reasons to allow them to intelligently consider whether the draft Shropshire Local Plan is likely to achieve its goals within the remaining 18 years of its proposed Plan period.</p> <p>-The draft Shropshire Local Plan and supporting evidence is very extensive (Appendix to this representation catalogues this material). Because of this volume (some of which is new) consider a longer consultation period was appropriate - extension to 10 weeks due to Covid 19 restrictions was welcome, but consider there are good reasons for at least 12 weeks of consultation.</p>
A0418	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Statement of Community Involvement	No	No	Yes	<p>Concerned about the consultation process, especially that at Regulation 19, undertaken to inform the draft Shropshire Local Plan. The process is very complicated which leads the general public at a marked disadvantage; there has been insufficient publicity; local views have not been reflected; Covid restrictions have meant opportunities to view paper copies of documents have largely been lost; the extension to the Regulation 19 consultation period was decided at the end of the original period, frustrating efforts to communicate it; and consultation documents are laid out and scaled (text size) in a way that it is difficult to assimilate at A4 and few households have A3 printers (particularly the site assessments which were approx. font size 5-6 at A4 when a minimum of font size 12 is recommended and there was an absence of repeater headers).</p>
A0423	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	General Comments	Not Specified	Not Specified	Not Specified	<p>Duty to Cooperate: West Midlands Resource Technical Advisory Body (WMRTAB) has facilitated discussion between Shropshire Council and other neighbouring waste planning authorities to assist with meeting the Duty to Cooperate in relation to waste management. Para 4.279 of the draft Shropshire Local Plan reports Shropshire is dependent on waste management services in neighbouring local authorities, particularly Telford and Wrekin. Note that National Planning Practice Guidance (NPPG) recognises "there is no expectation that each local planning authority should deal solely with its own waste to meet the requirements of the self-sufficiency and proximity principles...". Consider Statement(s) of Common Ground (SoCG) relating to meeting Shropshire's needs for waste management in other areas may be required, although understand a SoCG between Shropshire Council and Telford and Wrekin is in place.</p> <p>Soundness - Consistency with National Policy for Waste: The draft Shropshire Local Plan appears consistent with National Policy for Waste, although there are areas this could be clearer:</p> <p>-Promoting of the provision of adequate waste storage and segregation facilities within new residential and commercial development. Although note the draft Shropshire Local Plan supports sustainable waste management for new development in its requirement for "all types of development to include information about the management of waste during their construction and subsequent operation";</p> <p>-Requirements for additional wastewater treatment capacity. However, the draft Shropshire Local Plan does recognise the need for such additional capacity to facilitate development in certain areas; and,</p> <p>-Future monitoring of municipal waste recycling, recovery and disposal.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0410	B001	<p>The Regulation 19 consultation on the draft Shropshire Local Plan should be re-run when all key evidence has been published.</p> <p>The Draft Shropshire Local Plan should be amended to reflect the fact that Members of the Public, Town and Parish Councils and Local and National Interest groups are all overwhelmingly in favour of lower housing targets.</p>	<p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the 'Gunning Principles'.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Each stage of consultation has been supported by a proportionate evidence base. Following each of these stages of consultation, a summary of the responses received has been prepared and form appendices to the Consultation Statement prepared for the 'Regulation 19' Pre Submission Draft of the Shropshire Local Plan.</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.</p> <p>Where following consultation it has been proposed to make amendments to proposals in response to the consultation process or indeed any other emerging evidence, this has been documented within relevant subsequent consultation documents (reflecting the iterative process undertaken during the Regulation 18 Plan Preparation stage).</p>	No	General Comments
A0418	B002	<p>Better publicise consultations.</p> <p>Undertake a consultation meeting relating to the increased scale of the proposed allocation in Much Wenlock (similar engagement to the initial allocation).</p> <p>Allow a longer consultation period, post Covid lockdown.</p> <p>Provide simpler and more easily-read consultation documents.</p>	<p>Noted. Shropshire Council considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and national legislation. It is recognised that consultation material is extensive and can be complex and every endeavour is made to present this as succinctly and straightforwardly as possible, however it must be recognised that the planning policy process is complex and includes numerous very technical issues.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation. Responses to each of these stages of consultation have been given due consideration and informed proposals within subsequent stages of consultation, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	General Comments
A0423	B001	<p>The draft Shropshire Local Plan could be clearer regarding:</p> <ul style="list-style-type: none"> <li>-Promoting of the provision of adequate waste storage and segregation facilities within new residential and commercial development;</li> <li>-Requirements for additional wastewater treatment capacity; and</li> <li>-Future monitoring of municipal waste recycling, recovery and disposal.</li> </ul>	<p>Noted.</p> <p>Draft Policy SP17 includes a requirement that "applications for all types of development to include information about the management of waste during their construction and subsequent operation".</p> <p>Draft Policy DP19 includes a requirement that proposals are required to demonstrate that "they will be served by adequate water infrastructure in terms of water supply, foul drainage, wastewater and sewage treatment, without leading to significant problems for existing users or contamination of waterways (rivers or streams), clean water supply, surface water or groundwater.</p> <p>One of the monitoring indicators proposed for draft Policy SP17 within the draft Shropshire Local Plan is Municipal waste management annual performance.</p>	No	General Comments

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0427	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	General Comments	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan has not been positively prepared, and is therefore not sound, because:</p> <p>-An assessment of local housing need for the Bridgnorth Place Plan Area has not been undertaken. Without this, housing need for Bridgnorth cannot have been objectively assessed. The best assessment of housing need is that undertaken by Bridgnorth District Council in 2006. Extrapolating this to 2036, 15,168 dwellings are needed by 2036, compared with the 16,200 dwellings proposed by the version draft Local Plan at that time. This has been submitted to Shropshire Council in response to Regulation 18 consultation but no feedback has been provided.</p> <p>-'Statements of Common Ground' (SoCG), prepared under the Duty to Cooperate, have not been agreed with other Local Authorities. Paragraph 2.27 of the draft Shropshire Local Plan confirms that discussions have been held but that SoCG will only be available when the plan is submitted for Examination, as such they are not available for consideration as part of the Regulation 19 consultation.</p> <p>Such SoCG would include agreement on the housing needs of adjacent and other local authorities and the extent to which they anticipate not being able to meet them - we understand that not all the other local authorities have completed their own housing needs assessments.</p> <p>Shropshire Council is proposing to contribute 1,500 dwellings to meet the needs of the Association of Black Country Authorities (ABCA). However, we note that none of the members of ABCA are directly neighbouring authorities to Shropshire. It may be more appropriate for Telford and Wrekin Council to contribute to this need. Furthermore, we can find no evidence that any financial contribution has been agreed with these authorities to cover the additional infrastructure costs that will be needed to provide for the additional 1,500 dwellings. Again, without this information we consider that the Local Plan has not been positively prepared or objectively assessed.</p>
A0439	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2(2)	Not Specified	Not Specified	Not Specified	<p>I ask the Inspector to evaluate how and if, Shropshire council evaluated and processed the previous consultation responses. Local reports told of staff shortages within Shropshire Council due to the Covid-19 outbreak and many believe this consultation process was unable to happen thoroughly or fairly. How can nearly 300 responses to previous rounds of consultation be ignored? Why was no feedback or acknowledgement given?. There are four 'Gunning principles' for public consultations, including the stipulation that "there is adequate time for consideration and response". The consultation has not taken into account the restrictions on public involvement because of Covid19 restrictions and it is therefore against government guidelines. A Neighbourhood Plan should be drawn up</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0427	B007	<p>Reduce the housing requirement for Shropshire by removing the allocation for the Association of Black Country Authorities (ABCA) under the Duty to Cooperate. Under the Duty to Co-operate approach Telford and Wrekin Council to assess if housing and employment need can be met more sustainably by them.</p> <p>Information already provided by Bridgnorth Plan Steering Group, Save Bridgnorth Green Belt and others, should be taken into account during the plan-making process.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Responses to Local Plan Review consultations have been given due consideration. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	General Comments
A0439	B004	<p>I ask that the Independent inspector looks at the previous responses to the consultation from Cressage residents. There were many hundreds of objections and it feels these have not been evaluated or assessed fairly by Shropshire Council. I ask the inspector to evaluate the consultation process and request that a Neighbourhood Plan be drawn up. I ask that the Independent inspector reviews the Countryside Charity's objections and responses and considers them in depth. I ask the Independent inspector to review Shropshire Councils consultation process during Covid19 and the obvious impacts that has had on preventing people from replying. As evidence for non compliance with consultation, I am using the Draft Statement of Community involvement of the CPRE January 2021</p> <p>i) The update of the DSCI should have been carried out some time ago, rather than being left to the last minute in order to tie in with the statutory requirements connected with the Regulation 19 consultation on the Draft Plan.</p> <p>ii) The general principles of consultation in the Gunning principles and in the seven Criteria within Government's own Code of Practice on Consultation should be spelt out within the DSCI.</p> <p>iii) The recent Covid-19 related legislation concerning consultation arrangements should be summarised or referenced in the DSCI.</p> <p>iv) Consultations should be for a minimum of 12 weeks, as recommended by Government. Some Parish Councils do not meet often enough to be able to give due formal consideration to a consultation that is for only 6 weeks.</p> <p>v) Consultations should, as far as possible, avoid holiday periods, or be for a significantly extended period if they do straddle a holiday period.</p> <p>vi) Consultation material should be mainly in electronic form but should not be wholly so; traditional methods should still be used until the County has complete fast broadband cover.</p> <p>vii) The Council should not rely on hard pressed Parish and Town Councils to disseminate consultation material.</p> <p>viii) If a direct choice between multiple options is offered in a consultation the Council should ensure that its policies reflect the results of the poll on those options.</p> <p>ix) Reports on consultations should explain how the Council has arrived at its conclusions from those consultations.</p> <p>x) Neighbour notifications of planning applications should continue to be issued.</p>	<p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the 'Gunning Principles'.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Each stage of consultation has been supported by a proportionate evidence base. Following each of these stages of consultation, a summary of the responses received has been prepared and form appendices to the Consultation Statement prepared for the 'Regulation 19' Pre Submission Draft of the Shropshire Local Plan.</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. 1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0440	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2(2)	No	No	No	I ask the Inspector to evaluate how and if, Shropshire council evaluated and processed the previous consultation responses. Local reports told of staff shortages within Shropshire Council due to the Covid-19 outbreak and many believe this consultation process was unable to happen thoroughly or fairly. How can nearly 300 responses to previous rounds of consultation be ignored? Why was no feedback or acknowledgement given?. There are four 'Gunning principles' for public consultations, including the stipulation that "there is adequate time for consideration and response". The consultation has not taken into account the restrictions on public involvement because of Covid19 restrictions and it is therefore against government guidelines. A Neighbourhood Plan should be drawn up
A0457	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	No	No	From the early submissions to the questionnaires on the Local Plan it became absolutely clear that individual respondents were emphatically opposed (88% against) to the high level of growth being proposed by Shropshire Council. This attitude was also backed by both town and parish councils (74% against) who were also opposed to such high growth levels. These strongly held views of the wider public are being ignored by the Cabinet members (no doubt backed by central government policy) who are undemocratically pursuing their own agenda. For Shropshire Council to totally ignore the overwhelming view of its electorate and their local government representatives is unsound. A high degree of arrogance has been shown by Shropshire Council with their lack of a response at all the consultation phases when perfectly legitimate concerns and/or questions were raised – all the meetings and consultations were simply a box ticking exercise.
A0466	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Not specified	Not Specified	Not Specified	Not Specified	Blank Form

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0440	B004	<p>I ask that the Independent inspector looks at the previous responses to the consultation from Cressage residents. There were many hundreds of objections and it feels these have not been evaluated or assessed fairly by Shropshire Council. I ask the inspector to evaluate the consultation process and request that a Neighbourhood Plan be drawn up. I ask that the Independent inspector reviews the Countryside Charity's objections and responses and considers them in depth. I ask the Independent inspector to review Shropshire Councils consultation process during Covid19 and the obvious impacts that has had on preventing people from replying. As evidence for non compliance with consultation, I am using the Draft Statement of Community involvement of the CPRE January 2021</p> <p>i) The update of the DSCI should have been carried out some time ago, rather than being left to the last minute in order to tie in with the statutory requirements connected with the Regulation 19 consultation on the Draft Plan.</p> <p>ii) The general principles of consultation in the Gunning principles and in the seven Criteria within Government's own Code of Practice on Consultation should be spelt out within the DSCI.</p> <p>iii) The recent Covid-19 related legislation concerning consultation arrangements should be summarised or referenced in the DSCI.</p> <p>iv) Consultations should be for a minimum of 12 weeks, as recommended by Government. Some Parish Councils do not meet often enough to be able to give due formal consideration to a consultation that is for only 6 weeks.</p> <p>v) Consultations should, as far as possible, avoid holiday periods, or be for a significantly extended period if they do straddle a holiday period.</p> <p>vi) Consultation material should be mainly in electronic form but should not be wholly so; traditional methods should still be used until the County has complete fast broadband cover.</p> <p>vii) The Council should not rely on hard pressed Parish and Town Councils to disseminate consultation material.</p> <p>viii) If a direct choice between multiple options is offered in a consultation the Council should ensure that its policies reflect the results of the poll on those options.</p> <p>ix) Reports on consultations should explain how the Council has arrived at its conclusions from those consultations.</p> <p>x) Neighbour notifications of planning applications should continue to be issued.</p>	<p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the 'Gunning Principles'.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Each stage of consultation has been supported by a proportionate evidence base. Following each of these stages of consultation, a summary of the responses received has been prepared and form appendices to the Consultation Statement prepared for the 'Regulation 19' Pre Submission Draft of the Shropshire Local Plan.</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.</p> <p>Where following consultation it has been proposed to make amendments to proposals in response to the consultation process or indeed any other emerging evidence, this has been documented within relevant subsequent consultation documents (reflecting the iterative process undertaken during the Regulation 18 Plan Preparation stage).</p>	No	General Comments
A0457	B006	Please refer to attached sheets – endorsement of comments of Shropshire Councillor Roger Evans	<p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the 'Gunning Principles'.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. A0466	B010	Blank Form	Blank Form	No	General Comments

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0481	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole document	Not Specified	Not Specified	Not Specified	We have read the plan with interest but have no specific comments to make on the policies or proposals included. Ongoing discussions between Shropshire and Herefordshire Councils throughout the plan process have confirmed that there are no strategic cross boundary issues to be resolved. This will be reflected in a Statement of Common Ground (SoCG) between the two authorities, due to be finalised shortly.
A0482	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	General Comments	Not Specified	Not Specified	Not Specified	Note the draft Shropshire Local Plan contains locally specific policies and site allocations to complement existing allocations. Also note that upon adoption policies would replace those in the currently adopted Local Plan (except site allocations yet to be delivered). Consider further transport evidence for the draft Shropshire Local Plan is needed. Working closely with Shropshire Council to understand cumulative transport implications of proposed site allocations. This will include assessing cumulative and individual impacts of proposals upon the ability of road links and junctions affected to accommodate forecast traffic flows in terms of capacity and safety. Expect to be consulted imminently on a Model Specification Report (MSR) for modelling work proposed to be undertaken by the Council as part of the draft Shropshire Local Plan and for this modelling work to inform a Statement of Common Ground (SoCG). Where draft Shropshire Local Plan proposals are anticipated to have an impact on the operation of the Strategic Road Network (SRN) in the area, note wording of draft Policies have been amended to include requirement for a Transport Assessment for each site allocation, to determine the extent of any adverse impacts (including cumulative impacts) on the smooth functioning of the SRN in the area. Content with the inclusion of this wording in principle; however, we would recommend exclusion of "cumulative impacts". Instead, recommend a Transport Assessment will be needed for each site allocation, agreed through site specific pre-application consultation with Highways England. At the planning application stage the Transport Assessment will be reviewed in accordance with paras 21-50 of the DfT Circular 02/2013 - Strategic road network and the delivery of sustainable development. Where appropriate, conditions may be agreed to offset any unacceptable impacts that may be identified through the assessment process.
A0487	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	Not Specified	No	No	As set out in the 2019 National Planning Policy Framework (NPPF), the Council is under a Duty to Co-operate with other Local Planning Authorities (LPA) and prescribed bodies on strategic matters that cross administrative boundaries (para 24). To maximise the effectiveness of plan-making and fully meet the legal requirements of the Duty to Co-operate, the Council's engagement should be constructive, active and on-going. This collaboration should identify the relevant strategic matters to be addressed (para 25). Effective and on-going joint working is integral to the production of a positively prepared and justified strategy (para 26). The Council should demonstrate such working by the preparation and maintenance of one or more Statements of Common Ground (SoCG) identifying the cross-boundary matters to be addressed and the progress of co-operation in addressing these matters. A SoCG should be made publicly available throughout the plan-making process to provide transparency (para 27). The National Planning Practice Guidance (NPPG) confirms that a key element of Local Plan Examination is ensuring that there is certainty through formal agreements that an effective strategy is in place to deal with strategic matters when Local Plans are adopted (ID : 61-010-20190315 & 61-031-20190315). The NPPG explains that a SoCG sets out where effective co-operation is and is not happening throughout the plan-making process (ID : 61-010-20190315). The NPPG also sets out that by the time of publication of a Draft Plan, a SoCG should be available on the Council's website. Once published, the Council should ensure that the SoCG continues to reflect the most up-to-date position of joint working (ID : 61-020- 20190315). The HBF note that there are no SoCGs accompanying the LPR pre-submission consultation. The Council has stated that a full SoCG will be made available ahead of submission of the LPR for examination (para 2.27). This is inconsistent with national policy. Shropshire adjoins twelve other LPAs namely Telford & Wrekin, Cheshire West, Chester, Cheshire East, Wrexham, Powys, Herefordshire, Malvern Hills, Wyre Forest, South Staffordshire, Stafford and Newcastle under Lyme. The HBF would expect the Council to prepare and maintain one or more SoCG with these LPAs. There is also a functional relationship with the Black Country authorities of Dudley, Sandwell, Walsall and Wolverhampton, where there is an identified unmet housing need of up to 29,000 dwellings. It is proposed that 1,500 dwellings included in Shropshire's housing requirement will support housing needs from the Black Country. There is correspondence dated 30th September 2019 from the Black Country authorities supporting the proposed strategic allocation at J3 M54 in the Shropshire Local Plan. These strategic matters should be set out in a SoCG.
A0520	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2	No	No	No	'Gunning principles' for public consultation include ensuring "adequate time for consideration and response" and there is a common law requirement for responses to be conscientiously taken into account. Consultation has not taken into account restrictions on public involvement due to Covid 19 restrictions (exacerbated by demographics of Shropshire which mean many do not have access to the internet or appropriate resources) and is therefore contrary to government guidelines and flawed. Evidence for non-compliance of consultation includes CPRE comments on the draft Statement of Community Involvement (summarised within the representation). The consultation process is complex, but no assistance/explanation is provided. The inspector needs to evaluate how and if Shropshire Council processed/evaluated responses to previous consultations. Many consider the consultation process was inappropriate and unfair. How can 500 responses to previous consultations be ignored. Objections from CPRE should be considered.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0481	B001	n/a	Noted.	No	General Comments
A0482	B001	Where draft Shropshire Local Plan proposals are anticipated to have an impact on the operation of the Strategic Road Network (SRN) in the area, site guidelines include requirement for a Transport Assessment for each site allocation, to determine the extent of any adverse impacts (including cumulative impacts) on the smooth functioning of the SRN in the area. Content with the inclusion of this wording in principle; however, recommend exclusion of "cumulative impacts". Instead, recommend a Transport Assessment will be needed for each site allocation, agreed through site specific pre-application consultation with Highways England. At the planning application stage the Transport Assessment will be reviewed in accordance with paras 21-50 of the DfT Circular 02/2013 -Strategic road network and the delivery of sustainable development. Where appropriate, conditions may be agreed to offset any unacceptable impacts that may be identified through the assessment process.	Shropshire Council and Highways England have undertaken effective duty to cooperate discussions throughout the Local Plan Review process. This will continue to occur to inform highway modelling for Shrewsbury, which is being undertaken to provide further transport evidence to support the draft Shropshire Local Plan. Shropshire Council is also committed to continued positive engagement with Highways England during the eventual implementation of the draft Shropshire Local Plan. We note the comments regarding proposed site guidelines for sites where the draft Shropshire Local Plan proposals are anticipated to have the potential to impact on the operation of the Strategic Road Network (SRN) in the area. As such, to ensure clarity and consistency with Highways England best practice, we are proposing a series of minor modifications to: 1. Amend the relevant site guideline for these sites to state: "Any necessary improvements to the local and strategic road network will be undertaken, informed by an appropriate Transport Assessment", or words to this effect. 2. Within para 1 of draft Policy DP28. Communications and Transport we will include the sentence: "As such, unless agreed otherwise with Shropshire Council, a Transport Assessment will be undertaken for relevant site allocations in this Local Plan, the scope of which will be agreed through site specific pre-application consultation with Highways England."	Yes	General Comments
A0487	B013	In the absence of one or more published SoCG, it is difficult for the HBF and other interested parties to assess if the Council has satisfied the legal requirements of the Duty to Cooperate and the LPR is sound. The HBF may submit further comments in written Hearing Statements or orally during Examination Hearing Sessions.	With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs. It is considered appropriate to complete Statements of Common Ground with relevant Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.	No	General Comments
A0520	B001	The Inspector should evaluate the consultation process (particularly during Covid 19) and responses to consultation from Cressage residents. Objections from CPRE should be considered.	Noted. Shropshire Council considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement, Gunning Principles and national legislation. Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation. Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan. It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.	No	General Comments

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0586	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	New Policy	No	No	Not Specified	Consider more flexibility should be built into the Plan through the inclusion of Reserve Sites which would enable the Council to respond to any shortfall in housing delivery. See wider representations.
A0627	B008	Sustainability Appraisal	Whole document	Not Specified	No	Not Specified	<p>The whole document is not objective but puts a positive spin on Council aspirations for the Local Plan Review (“highly ambitious” High Growth strategy for both housing and economic growth). Contradictions exist between the identified Sustainability Objectives and application of Policy within the Hierarchy of Settlements Assessment (HoS) and Community Hub designations, which are purported to give significant positive effects on sustainability.</p> <p>Relaxation of key criteria for Community Hub settlements in the HoS (to not require multiple significant employment and peak time public transport) will result in additional private vehicle travel, contrary to the Council’s Climate Emergency Policy, to the National Planning Policy Framework (NPPF), and Government’s Zero Carbon aims. It is also contrary to the proposed “Spatial Vision”, draft Policy SP3 and Sustainability Objectives SO5, SO6, &amp; SO12 which seeks to minimise car travel/maximise trips by sustainable travel and reduce carbon emissions.</p> <p>Table 1.1 Housing Targets: All options proposed at Issues &amp; Options were above the Full Objectively Assessed Housing Need (FOAHN) identified for the county, with additional growth additions of 5%, 10% or 15% respectively. Therefore they all have significant benefits, irrespective of current SAMDev targets. Lower rates might as well not have been included as options if they were never going to be given creditability in the sustainability assessment.</p> <p>Table 1.2 ‘Poor’ sites: Numerous sites assessed as ‘Poor’ appear to have been selected to be allocated for development. That makes no sense.</p> <p>Table 2.7: No assessment of employment opportunities within the Sustainability Assessments for residential sites – are the available in the settlement? how far from the site? how accessible by sustainable travel (walking, wheeling, cycling or by public transport at times when they will trade (including shift patterns if applicable))? These are key factors in achieving sustainable development to meet Sustainability Objectives SO2, SO4, SO5, SO6, &amp; SO12 and draft Policy SP3. Road transport is identified as the largest single contributor of CO2 emissions (SO6), so development should be focused to accessible locations, reducing vehicle use.</p> <p>Table 2.7 Services assessment: Footnote states the list of services is consistent with the Primary Services in the HoS, but this is incorrect. Table 2.7 does not assess Nursery, Convenience Store, Post Office or Petrol Station which are considered “essential for day-to-day life”, whilst including many Secondary items that are “nice to have but not essential”. Access to all the Primary services is fundamental to sustainability.</p> <p>Table 2.8: Peak time public transport provision is included in Table 2.7 but not in Table 2.8. This should be a key factor in assessing and comparing sites.</p> <p>Draft Policy DP3: This draft policy does not itself “reduce the need for people to travel by car”, that is purely determined by the siting of the Open Market development that it forms part of and that being accessible by sustainable travel. If sites or settlements do not have that provision then all residents will have to use cars, potentially impacting more on lower income households, and on the environment.</p> <p>Draft Policy DP4: This draft policy does not itself “allow for a reduction in the need for private car use” It may not increase the need if every one of the new residents uses the other options. Also the requirement is only to access “local services” which in a rural settlement might not include many secondary services or, crucially employment. If settlements or sites do not have that provision then all residents will have to use cars, potentially impacting more on lower income households, and on the environment.</p> <p>Whilst minimal harm to landscape character and historic feature is noted for urban settings, the impact to rural settlements from these developments is not specifically considered, and the likely impact is played down to suit. DP5 Entry Level Exceptions includes consideration of this fact.</p> <p>Draft Policy DP6: Only reference is to urban settings with no mention of locations in or adjacent to rural settlements where impacts will be greater</p> <p>Draft Policy DP7: This completely overlooks developments adjacent to rural settlements. These do not have the “best access to services and facilities in the county” It cannot be said that they “naturally” reduce the need for travel by car, or that they “encourage” sustainable travel. Draft Policy DP7 only requires access to local service and facilities, but makes no mention of accessibility to employment opportunities. If settlements or sites do not have work opportunities then all residents will have to use cars, which potentially impacts more on lower income households, and on the environment.</p>
A0629	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole document	Yes	No	Yes	<p>The Planning and Compulsory Purchase Act (section 19) and the NPPF (para 148 – 149, incorporating footnote 48 and supplemented by NPPG), require Local Plans to be carbon audited and contribute to radical carbon emission reductions in line with the Climate Change Act.</p> <p>Legal briefing by the RTPI is supported, this states Local Plans are required to take into account baseline emissions; robustly evaluate future emissions, considering different emission sources, taking into account requirements set in national legislation, and a range of development scenarios; adopt proactive strategies to mitigate carbon emissions in line with the Climate Change Act, a 100% reduction by 2050. The draft Shropshire Local Plan sets out no carbon budget. References to reducing carbon emissions are general rather than objectively measurable as required. Therefore, given the RTPI legal opinion, the draft Shropshire Local Plan is not sound in terms of its climate change mitigation policies and duties.</p> <p>The evidence base for the draft Shropshire Local Plan should provide an overall carbon budget for the County to 2050, consistent with the updated Climate Change Act, showing baseline emissions and impact of development and mitigating policies on the emissions curve.</p> <p>Policies should aim to secure radical carbon reductions in line with a trajectory for the authority area that is consistent with the UK achieving full carbon neutrality by 2050, and in the short term should test the policy options available to achieve the highest level of ambition possible to meet this goal. To the extent possible, all new development should be zero carbon given that the country’s net zero target must be met in the next 30 years.</p> <p>This additional step should help the council align its local plan with its climate emergency declaration, and provide evidence to support the development and adoption of stronger planning policies.</p> <p>Where local authorities have undertaken carbon auditing, it is often concluded that it would be very difficult to achieve the required carbon reduction trajectory without new development being developed to a zero-carbon standard, due to the additional emissions growth inherent in new development commitments. Thus, following the process set out in legislation, planning policy and guidance to the letter will support the need for very ambitious planning policies around building performance. Such an approach also provides evidence to support proactive and supportive renewable energy policies as essential to carbon emission reduction.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0586	B005	Consider that more flexibility should be built into the Plan through the inclusion of Reserve Sites which would enable the Council to respond to any shortfall in housing delivery. See wider representations.	Noted. Shropshire Council considers it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. Draft Policy SP7 and other relevant policies provide the policy mechanism to respond to circumstances where the housing guidelines for particular settlements appears unlikely to be met over the proposed Plan period, or where there are specific considerations set out in the Settlement Policies. As such it is not considered necessary or appropriate to include a reserve site policy.	No	General Comments
A0627	B008	1) Review of the overall Housing Target figure against full assessed needs and additional sustainable growth – amend SP2 and associated housing allocations. 2) The Hierarchy of Settlements must be amended. It must correspond with and support SP3 Climate Change and Sustainability Objectives SO5, SO6, & SO12 which seek to minimise car travel and maximise trips by sustainable travel, and to reduce carbon emissions. In Para 5.41 setting a minimum range of only 5 from 20 services & facilities for a Hub settlement is patently far too low and must be increased. In Para 5.41 the relaxation wording must be removed Remove “In circumstances where there is no regular public transport service; and/or high speed broadband; and/or multiple significant employment opportunities, a larger range of services and facilities would be necessary to compensate to enable a settlement to achieve the specified point’s threshold. The full Hub criteria set out in Para 1.16 Table 2 and Para 5.35 Table 6 must be used to determine Settlement status. Critically the requirement to have both “significant employment opportunities” and “peak time public transport” for Hub status must be met. To achieve its stated purpose, the HofS must be an objective assessment and not include any element of subjective assessment. The Settlement Threshold must be determined by the full Hub criteria, not by any “gap” that appears in the results, nor by any relaxation wording introduced to support inaccurate scoring results i.e. the Threshold must be set by the policy and not that the policy be re-written to fit the results. The Table 10 assessment needs to be properly and fully reviewed using on the ground evidence of service & facilities and employment opportunities confirmed locally, not just reliance on the Mint Database information. 3) The list of Settlements must then be reviewed to confirm compliance with the full Hub criteria, 4) The Draft Plan settlement development status & allocations amended accordingly	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment, used to identify proposed Community Hubs, is appropriate and has been applied consistently across Shropshire. It is also considered consistent with the Sustainability Appraisal objectives. The list of proposed Community Hubs is also considered appropriate. Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment. The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation.	No	General Comments
A0629	B001	The draft Shropshire Local Plan should be subject to a carbon audit. To the extent that this indicates that the draft Shropshire Local Plan may not be following the trajectory to zero carbon, it should be modified and resubmitted.	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	General Comments

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B007-3	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	<p>Whilst the NPPF does not make explicit the need for the Local Plan to proactively set out the route to a net zero society, as a result of climate change emergency declarations, it should form a core part of the definition of sustainable development. The plan needs to recognise importance of spatial planning in the transition to a net zero transport system and set out how planned developments will contribute to this. Given Plan time period &amp; carbon reduction targets by 2050, together with consequences of failing to deliver reductions, every part of the Plan should consider whether it is reducing or adding to carbon emissions.</p> <p>it is inappropriate for the Local Plan to have exclusions from the requirement to contribute to the net zero pathway on the grounds of economic viability. Therefore, if a development cannot be economically developed in a way that contributes net zero pathway it should not proceed. Thus, references to such exemptions throughout the Plan should be removed.</p> <p>We welcome reference to the government's 25 Year Environment Plan in Para 3.161 SP17 but there should be greater reference to this throughout the document, especially in sections SP3, SP4, and SP9 The Nature Recovery Strategy is about much more than just Biodiversity Net Gain and thus, it should be a constant theme throughout the plan.</p> <p>strategic developments are not located on existing rail infrastructure and so this implies additional road building which is not consistent with the need to address the Climate Emergency</p>
A0633	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document [Part 1]	No	No	No	<p>Previous consultations failed to comply with the law and policy guidance on sustainability appraisals and hence also failed to comply with the law on the Plan complying with sustainable development requirements. Appraisal scoring did not include all the criteria stated to be assessed and the Plan allocated an employment site in Shifnal that had not been appraised at all. No reasons were given as to why more sustainable alternatives were rejected as required by the law. Information related to the SAs especially identification of site references to actual locations was not cross referenced or in one easily accessible location as required by case law (see attached statement for a detailed analysis of the law and its non-compliance here). The consultation process failed to comply with all four legal principles a consultation process has to legally follow as set out in the Gunning case law. Proposals in the Plan for the Shifnal Employment Site and RAF Cosford were being advertised in the Council's Invest in Shropshire brochure and on their website as being available for development before consultations took place. There has also been no response to objections made and evidence submitted indicating that the proposals were pre-determined as the Council have decided not to put forward any reasoning to rebut the objector's evidence. The evidence base on the website has not provided many of the documents quoted in the Plan as being key to the proposals in the Plan. There is considerable inconsistency in the figures used, such as employment for the County and Shifnal, so that the public do not know which is the correct ones to be able to comment on. This is especially important when large amounts of Green Belt are being proposed to be removed based on these inconsistencies. The lack of crucial evidence on the evidence base for the public to view and assess and the amount of incorrect information shows that there has been insufficient information to meet this legal criteria. The consultation periods for this and the previous consultation were unreasonably short for the amount of information that was being presented to the public. The Council has failed to respond to responses made and the evidence supporting those responses and failed to consider alternatives put forward. The Plan and consultation process do not meet the tests of soundness in NPPF paragraph 35. "Positively Prepared" – proposals have not been supported by objective assessments with inconsistencies in sustainability appraisals, and employment and housing proposals which have not stood up to objective challenge. No evidence has been submitted to substantiate that there is an unmet need from the Black Country, nor to justify the amount of overspill development now proposed in the Plan. The Plan does not adequately address infrastructure needs that would allow for sustainable development. The Plan is principally based on economic objectives and fails to give proper consideration to the social and environmental objectives required for sustainable development. "Justified"- the Council have failed to show that they have considered reasonable alternatives put forward in consultation responses. As many supporting evidence documents have not been made available to the public on the website, the Council cannot show that the evidence is proportionate. "Effective" –especially bearing in mind the impact of Covid, and historical development rates, the Council have not shown that the high housing growth proposed and employment development anticipated, is deliverable within the Plan period. No statement of common ground has been submitted. "Consistent with national policy" – the Plan does not comply with NPPF policy nor with guidance in Government Guidance Notes on Plan Making and Sustainability Appraisal. This includes failure to consider alternatives, failing to justify exceptional circumstances for removal of Green Belt and failure to provide a Council evidenced response to consultation comments.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B007-3	<p>Any policy which cannot be evidenced to its outcome measured in terms of carbon reduction must be amended. Where a policy is evidenced as increasing carbon, it should be removed.</p> <p>Inappropriate for the Local Plan to have exclusions from the requirement to contribute to the net zero pathway on the grounds of economic viability-references to such exemptions throughout the Plan should be removed.</p> <p>Greater reference to Nature Recovery Strategy throughout the Plan.</p> <p>Include more reference to the 25 Year Environment Plan throughout the Draft Plan, especially in sections SP3, SP4, and SP9.</p> <p>Remove references to NWRR.</p>	<p>The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. It is also considered that the Nature Recovery Strategy and 25 Year Environment Plan are appropriately referenced within the draft Shropshire Local Plan - it should be noted that the draft Shropshire Local Plan should be read as a whole. References to the North West Relief Road (NWRR) are considered appropriate, although the draft Shropshire Local Plan is not predicated on the delivery of the NWRR. No change proposed.</p>	No	General Comments
A0633	B001	N/A	<p>Noted. Shropshire Council considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement, Gunning Principles and national legislation.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation.</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p> <p>The Council also considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.</p>	No	General Comments

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0633	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document [Part 2]	No	No	No	<p>The Plan fails to comply with the Council's Statement of Community involvement. In particular, they have not complied with the community involvement processes and have not shown how the public's views have been incorporated nor how the responses have influenced plan development. The Council have failed to submit a Statement of Common Ground with either the Draft Reg 18 Pre Submission Plan when a Black Country Overspill for housing was proposed, nor with the current Reg19 Plan when additional employment overspill is proposed. This is contrary to the requirements of NPPF paragraph 27 and Planning Guidance Plan Making paragraphs 009 and 020.</p> <p>Whilst it is noted that statements should be succinct, because of the extent of non-compliance with the law, policy and guidance, the fact that the Council have failed to respond to objections raised in previous consultations, and the fact that no further submissions are allowed, it is considered essential that a fully detailed case be put to the Inspector. This shows that objections are fully referenced to supporting legislation and case law, planning policy, and Government guidance set out in its Plan Making and Sustainable Appraisal guidance notes. It also shows that all objections have been supported with detailed technical reasons, none of which have been responded to by the Council contrary to the law, the NPPF, Government guidance and the Council's own Statement of Community Involvement. Without this detailed supporting evidence set out in Appendix 1, it is not considered that the Inspector can properly assess the legal, procedural and soundness issues that have been raised.</p>
A0655	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	Not Specified	Not Specified	Not Specified	<p>After this consultation, the Plan will go for inspection by a Government Inspector and could be in force in early 2022. However, its timing is very unfortunate as the Government's new White Paper "Planning for the Future" has many aspirations to simplify these plans and make them more specific. If translated into law, these ideas will quickly render the Plan out-of-date. The main changes would be: a drastic shortening of the Local Plan; identification of all land as "Protected", "Re-development" or as "Growth land", where planning permission is not needed; more early stage public consultation; less high level aims; and more specific locally agreed 'design codes'. There is little in this current review suggesting movement towards these coming changes and this is a lost opportunity.</p> <p>Meantime, the NPPF still applies (although with pending amendments) and this Local Plan has been extended to cover up to 2038. (2 more years than the last draft.) The Plan also includes the Shrewsbury Place Plan and economic growth appears to be the main policy driver. The number of new homes planned for Shrewsbury has also been raised to 8625 (representing another 28% of population). This is some 11% greater than the Government requires although new housing need systems are about to be implemented nationally. These may re-configure governmental requirements upwards for Shropshire, if the White Paper takes effect.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0633	B002	N/A	<p>Shropshire Council considers a proportionate and robust evidence base has been prepared to inform the Local Plan Review. Specifically with regard to the proposed housing and employment land requirements, this includes such evidence as a Viability Study, Local Housing Need Assessment, Strategic Housing Market Assessment, Five Year Housing Land Supply Statement, Place Plans and Strategic Infrastructure Implementation Plan, Economic Development Needs Assessment and Employment Land Review.</p> <p>Shropshire Council considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement, Gunning Principles and national legislation.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation.</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p> <p>The Council also considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.</p>	No	General Comments
A0655	B001	<p>☒ The speed of housing growth is too fast for Shrewsbury. It is highly unpopular and infrastructure is lagging well behind. Without the requirement to co-operate with neighbouring LAs, a reduction (with pro-rata area reductions) in housing numbers is possible. A further extension of the Plan period could help too. The Plan allocates too many houses to be built in Shrewsbury and reduction are possible in the light of BTP "windfall" homes and re-use of a greater number of buildings in and around the town.</p> <p>☒ The Local Plan lacks wording that is specific enough to enforce a high quality of development design. A Design Code is needed for Shrewsbury that would provide certainty for developers of BTP Projects.</p> <p>☒ Shrewsbury residents have few chances to have a say and systems prompting involvement are dated. More of the engagement methods of BTP should be included in the SCI.</p> <p>☒ The Plan timetable is unfortunate in its timing concerning impending National changes to the Planning system and may require major re-adjustments soon. Including elements of coming changes, e.g. categorising land allocations, will provide greater confidence for developers and others.</p> <p>☒ Even without the possible implications of the White Paper, the Local Plan fails to show the influence of other changes, e.g. Permitted Development Rights, Public Consultation (e.g. the belated SCI), and the trends indicated in the Government's National Design Guide, BBBBC's Living with Beauty and the new National ave1</p> <p>☒ The Plan should provide more detail for allocated development sites in terms of meeting sustainability. For example, more estates need basic facilities such as a shop, community centre, medical facility, green transport routes, energy efficiency and high quality distinctive design.</p> <p>☒ New data collections are needed to more accurately assess traffic forecasts for the main routes into Shrewsbury. Only then can infrastructure plans be considered and the viability of development sites.</p>	<p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Shropshire Council also considers that the proposed development strategy for Shrewsbury and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.</p> <p>It is considered that the draft Shropshire Local Plan includes appropriate policies on design.</p> <p>Shropshire Council considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement, Gunning Principles and national legislation.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0656	B001	not specified	Noted.	No	General Comments
A0664	B003	Well located and designed specialist housing for older homeowners is a highly sustainable form of housing. Given the critical need for older persons accommodation in the West of England there should be a presumption in favour of sustainable housing and in particular specialist housing which is being proposed on suitable sites. It is recommended that greater weight is attached to this approach alongside the desire to release residential land within strategic allocations or indeed a separate policy within the document to cover the housing need for the ageing population. This accommodation will come from a number of sources both public and private and with varying levels of care and shelter provision enabling individual people to remain in their own home with independence and security. In effect there should be more of a positive policy supporting older people's accommodation in the same way that affordable housing is given a high priority.	It is considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate. Specifically: -Draft Policy DP1 requires all residential development to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. It also specifically requires the provision of an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings. -Settlement policies (S1-S19) allow for appropriate windfall development within identified development boundaries (or in the case of Community Clusters on specified types of sites) where they comply with other policy requirements, which can of course include accommodation for older people. -Draft Policy SP10 allows for affordable exception, entry level exception and cross subsidy exception housing schemes which meet evidenced local housing needs and other policy requirements. This again can include appropriate tenures of older person accommodation.	No	General Comments
A0671	B006	N/A	Noted. The site assessment process undertaken to inform proposed allocations includes comments from colleagues in Public Protection on issues such as noise and odour. We would also note that draft Policy DP18 specifically addresses these issues in the context of development proposals.	No	General Comments
A0671	B007	N/A	Noted. Shropshire Council is not proposing to allocate any specific sites for Gypsy and Travellers within the draft Shropshire Local Plan. The Gypsy and Traveller Accommodation Assessment (2019 Update) does not identify a requirement for such allocations.	No	General Comments
A0673	B004	Recognise there could continue to be a shortfall of land in neighbouring areas to which could be accommodated within the Plan area. Include this as a key trigger for an early review of the draft Shropshire Local Plan.	There is a legal requirement to review Local Plans every five years (Regulation 10A of the Town and Country Planning (Local Planning) (England) Regulations 2012). Furthermore, para 33 of the National Planning Policy Framework (NPPF) states "Policies in local plans and spatial development strategies should be reviewed to assess whether they need updating at least once every five years, and should then be updated as necessary. Reviews should be completed no later than five years from the adoption date of a plan, and should take into account changing circumstances affecting the area, or any relevant changes in national policy. Relevant strategic policies will need updating at least once every five years if their applicable local housing need figure has changed significantly; and they are likely to require earlier review if local housing need is expected to change significantly in the near future." This requirement is also specifically recognised within para 2.16 of the introduction to the draft Shropshire Local Plan. We would also note that proposed changes to the plan making process within the Planning for the Future White Paper, if ultimately introduced, could also require a review of the Local Plan. As such, it is considered unnecessary to include a specific early review mechanism within the draft Shropshire Local Plan.	No	General Comments
A0677	B001	Note the consultation document states a full set of Statements of Common Ground will be made available ahead of the submission of the draft Shropshire Local Plan. Ask that wider issues raised in representation are considered and addressed.	Noted.	No	General Comments

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0088	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13. Much Wenlock Place Plan Area	No	No	No	<p>Objection to the soundness of Reg 19 Plan related to SC lack of intention &amp; failure to: consult lawfully and meaningfully; engage and collaborate with the community and refusal to work through local community structures. Consultation on the LPR has been inadequate, contrary to statutory guidance and legal requirements and Shropshire Council have failed to consider significant community feedback.</p> <p>Consider LPR process contradicts Government Localism policies undermining trust in the planning process. Response reflects extensive community engagement by Much Wenlock Neighbourhood Plan Refresh Group &amp; community feedback. Also reflects evidence regarding development in the town. This is supported by detailed documentation, including from submitted links, which details community consultation &amp; outcomes. ( NB Council system prevents access to Google drive links ).</p> <p>No alternative development approaches to Preferred site' presented have been discussed with the community and the LPR Reg19 has not put forward any assessment options. Beyond the on-line publication and invitation to comment on the LPR, no meaningful community engagement has been undertaken or attended by Shropshire Council other than meeting held January 2019. This did not provide a transparent method for resident feedback to preferred options. The Town Council (MWTC) have not engaged the community, have misrepresented community and supported proposals without community consultation (as detailed in rep). Extracts of minutes provided to illustrate MWTC lack of public consultation and approach, including decision not to update neighbourhood plan. Unclear and conflicting information presented to the community by Shropshire Council regarding development requirements and delivery. Unexplained change leading to community confusion as a result of policies &amp; decisions of both SC and MWTC. Undue reliance by Shropshire Council on MWTC meetings and feedback. SC have misled MWTC to believe local plan would override the MWNP and take precedence with the option of development implemented through review of the MWNP not offered.</p> <p>Decision on Preferred Site should be made through the proper planning process, i.e. a consideration of all options through a review of the MWNP which allows meaningful community consultation. Benefit of increasing community cohesion.</p> <p>Consultation results and analysis by Shropshire skewed by inclusion of Cressage responses regarding development.</p> <p>Shropshire Council has not complied with its own SCI, which is inadequate in reference to neighbourhood plan making bodies &amp; delivering meaningful community consultation. SC has ignored LPR Policies where it undertakes to 'build consensus around shared local priorities and proposals' LPR Reg 19, 2.22, p 9. The LPR process has demonstrated an absence of commitment to community engagement &amp; options exploration (including public meetings). Expectation that concerns will be considered at Examination rather than earlier through the review process. Weaknesses of consultation process further detailed in response.</p> <p>Previous substantive representations to Shropshire Council have been ignored &amp; not been responded to. Shropshire Council officers have not accepted invitations to public events held to discuss issues. Responses given by Cabinet July 2020 to public questions were inadequate and not responsive to public desire to delete preferred site and progress options through MWNP. Lack of recognition of weight that should be given to Neighbourhood Plan, highlighted by lack of reference in SCI and Cabinet paper on the LPR (January 2017-link provided) and focus on resolving issues at Examination. SC has not complied with Local Plan Regulation 22 which requires plan making authorities to transparently show that necessary, legally compliant consultation has been undertaken &amp; that responses have been appropriately considered and taken into account. Approach taken by Shropshire Council out of step with Planning for the Future White Paper which expects 'More engagement should take place at the Local Plan phase'.</p>
A0126	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	General Comments	Not Specified	No	Not Specified	<p>Consultation during Pandemic is inadequate &amp; does not allow for full response. No scope for public meetings and limited opportunity for word of mouth dissemination due to social distancing &amp; other restrictions. Difficult to respond to the consultation: is not easily found/recognisable as the appropriate consultation on the Council's website; making a response is not website/computer friendly, users are expected to print or download the forms, save them, add comments and attach to an email for return.</p>
A0060	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Duty to Co-operate	No	No	Not Specified	<p>The duty to cooperate is a legal requirement for council's and statutory bodies to work together on strategic cross-boundary issues. In SC's case the county is adjoined by several local authority areas, and there are areas beyond this with a functional relationship, most notably the Black Country. As previously set out, there is no information contained in SC's evidence base which demonstrates why SC are proposing to include 1,500 dwellings to meet the Black Country needs. Without this key information being made publicly available, we cannot ascertain whether or not the duty to cooperate, under the Localism Act and NPPF has been conducted in an appropriate manner.</p>
A0286	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Duty to Co-operate	No	No	No	<p>The duty to cooperate is a legal requirement for council's and statutory bodies to work together on strategic cross-boundary issues. As previously set out, there is no information contained in SC's evidence base which demonstrates why SC are proposing to include 1,500 dwellings to meet the Black Country needs. Without this key information being made publicly available, we cannot ascertain whether or not the duty to cooperate, under the Localism Act and NPPF has been conducted in an appropriate manner.
A0637	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Duty to Co-operate	No	No	No	The duty to cooperate is a legal requirement for council's and statutory bodies to work together on strategic cross-boundary issues. In SC's case the county is adjoined by several local authority areas, and there are areas beyond this with a functional relationship, most notably the Black Country. As previously set out, there is no information contained in SC's evidence base which demonstrates why SC are proposing to include 1,500 dwellings to meet the Black Country needs. Without this key information being made publicly available, we cannot ascertain whether or not the duty to cooperate, under the Localism Act and NPPF has been conducted in an appropriate manner.
A0633	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Not specified	No	No	No	Employment – there needs to be a consistent employment figure in the different sections of the Plan and the 30ha proposed overspill allocation from the Black Country should be deleted. There is considerable inconsistency in the figures provided in the Plan varying from 300ha (policy S2) to 376ha (allocation total in settlement policies) to 414ha (Appendix 6 total for settlements) and this excluding employment proposed at RAF Cosford. The 300ha originally proposed to meet the County's own need to balance housing has also been reduced to include 30ha of Black Country overspill. In view of the impact on release of greenfield and Green Belt land and to evidence that proposals can meet sustainable development, a clear and consistent employment figure is essential for the Plan to be considered sound. The Plan needs modification to ensure that the employment figure given in this policy equates to the total employment figures in the settlement policies and then to the employment figures for settlements given in Appendix 6. The Black Country Plan and supporting evidence is at an early stage so there is no justified evidence to support the need for any overspill to be allocated in Shropshire. The allocation also fails to take account of recent Government policy and financial support to the use of Brownfield sites which could now meet this employment need.
A0347	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Strategic Flood Risk Assessments (SFRA) Levels 1 and 2	No	No	Not Specified	<ol style="list-style-type: none"> <li>1. We note the SFRA is intended to help Shropshire Council in applying the Sequential Test for their site allocations and identify where the application of the Exception Test may be required via a Level 2 Strategic Flood Risk Assessment.</li> <li>2. We haven't reviewed all sites as part of our review of this plan or SFRA L2. We rely on sites that may come forward being sequentially tested etc by you, as the LPA and appropriately assessed to ensure sustainability, including all sources of flooding.</li> <li>3. Rep summarises the modelling used in the SFRA to assess flood risk.</li> <li>4. The SFRA-2 table shows that the degree of flood risk varies between sites with some sites being more affected than others but the SFRA concludes that all sites in the summary table (6.1) should be developable to some degree if the detailed advice in the SFRA is followed.</li> <li>5. The SFRA assumes the maximum extent of fluvial flooding with climate change is likely to be similar to Flood Zone 2. EA normally require the 100-year plus 35% and 100-year plus 70% climate change fluvial scenarios to be considered in future housing developments (more vulnerable). These will likely be updated this year.</li> <li>6. The SFRA suggests that developers may need to undertake more detailed hydrological and hydraulic assessments of watercourses where there are currently no detailed hydraulic models, to verify flood extent (including latest climate change allowances), inform development zoning within the site and prove, if required, whether the Exception Test can be passed. This should be carried forward into the relevant site guidelines and for some sites, it will also need to include smaller un-modelled 'ordinary' watercourses (with a catchment less than 1km2. The outcome of such modelling may affect the amount of developable area and safe development requirements as well as the need for blue infrastructure.</li> <li>7. SFRA-2 section 8.2.2. This should also refer to the restrictions for surface water discharges to ground within SPZ1.</li> </ol>
A0347	B020	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Infrastructure The WCS/Local Plan is not clear on solutions for wastewater infrastructure in areas with a capacity issue. For instance, the WCS mentions that 'pumping out of catchment' may be needed, but this needs to be examined to inform likely viability, cost, delivery etc. We have indicated in previous discussions with you that you need to demonstrate there is a solution to amber or red constraints identified in the WCS. You may need to produce an Infrastructure Delivery Plan to give a reasonable degree of certainty and demonstrate that development is deliverable and will not cause environmental degradation. Government guidance states that sufficient detail should be provided to give clarity to all parties on if/when infrastructure upgrades will be provided, looking at the needs and costs (what and how much). There may be a need for a phasing policy to allow time for the solution to be actioned.
A0347	B021	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: WCS	No	No	Not Specified	Evidence base WCS: Section 9.7: Comment is made in numerous parts of the study to '...further mitigation may need to be taken to accommodate growth and options include pumping wastewater to a different WwTW or changing the point of discharge to a less sensitive waterbody'. This is not as easy as it may seem and the study does not pick up on the issue that transferring flow out of a catchment can cause more environmental harm as a result of the loss of flow from the original watercourse and then the need for assessment at any new location. We haven't listed all relevant sites here but further work is required to address this.
A0347	B022	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Section 6.3 Methodology With reference to the following point '...a red RAG score given by the water companies reflects the presence of sewer flooding, CSO spills or pollution events in the vicinity of the site, on the assumption that an increase in wastewater flows from development would make those occurrences more likely in the future...' We consider that impacts of the growth could be seen some distance from the development site depending upon the location of the first impacted storm overflow or even a cumulative effect in the sewer network. We are a bit concerned that just the immediate vicinity has been screened.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0636	B003	See summary of main issues.	Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. This is considered an appropriate contribution towards these unmet housing needs. It is also considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.	No	General Comments - Duty to Co-operate
A0637	B003	See summary of main issues.	Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. This is considered an appropriate contribution towards these unmet housing needs. It is also considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.	No	General Comments - Duty to Co-operate
A0633	B004	The Plan needs modification to ensure that the employment figure given in this policy equates to the total employment figures in the settlement policies and then to the employment figures for settlements given in Appendix 6. The Black Country Plan and supporting evidence is at an early stage so there is no justified evidence to support the need for any overspill to be allocated in Shropshire. The allocation also fails to take account of recent Government policy and financial support to the use of Brownfield sites which could now meet this employment need.	Shropshire Council considers that the proposed development strategies for each settlement are appropriate, effective, sustainable and deliverable (this includes the existing commitments (including existing allocations), proposed allocations and proposed windfall allowances identified to contribute towards achieving each proposed development strategy). Identification of proposed site allocations and where relevant safeguarded land has been informed by a proportionate and robust site assessment process. In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement. It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038. With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.	No	General Comments - Employment
A0347	B019	n/a	1. Noted. No change proposed. 2. Noted. No change proposed. 3. Noted. No change proposed. 4. Noted. No change proposed. 5. Noted. No change proposed. 6. The SFRA-2 evaluated 98 proposed allocations/promoted sites for fluvial flood risk, including flood risk from unmodelled water course. Out of the 98 sites, 19 were carried forward to a Level 2 assessment. Two of these sites, CST021 and WEM033, were taken forward on the basis that they contained unmodelled water courses. The Council thus considers that the flood risk from unmodelled watercourse has been adequately considered for all allocated sites and there is no need to add a requirement for more detailed hydrological and hydraulic assessments of the watercourses to any site guidelines. No change proposed. 7. The SFRA is an evidence base document and as such has informed the preparation of the Local Plan. The amendment suggested would not affect the content of the Local Plan so no change is proposed	No	General Comments - Evidence Base
A0347	B020	n/a	The Statements of Common Ground between SC and Severn Trent Water and SC and Welsh Water demonstrate that the red and amber constraints for wastewater infrastructure shown in the WCS can be overcome. Additionally, Policy DP19 provides for phasing to allow the relevant water company sufficient time to undertake any necessary capacity improvement works to the waste-water treatment works prior to construction and occupation of the development. No change proposed.	No	General Comments - Evidence Base
A0347	B021	n/a	Solutions for those WwTW which are at their Technically Achievable Limit (TAL) will be determined by the relevant water company at the development management stage rather than the plan making stage and will be subject to the environmental permitting regime at this point. No change proposed.	No	General Comments - Evidence Base
A0347	B022	n/a	Noted. No change proposed.	No	General Comments - Evidence Base

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0347	B023	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Section 6.6.1 The following comment has been made with regards to the Strategic Sites 'All of the strategic sites were scored red by STW who gave the following comments for each of the sites: Consider on-site treatment system. In reality this is probably more difficult than it may seem as any new discharge from an on-site treatment system would need to be assessed in terms of strict no deterioration policy as opposed to river needs permitting.
A0347	B024	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Table 7.2 Summary of WwTW flow assessment - could benefit from a column showing the proposed growth for easy comparison with the perceived headroom capacity.
A0347	B025	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Section 9.1 Phosphates – there doesn't appear to be any reference to the fact that a large percentage of phosphate in the sewer network originates from phosphate dosing into water supply to prevent leaching from water supply pipes.
A0347	B026	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Figure 9.1 Is the wording in light green outcome box correct? Shouldn't it read 'GES can be achieved using current technology?'
A0347	B027	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Section 9.4 Possible typo: SIMCAT modelling approach – Run type 9 within SIMCAT was then used which assumes that upstream flow each treatment works is at good ecological status. The permit value required to achieve GES is then calculated by the model.
A0347	B028	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Table 9.2 We suspect that WFD Standards do exist for the following: Bishop's Castle – Snakescroft Brook (GB 109054044061): Chirbury Tributary – source to confluence with River Camlad (GB 109054049290): Ditton Priors – Rea -source to confluence with Farlow Brook (GB109054044281): Dorrington- Cound Brook – confluence unnamed tributary to conf unnamed tributary (GB 109054049400): Ellesmere Wharf Meadon – Tetchill Brook – source to confluence with River Perry (GB 109054055000): Prees Golfhouse Lane-Soulton Brook- source to confluence with River Roden (GB 109054049201): Rushbury -Byne Brook – source to confluence with Quinny Brook (GB 109054044370). The WCS should be updated and appropriate actions taken.
A0347	B029	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Section 11.3 Point source pollution. It doesn't appear that the relevance of the SSSI designation or whether it is in continuity with the watercourse has been considered.
A0347	B030	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Section 11.7.1 This section doesn't appear to recognise the benefits SUDS offer in terms of reduced flows in combined sewers and so the potential reduction in storm impacts via CSOs and storm storage overflows
A0347	B031	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Section 12.3 The WCS states that 'the current allocated and committed growth in Shropshire has been made possible by upgrading phosphate stripping processes in the WwTW in the Clun catchment in order to reduce point-source inputs of nutrients, however any additional growth in the catchment would need further measures to ensure no deterioration to water quality in the catchment'. Our understanding was that 'projected future growth' was included in the requirements of the AMP6 schemes but this will not have accounted for any additional growth in this WSC, or local plan review, so yes, this additional growth alone would need further measures. These need to be understand and demonstrated to be deliverable.
A0347	B032	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS: Table 12.2 Options – Farm management – any nutrient removal via this route must be above and beyond what we would expect the agricultural sector to achieve in any case e.g. regulatory minimum.
A0347	B033	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence base: Water Cycle Study	No	No	Not Specified	Evidence base WCS Section 12.4.1 The WCS states that 'Additional growth as part of the preferred options and strategic sites identified in the Local Plan Review, would reduce the percentage phosphate load removed to under 75%. However, in AMP7 Bishops Castle is also due to be upgraded and its permit tightened to 0.4mg/l (from 0.43mg/l) to ensure future compliance. This is predicted to offset the proposed additional growth, and even allow some betterment in comparison to AMP6. Severn Trent Water have therefore commented that they would not need to "undertake further work to accommodate the extra 121 houses over and above the work already scheduled at Bishops Castle. This work alone is sufficient to ensure no net detriment to the SAC." This needs further clarity. Our understanding was that the initial growth projections were accounted for in the 75% load reduction but not the additional considered in this review. The AMP7 scheme at Bishops Castle is a No Deterioration scheme which assessed the possible impact if the STW discharged at the limit of its permit. Discharging at permitted load would cause a deterioration in the receiving watercourse so the P limit was tightened to ensure the load would not increase. Question is, are STWL suggesting that the current headroom at permitted volume would be sufficient to accommodate all the additional growth proposed for the Clun catchment? We would advise you to update the WCS and seek further clarification. To assist capacity considerations, in discussion with Severn Trent Water, you could check how much additional flow would be expected and where. We can then assess what further Phosphate reduction would be required to maintain the promised load reduction and how feasible that would be etc. Any identified action or option will need to come out as likely feasible, viable, and deliverable. This would also need to consider nutrient neutrality.

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0014	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.20	Not Specified	Not Specified	Not Specified	No reference to Local Nature Recovery Strategy. Concerned about absence of up to date and adopted Local Transport Plan.
A0014	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.21	Not Specified	Not Specified	Not Specified	Welcome recognition of need to respond to Climate Emergency and aim to achieve sustainable development. There is an Ecological and Climate Emergency, weighting should be duly considered in the 'full balance of considerations'.
A0123	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Introduction	No	No	Yes	With regard to para's 2.19 and 2.21, support aspirations and proposals to create a supportive environment for economic growth in Shropshire, and the need to carefully balance the need to protect the local environment and historic assets. Question the statement that 'decisions taken on land designations have been done so having regard to a full balance of considerations, with the aim of achieving sustainable development'. Proposed extent and nature of development and site designations in and around Oxon Hall caravan park are not deemed to represent sustainable development and will have a detrimental impact on existing businesses and the local environment.
A0385	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.27	Not Specified	No	Not Specified	Support proposed contributions to unmet cross-boundary housing and employment needs arising in the Black Country. However, no evidence of how these figures have been arrived at is provided and no Duty to Cooperate Statement/Statement of Common Ground (SoCG) has been published, as required by the National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG). NPPF states these should be maintained throughout plan production and made available by the time the draft Plan is published. Without them, it is difficult to ascertain extent of agreement with other local authorities on strategic issues (such as contributions to unmet housing need), assess appropriateness of agreements reached and determine if other factors including progress on draft Local Plans and changes to the standard method for calculating housing need (increased need in Wolverhampton (Black Country Authority) and Birmingham (in the same housing market area as the Black Country) by 35% - increasing pressure on the Black Country land supply) increase cross-boundary contributions. Therefore, further information should be provided and figures kept under review/flexibility provided in case of updated information from the Black Country changes housing need.
A0386	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Introduction Para 2.27	Not Specified	No	Not Specified	Further information is required to ensure soundness in respect of the approach to cross boundary issues. No reference to the advent of HS2 including opportunities of job creation / increased population serving local facilities for northern Shropshire towns, including Whitchurch. More recognition should be given to the positive knock-on effects of HS2 in line with Paragraph 102(b) of the NPPF. Support proposed contributions to unmet cross-boundary housing and employment needs arising in the Black Country. However, no evidence of how these figures have been arrived at is provided and no Duty to Cooperate Statement/Statement of Common Ground (SoCG) has been published, as required by the National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG). NPPF states these should be maintained throughout plan production and made available by the time the draft Plan is published. Without them, it is difficult to ascertain extent of agreement with other local authorities on strategic issues (such as contributions to unmet housing need), assess appropriateness of agreements reached and determine if other factors including progress on draft Local Plans and changes to the standard method for calculating housing need (increased need in Wolverhampton (Black Country Authority) and Birmingham (in the same housing market area as the Black Country) by 35% - increasing pressure on the Black Country land supply) increase cross-boundary contributions. Therefore, further information should be provided and figures kept under review/flexibility provided in case of updated information from the Black Country changes housing need.
A0387	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Introduction	Not Specified	No	Not Specified	No reference is made to the advent of HS2 including opportunities of job creation / increased population serving local facilities for northern Shropshire towns, including Market Drayton. More recognition should be given to the positive knock-on effects of HS2 in line with Paragraph 102(b) of the NPPF. Whilst supportive of the Council seeking to address cross-boundary issues including accommodating unmet needs, consider that the current approach is unsound as it is not fully positively prepared or consistent with national planning policy. Specifically, support proposed contributions to unmet cross-boundary housing and employment needs arising in the Black Country. However, no evidence of how these figures have been arrived at is provided and no Duty to Cooperate Statement/Statement of Common Ground (SoCG) has been published, as required by the National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG). NPPF states these should be maintained throughout plan production and made available by the time the draft Plan is published. Without them, it is difficult to ascertain extent of agreement with other local authorities on strategic issues (such as contributions to unmet housing need), assess appropriateness of agreements reached and determine if other factors including progress on draft Local Plans and changes to the standard method for calculating housing need (increased need in Wolverhampton (Black Country Authority) and Birmingham (in the same housing market area as the Black Country) by 35% - increasing pressure on the Black Country land supply) increase cross-boundary contributions. Therefore, further information should be provided and figures kept under review/flexibility provided in case of updated information from the Black Country changes housing need.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0014	B001	Make reference to Local Nature Recovery Strategy. Prepare and adopt a Local Transport Plan.	Noted. Documents listed in Para 2.20 is not intended to represent an exhaustive list, rather it highlights the fact that the draft Shropshire Local Plan has not been prepared in isolation. Future Nature Recovery Strategy is specifically referenced within draft Policy DP12. The draft Shropshire Local Plan has been informed by an extensive evidence base and discussions with relevant service areas, including colleagues in Highways particularly in relation to proposed site allocations. Shropshire Council is preparing the next Local Transport Plan (LTP4).	No	General Comments - Introduction
A0014	B002	Apply appropriate weighting to the Ecological and Climate Emergency.	Where decisions on land allocations have been taken, they have been done so having regard to a full balance of considerations, with the aim of achieving sustainable development.	No	General Comments - Introduction
A0123	B001	Need to carefully consider protection of the local environment and ensure policies are prepared to ensure that development proposals will not result in detrimental impacts on adjacent land uses and the long term viability of Oxon Hall caravan park.	Noted. The draft Shropshire Local Plan should be read as a whole. It includes draft Policies relating to the natural and historic environment. All proposed allocations have been subject to a proportionate and robust site assessment process.	No	General Comments - Introduction
A0385	B011	Update and publish a Duty to Cooperate Statement and accompanying Statements of Common Ground to demonstrate extent of agreement on strategic matters and provide information on how agreements on these matters have been reached, including in relation to contributions to unmet cross-boundary need arising in the Black Country. Keep the contribution to unmet cross-boundary need arising in the Black Country under review (in light of recent changes to the standard method for calculating housing need). Consider inclusion of a mechanism committing to a review of the housing requirement if these unmet needs increase.	Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. This is considered an appropriate contribution towards these unmet housing needs. It is also considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.	No	General Comments - Introduction
A0386	B001	Update and publish a Duty to Cooperate Statement and accompanying Statements of Common Ground to demonstrate extent of agreement on strategic matters and provide information on how agreements on these matters have been reached, including in relation to contributions to unmet cross-boundary need arising in the Black Country. Keep the contribution to unmet cross-boundary need arising in the Black Country under review (in light of recent changes to the standard method for calculating housing need). Consider inclusion of a mechanism committing to a review of the housing requirement if these unmet needs increase.	Shropshire Council has recognised and considered the potential opportunities associated with HS2 in the preparation of the draft Shropshire Local Plan. Draft Policy SP14 states that Strategic Corridors' along the principal rail and strategic road routes through the County will be the primary focus for major employment development especially along 'strategic corridors' with both rail and road connectivity. One such corridor identified is the North East Shropshire and the A41 corridor supporting Shropshire's links to the Northern Powerhouse through Cheshire and connected to the delivery of HS2 later in the Local Plan period. Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. This is considered an appropriate contribution towards these unmet housing needs. It is also considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.	No	General Comments - Introduction
A0387	B001	Reference HS2 and the associated opportunities within the introduction of the draft Shropshire Local Plan. Update and publish a Duty to Cooperate Statement and accompanying Statements of Common Ground to demonstrate extent of agreement on strategic matters and provide information on how agreements on these matters have been reached, including in relation to contributions to unmet cross-boundary need arising in the Black Country. Keep the contribution to unmet cross-boundary need arising in the Black Country under review (in light of recent changes to the standard method for calculating housing need). Consider inclusion of a mechanism committing to a review of the housing requirement if these unmet needs increase.	Shropshire Council does not consider it necessary or appropriate to reference all infrastructure projects within the introduction of the draft Shropshire Local Plan. However, the Council has recognised and considered the potential opportunities associated with HS2 in the preparation of the draft Shropshire Local Plan. Draft Policy SP14 states that Strategic Corridors' along the principal rail and strategic road routes through the County will be the primary focus for major employment development especially along 'strategic corridors' with both rail and road connectivity. One such corridor identified is the North East Shropshire and the A41 corridor supporting Shropshire's links to the Northern Powerhouse through Cheshire and connected to the delivery of HS2 later in the Local Plan period. Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. This is considered an appropriate contribution towards these unmet housing needs. It is also considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0663	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Introduction	Not Specified	Not Specified	Not Specified	We are pleased to see that a reference to affordable housing has been incorporated into the Local Plan Spatial Vision on page 11. It is important that affordable housing is given sufficient weight and status within the Plan so that those whose needs are not met by the current market are still provided for through the provision of a wide choice of high quality affordable homes.
A0060	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Legal Compliance - General	No	No	Not Specified	Council should respond to the following issues before proceeding to approve and submit the Submission Local Plan to the Secretary of State. The issues to be addressed are: (1) the inadequacies with the evidence base used to inform this review process; (2) the methodology applied when calculating Shifnal's employment need, (3) justification on how other sites in Shifnal were ruled out in the sustainability appraisal and (4) the heritage assessment used to inform their site selection process and (5) why SC has chosen to take on the overspill of employment and housing development required by the Black County.
A0060	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Legal Compliance - Gunning Principles	No	No	Not Specified	Common Law imposes specific requirements on public consultation through R.V Brent LBC Ex p. Gunning {1985} 4 WLUK 200 which set four legal principles for consultations to be legal (known as the Gunning Principles). These are that (i) Plans must be at a formative stage before a final decision has been made or pre-determined by the decision maker. the Council have not published consultation responses following the Regulation 18 Plan prior to publishing the Regulation 19 Plan and no written responses have been prepared to permit the public and elected local representatives to consider the arguments for the Regulation 19 Plan. This is considered to imply that the proposals in the Regulation 18 Plan were not at a formative stage and the Regulation 19 Plan has already been pre-determined including the employment land allocations in Shifnal. The Council have not responded to inconsistencies in the recording of the hectareage of land for SHF018b and SHF018d suggesting the figures used to release Green Belt land are not based on sound evidence contrary to the Gunning principles. Council also advertised RAF Cosford and SHF018b/SHF018d as potential development sites outside of the Green Belt prior to the strategic sites consultation where the sites were proposed for release from the Green Belt suggesting the Council had predetermined their strategic sites which is re-enforced by the lack of response to objections and queries following the consultation. (ii) There is sufficient information to give 'intelligent consideration' to the information provided. A number of evidence documents are missing, incomplete or out of date including the Local Transport Plan, Annual Monitoring Report, Tree & Woodland Strategy, Health and Well Being Strategy expires in 2021, no formal Estate Plans have been published to support Policy SP15, the Tourism Economic Impact Report is 2013, Landscape Characterisation Assessment is 2006. Information on the website, such as the proposed Local Plan period and the Local Development Scheme have not been kept up-to-date. There has been a lack of clarity over the hectareage of the employment allocations and the densities for the housing allocations in Shifnal, double counting in the calculation of the land area to be made available on the employment allocations which impacts on the release of Green Belt land. Inaccuracies in the Sustainability Appraisals. Therefore, how can the public be expected to judge the soundness of policies and proposals in the Plan, when crucial parts of the evidence are unavailable for the public to view. This is especially important when these proposals are likely to impact on the need to release Green Belt land. As well as going to the soundness of the plan and compliance with Government guidance, the failure to make accessible to the public evidence relied on by the Council, is contrary to the legal requirement in the Gunning case to permit intelligent consideration of accurate information bringing the soundness of the plan into question. (iii) There is adequate time for consideration and response to provide sufficient opportunity for consultees to participate in the process. There has been insufficient time through the review process with Regulation 18 Pre-Submission consultation permitting only 8 weeks during the summer holiday period. The Regulation 19 consultation was conducted in a similar manner over the Christmas period and national lockdown (addressed through an extension of the period) with libraries closed preventing access to the consultation documents that included matters affecting the whole County, 35 new policies referring to 50 evidence documents with appendices and a large number of new evidence documents contributing to the 11,000 page evidence base. In contrast, the Preferred Scale & Distribution of Development and Issues & Options Consultations that avoided holiday periods or the Preferred Sites and Strategic Sites consultation for just 4 sites that covered longer periods of 9 and 10 weeks. The period allowed was also reduced by the fact that several pieces of evidence quoted in the Plan were not put on the evidence base website at the start of the consultation period and nearly half was not put on the evidence base at all (this included the Infrastructure and Implementation Plan, Economic Development Needs Assessment, Transport Plan and Estate Plans) contrary to the statement on the Councils website on this consultation. This also contrasts with consultations on other public documents including a 12 week consultation on the revised Statement of Community Involvement that is 27 pages; 8 weeks for the Community and Rural Strategy that is 22 pages; and 12 weeks for the Cultural Strategy that is 33 pages. It is considered that this inconsistency is further evidence that this consultation is flawed and legally questionable. (iv) 'Conscientious consideration' must be given to the consultation responses before a decision is made. It is considered that the Council have not published evidence showing how consultation responses have been taken into account. The publication of a summary of responses does not demonstrate how feedback has been considered and how it has been incorporated into the next review phase or why the Council took decisions contrary to recommendations in the consultation responses.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0663	B001	N/A	Noted. Shropshire Council recognises the importance of providing affordable housing. It is for this reason that a series of draft Policies are proposed which introduce a series of mechanisms for the delivery of affordable housing.	No	General Comments - Introduction
A0060	B001	Council should respond to the following issues before proceeding to approve and submit the Submission Local Plan to the Secretary of State. The issues to be addressed are: (1) the inadequacies with the evidence base used to inform this review process; (2) the methodology applied when calculating Shifnal's employment need, (3) justification on how other sites in Shifnal were ruled out in the sustainability appraisal and (4) the heritage assessment used to inform their site selection process and (5) why SC has chosen to take on the overspill of employment and housing development required by the Black County.	<p>Shropshire Council considers that a proportionate and robust evidence base has been prepared to inform the draft Shropshire Local Plan. Shropshire Council also considers that the proposed development strategy for Shifnal and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that proposed safeguarded land is not allocated for development but safeguarded for beyond the proposed Plan period.</p> <p>Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p> <p>Comments on the Sustainability Appraisal (SA) noted. Proposed changes to SA would have no material effect so are not considered necessary.</p> <p>Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. This is considered an appropriate contribution towards these unmet housing needs. It is also considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p>	No	General Comments - Legal Compliance
A0060	B002	See summary of main issues.	<p>Shropshire Council considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement, Gunning Principles and national legislation.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation.</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.</p>	No	General Comments - Legal Compliance

A0313	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Legal Compliance - Gunning Principles	No	No	Not Specified	<p>Common Law imposes specific requirements on public consultation through R.V Brent LBC Ex p. Gunning {1985} 4 WLUK 200 which set four legal principles for consultations to be legal (known as the Gunning Principles). These are that (i) Plans must be at a formative stage before a final decision has been made or pre-determined by the decision maker. the Council have not published consultation responses following the Regulation 18 Plan prior to publishing the Regulation 19 Plan and no written responses have been prepared to permit the public and elected local representatives to consider the arguments for the Regulation 19 Plan. This is considered to imply that the proposals in the Regulation 18 Plan were not at a formative stage and the Regulation 19 Plan has already been pre-determined including the employment land allocations in Shifnal. The Council have not responded to inconsistencies in the recording of the hectareage of land for SHF018b and SHF018d suggesting the figures used to release Green Belt land are not based on sound evidence contrary to the Gunning principles. Council also advertised RAF Cosford and SHF018b/SHF018d as potential development sites outside of the Green Belt prior to the strategic sites consultation where the sites were proposed for release from the Green Belt suggesting the Council had predetermined their strategic sites which is re-enforced by the lack of response to objections and queries following the consultation. (ii) There is sufficient information to give 'intelligent consideration' to the information provided. A number of evidence documents are missing, incomplete or out of date including the Local Transport Plan, Annual Monitoring Report, Tree &amp; Woodland Strategy, Health and Well Being Strategy expires in 2021, no formal Estate Plans have been published to support Policy SP15, the Tourism Economic Impact Report is 2013, Landscape Characterisation Assessment is 2006. Information on the website, such as the proposed Local Plan period and the Local Development Scheme have not been kept up-to-date. There has been a lack of clarity over the hectareage of the employment allocations and the densities for the housing allocations in Shifnal, double counting in the calculation of the land area to be made available on the employment allocations which impacts on the release of Green Belt land. Inaccuracies in the Sustainability Appraisals. Therefore, how can the public be expected to judge the soundness of policies and proposals in the Plan, when crucial parts of the evidence are unavailable for the public to view. This is especially important when these proposals are likely to impact on the need to release Green Belt land. As well as going to the soundness of the plan and compliance with Government guidance, the failure to make accessible to the public evidence relied on by the Council, is contrary to the legal requirement in the Gunning case to permit intelligent consideration of accurate information bringing the soundness of the plan into question. (iii) There is adequate time for consideration and response to provide sufficient opportunity for consultees to participate in the process. There has been insufficient time through the review process with Regulation 18 Pre-Submission consultation permitting only 8 weeks during the summer holiday period. The Regulation 19 consultation was conducted in a similar manner over the Christmas period and national lockdown (addressed through an extension of the period) with libraries closed preventing access to the consultation documents that included matters affecting the whole County, 35 new policies referring to 50 evidence documents with appendices and a large number of new evidence documents contributing to the 11,000 page evidence base. In contrast, the Preferred Scale &amp; Distribution of Development and Issues &amp; Options Consultations that avoided holiday periods or the Preferred Sites and Strategic Sites consultation for just 4 sites that covered longer periods of 9 and 10 weeks. The period allowed was also reduced by the fact that several pieces of evidence quoted in the Plan were not put on the evidence base website at the start of the consultation period and nearly half was not put on the evidence base at all (this included the Infrastructure and Implementation Plan, Economic Development Needs Assessment, Transport Plan and Estate Plans) contrary to the statement on the Councils website on this consultation. This also contrasts with consultations on other public documents including a 12 week consultation on the revised Statement of Community Involvement that is 27 pages; 8 weeks for the Community and Rural Strategy that is 22 pages; and 12 weeks for the Cultural Strategy that is 33 pages. It is considered that this inconsistency is further evidence that this consultation is flawed and legally questionable. (iv) 'Conscientious consideration' must be given to the consultation responses before a decision is made. It is considered that the Council have not published evidence showing how consultation responses have been taken into account. The publication of a summary of responses does not demonstrate how feedback has been considered and how it has been incorporated into the next review phase or why the Council took decisions contrary to recommendations in the consultation responses.</p>
A0636	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Legal Compliance - General	No	No	No	<p>Council should respond to the following issues before proceeding to approve and submit the Submission Local Plan to the Secretary of State. The issues to be addressed are: (1) the inadequacies with the evidence base used to inform this review process; (2) the methodology applied when calculating Shifnal's employment need, (3) justification on how other sites in Shifnal were ruled out in the sustainability appraisal and (4) the heritage assessment used to inform their site selection process and (5) why SC has chosen to take on the overspill of employment and housing development required by the Black County.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0313	B002	See summary of main issues.	<p>Shropshire Council considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement, Gunning Principles and national legislation. Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation.</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.</p>	No	General Comments - Legal Compliance
A0636	B001	<p>Council should respond to the following issues before proceeding to approve and submit the Submission Local Plan to the Secretary of State. The issues to be addressed are: (1) the inadequacies with the evidence base used to inform this review process; (2) the methodology applied when calculating Shifnal's employment need, (3) justification on how other sites in Shifnal were ruled out in the sustainability appraisal and (4) the heritage assessment used to inform their site selection process and (5) why SC has chosen to take on the overspill of employment and housing development required by the Black County.</p>	<p>Shropshire Council considers that a proportionate and robust evidence base has been prepared to inform the draft Shropshire Local Plan. Shropshire Council also considers that the proposed development strategy for Shifnal and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that proposed safeguarded land is not allocated for development but safeguarded for beyond the proposed Plan period.</p> <p>Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p> <p>Comments on the Sustainability Appraisal (SA) noted. Proposed changes to SA would have no material effect so are not considered necessary.</p> <p>Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. This is considered an appropriate contribution towards these unmet housing needs. It is also considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p>	No	General Comments - Legal Compliance

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0636	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Legal Compliance - Gunning Principles	No	No	No	Common Law imposes specific requirements on public consultation through R.V Brent LBC Ex p. Gunning {1985} 4 WLUK 200 which set four legal principles for consultations to be legal (known as the Gunning Principles). These are that (i) Plans must be at a formative stage before a final decision has been made or pre-determined by the decision maker. the Council have not published consultation responses following the Regulation 18 Plan prior to publishing the Regulation 19 Plan and no written responses have been prepared to permit the public and elected local representatives to consider the arguments for the Regulation 19 Plan. This is considered to imply that the proposals in the Regulation 18 Plan were not at a formative stage and the Regulation 19 Plan has already been pre-determined including the employment land allocations in Shifnal. The Council have not responded to inconsistencies in the recording of the hectareage of land for SHF018b and SHF018d suggesting the figures used to release Green Belt land are not based on sound evidence contrary to the Gunning principles. Council also advertised RAF Cosford and SHF018b/SHF018d as potential development sites outside of the Green Belt prior to the strategic sites consultation where the sites were proposed for release from the Green Belt suggesting the Council had predetermined their strategic sites which is re-enforced by the lack of response to objections and queries following the consultation. (ii) There is sufficient information to give 'intelligent consideration' to the information provided. A number of evidence documents are missing, incomplete or out of date including the Local Transport Plan, Annual Monitoring Report, Tree & Woodland Strategy, Health and Well Being Strategy expires in 2021, no formal Estate Plans have been published to support Policy SP15, the Tourism Economic Impact Report is 2013, Landscape Characterisation Assessment is 2006. Information on the website, such as the proposed Local Plan period and the Local Development Scheme have not been kept up-to-date. There has been a lack of clarity over the hectareage of the employment allocations and the densities for the housing allocations in Shifnal, double counting in the calculation of the land area to be made available on the employment allocations which impacts on the release of Green Belt land. Inaccuracies in the Sustainability Appraisals. Therefore, how can the public be expected to judge the soundness of policies and proposals in the Plan, when crucial parts of the evidence are unavailable for the public to view. This is especially important when these proposals are likely to impact on the need to release Green Belt land. As well as going to the soundness of the plan and compliance with Government guidance, the failure to make accessible to the public evidence relied on by the Council, is contrary to the legal requirement in the Gunning case to permit intelligent consideration of accurate information bringing the soundness of the plan into question. (iii) There is adequate time for consideration and response to provide sufficient opportunity for consultees to participate in the process. There has been insufficient time through the review process with Regulation 18 Pre-Submission consultation permitting only 8 weeks during the summer holiday period. The Regulation 19 consultation was conducted in a similar manner over the Christmas period and national lockdown (addressed through an extension of the period) with libraries closed preventing access to the consultation documents that included matters affecting the whole County, 35 new policies referring to 50 evidence documents with appendices and a large number of new evidence documents contributing to the 11,000 page evidence base. In contrast, the Preferred Scale & Distribution of Development and Issues & Options Consultations that avoided holiday periods or the Preferred Sites and Strategic Sites consultation for just 4 sites that covered longer periods of 9 and 10 weeks. The period allowed was also reduced by the fact that several pieces of evidence quoted in the Plan were not put on the evidence base website at the start of the consultation period and nearly half was not put on the evidence base at all (this included the Infrastructure and Implementation Plan, Economic Development Needs Assessment, Transport Plan and Estate Plans) contrary to the statement on the Councils website on this consultation. This also contrasts with consultations on other public documents including a 12 week consultation on the revised Statement of Community Involvement that is 27 pages; 8 weeks for the Community and Rural Strategy that is 22 pages; and 12 weeks for the Cultural Strategy that is 33 pages. It is considered that this inconsistency is further evidence that this consultation is flawed and legally questionable. (iv) 'Conscientious consideration' must be given to the consultation responses before a decision is made. It is considered that the Council have not published evidence showing how consultation responses have been taken into account. The publication of a summary of responses does not demonstrate how feedback has been considered and how it has been incorporated into the next review phase or why the Council took decisions contrary to recommendations in the consultation responses.

It is considered that this inconsistency is further evidence that this consultation is flawed and legally questionable. (iv) 'Conscientious consideration' must be given to the consultation responses before a decision is made. It is considered that the Council have not published evidence showing how consultation responses have been taken into account. The publication of a summary of responses does not demonstrate how feedback has been considered and how it has been incorporated into the next review phase or why the Council took decisions contrary to recommendations in the consultation responses.
A0060	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Statement of Common Ground	No	No	Not Specified	Paragraph 27 of the NPPF sets out that 'authorities should produce, maintain, and update one or more statement(s) of common ground, throughout the plan-making process'. It goes onto state that 'such statements should be made publicly available throughout the plan-making process to provide transparency'. One of the tests of soundness is that a Plan must be effective and that cross-boundary matters that have been addressed are to be evidenced by the statement of common ground. This has not been demonstrated by SC and the current review process is unsound. As set out above SC are proposing to include 1,500 dwellings to meet the Black Country needs and no statement of common ground was submitted to accompany this consultation. Without this statement, there was no information on identified needs as required by paragraph 012 (reference ID: 61_024012-20190315) of the Plan Making guidance, for the public to understand the reasoning for this change. The NPPF requires that such statements should be provided throughout the preparation of the plan and not at the end. As members of the public have not been consulted on this, the evidence base is clearly flawed.

A0060	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Statement of Community Involvement	No	No	Not Specified	The Statement of Community Involvement (SCI) has not been regularly reviewed as required by Government guidance. The Council has also failed to comply with their SCI. The Town Council and local community have previously submitted detailed comments on locally relevant issues at each consultation stage, but SC have failed to respond to those concerns showing how they have taken those views into account or why they have not accepted them. This does not constitute effective or meaningful dialogue as the community involvement has been one way.
A0286	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Statement of Community Involvement	No	No	No	The Statement of Community Involvement (SCI) has not been regularly reviewed as required by Government guidance. The Council has also failed to comply with their SCI. The Town Council and local community have previously submitted detailed comments on locally relevant issues at each consultation stage, but SC have failed to respond to those concerns showing how they have taken those views into account or why they have not accepted them. This does not constitute effective or meaningful dialogue as the community involvement has been one way.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0312	B005	N/A	Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. This is considered an appropriate contribution towards these unmet housing needs. It is also considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.	No	General Comments - Statement of Common Ground

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0487	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3, DP1, DP3, DP11, DP12 & DP28	Not Specified	No	Not Specified	<p>The HBF response to the Council's draft Viability Study consultation raised concerns about numerous standard inputs and the cumulative impact of policy compliant requirements. A number of concerns have been addressed in the Council's final version of the Viability Study however the following concerns remain:-</p> <ul style="list-style-type: none"> <li>-Benchmark Land Values (BLV) of brownfield - Existing Use Value (EUV) of £500,000 per hectare (see Table 6.4) plus 20%, greenfield - EUV of £25,000 per hectare for agricultural land or £100,000 per hectare for paddock / amenity land (see Table 6.4) plus £400,000 per hectare and strategic sites EUV plus £300,000 per hectare (para 6.56). These premiums are low and may provide insufficient incentive to landowners. HCA Area Wide Viability Model (Annex 1 Transparent Viability Assumptions) dated August 2010 identified that "benchmarks and evidence from planning appeals tend to be in a range of 10% to 30% above EUV in urban areas. For greenfield land, benchmarks tend to be in a range of 10 to 20 times agricultural value". The Council's Viability Study acknowledges that this assumption has not been agreed with parties involved in the stakeholder consultation (para 6.58);</li> <li>-All abnormal costs (excluding an allowance of 5% for brownfield sites) are ignored. It is assumed that if residual land value excluding abnormal costs is greater than BLV, development is viable. If the residual land value including abnormal costs falls below BLV, development remains viable because such abnormal costs are deductible from BLV. If abnormal costs are high, then the premium uplift should be reduced and borne by the landowner rather than by a loss of planning gain however if the resultant figure provides insufficient incentive for a reasonable landowner to bring forward their land for development then the deliverability of the Local Plan is threatened. If the BLV is lower than the market value at which land will trade the delivery of housing targets will not be met. The NPPG specifically states (ID : 10-014-20190509) that BLV should "reflect the implications of abnormal costs" therefore abnormal costs should be recognised and acknowledged as forming an integral part of establishing BLV and a reasonable incentive for landowners to sell;</li> <li>-Assumed professional fees 8%. The Harman Report recommended 8% – 10% of all costs (unit build costs, external costs &amp; abnormal infrastructure costs &amp; policy compliant requirements) up to 20% for complex strategic sites ;</li> <li>-Contingencies assume 5% brownfield sites and 2.5% elsewhere. Assessment should not be conducted on the margins of viability. CIL Regulations were changed in 2019 and one critical change was that CIL and Local Plan Viability Assessment must use the same evidence base. In CIL viability assessment a buffer should be included to allow for changing economic circumstances. It is suggested that such a buffer should also be part of the Local Plan Viability Assessment to ensure that minor changes in economic circumstances do not necessitate a full-scale review of Local Plan policy requirements and viability assessment. The need for a substantial "cushion" is particularly important on greenfield sites, where as noted by the Harman Report, "prospective sellers are often making a once in a lifetime decision and are rarely distressed or forced sales".</li> <li>-Assumed sales costs of 3.5% but Harman Report recommends 3% - 5% ;</li> <li>-Assumed 1.5% for acquisition costs and legal fees but Harman Report recommends 1% - 2% for agent fee costs and 1% - 2% for legal fees ;</li> <li>-Policy DP1 Bullet Points 4 &amp; 5 (see detailed response). The additional costs for M4(2) and M4(3) compliant dwellings are assumed as £610 (£521 plus 17% inflationary increase) and £11,830 (£10,111 plus 17% inflationary increase). The Government's consultation "Raising Accessibility Standards for New Homes" (ending on 1st December 2020) estimates the additional cost per new dwelling is approximately £1,400 for dwellings, which would not already meet M4(2). In September 2014 during the Government's Housing Standards Review EC Harris estimated the cost impact of M4(3) per dwelling as £15,691 for apartments and £26,816 for houses. M4(3) compliant houses are also larger than NDSS (DCLG Housing Standards Review Illustrative Technical Standards Developed by the Working Groups August 2013) therefore larger sizes should be used when calculating additional build costs for M4(3) and any other input based on square meterage. The assessment also omits to consider the interplay between achievable density and proposed policy requirements on housing mix / unit sizes (NDSS &amp; M4(2)/(3));</li> </ul>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0487	B015	As identified in the Council's own Viability Study, there are significant viability challenges to the deliverability of development across the County. The HBF suggest that the Council's policy approach to Development Management Policies (SP3, DP1, DP3, DP11, DP12 & DP28) should be flexible.	Shropshire Council considers that the Whole Plan Viability Assessment undertaken to inform the draft Shropshire Local Plan is proportionate and robust. This assessment has been informed by and directly informed the draft Policies within the draft Shropshire Local Plan.	No	General Comments - Viability

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0487	B015 Cont'd						<p>☒ Policy DP1 Bullet Point 6 (see detailed response). The financial dynamics of older persons housing are different to general housing. Build costs are higher due to specific design criteria suited to the needs of older people, a greater gross to net floor area for non-saleable shared facilities, elongated construction / sales periods and cashflows as no individual units can be occupied until communal areas are completed, which means substantial upfront investment before any return on capital is received. It is noted that sheltered and extra care housing schemes have not been tested. Such schemes will be subject to viability assessment at planning application stage (para 4.78) ;</p> <p>☒ Policy DP12 (see detailed response). There are significant additional costs associated with biodiversity gain. The DEFRA Biodiversity Net Gain &amp; Local Nature Recovery Strategies: Impact Assessment Table 14 : Net Gain Delivery Costs (Residential) sets out regional costs (based on 2017 prices) in West Midlands of £18,527 per hectare of development based on a central estimate but there are significant increases in costs to £63,725 per hectare for off-site delivery under Scenario C. The Council's assessment tests £21,000 per hectare. There may also be an impact on gross / net site acreage ratio, which is not considered. The Government is committed to continued engagement with the housebuilding industry to address concerns and risks. The Government has confirmed that more work needs to be undertaken to address viability concerns raised by the housebuilding industry in order that net gain does not prevent, delay or reduce housing delivery ;</p> <p>☒ Policy SP3 Bullet Point 2a &amp; Policy DP11 Bullet Points 1a – 1d The Council's updated viability assessment should include additional costs for the Future Homes Standard. The Government's estimated cost for Option 2 (interim step of 31% reduction in carbon emissions compared to the current Part L 2013 requirements) is £4,847 per dwelling ;</p> <p>☒ Policy SP3 Bullet Point 1f &amp; Policy DP28 Bullet Point 3d. The Department for Transport - Electric Vehicle Charging in Residential &amp; Non-Residential Buildings consultation estimated an installation cost of approximately £976 per EVCP plus any costs for upgrading local electricity networks, which under the Government's proposal automatically levies a capped figure of £3,600 on developers therefore this figure should also be included in the Council's viability assessment. The supply from the power grid is already constrained in many areas across the country. The HBF and its Members have serious concerns about the capacity of the existing electrical network in the UK. Major network reinforcement will be required across the power network to facilitate the introduction of EVCPs and the move from gas to electric heating as proposed under the Future Homes Standard. These costs can be substantial and can drastically affect the viability of developments. If developers are funding the potential future reinforcement of the National Grid network at significant cost, this will have a significant impact on their businesses and potentially jeopardise future housing delivery. The Council's assessment excludes any costs for upgrading the local network.</p> <p>Viability assessment is highly sensitive to changes in its inputs whereby an adjustment or an error in any one assumption can have a significant impact on the viability of development.</p> <p>After sensitivity testing, the Viability Study concludes that :- ☒ within the South area, it is recommended that the Council only includes larger and medium sized greenfield sites if there is a confirmation from the landowner or site promoters that a policy compliant scheme can be delivered. Alternatively, the Council could seek more smaller sites (below 50 units) and substitute these for the larger sites (paras 12.92 &amp; 12.93); ☒ in the North area, the Council should be cautious about relying on development (para 12.97) ; and ☒ no firm conclusions are drawn about the strategic sites around Shrewsbury because the Council is still working up the assessment of the strategic infrastructure and mitigation requirements. It is recommended that that the Council continues to engage with developers / landowners (paras 12.78 – 12.80).</p>
A0014	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 2.31	Not Specified	Not Specified	Not Specified	Due to the Ecological and Climate Emergency we should be moving towards a zero carbon economy now, the vision should be about seeking to complete this transition.
A0123	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Vision	No	No	Yes	Support the principle of the Vision. Would seek assurances that planning applications will be determined with the Vision and aspirations of the Local Plan as a material consideration. The Vision makes it clear development which impacts negatively on public safety, health and economic productivity will be resisted. Given the extent and form of development proposed at Shrewsbury Sustainable Urban Extension (SUE) West and within the NWRR, consider these developments will result in detrimental levels of noise, air and light pollution to Oxon Hall caravan park, contrary to the Vision.
A0348	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Spatial Vision, para 2.31	Not Specified	Yes	Not Specified	Historic England welcomes the inclusion of the aspiration that the County's historic and natural environmental assets will be protected and enhanced (paragraph 2.31).
A0349	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Vision and Strategy	Not Specified	Not Specified	Not Specified	Natural England advises that the Plan's vision and emerging development strategy addresses impacts and opportunities for the natural environment. We note the aspiration to protect and enhance the environment and move towards a zero carbon economy. We note the Strategic Approach and while Natural England has no comment on the numbers of new dwellings required we support the approach overall.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0487	B015 Cont'd			No	General Comments - Viability
A0014	B003	Reword along the following lines: 'as Shropshire moves towards completing its progress to a zero-carbon economy'.	Noted. The draft Spatial Vision recognises the importance of and identifies the need to move positively towards a zero-carbon economy. The draft Spatial Vision would be implemented through the draft Policies proposed within the draft Shropshire Local Plan. The Council considers that the approach taken to climate change and reducing carbon emissions throughout the draft Shropshire Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	Spatial Vision
A0123	B002	Make amendments to the draft policies to secure greater protection of Oxon Hall caravan park and the amenities of the wider population from inappropriate development.	Noted. The draft Spatial Vision would be implemented through the draft Policies proposed within the draft Shropshire Local Plan. These draft Policies are considered to provide an appropriate framework for managing future development proposals.	No	Spatial Vision
A0348	B004	n/a	Noted; no actions proposed.	No	Spatial Vision
A0349	B006	n/a	Noted.	No	Spatial Vision

A0393	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	Active and sustainable solutions to the town's transport challenges are the only effective ways to reduce congestion, poor air quality and road deaths/injuries & better lives. As described in the RTPi report (Net Zero Transport: the role of spatial planning and place-based solutions, Jan 2021), spatial planning and the transport systems need to be considered together to create pathway to net zero greenhouse gas emissions. Given national & local climate emergency declarations needs to be a central component of this Local Plan. The RTPi, 2021 identifies that the planning system should prioritise urban renewal that enables growth while achieving a substantial reduction in travel demand & indicates that this should focus on maximising the potential for local living ( by ensuring access to a wide range of services & facilities by walking and cycling) with a key role for increased flexible & home working, digital service delivery & community spaces, alongside investment in place. The draft Local Plan fails to ensure that key planning decisions during its life will contribute to the pathway to achieving net zero. The recent Environmental Audit Committee report on Greening the Post COVID Recovery identifies Covid 19 crisis as a symptom of a growing ecological emergency highlights the urgency of tackling climate change as part of economic recovery. Particular issue with respect to the interaction of spatial planning and transport as Shropshire Council has failed to update its Local Transport Plan in time to inform the draft Local Plan. Spatial Vision' in Para 2.31 of the draft plan has admirable objectives but vision will not be delivered. Submission details against each policy how vision will not be achieved.
A0629	B007-1	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	Active and sustainable solutions to the town's transport challenges are the only effective ways to reduce congestion, poor air quality and road deaths/injuries & better lives. As described in the RTPi report (Net Zero Transport: the role of spatial planning and place-based solutions, Jan 2021), spatial planning and the transport systems need to be considered together to create pathway to net zero greenhouse gas emissions. Given national & local climate emergency declarations needs to be a central component of this Local Plan. The RTPi, 2021 identifies that the planning system should prioritise urban renewal that enables growth while achieving a substantial reduction in travel demand & indicates that this should focus on maximising the potential for local living ( by ensuring access to a wide range of services & facilities by walking and cycling) with a key role for increased flexible & home working, digital service delivery & community spaces, alongside investment in place. The draft Local Plan fails to ensure that key planning decisions during its life will contribute to the pathway to achieving net zero. The recent Environmental Audit Committee report on Greening the Post COVID Recovery identifies Covid 19 crisis as a symptom of a growing ecological emergency highlights the urgency of tackling climate change as part of economic recovery. Spatial Vision' in Para 2.31 of the draft plan has admirable objectives but vision will not be delivered. Submission details against each policy how vision will not be achieved.
A0014	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 (2)	Not Specified	Not Specified	Not Specified	Reference forthcoming Nature Recovery Strategy and Climate Strategy.
A0123	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1	No	No	Yes	Support the principles in draft Policy SP1. However imperative they are robustly applied in the decision making process (including in relation to the Shrewsbury Sustainable Urban Extension (SUE) West and the North West Relief Road (NWRR) to ensure that do not result in detrimental levels of air, light and noise pollution, and that the existing businesses and the wider local environment are protected). Draft Policy SP1 makes reference to the emerging Shrewsbury Big Town Plan (SBTP). However, the two documents are not consistent. For example employment land on Castle Foregate is proposed to represent protected employment land in the draft Shropshire Local Plan, but in the SBTP is proposed for offices and residential (occupiers have no desire to move and would object to proposals that would involve this). This raises concerns about soundness of the draft Shropshire Local Plan.
A0125	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 and STC002/P58a	Not Specified	No	Not Specified	Aims of draft Policy SP1 are not supported by or conflict with other policies in the draft Shropshire Local Plan. In particular development of proposed employment allocations STC002 and P58a at Stanmore would not "contribute to meeting local needs" or to "making settlements more sustainable" as required within draft Policy SP1. The settlement at Stanmore is very small and does not require 11.5ha of employment development to meet its needs or to become more sustainable. The Policy is not based on sound evidence and is not justified as being a sound basis for the development of more detailed policies in the draft Shropshire Local Plan.
A0133	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 (STC002 and P58a)	Not Specified	No	Not Specified	Aims of draft Policy SP1 are not supported by or conflict with other policies in the draft Shropshire Local Plan. In particular development of proposed employment allocations STC002 and P58a at Stanmore would not "contribute to meeting local needs" or to "making settlements more sustainable" as required within draft Policy SP1. The settlement at Stanmore is very small and does not require 11.5ha of employment development to meet its needs or to become more sustainable. The Policy is not based on sound evidence and is not justified as being a sound basis for the development of more detailed policies in the draft Shropshire Local Plan.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0393	B001	No specific modifications identified. Submission details against each policy how vision will not be achieved.	Noted. The draft Spatial Vision recognises the importance of and identifies the need to move positively towards a zero-carbon economy. The draft Spatial Vision would be implemented through the draft Policies proposed within the draft Shropshire Local Plan. The Council considers that the approach taken to climate change and reducing carbon emissions throughout the draft Shropshire Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	Spatial Vision
A0629	B007-1	No specific modifications identified. Submission details against each policy how vision will not be achieved	Noted. The draft Spatial Vision recognises the importance of and identifies the need to move positively towards a zero-carbon economy. The draft Spatial Vision would be implemented through the draft Policies proposed within the draft Shropshire Local Plan. The Council considers that the approach taken to climate change and reducing carbon emissions throughout the draft Shropshire Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	Spatial Vision
A0014	B004	Include reference to forthcoming Nature Recovery Strategy and Climate Strategy.	Noted. Documents listed in Para 2 of draft Policy SP1 are not intended to represent an exhaustive list, rather it highlights that, where appropriate, proposals need to reflect relevant considerations from other Shropshire Council strategies. The draft Shropshire Local Plan includes policies relating to the natural environment (including DP12. Natural Environment; DP14. Green Infrastructure; DP15. Open Space and Recreation; DP16. Landscaping of New Development and DP17. Landscape and Visual Amenity) and managing climate change (including SP3. Climate Change; DP11. Minimising Carbon Emissions; DP21. Flood Risk). Future Nature Recovery Strategy is specifically referenced within draft Policy DP12. The Natural Environment. The Climate Change Strategy Framework approved by Shropshire Council on the 19th December 2019 is specifically referenced within the Explanation of draft Policy SP3. Climate Change.	No	SP1. The Shropshire Test
A0123	B004	Ensure the Shrewsbury Big Town Plan is consistent with the draft Shropshire Local Plan or remove reference to it.	Shropshire Council considers that draft Policy SP1 and the objectives of the Big Town Plan and its associated masterplan documents are consistent. We would note that the draft Shropshire Local Plan, if adopted, would represent the starting point for decision making in accordance with Planning law, but that the specific proposals within or resulting from the Big Town Plan would be material in decision making.	No	SP1. The Shropshire Test
A0125	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test
A0133	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test

The settlement at Stanmore is very small and does not require 11.5ha of employment development to meet its needs or to become more sustainable. The Policy is not based on sound evidence and is not justified as being a sound basis for the development of more detailed policies in the draft Shropshire Local Plan.
A0140	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 (STC002 and P58a)	Not Specified	No	Not Specified	Aims of draft Policy SP1 are not supported by or conflict with other policies in the draft Shropshire Local Plan. In particular development of proposed employment allocations STC002 and P58a at Stanmore would not “contribute to meeting local needs” or to “making settlements more sustainable” as required within draft Policy SP1. The settlement at Stanmore is very small and does not require 11.5ha of employment development to meet its needs or to become more sustainable. The Policy is not based on sound evidence and is not justified as being a sound basis for the development of more detailed policies in the draft Shropshire Local Plan.

A0233	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 (STC002 and P58a)	Not Specified	No	Not Specified	Aims of draft Policy SP1 are not supported by or conflict with other policies in the draft Shropshire Local Plan. In particular development of proposed employment allocations STC002 and P58a at Stanmore would not “contribute to meeting local needs” or to “making settlements more sustainable” as required within draft Policy SP1. The settlement at Stanmore is very small and does not require 11.5ha of employment development to meet its needs or to become more sustainable. The Policy is not based on sound evidence and is not justified as being a sound basis for the development of more detailed policies in the draft Shropshire Local Plan.
A0255	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 (STC002 and P58a)	Not Specified	No	Not Specified	Consider other draft Policies in the draft Shropshire Local Plan conflict with the aims of draft Policy SP1. This means the plan will not be effective in delivering the aims of draft Policy SP1. For example, proposed allocations at Stanmore Industrial Estate (STC002 and P58a) conflict with draft Policy SP1 as they will not support health and well-being of any particular community, will not contribute to creating or maintaining any cohesive community, will have little if any positive effect on climate change, will not preserve or enhance any natural environment, will not raise design standards or enhance the County’s character or historic environment, it has not been demonstrated that it will make efficient use of land – as the sites proposed are greenfield it is questionable whether they can be regarded as being more efficiently used for employment purposes, and it is highly unlikely any future proposals for the sites will provide any level of infrastructure that goes beyond the minimum necessary for the proposal in hand. STC002 and P58a conflict with draft Policy SP1 which states “development will contribute to meeting local needs and making settlements more sustainable”. Employment needs of the small settlement at Stanmore (clearly regarded as a separate settlement by Shropshire Council as it was previously proposed for a new garden village) would not support the existing Stanmore Industrial Estate, let alone further additions. As such the sites do not meet any identified local need and would not make Stanmore more sustainable. STC002 and P58a have not been positively prepared as it will not meet the area’s assessed need, is not justified or evidenced as there is no need for the development, will not be effective because there is no evidence to demonstrate that the allocations will be taken up in the short term when it is clear that operators are moving away from the Estate, and is in clear conflict with national policy as the proposed sites are located in open countryside and in Green Belt. As such it conflicts with para 35 of the National Planning Policy Framework (NPPF). The issue of conflict between draft Policies, and in particular with draft Policy SP1, is a recurring matter in the draft Shropshire Local Plan.
A0256	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 (STC002 and P58a)	Not Specified	No	Not Specified	Aims of draft Policy SP1 are not supported by or conflict with other policies in the draft Shropshire Local Plan. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0145	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test
A0232	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test
A0233	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test
A0255	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	Noted. Shropshire Council considers that the draft Policies of the draft Shropshire Local Plan are consistent and together provide an appropriate vision and framework for the future development of Shropshire to 2038; address needs and opportunities in relation to housing, the local economy, community facilities and infrastructure; and seek to safeguard the environment, enable adaptation to climate change and helps to secure high-quality and accessible design. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	SP1. The Shropshire Test
A0256	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0325	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test
A0338	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test
A0340	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test
A0341	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test
A0342	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test
A0343	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test
A0347	B012	n/a	Noted. Shropshire Council considers the proposed wording of draft Policy SP1 is appropriate. The draft Shropshire Local Plan should be read as a whole. Whilst it presents an opportunity to ensure a comprehensive and co-ordinated approach is pursued to the planning and development of Shrewsbury and to ensure development is consistent with the objectives of the Shrewsbury Big Town Plan and associated masterplan documents which are material considerations in decision making, other proposed policies, such as DP21 which relates to flood risk, remain relevant to all development proposals across Shropshire.	No	SP1. The Shropshire Test
A0348	B005	n/a	Noted.	No	SP1. The Shropshire Test

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0381	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1	Not Specified	Not Specified	Not Specified	Draft Policy SP1 is aimed at providing a clear indication to future applicants of the high standards that the Council will seek to apply in managing development. The former Travis Perkins site provides an opportunity to accommodate a residential development of a high standard of design, which would contribute towards the creation of a sustainable community in the local area, address flood risk issues on the site and beyond and enhance pedestrian and cycle linkages with Shrewsbury town centre, in accordance with the objectives of this emerging policy.
A0384	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 (STC002 and P58a)	Not Specified	No	Not Specified	Aims of draft Policy SP1 are not supported by or conflict with other policies in the draft Shropshire Local Plan. In particular development of proposed employment allocations STC002 and P58a at Stanmore would not “contribute to meeting local needs” or to “making settlements more sustainable” as required within draft Policy SP1. The settlement at Stanmore is very small and does not require 11.5ha of employment development to meet its needs or to become more sustainable. The Policy is not based on sound evidence and is not justified as being a sound basis for the development of more detailed policies in the draft Shropshire Local Plan.
A0388	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1(1 )	Not Specified	No	Not Specified	The Shropshire Test fails to ensure that where plans are adopted for certain areas, the impacts on other local communities are reviewed and where necessary, addressed. For example, the Shrewsbury Big Town Plan seeks to remove a considerable amount of bus traffic from the town centre by closing the bus station and requiring buses to terminate at the existing park and ride locations. This makes use of public transport to access Shrewsbury Town Centre more difficult as two buses will be required from Baschurch. To access the hospital, 4 buses will be required. This will make the use of buses less attractive, further reducing their sustainability and leading to further services being cut. Whilst the aim of reducing pollution and congestion in the centre of Shrewsbury is to be applauded, policies must not be Shrewsbury centric and must provide a wider solution that supports the whole of the Shropshire community.
A0393	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	<p>Spatial Vision’ in Para 2.31 of the draft plan has admirable objectives but vision will not be delivered by the Plan as set out in SP1.</p> <p>Re Part a) Supports the health, well-being and safety of communities: Selection of higher target for house building than government targets based on a misguided assumption that building houses equals growth and this in turn leads to health and happiness. This does not correlate with majority preference by local people and town &amp; parish councils for lower rates of building. No detail on how building targets will translate into sustainable development objectives, meet vision aspirations or how residential building is part of a pathway to net zero greenhouse gas emissions for the county.</p> <p>Re part b) Supports cohesive communities: An integrated transport network that does not exclude certain groups is a key requirement for community cohesion. Shropshire Council cannot demonstrate that this has been taken into account in draft Local Plan development as the Local Transport Plan is out of date and a new plan will not be in place before Sept 2021.</p> <p>No definition of ‘right location’ &amp; how will this be assessed and measured? In order to deliver carbon reduction and identify pathway to net zero carbon emissions, definition required and specification of the conditions that must be met to reduce car use and increase the use of walking, cycling and buses</p> <p>Concern in line with issues highlighted in the 2018 report ‘Transport for new homes’ that the majority of new housing developments in the draft plan located in places with inadequate/limited walking, cycling and public transport connections to surrounding areas forcing car-dependency and adding carbon emissions. Lack of joined-up thinking on how to facilitate and provide the infrastructure to support walking, cycling and public transport for new residents. Absorbing housing demand from adjacent urban areas into a largely rural area is contradictory to net zero transport system aspirations. There is no reference to car-free housing potential or to site selection based on trip estimation data (TRICS) by different modes. Contrary to net zero carbon targets that trip estimation for different locations and configurations of walking, cycling and bus use opportunities have not been factored into locational decisions for new homes. :Whilst draft plan says that it references the climate change strategy, ignoring car trip generation and its impact on increasing transport’s carbon emissions fails to adequately address the largest contributor to carbon emissions in the county (transport) mainly because the local transport plan out of date.</p> <p>Re part c) Addresses the causes and mitigates the impacts of climate change; Whilst the NPPF does not make explicit the need for the Local Plan to proactively set out the route to a net zero society, as a result of climate change emergency declarations, it should form a core part of the definition of sustainable development. The plan needs to recognise importance of spatial planning in the transition to a net zero transport system and set out how planned developments will contribute to this. Given Plan time period &amp; carbon reduction targets by 2050, together with consequences of failing to deliver reductions, every part of the Plan should consider whether it is reducing or adding to carbon emissions. If any policy cannot be evidenced to its outcome measured in terms of carbon reduction it must be amended. Where a policy is evidenced as increasing carbon, it should be removed. To illustrate respondent references Thames Gateway Bridge (2007) Inspector’s Report which identifies greenhouse gas emissions linked to private cars and states that even a small increase offers no assistance in achieving the reduction committed to by the Government. The inspector concluded that the proposed TGB would not comply with national transport planning policy and result in a negative contribution to the Government’s commitment to reducing greenhouse gases &amp; recommended that the Bridge should not go ahead. On this basis it is inappropriate for the Local Plan to have exclusions from the requirement to contribute to the net zero pathway on the grounds of economic viability. Therefore, if a development cannot be economically developed in a way that contributes net zero pathway it should not proceed. Thus, references to such exemptions throughout the Plan should be removed.</p> <p>Re part d) Conserves and enhances the high-quality natural environment and provides opportunities for green and blue networks; In respect of blue networks, the promotion of the Shrewsbury North West Relief Road (NWRR) by Shropshire Council within the Local Plan is inconsistent with Para 3 of DP19 (water resources and water quality) as the proposed road includes a major roundabout across the inner Source Protection Zone (SPZ1) of the Shelton Water Supply. Re part e) Raises design standards and enhances the area’s character and historic environment: there should be no exemptions from requirements to comply with measures that contribute to the pathway to net zero greenhouse gas emissions. f) Makes efficient use of land; and g) Provides sufficient infrastructure, services, facilities, and where necessary provides opportunities for their enhancement.</p> <p>The largest council promoted scheme detailed in the plan is the proposed North West Relief Road which is likely increase car use and carbon emissions over the plan period. It is therefore not appropriate for the Local Plan to include the promotion of this scheme.</p>
A0410	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1	Not Specified	No	Not Specified	<p>Shropshire Council declared a climate emergency in May 2019, recognising the overwhelming importance of climate change considerations. Surprisingly, this declaration is mentioned only twice in the whole Draft Shropshire Local Plan, so there is little sense of an emergency within it.</p> <p>Shropshire Council was also one of the founders of the Shropshire Climate Action Partnership (SCAP) and has strongly supported SCAP’s work to develop its Zero Carbon Shropshire (ZCS) Plan. However, there is no sense of the importance of this within the draft Spatial Vision or draft Policy SP1.</p> <p>To that extent, draft Policy SP1 is unsound. Suggest the draft Spatial Vision is incorporated within draft Policy SP1 and the text is amended to better reflect the over-riding importance of the climate emergency.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0381	B001	n/a	Noted.	No	SP1. The Shropshire Test
A0384	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test
A0388	B002	Add the following sub-paragraph to Paragraph 1: 'h. Ensures all communities are not adversely affected by changes in primary infrastructure, services, facilities or transport '	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. This includes that development will provides sufficient infrastructure, services, facilities, and where necessary provides opportunities for their enhancement.	No	SP1. The Shropshire Test
A0393	B002	Modify policy to reflect comments. Comment sets out issues & weaknesses in draft Plan's approach and highlights concerns to be addressed. The following specific modifications identified:- -definition required of 'right location' & how will this be assessed and measured and specification of the conditions that must be met to reduce car use and increase the use of walking, cycling and buses. -part (e) remove exemptions from requirements to comply with measures that contribute to the pathway to net zero greenhouse gas emissions.	Noted. The draft Shropshire Local Plan should be read as a whole. Draft Policy SP1 is a 'gateway' that supplements the proposed vision and sets the context for the wider development framework within the draft Shropshire Local Plan. It is considered appropriate for all proposals to have consideration to the strategic issues identified within draft Policy SP1 as a starting point. The remaining proposed strategic and development management policies of the draft Shropshire Local Plan then expand on these issues. Draft Policy SP2 specifies that to achieve a sustainable and appropriate pattern of development which also maximises investment opportunities, new development will be focused in the urban areas. This will be complemented by appropriate new development in rural areas, in recognition of the rurality of much of Shropshire.	No	SP1. The Shropshire Test
A0410	B003	Incorporate the spatial vision into draft Policy SP1. Amend the spatial vision (including completion of the transition to a zero carbon economy by 2030, providing all residents access to zero carbon homes and optimising economic productivity consistent with zero carbon aims) and draft Policy SP1 (including all new development to be zero carbon by 2030) to better reflect the climate emergency - proposed wording provided within the representation. Include reference to Shropshire Climate Action Partnership's Zero Carbon Shropshire Plan.	Noted. The draft Shropshire Local Plan should be read as a whole. It is considered that the draft Shropshire Local Plan identifies an appropriate vision and framework for the future development of Shropshire to 2038 and addresses such issues as enabling adaptation to climate change. This positively responds to the climate emergency declared by Shropshire Council. With regard to the draft Spatial Vision, it recognises the importance of and identifies the need to move positively towards a zero-carbon economy. With regard to draft Policy SP1, it recognises the need for development to make settlements more sustainable and addresses the causes and mitigate the impacts of climate change.	No	SP1. The Shropshire Test

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0514	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP1. The Shropshire Test

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0621	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1	Not Specified	Yes	Not Specified	<p>Draft Policy SP1 sets out those issues considered of most importance in supporting Shropshire's growth and ensuring this takes place in a sustainable manner. Ruckley Estate and Harrow Estates support the approach that development at Shifnal will contribute to meeting local needs in the right place and should provide the right mix of new housing and employment. The principle of making efficient use of land whilst also balancing design, community and natural environment factors is also considered a sound policy basis. The allocation of circa 15ha of employment floorspace at SHF018b and SHF018d reflects this ambition, focusing development in a highly sustainable location to the east of the settlement of Shifnal, the strategy can assist in achieving a greater level of self-containment for the town and reducing the need to travel, which has substantial benefits across all three objectives of sustainability (economic, social and environmental, noting with respect to the latter that Shropshire Council has declared a climate change emergency). The proximity with the Lamledge Industrial Area (Shifnal Industrial Estate) and proposed residential allocations further ensures that it makes a key contribution to supporting the creation of a cohesive community to the east of Shifnal, thus according with part b) of the draft Policy.</p> <p>The proposed design approach to SHF018b and SHF018d is also considered to align with the expectation of part e) of the draft Policy for development to raise design standards, as well as making efficient use of land in line with part f) of the draft Policy. This is outlined in more detail in the accompanying Shifnal Settlement and Growth Study and Section 4 of these representations.</p> <p>Equally, sites SHF032 and SHF018c are considered to adhere to the strategic objectives and requirements of The Shropshire Test. These alternative safeguarded land options are sustainably located within walking distance of existing Shifnal town centre services and, being located on the east side of the town, clearly look towards Shifnal for these services and to the employment allocations for work opportunities, rather than Telford. This again will encourage local movement, reducing the requirement or desire to make longer journeys and therefore contributing to settlement containment. To this extent they should be preferred, and clearly, the alternative would also ensure the provision of additional community facilities and green space for the benefit of existing and future residents, supporting the creation of cohesive communities, thus according with parts b) and g) of the Shropshire Test.</p>
A0623	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1	Not Specified	Not Specified	Not Specified	<p>In the context of this test, Albrighton is a sustainable location for further housing growth given its excellent social, community and transport infrastructure, and the approach advanced in the draft plan to support the growth of RAF Cosford as a strategic employment site (Policy S21). It is on the edge of the Black Country and wider Greater Birmingham conurbation, with a regular rail service to Wolverhampton, Birmingham City Centre, Telford and Shrewsbury, and is in close proximity to the M54 growth corridor (comprising the employment sites at i54, ROF Featherstone, and the estates on Wobaston Road).</p>
A0629	B007-2	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	<p>Spatial Vision' in Para 2.31 of the draft plan has admirable objectives but vision will not be delivered by the Plan as set out in SP1.</p> <p>Re Part a) Supports the health, well-being and safety of communities: Selection of higher target for house building than government targets based on a misguided assumption that building houses equals growth and this in turn leads to health and happiness. This does not correlate with majority preference by local people and town &amp; parish councils for lower rates of building. No detail on how building targets will translate into sustainable development objectives, meet vision aspirations or how residential building is part of a pathway to net zero greenhouse gas emissions for the county.</p> <p>Re part b) Supports cohesive communities: An integrated transport network that does not exclude certain groups is a key requirement for community cohesion. Shropshire Council cannot demonstrate that this has been taken into account in draft Local Plan development as the Local Transport Plan is out of date and a new plan will not be in place before Sept 2021.</p> <p>No definition of 'right location' &amp; how will this be assessed and measured? In order to deliver carbon reduction and identify pathway to net zero carbon emissions, definition required and specification of the conditions that must be met to reduce car use and increase the use of walking, cycling and buses</p> <p>Concern in line with issues highlighted in the 2018 report 'Transport for new homes' that the majority of new housing developments in the draft plan located in places with inadequate/limited walking, cycling and public transport connections to surrounding areas forcing car-dependency and adding carbon emissions. Lack of joined-up thinking on how to facilitate and provide the infrastructure to support walking, cycling and public transport for new residents. Absorbing housing demand from adjacent urban areas into a largely rural area is contradictory to net zero transport system aspirations. There is no reference to car-free housing potential or to site selection based on trip estimation data (TRICS) by different modes. Contrary to net zero carbon targets that trip estimation for different locations and configurations of walking, cycling and bus use opportunities have not been factored into locational decisions for new homes. Whilst draft plan says that it references the climate change strategy, ignoring car trip generation and its impact on increasing transport's carbon emissions fails to adequately address the largest contributor to carbon emissions in the county (transport) mainly because the local transport plan out of date.</p> <p>Re part c) Addresses the causes and mitigates the impacts of climate change; Whilst the NPPF does not make explicit the need for the Local Plan to proactively set out the route to a net zero society, as a result of climate change emergency declarations, it should form a core part of the definition of sustainable development. The plan needs to recognise importance of spatial planning in the transition to a net zero transport system and set out how planned developments will contribute to this. Given Plan time period &amp; carbon reduction targets by 2050, together with consequences of failing to deliver reductions, every part of the Plan should consider whether it is reducing or adding to carbon emissions.</p> <p>If any policy cannot be evidenced to its outcome measured in terms of carbon reduction it must be amended. Where a policy is evidenced as increasing carbon, it should be removed. To illustrate respondent references Thames Gateway Bridge (2007) Inspector's Report which identifies greenhouse gas emissions linked to private cars and states that even a small increase offers no assistance in achieving the reduction committed to by the Government. The inspector concluded that the proposed TGB would not comply with national transport planning policy and result in a negative contribution to the Government's commitment to reducing greenhouse gases &amp; recommended that the Bridge should not go ahead. On this basis it is inappropriate for the Local Plan to have exclusions from the requirement to contribute to the net zero pathway on the grounds of economic viability. Therefore, if a development cannot be economically developed in a way that contributes net zero pathway it should not proceed. Thus, references to such exemptions throughout the Plan should be removed.</p> <p>Re part d) Conserves and enhances the high-quality natural environment and provides opportunities for green and blue networks; In respect of blue networks, the promotion of the Shrewsbury North West Relief Road (NWRR) by Shropshire Council within the Local Plan is inconsistent with Para 3 of DP19 (water resources and water quality) as the proposed road includes a major roundabout across the inner Source Protection Zone (SPZ1) of the Shelton Water Supply.</p> <p>Re part e) Raises design standards and enhances the area's character and historic environment: there should be no exemptions from requirements to comply with measures that contribute to the pathway to net zero greenhouse gas emissions.</p> <p>f) Makes efficient use of land; and g) Provides sufficient infrastructure, services, facilities, and where necessary provides opportunities for their enhancement.</p> <p>The largest council promoted scheme detailed in the plan is the proposed North West Relief Road which is likely increase car use and carbon emissions over the plan period. It is therefore not appropriate for the Local Plan to include the promotion of this scheme</p>

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 and Para 2.31	Yes	No	Yes	The draft Vision is not consistent with Shropshire Council objectives that Shropshire achieves net zero carbon by 2030. Consider the text of draft Policy SP1 does not reflect the draft Vision, nor does it the recently adopted Shropshire Council Climate Plan, so is not sound and incomplete.
A0629	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1	Yes	No	Yes	Para 2 of draft Policy SP1 should include reference to the Shropshire Climate Change Framework (acknowledges declaration of a climate emergency, establishment of a strategic framework to achieve the objective of net zero corporate carbon performance by 2030 and supporting achievement of a suitable objective for net zero carbon Shropshire. Shropshire Council subsequently became a member/supporter of Shropshire Climate Action Partnership and the Zero Carbon Shropshire Plan with its objective of achieving net zero carbon Shropshire by 2030. Policies should aim to secure radical carbon reductions in line with a trajectory for the authority area that is consistent with Shropshire achieving net zero carbon by 2030 and the UK achieving full carbon neutrality by 2050, and in the short term should test the policy options available to achieve the highest level of ambition possible to meet this goal.
A0655	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1	Not Specified	Not Specified	Not Specified	The first (SP1) is called "The Shropshire Test" – an idea taken from the Big Town Plan that identifies 7 main aims that developments should meet. (for example: "Supports the health, well-being and safety of communities"). This is meant to "give a clear indication of the high standards the Council will seek...." 10 are now identified in the Governments "Planning for the Future" document. However, the document assumes that the 7 principles will be taken into account by developers seeking planning permission in Shropshire.
A0662	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1	Not Specified	Yes	Not Specified	Telford & Wrekin Council support the aims and direction of the gateway 'Shropshire Test' Policy SP1 which sets out several priorities that new development should address. This includes supporting cohesive communities, mitigating the impacts of climate change and promoting green and blue infrastructure networks among other issues. In this regard Policy SP1 contributes to a positively prepared Local Plan. The provision of sufficient infrastructure from development proposals is also referenced in the Shropshire Test and this is of particular interest to Telford & Wrekin Council, under the Duty to Cooperate. Development proposals in locations within close proximity to Telford & Wrekin Council need to be considered on a cross-boundary basis given the infrastructure implications. Reference is made below to site allocations and the cross-boundary implications of those proposals.
A0674	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1	Not Specified	Not Specified	Not Specified	Support the aspirations of the draft Shropshire Local Plan and that it seeks to deliver sustainable development in the appropriate locations providing the right mix of new housing, employment etc.
A0678	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 (STC002 and P58a)	No	No	No	Aims of draft Policy SP1 are not supported by or conflict with other policies in the draft Shropshire Local Plan. In particular development of proposed employment allocations STC002 and P58a at Stanmore would not "contribute to meeting local needs" or to "making settlements more sustainable" as required within draft Policy SP1. The settlement at Stanmore is very small and does not require 11.5ha of employment development to meet its needs or to become more sustainable. The Policy is not based on sound evidence and is not justified as being a sound basis for the development of more detailed policies in the draft Shropshire Local Plan. Furthermore exceptional circumstances as required by para 137 of the National Planning Policy Framework (NPPF) have not been done.
A0679	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 (STC002 and P58a)	No	No	No	Aims of draft Policy SP1 are not supported by or conflict with other policies in the draft Shropshire Local Plan. In particular development of proposed employment allocations STC002 and P58a at Stanmore would not "contribute to meeting local needs" or to "making settlements more sustainable" as required within draft Policy SP1. 1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B008	The draft vision for Shropshire should be amended to replace reference of positively moving towards a zero carbon economy to moving forwards as a zero carbon economy. Draft Policy SP1 should be amended to include "Regards the Spatial Vision for Shropshire set out in 2.31 above as a mandatory test for any decision including any planning decision made by Shropshire Council."	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	SP1. The Shropshire Test
A0629	B009	Revise para 2 of draft Policy SP1 to read: "In addition, and where appropriate proposals should seek to reflect relevant considerations of Shropshire Council's objectives for net zero carbon Shropshire by 2030, and other strategies, including its Community Led Plans, Local Economic Growth Strategies (including the Shrewsbury Big Town Plan), the Local Transport Plan, the Public Health Strategy and the need for all new planned development to be of zero carbon standard from 2030 in line with declared objectives responding to the Declared Climate Emergency."	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	SP1. The Shropshire Test
A0655	B002	The principles appear very open to interpretation and consequently unenforceable.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. The draft Shropshire Local Plan should be read as a whole, together the proposed draft Policies are considered to provide an appropriate framework for the future development of Shropshire to 2038.	No	SP1. The Shropshire Test
A0662	B001	n/a	Noted.	No	SP1. The Shropshire Test
A0674	B001	N/A	Noted.	No	SP1. The Shropshire Test
A0678	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	SP1. The Shropshire Test
A0679	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Draft Policy SP1 is a 'gateway' policy and establishes those issues considered of most importance in supporting Shropshire growth to occur in a sustainable manner. It is considered that this policy is consistent with other policies within the draft Shropshire Local Plan. Sites STC002 and P58a are proposed for allocation to contribute towards achieving the proposed development strategy for Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0682	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1	Not Specified	Not Specified	Not Specified	Land between Park Lane and the A464, which is identified as proposed safeguarded land, aligns with the guiding principles set out in draft Policy SP1, as: -It is in a highly sustainable location with good access to services and facilities and all necessary infrastructure can be delivered (informed by vision framework appended to this representation). It also adjoins and can integrate into the existing built form/community, draw new households into the settlement increasing vitality and viability of services/facilities. -It can deliver 175-200 dwellings consisting of appropriate mix of housing, including policy complaint affordable housing, to meet need. -It will achieve high-quality design, including sufficient water attenuation can be provided to address climate change and a strong landscape framework including open space. -Its development will boost the local economy.
A0008	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	Object to the intention to deliver 'around 30,800 dwellings'. Whilst consistent with the adopted Core Strategy it is no longer so with national policy. Also disagree with vagueness in para 2 with the 'around' figure.
A0014	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2(2)	Not Specified	Not Specified	Not Specified	Concerned scale of residential and employment development proposed is too high, exceeds local housing need and is not a sustainable approach. It focuses on economic growth rather than pursuing the three pillars of sustainable development (economic, social and environmental) in a mutually supportive way. Concerns filter down to the various proposals for Place Plan Areas / Sites.
A0014	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2(5b)	Not Specified	Not Specified	Not Specified	Para 5b of draft Policy SP2. Not all Principal and Key Centres are equal in their ability to accommodate sustainable growth.
A0014	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 3.17	Not Specified	Not Specified	Not Specified	The purpose of the local plan is surely to achieve sustainable development not to achieve the aspirations of the Economic Growth Strategy.
A0014	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 3.28(b)	Not Specified	Not Specified	Not Specified	Question the ability of the A5 West strategic corridor to deliver true sustainable economic growth
A0014	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 3.28(d)	Not Specified	Not Specified	Not Specified	Oppose HS2 at the national level as environmental costs outweigh benefits. Identification of a strategic corridor (North East Shropshire and the A41 corridor - which is solely a road transport corridor) linked to HS2 is an example of the unsustainable results of the scheme and such reference is unwelcome.
A0014	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 3.28(e)	Not Specified	Not Specified	Not Specified	Question the ability of the A49 strategic corridor to deliver true sustainable economic growth.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0682	B007	N/A	Noted.	No	SP1. The Shropshire Test
A0008	B001	Amend the housing requirement and use of the word around.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.	No	SP2. Strategic Approach
A0014	B005	Reduce level of residential and employment development proposed.	Concern noted. At the heart of the draft Shropshire Local Plan is the achievement of sustainable development. It is considered that the proposals within the draft Shropshire Local Plan, including in relation to the level of housing and employment development, will contribute to the long term sustainability of Shropshire.	No	SP2. Strategic Approach
A0014	B006	Recognise that not all Principal and Key Centres are equal in their ability to accommodate sustainable growth.	Agreed. Draft Policy SP2 is not intending to suggest that all Principal and Key Centres are equal, but recognises that settlements within each category perform similar roles, as foci for key services and facilities, supporting their and surrounding communities. The draft policy recognises that these settlements are 'diverse' and the specific strategies for these settlements (identified within Policies S1-S18) are predicated on consideration of the characteristics, constraints and opportunities associated with each settlement.	No	SP2. Strategic Approach
A0014	B007	Reduce focus on achieving the Shropshire Economic Growth Strategy.	The draft Shropshire Local Plan seeks to achieve the sustainable development of Shropshire. However, the Local Plan does not sit in isolation; it is supported by and has regard to a number of other strategies produced by the Council and other bodies, including the Economic Growth Strategy for Shropshire. The draft Shropshire Local Plan seeks to respond effectively to these strategies. However in doing so, it should not be categorised as having any one overarching theme. Instead the draft Shropshire Local Plan provides a broad basis for dealing with a number of challenges in a balanced and positive manner.	No	SP2. Strategic Approach
A0014	B008	Remove reference to the A5 West corridor from para 3.28(b).	The draft Shropshire Local Plan is supported by and has regard to a number of other strategies produced by the Council and other bodies, including the Economic Growth Strategy for Shropshire. The Economic Growth Strategy for Shropshire identifies a series of strategic corridors, which are considered the principal rail and/or strategic road routes through the County, which it identifies as the primary focus for major employment development. One such corridor is the A5 West corridor, upon which Oswestry, the largest Principal Centre and second largest settlement is located. The draft Shropshire Local Plan seeks to prioritise significant new development and infrastructure investment into the Strategic, Principal and Key Centres and identified Strategic Sites to create 'growth zones' along the identified 'strategic corridors' through Shropshire and make effective use of the rail and road routes through these corridors. This is considered a sustainable approach to the development of Shropshire.	No	SP2. Strategic Approach
A0014	B009	Remove reference to HS2 from para 3.28(d). Remove reference to the North East Shropshire and the A41 corridor from para 3.28(d).	The draft Shropshire Local Plan is supported by and has regard to a number of other strategies produced by the Council and other bodies, including the Economic Growth Strategy for Shropshire and Government proposals for formation of HS2. Proposals such as HS2 cannot be ignored and would represent an economic opportunity for Shropshire, although it is important to note that none of the proposals in the draft Shropshire Local Plan are dependent on the delivery of this project. The Economic Growth Strategy for Shropshire identifies a series of strategic corridors, which are considered the principal rail and/or strategic road routes through the County, which it identifies as the primary focus for major employment development. One such corridor is the North East Shropshire and the A41 corridor, upon which Whitchurch and Market Drayton are located, both of which are considered Principal Centres within the Shropshire Local Plan. The draft Shropshire Local Plan seeks to prioritise significant new development and infrastructure investment into the Strategic, Principal and Key Centres and identified Strategic Sites to create 'growth zones' along the identified 'strategic corridors' through Shropshire and make effective use of the rail and road routes through these corridors. This is considered a sustainable approach to the development of Shropshire.	No	SP2. Strategic Approach
A0014	B010	Remove reference to the A49 corridor from para 3.28(e).	The draft Shropshire Local Plan is supported by and has regard to a number of other strategies produced by the Council and other bodies, including the Economic Growth Strategy for Shropshire. The Economic Growth Strategy for Shropshire identifies a series of strategic corridors, which are considered the principal rail and/or strategic road routes through the County, which it identifies as the primary focus for major employment development. One such corridor is the A49 corridor, upon which Ludlow, a Principal Centre is located. The draft Shropshire Local Plan seeks to prioritise significant new development and infrastructure investment into the Strategic, Principal and Key Centres and identified Strategic Sites to create 'growth zones' along the identified 'strategic corridors' through Shropshire and make effective use of the rail and road routes through these corridors. This is considered a sustainable approach to the development of Shropshire.	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0020	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	No	Whilst the supporting text to the policy indicates that the Council have applied an uplift to the housing requirement over and above the standard method figure, do not consider that this is sufficient to adequately respond to the worsening market signals identified and that a greater uplift should be applied if the Council are to achieve its objective of securing economic growth. We do not consider that 1,500 dwellings is a sufficient contribution in light of the 27,000 dwelling shortfall in the Black Country.
A0036	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	Of the total housing requirement approximately 25% (7,700) affordables will be provided during the local plan period. It is unclear how this total has been calculated and whether it is realistic given that Policy DP3 – Provision of Affordable Housing seeks a range of 10-20% provision.
A0037	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	No	The proposed housing requirement of around 1,400 dwellings per annum does not meet the Duty to Co-operate and fails the 'positively prepared' and 'consistent with national policy' tests of soundness. -The proposed housing requirement amounts to a reduction in the amount of housing in the adopted Core Strategy, which planned for 1,530 dwellings per annum from 2021, as such it fails to significantly boost the supply of housing as sought by para 59 of the National Planning Policy Framework (NPPF). -The proposed housing requirement is also less than the average annual growth forecasts in the 2018-based sub-national household projections (1,656 per annum). As such it will constrain growth, rather than meet needs. -Recognise the proposed housing requirement exceeds Local Housing Need, calculated using the standard methodology, but para 60 of the NPPF states need can be calculated differently where exceptional circumstances justify. Such circumstances exist in Shropshire given the difference between the 2014-based SNHP (which inform the standard methodology and show 19.2% growth over the proposed Local Plan period) and the 2018-based SNHP (which show 26.9% growth over the proposed Local Plan period). More sensible to utilise the 2018-based SNHP for calculating Local Housing Need. -Covid 19 further increases rates of growth, with increased demand for housing in Shropshire during 2020 and shifts towards home working increasing the attractiveness of Shropshire. -Affordability ratios in Shropshire exceeds that for West Midlands and England. Rapid house price rises in Shropshire during 2020 are expected to worsen this ratio. Under-delivery during the proposed Local Plan period will greatly worsen affordability of housing. -The Association of Black Country Authorities (ABCA) have requested support achieving unmet cross-boundary need for 26,000 homes over the period to 2038. Shropshire is less constrained than ABCA yet only proposed a 1,500 dwelling contribution. This fails consistency with para 60 of the NPPF which requires any needs that cannot be met within neighbouring areas to be taking into account in establishing a housing requirement. No Statement of Common Ground with ABCA has been published. It is contrary to para 27 of the NPPF to wait until submission to publish such Statements.
A0060	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Housing	No	No	Not Specified	Policy SP2 requires, from 2016 to 2038, provision of around 30,800 new dwellings at around 1,400 dwellings per annum. SC need to clarify and justify the uplift and sustainability of this housing target to 30,800 above the minimum 25,894 new dwellings required by central Government and above the demographic need of only 20,746 new dwellings and why 1,500 dwellings for Black Country needs is also accommodated in the proposed housing provision (this is despite their being no change to the standard methodology for most West Midlands local planning authorities except for Birmingham, Wolverhampton, Coventry and Stoke-on-Trent. Further the National Planning Policy Framework (NPPF) states any unmet need from neighbouring areas should only be accommodated where it is practical to do so and is consistent with achieving sustainable development, failing to detail why and how this will be accommodated in contrary to the NPPF and unsound - the Green Belt exceptional circumstances paper states Shifnal will play a role in meeting this need, requiring release of Green Belt without considering alternative locations and resulting in unsustainable development (due to existing infrastructure deficiencies and community desire to retain village feel) so is unsound and should have been assessed through Sustainability Appraisal (SA) so is contrary to legal requirements regarding SA). The existing 'standard methodology for calculating housing requirements is based on the lower 2014-household projections (not the 2018 based projections) for both Shropshire and Telford & Wrekin which would permit SC to reduce their housing targets rather than increase them to 30,800 dwellings. Proposals are contrary to SC strategic objectives of requiring sustainable development (with necessary supporting infrastructure) and communities. No evidence provided that more housing will result in more affordable housing or employment to meet housing growth. Consider a more moderate requirement would be more appropriate, particularly given Covid and risk to the Five Year Housing Land Supply (and potential associated unplanned development). If the Black Country are able to demonstrate unmet need, this should be accommodated in Telford, as the largest settlement in east Shropshire and given its reason for being constructed.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0020	B001	More than 1500 dwellings should be accommodated for in Shropshire for the Black Country.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p>	No	SP2. Strategic Approach
A0036	B002	The 25% figure quoted in Policy SP2 cannot be justified and should be reduced accordingly	<p>Noted. In Shropshire delivery of affordable housing is a key priority, as such it is considered appropriate to seek to delivery around 7,700 affordable dwellings (equating to around 25% of the total housing requirement) during the plan period from 2016 to 2038. This is considered positive and aspirational but deliverable.</p> <p>Past trends on affordable housing delivery, summarised within the Strategic Housing Market Assessment (SHMA), indicate that over the last 5 years, affordable housing completions averaged around 21% of total housing completions, based on generally comparable affordable housing requirements from market housing schemes.</p> <p>It should be noted that affordable housing contributions from open market schemes represent only one mechanism for securing affordable housing. Other such mechanisms, as identified within the proposed policies of the draft Shropshire Local Plan, include exceptions schemes, entry-level exceptions sites, single plot exceptions sites and cross-subsidy exception schemes.</p>	No	SP2. Strategic Approach
A0037	B005	<p>Increase the proposed housing requirement to 50,600 dwellings (2,300 dwellings per annum) rounded up from 50,468 dwellings (2,294 dwellings per annum), calculated as follows:</p> <ul style="list-style-type: none"> <li>-Match the 2018-based sub-national household projection (SNHP) for average growth over the plan period of 1,656 dwellings per annum; and</li> <li>-Add the standard method's adjustment figure based on the 2019 affordability ratio of 7.97, namely an adjustment of x0.248, which increases the figure by 24.8% or 411 dwellings per annum to 2,067 dwellings per annum; and</li> <li>-Add 5,000 dwellings (equivalent to 227 dwellings per annum) as Shropshire's contribution to meet unmet need from neighbouring areas.</li> </ul>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Government has recently consulted upon potential changes to the methodology for calculating LHN, including the potential use of the 2018-based sub-national household projections (SNHP). As a result of this consultation Government determined that it was most appropriate to retain the use of the 2014-based SNHP for this calculation. Furthermore, in responding to this Consultation, Shropshire Council indicated its significant concerns regarding the 2018-based SNHP, particularly with regard to their reliance on the 2018-based sub-national population projections (SNPP) which utilised only 2-years of internal migration data in their formulation.</p> <p>With regard to the adopted Local Plan housing requirement, it is important to note that this is an aspirational but achievable housing requirement, which exceeded past housing need calculations and continues to exceed calculations of LHN using Government's standard methodology. Furthermore, the housing requirement was phased into 5-year time periods (the average housing requirement over the total period covered by the adopted Local Plan is some 1,375 dwellings per annum). The draft Shropshire Local Plan also proposes an aspirational, but achievable housing requirement, which averages some 1,400 dwellings per annum, which meets identified LHN and provides an opportunity to respond/support other objectives as referenced above.</p> <p>Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. It is considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p>	No	SP2. Strategic Approach
A0060	B007	The existing 'standard methodology for calculating housing requirements is based on the lower 2014-household projections (not the 2018 based projections) for both Shropshire and Telford & Wrekin which would permit SC to reduce their housing requirement from 30,800 dwellings.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0060	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Employment	No	No	Not Specified	<p>Policy SP2 requires, from 2016 to 2038, around 300 hectares of employment land at around 14ha of employment land per annum. Appendix 6 of the Employment Land Supply states that the strategic employment land supply will be 414ha and it is unclear how this figure contributes to the employment land requirement nor why the two figures are different, a consistent figure is required for soundness. Distribution of employment to settlements and justification for Green Belt release cannot be justifiably undertaken with such divergence. Also unclear/unjustified how the 300ha can accommodate 30ha contribution to the Black Country, yet the employment land requirement is the same as that previously proposed to balance housing growth (the equivalent housing requirement increased).</p> <p>The 300ha requirement is considered sufficient to deliver enough jobs to achieve a sustainable balance with their housing requirement but SC need to explain how this balanced growth projection was calculated. The proposed 30,800 dwellings and 300 ha of employment land seem disproportionate and as an example, guideline employment land figure for Shifnal was previously 16 ha but increased to 41ha in the Pre-Submission Draft SLP. SC indicate the 1,500 new dwellings proposed at Shifnal should equal circa 1,500 new jobs. Each job needs on average 42.25 sq.m of finished floorspace equal to 40% of the entire employment site. This means, an additional 40% needs to be added to the overall total. The calculation is 1,500 new dwellings x 42.25 sq.m of floorspace x 40% equal to 15.84 ha. For the figure to increase to 41ha, the 40% provided by SC appears to be already included in the balanced growth calculation of 16 ha. SC need to explain the methodology to calculate Shifnal's employment need. The employment land supply figure identified by SC also fail to account for employment land proposed at RAF Cosford (Aviation Academy, 1500 additional military personnel; new air ambulance development). This additional land puts the actual employment land figure at +50% above the 300ha requirement and so, there is a clear over provision of employment land over the next plan period. The Economic Growth Strategy which underpins the draft Shropshire Local Plan will be out of date before adopted of the Plan and fails to consider the long term economic situation to 2038. Reliance on it is unjustified and unsound. The impact of Covid 19 is also ignored which is unsound, this is likely to affect economic aspirations and would support a more cautious approach - delivery of employment may not keep up with housing and could come under pressure for housing.</p>
A0071	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and SP3	Not Specified	No	Not Specified	<p>Do not consider the draft Shropshire Local Plan is justified as an appropriate strategy, taking into account reasonable alternatives and proportionate evidence.</p> <p>-The draft Shropshire Local Plan proposes 1,800 dwellings and 49ha of employment land in Bridgnorth between 2016 and 2038. Excluding completions already achieved and existing commitments there is a need for an additional 1,700 dwellings and 35ha of employment land. Guideline is reliant on the existing SAMDev Plan allocations with capacity for 500 dwellings and 13.3ha of employment land, which have as at January 2021, not been the subject of a Planning Application.</p> <p>-Proposals for Bridgnorth are a material element proposals for Shropshire (equating to just under 6% of proposed residential development and over 16% of employment land). Understand an element of employment land provision in Bridgnorth is to provide choice and competition in the local market, whilst this may be beneficial, it suggests some may not be delivered during the proposed Local Plan period.</p> <p>-Demographically, Shropshire's population and workforce is not self-sufficient, with population growth reliant on in-migration. 2014-based sub-national household projections (SNHP) project between 2016 and 2038, households numbers in Shropshire will grow by 19,136, whilst household size is expected to reduce. Estimate that 7,965 of this household growth results from reduction of household size and 11,171 result from population growth (driven by in-migration). The draft Shropshire Local Plan proposes an increase of 30,800 dwellings between 2016 and 2038, 11,664 dwellings (61%) more than needed to meet ONS projections - estimate this proposal would accommodate an additional 27,000 people.</p> <p>-Level of employment land proposed seems to be based on an assumption of 1 new job per dwelling, but we are concerned about the feasibility of this, given (even after allowing for in migration), as 'working age' (16-64) population of Shropshire is projected to decline by about 12,500 people.</p> <p>-No separate demographic projections are available for the Bridgnorth area, however it has a slightly higher age structure that Shropshire as a whole, so would expect a similar picture. Household and employment growth aspirations for Bridgnorth area largely reflect a despite to attract new people into the area as part of the wider Shropshire growth strategy.</p> <p>-Proposals for Bridgnorth represent a step-change in pace of development and opening-up of a significant areas of countryside on the edge of the town (separated from it by the A458). Not aware of evidence of market capacity for this level of development nor of an assessment of the strengths and weaknesses of Bridgnorth (re-shaped by this development) to attract new residents in competition with other areas. Unlike for employment, there is no provision for choice and competition in the market.</p> <p>-Consider the choice of sites for development at Bridgnorth (excluding those for expansion of Stanmore Industrial Estate) has been heavily influenced by an aspiration to achieve a single large development. Would like to see evidence that development across a number of sites has been adequately explored.</p> <p>-'Regulation 18' consultations have occurred for BRD030 (Tasley Garden Village) and Stanmore Garden Village, however these were separate consultations and used different mechanisms (consultation on BRD030 was limited to an online consultation due to the Covid-19 pandemic). Despite this a substantial volume of submissions were made and there is no publicly available evidence of how views have been taken into account. Consider consultation is not in-line with the 'Gunning Principles'.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0060	B008	<p>The actual employment land available in the County +50% higher than the 300ha requirement and so, the employment land requirement may be reduced over the next plan period. The employment land guideline for Shifnal should also be reduced to 16ha.</p>	<p>In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement.</p> <p>It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038.</p> <p>Shropshire Council also consider that the proposed development strategy for Shifnal and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that proposed safeguarded land is not allocated for development but safeguarded for beyond the proposed Plan period.</p> <p>Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p>	No	SP2. Strategic Approach
A0071	B003	<p>Reduce the proposed housing requirement to some 26,000 dwellings (1,180 dwellings per annum) between 2016-2038, aligning with the identified Local Housing Need. If evidence of demand and deliverability of a higher level of growth emerges, this can be accommodated in future revisions of the Local Plan.</p> <p>Reduce the proposed housing guideline for Bridgnorth by 500 dwellings.</p> <p>Undertake an assessment of realistically achievable housing and employment levels.</p> <p>Undertake a housing need assessment for Bridgnorth. Demonstrate how this need (particularly for smaller and affordable homes) can be met.</p> <p>Produce evidence of the availability of sites other than BRD030 (Tasley Garden Village) and document why they should not be allowed to proceed.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>The proposed housing requirement for Shropshire of around 30,800 dwellings over the proposed plan period from 2016 to 2038 will meet housing need and support the long-term sustainability of the County. It also provides some flexibility to respond to changes to local housing over the plan period and an opportunity to respond to other identified factors.</p> <p>The proposed employment land requirement seeks to support the achievement of the aspirations of the Economic Growth Strategy for Shropshire through the provision of sufficient appropriately located land to deliver high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable and also responds to key quantitative and qualitative evidence including that within the Economic Development Needs Assessments (EDNA), Employment Land Review (ELR) and Authority Monitoring Report (AMR) undertaken to inform the draft Shropshire Local Plan. The proposed employment land requirement incorporates up to 30ha of employment land to support the employment needs of the emerging Black Country Plan.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are also appropriate, effective, sustainable and deliverable.</p> <p>Identification of proposed site allocations for Bridgnorth has been informed by a proportionate and robust site assessment process, which considers all options for development identified in and around Bridgnorth, including sites identified through a 'call for sites' and any sites identified through the Local Plan Review process.</p> <p>With regard to consultation processes, please see response to A0071-B002.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0073	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	<p>Object to use of the word 'around' for the housing requirement. Para 59 of the National Planning Policy Framework (NPPF) seeks to 'boost significantly' the supply of housing land, furthermore given the aspirations established in paras 3.6 and 3.7 of the draft Shropshire Local Plan, the housing requirement should be a minimum. Examinations of the draft Lichfield Local Plan and Middlesbrough Local Plans concluded housing requirements should be a minimum.</p> <p>Agree there is clear justification for a housing requirement that exceeds the local housing need calculated using Government's standard methodology, given economic strategy/ambitions, affordable housing need, and allowance for meeting any unmet needs from the Black Country.</p> <p>However, calculation of local housing need does not consider 2018-based sub-national household projections (SNHP), which indicated 1,644 households per annum. Furthermore, whilst the Local Housing Need is currently based on the 2014-based SNHP, Government recently consulted on proposed changes to the standard method for calculating local housing need which used 2018-based SNHP and resulted in a local housing need of 2,129 dwellings per annum, which exceeds the proposed housing requirement by approximately 50%. It should be noted that need may therefore increase during the proposed Plan period which may require a review of the Local Plan.</p> <p>Para 73 of the NPPF requires a housing trajectory to be included within the draft Shropshire Local Plan, this has not occurred.</p> <p>Total housing supply identified in Appendix 5 amounts to approximately 27,750 dwellings, whilst proposed strategic settlements are identified to deliver a further 1,750 dwellings (do not disagree with inclusion of these sites, but delivery expectations need to be realistic). However this leaves a shortfall of approximately 1,300 dwellings (just under 1 years supply). Even if this shortfall can be accounted for through other rural windfall completions / windfalls, there does not appear to be any flexibility within the supply to deal with rapid change and ensure a continued 5 year supply.</p> <p>Support designation of Market Drayton as a Principal Centre. However, consider it could accommodate a greater proportion of development than is currently proposed in the draft plan.</p>
A0079	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Paras 2.16 to 2.26	Not Specified	No	Not Specified	<p>Responses to earlier stages of consultation on the Local Plan Review emphatically demonstrate respondents (the views of which are supported by Town and Parish Councils) were opposed to the high level of growth proposed. This undemocratic approach is unsound.</p>
A0090	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	No	Yes	<p>Proposals to located some 27% of development within rural settlements is: not justified as an appropriate strategy (lower carbon emission strategies exist), not sustainable, not consistent with national policy (which requires a move towards a low carbon economy), not consistent with other draft Policies (in so far as they purport to respond to the climate emergency), inconsistent with the zero-carbon spatial vision, inconsistent with the Climate Emergency declared by Shropshire Council and the UK parliament, inconsistent with the Zero Carbon Shropshire Plan and inconsistent with the 6th Carbon Budget (required by the Climate Change Act).</p> <p>Objection demonstrates, contrary to the National Planning Policy Framework (NPPF), rural development:</p> <ul style="list-style-type: none"> <li>-Will lead to up to 9 times more travel (for things like shopping, commuting, business, personal business and socialising) than development located in a key centre (so does not reduce the need to travel);</li> <li>-Cannot be realistically served by public transport (most minor Hubs and Clusters are served by only a single bus route with a singly bus in each direction in peak hours);</li> <li>-Cannot favour active means of travel (majority of cycling trips are short distances with 80% less than 5 miles and 40% less than 2 miles and walking as a means of communication is unrealistic and for leisure could occur equally in urban areas) ; and</li> <li>-Will lead to excessive amounts of embodied carbon in the automobile fleet (car ownership is much higher in rural areas and (1.78 per household compared with 1.23 in urban areas) and there is significant carbon embedded in cars); and</li> <li>-Isolate or increase dependence on others of those without cars.</li> </ul> <p>-Increase the need for travel or deny access to facilities (particularly social facilities), which is a particular issue for the young.</p> <p>-Increase the cost of travel - this is a particular concern for affordable housing.</p> <p>Consider the aspirations of the rural development policies are not supported by any clear evidence.</p> <p>Consider the Sustainability Appraisal (SA) is very poor quality (it does not compare carbon emissions between sites, assesses against specified measures rather than comparing sustainability with alternative sites, and fails to recognise societal conditions regarding access to private vehicles and efficiency of public transport) and cannot be taken to support this strategy.</p> <p>Consider development in Community Hubs and Clusters has not been evidenced as sustainable - no evidence development has in the past or would in the future significantly support services. Any benefit of this type needs to be competed with achieving a low carbon future.</p> <p>Object to proposals for the settlements of Kinnerley, Knockin, Llanymynech, Pant, Ruyton XI Towns, Trefonen, West Felton, Weston Rhyn and Whittington. Also object to proposals for all Community Clusters in the Oswestry Place Plan Area.</p> <p>An alternative strategy for the Oswestry Place Plan would involve the formation of a new modern settlement with good public transport links on the A5 strategic corridor, which would tie the area together and is fully consistent with the NPPF. See the Oswestry 2050 Plan - presentation attached to this representation. Consider this approach equally applies to the rest of Shropshire.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0073	B001	Remove use of "around" and replace with "minimum." Prepare a housing trajectory for inclusion within the draft Shropshire Local Plan. Ensure sufficient supply of deliverable sites to meet the housing requirement/maintain a 5 year housing land supply.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. It is considered that the proposed housing requirement and phraseology used in relation to the housing requirement is appropriate and will 'significantly boost' housing supply. Government has recently consulted upon potential changes to the methodology for calculating LHN, including the potential use of the 2018-based sub-national household projections (SNHP). As a result of this consultation Government determined that it was most appropriate to retain the use of the 2014-based SNHP for this calculation. Furthermore, in responding to this Consultation, Shropshire Council indicated its significant concerns regarding the 2018-based SNHP, particularly with regard to their reliance on the 2018-based sub-national population projections (SNPP) which utilised only 2-years of internal migration data in their formulation.</p> <p>As specified within the explanation to draft Policy SP2, whilst it is acknowledged that there will inevitably be fluctuations over time, which may result in annual rates of delivery falling below or exceeding this level, it is expected that this will 'balance out' to ensure that the housing requirement is achieved. As such, it is considered that this expected rate of delivery over the Local Plan period of around 1,400 dwellings per annum forms the most robust trajectory of future housing delivery in Shropshire and will be used to assess annual housing delivery.</p> <p>Shropshire Council also considers that it has a robust five year housing land supply and robust supply over the proposed Plan period, based on the proposals within the draft Shropshire Local Plan. Appendix 5 illustrates this supply - identified completions, commitments (including existing and proposed allocations) and appropriate windfall allowances (for settlements with development guidelines), which totals around 31,000 dwellings (excluding any windfall allowance for the wider rural area).</p>	No	SP2. Strategic Approach
A0079	B001	Public view should be recognised and housing target lowered significantly	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	SP2. Strategic Approach
A0090	B001	<p>1. Development in rural areas should be limited to that necessary to meet the needs of the rural areas.</p> <p>2. A development pattern should be developed which is compatible with the need to "move positively towards a zero carbon economy" as set out in the Plan's Spatial vision.</p> <p>For Oswestry/A5 corridor this should start with the principles sets out in the Civic Society's "Oswestry 2050" of a low carbon, public transport and active travel based settlement.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The pattern of development proposed seeks to direct the majority of development towards urban areas, but recognising the rurality of much of Shropshire and the importance of ensuring the long-term sustainability of rural communities, this growth in urban areas will be complemented by appropriate new development within Community Hubs which are considered significant rural service centres; and to a lesser extent Community Clusters, which consist of settlements with aspirations to maintain or enhance their sustainability.</p> <p>Community Hubs have been identified through a Hierarchy of Settlements Assessment, a proportionate and robust assessment which considers such factors as the availability of a range of services and facilities, public transport, significant employment and high speed broadband. However, recognising the diverse nature of Community Hub settlements the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0094	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>The strategy proposed within Draft Policy SP2 is one of urban focus. However it also recognises the rurality of much of Shropshire and the need for long term sustainability, but in so doing, indicates growth opportunities in rural areas should be more closely aligned with the ability of villages to provide a suitable standard of services and facilities. As such the draft Shropshire Local Plan is underpinned by a Hierarchy of Settlements to identify proposed Community Hubs.</p> <p>However, whilst draft Policy SP2 rightly identifies Community Hubs as significant rural service centres, it is unsound as it is not based on sound, up to date or accurate evidence and the treatment of change to local services and facilities have been inconsistent during the draft Local Plans development.</p> <p>The August 2020 Hierarchy of Settlements Assessment is the third iteration, it acknowledges and reflects the need to keep this evidence up-to-date with best available information about changing services, facilities and infrastructure (see para 2.6 of the Hierarchy of Settlements). However despite responses, including to the Regulation 18: Pre-Submission Consultation, highlighting changes to services (particularly in relation to the village of Clive), these have not been reflected within the assessment. This is inconsistent with the approach elsewhere, for instance Myddle was initially identified as a Community Hub, but following the closure of the local convenience store in 2018, fell below Community Hub status within the assessment, the same circumstances occurred in Clive but it remains a Community Hub. As such draft Policy SP2 does not take them into account and identifies Clive as a Community Hub without the necessary services and facilities.</p>
A0118	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	Yes	Yes	<p>Strategic approach set out in draft Policy SP2 which aims to see Shropshire flourish, with new development that meets its needs and makes its settlements more sustainable, is supported and considered fully in accordance with the aims of the National Planning Policy Framework (NPPF) and associated guidance. It also proposes to significantly boost housing supply and meet unmet needs arising in neighbouring areas and is therefore sound and in accordance with the Duty to Cooperate.</p> <p>Proposed housing requirement is in full accordance with up to date guidance on setting a sound and robust housing requirement. Recent changes to the standard methodology for calculating local housing need do not directly impact on Shropshire but do impact on the wider region (35% increase for Wolverhampton and Birmingham, which already have significant unmet need). Government proposals for additional financial support for these areas and changes to Permitted Development rights/evolving nature of town centres following Covid 19 will create further opportunities for housing delivery, however, unmet need in these areas will increase. Shropshire can absorb additional unmet need within its proposed housing strategy, providing further assistance to the wider region. Furthermore post Covid 19 highly likely people will wish to live in homes with more outdoor space and with space for a home office and perhaps less demand for high density urban living, further emphasising why Shropshire should take additional unmet need.</p> <p>Welcome commitment to keeping availability of land (both for housing and employment) 'under review', this is critical particularly for housing. Believe that the allocation of sites such as BUR004, which can deliver new dwellings, quickly, in the early years of the Plan period, is a positive step towards achieving a supply throughout the Plan period.</p> <p>Note proposal to focus development in urban areas. However, as the Council recognise, the long-term sustainability of rural communities is essential and new development is needed to ensure the ongoing vitality and viability of local services for these communities. Complementing growth of urban areas in particular in Community Hubs (such as Burford) which function as 'rural service centres' and contain a range of services and facilities, which provide an important focus for smaller settlements nearby, is fully in accordance with the guidance contained within para 78 of the NPPF.</p> <p>Draft Policy SP2 identifies Burford as a Community Hub, however the Hierarchy of Settlements Assessment recognises that it is a very sustainable settlement with a score equivalent to a Key Centre (identified as a Community Hub rather than a Key Centre due to its relationship to Tenbury Wells). Accept this rationale but consider the immediate proximity of services and facilities in Tenbury Wells should not be forgotten in recognising the sustainability of Burford, as it is more sustainable than a typical Community Hub Settlement.</p>
A0122	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Shropshire Council has produced a Local Plan Review which includes a "Hierarchy of Settlements" which is flawed, unsound. This hierarchy has allocated points to a selection of criteria for the selection of "Hub" status for settlements. Two of the criteria are "significant employment" and "peak time public transport". Hub status given to settlements must have both "significant employment" and "peak time public transport", This has not been achieved in this policy. It is unsound. Indeed this policy seems to contravene the councils own adopted policy on climate change and sustainability objectives. I believe this is covered in the adopted "Climate Change Emergency" policy proposed SP3 Climate Change and Sustainability Objectives SO5/6 &amp; 12. The objective of which is to reduce car travel to reduce carbon emissions. Indeed the way allocation of points to indicate what should be a "Hub settlement" seems in itself unsound. Why should points be awarded for children's playground in a village green space with a football field be used to ameliorate for lack of points for peak time public transport?</p> <p>Why 48 points to gain the title of "Hub" status. Why not 42 which it is written to be the answer to everything. Indeed the composition of this points table is flawed making the "Hierarchy of Settlements" unsound.</p> <p>As Policy SP2 - Strategic Approach Para 6 and SP2.2 Community Hubs relies on the Hierarchy of Settlements as its Evidence Base it must also be unsound.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0094	B001	Draft Policy SP2 should remove reference to Clive as Community Hub as current evidence on availability and accessibility of local facilities and services means it does not meet the definition of a significant rural service centre as defined by the Hierarchy of Settlements evidence base and subsequent Local Plan policies.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP2. Strategic Approach
A0118	B002	N/A	Noted.	No	SP2. Strategic Approach
A0122	B001	The "Hierarchy of Settlements has to be changed. It has to take proper account of the council's Spatial Vision SP3 Climate Change and Sustainability Objectives SO5, 6, & 12. That is to reduce carbon emissions by reducing car travel and encourage other sustainable journeys. To do this the wording in Para 5.41 "In circumstances where there is no regular public transport service; and/or high speed broadband; and/or multiple significant employment opportunities, a larger range of services and facilities would be necessary to enable a settlement to achieve the specified point's threshold" and "peak time public transport" for "Hub status" in Para 1.16 Table 2 and Para 5.35 Table 6. This list of settlements will have to be reviewed with the updated requirements. This will then require the Draft Plan settlement status and allocations changed.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p>	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0123	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	No	No	Yes	Draft Policy SP2 identifies Shrewsbury as the key strategic centre of Shropshire. Do not object to this, however, development proposals/allocations on the edge of the settlement must not result in severance between the town centre and wider local area. For example safe and suitable pedestrian access must be maintained between Oxon Hall caravan park and Shrewsbury Town Centre (over the North West Relief Road and through the Shrewsbury Sustainable Urban Extension (SUE) West), so visitors can continue to support the local economy. For the same reason, bus routes should also be maintained. Consider tourist related development outside development boundaries should be supported within draft Policy SP2 given their importance to rural economies and jobs, particularly in Shropshire. Note draft Policy SP2 includes reference to supporting delivery of the Shrewsbury Big Town Plan (SBTP). However, the SBTP is at an early stage, has not been subject to consultation and the two documents are not consistent. This raises concerns about soundness of the draft Shropshire Local Plan.
A0127	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	Plan unsound because the identification of Hubs is based on the unsound Hierarchy of Settlements evidence. It is not an appropriate and robust assessment. Para 5.41 relaxation of requirement for Hubs to have both significant employment & peak time public transport will result in people living further from employment & additional unsustainable travel where no appropriate public transport available, contrary to Council's climate change policies and proposed policy SP3 Climate Change & sustainability objectives SO5, SO6 & SO12 (which seek to reduce emissions and minimise car travel). Additionally the methodology which seeks to make an objective comparison between settlements is flawed because of the additional wording 'a larger range' of services & facilities which might mitigate the lack of transport/employment is not defined thus resulting in subjective decisions. Disagree that additional services/facilities such as play area/sports facilities or library bus can adequately compensate for lack of employment/public transport. Score to reach hub threshold
A0128	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	SP2 is intended to be informed by a consistent methodology of assessing settlements and for identifying Community Hubs, as set out in the Hierarchy of Settlements document. The purpose of the evidence of the Hierarchy of Settlement is to inform the Plan through assessment of the sustainability of settlements and their ability to support additional housing. However, the application of Policy SP2 in the identification of Community Hubs is not based on up to date, accurate, or appropriate evidence and consideration. Review of updated evidence regarding services and facilities has not satisfactorily implemented in the case of Clive. Its deferral of matters relating specifically to the settlement designation means the Plan is not effective. Clive hub status is based on inaccurate and out of date evidence on settlement sustainability The Village Store and bowling green amenities included within Hierarchy of Settlements assessment score no longer exist. This is evidenced by various correspondence & communications, meeting minutes, planning applications, Playing Pitch and Outdoor Sports Strategy (Oct 2020) from May 2018 on (submitted with response). Evidence has been submitted that the shop is unviable and closure permanent (with a change of use application) and that change of ownership had taken place causing loss of bowling green. Taking into account these changes to available facilities the correct assessment score for Clive should be 47 points which falls below the threshold for Community Hub designation. Inclusion of Clive as a Hub is therefore not justified. Additionally, the Playing Pitch and Outdoor Sports Strategy evidence does not identify any need for or shortfall in bowling provision. Therefore, demand and value of a bowling green and justification for including in Clive's Hierarchy of Settlements services and amenities points score are also not justified or sound. Approach inconsistent in Shropshire, with respect to considering changes in amenities and services and subsequent reassessment against the Hierarchy of Settlements methodology e.g. approach in Clive compared to Myddle & Westbury Hub re-assessments & reclassification following notification of loss of services/facilities in these settlements. Clive's settlement designation has been repeatedly and unnecessarily deferred. Evidence required to confirm loss of services has been more onerous than elsewhere & extensive evidence of loss of services in Clive has not been acted on resulting in inclusion as a Hub at Regulation 19 and the need for consideration of settlement status a main modification. Negative impact of this is that if Hub status removed by the Planning Inspector, default would be countryside status and option of Community Cluster, which may have been supported by the community is not now available without lengthy and expensive Neighbourhood Plan process. Inconsistent application of the Hierarchy of Settlements methodology with regard to Clive also raises serious questions over the soundness of the Local Plan.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0123	B005	<p>Ensure developments/allocations on the edge of settlements do not result in severance between the town centre and wider local area.</p> <p>Amend draft Policy SP2 to support tourism development outside development boundaries.</p> <p>Note draft Policy SP2 includes reference to supporting delivery of the Shrewsbury Big Town Plan (SBTP). However, the SBTP Remove reference to supporting delivery of the Shrewsbury Big Town Plan.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. Shropshire Council considers that the draft Shropshire Local Plan includes an appropriate draft strategy and draft policies relating to tourism and pedestrian/cyclist connectivity.</p> <p>Shrewsbury Big Town Plan is a visionary urban design document which has established a compelling and challenging shared vision and development framework for the town. It is considered appropriate to identify the objectives of the Big Town Plan and its associated masterplan documents as material considerations in decision making as they underpin the proposed strategy for Shrewsbury. We would note that the draft Shropshire Local Plan, if adopted, would represent the starting point for decision making in accordance with Planning law, but that the specific proposals within or resulting from the Big Town Plan would be material in decision making.</p>	No	SP2. Strategic Approach
A0127	B001	<p>Hierarchy of Settlements should be amended to reflect SP1, SP3 &amp; sustainability objectives SO5, SO6 &amp; SO12. Para 5.41 remove the wording 'a larger range of services' to compensate for employment &amp; public transport so that Hub requirements must include significant employment opportunities &amp; peak time public transport. List of settlements should then be reviewed against revised criteria &amp; settlement development status &amp; allocations amended accordingly. On this basis Trefonen should not be a community hub &amp; removed from schedule SP2.2:</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p>	No	SP2. Strategic Approach
A0128	B002	<p>Clive settlement should be not identified as a Hub &amp; should be removed from Schedule SP2.2</p>	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0137	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 3.18 of SP2	No	No	No	<p>Object to draft Policy SP2 and consider it is unsound and fails to comply with the duty to cooperate.</p> <p>The spatial distribution proposed in draft Policy SP2 does not positively or effectively respond to identified strategic priorities, notably of the Shropshire Economic Growth Strategy which seeks to deliver a 'step-change' in capacity and productivity of the local economy and to focus major employment development on strategic corridors.</p> <p>Shropshire Council has undertaken an assessment of the Local Housing Need using Government's standard methodology. This is likely to be appropriate to meet indigenous demographic-led needs. However, unmet housing needs of the Greater Birmingham and Black Country Housing Market Area (GBBCHMA) is significant and there has not been effective cooperation in meeting this cross-boundary strategic need. There is also a significant unmet employment need and consider a contribution of more than the proposed 30ha would be appropriate. As such, draft Policy SP2 does not positively or effectively respond to relevant cross-boundary strategic matters, including the significant unmet employment and housing need arising in the Black Country. Proposals to provide 30ha of employment land and 1,500 dwellings towards this unmet need is insufficient in quantitative and qualitative terms.</p> <p>Consider employment land provision and take-up will not be as successful as anticipated resulting in implications for achieving the objectives of the Shropshire Economic Growth Strategy, the West Midlands Strategic Economic Plan (SEP) and the West Midlands Local Industrial Strategy.</p> <p>Consider Land at Junction 3, close to RAF Cosford and at the heart of the M54 Corridor, should be identified as a strategic settlement. It would represent an effective and sustainable form of development; support identified economic development needs (including the Shropshire Economic Growth Strategy and West Midlands SEP); would be complementary to proposals at Shifnal; is well located to meet housing and employment needs arising in the Black Country, with direct access via M54 and Cosford Railway Station; and would have close links to businesses in the Black Country and major employment sites at i54 and T54.</p> <p>Consider exceptional circumstances exist to support the allocation of Land at Junction 3 (see A0137 B001).</p>
A0148	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	<p>Support higher growth option, but more housing than suggested is needed due to unmet housing need (1,500 with Black Country considered insufficient), low affordable numbers, need to support Economic Growth Strategy, the annual rate of housing delivery does not include any flexibility or headroom, the trajectory fails to set out quantified rates of anticipated delivery from site allocations. The Council's implicit recognition that its local housing need figure is a minimum starting point is welcomed, however it is unclear as to how a figure of 3,406 dwellings to provide flexibility has been derived and specifically to what needs it accommodates.</p>
A0149	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>The housing requirement which underpins the strategic approach in Policy SP2 is flawed and fails the tests of soundness. By setting an unambitious housing target which fails to accommodate unmet need from neighbouring areas or take account of market conditions, the plan has not been 'positively prepared', it is 'unjustified', 'ineffective' and 'inconsistent with national policy'. As we explore in our representations below, it is our view that the housing requirement figure of 1,400 dpa set out in Policy SP2 does not represent a sound approach to significantly boost the supply of homes above the standard method figure of 1,177 dpa. Given that Shropshire is relatively unconstrained, there are other factors which ought to have been considered, including unmet need from neighbouring areas and current and future demographic trends and market signals. There is no explanation as to why Shropshire can only accommodate 1,500 homes for the Black Country. In the absence of anything to the contrary, our suspicion is that this is simply a result of the current standard method figure of 1,177 dpa (i.e. the 'minimum' that Shropshire has to provide) being 'rounded up' to 1,400 dpa and being repackaged as meeting unmet housing needs of ABCA. ABCA's Urban Capacity Study (December 2019) identified a shortfall of about 26,920 homes which cannot be accommodated within ABCA's boundaries and therefore needed to be met in neighbouring areas – a higher requirement for Wolverhampton will increase this shortfall further. It is considered that the authority struggles to provide affordable housing for those on low incomes, which indicates that a higher level of affordable housing is needed - an increase in houses delivered will mean an increase in affordable houses delivered. Much Wenlock (including the settlement of Cressage and the wider Raby Estate) is one such place where housing is considered unaffordable, therefore this would be a logical area to increase housing provision. In our view, the council's economic growth aspirations will not be realised if the investment potential in housing delivery will be frustrated through an unambitious and modest increase in the housing requirement above the standard method and below recent delivery rates</p>
A0149	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>The Plan allocates an insufficient supply of sites, relies too heavily on windfalls and strategic sites and fails to accommodate a 'safety buffer.' Shropshire should allocate a greater number of sites to ensure there is a truly plan-led approach to development in the County. The heavy reliance on windfalls, in our view, increases the risk of the plan's failure as it undermines its robustness. In particular, we have concerns that the windfall allowance may not be achievable given the tight boundaries drawn around settlements (such as Cressage) which limits opportunities for such windfalls from occurring. In our view more sites including the Beslow Garden Village should be allocated as an additional site for the plan. NPPF para 72 suggests that the supply of large numbers of new homes can often be best achieved through planning for larger scale development, such as new settlements or significant extensions to existing villages and towns. The supply equates to a surplus of just 330 dwellings or 1%. Clearly this is a dangerously low 'safety buffer' which places the plan at risk of failure – this is 'ineffective'. 44% of the total supply is delivered on sites with planning permission or sites allocated but without planning permission. There is a risk that sites with planning permission may not come forward as expected. There is a risk of failure if one of the strategic sites does not come forward as expected.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0137	B005	<p>Increase the housing and employment requirements to accommodate more unmet needs arising in the Greater Birmingham and Black Country Housing Market Area (GBBCHMA) - to at least 4,500 dwellings and at least 90ha employment land.</p> <p>Remove Land at Junction 3 from the Green Belt (370ha) and include it as a strategic settlement to achieve the additional cross-boundary housing and employment need (3,000 dwellings and 75ha employment land). The remaining 1,500 dwellings and 15ha of employment land could be accommodated on non-strategic sites at Bridgnorth and Shifnal.</p> <p>Land at Junction 3 also offers significant wider benefits as documented within the representation.</p> <p>To reflect this, appropriate changes should be made to draft Policy SP2, draft Schedule SP2.1; and paragraphs 3.7 and 3.18 of the proposed Explanation to draft Policy SP2. A new Policy (suggest reference S22) should also be included for the Strategic Settlement: Land to the north of Junction 3. The representation documents these suggested changes and provides an example of suggested new Policy S22.</p>	<p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p> <p>Proposed allocations within the draft Shropshire Local Plan have been informed by an robust and proportionate site assessment process, which explains why sites are or are not proposed for allocation.</p>	No	SP2. Strategic Approach
A0148	B001	<p>Further evidence is required to robustly demonstrate whether an uplift of 4,906 dwellings is sufficient to address unmet housing need, affordable housing and infrastructure and economic growth.</p> <p>Recommend the Council re-run the appraisal of housing growth options through the SA in order to reasonably conclude on a preferred option which has been robustly tested.</p>	<p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>The proposed housing requirement has been informed by the extensive evidence base prepared to inform the Local Plan Review, consultation undertaken as part of the Local Plan Review process and Sustainability Appraisal.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p>	No	SP2. Strategic Approach
A0149	B002	<p>To be positively prepared, effective and consistent with national policy Shropshire should increase its contribution to meeting the unmet needs from ABCA and address the future impact of the 35% uplift in the largest cities of the West Midlands. Shropshire is unconstrained and therefore well placed to provide a substantial contribution. We recommend Shropshire should accommodate 250dpa over the plan period or 5,500 dwellings in total. To respond adequately to the market trends and the economic growth strategy a more appropriate housing requirement would be 2,000dpa and Strategic Policies of the local plan should be updated accordingly.</p>	<p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p>	No	SP2. Strategic Approach
A0149	B003	<p>The plan should:</p> <ul style="list-style-type: none"> <li>•Revisit the strategic approach</li> <li>•Accommodate more unmet need from ABCA</li> <li>•Respond to market signals and growth strategy</li> <li>•Place less reliance on windfalls</li> <li>•Identify an additional buffer of sites</li> <li>•Allocating more sites, strategic sites and new settlements</li> </ul>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council also considers it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. It is considered that the existing commitments (including existing allocations), proposed allocations and proposed windfall allowances are appropriate and deliverable. Furthermore, draft Policy SP7 and other relevant policies provide the policy mechanism to respond to circumstances where the housing guidelines for particular settlements appears unlikely to be met over the proposed Plan period, or where there are specific considerations set out in the Settlement Policies. As such it is not considered necessary or appropriate to include a reserve site policy.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p>	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0201	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	No	No	<p>Generally supportive of the proposed urban-focused spatial strategy within the draft Shropshire Local Plan.</p> <p>Do not object to proposed housing requirement of 30,800 dwellings, which has had regard to the minimum Local Housing Need (LHN) calculated using the standard method, with an upward adjustment of around 13% (3,406 dwellings) to meet Council needs plus 1,500 dwellings to meet needs of the Black Country. Welcome adjustments, but question whether they are sufficient as:</p> <p>-The Black Country Authorities acknowledge an inability to accommodate around 27,000 dwellings of their requirement (compounded by Wolverhampton being one of the 20 largest Cities subject to Government's proposed 35% increase to minimum local housing need). Furthermore, there is an established unmet need of around 37,900 dwellings from Birmingham City (in the same Housing Market Area as the Black Country), which is also one of the 20 largest Cities subject to the proposed uplift to need. Only aware of South Staffordshire Council (4,000 dwellings) also proposing contributions to the Black Country at present, leaving a shortfall of 20,000 dwellings. Given timescales for the Black Country Local Plan Review, there may be little further opportunity for them to seek further contributions to unmet need from Shropshire. Query whether sufficient support has been secured from the Black Country Authorities for this proposed contribution without a signed memorandum of understanding or indeed with South Staffordshire who stand to be hardest hit. Clearly Shropshire has a functional relationship with the Black Country and wider Birmingham conurbation and as such consider it should make a significantly greater contribution. As such, welcome proposed contribution to Black Country needs, but do not consider it sufficient as not agreeing a larger contribution means more of the housing need of the Black Country will go unmet. Therefore the draft Shropshire Local Plan is unsound as it is not positively prepared or effective. Shropshire Council needs to enter into a memorandum of understanding with the Black Country Authorities to confirm the proposed 1,500 dwelling contribution is acceptable to all, without this there is a question as to whether a higher contribution is required to reach agreement and how the Black Country and Greater Birmingham housing needs will be meeting full. This raises serious implications for whether the duty to cooperate with the Black Country Authorities or other authorities in the Greater Birmingham HMA has been met.</p> <p>-Para 3.6 of the explanation for draft Policy SP2 identifies the reasons for the housing requirement exceeding need. This includes delivery of affordable housing, but current and future affordable housing needs are much higher than proposed delivery (around 10,000 dwellings more), as demonstrated by the Council's evidence, one way to try and address this shortfall is more housing. This evidence also illustrates worsening market signals (particularly with regard to provision of affordable housing) and do not consider this is addressed within the Council's proposed strategy.</p> <p>Support the role of Whitchurch as a Principal Centre, identification of which was informed by the Hierarchy of Settlements, a consistent methodology for ranking settlements according to their relative sustainability through assessing the services and facilities. Contend Whitchurch scores highly within this assessment and agrees it is suitable to accommodate new residential development to meet the needs of the County going forward in a sustainable manner. This accords with para 103 of the National Planning Policy Framework (NPPF).</p>
A0231	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S13	Not Specified	Not Specified	No	<p>Shropshire Council have undoubtedly attempted to comply with the duty-to-cooperate by appear not to have done so in a manner that promotes sustainability. The duty-to-cooperate has been narrowly interpreted as being an obligation to provide homes beyond the externally set target. However this cooperation also needs to be consistent with achieving sustainable development.</p> <p>The cooperation proposed (1,500 dwellings to meet cross-boundary needs arising within the Black Country as their evidence indicates housing delivery opportunities are constrained), is inimical to sustainable development and would have the effect of increasing commuting and undermining sense of community in places such as Much Wenlock. The National Planning Policy Framework (NPPF) priorities use of brownfield land, which is far from lacking in the Black Country, where land hungry industry is in decline. Developers preference for greenfield land is well established, but one of the roles of the Planning System is to protect such land. Proposed allocation MUW012VAR combined with achieved/proposed supply exceeds local need and it is absurd to suggest good quality agricultural land should be lost to meet cross-boundary needs.</p> <p>The proposed contribution to cross-boundary need also lacks context of institutional memory. The 'historic' County of Shropshire provided the West Midlands enough land at Telford to build homes for almost 100,000 people (land is still being released for these new homes). Much of these homes in Telford have been within 10 miles of Much Wenlock, with a further 1,000 proposed at the Former Ironbridge Power Station within Much Wenlock Place Plan Area.</p> <p>Excessive housing proposals in east Shropshire are compounded by the presence of Green Belt maintaining open countryside between Telford and the West Midlands. A similar stretch between Telford and Shrewsbury is missing. The view of all was that the integrity of local communities, landscape and access to countryside should be protected. However currently there is unwarranted pressure to build more home over and above need outside the Green Belt, such as Much Wenlock (progressively losing its unique and historic character).</p>

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0255	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 (STC002 and P58a)	Not Specified	No	Not Specified	<p>To deliver the proposed employment land requirement (300ha), a greater figure is likely to be needed to allow for allocated sites not coming forward or land with planning permission not being actually developed in the Plan period. Difficult to work out precisely what the need for employment land is in the County.</p> <p>The Economic Development Needs Assessment (EDNA) undertaken to inform the draft Shropshire Local Plan estimates need for between 162ha and 264ha (gross) of employment land, suggesting an over-supply of employment land. However, Appendix 6 of the draft Shropshire Local Plan indicates a strategic land supply of 414ha is necessary, but no explanation of this or why each constituent figure is so high is provided, as such this level of provision is unjustified.</p> <p>300ha of employment land appears an aspirational target rather than one actually based on identified need and making settlements more sustainable. This extends to proposed allocations of STC002 and P58a in a settlement that has no need for further employment provision - Appendix 6 of the draft Shropshire Local Plan indicates 27.4ha of additional employment land will be allocated in Bridgnorth, but does not explain why this is necessary (it is also probably undeliverable), given only 1.2ha of land was developed in the first three years of the Plan period.</p> <p>The EDNA also indicates demand is likely to be centred on the A5/M54 corridor - Bridgnorth is peripheral to this, again suggesting demand is going to be limited in Bridgnorth. Emphasis in draft Policy SP2 is on meeting local need. Even if proposed allocations at Stanmore (STC002 and P58a) are intended to cater for Bridgnorth town rather than Stanmore itself, clear they are unnecessary. The draft Shropshire Local Plan does not evidence a quantitative or qualitative demand that might be used to justify development at Stanmore and thus loss of Green Belt. Given the amount of available but undeveloped/unused employment land in the town and, in particular, at Stanmore, the allocations that exist and are to be carried forward from the SAMDev Plan and the additional allocation being proposed in association with the Garden Village/Sustainable Urban Extension at Tasley, there is clearly no need for further allocations to serve the employment needs of Stanmore, or Bridgnorth.</p> <p>Stanmore is in the open countryside and West Midlands Green Belt (outside any Principal or Key Centre, or Community Hub or Cluster). Draft Policy SP2.6 says outside such settlements "new development will consist of affordable housing where there is evidence of local needs and appropriate rural employment and economic diversification". Draft Policy SP2.6 does not support the proposed allocation of 11.5ha of unneeded employment land at Stanmore, as they are not "appropriate rural development or economic (rural) diversification", as such STC002 and P58a conflict with this draft Policy.</p> <p>STC002 and P58a conflict with draft Policy SP2 and are not considered sound as defined in para 35 of the National Planning Policy Framework (NPPF).</p>
A0286	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	No	No	No	<p>Policy SP2 requires, from 2016 to 2038, the provision of around 30,800 new dwellings at around 1,400 dwellings per annum. SC need to clarify the uplift of this housing target to 30,800 above the minimum 25,894 new dwellings required by central Government and above the demographic need of only 20,746 new dwellings. SC also need to explain why 1,500 dwellings for Black Country needs is also accommodated in the proposed housing provision despite their being no change to the standard methodology for most West Midlands local planning authorities except for Birmingham, Wolverhampton, Coventry and Stoke-on-Trent. The existing 'standard methodology for calculating housing requirements is based on the lower 2014-household projections (not the 2018 based projections) for both Shropshire and Telford &amp; Wrekin which would permit SC to reduce their housing targets rather than increase them to 30,800 dwellings.</p>
A0286	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	No	No	No	<p>Policy SP2 requires, from 2016 to 2038, around 300 hectares of employment land at around 14ha of employment land per annum. Appendix 6 of the Employment Land Supply states that the strategic employment land supply will be 414ha and it is unclear how this figure contributes to the employment land requirement nor why the two figures are different. The 300ha requirement is considered sufficient to deliver enough jobs to achieve a sustainable balance with their housing requirement but SC need to explain how this balanced growth projection was calculated. The proposed 30,800 dwellings and 300 ha of employment land seem disproportionate and as an example, guideline employment land figure for Shifnal was previously 16 ha but increased to 41ha in the Pre-Submission Draft SLP. SC indicate the 1,500 new dwellings proposed at Shifnal should equal circa 1,500 new jobs. Each job needs on average 42.25 sq.m of finished floorspace equal to 40% of the entire employment site. This means, an additional 40% needs to be added to the overall total. The calculation is 1,500 new dwellings x 42.25 sq.m of floorspace x 40% equal to 15.84ha. For the figure to increase to 41ha, the 40% provided by SC appears to be already included in the balanced growth calculation of 16 ha. SC need to explain the methodology to calculate Shifnal's employment need. The employment land supply figure identified by SC also fail to account for employment land proposed at RAF Cosford (Aviation Academy, 1500 additional military personnel; new air ambulance development). This additional land puts the actual employment land figure at +50% above the 300ha requirement and so, there is a clear over provision of employment land over the next plan period.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0255	B006	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>The proposed employment land requirement seeks to support the achievement of the aspirations of the Economic Growth Strategy for Shropshire through the provision of sufficient appropriately located land to deliver high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable and also responds to key quantitative and qualitative evidence including that within the Economic Development Needs Assessments (EDNA), Employment Land Review (ELR) and Authority Monitoring Report (AMR) undertaken to inform the draft Shropshire Local Plan.</p> <p>With regard to this evidence, we would note that calculations of the employment land requirement are based on the national assumption that employment land when developed, delivers 40% net floorspace from the gross land area, and that new employment is generated on that basis. However, available evidence suggests that employment land when developed, delivers on average 25% net floorspace in Shropshire. This has been given careful consideration when determining an appropriate employment land requirement. Furthermore, we would also note that the proposed employment land requirement actually represents a reduction to that within the adopted Local Plan (whilst the housing requirement has actually increased).</p> <p>The proposed employment land requirement incorporates up to 30ha of employment land to support the employment needs of the emerging Black Country Plan, where evidence indicates employment delivery opportunities are constrained. This reflects a positive approach to cross boundary cooperation and responds to the functional relationship between the two areas.</p> <p>In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement.</p> <p>It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p>	No	SP2. Strategic Approach
A0286	B007	The existing 'standard methodology for calculating housing requirements is based on the lower 2014-household projections (not the 2018 based projections) for both Shropshire and Telford & Wrekin which would permit SC to reduce their housing requirement from 30,800 dwellings.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p>	No	SP2. Strategic Approach
A0286	B008	The actual employment land available in the County +50% higher than the 300ha requirement and so, the employment land requirement may be reduced over the next plan period. The employment land guideline for Shifnal should also be reduced to 16ha.	<p>In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement.</p> <p>It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038.</p> <p>Shropshire Council also consider that the proposed development strategy for Shifnal and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that proposed safeguarded land is not allocated for development but safeguarded for beyond the proposed Plan period.</p> <p>Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p>	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0305	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Housing	No	No	Yes	There is no sound evidence to justify the high growth housing requirement of 30,800 dwellings which is significantly higher than the housing needs of the County. The housing requirement will be difficult to justify: whether this can be delivered as sustainable development, whether past experience will be repeated through a significant need for greenfield and Green Belt land releases. The impact of Covid-19 is evidence for a cautious approach to development based on delivering housing need alone with subsequent reviews of the Local Plan providing the opportunity to assess the impacts of Covid-19 and to adjust the scale of development in the County. There is also no justification for the Black Country Housing Overspill to support tis need in Shropshire. The use of land in Shropshire to meet this suggested unmet need also fails to take account of Government policy to promote the use of brownfield land to meet the need in the Black Country.
A0305	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Employment	No	No	Yes	There needs to be a consistent employment figure in the different sections of the Plan where Policy SP2 refers to 300ha, the allocation total in Settlement Policies is 376ha and Appendix 6 refers to a total of 414ha. The SP2 requirement for 300ha was intended to meet the County's own needs and to balance the provision of housing but has now been reduced by also comprising the 30ha of unmet need in the Black Country. The Black Country Plan and supporting evidence is also at an early stage so there is no justified evidence to support the need for any employment overspill to be allocated in Shropshire. As the employment requirement has an impact on the release of greenfield and Green Belt land particularly through meeting Black Country needs in Shropshire, a clear and consistent employment figure is essential for the Plan to be found sound and to show that the proposals meet the sustainable development requirements of national policy.
A0312	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Housing	No	No	Yes	<p>There is no sound evidence to justify the high growth housing requirement of 30,800 dwellings which is significantly higher than the housing needs of the County, which is contrary to several strategic objectives requiring sustainable development/communities and difficult to justify as sustainable development. Also no evidence this will increase provision of affordable housing, how infrastructure will be provided at appropriate timescales (pre-requisite before growth - Moderate growth is more likely to achieve this), or how employment development to meet housing growth will be provided (given past take-up and implications of Covid).</p> <p>This requirement will increase strain on the ability to maintain a five year housing land supply, increasing pressure on unallocated land/safeguarded land which has implications on ability to meet future requirements (Shifnal already experienced problems from 40% increase in size of the town).</p> <p>The impact of Covid-19 is unclear and evidence for a cautious approach to development based on delivering housing need alone (reducing pressure on greenfield and Green Belt land releases and ensuring infrastructure provision can keep up) with subsequent reviews of the Local Plan providing the opportunity to assess the impacts of Covid-19 and to adjust the scale of development in the County.</p> <p>There is also no justification to provide for 1,500 dwellings towards suggested unmet need arising in the Black Country, which will exacerbate above issues. Para 35a of the National Planning Policy Framework (NPPF) states to be sound unmet need from neighbouring areas should only be accommodated where it is practical and consistent with achieving sustainable development, no evidence is provided of whether this is the case, how the figure was arrived at and whether it can be accommodated and meet sustainable community objectives so is unsound. No evidence that the Black Country have fully assessed availability of land to meet their own needs. The use of land in Shropshire to meet suggested unmet need also fails to take account of Government policy to promote the use of brownfield land to meet the need in the Black Country. The Green Belt Exceptional Circumstances Statement prepared to inform the draft Shropshire Local Plan states Shifnal will play a role in meeting this need, this is contrary to Green Belt policy as it is not to meet essential Shifnal needs and alternative locations are not considered so proposals are unsound. Further, the Council recognise Shifnal has infrastructure deficiencies to meet approved housing and is a commuter town. Adding unmet need from the Black Country would constitute unsustainable development/community so is unsound and contrary to legal requirements (proposals should be subject to Sustainability Appraisal).</p> <p>Telford is the largest settlement in east Shropshire and its population is below that planned when it was designated a new town. If there is a proven unmet need arising in the Black Country to be met west of the West Midlands, Telford would be a far better location than Shifnal to meet this need.</p>

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0312	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Employment	No	No	Yes	<p>Consistent employment figure required, draft Policy SP2 refers to 300ha, the allocation total in Settlement Policies is 376ha and Appendix 6 refers to a total of 414ha (nearly a 40% difference). No reasoning is given for these wide variations or how various commitments in Appendix 6 contribute to achieving the proposed employment land requirement. The subsequent disaggregation to settlements therefore cannot be justified. RAF Cosford is also not taken into account (further discrepancy).</p> <p>The proposed employment land requirement now includes 30ha towards unmet need in the Black Country. The Black Country Plan and supporting evidence is also at an early stage so there is no justified evidence to support the need for any employment overspill to be allocated in Shropshire.</p> <p>The 300ha employment land requirement was intended to meet the County's own needs and to balance the provision of housing but has now been reduced by also comprising the 30ha of unmet need from the Black Country and has not been increased to reflect changes to the proposed Plan period (as per housing), this questions the justification for the employment land requirement.</p> <p>The employment land requirement has an impact on release of greenfield and Green Belt land particularly through meeting Black Country needs in Shropshire. A clear and consistent employment figure is essential for the Plan to be found sound and to show that the proposals meet the sustainable development requirements of national policy. The Economic Growth Strategy is a key piece of evidence, however it will be out of date before the draft Shropshire Local Plan is adopted and fails to consider the long term economic situation to 2038. As such it is considered unsound to rely on it.</p> <p>There is no recognition of the huge impact of Covid 19 on the economy and implementation of Policy, supporting a more realistic/conservative employment land and housing requirement to ensure balance/sustainable development. Undeveloped allocated employment land may come under pressure for housing adversely affecting sustainability. Subsequent reviews of the Local Plan providing the opportunity to assess the impacts of Covid-19 and to adjust the scale of development in the County. This failure makes the draft Shropshire Local Plan unsound.</p>
A0313	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Housing	No	No	Not Specified	<p>Policy SP2 requires, from 2016 to 2038, the provision of around 30,800 new dwellings at around 1,400 dwellings per annum. SC need to clarify the uplift of this housing target to 30,800 above the minimum 25,894 new dwellings required by central Government and above the demographic need of only 20,746 new dwellings. SC also need to explain why 1,500 dwellings for Black Country needs is also accommodated in the proposed housing provision despite their being no change to the standard methodology for most West Midlands local planning authorities except for Birmingham, Wolverhampton, Coventry and Stoke-on-Trent. The existing 'standard methodology for calculating housing requirements is based on the lower 2014-household projections (not the 2018 based projections) for both Shropshire and Telford &amp; Wrekin which would permit SC to reduce their housing targets rather than increase them to 30,800 dwellings.</p>
A0313	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Employment	No	No	Not Specified	<p>Policy SP2 requires, from 2016 to 2038, around 300 hectares of employment land at around 14ha of employment land per annum. Appendix 6 of the Employment Land Supply states that the strategic employment land supply will be 414ha and it is unclear how this figure contributes to the employment land requirement nor why the two figures are different. The 300ha requirement is considered sufficient to deliver enough jobs to achieve a sustainable balance with their housing requirement but SC need to explain how this balanced growth projection was calculated. The proposed 30,800 dwellings and 300 ha of employment land seem disproportionate and as an example, guideline employment land figure for Shifnal was previously 16 ha but increased to 41ha in the Pre-Submission Draft SLP. SC indicate the 1,500 new dwellings proposed at Shifnal should equal circa 1,500 new jobs. Each job needs on average 42.25 sq.m of finished floorspace equal to 40% of the entire employment site. This means, an additional 40% needs to be added to the overall total. The calculation is 1,500 new dwellings x 42.25 sq.m of floorspace x 40% equal to 15.84 ha. For the figure to increase to 41ha, the 40% provided by SC appears to be already included in the balanced growth calculation of 16 ha. SC need to explain the methodology to calculate Shifnal's employment need. The employment land supply figure identified by SC also fail to account for employment land proposed at RAF Cosford (Aviation Academy, 1500 additional military personnel; new air ambulance development). This additional land puts the actual employment land figure at +50% above the 300ha requirement and so, there is a clear over provision of employment land over the next plan period.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0312	B008	The total requirement figure for Shropshire should be 25,000 dwellings to reflect housing need and the 1,500 dwellings proposed for the Black Country overspill should be deleted. The employment land requirement should also be reduced.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.	No	SP2. Strategic Approach
A0313	B007	The existing 'standard methodology for calculating housing requirements is based on the lower 2014-household projections (not the 2018 based projections) for both Shropshire and Telford & Wrekin which would permit SC to reduce their housing requirement form 30,800 dwellings.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.	No	SP2. Strategic Approach
A0313	B008	The actual employment land available in the County +50% higher than the 300ha requirement and so, the employment land requirement may be reduced over the next plan period. The employment land guideline for Shifnal should also be reduced to 16ha.	In order to achieve the proposed employment land requirement, respond to the wider range of employment uses and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement. It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038. Shropshire Council also consider that the proposed development strategy for Shifnal and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that proposed safeguarded land is not allocated for development but safeguarded for beyond the proposed Plan period. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0334	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	The HoS has not been applied in a proper manner in regard to Trefonen. It should not be a Hub - there are few job opportunities and virtually no public transport.
A0335	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	Definition of a Community Hub included a requirement for both significant employment and peak time public transport. Trefonen has neither of these meaning all Trefonen residents are dependent on the private car with associated implications for engine emissions and impact on access via narrow roads/lanes. Relaxation of these requirements works against proposed policy SP3 and sustainability objectives to minimise car travel and reduce carbon emissions (the Hierarchy of Settlements Assessment HoS, should align with these objectives).
A0346	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2.2	Not Specified	No	Not Specified	Para 5.41 of the Hierarchy of Settlements identifies the key criteria for 'Community Hub' status includes requiring: -"significant employment opportunities". Opportunities for employment in Trefonen are virtually non-existent and are therefore not significant. -"peak time public transport", this is not available in Trefonen. Trefonen is the only proposed Community Hub which fails to meet these criteria. Disagree that these can be offset by virtue of a playground and green space (para 5.41) is incorrect. As such consider Trefonen Community Hub status is unsound (should be identified as countryside) and this alone is sufficient to judge the draft Shropshire Local Plan unsound. Lack of significant employment in the vicinity of new housing means occupant will need to commute (probably significant distances) with consequent damage to the environment and congestion. Trefonen's status as a proposed Community Hub is therefore contrary to draft Policy SP3 and Sustainability Appraisal objectives SO5, SO6 and SO12.
A0347	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	No	No	Not Specified	We note the references to the Big Town Plan (BTP) in SP1...and similar in Policy SP2, with lines such as "...support of the delivery of the Big Town Plan and its related masterplans". Some sites in the BTP are in the functional flood plain and we do not want the inclusion of the BTP as an evidence base document to infer that such sites have any statutory status.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0334	B001	The HoS wording which suggests that lack of jobs and public transport could be balanced by a larger range of other services should be removed. Trefonen should be countryside.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.</p>	No	SP2. Strategic Approach
A0335	B002	The Hierarchy of Settlements Assessment (HoS) used to identify Community Hub's should be updated. Trefonen should not be identified as a proposed Community Hub.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.</p>	No	SP2. Strategic Approach
A0346	B001	Trefonen should not be identified as a Community Hub, rather it should be classified as countryside (associated changes to the draft Shropshire Local Plan should be undertaken).	<p>Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.</p> <p>Shropshire Council also considers that the development strategy proposed for Trefonen, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.</p>	No	SP2. Strategic Approach
A0347	B013	n/a	<p>Noted. Shropshire Council considers the proposed wording of draft Policy SP1 is appropriate. The draft Shropshire Local Plan should be read as a whole. Whilst it presents an opportunity to ensure a comprehensive and co-ordinated approach is pursued to the planning and development of Shrewsbury and to ensure development is consistent with the objectives of the Shrewsbury Big Town Plan and associated masterplan documents which are material considerations in decision making, other proposed policies, such as DP21 which relates to flood risk, remain relevant to all development proposals across Shropshire.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0350	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>The proposed housing requirement (around 1,400 dwellings per annum) does not meet the Duty to Co-operate and fails the 'positively prepared' and 'consistent with national policy' tests of soundness as:</p> <ul style="list-style-type: none"> <li>-It represents a reduction of the 1,530 dwellings planned for within the adopted Core Strategy from 2021, failing to support Governments objective of 'boosting the supply' identified within para 59 of the National Planning Policy Framework (NPPF).</li> <li>-It is significantly lower than the 2018-based household projections which forecast an average growth of 1,656 households per annum (2016-2038), constraining growth rather than meeting need.</li> </ul> <p>Recognise it exceeds Local Housing Need (LHN) calculated using Government's standard methodology, but consider exceptional circumstances exist to justify an alternative approach which reflects current and future demographic trends and market signals (as per para 60 of the NPPF). Specifically the large difference between the 2014-based (which inform the standard method) and 2018-based household projections (24,241 households above the standard method estimate of 23,749 households) over the proposed Local Plan period (graph/table provided within representation). Covid-19 has increased growth/demand in Shropshire in 2020 and resultant shifts towards more internet-based working from home will continue this, as commuting considerations are replaced by quality of life.</p> <p>The level of under-provision will result in rising house prices as demand outstrips supply, worsening affordability (Shropshire already has an affordability ratio of higher than the average for the West Midlands and England (figure provided in representation) and expect this to increase given recent rapid house price rises), and failure to meet the 'positively prepared' test.</p> <p>The Association of Black Country Authorities (ABCA) have requested assistance in meeting unmet housing need (26,000 dwellings to 2038). Despite limited constraints/Green Belt, Shropshire have proposed only a 1,500 dwelling contribution. Consider this fails the duty to cooperate and para 60 of the NPPF, which requires unmet needs within neighbouring areas to be taken into account. No statement of common ground has been published with ABCA, contrary to para's 24-27 of the NPPF which requires their preparation and availability.</p>
A0353	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and Schedule SP2.2	Not Specified	No	Not Specified	<p>The list of Community Hubs in Schedule SP2.2 fails the 'justified', 'effective' and 'consistent with national policy' tests of soundness, as:</p> <ul style="list-style-type: none"> <li>-The methodology for identifying Community Hubs is fatally flawed by its lack of consideration for population size. Para 3.54 of the draft Shropshire Local Plan states Community Hubs have been identified based on size of population/number of dwellings and services and facilities. However size of population/number of dwellings is only used to screen-out settlements within the Hierarchy of Settlements (HoS) assessment. This means Community Hubs vary significantly in size and some settlements much larger than proposed Community Hubs are not themselves proposed as Community Hubs (Westbury and Cockshutt are not proposed Community Hubs but have populations of 659 and 859 respectively, whilst the proposed Community Hubs of Knockin and Longden has populations of 181 and 332 respectively. A wider table and graph is provided in the representation). As such consider para 3.54 is disingenuous. Agree that the significance of a rural settlement is not entirely related to services. Population size also matters, as the social and cultural function is closely related to population size and social/economic networks. As such suggest points should be awarded in the HoS to reflect the size of a settlement (suggest 1 point for each 100 people). This would ensure the methodology accounts for population, making it more rounded as a measure of community sustainability, ignoring it means the draft Shropshire Local Plan fails the 'justified' test of soundness.</li> <li>-There are many errors in the HoS, meaning proposed Community Hubs are not supported by accurate evidence and fails the 'justified' test of soundness. Of particular concern is Westbury, which should have additional points for multiple outdoor sports facilities (Westbury Recreation ground and the former school field); the presence of an amenity green space (Westbury Recreation Ground); and multiple significant employment provision (Nigel Farr Farm Services, Westbury Special Education Needs School and G O Davies (Westbury) Ltd). Details are provided within Appendix 1 of the Representation.</li> <li>-Following the Covid-19 pandemic, many settlements have lost services and facilities. As such the HoS no longer reflects reality on the ground.</li> <li>-Para 3.55 and para 3.56 of the draft Shropshire Local Plan advises that Community Hubs are significant rural services centres that are widely distributed across Shropshire. Every rural area has a social centre, however Figure SP2.1 shows gaps across the County where local centres are missing, such as west of Shrewsbury (some Parish Councils have not opted-in as Community Clusters). This results in a lack of rural focal points for development, likely to threaten viability of local shops and services over time. This is contrary to para 78 of the National Planning Policy Framework (NPPF). Failure to identify Westbury as a rural centre fails the consistent with national policy' test of soundness.</li> <li>-The Viability Study undertaken to inform the draft Shropshire Local Plan (VS) finds that the majority of site typologies are unviable and suggests more small sites are sought for site allocations (according to the VS, only 0.8% of dwellings are on proposed greenfield allocations for up to 9 dwellings). Given these typologies are considered most viable, this is a fundamental flaw of the draft Shropshire Local Plan that means it fails the 'effective' test of soundness. Confirmation from site promoters should be treated with scepticism as any allocated site will claim to be viable, if the alternative may result in it being de-allocated.</li> </ul>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0350	B001	<p>Increase the annual housing requirement to 2,300 dwellings (50,600 dwellings between 2016 and 2038).</p> <p>Starting point for this is the 2018-household projection average annual growth of 1,656 dwellings per annum, adds in the standard method's adjustment for the 2019 affordability ratio and adds 5,000 dwelling contribution to unmet cross-boundary need.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Government has recently consulted upon potential changes to the methodology for calculating LHN, including the potential use of the 2018-based sub-national household projections (SNHP). As a result of this consultation Government determined that it was most appropriate to retain the use of the 2014-based SNHP for this calculation. Furthermore, in responding to this Consultation, Shropshire Council indicated its significant concerns regarding the 2018-based SNHP, particularly with regard to their reliance on the 2018-based sub-national population projections (SNPP) which utilised only 2-years of internal migration data in their formulation.</p> <p>With regard to the adopted Local Plan housing requirement, it is important to note that this is an aspirational but achievable housing requirement, which exceeded past housing need calculations and continues to exceed calculations of LHN using Government's standard methodology. Furthermore, the housing requirement was phased into 5-year time periods (the average housing requirement over the total period covered by the adopted Local Plan is some 1,375 dwellings per annum). The draft Shropshire Local Plan also proposes an aspirational, but achievable housing requirement, which averages some 1,400 dwellings per annum, which meets identified LHN and provides an opportunity to respond/support other objectives as referenced above.</p> <p>Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. It is considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p>	No	SP2. Strategic Approach
A0353	B001	<p>Include 'points' within the Hierarchy of Settlements (HoS) assessment to reflect the population size of a settlement. Updated the proposed Community Hubs to reflect this updated assessment.</p> <p>Correct the HoS assessment for Westbury.</p> <p>Include Westbury as a proposed Community Hub in the draft Shropshire Local Plan to provide a rural focus for development west of Shrewsbury. Make necessary associated corrections to the draft Shropshire Local Plan.</p> <p>Include additional small-sized allocations for land of less than 10 dwellings in the most viable locations such as villages. This could be achieved through additional Community Hubs.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Westbury. As such it is considered appropriate that Westbury is not identified as a proposed Community Hub.</p> <p>Within the HoS, the size of a settlements population/number of dwellings are specifically considered within Stage 2: Screening of Settlements, whilst provision of services and facilities; high speed broadband; employment opportunities; and public transport links are specifically considered within Stage 3: Assessment of Screened-In Settlements. This is considered an appropriate methodology by which to identify Community Hubs, which are considered significant rural service centres.</p> <p>With regard to Westbury:</p> <p>-Within the HoS consideration of open space is primarily informed by the Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Within this Open Space Needs Assessment two outdoor sports facilities were identified in and around Westbury, however one was excluded from the assessment as it was a dedicated school facility (consistent with the HoS methodology). Whilst this primary school has since closed, this facility is now used as a special education needs school, as such the associated outdoor sports facility remains a dedicated school facility. Within this Open Space Needs Assessment, no amenity green space is identified in or around Westbury, rather Westbury Recreation Ground is identified as an outdoor sports facility (and included within the assessment as such).</p> <p>-Within the HoS both Nigel Farr Farm Services and G O Davies (Westbury) Ltd were considered within the assessment of significant employment opportunities. However, whilst it was concluded that G O Davies (Westbury) Ltd represented a significant employment opportunity as defined within the HoS (and is included within the HoS as such), it was concluded that Nigel Farr Farm Services did not constitute a significant employment opportunity as defined within the HoS. Westbury Special Education Needs School is also not considered to constitute a significant employment opportunity as defined within the HoS.</p>	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0354	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Welcome the new draft Shropshire Local Plan, but consider it currently fails all four tests of soundness in relation to older persons' accommodation in relation to draft Policies SP2, DP1, SP9 and S16.1, as:</p> <ul style="list-style-type: none"> <li>-Neither draft Policy SP2 or any other draft policy sets a target for provision of specialist housing for the elderly or specifically seek to meet this identified need, despite the clear and acknowledged (para 4.20 of the draft Shropshire Local Plan) need, as such it is not 'positively prepared'.</li> <li>-The draft Shropshire Local Plan evidence base illustrates Shropshire's ageing population profile (particularly the Strategic Housing Market Assessment (SHMA) which is summarised in Para 4.40 of the draft Shropshire Local Plan as identifying a need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision), as do the 2018-based household projections (which forecasts higher growth of the elderly than the 2016-based household projections that underpin the SHMA (the majority in the 75-84 and 85+ age groups) - table provided summarising difference within representation). However the draft Shropshire Local Plan makes no specific provision to deliver housing to meet this need, apart from a proposed requirement to provide an appropriate mix of housing within draft Policy DP1. This is inadequate (particularly given the challenges identified in Para 4.20 of the draft Shropshire Local Plan) and will not deliver the quantity or quality of older persons' housing needed in Shropshire. As such it is 'not justified'.</li> <li>-The draft Shropshire Local Plan will fail to deliver sufficient specialist housing and as such is not 'effective' at meeting needs for older persons accommodation. Policy DP1 encourage older persons' housing on sites of 50 or more dwellings, but is unlikely to fully meet Shropshire's needs for this type of housing, due to the limited number of large developments. Schedule A7 of the draft Shropshire Local Plan identifies 76 allocations, of which 36 are for 50+ dwellings. However, 20 of these are for up to 100 dwellings and as such unlikely to make significant contributions amongst the normal housing mix, leaving only 16 sites to make any significant contribution to the need for at least 6,000 units. Furthermore, few of the promoters of proposed allocations have provided evidence they will make significant specialist housing provision on what are largely general housing sites. Quantity and quality of units needed will only be delivered if the proposed approach is supplemented by specialist housing allocations and includes support for 100% specialist housing sites.</li> <li>-Para 61 of the National Planning Policy Framework (NPPF) states the size, type and tenure of housing for different groups in the community (including older people) should be assessed and reflected in policy. National Planning Practice Guidance (NPPG) supports this and also encourages specific allocations for specialist housing and a positive approach to 100% specialist housing. However, the draft Shropshire Local Plan does not include a specific targets for specialist housing within its policies and does not allocate any sites specifically for this purpose. As such it is not consistent with national policy in failing to adequately plan for this category of housing.</li> </ul>
A0355	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Para 2 of draft Policy SP2 undermines aspirations to accommodate investment and new development that contributes to meeting needs and making settlements more sustainable, as it proposes only 1,400 dwellings per annum. This is significantly less than the average 1,656 households per annum estimated over the proposed Plan period within latest official statistics (table provided in representation which compares latest household projections with those underpinning Governments standard method for calculating housing need). As such draft Policy SP2 will constrain growth rather than meet housing need and fails the 'positively prepared' test of soundness. Consider that the significant difference between the latest household projections (2018) and those that underpin Governments standard housing need calculation (2014) (171,876 households compared to only 137,635 households by the end of the proposed Local Plan period) represents exceptional circumstances to justify a departure from Governments standard method for calculating housing need - to avoid a very significant difference between the number of dwellings and the county's growing number of households.</p>
A0356	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	<p>Support draft Policy SP2 which identifies an appropriate level of growth consistent with the standard methodology. Also support the defined role of Shrewsbury as a Strategic Centre. Shrewsbury should continue to be the focus of new housing development.</p>
A0357	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	No	No	<p>The proposed housing requirement (around 1,400 dwellings per annum) does not meet the Duty to Co-operate and fails the 'positively prepared' and 'consistent with national policy' tests of soundness as:</p> <ul style="list-style-type: none"> <li>-It represents a reduction of the 1,530 dwellings planned for within the adopted Core Strategy from 2021, failing to support Governments objective of 'boosting the supply' identified within para 59 of the National Planning Policy Framework (NPPF).</li> <li>-It is significantly lower than the 2018-based household projections which forecast an average growth of 1,656 households per annum (2016-2038), constraining growth rather than meeting need.</li> </ul> <p>Recognise it exceeds Local Housing Need (LHN) calculated using Government's standard methodology, but consider exceptional circumstances exist to justify an alternative approach which reflects current and future demographic trends and market signals (as per para 60 of the NPPF). Specifically the large difference between the 2014-based (which inform the standard method) and 2018-based household projections (24,241 households above the standard method estimate of 23,749 households) over the proposed Local Plan period (graph/table provided within representation). Covid-19 has increased growth/demand in Shropshire in 2020 and resultant shifts towards more internet-based working from home will continue this, as commuting considerations are replaced by quality of life.</p> <p>The level of under-provision will result in rising house prices as demand outstrips supply, worsening affordability (Shropshire already has an affordability ratio of higher than the average for the West Midlands and England (figure provided in representation) and expect this to increase given recent rapid house price rises), and failure to meet the 'positively prepared' test.</p> <p>The Association of Black Country Authorities (ABCA) have requested assistance in meeting unmet housing need (26,000 dwellings to 2038, which is only likely to increase further given Government's new standard methodology which uplifts housing need in Birmingham and Wolverhampton by 35%). Despite limited constraints/Green Belt, Shropshire have proposed only a 1,500 dwelling contribution. Consider this fails the duty to cooperate and para 60 of the NPPF, which requires unmet needs within neighbouring areas to be taken into account. No statement of common ground has been published with ABCA, contrary to para's 24-27 of the NPPF which requires their preparation and availability.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0354	B001	A target for provision should be identified in draft policy SP2. This should state: Over the plan period, at least 3,500 units of additional specialist older persons accommodation (class C3) and 2,500 extra units of residential care provision (class C2) will be delivered.	Noted. It is considered that the draft policies within the draft Shropshire Local Plan, set a clear approach for addressing housing need in Shropshire. This includes the needs of specific groups within the community, including older people. As such, it is not considered necessary (nor is it considered a requirement of national policy), to identify specific targets for the provision of older persons accommodation within draft Policy SP2.	No	SP2. Strategic Approach
A0355	B001	Modify para 2 of draft Policy SP2 to increase the proposed housing requirements to at least 36,432 dwellings and the annual housing requirement to some 1,656 dwellings. Modify para 6 of draft Policy SP2 to specify that growth in urban areas will be complemented by appropriate new development 'and visionary rural transformation' within Community Hubs.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Government has recently consulted upon potential changes to the methodology for calculating LHN, including the potential use of the 2018-based sub-national household projections (SNHP). As a result of this consultation Government determined that it was most appropriate to retain the use of the 2014-based SNHP for this calculation. Furthermore, in responding to this Consultation, Shropshire Council indicated its significant concerns regarding the 2018-based SNHP, particularly with regard to their reliance on the 2018-based sub-national population projections (SNPP) which utilised only 2-years of internal migration data in their formulation. It is also considered that references to Community Hubs within draft Policy SP2 are appropriate and consistent with the wider approach to managing development within Community Hubs within the wider policies of the draft Shropshire Local Plan.	No	SP2. Strategic Approach
A0356	B001	N/A	Noted.	No	SP2. Strategic Approach
A0357	B001	Increase the annual housing requirement to 2,300 dwellings (50,600 dwellings between 2016 and 2038). Starting point for this is the 2018-household projection average annual growth of 1,656 dwellings per annum, adds in the standard method's adjustment for the 2019 affordability ratio and adds 5,000 dwelling contribution to unmet cross-boundary need.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Government has recently consulted upon potential changes to the methodology for calculating LHN, including the potential use of the 2018-based sub-national household projections (SNHP). As a result of this consultation Government determined that it was most appropriate to retain the use of the 2014-based SNHP for this calculation. Furthermore, in responding to this Consultation, Shropshire Council indicated its significant concerns regarding the 2018-based SNHP, particularly with regard to their reliance on the 2018-based sub-national population projections (SNPP) which utilised only 2-years of internal migration data in their formulation. With regard to the adopted Local Plan housing requirement, it is important to note that this is an aspirational but achievable housing requirement, which exceeded past housing need calculations and continues to exceed calculations of LHN using Government's standard methodology. Furthermore, the housing requirement was phased into 5-year time periods (the average housing requirement over the total period covered by the adopted Local Plan is some 1,375 dwellings per annum). The draft Shropshire Local Plan also proposes an aspirational, but achievable housing requirement, which averages some 1,400 dwellings per annum, which meets identified LHN and provides an opportunity to respond/support other objectives as referenced above. Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. It is considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.	No	SP2. Strategic Approach

A0359	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	Support aspiration to accommodate investment and new development that contributes to meeting needs and making its settlements more sustainable. Support identification of Ludlow as a Principal Centre. This accords with the Local Plan vision, given Ludlow's strategic location on the A49 corridor.
A0360	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	Support aspiration to accommodate investment and new development that contributes to meeting needs and making its settlements more sustainable. Identification of Wem as a Key Centre accords with the Local Plan vision, given Wem's strategic location on the A49 corridor with excellent connections to Shrewsbury and other regions to the north.
A0361	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	Support aspiration to accommodate investment and new development that contributes to meeting needs and making its settlements more sustainable. Support identification of Clun as a Community Hub as this accords with the Local Plan vision, given Clun's important role as a service centre for a wider rural hinterland. Having a 'critical mass' of households is essential to maintain vitality of services.
A0362	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	Support aspiration to accommodate investment and new development that contributes to meeting needs and making its settlements more sustainable. Identification of Craven Arms as a Key Centre accords with the Local Plan vision, given Craven Arm's strategic location on the A49 corridor with excellent connections to Shrewsbury and adjoining regions.
A0363	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	Support SP2, as well as Oswestry's identification as a Principal Centre
A0364	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	This policy's aspiration to accommodate, "investment and new development that contributes to meeting needs and making its settlements more sustainable" is supported. The identification of Whitchurch as a Principal Centre accords with the Local Plan's vision in this regard, given Whitchurch's size, range of services, facilities and employment opportunities and its strategic location on the A49 corridor, with excellent connections to other English regions to the north.
A0365	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	Support this policy, specifically in relation to Pant
A0366	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	Support this policy, specifically in relation to Ford
A0367	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	Support this policy, specifically in relation to Oswestry
A0368	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	This policy's aspiration to accommodate, "investment and new development that contributes to meeting needs and making its settlements more sustainable" is supported. The identification of Church Stretton as a Key Centre accords with the Local Plan's vision in this regard, given Church Stretton's strategic location on the A49 corridor with excellent connections to Shrewsbury and adjoining regions.
A0369	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	This policy's aspiration to accommodate, "investment and new development that contributes to meeting needs and making its settlements more sustainable" is supported. The identification of Elson as a Community Cluster settlement accords with the Local Plan's vision in this regard, given Elson's employment opportunities and its location on the B5068 less than 1km from Ellesmere, a key service centre for this area of the County.
A0372	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	Relaxing the requirement for Hubs to have both 'significant employment' and 'peak time public transport' makes the Hierarchy of settlements unsound. This is also contrary to the proposed Climate Change and Sustainability Objectives SO5, SO6 and SO12 which seek to reduce carbon emissions by reducing travel by private vehicles making it unsound.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0359	B001	N/A	Noted.	No	SP2. Strategic Approach
A0360	B001	N/A	Noted.	No	SP2. Strategic Approach
A0361	B001	N/A	Noted.	No	SP2. Strategic Approach
A0362	B001	N/A	Noted.	No	SP2. Strategic Approach
A0363	B003	n/a	Noted.	No	SP2. Strategic Approach
A0364	B002	n/a	Noted.	No	SP2. Strategic Approach
A0365	B002	n/a	Noted.	No	SP2. Strategic Approach
A0366	B002	n/a	Noted.	No	SP2. Strategic Approach
A0367	B002	n/a	Noted.	No	SP2. Strategic Approach
A0368	B002	n/a	Noted.	No	SP2. Strategic Approach
A0369	B002	n/a	Noted.	No	SP2. Strategic Approach
A0372	B001	<p>The Hierarchy of Settlements needs to be amended to fulfil the SP3 Climate Change and Sustainability Objectives SO5, SO6 and SO12 to minimise car travel and reduce carbon emissions.</p> <p>The vague wording used to relax the original criteria in Para 5.41 needs to be removed and the original requirement to have both significant employment and peak time public transport must be reinstated.</p> <p>The Hierarchy of Settlements then needs to be reviewed using this criteria and the draft plan development status and allocations amended as appropriate.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0377	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Support proposals to provide for up to 1,500 homes attributed to meeting needs arising in the Black Country. Consider proposals for significant levels of development in Bridgnorth and Shifnal could credibly meet Black Country needs, given existing migration patterns, geographical proximity and physical links. However, likely a shortfall of land to meet Black Country housing needs will remain, even with this and likely contributions within other emerging neighbouring Local Plans.</p> <p>The Black Country evidence (Urban Capacity Review (UCR) Update 2019) demonstrates a need for 71,500 homes between 2019 and 2038, of which 44,500 homes can be accommodated in the urban area leaving a shortfall of 27,000. This shortfall is likely to increase by around 5,000 homes as a result of recent changes to the calculation of local housing need. An UCR Update 2020 will shortly be published calculating an up-to-date shortfall figure, which will inform a forthcoming consultation on the draft Black Country Plan. Evidence clearly demonstrates the Black Country cannot accommodate all of its needs in the urban area.</p> <p>Duty to cooperate discussions with neighbouring Local Authorities have resulted in a number of local authorities (including South Staffordshire, Lichfield, Cannock and Shropshire) indicating they will seek to test ability to accommodate additional housing need over and above their own as part of Local Plan Reviews (anticipate as a best-case scenario they could accommodate up to 10,500-12,500 homes, leaving a significant shortfall of approximately 14,550-16,500 houses (plus 5,000 homes as a result of the change to the calculation of local housing need).</p> <p>Currently engaging with other Local Authorities with a functional relationship (including Telford &amp; Wrekin, Solihull and Bromsgrove) and it is possible further contributions will come forward.</p> <p>In terms of non-urban capacity, assessments undertaken (Green Belt, Landscape Sensitivity, Historic Landscape Characterisation and Ecological surveys) severely constrain capacity to deliver large scale development across much of the Black Country. Market deliverability is also being assessed, but consider this will also limit capacity (based on experience in Birmingham, where capacity of an urban extension was reduced from 10,000 to 5,000 over the 15 year plan period and this was based on a strong housing market recovery scenario in one of the strongest housing markets areas in the West Midlands). The majority of the Green Belt is located in Walsall and to a lesser extent Dudley, so these are the two main housing market areas with potential for Green Belt housing, based on a scenario that there is sufficient unconstrained capacity in the Black Country Green Belt, a deliverability study may reasonably conclude capacity for some 10,000 homes in the Green Belt over the 15-year Plan period, leaving a significant shortfall to be met in neighbouring authorities. This does not reflect findings of key studies/Green Belt assessment, position will be made clearer at the forthcoming consultation on the draft Black Country Plan. However, it is clear that on the basis of the maximum capacity of the urban area, the potential contribution of neighbouring local authorities, and the indicative market capacity of the Green Belt, it is likely that the Black Country will be unable to meet its own housing land needs.</p> <p>Request the draft Shropshire Local Plan recognises there could continue to be a shortfall of land in neighbouring areas which could be accommodated within the Plan area. This must be recognised in the Plan as a key trigger for an early review of the draft Shropshire Local Plan. This approach has been used in a number of West Midlands Local Plans - most recently Wyre Forest, Stratford on Avon and North Warwickshire. Failure to include this is a serious omission and must be addressed in order for the Plan to be sound.</p>
A0377	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Incorporation of 30ha of employment land to meet needs arising in the Black Country, within the overall employment land requirement is welcomed in principle. The evidence for this is set out in the Economic Development Needs Assessment (EDNA), which identifies strong labour market linkages with the Black Country and Wolverhampton in particular, and recommends close co-operation on employment land supply.</p> <p>The Black Country employment land requirement ranges from 592ha (baseline) to 870ha (aspirational growth based on WMCA SEP). Existing urban employment land supply is around 305ha, leaving a shortfall of between 263ha and 500ha, depending on the growth scenarios applied. As per housing, considering all opportunities to bring forward additional employment land within the urban area and Green Belt, but this exercise will not make a significant impact upon addressing unmet need. Contributions through the Duty to Cooperate are currently limited to 50ha in total (including the 30ha in the draft Shropshire Local Plan), but this work is ongoing and will include a proportion of the consented West Midlands Interchange at Four Ashes in South Staffordshire.</p> <p>The quantitative employment land requirement identified in the EDNA is between 164ha and 264ha (including the 30ha Black Country contribution). The current supply is some 276ha and the Plan target 300ha. This suggests there is an oversupply of land of between 138ha and 36ha, not required to meet local needs and could provide scope to increase the contribution to the Black Country further.</p> <p>Quantitatively, employment sites in Shifnal and Bridgnorth (given their location and functional relationship) could be assumed to be capable of meeting needs arising in the Black Country. Size and accessibility of proposed sites to the motorway network may limit the range of occupiers attracted to them (unlikely to be attractive to large scale and footloose inward-investment requirements). Note the EDNA recognises proximity of i54 (Junction 2 of M54) and potential for this to draw further occupiers into the County and the need to consider whether there will be enough demand to justify additional development (in addition to that already proposed as part of the i54 extension). Demand for large scale occupiers/need for additional 'strategic' employment sites will be considered in the West Midlands Strategic Sites Study and is anticipated to be completed in early 2021.</p> <p>As for housing, it is possible there could continue to be a quantitative and qualitative shortfall of employment land in neighbouring areas which could be accommodated within the Plan area. Request the draft Shropshire Local Plan recognises there could continue to be a shortfall of land in neighbouring areas which could be accommodated within the Plan area. This must be recognised in the Plan as a key trigger for an early review of the draft Shropshire Local Plan. This approach has been used in a number of West Midlands Local Plans - most recently Wyre Forest, Stratford on Avon and North Warwickshire. Failure to include this is a serious omission and must be addressed in order for the Plan to be sound.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0377	B001	Recognise there could continue to be a shortfall of land in neighbouring areas to which could be accommodated within the Plan area. Include this as a key trigger for an early review of the draft Shropshire Local Plan.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>There is a legal requirement to review Local Plans every five years (Regulation 10A of the Town and Country Planning (Local Planning) (England) Regulations 2012). Furthermore, para 33 of the National Planning Policy Framework (NPPF) states "Policies in local plans and spatial development strategies should be reviewed to assess whether they need updating at least once every five years, and should then be updated as necessary. Reviews should be completed no later than five years from the adoption date of a plan, and should take into account changing circumstances affecting the area, or any relevant changes in national policy. Relevant strategic policies will need updating at least once every five years if their applicable local housing need figure has changed significantly; and they are likely to require earlier review if local housing need is expected to change significantly in the near future." This requirement is also specifically recognised within para 2.16 of the introduction to the draft Shropshire Local Plan. We would also note that proposed changes to the plan making process within the Planning for the Future White Paper, if ultimately introduced, could also require a review of the Local Plan. As such, it is considered unnecessary to include a specific early review mechanism within the draft Shropshire Local Plan.</p>	No	SP2. Strategic Approach
A0377	B002	<p>Recognise there could continue to be a shortfall of land in neighbouring areas to which could be accommodated within the Plan area. Include this as a key trigger for an early review of the draft Shropshire Local Plan.</p> <p>Consider an increased employment land contribution to the Black Country.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed employment land requirement and proposed employment land supply are also considered appropriate, effective and sustainable.</p> <p>The proposed employment land requirement seeks to support the achievement of the aspirations of the Economic Growth Strategy for Shropshire through the provision of sufficient appropriately located land to deliver high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable and also responds to key quantitative and qualitative evidence including that within the Economic Development Needs Assessments (EDNA), Employment Land Review (ELR) and Authority Monitoring Report (AMR) undertaken to inform the draft Shropshire Local Plan.</p> <p>The proposed employment land requirement incorporates up to 30ha of employment land to support the employment needs of the emerging Black Country Plan, where evidence indicates employment delivery opportunities are constrained. This reflects a positive approach to cross boundary cooperation and responds to the functional relationship between the two areas.</p> <p>In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement. It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038.</p> <p>There is a legal requirement to review Local Plans every five years (Regulation 10A of the Town and Country Planning (Local Planning) (England) Regulations 2012). Furthermore, para 33 of the National Planning Policy Framework (NPPF) states "Policies in local plans and spatial development strategies should be reviewed to assess whether they need updating at least once every five years, and should then be updated as necessary. Reviews should be completed no later than five years from the adoption date of a plan, and should take into account changing circumstances affecting the area, or any relevant changes in national policy. Relevant strategic policies will need updating at least once every five years if their applicable local housing need figure has changed significantly; and they are likely to require earlier review if local housing need is expected to change significantly in the near future." This requirement is also specifically recognised within para 2.16 of the introduction to the draft Shropshire Local Plan. We would also note that proposed changes to the plan making process within the Planning for the Future White Paper, if ultimately introduced, could also require a review of the Local Plan. As such, it is considered unnecessary to include a specific early review mechanism within the draft Shropshire Local Plan.</p>	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0381	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	Fully supportive of this draft policy. The residential development that is proposed on the land off Wood Street site would help Shropshire to achieve its growth aspirations, delivering well-designed new housing on a site comprising entirely of previously developed land that is currently under-utilised. It would also support the delivery of the Big Town Plan, including for example by facilitating the creation of an enhanced pedestrian and cycle connection along Bagley Brook, which is one of the key design principles identified by the Big Town Plan. Within a pre-application advice letter, the Local Planning Authority acknowledged that the site offers opportunities to improve ecological and public connectivity in the area.
A0382	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2	Not Specified	No	Not Specified	Myddle's score in the HoS was 52 in 2017, but it was reduced to 47 in 2018, Whilst the shop closing is accepted (deducting the score by 4), Myddle lost points for not having 'multiple provision' of Children's Playground. Myddle Park has the facilities to not lose these points and thus remain the settlement at Hub status.
A0383	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	The 2017 HoS gave Morda a score of 53, in 2018 it was updated to 47. Whilst it is accepted that the Post Office has closed, there is no explanation for reducing the Public House's score from 4 to 3 and there are multiple Children's Playgrounds, therefore 4 points should not have been removed.
A0385	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Support the principle of the strategic approach, role of Shrewsbury as the main strategic centre with commensurate growth, and the status of Principal and Key Centres as part of a sustainable development strategy for Shropshire in draft Policy SP2. However, consider a greater proportion of growth should be directed to urban areas - based on Appendix 5 it appears around 74% of the housing requirement and 87% of the employment land requirement are directed to urban areas, but there are a number of small Community Hubs with significant development directed towards them). This is a more sustainable approach, will allow for more larger development sites (the Council should be cautious about over-reliance on smaller sites given higher rates of non-implementation), reflects the Economic Growth Strategies prioritisation of investment in strategic locations/growth zones on strategic corridors, would serve to boost economic growth in line with para 80 of the NPPF, and reflects conclusions within the Sustainability Appraisal (SA) that an urban focus is more sustainable than alternatives (a greater urban focus and higher residential guideline is not tested within the SA).</p> <p>Some development in Community Hubs is necessary to support long-term sustainability, but the scale of development should be proportionate to size and sustainability of the settlement - the proposed approach needs to be more robustly justified with reference to scale, services/facilities and accessibility to higher order settlements.</p> <p>Further information on housing trajectories for proposed allocations should be provided to justify anticipated timescales for delivery (e.g. BUR004 does not appear to have been actively promoted).</p> <p>The Strategic Housing Market Assessment (SHMA) undertaken to inform the draft Shropshire Local Plan states a housing requirement sufficient to meet affordable housing need is undeliverable, but there is an opportunity to go further towards meeting affordable housing need via additional sustainable development as part of the urban focused strategy. Additional housing land supply should be identified to provide flexibility (including in relation to changes to unmet cross-boundary need) and ensure the housing requirement is achieved. Based on Appendix 5 it appears around 30,912 dwellings have been identified against a need for 30,800 dwellings, this risks the draft Shropshire Local Plan not being effective, particularly given issues regarding lapse rates (the rate applied in the housing trajectory is unclear and must be justified. The Council's Five Year Housing Land Supply (5YS), which is not based on up-to-date evidence, includes a 10% lapse rate, but none is referenced within the Strategic Land Availability Assessment (SLAA). NPPG states an overall risk assessment should be made as to whether sites will come forward as anticipated), and windfall allowances (no evidence for windfall rates for each settlement, this must be justified in line with the NPPF and NPPG). Greater flexibility and certainty about the ability to meet local and unmet cross-boundary need can be provided by identifying additional residential/mixed use allocations in sustainable urban locations during and beyond the proposed plan period, rather than relying on windfall development. Recent Local Plan examinations have provided significant degrees of flexibility in housing land supply in case large allocations are delayed.</p> <p>The proposed housing requirement exceeds minimum local housing need (LHN) calculated using Government's standard methodology by around 19%, however a higher requirement (1,430 dwellings per annum) was previously proposed and it is not clear why this is no longer the case (this should be tested within the SA). How this 19% uplift has been determined is not documented in the LHN Assessment. It also provides no commentary on the proposed contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country.</p> <p>It is unclear whether the housing requirement and economic growth ambitions align, evidence should be clearer on this - the LHN Assessment does not identify how much uplift above LHN is required for economic growth; whilst the scenarios in the Economic Development Needs Assessment (EDNA) associated with LHN/housing requirement suggest a lower employment land requirement than that proposed in the draft Shropshire Local Plan. Should further housing growth be required to support the economic growth strategy, this would be best distributed in accordance with the urban focused strategy.</p> <p>Changes noted will ensure the plan is positively prepared, justified, effective and consistent with national policy.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0381	B002	n/a	Noted.	No	SP2. Strategic Approach
A0382	B002	Myddle's scoring should be corrected resulting in it gaining Hub status (from 47 to 51). Subsequently, the site described in our representations should be allocated (to the rear of Glebelands) for circa 47 dwellings.	Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Myddle. As such it is considered appropriate for Myddle to be identified as open countryside.	No	SP2. Strategic Approach
A0383	B001	Policy SP2 (Schedule SP2.2) of the draft Shropshire Local Plan should be amended to designate Morda Village as a Community Hub. Land should be allocated in the draft Local Plan policy S14.2 for new housing development in the village, including all or part of the land in the ownership of TSE.	Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Morda. As such it is considered appropriate for Morda to be identified as open countryside.	No	SP2. Strategic Approach
A0385	B001	<ul style="list-style-type: none"> <li>-Consider further flexibility in the housing requirement and housing land supply to take account of increased Black Country housing needs under the revised standard methodology.</li> <li>-Increase the proportion of development (particularly housing) directed towards urban areas.</li> <li>-Clearly demonstrate the degree of alignment between the economic growth employment land requirement and the housing requirement within the draft Shropshire Local Plan and supporting evidence.</li> <li>-Provide further flexibility to the housing land supply (directed towards urban areas in accordance with the urban focus strategy).</li> <li>-Review flexibility of the housing land supply with respect to lapse rates and windfall allowance assumptions. Reduce reliance on windfalls by securing additional allocations as part of the urban focused strategy.</li> </ul>	<p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Shropshire Council also considers that it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. Assumptions regarding non-delivery rates, windfall allowances and delivery timescales for proposed allocations are considered appropriate and respond to consideration of the specific characteristics, constraints and opportunities that exist across Shropshire, in specific settlements and on specific sites.</p> <p>Shropshire Council consulted on options for growth and the distribution of that growth at the Issues and Options and Preferred Scale and Distribution of Development stages of Local Plan preparation. A Sustainability Appraisal was carried out for both of these stages and is available on the Council's website.</p> <p>The proposed employment land requirement seeks to support the achievement of the aspirations of the Economic Growth Strategy for Shropshire through the provision of sufficient appropriately located land to deliver high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable and also responds to key quantitative and qualitative evidence including that within the Economic Development Needs Assessments (EDNA), Employment Land Review (ELR) and Authority Monitoring Report (AMR) undertaken to inform the draft Shropshire Local Plan. The proposed employment land requirement incorporates up to 30ha of employment land to support the employment needs of the emerging Black Country Plan, where evidence indicates employment delivery opportunities are constrained. This reflects a positive approach to cross boundary cooperation and responds to the functional relationship between the two areas.</p> <p>In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement. It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038.</p> <p>It is considered that an appropriate balance is achieved between the proposed housing and employment land requirements. It is important to note that the proposed employment land requirement needs to respond to numerous factors in addition to the proposed housing requirement, including: achieving key economic objectives of the strategic approach in Policy SP2, such as providing for the delivery of a growing and diverse labour force (including those which commute out of the County), and in turn supporting the delivery of an improving rate of economic growth and an increase in the productivity of the local economy; wider aspirations within the Economic Growth Strategy for Shropshire; the nature of employment development in Shropshire (including the proportion of an employment site that results in net employment floorspace); the need to off-set the re-use of existing employment land for other purposes; and the wider range of employment uses now being accepted in the draft Shropshire Local Plan.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0386	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Support the principle of the strategic approach, urban focus and identification of Whitchurch as a Principal Centre (informed by the Hierarchy of Settlements Assessment/Economic Development Needs Assessment undertaken to inform the draft Shropshire Local Plan and the Shropshire Economic Growth Strategy) in draft Policy SP2. However, to ensure the draft Shropshire Local Plan is positively prepared, effective and consistent with national policy consider:</p> <p>-A greater proportion of housing growth should be directed to urban areas (based on Appendix 5 it appears around 74% of the housing requirement is directed to urban areas, but there are a number of small Community Hubs with significant development directed towards them and a higher percentage increase in the number of dwellings proposed than the urban settlements). Whilst some development in Community Hubs is necessary to support long-term sustainability, the scale of development should be proportionate to size and sustainability of the settlement. More sustainable growth would be achieved by directing more to higher order settlements, such as Whitchurch. This would also provide an opportunity to reduce reliance on smaller sites in the housing supply (subject to higher non-implementation rates). Directing more housing development to urban locations also reflects the Economic Growth Strategies prioritisation of investment in strategic locations/growth zones on strategic corridors (Whitchurch/Market Drayton are on the A41 strategic corridor), supports opportunities connected to HS2, would serve to boost economic growth in line with para 80 of the NPPF, and reflects conclusions within the Sustainability Appraisal (SA) that an urban focus is more sustainable than alternatives (a greater urban focus and higher residential guideline is not tested within the SA).</p> <p>-Additional housing land supply should be identified. This will provide flexibility (including in relation to changes to unmet cross-boundary need) and ensure the housing requirement is achieved. Based on Appendix 5 it appears around 30,912 dwellings have been identified against a need for 30,800 dwellings, this risks the draft Shropshire Local Plan not being effective, particularly given issues regarding lapse rates (the rate applied in the housing trajectory is unclear and must be justified. The Council's Five Year Housing Land Supply (5YS), which is not based on up-to-date evidence, includes a 10% lapse rate, but none is referenced within the Strategic Land Availability Assessment (SLAA). NPPG states an overall risk assessment should be made as to whether sites will come forward as anticipated), and windfall allowances (no evidence for windfall rates for each settlement, this must be justified in line with the NPPF and NPPG). Greater flexibility and certainty about the ability to meet local and unmet cross-boundary need can be provided by increased growth in sustainable urban locations, rather than relying on windfall development. Recent Local Plan examinations have provided significant degrees of flexibility in housing land supply in case large allocations are delayed.</p> <p>The proposed housing requirement exceeds minimum local housing need (LHN) calculated using Government's standard methodology by around 19%, however a higher requirement (1,430 dwellings per annum) was previously proposed and it is not clear why this is no longer the case (this should be tested within the SA). How this 19% uplift has been determined is not documented in the LHN Assessment. It also provides no commentary on the proposed contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country.</p> <p>It is unclear whether the housing requirement and economic growth ambitions align, evidence should be clearer on this - the LHN Assessment does not identify how much uplift above LHN is required for economic growth; whilst the scenarios in the Economic Development Needs Assessment (EDNA) associated with LHN/housing requirement suggest a lower employment land requirement than that proposed in the draft Shropshire Local Plan. Should further housing growth be required to support the economic growth strategy, this would be best distributed in accordance with the urban focused strategy.</p> <p>The Strategic Housing Market Assessment (SHMA) undertaken to inform the draft Shropshire Local Plan states a housing requirement sufficient to meet affordable housing need is undeliverable, but there is an opportunity to go further towards meeting affordable housing need via additional sustainable development as part of the urban focused strategy.</p>

Reduce reliance on windfalls by securing additional allocations as part of the urban focused strategy.</li> </ul>	<p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Shropshire Council also considers that it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. Assumptions regarding non-delivery rates, windfall allowances and delivery timescales for proposed allocations are considered appropriate and respond to consideration of the specific characteristics, constraints and opportunities that exist across Shropshire, in specific settlements and on specific sites. Shropshire Council consulted on options for growth and the distribution of that growth at the Issues and Options and Preferred Scale and Distribution of Development stages of Local Plan preparation. A Sustainability Appraisal was carried out for both of these stages and is available on the Council's website.</p> <p>The proposed employment land requirement seeks to support the achievement of the aspirations of the Economic Growth Strategy for Shropshire through the provision of sufficient appropriately located land to deliver high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable and also responds to key quantitative and qualitative evidence including that within the Economic Development Needs Assessments (EDNA), Employment Land Review (ELR) and Authority Monitoring Report (AMR) undertaken to inform the draft Shropshire Local Plan. The proposed employment land requirement incorporates up to 30ha of employment land to support the employment needs of the emerging Black Country Plan, where evidence indicates employment delivery opportunities are constrained. This reflects a positive approach to cross boundary cooperation and responds to the functional relationship between the two areas. In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement. It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038. It is considered that an appropriate balance is achieved between the proposed housing and employment land requirements. It is important to note that the proposed employment land requirement needs to respond to numerous factors in addition to the proposed housing requirement, including: achieving key economic objectives of the strategic approach in Policy SP2, such as providing for the delivery of a growing and diverse labour force (including those which commute out of the County), and in turn supporting the delivery of an improving rate of economic growth and an increase in the productivity of the local economy; wider aspirations within the Economic Growth Strategy for Shropshire; the nature of employment development in Shropshire (including the proportion of an employment site that results in net employment floorspace); the need to off-set the re-use of existing employment land for other purposes; and the wider range of employment uses now being accepted in the draft Shropshire Local Plan.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0387	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Support identification of Market Drayton as a Principal Centre and Longslow as a Community Cluster (given the need to deliver proportionate development to support rural vitality and its proximity to Market Drayton).</p> <p>Support the principle of the strategic approach, but object to the level and apportionment of growth currently identified which is considered unsound (not fully positively prepared, justified, effective or consistent with national planning policy). Specifically more development should be focused in higher order settlements such as Market Drayton and less in Community Hubs. Based on Appendix 5 it appears around 74% of the housing requirement is directed to urban areas, but there are a number of small Community Hubs with significant development directed towards them and a higher percentage increase in the number of dwellings proposed than the urban settlements. Whilst some development in Community Hubs is necessary to support long-term sustainability, the scale of development should be proportionate to size and sustainability of the settlement and more robustly justified. Focusing more development in higher order settlement would also provide an opportunity to reduce reliance on smaller sites in the housing supply (subject to higher non-implementation rates), reflects the Economic Growth Strategies prioritisation of investment in strategic locations/growth zones on strategic corridors (Whitchurch/Market Drayton are on the A41 strategic corridor), supports opportunities connected to HS2 and would serve to boost economic growth in line with para 80 of the NPPF, and reflects conclusions within the Sustainability Appraisal (SA) that an urban focus is more sustainable than alternatives (a greater urban focus and higher residential guideline is not tested within the SA).</p> <p>The proposed housing requirement exceeds minimum local housing need (LHN) calculated using Government's standard methodology by around 19%, however a higher requirement (1,430 dwellings per annum) was previously proposed and it is not clear why this is no longer the case (this should be tested within the SA). How this 19% uplift has been determined is not documented in the LHN Assessment. It also provides no commentary on the proposed contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country.</p> <p>It is unclear whether the housing requirement and economic growth ambitions align, evidence should be clearer on this - the LHN Assessment does not identify how much uplift above LHN is required for economic growth; whilst the scenarios in the Economic Development Needs Assessment (EDNA) associated with LHN/housing requirement suggest a lower employment land requirement than that proposed in the draft Shropshire Local Plan. Should further housing growth be required to support the economic growth strategy, this would be best distributed in accordance with the urban focused strategy.</p> <p>The Strategic Housing Market Assessment (SHMA) undertaken to inform the draft Shropshire Local Plan states a housing requirement sufficient to meet affordable housing need is undeliverable, but there is an opportunity to go further towards meeting affordable housing need via additional sustainable development as part of the urban focused strategy. Additional housing land supply should be identified. This will provide flexibility (including in relation to changes to unmet cross-boundary need) and ensure the housing requirement is achieved. Based on Appendix 5 it appears around 30,912 dwellings have been identified against a need for 30,800 dwellings, this risks the draft Shropshire Local Plan not being effective, particularly given issues regarding lapse rates (the rate applied in the housing trajectory is unclear and must be justified. The Council's Five Year Housing Land Supply (5YS), which is not based on up-to-date evidence, includes a 10% lapse rate, but none is referenced within the Strategic Land Availability Assessment (SLAA). NPPG states an overall risk assessment should be made as to whether sites will come forward as anticipated), and windfall allowances (no evidence for windfall rates for each settlement, this must be justified in line with the NPPF and NPPG). Greater flexibility and certainty about the ability to meet local and unmet cross-boundary need can be provided by increased growth in sustainable urban locations, rather than relying on windfall development. Recent Local Plan examinations have provided significant degrees of flexibility in housing land supply in case large allocations are delayed.</p>
A0400	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	No	Yes	<p>Proposed categorisation of Key Centres, Community Hubs and Community Clusters in draft Policy SP2 and associated Schedules (SP2.1, SP2.2 and SP2.3) does not take into account whether settlements are located within the Shropshire Hills AONB. The AONB should be considered when categorising settlements and in planning/protection terms. Shropshire Council continues to 'shoe horn' AONB communities into Shropshire-wide categories and is determined to apply Shropshire-wide policies to the AONB. This approach is not 'fit for purpose', dilutes the protections that should exist for the AONB environment and landscape and is not sound.</p>
A0413	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	No	Yes	<p>Support the proposed housing requirement within draft Policy SP2, which exceeds the latest calculation of local housing need, includes a 1,500 dwellings contribution to unmet need arising in the Black Country.</p> <p>The proposed housing requirement should be considered a minimum in accordance with para 60 of the National Planning Policy Framework (NPPF). Housing provision above the requirement is more likely to deliver sufficient housing (including affordable housing).</p> <p>Broadly support the spatial distribution of development, with its clear emphasis on future housing and employment development in and adjacent to Shrewsbury as the largest and most sustainable settlement in Shropshire.</p> <p>Concerned about proposals for strategic sites that are not particularly well connected to existing settlements (including development of Green Belt). This is not a sound strategy as it is not justified or effective given opportunities to focus on Shrewsbury, capitalising on existing and proposed infrastructure. Shrewsbury can support more development than proposed, particularly to support new infrastructure provision, including the NWRR.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0387	B002	<p>-Consider further flexibility in the housing requirement and housing land supply to take account of increased Black Country housing needs under the revised standard methodology.</p> <p>-Increase the proportion of development (particularly housing) directed towards urban areas.</p> <p>-Clearly demonstrate the degree of alignment between the economic growth employment land requirement and the housing requirement within the draft Shropshire Local Plan and supporting evidence.</p> <p>-Provide further flexibility to the housing land supply (directed towards urban areas in accordance with the urban focus strategy).</p> <p>-Review flexibility of the housing land supply with respect to lapse rates and windfall allowance assumptions. Reduce reliance on windfalls by securing additional allocations as part of the urban focused strategy.</p>	<p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council also considers that it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. Assumptions regarding non-delivery rates, windfall allowances and delivery timescales for proposed allocations are considered appropriate and respond to consideration of the specific characteristics, constraints and opportunities that exist across Shropshire, in specific settlements and on specific sites.</p> <p>Shropshire Council consulted on options for growth and the distribution of that growth at the Issues and Options and Preferred Scale and Distribution of Development stages of Local Plan preparation. A Sustainability Appraisal was carried out for both of these stages and is available on the Council's website.</p> <p>The proposed employment land requirement seeks to support the achievement of the aspirations of the Economic Growth Strategy for Shropshire through the provision of sufficient appropriately located land to deliver high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable and also responds to key quantitative and qualitative evidence including that within the Economic Development Needs Assessments (EDNA), Employment Land Review (ELR) and Authority Monitoring Report (AMR) undertaken to inform the draft Shropshire Local Plan. The proposed employment land requirement incorporates up to 30ha of employment land to support the employment needs of the emerging Black Country Plan, where evidence indicates employment delivery opportunities are constrained. This reflects a positive approach to cross boundary cooperation and responds to the functional relationship between the two areas.</p> <p>In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement. It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038.</p> <p>It is considered that an appropriate balance is achieved between the proposed housing and employment land requirements. It is important to note that the proposed employment land requirement needs to respond to numerous factors in addition to the proposed housing requirement, including: achieving key economic objectives of the strategic approach in Policy SP2, such as providing for the delivery of a growing and diverse labour force (including those which commute out of the County), and in turn supporting the delivery of an improving rate of economic growth and an increase in the productivity of the local economy; wider aspirations within the Economic Growth Strategy for Shropshire; the nature of employment development in Shropshire (including the proportion of an employment site that results in net employment floorspace); the need to off-set the re-use of existing employment land for other purposes; and the wider range of employment uses now being accepted in the draft Shropshire Local Plan.</p>	No	SP2. Strategic Approach
A0400	B001	<p>Communities within the Shropshire Hills AONB should be withdrawn from the Key Centre, Community Hub and Community Cluster settlement categories.</p> <p>Shropshire Council, the Shropshire Hills AONB Partnership and interested community groups to prepare a dedicated Development Plan Document (DPD) for the Shropshire Hills AONB.</p>	<p>The categorisation of settlements proposed in draft Policy SP2 (and Schedules SP2.1, SP2.2 and SP2.3) has been informed by consideration of services and facilities available within settlements.</p> <p>However the proposed strategy for the distribution of development has had due regard to the specific characteristics, constraints and opportunities that exist across Shropshire, including the Shropshire Hills AONB. Furthermore the proposed development strategies for specific settlements have had regard to the relevant settlements specific characteristics, constraints and opportunities, including whether it is located within the Shropshire Hills AONB.</p> <p>As such, Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategies for settlements within the Shropshire Hills AONB, and the existing and proposed allocations identified to contribute towards achieving these proposed development strategies are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The draft Shropshire Local Plan includes a draft Policy specifically relating to the Shropshire Hills AONB (draft Policy DP24), this combined with the proposed strategic approach and wider draft policies within the draft Shropshire Local Plan are considered an appropriate means by which to plan for development within the Shropshire Hills AONB. As such a separate Development Plan Document is not considered necessary for the area.</p>	No	SP2. Strategic Approach
A0413	B004	<p>The draft Shropshire Local Plan should be amended to direct more development towards Shrewsbury and allocate more land in and around the town. This should include sites SHR163, SHR174, SHR109 and SHR023.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p>	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0425	B001	Clive settlement should not be identified as a Community Hub in Schedule SP2.2 of draft Policy SP2.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0435	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S14.2	Not Specified	Not Specified	Not Specified	Trefonen's proposed amended designation from "Countryside" to Hub is flawed in several respects and consequently assessment points allocated incorrectly. There are no employment opportunities within the village other than 1 part time vacancy in the small village shop/post office. Please note that this is a small facility necessitating a separate shopping trip into Oswestry for a greater variety of provisions. Secondly, the bus service is very limited and a car or independent transport would generally be necessary for visits to supermarkets/ doctors/ dentists/ hospital/ opticians etc.,. Thirdly, the library service is a mobile facility, once a fortnight. Having spoken to many fellow residents, this would be gladly given up to accurately reduce the points allocation used to allocate "Hub" status and preserve our "Countryside" designation.
A0437	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	The Council stated that it would apply a consistent methodology for the identification of Community Hubs, assessed through the Hierarchy of Settlements document. The policy identifies Community Hubs as significant rural service centres but it is unsound in its application as it is not based on up to date or accurate evidence and the treatment of changes to local services and facilities throughout the Plan's development has been inconsistent. The Hierarchy of Settlements (August 2020) supports the Local Plan Review and Policy SP2, by setting out the methodology and conclusions for identifying Shropshire's service centres. The purpose being to inform Policy SP2 with specific and consistent criteria about Shropshire's settlements and their sustainability. Despite consultation responses highlighting changing evidence on the availability of local services and facilities in some of Shropshire's settlements, including the most recent Regulation 18: Pre-Submission Draft of the Local Plan (August 2020- September 2020), Policy SP2 does not take these into account. Previous formal and informal consultations on the Local Plan Review have repeatedly highlighted the misidentification of available local services for the village of Clive. However Clive remains under Policy SP2 as a Community Hub and deemed a 'significant rural service centre' but without the actual presence of the necessary associated services and facilities to support this. This therefore raises concerns about the soundness of the application of the Hierarchy of Settlements evidence base in the development of the Regulation 19 Plan and the application of a consistent approach cross the whole of the Plan area. For example, the village of Myddle, like Clive, was initially identified as a Community Hub but following closure of the local convenience store in summer 2018, the evidence base was reviewed and it was determined that the village fell below the threshold to be considered a 'significant rural service centre'. The same consistent application of this methodology has not been applied to the village of Clive, despite falling under comparative circumstances with a closure of a local convenience store. The village thereby also falls below the threshold for a Community Hub. This was raised with Shropshire Council by the Parish Council, local residents and indeed the shop owner during the Regulation 18 consultation stage but the Regulation 19 Plan remains unchanged, rendering Policy S2.2 unsound as it is not justified and based upon out of date evidence.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0435	B001	Revert Trefonen's status back to countryside after the scoring is corrected.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.</p>	No	SP2. Strategic Approach
A0437	B001	Policy SP2 should remove reference to Clive as Community Hub as current evidence on availability and accessibility of local facilities and services means it does not meet the definition of a significant rural service centre as defined by the Hierarchy of Settlements evidence base and subsequent Local Plan policies.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0445	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Policy SP2 states that growth opportunities in rural areas should be closely aligned with the ability of villages to provide a suitable standard of services and facilities. In order to ensure this the Council stated that it would apply a consistent methodology for the identification of Community Hubs, assessed through the Hierarchy of Settlements document. The policy identifies Community Hubs as significant rural service centres but it is unsound in its application as it is not based on up to date or accurate evidence and the treatment of changes to local services and facilities throughout the Plan's development has been inconsistent. The Hierarchy of Settlements (August 2020) supports the Local Plan Review and Policy SP2, by setting out the methodology for identifying Shropshire's service centres. This is to provide Policy SP2 with specific and consistent criteria about Shropshire's settlements and their sustainability. Para 2.6 of the August 2020 version of the Hierarchy of Settlements states the need to keep this evidence up to date with best available information about changing local facilities, services and infrastructure, including feedback from previous consultation on the Local Plan Review and informal consultation with representatives of the local communities. However, despite consultation responses highlighting changing evidence on the availability of local facilities in some of Shropshire's settlements, including the most recent Regulation 18: Pre- Submission Draft of the Local Plan (August 2020- September 2020), Policy SP2 does not take these into account. Previous formal and informal consultations on the Local Plan Review have repeatedly highlighted the misidentification of available local services for the village of Clive. However Clive remains under Policy SP2 as a Community Hub and deemed a 'significant rural service centre' but without the actual presence of the necessary associated services and facilities to support this. This raises significant concerns about the soundness of the application of the Hierarchy of Settlements evidence base in the development of the Regulation 19 Plan and the application of a consistent approach cross the whole of the Plan area. For example, the village of Myddle, like Clive, was initially identified as a Community Hub but following closure of the local convenience store in summer 2018, the evidence base was reviewed and it was determined that the village fell below the threshold to be considered a 'significant rural service centre'. The same consistent application of this methodology has not been applied to the village of Clive, despite falling under comparative circumstances with a closure of a local convenience store. The village thereby also falls below the threshold for a Community Hub. This was raised with Shropshire Council by the Parish Council, local residents and indeed the shop owner during the Regulation 18 consultation stage but the Regulation 19 Plan remains unchanged, rendering Policy S2.2 unsound as it is not justified and based upon out of date evidence.</p>
A0446	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Policy SP2 states that growth opportunities in rural areas should be closely aligned with the ability of villages to provide a suitable standard of services and facilities. In order to ensure this the Council stated that it would apply a consistent methodology for the identification of Community Hubs, assessed through the Hierarchy of Settlements document. The policy identifies Community Hubs as significant rural service centres but it is unsound in its application as it is not based on up to date or accurate evidence and the treatment of changes to local services and facilities throughout the Plan's development has been inconsistent. The Hierarchy of Settlements (August 2020) supports the Local Plan Review and Policy SP2, by setting out the methodology for identifying Shropshire's service centres. This is to provide Policy SP2 with specific and consistent criteria about Shropshire's settlements and their sustainability. Para 2.6 of the August 2020 version of the Hierarchy of Settlements states the need to keep this evidence up to date with best available information about changing local facilities, services and infrastructure, including feedback from previous consultation on the Local Plan Review and informal consultation with representatives of the local communities. However, despite consultation responses highlighting changing evidence on the availability of local facilities in some of Shropshire's settlements, including the most recent Regulation 18: Pre- Submission Draft of the Local Plan (August 2020- September 2020), Policy SP2 does not take these into account. Previous formal and informal consultations on the Local Plan Review have repeatedly highlighted the misidentification of available local services for the village of Clive. However Clive remains under Policy SP2 as a Community Hub and deemed a 'significant rural service centre' but without the actual presence of the necessary associated services and facilities to support this. This raises significant concerns about the soundness of the application of the Hierarchy of Settlements evidence base in the development of the Regulation 19 Plan and the application of a consistent approach cross the whole of the Plan area. A0447	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix: Hierarchy of Settlements	Yes	No	Yes	<p>HoS methodology is having a detrimental effect on sustainability of rural villages by incentivising service closure - it does not meet the test of soundness as it is inconsistent with national policy and fails NPPF para 83d. In direct opposition to the retention of community facilities, before the plan has even been adopted, it has led to the loss of community facilities and created an impediment to new ones in some rural Shropshire villages. It has led to an incentive for rural communities to close services in order to avoid large scale development. Residents of Clive are prepared to lose services to avoid house building.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0445	B001	Policy SP2 should remove reference to Clive as Community Hub as current evidence on availability and accessibility of local facilities and services means it does not meet the definition of a significant rural service centre as defined by the Hierarchy of Settlements evidence base and subsequent Local Plan policies.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP2. Strategic Approach
A0446	B001	Policy SP2 should remove reference to Clive as Community Hub as current evidence on availability and accessibility of local facilities and services means it does not meet the definition of a significant rural service centre as defined by the Hierarchy of Settlements evidence base and subsequent Local Plan policies.	<p>Noted. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP2. Strategic Approach
A0447	B001	There is no way to undo the damage already done to villages where an amenity has already been voluntarily lost in the consultation stages of the plan. If not entirely rejected, the plan should be modified to remove the explicit link between the scale of development and services. This would at least avoid further damage to villages near the points boundaries, which without the modification will continue to resist any new service opportunities, or intentionally plan the loss of services prior to the ongoing 5 yearly review.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0455	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	Yes	Yes	<p>Proposed strategic approach, which aims to see Shropshire flourish, with new development that meets its needs, makes settlements more sustainable and seeks to deliver a strategy of economic growth and improvement is supported and considered in line with the National Planning Policy Framework (NPPF) and associated guidance. It also proposes to significantly boost housing supply and meet unmet needs arising in neighbouring areas and is therefore sound and in accordance with the Duty to Cooperate.</p> <p>Proposed housing requirement is in full accordance with up to date guidance on setting a sound and robust housing requirement. Also support the Council's position in para 3.6 regarding the housing requirement meeting need, but also providing flexibility in the supply and achieving other identified opportunities.</p> <p>Recent changes to the standard methodology for calculating local housing need do not directly impact on Shropshire but do impact on the wider region (35% increase for Wolverhampton and Birmingham, which already have significant unmet need). Government proposals for additional financial support for these areas and changes to Permitted Development rights/evolving nature of town centres following Covid 19 will create further opportunities for housing delivery, however, unmet need in these areas will increase. Shropshire can absorb additional unmet need within its proposed housing strategy, providing further assistance to the wider region.</p> <p>Welcome commitment to keeping availability of land (both for housing and employment) 'under review', this is critical particularly for housing.</p> <p>Support identification of Clive Barracks, Tern Hill as a strategic settlement. It will form a successful, sustainable and well-designed new community delivering an appropriate mix of housing, employment opportunities and local services and facilities to serve existing and future residents, as well as the necessary infrastructure to deliver a sustainable and safe development. Allocating sites that will deliver in the medium/long term, such as this, is a crucial component of supply to achieve consistent housing delivery throughout the proposed Plan period and beyond.</p> <p>Whilst general principles of draft Policy SP2 are supported, it should make specific reference to delivery of suitable Brownfield land. NPPF states planning policies and decisions should give substantial weight to the value of using suitable brownfield land for homes or other identified needs and such sites must be prioritised by spatial, strategic policies. Recognise a number of brownfield sites are proposed for allocation, however the overarching strategy fails to make clear the advantages of the delivery of these sites as part of the overall strategic approach.</p>
A0457	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	<p>Many communities query as unjustified the scoring mechanism used identify whether a village is nominated as "Hub". The methodology used has never been scrutinised and is a basic premise of the revised plan. Should this be found to be in error the whole plan may be found to be unsound.</p>
A0459	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>HoS is flawed and unsound as it ignores the requirement for a Hub to have both significant employment and peak-time public transport (Trefonen has neither); it therefore goes against the Council's Climate Change Policy. The suggestion that other services and facilities may compensate for this flawed alteration is vague and undefined, relying on subjective opinion rather than objective comparison of settlements. The Threshold score of 48 points for Hub status has been set using inaccurate scoring in both the 2017 Table 10 and the 2020 Table 10. It is therefore neither appropriate nor robust, thus rendering the Hierarchy of Settlements 'unsound'. Since Policy SP2 Para 6 and SP2.2. Community Hubs relies on this Hierarchy of Settlements as its evidence base, it must also be deemed 'unsound'.</p>
A0461	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	<p>Support this policy, however there is some imbalance to Market Drayton.</p>
A0469	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>The large scale of overall housing development proposed without clear indications of how this is justified. The Government's assessment of Local Housing Need (paras.3.5, 3.6 and 3.7) is 25,894 homes from 2020 to 2034. Shropshire Council has agreed to co-operate with the Black Country to pick up 1500 homes from their requirement subtotal 26,394 and then says but we might need a few more and makes the total 30,800 homes. There is no clear indication about how they reached this final figure. No indication of how they are going to provide the necessary infrastructure.</p> <p>A popular commuter route to the Black Country from Shrewsbury and vice versa is using the A458 through Much Wenlock (3.13) and then through Bridgnorth. This is in addition to a failure to say how they are going to mitigate the effect on Much Wenlock of Building 1000 houses at Buildwas on the A4169 in the Much Wenlock Place Plan Area. The two roads meet at an already heavily used junction at the Gaskell Arms which leads to rat-running through the towns medieval streets.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0455	B002	Include specific reference to the advantages of delivering brownfield land.	<p>General support for draft Policy SP2 noted.</p> <p>With regard to brownfield land, the strategic approach includes an urban focus, by which the majority of development is directed to urban areas, which are also the locations where the majority of appropriate brownfield sites are located. Furthermore, where appropriate, brownfield sites, including large brownfield/part brownfield sites, such as Clive Barracks, Tern Hill, have been identified as proposed allocations.</p> <p>The draft Shropshire Local Plan should be read as a whole. Draft Policy DP18 specifically addresses the re-use of previously developed (brownfield) land and stipulates the circumstances within which such development will be supported.</p>	No	SP2. Strategic Approach
A0457	B002	HoS needs to be scrutinised and examined. Garden Villages need to be subject to a Scrutiny Review.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire. This methodology and its subsequent application has been the subject of consultation as part of the Local Plan Review process.</p>	No	SP2. Strategic Approach
A0459	B001	The HoS needs to be amended to comply with SP1 and SP3 and Sustainability Objectives SO5, SO6 and SO12, which seek to reduce carbon emissions by using sustainable travel rather than private car transport. I am also very concerned about Trefonen's rising water table and further proposals to build on flood plains. The relaxation of criteria for Hub Status must be overturned and the full Hub Criteria as set out in Para 1.6 Table 2 and Para 5.35 Table 6 must be applied as an objective assessment. The requirements to have both 'significant employment opportunities' and 'peak time public transport' for Hub Status must be met. We have neither and very little else to compensate. In turn, the list settlements must be reviewed to confirm full compliance; and the Draft Plan for settlement development status must be amended accordingly. Trefonen must be removed from Community Hub Status and classified as a Rural Settlement.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.</p>	No	SP2. Strategic Approach
A0461	B001	Policy could and should accommodate further residential development of a level that supports the proposed economic growth of the town.	<p>Noted. Shropshire Council considers that the proposed development strategy for Market Drayton and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p>	No	SP2. Strategic Approach
A0469	B003	Comply with Government legislation and Planning Policies. Give a detailed explanation of how they reached a total of 30,800 homes. What are the commitments/proposals for local employment opportunities? How will they solve the problems caused by the increase in traffic? Particularly through the A4169/A5481 junction in Much Wenlock.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p> <p>The proposed employment land supply is documented within Appendix 6 of the draft Shropshire Local Plan.</p> <p>Draft Policy DP25 addresses provision of infrastructure. It states "New development should only take place where there is sufficient existing infrastructure capacity available. Where a new development would lead to a shortfall in infrastructure provision, the development will be required to fund necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means."</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0476	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	Yes	Yes	Do not have any specific objection to the overall housing requirement that is proposed and note that other representors will likely present a stronger view on whether this is sufficient or not. Clearly, if the housing requirement were to increase would welcome this outcome.
A0479	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	<p>Hierarchy of Settlements 2020 - Para 5.41</p> <p>a) This still includes a relaxation of these key criteria for "Community Hub" status requiring "significant employment opportunities; and "peak time public transport"; as well as a combination of services &amp; facilities. The suggestion in Para 5.41 that a "larger range" of services and facilities would compensate for the lack of these fundamental criteria is clearly wrong. It is obvious that facilities such as playgrounds, outdoor sports facilities &amp; amenity green space, etc. cannot possibly compensate in any way for lack of employment and/or public transport. This relaxation makes the Hierarchy of Settlements assessment &amp; Hub designation "unsound" and should be removed.</p> <p>b) Additionally, without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in any Community Hub That is contrary to the "Spatial Vision" and SP3 Climate Change which seeks to minimise travel and maximise trips by sustainable travel. Therefore the status of Trefonen as a "Community Hub" is contrary to existing and proposed policies, and it should be designated "Other Rural" settlement, for which it meets the full criteria. Trefonen is the only proposed Hub settlement with neither of these key requirements, and so its designation as such is "unsound". Therefore Trefonen should be designated "Other Rural" settlement, for which it meets the full criteria.</p>
A0479	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	<p>Para 2 Housing Requirement - target of 30,800 Explanation Para 3.5, Para 3.6 and Para 3.7</p> <p>This target is 19% in excess of the identified need of 25,894 for Shropshire. The Council is still pursuing its "highly ambitious" High Growth target. The incorporation of 1500 dwellings for the emerging Black Country Plan places an additional burden on Shropshire during the Plan period for the delivery of that additional supply to be provided as part of the annual 5 Year Housing Supply assessments. Both of these factors increase the risk of an "out of date" Plan due to economic fluctuations between now and 2038, completely outside the control of the Council. Additionally the Covid-19 pandemic has had short term effect on construction and its long term impact on the economy and growth is unknown. The impact on consumer demand for housing will be financial lead whilst in turn supply by developers is profit led. Despite Government exaltations to "Build" the funding for Local Authority housing is limited and the supply is majority private sector. It is established fact that whenever there is a lack of demand housing is not built, but developers pursue consent on otherwise unattainable land An "out of date" Plan holds that inherent risk of exploitation by developers &amp; landowners to gain consent for open market housing on sites not identified in the Plan, which will be contrary to the aims of "Right Homes in Right Place" in the Draft Housing Strategy 2020-2025. By the next Partial Review (5yearly) the repercussions of the pandemic will be clearer, and the Housing Target can be adjusted to suit the new circumstances then, rather than increasing now when a downturn in demand &amp; supply is widely predicted. In view of the changed world circumstances we would again ask that the 15% "High Growth" Target is reconsidered by the Council, and changed to a more deliverable "Moderate Growth" 5% above identified needs to avoid a potential "out of date" Plan in the coming years. Black Country Plan housing provision. We acknowledge the requirement for cross boundary co-operation with neighbouring authorities. Our concern is the incorporation of the additional 1500 homes into the overall Shropshire Housing Target. This will increase pressures on settlements across the county for the supply of 'out of county' needs unless sites or location close to that region can be identified. If the aim is to supply housing for residents of the Black Country surely these must be located close to that area, and not anywhere across the whole county.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0476	B001	Welcome inclusion of a modest upward adjustment to the housing requirement, although our concerns relate to the components of the housing supply, how these have been derived and how ultimately they will be delivered.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council also considers that it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. Assumptions regarding non-delivery rates, windfall allowances and delivery timescales for proposed allocations are considered appropriate and respond to consideration of the specific characteristics, constraints and opportunities that exist across Shropshire, in specific settlements and on specific sites.</p>	No	SP2. Strategic Approach
A0479	B001	Trefonen should be removed from the Community Hub settlements in Policy S14.2 Community Hubs – Oswestry Place Plan Area and Schedule SP2.2: Community Hubs. It should be a Rural Settlement.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.</p>	No	SP2. Strategic Approach
A0479	B003	Reduce the proposed housing requirement and reconsider when the draft Shropshire Local Plan is next reviewed. Review proposed contributions to the unmet need arising within the Black Country.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0479	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Trefonen	Not Specified	No	Not Specified	<p>1) Designation of Trefonen as a Community Hub settlement Trefonen does not meet the full Hub Definition for “Community Hub” status as set out in Hierarchy of Settlements Tables 2 &amp; 6. Trefonen has no “significant employment opportunities; or “peak time public transport” It is the only proposed Hub settlement with NEITHER of these KEY requirements. Trefonen should be designated “Other Rural” settlement - for which it meets the full criteria. Without either employment or peak time travel it is certain that daily car travel will be increased by additional housing in Trefonen. Walking or cycling to Oswestry are not safe or practical alternatives. That is contrary to Shropshire Council’s Climate Emergency Policy, to NPPF, and to Government’s Zero Carbon aims. It is also contrary to the Draft Local Plan “Spatial Vision” and SP3 Climate Change which seek to minimise travel &amp; maximise trips by sustainable travel. Therefore the status of Trefonen as a “Community Hub” is contrary to existing &amp; proposed policies, &amp; is therefore “unsound”. It should be designated “Other Rural” settlement, for which it meets the full criteria.</p> <p>2) Settlement Boundary Maps - Trefonen Trefonen does not meet the full Hub Definition for “Community Hub” status as set out in Hierarchy of Settlements Tables 2 &amp; 6 and should be designated as “Other Rural” settlement. Therefore it should not have a new defined Settlement Boundary.</p> <p>3) Appendix 5: Residential Development Guidelines and Residential Supply Page330 Trefonen Development Guideline 55 dwellings / Windfall Allowance 50 additional dwellings That is a build rate of 3 per year and a 15% expansion of the village of 324 existing dwellings. This is not “similar” to the recent rate and cannot be considered to be a “modest amount”. The proposed growth would be excessive for the scale, layout, topography, historical assets and character of Trefonen. No consideration has been given to the protection of the Setting of Offa’s Dyke - a Scheduled Monument which runs right through the village and is subject to visits from tourists. Multiple “small” developments to reach a “guideline” of 50 additional dwellings would have a cumulative impact amounting to the same, or arguably greater impact, as a large development over the course of time. Therefore, the guideline should be reduced to that required to meet “identified local needs” for truly “Affordable Homes” for local people at a guide rate of 1per year – Guideline 18 Windfall Affordable Homes.</p>
A0487	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>The determination of the minimum number of homes needed should be informed by a LHN assessment using the Government’s standard methodology unless exceptional circumstances justify an alternative approach (para 60). In Shropshire, there are no exceptional circumstances to justify an alternative approach. Using the standard methodology, the minimum LHN for Shropshire is 1,177 dwellings per annum equivalent to 25,894 dwellings over the plan period 2016 – 2038. In Shropshire, there is justification for a housing requirement above the minimum LHN. The Council should also recognise economic benefits of housing development in supporting local communities as highlighted by the HBF’s latest publication Building Communities – Making Place A Home (Autumn 2020). The Council should calculate its affordable housing need as defined by the NPPG. This figure may be significant in comparison to the minimum LHN. A higher overall housing requirement will contribute towards delivery of a greater number of affordable homes. It is acknowledged that the Council may not be able to meet all affordable housing needs but an uplifted housing requirement above the minimum LHN will make some contribution to meeting affordable housing needs. The NPPG does not set any limitations on a higher figure, which is a matter of judgement. The HBF believe that the Council should have been more ambitious.</p>
A0487	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2, SP7 and SP10	Not Specified	No	Not Specified	<p>The Council’s overall HLS should provide some flexibility to respond to changing circumstances, to treat the housing requirement as a minimum rather than a maximum and to provide choice and competition in the land market. There is no numerical formula to determine the appropriate quantum for a contingency but greater numerical flexibility is necessary where HLS is dependent on a few large strategic sites or locations than in cases where HLS is more diversified. The HBF always suggests as large a contingency as possible (at least 20%). The Council’s HLS surplus is only 130 dwellings (0.4%). This lack of headroom provides no flexibility. If during the LPR Examination, any of the Council’s assumptions on lapse rates, windfall allowances and delivery rates are changed or any proposed housing site allocations are removed then any contingency is eradicated. The Council’s windfall allowance comprises 8.67% of HLS, which should be justified by the Council. National policy only permits an allowance for windfall sites if there is compelling evidence that such sites have consistently become available and will continue to be a reliable source of supply. It is noted that the Council has provided no site by site analysis of the deliverability of individual site allocations. The 2019 NPPF sets out that strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period and if appropriate to set out the anticipated rate of development for specific sites (para 73). Appendix 7 : Forecast of Delivery Timescales for Local Plan Allocations is not a housing trajectory. The omission of a detailed housing trajectory is inconsistent with the 2019 NPPF. A housing trajectory should be incorporated into the LPR. The Council has not provided a 5 YHLS Statement for the proposed housing requirement and trajectory. If the Council cannot demonstrate a 5 YHLS on adoption of the LPR and maintain a 5 YHLS throughout the plan period, then the LPR should not be found sound.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0479	B004	Trefonen should be removed from the Community Hub settlements in Policy S14.2 Community Hubs – Oswestry Place Plan Area and Schedule SP2.2: Community Hubs. It should be a Rural Settlement.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.</p>	No	SP2. Strategic Approach
A0487	B005	Before submission of the LPR for examination, the Council should re-consideration its housing requirement. Policy SP2 should be amended to set out the housing requirement as a minimum figure.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p>	No	SP2. Strategic Approach
A0487	B014	<p>The Council's overall HLS should provide some flexibility to respond to changing circumstances, to treat the housing requirement as a minimum rather than a maximum and to provide choice and competition in the land market. The Council's HLS surplus is only 130 dwellings (0.4%). This lack of headroom provides no flexibility. The Council should consider the provision of a greater contingency.</p> <p>Appendix 7 : Forecast of Delivery Timescales for Local Plan Allocations is not a housing trajectory. The omission of a detailed housing trajectory is inconsistent with the 2019 NPPF. A housing trajectory should be incorporated into the LPR. The Council has not provided a 5 YHLS Statement for the proposed housing requirement and trajectory. If the Council cannot demonstrate a 5 YHLS on adoption of the LPR and maintain a 5 YHLS throughout the plan period, then the LPR should not be found sound. Further information on 5 YHLS should be provided by the Council.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council also considers that it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. Assumptions regarding non-delivery rates, windfall allowances and delivery timescales for proposed allocations are considered appropriate and respond to consideration of the specific characteristics, constraints and opportunities that exist across Shropshire, in specific settlements and on specific sites.</p> <p>As specified within the explanation to draft Policy SP2, whilst it is acknowledged that there will inevitably be fluctuations over time, which may result in annual rates of delivery falling below or exceeding this level, it is expected that this will 'balance out' to ensure that the housing requirement is achieved. As such, it is considered that this expected rate of delivery over the Local Plan period of around 1,400 dwellings per annum forms the most robust trajectory of future housing delivery in Shropshire and will be used to assess annual housing delivery.</p> <p>This is considered a reasonable and precautionary approach to preparing a housing trajectory. This trajectory of future housing delivery will be kept up to date and a revised version published each financial year within Shropshire Council's Authority Monitoring Report (AMR).</p>	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0488	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	The Hierarchy of Settlements is flawed due to the wording of Para 5.41 which relaxes the full requirement for Hubs to have both “significant employment” and “peak time public transport”. That is contrary to the Council’s adopted Climate Change Emergency policies and the proposed SP3 Climate Change and Sustainability Objectives SO5, SO6, & SO12 in the Draft Plan which seek to minimise car travel and maximise trips by sustainable travel, and to reduce carbon emissions. The Hub Threshold score 48points was set using flawed and inaccurate scoring in the original 2017 Table 10, but has been kept
A0492	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and SP3	Yes	No	Yes	Object to the way in which the housing growth numbers in the Local Plan have been considered in relation to the Climate Change requirements of the Plan and the Sustainability Appraisal document, and the declaration of a Climate Emergency by Shropshire Council in 2019. I do not object to the need for new housing growth in Shropshire, but when faced with a climate crisis I cannot understand why the Council is promoting a plan which recommends housing growth some 5000 dwellings above that which is defined as needed under the National Housing Methodology. (A Council "requirement" of 30,800 against defined need of 25,894). There are many good statements in the Plan and supporting documents referring to climate change and the need for it to be tackled, and this is welcomed. However, when these statements are tested against the ambitious housing growth figures that are proposed, they are found wanting. For example, the Reg 19 Introduction refers to seeking "to safeguard the environment, and enable adaptation to climate change"; S5 of the Housing Strategy document refers to "minimising the environmental impact of....future housing development in the interests of climate change"; and the 5 key objectives of the Overall Housing Strategy include reference to “minimising environmental impact”. However the implementation of these aims and policies is undermined by the ways in which the Plan has failed to properly account for the impact of the proposed new housing. For example, under para. 3.40 in the section on Climate Change (SP3) there is a requirement, quite properly, for all planning applications for new development to set out how they comply with Policy SP5 relating to design – but there is no similar requirement to show how new housing policies should comply with Climate Change policy SP3. This is a major failing of the Plan, which is further evidenced in the Sustainability Appraisal document in which the different levels of housing growth are considered against the 16 Sustainability Objectives; in particular SO12 (reducing CO2 emissions) and SO13 (Adapting and mitigating climate change). The conclusion must be that the draft Plan has failed to address the impact of its housing growth figures on the CO2 and Climate Change policies and statements in the very same Plan. Including worthy policies and declaring a Climate Emergency becomes meaningless in these circumstances. Given the gravity, enormity and speed with which the climate crisis is facing us all, the Council must re-examine the scale of its proposed housing development and justify how such a scale is compatible with its policies and objectives on climate and the environment.
A0497	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2(2)	Not Specified	No	Not Specified	Welcome change to Part 2 of Draft Policy SP2 to ensure that sufficient land 'in the right locations' is available to achieve growth aspirations. However, consider this is not followed through in allocations. Land in the right location in Bridgnorth has not been identified as the proposed allocation is not considered deliverable and is on the wrong side of the town. As such draft Policy DP2 is unsound as it is not effective and may lead to under delivery of housing and employment land. Part 2 of Draft Policy SP2 rightly commits to keeping availability of land under review to ensure a continuous supply of suitable sites. However, it does not propose any recourse in the event allocations are found to be unavailable, as such it is unsound as it is not effective. It needs to set out/cross-reference another policy specifying how flexibility is provided if a major site is not available and not delivered. Draft Policy SP7 Managing Housing Development adds some flexibility to allow housing if a shortfall in the Plans residential development guideline for a settlement arises but this could lead to ad hoc site approvals rather than planned development. To avoid a review of the Local plan in the case of non-delivery, which could cause significant delay, an option could be for a Neighbourhood Development Plan to bring forward an alternative. It is imperative that land in the right location in Bridgnorth is identified, as the strategy relies on a single major garden village allocation, which if it does not deliver for any reason, means there will be a shortfall of housing in Bridgnorth. Consider the proposed allocation of 1,050 houses at Tasley Garden Village (BRD030) in Bridgnorth will not be delivered (see wider representation). An allocation at Stanmore Garden Village (BRD032) is more likely to deliver a cohesive development of housing, employment and community infrastructure.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0488	B001	<p>The Hierarchy of Settlements must be amended. It must correspond with and supports the Spatial Vision, SP1 Shropshire Test, SP3 Climate Change and Sustainability Objectives SO5, SO6, &amp; SO12 which seek to minimise car travel and maximise trips by sustainable travel, and to reduce carbon emissions. In Para 5.41 the relaxation wording must be removed :</p> <p>Remove "In circumstances where there is no regular public transport service; and/or high speed broadband; and/or multiple significant employment opportunities, a larger range of services and facilities would be necessary to compensate to enable a settlement to achieve the specified point's threshold."</p> <p>The full Hub criteria set out in Para 1.16 Table 2 and Para 5.35 Table 6 must be used to determine Settlement status by objective assessment. Critically the requirement to have both "significant employment opportunities" and "peak time public transport" for Hub status must be met.</p> <p>2) The list of Settlements must then be reviewed to confirm compliance with the full Hub criteria, and;</p> <p>3) The Draft Plan settlement development status &amp; allocations amended accordingly.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.</p>	No	SP2. Strategic Approach
A0492	B001	<p>The Council needs to fundamentally reconsider the relationship and compatibility between the proposed housing growth figures and the impact of such growth on CO2 emissions and the threat of Climate Change. This will require a re-examination of the relationship between SP2 and SP3, and a re-examination of the Sustainability Appraisal in order to produce an accurate statement of the impact of housing growth on SP3, and its impact on the Sustainability Objectives relating to CO2 production and Climate Change (SO12 and SO13)</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>The Sustainability Appraisal process undertaken to inform the draft Shropshire Local Plan, which includes consideration of Draft Policy SP2, is considered appropriate, robust and legally compliant.</p>	No	SP2. Strategic Approach
A0497	B008	<p>Part 2 of draft Policy SP2 needs to be flexible and adaptable in the event land allocated is not available and it should specify a specific course of action to rectify a situation where a site allocated is not coming forward. Such recourse should be a review of the Local Plan, a Neighbourhood Development Plan to identify alternatives or a planning application in accordance with SP7.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The draft Shropshire Local Plan should be read as a whole. Draft Policy SP7 stipulates the approach where there is clear evidence that clear evidence that the residential development guideline for a settlement appears unlikely to be met over the plan period.</p> <p>Shropshire Council has always taken a positive and proactive approach to Neighbourhood Plans and has sought to work constructively with local areas to advance their aspirations.</p>	No	SP2. Strategic Approach
A0497	B009	N/A	Noted.	No	SP2. Strategic Approach
A0497	B010	N/A	Noted.	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0500	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	Draft Policy SP2 is not justified and is unsound as the identification of Community Hubs (through the Hierarchy of Settlements Assessment (HoS)) is not based on up to date or accurate evidence and updates to evidence in response to changes to local services and facilities have been inconsistent. Shropshire Council stated it would consistently apply the methodology for identification of Community Hubs within the HoS, however despite informal and formal consultation responses (including to the last Regulation 18 consultation) highlighting changing evidence on availability of local services and facilities (loss of the convenience store) in Clive, these have not been taken into account. In contrast where Myddle lost its convenience store and the HoS was updated and Community Hub status was removed. Clive does not have the necessary associated services and facilities to represent a significant rural service centre or a Community Hub, as defined within the HoS and subsequent draft Shropshire Local Plan policies.
A0506	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	Consider the methodology used to identify Community Hubs is too rigid and insensitive to needs and desires of local communities. If the scoring system wrongly categorises a particular village, it will lead to unsuitable levels of development and disharmony in communities. As such, draft Policy SP2 is not effective in achieving stated aims and conflicts with the National Planning Policy Framework (NPPF) - not responsive to local circumstances/needs as per para 77 of the NPPF and will not promote sustainable development in rural areas or enhanced the vitality of rural communities as per para 76 of the NPPF. Support submission made by Longden Parish Council and Longden Village Action Group. Submission supported by other residents (documented within an Appendix to this representation).
A0507	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	The principal behind draft Policy SP2 and the ambition to ensure greater long-term sustainability for rural settlements is supported, but the manner in which Community Hubs and Community Clusters have been identified is not likely to produce development which will ensure long-term sustainability of rural settlements and, in some cases, will have the effect of making them less sustainable. Consider attempting to use an objective means of identifying Community Hubs and Community Clusters should be applauded, but the chosen methodology (scoring based on services) is not sufficiently sensitive to recognise the roles of certain villages, and thus they end up wrongly classified. Where a settlement has significant local services to support but is not allowed appropriate levels of housing, this can lead to closure of services and increased use of private motor vehicles. The scoring system therefore needs to be carefully and flexibly applied if the stated aims of Policy SP2 are to be achieved. At present it is too rigid, will not be effective in achieving the aims of draft Policy SP2 and is in conflict with para 77 of the National Planning Policy Framework (NPPF) as it is not responsive to local circumstances or reflective of local needs. The draft Shropshire Local Plan will not promote sustainable development in rural areas and will not enhance or maintain the vitality of rural communities as required by para 78 of the NPPF.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0500	B001	Remove reference to Clive as a Community Hub.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP2. Strategic Approach
A0506	B001	<p>Longden should not be identified as a Community Hub, rather it should form a Community Cluster.</p> <p>Draft Policy SP7 should be modified to ensure large scale development proposals for affordable housing outside Community Clusters will not be approved.</p>	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Longden.</p> <p>As such it is considered appropriate for Longden to be identified as a proposed Community Hub.</p> <p>However recognising the level of development that has occurred over recent years within the settlement, and its characteristics, constraints and opportunities the draft Shropshire Local Plan has identified a low residential development guideline of some 50 dwellings (equating to just over 2 dwellings per annum) for the settlement. Completions already achieved within the draft Shropshire Local Plan period from 2016-2038 and current commitments achieve around half of this proposed residential guideline. As such, it has been concluded that no specific site allocations are required to achieve the proposed residential development guideline and the remaining windfall allowance is some 27 dwellings (as at 31st March 2019). This is considered an appropriate, effective, sustainable and deliverable approach.</p> <p>Shropshire Council also considers that draft Policy SP7, alongside other relevant draft Shropshire Local Plan policies, is an appropriate and effective means of managing housing development.</p>	No	SP2. Strategic Approach
A0507	B002	Draft Policy SP2 should be revised to allow flexibility in identification of Community Hubs and Community Clusters when it is realised that settlements are becoming less sustainable and more reliant on private motor vehicles. Positive action should be taken to encourage such settlements to increase their sustainability.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire.</p> <p>Where settlements are proposed to be identified as countryside for policy purposes, draft Policy SP10 provides the starting point for decision making, identifying the types of development that may be appropriate in such a location. This is also considered an appropriate approach which is effective, sustainable and deliverable.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0509	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Identification of Aston as an element within a Community Cluster which also includes Edstaston, Quina Brook, Northwood, Newtown, and Tilly, is supported.</p> <p>The percentage of development proposed in rural areas is significantly less than that within the adopted Local Plan. Proposals equate to around 8,470 houses to be delivered in the rural area. Deducing guidelines for Community Hubs, a shortfall of 2,538 dwellings (around 30%) are required in Community Clusters through windfall development (given there are generally no allocations). Given restrictions on development contained in draft Policy SP9, concerned Community Clusters will not produce the development necessary to deliver the number of houses required from this source.</p> <p>There are 99 villages across 32 proposed Community Clusters. but no estimates are provided on the numbers of houses to be delivered within these settlements, or whether they have capacity either in terms of available land or level of infrastructure to produce the housing needed.</p> <p>Unless such estimates are produced and found to be sensible and reasonable, the development to be constructed in Community Clusters must remain a guess at best. Delivery of the number of houses necessary therefore makes draft Policy SP2 unsound, as it is neither justified nor evidenced, and delivery cannot be assured.</p>
A0511	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 (Cockshutt)	Not Specified	No	Not Specified	<p>The principal behind draft Policy SP2 and the ambition to ensure greater long-term sustainability for rural settle-ments, is supported, but the manner in which villages have been assigned as either Community Hubs or Community Clusters is not. Consider this is not going to produce development that will ensure the long-term sustainability of rural settlements and, in some cases, will have the effect of making them less sustainable.</p> <p>Identification of Community Hubs or Community Clusters in an objective fashion is to be applauded, but the method chosen, (Hierarchy of Settlements Assessment (HoS)) a scoring system based on provision of services, is not sufficiently sensitive to recognise the role that certain villages perform, and thus settlements can be categorised in a way inappropriate to actual function. If a village is wrongly categorised (designated a Community Hub when it is not a small centre to which others look, or Community Cluster with significant local services to support but not permitted appropriate levels of hous-ing to provide this support), it can lead to closure of services and increased use of private motor travel. The scoring system adopted needs to be carefully and flexibly applied if the stated aims of draft Policy SP2 are to be achieved.</p> <p>Consider the HoS is too rigid, and will not be effective in achieving the aims of draft Policy SP2, and are in conflict with para 77 of the National Planning Policy Framework (NPPF) as it is not responsive to local circumstances or reflective of local needs.</p> <p>Proposals for the rural area equate to around 8,470 houses to be delivered. Deducing guidelines for Community Hubs, a shortfall of 2,538 dwellings (around 30%) are required through windfall development in the rural area. To ensure deliver an additional 10-15% of Planning Permissions will need to be granted, further increasing reliance on windfall. This cannot be guaranteed within the Draft Shropshire Local Plan as such it will not promote sustainable development in rural areas or enhance/main-tain the vitality of rural communities as required by para 78 of the NPPF.</p>
A0512	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 (BUCK001)	Not Specified	No	Not Specified	<p>Support proposed allocation of BUCK001. This is an important brownfield site for Bucknell, it can comply with all requirements of draft Policies S2.2 (although note S2.2.6 relates to impact on the River Clun SAC) and SP8, however draft Policy DP13 places significant obstacle in the way of its development. Every effort should be made by the Local Planning Authority (LPA) to bring it forward for development as quickly as possible.</p> <p>The site has also been allocated for development for 22 years, most recently in the SAMDev Plan (2015) for 70 dwellings. There have also been a number of Planning Applications on the site, the most recent remains undetermined. However, delivery has been delayed for numerous reasons but not willingness of the landowner.</p> <p>The SAMDev Plan states development in the Bishop's Castle area may "adversely affect the integrity of the River Clun SAC. Mitigation measures are required to remove harm arising from hydrological and water quality impacts on this internationally designated site ..... ", no readily available/understandable advice has been provided on what mitigation measures might be suggested and this remains unresolved. It also requires project level Habitats Regulations Assessment (HRA) for proposals where a likely significant effect on an internationally designated site may occur (the HRA was to be prepared by the LPA). It also specified proposals likely to have a significant effect on factors including priority species and priority habitats, would only be permitted "where it could be demonstrated that there is no satisfactory alternative means of avoiding such impacts and the social or economic benefits of the proposal outweigh the harm to the asset". No advice has ever been forthcoming from the LPA on the measures that might be regarded as mitigating effects on natural assets.</p> <p>A River Clun SAC Nutrient Management Plan (NMP) was prepared by Natural England (NE), the Environment Agency (EA) and the LPA, to identify those issues threatening the freshwater pearl mussels in the River Clun. It concluded the freshwater pearl mussel population was 'functionally extinct' (declining population and little evidence of recruitment), and estimated mussels would only survive for another 20 years if nothing was done. Therefore a series of targets for water quality in the River Clun should be adopted, although even if achieved, there was no guarantee the colony would be rejuvenated. Three main causes of problems for the mussels were phosphates, nitrates and silt, of which development was a major factor for only phosphate (majority associated with Waste Water Treatment Works (WWTW)). The NMP contained no specific actions a developer might take to make residential development acceptable. The LPA advised development cannot occur unless it demonstrates no phosphates generated would enter the River and it should also demonstrate betterment.</p> <p>Discharge from Bucknell WWTW into the River Clun is controlled by Severn Trent Water (STW) and the EA. In 2017, STW indicated they intended to solve the problem by diverting discharge to another watercourse. However, this did not occur, instead, STW installed additional phosphate stripping facilities. Understand this has improved water quality , but has not improved it to a level that would mean targets set in the NMP are achieved.</p> <p>Most recently, the LPA in association with NE have produced a document indicating that development will only be permitted which would involve discharge to the River Clun or its tributaries, if it can be shown that the development would be "nutrient neutral". There is no indication given as to how this could be measured, how it could be achieved, what effect it might have on the water quality in the River, or whether it would produce a situation where the pearl mussel colony might be rescued and rejuvenated.</p> <p>The Local Plan Review continues this situation. Bucknell is identified as a Community Hub and BUCK001 is reallocated, however is still constrained by the necessity to ensure that the freshwater pearl mussels in the River Clun are unharmed by the development. Draft Policy DP13 specifies the restrictions in the Clun catchment, but no advice is provided as to how identified objectives can be achieved. Clear that simply preventing development is not the answer, but very little appears to be happening that would help in other directions. One suggestion a refresh of the NMP, but these are clearly ineffective unless they include definitive/measurable actions on the part of those bodies responsible for water quality and comprise more than just preventing development.</p> <p>This situation effects more than just BUCK001. The River Clun catchment includes Bishop's Castle (Key Centre), Clun (Community hub) and Lydbury North (Community Cluster) amongst others. Allocations for residential development have not come forward due to the same problem. These allocations are to be saved and there is a clear need/demand for development, which continues to be recognised. As such, the draft Shropshire Local Plan should tackle the issue of the water quality in the River Clun in a pro-active manner, and bring forward positive proposals to be put into action by the various authorities that have responsibility for watercourses in the catchment in order that the development that is planned, wanted and needed can be delivered. Until the draft Shropshire Local Plan includes such proposals it cannot be regarded as being "sound" as it is not effective or been developed in a positive manner, fails to meet the responsibility of ensuring the survival of the pearl mussel colony and will also fail to deliver the dwellings (514) planned in the Clun catchment.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0509	B002	<p>Draft Policy SP2 and others that relate to development in Community Clusters should be modified to provide estimates of potential numbers of dwellings to be constructed in Community Clusters.</p> <p>Appropriate evidence of the likely availability of land to meet these estimates should be made available if it exists. By so doing it will become clear whether or not the contribution to the overall housing supply in the Council that will be made by Community Clusters will be sufficient to meet the overall housing delivery target.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. It is also considered that draft Policy SP9, alongside other relevant draft Policies, provides an appropriate framework for the management of development within proposed Community Clusters.</p> <p>As illustrated within Appendix 5 of the draft Shropshire Local Plan, as at 31st March 2019, 929 dwellings has been completed within the rural area beyond Community Hubs (including Community Clusters), a further 2,078 dwellings were committed on sites with Planning Permission or Prior Approval and 62 dwellings were committed on allocations without Planning Permission. It is considered that this supply, alongside other appropriate windfall opportunities that arise within proposed Community Clusters and the wider rural area will effectively contribute towards achieving the proposed strategic approach to the level and distribution of development.</p>	No	SP2. Strategic Approach
A0511	B002	<p>Cockshutt should be re-evaluated and designated a Community Hub, with a settlement strategy, development boundary (including allocation of land on the plan appended to this representation (in whole or part) for mixed development including open market and affordable housing).</p> <p>The scoring system that is used to select Community Hubs and Clusters should be re-evaluated, and relevant policies should provide for a reassessment to be carried out at least once a year in order to react to changes in provision of local services.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including for Cockshutt.</p> <p>It is considered that draft Policies SP8 and SP9, alongside other relevant policies, provide an appropriate framework for the management of development within Community Hubs and Community Clusters respectively.</p> <p>As illustrated within Appendix 5 of the draft Shropshire Local Plan, as at 31st March 2019, 929 dwellings has been completed within the rural area beyond Community Hubs (including Community Clusters), a further 2,078 dwellings were committed on sites with Planning Permission or Prior Approval and 62 dwellings were committed on allocations without Planning Permission. It is considered that this supply, alongside other appropriate windfall opportunities that arise within proposed Community Clusters and the wider rural area will effectively contribute towards achieving the proposed strategic approach to the level and distribution of development.</p>	No	SP2. Strategic Approach
A0512	B002	<p>The draft Shropshire Local Plan should be modified to include specific, positive, measures that will:</p> <ul style="list-style-type: none"> <li>i. Ensure the longevity of the freshwater pearl colony, and</li> <li>ii. Ensure that the development that is assessed as being necessary in the River Clun catchment can be delivered immediately upon the adoption of the draft Shropshire Local Plan.</li> </ul>	<p>Shropshire Council must comply with the Habitats Regulations and subsequent legal judgments (including the Dutch Nitrogen case) when determining planning applications which are likely to have an adverse effect on the River Clun SAC. This means that development in the river Clun catchment can only be permitted if it can be demonstrated that no adverse effect on the River Clun SAC will occur. The Council is unable to consent to planning applications in Bucknell (and the wider river Clun catchment) which do not meet this requirement. Policy DP13 plans positively for development in the Clun catchment whilst safeguarding the SAC, by setting out the criteria which planning proposals must meet to comply with the Habitats Regulations. A series of minor modifications to this policy and its explanation (see schedule of minor modifications) are proposed to provide additional clarity on legal compliance with the Habitats Regulations and Dutch Nitrogen Judgement and on processes to support policy implementation, including the assessment of nutrient neutrality and determination of mitigation measures.</p>	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0517	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	There is no geographical aspect to the location of the Black Country related development and it will simply be spread around Shropshire. Therefore, by way of example, Weston Rhyn in the top north west corner of the county will be delivering some of Dudley's housing. Much of the north west, west and north east of Shropshire has no real relationship with the Black Country. These areas have a relationship more with North East Wales, the North West and the Potteries. I am not aware of any real direct public transport links from these locations to the Black Country and therefore nothing to discourage car use if these locations should be expected to provide housing and jobs for the conurbation. The 1,500 dwellings and 30 hectares of employment are not for Shropshire, they are for the Black Country. It would therefore be expected that those who will live and work in these new homes and business will be current Black Country residents. It is implausible to think that the same people decanted to Shropshire to live will be the same people who take up jobs on the 30 hectares of employment and what will actually happen is the new residents will commute back into the conurbation, and those working in Shropshire will travel out of the conurbation. The result therefore of dispersing Black Country development around Shropshire will be unsustainable travel patterns. The way the Black Country development is dealt with is neither positively prepared nor justified. It is not achieving sustainable development or an appropriate strategy. What should be happening is for the focus of any Black Country development to be on the eastern edge of Shropshire between Telford and Wyre Forest District, and on the M54/A5/Rail transport corridor to Shrewsbury.
A0518	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	The HoS is flawed - the added text "a larger range of services" isn't defined and adds an element of subjectivity.
A0522	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendices 5 and 7	Not Specified	No	Not Specified	Para 73 of the National Planning Policy Framework (NPPF) sets out that local plans should include a trajectory illustrating expected rate of housing delivery over the plan period for strategic policies. Furthermore, it requires that local planning authorities should identify and update annually a supply of deliverable sites to provide a minimum of five years' worth of housing supply. The Plan as it stands is not consistent with para 73 of the NPPF as it does not include a detailed housing trajectory, nor is there an updated housing land supply position that reflects the years 2020/21 – 2024/25 as per the proposed housing requirement and trajectory. Given issues highlighted in these representations around timescales and deliverability of selected site allocations, a modification to the plan by way of the inclusion of a detailed housing trajectory is required as a matter of soundness.
A0538	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	Hubs and Cluster designations are based on flawed logic (including Trefonen).
A0544	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	Apart from need for affordable housing, no evidence of local demand for a fraction of the housing proposed at Tasley (Bridgnorth). Some new housing (primarily affordable), would be welcome but it needs to be of a volume compatible/sensitive to the needs of the town and its current and future residents. Proposals seriously risk causing significant damage to the attractive historic market town that is Bridgnorth and loss of good quality farmland is outrageous (compounded by the suggestion that further such land might be annexed in the future). Majority of local residents are opposed to these proposals, but these views appear to have been disregarded. There is already land earmarked for housing which would satisfy local demand for many years. Local businesses have no aspirations for expansion and there is no evidence employers view Bridgnorth as a location for expansion (given transport links and negligible public transport) of the type predicated in the draft Shropshire Local Plan. Also seems unlikely housing proposals would provide enough employees of the type required to service assumed employment types (tech and IT jobs), meaning a need for increased in commuting. Describing BRD030 as a garden village is misleading. It would become a vast housing estate, attracting incomers from the West Midlands and proposals do not adequately address need for affordable housing.. Its development would have a catastrophic impact on services and facilities (already over-stretched), road infrastructure (particularly the A442 given residents are likely to commute to Wolverhampton and the West Midlands) and pollution (particularly bad on Hospital Street) this has not been adequately considered.
A0551	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	No	No	Not Specified	The change in the HoS to allow for "a larger range of services" creates subjectivity, and can manipulate the figures to allow settlements to have a score of 48 and therefore Hub status.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0517	B007	<p>The 1,500 dwellings and 30 hectares of employment land being provided for the Black Country should be redirected to the eastern edge of Shropshire and the M54/A5/Rail transport corridor to Shrewsbury.</p> <p>The housing and employment numbers for these relevant areas should be increased. At the same time the numbers for the north west, north and north east of Shropshire including Oswestry, Whitchurch and Market Drayton (and their Place Plan Areas) should be reduced to reflect this re-distribution.</p> <p>The local plan would then have the appropriate strategy to achieve sustainable development in relation to this matter.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p>	No	SP2. Strategic Approach
A0518	B002	The HoS must be amended, supporting the Spatial Vision, SP1 and SP3. Remove text relating to a larger range of services and facilities.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire.</p>	No	SP2. Strategic Approach
A0522	B002	Modify the draft Shropshire Local Plan to include a detailed housing trajectory.	<p>As specified within the explanation to draft Policy SP2, whilst it is acknowledged that there will inevitably be fluctuations over time, which may result in annual rates of delivery falling below or exceeding this level, it is expected that this will 'balance out' to ensure that the housing requirement is achieved. As such, it is considered that this expected rate of delivery over the Local Plan period of around 1,400 dwellings per annum forms the most robust trajectory of future housing delivery in Shropshire and will be used to assess annual housing delivery.</p> <p>This is considered a reasonable and precautionary approach to preparing a housing trajectory. This trajectory of future housing delivery will be kept up to date and a revised version published each financial year within Shropshire Council's Authority Monitoring Report (AMR).</p> <p>Shropshire Council also considers that it has a robust five year housing land supply and robust supply over the proposed Plan period, based on the proposals within the draft Shropshire Local Plan. Appendix 5 illustrates this supply - identified completions, commitments (including existing and proposed allocations) and appropriate windfall allowances (for settlements with development guidelines). This will be reviewed annually through the Five Year Housing Land Supply Statement and the Authority Monitoring Report.</p>	No	SP2. Strategic Approach
A0538	B001	n/a	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment, used to identify proposed Community Hubs, is appropriate and has been applied consistently across Shropshire. It is also considered that the approach to identifying proposed Community Clusters is appropriate.</p>	No	SP2. Strategic Approach
A0544	B006	Proposals for Bridgnorth should be scaled back. development proposals should be conditional upon (1) significant improvements to local infrastructure and services and (2) reductions in air pollution which are already at unacceptably high levels along Hospital Street (A442).	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are also appropriate, effective, sustainable and deliverable.</p> <p>Proposed allocations have been identified through a proportionate and robust site assessment process.</p> <p>Draft site guidelines for proposed allocation BRD030 relate to provision of on-site services and facilities and mechanisms for improving connectivity to existing services and facilities. Furthermore draft site guidelines also include that "Any necessary improvements to the A458 Ludlow Road roundabout, the wider highway network and associated infrastructure will be undertaken, informed by Strategic and Local Highway Transport Assessments. An air quality assessment of the impact of increased vehicular movements into Bridgnorth will also be undertaken and its recommendations implemented."</p>	No	SP2. Strategic Approach
A0551	B001	HoS - remove text relating to a larger range of services and facilities.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0582	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>The SLP includes a housing requirement for Shropshire of 30,800 dwellings over the plan period, which Shropshire Council considers to provide flexibility to respond to changes in the Local Housing Need figure over the plan period. However, the additional allowance of 4,906 dwellings over the LHN for the entire plan period of 22 years, is considered to be extremely modest if Shropshire is to meet its wider aspirations for growth. As set out in the Economic Growth Strategy for Shropshire (2017-2021) the Council has a commitment and ambition to grow the local economy of the County through investment and an increase in productivity and diversification of the labour force.</p> <p>These economic ambitions require an increase in the housing requirement above the minimum LHN so that a lack of labour is not a constraint on realising the economic growth potential of the County. The 300ha of employment land required within the plan period is identified to help drive this growth. However, the provision of additional housing will also be key to promoting growth in the area and supporting the delivery of new employment.</p> <p>The current housing requirement in the adopted Local Plan is 1,375 dwellings per annum. The housing requirement in the emerging plan provides for only 25 dwellings per annum more (a 1.8% increase). This is not considered sufficient to support the economic growth being sought within the County.</p>
A0583	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	Yes	Yes	<p>Recognise the sustainable merits of a balanced approach to development. The Draft Shropshire Local Plan identifies the role of the higher order and most sustainable settlements but also the importance of the rural areas and the part these settlements can continue to play in delivering housing and, in turn, providing for vitality to communities.</p> <p>Owing to the existing service offer (Hierarchy of Settlement Paper, August 2020), maintain support for the identification of St Martins as a Community Hub settlement under schedule SP2.2. In turn, it is appropriate that Bullet 6 of Policy SP2 enables sustainable development at such rural service centres. This principle is clearly identified by para 78 of the National Planning Policy Framework (NPPF).</p>
A0584	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	"Shropshire's Character"	Yes	No	Yes	<p>There is an absence in the LPR of an objectively assessment requirement for C2 / care provision and effective strategy to meet this need. Para 2.19 states that the DSLP will seek to provide a sustainable pattern of growth, responding to the needs and functions of Shropshire's settlements. This is the correct approach, but all needs and functions (including for an aging population) should be included in this provision. The ageing population and its needs demand specific attention in this Plan, which is lacking. The ageing population and its needs warrant more emphasis in the Introduction and analysis as they comprise a key issue for this Local Plan. As with many local plans, the DSLP refers to the issue of an ageing population but does not then set out a specific and effective policy approach to deal with the matter going forward. For the Plan to simply say that elderly accommodation will form part of general housing allocations is unrealistic and experience shows that it simply will not happen. Housebuilders will do no more than include an occasional care home in urban extensions, which is not enough. The ageing population should form part of the Introduction.</p>
A0584	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	No	Yes	<p>There is an absence in the LPR of an objectively assessment requirement for C2 / care provision and effective strategy to meet this need. SP2 states that it will 'support the delivery of specialist housing for older people, people with disabilities and the needs of other groups within the community.' However, no further detail or clarity provided on how or where this might be achieved. The Plan does not quantify the number of specialised elderly person and care units required on an annual basis. The updated Standard Methodology released by the Government in December 2020 indicates an Indicative Local Housing Need of 1,177 per year for Shropshire. In addition to meeting the compelling need for specialised elderly persons accommodation and care, the delivery of purpose-built housing for the older population in dedicated retirement and care communities will facilitate the 'freeing up' of existing dwellings which will contribute towards meeting this identified housing need. The issue needs to be more comprehensively and accurately addressed in the strategy section of the Plan and either a number of specific sites should be allocated, or the Plan should have a criteria based policy setting out the factors against which such schemes should be assessed, and listing the facilities they should provide.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0582	B009	Requested Change – It is considered that the overall housing requirement identified in the SLP does not represent a boost to the supply of homes in the area, as is required to support the economic growth aspirations of Shropshire Council. A higher housing requirement should be considered by the Council.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>It is considered that an appropriate balance is achieved between the proposed housing and employment land requirements. It is important to note that the proposed employment land requirement needs to respond to numerous factors in addition to the proposed housing requirement, including: achieving key economic objectives of the strategic approach in Policy SP2, such as providing for the delivery of a growing and diverse labour force (including those which commute out of the County), and in turn supporting the delivery of an improving rate of economic growth and an increase in the productivity of the local economy; wider aspirations within the Economic Growth Strategy for Shropshire; the nature of employment development in Shropshire (including the proportion of an employment site that results in net employment floorspace); the need to off-set the re-use of existing employment land for other purposes; and the wider range of employment uses now being accepted in the draft Shropshire Local Plan.</p> <p>The proposed employment land requirement also incorporates up to 30ha of employment land to support the employment needs of the emerging Black Country Plan, where evidence indicates employment delivery opportunities are constrained. This reflects a positive approach to cross boundary cooperation and responds to the functional relationship between the two areas.</p>	No	SP2. Strategic Approach
A0583	B003	n/a	Noted.	No	SP2. Strategic Approach
A0584	B002	Recommend and request a more specific reference in the Introduction on the Plan's approach to later living and care accommodation, addressing the overriding need for specialised accommodation for the expanding older sector of the population, setting out the numerical requirement, and later in the Plan to include a policy approach to delivering appropriate accommodation in the right locations, including specific retirement living and care communities, and the allocation of suitable sites for this. At present, the LPR recognises the need for care and later living, but fails to provide realistic policies to secure its delivery. It falls short of meeting and addressing the national need (in fact the national crisis) identified by Government, as set out starkly in the independent CASS report and other assessments of need across the UK. It is therefore unsound. Our related representations include a specific analysis of the need in Shropshire, which is calculated by expert consultants in this field. It is larger and even more compelling than the figures produced in the Local Plan (see later representations). The need in Shropshire is greater than the national position, due to the proportion of Shropshire's total population in the elderly category being significantly higher than the national average. The need is more urgent locally than nationally and it warrants immediate and clear attention, enumerating the units required annually to address the requirement.	<p>It is considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate. Specifically:</p> <ul style="list-style-type: none"> <li>-Draft Policy DP1 requires all residential development to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. It also specifically requires the provision of an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings.</li> <li>-Settlement policies (S1-S19) allow for appropriate windfall development within identified development boundaries (or in the case of Community Clusters on specified types of sites) where they comply with other policy requirements, which can of course include accommodation for older people.</li> <li>-Draft Policy SP10 allows for affordable exception, entry level exception and cross subsidy exception housing schemes which meet evidenced local housing needs and other policy requirements. This again can include appropriate tenures of older person accommodation.</li> </ul>	No	SP2. Strategic Approach
A0584	B004	The issue of housing for the elderly and related care is a very serious and pressing matter for Shropshire. It receives only a passing reference in the Strategy section of the Plan and should be addressed more substantively in this section as a key social, healthcare and housing challenge. A clear policy approach is requested elsewhere in relation to the Residential Mix section of the Plan, to either allocate suitable sites for specialised (Use class C2) accommodation or for a criteria based policy to facilitate the delivery of such development on appropriate sites and subject to the necessary range of supporting healthcare and other facilities. This includes a specific proposal to develop a care community on land at Hencote vineyard, to be added to the current Local Plan allocations in order to provide a specialised form of combined care and housing development, distinct and differentiated from general market housing in direct response to the Plan's identified need (Use class C2), as set out in our other representations (these representations should be read together).	<p>The need for accommodation for older people is assessed within the Strategic Housing Market Assessment. Specifically, the SHMA indicates growth in the number of older persons' households is a key feature in the population and household change projected to occur in Shropshire over the proposed Plan period. It also identifies a specific need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision. It is also considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate. Specifically:</p> <ul style="list-style-type: none"> <li>-Draft Policy DP1 requires all residential development to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. It also specifically requires the provision of an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings.</li> <li>-Settlement policies (S1-S19) allow for appropriate windfall development within identified development boundaries (or in the case of Community Clusters on specified types of sites) where they comply with other policy requirements, which can of course include accommodation for older people.</li> <li>-Draft Policy SP10 allows for affordable exception, entry level exception and cross subsidy exception housing schemes which meet evidenced local housing needs and other policy requirements. This again can include appropriate tenures of older person accommodation.</li> </ul>	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0586	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	No	No	Not Specified	No allowance is made for reserve sites to meet any shortfall in housing delivery or an increase in affordability issues in locations such as Shifnal (the pandemic has already impacted on house prices in commutable rural locations, worsening affordability), which has the second lowest quartile affordability ratio and worst median affordability ratio in the County. The housing white paper and changes to the planning system consultations referenced.
A0595	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	Yes	Yes	<p>Previous representations have resulted in no appropriate change, between Regulation 18 and 19 Plans. Despite context of policy and initiatives e.g. Help to Buy, Stamp Duty incentives etc which seek to boost the supply of housing and support Government's strong commitment to delivering 300,000 homes p.a. &amp; government statements strongly support for need for significantly more house building.</p> <p>The Housing White Paper (2017) "Fixing Our Broken Housing Market" preceded planning reforms aimed at addressing the housing crisis and the Government's latest consultation "Planning for the Future" (White Paper) seeks to fundamentally reform the planning system which is identified in that Paper as failing to deliver the homes required leading to persistent undersupply. The Paper also highlights the impact of the COVID-19 pandemic on quantity &amp; quality of housing delivery, inequalities and the economic importance of the construction sector role in economic recovery and lack of provision in Adopted Local Plans for new homes annually, relative to commitment to deliver 300,000 new homes in England. These issues are a fundamental driver behind the drive to an updated standard method and ongoing reforms to the planning system. They provide a fundamental material consideration underpinning submitted representation &amp; set out a significant context to understanding housing land needs, supply and its aims. The approach is to ensure that greater housing delivery in line with the Government's objectives to boost housing supply.</p> <p>It is therefore essential that the new Plan provides for an appropriate level of housing in line with required step change in the delivery of new housing.</p> <p>Accept and support the requirement for about 30,800 new dwellings for the plan period. In the context of current planning practice guidance, the requirement sets positive levels of growth (which the Plan states is) reflective of the Standard Methodology; supports long term sustainability of the County; provides flexibility to respond to changes in need, increases affordable &amp; specialist housing provision; supports diversification of the workforce and increased economic growth and productivity. Allied to this support the plan proposals to provide for employment growth to deliver around 330 ha employment development at 14 hectares p.a. Essential in the current economic climate that Shropshire provides support to business and opportunities for economic growth consistent with the economic objectives of the Framework. A strategy which plans for growth, provides sufficient land and other flexible development opportunities is key to support economic growth &amp; the Plan generally supports Shropshire's Economic Growth. To be an attractive location for investment Shropshire needs sufficient local workforce to meet jobs growth sustainably, i.e. reducing the need for commuting. Need for employment land delivery strategy to be supported by growth in housing provision to retain and attract the required workforce. Therefore, whilst the overall housing Plan review requirement supported there are fundamental concerns that Plan provisions will not result in the Local Plan housing requirement being met. Whilst the housing requirement is expected to be met by a combination of completions &amp; commitments, new Local Plan Allocations and Windfall, the extent to which these components of supply will contribute to the level expected is not clear and not supported by evidence.</p> <p>Specifically the following issues are highlighted (with reference to Appendices 5 and 7):</p> <ul style="list-style-type: none"> <li>• The base date of the 1st March 2019 for Appendix 5 Table needs to be updated, ideally to 1st April 2021, with completions and planning permissions. Issuing of planning permissions and delivery will have been affected by the Covid-19 pandemic. The contribution from "Commitments" should be critically assessed to ensure they can genuinely deliver in the plan period. No deductions are made for lapse or non-delivery and the overall delivery could be considerably less than anticipated. The contribution from SAMDev Allocations also needs to be critically reviewed. 3564 dwellings -yet to gain planning permission &amp; therefore future contribution to supply and their suitability should be re-evaluated. There is an undue and unreasonable reliance upon windfall sites. The Plan should provide for a greater degree of certainty through allocation of sites. A greater range and number of sites needs to be allocated. The principle of including a realistic, evidenced windfall allowance for some settlements is supported in helping to provide deliverability flexibility in line with NPPF para 70. Therefore the Plan needs to be supported by evidence that the level of windfall allowance proposed is appropriate and justified based on historic delivery rates and robust assessment of the potential for sufficient windfall delivery rates to continue for the duration of the plan period. It should take into account that potential for windfall is reduced with an up to date plan. Given a tightly drawn plan, the potential for windfall to continue at past rates over the full 22 year plan period is extremely unlikely. It is considered that, in line with the requirements of the NPPF, the Plan should be revised to reduce the reliance on windfall and allocate a larger number and wider range of sites to increase certainty of housing delivery and create a positive and proactive planning policy context to encourage sustainable growth. The likely consequence would be that the residual Housing Requirement to meet the full housing requirement, will be significantly greater. This is likely to result in the need to allocate more sites to ensure the plan requirement is met. Additional allocated sites will need to be genuinely deliverable within the Plan period and maintain a positive rolling 5 year supply. In this regard; The Plan does not contain a 5 year supply calculation upon adoption and reflective of the concerns above in respect of the components of supply, should ensure that the calculation is robust and evidences deliverability.</li> <li>• The Plan does not contain a clear trajectory for delivery over the plan period, vital to show that the plan requirement will be met, but also important to show maintenance of a 5 year supply over the plan.</li> <li>• The Table in Appendix 7 gives some indication of delivery over 5 year bands or phases, but does not provide the evidence of a trajectory for a supply over the plan period, year by year. A graph showing year by year supply would normally be provided as part of a plan to demonstrate a trajectory of delivery through the plan period.</li> <li>• Where Allocations are listed in Appendix 7, it is unclear as to what evidence has been used to formulate the expected delivery timeframes i.e. evidence base of any informed and evidenced delivery assumptions, development delivery programme, infrastructure requirements, constraints and risks to delivery for these sites. This is significant in that the Council recognise that a number of the larger sites will not deliver until very late in the Plan period, or beyond 2038. Given fundamental concern re lack of evidence for delivery assumptions, failure of some of the larger sites to deliver their required contribution to the plan housing requirement will put</li> </ul>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0586	B003	Include an allowance for reserve sites within the housing land supply, in locations such as Shifnal.	Noted. Shropshire Council considers it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. Draft Policy SP7 and other relevant policies provide the policy mechanism to respond to circumstances where the housing guidelines for particular settlements appears unlikely to be met over the proposed Plan period, or where there are specific considerations set out in the Settlement Policies. As such it is not considered necessary or appropriate to include a reserve site policy.	No	SP2. Strategic Approach
A0595	B005	<ul style="list-style-type: none"> <li>The base date of the 1st March 2019 for the Table in Appendix 5 should be updated. Completions and commitments should be updated, ideally to 1st April 2021 which would be the most up to date at the time of the Local Plan Examination.</li> <li>The contribution from Commitments and SAMDev Allocations should be critically assessed and deductions made for potential lapse and/or non delivery.</li> <li>The reliance upon windfall sites should be reduced and the Plan should provide for a greater degree of certainty and specifically plan for the allocation of sites.</li> <li>A robust 5 year supply calculation upon adoption should be provided, reflective of the components of supply and evidence of deliverability.</li> <li>A clear trajectory for delivery over the plan period needs to be included to show delivery of the housing requirement.</li> <li>The plan needs to evidence a trajectory for each of the larger sites to ensure the risks to their delivery at the rates suggested is known and understood and their contribution to the Local Plan requirement supportable.</li> <li>Additional sites should be allocated to plug any gaps in delivery of the housing requirement.</li> </ul>	<p>Noted. As recognised within the proposed explanation to draft Policy SP2 and Appendix 5, the supply and delivery of housing in Shropshire will be annually assessed through the Five Year Housing Land Supply Statement and the associated Authority Monitoring Report. This includes a critical assessment of the potential for commitments and SAMDev allocations to contribute to achieving the proposed housing requirement. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council also considers that the proposed development strategies for the settlements across Shropshire, the existing and proposed allocations and windfall allowances identified to contribute towards achieving these proposed development strategies are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Given the nature of Shropshire it is not surprising that windfall development represents a component of the housing land supply in both urban and rural areas - Shropshire is a large rural County containing the town of Shrewsbury, 17 other smaller settlements identified as Principal/Key Centres; and hundreds of other villages and hamlets. Consequently there is a constant and significant recycling of previously developed land; significant numbers of infill developments; high numbers of conversions of barns and other rural buildings; and significant delivery of affordable exception sites (which will be supplemented by the more diverse mechanisms proposed for such housing within the draft Shropshire Local Plan).</p> <p>Shropshire Council also considers that it has a robust five year housing land supply and robust supply over the proposed Plan period, based on the proposals within the draft Shropshire Local Plan. Appendix 5 illustrates this supply - identified completions, commitments (including existing and proposed allocations) and appropriate windfall allowances (for settlements with development guidelines), which totals around 31,000 dwellings (excluding any windfall allowance for the wider rural area).</p> <p>As specified within the explanation to draft Policy SP2, whilst it is acknowledged that there will inevitably be fluctuations over time, which may result in annual rates of delivery falling below or exceeding this level, it is expected that this will 'balance out' to ensure that the housing requirement is achieved. As such, it is considered that this expected rate of delivery over the Local Plan period of around 1,400 dwellings per annum forms the most robust trajectory of future housing delivery in Shropshire and will be used to assess annual housing delivery.</p> <p>A cautious high level trajectory for proposed allocations is provided within Appendix 7 of the draft Shropshire Local Plan, based on proactive discussions with site promoters. If ultimately adopted, trajectories for sites will be kept under review as part of the Five Year Housing Land Supply Statement.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0598	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	<p>Note proposed housing requirement is based on calculation of local housing need using Governments standard method. Do not object to this calculation, but do object to the proposed housing requirement. Governments standard method for calculating housing need uses 2014-based sub-national household projections (SNHP) and identifies a 'minimum' annual need. It is therefore necessary, as per National Planning Practice Guidance (NPPG), to consider factors that might justify an appropriate (upward) adjustment as a basis for determining a housing requirement. Consider a higher requirement is justified as:</p> <ul style="list-style-type: none"> <li>- Level of growth proposed represents a reduction from recent rates of delivery.</li> <li>- Recent growth trends suggest changes in dwelling stock and housing completions are markedly different to trends observed prior to 2014 (which inform the 2014-based SNHP), causing higher in-migration or (comparatively) lower out-migration not captured in the 2014-based household projections. Specifically the average change between 2010 and 2014 was 906 dwellings whilst that between 2014 and 2019 was 1,632 dwellings. The Council's evidence indicates a significant increase in completions since 2016 (average of 1,876 dwellings between 2016 and 2019 compared with 1,090 dwellings between 2006 and 2016).</li> <li>- Proper regard should be had to the contribution the requirement could make to tackling pressing need for affordable housing (as recognised within the NPPG), this has not been sufficiently considered. The Council's 2016 FOAHN identified a need for 1,240 affordable dwelling per annum, representing 97.6% of the minimum annual local housing need and 86% of the proposed housing requirement. Despite this, within the Preferred Sites Consultation undertaken as part of the Local Plan Review, the Council were of the view that the proposed housing requirement would allow the opportunity to deliver affordable housing particularly as a percentage of new open market housing schemes. Within the draft Shropshire Local Plan, affordable housing need has significantly reduced to 799 dwellings per annum - could not located evidence of this. However, continue to consider the approach to addressing need for affordable housing is insufficient to make any meaningful contribution as it is unclear how the proposed target of 25% of all housing to be affordable will be achieved and this (7,700 dwellings) remains less than half the assumed need (17,578 dwellings); and there has been persistent under-delivery of affordable housing over the last 10 years of so (annual average between 2010 and 2017 was some 244 dwellings, just 30% of the total affordable need documented in the draft Shropshire Local Plan). As such consider not enough is being done to address need o tackle current and future affordable housing need. This can be achieved by increasing the supply of land in those locations deemed to be sustainable and on sites that are considered to be deliverable, in particular ALB014. -The National Planning Policy Framework (NPPF) indicates strategic policies (such as draft Policy SP2) should address any cross-boundary issues. Therefore, broadly supportive of the Council's 'in-principle' intention to contribute to unmet needs emanating from the Black Country. However the only reference to this is in the proposed explanation to draft Policy SP2. Contend draft Policy SP2 is inconsistent with para 21 of the NPPF as neither the principle or specific contribution are referenced within it, meaning it is not effective. Furthermore, how the extent of the 'soft' commitment toward the unmet cross boundary needs of the Black Country was arrived at is not explained and the proposed contribution is unsound and open to challenge. Consider the contribution should be revisited and increased, primarily to reflect recent evidence/material change not taken into account that housing need in the Black Country is increasing by 4,902 dwellings, increasing the housing land supply shortfall (the shortfall identified before this was between 26,918 and 29,288 dwellings up to 2038). This also raises further concerns with the justification and soundness of the approach taken. Reviewing migration trends between Shropshire and the West Midlands (data provided in representation), considered a credible basis for a reasonable contribution, in excess of 10% of total moves into Shropshire originate in the Black Country (2016-2019) justifying a higher contribution of around 10% to unmet need arising in the Black Country (current offer is around 5% of unmet need reducing to 4.4% as need increases due to changes to Governments calculation of housing need) increasing cross-boundary contributions from 1,500 dwellings to 3,419 dwellings (1,919 additional dwellings). This increase should be added to the proposed housing requirement to reflect the fact that the contribution towards the unmet need is over and above the local housing need in Shropshire, not a part of it. This results in a revised housing requirement of at least 32,719 dwellings (30,800 plus 1,919) for the draft Shropshire Local Plan. It is also unclear how contributions to unmet cross-boundary need will be distributed/which sites are to meet this need. Consider that it is necessary to assign sites against the contribution in order that the Council can properly monitor progress of the draft Shropshire Local Plan in delivering on its commitments and take the necessary actions where this is not happening as anticipated, without this the draft Shropshire Local Plan is not effective or positively prepared and therefore unsound. Suggest sites assigned to meeting this need should be based on a sequential approach that favours sites deemed sustainable, deliverable and located in relatively close proximity/accessible to the Black Country by public transport - sites located in the eastern Shropshire and situated along the A41/M54/A5 corridor are considered to be most appropriate when compared to other locations in the Borough. Site ALB014 should therefore be allocated for development.</li> </ul>
A0598	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>Note the proposed approach to the distribution of development remains largely unchanged from previous consultations and Albrighton remains a proposed Key Centre. However, remain concerned with the overall approach to distribution of housing across Shropshire, in particular the level of growth directed to Albrighton.</p> <p>The draft Shropshire Local Plan states Key Centres (as the third tier of urban location in an urban focused strategy) are to accommodate significant growth to maintain and enhance their roles and maximise economic potential. However, the proposed distribution of growth within the draft Shropshire Local Plan (table provided within representation), dilutes the level of development proposed within Key Centres earlier in the Local Plan Review (table provided within representation) and includes an over-emphasis on rural areas (31% of total development), significantly higher than the 16.7% proposed for the more sustainable Key Centres. This is illogical and inconsistent with an urban focused strategy of directing significant development to more sustainable urban locations. It also limits rather than maximises economic potential of Key Centres (as intended in draft Policy SP2), including Albrighton, where the residential guideline is constrained to the strategy rather than reflecting opportunities.</p> <p>Contends that the lack of focus on Key Centres, in proportionate terms, compared to other less sustainable locations has not been justified and does not represent positive planning, meaning that draft Policy SP2 is not soundly-based.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0598	B002	<p>Revise the proposed housing requirement to at least 32,719 dwellings (increased contribution to unmet cross-boundary need).</p> <p>Identify specific sites to accommodate accepted unmet cross-boundary need.</p> <p>Consider revising the housing requirement in response to recent delivery (not considered within the 2014-based sub-national household projections) and high affordable housing need.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Government has recently consulted upon potential changes to the methodology for calculating LHN, including the potential use of the 2018-based sub-national household projections (SNHP). As a result of this consultation Government determined that it was most appropriate to retain the use of the 2014-based SNHP for this calculation. Furthermore, in responding to this Consultation, Shropshire Council indicated its significant concerns regarding the 2018-based SNHP, particularly with regard to their reliance on the 2018-based sub-national population projections (SNPP) which utilised only 2-years of internal migration data in their formulation.</p> <p>Shropshire Council would note that the proposed housing requirement represents an aspirational, but achievable housing requirement, which meets identified LHN and provides an opportunity to respond/support other objectives as referenced above. It represents an increase to that in the adopted Local Plan which itself represented an aspirational but achievable housing requirement, which exceeded past housing need calculations and continues to exceed calculations of LHN using Government's standard methodology.</p> <p>Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. It is considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p>	No	SP2. Strategic Approach
A0598	B003	<p>Direct less growth to rural locations and more growth to Key Centres.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire is a large and diverse County with a very significant rural area. As specified within draft Policy SP2, recognising the rurality of much of Shropshire and the importance of ensuring the long-term sustainability of rural communities, growth in urban areas will be complemented by appropriate new development within Community Hubs and to a lesser extent Community Clusters and affordable housing within the wider rural area where there is evidenced local needs. We would note that the development attributed to rural areas in this response includes that proposed for within Strategic Settlements.</p> <p>With regard to Albrighton, Shropshire Council considers that the proposed development strategy and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Furthermore, proposed allocations have been informed by a proportionate and robust site assessment process, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0598	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>The proposed economic strategy underpinning the draft Shropshire Local Plan (referenced in draft Policy SP2 and set out in draft Policies SP12 and SP14) recognises the importance of focusing growth and development within strategic corridors as part of delivering a 'step change' in the economic performance of Shropshire. The first corridor identified is the M54/A41/A5, which includes Albrighton (accepted by the Council). However, this is not reflected in the proposed housing growth strategy as set out in draft Policy SP2, which makes no reference to the contribution that residential development within Strategic Corridors can make towards delivering the overall growth strategy for Shropshire up to 2038 (only reference made is in the supporting text to draft Policy SP2 at para 3.28).</p> <p>Criterion 1 of draft Policy SP14 is therefore wrong to state "The strategic approach in Policy SP2 seeks to deliver significant development and infrastructure investment within the 'strategic corridors' served by the principal rail network and strategic and principal road networks in Shropshire." As such, contend the housing and economic strands of the proposed spatial strategy are not sufficiently integrated, contradictory and inconsistent, creating a lack of clarity and meaning the draft Shropshire Local Plan is not 'clear and unambiguous' and is not justified, contrary to National Policy and unsound with regard to the status and purpose of Strategic Corridors with respect to housing development. These inconsistencies have clear implications for Albrighton, where growth will be restricted, ignoring the wider economic objectives of the draft Shropshire Local Plan/potential to contribute to delivering economic objectives and undermining its intended/potential role within the overall proposed spatial strategy.</p>
A0600	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	Yes	Yes	Continue to support recognition of the RAF Cosford Strategic Site forming a centre of excellence for aviation and engineering, meeting military personnel accommodation needs and supporting the aspirations of the MOD within section 5d of draft Policy SP2.
A0601	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	No	<p>For the reasons summarised within the para 3.6 of the explanation to draft Policy SP2, support the proposed approach in draft Policy SP2 of planning to deliver more than the minimum Local Housing Need calculated using Government's Standard Method. Indeed, this approach is supported by paras 11 and 59 of the National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG) (ID 2a-010).</p> <p>However, concerned about a very fundamental misalignment between the annual housing (1,400) and annual employment land (14ha) requirements. The Economic Development Needs Assessment (EDNA) undertaken to inform the draft Shropshire Local Plan indicates 142.83ha. (6.49ha per annum) of employment land is required to balance jobs and housing (note figures within the EDNA apply flexibility and churn/replacement of lost stock uplifts). The proposed employment land growth is double that required to support planned housing growth and as such is neither justified or effective as defined in the NPPF. This misalignment (identified as an issue within the EDNA along with a recommendation to undertake more detailed housing modelling which has not occurred), is likely to result in unsustainable commuting patterns due to insufficient availability of homes to meet the needs of the increased and diverse workforce with consequential cross boundary strategic implications. To achieve balance either the planned level of housing growth must significantly increase, and/or the level of planned employment land growth must significantly reduce.</p> <p>The EDNA tests other employment land forecasts scenarios, all of which (with the exception of past take-up trends which itself is meaningfully higher) are around half the proposed employment land requirement.</p> <p>-To meet the economic projections and regeneration objectives/commitments in the Marshes LEP Strategic Economic Plan scenarios, the employment land requirement should be around 7.6ha per annum (166ha over the proposed Plan period). But even at this level of employment land growth, further housing modelling is required, as more than 1,400 dwelling per annum are necessary to appropriately align jobs and housing.</p> <p>-Whilst the past take-up trends scenario is credible in principle, at 10.63ha per annum it is higher than the labour supply (and the economic projections and regeneration objectives/commitments scenarios). As such, credibility of the past trend scenario is highly questionable, particularly post-Covid19 where working practices and demand for employment space are likely to have permanently changed. Even if this scenario is accepted, the proposed employment land requirement remains higher and further housing modelling is required, as more than 1,400 dwelling per annum are necessary to appropriately align jobs and housing.</p> <p>Firmly consider the employment land requirement justified by the Council's evidence base is at best 166ha (7.6ha per annum), increasing to 196ha (8.9ha per annum) after factoring in the agreed 30ha contribution to unmet employment land needs arising in the Black Country and draft Policy SP2 should be amended to reflect this. Further housing modelling is also necessary to determine the amount of housing necessary to support this, and the proposed housing requirement figure within draft Policy SP2 and associated supporting text should accordingly be amended to reflect its outcome (Council monitoring confirms more than 1,400 dwellings per annum is deliverable - average of 1,637 dwellings per annum over the last 5 years and 1,876 dwellings per annum over the last 3 years).</p> <p>Any additional housing growth associated with this change should be accommodated in higher order settlements, such as Shrewsbury.</p> <p>Given the very significant over supply of employment land (EDNA identifies the current employment land supply as 410 ha), undeveloped allocated/approved employment land, such as that on the South Shrewsbury Strategic Urban Extension (SUE) (which has been actively marketed with little interest as it does not have direct access to the strategic road network and take-up is stronger around established employment sites), should be released for residential-led mixed development to meet the additional housing land required.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0598	B004	Identify additional growth at Albrighton, consistent with its location along one of the identified 'strategic corridors'.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. This approach is considered to effectively plan for housing and employment development and positively responds to the Economic Growth Strategy for Shropshire (2017-2021) and specifically reflects the objective to prioritise investment in strategic locations and growth zones along strategic corridors utilising existing road and rail connections.</p> <p>With regard to Albrighton, Shropshire Council considers that the proposed development strategy and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics (this of course includes the location of the settlement), constraints and opportunities that exist. Furthermore, proposed allocations and proposed safeguarded land have been informed by a proportionate and robust site assessment process, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p>	No	SP2. Strategic Approach
A0600	B010	N/A	Noted.	No	SP2. Strategic Approach
A0601	B002	<p>Decrease the proposed employment land requirement to 7.6 ha per annum (8.9 ha per annum once contributions to unmet needs arising from the Black County is considered). Undertake further housing modelling to determine the housing requirement necessary to align with the proposed employment land requirement. Amend the proposed housing requirement as appropriate and allocate additional land for housing development.</p> <p>Given the very significant over supply of employment land in Shropshire, reallocate undeveloped/approved employment land, such as that associated with the South Shrewsbury SUE, to help meet market and affordable housing needs.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>The proposed employment land requirement seeks to support the achievement of the aspirations of the Economic Growth Strategy for Shropshire through the provision of sufficient appropriately located land to deliver high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable and also responds to key quantitative and qualitative evidence including that within the Economic Development Needs Assessments (EDNA), Employment Land Review (ELR) and Authority Monitoring Report (AMR) undertaken to inform the draft Shropshire Local Plan.</p> <p>With regard to this evidence, we would note that calculations of the employment land requirement are based on the national assumption that employment land when developed, delivers 40% net floorspace from the gross land area, and that new employment is generated on that basis. However, available evidence suggests that employment land when developed, delivers on average 25% net floorspace in Shropshire. This has been given careful consideration when determining an appropriate employment land requirement. Furthermore, we would also note that the proposed employment land requirement actually represents a reduction to that within the adopted Local Plan (whilst the housing requirement has actually increased). The proposed employment land requirement incorporates up to 30ha of employment land to support the employment needs of the emerging Black Country Plan, where evidence indicates employment delivery opportunities are constrained. This reflects a positive approach to cross boundary cooperation and responds to the functional relationship between the two areas.</p> <p>In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement.</p> <p>It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038.</p> <p>It is considered that an appropriate balance is achieved between the proposed housing and employment land requirements. It is important to note that the proposed employment land requirement needs to respond to numerous factors in addition to the proposed housing requirement, including: achieving key economic objectives of the strategic approach in Policy SP2, such as providing for the delivery of a growing and diverse labour force (including those which commute out of the County), and in turn supporting the delivery of an improving rate of economic growth and an increase in the productivity of the local economy; wider aspirations within the Economic Growth Strategy for Shropshire; the nature of employment development in Shropshire (including the proportion of an employment site that results in net employment floorspace); the need to off-set the re-use of existing employment land for other purposes; and the wider range of employment uses now being accepted in the draft Shropshire Local Plan.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0602	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2	Not Specified	No	Not Specified	<p>Identification of Community Hubs in draft Policy SP2 is not based on up to date, accurate, or appropriate evidence within the Hierarchy of Settlements Assessment (HoS). The HoS includes two facilities for Clive that do not exist, without them Clive does not meet the criteria for Community Hub designation. These are:</p> <p>-A bowling green, situated within the private grounds of Clive Hall. The green was formerly used by Clive Bowling Club but in May 2018, the owners of the property issued notice to the Bowling Club that the facility was no longer available following sale of the property. This bowling green was not included within the original HoS but was subsequently added. The Parish Council notified Shropshire Council of the error and were assured it would be corrected. However, Shropshire Council argue the Open Space Needs Assessment (OSN) includes the bowling green and it is up to the community to demonstrate it is now surplus to requirements. Although this is demonstrably the case (since the Bowling Club now plays at an alternative green outside the Parish). The Playing Pitch and Outdoor Sports Strategy (PPOSS), supersedes the OSNA and was formally adopted by Shropshire Council in Nov 2020. PPOSS does not include this bowling green. It is therefore unjustified and unsound to allocate points to a facility that, as evidenced by the Council's own documentation, does not exist.</p> <p>-A convenience store, which closed in October 2020. Shropshire Council refused to accept permanent closure had taken place and, further, insisted on submission of a change of use planning application from the property owner (now submitted). However, the Council continues to include points for this non-existent facility. It is therefore unjustified and unsound to allocate points to a facility that does not exist.</p> <p>Furthermore, the manner in which Shropshire Council has handled changes to local amenities and services throughout the Local Plan Review process has not been consistent across all settlements, despite the Council indicating that this would be the case. When the shop in Myddle closed and the Post Office in Westbury closed the HoS was updated and their settlement status also. No requirement was made for a change of use Planning Application. For Clive, the Council have refused to correct the HoS, deferring action and therefore requiring a main modification and is not effective.</p>
A0607	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>The policy identifies Community Hubs as significant rural service centres but it is unsound in its application as it is not based on up to date or accurate evidence and the treatment of changes to local services and facilities throughout the Plan's development has been inconsistent. The Hierarchy of Settlements (August 2020) supports the Local Plan Review and Policy SP2, by setting out the methodology for identifying Shropshire's service centres. This is to provide Policy SP2 with specific and consistent criteria about Shropshire's settlements and their sustainability. Para 2.6 of the August 2020 version of the Hierarchy of Settlements states the need to keep this evidence up to date with best available information about changing local facilities, services and infrastructure, including feedback from previous consultation on the Local Plan Review and informal consultation with representatives of the local communities.</p> <p>However, despite consultation responses highlighting changing evidence on the availability of local facilities in some of Shropshire's settlements, including the most recent Regulation 18: Pre- Submission Draft of the Local Plan (August 2020- September 2020), Policy SP2 does not take these into account.</p> <p>Previous formal and informal consultations on the Local Plan Review have repeatedly highlighted the misidentification of available local services for the village of Clive. However Clive remains under Policy SP2 as a Community Hub and deemed a 'significant rural service centre' but without the actual presence of the necessary associated services and facilities to support this.</p> <p>This raises significant concerns about the soundness of the application of the Hierarchy of Settlements evidence base in the development of the Regulation 19 Plan and the application of a consistent approach cross the whole of the Plan area. For example, the village of Myddle, like Clive, was initially identified as a Community Hub but following closure of the local convenience store in summer 2018, the evidence base was reviewed and it was determined that the village fell below the threshold to be considered a 'significant rural service centre'. The same consistent application of this methodology has not been applied to the village of Clive, despite falling under comparative circumstances with a closure of a local convenience store. The village thereby also falls below the threshold for a Community Hub. This was raised with Shropshire Council by the Parish Council, local residents and indeed the shop owner during the Regulation 18 consultation stage but the Regulation 19 Plan remains unchanged, rendering Policy S2.2 unsound as it is not justified and based upon out of date evidence.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0602	B002	Remove Community Hub status from Clive and update policies and explanations as required.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP2. Strategic Approach
A0607	B002	Policy SP2 should remove reference to Clive as Community Hub as current evidence on availability and accessibility of local facilities and services means it does not meet the definition of a significant rural service centre as defined by the Hierarchy of Settlements evidence base and subsequent Local Plan policies.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0608	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	Site SHR173 will contribute to the proposed housing requirement for Shropshire and reinforce the proposed strategy for additional growth to be located at the highest level of the settlement hierarchy, which is supported, and in accordance with the Shropshire Council Hierarchy of Settlements.
A0609	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	Support overarching vision and proposals to deliver 1,400 dwellings per annum, recognising the need to deliver sufficient levels of affordable housing whilst maintaining and enhancing the role of principal and key centres such as Bridgnorth. Such an approach is considered justified and accords with national policy, recognising the standard method of calculating housing need must be treated as a minimum figure.
A0614	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Yes	Not Specified	Support delivery of quality family housing in sustainable locations and acknowledges the role this can play in attracting new families to the County. It is important that the future growth aspirations are aligned with housing policy and that enough of the right types of housing are built to ensure that the labour force and skills the economy needs will be attracted to and retained in Shropshire. Overall this policy is supported.
A0620	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	HoS is flawed and unsound – ignores the requirement for a Hub to have both significant employment and peak-time public transport (Trefonen has neither). Therefore contrary to SP3 and SO5, SO6 and SO12, in the Draft Plan. HoS is subjective.
A0621	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>We support the identification of a requirement above the minimum, aligned with Shropshire’s growth aspirations, which provides flexibility and contingency, it is a justified and effective means to ensure delivery of an appropriate scale of development to meet needs. The delivery of the employment development is critical to deliver on and facilitate the County’s ambition for sustainable economic growth contained in the Economic Growth Strategy for Shropshire. This strategy aims to achieve £300 million of private sector investment over the next 5 years and at least 3,700 new jobs. Even at the lower end of the range, there is an identified need for employment land. SHF018 and SHF018d are suitable, sustainable locations for such development due to the links to the M54 corridor links and ability to serve local need within Shifnal. The Local Plan does not make any specific land allocations to meet the Black Country need. If the Government is to meet its housing target and boost housing supply, both within Shifnal and the Black Country, exceptional circumstances can be expected to continue to be applied through the plan making process. The release of land from the Green Belt, either now given the revised need, or safeguarded to meet future need, should, and must, continue to feature in the Shropshire plan under exceptional circumstances.</p> <p>Windfall sites are highly uncertain, particularly in the context of the current economic climate and brownfield opportunities are limited in the existing built-up area. In addition, these sites are not necessarily coming forward in locations of greatest housing need, such as Shifnal. Consequently, the reinstatement of allocation SHF032 and additional safeguarded land SHF018c have the potential to reduce the reliance on windfall sites whose delivery is highly uncertain. It also ensures that housing is being delivered where it is needed most. Windfall sites, most notably those derived from rural buildings and barns, are unlikely to serve Shifnal’s housing need to the same extent that it would in other, more rural, parts of Shropshire.</p> <p>It is likely to be the case that there are a number of substantive risks linked to the future housing supply resulting from the Covid-19 pandemic. This includes ongoing challenges for the capacity of the construction industry on sites that had been assumed to be deliverable. As well as potential supply chain issues for housebuilders, a key risk comprises housebuilders or developers running out of funds to maintain the delivery previously anticipated. These issues are also likely to have a direct impact on the viability of some existing permissions and allocations, causing stalling of delivery and also requiring existing s106 commitments to be reviewed.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0608	B002	N/A	Noted.	No	SP2. Strategic Approach
A0609	B002	N/A	Noted.	No	SP2. Strategic Approach
A0614	B004	n/a	Noted.	No	SP2. Strategic Approach
A0620	B001	HoS needs to comply with SP1, SP3 and Sustainability Objectives SO5, SO6 and SO12. The requirements to have both 'significant employment opportunities' and 'peak time public transport' for Hub Status must be met. Trefonen should be removed from Hub status.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen. Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment. As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.	No	SP2. Strategic Approach
A0621	B008	Insert the asterisks below: 2. Over the plan period from 2016 to 2038, *a minimum* of 30,800 new dwellings and around 300 hectares of employment land will be delivered. This equates to around 1,400 dwellings and around 14ha of employment land per annum. This Local Plan ensures that sufficient land in the right locations is available to achieve these growth aspirations, however the availability of land will be kept under review to ensure a continuous supply of suitable sites is available.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Shropshire Council also considers that it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. Assumptions regarding non-delivery rates, windfall allowances and delivery timescales for proposed allocations are considered appropriate and respond to consideration of the specific characteristics, constraints and opportunities that exist across Shropshire, in specific settlements and on specific sites.	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0623	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	Do not agree that the plan's spatial strategy, in particular the amount of growth proposed for Albrighton (500 dwellings), will realise the opportunities identifies in the draft Plan and SA to improve affordability or maximise the viability and vitality of existing services and facilities, nor alleviate existing pressures from pent up demand. The spatial strategy also does not reflect where significant job creation is expected (such as at Cosford and along the M54 / A5 growth corridor). At the same time, the spatial strategy also fails to respond to where the Black Country shortfall arises. Greater development should be in closer proximity to the Black Country to meet this need where it arises. There is long-term decline in Albrighton's population and a more recently static picture which is materially changing the demographic profile of the town.
A0624	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	The Framework and Planning Practice Guidance (PPG) strongly support the position taken by Shropshire to identify a housing requirement which is higher than that implied as a 'minimum' level through the standard method. This particularly recognises & commits to the economic ambitions relating to the M54 growth corridor. Planning for higher levels of housing need is also prudent in the context of the opportunity presented by the County's proximity to and functional relationship with strategic drivers of growth beyond the County including opportunities presented by HS2. Furthermore planning for a higher level of provision is necessary to respond to the pressing need for affordable homes delivery to address historic under-provision. Appropriate to plan for a higher amount of housing in recognition of proximity to housing market areas (HMAs) facing significant constraints on their ability to meet full need (e.g. the Greater Birmingham/ Black Country HMA). The Local Plan housing requirement is supported as a minimum, but the Council should give consideration to take a more positive approach in providing for identified needs and opportunities.
A0626	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	Trefonen does not have any "significant employment opportunities" or "peak time public transport". It is the only proposed Hub settlement with neither of these key requirements.
A0626	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	Trefonen does not have any "significant employment opportunities" or "peak time public transport". The additional wording "a larger range" of services and facilities to compensate for the lack of these fundamental criteria is not defined, and introduces an element of subjective assessment, which is contrary to the aims to the Hierarchy of Settlements Methodology for objective comparison between settlements. The Threshold score of 48points for Hub status was set using flawed and inaccurate scoring in the original 2017 Table 10 and has not been changed since.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0623	B008	Given the clear evidence that Albrighton's housing delivery remains constrained despite a pressing need and growing demand, and the anticipated and planned significant employment growth at Cosford, a greater quantum of growth should be directed to Albrighton to ensure the plan is consistent with national policy, positively prepared, effective and justified. The site to the west of Newport Road can make a significant contribution to this, as well as the wider county's housing needs.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council also considers that the proposed development strategy for Albrighton and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Furthermore, proposed allocations and proposed safeguarded land have been informed by a proportionate and robust site assessment process, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p>	No	SP2. Strategic Approach
A0624	B003	Give consideration to a more positive approach to housing requirement - higher than identified.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p>	No	SP2. Strategic Approach
A0626	B001	Trefonen should be a rural settlement with no development boundary. Any development should conform to the Village Design Statement	Shropshire Council undertook a robust assessment during the Hierarchy of Settlement process and Trefonen's services and facilities meant that its score resulted in it being a Hub. Notably there are no housing allocations in the settlement as part of this Plan Review.	No	SP2. Strategic Approach
A0626	B002	HoS must be amended and support other relevant policies in the Plan. In Para 5.41 the relaxation wording must be removed...Remove "In circumstances where there is no regular public transport service; and/or high speed broadband; and/or multiple significant employment opportunities, a larger range of services and facilities would be necessary to compensate to enable a settlement to achieve the specified point's threshold" the requirement to have both "significant employment opportunities" and "peak time public transport" for Hub status must be met.	<p>Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.</p> <p>Shropshire Council also considers that the development strategy proposed for Trefonen, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable. It is noted that the proposed requirements in draft Policy S14.2, which applies to the proposed Community Hubs in the Oswestry Place Plan Area - including Trefonen, includes "development proposals will be expected to positively respond to policies and guidelines within any relevant community-led plans and local needs."</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0627	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	<p>The Hierarchy of Settlements Assessment (HoS) and as a result the Draft Shropshire Local Plan is unsound as determination of settlement status is fundamentally flawed. The Hierarchy of Settlements Assessment (HoS) contains additional relaxation wording (Para 5.41) that is contrary to the full definition of settlement requirements within the HoS and critically is contrary to Climate Change policies (both adopted and proposed) and the Sustainability Appraisal objectives.</p> <p>Specifically, para 5.41 of the HoS introduces an element of subjective assessment (proposals that a “larger range” of services and facilities compensate for lack of fundamental criteria (facilities such as fortnightly mobile library visits, children’s playgrounds, outdoor sport facilities &amp; green space cannot possibly compensate in any way for lack of employment and/or public transport)), at odds with aims of the HoS methodology and for addressing the concerns of the SAMDev Examination Inspector in their Report 30th October 2015.</p> <p>The threshold for Community Hub status of 48 points was set by a “3 point gap” in the original 2017 HoS, but this gap never existed. This inaccuracy led to relaxation of the wording, to make the policy fit the results rather than the results meet the policy. Subsequently, the 2018 HoS removed reference to the “3 point gap”, but critically retained the 48 point threshold and the same relaxed wording. Removing the wording does not correct the mistake in setting the threshold at 48 points when full Community Hub criteria is not met by settlements above that score.</p> <p>Also the HoS scoring still contains many inaccuracies (list provided as an appendix to this representation including for Alveley, Baschurch, Bomere Heath, Hodnet, Llanymynech, Pant, Nesscliffe, Whittington, Weston Rhyn/Preesgweene, Cosford, Conover, Dudleston Heath, Knockin, Morda and St Martins, Westbury, Knockin, Brockton, Clive, Cressage, Hodnet, Ditton Priors, Dorrington, Worthen, Prees, Baschurch, Shawbury and Clun), meaning it is unfit for purpose.</p> <p>Para 2.8 of the HoS notes “it is not intended to represent a comprehensive assessment of all services or facilities” this compounds the inaccuracy. This assessment underpins decisions on the status of settlements and therefore it is critical that it is 100% accurate. As it is not, the whole outcome is flawed and unsound.</p>
A0628	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	No	No	Yes	The draft Shropshire Local Plan omits a detailed housing trajectory and is therefore inconsistent with the National Planning Policy Framework.
A0629	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	No	Yes	Within para 2 of draft Policy SP2, it is not clear what the definition of “employment land” is. The amount stated here is wholly insufficient to allow Shropshire to realise its renewable energy commitment if land use for photovoltaic arrays and any other forms of renewable electricity generation are included within the scope of employment land.
A0629	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and Para 3.28	Yes	No	Yes	Para 3.28 of the explanation to draft Policy SP2 identifies strategic corridors in Shropshire. Question the ability for the A41 strategic corridor to deliver true sustainable economic growth as there is no bus service along the A41. Public transport to and from Market Drayton and Whitchurch involves travelling via Shrewsbury along the A53 which is not considered a strategic corridor.
A0629	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	No	No	Yes	<p>Whilst accepting the general strategic approach, question the scale of development (housing and employment land). Consider pursuing housing in excess of need is not a sustainable approach and reflects a focus on economic growth (contrary to section 2 of the NPPF which states the three overarching objectives of sustainable development (economic, social and environmental) need to be pursued in mutually supportive ways (so opportunities can be taken to secure net gains across each). This concern filters down to place plan areas/sites which are placed under additional pressure to deliver housing beyond need.</p> <p>The move to a low carbon economy (para 8 of the National Planning Policy Framework (NPPF)) and to net zero by 2050 (Climate Change Act 2008 as updated) requires elimination of emissions at source and careful limitations on the amount of carbon embodied in construction - some construction will have very long/will not within their lifetime repay embedded carbon. Section 19 of the Planning and Compulsory Purchase Act, paras 148-149 (incorporating footnote 48) of the NPPF and supporting National Planning Practice Guidance (NPPG) require Local Plans to carbon audited, and to “contribute to radical carbon emission reductions in line with the Climate Change Act”.</p> <p>The future homes standard consultation has been published confirming Government is intending to tighten building regulations in relation to carbon emissions. Consider wording relating to 'strongly encouraging' zero carbon could be tightened to 'should be' zero carbon for major development.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0627	B006	<p>1. Amend the Hierarchy of Settlements Assessment (HoS). This assessment must correspond with and support the draft Spatial Vision, draft Policies SP1 and SP3, and Sustainability Objectives SO5, SO6, &amp; SO12 which seek to minimise car travel/maximise trips by sustainable travel and reduce carbon emissions.</p> <p>Para 5.41 of the HoS setting a minimum range of only 5 from 20 services &amp; facilities for a Community Hub settlement is far too low and must be increased.</p> <p>The relaxation wording in para 5.41 of the HoS must also be removed. Rather the full Community Hub criteria set out in Para 1.16 (Table 2) and Para 5.35 (Table 6) must be used to determine Settlement status. Critically, the requirement to have both "significant employment opportunities" and "peak time public transport" for Community Hub status must be met.</p> <p>The Community Hub threshold must be determined by the full Community Hub criteria, not any "gap" that appears in the results, nor by relaxation wording introduced to support inaccurate scoring results i.e. the threshold must be set by the draft Policy and not that the draft Policy be re-written to fit the results.</p> <p>To achieve its stated purpose, the HoS must be an objective assessment and not include any element of subjective assessment.</p> <p>The Table 10 assessment needs to be properly and fully reviewed using on the ground evidence of service &amp; facilities and employment opportunities confirmed locally, not just reliance on the Mint Database information.</p> <p>2. Review the list of proposed Community Hubs to ensure compliance with the full Community Hub criteria and amend settlements development status and proposed allocations accordingly.</p>	<p>Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.</p> <p>Shropshire Council also considers that the development strategy proposed for Trefonen, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.</p>	No	SP2. Strategic Approach
A0628	B008	Provide a detailed housing trajectory.	As outlined within the proposed explanation for draft Policy SP2 "the expected rate of housing delivery over the Local Plan period is around 1,400 dwelling per annum, which is consistent with the annual housing requirement. Whilst it is acknowledged that there will inevitably be fluctuations over time, which may result in annual rates of delivery falling below or exceeding this level, it is expected that this will 'balance out' to ensure that the housing requirement is achieved. As such it is considered that this expected rate of delivery over the Local Plan period of around 1,400 dwellings per annum forms the most robust trajectory of future housing delivery in Shropshire and will be used to assess annual housing delivery."	No	SP2. Strategic Approach
A0629	B010	In para 2 of draft Policy SP2 add "For the avoidance of doubt, 'employment land' excludes areas used for the development and operation of systems producing renewable energy." Or, at a suitable and binding place in the strategy, provide a proper definition of 'employment land' and other land use types referenced in the Strategy that incorporates this definition. Or provide a reference to an external accepted standard that clearly incorporates this definition.	Noted. The draft Shropshire Local Plan should be read as a whole. Para 2 of draft Policy SP13 explains what employment generating uses will comprise.	No	SP2. Strategic Approach
A0629	B011	The term strategic corridor should be defined as one along which some form of public transport – bus or rail - is provided. Current meaning seems to imply 'an A class road'	Draft Policy SP14 and the associated Shropshire Economic Growth Strategy explain that 'Strategic Corridors' are the principal rail and strategic road routes through the County. This is considered an appropriate definition for these corridors.	No	SP2. Strategic Approach
A0629	B012	<p>For all development proposals above a certain threshold (e.g. £2m/10 dwellings/1ha), an assessment of net lifetime emissions including embodied carbon will be required. Where this exceeds 25gm/£1 with repayment times above 10 years development will only be permitted in very special circumstances.</p> <p>SP2 should be revised to reduce the level of new building.</p> <p>Development Plans should comply with para 69 of the National Planning Policy Framework (NPPF) to "identify, through the development plan and brownfield registers, land to accommodate at least 10% of their housing requirement on sites no larger than one hectare".</p>	<p>Noted. The requirement to assess lifetime emissions of development proposals does not derive from either national planning policy or national planning practice guidance. As such the Council does not consider it necessary to include it in the Local Plan.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>The proposed strategy for achieving the proposed housing requirement includes a significant proportion of sites with capacity for less than 10 dwellings (net), exceeding the 10% figure within the National Planning Policy Framework (NPPF). This includes completions achieved between 2016/17 and 2019/2020 of around 1,900 dwelling; and existing commitments (sites with Planning Permission, Prior Approval or proposed 'saved' Allocations that have not yet secured Planning Permission) and proposed allocations with a capacity of around 2,650 dwellings. Furthermore windfall allowances for settlements and windfall development in the rural area inevitably will include considerable numbers of sites of less than 10 dwellings (the most recent Five Year Housing Land Supply Statement explains that small scale windfall sites of less than 5 dwellings have always represented a significant component of the housing land supply in Shropshire, and it is anticipated that this will remain the case. It also explains that the average completion rate on all small scale windfall sites of less than 5 dwellings over the plan period 2006/07-2019/20, is some 378 dwellings per annum and the actual rate for 2019/20 was some 329 dwellings).</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	No	Yes	In proposing Community Cluster developments, no mention is made to transport infrastructure or public transport requirements. Rural Community Cluster developments result in a larger carbon footprints than those in urban centres – where new developments should be concentrated (consistent with conclusions from the Committee on Climate Change).
A0630	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	Relaxing the requirement for Hubs to have both 'significant employment' and 'peak time public transport' makes the Hierarchy of settlements unsound. This is also contrary to the proposed Climate Change and Sustainability Objectives SO5, SO6 and SO12 which seek to reduce carbon emissions by reducing travel by private vehicles making it unsound. The adding of the vague and undefined phrase 'a larger range' of services and facilities to compensate for the lack of these facilities is subjective. This is contrary to the Hierarchy of Settlements attempt at objective comparison between settlements. The scoring system used in Table 10 is flawed and inaccurate making the threshold dubious. It is not an appropriate or robust assessment which makes it unsound. As the SP2 Strategic Approach para 6 relies on this it is therefore also unsound.
A0631	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2, SP3 and SHR060	Yes	No	Yes	Although Shropshire Council recognises the imminent need for climate change it is recommending building approx. 5000 houses more than the fulfilment requires.
A0633	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S2	No	No	No	Housing – the total requirement figure should be 25,000 to reflect the housing need and the 1,500 proposed Black Country overspill deleted. There is no sound evidence to justify such a large increase over need, it will be difficult to justify that this can be delivered as sustainable development, previous experience in the County shows that failure to deliver housing resulted in greenfield and Green Belt land having to be released and with the impact of Covid, a cautious approach to development should be taken at present. The Plan will be reviewed ling before 2038 and this will be the opportunity to assess the impact of Covid and adjust development in the Plan above need if justified at that time. The Black Country Plan and supporting evidence is at an early stage so there is no justified evidence to support the need for such a large overspill to be allocated in Shropshire. The allocation also fails to take account of recent Government policy and financial support to the use of Brownfield sites which could now meet this housing need in the Black Country.
A0636	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Housing	No	No	No	Policy SP2 requires, from 2016 to 2038, the provision of around 30,800 new dwellings at around 1,400 dwellings per annum. SC need to clarify the uplift of this housing target to 30,800 above the minimum 25,894 new dwellings required by central Government and above the demographic need of only 20,746 new dwellings. SC also need to explain why 1,500 dwellings for Black Country needs is also accommodated in the proposed housing provision despite their being no change to the standard methodology for most West Midlands local planning authorities except for Birmingham, Wolverhampton, Coventry and Stoke-on-Trent. The existing 'standard methodology for calculating housing requirements is based on the lower 2014-household projections (not the 2018 based projections) for both Shropshire and Telford & Wrekin which would permit SC to reduce their housing targets rather than increase them to 30,800 dwellings.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B013	Transport infrastructure, including access to public transport should be included in the criteria for selecting rural development sites in policy SP2.	Noted. The proposed strategic approach for the distribution of development includes the principle of urban focus, by which the majority of development is directed towards urban areas. However, recognising the rurality of much of Shropshire and the importance of ensuring the long-term sustainability of rural communities, growth in urban areas will be complemented by appropriate new development within Community Hubs, which are considered significant rural service centres; and to a lesser extent Community Clusters, which consist of settlements with aspirations to maintain or enhance their sustainability. This is considered an appropriate, effective, sustainable and deliverable strategy. The specific criteria for development within Community Clusters is identified within draft Policy SP9, this includes that there is sufficient infrastructure capacity to support the development, or any infrastructure capacity constraints can be addressed through the development, consistent with relevant policies of this Local Plan.	No	SP2. Strategic Approach
A0630	B001	The Hierarchy of Settlements needs to be amended to fulfil the SP3 Climate Change and Sustainability Objectives SO5, SO6 and SO12 to minimise car travel and reduce carbon emissions. The vague wording used to relax the original criteria in Para 5.41 needs to be removed and the original requirement to have both significant employment and peak time public transport must be reinstated. The Hierarchy of Settlements then needs to be reviewed using this criteria and the draft plan development status and allocations amended as appropriate.	Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire. Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment. As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub. Shropshire Council also considers that the development strategy proposed for Trefonen, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.	No	SP2. Strategic Approach
A0631	B001	Over development - far too many new houses in an area of not much more than 1 sq. mile 1500+ dwellings proposed 425 newbuilds (less than 5yrs old) Darwin's Walk & Bowbrook Meadows 126 currently being finished on Radbrook Rd The density of the proposed housing is particularly high in SHR060	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Shropshire Council also considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.	No	SP2. Strategic Approach
A0633	B003	the total requirement figure should be 25,000 to reflect the housing need and the 1,500 proposed Black Country overspill deleted.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.	No	SP2. Strategic Approach
A0636	B007	The existing 'standard methodology for calculating housing requirements is based on the lower 2014-household projections (not the 2018 based projections) for both Shropshire and Telford & Wrekin which would permit SC to reduce their housing requirement form 30,800 dwellings.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.	No	SP2. Strategic Approach

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0636	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Employment	No	No	No	Policy SP2 requires, from 2016 to 2038, around 300 hectares of employment land at around 14ha of employment land per annum. Appendix 6 of the Employment Land Supply states that the strategic employment land supply will be 414ha and it is unclear how this figure contributes to the employment land requirement nor why the two figures are different. The 300ha requirement is considered sufficient to deliver enough jobs to achieve a sustainable balance with their housing requirement but SC need to explain how this balanced growth projection was calculated. The proposed 30,800 dwellings and 300 ha of employment land seem disproportionate and as an example, guideline employment land figure for Shifnal was previously 16 ha but increased to 41ha in the Pre-Submission Draft SLP. SC indicate the 1,500 new dwellings proposed at Shifnal should equal circa 1,500 new jobs. Each job needs on average 42.25 sq.m of finished floorspace equal to 40% of the entire employment site. This means, an additional 40% needs to be added to the overall total. The calculation is 1,500 new dwellings x 42.25 sq.m of floorspace x 40% equal to 15.84 ha. For the figure to increase to 41ha, the 40% provided by SC appears to be already included in the balanced growth calculation of 16 ha. SC need to explain the methodology to calculate Shifnal's employment need. The employment land supply figure identified by SC also fail to account for employment land proposed at RAF Cosford (Aviation Academy, 1500 additional military personnel; new air ambulance development). This additional land puts the actual employment land figure at +50% above the 300ha requirement and so, there is a clear over provision of employment land over the next plan period.
A0637	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Housing	No	No	No	Policy SP2 requires, from 2016 to 2038, the provision of around 30,800 new dwellings at around 1,400 dwellings per annum. SC need to clarify the uplift of this housing target to 30,800 above the minimum 25,894 new dwellings required by central Government and above the demographic need of only 20,746 new dwellings. SC also need to explain why 1,500 dwellings for Black Country needs is also accommodated in the proposed housing provision despite their being no change to the standard methodology for most West Midlands local planning authorities except for Birmingham, Wolverhampton, Coventry and Stoke-on-Trent. The existing 'standard methodology for calculating housing requirements is based on the lower 2014-household projections (not the 2018 based projections) for both Shropshire and Telford & Wrekin which would permit SC to reduce their housing targets rather than increase them to 30,800 dwellings.
A0637	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 - Employment	No	No	No	Policy SP2 requires, from 2016 to 2038, around 300 hectares of employment land at around 14ha of employment land per annum. Appendix 6 of the Employment Land Supply states that the strategic employment land supply will be 414ha and it is unclear how this figure contributes to the employment land requirement nor why the two figures are different. The 300ha requirement is considered sufficient to deliver enough jobs to achieve a sustainable balance with their housing requirement but SC need to explain how this balanced growth projection was calculated. The proposed 30,800 dwellings and 300 ha of employment land seem disproportionate and as an example, guideline employment land figure for Shifnal was previously 16 ha but increased to 41ha in the Pre-Submission Draft SLP. SC indicate the 1,500 new dwellings proposed at Shifnal should equal circa 1,500 new jobs. Each job needs on average 42.25 sq.m of finished floorspace equal to 40% of the entire employment site. This means, an additional 40% needs to be added to the overall total. The calculation is 1,500 new dwellings x 42.25 sq.m of floorspace x 40% equal to 15.84 ha. For the figure to increase to 41ha, the 40% provided by SC appears to be already included in the balanced growth calculation of 16 ha. SC need to explain the methodology to calculate Shifnal's employment need. The employment land supply figure identified by SC also fail to account for employment land proposed at RAF Cosford (Aviation Academy, 1500 additional military personnel; new air ambulance development). This additional land puts the actual employment land figure at +50% above the 300ha requirement and so, there is a clear over provision of employment land over the next plan period.
A0646	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Yes	Yes	Yes	Consider the approach to development in Shrewsbury as set out within SP2 is sound when considered against the tests set out in para 35 of the NPPF.
A0655	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	SP2 discusses issues such as different parts of Shropshire, proportions of 'affordable' homes and the growing number of Neighbourhood Planning towns. Neighbourhood plans are agreed only after local referenda and eventually gain legal force. Shrewsbury does not have a Neighbourhood Plan but the Big Town Plan is providing planning strategy, although there will be no referendum. Consequently, considerable additional public consultation is enabling townspeople to be involved through many means that are not echoed in the Local Plan's sister draft policy on Community Involvement. (CSI)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0663	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	A fundamental requirement of the NPPF is the responsibility placed upon Local Planning Authorities to “boost significantly” the supply of market and affordable housing. It is therefore critical for the Local Plan to ambitiously plan to meet affordable housing need across the District. Failure to do so will inevitably cause further deterioration in the delivery of affordable housing, placing many more families on ever-increasing housing waiting lists; an issue which is already a serious one in Shropshire as documented at supporting paragraph 3.15. Given an estimated affordable housing need of 799 households per year, it is clear that the delivery of 7,700 affordable units over the lifetime of the emerging 18 year plan period will not be enough to support all of those who are in housing need.
A0672	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	The definition of Hub has been tweaked in the Hierarchy of Settlements. One cannot help but wonder why, given the wording of para 5.41, it is no longer a requirement that a Hub can provide both significant employment and peak time public transport. Is this an attempt to squeeze the criteria to fit certain locations? Climate change and sustainability are arguably the major issues facing us at the moment, as many young people will tell us. The reduction of carbon emissions and car travel are important and the relaxation of this wording could be seen as contrary to Objectives SO5, 6 and 12.
A0673	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	No	Object to the draft Shropshire Local Plan as it does not positively or effectively respond to cross-boundary strategic matters. The draft Shropshire Local Plan proposes a 30ha contribution to unmet cross-boundary need for employment land arising in the Black Country. Evidence for this is set out in the Economic Development Needs Assessment (EDNA), which identifies strong labour market linkages with the Black Country and Wolverhampton in particular, and recommends close co-operation on employment land supply. The Black Country employment land requirement ranges from 592ha (baseline) to 870ha (aspirational growth based on WMCA SEP). Existing urban employment land supply is around 305ha, leaving a shortfall of between 287ha and 565ha, depending on the growth scenarios applied. All opportunities to bring forward additional employment land within the urban area and Green Belt are being considered, but this exercise will not make a significant impact upon addressing unmet need. Work is also ongoing to find other sources of supply including some proportion of the consented West Midlands Interchange (WMI). Contributions through Duty to Cooperate are currently limited to 50ha in total (including the 30ha in the draft Shropshire Local Plan). As such apparent there will be a significant quantitative shortfall of employment land in the Black Country. The West Midlands Strategic Employment Sites Study (currently being updated) and West Midlands Land Commission Report respectively found the Black Country and southern Staffordshire has a severe lack of strategic minimum 25ha employment sites (this remains the case and was recognised during the recent decision on the WMI) and the shortfall of land for employment space is at least as pressing as that for housing. As such it is apparent there will be a significant qualitative shortfall of employment land in the Black Country and there are very limited locations where this need can be met. The quantitative employment land requirement for Shropshire identified in the EDNA is between 164ha and 264ha (including the 30ha Black Country contribution). The current supply is some 276ha and the Plan target 300ha. This suggests headroom to increase the employment land contribution to the Black Country. Employment sites in Shifnal and Bridgnorth, given size and distance from the motorway network (limits range of potential occupiers as unlikely to be attractive to large scale and footloose inward-investment), could be assumed capable of contributing to non-strategic needs arising in the Black Country. This is consistent with the findings of the EDNA, which acknowledges demand for ‘Big Box’ units (10,000 sqm plus) has been generally limited in Shropshire. However, this is in part due to the lack of readily available and suitably located, high quality larger stock (the EDNA concludes newly developed modern stock has largely catered to smaller occupiers and trade counter uses and much of the existing larger stock is dated and in need of refurbishment to meet requirements of modern occupiers). As such, given the scale of the qualitative and quantitative unmet need, consider the proposed employment land contribution to cross boundary need should be increased. Consider current proposals are not sufficient to respond positively or effectively to cross-boundary strategic matters given the scale of quantitative and qualitative needs and the size of Shropshire relative to neighbours. Any increase to this offer should also reflect qualitative factors including significant demand for advanced logistics premises in locations with good access to the M54 (identified as a key strategic corridor in the Strategic Options Study). There is also a need to review how much employment land could sustainably and practically be delivered on proposed allocations (Shifnal and Bridgnorth) and through continuing consideration of strategic sites. In particular, land to the north of M54 Junction 3 (strongly supported by ABCA in previous consultations) has been promoted as a potential Strategic Employment Site, with potential to provide 75ha of employment land. This could complement development at Shifnal and take up opportunities that might arise at Cosford - support this proposal and take the view the draft Shropshire Local Plan should support a strategic settlement in this location which would also help to meet the housing needs of the Black Country.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0663	B002	It is critical that the Council are pro-active in their efforts to secure the maximum provision of affordable housing in Shropshire in order to meet the needs of its residents. This means that local plan should seek to drive change across the Authority through a pragmatic and ambitious approach to affordable housing, encouraging greater diversity to meet all needs where possible. Maximising the delivery of affordable housing is a priority of the plan and introducing policies that restrict the delivery of affordable housing should be avoided where possible.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. The draft Shropshire Local Plan should be read as a whole. Shropshire Council considers that the draft Shropshire Local Plan introduces an appropriate 'toolbox' of measures to positively contribute towards the delivery of appropriately located and appropriate types and sizes of affordable housing to meet identified local needs.	No	SP2. Strategic Approach
A0672	B001	The Village Design Statement for Trefonen Treflach and Nantmar (2006 and 2016) make it absolutely clear that Trefonen neither offers significant employment opportunities nor does it enjoy any peak time public transport, unless you are a school child. The designation of Trefonen as a Hub should be changed. It should be designated 'Other rural' and deleted from Policy S14.2 Community Hubs – Oswestry Place Plan Area. We envisaged a small number of Affordable Homes, houses and bungalows which would meet the needs of starters on the housing ladder, those wishing to down-size, and those with specific access needs. Large scale developments are inappropriate. We wish to see Trefonen designated as Other Rural with Affordable Homes provided by the Rural Exceptions Policies DP4, 5, 6 and 7.	Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire. Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment. As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub. Shropshire Council also considers that the development strategy proposed for Trefonen, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.	No	SP2. Strategic Approach
A0673	B001	Provide a significantly larger contribution to unmet cross-boundary need for employment land arising in the Black Country. This should reflect the quantitative and qualitative needs of the area. Review how much land could sustainably and practically be delivered on the sites identified in the draft Shropshire Local Plan and consider potential strategic sites, particularly land north of M54 of Junction 3, which should be allocated for development to meet the cross-boundary needs arising in the Black Country.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed employment land requirement and proposed employment land supply are also considered appropriate, effective and sustainable. The proposed employment land requirement seeks to support the achievement of the aspirations of the Economic Growth Strategy for Shropshire through the provision of sufficient appropriately located land to deliver high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable and also responds to key quantitative and qualitative evidence including that within the Economic Development Needs Assessments (EDNA), Employment Land Review (ELR) and Authority Monitoring Report (AMR) undertaken to inform the draft Shropshire Local Plan. In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement. It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038. With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0673	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	No	<p>Object to the draft Shropshire Local Plan as it does not positively or effectively respond to cross-boundary strategic matters.</p> <p>Proposals include a 1,500 dwelling contribution to meeting needs arising in the Black Country. Whilst proposals at Bridgnorth and Shifnal could make some contribution to Black Country needs, given existing migration patterns, geographical proximity and physical links. However, they are not strategic and do not benefit from direct access and visibility from the M54 corridor. Further, likely a shortfall of land to meet Black Country housing needs will remain, even with this and likely contributions within other emerging neighbouring Local Plans.</p> <p>The Black Country evidence (Urban Capacity Review (UCR) Update 2019) demonstrates a need for 71,500 homes between 2019 and 2038, of which 44,500 homes can be accommodated in the urban area leaving a shortfall of 27,000. This shortfall is likely to increase by around 5,000 homes as a result of recent changes to the calculation of local housing need. An UCR Update 2020 will shortly be published calculating an up-to-date shortfall figure, which will inform a forthcoming consultation on the draft Black Country Plan. Evidence clearly demonstrates the Black Country cannot accommodate all of its needs in the urban area.</p> <p>In terms of non-urban opportunities, assessments undertaken (Green Belt, Landscape Sensitivity, Historic Landscape Characterisation and Ecological surveys) severely constrain capacity to deliver large scale development across much of the Black Country. Market deliverability is also being assessed, but consider this will also limit capacity (based on experience in Birmingham, where capacity of an urban extension was reduced from 10,000 to 5,000 over the 15 year plan period and this was based on a strong housing market recovery scenario in one of the strongest housing markets areas in the West Midlands). The majority of the Green Belt is located in Walsall and to a lesser extent Dudley, so these are the two main housing market areas with potential for Green Belt housing, based on a scenario that there is sufficient unconstrained capacity in the Black Country Green Belt, a deliverability study may reasonably conclude capacity for some 10,000 homes in the Green Belt over the 15-year Plan period, leaving a significant shortfall to be met in neighbouring authorities.</p> <p>Duty to cooperate discussions with neighbouring Local Authorities have resulted in a number of local authorities (including South Staffordshire, Lichfield, Cannock and Shropshire) indicating they will seek to test ability to accommodate additional housing need over and above their own as part of Local Plan Reviews (anticipate as a best-case scenario they could accommodate up to 10,500-12,500 homes, leaving a significant shortfall of approximately 14,550-16,500 houses (plus 5,000 homes as a result of the change to the calculation of local housing need). However, there is no certainty these contributions will come forward.</p> <p>Therefore important firm commitment is made now as part of the Shropshire Local Plan Review, the most advanced of all the neighbouring plans, and these commitments are capable of meeting identified strategic needs. Request the Shropshire Local Plan increases its housing requirement by 3,000 to incorporate up to 4,500 dwellings to support the housing needs of the emerging Black Country Plan. Some 1,500 of this could be met by proposed housing allocations around Shifnal and Bridgnorth, with the addition of up to 3,000 dwellings to be met at Land to the north of Junction 3 of the M54 as part of a new Strategic Settlement (strongly supported by ABCA in previous consultations).</p>
A0674	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	Support the strategic approach set out in the draft Shropshire Local Plan, which seeks to deliver 30,800 new dwellings between 2016 to 2038. Also welcome identification of Market Drayton as a 'Principal Centre' where development is directed.
A0682	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	Not Specified	Not Specified	<p>Support ambition for Shropshire to flourish as identified in draft Policy SP2.</p> <p>Recognise the sustained ambition of Shropshire Council to propose a housing requirement which exceeds local housing need, as calculated using Governments standard method. This recognises economic aspirations for the M54 corridor, will deliver more much needed affordable housing (historically under-delivered) and is supported within the National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG). However, up to date demographic projections suggest a higher level of need than that calculated using Governments standard methodology.</p> <p>Planning for higher levels of housing need is also prudent given significant pressures in the Greater Birmingham/Black Country Housing Market Area (little evidence needs will be met), which has strong relationships to both Shropshire and Shifnal. This will be exacerbated by recent changes to Governments standard methodology which include a 35% uplift in both Birmingham and Wolverhampton, resulting in continued pressure to displace housing demand pressures (including in Shropshire). Opportunity exists to take an even more positive approach in providing for these needs, given the unique position of adjoining housing markets linked by the M54 Corridor. Planning for housing above the proposed housing requirement would further support the delivery of additional affordable housing towards identified needs and mitigate risk that the aspired boost in provision is not achieved.</p> <p>Note proposed approach to keeping availability of land under review, but there is no mechanism to determine how these reviews could impact on proposed policies/how safeguarded land could be considered for development. Such a mechanism would make the plan more robust and ensure ambitions are achieved.</p> <p>Shifnal is identified as a Key Centre and is a sustainable location for development. This is supported by the Hierarchy of Settlements Assessment (HoS) which reviews services/facilities and indicates significant provision of social infrastructure. This provision is also recognised in the Sustainability Appraisal (SA) of the draft Shropshire Local Plan and aligns with the objective to provide health and leisure/recreation facilities in the Shifnal Neighbourhood Plan.</p> <p>Strong evidence of proposed approach to allocating/safeguarding land for housing in Shifnal. Strongly support provision of a large employment site in Shifnal, as a means of sustainably accommodating inward investment, enabling local business to grow and build on advantages of the M54 corridor (regionally and nationally significant growth corridor). However, realistic prospect that housing delivery will be curtailed by the proposed housing requirement in parallel with delivery of this employment allocation. Some displacement of people living in Shifnal but working elsewhere could occur, but enhancement in provision of rail transport services, alongside other factors, is likely to make it challenging to realise this quickly. Creation of jobs will elevate demand for housing, therefore to fully realise opportunities associated with the M54 corridor, greater flexibility regarding advancement of safeguarded land within the proposed Plan period should be provided.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0673	B002	Increase the proposed housing requirement by 3,000 to incorporate up to 4,500 dwellings to support the housing needs of the emerging Black Country Plan. Some 1,500 of this could be met by proposed housing allocations around Shifnal and Bridgnorth, with the addition of up to 3,000 dwellings to be met at Land to the north of Junction 3 of the M54 as part of a new Strategic Settlement (strongly supported by ABCA in previous consultations).	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.	No	SP2. Strategic Approach
A0674	B002	N/A	Noted.	No	SP2. Strategic Approach
A0682	B008	Increase the proposed housing requirement. Include a mechanism which allows easing of policies/bringing forward of safeguarded land where required to supplement supply/realise benefits on the M54 corridor.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Government has recently consulted upon potential changes to the methodology for calculating LHN, including the potential use of the 2018-based sub-national household projections (SNHP). As a result of this consultation Government determined that it was most appropriate to retain the use of the 2014-based SNHP for this calculation. Furthermore, in responding to this Consultation, Shropshire Council indicated its significant concerns regarding the 2018-based SNHP, particularly with regard to their reliance on the 2018-based sub-national population projections (SNPP) which utilised only 2-years of internal migration data in their formulation. Shropshire Council also considers that the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. With regard to the proposed safeguarded land, it is noted that the National Planning Policy Framework (NPPF) states Plans should "make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development". The explanation to draft Policy SP2 outlines potential responses where any issues with the supply or delivery of new dwellings arises, which include such measures as preparation of a Housing Delivery Action Plan or Local Plan Review. With regard to the proposed safeguarded land, it is noted that the National Planning Policy Framework (NPPF) states Plans should "make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development".	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0137	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	No	No	No	<p>The draft Shropshire Local Plan is unsound as it does not include Land at Junction 3 as a strategic site allocation.</p> <p>The only explanation for excluding Land at Junction 3 is that from the Cabinet Report on the 7th December 2020, which stated that in weighing up competing considerations, including the benefits of providing a strategic employment area, there remained insufficient justification to release this land from the Green Belt. Consider there is sufficient justification and exceptional circumstances (note that there is no definition of what constitutes such circumstances, this is down to the judgement of the local authority) for including Land at Junction 3 as a strategic allocation. Key considerations (further detail on these point provided below) are: a.Supporting aspirations of the Shropshire Economic Growth Strategy and West Midlands Combined Authority SEP. b.Supporting the medium- and long-term needs of existing businesses and attract new businesses, particularly in the engineering and manufacturing sector. c.Supporting strategic transport and social infrastructure investment within the M54 Corridor. d.Black Country Unmet Needs (see above). e.Supporting the Role of RAF Cosford. Section 33A of the Planning and Compulsory Purchase Act 2004 ("the 2004 Act") and Paragraphs 24-27 of the National Planning Policy Framework (NPPF) (supplemented by National Planning Practice Guidance (NPPG)) require Local Planning Authorities to undertake a "duty to co-operate". There is a significant unmet housing and employment need arising within the Greater Birmingham and Black Country Housing Market Area (GBBCHMA) and there has not been effective cooperation in meeting this cross-boundary strategic need. As such the decision to not include Land at Junction 3 as a strategic site allocation (to contribute to these unmet needs) and to not engage effectively and on an ongoing basis with the Association of Black Country Authorities (ABCA) has resulted in a strategy which is not positively prepared or justified. As such, the duty to co-operate has not yet been fully complied with.</p> <p>-The core proposal for Land at Junction 3 has been consistently promoted throughout the Local Plan process. This is a highly sustainable, vibrant and high-quality designed new community capable of accommodating a strategic employment area of up to 50ha (to accommodate enterprises of a range of scales anchored by a training and skills hub), a strategic housing site for approx. 3,000 homes (across 4 well related neighbourhoods) and a comprehensive range of supporting facilities and services (including shops, community buildings, medical centre, 2 primary schools and a secondary school), embedded within a wealth of green infrastructure (over 400ha, including a 60ha Country Park, public parks, play areas, formal sport provision and an extensive informal recreation network). An initial illustrative Masterplan (appended to the representation) was prepared, informed by assessments of key constraints and opportunities, including a high-level market analysis. Site viability was also confirmed (although the strategic employment area was reliant on the wider proposals).</p> <p>-Land at Junction 3 was identified as a 'potential strategic site' within the Regulation 18 Strategic Sites Consultation, within which it was recognised as a "once in a generation opportunity to meet cross-boundary needs, through delivery of nationally significant employment opportunities, high quality housing and a local centre to provide services, facilities and infrastructure as part of a planned new settlement within an important strategic corridor." In response to this consultation, the Association of Black Country Authorities (ABCA) strongly supported the allocation of Land at Junction 3.</p> <p>-Proposals for Land at Junction 3 were refined in 2020 in response to changing economic circumstances and a more detailed market analysis (appended to this representation), which illustrated a clear need for additional employment land of a sufficient scale to meet demand for B2/B8 uses and identified a strong case to extend the strategic employment area. The strategic employment area (always fundamental) is now considered vital to support economic recovery and Government Policy, particularly given the acknowledged critical undersupply of strategic employment sites in the region. An updated Illustrative Masterplan (appended to the representation) was therefore prepared. Refined proposals for the strategic employment area mean it could be expanded to 75ha (same overall site boundary with around 500 less dwellings but same range of on-site facilities); could accommodate an education campus linked to Wolverhampton University; is viable in and of itself; and can occur either in advance or without any associated residential development (no cross-subsidy required). The updated Illustrative Masterplan also illustrates a potential location for a solar farm north of the site, as an integral part of the zero carbon strategy for Land at Junction 3.</p> <p>-The updated Illustrative Masterplan and emerging proposals for Junction 3 can evolve/respond to engagement with the local community and stakeholders. A comprehensive Masterplan could be prepared for the site and adopted by Shropshire Council. The comprehensive Masterplan and development would need to comply with any site guidelines.</p> <p>-The benefits of a strategic employment area Land at Junction 3 include 6,000-9,100 jobs; greater accessibility to jobs, reducing out-commuting for those living in the area (and leaving service at RAF Cosford); £290m - £440m GVA per annum into the economy; £4.5m additional business rates; an education campus focussing on re/up-skilling, benefitting employees and firms, forming part of the wider educational network in the area and promoting employment growth linked to engineering and aeronautical focus of RAF Cosford; supporting sustainable transport improvements in the Strategic Transport Corridor (including business case for rail improvements complementing other planned improvements such as M6/M6 toll link, West Midlands Rail Freight Interchange, Birmingham-Shrewsbury Rail Improvements; HS2 and metro line extensions); an embedded net zero carbon strategy (through a combination of efficiency, solar generation, heat pumps, electric vehicles and energy storage); net Environmental Gain; new public transport, pedestrian and cycle links (integrating into existing networks); a safeguarded green buffer to Tong Village; and compensatory improvements to the Green Belt.</p> <p>-The additional benefits of also delivering the residential development at Land at Junction 3 include: 510ha of open space; enhanced formal and informal recreation; new and enhanced bus routes (also service other communities) linked to nearby railway stations; affordable and lifetime homes; and self-containment with opportunities to live close to employment opportunities and new community facilities (education, healthcare, local food hub etc), with associated employment opportunities and reducing impact on surrounding road networks.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0137	B001	<p>Increase the housing and employment requirements to accommodate more unmet needs arising in the Greater Birmingham and Black Country Housing Market Area (GBBCHMA) - to at least 4,500 dwellings and at least 90ha employment land.</p> <p>Remove Land at Junction 3 from the Green Belt (370ha) and include it as a strategic settlement to achieve the additional cross-boundary housing and employment need (3,000 dwellings and 75ha employment land). The remaining 1,500 dwellings and 15ha of employment land could be accommodated on non-strategic sites at Bridgnorth and Shifnal.</p> <p>Land at Junction 3 also offers significant wider benefits as documented within the representation.</p> <p>To reflect this, appropriate changes should be made to draft Policy SP2, draft Schedule SP2.1; and paragraphs 3.7 and 3.18 of the proposed Explanation to draft Policy SP2. A new Policy (suggest reference S22) should also be included for the Strategic Settlement: Land to the north of Junction 3. The representation documents these suggested changes and provides an example of suggested new Policy S22.</p>	<p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.</p> <p>Proposed allocations within the draft Shropshire Local Plan have been informed by an robust and proportionate site assessment process, which explains why sites are or are not proposed for allocation.</p>	No	SP2. Strategic Approach

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0137	B001 Cont'd						<p>Proposals are supported by location plans, masterplans, and technical assessments including on employment needs, housing and employment needs, development principals, green infrastructure, green belt, archaeology, ecology, transport/updated transport, flood risk and surface water drainage, land quality, utilities, heritage, and landscape and visual (appended to this representation). They confirm there are no 'in principle' constraints and demonstrate how Land at Junction 3 could be delivered, based on best practice, achieve a sensitive design and mitigate any negative impacts. Transport proposals (including active travel and sustainable transport links) ensure sustainable development is achieved for either the residential and employment proposal or stand-alone employment proposal.</p> <p>-Proposals have also been informed by engagement with the Council, local community and key stakeholder - committed to this continuing.</p> <p>-A site specific Green Belt assessment has been undertaken for Land at Junction 3 (appended to this representation), using the same methodology as that for the Local Plan Review. This concludes parcels of land proposed for removal from the Green Belt would result in low-moderate or moderate harm to the Green Belt; land at Junction 3 has clearly defined and strong Green Belt boundaries to north (A5), east (A41), south (M54) and west (existing and proposed roads/hedgerows); and highlights where remaining Green Belt land would present an opportunities for compensatory improvements.</p> <p>-Consider commercial rental values and yields identified within the Viability Assessment undertaken to inform the draft Shropshire Local Plan are overly optimistic. Assumptions for strategic sites should also be treated differently from 'typical' sites to reflect higher risk, scale and timescales. An initial, high level viability appraisal, undertaken for Land at Junction 3, confirms an employment-led mixed-use scheme and associated community facilities/infrastructure is viable without any Council funding, allowing them to focus on applying the economic and revenue benefits secured. Discussions have also occurred with Home England who indicated they would in principle provide loan support to assist in accelerating delivery (although only if residential is included).</p> <p>-RAF Cosford is in proximity Land at Junction 3, which presents a potential to complement its employment growth and link to the increased focus of the base as the RAF's centre for engineering and aeronautical training. To date, many high-skilled individuals leaving the RAF relocate out of the area because of lack of appropriate private sector opportunities. Land at Junction 3 would present an opportunity to retain these individuals. The base would also benefit from sustainable transport measures linked to Land at Junction 3.</p> <p>-Land at Junction 3 is in a single ownership with a committed landowner. Intention would be early commencement of the strategic employment area, associated services and housing with options to phase over time.</p> <p>-The Shropshire Economic Growth Strategy seeks to deliver a step change in capacity/productivity of the local economy and to focus on strategic corridors, which are widely recognised as key drivers for economic growth. The M54 is one such corridor.</p> <p>-The M54 Growth Corridor – Strategic Options Study undertaken to inform the draft Shropshire Local Plan identifies the M54 as a key strategic gateway for both Shropshire and neighbouring local authorities and as such a key growth Corridor for employment and residential development. The Study considers the M54 ripe for investment to provide 'fit for purpose' employment land that meets the needs of the modern occupier and responds to market demand, which will assist in diversifying the economy and attracting higher value sectors that drive economic productivity and retain talent in the Country. It also identifies Land at Junction 3 as a potential priority location for employment and residential development.</p> <p>-The Employment Land Review undertaken to inform the draft Shropshire Local Plan divides employment land opportunities into three categories (strategic, significant local and other local). Strategic employment opportunities include at Shrewsbury and/or nodes on strategic corridors. Proposed allocations in the Plan in the east of the County at Shifnal, Albrighton, Bridgnorth and Ironbridge are not located in such key locations with direct access/visibility from strategic corridors (commercial analysis of employment land appended to representation). In comparison Land at Junction 3 benefits from direct access onto Junction 3 of the M54 at the heart of this strategic corridor (the strategic employment area is capable of expanding to 75ha).</p> <p>-Aware of several employers with large-scale requirements along the M54 corridor, which could not be accommodated at Shifnal, Albrighton, Bridgnorth or Ironbridge.</p> <p>-Furthermore the Strategic Economic Plan (SEP) and Local Industrial Strategy for the West Midlands Combined Authority also outline ambitious plans for growth in the region.</p> <p>-The Economic Development Needs Assessment (EDNA) undertaken to inform the draft Shropshire Local Plan indicates a quantitative need for between 164 and 264ha of employment land (including 30ha contribution to unmet need arising in the Black Country) over the proposed Local Plan period, with a 30% office to 70% industrial/distribution split. This assumes all undeveloped employment allocations/commitments come forward. As the existing supply in Shropshire is some 276ha and the proposed Plan target is 300ha, headroom could be attributed to further meeting unmet cross-boundary need arising in the Black Country, particularly given the scale of this unmet need.</p> <p>-National Planning Practice Guidance (NPPG) explains employment requirements in Plan's must consider both quantitative and qualitative needs for all foreseeable types of economic activity over the Plan period (as confirmed within the EDNA). Qualitative factors for Shropshire include: significant and increasing demand for advanced industrial/logistics premises in locations with good access to the M54 (the EDNA acknowledges demand for upper end 'Mid Box' scale (30,000sq.ft – 100,000sq.ft) industrial units which is likely greater in areas with good connections to the A5 and M54 (positively impacted by demands from rapid recent growth of e-</p>
A0137	B001 Further Cont'd						<p>However an Employment Needs Assessment (appended to this representation) commissioned to inform Land at Junction 3 considers this is because of no readily available supply of suitably located, high quality stock. It also considers high demand exists in Shropshire and the wider West Midlands from logistics and manufacturing sectors (Grade A quality), but only a very limited supply (1.64 years including 1/3 Grades B/C) is available); significant undersupply of good quality, larger stock available in the east of Shropshire, and the wider West Midlands to cater for this demand (the EDNA found modern stock largely catered to smaller occupiers/trade counters and much of the existing larger stock is dated and in need of refurbishment to meet requirements of modern occupiers. The West Midlands Strategic Employment Sites Study defines 'strategic sites' as at least 25ha and confirms a severe lack of such sites, the West Midlands Land Commission found a similar shortfall, and the Secretary of State decision on the West Midlands Rail Freight Interchange found a significant level of need for additional logistics floorspace in the region and strong market demand and shortage in the supply of large warehouse buildings and sites); and the subsequent consequences in not meeting the growth aspirations of the Shropshire Economic Growth Strategy and the West Midlands SEP (the EDNA concluded there was a lack of 'over ready' employment land despite market demand risking those seeking premises locating elsewhere).</p> <p>-Unmet employment need arising in the Black Country is estimated at between 287ha and 565ha, this is for large scale hi-tech manufacturing and national and regional distribution centres that have very specific location criteria, requiring close links to the strategic highway network (this also minimises congestion and environmental nuisance). Ideal locations are therefore at motorway and major A road nodal junctions, as identified in the Council's EDNA and Employment Land Review. No Local Authorities have committed to making contributions to this unmet need, therefore if this unmet need is to be reduced, reliable and timely action must be taken. Proposed employment land around Shifnal and Bridgnorth are not of sufficient scale/appropriately located to contribute meaningfully (see commercial analysis appended to representation) and a 30ha contribution is too small. Locations alternative to Land at Junction 3 on the M6, M54 and A roads are extremely limited and constrained. With these constraints it is unclear how these industrial sectors, central to the concept of the 'Midlands Engine', can expand and they may relocate, possibly out of the UK (associated implications for supply chains, investment and employment).</p> <p>-Unmet housing need arising in for the wider Greater Birmingham and Black Country Housing Market Area (GBBCHNA) is also very significant. Birmingham and the Black Country Authorities combined have an annual unmet need of approximately 3,277dpa. This needs to be comprehensively addressed, ideally as soon (rather than deferred in order to boost the supply of housing) and close to the source as possible (greater distances can be justified where there are good transport links). It is therefore necessary to look at surrounding 'doughnut' authorities (complicated by unmet need in Coventry of 1,243dpa although Local Housing Need has increased for Coventry, so it may be higher) as some authorities adjoining both, there capacity needs to be shared. Estimate these 'doughnut' authorities can accommodate between 611dpa and 722dpa of the 3,277dpa unmet need (less than a quarter). There may be an expectation for these authorities to accommodate more when Plans are next reviewed and efficiencies gained through better use of brownfield/change of use of land, a significant shortfall will remain. Therefore it is crucial that the net is cast wider, particularly in terms of areas with the best transport links with Birmingham and the Black Country. East is unrealistic due to other unmet need (Coventry, Derby and Leicester); South is the AONB and pressure associated with Cambridge/Oxford; north is Stoke-on-Trent, which has seen its local housing need increase from 500dpa to 684dpa and the city is surrounded by Green Belt that may cause constraints. In between is Stafford which may have potential but is only at an early stage in its Local Plan Review. To the west is Shropshire proposing only a modest 83dpa (1,500 total) contribution. Given Shropshire is the fourth largest local authority by area in England, has land closer to Wolverhampton than much of Lichfield is to Walsall and benefits from both direct motorway and train links, this contribution is paltry. Green Belt cannot be considered a good reason for this, South Staffordshire and Lichfield are both much smaller authorities but covered by the Green Belt to a far greater extent, yet are offering to accommodate more unmet need.</p> <p>-All reasonable options for meeting the Black Country needs have been examined (brownfield/under-utilised land has been maximised; Black Country Green Belt capacity considered; and discussions have occurred with neighbouring authorities. Given the scale of the unmet needs of the Black Country; size of Shropshire relative to neighbours; and lack of readily identifiable, suitable, reliable and deliverable alternatives, Land at Junction 3 could be of major significance in helping satisfy this unmet need and fulfilling the aims of various economic strategies/plans. Land at Junction 3 is a sustainable, attractive and appropriate option for meeting Black Country and wider West Midlands needs because it offers access to an unconstrained M54 junction within a Strategic Growth Corridor; a different yet still attractive market location; comprehensive development co-locating housing and employment; and a diverse and distinctive offer (mixed uses, a full spectrum of scale, including grow-on space, embedded skills and training, plus the potential benefits of living and working within the same development). On this basis, recommend Shropshire increases its housing and employment requirements to accommodate more unmet needs arising in the Black Country - at least 4,500 dwellings and at least 90ha employment land. This additional provision plus 15ha of the existing employment offer (3,000 dwellings and 75ha employment land total) can be accommodated on Land at Junction 3 (complemented by 1,500 dwellings on residential allocations and 15ha of employment land on non-strategic sites at Bridgnorth and Shifnal).</p>

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0410	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	No	No	No	<p>Little sense of the Climate Emergency declared by the Council within the draft Shropshire Local Plan. The Council's recently prepared Corporate Climate Strategy is not available on the evidence base webpage, this indicates the Council's intention to lead by example and identifies a key objective of reducing Shropshire Council's greenhouse gas emissions to net carbon zero by 2030, necessary urgency to achieve this not contained in the draft Shropshire Local Plan. Shropshire Council was also one of the founders of the Shropshire Climate Action Partnership (SCAP) that prepared a Zero Carbon Shropshire (ZCS) Plan. This identifies 45% of Shropshire's carbon footprint is associated with people's everyday activities being at home, work and travelling and a further 46% is associated with imported goods, therefore every effort should be made to minimise the increase in the number of buildings as long as they are not carbon neutral/negative.</p> <p>-The proposed housing requirement (30,800 dwellings) in draft Policy SP2 is significantly more than the minimum Local Housing Need (LHN) calculated using Government's standard methodology (30,800 compared with 25,894) - table and graph provided within the representation illustrating the components of LHN and the proposed housing requirement, in summary 12,490 dwellings to accommodate population L1390increase, 8,256 dwellings to accommodate changes in household size (surprisingly large due to changes (2.5% reduction in size) applying to all of the population, rather than just the new population), 5,148 dwellings for the affordability uplift (that this will make housing more affordable is widely considered misguided, the Letwin Review indicates house builders will continue to "drip-feed" houses to the market because it is not in their interests to cause a reduction in the price of their product), 1,500 dwellings to meet unmet needs arising in the Black Country, and 3,406 dwellings for Shropshire Council aspirations. 30,800 dwellings are proposed for a population increase of 28,380 people. Consider the high figure is not justified by proportionate or robust evidence. Also, taking account of the climate emergency and associated ecological emergency (overriding considerations), growth/exploitation of resources should be optimised (kept to a minimum level consistent with other needs) not maximised. Therefore balance of evidence justifies building no more than the absolute minimum number of dwellings required by Government.</p> <p>-The proposed employment land requirement (300ha) in draft Policy SP2 is unreasonably high, based on questionable data/not justified by proportionate evidence and are inconsistent (other data/internally). Partly founded on the aim of the Economic Growth Strategy to 'maximise our economic potential', this is contrary to climate change goals. The preferred strategy is balanced growth, this is a sensible aim, but the calculation of employment land required is overstated (representation outlines calculation detailed in the Preferred Scale and Distribution of Development consultation document, in summary 1 job per household, 42.25sq.m per job, 10,000 sq.m per ha and workspace equates to 40% of the overall site). Proposed employment guidelines for many settlements in previous stages of consultation on the Local Plan Review and the draft Shropshire Local Plan reflect this calculation, although those for Bridgnorth (subsequently further increased) and Shifnal were increased to take account of largely unspecified 'local circumstances'. Guideline for some other settlements have also subsequently been 'tweaked' beyond this equation of balance, most notably Shrewsbury, Oswestry, Market Drayton and Craven Arms. Query whether proportionate evidence is available to justify all these figures.</p> <p>Two main queries with the calculation of employment land are whether an appropriately justified employment density has been adopted (a major aim of the Shropshire Economic Growth Strategy is increased productivity (improving median earnings, entailing higher-skilled jobs), this is at odds with the assumption that each job requires 42.25sq.m as this includes 25% as warehouse style jobs. Further, within the Council's evidence/Local Plan process, alternative and more productive employment densities have been applied, for instance the Oxford Economic Forecasts (underpin the Economic Growth Strategy) apply a 31sq.m job density), and whether each new dwelling is likely to require a new job (not all occupants of new houses will have jobs which require employment land, some occupants will already have jobs, many occupants will be beyond working age and not all jobs require dedicated employment sites. It therefore seems likely that each house will produce less than one job requiring employment land. This inevitably ought to decrease the calculation of the requirement for employment land). Alternative calculation of employment land using a job density of 31sq.m and allowing for households formed as a result of population change, half of houses resulting from the affordability ratio adjustment (much if not all of this is already within the workforce) unmet cross boundary need and Council aspirations results in a need for 155ha, around 52% of the proposed employment land requirement.</p>
A0410	B004 Cont'd						<p>There are also two inconsistencies in the employment figures, these are the Economic Development Needs Assessment (EDNA) identifies an employment land need for between 132ha and 234ha, this is a long way short of the stated employment land requirement of 300ha, and the guidelines for individual settlements total some 375ha, wholly inconsistent with the 300ha employment land requirement.</p> <p>-Proposed housing and employment land requirements in draft Policy SP2 include 1,500 dwellings and 30ha of employment land towards unmet cross-boundary need arising within the Association of Black Country Authorities (ABCA) area. However there is no statement of common ground (SoCG) between Shropshire and ABCA and such discussions should not occur in isolation from other local authorities in the West Midland Combined Authority (WMCA) area - a joint SoCG should be prepared. Shropshire should not be expected to take unmet need disproportionate to its geographical distance from ABCA/presence of Green Belt, nor disproportionate to what other local authorities are accepting. Given lack of such evidence to justify accepting ABCA need and also because of the current stage of the ABCA plan, consider it is premature for Shropshire Council to accept any unmet need from ABCA.</p> <p>-Evidence to inform identification of proposed Community Hubs provided within the Hierarchy of Settlements Assessment (HoS). The scoring system in the HoS is overly simplistic, attributing the same scores to towns and villages for services/facilities where towns have them to a much greater degree (particularly libraries (permanent library and library bus once a fortnight), public transport (rudimentary services versus extensive services/bus stations), employment (limited versus extensive)). This may be addressed with a more nuanced scoring system and relative scores amongst villages would produce a similar hierarchy. The scoring system in the HoS also fails to give any special weight to more important services/facilities (school or bus service). This is a more fundamental question as to whether proposed Community Hubs are truly sustainable (valid argument that building in rural locations is fundamentally less sustainable than urban locations). The HoS indicates some of the proposed Community Hubs do not satisfy the Council's definition of what facilities a Community Hub should have (table provided in representation demonstrates some proposed Community Hubs do not have schools, any public transport or employment opportunities - in reality, most living in villages commute elsewhere for employment, one reason why rural villages are unsustainable locations for further development, however, lack of a school and public transport indicates a further level of unsustainability). Balance of evidence indicates some of the proposed Community Hub do not satisfy the Council's definition of sustainability/objective definition of sustainability. These are Ditton Priors, Cross Houses, Woore/Irelands Cross, and Knockin. There is also doubt about Clun, Hinstock, Cosford, and Trefonen.</p> <p>Table summarising housing and employment supply by category and settlement provided within representation. Appendix 5 should include a total of the housing land supply. Appendix 6 should include a total of the employment land supply and does not include the settlement guidelines.</p>
A0014	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	Not Specified	Not Specified	Welcome inclusion of a specific Climate Change policy. However, consider it needs to be much stronger. For example, "Climate Emergency" would be a better policy title reflecting Shropshire Council's declaration.
A0014	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3(1e)	Not Specified	Not Specified	Not Specified	In para 1e, amend encourage to ensure.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0410	B004	<p>Reduce the housing requirement in draft Policy SP2 from 30,800 to no more than Government's minimum requirement of 25,894 dwellings.</p> <p>Reduce the employment land requirement in draft Policy SP2 from around 300ha to the lower end of the Economic Development Needs Assessment (EDNA) range of 132ha to 234ha. Own figure is around 155ha.</p> <p>Amend employment land guidelines for settlements in draft Policies S1-S21 so they total the overall employment land requirement.</p> <p>Amend Appendix 6 into the same format as Appendix 5. Both should show totals.</p> <p>Contributions (under the duty to cooperate) to unmet cross boundary need arising within the Black Country (1,500 dwellings and up to 30ha of employment land) should be removed until such time as the Black Country Plan is mature and Shropshire's proposed share of unmet need arising in the Black Country can be justifiably evidenced to be proportionate to local authorities with a closer functional relationship to the Black Country.</p> <p>Ditton Priors, Cross Houses, Woore/Irelands Cross, and Knockin should be removed from the list of Community Hubs in Schedule SP2.2.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>The proposed employment land requirement seeks to support the achievement of the aspirations of the Economic Growth Strategy for Shropshire through the provision of sufficient appropriately located land to deliver high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable and also responds to key quantitative and qualitative evidence including that within the Economic Development Needs Assessments (EDNA), Employment Land Review (ELR) and Authority Monitoring Report (AMR) undertaken to inform the draft Shropshire Local Plan. With regard to this evidence, we would note that calculations of the employment land requirement are based on the national assumption that employment land when developed, delivers 40% net floorspace from the gross land area, and that new employment is generated on that basis. However, available evidence suggests that employment land when developed, delivers on average 25% net floorspace in Shropshire. This has been given careful consideration when determining an appropriate employment land requirement. Furthermore, we would also note that the proposed employment land requirement actually represents a reduction to that within the adopted Local Plan (whilst the housing requirement has actually increased). The proposed employment land requirement incorporates up to 30ha of employment land to support the employment needs of the emerging Black Country Plan.</p> <p>In order to achieve the proposed employment land requirement, respond to the wider range of employment uses and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement. It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038.</p> <p>Shropshire Council has undertaken proactive discussions with Local Authorities in neighbouring areas, under the duty to cooperate. These discussions have led to the proposed contribution of some 1,500 dwellings and 30ha of employment land to meet unmet cross-boundary need arising within the Black Country. It is considered appropriate to complete Statements of Common Ground with these Local Authorities informed by the content of the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>The proposed employment land guidelines for settlements provide appropriate choice and competition within the market, recognise the role of larger settlements as the focus for growth supporting their surrounding hinterland, and also respond to specific circumstances and opportunities that exist within settlements. The strategies for each settlement and the existing and proposed allocations identified to contribute towards achieving these proposed development strategies are considered appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>Appendices 5 and 6 of the draft Shropshire Local Plan are considered appropriate for presenting information on housing and employment land supply. It is perhaps inevitable that they vary given they present information on different issues. For clarity a minor amendment is proposed to remove reference to employment development guidelines in relation to Appendix 6.</p> <p>Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire. Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent.</p>	Yes	SP2. Strategic Approach
A0410	B004 Cont'd				SP2. Strategic Approach
A0014	B011	Amend name of draft Policy SP3 to Climate Emergency.	The name of draft Policy SP3 is considered to appropriately reflect its subject matter.	No	SP3. Climate Change
A0014	B012	In para 1e of draft Policy SP3, amend encourage to ensure.	The proposed change would impose an unreasonable requirement given that the rural nature of Shropshire means that not all new development will be able to link to or integrate with public transport.	No	SP3. Climate Change

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0014	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3(1f)	Not Specified	Not Specified	Not Specified	In para 1f, wording is weak as electric charging infrastructure should be provided in all new development.
A0014	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3(2a)	Not Specified	Not Specified	Not Specified	In para 2a, more clarity is needed on what is meant by renewable and low carbon energy systems.
A0014	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3(3a)	Not Specified	Not Specified	Not Specified	In para 3a, wording is weak. There should be more than 'encouragement'.
A0014	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3(3b)	Not Specified	Not Specified	Not Specified	In para 3b, there should be a requirement to restore habitats with potential for significant carbon sequestration and storage, including wetlands, peatland, and soils.
A0014	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3(4c)	Not Specified	Not Specified	Not Specified	In para 4c, "supporting" should be replaced with "requiring", as per Biodiversity Net Gain as a minimum.
A0072	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	Not Specified	Not Specified	Not Specified	More focus should be on energy efficiency of, and energy production in new homes
A0123	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	No	No	Yes	Imperative safe and suitable pedestrian access is maintained between Oxon Hall caravan park and Shrewsbury Town Centre (over the North West Relief Road and through the Shrewsbury Sustainable Urban Extension (SUE) West), to enhance visitor experience, promote visitor spend in the town centre and have a positive impact on climate change. This appears to be supported in the draft Shropshire Local Plan, which is welcomed and look forward to their application in relation to the above development proposals.
A0131	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	Not Specified	Not Specified	We note that Policy SP3 – Climate Change – refers to supporting of renewable and low carbon. We are satisfied with this approach should renewable energy come forward with the potential to impact the setting of the Clwydian Range and Dee Valley AONB. NRW should be consulted should any such schemes come forward.
A0148	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	Not Specified	Not Specified	Support the encouragement for the use of electric and hybrid vehicles but consider this should be secured through a national standardised approach implemented through the Building Regulations. This will ensure a consistent approach to future proofing the housing stock. The inclusion of EVCP requirements within the Building Regulations 2010 will introduce a standardised consistent approach to EVCPs in new buildings across the country. The requirements proposed apply to car parking spaces in or adjacent to buildings and considered a proposal for one charge point per dwelling rather than per parking space. L&Q Estates endorses the Council's requirement for development to support the transition to a zero-carbon economy and considers that its land interests at Shifnal would look to support this transition to a zero-carbon economy.
A0347	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	No	No	Not Specified	1. Paragraph 4. Should include "by avoiding inappropriate development in fluvial flood risk areas". 2. General. Your plan appears centred around increasing growth and economic productivity....in line with our strategic climate change objectives and move towards net zero carbon, your Council's declaration and SA objective, we would encourage you to ensure all growth and related transport options are sustainable in the long term with emphasis on addressing the effects of climate change too. 3. Paragraph 4 d. Support. Integrating water efficiency measures to mitigate the impact of drought and reduce resource and associated energy consumption. Whether it needs to link to policy DP20; and/or refer to the expected higher levels of water efficiency standards here? (Noting future likely 'serious water stress' in Shropshire) – see DP20 comments.
A0349	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	Not Specified	Not Specified	Climate Change Natural England supports this strategic policy for tackling climate change. All 4 parts of the policy are strongly supported by Natural England. Natural
A0357	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Yes	Yes	Not Specified	Support draft Policy SP3 and particularly welcome sections 1a and 1e which seek to reduce carbon emissions by encouraging new development to link to and where possible integrate public transport. Proposed allocation ALB017 helps support this by providing residential development within easy walking distance of a good railway service on the Shrewsbury-Wolverhampton line. Concerned about how section 2a of draft Policy SP3 is applied through draft Policy DP11. Support renewable and low carbon energy systems, but technologies required should be appropriate to Shropshire. Policy DP11(d) seeks to maximise use of district heating and cooling systems on relatively modest sites, which is impracticable, unjustified and unviable.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0014	B013	In para 1f of draft Policy SP3, amend wording to require electric charging infrastructure in all new development.	It is considered that the current wording is appropriate. The provision of electric vehicle infrastructure is covered by Building Regulations rather than the planning regime. No change proposed.	No	SP3. Climate Change
A0014	B014	Provide clarification of renewable and low carbon energy systems within para 2a of draft Policy SP3.	Noted. The Annex 2: Glossary of the NPPF provides a useful summary of these terms. Further details of requirements relating to renewable energy and low carbon energy requirements is available within draft Policy DP11. Minimising Carbon Emissions.	No	SP3. Climate Change
A0014	B015	Strengthen requirements of para 3a of draft Policy SP3.	The Council considers that the current wording is consistent with current national policy. No change proposed.	No	SP3. Climate Change
A0014	B016	In para 3b of draft Policy SP3, require restoration of habitats with potential for significant carbon sequestration and storage.	The draft Shropshire Local Plan identifies a vision and framework for the future development of Shropshire to 2038, however it does not and cannot manage all existing land uses. Therefore whilst it can positively promote/encourage opportunities to restore wetlands as part of the development process, it cannot require their restoration. No change proposed.	No	SP3. Climate Change
A0014	B017	In para 4c of draft Policy SP3, amend wording to require an increase in the extent, interconnectedness and diversity of wildlife habitats and the ecosystem services which they provide.	The concept of biodiversity net gain is already captured in draft Policy DP12. The Natural Environment. Para 4c of draft Policy SP3 sets the context for this policy requirement. No change proposed.	No	SP3. Climate Change
A0072	B001	The policies in the document could be strengthened by the adoption and inclusion of the Merton Rule (requiring new developments to generate at least 10% of their energy needs from on-site renewable sources). The risk of fuel poverty could be reduced and fewer carbon emissions could be achieved by increasing the standard of insulation in new homes. Such policies would be progressive.	Policy DP11 includes a requirement for new development to provide a minimum of 10% of the predicted energy needs of the development from on-site renewable and low carbon energy sources. No change proposed.	No	SP3. Climate Change
A0123	B006	N/A	Noted.	No	SP3. Climate Change
A0131	B002	None specified	Support welcomed.	No	SP3. Climate Change
A0148	B003	The requirement for EVCPs should be deleted given the Government's proposed changes to Building Regulations are still at the consultation stage and therefore have not been finalised.	The policy encourages new electric vehicle infrastructure rather than requires it ( in recognition of the role of Building Regulations in this area). As such the phrasing of the policy is considered appropriate. No change proposed.	No	SP3. Climate Change
A0347	B015	n/a	1. Minor modification proposed to accommodate the point being made 2. Noted. No change proposed. The Local Plan sets out the Council's strategy for the delivery of the objectively assessed housing need and employment requirement. It has been subject to Sustainability Appraisal which assesses policies and site allocations against a range of sustainability objectives, including those designed to minimise, mitigate and adapt to climate change. 3. Support welcomed. Amendment to cross refer to Policy DP20 proposed	Yes	SP3. Climate Change
A0349	B007	n/a	Support welcomed.	No	SP3. Climate Change
A0357	B002	N/A	Comments in respect of Policy SP3 are noted	No	SP3. Climate Change

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0393	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	<p>Welcome inclusion of a specific Climate Change policy but needs to be much stronger &amp; should be named 'Climate Emergency'. Paras 1a-g in SP3 are at variance with other statements &amp; established policies and track record of Shropshire Council that damage public transport and active travel including: rejection of default 20mph zones (at Council in Dec 2019) despite evidence re the effectiveness in increasing walking and cycling and reducing transport's carbon emissions; reductions in bus funding ; demolition of Shrewsbury bus station contrary to the central principle of sustainable transport which is integration, achieved by close location of train &amp; bus stations to encourage bus and train use in combination and this combination; refusal to develop a Cycling and Walking Infrastructure Plan. Statements in SP3 at variance with Shropshire Council neglect and damage to walking, cycling and public transport and nothing in the Local Plan that demonstrates a reversal of these policies.</p> <p>Re para 1 a Local Plan does not give substance to the aspiration of "maximising the ability to make trips by sustainable modes of transport" which requires interventions e.g. those available under Bus Services Act (2017) ( such as those used by Cornwall County Council's bus strategy) to produce substantial increases in walking, cycling and bus use &amp; and there is nothing in the Local Plan to indicate that this will be done in the plan period. The text makes nothing compulsory but and the words 'encourage' and 'where possible' and 'promoting' are meaningless unless enforceable and enforced.</p> <p>Policy aspirations call into question traffic figures used in the outline business plan for the proposed Shrewsbury North West Relief Road. These need review in the light of the COVID pandemic and the climate emergency.</p> <p>Para 3.31 The Strategy framework is not a strategy but an outline of how the strategy will be developed. The Local Plan needs to reference the council's Climate Change Strategy or more appropriately, as this document only refers to Shropshire Council's emissions, the Zero Carbon Shropshire Plan produced through the Shropshire Climate Action Partnership of which Shropshire Council is a contributor. This addresses the totality of direct and indirect emissions &amp; in the absence of an up to date transport plan could provide some of the headline figures of how transport (and by implication spatial planning) needs to change. The implications of this policy have not been followed through into the traffic forecasts that are used in the outline business case for the NWRR. Support for active travel ( para 1d ) is not linked to adoption of EVs or ULEVs. Driving a car is a sedentary activity &amp; car ownership increases car use and reduces walking, cycling and bus use. If people drive rather than walking or cycling, they do not meet public health targets for physical activity with resulting elevated disease risk. The local plan includes nothing to stimulate or promote non-car alternatives including infrastructure to support walk, cycle and bus use such as: excellent segregated cycle paths, joined-up networks to link housing with schools / commonly used destinations. These requirements are not supported or funded in Shropshire&amp; there has been a refusal by Shropshire Council to adopt 20mph contrary to WHO advice in the Stockholm declaration that this increases active travel and modal shift away from cars and towards walking, cycling and bus use. It highlights that appropriate speed management to address environmental &amp; safety issues is important.</p> <p>Wholesale adoption of Electric vehicles on its own, without significant traffic reduction, is not enough to meet net zero targets &amp; the significance of transport and climate change is a major weakness of the climate change sections of the Local Plan as highlighted in the recent Lyn Sloman report for at Transport for Quality of Life.</p> <p>A completely new section should be included in the Local Plan explaining why we must reduce traffic levels (e.g. a 25% reduction in vehicle kms travelled in Shropshire). This is well understood and be found in UK government reports but is not mentioned in the Local Plan.</p>
A0410	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	No	No	Not Specified	<p>The climate emergency and associated ecological emergency (overriding considerations) mean growth/exploitation of resources should be optimised (kept to a minimum level consistent with other needs) not maximised. This is corroborated by planning legislation and policy (Section 19 of the 2004 Planning and Compulsory Purchase Act (as amended) and paras 148-149 of the National Planning Policy Framework (NPPF)).</p> <p>The draft Shropshire Local Plan is required to demonstrate how policies are in line with legally binding carbon emission reduction targets in the Climate Change Act. It should take into account baseline emissions; robustly evaluate future emissions (all sources taking into account requirements in national legislation) and a range of development scenarios; and adopt proactive strategies to mitigate carbon emissions in line with the Climate Change Act (100% reduction by 2050).</p> <p>To be sound in relation to Climate Change policy, the draft Shropshire Local Plan/evidence base should set out a carbon budget for the whole Shropshire Council area (consistent with the updated Climate Change Act), and a strategy as to how to achieve it.</p> <p>Draft policies should aim to radically reduce carbon emissions in line with a trajectory for the Plan consistent with the UK achieving full carbon neutrality by 2050 and in the short term should test policy options available to achieve the highest level of ambition possible to meet this goal. To the greatest extent possible, all new development should be zero carbon given that the country's net zero target must be met in the next 30 years. This has not been done within the Draft Shropshire Local Plan.</p> <p>References to reducing carbon emissions are general rather than objectively measurable as required, this is not legally sound in terms of climate change mitigation policies and duties.</p> <p>Para 3.29 of the explanation to draft Policy relates to climate change and the need to minimise carbon emissions, but draft Policies do not bear out the sense of urgency identified.</p> <p>Para 1a of draft Policy SP3 relates to minimising the need to travel/maximising ability to travel by sustainable modes, this is weak to the point of being unsound because no sense of how much this will contribute to reducing emissions; large part of development proposed for rural settlements which rely on the private motor car for transport; and no integrated active travel plan to promote sustainable modes of transport/make them the dominant form of transport is available.</p> <p>Para 1g of draft Policy SP3 promote fabric energy efficiency retrofits of existing buildings. This is constructive as a general, high level statement, but aims should be reflected in draft Policy DP23 (main policy covering numerous listed buildings in Shropshire).</p> <p>Para 2d of draft Policy SP3 supports community energy proposals, but this is not taken up or elaborated upon in draft Policy DP26.</p> <p>Para 3 of draft Policy SP3 is about maximising carbon sequestration, but this could be better integrated into draft Policies DP14 and DP16, neither of which make any further mention of sequestration.</p> <p>Para 4 of draft Policy SP3 makes good mention of climate change adaptation, but would benefit from more detail on how new development is to integrate climate adaptation measures (draft Policy DP14 does however cross refer to draft Policy SP3).</p>
A0457	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3 and DP11	Not Specified	Not Specified	Not Specified	New policies put forward it is assumed to meet with the Councils decision to declare a Climate Emergency

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0393	B007	<p>See issues summary . Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed .Modify policy to reflect comments;</p> <p>The following specific modifications identified:</p> <ol style="list-style-type: none"> <li>1. Welcome specific Climate Policy but needs to be much stronger &amp; be re- named 'Climate emergency'</li> <li>2 Para 1.e. Weak wording, change “encourage” to “ensure” . A site should not be on the list unless it can be linked and integrated and unless it is a condition for development.</li> <li>3. Para 1.f. The wording is weak as electric charging infrastructure should be provided in all new development.</li> <li>4 Para 1.g. Fabric energy efficiency should be defined with a minimum figure.</li> <li>5. The local plan needs to do more to achieve traffic reduction and to stimulate or promote non-car alternatives e.g. appropriate infrastructure provision &amp; speed management (20mph speed limit);</li> <li>6. Para 3.31 needs to reference the Council’s Climate Change Strategy or more appropriately, the Zero Carbon Shropshire Plan</li> <li>7. A new section should be included in the Local Plan explaining why we must reduce traffic levels (e.g. a 25% reduction in vehicle kms travelled in Shropshire).</li> <li>8. Include greater reference to 25 Year Environment Plan</li> </ol>	<ol style="list-style-type: none"> <li>1. The name of draft Policy SP3 is considered to appropriately reflect its subject matter.</li> <li>2. The proposed change would impose an unreasonable requirement given that the rural nature of Shropshire means that not all new development will be able to link to or integrate with public transport.</li> <li>3. The provision of electric vehicle infrastructure is covered by Building Regulations rather than the planning regime.</li> <li>4. Energy efficiency ratings are covered by Building Regulations and it is not considered necessary to refer to specific figures in this policy</li> <li>5 and 7. The need to reduce traffic and encourage alternative travel options is a theme running throughout the Plan. There is an emphasis on the location of new development in existing urban centres, the wording of many policies supports pedestrian and cycling options and the Sustainability Appraisal and site assessment process contain criteria aimed at minimising car-based travel and encouraging walking and cycling.</li> <li>6. The Council’s Climate Change Strategy covers issues which are primarily delivered by mechanisms other than the planning process - although the Local Plan does reflect the Strategy’s priorities when they accord with national planning policy and guidance. Accordingly, it is not considered necessary to reference the document in this paragraph.</li> <li>8. The government’s 25 year Environment Plan covers a wide range of issues and where its provisions affect the planning process, they have been reflected in Shropshire Local Plan policies. However, the Shropshire Local Plan should be read as a whole and the Council does not consider it necessary to include additional references to the 25 year Environment Plan.</li> </ol>	No	SP3. Climate Change
A0410	B005	<p>The Draft Shropshire Local Plan must include a carbon budget and a strategy for achieving it.</p> <p>Intentions within draft Policy SP3 must be cascaded to the development management policies in a more concrete manner.</p>	<p>There is no requirement in national planning policy or other legislation for a Local Plan to set a carbon budget and therefore the Council considers this is not necessary.</p> <p>The Council considers that draft Policy DP11 appropriately supports the strategic intentions of draft Policy SP3.</p>	No	SP3. Climate Change
A0457	B005	<p>Scrutiny should be given the opportunity to examine this. To look at what is proposed and if needed receive assurance that it will deliver the policy it has set.</p>	<p>The draft Local Plan will be discussed at a full Council meeting and following submission, will be subject to an Examination in Public. The Council thus considers the Plan will be adequately scrutinised</p>	No	SP3. Climate Change

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0461	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3 and DP11	Not Specified	Not Specified	Not Specified	Whilst recognising that responding to climate change will be an issue of increasing importance during the plan period it is currently unclear how a number of the requirements of these policies will be applied. It is also unclear whether the viability implications of these requirements have been tested.
A0487	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3 & DP11	Not Specified	No	Not Specified	By delivering carbon reductions through the fabric and building services in a home rather than relying on wider carbon offsetting, the Future Homes Standard will ensure new homes have a smaller carbon footprint than any previous Government policy. In addition, this footprint will continue to reduce over time as the electricity grid decarbonises. The HBF support moving towards greater energy efficiency via a nationally consistent set of standards and a timetable, which is universally understood and technically implementable. The Government Response to The Future Homes Standard consultation confirms that the Planning and Energy Act 2008 will not be amended, which means that the Council will retain powers to set local energy efficiency standards for new homes. The HBF acknowledges that the Council may stipulate energy performance standards that exceed the Building Regulations but consider that the Council should comply with the Government's intention of setting standards for energy efficiency through the Building Regulations. It is the HBF's opinion that the Council should not be setting different targets or policies outside of Building Regulations. The key to success is standardisation and avoidance of individual Council's specifying their own policy approach to energy efficiency, which would undermine economies of scale for product manufacturers, suppliers and developers. As set out in the Planning for the Future White Paper a simpler planning process improves certainty. The higher levels of energy efficiency standards for new homes proposed in the 2021 Part L uplift and Future Homes Standard means that the Council should not need to set local energy efficiency standards in order to achieve the shared net zero goal. The Council's policy approach should not compromise the viability of development, additional costs for Future Homes Standard Option 2 should be included in the Council's viability assessment (see detailed HBF comments on Deliverability & Viability).
A0487	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3 & DP20	Not Specified	No	Not Specified	Strategic Policy SP3 - Climate Change requires :- <ul style="list-style-type: none"> <li>☑ Bullet Point 4d - integration of water efficiency measures.</li> </ul> The Council is committed to an overall goal of making Shropshire net greenhouse gas neutral by 2030. It is the HBF's opinion that the Council's policy approach to climate change should reflect the Government's proposals on for Future Homes Standard, heat networks, electric vehicle charging points (EVCP) and water efficiency. Development Management Policy DP20 - Water Efficiency Under Bullet Point 1 new housing will be expected to meet the Building Regulations 110 litres per person per day standard for water. Under Building Regulations, all new dwellings must achieve a mandatory level of water efficiency of 125 litres per day per person, which is a higher standard than that achieved by much of the existing housing stock. This mandatory standard represents an effective demand management measure. If the Council wishes to adopt the optional standard for water efficiency of 110 litres per person per day, then the Council should justify doing so by applying the criteria set out in the NPPG. The NPPG states that where there is a "clear local need, Local Planning Authorities (LPA) can set out Local Plan Policies requiring new dwellings to meet tighter Building Regulations optional requirement of 110 litres per person per day" (ID : 56-014-20150327). The NPPG also states the "it will be for a LPA to establish a clear need based on existing sources of evidence, consultations with the local water and sewerage company, the Environment Agency and catchment partnerships and consideration of the impact on viability and housing supply of such a requirement" (ID : 56- 015-20150327). The Housing Standards Review was explicit that reduced water consumption was solely applicable to water stressed areas. The Shropshire Water Cycle Study (2020) reports that the Environment Agency and Natural Resources Wales assess the Severn Trent and United Utilities supply regions as areas of only "moderate" water stress (para 4.6.1) rather than an area of serious water stress.
A0487	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3 & DP28	Not Specified	No	Not Specified	Strategic Policy SP3 - Climate Change requires:- Bullet Point 1f - wherever possible, integration of electric vehicle charging infrastructure into new development in line with Policy DP11 ; The Council is committed to an overall goal of making Shropshire net greenhouse gas neutral by 2030. It is the HBF's opinion that the Council's policy approach to climate change should reflect the Government's proposals on for Future Homes Standard, heat networks, electric vehicle charging points (EVCP) and water efficiency. Development Management Policy DP28 - Communications & Transport under Bullet Point 3d requires provision of infrastructure investment including domestic charging points in dwellings. The HBF recognise that electric vehicles will be part of the solution to transitioning to a low carbon future. The Department of Transport consultation on Electric Vehicle Charging in Residential & Non-Residential Buildings (ended on 7th October 2019) set out the Government's preferred option to introduce a new requirement for EVCPs under Part S of the Building Regulations. The inclusion of EVCP requirements within the Building Regulations will introduce a standardised consistent approach to EVCPs in new buildings across the country. The requirements proposed apply to car parking spaces in or adjacent to buildings and the intention is for there to be one charge point per dwelling rather than per parking space. It is proposed that charging points must be at least Mode 3 or equivalent with a minimum power rating output of 7kW fitted with a universal socket to charge all types of electric vehicle currently on the market. The Council's policy approach should not compromise the viability of development (see detailed HBF comments on Deliverability & Viability).

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0461	B002	n/a	Comments noted	No	SP3. Climate Change
A0487	B006	The Council's proposed policy approach is unnecessary because of the Government's Future Homes Standard proposals. Policy SP3 Bullet Point 2a and Policy DP11 Bullet Points 1a - 1d should be deleted.	The government's Future Homes Standard will be implemented through the Building Regulations rather than the planning process. It thus provides a complementary mechanism to the Local Plan and the Council considers no change to the policy is necessary.	No	SP3. Climate Change
A0487	B007	The Council's policy approach is unnecessary and unjustified Bullet Point 4d of Policy SP3 and Bullet Point 1 of Policy DP20 should be deleted.	The Council considers that its Water Cycle Study sets out the clear local need for a tighter water efficiency standard than Building Regulation and that this draft policy therefore complies with national guidance. No change proposed.	No	SP3. Climate Change
A0487	B008	The Council's policy approach is unnecessary because of the Government's proposals to change Building Regulations. Bullet Point 1f of Policy SP3 and Bullet Point of 3d Policy DP28 should be deleted. However, if Policy DP28 Bullet Point 3d is retained, the HBF consider that the physical installation of active EVCPs is unnecessary. The evolution of automotive technology is moving quickly therefore a passive cable and duct approach is a more sensible and future proofed solution, which negates the potential for obsolete technology being experienced by householders. A passive cable and duct approach means that the householder can later arrange and install a physical EVCP suitable for their vehicle and in line with the latest technologies.	The policy encourages new electric vehicle infrastructure rather than requires it ( in recognition of the role of Building Regulations in this area). As such the phrasing of the policy is considered appropriate. No change proposed.	No	SP3. Climate Change

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0487	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3 & DP11	Not Specified	No	Not Specified	<p>The Council is committed to an overall goal of making Shropshire net greenhouse gas neutral by 2030. It is the HBF's opinion that the Council's policy approach to climate change should reflect the Government's proposals on for Future Homes Standard, heat networks, electric vehicle charging points (EVCP) and water efficiency. Under Development Management Policy DP11 - Minimising Carbon Emissions, new residential development will reduce the impact of climate change by :-  Bullet Point 1d - encouraging all proposals in particular residential development of 50 or more dwellings to achieve zero net-carbon emissions, to use on-site district heating / cooling systems, and to connect to wider heating / cooling networks both for energy supply and export, especially where these utilise renewable energy.</p> <p>The Council is also referred to the Department for Business, Energy and Industrial Strategy consultation on Heat Networks : Building A Market Framework (ended on 1st June 2020). To meet the Government's legal commitment on reducing greenhouse gas emissions virtually all heat in buildings will require decarbonising. Heat networks are one aspect of the path towards decarbonising heat, however currently the predominant technology for district sized communal heating networks is gas combined heat and power (CHP) plants. Over 90% of district networks are gas fired. As 2050 approaches, meeting the Government's climate target of reducing greenhouse gas emissions to net zero will require a transition from gas-fired networks to renewable or low carbon alternatives such as large heat pumps, hydrogen or waste-heat recovery but at the moment one of the major reasons why heat network projects do not install such technologies is because of the up-front capital cost. The Council should be aware that for the foreseeable future it will remain uneconomic for most heat networks to install low-carbon technologies. Furthermore, some heat network consumers do not have comparable levels of satisfaction as consumers on gas and electricity networks, and they pay a higher price. Currently, there are no sector specific protections for heat network consumers, unlike for people on other utilities such as gas, electricity or water. A consumer living in a building serviced by a heat network does not have the same opportunities to switch supplier as they would for most gas and electricity supplies. All heat network domestic consumers should have ready access to information about their heat network, a good quality of service, fair and transparently priced heating and a redress option should things go wrong. Research by the Competition and Markets Authority (CMA) found that a significant proportion of suppliers and managing agents do not provide pre-transaction documents, or what is provided contains limited information, particularly on the on-going costs of heat networks and poor transparency regarding heating bills, including their calculation, limits consumers' ability to challenge their heat suppliers reinforcing a perception that prices are unjustified. The monopolistic nature of heat networks means that future price regulation is required to protect domestic consumers. The CMA have concluded that "a statutory framework should be set up that underpins the regulation of all heat networks." They recommended that "the regulatory framework should be designed to ensure that all heat network customers are adequately protected. At a minimum, they should be given a comparable level of protection to gas and electricity in the regulated energy sector." The Government's latest consultation on heating networks proposes a regulatory framework that would give Ofgem oversight and enforcement powers across quality of service, provision of information and pricing arrangements for all domestic heat network consumers.</p>
A0497	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	No	Not Specified	<p>Representations to the Regulation 18 Pre-Submission Draft Plan (Appendix 1 of this representation) remain relevant and the plan is unsound as it is not justified or effective. Support that development in Shropshire will help bring a transition to a zero-carbon economy.</p> <p>Draft Policy SP3 should recognise the contribution of land use planning to support the transition to a zero-carbon economy.</p> <p>Measures identified can be achieved in selecting the location of sites to be allocated and the benefits of a juxtaposition of uses (not just about directing development to sustainable settlements but sustainable locations within a settlement, such as those which can reduce commuting).</p>
A0582	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	No	Not Specified	<p>The aim of transitioning to a zero-carbon economy is noted, as is the recognition in paragraph 3.29 of the explanatory text, that this is a very challenging target.</p> <p>Policy SP3 part 2 goes on to refer to integrating or supporting both on and off-site delivery of renewable and low carbon energy in accordance with the requirements of Policy DP12, as well as supporting district heating and cooling networks, and community energy generation schemes. It is stressed that the practicalities and cost implications of such policy requirements will need to be fully considered and incorporated into the SLP Delivery and Viability Study.</p> <p>The Shropshire Delivery and Viability Study (July 2020) recognises that building to increased standards would require higher costs (paragraph 8.18) and sets out several scenarios for potential build cost implications. The Study needs to take account of local circumstances and up to date information from developers in the Shropshire area and appropriate industry bodies, to ensure that it reflects a true assessment of costs involved in the proposed climate change measures and how this effects site viability.</p>
A0586	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3 / SO5	Not Specified	No	Not Specified	<p>No relevant scoring criteria is included for Sustainability Appraisal Objective SO5 within stage 2a of the site assessment for the preferred sites or strategic sites consultations (subsequently included within the next Regulation 18 consultation), no explanation for this omission was made. Would also question whether criteria now included meets the requirements of the Sustainability Objectives SO5 as set out within the Sustainability Appraisal.</p> <p>Consider the draft Shropshire Local Plan, its Sustainability Appraisal and evidence base give insufficient consideration to the climate emergency declared by Shropshire Council.</p>
A0608	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	No	Not Specified	<p>Within draft Policy SP3 the minimisation of travel and encouragement of public transport, delivering higher density development and encouraging new development to link and where possible integrate with public transport is supported; as detailed in Parts 1a, 1b, and 1e respectively.</p> <p>Parts 1g and 2a of draft Policy SP3 make reference to promoting fabric energy efficiency and integrating renewable/low carbon energy, in line with draft Policy DP11. As per para 34 of the National Planning Policy Framework (NPPF), these requirements should not undermine deliverability of the Plan. Further, policy should not duplicate legal requirements covered elsewhere and changes have already been made to building regulations to achieve energy efficiency standards. These parts of the policy should instead defer to the latest building regulations. Any requirement that goes beyond building regulations should be on a needs only basis, informed by detailed evidence.</p> <p>Part 3a of draft Policy SP3 should be clarified as being an optional requirement.</p> <p>This policy should be amended to reflect the above in order to be found sound, be fully justified and compliant with national policy.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0487	B009	The Council's policy approach is ineffective, Bullet Point 2c of Policy SP3 and Bullet Point 1d of Policy DP1 should be deleted.	The Council considers that its approach to climate change in the Local Plan complements the governments Future Homes Standard proposals which will be implemented through Building Regulations. Comments on heat networks are noted.	No	SP3. Climate Change
A0497	B011	Paragraph 1 of draft Policy SP3 should include a new criterion stating "Sites for development should be located so as to reduce the distance travelled to jobs having regard to commuting patterns; and housing should be located close to jobs so as to reduce the need to travel."	Shropshire Council considers that draft Policy SP3 provides an appropriate mechanism to support the transition to a zero-carbon economy. Shropshire Council also considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Furthermore in identifying proposed site allocations a comprehensive site assessment process has been undertaken, which is considered appropriate, proportionate and robust.	No	SP3. Climate Change
A0582	B010	Requested Change – Further consideration is needed in relation the deliverability and viability of the measures set out. This must be reflected in the Delivery and Viability Study supporting the SLP and supported by up to date local evidence from developers and industry bodies. The first sentence of SP3.2 should be reworded to state 'Integrating or supporting both on and off-site delivery of renewable and low carbon energy, where viable, including by....'	A Whole Plan Viability Assessment has been undertaken to inform proposed policy requirements, including those related to energy efficiency, with the intention of ensuring the viability and deliverability of the draft Shropshire Local Plan. This is considered a proportionate and robust assessment. The wording of draft Policy SP3 is considered appropriate and consistent with the wider draft Shropshire Local Plan.	No	SP3. Climate Change
A0586	B010	Review the site assessment process and consideration of the Climate Emergency.	The omission was made in error and corrected in later appraisals. As such the Council considers that the SA and site assessment process is legally compliant, appropriate, robust and proportionate. No change proposed.	No	SP3. Climate Change
A0608	B003	Amend Part 1g of draft Policy SP3 to replace "in line with the requirements of DP11" with "in line with the relevant Building Regulations". Amend Part 2a of draft Policy SP3 to replace "in line with the requirements of DP11" with "in line with the relevant Building Regulations".	The Council considers that the Building Regulations are complementary to the Local Plan and that draft Policy SP3 reflects this relationship appropriately.	No	SP3. Climate Change

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0609	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	Yes	Not Specified	Support the aim of draft Policy SP3 and the transition towards a zero-carbon economy. The policy recognises the need to minimise travel and maximise the ability to make trips via sustainable modes of transport. As such, we consider this policy to be positively prepared and consistent with national policy. The policy is therefore considered to be sound.
A0614	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	Yes	Not Specified	The Council is correct to use the energy hierarchy but then they appear to circumnavigate it by jumping straight to renewable and low carbon sources. The primary aim should be to reduce energy use; it should not matter if that can be achieved through a fabric first approach. A more sophisticated approach is needed than is currently being suggested
A0628	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	No	No	Yes	References to district heating and cooling and community energy generation and distribution schemes in draft Policy SP3 are vague and could lead to issues of what is expected of development. Further justification for this draft Policy is necessary to make the approach sound. Recommend further clarity on what these schemes would entail. It may be necessary for the Council to produce separate guidelines specifically on this matter. There is no draft Policy relating to the number of electric vehicle charging points expected within developments. It would be helpful if the expectations for charging points was more clearly set out, with reference to the impacts of viability being taken into consideration.
A0629	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	Welcome inclusion of a specific Climate Change policy but needs to be much stronger & should be named 'Climate Emergency'. Paras 1a-g in SP3 are at variance with other statements & established policies and track record of Shropshire Council that damage public transport and active travel including: rejection of default 20mph zones (at Council in Dec 2019) despite evidence re the effectiveness in increasing walking and cycling and reducing transport's carbon emissions; reductions in bus funding ; demolition of Shrewsbury bus station contrary to the central principle of sustainable transport which is integration, achieved by close location of train & bus stations to encourage bus and train use in combination and this combination; refusal to develop a Cycling and Walking Infrastructure Plan. Statements in SP3 at variance with Shropshire Council neglect and damage to walking, cycling and public transport and nothing in the Local Plan that demonstrates a reversal of these policies. Re para 1 a Local Plan does not give substance to the aspiration of "maximising the ability to make trips by sustainable modes of transport" which requires interventions e.g. those available under Bus Services Act (2017) ( such as those used by Cornwall County Council's bus strategy) to produce substantial increases in walking, cycling and bus use & and there is nothing in the Local Plan to indicate that this will be done in the plan period. The text makes nothing compulsory but and the words 'encourage' and 'where possible' and 'promoting' are meaningless unless enforceable and enforced. Policy aspirations call into question traffic figures used in the outline business plan for the proposed Shrewsbury North West Relief Road. These need review in the light of the COVID pandemic and the climate emergency. Para 3.31 The Strategy framework is not a strategy but an outline of how the strategy will be developed. The Local Plan needs to reference the council's Climate Change Strategy or more appropriately, as this document only refers to Shropshire Council's emissions, the Zero Carbon Shropshire Plan produced through the Shropshire Climate Action Partnership of which Shropshire Council is a contributor. This addresses the totality of direct and indirect emissions & in the absence of an up to date transport plan could provide some of the headline figures of how transport (and by implication spatial planning) needs to change. The implications of this policy have not been followed through into the traffic forecasts that are used in the outline business case for the NWRR. Support for active travel ( para 1d ) is not linked to adoption of EVs or ULEVs. Driving a car is a sedentary activity & car ownership increases car use and reduces walking, cycling and bus use. If people drive rather than walking or cycling, they do not meet public health targets for physical activity with resulting elevated disease risk. The local plan includes nothing to stimulate or promote non-car alternatives including infrastructure to support walk, cycle and bus use such as: excellent segregated cycle paths, joined-up networks to link housing with schools / commonly used destinations. These requirements are not supported or funded in Shropshire& there has been a refusal by Shropshire Council to adopt 20mph contrary to WHO advice in the Stockholm declaration that this increases active travel and modal shift away from cars and towards walking, cycling and bus use. It highlights that appropriate speed management to address environmental & safety issues is important. Wholesale adoption of Electric vehicles on its own, without significant traffic reduction, is not enough to meet net zero targets & the significance of transport and climate change is a major weakness of the climate change sections of the Local Plan as highlighted in the recent Lyn Sloman report for at Transport for Quality of Life. A completely new section should be included in the Local Plan explaining why we must reduce traffic levels (e.g. a 25% reduction in vehicle kms travelled in Shropshire). This is well understood and be found in UK government reports but is not mentioned in the Local Plan.
A0629	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Yes	No	Yes	Whilst welcoming inclusion of a specific Climate Change policy (draft Policy SP2), feel it needs to be more strongly worded. For example "Climate Emergency" would be a better policy title reflecting Shropshire Council's declaration.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0609	B003	N/A	Noted.	No	SP3. Climate Change
A0614	B005	The Council is correct to use the energy hierarchy but then they appear to circumnavigate it by jumping straight to renewable and low carbon sources. The primary aim should be to reduce energy use; it should not matter if that can be achieved through a fabric first approach. A more sophisticated approach is needed than is currently being suggested	The Council considers the approach taken in draft Policies SP3 and DP11 is appropriate.	No	SP3. Climate Change
A0628	B007	Provide further justification and explanation for draft Policy SP3.	Shropshire Council considers that draft Policy SP3 provides an appropriate mechanism to support the transition to a zero-carbon economy and there is sufficient justification within it and associated detailed policies with regard to the proposed requirements of this policy. A Whole Plan Viability Assessment has been undertaken to inform policy requirements with the intention of ensuring the draft Shropshire Local Plan is viable and deliverable. The provision of electric vehicle infrastructure is covered by Building Regulations rather than the planning system.	No	SP3. Climate Change
A0629	B007	See issues summary . Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed .Modify policy to reflect comments; The following specific modifications identified: 1. Welcome specific Climate Policy but needs to be much stronger & be re- named 'Climate emergency' 2. para 1.e. Weak wording, change "encourage" to "ensure". A site should not be on the list unless it can be linked and integrated and unless it is a condition for development. 3. para 1.f. The wording is weak as electric charging infrastructure should be provided in all new development. 4 para 1.g. Fabric energy efficiency should be defined with a minimum figure. 5. The local plan needs to do more to achieve traffic reduction and to stimulate or promote non-car alternatives e.g. appropriate infrastructure provision & speed management (20mph speed limit); 6 para 3.31 needs to reference the Council's Climate Change Strategy or more appropriately, the Zero Carbon Shropshire Plan 7 new section should be included in the Local Plan explaining why we must reduce traffic levels (e.g. a 25% reduction in vehicle kms travelled in Shropshire). 8 Include greater reference to 25 Year Environment Plan	1. The name of draft Policy SP3 is considered to appropriately reflect its subject matter. 2. The proposed change would impose an unreasonable requirement given that the rural nature of Shropshire means that not all new development will be able to link to or integrate with public transport. 3. The provision of electric vehicle infrastructure is covered by Building Regulations rather than the planning system. 4. Energy efficiency ratings are covered by Building Regulations and it is not considered necessary to refer to specific figures in this policy 5 and 7. The need to reduce traffic and encourage alternative travel options is a theme running throughout the Plan. There is an emphasis on the location of new development in existing urban centres, the wording of many policies supports pedestrian and cycling options and the Sustainability Appraisal and site assessment process contain criteria aimed at minimising car-based travel and encouraging walking and cycling. 6. The Council's Climate Change Strategy covers issues which are primarily delivered by mechanisms other than the planning process - although the Local Plan does reflect the Strategy's priorities when they accord with national planning policy and guidance. Accordingly, it is not considered necessary to reference the document in this paragraph. 8. The government's 25 year Environment Plan covers a wide range of issues and where its provisions affect the planning process, they have been reflected in Shropshire Local Plan policies. However, the Shropshire Local Plan should be read as a whole and the Council	No	SP3. Climate Change
A0629	B014	SP3 is an expression of intent. Hard targets or key performance indicators need to be added given the county' adoption of a Climate Emergency.	The Council considers that the approach taken is consistent with national planning policy and guidance. No change proposed.	No	SP3. Climate Change

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Yes	No	Yes	<p>There are a number of problems with the draft Shropshire Local Plan and as such it is legally unsound in terms of climate change mitigation policies and duties:</p> <ul style="list-style-type: none"> <li>-Section 19 of the Planning and Compulsory Purchase Act, paras 148-149 (incorporating footnote 48) of the National Planning Policy Framework (NPPF) and supporting National Planning Practice Guidance (NPPG) require Local Plans to carbon audited, and to “contribute to radical carbon emission reductions in line with the Climate Change Act”, this has not occurred. This process is essential and will identify the need for/support very ambitious planning policies around building performance and renewable energy if the required carbon reduction strategy is to be achieved.</li> <li>-It should demonstrate how net zero carbon Shropshire will be achieved by 2030, in line with Government policy/Council objectives and require new developments/activities to be aligned to this objective.</li> <li>-References to reducing carbon emissions are general rather than objectively measurable as required.</li> <li>-The evidence base for the draft Shropshire Local Plan should provide an overall carbon budget for the district to 2050, consistent with the updated Climate Change Act. Policies should aim to secure radical carbon reductions in line with a trajectory for the authority area to achieve full carbon neutrality by 2050 and in the short term achieve highest level of ambition possible to meet this goal (to the extent possible).</li> </ul> <p>Relevant draft Policies must be amended to align the draft Shropshire Local Plan with the declared climate emergency declaration, achieving the net zero carbon Shropshire 2030 and Government policy.</p> <p>Para 2d of draft Policy SP3 limits possible energy generation as a response to climate change to a scale of local generation and distribution. This is not sound in light of the national need for renewable generation. Draft Policy SP12 is referenced several times in the draft Shropshire Local Plan and may be intended to cover this point but is not binding. Policies provide a list of potential negatives of renewable energy rather than a positive strategy for delivery. Policies should give specific encouragement to community energy projects and defining what is meant by “community energy” (as per para 152 of the NPPF).</p>
A0629	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Yes	No	Yes	<p>Within para 1f of Draft Policy SP3, electric charging infrastructure should be mandatory in all new development. “Wherever possible” is an easy to apply get-out (the committee on climate change reach broadly similar conclusions).</p>
A0635	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	No	Not Specified	<p>The Plan lacks a coherent policy for protecting and improving walking routes and promoting walking, within and between communities and in the wider countryside. The way the policies are written does not give a clear policy framework for pedestrian travel and the infrastructure it needs. In particular it lacks clarity with respect to existing as opposed to new developments and travel between centres and hubs. The Plan has missed the opportunity to give a clear steer that investment in walking routes throughout Shropshire is needed to ensure sustainable development and a zero carbon economy and to ensure that the amount of active travel through walking increases.</p> <p>SP3 1d. (Active travel/Walking and cycling links). This policy relates only to new developments and to links from new to existing developments. Therefore it is inadequate to deliver transition to a zero-carbon economy across Shropshire. It does not specifically mention active travel in existing neighbourhoods nor between strategic/principal centres and community hubs.</p>
A0655	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	Not Specified	Not Specified	<p>SP3 addresses issues concerning Climate Change. However, while Shropshire Council has agreed a “Climate Emergency” and has a partnership seeking ways to reduce CO2 emissions, this is hardly mentioned in SP3. It is notable that several experts in the field have assessed this Policy as inadequate to provide zero emission by 2036.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B015	<p>Para 1(g) of draft Policy SP3 should be integrated within draft Policy DP23 which sets out the Council's approach to conserving and enhancing the historic environment. Policy DP23 makes no mention of energy efficiency retrofitting, and this is the council's main policy covering conservation and listed buildings so suitable amendments are vital to these policies if they are to achieve the intended objectives.</p> <p>Para 2 of draft Policy SP3 supports community energy proposals, but this is not reflected in draft Policy DP26. Suitable amendments are required to achieve this.</p> <p>Para 3 of draft Policy SP3 is about maximising carbon sequestration and needs to be better integrated within draft Policies DP14 and DP16.</p> <p>Delete Para 4 of draft Policy SP3 and replace with the following: "Development will be expected to include site and building-level measures to be resilient to future climate change impacts and provide for the comfort, health, and wellbeing of current and future occupiers and the surrounding environment over the lifetime of the development. These measures should be integral to the layout and design of new development and should take the vulnerability of the building occupants into account.</p> <p>Site-level adaptations: Development should be designed, through its layout, form and massing and through the use of green/blue infrastructure, to: 1 Minimise the overheating of buildings; 2 Provide comfortable external spaces in hot weather; and 3 Conserve water supplies and minimise the risk and impact of flooding.</p> <p>The use of green/blue infrastructure should provide multifunctional benefits in relation to climate change adaptation. Where appropriate to its context, this should include the use of living roofs with a sufficient substrate depth to maximise cooling benefits.</p> <p>Building-level adaptations: Building designs and building-integrated measures should: 1 Mitigate the risk of overheating, ensuring that cooling needs are met sustainably; 2 Conserve water supplies; and 3 Avoid responses to climate impacts which lead to increases in energy use and carbon dioxide emissions.</p> <p>Adaptation strategy: Proposals for development should demonstrate through an adaptation strategy how these issues will be addressed. This should include technical modelling and assessment of the risk of overheating in current and future climate change scenarios. In considering the likely impact of climate change over the lifetime of the development (particularly in relation to overheating), reference should be made to the most recent climate change projection. Para 2 of draft Policy SP3 should also include "e) supporting the development of renewable energy generation schemes at a level compatible with viable business opportunities, to promote economic growth."</p>	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	SP3. Climate Change
A0629	B016	Amend para 1f of draft Policy SP3 to read: "Enable the installation / integration of electric vehicle charging infrastructure into new development, in line with the requirements of DP11; and"	The provision of electric vehicle infrastructure is covered by Building Regulations rather than the planning system. No change proposed.	No	SP3. Climate Change
A0635	B002	Policy SP3 1d should be extended to cover active travel in existing neighbourhoods, and between strategic/principal centres and community hubs and therefore fit with policy DP28 3b.	The need to reduce traffic and encourage alternative travel options is a theme running throughout the Plan. There is an emphasis on the location of new development in existing urban centres, the wording of many policies supports pedestrian and cycling options and the Sustainability Appraisal and site assessment process contain criteria aimed at minimising car-based travel and encouraging walking and cycling. No change proposed.	No	SP3. Climate Change
A0655	B004	It is notable that several experts in the field have assessed this Policy as inadequate to provide zero emission by 2036. This is already given attention within the NPPF in terms of sustainability, but now needs much stronger detailing about CO2 emissions, including construction methods, materials and future energy use.	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	SP3. Climate Change

A0286	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	No	No	No	Paragraph 7 of the NPPF sets out that 'the purpose of the planning system is to contribute to the achievement of sustainable development'. The draft plan has not been proactively prepared in accordance with the three overarching objectives, which help form sustainable development. Significant weight is placed on the economic objective for Shifnal and the wider district but very little on the social and environmental objectives. The proposed inclusion of 41 ha of employment land and 1,500 new dwellings in Shifnal will lead to substantial losses of Safeguarded Land and Green Belt eroding the natural green space between Shifnal and Tong. Contrary to paragraph 9 of the NPPF, the local circumstances, needs and opportunities for Shifnal are not considered and the proposed urban extension will have a detrimental effect on the surrounding landscape, road infrastructure, schools and health services. The proposed Draft Plan is therefore unsound. There is no recognition in the Pre-Submission Draft SLP of the potential impacts of Covid-19 on the local economy, including increased homeworking reducing the need for employment land. A more conservative estimate of the employment land requirements should be undertaken, with reconsideration of the requirement waiting until the next plan review, reassessing the economic situation when the full effects of Covid-19 can be assessed. Otherwise, there is a high likelihood that employment will not keep up with the high housing figure proposed and so balanced growth will not occur nor will sustainable development be achieved in accordance with Policy SP4.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0286	B009	A more conservative estimate of the employment land requirements should be undertaken, with reconsideration of the requirement waiting until the next plan review, reassessing the economic situation when the full effects of Covid-19 can be assessed.	<p>The draft Shropshire Local Plan seeks to achieve the sustainable development of Shropshire. All references to sustainable development within the draft Shropshire Local Plan recognise the three overarching objectives (economic, social and environmental), which are interdependent and need to be pursued in mutually supportive ways (so that opportunities can be taken to secure net gains across each of the different objectives). This is recognised within the introduction to the draft Shropshire Local Plan, which states "the pursuit of sustainable development is at the heart of the planning process" and that "achieving sustainable development will mean that decision takers must look at all facets of sustainability in arriving at decisions: economic, social and environmental. In all cases a balance of considerations is needed, and it is accepted this will often lead to a variety of opinions being expressed."</p> <p>The proposals within the draft Shropshire Local Plan have been informed by a comprehensive Sustainability Appraisal process. Draft Policy SP4 is not seeking to define sustainable development, rather it is providing clarity on how the presumption in favour of sustainable development introduced within the NPPF would apply, if relevant, in Shropshire. Shropshire Council considers that the proposed strategic approach to the level and distribution of development is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the proposed development strategy for Shifnal and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that proposed safeguarded land is not allocated for development but safeguarded for beyond the proposed Plan period.</p> <p>Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p> <p>Comments on the Sustainability Appraisal (SA) noted. Proposed changes to SA would have no material effect so are not considered necessary.</p> <p>With regard to the proposed safeguarded land, it is noted that the National Planning Policy Framework (NPPF) states Plans should "make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development".</p>	No	SP4 Sustainable Development
A0313	B009	A more conservative estimate of the employment land requirements should be undertaken, with reconsideration of the requirement waiting until the next plan review, reassessing the economic situation when the full effects of Covid-19 can be assessed.	<p>The draft Shropshire Local Plan seeks to achieve the sustainable development of Shropshire. A0014	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	Not Specified	Not Specified	Not Specified	This is not a robust interpretation of the NPPF definition of sustainable development: "development which meets the needs of the present without compromising the ability of future generations to meet their own needs". Throughout the plan the term "sustainable" is used without adequate consideration of environmental implications. This is also true for the sustainability appraisal.
A0060	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	No	No	Not Specified	Paragraph 7 of the NPPF sets out that 'the purpose of the planning system is to contribute to the achievement of sustainable development'. The draft plan has not been proactively prepared in accordance with the three overarching objectives, which help form sustainable development. Significant weight is placed on the economic objective for Shifnal and the wider district but very little on the social and environmental objectives. The proposed inclusion of 41 ha of employment land and 1,500 new dwellings in Shifnal will lead to substantial losses of Safeguarded Land and Green Belt eroding the natural green space between Shifnal and Tong. Contrary to paragraph 9 of the NPPF, the local circumstances, needs and opportunities for Shifnal are not considered and the proposed urban extension will have a detrimental effect on the surrounding landscape, road infrastructure, schools and health services. The proposed Draft Plan is therefore unsound. There is no recognition in the Pre-Submission Draft SLP of the potential impacts of Covid-19 on the local economy, including increased homeworking reducing the need for employment land. A more conservative estimate of the employment land requirements should be undertaken, with reconsideration of the requirement waiting until the next plan review, reassessing the economic situation when the full effects of Covid-19 can be assessed. Otherwise, there is a high likelihood that employment will not keep up with the high housing figure proposed and so balanced growth will not occur nor will sustainable development be achieved in accordance with Policy SP4.
A0255	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4 (STC002 and P58a)	Not Specified	No	Not Specified	To be effective, all policies should complement/be consistent with each other and National Policy. The National Planning Policy (NPPF) seeks to protect the Green Belt unless exceptional circumstances that are fully evidenced and justified, through preparation of Local Plans. No evidence/exceptional circumstances exist to justify development of STC002 and P58a - the Council's Green Belt Release Exceptional Circumstances Statement do not identify any circumstance which is exceptional and as such the sites should not be allocated. Currently, very special circumstances would need to be demonstrated to justify development of STC002 and P58a. An unjustified allocation should not be used to circumvent this. Such development would be unsustainable and would be in conflict with draft Policy SP4.
A0393	B045	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	Welcome reference to the government's 25 Year Environment Plan in SP17 but there should be greater reference to this throughout the document, especially in sections SP3, SP4, and SP9.

A0255	B007	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	<p>Noted. Shropshire Council considers that the draft Policies of the draft Shropshire Local Plan are consistent and together provide an appropriate vision and framework for the future development of Shropshire to 2038; address needs and opportunities in relation to housing, the local economy, community facilities and infrastructure; and seek to safeguard the environment, enable adaptation to climate change and helps to secure high-quality and accessible design.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt.</p> <p>Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p>	No	SP4. Sustainable Development
A0393	B045	Include greater reference to 25 Year Environment Plan	Government's 25 year Environment Plan covers a wide range of issues and where its provisions affect the planning process, they have been appropriately reflected in the draft Policies of the draft Shropshire Local Plan, which should be read as a whole. Shropshire Council does not consider it necessary to include additional references to the 25 year Environment Plan.	No	SP4. Sustainable Development

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0461	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	Not Specified	Not Specified	Not Specified	Support this policy
A0487	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	Not Specified	No	Not Specified	The 2019 NPPF confirms that Local Plans should avoid unnecessary duplication including repetition of policies in the NPPF itself (para 16f). The presumption in favour of sustainable development is clearly set out in the 2019 NPPF (para 11). In attempting to repeat national policy in Policy SP4, there is a danger that some inconsistencies creep in and lead to small but critical differences between national and local policy causing difficulties in interpretation and relative weighting.
A0497	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	Not Specified	Yes	Not Specified	Support a positive approach to sustainable development and recognition of the presumption in favour of sustainable development in the National Planning Policy Framework (NPPF).
A0609	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	Not Specified	Yes	Not Specified	Endorse the Council's commitment to taking a positive approach to sustainable development. Draft Policy SP4 accords with paragraph 11 of the NPPF and is considered to be sound.
A0621	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	Not Specified	Yes	Not Specified	Support this policy. In taking forward a robust local plan which provides the necessary flexibility where assumed delivery may not reach expected levels, ensuring that opportunities for sustainable development in areas of strategic growth are maximised is considered critical. In this context, site SHF032, alongside site SHF018c, have the combined ability to perform positively, both as standalone options, and contributing to a comprehensive strategy for development, in accordance with the aims and objectives of sustainable development. Specifically, they respond to NPPF paragraph 72 relating to 'planning for large scale development' and offer the potential to both complement and benefit from the infrastructure improvements delivered as part of the adjacent proposed employment allocations. In appraising sustainable development in key centres such as Shifnal, and how this is applied, it is considered that SHF018c and SHF032 fulfil the economic, social and environmental objectives contained in the NPPF and should be incorporated into the plan as safeguarded land. Specifically, in combination, these land allocations create a strong basis for local living, to create a strong cohesive community and reduce the need to travel, with substantial benefits including a reduction in carbon footprint.
A0623	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	Not Specified	Not Specified	Not Specified	Policy SP4 'Sustainable Development' duplicates the NPPF and reiterates the principles set out within Section 38 (6) of the Planning and Compulsory Purchase Act 2004.
A0629	B007-45	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	We welcome reference to the government's 25 Year Environment Plan in SP17 but there should be greater reference to this throughout the document, especially in sections SP3, SP4, and SP9.
A0629	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	Yes	No	Yes	The purpose of the draft Shropshire Local Plan is to achieve sustainable development not to achieve the aspirations of the Economic Growth Strategy. Draft Policy SP4 is not a robust interpretation of the Brundtland report definition of 'sustainable development' and that which now advanced by the HMT Dasgupta Review 2021 on the Economics of Biodiversity.
A0655	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	Not Specified	Not Specified	Not Specified	SP4 seeks to address issues of Sustainable Development, which in the NPPF has three aspects: Visual, Social and Environmental sustainability. These are not identified in the Draft Local Plan and so it lacks the detailing that might prompt better sustainable living for future residents.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0461	B003	n/a	Noted.	No	SP4. Sustainable Development
A0487	B010	Policy SP4 is unnecessary, which should be deleted.	Noted. Shropshire Council considers draft Policy SP4 is appropriate and consistent with national policy. It is complemented by the wider draft Policies within the draft Shropshire Local Plan.	No	SP4. Sustainable Development
A0497	B012	N/A	Noted.	No	SP4. Sustainable Development
A0609	B004	N/A	Noted.	No	SP4. Sustainable Development
A0621	B009	Allocate SHF032 and SHF018c	Support for Policy SP4 is noted. Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations and proposed safeguarded land a proportionate and robust site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	SP4. Sustainable Development
A0623	B010	Policy SP4 would be more effective if further details were provided relating to how the presumption will be applied locally, otherwise it should be deleted.	Noted. Shropshire Council considers draft Policy SP4 is appropriate and consistent with national policy. It is complemented by the wider draft Policies within the draft Shropshire Local Plan.	No	SP4. Sustainable Development
A0629	B007-45	Include greater reference to 25 Year Environment Plan	Government's 25 year Environment Plan covers a wide range of issues and where its provisions affect the planning process, they have been appropriately reflected in the draft Policies of the draft Shropshire Local Plan, which should be read as a whole. Shropshire Council does not consider it necessary to include additional references to the 25 year Environment Plan.	No	SP4. Sustainable Development
A0629	B017	The term sustainable development is used more than 20 times in the Plan, but is not defined. The definition adopted by the World Commission on Environment and Development's 1987 Brundtland report 'Our Common Future' should be adopted: "Development that meets the needs of the present without compromising the ability of future generations to meet their own needs". This definition recognises current levels of development should be kept to a minimum in order to preserve biodiversity for the future.	Noted. It is considered that the draft Shropshire Local Plan provides an appropriate, sustainable and deliverable vision and framework for the future development of Shropshire. The principle of sustainable development, as defined within the National Planning Policy Framework (NPPF), underpins the draft Shropshire Local Plan. Draft Policy SP4 is considered to be consistent with the presumption in favour of sustainable development documented within the NPPF.	No	SP4. Sustainable Development
A0655	B005	SP4 seeks to address issues of Sustainable Development, which in the NPPF has three aspects: Visual, Social and Environmental sustainability. These are not identified in the Draft Local Plan and so it lacks the detailing that might prompt better sustainable living for future residents.	The draft Shropshire Local Plan seeks to achieve the sustainable development of Shropshire. All references to sustainable development within the draft Shropshire Local Plan recognise the three overarching objectives (economic, social and environmental), which are interdependent and need to be pursued in mutually supportive ways (so that opportunities can be taken to secure net gains across each of the different objectives). This is recognised within the introduction to the draft Shropshire Local Plan, which states "the pursuit of sustainable development is at the heart of the planning process" and that "achieving sustainable development will mean that decision takers must look at all facets of sustainability in arriving at decisions: economic, social and environmental. In all cases a balance of considerations is needed, and it is accepted this will often lead to a variety of opinions being expressed." The proposals within the draft Shropshire Local Plan have been informed by a comprehensive Sustainability Appraisal process. Draft Policy SP4 is not seeking to define sustainable development, rather it is providing clarity on how the presumption in favour of sustainable development introduced within the NPPF would apply, if relevant, in Shropshire.	No	SP4. Sustainable Development

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0682	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP4	Not Specified	Not Specified	Not Specified	Draft Policy SP4 duplicates the National Planning Policy Framework (NPPF) and reiterates principles in S38(6) of the Planning and Compulsory Purchase Act. Consider draft Policy SP4 would be more effective if further details were provided relating to how the presumption will be applied locally.
A0124	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Yes	Yes	Yes	Support the modifications made to the policy at Reg 18 to make specific reference to supporting active and healthy lifestyles and supports the corresponding modification to paragraph 3.34 to reference promoting healthy and safe communities.
A0090	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Yes	No	Yes	Consider the West Midlands Design Charter referenced in para 2 of draft Policy SP5 falls well short of the scope of Government guidance contained in the publications "Government Design Principles", "Design: process and tools" and to the extent that it is policy the report "Living with Beauty – Promoting Health Well Being and Sustainable Growth". Principle 10 is severely deficient and at odds with Government guidance on Effective Community Engagement in design. As such it is unsound. Consider Shropshire Council have failed to ensure effective community engagement and participated in decisions on Planning Applications.
A0348	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	Yes	Not Specified	Historic England welcomes the references to local character and historic interests, as well as building materials and detailing, included in this strategic policy which offers the opportunity to conserve and enhance the historic environment.
A0381	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	Not Specified	Not Specified	Draft Policy SP5 is supported. Firmly believe that the former Travis Perkins site offers a unique opportunity to deliver a residential development of a high standard of design which will enhance the character and appearance of the site, its immediate surroundings and the wider Shrewsbury town area, in accordance with the objectives of this draft policy.
A0393	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	High quality design should not compromise sustainability and should incorporate extensive sustainable design features beyond solar.
A0487	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	No	Not Specified	Under Bullet Point 2 of Policy SP5 development should be designed in accordance with the West Midlands Design Charter. The Council's policy approach to high quality design should align with the 2019 NPPF, the latest NPPG, the National Design Guide and the National Design Code. The HBF is supportive of the use of best practice guidance, however the use of such guidance should remain voluntary rather than becoming a mandatory policy requirement. The West Midlands Design Charter is not intended to set a local design policy (see para 3.36 of the supporting text of the LPR), yet all planning applications for new development must set out their compliance with Policy SP5 and the West Midlands Design Charter (see para 3.40 of the supporting text of the LPR). Policy SP5 and its supporting text should not convey development plan status onto the West Midlands Design Charter, which has not been subject to the same process of preparation, consultation and examination as the LPR.
A0497	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	Yes	Not Specified	Support delivery of high-quality design in new development to ensure the creation of better places; promote individual and community well-being; and enhance the way places are enjoyed and experienced by those who live, work or visit. Stanmore Garden Village (BRD032) has a focus on high quality design with a legacy landowner that has the ability to deliver above the standard. A principles that underpins Garden Communities is: "Beautifully and imaginatively designed homes with gardens, combining the best of town and country to create healthy communities and including opportunities to grow food." The legacy landowner at Stanmore Garden Village (BRD032) can deliver. through use and control of local and regional housebuilders, a vision with building design and features relating to locally distinctive development and bring innovative design that will positively contribute to the character, appearance and local identity of the area. It would be planned as a settlement with cohesive layout and design. Stanmore Garden Village (BRD032) would create a real sense of place that will become the heart of the development. The Community Centre will be designed for traditional retail uses selling local produce, alongside a café and associated leisure and cultural facilities, in buildings where elevations respond to their surroundings and position within the settlement. Promoters of Stanmore Garden Village (BRD032) are committed to the principle of Garden Village design. They have recruited the renowned authority on such developments, Lord Matthew Taylor, as a principal adviser on the scheme. He is involved in the delivery of a number of Garden Communities in the UK created by Government's Garden Communities programme.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0682	B010	Provide further details relating to how the presumption in favour of sustainable development would be applied locally.	Noted. Shropshire Council considers draft Policy SP4 is appropriate and consistent with national policy. It is complemented by the wider draft Policies within the draft Shropshire Local Plan.	No	SP4. Sustainable Development
A0124	B006	n/a	Support welcomed.	No	SP5 High Quality Design
A0090	B005	The policy should be amended as follows: "in accordance with Government guidance on Design, National Planning Policy and, where compatible with national guidance, the West Midlands Design Charter. Collaborative engagement will be a watchword of public participation in design." The explanation should be amended to suit, emphasising the need to meet guidance on effective community participation in design.	Noted. Shropshire Council have endorsed the West Midlands Combined Authority (WMCA) Design Charter and acknowledged that this can be taken into account as a material consideration to inform planning decisions and to inform policy development, notably the review of the Local Plan. It is considered the principles established within this Design Charter are appropriate in a Shropshire context. This aspect of draft Policy DP5 is complemented by the remainder of draft Policy DP5, the other draft Policies within the draft Shropshire Local Plan and the NPPF. Furthermore, the draft Shropshire Local Plan also, where appropriate, specifies that for large development sites such mechanisms as Supplementary Planning Documents (SPD's) will be used to identify more detailed and location/site specific design considerations.	No	SP5. High Quality Design
A0348	B006	n/a	Noted, no actions proposed.	No	SP5. High Quality Design
A0381	B003	n/a	Noted.	No	SP5. High Quality Design
A0393	B008	High quality design should incorporate extensive sustainable design features beyond solar. Strengthen with additional guidance: "should be designed to integrate space for both people and wildlife, reduce carbon emissions and minimise water usage".	Noted. Draft Policy SP5 already states "Design and layout positively responds to our changing climate by taking opportunities to maximise energy efficiency (including maximising opportunities for solar gain), minimise carbon emissions and make efficient use of water, in accordance with relevant policies of this Local Plan". Furthermore the draft Shropshire Local Plan should be read as a whole and wider draft policies also address these issues. For instance draft Policies SP3 and DP11 address climate change and minimising carbon emissions; draft Policy SP6 addresses health and wellbeing, including consideration of "the provision of appropriate levels of private and public open space"; draft Policy DP15 addresses provision of open space within development; draft Policies DP14 and DP16 address green infrastructure and landscaping of new development respectively; and draft Policy DP20 addresses water efficiency.	No	SP5. High Quality Design
A0487	B011	Policy SP5 Bullet Point 2 should be deleted. The Council should signpost guidance in its supporting text rather than in policy.	Noted. Shropshire Council have endorsed the West Midlands Combined Authority (WMCA) Design Charter and acknowledged that this can be taken into account as a material consideration to inform planning decisions and to inform policy development, notably the review of the Local Plan. It is considered the principles established within this Design Charter are appropriate in a Shropshire context. This aspect of draft Policy DP5 is complemented by the remainder of draft Policy DP5, the other draft Policies within the draft Shropshire Local Plan and the NPPF. It is also noted that draft Policy DP5 has been subject to Sustainability Appraisal and public consultation.	No	SP5. High Quality Design
A0497	B013	N/A	Noted.	No	SP5. High Quality Design

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0598	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	No	Not Specified	Consider the wording of para 2 of draft Policy SP5 is overly-prescriptive and reduced the ability of applicants to devise creative and innovative solutions to address particular site or locational considerations relevant to individual proposals. Such an approach is contrary to national policy, which advises that "Plans should, at the most appropriate level, set out a clear design vision and expectations, so that applicants have as much certainty as possible about what is likely to be acceptable" and advises developments are "sympathetic to local character and history, including the surrounding built environment and landscape setting, while not preventing or discouraging appropriate innovation or change..." The draft Policy is also not justified because no evidence is provided to demonstrate such a prescriptive approach is warranted in Shropshire.
A0608	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	No	Not Specified	This policy needs to be amended to be found sound: -Part 5 of draft Policy SP5 is negatively worded and should be more balanced - for instance where development positively demonstrates design principles being incorporated then planning permission will be granted. -The proposed explanation of draft Policy SP5 requires planning applications to demonstrate how they comply with the West Midlands Design Charter, however this is not intended to set local design policy and has not been subject to the same process of preparation, consultation and examination as the draft Shropshire Local Plan. -Note there is no reference to the National Design Guide (October 2019) which has significantly more material planning weight than a regional design guide. This also follows into the draft National Model Design Code (currently subject to consultation), which is expected to inform local design guides, codes and policies and therefore would be useful to reference along with the DfT Cycle Infrastructure Design Guide. -Needs to be fully justified against national design guidance with references made to it, and more balanced in its overall approach to appreciate where good design principles have been adhered to.
A0609	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	No	Not Specified	Support the aims and objectives of draft Policy SP5 and the delivery of new high quality developments to ensure the creation of better places to live and work. However with regard to para 2 of draft Policy SP5 consider it more effective and justified for developments to comply with specific design guidance with relates to Shropshire in particular, as opposed to the West Midlands Design Charter, which has been produced for the whole County. A Shropshire specific design charter would ensure design principles are grounded in an understanding of the County's defining characteristics but also reflects nuances and particulars in Shropshire which are not relevant to all the West Midlands. Recommend draft Policy SP5 is amended to remove reference to the West Midlands Design Charter. Should the Council feel it is necessary, a specific Design Guide for Shropshire could be prepared or such matters could also be dealt with through any site specific SPD's produced for planned strategic developments such as Tasley Garden Village.
A0627	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	No	Not Specified	No reference is made to Neighbourhood Plans, Community Led Plans or Village Design Statements being considered as part of compliance with draft Policy SP5. This should be included for these documents to be "material considerations" as part of overall siting, site layouts, housing styles, and individual dwelling designs. Note that SP8(i) & SP9(h) refer to Neighbourhood Plans and Community Led Plans, but they do not refer to Village Design Statements which are more likely to be in place for Community Hubs and Clusters and smaller settlements.
A0629	B007-8	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	High quality design should not compromise sustainability and should incorporate extensive sustainable design features beyond solar.
A0629	B020	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Yes	No	Yes	There is no explicit reference to climate change in para 5 of draft Policy SP5 or para 3.40 of the explanation to draft Policy SP5. This is considered an omission if the draft Shropshire Local Plan is to reflect the broader demand of quality design. Other elements of the Local Plan such as DP11 make it clear that minimising carbon emissions is considered fundamental.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0598	B006	The word 'must' from para 2 of draft Policy SP5 should be replaced by more appropriate wording that reflects national policy objectives on design.	Noted. Shropshire Council consider the requirements of para 2 of draft Policy SP5 are appropriate and consistent with national policy. Requiring development to maintain and enhance the character, appearance and historic interests of settlements, streetscenes, groups of buildings, individual buildings and the landscape and, reinforce the hierarchy of networks and spaces in accordance with national planning policy and the design principles set out in the West Midlands Design Charter is considered to provide a clear design vision and expectations, so that applicants have as much certainty as possible about what is likely to be acceptable whilst also allowing for appropriate creativity and flexibility of design in achieving these requirements.	No	SP5. High Quality Design
A0608	B004	Part 5 of draft Policy SP5 should be amended to state "where development positively demonstrates design principles being incorporated then planning permission will be granted." Reference to the West Midlands Design Charter should recognise that this is not intended to set local design policy and has not been subject to the same process of preparation, consultation and examination as the draft Shropshire Local Plan. Specific reference should be made to the National Design Guide (October 2019), draft National Model Design Code and the DfT Cycle Infrastructure Design Guide. Draft Policy SP5 needs to be fully justified against national design guidance with references made to it, and more balanced in its overall approach to appreciate where good design principles have been adhered to.	Noted. Shropshire Council considers that draft Policy SP5 is fully justified and consistent with national policy and guidance. It is considered appropriate to clearly state that planning permission will be refused for development of poor design and that fails to take the opportunities available for improving the character and quality of an area, the way it functions where it would adversely affect the well-being of others and where inadequate information has been submitted to demonstrate how new development will ensure the quality of design. Shropshire Council has adopted the West Midlands Design Charter as a material consideration to inform planning decisions and to inform policy development, notably the review of the Local Plan. The West Midlands Design Charter is not intended to set local design policies but seeks to provide a clear and consistent understanding of the West Midlands' place-making expectations, create a level playing field for developers across the region, to define 'good design quality' and indicate what is expected from developers when planning applications are submitted. As such it is considered appropriate to expect all planning applications for new development to set out how they comply with Policy SP5, the principles of the West Midlands Design Charter and comply how they comply with the design requirements of the other policies contained in this Local Plan. Draft Policy SP5 specifies that development must maintain and enhance the character, appearance and historic interests of settlements, streetscenes, groups of buildings, individual buildings and the landscape and, reinforce the hierarchy of networks and spaces in accordance with national planning policy. However for the sake of clarity a minor modification is proposed to also reference national guidance.	Yes	SP5. High Quality Design
A0609	B005	Remove reference to the West Midlands Design Charter within draft Policy SP5. If necessary, a specific Design Guide for Shropshire could be prepared. Alternatively this could be dealt with through site-specific SPD's.	Noted. Shropshire Council have endorsed the West Midlands Combined Authority (WMCA) Design Charter and acknowledged that this can be taken into account as a material consideration to inform planning decisions and to inform policy development, notably the review of the Local Plan. It is considered the principles established within this Design Charter are appropriate in a Shropshire context. This aspect of draft Policy DP5 is complemented by the remainder of draft Policy DP5, the other draft Policies within the draft Shropshire Local Plan and the NPPF. Furthermore, the draft Shropshire Local Plan also, where appropriate, specifies that for large development sites such mechanisms as Supplementary Planning Documents (SPD's) will be used to identify more detailed and location/site specific design considerations.	No	SP5. High Quality Design
A0627	B007	Add wording to draft Policy SP5 stating Neighbourhood Plans, Community Led Plans and Village Design Statements are "material considerations" with regard to overall siting, site layouts, housing styles, and individual dwelling designs. Add wording to SP8(i) & SP9(h) to refer to Village Design Statements.	Noted. The explanation to draft Policy SP5 states "Community-led plans can also provide information on locally distinctive design factors, which should be considered in the context of this Policy". Village Design Statements are a form of community-led plan. However, for clarity a minor modification is proposed to the explanation to draft Policy SP5.	Yes	SP5. High Quality Design
A0629	B007-8	High quality design should incorporate extensive sustainable design features beyond solar. Strengthen with additional guidance: "should be designed to integrate space for both people and wildlife, reduce carbon emissions and minimise water usage".	Noted. Draft Policy SP5 already states "Design and layout positively responds to our changing climate by taking opportunities to maximise energy efficiency (including maximising opportunities for solar gain), minimise carbon emissions and make efficient use of water, in accordance with relevant policies of this Local Plan". Furthermore the draft Shropshire Local Plan should be read as a whole and wider draft policies also address these issues. For instance draft Policies SP3 and DP11 address climate change and minimising carbon emissions; draft Policy SP6 addresses health and wellbeing, including consideration of "the provision of appropriate levels of private and public open space"; draft Policy DP15 addresses provision of open space within development; draft Policies DP14 and DP16 address green infrastructure and landscaping of new development respectively; and draft Policy DP20 addresses water efficiency.	No	SP5. High Quality Design
A0629	B020	Revise para 5 of draft Policy SP5 to read: Permission will be refused for development of poor design and that fails to take the opportunities available for improving the character and quality of an area, the way it functions where it would adversely affect the well-being of others and its adverse impact on the climate and where inadequate information has been submitted to demonstrate how new development will ensure the quality of design. Revise Explanation note 3.40 to read: All planning applications for new development should set out how they comply with Policy SP5, the principles of the West Midlands Design Charter and comply how they comply with the design requirements of the other policies contained in this Local Plan and shall include a clear Carbon Statement which details predicted carbon emissions and the methods and costs of achieving a net zero carbon development.	Para 3a of draft Policy SP5 states "Design and layout positively responds to our changing climate by taking opportunities to maximise energy efficiency (including maximising opportunities for solar gain), minimise carbon emissions and make efficient use of water, in accordance with relevant policies of this Local Plan". Para 3.40 recognises that planning applications should set out how they comply with... "design requirements of the other policies contained in this Local Plan", this includes design requirements of draft Policy DP11. The draft Shropshire Local Plan should be read as a whole.	No	SP5. High Quality Design

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0655	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	Not Specified	Not Specified	SP5 is seeking to “ensure the creation of better places” through “High Quality Design”. It adopts the West Midlands Combined Authorities Design Charter which is a well-drafted set of over-arching principles for designing developments. There are some 14 principles (e.g. “Opportunities for solar gain are maximised where possible”.) Planning applications are meant to set out “how the principles have been considered”. These requests lack specificity and exemplification and consequently the Charter failed in the quest for better design. The White Paper “Planning for the Future” also seeks much firmer guidance, following on from the report of the “Building Better – Building Beautiful Commission”. Planning reforms are likely to require Local Plans to be shorter, more specific and to include unambiguous “Design Codes”. The recent “National Model Design Code” attempts to show how to devise a Design Code and to re-iterate the expectation that LPAs will develop them.
A0674	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	Not Specified	Not Specified	Support the Council’s aspirations for high quality design, which is an important requirement for new development in the County. Aspirations for sites MDR014 and MDR031 seek to deliver high quality design with the proposals carefully designed to provide a local distinctiveness, high quality materials, which seeks to utilise solar gains and integrate Green Infrastructure and sustainable drainage opportunities.
A0682	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	Not Specified	Not Specified	Promoter of Land between Park Lane and the A464 at Shifnal has a track record of high quality design. The Vision Framework and Illustrative Masterplan for land west of Shifnal (appended to representation) demonstrate how wider design considerations have been considered.
A0014	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP5	Not Specified	Not Specified	Not Specified	Policy could be strengthened by including: “should be designed to integrate space for both people and wildlife, reduce carbon emissions and minimise water usage”. High quality design should not compromise sustainability and should incorporate extensive sustainable design features beyond solar.
A0124	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Yes	Yes	Yes	1. Support the modifications made to the policy and para 3.45 at Reg 18. 2. There is concern that the words "wherever possible" have been added in relation to ensuring new development is within walking distance of open space, since this implies that new developments may be permitted in locations that are not within accessible walking distance, contrary to the purpose of the policy to promote health and well-being. 3. There is an opportunity to cross reference to policy DP16.
A0014	B020	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Not Specified	Not Specified	Not Specified	Welcome this draft Policy.
A0014	B021	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6(2)	Not Specified	Not Specified	Not Specified	It is well-established that access to natural greenspace is beneficial for health and well-being. Feel high quality accessible greenspace should be included in ‘external space standards’.
A0014	B022	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6(7)	Not Specified	Not Specified	Not Specified	Weak wording. Walking and cycling routes and infrastructure should be provided in development. Accessible natural greenspace should be specifically referenced and a definition of walking distance provided e.g. NE Access to Natural Greenspace standard.
A0014	B023	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6(5b)	Not Specified	Not Specified	Not Specified	A hierarchy of action is required, with ‘enhance’ as a high priority. Need to recognise value of ‘natural play’ and the need to enhance, retain and protect areas where this can occur.
A0014	B024	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6(7)	Not Specified	Not Specified	Not Specified	Should include promotion of local food supply (allotments/garden space/farmers markets).
A0014	B025	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6(8)	Not Specified	Not Specified	Not Specified	Focus should be on nature-based solutions, i.e. tree planting, to achieve this.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0655	B006	Now is the time to elevate standards by robustly wording policies to ensure they have real lifetime impact.	Noted. Shropshire Council have endorsed the West Midlands Combined Authority (WMCA) Design Charter and acknowledged that this can be taken into account as a material consideration to inform planning decisions and to inform policy development, notably the review of the Local Plan. It is considered the principles established within this Design Charter are appropriate in a Shropshire context. This aspect of draft Policy DP5 is complemented by the remainder of draft Policy DP5, the other draft Policies within the draft Shropshire Local Plan and the NPPF. Furthermore, the draft Shropshire Local Plan also, where appropriate, specifies that for large development sites such mechanisms as Supplementary Planning Documents (SPD's) will be used to identify more detailed and location/site specific design considerations.	No	SP5. High Quality Design
A0674	B003	N/A	Noted.	No	SP5. High Quality Design
A0682	B011	N/A	Noted.	No	SP5. High Quality Design
A0014	B019	Include the following policy requirement "should be designed to integrate space for both people and wildlife, reduce carbon emissions and minimise water usage" within draft Policy SP5.	Noted. Draft Policy SP5 already states "Design and layout positively responds to our changing climate by taking opportunities to maximise energy efficiency (including maximising opportunities for solar gain), minimise carbon emissions and make efficient use of water, in accordance with relevant policies of this Local Plan". Furthermore the draft Shropshire Local Plan should be read as a whole and wider draft policies also address these issues. For instance draft Policies SP3 and DP11 address climate change and minimising carbon emissions; draft Policy SP6 addresses health and wellbeing, including consideration of "the provision of appropriate levels of private and public open space"; draft Policy DP15 addresses provision of open space within development; draft Policies DP14 and DP16 address green infrastructure and landscaping of new development respectively; and draft Policy DP20 addresses water efficiency.	No	SP5. High-Quality Design
A0124	B007	n/a	1. Support welcomed. 2. The Council considers that the SP6 paragraph 7 is appropriate as it would be unreasonable to require all development to be located within walking distance of open space. 3. The Plan should be read as a whole. The Council does not consider a cross reference to policy DP16 to be necessary	No	SP6 Health and Wellbeing
A0014	B020	N/A	Support welcomed.	No	SP6. Health and Wellbeing
A0014	B021	Make reference to high quality accessible greenspace as part of 'external space standards' within para 2 of draft Policy SP6.	Para 2 of draft Policy SP6 recognises the need for provision of appropriate levels of private and public open space, including accessible greenspace, as part of 'external space standards'. Draft Policy DP15 provides further detail of open space requirements for development.	No	SP6. Health and Wellbeing
A0014	B022	1. Para 7 of draft Policy SP6 should require walking and cycling infrastructure to be provided. 2. Para 7 of draft Policy SP6 should reference accessible natural greenspace and provide a definition of walking distance.	1. The Council considers the wording of Para 7 of draft Policy SP6 is appropriate, it promotes provision of safe and well-lit high-quality walking and cycling routes, cycle parking, changing facilities and secure lockers.... This approach recognises the diverse nature of Shropshire and development proposals that come forward. 2. Para 7 of draft Policy SP6 references development being within walking distance of open space, this includes accessible natural greenspace.	No	SP6. Health and Wellbeing
A0014	B023	1. Para 5b of draft Policy SP6 should include a hierarchy of action for sports, leisure, recreation and education facilities including children's playgrounds. 'Enhance' should be the highest priority. 2. Para 5b of draft Policy SP6 should recognise the value of 'natural play' and the need to enhance, retain and protect areas where this can occur.	1. Para 5b of draft Policy SP6 recognises the importance of protecting, retaining or enhancing sports, leisure, recreation and education facilities including children's playgrounds. The specific opportunities vary from site to site, but the draft policy already includes recognition of the importance of enhancing these facilities. 2. Consideration of the various forms of open space, including space for 'natural play' is captured within this draft Policy and draft Policy DP15. Open Space and Recreation.	No	SP6. Health and Wellbeing
A0014	B024	Include promotion of local food supply (allotments/garden space/farmers markets) in para 7 of draft Policy SP6.	This draft policy (alongside other draft policies such as DP15, Open Space and Recreation) already recognises the importance of providing appropriate external space standards, including the provision of appropriate levels of private and public open space - this will include allotments and garden space.	No	SP6. Health and Wellbeing
A0014	B025	Para 8 of draft Policy SP6 should focus on nature-based solutions, i.e. tree planting, to achieve protection against pollution.	The purpose of para 8 of draft Policy SP6 is to identify the policy considerations in relation to the role of new development in ensuring the health and well-being of individuals, communities and places. In this context, an important consideration is protecting against exposure to pollution and it is agreed that green infrastructure (including tree planting) is an important way within which this can be achieved. However this is a high level strategic policy and cannot provide detail on all methods of protecting against exposure to pollution. However, it is directly supported by a more detailed policy on this issue, specifically draft Policy DP18. Pollution and Public Amenity. Para 3 of this draft Policy includes "Opportunities to improve air quality through the provision of green infrastructure in accordance with Policy DP14..."	No	SP6. Health and Wellbeing

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0060	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	No	No	Not Specified	Policy SP6 sets out that new development should ensure the health and well-being of individuals, communities and places. The location of Shifnal's employment land to the north east and future strategic housing to the south and west is contrary to the Neighbourhood Plan and the views of the local community on the future development of their town. A large proportion of Shifnal's existing and new housing stock south and west is split from the proposed employment land to the north east. The existing central railway line makes access from the south and west to the new employment land only achievable through the centre of Shifnal via the Market Place, Victoria Road, Braford Street and Aston Street junctions on a road network too constrained to carry the proposed increased transport movements throughout the town. This is assessed in 'Comments on the Effect on Traffic in Shifnal Caused by the Proposed Employment Land Development (Land off Stanton Road)'. In addition, the infrastructure improvements including highways improvements required by the recent inclusion of 1,100 new dwellings have yet to be implemented in Shifnal and Shifnal does not have the infrastructure or facilities to accommodate 41 ha of employment land and a further 1,500 new dwellings, in addition to the 1,100 new dwellings being built out. The employment and housing allocations are disproportionate to the existing settlement, fail to maintain or enhance the vitality of Shifnal and have a harmful impact on the social wellbeing of the local community, risking the erosion of community cohesion. SC must assess the proposed cumulative growth in Shifnal over this relatively short time from 2012 – 2021 and through the 2038 which will have a negative impact on social wellbeing and social cohesion within Shifnal contrary to Policy SP6.
A0113	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Yes	Yes	Yes	Consider draft Policy SP6 meets the tests of soundness. Point 4(b) of draft Policy SP6 promotes the use of Secured by Design to reduce crime and antisocial behaviour. This is in accordance with the National Planning Policy Framework (NPPF), as paras 91 and 127 seek environments where crime and disorder and the fear of crime do not undermine the quality of life, health of communities and community cohesion. This in turn is supported by paras 124 – 126 of the NPPF, which make clear that Local Plans should detail a clear design vision and state what is expected of applicants when proposing development schemes. Additionally, the policy aligns with paragraph 95 in ensuring planning policies and decisions promote public safety and security requirements by using the most up-to-date information available from the police. It is also consistent with the National Planning Practice Guidance (NPPG). Draft Policy SP6 will also help to promote joint working with West Mercia Police (WMP) by scheme promoters on new developments.
A0148	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Not Specified	Not Specified	Not Specified	Support for this policy. Our land interests at Shifnal are well situated to accommodate residential development, as new dwellings would be located close to existing green spaces and the proposed site layout will promote walking and cycling. Additionally, the proposed development is well located to existing and future planned employment opportunities, community facilities and transport connections, and should therefore be considered favourably in the context of Policy SP6(3).
A0255	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Not Specified	Yes	Not Specified	Proposals advanced in draft Policy SP6 as far as the housing development in the proposed Garden Village at Tasley (BRD030) is concerned, are supported. Inclusion of employment land and community facilities and open amenity land in the project is also supported as this will ensure a sustainable development.
A0286	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	No	No	No	Policy SP6 sets out that new development should ensure the health and well-being of individuals, communities and places. The location of Shifnal's employment land to the north east and future strategic housing to the south and west is contrary to the Neighbourhood Plan and the views of the local community on the future development of their town. A large proportion of Shifnal's existing and new housing stock south and west is split from the proposed employment land to the north east. The existing central railway line makes access from the south and west to the new employment land only achievable through the centre of Shifnal via the Market Place, Victoria Road, Braford Street and Aston Street junctions on a road network too constrained to carry the proposed increased transport movements throughout the town. This is assessed in 'Comments on the Effect on Traffic in Shifnal Caused by the Proposed Employment Land Development (Land off Stanton Road)'. In addition, the infrastructure improvements including highways improvements required by the recent inclusion of 1,100 new dwellings have yet to be implemented in Shifnal and Shifnal does not have the infrastructure or facilities to accommodate 41 ha of employment land and a further 1,500 new dwellings, in addition to the 1,100 new dwellings being built out. The employment and housing allocations are disproportionate to the existing settlement, fail to maintain or enhance the vitality of Shifnal and have a harmful impact on the social wellbeing of the local community, risking the erosion of community cohesion. SC must assess the proposed cumulative growth in Shifnal over this relatively short time from 2012 – 2021 and through the 2038 which will have a negative impact on social wellbeing and social cohesion within Shifnal contrary to Policy SP6.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0060	B010	Council must assess the proposed cumulative growth in Shifnal over this relatively short time from 2012 – 2021 and through the 2038 which will have a negative impact on social wellbeing and social cohesion within Shifnal contrary to Policy SP6.	The Council considers that there is no conflict between Policy SP6 and its strategy for Shifnal. The latter forms part of the overall approach to development in Shropshire which is aimed at achieving all facets of sustainable development, social, economic and environmental.	No	SP6. Health and Wellbeing
A0113	B002	N/A	Noted.	No	SP6. Health and Wellbeing
A0148	B004	n/a	Support welcomed.	No	SP6. Health and Wellbeing
A0255	B008	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Furthermore, proposed allocations have been informed by a proportionate and robust site assessment process, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt, informed by a proportionate and robust Green Belt Review. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.	No	SP6. Health and Wellbeing
A0286	B010	Council must assess the proposed cumulative growth in Shifnal over this relatively short time from 2012 – 2021 and through the 2038 which will have a negative impact on social wellbeing and social cohesion within Shifnal contrary to Policy SP6.	The Council considers that there is no conflict between Policy SP6 and its strategy for Shifnal. The latter forms part of the overall approach to development in Shropshire which is aimed at achieving all facets of sustainable development, social, economic and environmental.	No	SP6. Health and Wellbeing

A0348	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Not Specified	Yes	Not Specified	The acknowledgment of the critical role the historic environment plays in the health and welfare of individuals and communities in Shropshire is supported in this strategic policy
A0393	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	Para 6 & 7. Welcome the inclusion of Sport's England's '10 principles of active design' as a requirement. However, it is not possible for individual developments to contribute properly to well-designed walking and cycling routes without a high level strategy of where these routes need to be. In this respect, Shropshire Council's refusal to develop a Local Walking and Cycling Infrastructure Plan will largely negate the potential benefits of this policy.
A0487	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Not Specified	No	Not Specified	Under Policy DP27 residential developers are expected to provide broadband and mobile communication infrastructure (see HBF response to Policy DP27 below), the developer should not also be expected to ensure access to on-line services, which is beyond the control of a developer. This Bullet Point is inappropriate, Bullet Point 6b should be deleted from Policy SP6. Under Policy SP6 Bullet Point 10, major development proposals (more than 10 dwellings) must be accompanied by a proportionate Health Impact Assessment (HIA) detailing how they respond to contributors to health and well-being, including details of ongoing management or mitigation of issues where necessary. The NPPG confirms that a HIA can serve a useful purpose at planning application stage and consultation with the Director of Public Health as part of the process can establish whether a HIA would be a useful tool for understanding the potential impacts upon wellbeing that development proposals will have on existing health services and facilities (ID : 53-004-20140306). Any requirement for a HIA should be based on a proportionate level of detail in relation the scale and type of development proposed. The requirement for HIA without any specific evidence that an individual scheme is likely to have a significant impact upon the health and wellbeing of the local population is not justified by reference to the NPPG. Only if a significant adverse impact on health and wellbeing is identified should a HIA be required, which sets out measures to mitigate the impact.
A0608	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Not Specified	No	Not Specified	Draft Policy SP6 requires major applications be accompanied by a proportionate Health Impact Assessment (HIA). However, HIAs require a screening and scoping process, and not all developments will require one. A HIA can be in the form of an Intermediate HIA or Rapid HIA. Therefore, draft Policy SP6 should make clear that major developments would be required to screen/scope the need for a HIA and that these can either be intermediate or rapid submissions. As such this draft Policy should be amended to be found sound.
A0609	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Not Specified	No	Not Specified	Support the need for new development to ensure the health and well-being of individuals, communities and place. However, concerned about reference to the Council's Air Quality Action Plans in Part 8 of draft Policy SP6 as whilst an Air Quality Annual Status Report was published in December 2020, no Action Plans have yet been prepared. A draft Air Quality Action Plan for Bridgnorth was published in March 2008, however this is almost 13 years old and question how relevant this remains. For draft Policy SP6 to be considered sound a timeline as to when Action Plans will be prepared should be provided, with this being published in line with, or prior to the adoption of the Local Plan Review.
A0622	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Yes	No	Yes	We support the general ethos of this policy, however it has limited focus on our ageing population and the needs for more care and retirement facilities. Over the coming 20 years there will be a soaring demand for care home spaces as people live longer.
A0629	B007-9	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	Para 6 & 7. Welcome the inclusion of Sport's England's '10 principles of active design' as a requirement. However, it is not possible for individual developments to contribute properly to well-designed walking and cycling routes without a high level strategy of where these routes need to be. In this respect, Shropshire Council's refusal to develop a Local Walking and Cycling Infrastructure Plan will largely negate the potential benefits of this policy.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0313	B010	Council must assess the proposed cumulative growth in Shifnal over this relatively short time from 2012 – 2021 and through the 2038 which will have a negative impact on social wellbeing and social cohesion within Shifnal contrary to Policy SP6.	The Council considers that there is no conflict between Policy SP6 and its strategy for Shifnal. The latter forms part of the overall approach to development in Shropshire which is aimed at achieving all facets of sustainable development, social, economic and environmental.	No	SP6. Health and Wellbeing
A0348	B007	n/a	Noted.	No	SP6. Health and Wellbeing
A0393	B009	Need for high level strategy for walking & cycling routes & Local Walking & Cycling infrastructure Plan	The need to reduce traffic and encourage alternative travel options is a theme running throughout the Plan. There is an emphasis on the location of new development in existing urban centres, the wording of many policies supports pedestrian and cycling options and the Sustainability Appraisal and site assessment process contain criteria aimed at minimising car-based travel and encouraging walking and cycling.	No	SP6. Health and Wellbeing
A0487	B012	Policy SP6 Bullet Point 10 should be deleted.	Paragraph 6b asks developers to ensure access to high speed broadband networks it does not require them to provide a broadband service. No change proposed.	No	SP6. Health and Wellbeing
A0608	B005	Draft Policy SP6 should make clear that major developments would be required to screen/scope the need for a HIA and that these can either be intermediate or rapid submissions.	The Council considers that the screening and scoping stages of HIA are integral to the process and there is no need to make specific reference to this in the policy. No change proposed.	No	SP6. Health and Wellbeing
A0609	B006	Remove reference to Air Quality Action Plans or provide a timeline of when Action Plans will be prepared (in line with, or prior to the adoption of the Local Plan Review).	The Council is satisfied that relevant and appropriate Air Quality Action Plans will be produced during the lifetime of the Plan. No change proposed.	No	SP6. Health and Wellbeing
A0622	B004	We suggest that a network of new facilities could be created across the County and not just focused on the main towns. Some of the community hubs are well placed to accept and appropriate mix of housing, elderly care facilities, medical centres, recreational facilities etc. The policy n=should be modified to allow this network of facilities to come forward.	Other policies in the Local Plan provide for the housing, services and facilitates and as the Plan should be read as a whole, the Council does not consider it necessary to make any changes.	No	SP6. Health and Wellbeing
A0629	B007-9	Need for high level strategy for walking & cycling routes & Local Walking & Cycling infrastructure Plan	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	SP6. Health and Wellbeing

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0635	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Not Specified	No	Not Specified	The Plan lacks a coherent policy for protecting and improving walking routes and promoting walking, within and between communities and in the wider countryside. The way the policies are written does not give a clear policy framework for walking for health and leisure and the infrastructure it needs. Policies lack clarity in their application and do not recognise that the local footpath network is a key part of community infrastructure to achieve active and healthy lifestyles. The Plan has missed the opportunity to give a clear steer that walking is a key element in achieving active lifestyles. Policy SP6. Health and Wellbeing. The only policy in SP6 relating to walking or walking routes is Policy SP6 7 (NB the numbering is incorrect in the consultation draft, this is the first No 7) relating to “safe and well-lit high quality walking and cycling routes”. The policy needs clarifying – does it just apply to routes within (?new) settlements or possibly just to destinations? Despite the fact that local footpath routes are a very important part of community infrastructure that promotes healthy and active lifestyles (SP6 5a) they are not mentioned within SP6 5a which only relates to “facilities”. There is no policy relating to protecting, improving and promoting footpath infrastructure and Rights of Way in the countryside.
A0636	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	No	No	No	Policy SP6 sets out that new development should ensure the health and well-being of individuals, communities and places. The location of Shifnal’s employment land to the north east and future strategic housing to the south and west is contrary to the Neighbourhood Plan and the views of the local community on the future development of their town. A large proportion of Shifnal’s existing and new housing stock south and west is split from the proposed employment land to the north east. The existing central railway line makes access from the south and west to the new employment land only achievable through the centre of Shifnal via the Market Place, Victoria Road, Braford Street and Aston Street junctions on a road network too constrained to carry the proposed increased transport movements throughout the town. This is assessed in 'Comments on the Effect on Traffic in Shifnal Caused by the Proposed Employment Land Development (Land off Stanton Road). In addition, the infrastructure improvements including highways improvements required by the recent inclusion of 1,100 new dwellings have yet to be implemented in Shifnal and Shifnal does not have the infrastructure or facilities to accommodate 41 ha of employment land and a further 1,500 new dwellings, in addition to the 1,100 new dwellings being built out. The employment and housing allocations are disproportionate to the existing settlement, fail to maintain or enhance the vitality of Shifnal and have a harmful impact on the social wellbeing of the local community, risking the erosion of community cohesion. SC must assess the proposed cumulative growth in Shifnal over this relatively short time from 2012 – 2021 and through the 2038 which will have a negative impact on social wellbeing and social cohesion within Shifnal contrary to Policy SP6.
A0637	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	No	No	No	Policy SP6 sets out that new development should ensure the health and well-being of individuals, communities and places. The location of Shifnal’s employment land to the north east and future strategic housing to the south and west is contrary to the Neighbourhood Plan and the views of the local community on the future development of their town. A large proportion of Shifnal’s existing and new housing stock south and west is split from the proposed employment land to the north east. The existing central railway line makes access from the south and west to the new employment land only achievable through the centre of Shifnal via the Market Place, Victoria Road, Braford Street and Aston Street junctions on a road network too constrained to carry the proposed increased transport movements throughout the town. This is assessed in 'Comments on the Effect on Traffic in Shifnal Caused by the Proposed Employment Land Development (Land off Stanton Road). In addition, the infrastructure improvements including highways improvements required by the recent inclusion of 1,100 new dwellings have yet to be implemented in Shifnal and Shifnal does not have the infrastructure or facilities to accommodate 41 ha of employment land and a further 1,500 new dwellings, in addition to the 1,100 new dwellings being built out. The employment and housing allocations are disproportionate to the existing settlement, fail to maintain or enhance the vitality of Shifnal and have a harmful impact on the social wellbeing of the local community, risking the erosion of community cohesion. SC must assess the proposed cumulative growth in Shifnal over this relatively short time from 2012 – 2021 and through the 2038 which will have a negative impact on social wellbeing and social cohesion within Shifnal contrary to Policy SP6.
A0648	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Yes	No	Yes	Whilst we broadly agree with the overall policy, we consider that singling out hot food takeaways as a particular threat to healthy eating is not borne out by evidence. Indeed, research (Robinson et al, 2018) has found that the energy content of full service restaurant meals in the UK tends actually to be higher than take-away meals.
A0665	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	6.6a	Yes	Yes	Yes	The Trust broadly considers this policy to be legally compliant and sound in terms of seeking to protect valued facilities from loss in line with paragraph 92 of the NPPF (2019). However, we consider its effectiveness and robustness would be improved with the addition of criteria either within the policy or supporting text which outlines how applicants would be expected to justify loss.
A0037	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	No	Not Specified	Concerned draft Policy SP7 fails the 'justified', 'effective' and 'consistent with national policy' soundness tests. -Draft Policy SP7 makes residential development guidelines significant policy considerations, and states that whilst not ceilings to development, going beyond them by too great a degree could result in unsustainable development. However, the Council has presented no evidence that residential development guidelines represent sustainable levels of development or that higher levels of development represent unsustainable levels, taking into account reasonable alternatives. -Applying settlement guidelines which restrict development runs counter to para 59 of the National Planning Policy Framework (NPPF) which seeks to significantly boost the supply of homes and para 60 and 73 of the NPPF regarding housing requirements and land supply being minimums. -Concerned that draft Policy SP7 in combination with draft Policy DP1 will adversely impact on housing delivery. Draft Policy DP1 seeks a higher proportion of smaller houses, effectively requiring more units on a site to achieve the same saleable floorspace. Viability in Shropshire is finely balanced in many parts of the County (as demonstrated within the Shropshire Viability Assessment), so saleable floorspace must be maximised to ensure viability. So, it is difficult to achieve the mix sought under draft Policy DP1 if doing so exceeds the settlements residential guidelines. As such draft Policy SP7 in combination with draft Policy DP1 could render allocations undeliverable and create deliverability issues across the County.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0635	B003	An additional policy is needed in SP6 to protect and improve the footpath network to connect the countryside with settlements and to promote walking for active lifestyles. Alternatively the Policy SP6 5a relating to community infrastructure should be expanded to include local footpath networks. Policy SP6 first7 needs to be amended to clarify what it applies to.	The Council considers that the need to encourage alternative travel options is a theme running throughout the Plan and is given particular emphasis in Policy DP28: Communications and Transport in relation to the Hierarchy of Sustainable Transport. The Local Plan places an emphasis on the location of new development in existing urban centres and the wording of many policies supports pedestrian, cycling and other sustainable transport options. No change proposed.	No	SP6. Health and Wellbeing
A0636	B010	Council must assess the proposed cumulative growth in Shifnal over this relatively short time from 2012 – 2021 and through the 2038 which will have a negative impact on social wellbeing and social cohesion within Shifnal contrary to Policy SP6.	The Council considers that there is no conflict between Policy SP6 and its strategy for Shifnal. The latter forms part of the overall approach to development in Shropshire which is aimed at achieving all facets of sustainable development, social, economic and environmental.	No	SP6. Health and Wellbeing
A0637	B010	Council must assess the proposed cumulative growth in Shifnal over this relatively short time from 2012 – 2021 and through the 2038 which will have a negative impact on social wellbeing and social cohesion within Shifnal contrary to Policy SP6.	The Council considers that there is no conflict between Policy SP6 and its strategy for Shifnal. The latter forms part of the overall approach to development in Shropshire which is aimed at achieving all facets of sustainable development, social, economic and environmental.	No	SP6. Health and Wellbeing
A0648	B001	Either widen part 7 (b) of the policy to include all food and drink uses (Class E, HFT, pubs, pubs with expanded food provision) or delete part 7 (b).	The Council considers that the policy addresses all relevant issues appropriately. No change proposed.	No	SP6. Health and Wellbeing
A0665	B001	We recommend that such evidence should include evidence of marketing over a period of 12-24 months through recognised local, regional and national agents and channels appropriate to the type of facility being marketed, at a price consistent with the facility's existing use and condition without development potential. It should also be demonstrated that there is no longer a need for the facility.	The Council considers that paragraph 3.46 covers this issue. No change proposed.	No	SP6. Health and Wellbeing
A0037	B006	Draft Policy SP7 should reflect the conclusions of the Shropshire Viability Study. Consent should be granted for 120-130% of the residential guideline in order to deliver 100% of housing needs. Meaning a 20-30% non-delivery allowance being applied. Draft Policy SP7 should be modified to: -Under point 4, remove reference to 'significant' in relation to residential development guidelines. -Under point 3: recognise the need to include a 20% non-delivery allowance in relation to outstanding commitments; reference the delivery of the housing mix in draft Policy DP1; and reference the viability and delivery of the Plans allocated sites.	Noted. The purpose of the draft Shropshire Local Plan is to provide a framework for the sustainable development of Shropshire. A key part of this process involves establishing an appropriate strategy for the level and distribution of development. This is achieved, in part, by identifying residential development guidelines for settlements. The proposed residential development guidelines have been subject to detailed consideration by the Council, infrastructure providers and the community and as such it is only right that they are recognised as significant policy considerations. However, draft Policy SP7 recognises that these residential development guidelines are not intended to represent a ceiling on development, but that going beyond it by too great a degree could result in unsustainable development. As such, draft Policy SP7 sets out a clear set of considerations which regard will be had to in determining planning applications which would result in the provision of more dwellings that the settlement's residential development guideline. These include benefits arising from the proposal (aside for increased housing supply), likelihood of delivery of existing commitments, any cumulative impacts of development and increase relative the relevant guideline. As such, Shropshire Council considers that draft Policy SP7 is justified, effective and consistent with national policy. It is also considered that draft Policy DP1 is complementary in that it ensures the effective use of land and that the forms of housing delivered are responsive to the needs of local communities.	No	SP7. Managing Housing Development

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0094	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	Yes	Not Specified	Draft Policy SP7 recognises the important of residential guidelines for settlements. This is consistent with draft Policies SP1 and SP2 which together seek to support the NPPF's approach to significantly boosting housing supply whilst reflecting the unique character of Shropshire's urban and rural settlements, through appropriate distribution of development. Removal of development boundaries or flexible application of housing guidelines would potentially open up further opportunity for growth, as a positive, but would also lead to uncontrolled and unsustainable development, conflict with other policies within the draft Shropshire Local Plan and lead to uncertainty on delivery which is counter to the evidence led approach and consultation processes for development of the draft Shropshire Local Plan. The purpose of the Plan is to provide a consistent framework for future development across Shropshire and as such the guidelines in draft Policy SP7 are considered important and sound.
A0148	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	Not Specified	Not Specified	Significant concern regarding the form of the proposed housing trajectory in that it fails to adequately detail the specific expected rate of housing delivery over the plan period. The failure to outline specific delivery rates from the identified housing allocations renders the Policy SP7 unsound given its conflict with the requirement of NPPF paragraph 73.
A0350	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	No	Not Specified	Consider draft Policy SP7 fails the 'justified', 'effective' and 'consistent with national policy' tests of soundness. It is 'not justified' as para 3 of draft Policy SP7 proposes that settlement guidelines are 'significant policy considerations'. Whilst the proposed supporting text to draft Policy SP7 notes these guidelines are not a ceiling to development, in practice operation of para 3 of draft Policy SP7 restricts the amount of development in identified sustainable settlements. No evidence is presented that these guidelines represent appropriate strategies, taking into account reasonable alternatives or that they represent a sustainable level of development (or that more would be unsustainable). It is 'not consistent with national policy' as applying settlement guidelines to restrict development is contrary to para 59 of the National Planning Policy Framework (NPPF) which seeks to boost the supply of housing and para's 60 and 73 of the NPPF regarding treating housing requirements as minimums. It is 'not effective' as in combination with draft Policy DP1 it will adversely impact on housing delivery by making proposed allocations undeliverable. This is because draft Policy SP7 limits housing numbers in a settlement and draft Policy DP1 seeks a higher proportion of smaller houses, effectively requiring more units on a site to achieve the same saleable floorspace (the Viability Study undertaken to inform the draft Shropshire Local Plan demonstrates that viability is finely balanced in many parts of the County (extract provided within representation), so saleable floorspace must be maximised), which will be difficult to achieve if doing so exceeds a settlement guideline.
A0357	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Yes	No	Not Specified	Consider draft Policy SP7 fails the 'justified', 'effective' and 'consistent with national policy' tests of soundness. It is 'not justified' as para 3 of draft Policy SP7 proposes that settlement guidelines are 'significant policy considerations'. Whilst the proposed supporting text to draft Policy SP7 notes these guidelines are not a ceiling to development, in practice operation of para 3 of draft Policy SP7 restricts the amount of development in identified sustainable settlements. No evidence is presented that these guidelines represent appropriate strategies, taking into account reasonable alternatives or that they represent a sustainable level of development (or that more would be unsustainable). It is 'not consistent with national policy' as applying settlement guidelines to restrict development is contrary to para 59 of the National Planning Policy Framework (NPPF) which seeks to boost the supply of housing and para's 60 and 73 of the NPPF regarding treating housing requirements as minimums. It is 'not effective' as in combination with draft Policy DP1 it will adversely impact on housing delivery by making proposed allocations undeliverable. This is because draft Policy SP7 limits housing numbers in a settlement and draft Policy DP1 seeks a higher proportion of smaller houses, effectively requiring more units on a site to achieve the same saleable floorspace/benchmark land value expected by landowners (the Viability Study undertaken to inform the draft Shropshire Local Plan demonstrates that viability is finely balanced in many parts of the County (extract provided within representation), so saleable floorspace must be maximised), which will be difficult to achieve if doing so exceeds a settlement guideline. This also suggests Planning Permissions will be required for 200% of the residential guideline figure to achieve 100% of the guidelines, yet draft Policy SP7 does not make sufficient allowance for a high proportion of sites being unviable.
A0381	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	Not Specified	Not Specified	Supportive of Draft Policy SP7, which states that in addition to supporting the development of housing on the allocations contained within the Local Plan, positive consideration will also be given to other sustainable housing development. It adds that additional housing development opportunities which would support the reuse of disused land or premises or contribute towards achieving wider town centre regeneration will be supported. This draft policy lends support for the residential development of the former Travis Perkins site. Although the site does contain existing buildings and extensive hard standings associated with its former use and some small-scale temporary light industrial uses that are still in operation, it is largely vacant and, in overall terms, is underutilised. Within the subsequent pre-application advice issued in January 2021, the Local Authority's Highways Team advised that the site is not suited to serve the current/former permitted land use, nor is it suited to serve an intensive commercial/employment land use. The residential development that is proposed would bring the site back into full use and would contribute positively towards the regeneration objectives for the wider town centre.
A0385	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	Yes	Not Specified	Support the monitoring led approach to residential development beyond development boundaries proposed within draft Policy SP10. However, consider sufficient housing land supply and flexibility should be identified and prioritised.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0094	B002	n/a	Noted.	No	SP7. Managing Housing Development
A0148	B005	The failure to outline specific delivery rates from the identified housing allocations renders the Policy SP7 unsound given its conflict with the requirement of NPPF paragraph 73.	A cautious high level trajectory for proposed allocations is provided within Appendix 7 of the draft Shropshire Local Plan, based on proactive discussions with site promoters. If ultimately adopted, trajectories for sites will be kept under review as part of the Five Year Housing Land Supply Statement.	No	SP7. Managing Housing Development
A0350	B002	Draft Policy SP7 should be modified to: -Under point 3, remove reference to 'significant' in relation to residential development guidelines. -Under point 3b, recognise the need to include a 20% non-delivery allowance in relation to outstanding commitments. -Under point 3, expand the list of considerations, in situations where a residential guideline would be exceeded, to include two new considerations, specifically the delivery of the housing mix sought in draft Policy DP1 and the viability and delivery of the plans allocated sites.	Noted. The purpose of the draft Shropshire Local Plan is to provide a framework for the sustainable development of Shropshire. A key part of this process involves establishing an appropriate strategy for the level and distribution of development. This is achieved, in part, by identifying residential development guidelines for settlements. The proposed residential development guidelines have been subject to detailed consideration by the Council, infrastructure providers and the community and as such it is only right that they are recognised as significant policy considerations. However, draft Policy SP7 recognises that these residential development guidelines are not intended to represent a ceiling on development, but that going beyond it by too great a degree could result in unsustainable development. As such, draft Policy SP7 sets out a clear set of considerations which regard will be had to in determining planning applications which would result in the provision of more dwellings that the settlement's residential development guideline. These include benefits arising from the proposal (aside for increased housing supply), likelihood of delivery of existing commitments, any cumulative impacts of development and increase relative the relevant guideline. As such, Shropshire Council considers that draft Policy SP7 is justified, effective and consistent with national policy. It is also considered that draft Policy DP1 is complementary in that it ensures the effective use of land and that the forms of housing delivered are responsive to the needs of local communities.	No	SP7. Managing Housing Development
A0357	B003	Draft Policy SP7 should be modified to: -Under point 3, remove reference to 'significant' in relation to residential development guidelines. -Under point 3b, recognise the need to include a 25% non-delivery allowance in relation to outstanding commitments. -Under point 3, expand the list of considerations, in situations where a residential guideline would be exceeded, to include two new considerations, specifically the delivery of the housing mix sought in draft Policy DP1 and the viability and delivery of the plans allocated sites.	Noted. The purpose of the draft Shropshire Local Plan is to provide a framework for the sustainable development of Shropshire. A key part of this process involves establishing an appropriate strategy for the level and distribution of development. This is achieved, in part, by identifying residential development guidelines for settlements. The proposed residential development guidelines have been subject to detailed consideration by the Council, infrastructure providers and the community and as such it is only right that they are recognised as significant policy considerations. However, draft Policy SP7 recognises that these residential development guidelines are not intended to represent a ceiling on development, but that going beyond it by too great a degree could result in unsustainable development. As such, draft Policy SP7 sets out a clear set of considerations which regard will be had to in determining planning applications which would result in the provision of more dwellings that the settlement's residential development guideline. These include benefits arising from the proposal (aside for increased housing supply), likelihood of delivery of existing commitments, any cumulative impacts of development and increase relative the relevant guideline. As such, Shropshire Council considers that draft Policy SP7 is justified, effective and consistent with national policy. It is also considered that draft Policy DP1 is complementary in that it ensures the effective use of land and that the forms of housing delivered are responsive to the needs of local communities.	No	SP7. Managing Housing Development
A0381	B004	N/A	N/A	No	SP7. Managing Housing Development
A0385	B002	N/A	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. Shropshire Council also considers that it has a robust five year housing land supply and robust supply over the proposed Plan period, based on the proposals within the draft Shropshire Local Plan. Appendix 5 illustrates this supply - identifying completions, commitments (including existing and proposed allocations) and appropriate windfall allowances (for settlements with development guidelines), which totals around 31,000 dwellings (excluding any windfall allowance for the wider rural area). The Housing Land Supply will be kept under review as part of the annual assessment of the Five Year Housing Land Supply.	No	SP7. Managing Housing Development

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0387	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	Yes	Not Specified	Support the monitoring led approach to residential development beyond development boundaries proposed within draft Policy SP10. However, consider sufficient housing land supply and flexibility should be identified and prioritised.
A0410	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	No	Not Specified	Consider not enough affordable houses are built and there is no coherent Policy to get houses for different need groups into the right places. With regard to affordable housing, the draft Shropshire Local Plan targets 25% of housing to be affordable, whilst proposing 10% from sites on the north and 20% from sites in the south. This will make the problem of the overall inadequate proportion of affordable houses worse, not better. Part of the problem is viability, more of this challenge could be taken on through the Council's housing company. With regard to needs of different groups, the Shropshire Strategic Housing Market Assessment (SHMA) sets out the housing needs of different segments of society, but draft Policies in the draft Shropshire Local Plan do not really take any significant notice of it. More Right Home Right Place Surveys should be undertaken to identify housing needs of Parish across Shropshire.
A0430	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	No	Not Specified	Whilst this monitoring-led approach to the delivery of the housing strategy is supported, the Council should ensure in the first instance that sufficient flexibility for housing land supply is provided in the draft SLP in a way that supports housing delivery in line with the spatial strategy.
A0445	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	Yes	Not Specified	Policy SP7 recognises the importance of the residential guidelines for settlements, set out in Policies S1- S20 as an important policy consideration in managing future developments. It reflects the importance of settlement policy boundaries in strictly controlling development. This Policy is consistent with the Shropshire Test set out in Policy SP1 and the Strategic Approach in Policy SP2 which together support the NPPFs approach to significantly boosting housing supply whilst reflecting the unique character across Shropshire's urban and rural settlements through appropriate application and distribution of development across a settlement hierarchy. Removal of development boundaries or flexible application of the housing guidelines as a minimum could lead to uncontrolled and unsustainable development thereby conflicting with other policies within the Plan.
A0446	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	Yes	Not Specified	Policy SP7 recognises the importance of the residential guidelines for settlements, set out in Policies S1- S20 as an important policy consideration in managing future developments. It reflects the importance of settlement policy boundaries in strictly controlling development. This Policy is consistent with the Shropshire Test set out in Policy SP1 and the Strategic Approach in Policy SP2 which together support the NPPFs approach to significantly boosting housing supply whilst reflecting the unique character across Shropshire's urban and rural settlements through appropriate application and distribution of development across a settlement hierarchy. Removal of development boundaries or flexible application of the housing guidelines as a minimum could lead to uncontrolled and unsustainable development thereby conflicting with other policies within the Plan.
A0461	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6	Not Specified	Not Specified	Not Specified	Support the use of policies group by area, referred to as 'Place Plan Areas'. This approach allows local character, need and contexts to be accounted for within the Strategic Planning process. However, object to the strict controlling of additional market housing as set in response to Policy SP9.
A0496	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	No	Not Specified	The National Planning Policy Framework (NPPF) is clear there is a need to consider brownfield land for residential development and that where unallocated sites for particular uses are not likely to come forward, they should be considered for alternative uses. Specifically para 118(d) which relates to how planning policies and decisions should promote and support development of under-utilised land and buildings, especially if this helps to meet identified housing needs where land supply is constrained and available sites can be used more effectively. Para 121 advises that Local Authorities should take a positive approach to applications for alternative uses of unallocated developed land, where it would help meet identified needs. In particular use of retail and employment land for homes in areas of high demand, provided these does not undermine key economic sectors or sites/town centre viability and is compatible with the NPPF and making more effective use of sites providing community services, where it also maintains/improves the quality of these services and access to open space. To ensure consistency with the NPPF, consider the draft Shropshire Local Plan should be more flexible to allow for circumstances whereby residential development outside of development boundaries (and outside of Green Belt) on brownfield land can be supported, particularly where an existing use on the site can no longer be sustained.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0387	B003	N/A	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. Shropshire Council also considers that it has a robust five year housing land supply and robust supply over the proposed Plan period, based on the proposals within the draft Shropshire Local Plan. Appendix 5 illustrates this supply - identifying completions, commitments (including existing and proposed allocations) and appropriate windfall allowances (for settlements with development guidelines), which totals around 31,000 dwellings (excluding any windfall allowance for the wider rural area). The Housing Land Supply will be kept under review as part of the annual assessment of the Five Year Housing Land Supply.	No	SP7. Managing Housing Development
A0410	B006	Include a Policy to enable affordable housing developments to be achieved more easily, where housing needs surveys have indicated a particular need for affordable housing. Draft Policy SP7 should be amended to take account of the housing needs of the different segments of society, as evidenced in the Shropshire Strategic Housing Market Assessment (SHMA).	The draft Shropshire Local Plan should be read as a whole. Shropshire Council considers that draft Policies DP3-DP7 provide an appropriate and effective policy framework for the delivery of appropriate affordable housing. Shropshire Council also considers that the needs of particular groups within society have been considered and the draft Policies provide an appropriate and effective policy framework that appropriately responds to these needs.	No	SP7. Managing Housing Development
A0430	B001	The Council should ensure in the first instance that sufficient flexibility for housing land supply is provided in the draft SLP in a way that supports housing delivery in line with the spatial strategy.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. Shropshire Council also considers that it has a robust five year housing land supply and robust supply over the proposed Plan period, based on the proposals within the draft Shropshire Local Plan. Appendix 5 illustrates this supply - identifying completions, commitments (including existing and proposed allocations) and appropriate windfall allowances (for settlements with development guidelines), which totals around 31,000 dwellings (excluding any windfall allowance for the wider rural area). The Housing Land Supply will be kept under review as part of the annual assessment of the Five Year Housing Land Supply.	No	SP7. Managing Housing Development
A0445	B002	n/a	Noted.	No	SP7. Managing Housing Development
A0446	B002	n/a	Noted.	No	SP7. Managing Housing Development
A0461	B004	n/a	Noted. The purpose of the draft Shropshire Local Plan is to provide a framework for the sustainable development of Shropshire. A key part of this process involves establishing an appropriate strategy for the level and distribution of development. This is achieved, in part, by identifying residential development guidelines for settlements. The proposed residential development guidelines have been subject to detailed consideration by the Council, infrastructure providers and the community and as such it is only right that they are recognised as significant policy considerations. However, draft Policy SP7 recognises that these residential development guidelines are not intended to represent a ceiling on development, but that going beyond it by too great a degree could result in unsustainable development. As such, draft Policy SP7 sets out a clear set of considerations which regard will be had to in determining planning applications which would result in the provision of more dwellings that the settlement's residential development guideline. These include benefits arising from the proposal (aside for increased housing supply), likelihood of delivery of existing commitments, any cumulative impacts of development and increase relative the relevant guideline. As such, Shropshire Council considers that draft Policy SP7 is justified, effective and consistent with national policy. It is also considered that draft Policy DP1 is complementary in that it ensures the effective use of land and that the forms of housing delivered are responsive to the needs of local communities.	No	SP7. Managing Housing Development
A0496	B001	Para 4 of draft Policy SP7, relating to circumstances where market housing can occur outside development boundaries, should be amended to include sites that meet the following: brownfield land, outside the Green Belt and no longer viable for its current use.	Noted. Shropshire Council considers that the existing criteria within para 4 of draft Policy SP7 are appropriate. The draft Shropshire Local Plan should be read as a whole. Draft Policy DP18 specifically addresses the re-use of previously developed (brownfield) land and stipulates the circumstances within which such development will be supported.	No	SP7. Managing Housing Development

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0506	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	No	Not Specified	The community of Longden are unanimously opposed to Community Hub status. Concerned identification of Longden as a Community Hub with a development boundary and no allocations could lead to exhaustion of infill sites and pressure to develop outside the development boundary (as experienced between 2014 and 2020 when the Parish Council and Longden residents withstood development pressure, resulting in four appeal being dismissed, but with a settlement guideline which is unrealistic to achieve within the village). Draft Policy SP7 in addition to draft Policy SP8 are significant problems for Longden. Support submission made by Longden Parish Council and Longden Village Action Group. Submission supported by other residents (documented within an Appendix to this representation).
A0582	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	Yes	Not Specified	The strategy for managing housing development set out in Policy SP7 is supported. In particular, the reference in SP7.4 to considering additional housing development outside of the identified settlement development boundaries when necessary, provides flexibility to enable the delivery of Shropshire's identified housing requirements. As noted in the policy, there may be circumstances where the development guidelines for a particular settlement are unlikely to be met. This may be due to site specific constraints being identified on a site following its allocation for development. Such constraints may limit the level of market housing that can be delivered on that particular site and as such there will be a demonstrable risk to the delivery of that site allocation within the plan period. In such circumstances, it is only appropriate that other suitable sites are considered to accommodate the identified housing need for that settlement. As noted in the policy, those additional sites may require land that is currently outside of the settlement boundary. This flexible approach will help ensure housing is delivered in accordance with the identified requirements of the Local Plan period and reflects the NPPF's presumption in favour of sustainable development. As set out in paragraph 3.50 of the SLP, the development boundary of a settlement is a mechanism to positively manage development. This approach is welcomed.
A0586	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	No	No	Not Specified	No allowance is made for reserve sites to meet any shortfall in housing delivery or an increase in affordability issues in locations such as Shifnal (the pandemic has already impacted on house prices in commutable rural locations, worsening affordability), which has the second words lower quartile affordability ratio and worst median affordability ratio in the County.
A0595	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Yes	No	Yes	Policy aims and aspirations are confusing in dual aspects of supporting and explaining how the Plan's housing requirements will be delivered and seeking to provide some flexibility and adaptability to changing circumstances particularly in the context of the Housing Delivery Test. The Policy appears to resist housing development which would lead to the residential development guideline for a settlement being exceeded. This may be appropriate where disproportionate growth is proposed in less sustainable locations and settlements, but where additional development is proposed in sustainable locations (e.g. Shrewsbury) and even exceeds its development guideline, such development which would otherwise be sustainable should not be restricted by the development guideline cap. Part 4 of the policy describes circumstances where additional market housing development outside of settlement development boundaries will be potentially acceptable. This additional flexibility outside of settlement boundaries is welcomed but policy is too ambiguous and limited in its application. Giving some flexibility to meet housing needs would make the plan sound. There are additional circumstances which should allow the council to look more flexibly at proposals for housing outside of Settlement Boundaries including where the council is failing their Housing Delivery Test, the absence of a 5 year supply or generally failure in the plan to deliver the housing requirement within the plan period. In this specific regard, this is not just on an individual settlement allocation basis but Shropshire wide, particularly as shortfalls in delivery in one settlement could still be sustainably be met in another. Such an approach would avoid the need for an early review of the plan and increase its longevity.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0506	B002	Longden should not be identified as a Community Hub, rather it should form a Community Cluster. Draft Policy SP7 should be modified to ensure large scale development proposals for affordable housing outside Community Clusters will not be approved.	Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Longden. As such it is considered appropriate for Longden to be identified as a proposed Community Hub. However recognising the level of development that has occurred over recent years within the settlement, and its characteristics, constraints and opportunities the draft Shropshire Local Plan has identified a low residential development guideline of some 50 dwellings (equating to just over 2 dwellings per annum) for the settlement. Completions already achieved within the draft Shropshire Local Plan period from 2016-2038 and current commitments achieve around half of this proposed residential guideline. As such, it has been concluded that no specific site allocations are required to achieve the proposed residential development guideline and the remaining windfall allowance is some 27 dwellings (as at 31st March 2019). This is considered an appropriate, effective, sustainable and deliverable approach. Shropshire Council also considers that draft Policy SP7, alongside other relevant draft Shropshire Local Plan policies, is an appropriate and effective means of managing housing development.	No	SP7. Managing Housing Development
A0582	B011	n/a	Noted.	No	SP7. Managing Housing Development
A0586	B002	Include an allowance for reserve sites within the housing land supply, in locations such as Shifnal.	Noted. Shropshire Council considers it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. Draft Policy SP7 and other relevant policies provide the policy mechanism to respond to circumstances where the housing guidelines for particular settlements appears unlikely to be met over the proposed Plan period, or where there are specific considerations set out in the Settlement Policies. As such it is not considered necessary or appropriate to include a reserve site policy.	No	SP7. Managing Housing Development
A0595	B006	The policy should be amended as per response to allow the council to look more flexibly at proposals for housing outside of Settlement Boundaries including where the council is failing their Housing Delivery Test, the absence of a 5 year supply or generally failure in the plan to deliver the housing requirement within the plan period ( not just on an individual settlement basis but for Shropshire as shortfalls in delivery in one settlement could still be sustainably be met in another).	Noted. The purpose of the draft Shropshire Local Plan is to provide a framework for the sustainable development of Shropshire. A key part of this process involves establishing an appropriate strategy for the level and distribution of development. This is achieved, in part, by identifying residential development guidelines for settlements. The proposed residential development guidelines have been subject to detailed consideration by the Council, infrastructure providers and the community and as such it is only right that they are recognised as significant policy considerations. However, draft Policy SP7 recognises that these residential development guidelines are not intended to represent a ceiling on development, but that going beyond it by too great a degree could result in unsustainable development. As such, draft Policy SP7 sets out a clear set of considerations which regard will be had to in determining planning applications which would result in the provision of more dwellings that the settlement's residential development guideline. These include benefits arising from the proposal (aside for increased housing supply), likelihood of delivery of existing commitments, any cumulative impacts of development and increase relative the relevant guideline. As such, Shropshire Council considers that draft Policy SP7 is justified, effective and consistent with national policy. It is also considered that draft Policy DP1 is complementary in that it ensures the effective use of land and that the forms of housing delivered are responsive to the needs of local communities. Draft Policy SP4 deals with circumstances where there are no policies relevant to a planning application or the policies which are most important to determining the application are out of date at the time of making the decision.	No	SP7. Managing Housing Development

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0598	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	No	Not Specified	The intention of draft Policy SP7 is to provide an arbitrary cap on the number of dwellings delivered in any given settlement - including in the strategic, principal and key centres. It creates a two stage assessment of planning applications, the 1st against draft policies, the 2nd against criterion 3 of draft Policy SP7. Object to this two stage process. Firstly, no evidence is presented to justify the inclusion of such an approach under criterion 3, including the need to demonstrate that exceeding the residential guidelines is likely to cause adverse harm. Secondly, residential guidelines to which this criterion relate are not based on 'maxima' or 'caps' or an other 'limitation' on the number of homes that could be delivered at any given settlement, therefore questions the need for it. Therefore, seeking to apply a 'cap' on development is at clear odds with the purpose of using 'guidelines'. Thirdly, this appears to be an attempt to define, in policy, what material circumstances should be applied by the decision-maker, this is not the role of the Plan. Fourthly, question the necessity for the additional criterion given that the draft Shropshire Local Plan contains a range of policies that allow the decision-maker to determine whether or not proposals are acceptable in planning terms. As such, consider criterion 3 of draft Policy SP7 is unsound and should be deleted.
A0607	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	Yes	Not Specified	Policy SP7 recognises the importance of the residential guidelines for settlements, set out in Policies S1- S20 as an important policy consideration in managing future developments. It reflects the importance of settlement policy boundaries in strictly controlling development. This Policy is consistent with the Shropshire Test set out in Policy SP1 and the Strategic Approach in Policy SP2 which together support the NPPFs approach to significantly boosting housing supply whilst reflecting the unique character across Shropshire's urban and rural settlements through appropriate application and distribution of development across a settlement hierarchy. Removal of development boundaries or flexible application of the housing guidelines as a minimum could lead to uncontrolled and unsustainable development thereby conflicting with other policies within the Plan.
A0621	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	No	Not Specified	It is considered that the wording of draft Policy SP7 does not provide sufficient flexibility in line with the NPPF and NPPG requirements for plan making. In light of the impact on assumed housing delivery caused by the economic climate, combined with the proposed increase in the housing requirement contained in the revised standard methodology, the Black Country unmet need and recent delivery rates, the housing need is likely to be higher than that identified. Sustainable development opportunities adjacent to the settlement boundaries of identified growth locations, such as Shifnal, should therefore be maximised. Sites SHF018c and SHF032 are both sustainably located, within walking distance of existing Shifnal town centre services, and close to primary and secondary schools on the eastern side of Shifnal. All sites are well-located on the eastern edge of the Town, adjacent to existing and proposed employment uses and with convenient access via Stanton Road to the A41 and Junction 3 of the M54. Site 018c has been submitted previously for consideration as part of representations to Local Plan consultations on behalf of Harrow Estates. Whilst the sites do not currently form part of identified growth strategy, these representations seek to present their merits as a positive, suitable and justifiable option for residential-led development.
A0646	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Yes	Yes	Yes	Considers the Councils approach to development in Shrewsbury as set out within SP7 is sound when considered against the tests set out in para 35 of the NPPF.
A0674	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	Not Specified	Not Specified	Support premise of allowing unallocated sites within settlement boundaries. Suggest an amendment to para 2 of draft Policy SP7 to read: "In particular, additional housing development opportunities which would support the development of previously developed sites, or greenfield sites within settlement development boundaries as shown on the Policies Map; or contribute towards achieving wider town centre regeneration will be supported." Such an amendment would allow for an appropriate level of windfall sites to come forward, as envisaged in the proposed Plan period, as worded it only allows for the reuse of disused land or premises.

A0607	B001	n/a	Noted.	No	SP7. Managing Housing Development
A0621	B010	Allocate SHF032 and SHF018c.	<p>Noted. The purpose of the draft Shropshire Local Plan is to provide a framework for the sustainable development of Shropshire. A key part of this process involves establishing an appropriate strategy for the level and distribution of development. This is achieved, in part, by identifying residential development guidelines for settlements. The proposed residential development guidelines have been subject to detailed consideration by the Council, infrastructure providers and the community and as such it is only right that they are recognised as significant policy considerations.</p> <p>However, draft Policy SP7 recognises that these residential development guidelines are not intended to represent a ceiling on development, but that going beyond it by too great a degree could result in unsustainable development. As such, draft Policy SP7 sets out a clear set of considerations which regard will be had to in determining planning applications which would result in the provision of more dwellings that the settlement's residential development guideline. These include benefits arising from the proposal (aside for increased housing supply), likelihood of delivery of existing commitments, any cumulative impacts of development and increase relative the relevant guideline.</p> <p>As such, Shropshire Council considers that draft Policy SP7 is justified, effective and consistent with national policy. It is also considered that draft Policy DP1 is complementary in that it ensures the effective use of land and that the forms of housing delivered are responsive to the needs of local communities.</p> <p>Draft Policy SP7 forms part of the draft Shropshire Local Plan, which should be read as a whole, rather than forming a separate external consideration. Shropshire Council also considers that the proposed development strategy for Shifnal and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that proposed safeguarded land is not allocated for development but safeguarded for beyond the proposed Plan period.</p> <p>Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt.</p>	No	SP7. Managing Housing Development
A0646	B006	n/a	Noted.	No	SP7. Managing Housing Development
A0674	B004	Suggest an amendment to para 2 of draft Policy SP7 to read: "In particular, additional housing development opportunities which would support the development of previously developed sites, or greenfield sites within settlement development boundaries as shown on the Policies Map; or contribute towards achieving wider town centre regeneration will be supported."	Noted. The draft Shropshire Local Plan should be read as a whole. It is considered that the draft policies in the draft Shropshire Local Plan provide an effective framework for managing windfall opportunities within development boundaries.	No	SP7. Managing Housing Development

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0682	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	Not Specified	Not Specified	Draft Policy SP7 makes no reference to proposed safeguarded land. Para 4 of the Policy references circumstances where land beyond development boundaries will be considered potentially acceptable. Consider it would be sensible to consider safeguarded land in the first instance (particularly as Shifnal is a very sustainable settlement with good access to services and facilities). As such a robust mechanism should be built into draft Policy SP7 to allow safeguarded sites (Land between Park Lane and the A464 is sustainably located and suitable for residential development - the vision framework (appended to this representation) demonstrates consideration of constraints and opportunities) to be bought forward at an earlier date if certain criterion is met.
A0007	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Shrewsbury Hubs: Longden	Not Specified	No	Not Specified	<p>Longden should not be a Hub - it is a small and old village, smaller than all other Hubs and has limited road infrastructure. Development in the village will result in loss of trees and hedgerows and highly valued agricultural fields. Local surveys, community engagement, the Village Development Statement (appendix of this representation) and consultation responses are clear the community does not support Community Hub status, this status is therefore in breach of Localism.</p> <p>The Hierarchy of Settlements is flawed as it fails to weigh services based on size and capacity to cater for more residents. Longden has only a mobile library, a small joint shop/post office, small pub, small school and small nursery, but all attain the same points as larger facilities. Superfast broadband is not available, the Council indicate satellite links, but surely this is available to everyone. Outdoor sports facilities and children's playground should be grouped together. Whilst there is a regular bus service it is not sufficiently frequent to have a major impact on sustainability and does not link to services to settlements beyond Shrewsbury. there are few employment opportunities in the Parish, with most commuting to Shrewsbury and beyond.</p> <p>Consider the proposed residential guideline is too high and disregards evidence about housing need and local views.</p> <p>Development in Longden, without access to adequate public transport and no local employment would generate significant additional carbon, encourage more cars and contradicts national and local zero carbon strategies.</p> <p>Unclear why sites which have been subject to refused appeals are considered.</p> <p>Infrastructure plan and transport plan missing.</p> <p>Covid 19 restrictions have reduced the ability to raise community awareness/undertake community engagement on this consultation.</p>
A0037	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	<p>Section 1f of draft Policy SP8 fails the 'justified', 'positively prepared', 'effective' and 'consistent with national policy' tests of soundness.</p> <p>-Draft Policy SP8 confirms "Community Hubs are considered significant rural service centres and the focus for development within the rural area." However section 1f turns them from sustainable settlements where development is appropriate, to locations where development is refused if residential guidelines are exceeded. Inadequate evidence and no justification is provided for this approach. Also, no clear evidence or justification is provided for proposed guidelines, differences between each proposed Community Hub, and the alternative of considering whether development is sustainable has not been considered (as proposed to be applied within Community Clusters).</p> <p>-2018-based sub-national household projections (SNHP) growth forecasts equate to 1.22% growth per annum. This should be the minimum level of growth for each proposed Community Hub if they are to be the focus for rural development, but almost all proposed residential guidelines are below this figure.</p> <p>-Section 1f of draft Policy SP8 will disproportionately affect proposed Community Hubs with effective housing delivery. This places extra pressure on less favourable locations, with far weaker viability. The Shropshire Viability Study indicates some parts of Shropshire have lower viability than others, highlighting potential deliverability issues. Draft Policy DP8 therefore increases the risk of failing to meet housing need.</p> <p>-Constraining development in successful Community Hubs will hold back development that improvements social and economic sustainability.</p> <p>-Section 1f of draft Policy SP8 makes proposed residential development guidelines ceilings to development, contrary to para 59 of the National Planning Policy Framework (NPPF) regarding significantly boosting the supply of homes.</p> <p>-Section 1f repeats draft Policy SP7 and is therefore unnecessary.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0682	B012	Include a mechanism in draft Policy SP7 which allows safeguarded sites to be bought forward at an earlier date if certain criterion is met.	<p>Shropshire Council consider that draft Policy SP7 provides an appropriate mechanism for responding to circumstances where there is clear evidence that the residential development guideline for the settlement appears unlikely to be met over the plan period, or where there are specific considerations set out in the Settlement Policies.</p> <p>Shropshire Council has undertaken a robust and proportionate site assessment process to inform identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. A summary of this assessment, including an explanation of why proposed allocations and proposed safeguarded land have been identified for development is provided as an appendix to the Sustainability Appraisal of the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan.</p> <p>With regard to the proposed safeguarded land, it is noted that the National Planning Policy Framework (NPPF) states Plans should "make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development".</p>	No	SP7. Managing Housing Development
A0007	B001	Revisit the Hierarchy of Settlements assessment and allocate Longden Village as a Community Cluster rather than a Community Hub.	<p>Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Longden.</p> <p>As such it is considered appropriate for Longden to be identified as a proposed Community Hub.</p> <p>However recognising the level of development that has occurred over recent years within the settlement, and its characteristics, constraints and opportunities the draft Shropshire Local Plan has identified a low residential development guideline of some 50 dwellings (equating to just over 2 dwellings per annum) for the settlement. Completions already achieved within the draft Shropshire Local Plan period from 2016-2038 and current commitments achieve around half of this proposed residential guideline. As such, it has been concluded that no specific site allocations are required to achieve the proposed residential development guideline and the remaining windfall allowance is some 27 dwellings (as at 31st March 2019). This is considered an appropriate, effective, sustainable and deliverable approach.</p> <p>The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p> <p>In order to undertake a comprehensive site assessment process, numerous sources have been used to identify sites for consideration, including past Planning Applications. Consideration of such sites does not necessarily mean Shropshire Council endorses their development.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	SP8. Managing Development in Community Hubs
A0037	B007	Remove para 1f of draft Policy SP8 entirely. If settlement residential guidelines are retained, they should be referenced as minimum figures.	<p>Noted. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology.</p> <p>The purpose of the draft Shropshire Local Plan to provide a framework for the sustainable development of Shropshire. A key part of this process involves establishing an appropriate strategy for the level and distribution of development. This is achieved, in part, by identifying residential development guidelines for settlements. The proposed residential development guidelines for proposed Community Hubs have been subject to detailed consideration by the Council, infrastructure providers and the community and as such it is only right that they are recognised as significant policy considerations.</p> <p>Para 1f of Draft Policy SP8 recognises that these residential development guidelines are not intended to represent a ceiling on development, but that going beyond it by too great a degree could result in unsustainable development. As such where these residential development guidelines are to be exceeded it cross-references draft Policy SP7. Draft Policy SP7 sets out a clear set of considerations which regard will be had to in determining planning applications which would result in the provision of more dwellings than the settlement's residential development guideline. These include benefits arising from the proposal (aside for increased housing supply), likelihood of delivery of existing commitments, any cumulative impacts of development and increase relative the relevant guideline.</p>	No	SP8. Managing Development in Community Hubs

A0040	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	<p>Section 1f of draft Policy SP8 fails the 'justified', 'positively prepared', 'effective' and 'consistent with national policy' tests of soundness.</p> <p>-Draft Policy SP8 confirms "Community Hubs are considered significant rural service centres and the focus for development within the rural area." However section 1f turns them from sustainable settlements where development is appropriate, to locations where development is refused if residential guidelines are exceeded. Inadequate evidence and no justification is provided for this approach. Also, no clear evidence or justification is provided for proposed guidelines, differences between each proposed Community Hub, and the alternative of considering whether development is sustainable has not been considered (as proposed to be applied within Community Clusters).</p> <p>-2018-based sub-national household projections (SNHP) growth forecasts equate to 1.22% growth per annum. This should be the minimum level of growth for each proposed Community Hub if they are to be the focus for rural development, but almost all proposed residential guidelines are below this figure.</p> <p>-Section 1f of draft Policy SP8 will disproportionately affect proposed Community Hubs with effective housing delivery. This places extra pressure on less favourable locations, with far weaker viability. The Shropshire Viability Study indicates some parts of Shropshire have lower viability than others, highlighting potential deliverability issues. Draft Policy DP8 therefore increases the risk of failing to meet housing need.</p> <p>-Constraining development in successful Community Hubs will hold back development that improvements social and economic sustainability.</p> <p>-Section 1f of draft Policy SP8 makes proposed residential development guidelines ceilings to development, contrary to para 59 of the National Planning Policy Framework (NPPF) regarding significantly boosting the supply of homes.</p> <p>-Section 1f repeats draft Policy SP7 and is therefore unnecessary.</p>
A0094	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	<p>The Hierarchy of Settlements Assessment which has informed identification of proposed Community Hubs is not based on up to date, accurate or consistent information and therefore draft Policy SP8 is not justified and is considered unsound. The Council consider the Hierarchy of Settlements Assessment has been applied consistently and responded to changing circumstances. However, despite responses, including to the Regulation 18: Pre-Submission Consultation, highlighting changes to services (particularly in relation to the village of Clive), these have not been reflected within the assessment.</p> <p>In Clive, the current scoring within the Hierarchy of Settlements Assessment for Clive includes the bowling green as an outdoor sports facility and the local convenience store, but neither of these facilities are publicly accessible to the community, following closure of both the bowling green and local convenience shop. Both now fall under private residential ownership and use.</p> <p>With regard to the bowling green, Shropshire Council recognise there is no active club in the Shropshire Council Playing Pitch and Outdoor Sports Strategy Assessment Report (Oct 2020) (PPOSS), a comprehensive assessment undertaken between 2018 and 2019 within which Clive is not recorded as having such a facility. However, Shropshire Council justify retention of the facility in Clive following its inclusion in the Open Space Needs Assessment (2017 - based on 2009 data with limited desk-based updates) (OSNA), this assessment acknowledges that "without a catchment area analysis it cannot detect the reality of variations in provision within each Place Plan Area"... this data is considered out-of-date, has not been verified locally and has been superseded by the PPOSS.</p> <p>With regard to the local convenience store, Shropshire Council has acknowledged receipt of recent correspondence from both the Parish Council and store owner that it is no longer in use and now falls within a residential curtilage. This has now been formalised with a change of use planning application to convert the store to a residential annex (ref 21/00048/FUL).</p> <p>An inconsistent approach has been taken to reflecting changes during development of the draft Shropshire Local Plan. For instance Myddle was initially identified as a Community Hub, but following the closure of the local convenience store in 2018, fell below Community Hub status within the assessment. Similar situations occurred in Cockshutt and Westbury. The same circumstances occurred in Clive but it remains a Community Hub. It is acknowledged that these changes occurred later in the development of the draft Shropshire Local Plan, but there remains a disparity. Also, for these settlements, notification from the relevant Parish Council was sufficient, but Clive Parish Council were asked for evidence of marketing more widely and suitable assurances about the potential future uses for the facility. Regarding marketing, the store was most recently let to a local resident but this quickly came to an end due to viability. The store was then marketed, but was not considered to be viable proposition and no offers were made. It was also offered to the community but no offers were made.</p> <p>This calls into question the soundness of the draft Plan's development and consultation. Whilst we recognise the need to progress with developing an up to date plan for Shropshire, the pace to push this through prior to local elections should not negate the appropriate consideration of consultation responses, follow up discussion or consideration which is critical in ensuring development of a sound plan based on credible evidence.</p> <p>Revisions to the Hierarchy of Settlements over the Plan development has led to relaxation around the requirement for Community Hubs to have employment and peak time public transport, which clearly should be fundamental to determining significant rural service centres, which has caused inconsistencies in the policy and evidence base with regard to the definition of Community Hubs - 'settlements considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities' but the assessment criteria and associated threshold not requiring such facilities to be present. Clive illustrates this point as it is at least partly reliant on other settlements to meet certain day to day needs such as employment and local convenience goods.</p> <p>The draft Shropshire Local Plan and draft Policy SP8 is therefore considered to be unsound as the methodology and application of associated evidence does not meet the intended definition of a Community Hub and overall settlement hierarchy needed to maintain overall sustainability and is therefore not justified.</p>
A0118	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Yes	Yes	Yes	<p>Identification of Community Hubs (including Burford which is more sustainable due to proximity to Tenbury Wells) as significant rural service centres and the focus for development in rural areas where appropriate development will be permitted on allocated sites, is supported. This accords with para 78 of the National Planning Policy Framework (NPPF) as it will enhance and maintain the vitality of rural communities and will allow them to grow and thrive.</p> <p>The criteria proposed within draft Policy SP8 are appropriate and generally supported.</p> <p>Consider proposed allocation BUR004 adheres with these proposed criteria (table and masterplan provided within representation demonstrating compliance with each criteria).</p>

Draft Policy SP7 sets out a clear set of considerations which regard will be had to in determining planning applications which would result in the provision of more dwellings that the settlement's residential development guideline. These include benefits arising from the proposal (aside for increased housing supply), likelihood of delivery of existing commitments, any cumulative impacts of development and increase relative the relevant guideline.</p>	No	SP8. Managing Development in Community Hubs
A0094	B003	Policy SP8 should remove reference to Clive as Community Hub as current evidence means it does not meet the definition of a significant rural service centre as defined by the Local Plan Review	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirements to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP8. Managing Development in Community Hubs
A0118	B003	N/A	Noted.	No	SP8. Managing Development in Community Hubs

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0128	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	<p>Policy SP8 defines Community Hubs as significant rural service centres &amp; sets out that the Community Hubs have been identified through a Hierarchy of Settlements Assessment, which has assessed settlement function through a consistent methodology which includes consideration of: population/ households within a settlement; and the extent to which the settlement provides services and facilities, high speed broadband; employment opportunities; and other transport links. However the evidence within Hierarchy of Settlement assessment, is not based on up to date or accurate information and has not been appropriately reviewed and changes to services &amp; facilities have not been considered consistently across all settlements in the Local Plan and therefore Policy SP8 is not justified and unsound. Their deferral of matters relating specifically to the settlement designation of Clive (Wem Place Plan area) also mean the Plan is not effective.</p> <p>Clive hub status is based on inaccurate and out of date evidence on settlement sustainability The Village Store and bowling green amenities included within Hierarchy of Settlements assessment score no longer exist. This is evidenced by various correspondence &amp; communications, meeting minutes, planning applications, Playing Pitch and Outdoor Sports Strategy (Oct 2020) from May 2018 on ( submitted with response). Evidence has been submitted that the shop is unviable and closure permanent ( with a change of use application) and that change of ownership had taken place causing loss of bowling green. Taking into account these changes to available facilities the correct assessment score for Clive should be 47 points which falls below the threshold for Community Hub designation. Inclusion of Clive as a Hub is therefore not justified. Additionally, the Playing Pitch and Outdoor Sports Strategy evidence does not identify any need for or shortfall in bowling provision. Therefore, demand and value of a bowling green and justification for including in Clive's Hierarchy of Settlements services and amenities points score are also not justified or sound.</p> <p>Approach inconsistent in Shropshire, with respect to considering changes in amenities and services and subsequent reassessment against the Hierarchy of Settlements methodology e.g. approach in Clive compared to Myddle &amp; Westbury Hub re-assessments &amp; reclassification following notification of loss of services/facilities in these settlements. Clive's settlement designation has been repeatedly and unnecessarily deferred. Evidence required to confirm loss of services has been more onerous than elsewhere &amp; extensive evidence of loss of services in Clive has not been acted on resulting in inclusion as a Hub at Regulation 19 and the need for consideration of settlement status a main modification. Negative impact of this is that if Hub status removed by the Planning Inspector, default would be countryside status and option of Community Cluster, which may have been supported by the community is not now available without lengthy and expensive Neighbourhood Plan process. Inconsistent application of the Hierarchy of Settlements methodology with regard to Clive also raises serious questions over the soundness of the Local Plan.</p>
A0129	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 3.52 ; Policy:SP8	No	Yes	Not Specified	<p>Support policy SP8, noting para 1 and criteria to define appropriate development set out in points a-l with the most notable, being f – which would exclude any proposal that would result in the settlement's residential guideline being exceeded. Also note specific cross reference in f to Paragraph 3 of Policy SP7 which deals with residential guidelines as a policy consideration with Paragraph 4 going on to clarify further approach in respect of additional market housing development outside the settlement development boundaries.</p> <p>This positive approach provides an opportunity for development of Bayston Hill site to come forward in the event that the council cannot give further consideration to allocation within the emerging Plan. Thus it is understood that this policy does exclude proposals coming forward – particularly following reasoning set out in paragraphs 3.49 &amp; 3.50 to SP7 that ; “the guideline is not intended to represent a ceiling on development, but going beyond it by too great a degree could result in unsustainable development.” Also that “the policy also identifies the specific circumstances where consideration will be given to the grant of approval for market housing beyond a defined development boundary. In doing so the policy is clear in the role development boundaries play as a mechanism to positively manage development.” Consider this confusing; the policy states that the guideline is not intended as a ceiling on development providing the guideline figure is not exceeded by too great a degree.</p>
A0255	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8 (STC002 and P58a)	Not Specified	Yes	Not Specified	<p>Stanmore (STC002 and P58a) is not enclosed within the proposed Bridgnorth development boundary and is not a proposed Community Hub. As such is not subject to draft Policy SP8 but rather draft Policy SP10. Proposed development of STC002 and P58a conflicts with draft Policies SP2 and SP10 which indicate development in the rural area will be focussed on Community Hubs and Community Clusters. These proposed allocations are neither justified nor evidenced and will not be effective in achieving the aims of the Local Plan.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0128	B003	Clive settlement should be removed from Schedule SP2.2, Community Hubs (referred to in paragraph 3.56 of Policy SP8),	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP8. Managing Development in Community Hubs
A0129	B003	<p>The Council should commit to the inclusion of reserve sites within the Local Plan review identified to meet housing requirements in the event that the Government's standard methodology is once again amended, or delivery of allocated sites is stalled. This would allow the Local Plan Review to be flexible, deal with rapid change and avoid delays and resourcing associated with a partial or wholesale plan review.</p> <p>The alternative would be to follow Stratford upon Avon District approach &amp; include a policy within the Plan requiring the commencement of a separate Site Allocation document to include a series of reserve sites and to be read in conjunction with the Local Plan including adherence to the development strategy.</p>	<p>Shropshire Council considers that the proposed development strategies for each settlement are appropriate, effective, sustainable and deliverable (this includes the existing commitments (including existing allocations), proposed allocations and proposed windfall allowances identified to contribute towards achieving each proposed development strategy). Identification of proposed site allocations has been informed by a proportionate and robust site assessment process.</p> <p>Shropshire Council also considers that it has a robust five year housing land supply and robust supply over the proposed Plan period, based on the proposals within the draft Shropshire Local Plan. Appendix 5 illustrates this supply - identifying completions, commitments (including existing and proposed allocations) and appropriate windfall allowances (for settlements with development guidelines), which totals around 31,000 dwellings (excluding any windfall allowance for the wider rural area).</p>	No	SP8. Managing Development in Community Hubs
A0255	B009	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	<p>Noted. Shropshire Council considers that the draft Policies of the draft Shropshire Local Plan are consistent and together provide an appropriate vision and framework for the future development of Shropshire to 2038; address needs and opportunities in relation to housing, the local economy, community facilities and infrastructure; and seek to safeguard the environment, enable adaptation to climate change and helps to secure high-quality and accessible design.</p> <p>Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p> <p>Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p>	No	SP8. Managing Development in Community Hubs

A0347	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	No	No	Not Specified	Paragraph 1 h. In line with our comments made to the Water Cycle Study and waste water infrastructure there are capacity issues associated with some areas – a lack of mitigation options to show if and how some impacts can be overcome (deliverability). This should be informed by your evidence base to identify and ensure any infrastructure requirements are deliverable.
A0348	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	Yes	Not Specified	Historic England welcomes the inclusion of respecting heritage assets as a consideration for assessing development sites in Community Hubs.
A0350	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	Support the statement in draft Policy SP8 that "Community Hubs are considered significant rural service centres and the focus for development within the rural area." However, section 1f of draft Policy SP8 contradicts this by imposing a ceiling on development, meaning the draft Policy fails the 'justified', 'positively prepared', and 'consistent with national policy' tests of soundness. As: -It is contrary to para 59 of the National Planning Policy Framework (NPPF) regarding significantly boosting the supply of homes. -If Community Hubs are intended to be the focus for development in rural areas they must accommodate both their own growth and that of their rural hinterland. If this is to be achieved, proposed residential guidelines should be a minimum of the average growth forecasts for Shropshire (equivalent to 1.22% per annum between 2016-2038 based on 2018-based sub-national household projections (SNHP)). But almost all proposed residential guidelines for Community Hubs are below this figure. -There is inadequate justification or evidence as to why successful and sustainable settlements should tip from a positive to negative approach to development, simply because they have exceeded an arbitrary guideline. This also contradicts the above statement regarding them being a focus for development in the rural area. -It repeats draft Policy SP7 and is therefore unnecessary.
A0355	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	Support the statement in draft Policy SP8 that "Community Hubs are considered significant rural service centres and the focus for development within the rural area." However, section 1f of draft Policy SP8 contradicts this by imposing a ceiling on development, meaning the draft Policy fails the 'justified', 'positively prepared', and 'consistent with national policy' tests of soundness. As: -There is inadequate justification or evidence as to why successful and sustainable settlements should tip from a positive to negative approach to development, simply because they have exceeded an arbitrary guideline. This also contradicts the above statement regarding them being a focus for development in the rural area. -Proposed Community Hubs have residential guidelines less than the Office of National Statistics' latest projected household growth figures for Shropshire (2018-based figures). So keeping development below settlement guideline figures does not seek to meet growth needs of rural areas and results in the policy failing the 'positively prepared' test of soundness. -It is contrary to para 59 of the National Planning Policy Framework (NPPF) regarding significantly boosting the supply of homes. -It repeats draft Policy SP7 and is therefore unnecessary.
A0366	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	It is disappointing that Policy SP8 seeks to limit development in Community Hubs, only permitting development where it "would not result in the settlement's residential guideline being exceeded" (section 1f of the policy). This section of the policy makes the guideline a ceiling figure, running counter to the National Planning Policy Framework's consistent use of housing numbers as minimums rather than maximums. It is contrary to the Government's key objective of, "significantly boosting the supply of homes" expressed in paragraph 59 of the Framework and in more recent Ministerial Statements. It makes the Local Plan's job of delivering the housing and employment development that Shropshire needs much more difficult than it needs to be. In our view, Community Hubs should be allowed the flexibility to respond to changing needs and not have artificial constraints such as a ceiling on numbers imposed on them.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0425	B002	Draft Policy SP8 should remove reference to Clive as a Community Hub.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP8. Managing Development in Community Hubs
A0426	B002	Draft Policy SP8 should remove reference to Clive as a Community Hub.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0430	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	Trefonen is the only Hub with no allocations, and so is wholly inconsistent with the approach to all other hubs, with no evidence to justify the lack of a housing allocations. The sites in the SA for Oswestry were ultimately discounted due to there being a greater need for affordable and/or low-cost housing within the Parish Council's Rural Housing Needs Survey (2018). This hardly illustrates evidence of excessive need for affordable housing in Trefonen, nor has any evidence been provided to demonstrate a lack of demand for open market housing that might justify the departure away from the approach the Council has taken in relation to all the other Community Hubs. The survey's results are inconsistent with the actual results of the survey.
A0436	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	Given that Community Hubs are considered significant rural service centres and the focus for development within the rural area, it is not clear why the development boundary for St Martins (Oswestry Maps) has not been changed to take account of existing developments. This results in sustainable sites within the existing built form of this Community Hub being incorrectly identified within open countryside for policy purposes and any opportunities for sustainable windfall development that meets the criteria of Policy SP8 lost. The Plan is not therefore positively prepared. In particular, SHLAA site SM041 is surrounded on all sides by existing suburban housing development and is effectively landlocked. Immediately to the south is a small housing scheme of nine properties that was approved at a time when the Council could not demonstrate a five year housing supply. This development should clearly be included in the development boundary of St Martins. It is a well established development clearly forming part of, and not separated from, other built development in St Martins. It clearly forms part of the Community Hub. SHLAA site SMH041 provides a windfall opportunity. In fact, had the site been correctly assessed as being within a Community Hub boundary it would have scored significantly different in the SA. To plan is not positively prepared as the development boundary of St Martins excludes development sites that would clearly be appropriate as windfall sites, subject to meeting criteria of Policy SP8 and contribute to the areas housing needs. I can find no evidence that the development boundary has been reviewed.
A0500	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	Draft Policy SP8 states Community Hubs have been identified through a Hierarchy of Settlements Assessment (HoS). However the evidence within the HoS is not based on accurate information and its application does not meet the intended definition of a Community Hub/overall settlement hierarchy needed to maintain overall sustainability and therefore Policy SP8 is not justified and unsound. Shropshire Council consider the methodology within the HoS has been consistently applied, however informal and formal consultation responses have identified inaccuracies which have not been responded to, rendering the draft Shropshire Local Plan, draft Policy SP8 and associated schedule SP2.2 unsound. Specifically, the HoS for Clive includes a bowling green as an outdoor sports facility and a convenience store. Neither now exist following their closures (the shop has closed 3 times in recent years and is clearly unviable): -The loss of the bowling green was recognised within the Shropshire Council Playing Pitch and Outdoor Sports Strategy Assessment Report (PPOSS) (Oct 2020), which should supersede the Open Space Needs Assessment (OSNA) (2017 desk based assessment using 2009 data) as it is based on more up to date and comprehensive information. -Shropshire Council has also acknowledged receiving correspondence from the Parish Council and convenience store owner regarding its closure. This has been confirmed through submission of a Planning Application (21/00048/FUL) for change of use to a residential annexe. Revisions to the HoS evidence has also led to inconsistencies in the definition of Community Hubs and their identification - the definition states settlements considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities (emphasised); and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities', however the criteria threshold no longer requires such facilities to be present. This is illustrated by Clive which evidently does not have the services necessary to meet day to day needs, such as employment and convenience goods.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0430	B003	In order for the draft SLP to be effective and consistent with national planning policy we suggest the following change is necessary: Allocated housing sites should be identified in Trefonen and shown on the Policies Map to ensure delivery of the residential guidelines.	Shropshire Council considers that the proposed development strategies for each settlement, including Trefonen, are appropriate, effective, sustainable and deliverable (this includes the existing commitments (including existing allocations), proposed allocations and proposed windfall allowances identified to contribute towards achieving each proposed development strategy). Identification of proposed site allocations has been informed by a proportionate and robust site assessment process.	No	SP8. Managing Development in Community Hubs
A0436	B004	The Development boundary of St Martins, a Community Hub, requires review and amending to reflect housing development that has occurred and ensure the plan is positively prepared and Policy SP8 is justified.	Shropshire Council considers that the development strategy proposed for St Martins (including existing commitments (including existing allocations), the proposed allocations and the proposed windfall allowance), which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). It is also considered that the proposed development boundary for St Martins is appropriate, having had due consideration of the built form of the settlement.	No	SP8. Managing Development in Community Hubs
A0500	B002	Remove reference to Clive as a Community Hub.	Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive. With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility. With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub. Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirements to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment. Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.	No	SP8. Managing Development in Community Hubs

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0506	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	<p>Process for identifying Community Hubs (Hierarchy of Settlements Assessment (HoS)) was developed mid-way through the Local Plan Review process. Initially Longden was not identified as a Community Hub, however this was later revised and the settlement re-classified. Do not consider Longden should be identified as a Community Hub as it will adversely affect the balance of the community and fail to achieve sustainable development/retain rural vitality. Also consider that the HoS is not sufficiently sensitive to the needs of communities and should be reconsidered (Longden is on the limit of the Community Hub threshold change to one score would change its status, it should also be apparent that a village like Longden should not have the same approach as larger villages like Minsterley). As such it is not property justified or evidenced and will not deliver sustainable development.</p> <p>Within the currently adopted Local Plan, Longden is part of a Community Cluster. This was considered acceptable by residents and its development guideline was achieved without a development boundary or site allocations (although following adoption, there was significant pressure for new housing (6-60 dwellings) on the periphery of the village, encouraged by Council Planning Officers, but refused at appeal).</p> <p>In the draft Shropshire Local Plan, the proposed residential guideline of 50 dwellings to be achieved by infill development within a tightly drawn development boundary. Consider the proposed residential guideline is inappropriate for the village (represents a 37% increase in the size of the village, too large to be assimilated into the settlement, especially over 17 years - only 2 of the proposed Community Hubs have a smaller population and several settlements not chosen to be Community Hubs have a much larger population) and that a development boundary should not be identified. Very concerned categorisation of Longden as a Community Hub will encourage further applications on the periphery of the village which will become difficult to resist.</p> <p>Concerned identification of Longden as a Community Hub with a development boundary and no allocations could lead to exhaustion of infill sites and pressure to develop outside the development boundary (as experienced between 2014 and 2020 when the Parish Council and Longden residents withstood development pressure, resulting in four appeal being dismissed, but with a settlement guideline which is unrealistic to achieve within the village). Draft Policy SP7 in addition to draft Policy SP8 are significant problems for Longden. This concern is compounded by provisions of draft Policy SP7 which allows for cross-subsidy development (affordable housing cross-subsidised by a percentage of open market housing) immediately adjoining the built form of Community hubs and Community Clusters, which will encourage development outside the proposed development boundary for Longden.</p> <p>Support submission made by Longden Parish Council and Longden Village Action Group. Submission supported by other residents (documented within an Appendix to this representation).</p>
A0510	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8 (GOB012)	Not Specified	Yes	Not Specified	<p>Support identification of Gobowen as a Community Hub in draft Policy SP8.</p> <p>GOB012 was allocated in the SAMDev Plan, however delivery was delayed by unforeseen non-planning issues. These have been resolved and the site can be made available for development, as such its re-allocation is supported.</p>
A0511	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8 (Cockshutt)	Not Specified	No	Not Specified	<p>Community Hubs are considered significant rural service centres and the focus for development in the rural area. The manner in which they are proposed to be identified varies from the adopted Local Plan, which allowed communities to 'opt-in' based on the principle of localism - this failed as it did not produce the right quantity/type/distribution of housing and did not achieve rural re-balance. It is now proposed they will be identified through a Hierarchy of Settlements Assessment (HoS), using a point system.</p> <p>The HoS was prepared mid-way through the Local Plan Review process and updated at various points. Whilst many updates had little impact some re-classified settlements, which is very significant in terms of ability to grow and support local services. An example is Cockshutt, which was a main service village in the North Shropshire Plan; a Community Hub in the adopted Local Plan; and proposed to represent a Community Hub in the early part of the Local Plan Review, but ultimately was classified a Community Cluster due to loss of the convenience store. Cockshutt has a population of around 859 and around 350 dwellings, larger than 24 (57%) of the proposed Community Hubs, with some considerably less. Consider the system adopted is not sufficiently sensitive to community needs (not necessarily the same as community desires expressed by Parish Councils). A result of restrictions on development over the past 15 years is loss of local services and employment opportunities, increasing the need to travel elsewhere and making settlements, such as Cockshutt, less sustainable than it was.</p> <p>Appreciate the HoS is intended to focus on provision of services as an indication of settlement role. However, the scoring system is too rigid, with no flexibility to assess the true role of settlements or respond to short term/temporary changes to services without permanent consequences. Cockshutt has been a 'focus' village for provision of services for many years., its decline is linked to planning policies reacting to local wishes rather than analysis of the issues facing the village.</p> <p>Notable that there is a hole south-east of Ellesmere in the distribution of Community Hubs (illustrated on the map in the HoS), where Cockshutt has traditionally been the focus for services.</p> <p>Consider scoring for Cockshutt is incorrect as there is an 'amenity green space' in the village (land adjacent to the village's Millennium Hall (Community Hall) was gifted to the village in 2012 for use as amenity green space, and planning permission to change the use of that land (now known as Jubilee Field) from agriculture to amenity land was granted on 30 May 2017). This would mean Cockshutt attains Community Hub status.</p> <p>The problem with the HoS is it requires assessment of scores and what can be done to make settlements more sustainable but is used purely as a basis for distribution of development, rather than to allow consideration of whether additional development would support more /better services. This is especially important where settlements have traditionally been a centre for an extended local community (like as Cockshutt) and yet is suddenly calculated as not being appropriate for future support. The assessment should aim to increase sustainability rather than lessen it, which will be the result for Cockshutt.</p> <p>Cockshutt should be designated a Community Hub, provided with a development boundary (including allocation of land identified on the plan appended to this representation). This site has been available for development for over 20 years, but its development has been restricted by policy. Its allocation would allow further development in Cockshutt without adverse effect on existing properties. It would have access off the main road and could achieve improvements to the southern access to the village, good links into the village or on to Shrewsbury/Ellesmere, drainage infrastructure runs through the site, could deliver a new village shop, couple of small workshops, provide land for a doctors surgery and recreation space and additional open market/affordable housing. These would all increase the sustainability of Cockshutt.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0506	B003	Longden should not be identified as a Community Hub, rather it should form a Community Cluster.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Longden.</p> <p>As such it is considered appropriate for Longden to be identified as a proposed Community Hub.</p> <p>However recognising the level of development that has occurred over recent years within the settlement, and its characteristics, constraints and opportunities the draft Shropshire Local Plan has identified a low residential development guideline of some 50 dwellings (equating to just over 2 dwellings per annum) for the settlement. Completions already achieved within the draft Shropshire Local Plan period from 2016-2038 and current commitments achieve around half of this proposed residential guideline. As such, it has been concluded that no specific site allocations are required to achieve the proposed residential development guideline and the remaining windfall allowance is some 27 dwellings (as at 31st March 2019). It should be noted that this windfall allowance includes appropriate cross-subsidy and exception development where it is consistent with Community Hub Policy SP8 and other relevant policies of this Local Plan. This is considered an appropriate, effective, sustainable and deliverable approach.</p> <p>Shropshire Council also considers that development boundaries are an effective means of providing certainty to all parties (local communities, the decision maker and development industry).</p>	No	SP8. Managing Development in Community Hubs
A0510	B002	N/A	Noted.	No	SP8. Managing Development in Community Hubs
A0511	B001	<p>Cockshutt should be re-evaluated and designated a Community Hub, with a settlement strategy, development boundary (including allocation of land on the plan appended to this representation (in whole or part) for mixed development including open market and affordable housing).</p> <p>The scoring system that is used to select Community Hubs and Clusters should be re-evaluated, and relevant policies should provide for a reassessment to be carried out at least once a year in order to react to changes in provision of local services.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including for Cockshutt.</p> <p>It is considered that draft Policies SP8 and SP9, alongside other relevant policies, provide an appropriate framework for the management of development within Community Hubs and Community Clusters respectively.</p>	No	SP8. Managing Development in Community Hubs

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0512	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8 (BUCK001)	Not Specified	No	Not Specified	<p>Support proposed allocation of BUCK001. This is an important brownfield site for Bucknell, it can comply with all requirements of draft Policies S2.2 (although note S2.2.6 relates to impact on the River Clun SAC) and SP8, however draft Policy DP13 places significant obstacle in the way of its development. Every effort should be made by the Local Planning Authority (LPA) to bring it forward for development as quickly as possible.</p> <p>The site has also been allocated for development for 22 years, most recently in the SAMDev Plan (2015) for 70 dwellings. There have also been a number of Planning Applications on the site, the most recent remains undetermined. However, delivery has been delayed for numerous reasons but not willingness of the landowner.</p> <p>The SAMDev Plan states development in the Bishop's Castle area may "adversely affect the integrity of the River Clun SAC. Mitigation measures are required to remove harm arising from hydrological and water quality impacts on this internationally designated site ..... ", no readily available/understandable advice has been provided on what mitigation measures might be suggested and this remains unresolved. It also requires project level Habitats Regulations Assessment (HRA) for proposals where a likely significant effect on an internationally designated site may occur (the HRA was to be prepared by the LPA). It also specified proposals likely to have a significant effect on factors including priority species and priority habitats, would only be permitted "where it could be demonstrated that there is no satisfactory alternative means of avoiding such impacts and the social or economic benefits of the proposal outweigh the harm to the asset". No advice has ever been forthcoming from the LPA on the measures that might be regarded as mitigating effects on natural assets.</p> <p>A River Clun SAC Nutrient Management Plan (NMP) was prepared by Natural England (NE), the Environment Agency (EA) and the LPA, to identify those issues threatening the freshwater pearl mussels in the River Clun. It concluded the freshwater pearl mussel population was 'functionally extinct' (declining population and little evidence of recruitment), and estimated mussels would only survive for another 20 years if nothing was done. Therefore a series of targets for water quality in the River Clun should be adopted, although even if achieved, there was no guarantee the colony would be rejuvenated. Three main causes of problems for the mussels were phosphates, nitrates and silt, of which development was a major factor for only phosphate (majority associated with Waste Water Treatment Works (WWTW)). The NMP contained no specific actions a developer might take to make residential development acceptable. The LPA advised development cannot occur unless it demonstrates no phosphates generated would enter the River and it should also demonstrate betterment.</p> <p>Discharge from Bucknell WWTW into the River Clun is controlled by Severn Trent Water (STW) and the EA. In 2017, STW indicated they intended to solve the problem by diverting discharge to another watercourse. However, this did not occur, instead, STW installed additional phosphate stripping facilities. Understand this has improved water quality , but has not improved it to a level that would mean targets set in the NMP are achieved.</p> <p>Most recently, the LPA in association with NE have produced a document indicating that development will only be permitted which would involve discharge to the River Clun or its tributaries, if it can be shown that the development would be "nutrient neutral". There is no indication given as to how this could be measured, how it could be achieved, what effect it might have on the water quality in the River, or whether it would produce a situation where the pearl mussel colony might be rescued and rejuvenated.</p> <p>The Local Plan Review continues this situation. Bucknell is identified as a Community Hub and BUCK001 is reallocated, however is still constrained by the necessity to ensure that the freshwater pearl mussels in the River Clun are unharmed by the development. Draft Policy DP13 specifies the restrictions in the Clun catchment, but no advice is provided as to how identified objectives can be achieved. Clear that simply preventing development is not the answer, but very little appears to be happening that would help in other directions. One suggestion a refresh of the NMP, but these are clearly ineffective unless they include definitive/measurable actions on the part of those bodies responsible for water quality and comprise more than just preventing development.</p> <p>This situation effects more than just BUCK001. The River Clun catchment includes Bishop's Castle (Key Centre), Clun (Community hub) and Lydbury North (Community Cluster) amongst others. Allocations for residential development have not come forward due to the same problem. These allocations are to be saved and there is a clear need/demand for development, which continues to be recognised. As such, the draft Shropshire Local Plan should tackle the issue of the water quality in the River Clun in a pro-active manner, and bring forward positive proposals to be put into action by the various authorities that have responsibility for watercourses in the catchment in order that the development that is planned, wanted and needed can be delivered. Until the draft Shropshire Local Plan includes such proposals it cannot be regarded as being "sound" as it is not effective or been developed in a positive manner, fails to meet the responsibility of ensuring the survival of the pearl mussel colony and will also fail to deliver the dwellings (514) planned in the Clun catchment.</p>
A0583	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Yes	Yes	Yes	The policy criteria of Policy SP8, concerning management of development in Community Hubs are noted, as relevant specifically to St Martins. The 3 policy criteria (including sub sections) provide a framework under which future development proposals can be appropriately considered.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0512	B001	<p>The draft Shropshire Local Plan should be modified to include specific, positive, measures that will:</p> <ul style="list-style-type: none"> <li>i. Ensure the longevity of the freshwater pearl colony, and</li> <li>ii. Ensure that the development that is assessed as being necessary in the River Clun catchment can be delivered immediately upon the adoption of the draft Shropshire Local Plan.</li> </ul>	<p>Shropshire Council must comply with the Habitats Regulations and subsequent legal judgments (including the Dutch Nitrogen case) when determining planning applications which are likely to have an adverse effect on the River Clun SAC. This means that development in the river Clun catchment can only be permitted if it can be demonstrated that no adverse effect on the River Clun SAC will occur. The Council is unable to consent to planning applications in Bucknell (and the wider river Clun catchment) which do not meet this requirement. Policy DP13 plans positively for development in the Clun catchment whilst safeguarding the SAC, by setting out the criteria which planning proposals must meet to comply with the Habitats Regulations. A series of minor modifications to this policy and its explanation (see schedule of minor modifications) are proposed to provide additional clarity on legal compliance with the Habitats Regulations and Dutch Nitrogen Judgement and on processes to support policy implementation, including the assessment of nutrient neutrality and determination of mitigation measures.</p>	No	SP8. Managing Development in Community Hubs
A0583	B004	n/a	Noted.	No	SP8. Managing Development in Community Hubs

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0602	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	<p>Identification of Community Hubs in draft Policy SP8 is not based on up to date, accurate, or appropriate evidence within the Hierarchy of Settlements Assessment (HoS). Therefore Policy SP8 is not justified and is unsound.</p> <p>The HoS includes two facilities for Clive that do not exist, without them Clive does not meet the criteria for Community Hub designation. These are:</p> <p>-A bowling green, situated within the private grounds of Clive Hall. The green was formerly used by Clive Bowling Club but in May 2018, the owners of the property issued notice to the Bowling Club that the facility was no longer available following sale of the property. This bowling green was not included within the original HoS but was subsequently added. The Parish Council notified Shropshire Council of the error and were assured it would be corrected. However, Shropshire Council argue the Open Space Needs Assessment (OSN) includes the bowling green and it is up to the community to demonstrate it is now surplus to requirements. Although this is demonstrably the case (since the Bowling Club now plays at an alternative green outside the Parish). The Playing Pitch and Outdoor Sports Strategy (PPOSS), supersedes the OSNA and was formally adopted by Shropshire Council in Nov 2020. PPOSS does not include this bowling green. It is therefore unjustified and unsound to allocate points to a facility that, as evidenced by the Council's own documentation, does not exist.</p> <p>-A convenience store, which closed in October 2020. Shropshire Council refused to accept permanent closure had taken place and, further, insisted on submission of a change of use planning application from the property owner (now submitted). However, the Council continues to include points for this non-existent facility. It is therefore unjustified and unsound to allocate points to a facility that does not exist.</p> <p>Furthermore, the manner in which Shropshire Council has handled changes to local amenities and services throughout the Local Plan Review process has not been consistent across all settlements, despite the Council indicating that this would be the case. When the shop in Myddle closed and the Post Office in Westbury closed the HoS was updated and their settlement status also. No requirement was made for a change of use Planning Application. For Clive, the Council have refused to correct the HoS, deferring action and therefore requiring a main modification and is not effective.</p>
A0607	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	<p>HoS is inaccurate. Clive's coring is wrong. Bowling Green is not available to the community, neither is the local convenience store (both are closed). Other settlements have had their scores adjusted based on changes, Clive has not. The Hierarchy of Settlements evidence base and Local Plan Policies are now based on inconsistencies which render them unsound. Revisions to the Hierarchy of Settlements evidence base over the Plan development has led to relaxation around the requirement for Community Hubs to have employment and peak time public transport, which should be fundamental to the determination of 'significant rural service centres'. As a result, there are now inconsistencies in the policy, with the definition of Community Hubs continuing to be set out as 'settlements considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities' but the assessment criteria and associated threshold no longer require such facilities to be present. This is illustrated by the example of Clive which when assessed clearly doesn't meet the criteria for a Community Hub in that there is a reliance upon other settlements to meet day to day needs such as employment and local convenience goods. The Plan and Policy SP8 is therefore considered to be unsound as the methodology and application of associated evidence does not meet the intended definition of a Community Hub and the overall settlement hierarchy needed to maintain sustainability and is therefore not justified</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0602	B003	Remove Community Hub status from Clive and update policies and explanations as required.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP8. Managing Development in Community Hubs
A0607	B003	Policy SP8 should remove reference to Clive as Community Hub as current evidence means it does not meet the definition of a significant rural service centre as defined by the Local Plan Review	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive. With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirements to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	SP8. Managing Development in Community Hubs

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0614	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	Yes	Not Specified	Support identification of development guidelines for named Community Hubs. The housing figures clearly seek to acknowledge the sustainability of Community Hubs, as well as the requirement to meet the needs of small settlements for new housing and sustain the existing services.
A0622	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Yes	No	Yes	Agree that Hubs are key rural services but suggest that appropriate development should be permitted on allocated sites and other sustainable sites within and adjacent to the settlement development boundaries. Therefore consider draft Policy SP8 has not been positively prepared and is ineffective in allowing appropriate development in certain circumstances to come forward.
A0027	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Not Specified	No	Not Specified	Draft Policy SP9's restriction on site size for infill development of no more than 0.1ha is not justified, effective or consistent with national policy. It creates inconsistencies in the draft Shropshire Local Plan, including draft Policies SP1 and SP5, as combined with the suggested limit on the number of dwellings on these plots (maximum of 3) this would mean a density of 30 dwellings per hectare (dph), whereas typical densities in Community Clusters are 12-18dph. It will not help deliver sustainable rural development, the low density forms of housing wanted by these communities and not support self-build housing or live/work units which require larger plots (even larger than 0.1ha), as it encourages higher-density development. It is also inflexible as it would result in the refusal of plots just over the threshold or containing well designed schemes of lower density. The lack of flexibility is not consistent with national policy which in para 127 of the National Planning Policy Framework (NPPF) states "plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change". Developers may artificially alter site boundaries to fit, sometimes leading to unnatural boundaries that do not respond to their context and clash with para 127 of the NPPF states good design is "sympathetic to local character and history, including the surrounding built environment and landscape setting" and which will, "establish or maintain a strong sense of place." Suggest increasing the plot size to 0.2ha and providing flexibility by using the term 'about' or set a size that is at the maximum end of the range of sizes that would be acceptable.
A0149	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Not Specified	No	Not Specified	The draft plan makes no provision for the designation of a community cluster accept through the Neighbourhood Plan process. This is overly restrictive and inconsistent with national policy.
A0255	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9 (STC002 and P58a)	Not Specified	Yes	Not Specified	Stanmore (STC002 and P58a) is not enclosed within the proposed Bridgnorth development boundary and is not a proposed Community Cluster. As such is not subject to draft Policy SP9 but rather draft Policy SP10. Proposed development of STC002 and P58a conflicts with draft Policies SP2 and SP10 which indicate development in the rural area will be focussed on Community Hubs and Community Clusters. These proposed allocations are neither justified nor evidenced and will not be effective in achieving the aims of the Local Plan.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0614	B006	n/a	Noted.	No	SP8. Managing Development in Community Hubs
A0622	B005	Suggest the wording of para 1 of draft Policy SP8 is varied to include appropriate development on the edge of Community Hubs where a need can be proven for the development.	The purpose of the draft Shropshire Local Plan to provide a framework for the sustainable development of Shropshire. A key part of this process involves establishing an appropriate strategy for the level and distribution of development. This is achieved, in part, by identifying appropriate types and locations for open market residential development, including through identification of development boundaries where it is considered appropriate to do so. Draft Policy SP8 reflects the draft Shropshire Local Plan's urban development focus and strategy of focusing growth in strategically agreed locations (set out in Draft Policy SP2) whilst supporting rural communities by enabling some controlled development to maintain local sustainability. Shropshire Council considers that the proposed development strategies for each Community Hub settlement, are appropriate, effective, sustainable and deliverable (this includes the existing commitments (including existing allocations), proposed allocations and proposed windfall allowances identified to contribute towards achieving each proposed development strategy). Identification of proposed site allocations has been informed by a proportionate and robust site assessment process.	No	SP8. Managing Development in Community Hubs
A0027	B001	Amend the policy to remove the 0.1ha threshold for infill plots and replace it with a more threshold that is more responsive to the characteristics of Community Cluster settlements and more flexible, of 'about' 0.2ha.	Noted. It is considered that the definition of infill plots provided within draft Policy SP9 is appropriate. It provides a level of certainty to local communities and the development industry about the types of sites that are suitable for such development - in terms of location, size and capacity; ensures an effective use of land; but also allows for flexibility to density, design and layout, as the referenced site size (0.1ha or less) and capacity (maximum 3 dwellings) are maximums. As such it recognises the diverse nature of Community Clusters and the settlements within them. It should also be noted that whilst draft Policy SP9 provides the starting point for decisions on infill development within Community Clusters, the draft Shropshire Local Plan should be read as a whole. As such draft Policies SP1 and SP5 apply to such sites and there will inevitably be instances where a 0.1ha site is appropriate for 3 dwellings and others where it perhaps is not.	No	SP9. Managing Development in Community Clusters
A0149	B006	To ensure consistency with the Local Plan we recommend a modification to Policy SP9 as follows (additions in asterisks, deletion in square brackets): 6. Existing Community Clusters are identified within Schedule SP2.2 of Policy SP2. New Community Clusters can be brought forward [by the community] through the Neighbourhood Plan *or Whole Estate Plan Endorsement* process and will be subject to this Policy and the other requirements of the Local Plan.	Shropshire Council considers that if new Community Clusters are to be brought forward, this should be through the Neighbourhood Plan process, rather than a Whole Estate Plan or other such mechanism. Formal Neighbourhood Plans, once made, form part of the Development Plan.	No	SP9. Managing Development in Community Clusters
A0255	B010	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	Noted. Shropshire Council considers that the draft Policies of the draft Shropshire Local Plan are consistent and together provide an appropriate vision and framework for the future development of Shropshire to 2038; address needs and opportunities in relation to housing, the local economy, community facilities and infrastructure; and seek to safeguard the environment, enable adaptation to climate change and helps to secure high-quality and accessible design. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP9. Managing Development in Community Clusters

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0347	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	No	No	Not Specified	<p>1. The rural nature of Community Clusters means that early consideration should be given to the availability of water in new developments (particularly in areas of water stress), adjacent private water supplies and non-mains foul drainage.</p> <p>2. The issue of appropriate foul drainage provision is particularly important in such settings. Within Shropshire there are many people who rely on private water supply wells, boreholes and springs for their potable water. We wouldn't encourage the extensive proliferation of non-mains drainage. Large scale development that is not able to be serviced by mains water or mains foul drainage could potentially have negative environmental impacts for water resource and water quality.</p> <p>3. Reference to DP19 should be included.</p> <p>4. There may be options for 'first time' mains sewerage systems.</p>
A0348	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Not Specified	Yes	Not Specified	Historic England welcomes the inclusion of respecting heritage assets as a consideration for assessing development sites in Community Clusters.
A0369	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Not Specified	No	Not Specified	<p>The current pandemic has highlighted the benefits of rural living and we anticipate greater demand for homes and business to locate in the countryside in the future. It is therefore very disappointing that section 2.c of Policy SP9 seeks to limit development in Community Clusters to "small-scale infill sites of 0.1ha or less, which are clearly within and well related to the built form of the settlement, have permanent and substantial buildings on at least two sides and are for up to a maximum of 3 dwellings".</p> <p>This section runs counter to the Government's key objective of, "significantly boosting the supply of homes" expressed in paragraph 59 of the Framework and in more recent Ministerial Statements. It makes the Local Plan's job of delivering the housing development that Shropshire needs more difficult than it needs to be.</p> <p>In our view, Community Clusters should be allowed the flexibility to deliver larger sites with a greater number of dwellings on them, so long as the proposals do not conflict with the criteria in section 4 of policy SP9 (criteria which provide sufficient control over the delivery of new development to ensure that new development is of an appropriate scale). For the reasons set out above, the Plan fails the 'positively prepared', 'justified', 'effective' and 'consistent with National Policy' tests of soundness.</p>
A0393	B046	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	We welcome reference to the government's 25 Year Environment Plan in SP17 but there should be greater reference to this throughout the document, especially in sections SP3, SP4, and SP9.
A0491	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Not Specified	Not Specified	Not Specified	This policy does not provide for the redevelopment of brownfield sites and must make provision for this. NPPF consistently guides development towards brownfield land (e.g. Paras 117 and 118) yet this has been ignored here.
A0507	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Not Specified	No	Not Specified	<p>The definition of Community Clusters within draft Policy SP9.1 is looser than that in the adopted Local Plan, being no longer based on provision of services and allowing any amount of small settlements to be included.</p> <p>Maesbury and Maesbury Marsh abut each other and share community facilities (do not rely on other small communities). They are an example of what Community Clusters were originally envisaged to be, however they are not proposed as such within the draft Shropshire Local Plan and so would be regarded as countryside where development opportunities are limited. Shropshire Council refuses to accept they function as a single settlement on a day-to-day basis, but other proposed Community Clusters include two distinct elements.</p> <p>Further, Maesbury/Maesbury Marsh have a combined population of over 450 people, individually larger than many of the settlements proposed as Community Clusters and combined larger than combined proposed Community Clusters.</p> <p>Settlements identified as Community Hubs and Community Clusters have been identified based on a scoring system of existing services (Hierarchy of Settlements assessment (HoS)), in an attempt to redress the situation in the adopted Local Plan where status was determined by Parish Councils/be more objective. Villages not identified as Community Hubs, depending on size, provision of facilities and view of the Parish Council, can be designated a Community Cluster or countryside. Whilst this is more objective, it is not sufficiently sensitive to the needs of communities, as restrictions to development simply perpetuate trends of reducing sustainability.</p> <p>There appears questionable apportionment of points within the HoS for Maesbury and Maesbury Marsh, for instance in relation to the pre-school and local employment opportunities. Combining the scores for the two settlements would almost achieve Community Hub status.</p> <p>Planning policies over the last 20 years have resulted in Maesbury/Maesbury Marsh becoming less sustainable (loss of village shop and primary school). Consider Maesbury and Maesbury Marsh operate as a single entity and should be subject to detailed consideration of what is needed to make them more sustainable - this is the basic concept of draft Policy SP2, but scoring in the HoS is insufficiently sensitive to community needs and does not promote sustainability. Failure to identify Maesbury/Maesbury Marsh as a proposed Community Cluster is not in line with the proposed strategy in draft Policy SP2.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0347	B017	n/a	<p>1. The Shropshire Water Cycle Study shows that there is sufficient water to accommodate the growth in the Local Plan, including in the rural areas. No change proposed.</p> <p>2. Proposed modifications to Policy DP19 address the issue of private water supplies and non-mains drainage. No change proposed.</p> <p>3. The draft Shropshire Local Plan should be read as a whole. Furthermore, draft Policy SP9 includes "There is sufficient infrastructure capacity to support the development, or any infrastructure capacity constraints can be addressed through the development, consistent with relevant policies of this Local Plan." Given the number of relevant policies, it is not considered that specific cross-referencing is necessary in this instance.</p> <p>4. Options for first time mains sewerage systems are noted. No change proposed.</p>	No	SP9. Managing Development in Community Clusters
A0348	B009	n/a	Noted; no actions proposed.	No	SP9. Managing Development in Community Clusters
A0369	B003	To make the Plan 'sound' requires section 2.c of the policy to be rephrased to enable larger developments (subject to the criteria in the remainder of the policy being met). Our client's land in Elson (submitted under Shropshire's 'Call for Sites' and identified by the Council as ELS001 'Land adjoining Mayfield, Elson, Ellesmere', provides an example of a site that is larger than 0.1ha. but would otherwise accord with the criteria in the policy and should therefore be supported as a sustainable windfall development that would make a greater contribution to the overall need for housing in Shropshire. An indicative site layout is attached as an Appendix to this representation.	Noted. It is considered that the definition of infill plots provided within draft Policy SP9 is appropriate. It provides a level of certainty to local communities and the development industry about the types of sites that are suitable for such development - in terms of location, size and capacity; ensures an effective use of land; but also allows for flexibility to density, design and layout, as the referenced site size (0.1ha or less) and capacity (maximum 3 dwellings) are maximums. As such it recognises the diverse nature of Community Clusters and the settlements within them.	No	SP9. Managing Development in Community Clusters
A0393	B046	Include greater reference to 25 Year Environment Plan	Government's 25 year Environment Plan covers a wide range of issues and where its provisions affect the planning process, they have been reflected in Shropshire Local Plan policies. However, the Shropshire Local Plan should be read as a whole and the Council does not consider it necessary to include additional references to the 25 year Environment Plan.	No	SP9. Managing Development in Community Clusters
A0491	B002	This policy does not provide for the redevelopment of brownfield sites and must make provision for this. NPPF consistently guides development towards brownfield land (e.g. Paras 117 and 118) yet this has been ignored here.	<p>Noted. Shropshire Council considers draft Policy SP9 gives appropriate consideration to brownfield land. Specifically they types of sites upon which it is proposed that residential development can occur include "conversion of existing buildings within or immediately adjoining the built form of the settlement"; and "suitable small-scale infill sites of 0.1ha or less, which are clearly within and well related to the built form of the settlement, have permanent and substantial buildings on at least two sides and are for up to a maximum of 3 dwellings"; and "By affordable exception sites, cross-subsidy exception sites and entry level exception sites meeting evidenced need and the other requirements of Local Plan Policies." Each of these categories can of course include appropriate brownfield land. Furthermore employment development which is of a type and scale appropriate to the settlement and other non-residential development that benefits the rural community by providing required community facilities and infrastructure will be supported where it can be achieved through the reuse of existing buildings or on suitable sites within or immediately adjoining the built form of the settlement and meets other requirements of Local Plan Policy. Again, this includes appropriate brownfield land.</p> <p>The draft Shropshire Local Plan should be read as a whole. Draft Policy DP18 specifically addresses the re-use of previously developed (brownfield) land and stipulates the circumstances within which such development will be supported.</p>	No	SP9. Managing Development in Community Clusters
A0507	B001	Draft Policy SP9 should be revised to allow flexibility in identification of Community Hubs and Community Clusters when it is realised that settlements are becoming less sustainable and more reliant on private motor vehicles. Positive action should be taken to encourage such settlements to increase their sustainability.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. It is also considered that draft Policy SP9, alongside other relevant draft Policies, provides an appropriate framework for the management of development within proposed Community Clusters which can positively respond to the varying sizes and natures of Community Cluster settlements.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire. We would also note that Maesbury/Maesbury Marsh are classified as countryside within the adopted Local Plan. Where settlements are proposed to be identified as countryside for policy purposes, draft Policy SP10 provides the starting point for decision making, identifying the types of development that may be appropriate in such a location.</p>	No	SP9. Managing Development in Community Clusters

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0509	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Not Specified	No	Not Specified	<p>Proposed Community Clusters vary enormously in size, character, level of community infrastructure and distribution. Relationship between buildings.</p> <p>Draft Policy SP9 may be appropriate in some villages, but others may have difficulty finding 'infill' sites and demonstrate 'ability to accommodate' requirements. It is important that listed villages are capable of accommodating new residential development, otherwise needed windfall housing will not be delivered and the overall strategy will fail.</p> <p>Shropshire Council has not undertaken a capacity study to estimate how many dwellings can be constructed in proposed Community Clusters in line with proposed Policy SP9, without this it cannot be assumed draft Policy SP9 will produce the number of houses necessary and therefore it cannot be justified, evidenced or found sound.</p> <p>Suggest greater emphasis is placed on proposed development sites being appropriate to/reflective of the character and setting of the village in which it is located, rather than having arbitrary sizes and standards - particularly with regard to the definition of infill (may suit many situations but consider its unnecessary and could po-tentially be more harmful than the development it might or might not permit - many settlements have loose-knit relationships and insisting on infill development might force development into 'gaps' between buildings. These might represent infill plots in draft Policy SP9, but their development could significantly alter the character and appearance of the settlement and should be preserved/reduced/modified). Draft Policy SP9.2.c should be modified to allow development that is "infill or which would be appropriate to, or reflective of, the character of the settlement in which it is situated".</p> <p>Unclear how draft Policy SP9.4.e "appropriate mix of dwelling types, tenure and affordability", is to be put into effect when the development is to be restricted to three dwellings or less. If a particular mix of dwelling types, tenure or affordability is considered essential in any particular village, this should be specified in the draft Shropshire Local Plan (or Community Led Plans cross-referenced) - no evidence that an assessment has been undertaken to justify specific mixes for Community Cluster settlements, so this element of the draft Policy should be deleted.</p>
A0511	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9 (Cockshutt)	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan loosens the definition of Community Clusters to that applied within the adopted Local Plan, such that it is no longer based on provision of services and can be any amount of small settlements, including single settlements without relationships to others in terms of services.</p> <p>Cockshutt does not rely on any other villages for services. Indeed it acts, or has acted in the past, as a Community Hub to which other smaller settlements gravitated for services.</p> <p>Cockshutt, in turn, gravitated towards Ellesmere, designated a "Key Centre" in the Local Plan Review.</p> <p>Cockshutt clearly has a different role from the other smaller villages in the locality. No other proposed Community Cluster settlements have a population higher than Cockshutt and only one Community Cluster (containing 6 settlements) has a combined population that is higher.</p> <p>Noticeable that, although a Community Hub in the adopted Local Plan, Cockshutt was allocated just 20 new dwellings (on 5 sites), none of which had been delivered at the start of the Local Plan Review (some have now been delivered, but none will deliver affordable housing) and so are proposed to be saved within the draft Shropshire Local Plan. No new allocations are proposed in the draft Shropshire Local Plan. Cockshutt has become less sustainable as a result of planning policy over the past twenty years and has not achieved a rebalance of the community. Current proposals to restrict development to infill plots only, in a settlement that is already tightly developed, leave little opportunity for development and will not create conditions where further community services and facilities can be provided and sustained. The village needs new and sustained growth if it is to regain its sustainability. The village should be reclassified as a Community Hub, and serious consideration should be given to the manner in which new services can be provided and sustained in the settlement.</p>
A0516	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Yes	No	Yes	<p>Consider the criterion and reference to infill sites of less than 0.1hectares and up to a maximum of 3 dwellings to be too prescriptive. It is likely that such restrictions may not provide sufficient scope for meeting local housing needs or enough opportunity sites to genuinely sustain rural communities in accordance with the policy objective expressed in paragraph 3.23. Moreover, Community clusters are typically 'villages' characterised by a variety of settlement forms – some compact, some linear and some dispersed. For this reason, the refence to infill sites is likely preclude many candidate sites. Greater weight should be given to such issues as sustainability, connection to services, footpaths and avoidance of flood risk.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0509	B001	Draft Policy SP9.2.c should be modified to read: "On suitable small-scale infill sites of 0.1ha or less, or which would be appropriate to, or reflect of, the character of the settlement in which it is situated." Draft Policy SP9.2.e should be deleted.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. It is also considered that draft Policy SP9, alongside other relevant draft Policies, provides an appropriate framework for the management of development within proposed Community Clusters which can positively respond to the varying sizes and natures of Community Cluster settlements.	No	SP9. Managing Development in Community Clusters
A0511	B003	Cockshutt should be re-evaluated and designated a Community Hub, with a settlement strategy, development boundary (including allocation of land on the plan appended to this representation (in whole or part) for mixed development including open market and affordable housing). The scoring system that is used to select Community Hubs and Clusters should be re-evaluated, and relevant policies should provide for a reassessment to be carried out at least once a year in order to react to changes in provision of local services.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including for Cockshutt. It is considered that draft Policies SP8 and SP9, alongside other relevant policies, provide an appropriate framework for the management of development within Community Hubs and Community Clusters respectively.	No	SP9. Managing Development in Community Clusters
A0516	B001	Modify Policy SP9.2.c to refer to sites capable of accommodating between 5-10 dwellings. The reference to a maximum of 3 dwellings is far too restrictive and would preclude, for example, a courtyard scheme, which may be far more appropriate in some rural location than 3 detached dwellings, a more likely outcome, as worded in the Policy. Policy SP9. 2.c ought to be modified in order that sites can come forward for consideration that will genuinely sustain rural communities in accordance with Policy SP9. As written Policy SP9.2.c is unsound. It is in conflict with the Council's Strategic Approach to ensuring sustainable development as expressed in Policy SP2 and with paragraph 3.23 of the Regulation 19 Draft Local Plan. It allows for appropriate levels of development within rural areas, to enhance the longer-term sustainability of rural communities. This includes Community Clusters described as "...settlements with aspirations to enhance their sustainability..... the focus for rural development". This aspiration can be achieved by modifying Policy SP9.2.c as proposed. As written Policy SP9.2.c is in conflict with NPPF paragraph 77 and 78 which identifies that Local plans should identify opportunities to for villages to grow and thrive especially where this will support local services.	Noted. It is considered that the definition of infill plots provided within draft Policy SP9 is appropriate. It provides a level of certainty to local communities and the development industry about the types of sites that are suitable for such development - in terms of location, size and capacity; ensures an effective use of land; but also allows for flexibility to density, design and layout, as the referenced site size (0.1ha or less) and capacity (maximum 3 dwellings) are maximums. As such it recognises the diverse nature of Community Clusters and the settlements within them.	No	SP9. Managing Development in Community Clusters

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0541	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9.2	Not Specified	No	Not Specified	The inclusion of a maximum site area (MSA) of "of 0.1ha or less" is unjustified, ineffective and is inconsistent with the NPPF. None of the evidence base included with the Regulation 19 documents gives any justification for the inclusion of a MSA. The respondent has directly requested confirmation of the evidence used by the LPA to justify the inclusion of the MSA and the LPA have failed to provide such evidence. The desire or need to limit scale is understandable particularly having regard to consultation responses to various draft documents however at no point has a MSA or 0.1 hectares been justified in terms of being an appropriate figure and/or why a figure more or less than 0.1 hectares is not appropriate. Removing the MSA text whilst retaining the unit number limit of 3 dwellings will be more than sufficient and effective to control the scale of development when read in conjunction with policy SP9.4a. Having the MSA goes beyond what is necessary for the policy to be effective. In the absence of evidence such as character assessments of the proposed Cluster settlements there is no justification that restricting "infill" to sites with "permanent and substantial buildings on at least two sides" is appropriate having regard to the context of these rural settlements.
A0595	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Yes	No	Yes	The Policy sets out various provisions in relation to the management of development in the Countryside. In respect of housing it confirms that new market housing will be strictly controlled outside of development boundaries. However, the policy should cross reference to the flexibility allowed for open market housing in the countryside within policy SP7 if the circumstances of policy SP7 are met.
A0613	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Not Specified	No	Not Specified	Whilst the principle of the policy is supported, concerns are raised over the overly restrictive requirements for new residential development. Rural community clusters require a mixture of appropriate development including a modest amount of modest new build housing. The drafted policy, suggests that new residential development will be delivered via; "2c. On suitable small-scale infill sites of 0.1ha or less, which are clearly within and well related to the built form of the settlement, have permanent and substantial buildings on at least two sides and are for up to a maximum of 3 dwellings"; Firstly the density of the development suggested; 3 dwellings on 0.1ha would be out of keeping with the majority of settlements proposed to be community clusters and arguably could be considered over development. Secondly, the restrictive description of what constitutes a suitable site would limit modest growth of community cluster settlements.
A0629	B007-46	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	We welcome reference to the government's 25 Year Environment Plan in SP17 but there should be greater reference to this throughout the document, especially in sections SP3, SP4, and SP9.
A0232	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.
A0123	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	No	No	Yes	Welcome support for tourist related developments within the countryside in draft Policy SP10. However, consider further clarification is required in relation to para 3b. Question whether draft Policy SP10 goes far enough and whether it will be fit for purpose in a post-Covid 19 world where staycations are likely to become more common place and demand for accommodation and tourist uses is likely to be heightened. Accept suitable safeguards need to be in place to protect amenity and the environment, but the draft Policy as worded is not sufficiently flexible to meet the needs of businesses and support their long-term future.
A0125	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 and STC002/P58a	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0541	B001	Amend policy SP9.2.c. to: "c. On suitable small-scale infill sites, which are clearly within and well related to the built form of the settlement, have permanent and substantial buildings on at least two sides or one side where there are existing permanent and substantial buildings onsite and are for up to a maximum of 3 dwellings"	Noted. It is considered that the definition of infill plots provided within draft Policy SP9 is appropriate. It provides a level of certainty to local communities and the development industry about the types of sites that are suitable for such development - in terms of location, size and capacity; ensures an effective use of land; but also allows for flexibility to density, design and layout, as the referenced site size (0.1ha or less) and capacity (maximum 3 dwellings) are maximums. As such it recognises the diverse nature of Community Clusters and the settlements within them.	No	SP9. Managing Development in Community Clusters
A0595	B007	The policy should cross reference to the circumstances under Policy SP7	Community Clusters consist of individual or groups of small rural settlements of varying function but with aspirations to maintain or enhance their sustainability through modest levels of appropriate development. As such only modest levels of development (of the types documented within the draft Policy) are envisaged, to support community sustainability. Therefore these settlements do not have residential guidelines, new proposed allocations or development boundaries. The policy defines its own considerations of cumulative impact of development. It is therefore not appropriate to cross reference to Policy SP7.	No	SP9. Managing Development in Community Clusters
A0613	B001	SP9 (2.c); Residential development will be delivered: "c. On suitable small-scale sites of 0.3ha or less, which are well related to the built form of the settlement, respecting the local spatial pattern and are for up to a maximum of 3 dwellings;"	Noted. It is considered that the definition of infill plots provided within draft Policy SP9 is appropriate. It provides a level of certainty to local communities and the development industry about the types of sites that are suitable for such development - in terms of location, size and capacity; ensures an effective use of land; but also allows for flexibility to density, design and layout, as the referenced site size (0.1ha or less) and capacity (maximum 3 dwellings) are maximums. As such it recognises the diverse nature of Community Clusters and the settlements within them.	No	SP9. Managing Development in Community Clusters
A0629	B007-46	Include greater reference to 25 Year Environment Plan	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	SP9. Managing Development in Community Clusters
A0232	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP10, rather than draft Policy SP10 itself. Sites STC002 and P58a are proposed for allocation to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. As proposed allocations, draft Policy SP10 would not be applicable. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP10
A0123	B007	Provide further clarification of para 3b of draft Policy SP10.	Noted. The draft Shropshire Local Plan is intended to be read as a whole and draft Policy DP10 provides the detailed policy context in respect of tourism, cultural and leisure related development. Draft Policy SP10 more broadly addresses how sustainable rural development can be achieved within the context of the Draft Plan's overall strategic approach in Draft Policy SP2. When considering development proposals, the need to support rural vitality and the viability of countryside as an economic, as well as an environmental, resource will be a significant consideration. Draft SP2 recognises the countryside as a 'living-working' environment and provides for appropriate development to facilitate its various functions and support the sustainability of rural communities. Shropshire Council therefore considers that the draft Shropshire Local Plan includes an appropriate draft strategy and draft policies relating to tourism development.	No	SP10. Managing Development in the Countryside
A0125	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP10, rather than draft Policy SP10 itself. Sites STC002 and P58a are proposed for allocation to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. As proposed allocations, draft Policy SP10 would not be applicable. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). A0133	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.

There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.
A0149	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	Not Specified	No	Not Specified	Given the rural nature of Shropshire it is likely that Whole Estate Plans will be prepared for areas that encompass land that falls outside any identified development boundary/settlement type. It is therefore surprising that SP10 does not refer to Whole Estate Plans in either the policy text or supporting explanatory text to support development that comes forward in accordance with an endorsed Whole Estate Plans. The policy should be amended to ensure that the approach is consistent with the NPPFs requirements for plans to be positively prepared and the requirement that policies are clearly written and unambiguous so that it is clear for decision makers how they should react to proposals.

No	SP10. Managing Development in the Countryside
A0149	B005	SP10 should be amended as follows: Add to para 3: "g. Employment, business, renewable energy and community development that comes forward as part of a Whole Estate Plan endorsed in accordance with Policy SP15." Add to para 4: "h. Suitably designed and located dwellings and housing schemes which meet evidenced local housing needs that come forward as part of a Whole Estate Plan endorsed in accordance with Policy SP15."	Draft Policy SP15 relates to Whole Estate Plans, referencing their role as non-statutory plans produced by Estates themselves. Whilst not specifically referenced in Draft Policy SP10, the draft Shropshire Local Plan has to address a wide range of issues and requirements and is intended to be read as a whole. Therefore, in addition to the criteria set out in Draft Policy SP10, the relevant considerations of all other applicable policies will need to be taken into account in decision making on planning applications, along with other material considerations.	No	SP10. Managing Development in the Countryside

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0255	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	The draft Shropshire Local Plan is unsound and not in compliance with national policy. Draft Policy SP10 conflicts with the aims of other draft Policies in the draft Shropshire Local Plan. Proposed allocations STC002 and P58a encroach on open countryside and the Green Belt. This land is not within a Strategic, Principal or Key Centre, Strategic Settlement or Community Hub/Cluster. It also does not fall into any of the categories of development that might be acceptable in the Green Belt, as set out in draft Policy SP10.3. STC002 and P58a are unjustified, not evidenced and would be in conflict with the aims of draft Policy SP10 and therefore are not sound as defined in para 35 of the National Planning Policy Framework (NPPF).
A0256	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.
A0257	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0255	B011	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	<p>Noted. Shropshire Council considers that the draft Policies of the draft Shropshire Local Plan are consistent and together provide an appropriate vision and framework for the future development of Shropshire to 2038; address needs and opportunities in relation to housing, the local economy, community facilities and infrastructure; and seek to safeguard the environment, enable adaptation to climate change and helps to secure high-quality and accessible design.</p> <p>Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. As proposed allocations, draft Policy SP10 would not be applicable.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p> <p>Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p>	No	SP10. A0260	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.
A0261	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.
A0263	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.
A0264	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 and STC002/P58a	Yes	No	Yes	Policy SP10 would restrict economic development in rural areas in line with national guidance to ensure economic development proposals are only allowed where they maintain or enhance countryside vitality and character. The employment sites proposed at Stanmore are in the countryside and are accessed through an established country park. The Council, and the Stanmore residents have sought to preserve the character of this area and the designation of the land for many years. There is no guarantee the proposed allocations will protect this situation and so the allocations are an attempt to side-step Policy SP10 in any future development. The countryside at Stanmore should continue to be protected similar to other rural areas in Shropshire and consequently the need for these proposed allocations is not justified and not properly evidenced.
A0265	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0260	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP10, rather than draft Policy SP10 itself. Sites STC002 and P58a are proposed for allocation to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. As proposed allocations, draft Policy SP10 would not be applicable. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP10. Managing Development in the Countryside

A0311	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0309	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP10, rather than draft Policy SP10 itself. Sites STC002 and P58a are proposed for allocation to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. As proposed allocations, draft Policy SP10 would not be applicable. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP10. Managing Development in the Countryside

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0342	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.
A0343	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.
A0348	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	Not Specified	Yes	Not Specified	Historic England welcomes the inclusion of the requirement for proposals for the replacement of buildings which contribute to the local distinctiveness, landscape character and historic environment to be resisted, unless other sustainability considerations can be demonstrated and that and the requirements of Historic Environment Policy DP23 can be met, which will assist in safeguarding heritage assets.
A0351	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	Not Specified	No	Not Specified	There are two types of housing that the draft Shropshire Local Plan will not deliver in sufficient quantity, namely: -Specialist housing to meet the needs of older people (the Strategic Housing Market Assessment (SHMA) indicates a need for 3,500 C3 specialist units and 2,500 C2 specialist units), as development boundaries are tight, no specific allocations are made for this form of housing and the draft Shropshire Local Plan only makes provision for it on large sites of 50 or more dwellings (draft Policy DP1). Unlikely allocated sites of 50-100 dwellings will deliver specialist housing as to do so, over 50% of the housing would need to be of this type (not normally built by general housing developers). -Self-build and custom-build housing (the SHMA identifies a need for 2,500 houses), as proposed development boundaries are tight and whilst draft Policy DP2 expects large sites to provide 10% of their plots as self-build, this is incompatible with housebuilders' business models and highly unlikely to be delivered. Problems in delivering/inadequate provision of the above two types of housing mean the Plan fails the 'effective' and 'positively prepared' (para 35a of the National Planning Policy Framework (NPPF) requires a strategy which as a minimum seeks to meet objectively assessed needs) tests of soundness for this type of housing. Draft Policy SP10 should allow for their provision in the countryside adjoining settlements. The principle of allowing development outside but adjoining development boundaries (where guidelines appear unlikely to be met) is accepted in section 4 of draft Policy SP7. It should not be necessary to wait until late in the Plan period to meet needs for specialist and self-build housing.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0342	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP10, rather than draft Policy SP10 itself. Sites STC002 and P58a are proposed for allocation to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. As proposed allocations, draft Policy SP10 would not be applicable. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP10. Managing Development in the Countryside
A0343	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP10, rather than draft Policy SP10 itself. Sites STC002 and P58a are proposed for allocation to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. As proposed allocations, draft Policy SP10 would not be applicable. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP10. Managing Development in the Countryside
A0348	B010	n/a	Noted; no actions proposed	No	SP10. Managing Development in the Countryside
A0351	B002	Para 4 of draft Policy SP10 should allow for: specialist housing such as retirement living or sheltered housing; extra care housing or housing-with-care; and residential care homes and nursing homes where there is a shortage of provision locally; and self-build and custom-build housing on suitable sites adjoining development boundaries.	Noted. SP10 reflects the Draft Plan strategy of achieving a sustainable and appropriate pattern of development through new development focused in the urban areas. Accordingly, a wide range of allocations and other opportunities are provided by the Draft Plan for all types of housing within settlements. In line with the Plan's strategy SP10 seeks to strictly control new market housing outside development boundaries. This reflects the approach set out in national policy which seeks to direct new housing development away from isolated rural locations to places where it will support the role of existing settlements and their communities. Affordable housing exception schemes in appropriate locations are enabled by a range of policies in the draft Plan as sustainable housing solutions to meet recognised local housing needs. Recognised local needs can of course include specialist affordable housing, including appropriate types of accommodation for older persons encompassing both C2/C3 use classes. Single Pot Exception Policy DP6 provides a mechanism for affordable self-build dwellings. DP1 makes provision for specialist older person accommodation in settlements in a way which is integrated with broader market provision in communities, recognising the benefits of access to services and facilities, including healthcare, which may be less accessible in countryside locations. As such it is considered that allowing open market self build or older person accommodation in the countryside is unnecessary and would undermine the proposed strategic approach within the draft Shropshire Local Plan and the plan led approach to managing development in Shropshire.	No	SP10. Managing Development in the Countryside

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0354	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	Not Specified	No	Not Specified	<p>Welcome the new draft Shropshire Local Plan, but consider it currently fails all four tests of soundness in relation to older persons' accommodation in relation to draft Policies SP2, DP1, SP9 and S16.1, as:</p> <ul style="list-style-type: none"> <li>-Draft policies do not set a target for provision of specialist housing for the elderly or specifically seek to meet this identified need, despite the clear and acknowledged (para 4.20 of the draft Shropshire Local Plan) need, as such it is not 'positively prepared'.</li> <li>-The draft Shropshire Local Plan evidence base illustrates Shropshire's ageing population profile (particularly the Strategic Housing Market Assessment (SHMA) which is summarised in Para 4.40 of the draft Shropshire Local Plan as identifying a need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision), as do the 2018-based household projections (which forecasts higher growth of the elderly than the 2016-based household projections that underpin the SHMA (the majority in the 75-84 and 85+ age groups) - table provided summarising difference within representation). However the draft Shropshire Local Plan makes no specific provision to deliver housing to meet this need, apart from a proposed requirement to provide an appropriate mix of housing within draft Policy DP1. This is inadequate (particularly given the challenges identified in Para 4.20 of the draft Shropshire Local Plan) and will not deliver the quantity or quality of older persons' housing needed in Shropshire. As such it is 'not justified'.</li> <li>-The draft Shropshire Local Plan will fail to deliver sufficient specialist housing and as such is not 'effective' at meeting needs for older persons accommodation. Policy DP1 encourage older persons' housing on sites of 50 or more dwellings, but is unlikely to fully meet Shropshire's needs for this type of housing, due to the limited number of large developments. Schedule A7 of the draft Shropshire Local Plan identifies 76 allocations, of which 36 are for 50+ dwellings. However, 20 of these are for up to 100 dwellings and as such unlikely to make significant contributions amongst the normal housing mix, leaving only 16 sites to make any significant contribution to the need for at least 6,000 units. Furthermore, few of the promoters of proposed allocations have provided evidence they will make significant specialist housing provision on what are largely general housing sites. Quantity and quality of units needed will only be delivered if the proposed approach is supplemented by specialist housing allocations and includes support for 100% specialist housing sites.</li> <li>-Para 61 of the National Planning Policy Framework (NPPF) states the size, type and tenure of housing for different groups in the community (including older people) should be assessed and reflected in policy. National Planning Practice Guidance (NPPG) supports this and also encourages specific allocations for specialist housing and a positive approach to 100% specialist housing. However, the draft Shropshire Local Plan does not include a specific targets for specialist housing within its policies and does not allocate any sites specifically for this purpose. As such it is not consistent with national policy in failing to adequately plan for this category of housing.</li> </ul>
A0355	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	Not Specified	No	Not Specified	<p>Overall, support the positive approach in sections 2 and 3 of draft Policy SP10 to economic and community development in the countryside and welcome enablement of a wide range of uses that will strengthen rural sustainability.</p> <p>However, section 3a restricts new economic development to "small-scale", this fails the 'justified', 'effective' and 'consistent with national policy' tests of soundness, as:</p> <ul style="list-style-type: none"> <li>-National policy does not limit rural economic development to small-scale, rather Section 6 of the National Planning Policy Framework (NPPF) seeks to support a prosperous rural economy and Para 83 of the NPPF relates to policy/decision making in relation to various forms of development in rural areas, including 'all types of business'.</li> <li>-Sections 3b and 3c do not impose similar size restrictions on existing businesses and land-based businesses, so there is no justification for doing so for new businesses.</li> <li>-The restriction is unnecessary, given the draft policy requires economic development to "maintain or enhance countryside vitality and character".</li> </ul> <p>Section 4d of draft Policy SP10 permits sustainable re-use of buildings with heritage significance, but wording is so 'tight' it renders renovation unviable and impractical in most cases. Specifically it requires "minimal alteration, extension or rebuilding", greatly limiting flexibility necessary to make renovation schemes worthwhile - little point if a building cannot be brought up to modern standards which in most cases involves some alterations/extensions to the original building, which can be done sympathetically to provide a successful mix of original and modern.</p> <p>Intention of section 4d is to achieve, "optimum viable and sustainable reuse of buildings with heritage significance" but restrictions render it ineffective and fail the 'effective' test of soundness.</p>
A0384	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements.</p> <p>There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.</p>
A0388	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10(4a)	Not Specified	No	Not Specified	<p>Issues raised and detailed at Regulation 18 stage for SP9 (now SP10) and the associated DP3, DP4, DP5, DP6 and DP7 have not been addressed. There remain concerns that developers could bring forward exception sites that would be unsustainable for those requiring affordable housing. Where a settlement included a school or had access to a school via sustainable transport modes (a very subjective criteria), these could be targeted for multiple sites that could adversely change their character and not be supported by local services. Concerns raised at Reg 18 for SP9 (now SP10) DP3, DP4, DP5, DP6 and DP7 need to be addressed to ensure a good mix of housing in an area, sustainable and viable access to schools, services and employment for those without cars, change in character from multiple and adjacent sites and erosion of gaps between settlements.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0354	B002	Para 4 of draft Policy SP10, which identifies forms of residential development in the countryside which will be positively considered (where they meet all relevant requirements of Local Plan policies), should include an additional form, specifically: specialist housing such as retirement living or sheltered housing; extra care housing or housing-with-care; and residential care homes and nursing homes where there is a shortage of provision locally.	<p>It is considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate. Specifically:</p> <ul style="list-style-type: none"> <li>-Draft Policy DP1 requires all residential development to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. It also specifically requires the provision of an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings. The draft policy thus makes provision for specialist older person accommodation in settlements in a way which is integrated with broader market provision in communities, recognising the benefits of access to services and facilities, including healthcare, which may be less accessible in countryside locations.</li> <li>-Settlement policies (S1-S19) allow for appropriate windfall development within identified development boundaries (or in the case of Community Clusters on specified types of sites) where they comply with other policy requirements, which can of course include accommodation for older people.</li> <li>-Draft Policy SP10, in line with the Plan's strategy, seeks to strictly control new market housing outside development boundaries. This reflects the approach set out in national policy which seeks to direct new housing development away from isolated rural locations to places where it will support the role of existing settlements and their communities. Draft Policy SP10 allows for affordable exception, entry level exception and cross subsidy exception housing schemes which meet evidenced local housing needs and other policy requirements. This again can include appropriate tenures of older person accommodation.</li> </ul> <p>As such it is considered that allowing open market older person accommodation in the countryside is unnecessary and would undermine the proposed strategic approach within the draft Shropshire Local Plan and the plan led approach to managing development in Shropshire.</p>	No	SP10. Managing Development in the Countryside
A0355	B003	Modify section 3a of draft Policy SP10 to remove reference to 'small-scale'. Modify section 4d of draft Policy SP10 to remove reference to alteration and extension, instead referencing only minimal rebuilding.	<p>Noted. Draft Policy SP10 reflects the Draft Plan's urban development focus and strategy of focusing growth in strategically agreed locations (set out in Draft Policy SP2) whilst supporting rural communities by enabling some controlled development to maintain local sustainability. Other draft policies in the plan relating to economic strategy and growth ( SP12; SP13, SP14) reflect the expectation that a sustainable pattern of development will be delivered by directing employment development primarily to identified strategic sites or to Shrewsbury, Principal Centres and Key Centres as these locations will more readily provide an employment land offer supported by housing, services and accessibility. However part 3 of draft Policy SP10 is positively phrased and thus allows for the consideration of other development which is not listed on its sustainability merits. As such it is considered that the broadening of the criteria by removing reference to small-scale is unnecessary and would undermine the proposed strategic approach within the draft Shropshire Local Plan and the plan led approach to managing development in Shropshire.</p> <p>Part 4d of the Draft Policy reflects local and national policy aims in respect of heritage assets. It also seeks to more broadly safeguard the character of buildings and the countryside. The draft policy does not necessarily preclude sympathetic alterations and extensions but expects that individual proposals would be considered on their merits as clarified by the draft policy explanatory text.</p>	No	SP10. Managing Development in the Countryside
A0384	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	<p>Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP10, rather than draft Policy SP10 itself.</p> <p>Sites STC002 and P58a are proposed for allocation to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. As proposed allocations, draft Policy SP10 would not be applicable.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p>	No	SP10. Managing Development in the Countryside
A0388	B003	none specified.	<p>Noted. Response references the provision for exception schemes in SP10 which facilitates affordable development but does not however set out the detailed approach referenced. Issues raised are therefore more appropriately considered in relation to the wording and operation of exception policies DP3, DP4, DP5, DP6 &amp; DP7.</p>	No	SP10. Managing Development in the Countryside

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0393	B011	Needs to set out how much renewable energy is required & how this might be achieved. How many solar or wind farms are likely to be required and where would they be best located within the county; SP10 5(d) Investment should be prioritised for sustainable transport in appropriate locations	Local Plan has to address a wide range of issues and requirements and is intended to be read as a whole. Therefore, in addition to the criteria set out in Draft Policy SP10, the relevant considerations of all other applicable policies will need to be taken into account in decision making on planning applications. Council considers that the approach taken to renewable energy in policy DP26 Strategic Infrastructure, as well to climate change and reducing carbon emissions more generally throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. The Transport Plan sets out transport investment priorities .No change proposed.	No	SP10. Managing Development in the Countryside
A0427	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP10, rather than draft Policy SP10 itself. Sites STC002 and P58a are proposed for allocation to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. As proposed allocations, draft Policy SP10 would not be applicable. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP10. Managing Development in the Countryside
A0443	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP10. Managing Development in the Countryside
A0461	B005	Suggest that further flexibility should be provided for within Policy SP9 to consider sustainable development opportunities beyond the development limits identified on the Policy Maps. Due to the rural nature of the County, Gladman suggest that a blanket approach to development beyond the settlement boundary may not be appropriate nor effective. A criterion-based approach that considers additional residential schemes that adjoin the settlement boundaries of the Strategic Centre of Shrewsbury and the Principal Centres may be a more appropriate approach.	Noted. The purpose of the draft Shropshire Local Plan is to provide a framework for the sustainable development of Shropshire. A key part of this process involves establishing an appropriate strategy for the level and distribution of development. This is achieved, in part, by identifying development boundaries and residential development guidelines for settlements. Accordingly, a wide range of allocations and other opportunities are provided by the Draft Plan for all types of housing within settlements. SP10 reflects the Draft Plan strategy of achieving a sustainable and appropriate pattern of development through new development focused in the urban areas. In line with the Plan's strategy SP10 seeks to strictly control new market housing outside development boundaries.	No	SP10. Managing Development in the Countryside
A0467	B001	N/A	Noted. No soundness issues with draft Policy SP10 are raised. Comments support the change of status of existing Community Cluster settlements to countryside.	No	SP10. Managing Development in the Countryside

A0519	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.
A0543	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	The sites proposed for employment development at Stanmore is situated in open countryside, and are accessed through a country park. The Council, and the local residents in the Stanmore area, have gone to great lengths in the past to preserve this situation. Policy SP10 of the Local Plan Review proposes to restrict economic development in rural areas in line with national guidance. Policy SP10 says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. There is no guarantee that the proposed allocations will produce that effect, so the proposed allocations are an attempt to side-step such limitations for future developers. There is no reason why such allocations should be made, the countryside should continue to be protected. The reasons why this area of countryside should not be protected as the majority of the rest of the rural area of the County are, have not been justified and the need for the proposed allocation has not been properly evidenced.
A0544	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. 1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B007-11	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	Renewable energy is mentioned in the opening paras but there is no consideration in the plan of how much is required or how this might be achieved.SP10 5(d) Investment should be prioritised for sustainable transport in appropriate locations, in line with DfT guidance on a hierarchy of road users as road transport is a major contributor to the Climate Emergency.
A0629	B021	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	Yes	No	Yes	Within para 3 of draft Policy SP10, the phrase ' maintain or enhance countryside vitality and character' is too tightly drawn to allow for new forms of employment to emerge – it condemns the rural area to a fixed and probably obsolete pattern of employment generation and land use.
A0629	B022	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	Yes	No	Yes	There is no policy on large intensive livestock units, which have huge environmental problems. Agricultural development is mentioned in draft Policy SP10 but the policy content is not adequate to address the significant factors around this big issue for Shropshire.
A0634	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	Yes	No	Not Specified	This policy does not adequately address the issue of large intensive livestock units, which have been the commonest form of major development within the AONB in the last decade. Most of these have been recommended for approval, in contrast to the 'exceptional circumstances' wording and tests within NPPF for major development in AONBs. The AONB Management Plan identifies this category of major development as a significant concern. Large intensive livestock units have also been an area of significant contention elsewhere in Shropshire and so should be addressed in this policy as well as relying on the AONB policy DP24. The soundness test of being positively prepared "meeting the area's objectively assessed needs" is arguably not met. Everything that is said about agricultural development in para 3c of SP10 comes under the preface "...will be positively considered..". As in NPPF, the geographically specific exception policies such as for the AONB effectively over-ride general policy presumptions in favour of certain types of development, but unless this is made clear the policies tend not to be interpreted this way and positive presumptions become a green light for 'anything goes'.
A0646	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	Yes	Yes	Yes	The Estate considers the Councils approach to development in Shrewsbury as set out within SP10 is sound when considered against the tests set out in para 35 of the NPPF.
A0671	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	Not Specified	Not Specified	Not Specified	United Utilities owns assets which may require upgrades in the near future, that are situated in the countryside. Important to ensure any required upgrades/expansions to these sites can be undertaken to meet infrastructure requirements of proposed future development and respond to environmental agendas in accordance with obligations. Request the draft Shropshire Local Policy and proposals map recognise that utility sites, located within the countryside are appropriate for development for operational purposes. Assets include: Woore Serviced Reservoir; Land at Bearstone Borehole; Adderley Wastewater Treatment Works (WWTW); Calverhall WWTW; and Oswestry Water Treatment Works (WTW).

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B007-11	Needs to set out how much renewable energy is required & how this might be achieved. How many solar or wind farms are likely to be required and where would they be best located within the county; SP10 5(d) Investment should be prioritised for sustainable transport in appropriate locations	Noted. Local Plan has to address a wide range of issues and requirements and is intended to be read as a whole. Therefore, in addition to the criteria set out in Draft Policy SP10, the relevant considerations of all other applicable policies will need to be taken into account in decision making on planning applications. Council considers that the approach taken to renewable energy, climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. The Transport Plan sets out transport investment priorities .	No	SP10. Managing Development in the Countryside
A0629	B021	Delete the wording "...where they maintain or enhance countryside vitality and character,"... from para 3 of draft Policy SP10.	Noted. Shropshire Council considers that it is appropriate to include consideration of maintenance or enhancement of countryside vitality and character in the context of proposals for sustainable employment, tourism, leisure, other business and community development proposals in the countryside.	No	SP10. Managing Development in the Countryside
A0629	B022	Draft Policy SP10 needs to look at the planning considerations in respect of warehousing type buildings being erected and totally out of keeping in rural settings.	Noted. It is considered that the approach set out in SP10 is appropriate. Policy SP10 specifies that for positive consideration of agricultural proposals should 'maintain or enhance countryside vitality and character' and comply with all other relevant policy. Additional requirements are identified for large scale new development, with separate criteria for agricultural developments and other particularly relevant policies, including that relating to the AONB, signposted. The draft Shropshire Local Plan has to address a wide range of issues and requirements and is intended to be read as a whole . Therefore, in addition to the criteria set out in Draft Strategic Policy SP10, the relevant considerations of all other applicable policies will need to be taken into account in decision making on planning applications, along with other material considerations which can include other plans such as the AONB Management Plan which is directly referenced in draft Policy DP24.	No	SP10. Managing Development in the Countryside
A0634	B005	This topic justifies specific policy development and background given its importance, and should not be subsumed within the broader policy SP10. The AONB Management Plan policy P5 on Agricultural Development has some material to draw on here: "vi) Criteria indicating that applications for intensive livestock buildings should be refused include where: <ul style="list-style-type: none"> <li>the scale of buildings would exceed the farmstead's existing built footprint</li> <li>proximity to existing sheds would create significant cumulative impacts</li> <li>location is proposed in open field locations away from other farm buildings</li> <li>significant earth-moving or bunding is proposed</li> <li>the topography means that the development will be easily visible</li> <li>harm to landscape character cannot be satisfactorily mitigated</li> <li>proximity to residential properties or other businesses (within 400m has potential to generate harmful impacts on amenity, as recognised in the restriction in this zone for agricultural permitted development)</li> <li>units would be accessed by narrow roads and/or heavy traffic movements would alter the character of rural lanes or damage hedges or verges."</li> </ul> Other key issues are around airborne nitrogen, waste materials especially in relation to the water environment, the physical landscape impact of large buildings, noise and odours, and associated traffic. Farming is vital to provide food, and this will involve some built development. However unsustainable forms of farming are now widely understood to be a key contributor to the Climate and Ecological Emergency, yet the Plan does not really acknowledge that agricultural developments can cause harm. The Plan should actively encourage sustainable forms of farming (with explanation) as is done for other sectors of economic activity such as tourism.	Noted. It is considered that the approach set out in SP10 is appropriate. Policy SP10 specifies that for positive consideration of agricultural proposals should 'maintain or enhance countryside vitality and character' and comply with all other relevant policy. Additional requirements are identified for large scale new development, with separate criteria for agricultural developments and other particularly relevant policies, including that relating to the AONB, signposted. The draft Shropshire Local Plan has to address a wide range of issues and requirements and is intended to be read as a whole . Therefore, in addition to the criteria set out in Draft Strategic Policy SP10, the relevant considerations of all other applicable policies will need to be taken into account in decision making on planning applications, along with other material considerations which can include other plans such as the AONB Management Plan which is directly referenced in draft Policy DP24.	No	SP10. Managing Development in the Countryside
A0646	B007	n/a	The draft Shropshire Local Plan has to address a wide range of issues and requirements and is intended to be read as a whole . Therefore, in addition to the criteria set out in Draft Strategic Policy SP10, the relevant considerations of all other applicable policies will need to be taken into account in decision making on planning applications, along with other material considerations which can include other plans such as the AONB Management Plan which is directly referenced in draft Policy DP24.	No	SP10. Managing Development in the Countryside
A0671	B003	Policy and the proposals map recognise that utility sites, located within the countryside are appropriate for development for operational purposes. Assets include: Woore Serviced Reservoir; Land at Bearstone Borehole; Adderley Wastewater Treatment Works (WWTW); Calverhall WWTW; and Oswestry Water Treatment Works (WTW).	Noted. The draft Shropshire Local Plan recognises the need for the provision of appropriate infrastructure, to support sustainable communities and the delivery new development as set out in a range of draft policies including DP19, DP25 & DP26. DP19 requires adequate water infrastructure for development and DP26 relates specifically to strategic infrastructure, including that required for water management. As well as new strategic infrastructure provision, draft Policy DP26 identifies the import of ensuring the continued operation and potential for necessary expansion of existing strategic infrastructure. Requirements for infrastructure development in the countryside, are referenced in part (e) of Policy SP10 in the countryside but a minor modification to also include specific reference to infrastructure in paragraph 2 of the Policy would provide further clarity. Existing water infrastructure is appropriately identified in the Water Cycle Study which forms part of the evidence base for the Draft Plan.	Yes	SP10. Managing Development in the Countryside

A0674	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10	Not Specified	Not Specified	Not Specified	Support the principle of development within existing settlements. Such an approach should be brought forward within the Council's allocations, which seeks to allocate land within the countryside, where there are still potential sites within settlement boundaries to meet the housing need.
A0678	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	No	No	No	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.
A0679	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10 (STC002 and P58a)	No	No	No	Draft Policy SP10 proposes to restrict economic development in rural areas, in line with national guidance. It says that development proposals in the countryside will be allowed where they maintain or enhance countryside vitality and character. Proposed employment allocations STC002 and P58a at Stanmore are situated in open countryside and accessed through a country park (a situation the Council and local community have sought to protect), there is no guarantee their development will achieve this requirement, so they are proposed for allocation in an attempt to side-step these requirements. There is no reason to allocate sites STC002 and P58, the countryside should continue to be protected.
A0014	B027	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	Not Specified	Not Specified	Concerned about loss of Green Belt. Consider it is unacceptable to develop (or safeguard) land where its release from the Green Belt would cause a moderate or above risk of harm.
A0014	B028	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11(3b)	Not Specified	Not Specified	Not Specified	Para 3b should be removed. The draft Policy should explicitly state that no Green Belt should be released if this would cause a moderate or above risk of harm.
A0014	B029	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 3.108	Not Specified	Not Specified	Not Specified	Mitigation of land removed from the Green Belt should follow Biodiversity Net Gain principles.
A0060	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	No	No	Not Specified	SC concluded that exceptional circumstances exist for the release of Green Belt land without properly satisfying NPPF paragraph 137 to demonstrate that all other reasonable development options for meeting identified needs have been properly assessed. This omission affects land released for housing and employment uses on sites allocated for development to 2038 and also land safeguarded for future development. The evidence base for the Local Plan did not provide the reasons why other sites were rejected and did not consider other opportunities for industrial development within neighbouring Telford and the sub-region (Staffordshire, Wolverhampton, West Midlands etc) before changing the Green Belt boundaries around Shifnal. Shifnal Town Council suggested SHF018a as a more sustainable option than SHF018b/SHF018d to meet the employment needs of the town and no explanation was provided for rejecting SHF018a as safeguarded land. The land that is safeguarded is not justified in the evidence base, Sustainability Appraisal or Proposals Map. There is also conflict in Policy S15.1 between Point 4 which seeks to promote the local and sub-regional role and functions of Shifnal and Point 7 which protects the safeguarded land from development except in very special circumstances. These very special circumstances relate more to the sub-regional role of the town than to the local objectives in the Neighbourhood Plan which is a material consideration for the Local Plan. This also reflects an objective in the exceptional circumstances statement that Shifnal should perform the same role as Bridgnorth even though Shifnal is a smaller settlement, located close to the strategic centre of Telford. Shifnal is also expected to be influenced by development of the strategic site on the former Ironbridge Power Station. The release of Green Belt land for development and safeguarding cannot be justified as all reasonable options for development have not been assessed and exceptional circumstances for the release of this Green Belt land have not been properly identified.
A0124	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Yes	Yes	Yes	Support the modifications made to part 8 of the policy at Reg 18.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0674	B005	n/a	Noted.	No	SP10. Managing Development in the Countryside
A0678	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP10, rather than draft Policy SP10 itself. Sites STC002 and P58a are proposed for allocation to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. As proposed allocations, draft Policy SP10 would not be applicable. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP10. Managing Development in the Countryside
A0679	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP10, rather than draft Policy SP10 itself. Sites STC002 and P58a are proposed for allocation to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. As proposed allocations, draft Policy SP10 would not be applicable. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP10. Managing Development in the Countryside
A0014	B027	Sites identified for development or safeguarding that would result in moderate or above harm to the Green Belt should be removed from the draft Shropshire Local Plan.	Noted. In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	SP11. Green Belt and Safeguarded Land
A0014	B028	Delete paragraph 3b of draft Policy SP11 and replace it with a statement that no Green Belt should be released if this would cause a moderate or above risk of harm.	Noted. In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Harm of release is a significant consideration, but other factors must also be taken into account as described in the Policy explanatory text.	No	SP11. Green Belt and Safeguarded Land
A0014	B029	Amend para 3.108 to stipulate that land removed from the Green Belt should follow biodiversity net gain principles.	Noted. Achieving biodiversity net gain is already captured in draft Policy DP12. The Natural Environment, as such it would apply to development of any site, including those which were removed from the Green Belt for development.	No	SP11. Green Belt and Safeguarded Land
A0060	B011	See summary of main issues.	It is understood that this representation primarily relates to the proposed strategy for Shifnal and not the content of draft Policy SP11. Issues raised relating to Shifnal are addressed in the relevant settlement section. Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	SP11. Green Belt and Safeguarded Land
A0124	B008	n/a	Support welcomed.	No	SP11. Green Belt and Safeguarded Land

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0125	B004	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land

Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0137	B006	Remove Land at Junction 3 from the Green Belt (370ha) and include it as a strategic settlement to contribute to cross-boundary housing and employment need (3,000 dwellings and 75ha employment land - reducing contributions from the wider employment land supply to 15ha which could be accommodated on non-strategic sites at Bridgnorth and Shifnal). Land at Junction 3 offers significant wider benefits as documented within the representation. Include reference to land at Junction 3 as a strategic settlement within draft Policy SP11 and Table SP11.1. The representation documents these suggested changes.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. With regard to the proposed contribution to the cross-boundary need arising within the Black Country, Shropshire Council currently understands that evidence prepared to inform the ongoing Black Country Local Plan Review indicates a significant unmet housing and employment land need within the Black Country. As a result of Duty to Cooperate discussions, Shropshire Council is proposing to contribute 1,500 dwellings and 30ha of employment land towards meeting this unmet housing and employment land needs.	No	SP11. Green Belt and Safeguarded Land
A0137	B007	Remove Land at Junction 3 from the Green Belt (370ha) and include it as a strategic settlement to contribute to cross-boundary housing and employment need (3,000 dwellings and 75ha employment land - reducing contributions from the wider employment land supply to 15ha which could be accommodated on non-strategic sites at Bridgnorth and Shifnal). Land at Junction 3 offers significant wider benefits as documented within the representation. Include reference to land at Junction 3 as a strategic settlement within draft Policy SP11 and Table SP11.1. The representation documents these suggested changes.	Noted. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0140	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land

A0148	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	Not Specified	Not Specified	<p>In terms of safeguarding land, the approach is over-cautious. Safeguarded land should be allocated for housing through this Local Plan review to meet the needs within this plan period, rather than beyond 2038 to ensure flexibility, complies with DtC, affordable housing needs are met, and infrastructure and economic needs are met. In identifying additional sites to deliver an increased housing requirement, safeguarded sites should be considered ahead of other sites given that they have been assessed and identified as acceptable in principle for development. The council do not specify what type of development the land at Albrighton, Alveley and Shifnal relates. The Council has not specified a period beyond 2038 for which the safeguarded land is intended to accommodate, however 5 years in this instance is considered appropriate.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0143	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0145	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0148	B006	It is considered that the Council's 'Forecast of Delivery Timescales for Local Plan Allocations' lacks sufficient details on the anticipated delivery rates of allocations; resultingly, the DSLP assumes an unrealistic and overambitious build-out rate of housing within the plan period, and thus a number of sites including the above strategic sites are likely to continue to deliver beyond 2038. L&Q Estates considers that the safeguarded site at 'land between Revells Rough, Lamledge Lane and the eastern rail line' in Shifnal should instead be allocated for housing to meet needs within the plan period rather than beyond 2038.	It is understood that this representation primarily relates to the proposed development strategy and identified allocations for Shifnal and not the content of draft Policy SP11. Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Shropshire Council also considers that it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. Assumptions regarding non-delivery rates, windfall allowances and delivery timescales for proposed allocations are considered appropriate and respond to consideration of the specific characteristics, constraints and opportunities that exist across Shropshire, in specific settlements and on specific sites. In accordance with national policy safeguarded land is appropriately identified to meet needs beyond the current Plan period and decisions on future allocation of safeguarded land would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0255	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan is unsound and not in compliance with national policy. It purports to support restrictions on development in the Green Belt, but also proposes release of some 11.5ha (STC002 and P58a) at Stanmore for unidentified employment uses.</p> <p>Draft Policy SP11 says Green Belt will be protected against inappropriate development, as defined by national policy. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a.</p> <p>Removing STC002 and P58a from the Green Belt removes the need to demonstrate 'very special circumstances', this is not made clear in draft Policy SP11, or the following explanatory paragraphs, but ought to be.</p> <p>The draft Policies Map shows both the existing Stanmore Industrial Estate and STC002/P58a, as being excluded from the Green Belt. This is misleading as at present, STC002 and P58a are included within the Green Belt. The text of draft Policy SP11 and the draft Policies Map should make this difference clear.</p> <p>Justification for removing proposed allocations STC002 and P58a from the Green Belt is not clear. Unless specific exceptional need for this development exists and exceptional circumstances are demonstrated, they should not be removed from the Green Belt. Even if removed from the Green Belt, draft countryside Policy would still apply.</p> <p>The Green Belt Exceptional Circumstances Statement prepared to inform the draft Shropshire Local Plan was produced late in the Local Plan process and appears to be aimed at explaining proposed allocations rather than being the basis for decisions. For STC002 and P58a do not consider the factors identified in themselves represent exceptional circumstances - similar factors likely exist elsewhere. No detailed evidence of past/future impact of these issues and no explanation of why they could not be satisfied elsewhere on sites outside the Green Belt is provided. Also note the Council consider availability of land have impacted on delivery of employment, but no evidence is presented to substantiate this (reference is made to special circumstances which have delayed delivery of current employment allocations, but it is not made clear what these are or how they can be rectified).</p> <p>No exceptional circumstances were provided in the Regulation 18 consultation document (reference is made to a Green Belt Review but this assesses harm to the Green Belt and does not identify exceptional circumstances).</p> <p>Consider STC002 and P58a have long term implications for the Green Belt (including adversely affecting the openness of the Green Belt and encroachment of the countryside). No exceptional circumstances in terms of imperative/urgent need for additional employment land in Stanmore/Worfield Parish/Bridgnorth town; need for a particular employment operator is in need of additional land adjoining an existing operation that cannot be moved elsewhere; or that an operator has special requirements that cannot be met anywhere other than on the proposed allocated sites, is provided. Same arguments presented could be provided at a future Local Plan Review. Also no evidence of the need for this amount of land and the need for two sites (opposite ends of the existing estate, stretching into Green Belt).</p> <p>Case law has established suitability of land for a particular use does not on its own constitute exceptional circumstances (see Gallagher Homes Ltd v Solihull DC [2014] EWCA 1610), the same logic would mean lack of harm to the Green Belt also does not itself constitute an exceptional circumstance.</p> <p>No evidence provided that all land and buildings at Stanmore have been developed and let. There are several buildings that are empty, and areas of land that have never been developed for commercial purposes.</p> <p>Consider proposed allocations STC002 and P58a are contrary to the National Planning Policy Framework (NPPF) including para 35, unsustainable, unjustified and unevidenced and there is no guarantee they will actually be delivered.</p>
A0256	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a.</p> <p>Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites.</p> <p>Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'.</p> <p>If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0255	B012	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	<p>Noted. Shropshire Council considers that the draft Policies of the draft Shropshire Local Plan are consistent and together provide an appropriate vision and framework for the future development of Shropshire to 2038; address needs and opportunities in relation to housing, the local economy, community facilities and infrastructure; and seek to safeguard the environment, enable adaptation to climate change and helps to secure high-quality and accessible design.</p> <p>Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development (as defined in the NPPF) within Green Belt, with this being a necessary consideration for planning applications. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 &amp; special circumstances requirements would not be applicable.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p> <p>Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p>	No	SP11. Green Belt and Safeguarded Land
A0256	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	<p>Noted. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0257	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0264	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 and STC002/P58a	Yes	No	Yes	Policy SP11 sets out to protect the Green Belt from 'inappropriate development' which detracts from the fundamental aims to preserve the openness and ensure the permanence of Green Belts in accordance with national policy. The release of 11.5ha of land from the Green Belt at Stanmore for industrial or storage uses with the construction industrial buildings could not fail to have an adverse effect on the Green Belt which will continue to surround the proposed allocated sites. It is likely therefore, that if approved, this allocation could also be used for further unjustified incursions into the Green Belt in the future. The sites now proposed for employment development at Stanmore are located within the Green Belt and the Council propose to remove this protection without any exceptional circumstance being demonstrated. The National Planning Policy Framework says, at para 145, that local planning authorities should regard the construction of buildings as being inappropriate in the Green Belt, unless they are for certain, specified, uses - none of which include new development for industrial purposes. There is no indication of the types of businesses which might locate at Stanmore, and so the proposals appear to be a device to ensure that future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11 particularly to demonstrate very special circumstances for development to be permitted. This proposed release of land from the Green Belt has not been justified, and the need for the land to be made available for employment development has not been evidenced.
A0265	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a. Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites. Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'. If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.
A0266	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a. Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites. Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'. If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0267	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0268	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. A0286	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	No	No	No	<p>SC concluded that exceptional circumstances exist for the release of Green Belt land without properly satisfying NPPF paragraph 137 to demonstrate that all other reasonable development options for meeting identified needs have been properly assessed. This omission affects land released for housing and employment uses on sites allocated for development to 2038 and also land safeguarded for future development. The evidence base for the Local Plan did not provide the reasons why other sites were rejected and did not consider other opportunities for industrial development within neighbouring Telford and the sub-region (Staffordshire, Wolverhampton, West Midlands etc) before changing the Green Belt boundaries around Shifnal. Shifnal Town Council suggested SHF018a as a more sustainable option than SHF018b/SHF018d to meet the employment needs of the town and no explanation was provided for rejecting SHF018a as safeguarded land. The land that is safeguarded is not justified in the evidence base, Sustainability Appraisal or Proposals Map. There is also conflict in Policy S15.1 between Point 4 which seeks to promote the local and sub-regional role and functions of Shifnal and Point 7 which protects the safeguarded land from development except in very special circumstances. These very special circumstances relate more to the sub-regional role of the town than to the local objectives in the Neighbourhood Plan which is a material consideration for the Local Plan. This also reflects an objective in the exceptional circumstances statement that Shifnal should perform the same role as Bridgnorth even though Shifnal is a smaller settlement, located close to the strategic centre of Telford. Shifnal is also expected to be influenced by development of the strategic site on the former Ironbridge Power Station. The release of Green Belt land for development and safeguarding cannot be justified as all reasonable options for development have not been assessed and exceptional circumstances for the release of this Green Belt land have not been properly identified.</p>

Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0286	B011	See summary of main issues.	It is understood that this representation primarily relates to the proposed strategy for Shifnal and not the content of draft Policy SP11. Issues raised relating to Shifnal are addressed in the relevant settlement section. Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	SP11. Green Belt and Safeguarded Land

It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0310	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. A0311	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a.</p> <p>Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites.</p> <p>Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'.</p> <p>If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.</p>
A0313	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	No	No	Not Specified	<p>SC concluded that exceptional circumstances exist for the release of Green Belt land without properly satisfying NPPF paragraph 137 to demonstrate that all other reasonable development options for meeting identified needs have been properly assessed. This omission affects land released for housing and employment uses on sites allocated for development to 2038 and also land safeguarded for future development. The evidence base for the Local Plan did not provide the reasons why other sites were rejected and did not consider other opportunities for industrial development within neighbouring Telford and the sub-region (Staffordshire, Wolverhampton, West Midlands etc) before changing the Green Belt boundaries around Shifnal. Shifnal Town Council suggested SHF018a as a more sustainable option than SHF018b/SHF018d to meet the employment needs of the town and no explanation was provided for rejecting SHF018a as safeguarded land. The land that is safeguarded is not justified in the evidence base, Sustainability Appraisal or Proposals Map. There is also conflict in Policy S15.1 between Point 4 which seeks to promote the local and sub-regional role and functions of Shifnal and Point 7 which protects the safeguarded land from development except in very special circumstances. These very special circumstances relate more to the sub-regional role of the town than to the local objectives in the Neighbourhood Plan which is a material consideration for the Local Plan. This also reflects an objective in the exceptional circumstances statement that Shifnal should perform the same role as Bridgnorth even though Shifnal is a smaller settlement, located close to the strategic centre of Telford. Shifnal is also expected to be influenced by development of the strategic site on the former Ironbridge Power Station. The release of Green Belt land for development and safeguarding cannot be justified as all reasonable options for development have not been assessed and exceptional circumstances for the release of this Green Belt land have not been properly identified.</p>
A0314	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a.</p> <p>Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites.</p> <p>Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'.</p> <p>If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.</p>

National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a.</p> <p>Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites.</p> <p>Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'.</p> <p>If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.</p>

A0339	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land

A0384	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0385	B003	Exceptional circumstances for release of Green Belt should be fully justified as per the National Planning Policy Framework (NPPF). Alternative non-Green Belt housing land supply options for beyond the plan period should be considered within the context of the urban focused strategy (taking account of non-Green Belt land opportunities at the strategic centre of Shrewsbury).	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council also considers that exceptional circumstances, as documented within the Green Belt Exceptional Circumstances Statement, exist to justify the proposed release of land from the Green Belt. In accordance with national policy safeguarded land is identified to meet needs beyond the current Plan period.	No	SP11. Green Belt and Safeguarded Land

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0387	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	No	Not Specified	The National Planning Policy Framework (NPPF) requires exceptional circumstances to be demonstrated to justify the release of land from the Green Belt. Note the Green Belt Exceptional Circumstances Statement (ECS), however query if the release of Green Belt land is fully justified. For instance, in relation to Shifnal, para 8.73-8.81 of the ECS notes there are potential alternative non-Green Belt options at other urban locations along the strategic growth corridor, including Shrewsbury, which could mean that in the balance a case for exceptional circumstances is not fully justified. Some proposed Green Belt release is for safeguarded land which can only come forward once allocated in a future Local Plan Review. Consideration of provision of further flexibility beyond the proposed Plan period, via sites which could come forwards more quickly to respond to market circumstances, should be undertaken. Further consideration should be given to non-Green Belt development under draft Policy SP11 to ensure the draft Shropshire Local Plan is justified and consistent with national planning policy.
A0410	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	No	Not Specified	CPRE's report 'local green space: State of the Green Belt 2021' documents the importance as accessible countryside to towns and cities and the gradual erosion of the Green Belt. Do not consider proposed releases of Green Belt land set out in Table SP11.1 are justified by proportionate evidence or by a sufficient exceptional circumstances. Exceptional circumstances presented, essentially development pressure, partly emanating from the West Midlands and along the M54 corridor, are not quantified or justified by proportionate evidence. Appears to be no need to release RAF Cosford from the Green Belt - existing policies already allow for the military-related development proposed. Certainly no need for the amount of land proposed to be released and no evidence is given o support how the actual area of land proposed has been calculated. Land required for the Midlands Air Ambulance headquarters is a separate issue from the existing RAF Cosford. Planning permission has already been granted and "very special circumstances" were accepted to exist by the Council. Concerned about proposals for Shifnal (documented under comments on draft Policy S15). Above considerations indicate that the quantum of land proposed to be released from the Green Belt, both within this proposed Plan period and as safeguarded land, should be re-examined.
A0427	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002/P58a)	Not Specified	No	Not Specified	Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a. Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites. Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'. If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.
A0443	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0387	B004	Exceptional circumstances for release of Green Belt should be fully justified as per the National Planning Policy Framework (NPPF). Alternative non-Green Belt housing land supply options for beyond the plan period should be considered within the context of the urban focused strategy (taking account of non-Green Belt land opportunities at the strategic centre of Shrewsbury).	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council also considers that exceptional circumstances, as documented within the Green Belt Exceptional Circumstances Statement, exist to justify the proposed release of land from the Green Belt. In accordance with national policy safeguarded land is identified to meet needs beyond the current Plan period.	No	SP11. Green Belt and Safeguarded Land
A0410	B007	Because of the doubts about the quantum of the proposed releases from the Green Belt, the figures should be re-examined. Text should be added after clause 3b to state: "Green Belt land is important not only for the five purposes in NPPF 134 but also for its natural capital value. In presenting a "very special circumstances" case, applicants should be required to quantify: i) lost food production value per hectare at current productivity rates, and what that means for UK self-sufficiency; ii) lost carbon absorption in tonnes per hectare; and iii) lost biodiversity value."	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council considers the approach to establishing whether 'very special circumstances' exist to justify development within the Green Belt outlined within draft Policy SP11 and the National Planning Policy Framework (NPPF) is appropriate.	No	SP11. Green Belt and Safeguarded Land
A0427	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0443	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0519	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a.</p> <p>Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites.</p> <p>Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'.</p> <p>If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.</p>
A0543	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>The sites proposed for employment development at Stanmore are located in the Green Belt and Policy SP11 sets out to protect the Green Belt. The proposed allocation would remove the land from Green Belt protection without any exceptional circumstance being demonstrated. There is no indication of which businesses might wish to locate at Stanmore, and so the proposal appears to be a device to ensure that future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, that is, that proposals have to demonstrate that 'very special circumstances' exist.</p> <p>Policy SP11 says that the Green Belt will be protected in accordance with national policy. National policy is to protect green belts from 'inappropriate development'. Inappropriate development can be anything that detracts from the fundamental functions of green belts, which are to preserve their openness and to ensure their permanence. The National Planning Policy Framework says, at para 145, that local planning authorities should regard the construction of buildings as being "inappropriate" on a green belt, unless they are for certain, specified, uses – none of which include new development for industrial purposes. The re-lease of 11.5ha of land from the Green Belt at Stanmore for use for industrial or storage purposes, and the construction industrial buildings could not fail to have an adverse effect on the Green Belt which will continue to surround the proposed allocated sites.</p> <p>The proposed release of land from the green belt has not been justified, and the need for the land to be made available for employment development has not been evidenced. It is likely that, if approved, this allocation would be used for further unjustified incursions into the green belt in the future.</p>
A0544	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a.</p> <p>Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites.</p> <p>Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'.</p> <p>If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0519	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0543	B005	Sites STC002 and P58a – allocated for employment development at Stanmore – should be deleted from the Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP11. Green Belt and Safeguarded Land
A0544	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0559	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a. Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites. Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'. If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.
A0560	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a. Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites. Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'. If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.
A0586	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	No	No	Not Specified	Draft Policy SP11 is unsound. Consider insufficient safeguarded land has been identified to meet the longer term needs of Shifnal, allowing flexibility and opportunity for a choice of potential allocation sites in future, ensuring the longer term sustainability of the Local Plan or achieving key aspirations to improve the Green Belt. This is a significant error of the site assessment process and will likely result in the need for a further Green Belt Review at the end of the proposed Plan period, contrary to para 139 of the National Planning Policy Framework. Consideration of compensatory improvements to the environmental quality and accessibility of the remaining Green Belt, as required in the NPPF and National Planning Practice Guidance when undertaking the site assessment and identification process has been insufficient.
A0598	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	Not Specified	Not Specified	Support proposal to remove ALB014 from the Green Belt. However object to the site being proposed as safeguarded land, rather it should be allocated for residential development given the case outlined within the wider representation regarding the need for positive allocations to be made at Albrighton.
A0600	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Yes	Yes	Yes	Support reference in part 2 of draft Policy SP11 to the Strategic Site at RAF Cosford being excluded from the Green Belt. Also support reference in part 7 to RAF Cosford being a strategic site inset within the Green Belt to "facilitate military and charity operational and development needs", however would request a minor factual change to read "facilitate defence and charity operational and development needs." Welcome and support change made to Paragraph 3.107 to an earlier draft of this policy, which provides clarification that RAF Cosford Strategic Site is removed from the Green Belt.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0559	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0560	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0586	B004	More safeguarded land should be identified at Shifnal. Consider capacity for compensatory improvements to the Green Belt within the site assessment process.	Noted. Shropshire Council considers that an appropriate amount of safeguarded land has been proposed for Shifnal. This is considered sufficient to ensure that Green Belt boundaries will not need to be altered at the end of the plan period. Proposed allocations and proposed safeguarded land have been informed by a proportionate and robust site assessment process, this included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt and the ability to achieve compensatory improvements to the remaining Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances and compensatory improvements to the remaining Green Belt are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	SP11. Green Belt and Safeguarded Land
A0598	B008	ALB014 should be removed from the Green Belt and allocated for development, rather than safeguarded for future development beyond 2038.	Shropshire Council considers that the proposed development strategy for Albrighton and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Furthermore, proposed allocations and proposed safeguarded land have been informed by a proportionate and robust site assessment process, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. In accordance with national policy safeguarded land is identified to meet needs beyond the current Plan period and decisions on future allocation of safeguarded land would be a matter for a future Local Plan Review	No	SP11. Green Belt and Safeguarded Land
A0600	B012	Part 7 of draft Policy SP11 should be amended to read "facilitate defence and charity operational and development needs."	Noted. For the purpose of clarity a minor modification is proposed to para 7 of draft Policy SP11.	Yes	SP11. Green Belt and Safeguarded Land

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0606	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a.</p> <p>Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites.</p> <p>Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'.</p> <p>If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.</p>
A0609	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	No	Not Specified	<p>11.4 hectares of land (STC002 and P58a) adjacent to Stanmore Industrial Estate is proposed to be released from the Green Belt in Bridgnorth for employment development. Concerned very special circumstances do not exist to support these draft allocations. Para 137 of the National Planning Policy Framework (NPPF), indicates Green Belt boundaries should only be altered when all other reasonable options have been explored and there are no other reasonable alternatives. This is not the case in Bridgnorth and therefore the policy is not considered to be consistent with national policy.</p> <p>The draft Shropshire Local Plan proposes to allocate Tasley Garden Village (BRD030) as a sustainable location for housing and employment delivery at Bridgnorth. This site is located in open countryside, in close proximity to existing services and facilities and adjacent to existing housing and employment SAMDev allocations. It is considered unconstrained and suitable to deliver future housing and employment needs for Bridgnorth (within the proposed Plan period and beyond). As such, there is no need to allocate Green Belt land for development within the proposed Plan period or beyond.</p> <p>Draft Policy SP11 is therefore not considered consistent with national policy or justified and as such is unsound.</p>
A0619	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	No	Not Specified	Not Specified	<p>Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a.</p> <p>Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites.</p> <p>Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'.</p> <p>If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.</p>
A0621	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	No	Not Specified	<p>There are several key factors which support the need for additional allocations or safeguarded residential land around Shifnal as referenced in the Green Belt Exceptional Circumstances Statement:</p> <ul style="list-style-type: none"> <li>• Shifnal has experienced decades of restraint on its housing growth, which has resulted in significant demand for housing in the town. Shifnal needs to redress many years of under provision as a result;</li> <li>• Housing completions in Shifnal have traditionally been very low over the past two decades;</li> <li>• It is expected that the current rate of completions could result in the adopted housing land supply in both the current Local Plan and the Local Plan review being exhausted before 2024-25.</li> <li>• The slower rate of housing development in Shifnal has affected the affordability ratio in the town making Shifnal one of the most expensive markets in the County.</li> </ul> <p>With careful consideration given to siting, massing and landscape through master planning, SHF032, SHF018b, SHF018c and SHF018d could be released from the Green Belt and developed with limited harm to the Shropshire Green Belt and its overall integrity. In terms of hierarchy of land release from the Green Belt and development priority, it is considered that SHF032 and SHF018c provide a more suitable and therefore preferred option for development than land to the south west of Shifnal as currently identified for safeguarding beyond the plan period. SHF018c offers a genuine and more suitable alternative for safeguarded land to be identified in the Local Plan. Site SHF018c is scored as Good against the sustainability objectives in Stage 2a of the assessment. The rationale for retention of site allocation SHF032 within the Green Belt, despite previously being allocated for residential safeguarding is unclear. It has been demonstrated that SHF032 does not deliver a significant contribution to the asset's significance, and neither do views from or through SHF032 provide notable legibility of that significance. The Council's own evidence base supports the reinstatement of SHF032 as a residential allocation and proposed strategic safeguarded site SHF018c for inclusion within the Local Plan.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0606	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0609	B007	Remove proposed allocation STC002 and P58a.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	SP11. Green Belt and Safeguarded Land
A0619	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0621	B011	Add: Table SP11.1 Green Belt release by Location and Type: "Shifnal safeguarded land ha. figures amended with SHF018c and removal of Land SW of Shifnal."  Reinstate SHF032 as a housing allocation for 80 units	It is understood that this representation primarily relates to the proposed strategy and allocations for Shifnal and not the content of draft Policy SP11. Issues raised relating to Shifnal are further addressed in the relevant settlement section. Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlement's characteristics, constraints and opportunities that exist. In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Shropshire Council also considers that it has a robust proposed housing land supply.	No	SP11. Green Belt and Safeguarded Land

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0623	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	Not Specified	Not Specified	Albrighton is one of the most sustainable settlements within the county and also one of only a small number which is constrained by the West Midlands Green Belt given its proximity and functional relationship with the built up area of Wolverhampton. As such unlike other more rural and less sustainable settlements, there are limited opportunities where windfall sites can come forward to meet local need at Albrighton. Although provision is made for safeguarded land at Albrighton, it is in no way proportional to the village's sustainability and role in the settlement hierarchy. Table SP11.1 underlines this point. 92.8ha of safeguarded land for future residential development is proposed at Shifnal, which sits within the same tier in the settlement hierarchy, albeit is larger and therefore has a larger allocation of 1,500 dwellings. In contrast a much less proportional provision of safeguarded land for residential development at Albrighton of 19.9ha is proposed.
A0636	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	No	No	No	SC concluded that exceptional circumstances exist for the release of Green Belt land without properly satisfying NPPF paragraph 137 to demonstrate that all other reasonable development options for meeting identified needs have been properly assessed. This omission affects land released for housing and employment uses on sites allocated for development to 2038 and also land safeguarded for future development. The evidence base for the Local Plan did not provide the reasons why other sites were rejected and did not consider other opportunities for industrial development within neighbouring Telford and the sub-region (Staffordshire, Wolverhampton, West Midlands etc) before changing the Green Belt boundaries around Shifnal. Shifnal Town Council suggested SHF018a as a more sustainable option than SHF018b/SHF018d to meet the employment needs of the town and no explanation was provided for rejecting SHF018a as safeguarded land. The land that is safeguarded is not justified in the evidence base, Sustainability Appraisal or Proposals Map. There is also conflict in Policy S15.1 between Point 4 which seeks to promote the local and sub-regional role and functions of Shifnal and Point 7 which protects the safeguarded land from development except in very special circumstances. These very special circumstances relate more to the sub-regional role of the town than to the local objectives in the Neighbourhood Plan which is a material consideration for the Local Plan. This also reflects an objective in the exceptional circumstances statement that Shifnal should perform the same role as Bridgnorth even though Shifnal is a smaller settlement, located close to the strategic centre of Telford. Shifnal is also expected to be influenced by development of the strategic site on the former Ironbridge Power Station. The release of Green Belt land for development and safeguarding cannot be justified as all reasonable options for development have not been assessed and exceptional circumstances for the release of this Green Belt land have not been properly identified.
A0637	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	No	No	No	SC concluded that exceptional circumstances exist for the release of Green Belt land without properly satisfying NPPF paragraph 137 to demonstrate that all other reasonable development options for meeting identified needs have been properly assessed. This omission affects land released for housing and employment uses on sites allocated for development to 2038 and also land safeguarded for future development. The evidence base for the Local Plan did not provide the reasons why other sites were rejected and did not consider other opportunities for industrial development within neighbouring Telford and the sub-region (Staffordshire, Wolverhampton, West Midlands etc) before changing the Green Belt boundaries around Shifnal. Shifnal Town Council suggested SHF018a as a more sustainable option than SHF018b/SHF018d to meet the employment needs of the town and no explanation was provided for rejecting SHF018a as safeguarded land. The land that is safeguarded is not justified in the evidence base, Sustainability Appraisal or Proposals Map. There is also conflict in Policy S15.1 between Point 4 which seeks to promote the local and sub-regional role and functions of Shifnal and Point 7 which protects the safeguarded land from development except in very special circumstances. These very special circumstances relate more to the sub-regional role of the town than to the local objectives in the Neighbourhood Plan which is a material consideration for the Local Plan. This also reflects an objective in the exceptional circumstances statement that Shifnal should perform the same role as Bridgnorth even though Shifnal is a smaller settlement, located close to the strategic centre of Telford. Shifnal is also expected to be influenced by development of the strategic site on the former Ironbridge Power Station. The release of Green Belt land for development and safeguarding cannot be justified as all reasonable options for development have not been assessed and exceptional circumstances for the release of this Green Belt land have not been properly identified.
A0663	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	Not Specified	Not Specified	We are pleased to see part six of policy SP11 allows for the delivery of affordable housing on rural exception sites within the Green Belt, where there is a proven need, in line with national policy.
A0674	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	No	Not Specified	Object to Point 4 of draft Policy SP11. This does not comply with para 145(g) of the National Planning Policy Framework (NPPF), which does not limit redevelopment of previously developed land in the Green Belt to affordable housing rather than market homes and there is significant case law to substantiate this. The merits of such sites and the form of development proposed should be considered on the balance/test of openness and other policies in the draft Shropshire Local Plan and not limit the tenure of housing. As also demonstrated in case law, para 145(g) of the NPPF does allow for up to substantial harm in the Green Belt where affordable homes are being provided in an area of affordable housing need.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0623	B011	If the plan is to take a consistent approach and is positively prepared and effective a greater provision of safeguarded land should be proposed at Albrighton.	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach are appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Albrighton and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the characteristics, constraints and opportunities that exist and the need to identify safeguarded land to meet needs beyond the current Plan period.	No	SP11. Green Belt and Safeguarded Land
A0636	B011	See summary of main issues.	It is understood that this representation primarily relates to the proposed strategy for Shifnal and not the content of draft Policy SP11. Issues raised relating to Shifnal are further addressed in the relevant settlement section. Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	SP11. Green Belt and Safeguarded Land

No	SP11. Green Belt and Safeguarded Land
A0663	B003	n/a	Noted	No	SP11. Green Belt and Safeguarded Land
A0674	B010	Amend para 4 of draft Policy SP11 to allow reuse of previously developed land within the Green Belt for open market housing.	Noted. Draft Policy SP11 identifies circumstances when development may be acceptable in line with National Policy, whilst also providing appropriate additional clarification in the Shropshire context. Para 5 of the draft Policy seeks to enable appropriate reuse of previously developed land to meet identified local affordable housing need, 'where it can be demonstrated not to cause substantial harm to the openness of the Green Belt'. This proposed policy requirement is considered consistent with the proposed strategic approach to development outlined within draft Policy SP2 which states that outside identified settlements, 'new development in the wider rural area will consist of affordable housing where there is evidenced local needs and appropriate rural employment and economic diversification' and the proposed Policy approach within draft Policy SP10 regarding development in the countryside. We would also note that this proposed approach is consistent with that within the adopted Local Plan.	No	SP11. Green Belt and Safeguarded Land

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0678	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a.</p> <p>Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites.</p> <p>Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'.</p> <p>If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.</p>
A0679	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11 (STC002 and P58a)	Not Specified	No	Not Specified	<p>Draft Policy SP11 sets out to protect the Green Belt, in accordance with national policy. National policy is to protect Green Belt from 'inappropriate development'. Para 145 of the National Planning Policy Framework (NPPF) says construction of buildings in the Green Belt is 'inappropriate development', unless they are prescribed uses, which does not include industrial development, such as that proposed at STC002 and P58a.</p> <p>Development of the proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) could not fail to have an adverse effect on the Green Belt, which will continue to surround the proposed allocated sites.</p> <p>Proposed employment allocations STC002 and P58a at Stanmore are located in the Green Belt and no justification, need, indication of which businesses might wish to locate at Stanmore, or exceptional circumstance have been demonstrated. Therefore the proposal appears to be a device to ensure future development proposals at Stanmore are not subject to the limitations imposed by Policy SP11, specifically demonstrating 'very special circumstances'.</p> <p>If these sites are allocated for development, it would be used to justify further incursions into the Green Belt in the future.</p>
A0682	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	Not Specified	Not Specified	<p>Welcome upgrade of draft Policy SP11 to a 'strategic' one.</p> <p>Only reference to safeguarded land is specifying identified land is to be removed from the Green Belt. Contend the approach to safeguarded sites is not consistent with para 120 of the National Planning Policy Framework (NPPF), which states policies need to reflect changes in demand for land. There is an opportunity to make draft Policy SP11 more robust and assist in ensuring its soundness by including a mechanism for when the safeguarded land could come forward within the proposed Plan period.</p> <p>Consideration of all other reasonable options and exceptional circumstances for Land between Park Lane and the A464 have been fully evidenced and justified through Shropshire's evidence base (including the Green Belt Release Exceptional Circumstances Statement), in line with para 136 of the NPPF. This evidence justifies allocation rather than safeguarding of this site. However, if it remains safeguarded land the above mechanism is important to allow it to come forward for development.</p> <p>It would be beneficial to give safeguarded land site references.</p>
A0633	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S12, S13 and S14	No	No	No	<p>Draft Policies S12, S13 and S14 allow for unrestricted economic developments outside settlements are considered superfluous as they would give carte blanche approval to economic development in a wide area outside established settlement areas, undermining the status of Green Belt and Safeguarded Land protection and stated reasons for allowing removal of Green Belt in the Plan. The policies as worded give no certainty or assurance to the public on what development can be expected for their area in the Plan and as such are contrary to policy and unsound. The proposed revised policy would still enable such economic development to take place but give a higher degree of justification and give the public the opportunity to input before any such decision was taken which would not be the case with the policies as worded.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0678	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0679	B003	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. It is understood comments on soundness relate to compliance of proposed employment allocations STC002 and P58a with draft Policy SP11, rather than draft Policy SP11 itself. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable. The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page. Very special circumstances would have to be demonstrated as a justification in respect of any future proposals for inappropriate development ( as defined in the NPPF) within Green Belt, with this being a necessary consideration for Planning Applications. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy (including sites STC002 and P58a) are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Any decisions on future changes to the extent of Green Belt would be a matter for a future Local Plan Review.	No	SP11. Green Belt and Safeguarded Land
A0682	B013	Include a mechanism in draft Policy SP11 which allows safeguarded sites to be bought forward at an earlier date if certain criterion is met. Land proposed to be safeguarded for future development should instead be allocated for development. Provide references for proposed safeguarded land.	Shropshire Council consider that draft Policy SP11 is appropriate and consistent with the National Planning Policy Framework (NPPF). Shropshire Council has undertaken a robust and proportionate site assessment process to inform identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. A summary of this assessment, including an explanation of why proposed allocations and proposed safeguarded land have been identified for development is provided as an appendix to the Sustainability Appraisal of the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan. With regard to the proposed safeguarded land, it is noted that the NPPF states Plans should "make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development". It is not considered necessary to provide site references for proposed safeguarded land. Consistent with the NPPF, such land can only come forward for development following an update to a plan which proposes its development.	No	SP11. Green Belt and Safeguarded Land
A0633	B005	Delete reference in these policies to allowing development outside settlements on green field and Green Belt land and delete inclusion of RAF Cosford as a Strategic Site. Replace with a general economic policy stating that any windfall/significant development that cannot be accommodated within a settlement would be considered on its own merits having regard to the need for the development, the availability of alternative sites and other development policies in the Plan specifically relating to sustainable development, climate change and any protected status of the land.	Shropshire Council has undertaken a robust and proportionate site assessment process to inform identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. A summary of this assessment, including an explanation of why proposed allocations and proposed safeguarded land have been identified for development is provided as an appendix to the Sustainability Appraisal of the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt including land at Shifnal proposed to be allocated for employment development and land proposed to be safeguarded for consideration in future plans for the growth and development of the town.	No	SP12, SP13 and SP14

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0014	B026	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP10(5b)	Not Specified	Not Specified	Not Specified	Improved digital connectivity can reduce need for additional infrastructure and travel.
A0060	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	No	No	Not Specified	<p>Policy SP12 refers to the employment requirement to deliver around 300 ha of employment land throughout the plan period. The spatial strategy identified to achieve these objectives is also set out in Policy SP12. There is no explanation in this Policy nor in the description of the strategy to explain the reasons why proposed employment allocation SHF018d and SHF018b have been brought forward in Shifnal over other sites and SHF018a, in particular. This omission makes it difficult to establish whether the plan led approach is successful in protecting and improving areas of higher landscape value. In the evidence presented as part of SC's Highways Assessment, it is unclear why site 2- plots SHF018b &amp; d are identified as having low or medium highways impact, whilst adjoining sites 1 and 3 are considered as having a high to very high highways impact. SC also need to clarify the methodology used for calculating Shifnal's balanced growth and resulting employment need.</p> <p>Policies SP12, SP13 and SP14 allow for unplanned development (employment development supported by new housing and infrastructure) outside settlements particularly adjacent to settlements in a strategic corridor and strategic sites (including RAF Cosford) and in the Green Belt, despite presence of proposed allocations. Plan proposals are subject to Sustainability Appraisal, sites under this proposed policy approach would not. Public entitled to some certainty about development. Consider these is no need for this flexibility as this would undermine/conflict with policies for specific settlements and the Green Belt and are also contrary to the legal requirement in Section 39 of the Planning &amp; Compulsory Purchase Act 2004 that a Plan must be prepared with the objective of contributing to the achievement of sustainable development. Where a need is identified that cannot be accommodated within the plan this can be considered on its own merits.</p>
A0123	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	No	No	Yes	<p>Support aspirations to support economic growth and development and the provisions and principles of the draft Policy SP12.</p> <p>Note amendments responding to comments on the economic fallout from the global health crisis, and the need to ensure that the Development Plan meets the needs of businesses in this new era and is sufficiently positive and proactive in supporting growth, development and business investment to secure the long term future of the local economy and existing jobs and businesses. It is however important that other policies in the draft Shropshire Local Plan are consistent with this approach.</p>
A0137	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	No	No	No	<p>Support draft Policy SP12 in terms of the aim of delivering sustainable economic growth and investment in the strategic and principal settlements, strategic corridors, new strategic settlements and sites and appropriate rural locations. However, would note objection to the proposed strategic approach in draft Policy SP2 and the omission of Land at J3 as a Strategic Settlement.</p> <p>Note that the explanation to draft Policies SP2 and SP14 confirm that 'strategic corridors' include the 'Eastern Belt M54/A5/A41/A464/A5 and A454/A458'.</p> <p>Note that the explanation to draft Policy SP12 states 'to facilitate sustainable economic growth, a 'step change' is needed in Shropshire's economic productivity...</p> <p>Land at Junction 3 is located on the M54 corridor and would deliver sustainable economic growth and support the 'step change' in the economy. The M54 corridor is the most prominent strategic corridor in Shropshire offering connectivity to the West Midlands.</p>
A0255	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 (STC002 and P58a)	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan is unsound.</p> <p>There is conflict between draft Policy SP12 and other draft policies in the draft Shropshire Local Plan.</p> <p>Draft Policy SP12 will not be effective. For instance it seeks to focus development in Shrewsbury, Principal/Key Centres, Strategic corridors/settlements/sites, Community Hubs and Community Clusters. However, sites STC002 and P58a are proposed for allocation and not located in any of these locations/does not fulfil this criteria, rather they are in the open countryside/Green Belt, adjacent to an existing isolated Industrial Estate and in agricultural use. As such STC002 and P58a conflict with draft Policy SP12.</p> <p>Consider proposed allocations STC002 and P58a are contrary to the National Planning Policy Framework (NPPF) including para 35, unjustified and unevidenced and there is no guarantee they will actually be delivered. These sites should be deleted to ensure compliance with draft Policy SP10.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0014	B026	N/A	Comment is noted. It is identified as relating to para 5b of draft Policy SP10, however it appears to relate to para 5b of draft Policy SP12 (SP12 was referenced as SP10 within the earlier consultation on the Regulation 18: Pre-Submission Draft of the Shropshire Local Plan).	No	SP12. Shropshire Economic Growth Strategy
A0060	B012	Draft Policies SP12, SP13 and SP14 should be replaced with a general economic development policy stating any windfall/significant development that cannot be accommodated within a settlement, would be considered on its own merits having regard to the need for the development, the availability of alternative sites and other development policies in the Plan specifically relating to sustainable development, climate change and any protected status of the land.	Shropshire Council considers that the proposed strategy for supporting economic growth, development and business investment in Shropshire within the draft Shropshire Local Plan is appropriate, effective, sustainable and deliverable. It is also considered that the draft Policies of the draft Shropshire Local Plan are consistent, sufficiently flexible and positively contribute to the achievement of this strategy. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic. It is considered that an employment land provision at Junction 3 of the M54 Motorway is not required during this Plan period to 2038. The employment policies SP12, SP13 and SP14 would still be sufficiently flexible to accommodate such an outcome in the event that the circumstances determining the strategy for the Local Plan were to change considerably during the Plan period.	No	SP12. Shropshire Economic Growth Strategy
A0123	B008	Ensure draft Policies in the Shropshire Local Plan are consistent with draft Policy SP12 and sufficiently positive and proactive in supporting growth, development and business investment.	Noted. Shropshire Council considers that the proposed strategy for supporting economic growth, development and business investment in Shropshire within the draft Shropshire Local Plan is appropriate, effective, sustainable and deliverable. It is also considered that the draft Policies of the draft Shropshire Local Plan are consistent and positively contribute to the achievement of this strategy.	No	SP12. Shropshire Economic Growth Strategy
A0137	B008	N/A	Noted.	No	SP12. Shropshire Economic Growth Strategy
A0255	B013	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	<p>Noted. Shropshire Council considers that the draft Policies of the draft Shropshire Local Plan are consistent and together provide an appropriate vision and framework for the future development of Shropshire to 2038; address needs and opportunities in relation to housing, the local economy, community facilities and infrastructure; and seek to safeguard the environment, enable adaptation to climate change and helps to secure high-quality and accessible design.</p> <p>Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Assuming these sites are removed from the Green Belt, draft Policy SP11 would not be applicable.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p> <p>Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p>	No	SP12. Shropshire Economic Growth Strategy

A0286	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	No	No	No	Policy SP12 refers to the employment requirement to deliver around 300 ha of employment land throughout the plan period. The spatial strategy identified to achieve these objectives is also set out in Policy SP12. There is no explanation in this Policy nor in the description of the strategy to explain the reasons why proposed employment allocation SHF018d and SHF018b have been brought forward in Shifnal over other sites and SHF018a, in particular. This omission makes it difficult to establish whether the plan led approach is successful in protecting and improving areas of higher landscape value. In the evidence presented as part of SC's Highways Assessment, it is unclear why site 2- plots SHF018b & d are identified as having low or medium highways impact, whilst adjoining sites 1 and 3 are considered as having a high to very high highways impact. SC also need to clarify the methodology used for calculating Shifnal's balanced growth and resulting employment need.
A0305	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	No	No	Yes	The sections of this policy that permits unrestricted economic development outside settlements are superfluous and give 'carte blanche' approval to economic development outside established settlement areas, undermining the protected status of Green Belt and Safeguarded Land and the stated reasons for allowing removal of Green Belt in the Plan. The policy as worded gives no certainty or assurance to the public on the type of development expected for their area and makes the proposals contrary to policy and unsound. Proposed revised wording for economic development policy will enable development to take place but requires a higher degree of justification, grants more opportunity to the public to give their input before any such decision is taken unlike the proposed policy wording in the Plan.
A0312	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	No	No	Yes	The sections of this policy that permits unrestricted economic development outside settlements are superfluous and give 'carte blanche' approval to economic development outside established settlement areas, undermining the protected status of Green Belt and Safeguarded Land and the stated reasons for allowing removal of Green Belt in the Plan. The policy as worded gives no certainty or assurance to the public on the type of development expected for their area and makes the proposals contrary to policy and unsound. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0286	B012	Policy SP12 refers to the employment requirement to deliver around 300 ha of employment land throughout the plan period. The spatial strategy identified to achieve these objectives is also set out in Policy SP12. There is no explanation in this Policy nor in the description of the strategy to explain the reasons why proposed employment allocation SHF018d and SHF018b have been brought forward in Shifnal over other sites and SHF018a, in particular. This omission makes it difficult to establish whether the plan led approach is successful in protecting and improving areas of higher landscape value. In the evidence presented as part of SC's Highways Assessment, it is unclear why site 2-plots SHF018b & d are identified as having low or medium highways impact, whilst adjoining sites 1 and 3 are considered as having a high to very high highways impact. SC also need to clarify the methodology used for calculating Shifnal's balanced growth and resulting employment need.	Shropshire Council considers that the proposed strategy for supporting economic growth, development and business investment in Shropshire within the draft Shropshire Local Plan is appropriate, effective, sustainable and deliverable. It is also considered that the draft Policies of the draft Shropshire Local Plan are consistent, sufficiently flexible and positively contribute to the achievement of this strategy. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic. It is considered that an employment land provision at Junction 3 of the M54 Motorway is not required during this Plan period to 2038. The employment policies SP12, SP13 and SP14 would still be sufficiently flexible to accommodate such an outcome in the event that the circumstances determining the strategy for the Local Plan were to change considerably during the Plan period.	No	SP12. Shropshire Economic Growth Strategy
A0305	B006	Delete this policy to allowing development outside settlements on greenfield and Green Belt land and delete the inclusion of RAF Cosford as a Strategic Site. Replace this policy with a general economic policy stating that any windfall/significant development that cannot be accommodated within a settlement would be considered on its own merits having regard to the need for the development, the availability of alternative sites and other development policies in the Plan specifically relating to sustainable development, climate change and any protected status of the land.	Shropshire Council has undertaken a robust and proportionate site assessment process to inform identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. A summary of this assessment, including an explanation of why proposed allocations and proposed safeguarded land have been identified for development is provided as an appendix to the Sustainability Appraisal of the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt including land at Shifnal proposed to be allocated for employment development and land proposed to be safeguarded for consideration in future plans for the growth and development of the town.	No	SP12. Shropshire Economic Growth Strategy
A0312	B009	Delete this policy to allowing development outside settlements on greenfield and Green Belt land and delete the inclusion of RAF Cosford as a Strategic Site. Replace this policy with a general economic policy stating that any windfall/significant development that cannot be accommodated within a settlement would be considered on its own merits having regard to the need for the development, the availability of alternative sites and other development policies in the Plan specifically relating to sustainable development, climate change and any protected status of the land.	Shropshire Council has undertaken a robust and proportionate site assessment process to inform identification of proposed allocations and proposed safeguarded land. 1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0385	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12, SP13 and SP14	Not Specified	Yes	Not Specified	Support the aim to provide around 300ha of employment land over the plan period and the urban focused approach to development. However, the objective to deliver a step change in economic productivity should be maximised by taking opportunities for a greater proportion of growth being accommodated in urban locations (particularly Shrewsbury as the Strategic Centre). Identification of additional housing growth within these locations should be supported by corresponding employment growth, recognising opportunities for mixed -use allocations at sites such as Land at Nobold.
A0387	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12, SP13 and SP14	Not Specified	Yes	Not Specified	Support the aim to provide around 300ha of employment land over the plan period and the urban focused approach to development. However, the objective to deliver a step change in economic productivity should be maximised by taking opportunities for a greater proportion of growth being accommodated in urban locations (including Market Drayton as the Principal Centre) and recognising the potential of non-Green Belt sites to deliver additional housing land supply.
A0393	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	There should be reference to addressing business carbon emissions in the policy .
A0410	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Not Specified	No	Not Specified	The Economic Growth Strategy for Shropshire (EGS) underpins draft Policy SP12, but is considered unsound (it is based on an erroneous report) and has not been subject to Sustainability Appraisal (SA). The SA of the draft Shropshire Local Plan concludes draft Policy SP12 will have no effect on the sustainability objective of reducing carbon emissions and promoting adaption and mitigation to climate change. Consider until all development becomes zero carbon, any development will make the problem worse, not better. Therefore to comply with draft Policy SP3 and achieve climate change objectives, the Council should seek to keep economic development to minimal, optimal levels, not to “strive to maximise” things. Desire to be the best seems a worthy aim, but simply fosters competition with neighbouring Local Authorities, better placed for investment. Consider draft Policy SP12 is unsound to the extent it promotes aims not supported by proportionate evidence, particularly the evidence within climate change considerations. Consider reference to Countryside should be removed from para 3.e of draft Policy SP12. For simplicity, management of development in the countryside should be controlled solely via draft Policy SP10. The SA incorrectly references draft Policy SP12 as SP10 on page 146.
A0455	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Yes	Yes	Yes	Support proposed policies relating to employment and economic growth. Clearly in the context of regional issues with housing delivery and employment delivery, there is an opportunity for Shropshire to capitalise and bring investment into the area. Recognition that proposed Strategic Settlements can assist in delivering economic development, which serves to benefit the economic offer and output of the Plan area, as well as create a level of self-containment to enable these new settlements to thrive sustainably, is supported. Clive Barracks, Tern Hill, will deliver approximately 6ha of employment generating land (as documented in draft Policy SP19). Site promoters remain committed to working with the Council to ensure that the employment opportunities at Clive Barracks are responsive to local need, market demands and the aspirations of the economic growth strategy for Shropshire. Although flexibility over the nature of employment generating uses at the site will be key in ensuring the success of this aspect of the scheme, particularly given the unknown impacts of Brexit/Covid 19, and the fact development is not likely to commence until 2025 and as such employment needs may vary over this time. Work will be undertaken over the coming years to ensure the employment provided is suitable in that economic climate, providing jobs for the new community and beyond.
A0497	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Not Specified	Yes	Not Specified	Aims and objectives of draft Policy SP12 are appropriate and supported. Bridgnorth, a Principal Centre, is well placed geographically to attract inward investment and meet economic needs. It has a high level of sustainability with a vast range of services and facilities that makes it a suitable location for growth.
A0513	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 (HKW014)	Not Specified	No	Not Specified	References to step change in provision of employment opportunities appear only likely to occur in areas that are already heavily developed. Consider requirements within draft Policy SP12.3 and SP12.4.f are unlikely to bring about the step change in economic activity aspired to by Shropshire Council. Appears Shropshire Council does not have concrete ideas about how these examples can bring about step change or even, for that matter, cater for the existing situation. Draft Policy SP12 has not been positively prepared and there is little evidence available in the draft Shropshire Local Plan that would suggest a positive direction of travel. Nevertheless, more houses are to be constructed in Hinstock, and more commuting will have to take place. This makes the draft Shropshire Local Plan 'unsound'. Draft Policy SP12 should be producing concrete proposals which will result in a greater variety of employment opportunities than exist at present.
A0582	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Not Specified	Yes	Not Specified	Part 3 of the economic growth strategy set out in SP12 is supported. It is agreed that the Principal Centres and Key Centres, such as Wem, should be the focus for economic growth and investment to ensure Shropshire’s continued prosperity. Many of the Key Centres identified in the SLP are critical economic and social hubs for the wider rural communities of Shropshire. As such focusing the delivery of housing within such areas is essential, while also enabling a controlled level of housing in smaller Community Hubs and Community Clusters.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0385	B004	N/A	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach (including in relation to achieving a step change in productivity) are appropriate, effective, sustainable and deliverable.	No	SP12. Shropshire Economic Growth Strategy
A0387	B005	N/A	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach (including in relation to achieving a step change in productivity) are appropriate, effective, sustainable and deliverable.	No	SP12. Shropshire Economic Growth Strategy
A0393	B010	include reference to addressing business carbon emissions	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	SP12. Shropshire Economic Growth Strategy
A0410	B008	Draft Policy SP12 and its proposed Explanation should replace references to “the best” and “maximum” with words indicating optimum consistent with the declared climate emergency and the aim of zero carbon by 2030. Para 3.e of draft Policy SP12 should remove the words “and the Countryside”.	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	SP12. Shropshire Economic Growth Strategy
A0455	B003	N/A	Noted.	No	SP12. Shropshire Economic Growth Strategy
A0497	B015	N/A	Noted.	No	SP12. Shropshire Economic Growth Strategy
A0513	B002	Draft Policy SP12 should be revised to indicate employment development, including on sites that may lie just outside the development boundaries of Community Hubs, will be considered seriously and planned development on such sites will be encouraged. Site HKW014 should be allocated for employment development (an identified on the Inset Map for Hinstock as such). Uses could include Class B, E, C2 and C2A and sui generis uses.	Shropshire Council considers that the proposed strategy for supporting economic growth, development and business investment in Shropshire within the draft Shropshire Local Plan is appropriate, effective, sustainable and deliverable. It is also considered that the draft Policies of the draft Shropshire Local Plan are consistent, sufficiently flexible and positively contribute to the achievement of this strategy. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic. It is considered that an employment land provision at Junction 3 of the M54 Motorway is not required during this Plan period to 2038. The employment policies SP12, SP13 and SP14 would still be sufficiently flexible to accommodate such an outcome in the event that the circumstances determining the strategy for the Local Plan were to change considerably during the Plan period	No	SP12. Shropshire Economic Growth Strategy
A0582	B012	n/a	Noted.	No	SP12. Shropshire Economic Growth Strategy

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0601	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Not Specified	No	No	Support the overarching principle within draft Policy SP12, which seeks to support and encourage economic growth in Shropshire over the proposed Plan period. Also support Shrewsbury being the primary focus for growth and investment to ensure that its role and function as the County Town and Strategic Centre protected and maintained. However, the Economic Development Needs Assessment (EDNA) undertaken to inform the draft Shropshire Local Plan indicates the proposed housing requirement would accommodate sufficient workforce growth to support employment land growth of 6.49 hectares per annum. However, to meet economic growth projections and regeneration objectives/commitments set out within the Marshes LEP Strategic Economic Plan, 7.6ha per annum are required. As such to ensure draft Policy SP12 is 'justified' and 'effective' further housing modelling to ensure that housing growth aligns with the Shropshire economic growth strategy must be undertaken and the housing requirement contained within the Local Plan accordingly uplifted. Any additional housing growth associated with this change should be accommodated in higher order settlements, such as Shrewsbury. Given the very significant over supply of employment land (EDNA identifies the current employment land supply as 410 ha), undeveloped allocated/approved employment land, such as that on the South Shrewsbury Strategic Urban Extension (SUE) (which has been actively marketed with little interest as it does not have direct access to the strategic road network and take-up is stronger around established employment sites), should be released for residential-led mixed development to meet the additional housing land required.
A0608	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Not Specified	Not Specified	Not Specified	Support draft Policy SP12 as it recognises the role of Shrewsbury, within the settlement hierarchy and the need to balance employment growth alongside new housing developments to support an expanded workforce. The two go hand-in-hand, and sustainable growth is achieved when the desire and aspiration of a new workforce are satisfied by a complementary housing market.
A0609	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Not Specified	Yes	Not Specified	Fully support the aims and objectives of draft Policy SP12 and the importance of a clear vision and strategy to encourage economic growth. Welcome the additional text in Part 2 of draft Policy SP12, which notes the spatial strategy will take into account special considerations in the Green Belt, Areas of Outstanding Natural Beauty and the need to protect and improve areas of higher landscape value and the natural and historic environment. This approach is considered justified and accords with national policy. Bridgnorth is well located to deliver and support a significant proportion of economic growth, particularly around the proposed Tasley Garden Village (BRD030). Support recognition within draft Policy SP12 that there is a need to deliver housing of the right type and in the right locations to support economic growth and employment development.
A0621	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Not Specified	Yes	Not Specified	This policy is supported. Shifnal represents a highly sustainable strategic location for economic growth to support Shropshire's wider economic objectives. In delivering on this potential for growth however, alongside allocations SHF018b and SHF018d, there needs to be appropriate provision for investment in residential development in the right locations. SHF032 and SHF018c are highly sustainable residential opportunities for additional safeguarded land on the eastern side of Shifnal, well placed for connections to the M54. In conjunction with the existing and allocated employment land to the east of Shifnal therefore, this additional safeguarded land will be essential in supporting the town's long-term economic growth needs.
A0629	B007-10	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	There should be reference to addressing business carbon emissions in the policy .
A0629	B023	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Yes	No	Yes	Para 3 of draft Policy SP10 is inconsistent with paras 4f and 5b of draft Policy SP12 and needs to be amended. The range of 'rural economic enterprises' in para 4f of draft Policy SP12 are too limiting. The phrase 'rural diversification' implies an existing enterprise undergoing some change, not the creation of new and innovative types of enterprise. This is not consistent with the broader investment objective stated at 5b). Para 5b of draft Policy SP12 is drawn to suggest that local low carbon energy investment should be wholly local. This fails to recognise the direction in which the energy generation and distribution industry is moving nationally; towards a peer-to-peer smart and flexible electricity generation and distribution system.
A0629	B024	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Yes	No	Yes	Within para 5 of draft Policy SP12 there is no reference to the need to support employment through promoting training in low carbon and retrofit skills, the lack of such skills will be a limit to growth in a sector with huge potential over coming years.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0601	B003	Decrease the proposed employment land requirement to 7.6 ha per annum (8.9 ha per annum once contributions to unmet needs arising from the Black County is considered). Undertake further housing modelling to determine the housing requirement necessary to align with the proposed employment land requirement. Amend the proposed housing requirement as appropriate and allocate additional land for housing development. Given the very significant over supply of employment land in Shropshire, reallocate undeveloped/approved employment land, such as that associated with the South Shrewsbury SUE, to help meet market and affordable housing needs.	Shropshire Council considers that the proposed strategy for supporting economic growth, development and business investment in Shropshire within the draft Shropshire Local Plan is appropriate, effective, sustainable and deliverable. It is also considered that the draft Policies of the draft Shropshire Local Plan are consistent, sufficiently flexible and positively contribute to the achievement of this strategy. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic. It is considered that an employment land provision at Junction 3 of the M54 Motorway is not required during this Plan period to 2038. A0609	B008	N/A	Noted.	No	SP12. Shropshire Economic Growth Strategy
A0621	B012	Allocate SHF032 and SHF018c	Shropshire Council considers that the proposed strategy for supporting economic growth, development and business investment in Shropshire within the draft Shropshire Local Plan is appropriate, effective, sustainable and deliverable. It is also considered that the draft Policies of the draft Shropshire Local Plan are consistent, sufficiently flexible and positively contribute to the achievement of this strategy. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local plan in relation to the management and delivery of economic development and employment in Shropshire.	No	SP12. Shropshire Economic Growth Strategy
A0629	B007-10	include reference to addressing business carbon emissions	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	SP12. Shropshire Economic Growth Strategy
A0629	B023	Add an addition point under para 4f of draft Policy SP12 stating: "iii) Innovative enterprises that seek to support Shropshire Council's climate change objectives. Sustainable employment, tourism, leisure, other business and community development proposals in the countryside will be positively considered, where they maintain or enhance countryside vitality and character, including through the use of previously developed land, and are consistent with national Green Belt policy and the wider policies of this Local Plan..." Revise para 5b of draft Policy SP12 to state: Renewable and low carbon energy generation including decentralised energy sources and to promote the productive use of this energy by businesses to reduce energy costs and increase energy 'independence' in the local and regional economy;"	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	SP12. Shropshire Economic Growth Strategy
A0629	B024	Include an additional sub-para under para 5 of draft Policy SP12 stating "g. Support and encourage local businesses and colleges to develop and sponsor skills training associated with new low carbon building technologies and with low carbon retrofit skills certification."	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	SP12. Shropshire Economic Growth Strategy

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B025	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Not Specified	No	Not Specified	Para 5e of draft Policy DP12 references the adoption of new and more sustainable transport options to improve accessibility in Shropshire and remove capacity constraints to future business investments (committee on climate change have reached broadly similar conclusions on the need to deliver modal shift from cars to walking/cycling/public transport and promote walking/cycling infrastructure in development). There is little in the draft Shropshire Local Plan which supports this commitment. Investment should be prioritised for sustainable transport in appropriate locations, as road transport is a major contributor to the Climate Emergency.
A0636	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	No	No	No	Policy SP12 refers to the employment requirement to deliver around 300 ha of employment land throughout the plan period. The spatial strategy identified to achieve these objectives is also set out in Policy SP12. There is no explanation in this Policy nor in the description of the strategy to explain the reasons why proposed employment allocation SHF018d and SHF018b have been brought forward in Shifnal over other sites and SHF018a, in particular. This omission makes it difficult to establish whether the plan led approach is successful in protecting and improving areas of higher landscape value. In the evidence presented as part of SC's Highways Assessment, it is unclear why site 2- plots SHF018b & d are identified as having low or medium highways impact, whilst adjoining sites 1 and 3 are considered as having a high to very high highways impact. SC also need to clarify the methodology used for calculating Shifnal's balanced growth and resulting employment need.
A0637	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	No	No	No	Policy SP12 refers to the employment requirement to deliver around 300 ha of employment land throughout the plan period. The spatial strategy identified to achieve these objectives is also set out in Policy SP12. There is no explanation in this Policy nor in the description of the strategy to explain the reasons why proposed employment allocation SHF018d and SHF018b have been brought forward in Shifnal over other sites and SHF018a, in particular. This omission makes it difficult to establish whether the plan led approach is successful in protecting and improving areas of higher landscape value. In the evidence presented as part of SC's Highways Assessment, it is unclear why site 2- plots SHF018b & d are identified as having low or medium highways impact, whilst adjoining sites 1 and 3 are considered as having a high to very high highways impact. SC also need to clarify the methodology used for calculating Shifnal's balanced growth and resulting employment need.
A0646	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Yes	Yes	Yes	The Estate considers the Councils approach to development in Shrewsbury as set out within SP12 is sound when considered against the tests set out in para 35 of the NPPF.
A0674	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12	Not Specified	Not Specified	Not Specified	Support and welcome the Council's approach to economic development. Particularly in these current times, need to ensure support to economic generation. However, it is important that the draft policy considers recent amendments to the use class order, and that employment generation isn't restricted to just the old B uses. A number of different commercial uses such as care homes and nurseries, for example, can employ a greater number of employees than some traditional B uses.
A0014	B030	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13 and Para 3.134	Not Specified	Not Specified	Not Specified	The sentence is contradictory. It states development should "respond positively" but then refers to environmental assets as "constraints". Further definition on the meaning of a 'positive response' is needed. This should include as a minimum actively enhancing biodiversity, as required by the NPPF, and supported by the Nature Recovery Strategy and Biodiversity Net Gain.
A0020	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11	Not Specified	Not Specified	Not Specified	The use classes that have been referred need updating in accordance with The Town and Country Planning (Use Classes) (Amendment) (England) Regulations 2020.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B025	Para 5e of draft Policy SP12 should be amended to read more positively: "Transport and utilities infrastructure and the adoption of new and more sustainable transport solutions to improve accessibility in Shropshire, by the removal of capacity constraints to enable future business investments and to contribute towards climate management objectives; and"	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	SP12. Shropshire Economic Growth Strategy
A0636	B012	Policy SP12 refers to the employment requirement to deliver around 300 ha of employment land throughout the plan period. The spatial strategy identified to achieve these objectives is also set out in Policy SP12. There is no explanation in this Policy nor in the description of the strategy to explain the reasons why proposed employment allocation SHF018d and SHF018b have been brought forward in Shifnal over other sites and SHF018a, in particular. This omission makes it difficult to establish whether the plan led approach is successful in protecting and improving areas of higher landscape value. In the evidence presented as part of SC's Highways Assessment, it is unclear why site 2-plots SHF018b & d are identified as having low or medium highways impact, whilst adjoining sites 1 and 3 are considered as having a high to very high highways impact. SC also need to clarify the methodology used for calculating Shifnal's balanced growth and resulting employment need.	Shropshire Council considers that the proposed strategy for supporting economic growth, development and business investment in Shropshire within the draft Shropshire Local Plan is appropriate, effective, sustainable and deliverable. It is also considered that the draft Policies of the draft Shropshire Local Plan are consistent, sufficiently flexible and positively contribute to the achievement of this strategy. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic. It is considered that an employment land provision at Junction 3 of the M54 Motorway is not required during this Plan period to 2038. The employment policies SP12, SP13 and SP14 would still be sufficiently flexible to accommodate such an outcome in the event that the circumstances determining the strategy for the Local Plan were to change considerably during the Plan period.	No	SP12. Shropshire Economic Growth Strategy
A0637	B012	Policy SP12 refers to the employment requirement to deliver around 300 ha of employment land throughout the plan period. The spatial strategy identified to achieve these objectives is also set out in Policy SP12. There is no explanation in this Policy nor in the description of the strategy to explain the reasons why proposed employment allocation SHF018d and SHF018b have been brought forward in Shifnal over other sites and SHF018a, in particular. This omission makes it difficult to establish whether the plan led approach is successful in protecting and improving areas of higher landscape value. In the evidence presented as part of SC's Highways Assessment, it is unclear why site 2-plots SHF018b & d are identified as having low or medium highways impact, whilst adjoining sites 1 and 3 are considered as having a high to very high highways impact. SC also need to clarify the methodology used for calculating Shifnal's balanced growth and resulting employment need.	Shropshire Council considers that the proposed strategy for supporting economic growth, development and business investment in Shropshire within the draft Shropshire Local Plan is appropriate, effective, sustainable and deliverable. It is also considered that the draft Policies of the draft Shropshire Local Plan are consistent, sufficiently flexible and positively contribute to the achievement of this strategy. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic. It is considered that an employment land provision at Junction 3 of the M54 Motorway is not required during this Plan period to 2038. The employment policies SP12, SP13 and SP14 would still be sufficiently flexible to accommodate such an outcome in the event that the circumstances determining the strategy for the Local Plan were to change considerably during the Plan period.	No	SP12. Shropshire Economic Growth Strategy
A0646	B008	A cross reference to Whole Estate Plans (Policy SP15) , and their role in facilitating such development, should be made within Policy SP12, to ensure clarity in future decision making.	The Local Plan should be read as a whole, and any planning application made would need to adhere to all of the relevant policies	No	SP12. Shropshire Economic Growth Strategy
A0674	B006	It is important that the draft policy considers recent amendments to the use class order, and that employment generation isn't restricted to just the old B uses. A number of different commercial uses such as care homes and nurseries, for example, can employ a greater number of employees than some traditional B uses.	The draft Shropshire Local Plan should be read as a whole. It is considered that draft Policies SP12 and other relevant policies such as draft Policy SP13 and SP14 appropriately consider and provide a framework for consideration of employment generating uses. Policy SP13 refers to the correct use classes as defined in the amendments of Town and Country Planning (Use Classes) (Amendment) (England) Regulations 2020	No	SP12. Shropshire Economic Growth Strategy
A0014	B030	1. Amend para 3.134 to amend reference to environmental constraints. 2. Amend para 3.134 to further define the meaning of a 'positive response' to environmental 'constraints'.	The reference to "environmental constraints" in paragraph 3.134 of the Explanation to Policy SP13 does not imply any judgements on the significance and benefits of any environmental considerations to be addressed in the development of employment land. The guidance in the policy seeks to ensure that whilst these environmental considerations might have the effect of reducing the developable area of the site, any reduction in the developable area and any consequent treatment of environmentally sensitive areas, will make a positive contribution to the quality and utility of the proposed employment development.	No	SP13. Delivering Sustainable Economic Growth and Enterprise
A0020	B004	The use classes that have been referred need updating in accordance with The Town and Country Planning (Use Classes) (Amendment) (England) Regulations 2020.	The draft Shropshire Local Plan should be read as a whole. It is considered that draft Policies SP12 and other relevant policies such as draft Policy SP13 and SP14 appropriately consider and provide a framework for consideration of employment generating uses. Policy SP13 refers to the correct use classes as defined in the amendments of Town and Country Planning (Use Classes) (Amendment) (England) Regulations 2020	No	SP13. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0060	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	No	No	Not Specified	Policies SP12, SP13 and SP14 allow for unplanned development (employment development supported by new housing and infrastructure) outside settlements particularly adjacent to settlements in a strategic corridor and strategic sites (including RAF Cosford) and in the Green Belt, despite presence of proposed allocations. Plan proposals are subject to Sustainability Appraisal, sites under this proposed policy approach would not. Public entitled to some certainty about development. Consider these is no need for this flexibility as this would undermine/conflict with policies for specific settlements and the Green Belt and are also contrary to the legal requirement in Section 39 of the Planning & Compulsory Purchase Act 2004 that a Plan must be prepared with the objective of contributing to the achievement of sustainable development. Where a need is identified that cannot be accommodated within the plan this can be considered on its own merits.
A0123	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	No	No	Yes	Support aspirations to support jobs, existing businesses and economic growth. Ask that the relevant draft policies contained in the draft Shropshire Local Plan are suitably flexible to allow businesses to respond to changing circumstances. In light of the impact on working patterns and the economy of the coronavirus pandemic this issue cannot be ignored.
A0137	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	No	No	No	Support draft Policy SP13. However, would note objection to the proposed strategic approach in draft Policy SP2 and the omission of Land at J3 as a Strategic Settlement. Consider Land at Junction 3 is required in the strategic supply of employment land in order to provide choice and competition in the market and meet an identified need in the logistics and manufacturing sector. It would support the Economic Growth Strategy and the growth aspirations of the wider area.
A0255	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13 (STC002 and P58a)	Not Specified	No	Not Specified	The draft Shropshire Local Plan is unsound. Draft Policy SP13 is not fully evidenced or justified, and conflicts with the aims of other draft Policies. Query justification for and deliverability of proposed employment land requirement. This equates to around 14ha per annum, but past delivery (2016-2019) is only 10.7ha per annum (meaning there is already a shortfall). No particular factors are evidenced to guarantee increased need and lack of delivery has not been caused by a lack of sites/planning permissions (land on existing employment area/allocations amounts to 239ha which is in theory readily developable). As such, there is little need for the 142ha of newly proposed allocated employment land. Para 3.d of draft Policy SP13 includes that proposals should satisfy requirements of national and local policy, including protection of the Green Belt except where there are very special circumstances. STC002 and P58a are located in the Green Belt, there allocation conflicts with para 3.d of draft Policy SP13 and no very special circumstance has been advanced. There proposed allocation appears a means of side-stepping requirements of para 3.d of draft Policy SP13. Consider proposed allocations STC002 and P58a are contrary to the National Planning Policy Framework (NPPF) including para 35.

The employment policies SP12, SP13 and SP14 would still be sufficiently flexible to accommodate such an outcome in the event that the circumstances determining the strategy for the Local Plan were to change considerably during the Plan period.	No	SP13. Delivering Sustainable Economic Growth and Enterprise
A0255	B014	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan and the land remain as Green Belt.	The economic strategy in the draft Shropshire Local Plan seeks to balance new economic development and employment generation with the delivery of new housing, focused within the strategic and principal urban centres of Shrewsbury, the Market Towns and Key Centres of the County. This balance between the two principal aims of the draft Local Plan seeks to ensure that key economic objectives of the strategic approach in Policy SP2 will be met: providing for the delivery of a growing and diverse labour force; and in turn, supporting the delivery of an improving rate of economic growth and an increase in the productivity of the local economy. This balancing approach in the spatial strategy for new economic development and employment generation targets new economic development opportunities principally into Shrewsbury and the principal centres with an increase in provision in the east of the County. This will improve the economic potential of the County particularly within significant commuting locations with higher concentrations of resident labour and with higher levels of skills and academic attainment. This increased urban focus in the economic strategy of the draft Local Plan also seeks to capture the greater opportunity in urban markets to achieve more efficient development of employment land. This is expected to deliver higher proportions of developed floorspace and employment from the land that is developed in the County. This urban focused strategy will also locate a greater proportion of the new employment development into those urban centres located along the strategic corridors through the County, helping to improve the accessibility and sustainability of Shropshire's key employment locations over the plan period to 2038. This is expected to assist in retaining more of the County's resident labour force and helping to improve the productivity of the Shropshire economy. The increased concentration of new economic development and employment generation in the centre and east of the County will also enable Shropshire to increase its profile and investment offer beyond the County boundary. This will be achieved by providing a broader range and choice of both housing and economic development opportunities that are accessible to other key economic and employment markets. This will include locations in the sub-regional area, in need of additional support to meet their own economic needs and demands, which will further help to improve the economic growth potential of the County.	No	SP13. Delivering Sustainable Economic Growth and Enterprise

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0305	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	No	No	Yes	The sections of this policy that permits unrestricted economic development outside settlements are superfluous and give 'carte blanche' approval to economic development outside established settlement areas, undermining the protected status of Green Belt and Safeguarded Land and the stated reasons for allowing removal of Green Belt in the Plan. The policy as worded gives no certainty or assurance to the public on the type of development expected for their area and makes the proposals contrary to policy and unsound. Proposed revised wording for economic development policy will enable development to take place but requires a higher degree of justification, grants more opportunity to the public to give their input before any such decision is taken unlike the proposed policy wording in the Plan.
A0312	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	No	No	Yes	The sections of this policy that permits unrestricted economic development outside settlements are superfluous and give 'carte blanche' approval to economic development outside established settlement areas, undermining the protected status of Green Belt and Safeguarded Land and the stated reasons for allowing removal of Green Belt in the Plan. The policy as worded gives no certainty or assurance to the public on the type of development expected for their area and makes the proposals contrary to policy and unsound. Proposed revised wording for economic development policy will enable development to take place but requires a higher degree of justification, grants more opportunity to the public to give their input before any such decision is taken unlike the proposed policy wording in the Plan.
A0348	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	Not Specified	Yes	Not Specified	Historic England welcomes this strategic policy requiring that development of employment generating uses need to demonstrate that they satisfy the requirements of national and local policies, especially to conserve historic environments, except where justified.
A0359	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	Not Specified	No	Not Specified	Support aim of draft Policy SP13 to support the delivery of the Economic Growth Strategy and support a step change in economic productivity. However, whilst para 3.123 of the explanation to the policy recognises the need for flexibility in the development of employment land to meet need, proposed criterion 7 of draft Policy SP13 seeks to protect allocated employment land/established employment areas to primarily Class B employment uses. It is considered greater flexibility is required regarding employment uses permissible on proposed allocations given uncertainty post Covid-19. As this draft Policy will constrain growth rather than meeting need and is therefore not 'positively prepared'.
A0455	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	Yes	Yes	Yes	Support principle of delivering around 300ha of employment land over the proposed Plan period. However, it is essential that flexibility is retained over the nature of the employment generating uses at sites such as Clive Barracks, Tern Hill, particularly in light of potential shifts in employment patterns following COVID-19 and Brexit and to ensure success of the delivery of this aspect of the scheme. Employment opportunities at Clive Barracks, Tern Hill must be able to respond to local need, market demands and changing aspirations of the Economic Growth Strategy for Shropshire. Draft Policy SP13 refers to the need for development of allocated sites, such as Clive Barracks, Tern Hill, to satisfy site-specific guidelines. Concerns in respect of these guidelines are noted in repose to draft Policy SP19.

A0483	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	Yes	No	Yes	The local plan's employment provisions and proposal are not opposed by our clients. However there is very real concern that the plan fails at this important time to clarify the provisions to be applied to any particular allocated development when it is to be considered as a planning application. Consequently the plan is unsound because the proposals could cause harm to existing developments and interests if not appropriately addressed. In allocating land for development, or taking forward previously allocated but unimplemented development sites as safeguarded through this plan, the opportunity must be taken to consider and assess all critical local issues which comprise material considerations to be considered at application stage. It is possible general harm can be predicted now and appropriate mitigation should be encompassed within the local plan. The NPPF provides clear guidance on decision making and this need not be repeated in the local plan, but the new document must demonstrate that provisions of the NPPF taken as a whole will be applied at the time of individual decision making. The plan makes numerous references to the NPPF, but there is no overt reference to NPPF paragraph 182, which safeguards existing business interests by requiring new development not to place unreasonable restrictions on neighbouring land uses. In our experience this is a matter frequently left to individual planning applications, when it is difficult for planning authorities to resist the prospect of new employment opportunities, and the decision balance is tilted unfairly in the favour of promised new employment over existing business activity. It is a question of ensuring neighbouring uses are compatible. While paragraph 3b of proposed Policy SP13 requires new uses or the intensification of existing uses to conform with neighbouring uses, it does not cover those situations, such as with our clients' business, where the uses are not similar in type or operation and where, with an inappropriate operation introduced, the neighbouring uses could be in conflict. By way of example our clients operate an equestrian business on land north of the A53 at Market Drayton lies alongside an area of safeguarded employment land. It is quite possible for that land to be developed for employment purposes without any harm to our clients operation. However, the 'wrong type of employment' such as one generated noise and disturbance, could have a catastrophic impact on our client's operation of breeding horses, potentially forcing it out of business. The situation can be repeated in many other locations where adjoining land uses are inappropriate, but can be avoided with foresight in local plans where allocations are brought forward.
A0497	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	Not Specified	No	Not Specified	Consider representations to the Regulation 18 Pre-submission Draft Plan (Appendix 1 of this representation - this draft Policy was formerly known as draft Policy SP11) remain relevant. Inclusion of updated employment use classes to reflect the change in the Use Classes Order 1987 (as amended) is supported and needs to be followed through to site allocations. However, as a result of amendments, employment policies in SP12, SP13 and SP14 together, have become overcomplicated and repetitive, this could deter employment development. The draft policies together need clarity on what they actually relate to. For example, they conflate a strategy to select sites to allocate, guiding development on allocated sites and consideration of sites not allocated. A simplified approach would be welcomed that will allow employment growth to flourish. The Council's approach makes the plan unsound as the policies are not effective and delivery of employment sites may be unintentionally hindered as a result.
A0513	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13 (HKW014)	Not Specified	No	Not Specified	Clear Shropshire Council does not intend to delivery of employment development of any consequence in the rural area. Indeed, draft Policy SP13.6.d says windfall Class B development will be supported where it is "for development of a suitable scale located within a Community Hub, Community Cluster or in the Countryside that satisfies Policies SP12, SP8, SP9 or SP10". Meanwhile, some 8,470 dwellings (27.5% of the total new housing) will be accommodated in the rural area. Employment provision to cater for this level of housing relies on windfall development, preferably on existing employment areas and certainly within specified village development boundaries.
A0601	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	Not Specified	No	No	Concerns regarding the proposed employment land requirement identified within representation A0601 B002 on draft Policy SP2 equally apply to draft Policy SP13. Consider that, as identified within the Economic Development Needs Assessment (EDNA), there is a very significant existing level of oversupply of employment land (circa. 410 ha.) within Shropshire. As such, consider the presumption to effectively protect all allocated employment land and established employment areas over the plan period in para 7 of draft Policy SP13 appears wholly unjustified and unsound as defined in para 35 of the National Planning Policy Framework (NPPF). Given the very significant level of existing employment land supply, the level of employment land protection afforded within para 7 of draft Policy SP13 should importantly differentiate and prioritise established employment areas over allocated employment land. When assessing proposals for change of use or loss of employment land, para 7(c) of draft Policy SP13 refers to 'other significant Local Plan objectives'. In the absence of the draft Shropshire Local Plan setting out objectives alongside the proposed Spatial Vision, consider the delivery of housing and affordable housing should be specifically referenced in this para. Indeed, a key component of the proposed Spatial Vision is to ensure access to homes and affordable housing.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0483	B001	We suggest that to become sound Policy SP13 3(b) need be amended only slightly to explain fully what is meant by conformity; not simply that a new development is similar to adjoining developments, but that any new development and operation must be cognizant fully of its potential impacts on all adjoining land uses. It should specify that inappropriate uses will not be permitted if any degree of harm identified, cannot be appropriately mitigated. The policy and or supporting explanation should clarify that any new development adjoining existing land uses will be expected to conform to a mode of operation that meets fully the principles included in the NPPF at paragraph 182.	Shropshire Council considers that Policy SP13 and the employment development strategy for Shropshire is appropriate, effective, sustainable and deliverable. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local Plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic. The issues arising from the conformity of proposed uses with the existing land use in a locality are addressed in Policy SP13 in criteria 3 in relation to neighbouring uses and the broader requirements of national and local policies, 5 in relation to other policies of the Local Plan determining location and land use, and 6 in relation to the scale of the development and the broader economic growth objectives. Where the issue of conformity is not resolved through these requirements then criterion 7 would require further evidence to be submitted to justify an otherwise 'non-conforming' use.	No	SP13. Delivering Sustainable Economic Growth and Enterprise
A0497	B016	The Strategy should set out the key issues for Bridgnorth in relation to delivering sustainable economic growth. Draft Policy SP13 needs to be simplified to allow, encourage and direct development direct to meet identified need. Draft Policy SP13 should recognise that development falling within new Use Class E (g) are suitable in particular uses that would fall into E(g) (i) offices (ii) Research and development (iii) light industrial.	Shropshire Council considers that Policy SP13 and the employment development strategy for Shropshire is appropriate, effective, sustainable and deliverable. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local Plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic.	No	SP13. Delivering Sustainable Economic Growth and Enterprise
A0513	B001	Draft Policy SP13 should be revised to indicate employment development, including on sites that may lie just outside the development boundaries of Community Hubs, will be considered seriously and planned development on such sites will be encouraged. Site HKW014 should be allocated for employment development (an identified on the Inset Map for Hinstock as such). Uses could include Class B, E, C2 and C2A and sui generis uses.	In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement. It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038.	No	SP13. Delivering Sustainable Economic Growth and Enterprise
A0601	B004	Decrease the proposed employment land requirement to 7.6 ha per annum (8.9 ha per annum once contributions to unmet needs arising from the Black County is considered). Undertake further housing modelling to determine the housing requirement necessary to align with the proposed employment land requirement. Amend the proposed housing requirement figure as appropriate and allocate additional land for housing development. Given the very significant over supply of employment land in Shropshire, reallocate undeveloped/approved employment land, such as that associated with the South Shrewsbury SUE, to help meet market and affordable housing needs. Amend para 7(c) of draft Policy SP13 to state: "The application demonstrates that the proposed use will make a significant contribution to the local economy, the local community or to other significant Local Plan objectives, such as delivering market and affordable housing."	In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement. It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038.	No	SP13. Delivering Sustainable Economic Growth and Enterprise

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0609	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	Not Specified	Yes	Not Specified	Support the level of employment development planned to be delivered within Shropshire, which recognises its economic potential and reflects the Council's clear growth aspirations. The level of growth is, in part, justified through the Shropshire Employment Land Review, which recognises the role that Bridgnorth can play and supports Bridgnorth fulfilling its roles as the second Principal Centre in the County. Whilst the Employment Land Review did not specifically consider Tasley Garden Village (BRD030), as it pre-dates the site promotion, the Employment Land Review clearly recognises the potential of land in this location to deliver employment development as it indicates existing SAMDev allocations in the vicinity represent a real opportunity given their siting adjacent to the road and the key gateway junction on the A458 which is an obvious location to accommodate new employment development and that they represent a strategic location which would be attractive to the local market given its visibility to the highway and edge of town location with good accessibility. The Employment Land Review also recognises that these existing SAMDev allocations could open up the other adjacent plots as part of a long term vision as an employment corridor. As such consider the proposed approach to be justified.
A0621	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	Not Specified	Yes	Not Specified	Support this policy
A0629	B026	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	Yes	No	Yes	No scope in draft Policy SP13 for employment generation in response to climate change activity nor any Shropshire Council policy. This policy is negligent / deficient in it's representation of these issues.
A0646	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP13	Yes	Yes	Yes	The Estate considers the Councils approach to development in Shrewsbury as set out within SP13 is sound when considered against the tests set out in para 35 of the NPPF.
A0014	B031	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14	Not Specified	Not Specified	Not Specified	There should be explicit preference for rail connectivity. Too much weight is afforded to road corridors. See comment for draft Policy DP9.
A0014	B032	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14(2)	Not Specified	Not Specified	Not Specified	Wildlife sites are effected more by transport than just 'atmospheric emissions', i.e. run-off and pollutants. These negative impacts needs to be considered, prevent, reduced, and mitigated for.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0609	B009	N/A	The economic strategy in the draft Shropshire Local Plan seeks to balance new economic development and employment generation with the delivery of new housing, focused within the strategic and principal urban centres of Shrewsbury, the Market Towns and Key Centres of the County. This balance between the two principal aims of the draft Local Plan seeks to ensure that key economic objectives of the strategic approach in Policy SP2 will be met: providing for the delivery of a growing and diverse labour force; and in turn, supporting the delivery of an improving rate of economic growth and an increase in the productivity of the local economy. This balancing approach in the spatial strategy for new economic development and employment generation targets new economic development opportunities principally into Shrewsbury and the principal centres with an increase in provision in the east of the County. This will improve the economic potential of the County particularly within significant commuting locations with higher concentrations of resident labour and with higher levels of skills and academic attainment. This increased urban focus in the economic strategy of the draft Local Plan also seeks to capture the greater opportunity in urban markets to achieve more efficient development of employment land. This is expected to deliver higher proportions of developed floorspace and employment from the land that is developed in the County. This urban focused strategy will also locate a greater proportion of the new employment development into those urban centres located along the strategic corridors through the County, helping to improve the accessibility and sustainability of Shropshire's key employment locations over the plan period to 2038. This is expected to assist in retaining more of the County's resident labour force and helping to improve the productivity of the Shropshire economy. The increased concentration of new economic development and employment generation in the centre and east of the County will also enable Shropshire to increase its profile and investment offer beyond the County boundary. This will be achieved by providing a broader range and choice of both housing and economic development opportunities that are accessible to other key economic and employment markets. This will include locations in the sub-regional area, in need of additional support to meet their own economic needs and demands, which will further help to improve the economic growth potential of the County.	No	SP13. Delivering Sustainable Economic Growth and Enterprise
A0621	B013	n/a	Shropshire Council welcomes the support for Policy SP13 and the employment development strategy for Shropshire which is considered to be appropriate, effective, sustainable and deliverable.	No	SP13. Delivering Sustainable Economic Growth and Enterprise
A0629	B026	Add an additional para to draft Policy SP13 stating "To prefer employment development in green industries, particularly those involved in low carbon energy generation and to prioritise employment generation in these industries where there is a choice of other alternatives."	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	SP13. Delivering Sustainable Economic Growth and Enterprise
A0646	B009	It is suggested that the policy also needs to acknowledge the flexibility encouraged by Paragraph 120 of the Framework, and provide for a mechanism whereby historical located sites which have not come forward for their allocated use, should be considered positively for alternative uses. An example would be the Estate's employment allocation at Battlefield (Site Ref SHR203), which could potentially be utilised more efficiently as a mixed use site reflecting the residential allocation on the adjacent half of the site, as well as surrounding commercial uses.	Shropshire Council considers that Policy SP13 and the employment development strategy for Shropshire is appropriate, effective, sustainable and deliverable. Draft Policies SP12, SP13 and SP14 clearly set out and structure the employment development strategy for Shropshire and articulate the strategic approach for the Local Plan in relation to the management and delivery of economic development and employment in Shropshire. The purpose of these policies is to also satisfy the requirements in NPPF particularly in paragraph 16(d) to make it evident how a decision maker should react to development proposals in a number of different locations and circumstances. The policies also recognise the need for flexibility arising from the presumption in paragraph 10 in favour of sustainable development and the need for decision makers to determine significant proposals taking into account other considerations alongside the policies of the Plan or equally, where circumstances may change and necessitate a more positive response to employment development proposals such as through the Brexit decision and the Covid-19 pandemic. In relation to site SHR203, it is considered that sufficient flexibility has been accorded to the development of this land. SHR203 and the adjacent residential allocation (referenced by the respondent) previously formed a mixed use allocation and SHR203 was defined as a suitably sized, viable employment site that also formed a buffer of conforming employment uses around the site of an adjacent key employer in Shrewsbury. It is considered that a further sub-division of SHR203 would raise issues of conformity with draft Policy SP13.	No	SP13. Delivering Sustainable Economic Growth and Enterprise
A0014	B031	Draft Policy SP14 should include an explicit preference for rail connectivity.	Policy SP14 places an emphasis on rail connections in the opening statement to the Policy and in criteria 1 and 3 and paragraphs 3.141 and 3.150. SP14 seeks to utilise access to the rail network along the strategic corridors where it exists and has identified these opportunities in the policy. Notwithstanding these opportunities, the spatial geography of the network and the connectivity provided by rail services and their timetabling are such that SP14 cannot rely wholly on rail connectivity to improve accessibility to employment opportunities in the County. SP14 also correctly supports those opportunities created by the strategic and principal road networks and particularly in locations where rail connectivity is not an option or is not available.	No	SP14. Strategic Corridors
A0014	B032	Para 2 of draft Policy SP14 should recognise that wildlife sites are effected more by transport than just 'atmospheric emissions'.	SP14 criterion 2 recognises that development along strategic corridors through the Green Belt and AONB may have a broad range of impacts which must be managed in relation to national and local policies. The reference to 'atmospheric emissions' relates to the very specific impacts on internationally designated wildlife sites where a Habitats Regulation Assessment may be required.	No	SP14. Strategic Corridors
