A0407	B002	<p>Establish Local Housing Needs Assessment for Bridgnorth and surrounding areas (to be reviewed every five years).</p> <p>Provide evidence that Bridgnorth can sustain a 35% population increase.</p>	<p>Noted. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development.</p> <p>There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach.</p> <p>Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>It should be noted that the potential future direction of growth is not proposed for allocation within the draft Shropshire Local Plan, rather it is identified to provide certainty about the ability to meet future development needs of the town.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements including those in draft policy DP25 and the existing/proposed site guidelines.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0407	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 & S3: Bridgnorth	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?
A0407	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each another regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.
A0407	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458. Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network. The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.
A0411	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3 (BRD030)	Not Specified	No	Not Specified	Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. It should be noted that the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ. It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0407	B004	<p>What areas / units are already available for occupation and how long have they been vacant?</p> <p>What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19.</p> <p>If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)
A0407	B005	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)
A0407	B006	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth (BRD030)
A0411	B001	<p>Explain why views of the elected Shropshire Councillors for the area, the Town Council and the surrounding Parish Councils have been ignored.</p> <p>Delay any decision on the Legal Compliance and Soundness of the draft Shropshire Local Plan until the matters discussed under Soundness have been resolved and any alternative options have been considered in detail.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which has considered all sites identified in and around settlements where development guidelines are proposed, including Bridgnorth. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (BRD030)

A0458	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Bridgnorth BRD030	Not Specified	Not Specified	Not Specified	n/a
A0493	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - BRD030	Not Specified	No	Not Specified	Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. However the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ. It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.
A0493	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 & S3: Bridgnorth	Not Specified	No	Not Specified	The draft Shropshire Local Plan proposed 2,250 dwellings in the Tasley area (500 on existing SAMDev Plan allocations, 1,050 on proposed allocation BRD030 and 700 on future development land associated with BRD030). At 2020, the population of Bridgnorth was approximately 13,000. Assuming 2 residents per new dwelling (conservative) proposed development equates to 4,500 people a 35% increase in population. It is accepted that Bridgnorth and surrounding areas require more dwellings to cater for likely future growth of the town, on what basis has Shropshire Council decided that such numbers '... will make provision for the needs of the town and surrounding hinterland...'? In the absence of a Local Housing Needs Assessment, how has this large figure been arrived at and what evidence is available to justify it/show it meets the needs of the town and demonstrate that the town can support this population increase?

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0493	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP12 & S3: Bridgnorth	Not Specified	No	Not Specified	In addition to 6.6ha for the relocation of the livestock market and 6.7ha for a business park, the draft Shropshire Local Plan proposes to allocate a further 16ha of employment land at BRD030 and 11ha for expansion of Stanmore Business Park (which is itself currently just over 17ha). This total 40ha of employment land at Bridgnorth. However, Telford is approximately 15 minutes away and has land available for development is close to the M54, has a mainline railway station and is already an industrial hub. Bridgnorth by comparison has poor logistics with no infrastructure and no evidence of future improvements and there is evidence of a lack of demand for employment land, given only 10% of available employment land in Bridgnorth has been developed since 2000. What grounds are there to require 40ha of employment land and why is this considered deliverable? Are all existing units occupied/what is the vacancy rate? How has/will Covid 19 affected current businesses? On what grounds does Shropshire Council believe that the predicted levels of employment growth are achievable?
A0493	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each another regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.
A0493	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP14, DP25 & S3: Bridgnorth	Not Specified	No	Not Specified	The current Transport Plan covers 2011-2026 should have been reviewed before decisions made on the draft Shropshire Local Plan. Development and road improvements in and around Bridgnorth are constrained by topography, landscape, pinch points within Bridgnorth and surrounding settlements (including the two bridges over the River Severn which bisects the town), single-carriageways on 'A roads' to surrounding settlements and lack of investment. Significant in and out commuting from the town occurs (approximately 60% of residents commute out (mainly to Telford, Wolverhampton and Kidderminster) and 60% of jobs are filled by people commuting in). BRD030 is located away from the main employment areas of the town/region (Stanmore, Wolverhampton and Telford) and whilst some employment is proposed on-site, these patterns are likely to continue and apply to this site due to the nature of jobs and level of pay creating further traffic adversely affecting the towns population. What plans are there for road improvements, without which employment development is unlikely to occur. The promoter of BRD030 has stated that they will build a suitable footbridge to enable pedestrians and cyclists to cross the road but do not own land fronting the A458. Why would SMEs and high paid workers wish to located in Bridgnorth due to poor road link and slow access to the motorway network. The A458 is a busy road, future residents of BRD030 would need to cross this road to access the town. The site promoters have stated they will build a suitable footbridge but how can they given they do not own land fronting the A458. Clarification required on feasibility of this or alternative means of achieving safe crossing points.
A0606	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP18 & S3: Bridgnorth	Not Specified	No	Not Specified	Within the SAMDev Plan, the livestock market was required to re-locate due to incompatibility with proposed housing. Why is development now proposed adjacent to the re-location site. Schedule S3.1(1) for BRD030 (Tasley Garden Village) and the Shropshire Council Cabinet Report 20 July 2020 (Appendix 2) are not consistent with each another regarding poultry units. At this Cabinet, Officers also discussed a possible legal agreement on this matter no such agreement has been registered, therefore how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences, this would breach draft Policy DP18. It is also possible that BRD030 could be constructed in the vicinity of a livestock market and poultry units. How can odour and noise from the poultry units and livestock market be mitigated? BRD030 is also close to sources of current road and commercial noise and potential future noise. No details are given as to how green infrastructure buffers can effectively manage this issue.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0493	B004	<p>What areas / units are already available for occupation and how long have they been vacant?</p> <p>What evidence is there of a need for a further 27ha of employment land in addition to existing SAMDev allocation and what evidence that their delivery is achievable, particularly in the light of Covid 19.</p> <p>If the predicted levels of employment growth are not achieved, how will the land and/or empty buildings be used?</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)
A0493	B005	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)
A0493	B006	<p>What are the plans for improving the road infrastructure around Bridgnorth and its surrounding areas? As there are no plans to improve roads, employment development is unlikely to occur.</p> <p>Clarification required on feasibility of a pedestrian footbridge over the A458 or alternative means of achieving safe crossing points between BRD030 and the town.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means. Furthermore, several draft site guidelines proposed for BRD030 relate to highway matters, including providing significant and effective pedestrian and cycle links over the A458.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p>	No	S3.1 Bridgnorth (BRD030)
A0606	B006	<p>Explain why BRD030 is considered appropriate alongside the livestock market, given its relocation was due to incompatibility with proposed housing.</p> <p>Confirm if there is a legal agreement between the landowner of the land for the proposed Poultry Units and Shropshire Council. If not, how can it be ensured the Poultry Units will not be in operation once development of BRD030 commences.</p> <p>Provide details of how noise and odour can be mitigated in these circumstances.</p>	<p>Noted. The current livestock market site has been allocated as part of a wider site for mixed used development within the adopted SAMDev Plan. Shropshire Council has undertaken a proportionate and robust site assessment process to inform identification of proposed allocations. This includes consideration of noise and odour informed by comments from Public Protection.</p> <p>Ultimately with regard to BRD030 and its location adjacent to the site allocated for the relocation of the livestock market, it is considered that this proximity requires careful and sensitive consideration; however, it is considered that this can be appropriately managed through appropriate design and layout and use of green infrastructure buffering. This is reflected within proposed site guidelines. Any development of this site would also need to comply with the proposed policies of the draft Shropshire Local Plan, including draft Policy DP18 on pollution and public amenity.</p> <p>Proposed site guidelines for BRD030 also require preparation of a vision, design code and masterplan which will be adopted as a Supplementary Planning Document. This process will allow for more detailed consideration of issues such as the appropriate design and layout and use of green infrastructure buffering to manage the sites proximity to the site for the relocation of the livestock market.</p> <p>Furthermore, any site ultimately allocated within the Local Plan still requires an appropriate Planning Permission to be granted before development can be implemented. The specific approach to managing these issues would therefore be determined at the Planning Application stage, where a detailed design and layout for the development and any further necessary supporting assessments would be available. Any Planning Permission may be subject to planning conditions and/or a S106 Legal Agreement, where appropriate to do so.</p>	No	S3.1 Bridgnorth (BRD030)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0606	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3 (BRD030)	Not Specified	No	Not Specified	Acknowledge that community involvement, as set out in the Council's Statement of Community Involvement (SCI), has taken place to a limited degree. It should be noted that the late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ. It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.
A0642	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3 (BRD030)	Not Specified	No	Not Specified	Very little community engagement, as set out in the Council's Statement of Community Involvement (SCI), has taken place. It should be noted that the surprising late emergence of BRD030 (Tasley Garden Village) means consultation methods used for this and the alternative site at Stanmore Garden Village differ (particularly due to Covid 19 restrictions). Given significance of this proposal and the alternatives available, would have expected a public debate on the merits of both proposals at the same time. It would appear that no account has been taken of objections and no public explanation has been given as to why the views expressed have been ignored. A steering group consisting of members of Bridgnorth Town Council and surrounding Parish Councils have considered the issues facing Bridgnorth and developed a plan for the settlement (draft report published in May 2020), around the same time the BRD030 proposal came to light. However this plan does not seem to have been considered by Shropshire Council at all.
A0071	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	Not Specified	Not Specified	Neither 'Gunning Principles' for consultation nor requirements of the 'Statement of Community Involvement' have been adequately followed. Concern over compliance with 'Gunning Principles' are: -Proposals should be consulted upon at a formative stage. BRD030 (Tasley Garden Village) was introduced in April 2020 as a complete proposal. At this late stage, there was no time for meaningful input. -There should be sufficient information for intelligent consideration. Do not consider information provided by the promoters of BRD030 was sufficient to allow informed comments. -There should be adequate time for consideration and response. Promoters of BRD030 undertook consultation which closed on 3rd June 2020 following a single video conference call that a number of Councillors attempted to join without success. A Subsequent 'Regulation 18' consultation by Shropshire Council, which included BRD030 as a revised proposed allocation, presented much less opportunity for public engagement than the previous Regulation 18 consultation which included an alternative preferred allocation (P54 (part); P56 (part); P58a; STC002; STC004 (part); STC005; and STC006) (Stanmore Garden Village). Do not consider the time or process used for consultation was adequate. -'Conscientious consideration' must be given to consultation responses before a decision is reached. No feedback on how submissions have been taken into account has been provided by Shropshire Council. Concern over compliance with the 'Statement of Community Involvement' are: -Shropshire Council have not 'engaged in a timely and constructive manner'. Do not consider sufficient time was allowed for consideration of proposed allocation BRD030. Consultation was inadequate, not allowing opportunities for discussions with Shropshire Council. Development of this scale would only be supported where adequate planning of required infrastructure and funding of infrastructure has occurred. No feedback has been provided on this at any stage of the consultation and the draft Shropshire Local Plan and supporting evidence do not address it. -Consider Shropshire Council simply listing submissions to the Reg 18 consultation does not meet the SCI's requirement to "provide information on how people's views have been handled, including reporting back to communities...".

This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Shropshire Council also considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the 'Gunning Principles'.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Each stage of consultation has been supported by a proportionate evidence base. Following each of these stages of consultation, a summary of the responses received has been prepared and form appendices to the Consultation Statement prepared for the 'Regulation 19' Pre Submission Draft of the Shropshire Local Plan.</p> <p>With regard to proposed allocation BRD030 (Tasley Garden Village), this site was identified as a proposed allocation and subject to consultation within the 'Regulation 18' Plan Preparation stage of the Local Plan Review - specifically, within the Regulation 18: Pre-Submission Draft of the Shropshire Local Plan (August 2020 – September 2020).</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.</p> <p>Where following consultation it has been proposed to make amendments to proposals in response to the consultation process or indeed any other emerging evidence, this has been documented within relevant subsequent consultation documents (reflecting the iterative process undertaken during the Regulation 18 Plan Preparation stage). Furthermore where such changes relate to proposed allocations (which have been the subject of the most significant level of response) this has also been documented within updated site assessments, provided as part of the evidence and consultation material for relevant stages of consultation.</p> <p>A proportionate and robust site assessment process has been undertaken to inform proposed site allocations. This site assessment process undertaken to inform proposed allocations included consideration of public protection.</p>	No	S3.1 Bridgnorth (Consultation Process)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0679	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	No	No	<p>Consider neither the 'Gunning Principles' for consultation nor the process require within Shropshire Council's 'Statement of Community Involvement' have been adequately followed.</p> <p>Concern over compliance with 'Gunning Principles' are:</p> <ul style="list-style-type: none"> <li>-There should be sufficient information for intelligent consideration. Do not consider information provided by the promoters of BRD030 was sufficient to allow informed comments and was inaccurate.</li> <li>-There should be adequate time for consideration and response. See above.</li> <li>-'Conscientious consideration' must be given to consultation responses before a decision is reached. No feedback on how submissions have been considered and taken into account has been provided by Shropshire Council.</li> </ul> <p>With regard to the 'Gunning Principles' within the 'Statement of Community Involvement' (SCI):</p> <ul style="list-style-type: none"> <li>-Shropshire Council have not 'engaged in a timely and constructive manner'. There has been a series of consultation exercises, but responses, including from the local community, Parish Councils and Bridgnorth Plan Steering Group have been ignored and no response provided.</li> <li>-The concept of BRD030 (Tasley Garden Village) was only revealed in April 2020, with the promoters undertaking just 1 month's consultation, during the Covid-19 pandemic using a short notice video conference meeting within which many residents were unable to participate, and ending on 3rd June 2020. Shropshire Council then undertook a Regulation 18 Consultation commencing on 3rd August 2020, too short a period for consideration of such a significant change. Too short notice was also provided about proposed changes, and the level of consultation was not proportionate given the scale of proposals and significance of the proposed change. Consider a majority of residents were unaware of proposals.</li> <li>-With regard to 'constructive consultation', the local community have consistently expressed concern that a full infrastructure plan, showing deliverability and funding, is needed for a proposal on this scale and one has not been prepared. Submissions made have not been acknowledged, demonstrating a total lack of constructive consultation.</li> <li>-Shropshire Council have held only one community consultation meeting around Bridgnorth, during the first Regulation 18 Consultation. No meetings have occurred during the second Regulation 18 or Regulation 19 Consultations. Outputs from these meetings have not been considered and neither have surveys undertaken by the Bridgnorth Plan Steering Group.</li> <li>-Shropshire Council has used over-structured methods to receive submissions, to simplify administration, which has reduced lines of consistent argument to isolated comments on individual paragraphs of draft documents.</li> <li>-Methods used to inform and engage communities in the planning process have been totally inadequate.</li> <li>-The SCI requires Shropshire Council to 'provide information on how people's views have been handled, including reporting back to communities ...'. Shropshire Council has provided summaries of submissions to Regulation 18 consultations however this does not begin to meet this commitment.</li> </ul> <p>Additionally questions to Shropshire Council Cabinet on Monday 7th December 2020 were evaded - question and response appended to representation.</p> <p>With regard to legal compliance BRD030 will massively increase vehicle movements and make the town centre more congested and more polluted (already breaching requirements - recent legal decision concluded air pollution contributed to illness/death, Shropshire Council could be held liable under Human Rights legislation if the Draft Shropshire Plan was implemented and the almost certain increase in air pollution was linked to illness and/or death. Manufacture of petrol/diesel vehicles will be banned from 2030, but realistically many millions of such vehicles will be on the road well into the 2030s).</p>
A0543	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	<p>The proposed employment allocations at Stanmore are presented in the Local Plan Review as being necessary to serve the needs of Bridgnorth, and the Stanmore area is presented as being part of Bridgnorth town. This is not the case. The Stanmore area is physically separated from Bridgnorth by a steep wooded escarpment. It is located in open countryside and does not form a natural extension to Bridgnorth.</p> <p>The Local Plan Review Policy S3.1 indicates that the Bridgnorth area will deliver 1,800 houses and 49 ha of employment land in Bridgnorth. The Strategic Land Supply 2016 – 2038 set out in Appendix 6: Employment Development Guidelines and Employment Land Supply, however, indicates that a total of 40.5 ha of land is to be allocated in the Place Plan Area, with only 37.7 ha to be provided in Bridgnorth. Clearly there is a discrepancy in the figures. The Local Plan does not explain why it is necessary to allocate 49 ha of employment land in Bridgnorth</p> <p>The discrepancy appears to be around the amount of development proposed for employment uses at Stanmore. It does not appear that the figures support this allocation.</p> <p>Policy S3.1 is not properly justified or evidenced, and has not been prepared on the basis of positive and robust predictions of future requirements and take-ups of employment or employment land.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0679	B008	<p>Modify the draft Shropshire Local Plan in line with the 1st Edition of the Bridgnorth Plan. Reduce the scale of development around Bridgnorth to provide sufficient dwellings to meet the need for a 10-year land bank. Then undertake a new Site Assessment for longer-term needs, giving the opportunity to demonstrate the Statement of Community Involvement has been revisited and its requirements met.</p>	<p>Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Shropshire Council also considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the 'Gunning Principles'.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Each stage of consultation has been supported by a proportionate evidence base. Following each of these stages of consultation, a summary of the responses received has been prepared and form appendices to the Consultation Statement prepared for the 'Regulation 19' Pre Submission Draft of the Shropshire Local Plan.</p> <p>With regard to proposed allocation BRD030 (Tasley Garden Village), this site was identified as a proposed allocation and subject to consultation within the 'Regulation 18' Plan Preparation stage of the Local Plan Review - specifically, within the Regulation 18: Pre-Submission Draft of the Shropshire Local Plan (August 2020 – September 2020).</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan.</p> <p>It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy.</p> <p>Where following consultation it has been proposed to make amendments to proposals in response to the consultation process or indeed any other emerging evidence, this has been documented within relevant subsequent consultation documents (reflecting the iterative process undertaken during the Regulation 18 Plan Preparation stage). Furthermore where such changes relate to proposed allocations (which have been the subject of the most significant level of response) this has also been documented within updated site assessments, provided as part of the evidence and consultation material for relevant stages of consultation.</p> <p>A proportionate and robust site assessment process has been undertaken to inform proposed site allocations. This site assessment process undertaken to inform proposed allocations included consideration of public protection.</p>	No	S3.1 Bridgnorth (Consultation Process)
A0543	B002	<p>Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.</p>	<p>Noted. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Draft Policy S3.1 provides a gross figure for employment land proposed to be made available to create choice and competition in the market, this therefore includes land required for landscaping, on-site infrastructure and in the case of existing allocation ELR011b the relocation of the existing livestock market. Schedule A6 presents gross site capacity for proposed allocations, however in the case of Bridgnorth it is net of that land specifically required for landscaping and the relocation of the livestock market.</p>	No	S3.1 Bridgnorth (STC002 and P58a)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0609	B031	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Bridgnorth P58a and STC002	Not Specified	No	Not Specified	<p>Proposed allocations STC002 and P58a involve release of land from the Green Belt. Concerned that the Green Belt Assessment and Review undertaken to inform the draft Shropshire Local Plan underestimates the contribution that the sites around Stanmore make to Green Belt purposes (see Appendix 2 of the representation). Chapter 13 of the National Planning Policy Framework (NPPF) is clear on the purpose and importance of Green Belt. Para 136 and 137 of the NPPF indicates Green Belt boundaries should be only be altered where exceptional circumstances are fully evidenced and justified through Local Plans and before concluding exceptional circumstances exist, all other reasonable options for meeting identified needs for development should be fully examined. As these sites are in the Green Belt there is a need to demonstrate Exceptional Circumstances.</p> <p>Having reviewed the circumstances presented by the Council we would note reference is made to evidence regarding current demand, capacity and occupancy rates at the existing Stanmore Industrial Estate, but this has not been published and does not form part of the evidence base for the draft Shropshire Local Plan. This evidence is important given the purpose of these sites is to allow for expansion of Stanmore Industrial Estate.</p> <p>Do not consider exceptional circumstances have been demonstrated and consider there is no need or justification to release Green Belt land around Stanmore to accommodate employment use. As such STC002 and P58a should be removed from the draft Shropshire Local Plan and the land retained as Green Belt.</p> <p>Concerned about the need for these employment allocations and the impact this would have on deliverability of employment land within and adjacent to Tasley Garden Village (BRD030).</p> <p>Notwithstanding the above, welcome the additional wording within proposed development guidelines for these sites, which requires the employment development to be targeted towards the engineering and advanced manufacturing sectors, to complement the employment offer on the existing Industrial Estate. This is considered effective, noting the Exceptional Circumstances presented regarding delivering a concentration and expansion of advanced manufacturing and engineering floorspace at the site.</p>
A0053	B002	Habitats Regulations Assessment	Habitats Regulations Assessment S3. Bridgnorth Place Plan Area -BRD026	No	No	No	<p>Landscape and visual assessment for BRD026 not undertaken.</p> <p>BRD026 should be registered a Brownfield land with potential ecological value.</p> <p>Poor air quality issue recognised but no identification of source or plan to address it.</p>
A0350	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.2 Alveley	Not Specified	No	Not Specified	<p>Strongly support designation of Alveley as a Community Hub and proposed changes to Green Belt boundaries (required for the long-term sustainability of the village). Alveley is a sustainable location to accommodate development in east Shropshire; is located on the A442 strategic transport corridor; has a good range of services, facilities, public transport links and local employment opportunities (including at Alveley Industrial Estate, allowing for balanced growth); access to the growing economies of Worcestershire/wider West Midlands; and there is a strong demand for housing in the local area.</p> <p>The level of development proposed (equivalent to 0.9% growth per annum over 20 years) is the minimum necessary to meet the village's housing needs, justifying the release of land from the Green Belt.</p> <p>Strongly support proposed allocation ALV009 for 35 dwellings. The site would be developed with a high-quality design and include a range of features including public open space (indicative layout forms an appendix to the representation).</p> <p>Within the Green Belt Review undertaken to inform the draft Shropshire Local Plan, the sub-parcel containing proposed allocation ALV009 was concluded to make only a limited contribution to the Green Belt and its development would result in one of the lowest harms to Green Belt. Within the Landscape and Visual Sensitivity Assessment undertaken to inform the draft Shropshire Local Plan, proposed allocation ALV009 was considered to have the lowest landscape and visual sensitivity.</p> <p>Unfortunately site guidelines could potentially cause deliverability problems that fail the 'effective' test of soundness, despite previous representations. Specifically:</p> <ul style="list-style-type: none"> <li>-The requirement for a footway along the A442 should be specifically on adopted highway land, given the limited space between third party land and the highway and the problems that can occur if third party land is involved.</li> <li>-It is necessary to recognise that the site's access will necessitate puncturing through the tree belt fronting the A442.</li> </ul>
A0417	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	ALV009	Not Specified	No	Not Specified	<p>Alveley has accepted appropriate development over recent years, including affordable housing in the Green Belt and a cross-subsidy scheme. A large residential caravan/park home site is also currently being developed just outside Alveley.</p> <p>A recent local housing need survey identified need for affordable houses/bungalows and some open market dwellings. Consider existing policy mechanisms have worked well.</p> <p>Would welcome removal of proposed allocation ALV009 and adjustment of the proposed residential guideline to reflect increased development that has occurred since the Local Plan Review commenced.</p> <p>Post office provision is now limited and there is no weighting adjustment for changes to services.</p>
A0548	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.2 Alveley	Not Specified	No	Not Specified	<p>Plan Review/Reports appraisals are numerous in cross referencing to the Pre-Submission Regulation 19 document. The reports and information is fragmented and disjointed and it is difficult to envisage how the Local Plan will give positive guidance in relation to proposed new development. e.g. Variation in Green Belt policy assessments regarding land to be released. The Central Garage site is only listed in the Brownfield Land Registration Maps and makes no reference to this ongoing development in the settlement map.</p> <p>Likewise no reference to Green Belt land already released. Land references and numbering vary depending on the report undertaken at the time which involves more cross referencing. Where Green Belt land is to be released giving the reason of a "high weighting" for example Community benefits and that reason is no longer valid or justified, how such a decision can be rescinded. e.g. ALV/006 - 007 if deemed appropriate.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0609	B031	Remove proposed allocations SCT002 and P58a from the draft Shropshire Local Plan.	<p>Noted. The Shropshire Local Plan Review have been informed by a Green Belt Assessment and Review. Shropshire Council considers that these assessments are appropriate, proportionate and robust.</p> <p>Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire.</p> <p>The exceptional circumstances for the proposed release of these sites from the Green Belt are documented within the Green Belt Release Exceptional Circumstances Statement (December 2020) available on the Shropshire Council evidence base page.</p> <p>Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p>	No	S3.1 Bridgnorth (STC002 and P58a)
A0053	B002	Carry out and publish the landscape and visual assessment for BRD026. Address poor air quality issue.	<p>Site BRD026 is an existing allocation within the adopted Local Plan.</p> <p>The draft Shropshire Local Plan should be read as a whole. As such, if adopted, any allocations would need to comply with all policy requirements, unless material considerations indicate otherwise. This is consistent with any development proposal. Consistent with draft Policy DP25, development of BRD030 can only occur where there is sufficient existing infrastructure capacity available or where the development would lead to a shortfall in infrastructure provision, the development funds necessary improvements through a suitable developer contribution, unless the identified shortfall is being addressed by other means.</p>	No	S3.1 Bridgnorth BRD030
A0350	B007	Update the draft development guidelines for proposed allocation ALV009 to: -Retain, where possible, protected and mature trees and hedgerows. -Recognise that the continuous footway along the A442 will be within adopted highway land.	<p>Noted. Shropshire Council considers that the proposed development strategy for Alveley is appropriate, effective, sustainable and deliverable.</p>	No	S3.2 Alveley
A0417	B001	Remove proposed allocation ALV009. Adjust the proposed residential guideline for Alveley to reflect recent commitments and allow the community time to absorb growth in the Parish (particularly Alveley). Provide explanation of how greater access to the Green Belt can be achieved for the community to off-set proposed development.	<p>Noted. Shropshire Council considers that the proposed development strategy for Alveley is appropriate, effective, sustainable and deliverable. The Draft Plan strategy has focused development in principal and key centres, but Green Belt release, to provide for allocations, are identified for Alveley to support its continuing role as a Community Hub as detailed within the exceptional circumstances statement. Allocation of sites in different parts of the village provides alternative delivery options. Shropshire Council has undertaken a robust and proportionate site assessment process to inform identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. Existing commitments and development in Alveley during the Plan period (2016-2038) are taken into account and contribute to the housing guideline figure. The exceptional circumstances statement details potential compensatory improvements to the Green Belt, including opportunities to for improving access.</p>	No	S3.2 Alveley
A0548	B001	n/a	<p>Noted. Shropshire Council considers that the proposed development strategy for Alveley is appropriate, effective, sustainable and deliverable. The Draft Plan strategy has focused development in principal and key centres, but Green Belt release, to provide for allocations, are identified for Alveley to support its continuing role as a Community Hub as detailed within the exceptional circumstances statement. Allocation of sites in different parts of the village provides alternative delivery options. Shropshire Council has undertaken a robust and proportionate site assessment process to inform identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. The methodology used within the Green Belt Assessment and Review undertaken to inform the Local Plan Review is considered appropriate, proportionate and robust. Existing commitments and development in Alveley during the Plan period (2016-2038) are taken into account and contribute to the housing guideline figure. The exceptional circumstances statement details potential compensatory improvements to the Green Belt, including opportunities to for improving access. Site guidelines set out specific requirements for proposed site allocations.</p>	No	S3.2 Alveley

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0121	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.2 Alveley	Yes	No	No	Accept Hub status, however the proposal to release green belt land adjacent to the Cleckars to provide for 35 new dwellings is unsound and fails to comply with the duty to co-operate. In the Parish Council's response to the Regulation 18 Pre-submission draft of the Local Plan it was clearly stated "The Parish Council would prefer this site (ALV009) to be retained within the green belt; there are ecological and hydrological issues with the site which Councillors feel have not adequately been taken into account". The Parish Council's view on this proposal has hardened as a result of the recent plan to construct up to 100 park homes on the Butts Caravan site in Alveley. Although this may not be legally relevant in planning terms, it will create additional problems for local services and argues against proposed housing developments elsewhere in the Village, especially on green belt land at the Cleckars site. There are also much-needed infrastructure improvements necessary for the area.
A0347	B048	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	ALV009	No	No	Not Specified	ALV009 is adjacent to groundwater springs/issues, so groundwater is likely to be shallow. Contaminated land, foundation dewatering and surface water management aspects will need consideration.
A0054	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3. Bridgnorth Place Plan Area - ALV09	No	No	No	The Plan does not take into account the approved Development Plan. Site ALV009 is in Green Belt and has previously been rejected by the Parish Council. Sufficient Green Belt Land is already identified in the Plan for 100 houses. There have been significant levels of recent housing development & known intentions to seek planning permission for additional. Views/complaints of residents & Parish Council are not properly considered by Shropshire Council
A0124	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	ALV006 & ALV007	Yes	Yes	Yes	Support the modifications made at Reg 18.
A0497	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Schedule S3.1(i) BRD030	Not Specified	No	Not Specified	Object to the development strategy for Bridgnorth which is not justified or effective as the evidence base does not support the strategy to allocate BRD030 (Tasley Garden Village) taking into account the reasonable alternative at BRD032 (Stanmore Garden Village). Response to the Regulation 18 Pre-Submission Draft Plan (Appendix 1 of this Representation which includes an initial Masterplan for Stanmore Garden Village, a number of technical studies undertaken in relation to Stanmore Garden Village, and work comparing Stanmore Garden Village and Tasley Garden Village and critiquing Tasley Garden Village) remains relevant. Stanmore Garden Village presents an opportunity to deliver a new, genuine garden community. The proposal has been adapted to take account of local views, incorporate great design with zero net carbon objectives, affordability (around 30% of provision would be affordable), significant amounts of green space, long term stewardship and services and facilities wanted by the community delivered early in the development. It will also lead to enhancement of Stanmore Country Park. It is the only genuinely deliverable site for Bridgnorth and will contribute to meeting the environmental targets of the County. Consider Tasley Garden Village is neither suitable, deliverable (including viable) nor available and on this basis this proposed allocation is unsound. Tasley Garden Village has risks associated with land acquisition, accessibility, livestock markets (health and wellbeing), highways, welfare and community facilities, impact on carbon emissions, there are questions over appropriateness of the land allocated for employment uses and commercially the cost of mitigating these will be substantial and may not be viable. The site will not achieve the principles of a garden village. By way of context: - The SAMDev Plan Inspector noted Green Belt constrained development in east Shropshire, including to the east of Bridgnorth (and also noted limited development opportunities outside Green Belt at Bridgnorth) and recommended a modification to the SAMDev Plan (subsequently included) committing to a detailed Green Belt Review. - Stanmore Garden Village was initially supported by Shropshire Council and identified as a preferred allocation within the Preferred Sites consultation. - Technical studies, stakeholder engagement and consultation have informed the refinement of proposals at Stanmore Garde Village. - The Council changed its position in April 2020 and sought to support an alternative site, Tasley Garden Village. The Council could have pursued this location from the outset of the Local Plan Review, but had indicated a preference for development at Stanmore due to consideration of opportunities and constraints. Shropshire needs more housing (particularly affordable housing for younger people) and employment opportunities (modern facilities) are required to retain and draw in employers. Without this economic decline could occur as the economically active leave to find jobs and businesses are attracted to locations outside Shropshire with modern facilities and better communications, choice and lifestyle. Bridgnorth is a rare opportunity to retain major regional employers, working with them to expand and develop a hub of new technology industries in modern buildings. Employment opportunities in the area are dominated by Telford (regionally) and Stanmore Business Park (locally). Stanmore Garden Village benefits from sustainable/better access to these locations and its adjacency to Stanmore Business Park provides opportunities for clustering to form a business hub/new quarter of the town (an approach supported by Shropshire Council's evidence base including the employment land review and economic development needs assessment). Tasley Garden Village is in the wrong location with poorer access to key employment locations and given its location, it is considered employment provision proposed on the site is not attractive to the market as it is on a secondary route with limited transport links nor is it viable/deliverable (supported by views of a local commercial property agent) - no evidence has been provided on viability/deliverability. Consider there is a strong planning case to justify development of Stanmore Garden Village and inclusion of the site in the draft Shropshire Local Plan. This includes that exceptional circumstances in relation to removal of the site from the Green Belt exist for such development (clear the Council felt this was the case when the site was originally identified, reinforced by the Council's proposal to release Green Belt for employment land at Stanmore, the wider release would consolidate this to deliver sustainable development). Whilst Tasley Garden Village is outside the Green Belt as it is not considered suitable, deliverable (including viable) or available it is unsound. Stanmore Garden Village is available immediately, being predominantly owned by two landowners that intend to deliver the proposals themselves. There is no need for/risk associated with negotiation or acquisition. It represents an opportunity to deliver housing and employment. Tasley Garden Village however is in multiple ownerships (none owned by the proposed developer), requiring formal options/equalisation agreements. This will impact on viability, reducing development contributions (including affordable housing)/amenity provision or lead to higher house prices. Later phases could be cancelled if sufficient profit is not achieved. This creates risk about delivery (housing and facilities). Comparable schemes to Tasley Garden Village highlight this risk: Langley Sustainable Urban Extension (SUE), Birmingham, is an allocation with multiple ownerships that has experienced significant delays to delivery; whilst a proposed 'Garden Community' at Easton Park within the Uttlesford Local Plan, led to an Inspector advising the withdrawal of the Local Plan (which occurred) due to concerns including uncertainty about deliverability of employment and infrastructure. Promoters of Tasley Garden Village have provided no evidence of control of land, viability or deliverability. Examination of the North

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0121	B001	The proposed allocation of the green belt site ALV009 for future housing development in the Local Plan period should be removed. Shropshire Council should remove paragraph 7 of S3.2 from the Local Plan. This refers to an area of land beyond the Alveley development boundary and states that this is being safeguarded to meet future development need beyond the period of the this Plan. For the reasons stated above, no such safeguarding is required.	Noted. Shropshire Council considers that the proposed development strategy for Alveley is appropriate, effective, sustainable and deliverable. The Draft Plan strategy has focused development in principal and key centres, but Green Belt release, to provide for allocations, are identified for Alveley to support its continuing role as a Community Hub as detailed within the exceptional circumstances statement. Allocation of sites in different parts of the village provides alternative delivery options. Shropshire Council has undertaken a robust and proportionate site assessment process to inform identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. Existing commitments and development in Alveley during the Plan period (2016-2038) are taken into account and contribute to the housing guideline figure. The exceptional circumstances statement details potential compensatory improvements to the Green Belt, including opportunities to for improving access. In accordance with national policy safeguarded land is identified to meet needs beyond the current Plan period.	No	S3.2 Alveley
A0347	B048	n/a	Noted. The draft Shropshire Local Plan should be read as a whole. Draft Policy DP19 comprehensively addresses the issue of water infrastructure and water quality.	No	S3.2 Alveley (ALV009)
A0054	B001	Remove ALV009 from Plan	Local Plans must be regularly reviewed and an the early review of the adopted Plan (SAMDev DPD) was required. The Draft Local Plan does not need to replicate the adopted plan but does needs to be in line national policy. As part of the review process housing and employment land requirements over the whole Plan period and beyond in the case of Green Belt review, must be considered. Alveley as a Community Hub is a sustainable location and focus for development in the rural area. Any housing delivery and existing commitments, together with constraints, are taken into account as part of the overall housing requirement and site assessments are carried out to consider the suitability of sites for allocation. National Policy relating to Green Belt has been taken into account and exceptional circumstances are identified for Green Belt boundary changes to support identified options for delivering sustainable development. Complaints submitted about the approval process for planning applications are required to be dealt with through a separate process to the examination of a Local Plan. All representations received in response to Local Plan consultations are considered.	No	S3.2 Alveley (ALV09)
A0124	B009	n/a	Support welcomed.	No	S3.2 Alveley ALV006 &ALV007
A0497	B001	BRD030 should be deleted and Stanmore Garden Village (BRD032) (part) should be allocated for 70ha comprising 850 dwellings, 16ha employment land, new local centre and green space.	Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. In identifying proposed site allocations a proportionate and robust site assessment process has been undertaken, which included consideration of an appropriate range of factors used to identify constraints and opportunities.	No	S3.1 Bridgnorth

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0497	B001 Cont'd						<p>Tasley Garden Village wraps around the site for the proposed relocation of the livestock market. Given associated noise/odour, livestock markets and housing do not mix, hence the need for its relocation. This proximity raises concerns about commercial viability/deliverability for both housing and continued operation of the livestock market which is key to the local economy.</p> <p>Poultry units proposed within the wider Tasley Garden Village are a similar constraint. The proposed site guideline to require this operation to cease prior to occupation of housing and any future S106 legal agreement/Grampian Condition would not work to control this matter.</p> <p>Shropshire Council has declared a climate emergency. A principal contributing factor easily influenced by the location of development is travel by car, with most journeys to work or a shop. Allocation of Stanmore Garden Village rather than Tasley Garden Village would make a significant contribution to reducing travel to work by car as it is closer to local and sub-regional employment (estimate Tasley Garden Village would result in an extra 2 million miles of commuting a year, based on traffic flows within the Tasley Garden Village site promoters assessment); increases the ability to walk/cycle to work; and reduces congestion. This will also increase health and wellbeing.</p> <p>Green Belt is a policy tool, the Green Belt associated with Bridgnorth is related to stopping the unrestricted sprawl of the West Midlands Conurbation (12 miles from Bridgnorth), but should not suppress the economies and meeting needs of towns around it. Stanmore Garden Village is located in the Green Belt, but it is the best location to: support economic growth (a key aspiration of the draft Shropshire Local Plan) due to proximity to Stanmore Business Park and sub-regional employment opportunities; support expansion of existing businesses; provide opportunities for balanced housing and employment provision; and meet long term growth needs, by opening up a new quarter for the town. This would be seen as the success of Bridgnorth and not West Midland encroachment (nearly 10 miles of Green Belt would remain between the two).</p> <p>Green Belt is not related to landscape quality. Landscape at Stanmore Garden Village is gently rolling lowland agricultural farmland screened by landform, woodland and field boundary vegetation, with a back-drop of the former RAF base. Tasley Garden Village however is far more expansive, being in a larger valley where the impact of development would change the nature of the valley to a greater degree; it can be seen from the Shropshire Hills Area of Outstanding Natural Beauty (AONB) and is outstandingly beautiful.</p> <p>Majority of the local community, local members and Town/Parish Council's (those who know the area best) want development to be located where it will cause the least damage, requires less mitigation, does not compound environmental issues/destroy the landscape and is viable/deliverable, and addresses housing challenges/improves the environment, Stanmore.</p> <p>A brief for work to evaluate the transport performance of the Tasley Garden Village and Stanmore Garden Village is not fit for purpose to evaluate and rank the two proposals. A Review (Appendix 4 of this representation) concludes that to avoid subsequent challenge and to withstand scrutiny at Local Plan Inquiry on soundness, it must be refashioned and extended with purpose, objectives and means to identify the appropriate outcome for the Community (people, places, activity) in the context of adopted and emerging policy clearly stated.</p> <p>Comments on the Development Options Assessment are also relevant.</p>
A0609	B029	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Bridgnorth BRD030	Not Specified	No	Not Specified	<p>Fully support proposed allocation Tasley Garden Village (BRD030) for delivery of a mixed use allocation. Consider the proposed allocation to be available, suitable and deliverable and the draft policy sound, with it being supported by a significant amount of evidence demonstrating the site's suitability for development. A vision document and masterplan demonstrating how BRD030 and the wider site promotion could be brought forward along with a suite of technical documents which further support this have been prepared by the site promoter (Appendix 1 of this representation). BRD030 would create a highly sustainable community, with new jobs, education, retail and employment opportunities on site, which will reduce the need to travel.</p> <p>Consider there is a significant need for housing development in Bridgnorth, given limited delivery over recent years, exacerbating affordability issues and demand.</p> <p>With regard to specific proposed site guidelines, they are generally considered sound, but some minor modifications are considered appropriate to make them effective and justified:</p> <ul style="list-style-type: none"> <li>-Support proposals to prepare a Supplementary Planning Document (SPD) which will detail the vision, design code and masterplan for the site. However, preparation of this SPD (which could take some time) should not be at the expense of much needed early delivery of initial phases of development, given the limited numbers of new homes delivered over recent years (primarily due to delays relating to the delivery of SAMDev allocations) which will have created pent-up demand for housing. Given the nature of the site, its relationship to the existing town and proposed access arrangements (likely to be fixed early in the masterplanning process), initial phases of development in the north-eastern corner of the site could come forward (restricted in terms of number of homes delivered and still subject to community engagement) in tandem with the SPD. Greater clarity is also required on this guideline (what is meant by completed and is it submission or determination of a Planning Application). This proposed site guideline should be amended to reflect these matters to ensure that the draft Policy is appropriate concise and effective, whilst also allowing the delivery of some initial phases in the event that the SPD is unable to be adopted very soon after the adoption of the Local Plan Review.</li> <li>-Development guidelines state at least 10% of the energy to be generated from on-site renewable and low carbon energy sources (consistent with draft Policy DP11). Welcome and support provision of renewable energy sources, however on-site renewable energy generation should be dealt with through the future SPD.</li> <li>-Endorse requirement for employment development to be an intrinsic part of the development. Additional employment land is needed to address the current balance between housing and employment and attract new businesses and industries into Bridgnorth, which will assist in securing economic growth. Agree this employment land should be located in a gateway location along the A458, which is one of the main arterial routes into Bridgnorth and, as recognised in the EDNA, is an obvious and appropriate location for growth.</li> <li>-Generally support the proposed guideline that employment uses should be targeted towards office and research and development on the basis that this would complement wider employment opportunities in Bridgnorth and contribute to the objectives of the Shropshire Economic Growth Strategy. However it is important that the type of employment delivered is not so constrained that it will prevent it from serving future and existing business needs, including the ability to adapt to changes (such as Covid-19). As such guidelines should provide flexibility to provide other employment uses that would be suitable for this location.</li> <li>-Fully support delivery of a local centre within BRD030 to deliver localised retail and community uses. Consider this local centre should be a designated centre within the retail hierarchy to ensure policy support for the development, and importantly, help to protect its future vitality and viability from any future out-of-centre proposals that may be brought forward. This amendment would ensure that the proposed local centre within the development is effective in supporting and protecting the centre.</li> <li>-Proposed development guidelines state provision of retail and community facilities will be linked to the first phase of residential development. However, consider that this would be best dealt with through the SPD. This is important as the phasing and delivery of the local retail and community facilities will largely be dependent upon its siting within the wider development site (if it is centrally located to provide greatest accessibility, it could not come forward in tandem with the first phase of housing).</li> </ul>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0497	B001 Cont'd				S3.1 Bridgnorth
A0609	B029	<p>The proposed site guideline for proposed allocation BRD030 regarding preparation of a Supplementary Planning Document (SPD) should be amended as follows:            'The development of this site will be <b>delivered</b> in accordance with a vision, design code and masterplan which will be prepared in consultation with the public and adopted as a Supplementary Planning Document by Shropshire Council. This <b>SPD</b> will represent a significant material planning consideration and <b>should must be completed adopted</b> before <b>the determination of</b> any planning application for development of the site. <b>In the event an application is submitted prior to the adoption of the SPD, this will be considered against its impact on the development of a wider masterplan, vision and design code for the site.'</b></p> <p>The proposed site guideline for proposed allocation BRD030 regarding on-site renewable energy generation should be deleted and dealt with through the future SPD.</p> <p>The proposed site guideline for proposed allocation BRD030 that targets employment provision towards office and research and development should allow for sufficient flexibility to provide other employment uses that would be suitable for this location.</p> <p>The proposed local centre on BRD030 should be included within the retail hierarchy as identified within draft Policy DP9.</p> <p>The proposed site guideline for proposed allocation BRD030 regarding linking provision of retail and community facilities to the first phase of residential development should be removed and this phasing determined through the SPD.</p> <p>The proposed site guideline for proposed allocation BRD030 regarding retention of non-designated historic farm buildings should be amended as it is not justified or precise.</p> <p>The proposed site guideline for proposed allocation BRD030 regarding cessation of poultry units is considered unnecessary and unjustified and as such should be deleted.</p>	<p>Noted. Shropshire Council considers the requirement for development of BRD030 to be in accordance with a vision, design code and masterplan adopted as a Supplementary Planning Document (SPD) important, given the scale and nature of development proposed on the site. Furthermore, assumptions regarding timescales and rates of delivery for proposed allocation BRD030, and its contribution to the strategy for Bridgnorth and Shropshire, have included consideration of likely timescales for preparing and adopting such a SPD. As such the proposed guideline is considered appropriate.</p> <p>However, for clarification a minor modification is proposed to recognise that it is the positive determination, rather than submission, of a Planning Application that is linked to the adoption of the SPD. Shropshire Council, as the Planning Authority, of course cannot control when a Planning Application is submitted for any site.</p> <p>Subsection 1 (a) of the 2008 Planning and Energy Act states that Local Authorities may include policies imposing reasonable requirements for 'a proportion of energy used in development in their area to be energy from renewable sources in the locality of the development' provided these are consistent with national policy. National policy is the 2015 Written Ministerial Statement which allows Local Planning Authorities to set Code for Sustainable Homes level 4 energy standards. Shropshire Council considers the proposed site guideline for on-site renewable and low-carbon energy generation to be consistent with the proposed requirement in draft Policy DP11, and for this draft policy to be reasonable. This requirement in draft Policy DP11 has been subject to due consideration within the Viability Assessment undertaken to inform the draft Shropshire Local Plan.</p> <p>The proposed site guideline relating to the types of employment uses targeted on the proposed employment land within proposed allocation BRD030 is considered appropriate, in that it recognises that office and research and development uses would complement wider employment opportunities in Bridgnorth and contribute to the objectives of the Shropshire Economic Growth Strategy. The guidelines are also considered sufficiently flexible to, where appropriate, allow for other suitable employment uses, where they conform with wider draft Policies including SP12.</p> <p>The proposed site guideline regarding linking provision of retail and community facilities to the first phase of residential development is considered appropriate as it recognises the importance of providing services and facilities early within a development of this scale. It is considered that the SPD can be used to determine the most appropriate means of achieving this proposed requirement.</p> <p>It is considered appropriate, consistent with the conclusions of the site assessment process and consistent with wider draft Policies in the draft Shropshire Local Plan to include a proposed site guideline relating to retention of non-designated heritage assets on the site. Those buildings which do and do not constitute non-designated heritage assets on the site will be determined during any future Planning Application process, informed by appropriate technical assessments and comments from relevant statutory consultees. However, for clarity a minor modification is proposed to amend reference from non-designated historic farm buildings to non-designated heritage asset.</p> <p>The proposed site guideline regarding cessation of poultry units operating on the proposed allocation or associated potential future direction of growth before occupation of the first dwelling is considered necessary and justified as it provides certainty that this matter is of relevance to this site and importantly the specific phasing of development of BRD030 is unknown, to be established through the SPD.</p>	Yes	S3.1 Bridgnorth (BRD030)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0609	B029 Cont'd						<p>Development guidelines require extensive open space to be delivered on site, including new playing fields, associated facilities, green infrastructure and a new linear park. Consider BRD030 can deliver these requirements as demonstrated on the masterplan and vision document. The open space will be of a good quality and quantity to meet the needs of the community and will reflect the principles of a Garden Village.</p> <p>-The development guideline relating to retention of designated heritage assets is supported. However the requirement relating to non-designated historic farm buildings is not justified and imprecise (what is meant by historic and these buildings have not been individually assessed). Some existing farm buildings/sheds are historic yet are not of significance to merit retention.</p> <p>-Proposed guidelines state buffers, effective design and materials will be used to mitigate noise, dust or odour issues arising from the A458, proposed employment development and the SAMDev employment site. Fully support this approach and consider this would undoubtedly be considered in further detail through the preparation of the SPD and any future Planning Applications.</p> <p>-The proposed guideline relating to cessation of poultry units within the proposed allocation or the proposed future direction for growth is considered unnecessary and unjustified as it replicates requirements set out elsewhere, including draft Policy DP18; the location currently subject to a Planning Application for poultry units within the proposed allocation/proposed future direction for growth is some distance from much of the proposed allocation (900m from likely first phases of development, compared with 350m to nearest residences and 450m to the existing SAMDev allocations); and any impact such as noise and odour in the event the Poultry Units are constructed would be appropriately dealt with through the noise/odour assessments undertaken to inform any proposed future Planning Application for BRD030.</p> <p>-Regarding proposed guidelines relating to development being appropriately designed to accommodate pedestrians, cyclists and motorists; creating a development which promotes sustainable modes of transport is a key priority for the site promoter and the design of BRD030. Also endorse the need for BRD030 accesses to complement those associated with existing SAMDev allocations, the Council should ensure these schemes tie together.</p>
A0609	B030	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S3.1 Bridgnorth BRD030	Not Specified	Not Specified	Not Specified	<p>Commentary on the Council's evidence base document summarising the assessment of Garden Village proposals in Bridgnorth:</p> <p>-BRD030 is located outside the Green Belt and has been fully considered within the site assessment process and identified as a sustainable, deliverable and suitable option to meet Bridgnorth's needs. An alternative site proposal at Stanmore Garden Village (BRD032) is located within the Green Belt. Chapter 13 of the National Planning Policy Framework (NPPF) is clear on the purpose and importance of Green Belt. Para 136 and 137 of the NPPF indicates Green Belt boundaries should be only be altered where exceptional circumstances are fully evidenced and justified through Local Plans and before concluding exceptional circumstances exist, all other reasonable options for meeting identified needs for development should be fully examined. Concerned the Green Belt Assessment and Review undertaken to inform the draft Shropshire Local Plan underestimates the contribution that the sites around Stanmore make to Green Belt purposes (see Appendix 2 of the representation).</p> <p>-BRD030 is consistent with the NPPF with regard to transport. It benefits from direct access onto an A road (the draft Masterplan and highways work undertaken demonstrates three access points, 2 onto the A458). Highway work undertaken for the site indicates the local highway network is capable of accommodating the level of traffic associated with -BRD030 and queuing/delays can be further mitigated, if required, by minor and deliverable improvements.</p> <p>-Consider BRD030 to be a sustainable location with good access to services and facilities and the town centre. Work undertaken by the site promoter demonstrates a pedestrian footbridge is achievable within public highway over the A458, linking BRD030 to Bridgnorth. BRD030 would include high quality pedestrian and cycle connections to and through the site and safe and suitable access for all. Conversely, consider the alternative site BRD032 to be inaccessible from existing health/education provision and the town centre as existing routes are longer and not appropriate or reasonable due to narrow footpaths and gradients and proposals for links through the ancient woodland on the Hermitage are contract to the NPPF (para 175c) - no exceptional circumstances have been demonstrated or suitable compensation strategy proposed. This would place greater reliance on private car use for access to day to day facilities, including education. Agree BRD030 provides greater opportunities to make localised improvements to the surrounding network to ensure development is integrated into the existing built up area of Bridgnorth than BRD032.</p> <p>-BRD030 has been informed by a heritage assessment, which confirms less than substantial harm, at the lower end of the spectrum to two Grade II Listed Buildings and Historic England have not objected to the proposal. Conversely, Historic England consider BRD032 would result in substantial harm to a Scheduled Monument (SM). Agree with Historic England (further information provided in Appendix 3 of this representation). Historic England are the statutory advisor on the historic environment and their views given substantial weight. The NPPF also indicates SM's should be considered as designated heritage assets of the highest significance. Endorse conclusion that BRD030 represents the less risk to heritage assets than BRD032.</p> <p>-BRD030 is supported by a Preliminary Ecological Assessment which confirms the site does not contain any statutory natural environmental designations. The site is in 2 SSSI impact risk zones, but the report confirms this can be managed through design, layout and construction of development. Conversely BRD032 lies immediately adjacent to ancient woodland on Hermitage Ridge. Have significant concerns about the 15m buffer proposed by the site promoter (Government guidance suggests this is the minimum buffer and Woodland Trust guidance suggests a 50m minimum buffer, this has not been considered by the site promoter and as such is considered undeliverable whilst achieving proposed levels of development). Query how a development free buffer can be achieved when pedestrian links through the woodland are proposed. Also consider proposed pedestrian links through the ancient woodland (via a boardwalk) would undoubtedly cause deterioration of the species and habitats within this valued ancient woodland and do not consider any exceptional circumstances exist (para 175c of the NPPF). There also appears little assessment of the impact of this level of new housing close to ancient woodland, this can result in harm as a result of increased use for recreation, invasion by non-native plant species (introduced into private gardens) and impacts from an increase in domesticated pets (e.g. cats). It appears inevitable that such a development would result in the loss of deterioration of the ancient woodland. Endorse conclusion that BRD030 represents the less risk to ecology assets than BRD032.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0609	B029 Cont'd				S3.1 Bridgnorth (BRD030)
A0609	B030	N/A	Noted. In identifying proposed site allocations a proportionate and robust site assessment process has been undertaken, which included consideration of ecological issues.	No	S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0609	B030 Cont'd						<p>BRD030 is considered to be consistent with the aims and objectives of the NPPF in terms of landscape and sensitivity. Generally support conclusion BRD030 and BRD032 are broadly neutral on this matter. However, the assessment concludes BRD030 is more sensitive to employment, but would note that the site is located adjacent to the SAMDev employment allocation, which once developed will alter the current landscape and change the baseline. Additionally, although a development of this scale will be visible from several locations within the surrounding area (particularly employment aspect) the illustrative masterplan, informed by analysis of landscape and visual issues, demonstrates development can be sensitively integrated and respect and enhance the surrounding landscape. Mitigation measures are also proposed to reduce potential effects. With regard to the Landscape and Visual Sensitivity Appendix, agree the offset between BRD030 and Oldbury Conservation Area mean the sensitivity of the landscape character areas containing the site may be reduced. Also agree that occupiers of listed buildings do not have enhanced visual sensitivity and there is not extensive visibility of the site from land to the south-west. Further comments provided in Appendix 4 of this representation.</p> <p>-The masterplan for BRD030 demonstrates how the site could be developed to avoid areas of flood risk, which are associated with Tiddle Brook which runs along the western/southern boundary of the site. Also consider it likely that the current flood mapping over-estimates these areas, based on site visits and landowner knowledge. Do not disagree with the conclusions of the option assessment.</p> <p>-The assessment identifies and considers a number of public protection matters regarding BRD030 and concludes that can be easily managed and mitigated through design and layout. The illustrative masterplan demonstrates that this is the case without affecting the ability to deliver the requirements set out in draft Policy S3. Regarding poultry units, earliest phases of BRD030 are some distance from the site subject to a Planning Application for poultry units, if this is granted, this could be considered/dealt with through technical assessment and consideration against draft Policy DP18. With regard to the livestock market relocation site, note this allocation itself includes substantial landscaping.</p> <p>-BRD030 promoters fully support provision of affordable housing and propose to comply with the affordable housing requirements of draft Policy DP3. Noted promoters of BRD032 propose provision of 30% affordable housing however references to 'key worker' and 'local employment' mean it is unclear whether this all meets the definition of affordable housing and no viability assessment has been prepared for the site to demonstrate this is viable.</p> <p>-Confirm BRD030 would deliver all necessary requirements relating to energy efficiency on site.</p> <p>-Support Council's comments regarding the opportunity BRD030 presents for Bridgnorth regarding employment provision. BRD030 would build on existing employment allocations and provide a concentration of employment floorspace well related to the strategic road network and resident population. Employment offer would be difference from that at the existing Stanmore Industrial Estate which is based around engineering and advanced manufacturing. The two areas could be complementary.</p> <p>-Endorse the Council's conclusion that BRD030 is the most appropriate located to deliver a mixed-use allocation to meet the needs of Bridgnorth and its wider hinterland.</p> <p>-BRD030 is not subject to technical or environmental constraints which would prevent its delivery. It will protect the Green Belt from development and is well related to existing services and facilities within Bridgnorth (it can also significantly improve connectivity and provide on-site services and facilities to meet needs of existing and future residents).</p> <p>-Support conclusion to propose to allocate part of BRD030 for development and identify the remainder as a potential future growth area.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0609	B030 Cont'd				S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0661	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	No	No	No	<p>Consider the decision to undertake Regulation 19 consultation on the draft Shropshire Local Plan fails the test of soundness and is not consistent with legal requirements (including the duty to cooperate and Gunning Principles) as:</p> <p>A.The Planning Inspectorate Procedure Guide for Local Plan Examinations (PINS Guide) makes clear Plans should identify and provide policies to address all matters which need to be planned for (paying careful attention to deliverability and viability) and all necessary matters should be addressed as far as possible and not deferred to a future update/Inspector relied on to address them. However the Regulation 19 draft of the Shropshire Local Plan explicitly acknowledges all necessary information has not been provided in the document bundle before community consultation (Statements of Common Ground with relevant bodies and at least 10 further items, including strategic assessments, justifications, and plans should be included in the SLP evidence base). It is not possible for communities to make informed comment on required information that has not been made available.</p> <p>B.The Regulation 19 draft of the Shropshire Local Plan has not been positively prepared to achieve sustainable development as: 1.A Local Housing Need Assessment has not been carried out for the Bridgnorth Place Plan Area. A Housing Need Assessment produced in 2006 and extrapolated forward concluded 15,168 dwellings would be needed compared to the 16,200 proposed by the draft Local Plan at the time. This has not been reflected in the Regulation 19 draft of the Shropshire Local Plan. 2.Statements of Common Ground have not been agreed with other Local Authorities under the Duty to Cooperate. No evidence to indicate other Local Authorities have completed their own housing need assessments. A decision was made to accept 1,500 dwellings from the Association of Black Country Authorities (ABCA), however this has not been justified, ABCA does not adjoin Shropshire and this need may be more appropriately met in Telford and Wrekin. No evidence has been provided of agreements regarding financial contributions to meet additional infrastructure costs of these 1,500 dwellings. 3.No justification is provided for the housing requirement exceeding housing need by a 19%.</p> <p>C.The Regulation 19 draft of the Shropshire Local Plan is not justified as the most appropriate strategy as: 1.It does not demonstrate all reasonable alternatives have been considered (The 2020 Bridgnorth Plan submitted during Regulation 18 consultations demonstrates a reasonable alternative but no evidence this community-led plan has been reflected) and the viable option to convey existing business premises to residential should also be considered, this would be more sustainable particularly given the impact of the Covid-19 pandemic. Sufficient proportionate credible evidence has not been provided and some documents are missing. There is a fixation on a garden village by a national housebuilder, but this is not the only option or right for the town. 2.Tasley Garden Village (BRD030) was preferred over the alternative site at Stanmore Garden Village as it is not located in the Green Belt, so had to be considered a viable alternative. This sounds rational but Green Belt is intended to stop urban sprawl from the West Midlands, yet BRD030 represents urban sprawl between Bridgnorth and Much Wenlock on high-quality agricultural land the wrong side of the A458. As such it cannot be considered a reasonable alternative. 3.Proposals cannot be justified when at least 10 evidence base documents including strategic assessments, justifications, and plans have not been provided. 4.Requested engagement with the community has not occurred during this or previous Regulation 18 consultations (no community meetings, even virtual ones). 5.The SAMDev Plan for Bridgnorth evidences little employment land delivery over the previous plan period. No credible evidence is provided as to how the proposed new supply will be delivered set against existing allocations. Employment land is noticeably absent from the Viability Assessment undertaken to inform the draft Shropshire Local Plan.</p> <p>D.The Regulation 19 draft of the Shropshire Local Plan is not effective because it is most likely not deliverable as: 1.Levels of housing and employment proposed in the Bridgnorth Place Plan Area appear well in excess of previous delivery levels. No evidence is provided to identify market capacity to absorb proposed levels of development. It is also unclear whether employment keeps pace with housing. 2.No evidence is provided that a 'Garden Village' approach is appropriate for the area. The Viability Assessment undertaken to inform the draft Shropshire Local Plan looks at both BRD030 and the alternative site Stanmore Garden Village as potential 'strategic sites' and suggests they may be financially viable, however this is subject to a caveat that the Council is still working up the assessment of the strategic infrastructure and mitigation requirements and as such it represents a best estimate. As such its value is low in the absence of an Infrastructure Plan and Strategic Transport Assessment for the Bridgnorth Place Plan Area.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0661	B001	<ol style="list-style-type: none"> <li>1. Adopt the community-led Bridgnorth Plan into the draft Shropshire Local Plan in lieu of unilaterally imposing a Garden Village model in the Bridgnorth area.</li> <li>2. Provide all the information requested by Bridgnorth Plan Steering Group in its Regulation 19 submissions.</li> <li>3. Fully engage with the community.</li> <li>4. Provide informative guidance on the draft Shropshire Local Plan, with a variety of realistic examples, to enable people to make an informed response to it.</li> <li>5. Improve usability of the Consultation Forms, and extend the Regulation 18 Form to allow space for ideas, opinions, and suggestions not necessarily tied to an existing policy/site/map in the SLP.</li> <li>6. Extend the consultation response summary for the last Regulation 18 consultation to include details of changes resulting from responses received during a consultation, and improve its usability by using a larger font size.</li> <li>7. Do not take on Black Country (ABCA) housing needs. All areas, including Shropshire should look first toward utilising empty office space instead.</li> <li>8. Remove or reduce Shropshire Councils policy of uplifting central government's housing requirement by 19%.</li> <li>9. If a Garden Village is required a realistic position could be the Charlton / Overly areas to the East of Shrewsbury as there are direct and excellent road links (A5) to Shrewsbury and the M54 to Telford and beyond to the West Midlands. The railway line is very close, and a new park and ride railway station would bring easy access to Shrewsbury, Telford and the West Midlands.</li> </ol>	<p>Shropshire Council considers that a proportionate and robust evidence base has been prepared to inform the draft Shropshire Local Plan. It is acknowledged that this evidence base is substantial and contains technical material, however this is unavoidable, although where possible, non-technical summaries have been provided. During consultation Shropshire Council has provided appropriate links between relevant webpages to aid navigation. Duty to Cooperate Discussions with relevant parties have occurred throughout the Local Plan Review process and Statements of Common Ground will be informed by the content of the draft Shropshire Local Plan subject to Regulation 19 consultation.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the LHN identified for Shropshire, reasons for proposing to exceed this need and for the distribution of development proposed are documented within the explanation to draft Policy SP2. Strategic Approach. Shropshire Council has undertaken a Local Housing Need (LHN) assessment for Shropshire. Once a Local Housing Need assessment for the Local Authority has been undertaken, it is the responsibility of the Local Authority to determine an appropriate and sustainable strategy for the level and distribution of development. There is no specific requirement to undertake a Local Housing Need assessment at a sub-Local Authority level, however through the Shropshire Council-led 'Right Home Right Place' initiative, we are seeking to help identify housing needs in the communities across Shropshire and draft Policy DP1 proposes that these surveys will inform the types of houses delivered within communities. Proposals regarding accepting an element of unmet housing and employment need arising within the Black Country have been informed by proactive cross-boundary discussions, where evidence indicates housing delivery opportunities are constrained. Shropshire Council also considers that the proposed development strategy for Bridgnorth and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and the 'Gunning Principles'. Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Each stage of consultation has been supported by a proportionate evidence base. Following each of these stages of consultation, a summary of the responses received has been prepared and form appendices to the Consultation Statement prepared for the 'Regulation 19' Pre Submission Draft of the Shropshire Local Plan. With regard to proposed allocation BRD030 (Tasley Garden Village), this site was identified as a proposed allocation and subject to consultation within the 'Regulation 18' Plan Preparation stage of the Local Plan Review - specifically, within the Regulation 18: Pre-Submission Draft of the Shropshire Local Plan (August 2020 – September 2020).</p> <p>Views expressed in response to the various 'Regulation 18' stage consultations have been considered, informing subsequent proposals, including those within the 'Regulation 19' Pre-Submission Draft of the Shropshire Local Plan. It is recognised that there will sometimes be local opposition to proposals within 'Regulation 18' consultations. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of 'Regulation 18' consultation, which have not led to a subsequent change to proposals, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is this 'planning balance' which is central to the Plan making process, with consultation responses informing the approach towards what Shropshire Council believes to be a 'sound' Plan when assessed against the requirements of the National Planning Policy Framework and legally compliant (including complying with the duty to cooperate) Plan when assessed against relevant legislation and national policy. Where following consultation it has been proposed to make amendments to proposals in response to the consultation process or indeed any other emerging evidence, this has been documented within relevant subsequent consultation documents (reflecting the iterative process undertaken during the Regulation 18 Plan Preparation stage). Furthermore where such changes relate to proposed allocations (which have been the subject of the most significant level of response) this has also been documented within updated site assessments, provided as part of the evidence and consultation material for relevant stages of consultation. The consultation forms used for the last Regulation 18 and Regulation 19 consultations were based on the Planning Inspectorates 'standard' consultation form and were considered appropriate and allowed opportunities for respondents to make appropriate responses (during the Regulation 18 consultation) and representations (during the Regulation 19 consultation). A guidance note was also prepared to assist those responding to these consultations.</p>	No	S3.1 Bridgnorth

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0661	B001 Cont'd						<p>3.No evidence is provided that Bridgnorth is an attractive location for employment provision, given the towns relatively weak connectivity. 4.No credible evidence is provided demonstrating that sustainable growth, addressing low levels of employment self-containment would result from the planned housing and employment allocations. 5.The Viability Assessment undertaken to inform the draft Shropshire Local Plan indicates Office and Industrial development are generally considered unviable on green and brownfield sites (albeit the viability calculation for "larger industrial" development on greenfield sites is marginal). Office development is likely to be less viable post Covid-19 as more staff work from home regularly for parts of the week.</p> <p>E.The last Regulation 18 consultation, the consultation on the Regulation 19 draft of the Shropshire Local Plan and the Regulation 19 draft of the Shropshire Local Plan fail to meet the test for legal compliance (including the duty to cooperate) in regard to the 'Gunning Principles' for consultation which are enshrined in law and Shropshire Councils Statement of Community Involvement (SCI) which states preparation of the Shropshire Local Plan "should be community-led and iterative between residents and itself as the LPA." Specifically: 1.The Regulation 18 and 19 drafts of the Shropshire Local Plan and associated document bundle were vast (upwards of 10,000 pages) of technically nuanced information containing thousands of links, some broken, to an untold number of further pages. Residents complained adequate guidance on navigating this material was not provided and it was not easily interpretable to allow informed responses, as required by Gunning Principles. Virtual roadshows were not undertaken to help communities better understand content and navigation of the bundle. 2.Contrary to strong advice from central government, the Regulation 18 Consultation on the Pre-Submission Draft of the Shropshire Local Plan was not presented to the community. This lack of presentation will have dissuaded many from responding. 3.Whilst a 'how to get involved' webpage was provided, there are issues with the consultation forms for the consultation on the last Regulation 18 document and the Regulation 19 draft Shropshire Local Plan. Namely: copy protection resulted in changes being discarded, difficulty completing the form dissuaded people from responding. Separate forms were required for comments on each part of policy/paragraph, controlled what people were allowed to comment on, and did not provide space for overall thoughts/opinions/ideas that do not fit into existing policies/paragraphs so people cannot comment on what is not in the draft Plan. Further as evidence documents are missing (see above) information cannot be considered available, accessible and easily interpretable for consultees as required within the Gunning Principles. 4.The promoters of BRD030 carried out a rushed and inadequate consultation on the site. Full details were not initially available, it was poorly promoted and collected unnecessary data. The manner of this consultation likely dissuaded respondents. Responses to this consultation were not reflected within the draft Shropshire Local Plan subject to Regulation 18 consultation. There is no evidence these responses were shared with Shropshire Council. May be contended that realising the inadequacy of this consultation Shropshire Council undertook a further Regulation 18 consultation, this would seem reasonable, but this was decided at Cabinet after the scope of the Regulation 19 consultation has been mis-represented, presumably to legitimise inclusion of BRD030. 6.Material concerns raised by Tasley Parish Council and Tasley residents during the last Regulation 18 consultation have not 'led to a change to the Local Plan' consulted upon at Regulation 19, with the exception of one concern touched upon but not addressed and another stipulation added that did not address the concern. As such these material concerns have either not been conscientiously considered as required by the Gunning Principles or they were deemed irrelevant. Could be contend they were conscientiously considered given the two changes made, but these do not address the concerns raised. 7.The summary of responses to the last Regulation 18 consultation does not evidence whether responses have "led to a change to the Local Plan" and if they have what change or where they could be found. Without this, how could anyone (including Shropshire Council's Cabinet) possibly be confident concerns have been conscientiously considered in the planning balance. Furthermore given this late publication (published on Friday 4th December before Cabinet on Monday 7th December) and large size of the document, how could Cabinet be confident they were full appraised, have scrutinised officer work and have conscientiously considered these responses and be confident they were appropriately responded to, prior to the decision to approve the Regulation 19 Consultation. Furthermore, at Cabinet there was inconsistency in how many questions were allowed to individuals/organisations and the reading of preamble which impacted on understanding of observers and Cabinet. This has led to many feeling the decision was just a tick box/rubber stamping exercise regardless of community views. 8.Gunning Principles mean for a consultation to be considered legal, it is not just about conducting a consultation. Shropshire Council's approach has actually prevented effective consultation and informed decision making. F.The community-led Bridgnorth Plan and community views have been ignored.</p>
A0105	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S4.1 Broseley	Not Specified	No	Not Specified	<p>Consider the proposed development strategy for Broseley is unsound as there are no residential allocations proposed.</p> <p>Consider land situated to the east of Ironbridge Road (site plan appended to representation) would be highly appropriate for residential development as it is brownfield land, situated close to the two sites allocated for employment development, and benefits from good road access. This site could accommodate a range of housing that would complement and enhance nearby employment and should be included in the development boundary for the settlement.</p> <p>The site has been discussed with the Parish Council in the context of the Neighbourhood Plan and they indicated it may have potential for affordable/subsidy housing.</p>

A0105	B001	Include land east of Ironbridge Road (see site location on appendix to representation) within the settlements development boundary.	Noted. A Neighbourhood Plan is being progressed for the Broseley Town Council area. The Neighbourhood Plan will include the strategy for achieving the housing and employment guidelines for the Key Centre of Broseley.	No	S4.1 Broseley

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0358	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S5.1 CST019VAR	Not Specified	No	Not Specified	<p>The proposed housing guideline for Church Stretton fails the 'positively prepared' and 'justified' tests of soundness as:</p> <ul style="list-style-type: none"> <li>-It is a sizeable settlement (4,000 residents) and has a very good range of services and facilities (3rd highest ranking Key Centre within the Hierarchy of Settlement Assessment (HoS) undertaken to inform the draft Shropshire Local Plan), but despite this a low level of growth is proposed for the town (0.46 per annum), despite high demand and significant affordability issues. Whilst the location of the town in the Shropshire Hills AONB is a valid consideration, the Council previously consulted on a higher rate of growth (0.63% per annum), consider this rate is more justified than that now proposed.</li> <li>-Identifying an appropriate level of growth for Church Stretton must consider latest (2018-based) household projections for Shropshire which forecasted 26.9% growth. Reflecting this in Church Stretton would result in demand for 534 more dwellings. In practice, Church Stretton is subject to greater demand than the Shropshire average (evidenced by house prices) so will likely outstrip this. Low levels of development will result in pressure on house prices and reduce affordability, undermining social and economic sustainability.</li> <li>-Church Stretton is in the highest viability area (1 of only 3 settlements) identified within the Viability Study undertaken to inform the draft Shropshire Local Plan. Given the viability issues identified across Shropshire in this study, levels of development in Church Stretton cannot afford to be minimised.</li> </ul> <p>Furthermore, the draft Shropshire Local Plan does not identify where future housing development will be situated to achieve the proposed guideline, relying on windfall and the remaining so far undelivered saved SAMDev allocation CSTR019. No new allocations are proposed (despite two potential sites being identified during earlier stages of consultation, dropped due to public objection) and one existing SAMDev residential allocation is proposed to not be saved. Past high demand means most windfall sites have long since been developed and the remainder will struggle to comply with proposed environmental policies. As such, consider the town's housing requirements fails the 'positively prepared', 'justified' and 'effective' tests of soundness.</p> <p>Also consider the existing employment allocation proposed to be saved, is subject to access issues and without changes is undeliverable, failing the 'effective' test of soundness. The draft Shropshire Local Plan has an opportunity to address this.</p> <p>Draft Policy S5.1 requires development proposal to recognise the importance of conserving and where possible enhancing the special qualities of the Shropshire Hills AONB... with "the highest and most sensitive design standards". Concur that well designed development on appropriate sites can provide the necessary balance, providing for the town's undisputed development needs whilst protecting and enhancing the AONB. However, this is best achieved by allocating a site large enough to deliver landscape enhancements for the town.</p> <p>Site CST019VAR would provide a suitable site to help meet housing needs. It has development on three sides and the railway line on its fourth (with mature tree boundaries on three sides); access can be established off Lawley Close (landowner has confirmed willingness to include their roadway to provide access from the south via Lawley Close), unlike as previously assessed via Shrewsbury Road; would fit within existing landscaping (the landscape and visual sensitivity assessment undertaken to inform the draft Shropshire Local Plan identifies the parcel north of the railway line (containing CST019VAR) as having the lowest sensitivity, with no designated features or key views); provide enhanced planting to screen the town; protect and enhance biodiversity; flood risk can be accommodated (illustrative layout plans appended to representation); and adjoins and could provide access to employment allocation ELR078. CST019VAR achieves a 'Good' rating within the Sustainability Appraisal assessment. Further details including aerials on CST019VAR provided within the representation and its appendices. The site is considered viable and deliverable.</p> <p>The Policies Map for Church Stretton does not include recent developments within it, including dwellings north (on planning consent 18/01258/OUT) and south (at Lawley Close) of CST019VAR. Nor does it include the existing employment allocation. These are serious omissions and should be corrected.</p>
A0400	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S5	Yes	No	Yes	<p>During the Local Plan Review, Shropshire Council has failed to recognise that Church Stretton Place Plan Area is within the Shropshire Hills AONB and properly apply appropriate AONB and National Planning Policy Framework (NPPF) obligations. As:</p> <ul style="list-style-type: none"> <li>-No assessment of local AONB/Church Stretton housing need has occurred.</li> <li>-The Sustainability Appraisal (SA) fails to include AONB specific matters.</li> <li>-Major sites were prioritised and smaller sites screened out in Church Stretton.</li> <li>-No exceptional circumstances were published until August 2020 and they are weak.</li> </ul> <p>The Windfall Allowance proposed for Church Stretton is some 121 homes (of a total residential guideline of some 200 homes). The allowance is arbitrary, results from a flawed process (failures above) and no assessment of local (AONB or Church Stretton) housing need has been attempted. Justification for housing is limited and relates to provision/retention of services whilst the SA indicates they will reduce in the long term. Shropshire Council considers settlement numbers are definitive targets, to be met or exceeded (see draft Policy SP7 which applies weight to these guidelines and failure to meet them). Such a 'target driven' approach demonstrably drives the wrong behaviour in the Shropshire Hills AONB and is likely to mean support for major development.</p> <p>Development numbers/proposals should be landscape led, respond to clear local need, demonstrate 'great weight' is given to conserving and enhancing the local environment and demonstrate that the exceptional circumstances tests have been met and are deliverable (without breaching national policy). This has not occurred.</p> <p>Shropshire Council can demonstrate a five year housing land supply (6.42 years against the housing requirement and 8 years against Governments Standard Methodology) so Church Stretton's windfall target is not sound, given it is to contribute to wider need.</p>

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0415	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S5.1	Yes	No	Yes	<p>The draft Shropshire Local Plan is unsound as it is not based on robust or credible evidence. Specifically, no evidence is provided to support the proposed windfall allowance for Church Stretton and no evidence is provided that this allowance is deliverable in accordance with draft Policy S5.1. This is required in para 70 of the National Planning Policy Framework (NPPF).</p> <p>The proposed windfall allowance is the second highest of the 11 proposed Key Centres (as documented in Appendix 5 of the draft Shropshire Local Plan).</p> <p>It appears the allowance has been arrived at by simply transferring the capacity of a former allocated site to be deleted to windfall.</p> <p>Any allowance and consideration of its deliverability must consider known constraints (topology, flood plan and unique status entirely within the AONB with its associated constraints and objectives).</p> <p>In recent years the visual dominance of landscape and tree cover in the town is increasingly being replaced by build development, including significant amounts of garden infill. This is an issue recognised within various parts of the draft Shropshire Local Plan (such as draft Policy SP1 and para 5.86 of the proposed explanation to draft Policy S5.1) and the AONB Management Plan (recognised as an important consideration within draft Policy DP24 of the draft Shropshire Local Plan). Para 70 of the NPPF identifies a need to consider whether inappropriate development of residential gardens should be resisted where it would harm the local area.</p> <p>The AONB Management Plan also prioritises managing negative impacts resulting from change and development particularly in the Stretton Valley and considers the physical capacity for development in Church Stretton may be more limited than elsewhere and it is important that the sensitivities of the AOBA are fully considered. NPPF and National Planning Practice Guidance (NPPG) echo this and recognise necessary protection may limit development/ability to meet objectively assessed need.</p> <p>Regretful an assessment of affordable housing need has not occurred to inform potential provision of rural exception and cross-subsidy sites (inevitably located outside the development boundary) which could contribute to achieving the guideline (if exceptional circumstances such as compelling evidence of need is justified).</p> <p>Note choice to use the Annex 2 of the NPPF definition of major development, although this appears contrary to footnotes 55 and 70 of the NPPF which state decision makers decide on what is major development.</p>
A0415	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Policy Map Inset S5	Yes	No	Yes	<p>The development boundary/inset map illustrating it are important as it defines the area considered countryside. Draft Inset Map S5 fails to include around 100 existing dwellings at Lawley Close, Willow Meadow, Leasowes Close and Street Meadow. It is inaccurate to include these within the open countryside and renders them subject to different policies.</p>
A0415	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 5.85	Yes	No	Yes	<p>Para 5.85 of the proposed explanation to draft Policy S5.1 sets out the special qualities of the Church Stretton area. Failure to mention Caer Caradoc hillfort amongst scheduled monuments is a gross error, especially given its iconic status/historic interest.</p>
A0526	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP1, S5.1	Not Specified	No	Not Specified	<p>The Local Plan Review is unsound as it does not deliver the stated objectives of this policy in this settlement and fails to deliver any new allocations for housing development. Instead, it relies on a just two sites which has been saved from the previous SAMDev consideration, but two that have not been delivered in the last 8 years. Other SAMDev sites which were previously included at the expense of site CST028 have all failed to deliver any housing for the settlement and have been withdrawn. The upshot is that the last significant planning permission that was granted in this Key settlement of Church Stretton was granted in 2008 renewed in 2011 at Lawley Close. Given that none of the SAMDev sites have delivered any measure of housing and no new housing site allocations are proposed in this review, which takes in a plan period up to 2038, the Development Plan will have failed to meet the housing needs of the settlement and the area that it serves in terms of housing allocations for more than 28 years. The only housing that has been delivered are windfalls and housing delivered by extant consents granted before and prior to SAMDev.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0415	B001	A summary of the evidence demonstrating that the proposed windfall allowance for Church Stretton is realistically achievable should be included in the draft Shropshire Local Plan. A revised windfall allowance should be provided for Church Stretton.	Shropshire Council considers that the proposed development strategy for Church Stretton and the existing commitments (including the existing allocations) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities, including its location within the Shropshire Hills AONB. With regard to demand for affordable housing, Shropshire Council would highlight that there are currently 88 households on the HomePoint housing waiting list which have identified a first preference to live in Church Stretton, of which 78 have indicated at least one local connection to the town (a breakdown of the bedroom number requirements for these is as follows: 37 x 1 bed; 26 x 2 bed; 14 x 3 bed; and 1 x 4 bed). We would also note that Church Stretton Town Council have recently undertaken a housing survey for Church Stretton town, which was supported by Shropshire Council.	No	S5.1 Church Stretton
A0415	B002	Update the draft development boundary for Church Stretton.	Noted. Shropshire Council considers that the proposed development boundary for Church Stretton is appropriate. Generally we exclude affordable housing exception sites such as those referenced from development boundaries.	No	S5.1 Church Stretton
A0415	B003	Relevant sentence of para 5.85 should be amended to read There are Scheduled Monuments at Nover's Hill to the north, Caer Caradoc to the north-east and Brockhurst to the south.	Noted. Para 5.85 of the proposed explanation to draft Policy S5.1 is providing general context for Church Stretton rather than seeking to listing all assets and/or constraints the exist. The two Scheduled Monuments identified are simply the two closest to the built form of the town. No change proposed.	No	S5.1 Church Stretton
A0526	B002	Include the SLAA Site CST028 for a housing allocation in the LPR delivering the many public benefits it will bring. It can also facilitate access to the "long term potential" CST033 and 034 sites, thereby unlocking their development potential and provide a more cost-effective alternative access to the 14/01173/OUT site, thereby facilitating its delivery.	Shropshire Council considers that the proposed development strategy for Church Stretton and the existing commitments (including the existing allocations) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities, including its location within the Shropshire Hills AONB.	No	S5.1 Church Stretton

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0555	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S5.1	Yes	No	Yes	<p>Object to the proposed residential guideline for Church Stretton, which includes a reliance on delivering 121 dwellings as windfall development (this has increased by 70 dwellings following the removal of a previously proposed allocation). No justification/evidence is given for the increased windfall allowance. As such, consider the higher windfall estimate of 121 is not achievable/not achievable without breaching National Planning Policy Framework (NPPF) guidance on development limitations in an AONB. Therefore the plan is unsound.</p> <p>Consider proposals to accommodate dwellings previously proposed to be accommodated on proposed allocation as windfall is contrary to a previous approach, by which these dwellings were deleted from the proposed guideline.</p> <p>Settlement residential guidelines are in effect targets (clear in draft Policy SP7). As such, the proposed residential guideline for Church Stretton needs to be fully justified by proportionate evidence and capable of delivery without breaching national policy. No calculation of local housing need for Church Stretton has occurred (implying the guideline is intended to meet wider needs/growth objectives contrary to national policy and guidance). Therefore essential tests of soundness are not met.</p> <p>The windfall allowance for the town is undeliverable because it exceeds a reasonable expectation of the capacity of small scale Brownfield development within the development boundary. Consider total capacity of such sites is 62 dwellings (22 permitted, 30 on brownfield sites and 10 on garden infill sites), well short of 121 dwellings. In effect, achieving the residential guideline for Church Stretton relies on possible exception sites under draft policies DP4 and DP7. Such sites are likely to require major development within the AONB. A residential guideline in the AONB is unsatisfactory if it implicitly relies on major development. Para 5.145 of the explanation for draft Policy S10.4 states major development requires evidence of exceptional circumstances and this necessitates provision of planned development to meet community needs. This equally applies to Church Stretton. Emphasis on planned development should apply throughout the draft Shropshire Local Plan (subject to evidence of need), there should not be reliance on unknown/unplanned sites.</p> <p>Para 2 of draft Policy S5.1 states the 200 dwellings in Church Stretton contribute towards strategic growth objectives in the south of the County. Strategic growth is not a need originating in the AONB. As Church Stretton is located in the AONB this is inconsistent with the general thrust of paras 11 and 172 of the NPPF (emphasises preservation and enhancement of natural beauty within an AONB), principles reiterated in National Planning Practice Guidance (NPPG).</p> <p>General assumption that Church Stretton needs affordable homes, but no assessment (consistent with NPPG principles) of the need/supply/potential sites has occurred. Consider brownfield sites are unlikely to make a significant contribution towards affordable housing, so potential for exception sites should be considered. Proposed reduction to the settlement guideline would not inhibit this calculated need being met (this possibility is identified in para 3 of draft Policy S5.1 and such considerations are recognised in para 4 of draft Policy SP7).</p>
A0659	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S5.1	Yes	No	Yes	<p>The housing guideline for Church Stretton is too high. There is no justification for the increase windfall number. We consider that the higher windfall estimate of 121 is not achievable or not achievable without breaching NPPF guidance on the development limitations within an AONB. Therefore the plan is UNSOUND because it is not deliverable and not consistent with national policy. The decision to re-allocate the 70 dwellings from the Snatchfield site allocation to windfall is contrary to previous practice and precedent when the numbers of houses for sites that have been de-allocated or removed have been deleted from the overall target for Church Stretton. The guideline for housing in Church Stretton was reduced from 250 in the 2018 preferred sites consultation to 200 in the Regulation 18 draft plan partly because of the deletion of the Gaerstone site (CSTO20) from the draft version of the local plan and partly because the school housing site (CSTRO18) in the current SAMDev Local Plan was de-allocated when the developer withdrew the planning applications. Because the figure of 200 for Church Stretton is a target it should be fully justified by proportionate evidence and capable of delivery without breaching national policy. These essential tests of soundness are not met. The Windfall section of the target, 121 dwellings, is undeliverable because it exceeds a reasonable expectation from small scale Brownfield development within the residential boundary. In effect the target relies on possible exception sites under policies DP4 and DP7, Affordable Housing Exception and Cross-subsidy schemes, none of which are identified. Policy S5.1 states that the 200 dwellings will enable Church Stretton to contribute towards strategic growth objectives in the south of the County. As a town in the AONB this is inconsistent with the general thrust of NPPF. There is a general assumption that there is a need in Church Stretton for more affordable homes, but there has been no assessment of the need for and supply of affordable housing.</p>
A0660	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S5.1 CST021	Yes	No	Yes	<p>Once we established the planning permissions or prior approval applications that have now expired and therefore are no longer capable of being implemented, we can confirm that 62 dwellings is an accurate figure of what could feasibly be delivered in the near future. In short, we accept that the windfall allowance for Church Stretton over the period of the emerging Local Plan is 121 dwellings. Following 20/00956/FUL being granted, the most up-to-date windfall requirement for Church Stretton at the time of writing is 119 dwellings.</p> <p>Question whether there is compelling evidence that past windfall delivery rates will continue at the same rate into the future, particularly in the context of a landscape sensitive settlement such as Church Stretton where speculative or redevelopment opportunities become increasingly scarce as previous sites are built out. The same point applies to cross-subsidy and exception development, i.e. suitable and available sites still need to exist in order for new housing to be delivered from this source of supply.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0555	B001	<p>Para 2 of draft Policy S5.1 should be revised to state "the role of Church Stretton as a Key Centre will be maintained by providing 130 dwellings and around 2ha of employment development. New housing and employment development should respond to identified local needs within the AONB and conserve and enhance local landscape and settlement character."</p> <p>The residential guideline for Church Stretton should be reduced to 130 dwellings (of which 51 will be delivered through windfall development) - within both relevant draft policies and Appendix 5 of the draft Shropshire Local Plan.</p> <p>A robust estimate of the requirement for affordable housing exception sites outside the proposed development boundary (undertaken by Shropshire Council and the Town Council with assistance sought from the relevant housing associations) and the ability to provide them within the proposed Plan period is required (para 3 of draft Policy S5.1).</p>	<p>Shropshire Council considers that the proposed development strategy for Church Stretton and the existing commitments (including the existing allocations) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities, including its location within the Shropshire Hills AONB.</p> <p>Shropshire Council would highlight that there are currently 88 households on the HomePoint housing waiting list which have identified a first preference to live in Church Stretton, of which 78 have indicated at least one local connection to the town (a breakdown of the bedroom number requirements for these is as follows: 37 x 1 bed; 26 x 2 bed; 14 x 3 bed; and 1 x 4 bed).</p> <p>We would note that those currently on the housing waiting list, alongside the suggested capacity of brownfield sites (40 dwellings) provided by the respondent totals 118 dwellings, comparable to the proposed windfall allowance.</p> <p>We would also note that Church Stretton Town Council have recently undertaken a housing survey for Church Stretton town, which was supported by Shropshire Council.</p>	No	S5.1 Church Stretton
A0659	B001	<p>Changes required to make the Plan for Church Stretton SOUND.</p> <p>a) S5.1, paragraph 2 should be revised as follows: The role of Church Stretton as a Key Centre will be maintained by providing 130 dwellings and around 2ha of employment development. New housing and employment development should respond to identified local needs within the AONB and conserve and enhance local landscape and settlement character.</p> <p>b) The Residential Guidelines and Supply for Church Stretton (Appendix 5) should be revised as follows: Residential Development: 130 Completions 2017-2019: 17 Sites with permission 31.3.19: 62 Windfall: 51</p> <p>c) A robust estimate of the requirement for exception site land outside the boundary for affordable homes and the ability to provide them within the timescale of the plan is required (S5.1.3). We suggest this needs survey should be carried out by Shropshire Council and the Town Council with assistance sought from the relevant housing associations.</p>	<p>Shropshire Council considers that the proposed development strategy for Church Stretton and the existing commitments (including the existing allocations) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities, including its location within the Shropshire Hills AONB.</p> <p>With regard to demand for affordable housing, Shropshire Council would highlight that there are currently 88 households on the HomePoint housing waiting list which have identified a first preference to live in Church Stretton, of which 78 have indicated at least one local connection to the town (a breakdown of the bedroom number requirements for these is as follows: 37 x 1 bed; 26 x 2 bed; 14 x 3 bed; and 1 x 4 bed).</p> <p>We would also note that Church Stretton Town Council have recently undertaken a housing survey for Church Stretton town, which was supported by Shropshire Council.</p>	No	S5.1 Church Stretton
A0660	B003	<p>Suggested modification to Policy S5.1 – Re-introduce the allocation of land at Snatchfield Farm (CST021) for up to 70 dwellings.</p>	<p>Shropshire Council considers that the proposed development strategy for Church Stretton and the existing commitments (including the existing allocations) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities, including its location within the Shropshire Hills AONB.</p>	No	S5.1 Church Stretton

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0504	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S5.1 CST020	Not Specified	No	Not Specified	CST020 has been amended with access from the top of Sandford avenue avoiding access direct from Sandford Avenue which would have had an adverse environmental impact in relation to the avenue of Lime trees that run along the avenue which are all long standing TPO trees. The house types suggested are smaller affordable and open market units. The proposals in the Local Plan do not deliver the strategy and are objected to as being unsound because they make no provision for any new housing sites and only include two sites which failed to deliver any housing in the last plan period. It is contended that the lack of any housing allocations proposed for this Key settlement make the LP review outcomes unsound.
A0660	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S5.1	Yes	No	Yes	Our clients' site – otherwise known as Snatchfield Farm – was unexpectedly removed from the draft Local Plan following the end of the Regulation 18 consultation stage. We therefore no longer support the council's approach to the delivery of housing in Church Stretton. The new strategy will not meet the area's objectively assessed needs and is not backed up by proportionate evidence to demonstrate that sufficient supply will actually emerge or be delivered from the sources suggested (windfall, cross-subsidy). New housing development has to occur at Church Stretton itself if its vitality, self-sufficiency and role as a Key Centre are to be maintained into the future. We are of the firm belief that our clients' land at Snatchfield Farm is the only logical location outside the development boundary to build new housing to serve the needs of the town without an underlying constraint preventing the site from being developed. If alternative sites did come forward elsewhere, such as within the development boundary, then these are still only likely to deliver the 48 new windfall homes in our view. Once these sites have been exhausted, we can see no evidence within the draft Local Plan or its supporting evidence base to suggest that a further 71 dwellings will be delivered from cross-subsidy and exception development. We respectfully submit that the Town Council and local opposition group are wrong to suggest that sites CST019VAR, CST035, or the school playing fields are reasonable and, perhaps more importantly, developable and deliverable alternatives when such an assertion ignores the constraints and problems affecting these parcels of land.
A0573	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S5.1 CST033 & CST034	Yes	No	Yes	CST033/034 is a well located and fully deliverable site with an area of 3.65 ha. We believe this site is suitably placed to provide development in the Key Centre of Church Stretton towards the target of 250 dwellings by 2038, being situated with an established access to the A49 (requiring improvements) and adjoining recently developed land. Due to the removal of an existing large site from the Local Plan, there is a shortfall in the housing supply for 2021-2038 in Church Stretton.
A0368	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S5.1 CST035	Not Specified	No	Not Specified	There is high demand for housing and an affordability problem in Church Stretton. The Local Plan proposes an unjustifiably low level of growth of only 200 dwellings over 22 years, equivalent to only 9 dwellings per annum over 2016-2038. The latest 2018-based household projections from the Office of National Statistics forecast a 26.9% growth in households in Shropshire over the plan period. If this county-wide growth rate is reflected in Church Stretton, it will result in demand for 534 more dwellings over the plan period. The Local Plan Delivery and Viability Study (July 2020) confirms that 23 of the 25 typologies are viable, meaning that the Local Plan needs more allocations in the South Higher area. Our client's land – CST035 – has a Good SA score and its concerns over flooding and ecological impacts have been addressed in the detailed reports under 18/01258/OUT, which was approved in Feb 2021. This site can accommodate around 20 dwellings.
A0660	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Not specified	Yes	No	Yes	The Stage 3 site assessment of our clients' land – identified as site reference CST021 in Appendix F – highlights some technical considerations that would need to be addressed should a planning application be brought forward, such as ecology/botanical, heritage and tree matters, but raises no site-specific or unassailable issues with regard to its deliverability. The reasons for excluding it as a housing allocation are vague and consist of the Council's recent stance that the residential guideline for Church Stretton can be achieved through a combination of windfall sites within the town's development boundary and through the delivery of exception and cross-subsidy affordable housing sites. We believe it is noteworthy that all other sites that are discounted in Appendix F are considered to have site-specific constraints or issues that prevent them from being allocated in the Local Plan, as set out in the 'Reasoning' box for each site. Put another way, the Council has not been able to identify such issues with our clients' land but nevertheless reaches the conclusion that it should not be allocated. It is submitted that this is a flawed assessment and that insufficient reasoning has been given to reject the land at Snatchfield Farm. While we do not believe that modifications necessarily need to be made to the Sustainability Appraisal as the overall conclusions regarding our site are not inherently negative, we believe it is important for the Council to consider our representation in advance of the Local Plan being submitted for examination or, ultimately, for the examining Inspector to understand our position. Finally, we consider that an identified need exists to allocate major residential development within the Shropshire Hills Area of Outstanding Natural Beauty and that bringing forward such development on land at Snatchfield Farm will be in the interest of existing and future residents, particularly in providing a meaningful contribution towards the local area's market and affordable housing needs and helping to sustain the vitality of Church Stretton and its role as an important Key Centre. The scope for developing outside of this designated area is limited in our opinion due to the town's location at the heart of the AONB remote from other settlements of any reasonable size, i.e. other settlements are too distant to directly meet the needs of Church Stretton and its hinterland.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0504	B001	It is contended this site put forward for consideration for inclusion in the SLAA and LPR at Regulation 18 stage, as modified, is entirely acceptable in landscape terms and compatible with the existing pattern of development in the town as well as assisting the long-term sustainability and deliverability for the town as a whole. The CST020 site is in single family ownership, is not in the Green Belt, has no known legal or physical constraints or impediments and can be delivered quickly in accordance with the requirements of the NPPF and by a Local Shropshire developer. Its allocation for a housing development will contribute to the soundness of the plan which will provide much sought after lower and mid-range second stage housing for the settlement.	Shropshire Council considers that the proposed development strategy for Church Stretton and the existing commitments (including the existing allocations) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities, including its location within the Shropshire Hills AONB.	No	S5.1 Church Stretton (CST020)
A0660	B002	Our clients' land, which was previously allocated for 70 dwellings, will still be essential if the Council truly wishes to meet its target of delivering 200 dwellings at the town. Put simply, we urge the Council to re-allocate the land at Snatchfield Farm for residential development before the draft Local Plan is submitted for examination.	Shropshire Council considers that the proposed development strategy for Church Stretton and the existing commitments (including the existing allocations) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities, including its location within the Shropshire Hills AONB.	No	S5.1 Church Stretton (CST021)
A0573	B001	Due to the amendments by Shropshire County Council to the key centre of Church Stretton, there is now a shortfall in the housing supply 2021-2038. On this basis we are proposing the allocation of CST033 (Watling Street North (eastern field)) & CST034 (Watling Street North (southern field)).	Shropshire Council considers that the proposed development strategy for Church Stretton and the existing commitments (including the existing allocations) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities, including its location within the Shropshire Hills AONB.	No	S5.1 Church Stretton (CST033 & CST034)
A0368	B001	To make the Plan 'sound' requires an increase in the housing requirement for Church Stretton and the allocation of land to deliver housing in a manner that protects and enhances the AONB. Policy S5.1 and the Church Stretton Policies Map should therefore be amended to include our client's land (reference CST035) with the development boundary of the settlement and allocated for residential development for up to 20 dwellings. The inclusion of this land would result in a greater level of certainty that the aims and objectives of the Plan, including the strategic growth objectives in this area of the County, will be realised over the Plan period.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Church Stretton and the existing commitments (including the existing allocations) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities, including its location within the Shropshire Hills AONB.	No	S5.1 Church Stretton (CST035)
A0660	B001	Correction of the SA score for CST021	Shropshire Council considers that the proposed development strategy for Church Stretton and the existing commitments (including the existing allocations) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities, including its location within the Shropshire Hills AONB.	No	S5.1 Church Stretton CST021

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0533	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8, SP9 and S5	Yes	No	Yes	Disagree with the Council's intentions in Policy S5 not to identify any "Hubs" or "Clusters" in the Church Stretton Place Plan. In particular, in the case of All Stretton, given the history of blanket opposition from the community to any new development, it is highly unlikely that the Parish Council will put forward All Stretton as a potential Cluster settlement.
A0351	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S7.1	Not Specified	No	Not Specified	<p>Draft Policy S7.1 is unsound as:</p> <ul style="list-style-type: none"> <li>-The Viability Study (VS) undertaken to inform the draft Shropshire Local Plan (extracts provided in representation) concludes development in much of the county is not viable. Therefore, more housing should be delivered on viable types of site/viable locations, in order for the Plan to meet the 'justified' and 'effective' tests of soundness. This includes small greenfield sites in the more viable south of the county. Within the VS, Craven Arms is identified as being: located in the more viable south zone and between two settlements in the higher south zone; as having 3/4 bedroom house prices similar/higher than growth settlements such as Shrewsbury, Bridgnorth, Shifnal and Albrighton; and having house prices substantially higher than in the north.</li> <li>-Latest housing projections show a significant need for housing (there is a difference of some 24,241 household between the 2014-based (which inform the standard method) and 2018-based household projections (data provided in representation)), exacerbated by Covid-19 which has increased demand in Shropshire a trend which is likely to continue due to home working reducing commuting considerations. To ensure that the Plan is 'positively prepared' and 'justified', more sites are needed to ensure sufficient delivery to meet the County's housing needs and avoid affordability problems.</li> <li>-Craven Arms is a Key Centre located on the A49 strategic corridor, identified as a focus for growth in the strategic approach of the draft Shropshire Local Plan. As such it is well placed to help meet needs, as reflected in the 500 dwelling guideline proposed for the settlement, which is supported. However, to reflect the conclusions on the VS, a 25% non-delivery allowance should be applied across Shropshire, meaning sufficient land for 625 dwellings should be identified in Craven Arms.</li> <li>-Development in Craven Arms is reliant on SAMDev Plan allocations that have failed to be delivered (CRAV003 &amp; CRAV009 for 235 dwellings and CRAV024 for 25 dwellings do not yet have Planning Permission and the VS concluded that large greenfield sites such as CRAV003 &amp; CRAV009 are unviable) and there is no convincing evidence that they will be. In contrast CRAV002, has been built out and CRAV004 &amp; CRAV010 are currently being developed (other SAMDev Plan allocations). To meet the 'effective' test of soundness, additional allocations are needed.</li> </ul> <p>As such sites CRA023, CRA024 and CRA025 should be included as proposed allocations/within the proposed development boundary. These sites have been promoted throughout the Local Plan Review (see appendix to this representation); would represent natural extensions to the town/recent developments; are not subject to environmental constraints and offer opportunities for enhancement; are located on the west of the town which has a lower landscape and visual sensitivity than the east; could deliver a mix of sizes, types (including self-build and custom-build), tenures and affordability of housing; could be accessed off Watling Street - identified within the 'Craven Arms Development Brief' (appendix to this representation) which identifies the potential for an upgrade of Watling Street as part of a comprehensive scheme, including a new crossing of the railway line (community priority identified in the Place Plan), but could also deliver improvements to Watling Street including provision of a footway for pedestrians and appropriate road widening outside of it; and are highly deliverable (small sites consistent with the VS).</p>
A0362	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S7.1 ELR055 and LS2005_00002	Not Specified	Yes	Not Specified	<p>Support draft Policy S7.1, draft Policy Map Inset S7 'Craven Arms' and saved employment land allocations ELR055 and LS2005_00002.</p> <p>Also support identification of a 14ha employment land guideline (including saved allocations ELR055 and LS2005_00002) to meet the needs of the town and its rural hinterland; realising the objectives of the Shropshire Economic Growth Strategy; and may also assist in enabling delivery of significant transport infrastructure improvements to the settlement, as detailed within criterion 5 of draft Policy S7.1 and its proposed explanation (committed to exploring potential funding mechanisms to deliver this infrastructure).</p> <p>Draft Policy S7.1 and its supporting text recognise the strategic role of Craven Arms as a primary growth point and focus for development in south Shropshire.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0533	B001	<p>Shropshire Council should remove the part of Policy S5 concerning Hubs and Clusters and instead rely on professional assessments of the sustainability and suitability of All Stretton to determine its future status in the hierarchy of settlements within Policy SP2. An Inspector from a previous appeal ref: 3149461, agreed that All Stretton's development status should clearly be altered from "open countryside" to a named "cluster" settlement. This would enable Shropshire Council to support appropriate housing development in accordance with Policy SP8 on our client's land at Starr Lane. Our client's land will enable the development of a mixture of house types which reflects the requirements of policy to support different categories of housing need in Shropshire. We therefore ask the Inspector to consider the status of All Stretton and our client's land for allocation.</p>	<p>Shropshire Council considers that the approach to identifying proposed Community Hubs, through a Hierarchy of Settlements Assessment, is appropriate. It is also considered that the methodology applied within the Hierarchy of Settlements Assessment, is appropriate and has been applied consistently across Shropshire. As such the list of proposed Community Hubs is considered appropriate. Shropshire Council also considers that the approach used to identify Community Clusters, by which communities can opt-in or opt-out is appropriate and reflects the intended purpose of such Community Clusters - settlements with aspirations to maintain or enhance their sustainability.</p>	No	S5.2 Church Stretton Hubs
A0351	B001	<p>A larger number of smaller sites in higher value parts of the County should be included in the Plan as proposed allocations. Sites CRA023, CRA024 and CRA025 should either be identified as proposed allocations or included in an extended development boundary for Craven Arms.</p>	<p>The adopted Local Plan in the Site Allocations and Management of Development Plan (SAMDev Plan, 2015) set out an ambitious development strategy for Craven Arms. This strategy is proposed to be transferred in its entirety into the draft Shropshire Local Plan with the addition of a windfall allowance for 90 dwellings for further small sale housing development within the town in the period to 2038. This ambitious strategy will strengthen the role and function of Craven Arms as a Key Centre and a principal 'service' settlement for the adjoining rural areas particularly within the Shropshire Area of Outstanding Natural Beauty along the Clun/Kemp valley (west) and Corvedale (east). The strategy also reflects the location of Craven Arms on the strategic corridor of the A49 Trunk Road through south Shropshire and the proposed function of the town as a key growth point supporting the historic Market Town of Ludlow (south) and the historic Key Centre of Church Stretton. This also reflects the more commercial history and character of the centre and eastern areas of the town and Craven Arms situation as an important station stop on the Shrewsbury – Cardiff rail line at the junction with the Heart of Wales line serving mid-Wales. The town is also the business location for a key local employer (Euro Quality Lambs) that is looking to locate and expand from the centre of the town to a new bespoke site in the north of Craven Arms to create the Newington Food Park which is expected to drive the development of further employment sites allocated in the north of the town including the Phase 2 expansion of the successful Craven Arms Business Park. Shropshire Council and its partners, including Craven Arms Town Council, consider the proposed strategic approach to the level and distribution of development in Shropshire to be appropriate, effective, sustainable and deliverable including the allocations in the draft Local plan that have been saved from the currently adopted SAMDev Plan. These saved allocations in Craven Arms almost entirely comprise larger greenfield sites for which there should be a ready market and reasonable levels of viability to deliver the proposed development. It is recognised that the more commercial character of Craven Arms means that the market in this town is not as strong and resilient as the other historic towns on Ludlow and Church Stretton located on the a49 in south Shropshire. For the time being, the Brexit decision and the Covid-19 downturn have affected the delivery of the Craven Arms strategy. The strategy is also affected by further strategic infrastructure requirements to deliver a new strategic highway junction on the A49, a strategic highway link between the north and the west of the town, bridging the Shrewsbury-Cardiff rail line and serving the employment allocations to the north and the housing allocations in the west along the urban boundary on Watling Street between the town to the east and the open countryside and AONB to the west. The delivery of this strategic infrastructure will facilitate the closure of the key level crossing (at Long Lane) and avoid the proposed automation of this crossing that is expected to cause traffic delays and queues onto the A49 affecting the safe operation of this strategic Trunk Road that also serves commercial traffic crossing and serving Mid and North Wales. The Council is supporting a partnership of landowners and developers in Craven Arms to deliver this strategic infrastructure in order to help trigger the delivery of the development strategy for Craven Arms set out in the draft Shropshire Local Plan. Shropshire Council with the Craven Arms Town Council have considered whether to make further land allocations in the draft Local plan to help deliver the strategy by enhancing the viability of the overall scheme as suggested in the Craven Arms Development Brief submitted by a respondent to the draft Local Plan. The preferred strategy agreed with Craven Arms Town Council is to make a small windfall allowance for available for smaller developers to balance the larger development opportunities in the town and to help broaden the range, choice and affordability of new housing in the town up to 2038. It is also recognised that Watling Street forms a strong and defensible boundary to western areas of the town and separate the urban areas from the countryside and AONB that encloses the north and west of Craven Arms. Consequently, sites CRA015, CRA023, CRA024 and CRA025 are not considered to be necessary or sustainable additions to the development strategy for Craven Arms. These sites would also affect the setting of the settlements and heritage assets in the adjoining Sibdon Carwood Parish in a location previously only considered for development to deliver an exceptional affordable housing scheme referenced by the respondent proposing sites CRA015. Shropshire Council therefore consider the strategy for Craven Arms to be appropriate, effective, sustainable and deliverable without further allocations including sites CRA015, CRA023, CRA024 and CRA025.</p>	No	S7.1 Craven Arms
A0362	B003	N/A	<p>The support is welcomed for Policy S7.1 in the draft Shropshire Local Plan setting out the settlement strategy for Craven Arms and recognising the significance of the proposed employment allocations to the role of the town and the opportunity to secure new employment in this important Key Centre and recognising the contribution this will make to the economic growth of south Shropshire.</p>	No	S7.1 Craven Arms

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0569	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S7.1 Craven Arms	Yes	No	Yes	CRA015 is a fully deliverable site with an area of 0.87 ha. We believe this site is suitably placed to provide development in the Key Centre of Craven Arms to contribute towards the target of 500 dwellings by 2038, being situated with good access to Watling Street and situated between recently developed land to the north and established developed land to the south creating a natural infill site. The land has the benefit of being fairly flat and not situated within a flood zone, unlike much of the flat land surrounding Craven Arms which has a high flood risk
A0106	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S8.1 Ellesmere	Not Specified	No	Not Specified	Proposed allocation ELL005 & ELL008 is accepted as being a positive benefit in terms of housing delivery. Understand a Planning Application has been submitted for 107 dwellings and is currently being considered. It has the support of the Town Council and the local community and will be a positive benefit to the town. However consider the draft Shropshire Local Plan relies too heavily on the mixed development allocation ELL003a & ELL003b within the adopted Local Plan, which has been slow to deliver much-needed housing. Given concerns about delivery of this site and in order to create a wider range of development opportunities consider there is clear potential for a further site to be allocated for residential development. It is considered that all or part of the land off Elson Road (see site plans appended to this representation) has the potential to be included as either an allocation or held in reserve for release during the Plan period should a shortfall in delivery occur. The remainder of the site would be available for allocation within the next Local Plan Review and has the potential to deliver a strategic link road (illustrated on plans appended to the representation). This site has been identified as having long term potential, with particular regard to providing a strategic link road, and has been pursued in a phased development in this way, in association with adjoining landowners.
A0347	B053	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Ellesmere	No	No	Not Specified	Ellesmere is underlain by complex sequence of superficial deposits comprising clays, silts, sands and gravels. This is in turn underlain by the Permo-Triassic Sandstone. The sandstone is of regional strategic importance in terms of water supply and more local scale water requirements and baseflow to watercourses can arise from the superficial deposits. The depth to groundwater across the area is highly variable with shallow groundwater systems present within the shallow drift deposits. Therefore consideration of appropriate development design (including dewatering of foundations, surface water drainage and pollution prevention measures etc) will be required
A0402	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S8.1	Yes	Yes	Yes	Consider draft Policy S8.1 should include reference to the future sustainable reuse of Ellesmere Yard. This will provide some degree of clarity in respect of future aspirations for long term sustainable re-use of Ellesmere Yard, thereby planning positively for such reuse and improving the plans effectiveness. Ellesmere yard (outside the proposed development boundary and not proposed for allocation) contains a historically significant cluster of Canalside buildings. However, buildings are no longer appropriate to fulfil the canal's operational needs and a long term sustainable use must be provided to safeguard them. At an early stage of exploring opportunities for reuse, although one option is a hub for the community and a site for tourism and leisure uses (improved connectivity with the town, including a new pedestrian bridge crossing of the canal, has been raised in recent consultations and is seen as key to bringing forward a successful scheme for this area). Note reuse of these buildings may be considered appropriate in the context of other more general draft Policies and as such allocation is not thought to be necessary or appropriate. However, a more general reference to aspirations for reuse/regeneration of this area and improved connectivity with the town in draft Policy S8.1 would be both appropriate and beneficial, providing greater clarity in respect of future aspirations for regeneration of this important area and enable it to be considered in the context of wider development proposals in the area including future connectivity. Consider the site clearly provides the opportunity to secure significant benefits to the town and its community. The Canal & River Trust is likely to continue to require an operational yard at Ellesmere and is examining how this can be met.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0569	B001	CRA015 should be considered for residential allocation	<p>The adopted Local Plan in the Site Allocations and Management of Development Plan (SAMDev Plan, 2015) set out an ambitious development strategy for Craven Arms. This strategy is proposed to be transferred in its entirety into the draft Shropshire Local Plan with the addition of a windfall allowance for 90 dwellings for further small sale housing development within the town in the period to 2038. This ambitious strategy will strengthen the role and function of Craven Arms as a Key Centre and a principal 'service' settlement for the adjoining rural areas particularly within the Shropshire Area of Outstanding Natural Beauty along the Clun/Kemp valley (west) and Corvedale (east). The strategy also reflects the location of Craven Arms on the strategic corridor of the A49 Trunk Road through south Shropshire and the proposed function of the town as a key growth point supporting the historic Market Town of Ludlow (south) and the historic Key Centre of Church Stretton. This also reflects the more commercial history and character of the centre and eastern areas of the town and Craven Arms situation as an important station stop on the Shrewsbury – Cardiff rail line at the junction with the Heart of Wales line serving mid-Wales. The town is also the business location for a key local employer (Euro Quality Lambs) that is looking to locate and expand from the centre of the town to a new bespoke site in the north of Craven Arms to create the Newington Food Park which is expected to drive the development of further employment sites allocated in the north of the town including the Phase 2 expansion of the successful Craven Arms Business Park. Shropshire Council and its partners, including Craven Arms Town Council, consider the proposed strategic approach to the level and distribution of development in Shropshire to be appropriate, effective, sustainable and deliverable including the allocations in the draft Local plan that have been saved from the currently adopted SAMDev Plan. These saved allocations in Craven Arms almost entirely comprise larger greenfield sites for which there should be a ready market and reasonable levels of viability to deliver the proposed development. It is recognised that the more commercial character of Craven Arms means that the market in this town is not as strong and resilient as the other historic towns on Ludlow and Church Stretton located on the a49 in south Shropshire. For the time being, the Brexit decision and the Covid-19 downturn have affected the delivery of the Craven Arms strategy. The strategy is also affected by further strategic infrastructure requirements to deliver a new strategic highway junction on the A49, a strategic highway link between the north and the west of the town, bridging the Shrewsbury-Cardiff rail line and serving the employment allocations to the north and the housing allocations in the west along the urban boundary on Watling Street between the town to the east and the open countryside and AONB to the west. The delivery of this strategic infrastructure will facilitate the closure of the key level crossing (at Long Lane) and avoid the proposed automation of this crossing that is expected to cause traffic delays and queues onto the A49 affecting the safe operation of this strategic Trunk Road that also serves commercial traffic crossing and serving Mid and North Wales. The Council is supporting a partnership of landowners and developers in Craven Arms to deliver this strategic infrastructure in order to help trigger the delivery of the development strategy for Craven Arms set out in the draft Shropshire Local Plan. Shropshire Council with the Craven Arms Town Council have considered whether to make further land allocations in the draft Local plan to help deliver the strategy by enhancing the viability of the overall scheme as suggested in the Craven Arms Development Brief submitted by a respondent to the draft Local Plan. The preferred strategy agreed with Craven Arms Town Council is to make a small windfall allowance for available for smaller developers to balance the larger development opportunities in the town and to help broaden the range, choice and affordability of new housing in the town up to 2038. It is also recognised that Watling Street forms a strong and defensible boundary to western areas of the town and separate the urban areas from the countryside and AONB that encloses the north and west of Craven Arms. Consequently, sites CRA015, CRA023, CRA024 and CRA025 are not considered to be necessary or sustainable additions to the development strategy for Craven Arms. These sites would also affect the setting of the settlements and heritage assets in the adjoining Sibdon Carwood Parish in a location previously only considered for development to deliver an exceptional affordable housing scheme referenced by the respondent proposing sites CRA015. Shropshire Council therefore consider the strategy for Craven Arms to be appropriate, effective, sustainable and deliverable without further allocations including sites CRA015, CRA023, CRA024 and CRA025.</p>	No	S7.1 Craven Arms (CRA015)
A0106	B001	Include all or part of land north of Elson Road (see site location on appendix to representation) as either an allocation or a reserve site should a shortfall in delivery occur.	<p>Shropshire Council considers that the proposed development strategy for Ellesmere and the existing commitments (including the existing allocations), proposed allocation and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities. In identifying proposed site allocations a proportionate and robust site assessment process has been undertaken, including consideration of this promoted site.</p>	No	S8.1 Ellesmere
A0347	B053	n/a	Noted. The draft Shropshire Local Plan should be read as a whole. Draft Policy DP19 comprehensively addresses the issue of water infrastructure and water quality.	No	S8.1 Ellesmere
A0402	B005	Include a new sentence in draft Policy S8.1 referring to aspirations to secure the long term sustainable reuse of Ellesmere Yard and its improved connectivity to the town.	<p>Noted. Given the location and nature of the Ellesmere Yard site, it is considered appropriate that the site remains outside the proposed development boundary for Ellesmere and as such 'countryside' for planning policy purposes. It is considered that draft Policy SP10 which is the starting point for managing development in the countryside provide an appropriate framework for managing sites such as the Ellesmere Yard.</p>	No	S8.1 Ellesmere

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0037	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S8.1 Ellesmere Policy Map	Not Specified	Not Specified	Not Specified	The Policies Map for Ellesmere is bizarre, excluding half of a current development site subject to Planning Permissions 14/00822/OUT / 15/05415/REM. This site and other existing development sites should be incorporated into the towns development boundary.
A0037	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S8.1 Ellesmere	Not Specified	No	Not Specified	The proposed development strategy for Ellesmere, to delivery 800 dwellings through proposed allocations and windfall development, fails the 'effective' test of soundness. This is because: -The windfall allowance cannot be accommodated within the development boundary, which is closely drawn around the town. Affordable exception sites will not deliver a significant contribution as they have not in the past and proposed policies are more restrictive than current ones. -It is considered that the proposed allocations are unlikely to deliver 170 dwellings by the end of the plan period. They are also concentrated in the south-west of Ellesmere, reducing choice and competition. This location has also been the focus for allocations since 1986 and timescales/delivery rates on all sites have been slow. Site ELL007 should be allocated for development to increase housing land supply in Ellesmere. There are technical solutions to constraints to the access being located in flood zone 2/3 and this was accepted in relation to current allocation ELL003. This site would have capacity for circa 22 dwellings, be delivered quickly, deliver multiple benefits (documented in representation), and help achieve the proposed windfall allowance for Ellesmere. Proposed site guidelines provided within the representation.
A0588	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Ellesmere ELL008 ELL033	Yes	Yes	Yes	Response seeks to support allocation of sites ELL008 and ELL033. The site lies within a highly sustainable location on the built-up edge of Ellesmere and sits comfortably within the existing pattern of development. It forms part of the previous planning permission 14/04047/OUT - for mixed use development. Various reports were provided in support at the time of application and are provided as appendices to the response for reference: 02 Heritage Assessment; 03 LVIA; 04 Archaeological Report;05 Transport Assessment; 06 Tree Report;07 Protected Species Report;08 Flood Risk Assessment The land is available, viable and deliverable. Site owned by Burbury Investments Ltd who have via Local Plan consultations and the submission of planning applications for development confirmed their intention to develop the site at the earliest opportunity. The site is confirmed as meeting the conditions for being available for development. The site will be made available for development when formally allocated. It is anticipated that the sites will come forward in the 'Short Term' (2020 to 2025) with completion in the 'Medium Term' (2025 to 2030)
A0347	B055	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Dudleston Heath	No	No	Not Specified	For Dudleston Heath to ensure adequate foul drainage and water supply. The protection of existing private supplies is also of importance as there are a number across these villages. In addition, a number of these locations, groundwater levels are known to be shallow and discharge of foul effluent to ground may not be appropriate.
A0414	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DUD006	Not Specified	No	Not Specified	Site DUDH006 is in large part a greenfield site outside the previous village development boundary and its allocation should not be saved as its inclusion is unsound: -It is not justified as it is based on inaccurate assumptions/information about ground/soil conditions (impermeable clay rather than highly permeable geology) and drainage (failure to correctly assess flood risk or consider sustainable drainage solutions. The site floods and acts as a floor water storage area - Environment Agency Map appended to the representation) which go to the heart of its suitability. -It is not effective as a result of the inaccuracies to constraints identified and the development numbers are not deliverable (due to the implications of these constraints - particularly drainage, habitats, highways and presence of sewers). -It is inconsistent with national flood policy and draft Policies DP21 and DP22 of the draft Shropshire Local Plan.
A0666	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S8.1 Ellesmere Inset Maps	Not Specified	Not Specified	Not Specified	Ref Appendix 1 Ellesmere Place Plan Area Site Assessment Dec 2020 I would like to bring to your attention that on page 16, row 5 "Amenity Space", DHG011 plot boundary is within 480 metres (distance being about 400 metres to the centre of the village). Also ref same site under "Highway Comments", page 137, the existing drive entrance, which is contained in the site, is not on double white lines or on a bend. There is a short area of existing kerbing in front of Pentre Heylin Cottage and there is sufficient space both sides of cottage for a new path which would link to existing paths to the North and South.
A0016	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S8.2 Ellesmere DUD006	Yes	Yes	Yes	It is not expected that the proposed development would have an adverse impact upon our sewerage assets. The site is crossed by a public sewer which may restrict development density for the site.
A0104	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8 & SP9	Not Specified	No	Not Specified	Consider Welshampton should be a Community Hub or a Community Cluster within the draft Shropshire Local Plan. The settlement is currently identified as countryside and no provision for housing to support the local community has been made, this is considered unsound. Welshampton was previously a Community Cluster and is located on the A495 road in close proximity to the town of Ellesmere. Welshampton has a number of local amenities including a primary school, parish hall, hairdressers, garage and public house. A significant amount of housing relies on these amenities. Site promoted within the village, which is considered a natural extension to an existing site with Planning Permission (ref no: 14/01603/OUT & 17/03500/REM - plan attached to representation) with an appropriate density and appearance of development.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0037	B002	All existing developments should be included within the development boundary (in particular 14/00822/OUT / 15/05415/REM).	Noted. It is not proposed that development boundaries will reflect the extent of all extant Planning Permissions around a town. Rather, the purpose of a development boundary is to define a logical area, based on the built form of a settlement and any proposed allocations, within which certain policies apply. With regard to Planning Permission 14/00822/OUT / 15/05415/REM, when defining the development boundary for Ellesmere it was considered that significant progress had been made on the northern element of the scheme to the extent that it was considered to constitute part of the built form of the settlement, this was not the case for the southern element of the site. This of course does not impact on the ability of Planning Permission 14/00822/OUT / 15/05415/REM from being implemented. Shropshire Council considers that the proposed development boundary for Ellesmere is appropriate.	No	S8.1 Ellesmere
A0037	B003	The development boundary should be enlarged to include the highly deliverable site ELL007, which would represent an additional phase of an ongoing development. This site would have capacity for circa 22 dwellings, be delivered quickly and help achieve the proposed windfall allowance for Ellesmere. Proposed site guidelines provided within the representation.	Shropshire Council considers that the proposed development strategy for Ellesmere and the existing commitments (including the existing allocations), proposed allocation and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities. In identifying proposed site allocations a proportionate and robust site assessment process has been undertaken, including consideration of this promoted site.	No	S8.1 Ellesmere
A0588	B001	n/a	Noted.	No	S8.1 Ellesmere (ELL008 & ELL033)
A0347	B055	n/a	Noted. The draft Shropshire Local Plan should be read as a whole. Draft Policy DP19 comprehensively addresses the issue of water infrastructure and water quality.	No	S8.2 Dudleston Heath
A0414	B001	DUDH006 should be either excluded or its suitability re-assessed to consider issues of flooding/drainage, sustainable drainage solutions and development capacity.	Shropshire Council considers that the proposed development strategy for Dudleston Heath and the existing commitments (including the existing allocation), and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities. Proposed saved SAMDev Allocations have previously been the subject of assessment and examination.	No	S8.2 Dudleston Heath
A0666	B001	Ref Appendix 1 Ellesmere Place Plan Area Site Assessment Dec 2020 I would like to bring to your attention that on page 16, row 5 "Amenity Space", DHG011 plot boundary is within 480 metres (distance being about 400 metres to the centre of the village). Also ref same site under "Highway Comments", page 137, the existing drive entrance, which is contained in the site, is not on double white lines or on a bend. There is a short area of existing kerbing in front of Pentre Heylin Cottage and there is sufficient space both sides of cottage for a new path which would link to existing paths to the North and South.	Noted. Shropshire Council considers that the Sustainability Appraisal of the draft Shropshire Local Plan and site assessment process which informs proposed allocations is proportionate and robust.	No	S8.2 Dudleston Heath
A0016	B001	n/a	Noted.	No	S8.2 Dudleston Heath (DUD006)
A0104	B001	Welshampton should be a Hub or Cluster in the Local Plan.	Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Welshampton. As such it is considered appropriate that Welshampton is not identified as a Community Hub. Community Clusters are settlements with aspirations to maintain or enhance their sustainability. Welshampton has not been identified as such a settlement through the Local Plan Review process. Draft Policy SP10 identifies the circumstances within which residential development in the countryside can occur, including within Welshampton.	No	S8.2 Welshampton

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0037	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S8.2 Cockshutt	Not Specified	No	Not Specified	Consider demotion of Cockshutt from Community Hub to Community Cluster fails the 'justified' test of soundness as no justification is provided in the Plan for the proposed change in status. The only change in the village's circumstances is the closure of its convenience store which has reduced its score in the Council's Hierarchy of Settlements' (HoS) from 50 points in 2017 to 46 points in 2020. The threshold for a Community Hub is deemed by the Council to be 48 points, but no justification is given for this arbitrary cut-off figure. The HoS (August 2020) is inaccurate, as many villages have lost services as a result of Covid 19. As such it no longer provides a sound justification for deciding the status of a settlement. The HoS (August 2020) is also inaccurate in relation to Cockshutt, as the settlement has amenity green space. The HoS approach is deeply flawed because it ignores the size of rural settlements, using it only within the screening of settlements. Cockshutt has a population much larger than some proposed Community Hubs. Suggest specific points applied for settlement size (1 per 100 people) to account for settlement size. Cockshutt has previously been recognised as a suitable settlement for development and removing Community Hub status will lead to a loss of services and facilities, contrary to aspirations of improving sustainability. Cockshutt has reliably delivered housing as demonstrated within the Council's latest Five Year Housing Land Supply Statement (base date 31st March 2019).
A0347	B054	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Cockshutt	No	No	Not Specified	For Cockshutt, Tetchill, and Welsh Frankton there is a need to ensure adequate foul drainage and water supply. The protection of existing private supplies is also of importance as there are a number across these villages. In addition, a number of these locations, groundwater levels are known to be shallow and discharge of foul effluent to ground may not be appropriate.
A0369	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S8.3	Not Specified	Yes	Not Specified	The designation of Elson as a Community Cluster settlement in Policy S8.3 and as identified on Inset S8, is strongly supported as this is seen as vital to ensuring the settlement's long-term future. The settlement of Elson lies in close proximity to, and has a strong relationship with, the key service centre of Ellesmere. It is also the location of significant employment premises. Elson therefore provides a highly sustainable location for the provision of additional residential development.
A0347	B057	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Welsh Frankton	No	No	Not Specified	Need to ensure adequate foul drainage and water supply. The protection of existing private supplies is also of importance as there are a number across these villages. In addition, a number of these locations, groundwater levels are known to be shallow and discharge of foul effluent to ground may not be appropriate.
A0042	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S9.1 Highley	Not Specified	No	Not Specified	Support proposed allocation of site HNN016 for around 100 dwellings. This is a highly sustainable and deliverable site (see Appendix to representation). Concerned the development guideline for Highley is too low and is therefore 'not justified', 'not positively prepared' and 'not consistent with national policy'. There is no evidence to justify the proposed housing guideline, equivalent to 11.4 dwellings per annum. Past delivery rates equate to 14 dwellings per annum (2006-2019, including a period impacted by an economic crash) and given Government objectives to significantly boost housing supply as per para 59 of the National Planning Policy Framework (NPPF), Highley should be aiming for higher rates than have previously been delivered. Applying 2018-based sub-national household projections (SNH) which indicate growth of 22.7% over the proposed Local Plan period, to Highley's dwellings, 332 dwellings would be required.
A0061	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S9.1 Development Strategy: Highley Key Centre	Not Specified	Not Specified	Not Specified	1. Consultation has not been carried out to agreed procedures. The Parish Council were consulted only once and there has been no public involvement. It is unclear how proposals have been arrived at. At a public meeting in Autumn 2019, only one option for the development of the town was presented. The community should be directly consulted and inform proposals and have requested such meetings on a number of occasions. Incorrect information has been provided. The community acknowledges the need to accommodate a fair share of housing, but consider there are better options than that proposed. 2. Site HNN014 has twice been subject to refused Planning Applications. A third Planning Application was then granted - consider this was due to its relationship to the proposed allocation at HNN016 (shared access - which is considered to be located on a dangerous bend with chevrons, where numerous accidents have occurred and vehicles have difficulty passing without mounting pavements used by school children) and threat of judicial review. Conditions on this Planning Application require a pedestrian crossing, although no appropriate location has been identified. Occupiers of HNN014 cannot safely get into town without this crossing. 3. Access to proposed allocation HNN016 is inappropriate for the level of development proposed. The site is subject to an Article 4 Direction, made in 2002, which requires Planning Permission to be granted for the erection, construction, maintenance, improvement or alteration of a gate, fence, wall or other means of enclosure. A strip of agricultural land will lie between the site and existing residential dwellings. A central valley through the middle of the site (25-30% of the site) is made-up ground and liable to slip. 4. Consider site HNN010 is a better alternative. It has better access to services and facilities, an appropriate access is available which has been documented by the site promoter, it could achieve a 50 bed care home, new medical centre, approximately 60-70 affordable properties, provide unfettered access/expansion land for the sewage treatment works and provide improvement pedestrian links to the school. Land could be released in phases for development.
A0271	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Introduction (HNN016)	No	No	No	The duty to cooperate has been failed as Shropshire Council has ignored communications, including through a solicitors letter from December 2020 about proposed allocation HNN016. Highley Parish Council resolved not to approve housing development on the eastern side of the ridge running north/south through Highley, which slopes down to the river and is referred to nationally as the Severn Valley. However they would consider development on the western side of the ridge as this would not be visible from the Railway, river or village of Alveley. These views are supported by the local community but the merits of other available sites (namely HNN010 which is considered brownfield land) are ignored to pursue an unsuitable site (HNN016) which is in the Severn Valley and has a dangerous point of access on a bend of the main road. Proposed allocation HNN016 also has an article 4 restricting walls and fences, so how can housing be developed on it? HNN010 is considered a better overall site than HNN016.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0037	B004	Cockshutt should be identified as a Community Hub, with a residential guideline of around 80 dwellings (based on a growth rate of 1% and recognising that it is a sustainable rural settlement which serves as a focus for growth for its surrounding rural hinterland). Site CCT010 should be allocated for 40 dwellings to support delivery of this proposed residential guideline and meet the villages long term growth through a comprehensive well-thought out development. Proposed site guidelines and benefits to the community identified within the representation.	Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cockshutt. As such it is considered appropriate that Cockshutt is not identified as a proposed Community Hub. Identification of Amenity Green Space is primarily informed by the Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Within the draft Shropshire Local Plan, Cockshutt is proposed to be identified as a Community Cluster. Community Clusters consist of individual or groups of small rural settlements of varying function but with aspirations to maintain or enhance their sustainability through modest levels of appropriate development. As such appropriate development is still expected to occur within such settlements. Draft Policy SP9 identifies the forms of residential development that are appropriate within Community Clusters, supported by other relevant draft Policies.	No	S8.3 Cockshutt
A0347	B054	n/a	Noted. The draft Shropshire Local Plan should be read as a whole. Draft Policy DP19 comprehensively addresses the issue of water infrastructure and water quality.	No	S8.3 Cockshutt
A0369	B001	n/a	Noted.	No	S8.3 Elson
A0347	B057	n/a	Noted. The draft Shropshire Local Plan should be read as a whole. Draft Policy DP19 comprehensively addresses the issue of water infrastructure and water quality.	No	S8.3 Welsh Frankton
A0042	B001	Amend the proposed residential development guideline for Highley from 250 to 330 dwellings.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Shropshire Council also considers that the proposed development strategy for Highley and the existing commitments, proposed allocation and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities.	No	S9.1 Highley
A0061	B001	Removed proposed allocation HNN016 and instead allocate site HNN010.	1. Noted. Shropshire Council considers the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement and national legislation. Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. All parties, including Town and Parish Councils and members of local communities, were able to respond to each of these stages of consultation. In identifying proposed site allocations, a comprehensive site assessment process has been undertaken. This considers a range of sites that have been identified in and around Highley and explains the reasoning for proposed allocations. This site assessment process was first published alongside the 'Preferred Sites' Consultation and has since been updated to inform the consultation on the 'Regulation 18: Pre-Submission Draft of the Shropshire Local Plan' and the 'Regulation 19: Pre-Submission Draft of the Shropshire Local Plan'. The most recent iteration of the site assessment process form appendices of the Sustainability Appraisal of the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan. 2. Planning Application 20/00193/FUL on site HNN014 was determined on its own merits, using the current Local Plan as the starting point for the decision making process. The Committee Report for this Planning Application is available on the Shropshire Council Planning Portal. Due to the stage of preparation, the draft Shropshire Local Plan carried no weight in the decision making process for this Planning Application. 3 and 4. Noted. In identifying proposed site allocations, a proportionate and robust site assessment process has been undertaken. This considers a range of sites that have been identified in and around Highley, including site HNN010 and other land in this vicinity, and explains the reasoning for proposed allocations. The site assessment process was informed by comments provided by highway officers and it is not considered that the Article 4 Direction restricts the ability to allocate the land for development or the development of the land for the uses proposed to occur. Draft Policy DP18 addresses circumstances where there is known or high likelihood of ground instability.	No	S9.1 Highley
A0271	B003	Enter into dialogue with Highley Parish Council. Change proposed allocation from HNN016 to HNN010. Accept Highley Parish Council's wish to prevent development on the banks of the River Severn, provided the housing guideline is achieved.	Noted. Shropshire Council considers that the proposed development strategy for Highley and the existing commitments, proposed allocation and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities. In identifying proposed site allocations a proportionate and robust site assessment process has been undertaken, which included consideration of issues such as landscape and visual sensitivity, heritage and highways. Site HNN010 (and promoted variations of this site) was considered as part of this assessment.	No	S9.1 Highley

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0348	B027	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S9.1(i) HNN016	Not Specified	Yes	Not Specified	Welcomes the requirement within the Development Guidelines for site HNN016, that the design and layout of this 100 unit housing site will reflect and respect the site's heritage and heritage assets within the wider area, including Grade II listed Hazelwell's Farm House, and that landscape buffers will be required to create appropriate settings for nearby heritage assets and built form. However, consider that to inform the above the Development Guidelines should also include the requirement for a heritage assessment.
A0412	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	HNN014 and HNN016	No	No	No	Shropshire Council has failed its duty to cooperate and ignored communications including from solicitors.
A0448	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S9.1 Highley, DP18	No	No	No	Public meetings were attended regarding this site and minutes were taken but I have not seen these, and I do not believe that they were recorded. Such meetings were officers paying lip services to the consultation, despite extremely strong local opposition to the site. The site was deemed in 2002 as being unsuitable for fences, hedges and walls. Poor access to the site on a dangerous bend. The mental health of residents will be affected. There are alternative sites which are preferred locally. The consultation has not been fair or transparent. Villagers are considering a judicial review however the council appear to have ignore their letters which shows a lack of respect and muscle flexing.
A0616	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S9.1	Not Specified	No	Not Specified	"New residential development will be delivered through the development of the identified site allocation" – Why are alternative sites not being considered? The identified site does not fit with the character of the village as it is too large and will suffer from access issues due to the main access being located on a corner.
A0616	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S9.1 para 5.124	Not Specified	No	Not Specified	"5.127. It is important that development takes account of known critical infrastructure constraints and requirements, particularly highways which is a known local concern, as identified within the Implementation Plan and Highley Place Plan." – The lack of capacity and access issues at the current medical centre are not mentioned in this document. The Highley Place Plan states it is "the responsibility of the local GP to submit a business case to the CCG" in order to improve the medical centre, if the local GP does not do this (and they are under no obligation) there would be a critical lack of medical infrastructure for the current population let alone an increase of 100 houses.
A0597	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	HNN016 Highley S9.1(i) 5.124- 5.127	Yes	No	Yes	Do not agree with the proposed allocation of HNN016 for 100 dwellings & consider that the allocation of this site is unsound. Whilst supportive of Highley as a Key Centre with new development responding to local needs, there are a number of issues with HNN016 which have not been properly considered or evidence provided to demonstrate how the issues may be overcome. These include: <ul style="list-style-type: none"> <li>• How HNN016 will address the access issues previously highlighted. The site is severely constrained by the limited frontage onto public highway at Bridgnorth Road. Question the site's ability to deliver 100 dwellings and extra care facilities on this site, with very poor access. Do not consider that the width of a conventional priority junction is achievable within the site frontage without the requirement of additional third-party land which will need to be secured &amp; will potentially impact on scheme viability. Stage 3 of the Sustainability Appraisal assumes that access adjacent to the Telephone Exchange but no evidence on whether this is achievable and thus the scheme deliverable. It is not considered that any off-site works will be achievable for the site.</li> <li>• The reasoning put forward for the allocation is that "the site is well related to the built form of the settlement and existing allocated sites ..... would outweigh any harm to the significance of these listed buildings." This conclusion is "woolly" at best and not known to be supported by any information, indicative layout plan or evidence re highway, access &amp; heritage considerations.</li> </ul> Site HNN019 is better located with more potential than the proposed allocation. Whilst it is within an area of potentially high landscape and visual sensitivity, this can be considered during the design phase. A comprehensive Vision Document and indicative layout which provides for Green Infrastructure, public open space, SUDs, and a Local Area for Play has already been submitted (previous representation & pre-application). The site proposals include residential development, medical centre with dedicated parking & extra care facility, dedicated bus layby pull in & parking spaces for Cleve Hill properties to alleviate existing parking issues thus providing for all residents' needs. Although the site is adjacent to the Conservation Area boundary of Cleve Hill, a sensitive design approach can enhance the appearance and character of the Conservation Area, along with betterment in the parking solution.
A0597	B002	Sustainability Appraisal	HNN016 Highley S9.1(i) 5.124- 5.127	Yes	No	Yes	The Sustainability Appraisal fails to mention Grade II listed Hazelwell's Farm House in proximity of the site along with other heritage assets in the near proximity which are referenced in site guidelines. Sustainability Appraisal flawed given that nearby heritage assets have not been taken into consideration when selecting HNN016 for allocation. It is only considered (briefly) at Stage 3 of the SA.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0348	B027	For site HNN016, include a Development Guideline requiring that any Planning Application should be accompanied by a heritage assessment.	A minor modification is proposed to the 3rd paragraph of the draft Site Guidelines for site HNN016 in Schedule 9.1(i) to reflect the need for a heritage assessment, which will inform site design and layout.	Yes	S9.1 Highley
A0412	B001	Accept Highley Parish Council's wish to prevent development on the banks of the River Severn up to 2038, provided the proposed housing guideline is achieved.	Shropshire Council considers that the proposed development strategy for Highley and the existing commitments, proposed allocation and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S9.1 Highley
A0448	B001	Replace site HNN016 with alternative suggested by Mr Unitt (another respondent).	Shropshire Council considers that the proposed development strategy for Highley and the existing commitments, proposed allocation and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S9.1 Highley
A0616	B001	Remove the identified site or reduce its size and include alternative, smaller sites for consideration through the usual planning process. There is no reason not to identify three or four smaller sites rather than one, sprawling large site which does not fit the character of the village.	Shropshire Council considers that the proposed development strategy for Highley and the existing commitments, proposed allocation and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S9.1 Highley
A0616	B002	In order to support the proposed level of development the Shropshire Local Plan must include details of how the required medical infrastructure will be provisioned and will be guaranteed to be in place before development starts. The same applies to highways infrastructure, the road out of the village towards Kinlet is unable to support the current level of traffic and will suffer more issues should 100 houses be added to the village (as witnessed by the most recent repairs lasting around 5 years before the road slips again towards the brook).	It is important to note that the draft Shropshire Local Plan should be read as a whole. Draft Policy DP25 proposes a policy approach to the provision of infrastructure to ensure that the infrastructure necessary to support development is delivered. Furthermore, where appropriate, proposed site guidelines for HNN016 identify some of the key infrastructure requirements and identify some of the further studies which may need to be undertaken at the Planning Application stage to identify infrastructure requirements, to inform any development proposals for the site.	No	S9.1 Highley
A0597	B001	Proposed allocation of HNN016 should be reconsidered and the Sustainability Appraisal undertaken again to reassess the suitability of alternative sites within the village in particular alternative site (HNN019) better fit with Local Plan Review policies & capable of achieving a better mix of residential development on the site & betterment in the relocation of the GP Surgery & provision of an Extra Care facility on the site, without impacting upon the setting of local heritage assets or the local highway network.	Shropshire Council considers that the proposed development strategy for Highley and the existing commitments, proposed allocation and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S9.1 Highley (HNN016)
A0597	B002	Proposed allocation of HNN016 should be reconsidered and the Sustainability Appraisal undertaken again to reassess the suitability of alternative sites within the village in particular alternative site (HNN019) better fit with Local Plan Review policies & capable of achieving a better mix of residential development on the site & betterment in the relocation of the GP Surgery & provision of an Extra Care facility on the site, without impacting upon the setting of local heritage assets or the local highway network.	Shropshire Council considers that the proposed development strategy for Highley and the existing commitments, proposed allocation and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed strategy has had due regard to the settlements specific characteristics, constraints and opportunities. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity. The most recent Sustainability Appraisal undertaken to inform the draft Shropshire Local Plan (December 2020) identifies that the site is within 300m of a listed building and the Conservation Area.	No	S9.1 Highley (HNN016)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0348	B028	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S10.1(i) Ludlow (LUD056 and LUD052)	Not Specified	Yes	Not Specified	<p>Welcome point 2 of the proposed strategy for Ludlow, which seeks to protect, conserve and enhance the significance of Ludlow's heritage assets and protect the setting of this historic town.</p> <p>With regard to proposed allocation LUD056, note that the proposed development guidelines for this site require a Heritage Impact Assessment to respect archaeological interest as this is the former site of the Fishmore Brick and Pipe Works.</p> <p>With regard to proposed allocation LUD052, whilst the requirement within the proposed development guidelines for a Heritage Impact Assessment, considering cumulative impacts on the significance of heritage assets located within Ludlow to the west and also the significance of the scheduled monument at Caynham Camp to the east (including its setting), is welcome, reiterate some of the previous concerns identified. Recommend the proposed development guidelines include a specific requirement for a low-rise form of development to take into account any impact, particularly the longer-term effects of cumulative development, on the setting of Caynham Camp and that Shropshire Council may wish to consider that longer term a Local Development Order for the site may assist in terms of setting out what may be appropriate in relation to permitted development.</p>
A0359	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S10.1	Not Specified	Yes	Not Specified	<p>Support Draft Policy S10.1 and its supporting text as they recognise the strategic role of Ludlow (largest market town in south Shropshire and principal focus for investment and development).</p> <p>Identification of 11ha employment land to meet the needs of the town and its hinterland (including employment land allocation LUD052 and saved employment land allocation ELR058) is supported. This will make a significant and unique contribution to meeting employment growth needs of the town, this area of the County and realising the objectives of the Economic Growth Strategy/draft Ludlow Local Economic Growth Strategy.</p>
A0359	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S10.1(ii) LUD052	Not Specified	Yes	Not Specified	<p>Support draft Policy S10.1(ii), the Ludlow Policy Map Inset and proposed employment allocation LUD052 (it will make a significant and unique contribution to meeting employment growth needs of the town and realising the objectives of the Economic Growth Strategy/draft Ludlow Local Economic Growth Strategy).</p> <p>Note LUD052, together with saved employment allocation ELR058, have been assessed by the Council as being unconstrained, viable and deliverable/developable. Combined these sites are large (8ha), will significantly improve the employment land offer in Ludlow, broaden the range of commercial premises/businesses, and meet employment needs of Ludlow.</p> <p>Support para 5.136 of the explanation to draft Policy S10.1 regarding flexibility for employment uses delivered on proposed allocations, but such flexibility must respect significance and setting... However, as per representation on draft Policy SP13, request maximum flexibility regarding employment generating uses is provided, given uncertainty of the post-Covid marketplace.</p> <p>Aware of Historic England concerns over proposed employment allocation LUD052, as such an initial Heritage Assessment is submitted as an appendix to this representation. This clearly identifies harm to the historic environment resulting from development would be less than substantial and can be mitigated at the detailed design/Planning Application stage through sensitive design and conditions. As such, there are no heritage reasons why the site should not be allocated.</p>
A0529	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP6 and S10	Yes	No	Yes	<p>Ludlow is designated as a Principal Centre in the Local Plan Review where only two housing sites were allocated. As a Principal Centre there should be a broader portfolio of sites allocated by the Council. For the Council to maximise housing delivery, the widest possible range of sites should be required in order to offer the widest possible range of dwellings. In the previous consultations periods, we have suggested the inclusion of our client's land in Ludlow as it provided scope for deliverable housing. It appears that Council did not give sufficient consideration to the benefits of this site to deliver housing. It is unclear why Shropshire Council continue to omit our client's site from the development boundary for Ludlow as it represents logical infilling of the existing frontage of development - the Council have given no explanation as to why.</p>
A0545	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S10	Not Specified	Not Specified	Not Specified	<p>In the Regulation 18 Pre -Submission Draft Shropshire Council stated: "Any further expansion into Ludford Parish is deferred to focus on the delivery of housing within the town." (Schedule 10.1 sub section 5.134 page 204.) Ludford Parish Council wholly supports this view and recorded this in the parish response to the consultation.</p> <p>LPC is concerned that the definitions used by Shropshire Council in the Site Assessment schedules lack sufficient strength and clarity for both the professional and lay reader. Sites that are regularly and repeatedly reviewed have remained in these schedules since the inception of SAMDev. Consequently, these sites could remain vulnerable to challenge as wind fall sites. The protection of Foldgate Lane proved to be completely inadequate at the public enquiry, at great cost to both the local environment and the public purse.</p> <p>LPC request that Shropshire Council states that the designation of "countryside" for the southern approach to the town and areas the east of the A49 will remain in place for the length of this plan (2036) and beyond. By assessing green field sites in this way, and opening up the possibility of a challenge to Shropshire Council's assessment system, the discipline of properly using more difficult brown field sites instead, is an unattractive option for developers.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0348	B028	For site LUD052, recommend proposed development guidelines include a specific requirement for a low-rise form of development to take into account any impact, particularly the longer-term effects of cumulative development, on the setting of Caynham Camp. Shropshire Council may wish to consider that longer term a Local Development Order for the site may assist in terms of setting out what may be appropriate in relation to permitted development.	Shropshire Council welcomes the support for Policy S10.1 recognising that the strategy for the Market Town of Ludlow will provide an opportunity to deliver new housing and employment development to strengthen role and function of the town and to support the rural settlements and communities in the Ludlow Place Plan area. A minor modification is proposed to the 5th paragraph of the draft site guidelines for site LUD052 in Schedule 10.1(ii) to reflect the need for the design of development to pay particular attention to building height, layout and materials.	Yes	S10.1 Ludlow
A0359	B004	N/A	Shropshire Council welcomes the support for Policy S10.1 recognising that the strategy for the Market Town of Ludlow will provide an opportunity to deliver new housing and employment development to strengthen the role and function of this Market Town and to support the rural settlements and communities in the Ludlow Place Plan area.	No	S10.1 Ludlow
A0359	B005	N/A	Shropshire Council welcomes the support for Policy S10.1 recognising that the strategy for the Market Town of Ludlow will provide an opportunity to deliver new housing and employment development to strengthen the role and function of this Market Town and to support the rural settlements and communities in the Ludlow Place Plan area.	No	S10.1 Ludlow
A0529	B001	We would request that our clients land at The Linney is considered for allocation. The site lies in a sustainable location providing easy access to a range of services and facilities. Whilst also providing logical infilling of the existing frontage along The Linney. The site has the potential to help meet housing requirements of older persons accommodation, something which is in high demand in Shropshire. The provision of specialist housing should be given sufficient consideration.	Shropshire Council considers that the proposed development strategy for Ludlow and the existing development commitments with the existing and proposed housing and employment allocations are appropriate, effective, sustainable and deliverable and make a sufficient contribute towards achieving this strategy. In identifying the two proposed, brownfield housing allocations, a comprehensive site assessment process has been undertaken which included the consideration of this other promoted site which has previously been refused for development for reasons including the impact on the heritage assets in the town including the Grade I listed Ludlow Castle. Consequently, the comparative benefits of the proposed allocations when compared to this promoted site and with the significant housing commitments already approved in the town, means that the land at The Linney is not required for development in Ludlow at this point in time.	No	S10.1 Ludlow
A0545	B001	Although it is a requirement of Shropshire Council to include Ludford Parish within the Ludlow Place Plan area, Ludford Parish Council respectfully request that Shropshire Council records and respects the boundary of the parish, in all its documents. The Fishmore Brook forms the northern boundary of Ludford Parish with the Ledwyche Brook as the easterly boundary. Ludford Village lies to the south of the River Teme and lies within the Conservation Area. Ludford Parish Council also requests that: <ul style="list-style-type: none"> <li>• There is a moratorium on the use of extensive, green field sites within Ludford Parish for the length of the plan period (2036.)</li> <li>• Designation of countryside areas to be strengthened and clearly described i.e. all areas to the south Ludford Village to the boundary of the parish, to protect the historic southern entrance to the town; areas to the east of the A49 up to the northern boundary of the parish.</li> </ul>	Ludlow is the principal Market Town and service centre in the south of the County, located on the strategic corridor of the A49 Trunk Road between the Herefordshire border (south) and the Key Centres of Craven Arms and Church Stretton to the north. As the principal Market Town, the draft Local Plan identifies a strategy for Ludlow comprising a development guideline of 1,000 dwellings and 11 hectares of employment development to be delivered through the addition of two new housing allocations both comprising brownfield sites within the town and a new employment allocation LUD052 to extend saved allocation ELR058 to the east of Ludlow on The Sheet, which is a local road through Ludford Parish. The draft Local Plan provides for a development boundary around the Market Town of Ludlow to tightly contain the proposed development of the town and its adjacent employment area. This principally comprises the proposed allocations, an extensive number of committed sites for housing development all located within the town and two larger greenfield sites both granted approval on appeal. These are located at Foldgate lane (south) and Bromfield Road (north) along with the proposed greenfield employment allocations at The Sheet. These greenfield allocations are all contained within the proposed development boundary around Ludlow. Shropshire Council considers this strategy to be appropriate, effective, sustainable and deliverable and that it satisfies the scale of development required in Ludlow and makes a significant contribution to the development needs of the south of the County. There is no apparent need for further land releases for development around Ludlow and the proposed policy framework of the draft Local Plan provides a appropriate level of protection to the countryside in the Parish of Ludford surrounding the Market Town of Ludlow.	No	S10.1 Ludlow

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0118	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S10.2 Burford	Yes	Yes	Yes	<p>Support identification of Burford as a Community Hub. As recognised within para 5.141 of the Draft Shropshire Local Plan, Burford in combination with Tenbury Wells is an important service centre for surrounding communities (Burford could be a Key Centre, if the services and facilities in Tenbury Wells were also taken into account). There are a wide range of existing services and facilities and employment provision in Burford and a wide range of shops and other services in Tenbury Wells. As such Burford is a highly sustainable settlement. For the purposes of the draft Shropshire Local Plan, it is accepted that identifying Burford as a Community Hub is justified.</p> <p>The adopted SAMDev Plan has restricted growth in this locality. As such the allocation of around 190 dwellings at Burford provides an important opportunity to ensure ongoing vitality and viability of its services and facilities and allows the settlement to grow in a manner that is commensurate to its size and importance. Recognise that this is a high guideline compared to other Community Hubs, however this is considered appropriate given the range of services and facilities in Burford and its position in the settlement hierarchy when the full range of services are considered with neighbouring Tenbury Wells.</p> <p>Delivery of new dwellings in Burford through proposed allocations, supplemented with appropriate small-scale windfall residential development within the development boundary (where it is consistent with Community Hub Policy SP7 and other relevant policies), is also supported as a way to ensure the growth assigned to the settlement is delivered.</p> <p>Support proposed allocation of BUR004 for 100 dwellings, including a range of housing with potential for self-build, family housing, age specific/special needs housing and affordable homes. Masterplan for development of the site provided within the representation demonstrating compliance with proposed site guidelines. Capacity of the site is informed by initial technical assessments and consideration of constraints and opportunities (documented within the representation).</p> <p>Fully committed to bringing this site forward for residential development and recognise the important role that it will have in helping to deliver the Council's housing need and the sustainable growth of Burford.</p> <p>Comments on proposed site guidelines for proposed allocation BUR004 are:</p> <ul style="list-style-type: none"> <li>-Dwellings will include an appropriate mix and site capacity have been informed by constraints and will respond to identified issues. This will be further refined by more detailed assessment work - consider capacity should be approximately 100 dwellings to respond to this.</li> <li>-Open space location will reflect proposed site guidelines and will respect the heritage of the Tenbury – Bewdley railway. The Heritage Note prepared for the site concludes there are no major archaeological constraints to the residential development of the site. Open space will assist in retaining the sites open character and landscape planting will soften the edge of the settlement and help it to assimilate with the River Teme Valley.</li> <li>-A Phase 1 Ground Investigation can accompany an Outline Planning Application for the site to address ground contamination. Development will ensure this is safely remediated.</li> <li>-Site specific flood risk assessment (including hydraulic modelling) will be undertaken to inform any future Planning Application and refined proposals. Proposed layout is set back from areas of known/suspected flood risk (accommodated in open space). All surface water runoff from the development will be directed to an attenuation pond ensuring no flows are directed towards neighbouring properties on Boraston Drive. Best practice Sustainable Drainage Systems (SuDS) methods will be used, designed to discharge clean water from the attenuation pond into the watercourse (at a low greenfield equivalent run off rate). This will help lessen the impact on the River Teme SSSI, as this currently suffers from water pollution as a result of agricultural run-off. The existing culverted watercourse to the east of the site will be re-naturalised to provide ecological benefit and potentially surface water flood risk betterment by increase flood storage.</li> <li>-The site would be served off the A456 (priority controlled T Junction). Feasibility of secondary pedestrian/cycle access to Boraston Drive will be confirmed ahead of any Planning Application.</li> <li>-Highways Consultant has reviewed Highways England comments at Reg 18 Consultation and advised based on a 100 dwelling scheme, as a worst case scenario, the site would likely generate approx. 60 two-way vehicle trips during a typical weekday peak hour (AM and PM). Would expect approx. 10% of vehicle trips associated with the site to pass through the A49/A456/Wyson Lane crossroads junction, translating to just six two-way vehicle trips during a typical weekday peak hour. Spread evenly, that would be one vehicle every 10 minutes, but even if all six vehicles arrived at the junction at the same time (highly unlikely given distances), wouldn't expect a lasting issue. Consider a much larger proportion of development traffic (than 10%) could route through to the junction, before impacts would begin to be felt. Therefore, do not expect proposed development of BUR004 would result in an impact on operation of the A49/A456/Wyson Lane crossroads junction and it is not expected that mitigation works at this location would be necessary.</li> <li>-Utilities Assessment will be provided to support any Planning Application.</li> </ul> <p>Note comments to previous consultations reference use of the site as parking for the Tenbury Show. however this was only allowed on a temporary bases at the landowners discretion and does not constitute a formal use or impact on the ability for development to occur.</p>
A0348	B029	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S10.2(i) BUR002	Not Specified	Yes	Not Specified	<p>Welcome requirement within the proposed development guidelines for site BUR002 that the design, layout and landscaping of the development should recognise the significance and setting of the heritage assets situated close to the site and supports the requirement for an assessment of the archaeological potential of the site situated close to Turnpike Cottage and the former Turnpike route along the A456, and also located near to Castle Trump Scheduled Monument.</p>
A0532	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S10.2 Burford	Not Specified	No	Not Specified	<p>The land at BUR008 is well related to the settlement of Burford. It is land that can be provided to meet the employment needs of the locality as well as housing needs. It is and put forward by a significant local business who have the resources to deliver the requested allocation. The considerable self-build demand is unmet in the south of the County and this proposal will provide dedicated land for custom build / self-build. Without providing a dedicated land allocation for employment use existing business will not be able to plan for their expansion. This in my view is a serious flaw which renders the Plan as presently proposed unsound.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0118	B001	Capacity for BUR004 should be expressed as 'approximately 100 dwellings; to allow for a reasonable amount of flexibility in dwelling numbers, in response to a more detailed assessment of the site's capacity.	Shropshire Council welcomes the support for Policy S10.2 recognising that the town of Burford is appropriately designated as a Community Hub and that the strategy will provide an opportunity to deliver new housing in Burford to support the rural area around the Market Town of Ludlow and also the adjacent town of Tenbury located in Worcestershire. This strategy identifies two preferred housing allocations comprising BUR002 and BUR004. The development guidelines for these sites identify an indicative capacity for the proposed development subject to the proposed design, any constraints to the development and the need for mitigation measures. Consequently, it is expected that the guideline site capacity may be merely an indication of the site capacity and it is already assumed that the site may out-turn a number of dwellings that will approximate to the guideline figure.	No	S10.2 Burford
A0348	B029	N/A	Shropshire Council welcomes the support for Policy S10.2 recognising that the town of Burford is appropriately designated as a Community Hub and that the strategy will provide an opportunity to deliver new housing in Burford to support the rural area around the Market Town of Ludlow and also the adjacent town of Tenbury located in Worcestershire. This strategy identifies a number of suitable housing allocations including BUR002 which will be subject to the assessment of any impacts from this development on heritage assets close to BUR002 through a heritage impact assessment and archaeological investigation. The support for this approach to the development of site BUR002 is also welcomed.	No	S10.2 Burford
A0532	B001	Allocate sufficient land on SITE BUR 8 for the industrial /commercial needs of two local companies and others that may be in need in the plan period combined with a mix of residential land which will add economic support	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Burford. Consequently, it is considered appropriate that Burford is identified as a proposed Community Hub and it is further proposed to identify a development guideline of 190 dwellings, a development boundary and housing allocations on sites BUR002 and BUR004 (it should be noted that site BUR001 is now under construction for a mixed tenure affordable housing scheme). Shropshire Council also considers that this proposed development strategy for Burford and the existing and proposed allocations identified to contribute towards achieving this strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying the proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this other promoted site. The development boundary for Burford is focused on the areas of the village to the west and east of the River Teme bridge link into Tenbury Wells drawing together all the principal services for these two related towns. To the east, the boundary draws together site BUR002 with the Lower Teme Business Park but BUR008 is situated beyond these two sites and forms part of the countryside surrounding the town and extending into the floodplain of the River Teme. Consequently, the comparative benefits of the proposed allocations compared to the promoted site BUR008, the already significant scale of the Burford development guideline figure and the sufficient capacity of proposed allocations BUR002 and BUR004 to help deliver the proposed 190 dwellings means that site BUR008 is not required for development at this point in time. It is noted that BUR008 is also proposed for employment development and that demand has been expressed by local companies in recent times. It is understood that these demands are now likely to be met in other locations and so, the need for further employment land provision in Burford beyond the significant areas of the Upper and Lower Teme Business Parks has not been made out at this time.	No	S10.2 Burford

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0656	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S10.2 Burford	Not Specified	Not Specified	Not Specified	There is concern about the proposed allocation of site BUR002 (land adjoining Lineage Farm on A456). The site scores poorly in the SA. Further, liaison with Tenbury Town Council has also highlighted concerns about the loss of a flood plain and potential flooding problems if site BUR002 was to be developed. Liaison with Tenbury Town Council has also highlighted that an additional 190 dwellings at Burford (which probably equates to around an additional 440 residents) would place additional demands on existing services, such as doctors, at Tenbury which are presently stretched. The impact on local services at Tenbury needs to be taken into account in any housing allocations at Burford. Whilst Tenbury Town and Burford Parish Council's have not yet undertaken Regulation 14 consultation on their emerging Tenbury and Burford NDP, it is understood that a NDP is still being prepared. It is considered that the Shropshire Local Plan needs to recognise that Tenbury and Burford is a designated Neighbourhood Area and reflect the current position with regards to the emerging NDP.
A0347	B059	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Burford BUR002	No	No	Not Specified	Records show presence of a borehole on this site. This will need to be appropriately decommissioned
A0348	B030	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S10.2(i) CHK002	Not Specified	Yes	Not Specified	Note the requirement within the proposed development guidelines for site CHK002, for a heritage impact assessment regarding archaeological interest, as the site was formerly a coal and ironstone workings.
A0124	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	MDR039 & MDR043	Yes	No	Yes	1. These comments should be read alongside ours on S11.1 Market Drayton. If the relocation of the Greenfields Sports Hub is not financially viable in its own right, then developer contributions from MDR039 & MDR043 should be considered to assist this. 2. Support the allocation of this site and the reference to providing pedestrian cycle and vehicular access to the relocated sports hub site via this housing development.
A0073	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 Market Drayton	Not Specified	Not Specified	Not Specified	It is not clear from the available evidence base as to why certain settlements are to be apportioned higher levels of growth than other settlements within the same tier of the hierarchy. With 35ha of allocated employment development available in Market Drayton, additional housing development in the settlement would be logical in the context of aligning housing and economic growth and delivering a sustainable pattern of development. Market Drayton could also accommodate any growth which may be undeliverable in Whitchurch.
A0124	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1	Yes	No	Yes	1. Note the Reg 18 modification to part 3 of policy but request additional text to ensure replacement facilities are equitable in quantity and quality in a suitable location. 2. Our concerns relate to the apparent uncertainty regarding viability of the relocation of the Greenfield Sports Hub. The Plan does not demonstrate the relocation is deliverable in line with the guidance in the NPPF. The uncertainty regarding deliverability potentially undermines continued use and investment in the existing Sports Club site who may find it difficult to secure grant funding due to the uncertainty regarding potential future relocation. 3. The policy map only identifies a broad location for proposed relocation to Longford Turning. This is insufficiently precise to demonstrate that the relocation of the sport facilities will provide equitable provision in quantity in accordance with para 97 of the NPPF. To address this, a specific site should be allocated for sports development, identifying the overall area (i.e.. square metres) of land to be provided to demonstrate that this allocation would be equitable in quantity (i.e.. area) to re-provide the existing pitches, courts, and ancillary facilities at Greenfields. Consideration should also be given to allocating additional land to facilitate future growth of the sports hub. This This should be supported by a feasibility assessment to demonstrate that the land is capable of providing the replacement sports pitches and associated facilities, taking into account any technical constraints such as levels, soil profiles, drainage etc.
A0348	B031	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1(i) MDR012 & MDR034	Not Specified	Yes	Not Specified	Note that development of a marina is key objective for Market Drayton (para. 5.155), seeking to utilise the town's proximity to the Shropshire Union Canal. Suggest that if proposed allocations MDR012 and MDR034, as well as the existing and protected employment sites in this general area could be considered overall in relation to the potential marina development at Victoria Farm, within a masterplanned approach, then this would assist with wider connections for people and enhancement and enjoyment of heritage assets.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0656	B002	SWC have prepared an emerging housing requirement for Tenbury Wells. It is considered that it would be helpful for Shropshire Council and the South Worcestershire Councils to liaise to jointly agree a housing requirement for the Tenbury and Burford Neighbourhood Area.	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Burford. Consequently, it is considered appropriate that Burford is identified as a proposed Community Hub and it is further proposed to identify a development guideline of 190 dwellings, a development boundary and housing allocations on sites BUR002 and BUR004 (it should be noted that site BUR001 is now under construction for a mixed tenure affordable housing scheme). The designation of Burford and the scale of the proposed housing development reflects the additional service provision in the adjacent town of Tenbury. Consequently, the development guidelines for sites BUR002 and BUR004 should recognise that where development in Burford is required to make a contribution towards sustaining key local services, this might also include services located in Tenbury. The development guidelines for the proposed allocation on site BUR002 already recognises a possible long term flood risk from the River Teme and the development guidelines for BUR002 provide for flood storage improvements including an open space buffer, an infiltration basin and other flood storage measures which mitigate this potential risk. The draft Shropshire Local Plan was prepared at a time when the communities of Burford and Tenbury proposed to prepare a Neighbourhood Development Plan (NDP). The preparation of the draft Shropshire Local Plan has preceded the preparation of the NDP and met the development needs of Burford with no further provision required in Burford at this time. In the event that the South Worcestershire Plan should be preceded by the NDP then the development needs of Tenbury may still be met through the NDP. This matter will be resolved in part through the SOCG with Malvern Hills District Council.	Yes	S10.2 Burford
A0347	B059	n/a	Noted. No change proposed	No	S10.2 Burford (BUR002)
A0348	B030	N/A	Shropshire Council welcomes the support for Policy S10.2 recognising that the village of Clee Hill is appropriately designated as a Community Hub and that the strategy will provide an opportunity to deliver new housing in the rural area around the Market Town of Ludlow. This strategy has identifies a suitable housing allocation on site CHK002 which will be subject to the assessment of any impacts from this development on the former coal and ironstone workings around Clee Hill through a heritage impact assessment and archaeological investigation. The support for this approach to the development of site CHK002 is also welcomed.	No	S10.2 Clee Hill
A0124	B012	Address the issue of viability of the proposed sports hub relocation to ensure consistency with the advice in the NPPF regarding deliverable planning policies, and if necessary require the proposed housing allocation to contribute towards the cost of relocating the sports hub.	The relocation of the Market Drayton sports facilities, currently located at Greenfields (on land owned by Shropshire Council), is a major local priority, having been considered as part of the draft Market Drayton Neighbourhood Plan. The Council is seeking to plan positively for this delivery and in doing so continue to assess the overall viability of the relocation of the current sports facilities at Greenfields, which includes an assessment of likely relocation costs, against an assessment of the likely re-use of the current site for alternative uses. This is recognised in paragraph 5.154 of the draft Local Plan. It is currently considered that the proposed relocation remains a viable proposition and is supported locally by the Town Council. The proposed housing scheme at Longford Turning (MDR039/MDR043) is required to enable sufficient improvements to the pedestrian, cycle and vehicle accessibility into the proposed relocation site (identified as a broad location on the draft Policies Map). In addition, there is the potential for CIL funding to support the wider improvements necessary and which could be used as 'gap' funding.	No	S11.1 (i) Market Drayton
A0073	B005	Whilst we support the identification of Market Drayton as a Principal Centre and the level of growth is broadly supported, we consider that Market Drayton could accommodate a higher level of housing growth. It is a sustainable location for new development, and there are suitable unconstrained sites available for development, in particular to the north of the A53.	It is considered the strategy for Market Drayton is appropriate, effective, sustainable and deliverable. it is recognised the strategy includes a proposal to enable the delivery of a key local objective; to relocate the local sports provision, as well as continuing to provide suitable opportunity for delivering employment provision. it is not considered there is any need to provide additional land in order to support non-delivery in Whitchurch.	No	S11.1 Market Drayton
A0124	B013	1.Revise the policy wording to ensure that the replacement sports hub at Longford Turning is to be equitable in quantity and quality to accord with para 97 of the NPPF, and to accord with proposed policy DP15 (open space and recreation). 2. Address the issue of viability to relocate the existing sports hub from Greenfields to Longford Turning in line with the guidance in the NPPF, and revise the wording of part 3 of the policy accordingly, or alternatively remove the allocation from the Plan if viability of the relocation cannot be demonstrated. 3. Revise the proposals map to specifically allocate sufficient land for the proposed sports hub relocation (rather than the current less precise proposal to show a broad location for relocation), supported by feasibility assessment that demonstrates the replacement land to be equitable in quantity in accordance with para 97 of the NPPF.	It is considered the current draft policy in S11.1(3), which specifies "that the relocation of Market Drayton Sports facilities from its current site on Greenfields Lane to land at Longford Turning, identified on the Policies Map, to enable the delivery of new facilities to at least equitable standard" provides sufficient certainty regarding the proposed location and quality of the new facility. Furthermore, the draft Shropshire Local Plan should be read as a whole, draft Policy DP15 would apply to any proposals for relation of the Market Drayton Sports facilities.	No	S11.1 Market Drayton
A0348	B031	Consider MDR012 and MDR034, as well as the existing and protected employment sites in this general area, within a masterplanned approach to the potential marina development at Victoria Farm.	Noted. Shropshire Council considers that an effective approach to the development of existing and proposed allocations at Market Drayton is established within the draft Shropshire Local Plan and elements of the adopted SAMDev Plan proposed to be saved. It is also considered that draft Policy S11.1 provides an appropriate context for the opportunities to deliver a marina and related uses on land at Victoria Farm. If any such development is proposed, it would be subject to detailed consideration through the Planning Application process.	No	S11.1 Market Drayton

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0378	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1(1)	Yes	No	Yes	Support continued role of Market Drayton as a Principal/Key Centre, acting as a focus for strategic growth objectives in the north-east of the County. However, suggest draft Policy S11.1 should state 'at least' instead of 'around' 1,200 dwellings.
A0378	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1(2)	Yes	Yes	Yes	Welcome and support the wording of para 2 of draft Policy S11.1.) Note that new residential development will be delivered through saved SAMDev residential allocations and proposed Local Plan residential site allocations, complemented by windfall residential development within the Town development boundary and appropriate cross-subsidy and exception (affordable) development. Welcome reference to the possibility for additional residential development outside the defined development boundary to enable delivery of proposals, such as the relocation of existing sports facilities from Greenfields Lane (para 3 of draft Policy S11.1) and the community aspiration for development of a marina at Victoria Farm (para 4 of draft Policy S11.1).
A0378	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1(3)	Yes	No	Yes	Note relocation of Market Drayton Sports facilities from Greenfields Lane is a central objective of the proposed Strategy. However, have serious concerns about suitability and deliverability of identified land at Longford Turning for the relocation of the existing facilities at Greenfields and the appropriateness of proposed enabling housing allocations MDR039 and MDR043. Promoter of MDR046 was previously asked about potential to accommodate at least some if not all of such facilities on the site. Envisaged land could be provided to the Council for sports and recreation use as part of a mixed use development that would inter alia, also deliver a marina and other beneficial proposals. Should the Longford Turning proposals subsequently be considered unsuitable/inappropriate and/or unviable or undeliverable, sports and recreational facilities can be accommodated on MDR046, as part of a mixed-use sustainable urban extension to the Town.
A0378	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1(4)	Yes	Yes	Yes	A new marina and associated development is strongly supported by Market Drayton Town Council, Shropshire Council and the local community in Market Drayton. Draft Policy DP10 identifies requirements for new marinas. Support para 4 of draft Policy S11.1, which offers supporting policy context to realise the local community's aspirations for a marina with related uses and enabling development, at Victoria Farm. In seeking to avoid a Canal & River Trust objection to site specific proposals, 'words of comfort' instead of a specific allocation for a marina and related and enabling development at Victoria Farm are proposed. An application to and subsequent discussions with the Canal & River Trust indicate they currently have no objection in principle to a marina at Victoria Farm, subject to technical approval. In light of this supportive feedback and the Council's continued support, sufficiently encouraged to progress work on preparing a Planning Application for a marina based development, which can be considered on its merits in the context of positive wording provided at para 4 of draft Policy S11.1 and paragraph 5.155 of the explanation to draft Policy S11.1. Alternatively the site at Victoria Farm could be allocated and a similar caveat to that in draft Policy DP10 (regarding demonstrating capability of the canal network to accommodate the development) included.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0378	B001	Para 1 of draft Policy S11.1 should state 'at least' instead of 'around' 1,200 dwellings.	The draft Shropshire Local Plan should be read as a whole. Draft Policy SP7 recognises that residential development guidelines are not intended to represent a ceiling on development, but that going beyond it by too great a degree could result in unsustainable development. As such, draft Policy SP7 sets out a clear set of considerations which regard will be had to in determining planning applications which would result in the provision of more dwellings that the settlement's residential development guideline. These include benefits arising from the proposal (aside for increased housing supply), likelihood of delivery of existing commitments, any cumulative impacts of development and increase relative the relevant guideline.	No	S11.1 Market Drayton
A0378	B002	N/A	Noted.	No	S11.1 Market Drayton
A0378	B003	Should the Longford Turning proposals subsequently be considered unsuitable/inappropriate and/or unviable or undeliverable, sports and recreational facilities can be accommodated on MDR046, as part of a mixed-use sustainable urban extension to the Town.	Shropshire Council have undertaken a proportionate and robust assessment of all of the promoted sites and considers the approach taken to the preferred allocations as being reasonable and appropriate for the Local Plan. The preferred allocations are all considered as being suitable, available and achievable (including viable).	No	S11.1 Market Drayton
A0378	B004	N/A	Noted.	No	S11.1 Market Drayton

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0378	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1(i) MDR012 & MDR034	Yes	Yes	Yes	<p>Strongly support proposed allocation of MDR012 (70 dwellings) and MDR034 (120 dwellings) as they are suitable, available and deliverable early in the proposed Plan period. They also represent the most appropriate and sustainable housing development opportunities on the periphery of Market Drayton as they are well related to the existing built form, within walking distance of the town centre and enclosed by the Canal to the north/east and employment (existing/proposed) to the north/west. These proposed allocations are supported by evidence and by any objective planning assessment, are perfectly acceptable.</p> <p>However, confused by reference to "the proposed marina" in the draft site guidelines for both MDR012 and MDR034, even though it is not currently a proposal, but merely an aspiration.</p> <p>The Sustainability Appraisal (SA) incorrectly scores MDR012 as a '-' for high landscape sensitivity when it is actually medium low landscape sensitivity (reflecting enclosure of the site). This should be correct, although the sites overall rating of 'fair' remains the same.</p> <p>Note that MDR012 and MDR034 score higher in the SA than the other proposed allocations at Market Drayton MDR006, MDR039 and MDR043.</p>
A0378	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1(i) MDR039 & MDR043	No	No	Yes	<p>Relocation of the Greenfields sports and recreation facilities is a central objective of the draft Strategy for Market Drayton, but this should not be promoted at the cost of unsustainable residential development, particularly where a more suitable site (MDR046) is potentially available to accommodate this relocation.</p> <p>Surprised and concerned about proposals to allocate MDR039 and MDR043. Note intention to facilitate relocation of Greenfields sports and recreation facilities, but these sites have a number of potentially fatal difficulties/flaws (provision of safe and convenient pedestrian and cycleway access, unsuitable topography; significant landscape impacts and creation of unsustainable residential development) and poor physical, technical and sustainability credentials. The Site Assessments give both MDR039 and MDR043 an overall score of '-8' and 'Poor' Sustainability (the Sustainability Appraisal acknowledges they are not within walking distance of key services and facilities and have high landscape impact, resulting in the poor classification). The Strategic Land Availability Assessment (SLAA) also rejects MDR043.</p> <p>Further, draft Policy S11.1(3) and paras 5.153 and 5.154 of the explanation to draft Policy S11.1 suggests that the Longford Turning proposals may not be sufficiently sustainable, robust, viable and a lack of confidence in their deliverability (what feasibility evidence is available to demonstrate deliverability of MDR039 and MDR043, let alone in accordance with anticipated timescales set out in Appendix 7 of the draft Shropshire Local Plan), referring to the opportunity for potential alternative locations, which could include MDR046 (officers previously enquired about this option and the promoter agreed to it, but chose to support proposals at Longford Turning instead).</p> <p>Would reiterate there remains scope to accommodate the Greenfields facilities, with appropriate enabling residential development as part of a comprehensive and sustainable mixed-use development to provide a range of residential, commercial and tourist and leisure development/uses, including a marina, that combined would deliver, with much greater certainty, significant social and economic benefits with less landscape impact, at MDR046. Given the above, it is difficult to understand why MDR039 and MDR043 are proposed.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0378	B005	<p>Para 2 of the draft site guidelines for both MDR012 and MDR034 should be modified to read: "Pedestrian and cycle links will be enhanced or provided through the site and linking into the town and to the existing canal towpath (subject to the approval of the Canal &amp; River Trust), in order to improve the site's overall sustainability."</p> <p>This modification would facilitate linkage to any future proposals that may come forward for a marina on land at Victoria Farm, including any associated improvements to pedestrian connectivity to the north of the Canal and over the A53 to link to the towpath.</p> <p>Para 5.156 of the proposed explanation to draft Policy S11.1 should include reference to proposed allocations MDR012 and MDR034, since these are capable of being delivered early in the plan period and their promoter fully intends to bring both sites forward for housing development without delay.</p> <p>Appendix 7 of the draft Shropshire Local Plan should be amended to reflect stated objective of early delivery of MDR012 and MDR034.</p>	<p>With regard to the draft site guideline regarding pedestrian and cycle links for proposed allocations MDR012 and MDR034, a minor modification is proposed to recognise these links should also be to the canal towpath. Applicants are required to engage with the relevant bodies for their applications, and so including every appropriate body within the site guidelines would not be necessary - such aspects would be discussed during the planning application process.</p> <p>Approximate delivery rates of the sites can be found in the Appendices and so they are not all listed in the policies or explanation text. Shropshire Council generally takes a precautionary approach to assumptions on delivery timescales, as such these approximate delivery rates are considered appropriate and robust.</p>	Yes	S11.1 Market Drayton
A0378	B006	<p>Proposed allocations MDR039 and MDR043 should be deleted.</p> <p>The opportunity to relocate the Greenfields sports and recreation facilities and associated enabling residential development at MDR046, as part of a comprehensive mixed-use development associated with the delivery of the marina and related uses and enabling development.</p>	<p>Shropshire Council have undertaken a proportionate and robust assessment of all of the promoted sites and considers the approach taken to the preferred allocations as being reasonable and appropriate for the Local Plan. The preferred allocations are all considered as being suitable, available and achievable (including viable).</p>	No	S11.1 Market Drayton

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0387	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11	Not Specified	No	Not Specified	<p>Whilst supportive of Market Drayton being identified as a Principal Centre and the main focus for growth in this Place Plan Area, consider the draft Shropshire Local Plan is currently unsound as it is not justified or effective. Consider additional housing growth should be directed to the Market Drayton and additional housing allocations are required to ensure delivery of the residential development requirement.</p> <p>Note that the proposed site allocations for Market Drayton are those from the Market Drayton Neighbourhood Plan found to not meet Basic Conditions at Examination (a concern at examination was the lack of formal site assessment and comparison of options). Concerned about these proposed allocations are: -MDR012 is subject to environmental issues (ecology and setting of the Grade II listed Victoria Bridge) which could affect capacity and the Sustainability Appraisal (SA) gives negative scores for key environmental constraints including ground source protection zone, heritage assets and landscape value, which may not be as readily mitigated as factors such as accessibility. The requirement for cross-subsidy of the proposed marina has been removed from the proposed site guidelines for MDR012, but is still referenced and has informed the site assessment - no genuine re-assessment of options. It is therefore not clear on what basis this site has been preferred for allocation versus other site options within Market Drayton. Therefore object to the allocation of MDR012. -1/3 of MDR034 is located in flood zones 2/3 and proposed guidelines exclude development from this element of the site, therefore query proposed capacity of the site (particularly given the SA identifies the need for further flood modelling and the presence of surface water flood risk; heritage issues (Grade II Listed Victoria Bridge and the canal); and surrounding noise (boat yard, commercial development and A53). The requirement for cross-subsidy of the proposed marina has been removed from the proposed site guidelines for MDR034, but is still referenced and has informed the site assessment - no genuine re-assessment of options. It is therefore not clear on what basis this site has been preferred for allocation versus other site options within Market Drayton. Therefore object to the allocation of MDR034. -The draft Shropshire Local Plan recognises the continued uncertainty regarding delivery of MDR039 and MDR043 in relation to the relocation of the Market Drayton Sports Facility and subsequent access arrangements, viability is therefore a key concern. Draft Policy S11 includes contingency proposals regarding other sites along the A53 that could support the sports facility relocation rather than genuinely re-assessing options. Where a site is preferred due to potential to cross-subsidise other development, viability should be clear. MDR039 and MDR043 score poor in the SA yet are proposed for allocation due to ability to deliver a community benefit, without being supported by evidence that this is deliverable, therefore object to the allocation of MDR039 and MDR043.</p> <p>Consider that the draft Shropshire Local Plan should fully consider alternative sites along the A53 to ensure the strategy for Market Drayton is achievable, particularly in light of potential delivery issues associated with MDR039 and MRD043. Such a site is promoted in this representation, consisting of MDR049 plus additional land (plan appended to representation) which represents a reasonable alternative allocation. This site has the potential to provide both necessary housing including affordable housing (capacity for around 550 dwellings having considered constraints) and other community benefits like relocated/additional sports facilities in a more sustainable location closer to the town centre and other potential new development (including site allocation MDR006). It also has the potential for landscape-led and sensitive development that respects its context, including the surrounding countryside. Whilst MDR049 performs poorly in the SA this is primarily due to accessibility and mitigation measures are to be put in place. Promoted site should be allocated instead of those proposed in the draft Shropshire Local Plan, to secure future housing delivery and potential speculative development outside the development boundary (draft Policy SP11 includes a contingency due to delivery uncertainties).</p> <p>Query SA scoring of sites with a negative for lack of access to a service when a site similarly score negative for proximity to a significant environment or physical constraint as some accessibility factors are less restrictive/more readily mitigated. Therefore SA criteria should assign neutral ratings to sites without access to services.</p> <p>Recognise the SA scoring does not consider mitigation, but it could be done in a way that reflects the potential for on-site mitigation in accordance with proposed policies (e.g. larger sites such as MDR049 not in proximity to existing facilities are more likely to provide on-site facilities such as play areas and amenity spaces). This could be done through 'neutral' instead of 'negative' scores on accessibility criteria. S11.2 identifies Community Hub settlements and their guidelines. More of this development should be focused in Market Drayton to a more sustainable and secure strategy (alongside sustainable growth of the Community Hubs and Clusters, as per our comments on draft Policy SP2). Risk of delivery of small sites (non-implementation is higher) should also be recognised.</p>
A0387	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	MDR012	Not Specified	No	Not Specified	<p>Whilst supportive of Market Drayton being identified as a Principal Centre and the main focus for growth in this Place Plan Area, consider the draft Shropshire Local Plan is currently unsound as it is not justified or effective. Consider additional housing growth should be directed to the Market Drayton and additional housing allocations are required to ensure delivery of the residential development requirement.</p> <p>Note that the proposed site allocations for Market Drayton are those from the Market Drayton Neighbourhood Plan found to not meet Basic Conditions at Examination (a concern at examination was the lack of formal site assessment and comparison of options). Concerned about these proposed allocations are: -MDR012 is subject to environmental issues (ecology and setting of the Grade II listed Victoria Bridge) which could affect capacity and the Sustainability Appraisal (SA) gives negative scores for key environmental constraints including ground source protection zone, heritage assets and landscape value, which may not be as readily mitigated as factors such as accessibility. The requirement for cross-subsidy of the proposed marina has been removed from the proposed site guidelines for MDR012, but is still referenced and has informed the site assessment - no genuine re-assessment of options. It is therefore not clear on what basis this site has been preferred for allocation versus other site options within Market Drayton. Therefore object to the allocation of MDR012. -1/3 of MDR034 is located in flood zones 2/3 and proposed guidelines exclude development from this element of the site, therefore query proposed capacity of the site (particularly given the SA identifies the need for further flood modelling and the presence of surface water flood risk; heritage issues (Grade II Listed Victoria Bridge and the canal); and surrounding noise (boat yard, commercial development and A53). The requirement for cross-subsidy of the proposed marina has been removed from the proposed site guidelines for MDR034, but is still referenced and has informed the site assessment - no genuine re-assessment of options. It is therefore not clear on what basis this site has been preferred for allocation versus other site options within Market Drayton. Therefore object to the allocation of MDR034. -The draft Shropshire Local Plan recognises the continued uncertainty regarding delivery of MDR039 and MDR043 in relation to the relocation of the Market Drayton Sports Facility and subsequent access arrangements, viability is therefore a key concern. Draft Policy S11 includes contingency proposals regarding other sites along the A53 that could support the sports facility relocation rather than genuinely re-assessing options. Where a site is preferred due to potential to cross-subsidise other development, viability should be clear. MDR039 and MDR043 score poor in the SA yet are proposed for allocation due to ability to deliver a community benefit, without being supported by evidence that this is deliverable, therefore object to the allocation of MDR039 and MDR043.</p> <p>Consider that the draft Shropshire Local Plan should fully consider alternative sites along the A53 to ensure the strategy for Market Drayton is achievable, particularly in light of potential delivery issues associated with MDR039 and MRD043. Such a site is promoted in this representation, consisting of MDR049 plus additional land (plan appended to representation) which represents a reasonable alternative allocation. This site has the potential to provide both necessary housing including affordable housing (capacity for around 550 dwellings having considered constraints) and other community benefits like relocated/additional sports facilities in a more sustainable location closer to the town centre and other potential new development (including site allocation MDR006). It also has the potential for landscape-led and sensitive development that respects its context, including the surrounding countryside. Whilst MDR049 performs poorly in the SA this is primarily due to accessibility and mitigation measures are to be put in place. Promoted site should be allocated instead of those proposed in the draft Shropshire Local Plan, to secure future housing delivery and potential speculative development outside the development boundary (draft Policy SP11 includes a contingency due to delivery uncertainties).</p> <p>Query SA scoring of sites with a negative for lack of access to a service when a site similarly score negative for proximity to a significant environment or physical constraint as some accessibility factors are less restrictive/more readily mitigated. Therefore SA criteria should assign neutral ratings to sites without access to services.</p> <p>Recognise the SA scoring does not consider mitigation, but it could be done in a way that reflects the potential for on-site mitigation in accordance with proposed policies (e.g. larger sites such as MDR049 not in proximity to existing facilities are more likely to provide on-site facilities such as play areas and amenity spaces). This could be done through 'neutral' instead of 'negative' scores on accessibility criteria. S11.2 identifies Community Hub settlements and their guidelines. More of this development should be focused in Market Drayton to a more sustainable and secure strategy (alongside sustainable growth of the Community Hubs and Clusters, as per our comments on draft Policy SP2). Risk of delivery of small sites (non-implementation is higher) should also be recognised.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0387	B010	<p>Direct additional housing growth to the Principal Centre of Market Drayton and identify additional allocations to ensure delivery of the residential development requirement. Site allocations should be reassessed alongside alternatives to ensure all options for growth have been assessed objectively, without any weight given to the marina or relocated sports pitch, unless there is evidence to support their deliverability.</p> <p>The Sustainability Appraisal (SA) should give consideration to the relative scoring of accessibility factors versus significant physical and environmental constraints. Promoted site (MDR049 plus additional land) should be considered as a reasonable alternative site allocation to secure delivery of the housing requirement for Market Drayton and key objectives for the area, which could include the relocated sports facility given the size of the site.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the proposed development strategy for Market Drayton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Site allocations have been identified through a proportionate and robust Sustainability Appraisal and site assessment process.</p> <p>With regard to MDR039 and MRD043, this site is considered a deliverable sustainable option for residential development. The delivery of this site is not dependent on the relocation of the Market Drayton Sports Association Facilities. However, as recognised within the summary of the site assessment process and the proposed site guidelines for this site, the development proposal does provide a unique opportunity to support the proposed relocation of the Market Drayton Sports Association Facilities to the proposed broad location at Longford Turning, which is a central objective of the Strategy for Market Drayton, through enabling improvements to the pedestrian, cycle and vehicle accessibility into the proposed relocation site. This will include construction of a public footway and cycleway along the northern edge of the site and improved traffic management, sufficient to enable access to both the residential allocation and the proposed future sports facilities on land to the north.</p> <p>With regard to MDR012 and MDR034 it is recognised that the proposed site guidelines for these allocations do not include a requirement to financially cross-subsidise a proposed marina on land at Victoria Farm. The draft Plan does not specifically seek to allocate land for a Marina following consultation comments at the Regulation 18 stage from the Canal &amp; River Trust, and instead policies S11.1, DP10 and SP7 provide a sufficient policy framework should such a proposal come forward during the plan period. CIL contributions from this and other development sites can of course contribute towards the a delivery of a marina. However, importantly, these sites will support improved pedestrian and cycle links the delivery of the proposed marina development and as such indirectly cross-subsidise its delivery, through enhancements to connectivity between the proposed marina site and the town - this is recognised within the proposed site guidelines for these proposed allocations which include "pedestrian and cycle links will be enhanced or provided through the site and linking into the town and to the proposed marina in order to improve the site's overall sustainability". The site assessment undertaken to inform proposed allocations in Market Drayton was based on this opportunity rather than a financial contribution.</p>	No	S11.1 Market Drayton
A0387	B012	<p>Direct additional housing growth to the Principal Centre of Market Drayton and identify additional allocations to ensure delivery of the residential development requirement. Site allocations should be reassessed alongside alternatives to ensure all options for growth have been assessed objectively, without any weight given to the marina or relocated sports pitch, unless there is evidence to support their deliverability.</p> <p>The Sustainability Appraisal (SA) should give consideration to the relative scoring of accessibility factors versus significant physical and environmental constraints. Promoted site (MDR049 plus additional land) should be considered as a reasonable alternative site allocation to secure delivery of the housing requirement for Market Drayton and key objectives for the area, which could include the relocated sports facility given the size of the site.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the proposed development strategy for Market Drayton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.</p> <p>Site allocations have been identified through a proportionate and robust Sustainability Appraisal and site assessment process.</p> <p>With regard to MDR039 and MRD043, this site is considered a deliverable sustainable option for residential development. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0387	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	MDR034	Not Specified	No	Not Specified	<p>Whilst supportive of Market Drayton being identified as a Principal Centre and the main focus for growth in this Place Plan Area, consider the draft Shropshire Local Plan is currently unsound as it is not justified or effective. Consider additional housing growth should be directed to the Market Drayton and additional housing allocations are required to ensure delivery of the residential development requirement.</p> <p>Note that the proposed site allocations for Market Drayton are those from the Market Drayton Neighbourhood Plan found to not meet Basic Conditions at Examination (a concern at examination was the lack of formal site assessment and comparison of options). Concerned about these proposed allocations are: -MDR012 is subject to environmental issues (ecology and setting of the Grade II listed Victoria Bridge) which could affect capacity and the Sustainability Appraisal (SA) gives negative scores for key environmental constraints including ground source protection zone, heritage assets and landscape value, which may not be as readily mitigated as factors such as accessibility. The requirement for cross-subsidy of the proposed marina has been removed from the proposed site guidelines for MDR012, but is still referenced and has informed the site assessment - no genuine re-assessment of options. It is therefore not clear on what basis this site has been preferred for allocation versus other site options within Market Drayton. Therefore object to the allocation of MDR012. -1/3 of MDR034 is located in flood zones 2/3 and proposed guidelines exclude development from this element of the site, therefore query proposed capacity of the site (particularly given the SA identifies the need for further flood modelling and the presence of surface water flood risk; heritage issues (Grade II Listed Victoria Bridge and the canal); and surrounding noise (boat yard, commercial development and A53). The requirement for cross-subsidy of the proposed marina has been removed from the proposed site guidelines for MDR034, but is still referenced and has informed the site assessment - no genuine re-assessment of options. It is therefore not clear on what basis this site has been preferred for allocation versus other site options within Market Drayton. Therefore object to the allocation of MDR034. -The draft Shropshire Local Plan recognises the continued uncertainty regarding delivery of MDR039 and MDR043 in relation to the relocation of the Market Drayton Sports Facility and subsequent access arrangements, viability is therefore a key concern. Draft Policy S11 includes contingency proposals regarding other sites along the A53 that could support the sports facility relocation rather than genuinely re-assessing options. Where a site is preferred due to potential to cross-subsidise other development, viability should be clear. MDR039 and MDR043 score poor in the SA yet are proposed for allocation due to ability to deliver a community benefit, without being supported by evidence that this is deliverable, therefore object to the allocation of MDR039 and MDR043.</p> <p>Consider that the draft Shropshire Local Plan should fully consider alternative sites along the A53 to ensure the strategy for Market Drayton is achievable, particularly in light of potential delivery issues associated with MDR039 and MRD043. Such a site is promoted in this representation, consisting of MDR049 plus additional land (plan appended to representation) which represents a reasonable alternative allocation. This site has the potential to provide both necessary housing including affordable housing (capacity for around 550 dwellings having considered constraints) and other community benefits like relocated/additional sports facilities in a more sustainable location closer to the town centre and other potential new development (including site allocation MDR006). It also has the potential for landscape-led and sensitive development that respects its context, including the surrounding countryside. Whilst MDR049 performs poorly in the SA this is primarily due to accessibility and mitigation measures are to be put in place. Promoted site should be allocated instead of those proposed in the draft Shropshire Local Plan, to secure future housing delivery and potential speculative development outside the development boundary (draft Policy SP11 includes a contingency due to delivery uncertainties).</p> <p>Query SA scoring of sites with a negative for lack of access to a service when a site similarly score negative for proximity to a significant environment or physical constraint as some accessibility factors are less restrictive/more readily mitigated. Therefore SA criteria should assign neutral ratings to sites without access to services.</p> <p>Recognise the SA scoring does not consider mitigation, but it could be done in a way that reflects the potential for on-site mitigation in accordance with proposed policies (e.g. larger sites such as MDR049 not in proximity to existing facilities are more likely to provide on-site facilities such as play areas and amenity spaces). This could be done through 'neutral' instead of 'negative' scores on accessibility criteria. S11.2 identifies Community Hub settlements and their guidelines. More of this development should be focused in Market Drayton to a more sustainable and secure strategy (alongside sustainable growth of the Community Hubs and Clusters, as per our comments on draft Policy SP2). Risk of delivery of small sites (non-implementation is higher) should also be recognised.</p>
A0387	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	MDR039 & MDR043	Not Specified	No	Not Specified	<p>Whilst supportive of Market Drayton being identified as a Principal Centre and the main focus for growth in this Place Plan Area, consider the draft Shropshire Local Plan is currently unsound as it is not justified or effective. A0402	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 (MDR012)	Yes	Yes	Yes	Consider minor changes are required to the proposed site guidelines for MDR012 to improve accuracy, effectiveness and provide greater clarity regarding the consideration of the adjoining canal. Specifically: -Reference is made to a proposed marina (pedestrian and cycle links between it and the town). This is misleading as no site for a marina is proposed within the draft Shropshire Local Plan. Reference should be amended instead to the canal, which could in any event help facilitate access to a potential future marina. This sentence should also be amended to include reference to enhancement of pedestrian and cycle links adjacent to the site, such as the canal towpath (increased use associated with nearby development may necessitate improvements to surfaces/access points to accommodate it). -Reference is made to reflecting/respecting heritage assets. Whilst this would likely include the canal corridor, would ask specific reference to future development positively addressing the adjoining canal and the opportunities it presents. -Reference should be made to the site design and layout positively addressing the adjoining canal corridor and ensuring no adverse impact on its character, heritage, ecology or structural integrity. -Reference is made to planting of large trees. This may not be appropriate given potential impact on canal infrastructure. This should be amended to provision of an appropriately design landscaping scheme, incorporating native species and, where appropriate, sustainable planting of large trees within the green infrastructure and public open space...
A0402	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 (MDR034)	Yes	Yes	Yes	Consider minor changes are required to the proposed site guidelines for MDR012 to improve accuracy, effectiveness and provide greater clarity regarding the consideration of the adjoining canal. Specifically: -Reference is made to a proposed marina (pedestrian and cycle links between it and the town). This is misleading as no site for a marina is proposed within the draft Shropshire Local Plan. This should be amended to provision of an appropriately design landscaping scheme, incorporating native species and, where appropriate, sustainable planting of large trees within the green infrastructure and public open space...
A0402	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 para 5.155	Yes	Yes	Yes	Note the aspiration for a new marina in Market Drayton, but no site is specifically allocated for a marina. Para 5.155 of the proposed explanation to draft Policy S11.1 specifies the Canal & River Trust do not support allocation of marina developments in Local Plans. Whilst this is correct, consider an explanation should be provided. Specifically the Canal & River Trust make decision on whether connecting marinas to the canal network is appropriate based on consideration of water resources, navigational safety considerations and any potential impacts on SSSIs. Applications need to be considered cumulatively and water cannot be reserved indefinitely (new schemes may come along or environmental factors may change). As such allocations could become undeliverable. Therefore, consider it is appropriate for marina proposals to be dealt with by means of appropriate criteria based policy (such as draft Policy DP10) or, where necessary, identified as a potential use within a more general site allocation, for example for leisure/tourism use. As such, consider minor changes to para 5.155 of the proposed explanation to draft Policy S11.1 to improve accuracy. Consider reference to the principle of a marina development in para 5.155 of the proposed explanation to draft Policy S11.1 should be amended to indicate that it "MAY" be capable of delivery rather than "IS" capable of delivery. All references to the "Canals and Rivers Trust" (and any other similar reference in the plan) should be corrected to "Canal & River Trust".
A0410	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11	Not Specified	No	Not Specified	The proposed employment guideline for Market Drayton earlier in the Local Plan Review was some 13ha (based on the 'balanced' employment land calculation identified within the Preferred Scale and Distribution of Development Consultation), this increased during the last Regulation 18 consultation (and remain as such in the draft Shropshire Local Plan) to 35ha, presumably only because land to meet that guideline is already in the pipeline, so no new allocations are proposed. No actual quantified justification has been evidenced for this large proposed increase in the employment land guideline, or for the departure from balance with the housing guideline. This means housing and employment land are not balanced locally, raising issues of sustainability, partly because of increased levels of commuting. To that extent, the employment land guideline is not justified by proportionate evidence.
A0461	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 Market Drayton	Not Specified	Not Specified	Not Specified	The overall strategy for Market Drayton can be summarised as delivering growth that supports the aims and objectives of the previously draft neighbourhood plan. Many of the allocations can be found in this draft document. Yet, the Council appear non-committal to this strategy which has resulted in the lack of certainty outlined in Paragraph 3 of S11.1. Gladman suggest this, in part, comes from not allocating the existing sports facilities at Greenfields Sports Facilities for redevelopment. Gladman suggest that Market Drayton as a principal centre can and should support more than 1,200 dwellings over the course of the plan period
A0461	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 Alternative sites	Not Specified	Not Specified	Not Specified	The housing guideline for Market Drayton should be higher.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0402	B006	Amend the proposed site guidelines for proposed allocation MDR012 to: -Remove reference to the proposed marina and instead reference the canal towpath. -With regard to enhancements to pedestrian and cycle links through the site, also reference adjacent to the site. -Include reference to future development positively addressing the adjoining canal and the opportunities it presents. -Include reference to site design and layout positively addressing the adjoining canal corridor and ensuring no adverse impact on its character, heritage, ecology or structural integrity. -Require an appropriately design landscaping scheme, incorporating native species and only where appropriate the sustainable planting of large trees.	Shropshire Council considers that the proposed development strategy for Market Drayton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Some of the points raised are covered in other policies within the draft Shropshire Local Plan, such as SP5: High Quality Design or would be a discussion to be had during the planning application process. With regard to the draft site guideline regarding pedestrian and cycle links for proposed allocations MDR012 and MDR034, a minor modification is proposed to recognise these links should also be to the canal towpath.	Yes	S11.1 Market Drayton
A0402	B007	Amend the proposed site guidelines for proposed allocation MDR012 to: -Remove reference to the proposed marina and instead reference the canal towpath. -With regard to enhancements to pedestrian and cycle links through the site, also reference adjacent to the site. -Include reference to future development positively addressing the adjoining canal and the opportunities it presents. -Include reference to site design and layout positively addressing the adjoining canal corridor and ensuring no adverse impact on its character, heritage, ecology or structural integrity. -Require an appropriately design landscaping scheme, incorporating native species and only where appropriate the sustainable planting of large trees.	Shropshire Council considers that the proposed development strategy for Market Drayton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Some of the points raised are covered in other policies within the draft Shropshire Local Plan, such as SP5: High Quality Design or would be a discussion to be had during the planning application process. With regard to the draft site guideline regarding pedestrian and cycle links for proposed allocations MDR012 and MDR034, a minor modification is proposed to recognise these links should also be to the canal towpath.	Yes	S11.1 Market Drayton
A0402	B008	Amend para 5.155 of the proposed explanation to draft Policy S11.1 to: -Explain why the Canal & River Trust are not supportive of allocating sites for marinas. -Specify that the potential marina "MAY" be capable of delivery rather than "IS" capable of delivery. -All references to the "Canals and Rivers Trust" (and any other similar reference in the plan) should be corrected to "Canal & River Trust".	Noted. It is not the role of the draft Plan to specify why proposals/sites are not included within it. Shropshire Council has positively responded to previous representations from the Canal & River Trust in that the draft Plan does not specifically seek to allocate land for a Marina, and instead policies S11.1, DP10 and SP7 provide a sufficient policy framework should such a proposal come forward during the plan period. CIL contributions from this and other development sites can of course contribute towards the a delivery of a marina. However, for the sake of clarity, a minor modification is proposed regarding the suitability of the marina. A modification is proposed to correct references to Canals and Rivers Trust.	Yes	S11.1 Market Drayton
A0410	B016	The quantum of employment land proposed needs to be reappraised.	Shropshire Council considers that the proposed development strategy for Market Drayton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. The proposed employment land guideline for Market Drayton provides appropriate choice and competition within the market, recognises the role of Market Drayton and its contribution towards strategic growth objectives in the north-east of the County and responds to the needs of the town and its surrounding hinterland, including providing opportunities for existing businesses to expand and opportunities associated with High Speed 2. It is noted that no additional employment land allocations are proposed for Market Drayton.	No	S11.1 Market Drayton
A0461	B009	To support the relocation of the sports fields it is important that the current location is released for residential development through an allocation with the expectations and requirements of this site being released for residential development being set out through policy wording. Gladman is confident that the relocation of the existing Greenfields Sports Facilities to the new preferred site is a realisable option as the landowners are willing to make this land available for the relocated sports facilities. Further strategic housing growth should be allocated to Market Drayton.	Noted, Shropshire Council considers that the strategic approach for Market Drayton is appropriate.	No	S11.1 Market Drayton
A0461	B012	MDR042 should also be an allocation	Shropshire Council have undertaken a robust assessment of all of the promoted sites and consider the approach taken to the preferred allocations as being reasonable and appropriate for the Local Plan. The preferred allocations are all considered as being suitable, available and achievable (including viable).	No	S11.1 Market Drayton

A0549	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11	Not Specified	No	Not Specified	Market Drayton Town Council are justified in raising concern that the marina site has not been identified in the local plan and included on the Policies Map. The local plan should clearly set out that the development at MDR012 and MDR034 contributes to the development of the Marina. Residents were consulted, as part of the Neighbourhood Plan process for Market Drayton, on the development of a Marina and there was resounding support of over 70% of residents who took part. A Marina development would bring economic and social benefits as identified in the current Shropshire council Core Strategy.
A0671	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1	Not Specified	Not Specified	Not Specified	United Utilities (UU) do not object to proposed allocations at Market Drayton, however note that current water infrastructure (particularly sewers) may have limited capacity to support planned growth and require upgrading. A coordinated/collaborative approach with UU will ensure assets required to support planned growth are provided without any unexpected delays to future allocations. Welcome approach proposed in draft Policy DP22 and site specific policies in Market Drayton regarding sustainable drainage. Keen to ensure surface water from new developments is designed holistically as part of any proposed landscaping/green infrastructure and subsequently discharged in accordance with the surface water hierarchy. Further reference to draft Policy DP22 (and other relevant draft Policies) in S11 would further strengthen the requirements and ensure the consistency as allocations are brought forward. Emphasise importance of early and continued detailed discussions over proposed allocations in Market Drayton, to ensure UU can appropriately support future delivery. Once information is available with respect to specific development sites (often only at the planning application stage), will be able to better understand the potential impacts of development on infrastructure and if necessary coordinate delivery of development with water infrastructure improvements. Recommend inclusion of a policy in the draft Shropshire Local Plan to this effect. Strongly advise relevant future applicants contact UU at the earliest stage (ideally before land transactions and certainly prior to any application) to explore infrastructure options. Important to highlight limited information on details of the development proposals is available - free Pre-App Service available (details in representation). All UU assets and associated easements need to be afforded due regard in the masterplanning process and may impact on deliverability dependent on location within a site.
A0674	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1	Not Specified	No	Not Specified	Support Para 1 of draft Policy S11.1 and the aspiration to deliver around 1,200 homes in Market Drayton. Also support the ability for windfall sites to come forward within the settlement boundary (para 2 of draft Policy S11.1). However, object to delivery of the housing, the approach taken, the site selection the sustainability appraisal and the level of allocations per site – set out in representation A0674 B013.
A0674	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1	Not Specified	No	Not Specified	Object to paras 3 and 4 and proposed allocations MDR039 and MDR043; MDR012; MDR034; and MDR006. Consider development north of the A53 (applies to all these sites) would harm Market Drayton's character, impact on a sensitive landscape and encroach on the countryside. The site assessment process fails to appropriately consider sites in alternative locations. These sites are also subject to viability/deliverability issues. -MDR039 and MDR043 are physically detached from and have poor access links to Market Drayton (photos provided in representation). The Sustainability Appraisal (SA) identifies the sites as poor, with access to services a key consideration. The Inspector of the Market Drayton Neighbourhood Plan considered the site unachievable/unviable. Site assessment also fails to demonstrate there are no alternative locations for sports facilities/existing facilities cannot be upgraded and no specific viability assessment has been undertaken. -Sites MDR012 and MDR034 are subject to a number of constraints including partial location in flood zone, distance to services/facilities and proximity to a listed buildings (as documented within the SA). The Inspector of the Market Drayton Neighbourhood Plan considered these sites not achievable/viable. It is unclear whether the sites include delivery of a marina and whether the site is viable/deliverable. With regard to MDR034 as 35% of the site is located in flood zones 2/3 its has not been demonstrated how the proposed housing guideline for the site can be accommodated (this could also impact on viability/deliverability). -MDR006 is detached from Market Drayton and subject to a number of constraints including distance to services/facilities (as documented within the SA). The viability/deliverability of the site (including proposed policy requirements) is not demonstrated. Sites MDR014 and MDR031 provide a deliverable alternative and consider it should be included as a proposed allocation. These sites are suitable, available and achievable for housing or employment development. Initial masterplans for the sites provided within the representation (showing much needed retirement housing which also creates jobs on MDR014 and housing/various forms of open space on MDR031). If both are allocated they could open up the Tern Valley as a natural green space. Space has been left for a potential community facility/revisions could be made for a larger facility. The land is in a single ownership and can be brought forward quickly to meet the need/ make a significant contribution to the local community and environment of Market Drayton/Shropshire and requirements of the National Planning Policy Framework.
A0073	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 Market Drayton MDR006	Not Specified	Not Specified	Not Specified	Strong support for this site. The draft allocation is for approximately 125 dwellings. We consider that this quantum of development is realistic and is therefore supported.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0549	B001	<p>4. Whilst land is not specifically allocated for this purpose, it is recognised there are opportunities to delivery and marina and related uses on land at Victoria Farm, therefore land has been identified on the Policies Map.</p> <p>5.155 In seeking to utilise the town's proximity to the Shropshire Union Canal, the development of a marina is another key objective for the Town, in recognition of the economic and social benefits this could bring as identified in the current Shropshire Core Strategy. During the process of the Neighbourhood Plan for Market Drayton a questionnaire was distributed to all residents of Market Drayton and the surrounding area. There was resounding support for the development of a Marina of over 70% of residents who responded.</p>	<p>It is recognised that the proposed site guidelines for these allocations do not include a requirement to financially cross-subsidise a proposed marina on land at Victoria Farm. The draft Plan does not specifically seek to allocate land for a Marina following consultation comments at the Regulation 18 stage from the Canal &amp; River Trust, and instead policies S11.1, DP10 and SP7 provide a sufficient policy framework should such a proposal come forward during the plan period. CIL contributions from this and other development sites can of course contribute towards the a delivery of a marina. However, importantly, these sites will support improved pedestrian and cycle links the delivery of the proposed marina development and as such indirectly cross-subsidise its delivery, through enhancements to connectivity between the proposed marina site and the town - this is recognised within the proposed site guidelines for these proposed allocations which include "pedestrian and cycle links will be enhanced or provided through the site and linking into the town and to the proposed marina in order to improve the site's overall sustainability".</p>	No	S11.1 Market Drayton
A0671	B001	<p>Recommend inclusion of a policy in the draft Shropshire Local Plan regarding coordinating delivery of development with water infrastructure improvements. Amend draft Policy S11 to include "Sites must allocate provision for the management of surface water through the use of sustainable drainage systems with multi-functional benefits as part of a high quality green and blue water environment in line with Policy DP22. Development with such features should consider the topography of the site to understand and design around any naturally occurring flow paths and any low lying areas within the proposal where water will naturally accumulate."</p>	<p>Noted. Para 4 of draft Policy DP19 includes "...proposals should show how development will be phased to allow the relevant water company sufficient time to undertake any necessary capacity improvement works to the existing water supply, wastewater and foul drainage networks and waste-water treatment works prior to construction and occupation of the development..."</p> <p>The draft Shropshire Local Plan should be read as a whole. Draft Policy DP22 comprehensively addresses sustainable drainage and applies to all proposed developments, including proposed allocations, in Shropshire.</p>	No	S11.1 Market Drayton
A0674	B012	<p>Allocate sites MDR014 and MDR031 instead/in addition to proposed allocations DR039 and MDR043; MDR012; MDR034; and MDR006.</p>	<p>Shropshire Council considers that the proposed development strategy for Market Drayton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Site allocations have been identified through a proportionate and robust Sustainability Appraisal and site assessment process.</p>	No	S11.1 Market Drayton
A0674	B013	<p>Allocate sites MDR014 and MDR031 instead/in addition to proposed allocations MDR039 and MDR043; MDR012; MDR034; and MDR006.</p>	<p>Shropshire Council considers that the proposed development strategy for Market Drayton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Site allocations have been identified through a proportionate and robust Sustainability Appraisal and site assessment process.</p>	No	S11.1 Market Drayton
A0073	B008	<p>The capacity could be increased if the Council considered that a higher density development would be more appropriate.</p>	<p>Para 7 of Draft Policy S11.1 recognises that the Provision figures are 'approximate'. It states "Development of site allocations should be in accordance with specified development guidelines and approximate site provision figures and all other relevant policies of this Local Plan." Shropshire Council has generally taken a precautionary approach to site capacity to ensure that the proposed housing requirement and proposed settlement guidelines are achieved. The specific number of dwellings and density of development that is appropriate on any proposed allocations will, if they are ultimately allocated, be determined at the Planning Application stage. The draft site guidelines for proposed allocations are also considered appropriate.</p>	No	S11.1 Market Drayton (MDR006)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0073	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 Market Drayton MDR012 and MDR034	Not Specified	Not Specified	Not Specified	While the principle of a new marina in the town is supported, the complexity of delivering such a project alongside a housing development means it could be some time before the first homes are occupied. This is reflected in Appendix 7 of the plan, which identifies that the sites will deliver in the medium – long term.
A0347	B062	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Market Drayton MDR012	No	No	Not Specified	This site is on Helsby Sandstone or Chester Sandstone Formation. They are also partly located within SPZ3. There is a surface water course in the vicinity and groundwater is likely to be shallow. Appropriate land use, mains foul drainage, surface water drainage design and pollution prevention measures would therefore be required.
A0347	B063	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Market Drayton MDR039/043	No	No	Not Specified	There is potentially a private water supply in the vicinity which if in use will need to be protected. Appropriate land use, mains foul drainage, surface water drainage design and pollution prevention measures would therefore be required.
A0347	B065	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Market Drayton HKW009	No	No	Not Specified	This site is located on the Permo-Triassic sandstone (principle aquifer) within SPZ3. Groundwater is shallow. Appropriate land use, dewatering of foundations, mains foul drainage, surface water drainage design and pollution prevention measures will be required.
A0486	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 Market Drayton MDR014	Yes	Yes	Yes	n/a
A0073	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 Market Drayton MDR039 and MDR043	Not Specified	Not Specified	Not Specified	The delivery of the site for the playing fields is reliant upon land in third party ownership, and furthermore any planning application involving the provision of new playing fields is likely to be extremely complex. It is not clear whether there is sufficient evidence to justify the site being identified for delivery within the short term, as suggested in Appendix 7 of the draft plan.
A0461	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 MDR039	Not Specified	Not Specified	Not Specified	Support this site.
A0461	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.1 MDR043	Not Specified	Not Specified	Not Specified	The area and shape does not seem to lend itself to a well-conceived and high-quality form of development.
A0528	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.2 Colehurst	Not Specified	No	Not Specified	Whilst Woore, Irelands Cross and Pipe Gate are included as a cluster in the Market Drayton Community Hubs, Colehurst is not included. There is no rational or objective reason for this exclusion and the plan is unsound for this reason. Relationship with the main town and each of the other settlements is similar and spatial relationship to services are no different. This settlement was identified as sustainable at the SAMDev stage but was removed as soon a someone stepped forward to actually build houses here.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0073	B006	To ensure that the Council are able to maintain a five-year supply of housing land, it is important that provision is made through other allocations within Market Drayton for deliverable sites free of constraint, which are capable of coming forward early in the plan period.	Shropshire Council considers that the proposed development strategy for Market Drayton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.	No	S11.1 Market Drayton (MDR012 and MDR034)
A0347	B062	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S11.1 Market Drayton (MDR012)
A0347	B063	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S11.1 Market Drayton (MDR013)
A0347	B065	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S11.1 Market Drayton (MDR013)
A0486	B001	n/a	N/A	No	S11.1 Market Drayton (MDR014)
A0073	B007	Having regard to the above considerations, it is important that provision is made through other allocations within Market Drayton for deliverable sites free of constraint, which are capable of coming forward early in the plan period.	Shropshire Council considers that the proposed development strategy for Market Drayton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.	No	S11.1 Market Drayton (MDR039 and MDR043)
A0461	B010	n/a	Noted.	No	S11.1 Market Drayton (MDR039)
A0461	B011	Gladman respectfully suggest that further work should be undertaken to define an area that makes more efficient use of the land.	Shropshire Council considers that the proposed development strategy for Market Drayton and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist.	No	S11.1 Market Drayton (MDR043)
A0528	B001	Include Colehurst as a settlement in the Market Drayton at 11 .2	Shropshire Council undertook a robust Hierarchy of Settlements process where it was found that Colehurst did not have a sufficient number of facilities or services to be classified as a Community Hub.	No	S11.2 Colehurst

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0513	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP11.2 (HKW014)	Not Specified	No	Not Specified	Hinstock has long been recognised as a village to which other smaller settlements look for services and facilities. As such is identified as a Community Hub in the adopted Local Plan (residential guideline of 60) and proposed to be a Community Hub in the draft Shropshire Local Plan (residential guideline of 155). Hinstock has clearly been growing and offers a good range of services and facilities, however it has few employment opportunities and no provision has been made for employment within the last two iterations of the Local Plan for the area. Despite an increase in the amount of dwellings proposed, there remains no planned provision for employment development. Draft Policy S11.2.3 states "new employment development will be delivered through appropriate small-scale windfall development within the settlements development boundary". Clearly no consideration has been given to provision of employment in or on the edge of settlements and sites within the development boundary are likely to be resisted by nearby residents. The draft Shropshire Local Plan and the he Plan for the Market Drayton Place Plan leaves provision of employment to chance with no coherent policy guidance, creating commuter settlements (conflicting with draft Policies which seek to improve sustainability, reduce pollution and reduce private car travel) and as such is not positively prepared or sound. Site HKW014 could provide a small employment develop-ment. It is accessible to Telford, Wolverhampton and Market Drayton via the A41 (without travelling through the village), is well screened and there are few residential properties in the immediate vicinity.
A0643	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.2 Hinstock	Yes	No	No	Out of a total of 18 site assessments, 6 sites were automatically removed from the site assessment process, including my own site, being HKW006. The summary of my site is inaccurate and I did not put it up for assessment because I was not approached to participate in the process. I feel that it is unreasonable to give a site assessment if the necessary information has not been sought or confirmed by relevant parties. For example, this site is recorded as being used as allotments, despite it not being used for allotments since 2014. The size of the land has been recorded inaccurately. It is stated as being 0.34 acres but is actually 0.42 acres. Since 1976 to present day the land has stood mainly unused apart from it's use as allotments from 2009 until 2014. The details of the land provided via the Strategic Land Availability Assessment (29 November 2018) indicates that there is only one piece of land (as shown in appendix A), some of which is still currently allotments. The land is actually in two parts and has been since around 1975, as indicated in Appendix B, which shows two boundary lines. These have been incorporated into one piece of land in the site assessment. I will be updating the status of the land with the council to make them aware of these issues and to avoid any future problems.
A0348	B032	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.2 HHH001 & HHH014	Not Specified	Yes	Not Specified	Note the Council has undertaken 'Supplementary Site Assessments' with regard to proposed allocations HHH001 and HHH014. Whilst this is welcomed, it is unclear that the significance of these sites to the Hodnet Conservation Area & to the Registered Park and Garden of Hodnet Hall has been fully considered. Further analysis, in line with the methodology set out in HEAN 3, is therefore suggested prior to allocation. Specifically, the 1st edition OS map shows a gap in boundary planting along the east side of Hodnet Hall Registered Park, opposite HHH001 and HHH014. This would appear to have provided a view to the rural landscape to the east, across the allocation site, and possibly into the distance; perhaps intended to be seen while travelling along the south drive of Hodnet Hall. Although this view is no longer available, it could be recoverable. Development on HHH001 and HHH014 would remove this possibility and also lead to the further, incremental loss of the rural setting of the park along its east boundary, as new clusters of settlement would join and become contiguous with the original village and conservation area. This would have a degree of harmful impact on the significance, derived from its setting, of the registered park and garden and potentially the other heritage assets within it. Note that the Development Guidelines for these sites include the requirement for a Heritage Impact Assessment and a high-quality site design and layout. However, note that the Supplementary Site Assessment sets out several more detailed measures to ensure that any residual harm to the Hodnet Conservation Area and other heritage assets will be mitigated, such as: low density development; incorporating well designed landscape and amenity space; good quality timber joinery detailing; and a palate of materials that is informed by, and in keeping with, the local vernacular. Suggest the proposed Development Guidelines are strengthened by the inclusion of these additional measures in order to conserve and enhance the historic environment of Hodnet.
A0020	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7	Not Specified	No	Not Specified	Where no allocations are proposed as is the case of Woore, it undermines the ability of the settlement to ensure its longer term sustainability. We, therefore, consider the policy unsound as it is not effective in that it will not enable Woore to ensure its longer term sustainability which is set out as an objective in Policy SP2.
A0020	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Not Specified	No	Not Specified	SP9 is overly restrictive in controlling new housing development on sites outside the development boundary around a settlement. The application of this policy in conjunction with SP7 will in our view lead to the constraint of new housing coming forward in Woore
A0020	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.2 Community Hubs: Market Drayton Place Plan Area	Not Specified	No	Not Specified	The absence of an allocation in the Local Plan coupled with the Neighbourhood Plan's silence on allocating any land for residential development combine to seriously undermine the Council's objective of sustaining rural villages such as Woore.
A0527	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.2 Pipe Gate	Not Specified	No	Not Specified	The Community Hub relates to all three parts of the settlement – It is irrational not to include all parts of the group of settlements for inclusion from housing development which is sustainable without reasoned justification and. All the more so when the presence of the Public House IN PIPE GATE close to our site was an important consideration in the original allocation of this cluster grouping for housing development. The landowners of Pipe Gate are entitled to equal consideration. For this reason the plan is unsound

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0513	B003	Draft Policy S11.2 should be revised to indicate employment development, including on sites that may lie just outside the development boundaries of Community Hubs, will be considered seriously and planned development on such sites will be encouraged. Site HKW014 should be allocated for employment development (an identified on the Inset Map for Hinstock as such). Uses could include Class B, E, C2 and C2A and sui generis uses.	Shropshire Council considers that the proposed development strategy for Market Drayton and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	S11.2 Hinstock
A0643	B001	I believe that it is necessary and fair that I am involved in the assessment of the land and provide the necessary information so that a valid decision can be made on the piece of land. This process if not giving people a reasonable chance to be included in the plan or for proper decisions to be made. If proper checks had been made it would have been seen that this piece of land is in fact two separate pieces. Ideally land that has not been put forward for assessment should have been checked via the Land Registry to ensure accurate information is gained.	The Call for Sites was undertaken in 2017 and land owners had the opportunity for years after this to promote their land as part of the Local Plan Review. It is therefore considered that landowners or those representing them had significant time to promote their land for development, and Shropshire Council undertook a long and robust site assessment process which ultimately led to the preferred allocations.	No	S11.2 Hinstock
A0348	B032	Undertake further analysis of the site, in line with the methodology set out in HEAN 3, prior to allocation. This should consider the degree of harmful impact resulting from development of HHH001 and HHH014 on the significance, derived from its setting, of the registered park and garden and potentially the other heritage assets within it. Amend the proposed site guidelines for HHH001 and HHH014 to include the detailed measures identified within the Supplementary Site Assessment. Such as: low density development; incorporating well designed landscape and amenity space; good quality timber joinery detailing; and a palate of materials that is informed by, and in keeping with, the local vernacular.	It is considered that sufficient analysis of the impact of development on the significance of Hodnet Hall Registered Park and Garden and its setting has been undertaken both through the site assessment process and the Supplementary Site Assessment carried out by the Historic Environment Manager. However, a minor modification is proposed to the 3rd paragraph of the draft site guidelines for site HHH001 and HHH014 in Schedule 11.2 to reflect the need for good quality timber joinery detailing and a palate of materials informed by, and in keeping with, the local vernacular.	Yes	S11.2 Hodnet
A0020	B002	There should be housing allocations in Woore.	Shropshire Council considers the proposals for Woore is appropriate. It should be noted that the Woore Neighbourhood Plan was recently adopted and allows for housing development in the settlement.	No	S11.2 Woore, Ireland's Cross and Pipe Gate
A0020	B003	There should be housing allocations in Woore.	Shropshire Council considers the proposals for Woore is appropriate. It should be noted that the Woore Neighbourhood Plan was recently adopted and allows for housing development in the settlement.	No	S11.2 Woore, Ireland's Cross and Pipe Gate
A0020	B006	There should be housing allocations in Woore, specifically a site on Audlem Road	Shropshire Council considers the proposals for Woore is appropriate. It should be noted that the Woore Neighbourhood Plan was recently adopted and allows for housing development in the settlement.	No	S11.2 Woore, Ireland's Cross and Pipe Gate
A0527	B001	Consider Pipe Gate for Limited housing development especially self build housing which would be welcome by the Landowners	Pipe Gate forms part of a wider Hub with Woore and Irelands Cross. Shropshire Council considers the proposals for the Hub is appropriate. It should be noted that the Woore Neighbourhood Plan was recently adopted and allows for housing development in the settlement. Self-Build development should be discussed at the planning application stage.	No	S11.2 Woore, Ireland's Cross and Pipe Gate

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0622	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11	Yes	No	Yes	Syllenhurst Farm (NW of Woore's) is no longer a commercially viable farming unit and there is an opportunity to provide a mixed used site which will have a variety of benefits for the local community. Appreciate that this proposal has come forward at a late stage in the plan review. However, the changes to care over the past 12-18 months have highlighted the need for more community based residential and care based options. Woore's development boundary is so tightly drawn that it does not allow for any sustainable expansion.
A0622	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S11.2	Yes	No	Yes	Agree with Woore's proposed Community Hub status but feel the draft Policy is not effective as Woore only has a residential guideline of 88 dwellings, whereas other proposed Community Hubs' are much higher. Para 2 of draft Policy S11.2 indicates development should be delivered within development boundaries, but Woore's is so tight it leaves no room for sustainable expansion. A mixed site allocation is suggested to the north of Woore, which can provide housing as well as facilities such as a doctor's.
A0039	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S12.1 Minsterley MIN018	Yes	No	Yes	Guideline for this site is too low, particularly when compared to adjoining site.
A0347	B067	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Minsterley MIN018	No	No	Not Specified	This site is adjacent to spring/surface watercourses. Groundwater is potentially shallow, so foundation dewatering and surface water management aspects will need consideration.
A0570	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S12.1 Minsterley	Yes	No	Yes	MIN019 is a well located and fully deliverable site with an area of 16.71 ha, however hedgerows could be planted so that the development could be phased. We believe this site is suitably placed to provide development in the Community Hub of Minsterley with 155 dwellings by 2038, being situated with an access to Leigh Road and adjoining previously developed land and the development boundary. The current preferred site, MIN018 will have a much higher implications in terms of highways. I note the comment in the site consultation appraisal: 'This is a very large, open site, which if developed would yield development which would be out of scale with the existing settlement of Minsterley.' In this respect, the northern part of the site can be put forward, instead of the whole to be developed to fulfil the required target housing supply of 20 dwellings, as well as the provision a new school car park. This will also provide future proofing with the remainder remaining available for future development if and when required.
A0111	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S12.1 Pontesbury	Yes	Yes	Not Specified	Pontesbury Parish Council has been adequately consulted. Sites identified are capable of delivering required number of houses within the time span of the plan.
A0571	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S12.1 Pontesbury	Yes	No	Yes	PON001 is a fully deliverable site with an area of 1.25 ha, to assist in the delivery of the remaining dwellings to meet the preferred dwelling guidance of 175 dwellings by 2038. We believe this site is suitably placed to provide development in the Community Hub of Pontesbury being situated adjoining existing housing to the south and east boundary, and a natural screen to the north of the land with the dense woodland adjoining the old railway line. The site is also adjoining an already allocated site (PBY019), presently being developed, providing a natural infill.
A0452	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S12.1 PON040	Not Specified	Not Specified	Not Specified	Regulation 19: Pre-Submission Draft of the Policies Map S12-minsterley-pontesbury-place-plan-area-insetmaps.pdf Pontesbury Map Development Boundary Line adjacent to PONO40 is unsound & Sustainability Assessment <a href="https://shropshire.gov.uk/media/16792/sustainability-appraisal-appendix-mminsterley-and-pontesbury-place-plan-area-site-assessments.pdf">https://shropshire.gov.uk/media/16792/sustainability-appraisal-appendix-mminsterley-and-pontesbury-place-plan-area-site-assessments.pdf</a> for PON040 is unsound. There are many anomalies. Neither reflect the facts on the ground, or available evidence. They do not comply with paragraph 35 of the National Planning Policy Framework (NPPF) Test b. Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0622	B001	Our client's land should be considered for development as part of the LPR. The guideline for Woore should be expanded to at least 150 dwellings plus additional facilities. Para 5 of S11.2 should be revised to read: "Development proposals in Woore, Irelands Cross and Pipe Gate Community Hub will be expected to positively respond to policies and guidelines within the adopted Woore Neighbourhood Plan and wider local development needs"	Shropshire Council considers the proposals for Woore is appropriate. It should be noted that the Woore Neighbourhood Plan was recently adopted and allows for housing development in the settlement.	No	S11.2 Woore, Ireland's Cross and Pipe Gate
A0622	B003	Para S11.2 should be amended to consider a site allocation to the north of Woore off the A51.	Shropshire Council considers the proposals for Woore is appropriate. It should be noted that the Woore Neighbourhood Plan was recently adopted and allows for housing development in the settlement.	No	S11.2 Woore, Ireland's Cross and Pipe Gate
A0039	B001	Increase the site's housing guideline to 30 (and overall Minsterley/Pontesbury by 30 to 185)	Shropshire Council considers that the proposed development strategy for Minsterley & Pontesbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Shropshire Council considers the proposed capacity of MIN018 is appropriate. It should be noted that Para 4 of Draft Policy S12.1 recognises that the Provision figures are 'approximate'. It states "Development of site allocations should be in accordance with specified development guidelines and approximate site provision figures and all other relevant policies of this Local Plan." Shropshire Council has generally taken a precautionary approach to site capacity to ensure that the proposed housing requirement and proposed settlement guidelines are achieved. The specific number of dwellings and density of development that is appropriate on any proposed allocations will, if they are ultimately allocated, be determined at the Planning Application stage.	No	S12.1 Minsterley (MIN018)
A0347	B067	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S12.1 Minsterley (MIN018)
A0570	B001	MIN019 should be considered for residential allocation	Shropshire Council have undertaken a robust assessment of all of the promoted sites and consider the approach taken to the preferred allocations as being reasonable and appropriate for the Local Plan.	No	S12.1 Minsterley (MIN019)
A0111	B001	N/A	Noted.	No	S12.1 Pontesbury
A0571	B001	PON001 should be considered for residential allocation	Shropshire Council have undertaken a robust assessment of all of the promoted sites and consider the approach taken to the preferred allocations as being reasonable and appropriate for the Local Plan.	No	S12.1 Pontesbury (PON001)
A0452	B001	1) Add site PON040 to Regulation 19: Pre-Submission Draft of the Shropshire Local Plan 2016 to 2038 - to S12 Community Hub Schedule S12.1(i) p234 by amending this box: Land at Minsterley Road, Pontesbury (PON008, PON017 and PON030 AND PON040) 2) At the very least Add site PON040 to the LONG TERM POTENTIAL SLAA RESIDENTIAL SITES allocation. 3) Modify the Development Boundary Line for Pontesbury so that >40 years existing 1&2 Hinton Lane are correctly shown as inside the Development Boundary.	Shropshire Council have undertaken a robust assessment of all of the promoted sites and consider the approach taken to the preferred allocations and Development Boundaries as being reasonable and appropriate for the Local Plan.	No	S12.1 Pontesbury (PON040)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0088	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13. Much Wenlock Place Plan Area	No	No	No	<p>Place Plan Impacts: need for large site in Much Wenlock should be seen in context of Place Plan area. Impact of redevelopment of power station is extremely important in determining the role of Much Wenlock . Given, Place Plan geographies represent areas with functional relationships, the housing numbers/5 year supply required of the Much Wenlock Place Plan area have been addressed at the Power Station site and/or the infrastructure levy from those 1000 houses should deliver significant improvements for Much Wenlock.</p> <p>Redevelopment of the Ironbridge Power Station reduces the need for MW to provide additional housing. Do not agree that Ironbridge strategic site is only providing buffer. Calculation of 5 year land supply means supply will be integral; the Place Plan provides the structure for planning and infrastructure provision and there must be consideration of impacts on Much Wenlock infrastructure. LPR is dealing with the plan making process as a purely site allocation activity and is not being strategic as demanded by national policy and its reliance on Place Plans as local infrastructure strategies. Demand for a 5YHLS is important but not the determining factor for policy approach NB climate change ; sustainability; distinctive character of Much Wenlock etc.</p> <p>No acknowledgement that infrastructure in Much Wenlock also serves needs of Cressage and Buildwas, therefore development here will impact &amp; high risk of significant overdevelopment in the town &amp; Place Plan area.</p> <p>Scale of development at Ironbridge Power Station site significantly detrimental to Much Wenlock due to increased traffic flows along unsuitable roads &amp; within the Conservation Area. SC has not put forward mechanisms for addressing traffic and highways issues.</p>
A0088	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13. Much Wenlock Place Plan Area	No	No	No	<p>Traffic congestion and air quality impacts on the town's Conservation Area will be further exacerbated by the Plan proposal (3.142. p64) which designates, the 'strategic corridors' including 'Eastern Belt A4169/A458/A454. The proposal to accommodate housing and employment land for the Black Country under 'duty to co-operate' carries great risk that Much Wenlock on the east side of the county will become a commuter settlement for the Black Country/Telford. Lack of policies providing mitigation to help to offset the damage to well-being and infrastructure and prevent Much Wenlock becoming a dormitory car-dependent town for the Black Country. Likely impacts provide a strong argument for deleting the proposal for 1500 houses for the Black Country under the 'duty to co-operate'</p>

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0088	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13. Much Wenlock Place Plan Area	No	No	No	No acknowledgement that infrastructure in Much Wenlock also serves needs of Cressage and Buildwas, therefore development here will impact & high risk of significant overdevelopment in the town & Place Plan area.
A0225	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	No	No	<p>The draft Shropshire Local Plan in relation to Much Wenlock is not legally compliant as it has made little or no representation to the community and required by the legally adopted and current Much Wenlock Neighbourhood Plan.</p> <p>Whilst Much Wenlock Town Council support the draft Shropshire Local Plan, they failed to consult the community before making this decision.</p> <p>Proposed allocation MUW012VAR is prone to severe flooding (evidenced in Feb 2019 and Jan 2020). This decision has not been informed by appropriately qualified individuals.</p> <p>Draft site guidelines for proposed allocation MUW012VAR calls for excess water to be contained within the site (via an attenuation pond) with no run-off allowed, how is this possible when the pond is full and there is evidence of percolation through sub-strata.</p> <p>No consideration has been given to alternative sites which have been subjected to attenuation ponds, such as MUW008 which is still shown as liable to flooding although it did not flood in Feb 2019 - therefore for convenience no review has been undertaken after the floods.</p> <p>Much Wenlock is also threatened by over development from Ironbridge Power Station and Tasley, Bridgnorth.</p> <p>The A458 and A4169 are identified as part of the 'Eastern Strategic Corridor' from the Black Country to the M54, yet the Gaskell Corner junction is already at capacity and developers of Ironbridge Power Station admit development will overload the junction but present no plausible alleviation.</p>
A0231	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	Not Specified	Not Specified	<p>Consider Section S13 of the draft Shropshire Local Plan is not legally complaint for several reasons, in particular:</p> <p>-The draft Shropshire Local Plan purports to reflect policies and priorities of the Much Wenlock Neighbourhood Plan (MWNP), however there is no evidence to support this claim. Actually consider the MWNP and consultation responses from the local community have been ignored - for example the MWNP sets a total target and limit on the size of individual residential developments, but the draft Shropshire Local Plan proposes a large allocation (capacity increased during consultation, greatly increasing the overall guideline for Much Wenlock and making it the largest single development site in the settlements history).</p> <p>-Legal obligations derived from Shropshire Council's role as the lead agent for managing flood risk have not been respected. Much Wenlock is designated a highest category Rapid Response Catchment by the Environment Agency, meaning in the case of flash flooding there is likely to be serious and immediate danger to people and property. Enormous amounts of evidence on this matter have been presented, including relating to proposed allocation MUW012VAR, showing it is liable to flooding and contributes to flooding elsewhere. Under these circumstances, legally, the site should be disregarded if alternative sites not subject to no such risk exist (several such sites are included within the site assessment) but have not been proposed for allocation.</p> <p>The suitable and relatively easy solution to flood management on land adjacent to MUW012VAR has eluded the Council. Outsourcing floor risk management to developers is not acceptable.</p> <p>Representation details evidence sources considered.</p>

A0225	B001	<p>The A458 and A4169 are identified as part of the 'Eastern Strategic Corridor' from the Black Country to the M54, yet the Gaskell Corner junction is already at capacity and developers of Ironbridge Power Station admit development will overload the junction but present no plausible alleviation. The strategy for the east of the County needs to be re-thought.</p> <p>The Much Wenlock Neighbourhood Plan calls for small, managed development sites and these are available as brownfield (MUW001 and MUW002) and parts of sites (MUW008 for example) that are within 10 minutes of both the town centre, local school and recreation facilities.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides a development strategy for the settlement.</p> <p>Shropshire Council also considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. The draft Shropshire Local Plan has also been subject to a Stage 1 and Stage 2 Strategic Flood Risk Assessment, which alongside discussions with colleagues in the Flood and Water Management Team, have informed proposed site guidelines for MUW012VAR.</p>	No	S13.1 Much Wenlock
A0231	B001	<p>Delete proposed allocation MUW012VAR.</p> <p>Conduct a catchment wide assessment of flood risk and necessary flood prevention/attenuation works necessitated as a consequence of Much Wenlock being designated a Rapid Response Catchment in the highest category by the Environment Agency. Undertake these necessary works.</p> <p>If further development can be safely envisaged, revert to the scale and nature of housing approved in the Much Wenlock Neighbourhood Plan - smaller target on smaller sites catering for local needs including affordable housing and homes for the elderly.</p>	<p>Noted. The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides a development strategy for the settlement.</p> <p>Shropshire Council considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. The draft Shropshire Local Plan has also been subject to a Stage 1 and Stage 2 Strategic Flood Risk Assessment, which alongside discussions with colleagues in the Flood and Water Management Team, have informed proposed site guidelines for MUW012VAR.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	S13.1 Much Wenlock

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0231	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan is not sound as defined within the National Planning Policy Framework (NPPF). Draft Policy S13 is not positively prepared in line with Shropshire Council policies, the NPPF or Much Wenlock Neighbourhood Plan.</p> <p>Proposed allocation MUW012VAR fails to comply with Para 7 of draft Policy S13, relating to positively responding to relevant policies and guidelines identified within the Much Wenlock Neighbourhood Plan (MWNP), as it does not conform with the scale, nature of development or prioritisation of local housing needs for affordable homes and the elderly within the MWNP. This is a fundamental failure of soundness in the draft Shropshire Local Plan.</p> <p>MUW012VAR represents a 12% increase in the size of Much Wenlock, this is over-development in an environmentally sensitive area adjacent to the Shropshire Hills AONB. This is on top of existing completions/commitments (which have often responded to local need and arisen without need for an allocation). Cumulatively this represents a significant additional demand on local infrastructure which is evidenced as over-burdened. Without balancing housing, jobs and infrastructure through necessary improvements (including additional secondary school places, expanded medical centre, sewage disposal capacity, water supply, public transport and traffic management) the plan is unsound - no evidence that these issues have been fully addressed.</p> <p>Para 5.180 of the explanation to draft Policy S13 states consideration of surface water flooding is a key consideration for Much Wenlock, but proposed allocation MUW012VAR is subject to flooding and contributes to flooding elsewhere. Despite this, Shropshire Council have failed to take preventive actions to alleviate this off-site as recommended by its consultants in 2011.</p> <p>Place Plans are not mentioned in section 13.1 of the draft Shropshire Local Plan. This omission conceals considerable discrepancies between housing targets in Place Plans and the draft Shropshire Local Plan and major new development proposed within the Place Plan area within 5 miles of Much Wenlock (60 more homes at Cressage; and redevelopment of the Former Ironbridge Power Station in Buildwas Parish, which will have a considerable impact on Much Wenlock but is not referenced at all under section 13 of the draft Shropshire Local Plan being dealt with separately under S20 and there are not links between these draft Policies, recognition it is within Much Wenlock Place Plan Area, or consideration of the potential impact on Much Wenlock (particularly traffic and community services)).</p> <p>Lack of soundness clearly illustrated in failure to consult directly with the public in Much Wenlock on proposals and modifications, despite specific invitations. This is disturbing given high response rate and support from residents within the MWNP process.</p> <p>There has been no detailed consideration of why Much Wenlock is categorised as a highest category Rapid Response Catchment by the Environment Agency. Without this it is impossible to assess whether additional development can be safely accommodated, another reason the draft Shropshire Local Plan is unsound.</p> <p>Representation details evidence sources considered.</p>
A0234	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	No	Not Specified	<p>Legal status &amp; policies of Much Wenlock Neighbourhood Plan, in particular requirement for limited number of new dwellings to meet local needs on small sites, have been ignored;</p> <p>Council has not complied with legal duty as a risk management authority to avoid development on land that floods;</p> <p>Need to consider evidence of MWNP, Flood Water Management Act 2021, Localism Act 2011, Neighbourhood Planning Regulations 2012</p> <p>Site – lower part of preferred site subject to frequent flooding, with flooding severity &amp; frequency increasing in recent years potentially due to climate change and nearby development. No new housing should be permitted until flood problem resolved.</p>
A0299	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.1	No	No	No	<p>With regard to proposals for Much Wenlock:</p> <ul style="list-style-type: none"> <li>-A complete lack of consultation has occurred with local people, the local council and other local organisations. Consultation is limited to landowners/developers.</li> <li>-The current Much Wenlock Neighbourhood Plan (MWNP) has been ignored and proposals contradict it.</li> <li>-Much Wenlock has a long history of flooding, as it is sited in a 'bowl'. Flooding still occurs despite two recent flood mitigation schemes (attenuation ponds).</li> <li>-Proposed allocation MUW012VAR is adjacent to the Hunters Gate estate, which is regularly subject to serious flooding. Future development must include a pre-condition that this is resolved, however there is minimal local trust that development proposals will successfully drain the development site and the Hunters Gate estate.</li> <li>-Additional developed areas plus existing flood problems within the town must be fully assessed (including consideration of climate change). No substantial development should occur until this occurs.</li> <li>-Sufficient capacity must be available within the sewage treatment works.</li> <li>-There is severe congestion at the junctions of the A458 and A4169 (Gaskell Arms), this leads to congestion on surrounding roads as people seek to bypass it. Development of 1,000 dwellings on the Former Ironbridge Power Station and the 200 dwellings proposed for Much Wenlock will exacerbate this issue. This issue must be addressed, A by-pass is required for the settlement.</li> <li>-Much Wenlock is already becoming a commuter/retirement location. Do not consider sufficient employment opportunities can be provided for the residents of the proposed 200 dwellings for Much Wenlock and commuting will therefore increase.</li> <li>-A small number of dwellings should be provided to meet the needs of local young people.</li> </ul>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0231	B002	<p>Approve, fund and monitor a review of the Much Wenlock Neighbourhood Plan before proposing major changes to the principles and policies encompassed in the current iteration.</p> <p>Align proposals for Much Wenlock in the draft Shropshire Local Plan with the data in the Place Plan and adjust proposals for Much Wenlock based on analysis of the impact of the redevelopment of the Former Ironbridge Power Station.</p> <p>Delete proposed allocation MUW012VAR as it is inconsistent with Shropshire Council's responsibilities as the lead local flood authority and unsuitable for development prior to action following a whole catchment survey of flood risk.</p> <p>Conduct a catchment wide assessment of flood risk implicit in designation of Much Wenlock as a Rapid Response Catchment in the highest category by the Environment Agency to inform future plans.</p> <p>Plan only for development in Much Wenlock consistent with eliminating increased flood risk.</p>	<p>Noted. The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides a development strategy for the settlement.</p> <p>Shropshire Council considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. The draft Shropshire Local Plan has also been subject to a Stage 1 and Stage 2 Strategic Flood Risk Assessment, which alongside discussions with colleagues in the Flood and Water Management Team, have informed proposed site guidelines for MUW012VAR.</p> <p>The Place Plans are documents which focus on local infrastructure needs in communities across the county. Place Plan Areas generally consist of a main centre, its surrounding settlements and rural hinterland. These documents have informed consideration of infrastructure requirements associated with development proposals within the draft Shropshire Local Plan.</p> <p>Within the settlement policies section of the draft Shropshire Local Plan, Place Plan Areas are used for the presentation of settlement policies, rather than as areas subject to draft policies. The Former Ironbridge Power Station site is presented separately as draft Policy S20 in recognition of the scale of the site. However consideration of the infrastructure requirements associated with this development and its wider implications have been informed by the Place Plan and have/will be informed by appropriate technical studies.</p>	No	S13.1 Much Wenlock
A0234	B001	<p>Delete preferred site MUW012VAR</p> <p>Number and type of homes to reflect local need only. Overall short, medium- &amp; long-term strategy and sites &amp; location for development should be agreed in consultation with community through MWNP review.</p> <p>Comprehensive flood risk study required for Much Wenlock &amp; catchment</p>	<p>Noted. The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides a development strategy for the settlement.</p> <p>Shropshire Council considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. The draft Shropshire Local Plan has also been subject to a Stage 1 and Stage 2 Strategic Flood Risk Assessment, which alongside discussions with colleagues in the Flood and Water Management Team, have informed proposed site guidelines for MUW012VAR.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	S13.1 Much Wenlock
A0299	B001	<p>Completely revise the document after full and proper consultation.</p>	<p>Noted. The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0307	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13. MUW012VAR	No	Not Specified	Not Specified	<p>The Much Wenlock Neighbourhood Plan (MWNP) sets out clear objectives to focus development on small scale sites, in character with existing housing and meeting local needs (priority for affordable homes and homes for the elderly). The Draft Shropshire Local Plan ignores these objectives by proposing an allocation for 120 dwellings (MUW012VAR). As such claims the draft Shropshire Local Plan meets the objectives of the MWNP are rhetoric and it is contrary to local democracy and the Localism Act 2011.</p> <p>MUW012VAR is prone to surface water flooding which can develop very quickly (Much Wenlock is a Flood Rapid Response Catchment in the highest category and MUW012VAR is identified as an area at particular risk to life and property within an Environment Agency Briefing Note). Why allocate this site when others, that are not similarly effected, are available? As such, MUW012VAR is contrary to the draft Shropshire Local Plan, which identifies surface water flood risk as a very significant local consideration.</p> <p>Also consider proposals to delegate responsibility for the flood defences of MUW012VAR to the developer is contrary to the draft Shropshire Local Plan. Responsibility for the flood defences of the adjacent Hunters Gate estate were also the developers and it experiences severe flooding, do not want history repeating itself.</p> <p>Shropshire Council has ignored legal duties toward the National Flood Risk Strategy and Flood and Water Act 2020, by failing to identify and address flooding issues to the Hunters Gate estate.</p>
A0307	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13. MUW012VAR	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan is unsound in many critical areas, including:</p> <ul style="list-style-type: none"> <li>-The proposed housing requirement exceeds need, but no justification for this is provided. This results in over-development.</li> <li>-New housing and employment proposals for Much Wenlock supposedly respond to 'local needs', but the levels proposed exceed local need and disregard the principles of the Much Wenlock Neighbourhood Plan (MWNP).</li> <li>-The proposed residential guideline for Much Wenlock increased from 150 to 200 dwellings without any community consultation. Understand this is to make proposed allocation MUW012VAR viable (capacity of the site increased from 80 to 120 dwellings), this demonstrates the residential guideline is developer led rather than need led and unsound in relation to MUW012VAR.</li> <li>-Proposals ignore local views in Much Wenlock as set out in the MWNP.</li> <li>-Do not consider a single site for 120 dwellings is sustainable in Much Wenlock.</li> <li>-Proposed allocation MUW012VAR and the site selection process undertaken to identify it is unsustainable, inconsistent with wider draft Shropshire Local Plan policies and unsound as: it is located within flood zone with no evidence of how flood risk is to be assessed/mitigated without exacerbating issues elsewhere (contrary to draft Shropshire Local Plan policies); reliance is placed on the developer to resolve flood risk, about which there is little confidence based on previous experience; it is beyond the development boundary on best and most versatile (Grade 3a - see MAFF ALC survey map ALCW00299) agricultural land contrary to the National Planning Policy Framework (NPPF); the indicative capacity of 176 dwellings is concerning given capacity has already increased for viability reasons; it contradicts conclusions of two previous enquiries; there is recognition of the need to upgrade infrastructure for Much Wenlock which is overstretched (schools, medical practice, water supply, drainage, sewage, traffic congestion on narrow roads), but little evidence of how this can be achieved to support MUW012VAR (contrary to Para 5 of draft Policy SP2); and it will damage the historic town and its unique landscape.</li> <li>-The existing employment allocation has not been delivered and Telford is a more attractive option. As such Much Wenlock will become a dormitory for larger conurbations, increasing commuting, congestion and associated pollution/carbon emissions, contrary to climate change policies in the draft Shropshire Local Plan.</li> <li>-The impact of the 1,000 dwellings proposed at the Former Ironbridge Power Station site (within the Much Wenlock Place Plan Area) is not recognised in draft Policy S13. This would have a huge impact on Much Wenlock (services and roads network, particularly Gaskell corner which is already a congestion hot-spot that leads to congestion on the wider network as people seek to avoid it).</li> </ul>
A0337	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13 (MUW012VAR)	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan is unsound as:</p> <ul style="list-style-type: none"> <li>-An unsuitable site (MUW012VAR) is proposed for allocation because it is believed this will address flooding issues on the adjacent Hunters Gate Estate. Yet this issue (present since development occurred) has not been addressed by the developer of Hunters Gate or Shropshire Council, despite other parts of the town receiving flood alleviation.</li> <li>-Legal commitments set out in the Statement of Community Involvement (SCI) relating to meaningful public engagement (no community meetings and ignoring community suggestions) have not been met.</li> <li>-The site selection process is flawed as it ignores alternative and potentially better sites - discussions have only ever occurred with a single landowner (scheme size increased to suit their commercial needs).</li> <li>-MUW012VAR a large development is proposed outside the development boundary and beyond walking distance to amenities (shopping, GP, library, schools etc), increasing reliance on cars, exacerbating existing issues (increased traffic (Gaskell Corner a particular pinch point) and rat running in narrow medieval streets) and with no solutions.</li> <li>-Housing and employment provision is not balanced in Much Wenlock, meaning it will become more of a dormitory town.</li> <li>-Proposal make a nonsense of Council zero-carbon aspirations and increase emission pollution in Much Wenlock - traffic associated with Much Wenlock, the Former Ironbridge Power Station and BRD030 in Bridgnorth.</li> <li>-There is no appreciation of the characteristics of Much Wenlock and proposals undermine them (medieval heritage and tourist destination).</li> <li>-Development will increase pressure on already overburdened services (GP, water supply and sewerage). No infrastructure improvements are proposed to support the 15% increase in the size of the town.</li> </ul>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0307	B001	Embrace the principles of the Localism Act (2011) and the Much Wenlock Neighbourhood Plan (MWNP) by removing proposed allocation MUW012VAR and including smaller sites outside flood zones.	<p>Noted. The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides a development strategy for the settlement.</p> <p>Shropshire Council considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. The draft Shropshire Local Plan has also been subject to a Stage 1 and Stage 2 Strategic Flood Risk Assessment, which alongside discussions with colleagues in the Flood and Water Management Team, have informed proposed site guidelines for MUW012VAR.</p>	No	S13.1 Much Wenlock
A0307	B002	Remove proposed allocation MUW012VAR and instead include smaller brownfield sites outside flood zones, which meet actual local needs (affordable homes and homes for the elderly) in accordance with the Much Wenlock Neighbourhood Plan (MWNP).	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides a development strategy for the settlement.</p> <p>Shropshire Council considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. The draft Shropshire Local Plan has also been subject to a Stage 1 and Stage 2 Strategic Flood Risk Assessment, which alongside discussions with colleagues in the Flood and Water Management Team, have informed proposed site guidelines for MUW012VAR.</p>	No	S13.1 Much Wenlock
A0337	B001	<p>Ensure flood risk is addressed before development is considered (a whole town solution is required for Much Wenlock).</p> <p>Ensure an infrastructure plan is prepared before site allocations proposed.</p> <p>Factor in impact of major development at the Former Ironbridge Power Station site when planning for Much Wenlock.</p>	<p>Shropshire Council also considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. The draft Shropshire Local Plan has also been subject to a Stage 1 and Stage 2 Strategic Flood Risk Assessment, which alongside discussions with colleagues in the Flood and Water Management Team, have informed proposed site guidelines for MUW012VAR.</p> <p>The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p>	No	S13.1 Much Wenlock

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0337	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13 (MUW012VAR)	No	Not Specified	Not Specified	The draft Shropshire Local Plan is not legally compliant as: -It is contrary to the Localism Act/national policy as it is not consistent with the positive vision of sustainable growth in the Much Wenlock Neighbourhood Plan (and the views of the community it reflects). Rather it imposes an unsuitable and commercially drive solution. -Duty to manage flood risk in Much Wenlock (particularly Hunters Gate) have been ignored.
A0370	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.1	Not Specified	Yes	Not Specified	This policy is supported as it recognises the role of Much Wenlock as a service centre for a large rural hinterland and its location on a 'strategic corridor' (the A458). Paragraph 3.142(a) of the Plan identifies that the A458 is a Strategic Corridor and Policy SP14: Strategic Corridors states that the "Shropshire Economic Growth Strategy seeks to deliver a 'step change' in the capacity and productivity of the local economy. To contribute to this aim, 'Strategic Corridors' along the principal rail and strategic road routes through the County will be the primary focus for major employment development". Whilst criterion 4(a) of policy SP14 recognises that, in order to achieve a sustainable pattern of development, employment growth in these corridors will need to be balanced with an appropriate level of housing growth. Given the above, it is evident that Much Wenlock should be a significant centre for growth in Shropshire, both socially and economically. The identification of land to the south-east the town (allocation MUW012VAR) is also supported as this land is unconstrained, lies in a highly sustainable location and will deliver substantial community benefits both on and off site by way of flood alleviation. The land will therefore make a significant and unique contribution towards meeting the growth needs of both the Town and the County.
A0389	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	MUW012VAR S13.1.1&4 SP12	No	No	No	The draft Local Plan ignores 'localism' legislation and policies & does not comply the Much Wenlock Neighbourhood Plan. Local authority has failed in its legal duties in respect of flooding, a major issue in Much Wenlock, despite extensive representations from affected local residents. The suggestion that employment can be generated in Much Wenlock is unsound, as evidenced by the failure, over many years, of take-up of land made available
A0416	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	No	Not Specified	The draft Shropshire Local Plan ignores the status and policies of the Much Wenlock Neighbourhood Plan (MWNP). The proposed allocation MUW012VAR is developer led and too large for the town. No meaningful engagement has occurred within the local community to understand their multiple concerns has occurred. Shropshire Council has ignored its legal duty regarding flood risk management by entrusting such matters to the developer. Consider developer led infrastructure solutions are often inadequate and Hunters Gate (adjacent to MUW012VAR), which still experiences flooding issues, is a good example of this. Concerned increased run-off associated with increased urbanisation will increase risk to existing properties, particularly those associated with Farley Brook the only watercourse to the River Severn from Much Wenlock and its environs.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0337	B002	Consult the Much Wenlock community if proposing changes to the Much Wenlock Neighbourhood Plan. Meet obligation to control flooding. Delete proposed allocation MUW012VAR.	The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides a development strategy for the settlement. Shropshire Council considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. The draft Shropshire Local Plan has also been subject to a Stage 1 and Stage 2 Strategic Flood Risk Assessment, which alongside discussions with colleagues in the Flood and Water Management Team, have informed proposed site guidelines for MUW012VAR.	No	S13.1 Much Wenlock
A0370	B001	n/a	Support noted.	No	S13.1 Much Wenlock
A0389	B001	New employment opportunities in Much Wenlock need provision of pre-fabricated units. fitted out to a basic level with electricity and sanitation	The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides an appropriate development strategy for the settlement. The Council has considered flood risk through its Strategic Flood Risk Assessments (Stages 1 and 2) and these have informed the proposed site allocations and the Sequential and Exception Tests.	No	S13.1 Much Wenlock
A0416	B001	Review and restructure the draft Shropshire Local Plan to take account of the Much Wenlock Neighbourhood Plan (MWNP), informed by engagement with the local community. Consider impact of the proposed development of the Former Ironbridge Power Station on Much Wenlock. Comprehensively review flood risk mitigation measures required within the town and Farley. Infrastructure must address existing issues and support development of the town within the parameters of the MWNP.	Noted. The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides a development strategy for the settlement. Shropshire Council considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. The draft Shropshire Local Plan has also been subject to a Stage 1 and Stage 2 Strategic Flood Risk Assessment, which alongside discussions with colleagues in the Flood and Water Management Team, have informed proposed site guidelines for MUW012VAR. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans.	No	S13.1 Much Wenlock

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0418	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13 (MUW012VAR)	No	No	Yes	<p>Object to proposed allocation MUW012VAR.</p> <p>Development of MUW012VAR alongside proposals for the Former Ironbridge Power Station and at Cressage (CES005) will more than double the population of the Much Wenlock Place Plan Area (within a concentrated part of it), placing a disproportionate burden on Much Wenlock town and does not constitute balanced growth (housing, employment and infrastructure balanced which is a clear aspiration of the Much Wenlock Place Plan).</p> <p>There is no guarantee that MUW012VAR would provide:</p> <ul style="list-style-type: none"> <li>-A range of house sizes and tenures to meet local needs (including how much affordable housing and whether this is reserved for those with local connections to Much Wenlock, as required within the Much Wenlock Neighbourhood Plan (MWNP));</li> <li>-Public open space and recreation facilities, especially for young people.</li> <li>-Flood attenuation measures that alleviate flooding at the Hunters Gate Estate. They will not alleviate flooding throughout the town/along Farley River. Also, Government has committed to substantial investment in flood defences by 2027, concerned MUW012VAR may be used as a reason not to invest in Much Wenlock.</li> </ul> <p>Water supply and sewerage is insufficient for existing demand, without significant investment it will not be able to cater for MUW012VAR.</p> <p>Due to distance of MUW012VAR from the retail core, people will not walk. Once in the car opportunities for more comprehensive offers are available in Shrewsbury/Telford/Bridgnorth/Madeley etc. As such, economic benefits for the town's traders, businesses and workforce will be limited.</p> <p>MUW012VAR is not in alignment with policies and aspirations of the MWNP. Shropshire Council acknowledge that the aspirations of the MWNP are currently being fulfilled (strong likelihood that two brownfield sites (MUW001 and MUW002) will come forward with capacity for at least 28 dwellings).</p> <p>Road infrastructure in and around Much Wenlock is fragile, development of MUW012VAR (in combination with the Former Ironbridge Power Station and at Cressage (CES005)) will detrimentally impact on road users (including pedestrians, cyclists and commuters), particularly at pinch points like the junction of the A458 and A4169 and Gaskell junction. It will also increase noise, emissions and congestion.</p> <p>Medical facilities in Much Wenlock and Cressage are already at capacity.</p> <p>Education facilities will over time expand to accommodate pupils from the Former Ironbridge Power Station, but no account is made to development in Much Wenlock and Cressage.</p> <p>Consider windfall sites (including the aforementioned brownfield sites) would achieve the original proposed settlement residential guideline of 150 dwellings. Current proposed may mean development well exceeds the proposed residential guideline (300 rather than 200 dwellings).</p>
A0420	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.1 MUW012VAR	No	No	No	<p>Selection of proposed allocation MUW012VAR ignores the status and policies of the Much Wenlock Neighbourhood Plan (MWNP) simply because the draft Shropshire Local Plan runs to 2038 and the MWNP runs to 2026. This selection also ignores community wishes and occurred before community consultation.</p> <p>MUW012VAR was selected to meet housing numbers, irrespective of strategic issues such as transport/traffic and flood management, particularly in relation to the potential effect of the Ironbridge Power Station development in Buildwas Parish which lies in the Much Wenlock Place Plan area.</p> <p>Shropshire Council has ignored its legal duties as a risk management authority in relation to flooding, despite past representations from the public. They are reliant on the developer of MUW012VAR carrying out all necessary flood management tasks satisfactorily and have ignored other higher-rated (good rather than fair) sites in the town with no flooding issues.</p>
A0470	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	No	Not Specified	<p>The Shropshire Local Plan is both not legally compliant and is unsound because it entirely disregards the Much Wenlock Neighbourhood Plan as regards the location and size of developments and building of additional housing. There is no problem over the number of additional homes to be provided within the town but the total disregard of the way in which such houses are to be provided has been ignored, rendering the Plan not legally compliant and unsound.</p>
A0470	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	No	Not Specified	<p>The selection of MUW012 has been carried out in a negligent way making it unsound. It floods but the SA states that 0% of the site lies within 20m of a historic flood event. MUW008 should have been selected instead. There has been misinformation around MUW012 and this was enlarged on commercial ground from the developer without local consultation.</p>

A0420	B001	<p>Treat Much Wenlock in the same way as other Neighbourhood Plan towns.</p> <p>Prepare an infrastructure investment strategy (particularly highways) to support the proposed 15% increase to the size of the town.</p> <p>Properly assess alternative sites.</p> <p>Specify how traffic problems on A458, A4169 and the medieval streets of Much Wenlock will be addressed.</p> <p>Explain why cross-boundary need from the Black Country is being accommodated in Shropshire.</p> <p>Recognised the effect of wider development in the Much Wenlock Place Plan area (including the Former Ironbridge Power Station) on Much Wenlock town.</p>	<p>Noted. The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides a development strategy for the settlement.</p> <p>Shropshire Council considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. The draft Shropshire Local Plan has also been subject to a Stage 1 and Stage 2 Strategic Flood Risk Assessment, which alongside discussions with colleagues in the Flood and Water Management Team, have informed proposed site guidelines for MUW012VAR.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans.</p>	No	S13.1 Much Wenlock
A0470	B001	Follow the contents of the Much Wenlock Neighbourhood Plan	The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides an appropriate development strategy for the settlement.	No	S13.1 Much Wenlock
A0470	B002	The policy in the Plan should reflect a correct and not a seriously negligent appraisal of the sites within the town. This undoubtedly will conclude that MUW012 is unsuitable and that some part of MUW008 should be selected as the preferred.	The proposed site allocations in Much Wenlock have been informed by a proportionate and robust site assessment process which has taken flood risk into account.	No	S13.1 Much Wenlock

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0471	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	Not Specified	Not Specified	It is claimed that sites and development numbers for Much Wenlock can be set because the Neighbourhood Plan only lasts until 2026 but the Local Plan is until 2038. The TC have said that they do not need to update the Neighbourhood Plan, if it does not need updating then why have SC decided to impose development and a single site option totally out of step with the provisions of the current Neighbourhood Plan? As evidence by the submission made by the Much Wenlock Neighbourhood Plan Refresh Group there are suitably qualified and experienced local residents ready and willing to find the evidence required to update it. Further SC are willing to accept that the proposed Broseley Neighbourhood Plan should find appropriate as yet unidentified sites for a Neighbourhood Plan which has as yet to be legally finalised. In the Introduction to this draft (page 10), paras 2.29 and 2.30 SC claims it has a positive and proactive approach to Neighbourhood Plans. If so why did it fail to have the MW Neighbourhood Plan and the Shifnal Neighbourhood Plan updated instead of SC taking control and putting its own options to cover the extra 12 years?
A0499	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	Not Specified	No	Not Specified	The draft Shropshire Local Plan is unsound as: -Shropshire Council delegated authority to run consultation meetings to a site promoter. -Shropshire Council changed its proposed option (increasing housing numbers) to meet landowners commercial needs after directly negotiating with them. -The Much Wenlock Neighbourhood Plan (MWNP) allows only small incremental housing developments and focuses on areas not liable to flooding. Shropshire Council also has a responsibility to take account of flood risk before considering new developments. MUW012VAR has flooded on numerous occasions, as such it is contrary to these. -No reference is made to enhancement of infrastructure (urgently needed to support proposals). -Draft Policy S13 has no consideration of the proposed redevelopment of the Former Ironbridge Power Station and the associated impact on Much Wenlock services and traffic problems. This current MWNP (democratically approved by the majority of Much Wenlock residents) has demonstrated it can meet the local development targets as such there is no proven need to deviate from it. Shropshire Council need to demonstrate the legal precedent or face legal challenge from local groups.
A0499	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	Not Specified	Not Specified	The draft Shropshire Local Plan is not legally compliant as it ignores/contradicts the Much Wenlock Neighbourhood Plan (MWNP), which has been democratically adopted by the Town through referendum. Specifically: -The MWNP safeguards local infrastructure (e.g. traffic, drainage, sewage, health through incremental sustainable development, but development proposals exceed those in the MWNP. -Housing proposed is not affordable and numbers are far in excess of demonstrable local need. -It ignores the legal duty regarding flood management by proposing large development without first demonstrably addressing the flooding issue. -Public consultation was devolved to site promoters (biased). The Secretary of State has confirmed "Once a neighbourhood plan has been approved at referendum, it forms part of the statutory development plan and becomes the starting point in making planning decisions."
A0632	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13 Much Wenlock	No	Not Specified	Not Specified	Not legally compliant because it ignores the 2014 adopted Neighbourhood Plan (Act of Parliament). The Neighbourhood Plan does not call for around 200 dwellings, in one batch, but for gradual development which allows the town to retain its character and to improve its infrastructure; drains, roads, alleviation of flooding, in line with development. The Council has not met its commitment to meaningful public engagement. The work of Neighbourhood Plan Refresh has been ignored by both Shropshire Council and the Town Council. This is inexplicable. Much Wenlock is fortunate to have both committed life-long residents and newer arrivals – retirees with time and energy to care. No-one wants to stop all development but they want a step by step approach to meet local needs – e.g. affordable housing, housing for the elderly. They want elected representatives who listen, consult and liaise openly with all concerned; the public, land-owners, Severn Trent, traffic managers. Plans to manage the flood risk and a huge increase of traffic from neighbouring developments are far from clear.

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0096	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.1 Much Wenlock MUW012VAR	No	No	No	MUW012VAR is a large scale development which was not agreed in the Neighbourhood Plan. The field that regularly floods. As the town has a flood risk of rapid flooding why is a whole town solution not being sought to put in place a plan building an infrastructure that can enable any growth to happen safely.
A0347	B068	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Much Wenlock MUW012VAR	No	No	Not Specified	The site falls within SP22/3. Appropriate land use, mains foul drainage, surface water drainage design and pollution prevention measures will be required.
A0371	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.1 MUW012VAR	Not Specified	Yes	Not Specified	To rely on windfall and exception sites to meet the needs of the settlement over the Plan period would fail to recognise that, without amendment to the development boundary of the settlement, windfall sites are a finite and diminishing resource and a significant reliance on such sites to meet the needs of a settlement is therefore considered to be wholly inappropriate. It is therefore considered essential that land is included within the development boundary of the town and allocated for residential development to ensure that the housing needs of the settlement and surrounding area are met, that existing issues with the built environment may be addressed and, consequently, that the aims and objectives of the Plan are realised. Given the flood modelling, it is considered evident that the proposed allocation of MUW012VAR will enable the provision of surface water drainage infrastructure that will provide a betterment by alleviating the risk of flooding in this area of the town and will assist in mitigating the effects of climate change. The implementation of a roundabout would improve the highways for the area.
A0469	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.1	No	Not Specified	Not Specified	The LPR totally ignores the provisions of the current Much Wenlock Neighbourhood Plan. The single commercially driven site is completely out of scale (MUW012VAR). The attempted justification is that the County Council can impose this because the Neighbourhood Plan only runs to 2026. The submission made by the Much Wenlock Neighbourhood Plan Refresh Group to this and the Draft Regulation 18 of the LPR shows that there are highly qualified people in Much Wenlock perfectly prepared to update the Neighbourhood Plan to 2038. A further inconsistency is that other Neighbourhood Plans e.g. Broseley (8.4), which have yet to be officially made are incorporated. Even though they have as yet to identify their Sites. The Council has legal duties to look at the risk of flooding and chose sites least likely to flood. especially as Much Wenlock is officially a Rapid Response Flood Catchment Area. The Site MUW012 VAR has flooded twice this year. Unlike any other Site assessed. Comment on the choice of Site has been put under the 'Sustainability Appraisal of the Regulation 19: Pre-submission Draft of the LPR a required.
A0469	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.1	Not Specified	No	Not Specified	Shropshire Council's Statement of Community Involvement says that there should be meaningful opportunities for the public to engage in looking at the possible options for development in the town and help shape the policy. Council officers have declined invitations to community meetings and ignored the community views that have been submitted. More particularly the original preferred Site MUW012 was reached with no other option being put to the town. Despite objection to the former it then arbitrarily morphed into the much larger MuW012VAR to suit the claimed needs of the landowner and developer. Shropshire Council has said that any dissenting views can be aired at the Examination in Public. The Site Assessments for Much Wenlock (See separate response to the Sustainability Appraisal) are flawed. It has ignored the sequential test that Councils should choose sites that are not at risk from flooding. It has chosen one that requires serious flood attenuation. It has said that a scheme to attenuate surface water flooding will be required apparently ignoring the probably more serious threat from ground water. There is an artesian well and springs in the field to the East of the MuW012 VAR site. The Council has not considered the strategic impact on the medieval streets and congested main road 'unction A458/A4169 of this and other major local developments or the general flood management in the town

A0641	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.1 Much Wenlock MUW012VAR	No	No	Not Specified	<p>The proposed site allocation ignores the status and policies of the Much Wenlock Neighbourhood Plan, which explicitly rejects large site development in favour of organic small-site development to meet local needs. This has worked successfully throughout the past six years with a steady number of dwellings being completed in each year. Although the Shropshire Local Plan extends beyond the Neighbourhood Plan's period of operation, no justification is given for not continuing with its policies or principles in future years. The site allocation proposed is one which is commercially driven and is not in accordance with community wishes.</p> <p>In Shropshire Council's Statement of Community Involvement, it commits to undertake meaningful public engagement. However no recent effective surveys or widespread consultation of the community have been undertaken either by Shropshire Council or the Much Wenlock Town Council about local wishes and needs. The consultation which did take place around the Place Plan included only details on proposed development of the site allocation which have since been modified and extended through negotiation with the landowner, seemingly to meet the landowner's commercial needs. There was little support shown for the proposed site allocation in the Place Plan consultation and the subsequent changes increase the proposed number of dwellings, thus extending the divergence from the policies in the Much Wenlock Neighbourhood Plan.</p> <p>The Neighbourhood Plan, which was the outcome of extensive public consultation and survey work and overwhelmingly approved in a local referendum, expressed the clear preference of the community for small scale development. There has been no public consultation or survey work which would indicate a change in the views of local residents and businesses in the intervening time.</p>
A0067	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Paras 16.15 to 16.28	Yes	No	No	<ol style="list-style-type: none"> <li>1. Cressage should remain open countryside not be designated a Community Hub to ensure no significant housing development will take place in the proposed Plan period. This would reflect the view of the majority of residents.</li> <li>2. Draft Shropshire Local Plan targets are too high, process undemocratic &amp; will not deliver sufficient affordable housing (lack of soundness on this basis also highlighted by CPRE). Identified growth not sustainable, particularly in view of climate emergency.</li> <li>3. Full needs assessment required to understand what is needed for the village</li> <li>4. Parish Council has not challenged Community Hub status or accurately represented local view - this should be considered by the Inspector.</li> <li>5. Shropshire Council has not been sufficiently resourced to properly consider consultation responses and responses have been ignored with no feedback given.</li> <li>6. Consultation not been satisfactory or appropriate during Covid 19 pandemic restrictions and Reg 19 &amp; should be re-run. Consultation specifically has not adhered to Gunning principles, particularly adequate access &amp; time for consideration and response since libraries have been closed denying access for persons without internet access.</li> <li>7. Community Hub status based on flawed scoring system is incorrect, in particular points awarded for mobile library being the same as a permanent library; points awarded for a closed place of worship and a pharmacy when there is only a dispensing surgery &amp; points awarded for public transport links provide no differentiation between levels in larger towns and Cressage.</li> </ol>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0641	B001	Removing site allocation MUW012VAR from the Local Plan and its replacement with proposals consistent with the Much Wenlock Neighbourhood Plan.	The draft Shropshire Local Plan works alongside the aspirations of Neighbourhood Plans where they share the same plan period. In the case of Much Wenlock, as the Neighbourhood Plan covers the period to 2026 (in accordance with the adopted Local Plan) there is a need for Shropshire Council to plan effectively for a further 12 years to the end of the new proposed Plan period to 2038. As such the draft Shropshire Local Plan provides an appropriate development strategy for the settlement. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.	No	S13.1 Much Wenlock (MUW012VAR)
A0067	B001	Inspector to consider flawed Community Hub scoring system; whether appropriate consideration and weight given to previous consultation responses and adequacy of current consultation during the pandemic should be scrutinised at examination. CPREs response & objections should be fully considered.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate for Cressage to be identified as a proposed Community Hub.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings towards unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate that Cressage is identified as a proposed Community Hub and it is proposed to identify a development guideline, development boundary and to identify proposed allocations - consistent with other rural settlements considered to be appropriate Community Hubs for policy purposes. Shropshire Council also consider that this proposed development strategy for Cressage, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and they informed the continued development of the draft Shropshire Local Plan. It is recognised there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on any issue. Where there has been disagreement or objection to proposals within responses to each stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p>	No	S13.2 Cressage

Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate for Cressage to be identified as a proposed Community Hub.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings towards unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council also consider that the development strategy proposed for Cressage, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and they informed the continued development of the draft Shropshire Local Plan. It is recognised there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on any issue. Where there has been disagreement or objection to proposals within responses to each stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p>	No	S13.2 Cressage

Consultation specifically has not adhered to Gunning principles, particularly adequate access &amp; time for consideration and response since libraries have been closed denying access for persons without internet access.</p> <p>7.Community Hub status based on flawed scoring system is incorrect, in particular points awarded for mobile library being the same as a permanent library; points awarded for a closed place of worship and a pharmacy when there is only a dispensing surgery &amp; points awarded for public transport links provide no differentiation between levels in larger towns and Cressage.</p>
A0149	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	Not Specified	No	Not Specified	<p>S13 and its associated schedules are unsound. The strategy for the area, and specifically the strategy for Cressage is not justified as it is not the most appropriate strategy when considered against the reasonable alternatives, it is not deliverable over the plan period and is inconsistent with national policy. Cressage is lacking in several services and amenities. To address local circumstances the draft settlement policies relating to Cressage would need to improve barriers to housing by providing more, deliver employment, deliver adequate green space and deliver highway safety improvements. The draft policies for Cressage fail to meet the criteria set out above as required by Paragraph 77 of the NPPF and the policies are therefore inconsistent with national policy. There is insufficient evidence to demonstrate that site CES005 can be delivered. Even if the site were deliverable, there is no evidence that 60 dwellings could be provided on site CES005 without significant conflict with other draft policies of the local plan. There is a need for employment land in Cressage.</p>
A0149	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.1 Much Wenlock	Not Specified	No	Not Specified	<p>The policies for the Much Wenlock Place Plan area fail to deliver on the draft plan's strategic objectives: they do not provide sufficient growth to meet the growth projections of the Place Plan area and do not propose additional growth above the needs of the Place Plan area to deliver the Economic Growth Strategy or contribute to the links between Shropshire and the West Midlands region. Much Wenlock has 1.7% of the households in Shropshire. If growth across Shropshire were planned to be proportionate to the existing distribution of population then the approach for Much Wenlock Place Plan area would equate to approximately half of what it should be.</p>

A0149	B007	<p>The housing guideline for Cressage should be 140 dwellings.</p> <p>Our site at Shore Lane would provide the improvements needed in Cressage and should be a housing allocation.</p> <p>CES005 should have its guideline reduced to 40 dwellings due to housing densities. Site CES002 is promoted by the Raby Estate as a mixed-use scheme and will assist with the lack of employment in Cressage. This site should be allocated.</p> <p>S13.2 para 3 should read (additions in asterisks, deletions in square brackets): 3. Within Cressage, *500sqm floor space of* employment development will be delivered through *a mixed-use allocation* appropriate [small-scale windfall employment development within the settlements development boundary, as shown on the Policies Map], where it is consistent with Community Hub Policy SP8 and other relevant policies of this Local Plan.</p>	<p>Shropshire Council considers that the proposed development strategy for Cressage which is to change from being a settlement in the countryside to become a Community hub, the housing guideline figure, the proposed development boundary and the proposed allocations that contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). The identification of proposed allocations were informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways matters with colleagues in the Developing Highways team. Sites have been chosen that will deliver a range of benefits for the community including measures to address the issue of traffic speeding through the speed restricted zones of the village. Traffic passing through Cressage already causes highway safety issues specifically because traffic control measures provide the only means to control the traffic flows and speeds. Development to meet the needs of existing and future residents of Cressage will require direct access to the A458 due to highway constraints elsewhere in the village. This form of development may also provide an effective means to reduce traffic speeds through the settlement and improve highway safety for the benefit of the local community. This will require a suitable scale of development for Cressage and the relatively modest housing guideline figure of 80 dwellings is considered to be appropriate to the size and function of the settlement. The greater proportion of this requirement is to be delivered on site CES005 (60 dwellings) which comprises a relatively flat, open and accessible development opportunity. The design of the development scheme for this site may have a positive impact on the traffic flows through the village. Residents of the proposed development will also have ready access to the principal services in the village particularly through the footway network within the village.</p>	No	S13.2 Cressage
A0149	B008	A positive step towards achieving soundness of policies of the local plan would be to increase the residential guideline in Cressage and to ensure that any development coming forward within Cressage is a mixed residential and employment scheme	Shropshire Council considers that the proposed development strategy for Cressage and the housing guideline figure are appropriate and effective,	No	S13.2 Cressage

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0230	B001	Inspector to consider flawed Community Hub scoring system; whether appropriate consideration and weight given to previous consultation responses and adequacy of current consultation during the pandemic should be scrutinised at examination. CPREs response & objections should be fully considered.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate for Cressage to be identified as a proposed Community Hub.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings towards unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate that Cressage is identified as a proposed Community Hub and it is proposed to identify a development guideline, development boundary and to identify proposed allocations - consistent with other rural settlements considered to be appropriate Community Hubs for policy purposes. Shropshire Council also consider that this proposed development strategy for Cressage, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and they informed the continued development of the draft Shropshire Local Plan. It is recognised there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on any issue. Where there has been disagreement or objection to proposals within responses to each stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p>	No	S13.2 Cressage

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0238	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Paras 16.15 to 16.35	Yes	No	No	<p>1. Cressage should remain open countryside not be designated a Community Hub to ensure no significant housing development will take place in the proposed Plan period. This would reflect the view of the majority of residents.</p> <p>2. Draft Shropshire Local Plan targets are too high, process undemocratic &amp; will not deliver sufficient affordable housing (lack of soundness on this basis also highlighted by CPRE). Identified growth not sustainable, particularly in view of climate emergency.</p> <p>3. Full needs assessment required to understand what is needed for the village</p> <p>4. Parish Council has not challenged Community Hub status or accurately represented local view - this should be considered by the Inspector.</p> <p>5. Shropshire Council has not been sufficiently resourced to properly consider consultation responses and responses have been ignored with no feedback given.</p> <p>6. Consultation not been satisfactory or appropriate during Covid 19 pandemic restrictions and Reg 19 &amp; should be re-run. Consultation specifically has not adhered to Gunning principles, particularly adequate access &amp; time for consideration and response since libraries have been closed denying access for persons without internet access.</p> <p>7. Community Hub status based on flawed scoring system is incorrect, in particular points awarded for mobile library being the same as a permanent library; points awarded for a closed place of worship and a pharmacy when there is only a dispensing surgery &amp; points awarded for public transport links provide no differentiation between levels in larger towns and Cressage.</p>
A0239	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	No	No	Not Specified	<p>There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where the majority of respondents did not agree with the identification of Cressage as a Community Hub, its proposed housing guideline, development boundary or proposed allocation CES005.</p> <p>Cressage is incorrectly identified as a Community Hub within the draft Shropshire Local Plan. The settlement currently remains countryside.</p> <p>Traffic issues on the A458 through Cressage have not been adequately considered. Proposed allocation CES005 is accessed via the A458, this stretch of the road is narrow (two large lorries cannot pass) and speeding is common so is already dangerous, consider this danger will increase as a result of additional traffic associated with construction and occupation of this site. Traffic safety is repeatedly raised by residents in responses to the Preferred Sites Consultation. These issues are acknowledged within the draft Shropshire Local Plan but solutions are not considered effective - improved pedestrian links are welcome but need to be more specific; new development changing the perception of the village and encouraging traffic to respect amenity and safety of residents is not understandable, given it is already clear you are entering a village</p>

A0243	B001	<p>The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. This should be clearly communicated and documented.</p> <p>Reference to Cressage being a Community Hub should be deleted as they are misleading.</p> <p>Traffic safety should be properly addressed, especially for residents on Harley Road opposite proposed allocation CES005.</p> <p>Plans for footpaths and traffic calming should be more specific.</p> <p>The A458 should be re-routed to bypass Cressage.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and informed the continued development of the draft Shropshire Local Plan. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p> <p>The Regulation 19: Pre-Submission Draft of the Shropshire Local Plan was prepared for consultation. As such it presents proposals, rather than reflecting the current situation. It is acknowledged that Cressage is identified as countryside within the adopted Local Plan, however the draft Shropshire Local Plan is proposing that the settlement be identified as a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>In identifying proposed site allocations, including in Cressage, a comprehensive site assessment process has been undertaken, which included consideration of highway matters, informed by comments from colleagues in the Developing Highways team. Traffic passing through Cressage already causes highway safety issues specifically because traffic control measures provide the only means to control the traffic flows and speeds. Development to meet the needs of existing and future residents of Cressage will require direct access to the A458 due to highway constraints elsewhere in the village. This form of development may also provide an effective means to reduce traffic speeds through the settlement and improve highway safety for the benefit of the local community.</p> <p>The proposed site guidelines for proposed allocation CES005 are considered to include an appropriate level of detail. The specific design and layout of development, including such features as pedestrian links, traffic calming measures and the principal highway access, will be subject to consideration through a Planning Application for the site.</p>	No	S13.2 Cressage
A0244	B001	<p>The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. This should be clearly communicated and documented.</p> <p>Reference to Cressage being a Community Hub should be deleted as they are misleading.</p> <p>Traffic safety should be properly addressed, especially for residents on Harley Road opposite proposed allocation CES005.</p> <p>Plans for footpaths and traffic calming should be more specific.</p> <p>The A458 should be re-routed to bypass Cressage.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. A0245	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	No	No	Not Specified	<p>There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where the majority of respondents did not agree with the identification of Cressage as a Community Hub, its proposed housing guideline, development boundary or proposed allocation CES005.</p> <p>Cressage is incorrectly identified as a Community Hub within the draft Shropshire Local Plan. The settlement currently remains countryside.</p> <p>Traffic issues on the A458 through Cressage have not been adequately considered. Proposed allocation CES005 is accessed via the A458, this stretch of the road is narrow (two large lorries cannot pass) and speeding is common so is already dangerous, consider this danger will increase as a result of additional traffic associated with construction and occupation of this site. Traffic safety is repeatedly raised by residents in responses to the Preferred Sites Consultation. These issues are acknowledged within the draft Shropshire Local Plan but solutions are not considered effective - improved pedestrian links are welcome but need to be more specific; new development changing the perception of the village and encouraging traffic to respect amenity and safety of residents is not understandable, given it is already clear you are entering a village</p>
A0246	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Paras 16.15 to 16.38	Yes	No	No	<ol style="list-style-type: none"> <li>1. Cressage should remain open countryside not be designated a Community Hub to ensure no significant housing development will take place in the proposed Plan period. This would reflect the view of the majority of residents.</li> <li>2. Draft Shropshire Local Plan targets are too high, process undemocratic &amp; will not deliver sufficient affordable housing (lack of soundness on this basis also highlighted by CPRE). Identified growth not sustainable, particularly in view of climate emergency.</li> <li>3. Full needs assessment required to understand what is needed for the village</li> <li>4. Parish Council has not challenged Community Hub status or accurately represented local view - this should be considered by the Inspector.</li> <li>5. Shropshire Council has not been sufficiently resourced to properly consider consultation responses and responses have been ignored with no feedback given.</li> <li>6. Consultation not been satisfactory or appropriate during Covid 19 pandemic restrictions and Reg 19 &amp; should be re-run. Consultation specifically has not adhered to Gunning principles, particularly adequate access &amp; time for consideration and response since libraries have been closed denying access for persons without internet access.</li> <li>7. Community Hub status based on flawed scoring system is incorrect, in particular points awarded for mobile library being the same as a permanent library; points awarded for a closed place of worship and a pharmacy when there is only a dispensing surgery &amp; points awarded for public transport links provide no differentiation between levels in larger towns and Cressage.</li> </ol>

Community Hub status based on flawed scoring system is incorrect, in particular points awarded for mobile library being the same as a permanent library; points awarded for a closed place of worship and a pharmacy when there is only a dispensing surgery &amp; points awarded for public transport links provide no differentiation between levels in larger towns and Cressage.</p>
A0251	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	No	No	Not Specified	<p>There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where the majority of respondents did not agree with the identification of Cressage as a Community Hub, its proposed housing guideline, development boundary or proposed allocation CES005.</p> <p>Cressage is incorrectly identified as a Community Hub within the draft Shropshire Local Plan. The settlement currently remains countryside.</p> <p>Traffic issues on the A458 through Cressage have not been adequately considered. Proposed allocation CES005 is accessed via the A458, this stretch of the road is narrow (two large lorries cannot pass) and speeding is common so is already dangerous, consider this danger will increase as a result of additional traffic associated with construction and occupation of this site. Traffic safety is repeatedly raised by residents in responses to the Preferred Sites Consultation. These issues are acknowledged within the draft Shropshire Local Plan but solutions are not considered effective - improved pedestrian links are welcome but need to be more specific; new development changing the perception of the village and encouraging traffic to respect amenity and safety of residents is not understandable, given it is already clear you are entering a village</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0250	B001	Inspector to consider flawed Community Hub scoring system; whether appropriate consideration and weight given to previous consultation responses and adequacy of current consultation during the pandemic should be scrutinised at examination. CPRES response & objections should be fully considered.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate for Cressage to be identified as a proposed Community Hub.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings towards unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate that Cressage is identified as a proposed Community Hub and it is proposed to identify a development guideline, development boundary and to identify proposed allocations - consistent with other rural settlements considered to be appropriate Community Hubs for policy purposes. Shropshire Council also consider that this proposed development strategy for Cressage, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and they informed the continued development of the draft Shropshire Local Plan. It is recognised there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on any issue. Where there has been disagreement or objection to proposals within responses to each stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p>	No	S13.2 Cressage
A0251	B001	<p>The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. This should be clearly communicated and documented.</p> <p>Reference to Cressage being a Community Hub should be deleted as they are misleading.</p> <p>Traffic safety should be properly addressed, especially for residents on Harley Road opposite proposed allocation CES005.</p> <p>Plans for footpaths and traffic calming should be more specific.</p> <p>The A458 should be re-routed to bypass Cressage.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and informed the continued development of the draft Shropshire Local Plan. It is recognised that there will sometimes be local opposition to Local Plan proposals. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0273	B001	<p>The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. This should be clearly communicated and documented.</p> <p>Reference to Cressage being a Community Hub should be deleted as they are misleading.</p> <p>Traffic safety should be properly addressed, especially for residents on Harley Road opposite proposed allocation CES005.</p> <p>Plans for footpaths and traffic calming should be more specific.</p> <p>The A458 should be re-routed to bypass Cressage.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and informed the continued development of the draft Shropshire Local Plan. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p> <p>The Regulation 19: Pre-Submission Draft of the Shropshire Local Plan was prepared for consultation. As such it presents proposals, rather than reflecting the current situation. It is acknowledged that Cressage is identified as countryside within the adopted Local Plan, however the draft Shropshire Local Plan is proposing that the settlement be identified as a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>In identifying proposed site allocations, including in Cressage, a comprehensive site assessment process has been undertaken, which included consideration of highway matters, informed by comments from colleagues in the Developing Highways team. Traffic passing through Cressage already causes highway safety issues specifically because traffic control measures provide the only means to control the traffic flows and speeds. Development to meet the needs of existing and future residents of Cressage will require direct access to the A458 due to highway constraints elsewhere in the village. This form of development may also provide an effective means to reduce traffic speeds through the settlement and improve highway safety for the benefit of the local community.</p> <p>The proposed site guidelines for proposed allocation CES005 are considered to include an appropriate level of detail. The specific design and layout of development, including such features as pedestrian links, traffic calming measures and the principal highway access, will be subject to consideration through a Planning Application for the site.</p>	No	S13.2 Cressage
A0274	B001	<p>The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. This should be clearly communicated and documented.</p> <p>Reference to Cressage being a Community Hub should be deleted as they are misleading.</p> <p>Traffic safety should be properly addressed, especially for residents on Harley Road opposite proposed allocation CES005.</p> <p>Plans for footpaths and traffic calming should be more specific.</p> <p>The A458 should be re-routed to bypass Cressage.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and informed the continued development of the draft Shropshire Local Plan. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p> <p>The Regulation 19: Pre-Submission Draft of the Shropshire Local Plan was prepared for consultation. As such it presents proposals, rather than reflecting the current situation. It is acknowledged that Cressage is identified as countryside within the adopted Local Plan, however the draft Shropshire Local Plan is proposing that the settlement be identified as a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>In identifying proposed site allocations, including in Cressage, a comprehensive site assessment process has been undertaken, which included consideration of highway matters, informed by comments from colleagues in the Developing Highways team. A0275	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	No	No	Not Specified	<p>There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where the majority of respondents did not agree with the identification of Cressage as a Community Hub, its proposed housing guideline, development boundary or proposed allocation CES005.</p> <p>Cressage is incorrectly identified as a Community Hub within the draft Shropshire Local Plan. The settlement currently remains countryside.</p> <p>Traffic issues on the A458 through Cressage have not been adequately considered. Proposed allocation CES005 is accessed via the A458, this stretch of the road is narrow (two large lorries cannot pass) and speeding is common so is already dangerous, consider this danger will increase as a result of additional traffic associated with construction and occupation of this site. Traffic safety is repeatedly raised by residents in responses to the Preferred Sites Consultation. These issues are acknowledged within the draft Shropshire Local Plan but solutions are not considered effective - improved pedestrian links are welcome but need to be more specific; new development changing the perception of the village and encouraging traffic to respect amenity and safety of residents is not understandable, given it is already clear you are entering a village</p>
A0276	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Paras 16.15 to 16.42	Yes	No	No	<ol style="list-style-type: none"> <li>1. Cressage should remain open countryside not be designated a Community Hub to ensure no significant housing development will take place in the proposed Plan period. This would reflect the view of the majority of residents.</li> <li>2. Draft Shropshire Local Plan targets are too high, process undemocratic &amp; will not deliver sufficient affordable housing (lack of soundness on this basis also highlighted by CPRE). Identified growth not sustainable, particularly in view of climate emergency.</li> <li>3. Full needs assessment required to understand what is needed for the village</li> <li>4. Parish Council has not challenged Community Hub status or accurately represented local view - this should be considered by the Inspector.</li> <li>5. Shropshire Council has not been sufficiently resourced to properly consider consultation responses and responses have been ignored with no feedback given.</li> <li>6. Consultation not been satisfactory or appropriate during Covid 19 pandemic restrictions and Reg 19 &amp; should be re-run. Consultation specifically has not adhered to Gunning principles, particularly adequate access &amp; time for consideration and response since libraries have been closed denying access for persons without internet access.</li> <li>7. Community Hub status based on flawed scoring system is incorrect, in particular points awarded for mobile library being the same as a permanent library; points awarded for a closed place of worship and a pharmacy when there is only a dispensing surgery &amp; points awarded for public transport links provide no differentiation between levels in larger towns and Cressage.</li> </ol>

As such it is considered appropriate that Cressage is identified as a proposed Community Hub and it is proposed to identify a development guideline, development boundary and to identify proposed allocations - consistent with other rural settlements considered to be appropriate Community Hubs for policy purposes. Shropshire Council also consider that this proposed development strategy for Cressage, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and they informed the continued development of the draft Shropshire Local Plan. It is recognised there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on any issue. Where there has been disagreement or objection to proposals within responses to each stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p>	No	S13.2 Cressage

A0281	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Paras 16.15 to 16.46	Yes	No	No	<p>1. Cressage should remain open countryside not be designated a Community Hub to ensure no significant housing development will take place in the proposed Plan period. This would reflect the view of the majority of residents.</p> <p>2. Draft Shropshire Local Plan targets are too high, process undemocratic &amp; will not deliver sufficient affordable housing (lack of soundness on this basis also highlighted by CPRE). Identified growth not sustainable, particularly in view of climate emergency.</p> <p>3. Full needs assessment required to understand what is needed for the village</p> <p>4. Parish Council has not challenged Community Hub status or accurately represented local view - this should be considered by the Inspector.</p> <p>5. Shropshire Council has not been sufficiently resourced to properly consider consultation responses and responses have been ignored with no feedback given.</p> <p>6. Consultation not been satisfactory or appropriate during Covid 19 pandemic restrictions and Reg 19 &amp; should be re-run. Consultation specifically has not adhered to Gunning principles, particularly adequate access &amp; time for consideration and response since libraries have been closed denying access for persons without internet access.</p> <p>7. Community Hub status based on flawed scoring system is incorrect, in particular points awarded for mobile library being the same as a permanent library; points awarded for a closed place of worship and a pharmacy when there is only a dispensing surgery &amp; points awarded for public transport links provide no differentiation between levels in larger towns and Cressage.</p>
A0283	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	No	No	<p>Amenity provision in Cressage (primary school is over-subscribed, doctors surgery is at capacity, no post office (although included within the Hierarchy of Settlements Assessment) and the village pub closed) will not support additional housing.</p> <p>Provision of a small number of 'affordable homes' for local young people who wish to stage in the area is important, but housing for 'non-local' people should not be considered.</p> <p>Brownfield sites in urban areas like Shrewsbury and Telford should cater for housing demand, where proper amenities can be provided.</p> <p>Past Green Belt policies should be re-instated to preserve the beautiful countryside, balance need for housing with farmland/woodland/etc, sustain current property values (loss of open views reduces values).</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0281	B001	Inspector to consider flawed Community Hub scoring system; whether appropriate consideration and weight given to previous consultation responses and adequacy of current consultation during the pandemic should be scrutinised at examination. CPRES response & objections should be fully considered.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate for Cressage to be identified as a proposed Community Hub.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings towards unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate that Cressage is identified as a proposed Community Hub and it is proposed to identify a development guideline, development boundary and to identify proposed allocations - consistent with other rural settlements considered to be appropriate Community Hubs for policy purposes. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0294	B001	<p>The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. This should be clearly communicated and documented.</p> <p>Reference to Cressage being a Community Hub should be deleted as they are misleading.</p> <p>Traffic safety should be properly addressed, especially for residents on Harley Road opposite proposed allocation CES005.</p> <p>Plans for footpaths and traffic calming should be more specific.</p> <p>The A458 should be re-routed to bypass Cressage.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and informed the continued development of the draft Shropshire Local Plan. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p> <p>The Regulation 19: Pre-Submission Draft of the Shropshire Local Plan was prepared for consultation. As such it presents proposals, rather than reflecting the current situation. It is acknowledged that Cressage is identified as countryside within the adopted Local Plan, however the draft Shropshire Local Plan is proposing that the settlement be identified as a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>In identifying proposed site allocations, including in Cressage, a comprehensive site assessment process has been undertaken, which included consideration of highway matters, informed by comments from colleagues in the Developing Highways team. Traffic passing through Cressage already causes highway safety issues specifically because traffic control measures provide the only means to control the traffic flows and speeds. Development to meet the needs of existing and future residents of Cressage will require direct access to the A458 due to highway constraints elsewhere in the village. This form of development may also provide an effective means to reduce traffic speeds through the settlement and improve highway safety for the benefit of the local community.</p> <p>The proposed site guidelines for proposed allocation CES005 are considered to include an appropriate level of detail. The specific design and layout of development, including such features as pedestrian links, traffic calming measures and the principal highway access, will be subject to consideration through a Planning Application for the site.</p>	No	S13.2 Cressage
A0295	B001	<p>The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. This should be clearly communicated and documented.</p> <p>Reference to Cressage being a Community Hub should be deleted as they are misleading.</p> <p>Traffic safety should be properly addressed, especially for residents on Harley Road opposite proposed allocation CES005.</p> <p>Plans for footpaths and traffic calming should be more specific.</p> <p>The A458 should be re-routed to bypass Cressage.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). A0296	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	No	No	There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where the majority of respondents did not agree with the identification of Cressage as a Community Hub, its proposed housing guideline, development boundary or proposed allocation CES005. Shropshire Council have also made serious errors in calculations of totals, because they have classed identical responses as a single response (over 300 people replied using pre-filled forms), this is undemocratic and illegal as it silences voices.
A0296	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	Yes	No	No	There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where nearly 300 residents opposed Cressage Community Hub status and felt method for selection was incorrect (scoring of services, facilities and employment), unfair and unjust. No feedback or changes were made. Continue to feel the method by which Cressage was identified as a Community Hub is incorrect.
A0296	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13	No	No	No	The Regulation 18 Preferred Sites Consultation stated Cressage was a proposed Community Hub. However the Regulation 19 draft Shropshire Local Plan states it has been a Community Hubs since 2015, this is inaccurate, erroneous and misleading. As such the draft Shropshire Local Plan is not legally binding because of misinformation/error.

Traffic safety is repeatedly raised by residents in responses to the Preferred Sites Consultation. These issues are acknowledged within the draft Shropshire Local Plan but solutions are not considered effective - improved pedestrian links are welcome but need to be more specific; new development changing the perception of the village and encouraging traffic to respect amenity and safety of residents is not understandable, given it is already clear you are entering a village</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0302	B001	<p>The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. This should be clearly communicated and documented.</p> <p>Reference to Cressage being a Community Hub should be deleted as they are misleading.</p> <p>Traffic safety should be properly addressed, especially for residents on Harley Road opposite proposed allocation CES005.</p> <p>Plans for footpaths and traffic calming should be more specific.</p> <p>The A458 should be re-routed to bypass Cressage.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and informed the continued development of the draft Shropshire Local Plan. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p> <p>The Regulation 19: Pre-Submission Draft of the Shropshire Local Plan was prepared for consultation. As such it presents proposals, rather than reflecting the current situation. It is acknowledged that Cressage is identified as countryside within the adopted Local Plan, however the draft Shropshire Local Plan is proposing that the settlement be identified as a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>In identifying proposed site allocations, including in Cressage, a comprehensive site assessment process has been undertaken, which included consideration of highway matters, informed by comments from colleagues in the Developing Highways team. Traffic passing through Cressage already causes highway safety issues specifically because traffic control measures provide the only means to control the traffic flows and speeds. Development to meet the needs of existing and future residents of Cressage will require direct access to the A458 due to highway constraints elsewhere in the village. This form of development may also provide an effective means to reduce traffic speeds through the settlement and improve highway safety for the benefit of the local community.</p> <p>The proposed site guidelines for proposed allocation CES005 are considered to include an appropriate level of detail. The specific design and layout of development, including such features as pedestrian links, traffic calming measures and the principal highway access, will be subject to consideration through a Planning Application for the site.</p>	No	S13.2 Cressage

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0304	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Paras 16.15 to 16.48	Yes	No	No	<p>1. Cressage should remain open countryside not be designated a Community Hub to ensure no significant housing development will take place in the proposed Plan period. This would reflect the view of the majority of residents.</p> <p>2. Draft Shropshire Local Plan targets are too high, process undemocratic &amp; will not deliver sufficient affordable housing (lack of soundness on this basis also highlighted by CPRE). Identified growth not sustainable, particularly in view of climate emergency.</p> <p>3. Full needs assessment required to understand what is needed for the village</p> <p>4. Parish Council has not challenged Community Hub status or accurately represented local view - this should be considered by the Inspector.</p> <p>5. Shropshire Council has not been sufficiently resourced to properly consider consultation responses and responses have been ignored with no feedback given.</p> <p>6. Consultation not been satisfactory or appropriate during Covid 19 pandemic restrictions and Reg 19 &amp; should be re-run. Consultation specifically has not adhered to Gunning principles, particularly adequate access &amp; time for consideration and response since libraries have been closed denying access for persons without internet access.</p> <p>7. Community Hub status based on flawed scoring system is incorrect, in particular points awarded for mobile library being the same as a permanent library; points awarded for a closed place of worship and a pharmacy when there is only a dispensing surgery &amp; points awarded for public transport links provide no differentiation between levels in larger towns and Cressage.</p>
A0308	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	No	No	Not Specified	<p>There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where the majority of respondents did not agree with the identification of Cressage as a Community Hub, its proposed housing guideline, development boundary or proposed allocation CES005.</p> <p>Cressage is incorrectly identified as a Community Hub within the draft Shropshire Local Plan. The settlement currently remains countryside.</p> <p>Traffic issues on the A458 through Cressage have not been adequately considered. Proposed allocation CES005 is accessed via the A458, this stretch of the road is narrow (two large lorries cannot pass) and speeding is common so is already dangerous, consider this danger will increase as a result of additional traffic associated with construction and occupation of this site. Traffic safety is repeatedly raised by residents in responses to the Preferred Sites Consultation. These issues are acknowledged within the draft Shropshire Local Plan but solutions are not considered effective - improved pedestrian links are welcome but need to be more specific; new development changing the perception of the village and encouraging traffic to respect amenity and safety of residents is not understandable, given it is already clear you are entering a village</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0304	B001	Inspector to consider flawed Community Hub scoring system; whether appropriate consideration and weight given to previous consultation responses and adequacy of current consultation during the pandemic should be scrutinised at examination. CPRES response & objections should be fully considered.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate for Cressage to be identified as a proposed Community Hub.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings towards unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate that Cressage is identified as a proposed Community Hub and it is proposed to identify a development guideline, development boundary and to identify proposed allocations - consistent with other rural settlements considered to be appropriate Community Hubs for policy purposes. Shropshire Council also consider that this proposed development strategy for Cressage, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0333	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	No	No	No	The proposed developments in Cressage will change the landscape of the village and have a negative effect on the infrastructure, and this has not been fully considered. The allocation of points for services in Cressage are biased in favour of the planners rather than the village. There has been a lack of feedback from the consultation so we are unaware of the facts as to why decisions have been made. We understand that there has not been a full count of the consultation responses due to a lack of resources at Shropshire Council
A0336	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	No	No	Not Specified	There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where the majority of respondents did not agree with the identification of Cressage as a Community Hub, its proposed housing guideline, development boundary or proposed allocation CES005. Cressage is incorrectly identified as a Community Hub within the draft Shropshire Local Plan. The settlement currently remains countryside. Traffic issues on the A458 through Cressage have not been adequately considered. Proposed allocation CES005 is accessed via the A458, this stretch of the road is narrow (two large lorries cannot pass) and speeding is common so is already dangerous, consider this danger will increase as a result of additional traffic associated with construction and occupation of this site. Traffic safety is repeatedly raised by residents in responses to the Preferred Sites Consultation. These issues are acknowledged within the draft Shropshire Local Plan but solutions are not considered effective - improved pedestrian links are welcome but need to be more specific; new development changing the perception of the village and encouraging traffic to respect amenity and safety of residents is not understandable, given it is already clear you are entering a village

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0333	B001	The Inspector should look at the village's facilities and infrastructure and realise that we cannot cope with large developments or take any more houses or people. Previous responses should also be looked at as they were ignored, including the Countryside Charities objections. They should also review the consultation process during covid-19 and the impacts this had on people replying	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate that Cressage is identified as a proposed Community Hub and it is proposed to identify a development guideline, development boundary and to identify proposed allocations - consistent with other rural settlements considered to be appropriate Community Hubs for policy purposes. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.	No	S13.2 Cressage
A0336	B001	The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. This should be clearly communicated and documented. Reference to Cressage being a Community Hub should be deleted as they are misleading. Traffic safety should be properly addressed, especially for residents on Harley Road opposite proposed allocation CES005. Plans for footpaths and traffic calming should be more specific. The A458 should be re-routed to bypass Cressage.	Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub. Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0348	B033	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 CES006	Not Specified	Yes	Not Specified	Welcome provisions of the draft Development Guidelines for CES006 which require supporting studies, including heritage and archaeology, and that the recommendations of these should be clearly reflected in the proposed development scheme for the sympathetic conversion of the former Eagles Inn pub building (Grade II Listed) to dwellings and the development of the former pub car park for further residential units.
A0376	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	Yes	No	No	<p>Cressage should remain Open Countryside. The residents do not want it to be a Hub. An assessment should be undertaken to ascertain what the village wants, without this the council cannot understand what is right for the village. The PC should not accept Hub status. It is confusing that Cressage is not a Hub in SAMDev but is in this Local Plan. Residents have not been listened to – the Inspector should look into this issue. They should also assess how the council have evaluated consultation responses – how can 300 responses be ignored? And the scoring system should also be reviewed by them. There could be a legal challenge if the council does not take into account Covid-19 restrictions which have affected people’s ability to respond. Public libraries were unavailable during the pandemic. Why did I not receive anything in the post – why was it online only?</p> <p>There are contentious points scored in the HoS which has led to Cressage having hub status, including incorrect scoring over the library, Place of Worship, chemist/pharmacy, public transport link, peak regular services (public transport). Cressage does not have the infrastructure or services to supply the needs that the growth in housing would demand. Cressage relies on Much Wenlock and Cross Houses for many services.</p> <p>The PC are sending mixed messages to the residents on views on Hub status, and have made false accusations on the residents’ behaviour. Shropshire Council should publicise the Plan more to residents.</p>

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0462	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	No	No	Not Specified	<p>There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where the majority of respondents did not agree with the identification of Cressage as a Community Hub, its proposed housing guideline, development boundary or proposed allocation CES005.</p> <p>Cressage is incorrectly identified as a Community Hub within the draft Shropshire Local Plan. The settlement currently remains countryside.</p> <p>Traffic issues on the A458 through Cressage have not been adequately considered. Proposed allocation CES005 is accessed via the A458, this stretch of the road is narrow (two large lorries cannot pass) and speeding is common so is already dangerous, consider this danger will increase as a result of additional traffic associated with construction and occupation of this site. Traffic safety is repeatedly raised by residents in responses to the Preferred Sites Consultation. These issues are acknowledged within the draft Shropshire Local Plan but solutions are not considered effective - improved pedestrian links are welcome but need to be more specific; new development changing the perception of the village and encouraging traffic to respect amenity and safety of residents is not understandable, given it is already clear you are entering a village</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0462	B001	<p>The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. This should be clearly communicated and documented.</p> <p>Reference to Cressage being a Community Hub should be deleted as they are misleading.</p> <p>Traffic safety should be properly addressed, especially for residents on Harley Road opposite proposed allocation CES005.</p> <p>Plans for footpaths and traffic calming should be more specific.</p> <p>The A458 should be re-routed to bypass Cressage.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and informed the continued development of the draft Shropshire Local Plan. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p> <p>The Regulation 19: Pre-Submission Draft of the Shropshire Local Plan was prepared for consultation. As such it presents proposals, rather than reflecting the current situation. It is acknowledged that Cressage is identified as countryside within the adopted Local Plan, however the draft Shropshire Local Plan is proposing that the settlement be identified as a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>In identifying proposed site allocations, including in Cressage, a comprehensive site assessment process has been undertaken, which included consideration of highway matters, informed by comments from colleagues in the Developing Highways team. Traffic passing through Cressage already causes highway safety issues specifically because traffic control measures provide the only means to control the traffic flows and speeds. Development to meet the needs of existing and future residents of Cressage will require direct access to the A458 due to highway constraints elsewhere in the village. This form of development may also provide an effective means to reduce traffic speeds through the settlement and improve highway safety for the benefit of the local community.</p> <p>The proposed site guidelines for proposed allocation CES005 are considered to include an appropriate level of detail. The specific design and layout of development, including such features as pedestrian links, traffic calming measures and the principal highway access, will be subject to consideration through a Planning Application for the site.</p>	No	S13.2 Cressage
A0463	B001	<p>The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. A0464	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	No	No	Not Specified	<p>There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where the majority of respondents did not agree with the identification of Cressage as a Community Hub, its proposed housing guideline, development boundary or proposed allocation CES005.</p> <p>Cressage is incorrectly identified as a Community Hub within the draft Shropshire Local Plan. The settlement currently remains countryside.</p> <p>Traffic issues on the A458 through Cressage have not been adequately considered. Proposed allocation CES005 is accessed via the A458, this stretch of the road is narrow (two large lorries cannot pass) and speeding is common so is already dangerous, consider this danger will increase as a result of additional traffic associated with construction and occupation of this site. Traffic safety is repeatedly raised by residents in responses to the Preferred Sites Consultation. These issues are acknowledged within the draft Shropshire Local Plan but solutions are not considered effective - improved pedestrian links are welcome but need to be more specific; new development changing the perception of the village and encouraging traffic to respect amenity and safety of residents is not understandable, given it is already clear you are entering a village</p>
A0520	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 (CES006)	Yes	No	No	<p>Unclear how many dwellings will be allowed on CES006. It states 4 in one place and in another specifies the potential for the conversion of the former Eagles into 2 dwellings and up to 3 new dwellings.</p> <p>Strong local interest in a community project to use part of the original downstairs of the former Eagles (recently a listed building) as a community asset/café/farm shop, this has not been logged. Would seem a sensible and valuable project for an area with so few amenities, even without further development.</p>
A0520	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2(1) (CES005)	Yes	No	No	<p>The status of Cressage as a Community Hubs needs to be proved.</p> <p>Should Community Hub status be approved, with regard to CES005:</p> <ul style="list-style-type: none"> <li>-It is unclear how many houses are proposed (numbers have varied from 60 to 80 dwellings).</li> <li>-Consider the proposed access is extremely dangerous. Many vehicles (especially lorries and HGVs) speed on the hill south of the village.</li> <li>-Traffic calming (lights or roundabout) would be required to prevent injury to pedestrians and drivers.</li> <li>-Crossing the A458 to access services (shop, school, bus stop, surgery etc) could be very dangerous for pedestrians (particularly for children and disabled).</li> <li>-Access to Wood Lane would be very difficult due to the gradient and existing housing (including a listed building).</li> <li>-The site has been subject to flooding, this should be considered.</li> <li>-Talk of a 'Special Interest Woodland Site' down Wood Lane.</li> </ul> <p>Site assessments are unclear and reasoning is woolly.</p>

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0520	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.4	No	No	No	<p>In para 5.184 of the explanation to draft Policy S13.2, 5.184. Cressage is presented as the only Community Hub in the Much Wenlock Place Plan Area and appears in documentation to have changed its status from being a 'Countryside' settlement since 2015.</p> <p>Why and how has the status changed from Countryside to Community Hub as it does not meet the criteria for allocation as a Community Hub? This was strongly expressed to the Council after the consultation (lack of post office, no operating church, rudimentary bus service, minimal mobile library visits, loss of public house/meals outlet, no pharmacy etc)</p> <p>Noted that services and amenities have reduced steadily concomitantly with major 1970's housing development onwards.</p> <p>Objections from CPRE should be considered.</p>
A0550	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	No	No	Not Specified	<p>There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where the majority of respondents did not agree with the identification of Cressage as a Community Hub, its proposed housing guideline, development boundary or proposed allocation CES005.</p> <p>Cressage is incorrectly identified as a Community Hub within the draft Shropshire Local Plan. The settlement currently remains countryside.</p> <p>Traffic issues on the A458 through Cressage have not been adequately considered. Proposed allocation CES005 is accessed via the A458, this stretch of the road is narrow (two large lorries cannot pass) and speeding is common so is already dangerous, consider this danger will increase as a result of additional traffic associated with construction and occupation of this site. Traffic safety is repeatedly raised by residents in responses to the Preferred Sites Consultation. These issues are acknowledged within the draft Shropshire Local Plan but solutions are not considered effective - improved pedestrian links are welcome but need to be more specific; new development changing the perception of the village and encouraging traffic to respect amenity and safety of residents is not understandable, given it is already clear you are entering a village</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0520	B004	<p>The Inspector should evaluate the consultation process (particularly during Covid 19) and responses to consultation from Cressage residents.</p> <p>Review points scoring within the Hierarchy of Settlements for Cressage and proposals for it to be a Community Hub (the assessment at the least might be arbitrary). Cressage should be identified as countryside (This does not equate to a 'no build' stance, but to a 'controlled build' scenario with proper sound objectives underpinned by agreed assessment of need and democratic discussion).</p> <p>A housing need assessment should be undertaken for Cressage before consideration of Community Hub status and major development.</p> <p>Consider more limited and organic development rather than a sudden big influx of commercial development would more adequately/satisfactorily contribute to sustainability, climate change and affordable housing.</p> <p>Objections from CPRE should be considered.</p>	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate for Cressage to be identified as a proposed Community Hub.</p> <p>Shropshire Council also consider that the development strategy proposed for Cressage, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0552	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Paras 16.15 to 16.50	Yes	No	No	<p>1. Cressage should remain open countryside not be designated a Community Hub to ensure no significant housing development will take place in the proposed Plan period. This would reflect the view of the majority of residents.</p> <p>2. Draft Shropshire Local Plan targets are too high, process undemocratic &amp; will not deliver sufficient affordable housing (lack of soundness on this basis also highlighted by CPRE). Identified growth not sustainable, particularly in view of climate emergency.</p> <p>3. Full needs assessment required to understand what is needed for the village</p> <p>4. Parish Council has not challenged Community Hub status or accurately represented local view - this should be considered by the Inspector.</p> <p>5. Shropshire Council has not been sufficiently resourced to properly consider consultation responses and responses have been ignored with no feedback given.</p> <p>6. Consultation not been satisfactory or appropriate during Covid 19 pandemic restrictions and Reg 19 &amp; should be re-run. Consultation specifically has not adhered to Gunning principles, particularly adequate access &amp; time for consideration and response since libraries have been closed denying access for persons without internet access.</p> <p>7. Community Hub status based on flawed scoring system is incorrect, in particular points awarded for mobile library being the same as a permanent library; points awarded for a closed place of worship and a pharmacy when there is only a dispensing surgery &amp; points awarded for public transport links provide no differentiation between levels in larger towns and Cressage.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0552	B001	Inspector to consider flawed Community Hub scoring system; whether appropriate consideration and weight given to previous consultation responses and adequacy of current consultation during the pandemic should be scrutinised at examination. CPREs response & objections should be fully considered.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate for Cressage to be identified as a proposed Community Hub.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings towards unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate that Cressage is identified as a proposed Community Hub and it is proposed to identify a development guideline, development boundary and to identify proposed allocations - consistent with other rural settlements considered to be appropriate Community Hubs for policy purposes. Shropshire Council also consider that this proposed development strategy for Cressage, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Draft Shropshire Local Plan targets are too high, process undemocratic &amp; will not deliver sufficient affordable housing (lack of soundness on this basis also highlighted by CPRE). Identified growth not sustainable, particularly in view of climate emergency.</p> <p>3. Full needs assessment required to understand what is needed for the village</p> <p>4. Parish Council has not challenged Community Hub status or accurately represented local view - this should be considered by the Inspector.</p> <p>5. Shropshire Council has not been sufficiently resourced to properly consider consultation responses and responses have been ignored with no feedback given.</p> <p>6. Consultation not been satisfactory or appropriate during Covid 19 pandemic restrictions and Reg 19 &amp; should be re-run. Consultation specifically has not adhered to Gunning principles, particularly adequate access &amp; time for consideration and response since libraries have been closed denying access for persons without internet access.</p> <p>7. Community Hub status based on flawed scoring system is incorrect, in particular points awarded for mobile library being the same as a permanent library; points awarded for a closed place of worship and a pharmacy when there is only a dispensing surgery &amp; points awarded for public transport links provide no differentiation between levels in larger towns and Cressage.</p>
A0561	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.2 Cressage	No	No	Not Specified	<p>There is a common law duty to take the results of consultation "conscientiously into account". Do not consider this has occurred for responses to the Reg 18 Preferred Sites Consultation, where the majority of respondents did not agree with the identification of Cressage as a Community Hub, its proposed housing guideline, development boundary or proposed allocation CES005.</p> <p>Cressage is incorrectly identified as a Community Hub within the draft Shropshire Local Plan. The settlement currently remains countryside.</p> <p>Traffic issues on the A458 through Cressage have not been adequately considered. Proposed allocation CES005 is accessed via the A458, this stretch of the road is narrow (two large lorries cannot pass) and speeding is common so is already dangerous, consider this danger will increase as a result of additional traffic associated with construction and occupation of this site. Traffic safety is repeatedly raised by residents in responses to the Preferred Sites Consultation. These issues are acknowledged within the draft Shropshire Local Plan but solutions are not considered effective - improved pedestrian links are welcome but need to be more specific; new development changing the perception of the village and encouraging traffic to respect amenity and safety of residents is not understandable, given it is already clear you are entering a village</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0553	B001	Inspector to consider flawed Community Hub scoring system; whether appropriate consideration and weight given to previous consultation responses and adequacy of current consultation during the pandemic should be scrutinised at examination. CPRES response & objections should be fully considered.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate for Cressage to be identified as a proposed Community Hub.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings towards unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate that Cressage is identified as a proposed Community Hub and it is proposed to identify a development guideline, development boundary and to identify proposed allocations - consistent with other rural settlements considered to be appropriate Community Hubs for policy purposes. Shropshire Council also consider that this proposed development strategy for Cressage, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and they informed the continued development of the draft Shropshire Local Plan. It is recognised there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on any issue. Where there has been disagreement or objection to proposals within responses to each stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p>	No	S13.2 Cressage
A0561	B001	<p>The Council should engage with the local community of Cressage and conscientiously take into account concerns regarding Community Hub status and the proposed housing guideline, development boundary and allocation CES005. This should be clearly communicated and documented.</p> <p>Reference to Cressage being a Community Hub should be deleted as they are misleading.</p> <p>Traffic safety should be properly addressed, especially for residents on Harley Road opposite proposed allocation CES005.</p> <p>Plans for footpaths and traffic calming should be more specific.</p> <p>The A458 should be re-routed to bypass Cressage.</p>	<p>Noted. Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. The consultation process set out the new policies and proposals to be contained in the new Local Plan and explained how these changes will alter the current position in the adopted SAMDev Plan (2015). In particular that Cressage will cease to be a countryside settlement and will instead become a Community Hub.</p> <p>Consultation on the Local Plan Review at the 'Regulation 18' Plan Preparation stage has been an iterative process, with five stages of consultation undertaken, each focussing on a specific set of issues. Responses received to each stage of consultation has been given due consideration and informed the continued development of the draft Shropshire Local Plan. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy and to propose an appropriate strategy to meet Shropshire development needs and to conform to the requirements of national policy.</p> <p>The Regulation 19: Pre-Submission Draft of the Shropshire Local Plan was prepared for consultation. As such it presents proposals, rather than reflecting the current situation. It is acknowledged that Cressage is identified as countryside within the adopted Local Plan, however the draft Shropshire Local Plan is proposing that the settlement be identified as a Community Hub. These changes are not intended to cause any confusion they simply explain the implications of the new Local Plan, these changes have been further explained by both the local Councillor and by the Parish Council.</p> <p>In identifying proposed site allocations, including in Cressage, a comprehensive site assessment process has been undertaken, which included consideration of highway matters, informed by comments from colleagues in the Developing Highways team. Traffic passing through Cressage already causes highway safety issues specifically because traffic control measures provide the only means to control the traffic flows and speeds. Development to meet the needs of existing and future residents of Cressage will require direct access to the A458 due to highway constraints elsewhere in the village. This form of development may also provide an effective means to reduce traffic speeds through the settlement and improve highway safety for the benefit of the local community.</p> <p>The proposed site guidelines for proposed allocation CES005 are considered to include an appropriate level of detail. The specific design and layout of development, including such features as pedestrian links, traffic calming measures and the principal highway access, will be subject to consideration through a Planning Application for the site.</p>	No	S13.2 Cressage

A0041	B001	None	Shropshire Council welcomes the support for the designation of Cressage as a Community Hub and for the allocation and delivery of housing site CES005 adjoining The Vicarage on A458. This support is welcomed as evidence of the soundness of the Draft Local Plan.	No	S13.2 Cressage (CES005)
A0439	B003	I ask that 1. The point scoring for allocation Cressage as a Community Hub be looked at again 2. IF Hub status is confirmed , that the safety of the access to the site CE S005 be reviewed	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate that Cressage is identified as a proposed Community Hub and it is proposed to identify a development guideline, development boundary and to identify proposed allocations - consistent with other rural settlements considered to be appropriate Community Hubs for policy purposes. The identification of proposed allocations were informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways matters with colleagues in the Developing Highways team. Sites have been chosen that will deliver a range of benefits for the community including measures to address the issue of traffic speeding through the speed restricted zones of the village. Traffic passing through Cressage already causes highway safety issues specifically because traffic control measures provide the only means to control the traffic flows and speeds. Development to meet the needs of existing and future residents of Cressage will require direct access to the A458 due to highway constraints elsewhere in the village. This form of development may also provide an effective means to reduce traffic speeds through the settlement and improve highway safety for the benefit of the local community. This will require a suitable scale of development for Cressage and the relatively modest housing guideline figure of 80 dwellings is considered to be appropriate to the size and function of the settlement. The greater proportion of this requirement is to be delivered on site CES005 (60 dwellings) which comprises a relatively flat, open and accessible development opportunity. The design of the development scheme for this site may have a positive impact on the traffic flows through the village. Residents of the proposed development will also have ready access to the principal services in the village particularly through the footway network within the village.	No	S13.2 Cressage (CES005)

A0440	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13.4 Cressage CES006	Yes	No	No	It is unclear from the document how many dwellings will be allowed on this site (CES006) as in one place it states 4 , and in another the conversion of the former Eagles into 2 dwellings and up to 3 new dwellings
A0088	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13. Much Wenlock Place Plan Area	No	No	No	<p>Much Wenlock Strategy : Shropshire Council have failed to engage with NP refresh group, work constructively in the local area and consider the Much Wenlock Neighbourhood Plan, significant evidence &amp; national policy and guidance.</p> <p>Much Wenlock has no strategic contribution in Plan Review and MWNP as non-strategic Plan remains relevant and applicable. National Policy continues to highlight relevance &amp; importance of NPs. LPR fails soundness tests because it has not taken into account or recognised the sustainable, professionally drafted, comprehensive and effective policy approach in the Much Wenlock Neighbourhood Plan (MWNP) which expresses significant community contribution and intent as evidenced by the independent assessor's formal report &amp; referendum (2013). The MWNP sets out clear policies that reflect the community's desire to not have large scale development &amp; maintain the scale, style and setting of Much Wenlock .</p> <p>Agreed community policy approach of 'limited development to meet local needs' through development on small scale sites (as set out in the MWNP 2013-2026) has been overridden. This lack of compliance with Neighbourhood Plan is contrary to national planning policy and guidance. Community should not be overridden.</p> <p>Plan is not sound because :it has ignored the Neighbourhood Plan; has not suggested an appropriate strategy and has not considered reasonable alternatives; does not take into account the evidence that current policy approaches are effectively delivering housing , and can do so until 2036 even with the increase to the target (as detailed further in representation); It does not meet objectively assessed needs as described in the MWNP, Place Plan and supporting evidence; As well as promoting community cohesion, formal review of MWNP would identify better options better reflecting SCs climate change, economic sustainability and flood alleviation policies.</p> <p>Shropshire Council's Hierarchy of Settlements report (2017), which is a foundation of the LPR, fails to recognise MWNP as part of the Development Plan. Lack of recognition and reflection of MWNP &amp; its key policies, including those that accord with emerging local plan policy such as Climate Change &amp; sustainability and despite acknowledgement (in 2017) by Shropshire Council that MWNP that housing policies are appropriate and working. SC interprets the NP for Much Wenlock as only being relevant for influencing details of design but no assessment available of how the MWNP has been taken into account/ discounted and Councillors did not endorse any rationale or evidence that justified setting aside effective current MWNP local policy for the delivery of housing. Proposals for Much Wenlock are not strategic, and SC has not 'responded positively to a range of evidence as required or explained what change of circumstances apply to justify its approach.</p> <p>More inclusive approach to development and growth elsewhere Unexplained lack of consistency in approach as similar settlements, Broseley, Bishops Castle and Cleobury Mortimer are being allowed to decide on the location and scale of development in the neighbourhood plans they are bringing forward. Allowing review of the MWNP to identify suitable location(s) and the type of development would be appropriate for Much Wenlock and this option should have been given. Submitted appendix details Ministerial support for Neighbourhood Plans &amp; need/ role for community participation &amp; buy in to planning.</p> <p>Incorrect interpretation of National Policy SC has interpreted its role as defining a site rather than strategic policies, solutions and objectives or evaluating a range of options or integrating development with the town's strategically assessed infrastructure needs. SC has also not set out reasons for setting aside the key policies for Much Wenlock. MWNP is the correct tool to identify non-strategic issues such as the location and delivery of the limited new housing required to support the 5-year land supply and meet local needs.</p> <p>Improper &amp; unsubstantiated focus on delivery of extra 200 houses and a single large housing site- when alternative more sustainable planning approaches available which are based on a substantial evidence base. No evidence for the increase in housing target/site number from that proposed preferred options stage. Approach not consistent with national policy; proposals will not deliver sustainable development because of the lack of necessary infrastructure investment and ignoring alternative options which would contribute positively to both sustainability and climate change; ignoring flood risk and local and National Flood strategies. Much Wenlock has a unique and fragile character and characteristics and aspirations which needs to be specifically taken into account and reflected in a local vision. Plan review proposals driven by countywide completion targets and scope to achieve planning gain and reduce Council expenditure. There has been insufficient recognition of its characteristics, relative size and infrastructure and service limitations, in identification as a key centre and its strategic role. 5-year review by the LPA can legitimately identify housing needs and requirements of its whole area but not simply overturn community aspirations defined in NP without evidence. The site allocation is not of strategic importance or part of strategic approach as Much Wenlock, is suitable only for 'limited development to meet local needs.</p> <p>Proposals for Much Wenlock ignore delivery of additional housing within the Place Plan area at Ironbridge and other strategic implications of wider LPR Reg 19 proposals including cumulative impacts of development in Much Wenlock, Ironbridge &amp; Bridgnorth which will overwhelm the road infrastructure, in particular pinch point at the 'Gaskell Corner' in Much Wenlock. Lack of policies to help to mitigate the damage to well-being and infrastructure from development and prevent Much Wenlock becoming a dormitory car-dependent town for the Black Country.</p> <p>SC Preferred Scale and Distribution of Development ( 2017) housing guideline of 150 over the plan period reflected the housing growth being experienced , likely trajectory over the extended plan period and reasonably compared to MWNP Neighbourhood Plan 2013-2026 growth guideline of was 130 dwellings was supported locally but preferred' single site approach not. 120 dwelling proposal combined with other growth will far exceed Plan period target of 200 dwellings, which together with other Place Plan development, placing, huge pressure on Much Wenlock's fragile environment and infrastructure.</p> <p>No explanation of how the Draft Local Plan housing proposals will meet local housing needs or how scale of development arrived at and how it will maintain character &amp; setting. MWNP/SC evidence show a greater need for smaller homes to suit young buyers and downsizers, as well as single level dwellings for older residents. Failure to meet these needs potentially challenges social cohesion. No evidence that single large commercial site will meet these local needs. An approach which utilises smaller and brownfield sites to achieve this better meet community aspirations in the MWNP, the character of Much Wenlock as a historic market town &amp; the Government's direction for the future of planning to make planning more inclusive and create more beautiful places. Importance of retaining the distinctiveness of Much Wenlock recognised in existing Plans and policy ambitions in Reg 19 Plan but not in the approach to LPR in Much Wenlock. Reg 19 Local Plan proposal for Much Wenlock does not meet the Local Plan Policy tests set out in policies SP1, SP2, DP21 and others and so will not deliver on the Vision (2.31) e.g. community cohesion , enhancement of historic assets; sustainability etc.</p> <p>Infrastructure needs are set out in the Much Wenlock Place Plan including emerging problems with traffic and road safety, sewage capacity, flooding and health services provision and need for recreation facilities &amp; accessible green space. Investment required to address public transport &amp; traffic impacts, including through the Conservation Area . There is a water shortages issue. Poor public transport ensures car reliance for the foreseeable future, contrary to Climate Change policies and Climate emergency. No indication of delivery mechanisms or funding streams to address infrastructure needs identified in Place Plan. No considered planning for the Town and no strategy in identifying investment or enhancing historic assets. LPR omits to address these infrastructure needs in a comprehensive way. Concern that LPR Reg 19 relegates the Place Plans as not being a statutory part of the local plan with no weight in decision making . MWNP pertinent as it entitles 25% of the revenues from the Community Infrastructure Levy arising from the development to help deliver community vision. No positive or defined plans are being put forward for the necessary infrastructure improvements for the town except proposal in SC's Infrastructure Funding Statement (December 2020) for Hunters Gate flood risk management infrastructure which is welcome but contradictory to Policy S13's reliance on a commercial development. Proposed roundabout is only necessary to meet highways requirements resulting from the 120-house development , not identified as necessary in the Place Plan and there are other potential</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0440	B003	I ask that 1. The point scoring for allocation Cressage as a Community Hub be looked at again 2. IF Hub status is confirmed , that the safety of the access to the site CE S005 be reviewed	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Cressage. As such it is considered appropriate that Cressage is identified as a proposed Community Hub and it is proposed to identify a development guideline, development boundary and to identify proposed allocations - consistent with other rural settlements considered to be appropriate Community Hubs for policy purposes. The identification of proposed allocations were informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways matters with colleagues in the Developing Highways team. Sites have been chosen that will deliver a range of benefits for the community including measures to address the issue of traffic speeding through the speed restricted zones of the village. Traffic passing through Cressage already causes highway safety issues specifically because traffic control measures provide the only means to control the traffic flows and speeds. Development to meet the needs of existing and future residents of Cressage will require direct access to the A458 due to highway constraints elsewhere in the village. This form of development may also provide an effective means to reduce traffic speeds through the settlement and improve highway safety for the benefit of the local community. This will require a suitable scale of development for Cressage and the relatively modest housing guideline figure of 80 dwellings is considered to be appropriate to the size and function of the settlement. The greater proportion of this requirement is to be delivered on site CES005 (60 dwellings) which comprises a relatively flat, open and accessible development opportunity. The design of the development scheme for this site may have a positive impact on the traffic flows through the village. Residents of the proposed development will also have ready access to the principal services in the village particularly through the footway network within the village.	No	S13.2 Cressage (CES005)
A0439	B002	That the number of dwellings be clarified. However I agree with the redevelopment of the former public house to residential and development of the carpark , as long as the footpath is resisted behind the existing building away from the A458, and that the site lines at the junction with Sheinton Road are improved	Noted. Shropshire Council considers that the approximate site capacity specified for site CES006 (around 4 houses) is appropriate. This capacity is considered likely to consist of either 1 resulting from the conversion of the existing building and 3 within the wider site or 2 resulting from the conversion of the existing building and 2 within the wider site, dependent on the nature of development undertaken.	No	S13.2 Cressage (CES006)
A0440	B002	That the number of dwellings be clarified. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0088	B002 Cont'd						<p>No recognition of changes to context, including Ironbridge proposals &amp; national flood policy, or an identified deliverable programme of infrastructure investment to address the significant weaknesses in the town's infrastructure to make growth sustainable; Funding arrangements for any infrastructure development should be set out in advance to ensure public confidence and support. MWNP Refresh Group's 'Certainty and Delivery' paper sets out clear alternative options for the achievement of additional development and addressing infrastructure needs.</p> <p>The Reg 19 Plan review fails to : meet national policies; openly consider or evaluate alternative and better planning solutions and is based on flawed assessments, ignoring relevant evidence. Evidence : Insufficient/out of date evidence – required housing needs survey has not been carried out by Shropshire Council to understand local needs. Given lack of information unclear how right type of affordable housing to meet local needs can be delivered through market development options. Much Wenlock Refresh Group have however carried out a recent survey of housing need. Representation submits evidence which should be considered ( via links ) including : reports of local consultation undertaken ;community feedback; Certainty and Delivery Report; Much Wenlock –Options for Sustainable Development Annex 1; Much Wenlock Final Submission to the LPR; response to the Ironbridge Master Plan; Much Wenlock Neighbourhood Plan; Cabinet reports and minutes of various meetings as well as published national policy &amp; guidance.</p> <p>Much Wenlock /Site - Flooding and the Rapid Response Catchment – lack of a strategic, catchment-wide approach and failure to meet Shropshire Council POLICY DP21 &amp; national policy.</p> <p>Long history of flooding in/ around Much Wenlock related to its geological and hydrological context exacerbated by development resulting in serious consequences for the community 2007 &amp; 2020 (factors further detailed in response). Flood risk known liable to increase due to climate change. Potential for future flooding with serious consequences. A comprehensive solution to reduce risk to life and property from surface water flooding for the whole town is not considered by LPR.</p> <p>Much Wenlock Flood Action Group set up 2007 considered all sites subject to flooding. Town Council endorsed a resolution in January 2008 following Much Wenlock local referendum of no further development until flooding issues Much Wenlock resolved. Much Wenlock within a designated Rapid Response Catchment remains at risk of serious surface water flooding with risk to life and property. Various flood investigative reports (detailed in submission) provided analysis of the problem. Construction of attenuation measures following 2007 serious flood event, have resulted in flood impact reduction and mitigated but not wholly solved the problem, with continuing serious flood events across the town in 2020. Area around Hunters Gate &amp; MUW012VAR remain at flood risk. Shropshire Council has failed to progress proposals for flood alleviation affecting site MUW012VAR identified in 2011. Full understanding of the causes and potential solutions is lacking. Strong argument that all development should be directed away from the town altogether on the basis of the high risk of flooding.</p> <p>Lack of confidence and trust in SC in its role as a flood risk management authority due to lack of transparency and history of shortcomings in meeting legal and other obligations of national flood risk strategy as set out in more detail in representation para 5.14 -5.22 . SC approach does not follow national steer (backed by funding) in taking an inclusive approach with communities &amp; working with them or acknowledge role of NP. Evidence that alternative (non-housing led) solutions to flooding exist and are viable.</p> <p>A new comprehensive strategic flood risk assessment as required by national policy needs to be undertaken prior to considering any site allocations, rather than partial and limited proposals from a single landowner and commercial developer. Because of complex geo-physical local circumstances simple site related attenuation schemes are not appropriate. In combination with policy drivers in the National Flood Risk Strategy (July 2020), a more sophisticated, integrated approach requiring strategic flood risk assessment of the entire catchment backed up by an agreed and appropriately funded overall remediation, using nature based solutions &amp; supporting wider environmental benefits, is necessary. Options and innovative solutions should be identified and agreed for the whole catchment, to improve resilience to both floods and droughts prior to seeking funding from the new available substantial Government resources prior to consideration of further development. Longer term view needs to be taken in resolving the tension between flooding and further development &amp; building community trust. Community's strong opposition to development-led flood alleviation based on costly local experience. SC's only commitment to infrastructure investment, a scheme funded by EA and Severn Trent suggests that the rationale for a large 120 house site is no longer valid. The proposed 'solution' also ignores alternative options for natural flood management, proven effective elsewhere, now at the heart of Environment Agency and Government strategy. Proposals are premature in view of programmed EA National Flood Risk Assessment which will provide more accessible and trusted information for making good investment decisions and aid review of MWNP to support better planning solution. SC approach ignores steers – including Defra announcements. Increased funding availability alleviates need for developer-led solution favoured by SC because of funding constraints.</p> <p>Opportunity to demonstrate national good practice by integrating the flood risk with the MWNP missed. MW rapid response catchment is an important contributor to the wider flooding problem within the Severn Catchment. Significant flood risk for the whole catchment has been acknowledged by Shropshire Council but they have not addressed the relationship between this risk, the town, the MWNP policies and the need and location of development.</p> <p>Insufficient attention paid to delivery of sustainable development and impacts on the distinctive character of the town by a large site. Too great a focus on potential for fast delivery. 'Preferred site' presented but no alternative development approaches have been discussed with the community; no alternative strategies for Much Wenlock have been considered by the Council and no assessment options put forward. SC refusal without evidence to consider small site approach. Top down approach. SC site assessment process identified a number of potential housing sites that, allowing for continuing infill development, could accommodate appropriate numbers through smaller scale development in potentially better locations.</p> <p>LPR approach driven by 5-year land supply requirements rather than existing MWNP policy and available evidence. No evidence to suggest that the MWNP current policy approach or allocation of a small site(s) would be wrong or could not deliver required development.</p> <p>MWNP Refresh Group analysis of SC 2020 site assessment evidences achievability of specific sites for small scale development to meet need &amp; exposes factual and technical flaws and inconsistencies in the SC's evidence base (set out in response , including appendix 2 &amp; referenced 'Certainty and Deliverability report'). Consider site assessment is flawed by lacking appropriate consideration of positive outcomes for the town or limitations in terms of negative impact. SC insufficient acknowledgement of NPPF requirements for sites, local infrastructure constraints and traffic impacts. SC process has eliminated alternative viable options. Appendix 2 re-assesses sites &amp; considers &amp; details scope for appropriate, sustainable development on various combinations of alternative sites (detailed) including MUW001; MUW002; MUW008; &amp; MUW011C for employment) . Submit that these 3 identified residential sites offer a better, more flexible opportunity than preferred MUW012VAR &amp; advantages of these sites are detailed, including less negative impacts &amp; how specific local housing needs could be met.. Partial site development is also possible in respect of MUW08. Final option is one of no allocation since housing completion target being already met &amp; exceeding it increases catastrophic flood risk threat. There are large numbers of market-led homes being built and planned nearby, with likely continued small site development in and around the town which will deliver a contribution. To be acceptable development must help deliver community needs and vision.</p> <p>Reg 19 proposal does not reflect broader policy support for the appropriate reuse of land as suitable brownfield sites not brought forward. Better alternative greenfield sites also available. All identified alternative sites are more sustainably located and accord with current and proposed planning policy MWNP &amp; Local Plan.</p> <p>Evidence that market and affordable housing has been and will continue to be delivered to achieve housing agreed targets set by SC for 2036 or 2038. If SC stated current annual rates of development (of 18 per year) are continued Much Wenlock would experience substantial over-development. Overdevelopment will turn it into a commuter town. MWNP Refresh Group has alternative and sustainable options to deliver small -scale sites that would meet the residential mix policy and SC target of 165-200 dwellings until 2038. Alternatives could be considered through Review of NP.</p> <p>Appendix 2 of response details 'Options for Sustainable Development' considering housing delivery against targets; questions appropriateness of housing target/windfall allowances specifically compared to Church Stretton &amp; Cleobury Mortimer.</p> <p>Balanced Growth not achieved or deliverable : Delivery of employment to achieve 'balanced growth' is not assured. Land at Stretton Road, allocated in the former Bridgnorth Local Plan ( 20 years ago ) &amp; the MWNP has not been brought forward. To bring the site forward &amp; achieve 'balanced growth' proposals to service then market the site are required and no known publicly available proposal to do so although the MW Place Plan identifies the employment site within Priority A. Proposals for a strategic corridor running through Much Wenlock supports dormitory growth dependent on private car transport &amp; contradict policies for balanced growth. Development proposals do not address the climate emergency.</p>
A0088	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13. Much Wenlock Place Plan Area	No	No	No	<p>Much Wenlock Flood Action Group set up 2007 considered all sites subject to flooding, including MUW012VAR. Town Council endorsed a resolution in January 2008 following Much Wenlock local referendum of no further development until flooding issues Much Wenlock resolved. Much Wenlock within a designated Rapid Response Catchment remains at risk of serious surface water flooding with risk to life and property. Various flood investigative reports (detailed in submission) provided analysis of the problem. Construction of attenuation measures following 2007 serious flood event, have resulted in flood impact reduction and mitigated but not wholly solved the problem, with continuing serious flood events across the town in 2020. Area around Hunters Gate &amp; MUW012VAR remain at flood risk. Shropshire Council has failed to progress proposals for flood alleviation affecting site MUW012VAR identified in 2011. Full understanding of the causes and potential solutions is lacking. Objection sets out detail of flooding factors and events at Hunters Gate &amp; site MUW012VAR including major flood incidents and issues with and failure of SUDs installation at Hunters Gate development.</p> <p>Sequential test in respect of flood risk not met. Alternative sites at less at risk are available. Proposed allocation does not reflect SAMDev Inspector's report and are contrary to the: NPPF guidance on flood risk and preparations for climate change. Local and National Flood Risk Management strategies emphasise working with communities to develop resilience to risks. Conflicts with Policy DP21 which states that 'The safeguarding of people and property and mitigation of the effects of climate change in accordance with Policy SP3 will be achieved by directing development to areas at least risk of flooding'. Proposed approach directs substantial development to a flood-prone catchment and most flood-prone site in catchment. Annex 1 of response identifies that alternative sites which have already mitigated the effects of flooding through the installation of attenuation ponds are available. Strong argument that all development should be directed away from the town altogether on the basis of the high risk of flooding.</p> <p>Lack of confidence and trust in SC in its role as a flood risk management authority due to lack of transparency and history of shortcomings in meeting legal and other obligations of national flood risk strategy as set out in more detail in representation para 5.14 -5.22 . SC approach does not follow national steer (backed by funding) in taking an inclusive approach with communities &amp; working with them or acknowledge role of NP. Evidence that alternative (non-housing led) solutions to flooding exist and are viable.</p> <p>Site should be deleted. choice of MUW012VAR is based on a flawed site assessment process that contains inaccurate information. Strong local opposition &amp; doesn't comply with the policies of Neighbourhood Plan. The allocation would not meet the type or scale of local needs. Doesn't comply with requirements of SC's DP1 (Residential Mix), DP17 (Landscape and Visual Amenity) and SP1 (The Shropshire Test). There are alternative options that will deliver 'more sustainable' development and meet policy tests. Development at a scale incompatible with the nature of the historic settlement ( largest in its history) and in an isolated position outside development boundary, contrary to NPPF. MW012VAR does not satisfy highways and transport requirements identified in the NPPF. There are better sites available, including MUW008. MUW012VAR flawed from an accessibility perspective with site MUW008 closer to the town centre, less isolated and with far better pedestrian and public transport accessibility (as detailed in response paras 19.1 ;20.1 The 'preferred' site with introduced roundabout access will create delays, noise and street lighting intrusion and badly impact both congestion and air quality at the critical Gaskell Corner junction with existing demand pressure significantly increased by more vehicular movement including HGVs from pre development mineral extraction at the former Ironbridge Power Station site. Increased traffic impacts detailed, particularly on A4169 Smithfield Road /Gaskell Corner junction which operates close to capacity as evidenced, by Ironbridge Power Station Transport Assessment (TAA) which recommends improvements to the junction. TAA acknowledges that the issue at the Gaskell Corner is related to high traffic volumes, the specific layout and design of the junction and movements through it. TAA confirms that options identified will not resolve the problems at the Gaskell Corner.</p> <p>Representation quantifies and details increased demand from MUW012VAR and likely outcome that vehicular movement to and from the site will use route through the town to avoid delays at the junction. MW012VAR, with delay-inducing roundabout access, with negative impact at the Gaskell Corner and increased rat-running &amp; is poor technical and planning practice. No identified need for this roundabout &amp; if a need is identified other gateway/traffic calming schemes e.g. speed limit extension/ signage/road narrowing/landscaping would be effective. TAA does not quantify the impact of the additional delays on Air Quality. Impacts and delays at this junction however have been seriously underestimated in the TAA because future impact from the proposed residential developments at Cressage (80 homes) and Tasley, Bridgnorth (1000-1500 homes) not included. Additionally, inappropriate modelling method used for this situation. TAA is flawed and improvement options untested and unlikely to be able to address issues identified (detailed in 18.5 –18.16). The allocation of MUW012VAR contrary to sequential preference given to brownfield sites (which are available in Much Wenlock ) , specifically identified in relation to strategic corridors.</p>

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0088	B003 Cont'd						<p>The allocation of MUW012VAR contrary to NPPF and good practice which requires that development sites should prioritise pedestrian and cycle movements, facilitate access to good public transport and whose impact on the highway network and safety can be mitigated. Significant impacts from the site on transport network and safety cannot be cost effectively mitigated. Increased traffic from unsustainable development will damage the social and physical fabric, restrain economic potential, damage to the town's character, historic fabric and result in loss of the visual quality of its unique rural setting adjacent to an AONB and significantly harm the environmental setting of the Town. Identification of site contrary to SC policies ( including SP2), ignores need for proximity to shops, community facilities &amp; open space and reduction in car use. Site assessment is flawed and highlights that there are alternative more sustainable options against the Plan's policies SP1 &amp; SP3. Also, negative impacts on flooding; access to services &amp; facilities, high street vitality highlighted when considered against other MWNP, Open Space, Sport &amp; Recreation Interim Planning Guidance and SAMDev policies. Due to lack of consultation Shropshire Council have failed to consider relevant local evidence which combined with inability to effectively compare sites misses the opportunity to achieve a more integrated and sustainable community with easier access to facilities including smaller single level development sites near the town centre. MUW01 and 02 are more sustainable brownfield sites within Much Wenlock development boundary.</p> <p>Objection sets out detail of flooding factors and events at Hunters Gate &amp; site MUW012VAR including major flood incidents and issues with and failure of SUDs installation at Hunters Gate development. Sequential test in respect of flood risk not met. Alternative sites at less at risk are available. Proposed allocation does not reflect SAMDev Inspector's report and are contrary to the: NPPF guidance on flood risk and preparations for climate change. Local and National Flood Risk Management strategies emphasise working with communities to develop resilience to risks. Conflicts with Policy DP21 which states that 'The safeguarding of people and property and mitigation of the effects of climate change in accordance with Policy SP3 will be achieved by directing development to areas at least risk of flooding'. Proposed approach directs substantial development to a flood-prone catchment and most flood-prone site in catchment. Annex 1 of response identifies that alternative sites which have already mitigated the effects of flooding through the installation of attenuation ponds are available. SC approach at odds with both the national strategy for flood risk management and increasing resilience and its own Shropshire Local Flood Management Strategy. Objection sets out detail of flooding factors and events at Hunters Gate &amp; site MUW012VAR including major flood incidents and issues with and failure of SUDs installation at Hunters Gate development. Flooding events detailed in representation, including 2020 ponding across a substantial part of site MUW012 fed by groundwater springs with groundwater flooding to Hunters Gate. The site (in 2015) was identified by the Environment Agency, on data provided by Shropshire Council, as one of the areas of the catchment of Much Wenlock most at risk of flooding. Earlier 2011 Mouchel report, whilst recommending attenuation ponds to the south of the town, above site MUW012 noted that "...flooding mechanisms are still not completely understood" and recommended further investigation . Given this complexity no confidence in the delivery of an effective developer-led flood alleviation scheme. MUW012VAR expected to deliver solutions to a historic flood problems and failures but this cannot lawfully be imposed or guaranteed. Solutions should be identified, agreed and funded separately in advance of the consideration of further development. Further investigatory report commissioned by Severn Trent identified several causes of the flooding on Hunters Gate including excessive runoff from site MUW012VAR (as well as excessive flow from the drainage of the A458) causing an overload of the drainage system. Knock on impacts of flooding from Hunters Gate were also identified, including undue pressure on the town systems &amp; the flow out of the bowl &amp; to the River Severn. On this basis sequential test has not been applied by SC in preparing their plan. In particular, no evidence that a single developer will guarantee 'no risk' to the homes downstream of Much Wenlock and into the catchment area of the River Severn. Unclear what happened as a result of Severn Trent/SC bid for funding for a scheme to reduce flood risk from site MUW012. Allocation fails to reflect investigative report outcomes none of which suggested that additional development could ameliorate rather than increase flood problem. Lack of transparency about flooding alleviation proposals. No pre consultation opportunity for public scrutiny of development related flood alleviation scheme justifying proposed increased housing numbers to defray costs.</p> <p>SC has not taken into account findings from previous local plan inquiries &amp; the Inspector's report into the Bridgnorth Local Plan in 2006 concluding that a large housing development on a part of the same site as suggested by the LPR (MUW 0012) would have a significant impact on town's economy through a negative effect on the town's tourism trade. Insufficient attention paid to impacts on the character of the town by a large site. Proposal ignores the special nature of the town. Allocation of enlarged site completely contrary to strength of residents feeling. Rationale for doubling of site size between Reg 18 &amp; 19 Plan versions, with a new site assessment which approval of an even larger development of 200/228 dwellings, not justified, clearly explained or appropriately consulted on. Increased development justified by recalculated costs of flood attenuation but inaccurate and question the quality of the hydrological survey submitted by agents to support the site allocation. Stated commercial viability issue is not a sufficient consideration.</p>
A0090	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.1 Oswestry Place Plan Area	Yes	No	Yes	<p>Reference to Oswestry 2050 to justify the proposed development at Park Hall is a distortion of the facts. Park Hall was provided as an example of village settlements within an enlarged Oswestry, but this was a part of a wider example of what could be the result of a strategic planning exercise. Oswestry 2050 could be viewed as a pleas for a land use and transport plan for the A5 corridor.</p> <p>The Strategic Approach for the county and the Oswestry Place Plan Area is wrong.</p>
A0367	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.1 Oswestry	Not Specified	No	Not Specified	<p>Given the strategic importance of growth being directed to Oswestry such a reliance on unplanned windfall development and allocations outside of the town is considered inappropriate given the opportunity to direct some of this growth to identifiable sites in sequentially more appropriate (sustainable) locations within the town. OSW017 should be re-introduced as an allocation</p>
A0410	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14	Not Specified	No	Not Specified	<p>The proposed employment guideline for Oswestry earlier in the Local Plan Review was some 19ha (based on the 'balanced' employment land calculation identified within the Preferred Scale and Distribution of Development Consultation), this increased during the last Regulation 18 consultation (and remain as such in the draft Shropshire Local Plan) to 57ha, presumably only because land to meet that guideline is already in the pipeline, so no new allocations are proposed. No actual quantified justification has been evidenced for this large proposed increase in the employment land guideline, or for the departure from balance with the housing guideline.</p> <p>This means housing and employment land are not balanced locally, raising issues of sustainability, partly because of increased levels of commuting. To that extent, the employment land guideline is not justified by proportionate evidence.</p> <p>Note that the housing guideline for Oswestry also increased by 100 dwellings at the same time the employment guideline increased.</p> <p>With regard to proposed allocations at Park Hall:</p> <ul style="list-style-type: none"> <li>-Para 2 of draft Policy S14.1 references Oswestry 2050 as an inspiration, this misses the point of this document which identified the need for a long term plan (including a transport plan) aiming to reduce carbon emissions and made no reference to a mixed use 'garden settlement', rather than being the Plan.</li> <li>-Proposals include provision for key worker housing for the RJAH Hospital and Derwen College, this is welcomed, but there is no mechanism to secure it.</li> <li>-Site location presents conflicts. It is an allocation for Oswestry (some distance from Oswestry), in Whittington Parish, but will benefit employment sites in Gobowen Parish. Allocation of resulting CIL monies may be problematic.</li> <li>-Note the components of the site have been subject to change from that earlier proposed.</li> <li>-Parts of these site were rejected in the SLAA but no mitigation is proposed within the Sustainability Appraisal (SA).</li> </ul> <p>As such it appears that the allocations at Park Hall are not supported by proportionate evidence, and are therefore unsound. It is unsustainable to treat allocations at Park Hall to meet the needs of Oswestry and some of the new allocations now proposed for Park Hall were rejected in the SLAA.</p>
A0484	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	PKH002, PKH011, PKH013, PKH029, PKH031, and PKH032	No	No	No	<p>Do not consider road infrastructure (narrow; prone to flooding; parts are without pedestrian footways; and poorly maintained) or schools (oversubscribed) are sufficient to support proposed allocation PKH002, PKH011, PKH013, PKH029, PKH031, and PKH032.</p> <p>Park Hall lacks local amenities and development of PKH002, PKH011, PKH013, PKH029, PKH031, and PKH032 would double its size.</p> <p>The proposals for PKH002, PKH011, PKH013, PKH029, PKH031, and PKH032 represent overdevelopment.</p> <p>A pond at the bottom of PKH002, PKH011, PKH013, PKH029, PKH031, and PKH032 floods and has protected newts.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0088	B003 Cont'd				S13 Much Wenlock (MUW012VAR)
A0090	B002	The deletion of identification of Hub and Cluster Settlements within Policy S14, as set out in the attached document, consistent with the amendments sought to Policy SP2	Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to those Community Hubs proposed in the Oswestry Place Plan Area. However, recognising the diverse nature of Community Hub settlements the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.	No	S14.1 Oswestry
A0367	B001	OSW017 should be re-introduced as an allocation - any highway issues can be mitigated against as part of the development	The site referred to was considered appropriate in previous consultations however now the site assessment states that the: "Scale of development on this site would be minimal in terms of a contribution to the open market housing need of the town. It is acknowledged that there are issues with highways towards Upper Brook Street, however these are not substantive. It is considered that there is little rationale for an open market housing allocation in this location." Shropshire Council retains this stance.	No	S14.1 Oswestry
A0410	B017	The quantum of employment land proposed, and the allocations at Park Hall, need to be reappraised.	Shropshire Council considers that the proposed development strategy for Oswestry and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). The proposed employment land guideline for Oswestry provides appropriate choice and competition within the market, recognises the role of Oswestry and its contribution towards strategic growth objectives in the north-west of the County and meets the needs of the town and its surrounding hinterland, including attracting inward investment and allowing existing businesses to expand. It is noted that no additional employment land allocations are proposed for Oswestry. In identifying proposed site allocations a comprehensive site assessment process has been undertaken. The Strategic Land Availability Assessment (SLAA) represents the first phase of this site assessment process and represents a very strategic assessment of an individual sites suitability, availability and achievability (including viability). It is not intended to be an exhaustive exercise and has not been informed by a direct assessment from officers from other relevant services areas such as development management; heritage and design; natural environment; public protection; highways; or flood risk management.	No	S14.1 Oswestry
A0484	B001	Widen and better maintain roads (including flood defences for Burma Road) and extend pedestrian links. Provide new schools and shopping facilities to support development proposals. Reduce the level of development proposed to better reflect the existing area.	Noted. Shropshire Council considers that the proposed development strategy for Oswestry/Park Hall and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans. Draft site guidelines for proposed allocation PKH002, PKH011, PKH013, PKH029, PKH031, and PKH032 include "Any necessary improvements to the local and strategic road network will be undertaken..."	No	S14.1 Oswestry

1	2	3	4	5	6	7	8

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0625	B001	The site at the Swan Hill/Brogyntyn Registered Park should be an allocation for housing	Shropshire Council considers that the proposed development strategy for Oswestry and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). The proposed allocations have been identified through an appropriate, proportionate and robust site assessment process. The southern element of the site was assessed under ref OSW028. It was rejected as it forms part of a registered park. Likewise, the land north of this site reference is also Registered Parkland, and is therefore unsuitable for development and there are more suitable sites elsewhere (Park Hall).	No	S14.1 Oswestry
A0671	B004	Oswestry and Llanforda Reservoir and WTW is located adjacent to Oswestry's proposed Development Boundary. The asset is operational but also includes surplus land following recent major investment, which is appropriate for alternative use consideration. The Council should encourage applicants on relevant sites to contact Unite Utilities in order to consider implications of presence of Vyrnwy Aqueduct under their site.	Noted. Shropshire Council considers the proposed development strategy for Oswestry and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Proposed site allocations have been informed by a proportionate and robust site assessment. Shropshire Council also considers that the proposed development boundary is appropriate. Draft Policy DP19 includes "Development must not adversely affect the quality, quantity and flow of both ground and surface water and must ensure that there is adequate water infrastructure in place to meet its own needs."	No	S14.1 Oswestry
A0363	B002	n/a	Noted	No	S14.1 Oswestry
A0363	B001	n/a	Noted	No	S14.1 Oswestry (ELR042)
A0479	B002	Remove site OSW017	No action needed - OSW017 has already been removed as a preferred allocation	No	S14.1 Oswestry (OSW017)
A0408	B001	n/a	The preferred allocations situated in Park Hall are to address the need for Oswestry town, due to the town's constraints, over the Plan period in conjunction with those allocation from SAMDev. As per the site guidelines, various infrastructure will be required for development to be acceptable and compliant with the emerging plan.	No	S14.1 Oswestry (PKH002)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0409	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.1 Oswestry PKH002	Not Specified	No	Not Specified	Significant development already occurred in this area already. Insufficient infrastructure, school capacity and poor roads.
A0124	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SMH038	Yes	Yes	Yes	Support the modifications made at Reg 18 stage.
A0131	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2	Not Specified	Not Specified	Not Specified	We note reference in Policy S14.2. Community Hubs: Oswestry Place Plan Area, that St Martins and Weston Rhyn are within the setting of the Clwydian Range and Dee Valley Area of Outstanding Natural Beauty (AONB). Planning Policy Wales 10 requires development in the setting of an AONB to take account of the special qualities of the designated area. Proposals affecting the setting of the Clwydian Range and Dee Valley AONB must have regard to its identified special qualities in consultation with Natural Resources Wales and the Clwydian Range and Dee Valley AONB Partnership. This policy wording appropriately deals with issues raised on this matter in our response to the regulation 18 Pre-Submission Draft of the Shropshire Local Plan (DLP) consultation (dated 13/10/2020).
A0510	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 (GOB012)	Not Specified	Yes	Not Specified	Support identification of Gobowen as a Community Hub with a proposed residential guideline of 360 dwellings in draft Policy S14.2. GOB012 was allocated in the SAMDev Plan, however delivery was delayed by unforeseen non-planning issues. These have been resolved and the site can be made available for development, as such its re-allocation is supported.
A0103	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Gobowen GWR023	Not Specified	No	No	GWR023 was a preferred site at Reg 18 in November 2018 however no discussion or explanation has been given for its exclusion. Access to the site can be directly through the recent consent 15/04473/REM off Whittington Road. Since the previous Local Plan Review, we have slightly amended the proposed boundary to take into account the partial flooding on the land. Our previous submission included land within the flood zone, with this current submission we have moved the proposed site boundary to avoid any development within the flood zone.
A0026	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Kinnerley Community Hub	Not Specified	No	Not Specified	The residential guideline for Kinnerley is too high, and Shropshire Council are not including past completions at Coly Anchor and Centenary Close which would take the guideline down once these are taken into account. The guideline is also not proportional to Kinnerley in terms of its size as well as when compared to other settlements' guideline in the Oswestry Place Plan area.
A0348	B034	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2(i) KCK009	Not Specified	Yes	Not Specified	The Council has undertaken a 'Supplementary Site Assessment' with regard to KCK009, which concludes that 'in principle development in this location would not cause harm to the significance of the Conservation Area as a result of inappropriate impacts on its setting, subject to it being of a comparable design, scale and layout to that which has been built most recently to the south'. This is welcomed and we note that the proposed Development Guidelines for KCK009 include stipulations for a Heritage Impact Assessment to be carried out and its recommendations taken into account with respect to the impact of the development on the significance of the Knockin Conservation Area. However, it is considered that the proposed Development Guidelines should be strengthened by the inclusion of more specific guidance relating to the design, scale and layout of the proposed allocation (as per the Supplementary Site Assessment), and thereby mitigating any harm that may be caused to the significance of the Conservation Area. Additionally, welcome that the 'Supplementary Site Assessment' of KCK009 includes assessment of the site in relation to the significance of the Scheduled Monument of Knockin Castle and its setting. With regard to non-designated archaeology, it is noted that two linear earthwork features (HER PRN 03723), (the remains of two substantial, infilled medieval ditches), would be partially destroyed by development of HHH001 and HHH014. Although, it is suggested that mitigation could be achieved at the development management stage through archaeological recording, secured by a planning condition, and that the requirements of which should be informed by an initial desk based assessment and field evaluation that are undertaken prior to submission of a planning application, this is not mentioned in the Development Guidelines at present and it is therefore recommended that these specific requirements be included.
A0347	B072	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Knockin KCK009	No	No	Not Specified	The site falls within the SPZ3 of a public water supply borehole. The depth to groundwater is likely to be shallow. There are also a number of private supplies. Given the sensitive hydrogeological setting appropriate drainage solutions will be required, foundation dewatering will need to be considered and we would discourage the proliferation of non-mains foul drainage

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0409	B001	n/a	The preferred allocations situated in Park Hall are to address the need for Oswestry town, due to the town's constraints, over the Plan period in conjunction with those allocation from SAMDev. As per the site guidelines, various infrastructure will be required for development to be acceptable and compliant with the emerging plan.	No	S14.1 Oswestry (PKH002)
A0124	B017	n/a	Support welcomed.	No	S14.2 (i) St Martins
A0131	B001	None specified	Support welcomed.	No	S14.2 Community Hubs Oswestry
A0510	B001	N/A	Noted.	No	S14.2 Gobowen
A0103	B001	The plan should be modified to include this site as a logical and sensible continuation of the existing development, and reinstate it's former status as a preferred housing allocation.	GWR023 was indeed a preferred allocation within the Reg-18 Preferred Sites Consultation (November 2018) document, however it was removed as a preferred allocation as part of the Reg-18 Pre-Submission Draft of the Shropshire Local Plan (Aug 2020), and this remains the case at Reg-19 stage. It should be noted that when GWR023 was a preferred allocation, it was immediately N of the existing consent and immediately adjacent to Fernhill Lane. As the SE corner of GWR023 lay in a flood area, Shropshire Council needed data from the SFRA Level 2 before a confirmed decision could be made on the site for the August 2020 Reg-18 stage. This data was received fairly late, and so very shortly after this was received, the document needed publishing, however the data confirmed that no access points should run through the site's SE corner (i.e. off Fernhill Lane). As this was the only possible access due to the design of the now-extant consent blocking off any possible access, the site was removed as it was inaccessible. This, contrary to the representation, was explained to the site promoters in an email thread in August 2020. It was also discussed "shifting" GWR023 to the west slightly - avoiding all the flood area and having access through the existing consent to the south. However, at the time the design and positioning of the housing in the existing consent meant that no access could go through the site northwards. A representation was subsequently submitted as part of the Aug 2020 Reg-18 Consultation for this "shifted" site, however it relied on an access through a semi-detached house whereby there were no applications to amend the scheme to remove this dwelling. The council was therefore not confident in the accessibility of this shifted site, and retain this stance.	No	S14.2 Gobowen (GWR023)
A0026	B001	The new residential guideline for Kinnerley as a Community Hub should be no more than 50 dwellings, not the proposed figure of 60 dwellings.	The completions at Coly Anchor and Centenary Close took place prior to 31st March 2016, and so are correctly not included in Shropshire Council's figures as they pre-date the plan period (i.e. before 31 March 2016). In terms of proportionality of development in Kinnerley - Shropshire Council takes due consideration on all settlements in terms of its housing guideline, looking at each settlements' opportunities and constraints. Kinnerley's percentage increase is comparable to several settlements in the Oswestry Place Plan area, including St Martins and West Felton. Each settlement is reviewed on a case-by-case basis, as every settlement has its own respective constraints and opportunities, and Kinnerley is seen as being a suitable settlement for the housing guideline given. Notably there are no allocations here, as it is expected the guideline will be reach through windfall development	No	S14.2 Kinnerley
A0348	B034	Proposed Development Guidelines for KCK009 should be strengthened by: -Inclusion of more specific guidance relating to the design, scale and layout of the proposed allocation (as per the Supplementary Site Assessment), and thereby mitigating any harm that may be caused to the significance of the Conservation Area. -Specifying that archaeological recording will be undertaken, secured by a planning condition, and that the requirements of this archaeological recording should be informed by an initial desk based assessment and field evaluation undertaken prior to submission of a Planning Application.	A minor modification is proposed to the 2nd paragraph of the site guidelines for KCK009 in Schedule S14.2(i) to reflect the need for an archaeological assessment prior to a planning application, the need to take into account non-designated archaeological features and that the design of development should reflect the findings of the Heritage Assessment.	Yes	S14.2 Knockin
A0347	B072	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S14.2 Knockin (KCK009)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0394	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Schedule S14.2(i) KCK009	Not Specified	Yes	Not Specified	S14.2. Community Hubs: Knockin . Support the proposed allocation of KCK009 for 25 dwellings. Development of site KCK009 would enable the sustainable development of Knockin within the Plan period. Site is adjacent to the existing built edge of Knockin & a logical location for village future expansion. There are limited site-specific constraints, and development would be proportionate to Knockin's role as a Community Hub. No known in principle reasons why detailed policy requirements re access, heritage, trees & drainage & flood risk set out in draft guidelines cannot be met. Site is deliverable – landowner in negotiations with developers and pre-application discussions have taken place with Shropshire Council under the pre-application process. Extract of masterplan scheme submitted at the pre-application stage shows how the site can accommodate 27 dwellings and demonstrates that it could address the detailed KCK009 policy requirements as part of a future planning application. The Estate has experience & a track record of timely delivery of residential sites. Consider forecast delivery timetables for the site at Appendix 7 of the Draft Local Plan are achievable & delivery could comfortably occur before identified medium term subject to the planning process.
A0468	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	not specified	Not Specified	Not Specified	Not Specified	The preferred allocation floods, and last did so in 2014 but also the flooding is every year along the east aspect of the field along the weirbrook... this field is lower than the brook which is buffered... i feel drainage will be compromised and sewage treatment is already over subscribed in the reedbed plant north end of church lane.
A0348	B035	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2(i) LYH007	Not Specified	Yes	Not Specified	Welcome that the Council has undertaken a 'Supplementary Site Assessment' for LYH007, regarding the potential impact on the significance of the Llanymynech Village and Heritage Conservation Area and the potential impact on the settings and significance of the Scheduled Monument of Lime kilns, associated tramways, structures and other buildings at Llanymynech (Llanymynech Lime Works) (NHLE ref. 1021412). Note proposed Development Guidelines for LYH007 include stipulations for a Heritage Impact Assessment to be carried out and its recommendations taken into account with respect to the impact of the development on the significance of the Llanymynech Conservation Area and its setting. However, recommend that proposed Development Guidelines be strengthened through the inclusion of more specific guidance relating to the design, scale and layout of the proposed allocation, to ensure that the development is comparable to the recent development of site LLAN009. Additionally, welcome the assessment of the site in relation to the significance of the Llanymynech Lime Works Scheduled Monument and note that a well-designed landscape buffer along the canal is also recommended, in addition to the design considerations set out in relation to the Conservation Area. However, this is also not mentioned in the proposed Development Guidelines and it is therefore recommended that these specific requirements also be included.
A0394	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2(i) LYH007	Not Specified	Yes	Not Specified	Support the proposed allocation of LYH007 for 50 dwellings. Development of site KCK009 would enable the sustainable development of Llanymynech within the Plan period. Site is adjacent to the existing built edge of Llanymynech & a logical location for village future expansion. There are limited site-specific constraints, and development would be proportionate to Llanymynech role as a Community Hub. Support the Regulation 19 Local Plan's policy requirements for LYH007 re access, heritage, rights of way; hedgerows and watercourses; drainage & flood management and the canal as set out in draft guidelines. Site is deliverable as demonstrated by pre-application submission to Shropshire Council which has appropriate evidence submitted. Further evidence would be commissioned at planning application stage. The pre-app scheme for site development is in accordance with the LYH007 draft site guidelines. It proposes 53 new homes of mixed size and tenure, with 10% affordable housing in accordance with emerging policy DP3. The scheme would be accessed through the recently implemented residential development at Barley Meadows, which until its development was also owned by Bradford Estates. This demonstrates that the Estate has ability, experience & a track record of delivery of residential sites. Consider forecast delivery timetables for the site at Appendix 7 of the Draft Local Plan are achievable & delivery could comfortably occur within the identified short-medium term.
A0490	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2	Not Specified	Not Specified	Not Specified	The guideline of around 125 dwellings for Ruyton XI Towns and around 155 dwellings for Weston Rhyn could be construed by some as being a maximum. The policy should make it clear that these figures are not meant to be seen as a "cap" but instead be expressed as a minimum.
A0491	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2	Not Specified	Not Specified	Not Specified	The guideline of around 125 dwellings for Ruyton XI Towns and around 155 dwellings for Weston Rhyn could be construed by some as being a maximum. The policy should make it clear that these figures are not meant to be seen as a "cap" but instead be expressed as a minimum. WRN016 in the maps does not show the full extent of the site which has been granted.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0394	B001	n/a	Noted	No	S14.2 Knockin (KCK009)
A0468	B001	n/a	As specified in the site guidelines: "The site will incorporate appropriate sustainable drainage, informed by a sustainable drainage strategy. Any residual surface water flood risk will be managed by excluding development from the affected areas of the site, development will also be excluded from the elements of the site located in Flood Zones 2 and/or 3, these areas will form part of the Green Infrastructure network. Flood and water management measures must not displace water elsewhere."	No	S14.2 Knockin (KCK009)
A0348	B035	Proposed Development Guidelines for LYH007 should: -Include more specific guidance relating to the design, scale and layout of the proposed allocation, to ensure that the development is comparable to the recent development of site LLAN009. -Require a well-designed landscape buffer along the canal.	5.8.5.A minor modification is proposed to the 2nd paragraph of the draft Site Guidelines for site LYH007 in Schedule 14.2(i) to reflect the need for the design of development to be based on the results of the Heritage Impact Assessment and to include a buffer to the canal.	Yes	S14.2 Llanymynech
A0394	B002	N/A	Noted	No	S14.2 Llanymynech (LYH007)
A0490	B002	The guideline of around 125 dwellings for Ruyton XI Towns and around 155 dwellings for Weston Rhyn could be construed by some as being a maximum. The policy should make it clear that these figures are not meant to be seen as a "cap" but instead be expressed as a minimum.	The figures for these settlements are meant as a guideline, and so this is not meant to be read as either a minimum or maximum figure.	No	S14.2 Oswestry Community Hubs
A0491	B003	The SAMDev allocation WRN016 should reflect the extent of the permission which reflects the brownfield extent of the site and as such the Local Plan should identify this and allocate it accordingly. Additionally, whilst the site lies upon the Councils Brownfield Land Register under the same WRN016 reference this too fails to reflect the "actual" extent of the previously developed site. These errors must be rectified and the settlement boundary must be extended to include the site as shown on the plan below which reflects the established brownfield extent of the site.	The figures illustrated for the sites are only guidelines and so appropriate housing numbers around the figures would be considered at the planning application stage. The site outlined in brown indicates the land which was adopted as a SAMDev site. Any subsequent additions to this would be from a planning application only, as only the land indicated was adopted as part of SAMDev and so this will not change.	No	S14.2 Oswestry Community Hubs

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0090	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Oswestry Hubs	Yes	No	Yes	Object to the preferred sites in Kinnerley, Knockin, Llanymynech, Pant, Ruyton XI Towns, Trefonen, West Felton, Weston Rhyn and Whittington. Most of the hubs only have a rudimentary bus services, and schools and employment are far from the settlement. Avoidable GHG emissions will be created if development is in these locations. Development should be limited to local need in all of the following locations: II. Kinnerley –there is no evidence that the services are in need of support which further development might bring, or that they provide a complete service which might make the settlement sustainable. Knockin has no primary school or other facilities. There is no evidence that any support which further development might bring might be effective in maintaining the village hall. The settlement is not sustainable. Whilst Llanymynech has shops, access to a primary school and other facilities, there is no evidence that these are in need of support which further development might bring, or that they provide a complete service which might make the settlement sustainable. Whilst Pant has a shop, a primary school and other facilities, there is no evidence that these are in need of support which further development might bring, or that they provide a complete service which might make the settlement sustainable. Whilst Ruyton has a shop, a primary school and other facilities, there is no evidence that these are in need of support which further development might bring, or that they provide a complete service which might make the settlement sustainable. The site allocated is a brownfield site, but it is distant from main services. Whilst Trefonen has a shop, a primary school and other facilities, there is no evidence that these are in need of support which further development might bring, or that they provide a complete service which might make the settlement sustainable. Whilst West Felton has a shop, a primary school and other facilities, there is no evidence that these are in need of support which further development might bring, or that they provide a complete service which might make the settlement sustainable. Whilst Weston Rhyn has a shop, a primary school and other facilities, there is no evidence that these are in need of support which further development might bring, or that they provide a complete service which might make the settlement sustainable. Whilst Whittington has a shop, a primary school and other facilities, there is no evidence that these are in need of support which further development might bring, or that they provide a complete service which might make the settlement sustainable. Similar principles should be applied to development in Community Clusters as to open countryside. It is unlikely that any development in the listed Community Clusters would be sustainably located in relation to the policy to move to a low carbon economy. There is no convincing evidence that any of the small scale development envisaged in cluster settlements would make any significant difference to the viability of such settlements.
A0365	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Pant PYC021	Not Specified	No	Not Specified	Support Pant's status as a Hub, however the guideline for the settlement is too low. Overdependence on windfall and the allocation (PYC021) for 25 dwellings which is fairly linear in nature and the highway requirements would impact the housing capacity on the site.
A0536	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8 and S14	Yes	No	Yes	As Ruyton XI Towns is a Community Hub, more than one site allocation should be identified as there is then more potential for delivery. There appears little evidence that proposed allocation RUY019 will be released for development in the near future, as it is currently used as a haulage site. As such RUY005 should be included as a proposed allocation. RUY005 lies in a sustainable location within walking distance (existing footway) of services and facilities and would represent infill development. Appears the Council did not give sufficient consideration to the benefits of this site to deliver housing.
A0347	B074	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Ruyton XI Towns	No	No	Not Specified	The site is located within SPZ3 of a public water supply borehole. Shallow groundwater is probable. Dairy/industrial former site use, so contaminated land considerations. Appropriate land use, mains foul drainage, surface water drainage design and pollution prevention measures would therefore be required.
A0490	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Ruyton XI Towns RUY019	Not Specified	Not Specified	Not Specified	The policy wishes for any redevelopment of the site to consider the potential for interpretation of heritage features on the site and also the contribution it might make to the wider heritage features elsewhere in the settlement (e.g. Ruyton Castle Scheduled Monument), but there are no known features on the site (our Archaeological Desktop that supported the Outline PP ref. 10/04143/OUT) demonstrates this and to associate this site with the Castle remains SAM located way beyond the site demise to the east of the village (as depicted on the Place Plan extract below) is unreasonable.
A0017	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 St Martins	Not Specified	Not Specified	Not Specified	The Parish Council would therefore request that as part of the current review Shropshire Council consider moving Stan's store and playing field to the rear within the development boundary as a minor modification to the Plan
A0040	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 St Martins	Not Specified	No	Not Specified	St. Martin's residential guideline of 'around 355 dwellings' is unjustifiably low.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0090	B003	There should be no housing allocations in Kinnerley, Knockin, Llanymynech, Pant, Ruyton XI Towns, Trefonen, West Felton, Weston Rhyn and Whittington.	Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to those Community Hubs proposed in the Oswestry Place Plan Area. However, recognising the diverse nature of Community Hub settlements the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.	No	S14.2 Oswestry Hubs
A0365	B001	PYC020 should be within the development boundary and potentially an allocated site for 6 dwellings	This site was assessed as part of the site assessment process, where it was considered that it "is located in an area where only very narrow roads reach, therefore there would be difficulties for HGVs etc. in accessing the site. There are also other more appropriate sites for allocation." A very minor snippet of the Conservation Area does overlap with the site at the west side.	No	S14.2 Pant (PYC021)
A0536	B001	RUY005 (plan appended to representation) should be considered for allocation.	Noted. Shropshire Council considers that the proposed development strategy for Ruyton XI Towns and the proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.	No	S14.2 Ruyton XI Towns
A0347	B074	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S14.2 Ruyton XI Towns (RUY019)
A0490	B003	Due to costs, the only incentive to consider this opportunity further is if the allocation (maps included as part of rep) was extended to include the small paddock to the west which might enable any renewable energy scheme to be brought forward on the field to the west of the paddock. The site can sustain 80 houses, rather than 65 in the guideline	The figure of 65 for the site is only a guideline and so appropriate housing numbers around this figure would be considered at the planning application stage. The site as preferred is considered appropriate in terms of size and scale. Likewise the additional land to the west was not promoted at any stage until now	No	S14.2 Ruyton XI Towns (RUY019)
A0017	B001	Development Boundary should be amended to include Stans Stores and the adjacent playing pitch.	It is also considered that the proposed development boundary for St Martins is appropriate, having had due consideration of the built form of the settlement.	No	S14.2 St Martins
A0040	B004	SMH037 should be allocated in addition to the preferred allocation, for around 65 dwellings	Shropshire Council undertook a robust site assessment exercise and it was considered that site SMH037 was "...compromised by poor highway access and by limited accessibility to local services. Better sites available." It is therefore considered that the preferred allocations are suitable alongside any windfall development to meet the housing target of the settlement	No	S14.2 St Martins

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0436	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Policies Map	Not Specified	No	Not Specified	It appears that the settlement development boundary of St Martins, identified as a Community Hub has not been reviewed to take account of / reflect developments that have occurred on the edge of the settlement. The plan is not positively prepared as a result. Windfall development is unnecessarily restricted despite the sustainable credentials of the settlement. The Plan is not therefore positively prepared or justified. Sites that should properly be considered under Policy SP8 as sustainable windfall sites in Community Hubs would, on the basis of the Policy Map, incorrectly be considered as falling within open countryside for policy purposes. The Inspector is asked to look at the soundness of St Martins settlement boundary. In particular SMH041 'West of Cottage Lane, St Martins' remains outside the settlement boundary despite being surrounded on all sides by an existing sub-urban housing development. It appears the Council has simply not correctly reviewed the boundaries to reflect existing developments. An outline planning application was made on part of the site Ref 16/03362/OUT, dated 28 July 2016 for residential development of circa 8 dwellings. It was refused solely due to its location outside the settlement boundary. The Inspector determining a subsequent appeal noted: The site is surrounded on all sides by existing suburban housing development and is effectively landlocked. The site lies outside the development boundary of St Martins. Immediately to the south is a small recently built housing scheme of nine properties that was approved at a time when the Council could not demonstrate a five year housing supply. That development should now be included in the Local Plan review as being within the development boundary of St Martins as it is a well-established development clearly forming part of, and not separated from, other built development in St Martins. It clearly forms part of the Community Hub.
A0436	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2	Not Specified	No	Not Specified	The development boundary of St Martins has not been reviewed or amended to reflect development on the ground. In particular, SHLAA site SMH041 is surrounded on all sides by existing suburban housing development and is effectively landlocked. Immediately to the south is a small housing scheme of nine properties that was approved at a time when the Council could not demonstrate a five year housing supply. This development should clearly be included in the development boundary. It is not separated from development currently identified as being within the development boundary and is clearly part of the Community Hub. SHLAA site SM041 provides a windfall opportunity. In fact, had the site been correctly assessed as being within a Community Hub boundary it would have scored significantly different in the SA. To plan is not positively prepared as the development boundary of St Martins excludes development sites that would clearly be appropriate as windfall sites, subject to meeting criteria of Policy SP8.
A0583	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2	Yes	No	Yes	The fourth paragraph relating to SHM031 is incorrect and must be corrected. As worded, this paragraph wrongly refers to a sewer, its implication upon development and seemingly a resulting assessment required of the Sewage Pumping Station to establish improvement requirement. The Estate, as Landowner, submitted a Concept Masterplan and Vision Document (CM&VD) to previous stages of the Local Plan process, including the Regulation 18 consultation (August 2020). This identifies a utility easement which is associated with a gas pipe and not sewer infrastructure. The CM&VD identified this utility easement and as a result demonstrates the ability of SMH031 to deliver, through a considered masterplan, the capacity of 60 dwellings in line with the site allocation. In view of the drafting error, it is appropriate to delete the final (fourth) paragraph associated with the SMH031 allocation.
A0347	B075	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	St Martins	No	No	Not Specified	This is a former mining area so there may be ground contamination/stability issues that will need to be addressed. Given the proposed scale of the development mains foul drainage will be required.
A0016	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 St Martins SMH031	Yes	Yes	Yes	The public sewerage network can accept the potential foul flows from the proposed development site however an assessment of the Sewage Pumping Station (SPS) would need to be undertaken to establish whether improvements are required. Potential developers need to be aware that this site is crossed by a sewer and protection measures in the form of an easement width or a diversion of the pipe would be required which may impact upon the housing density achievable on site.
A0644	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 St Martins	Not Specified	No	Yes	I object to the smaller field directly behind the rear gardens of 1-14 Moors Bank being included in the plans. This is due to residents using this field for recreational walking to access the right of way paths, to walk to the canal, for many years. Access is also needed to our rear gardens, for purposes such as large machinery, due to narrow access at the front. If this field is developed for residential housing, it will have a detrimental impact on our quality of life, as we as a family spend large amounts of time in our garden. Our garden is a safe place for our children to play and enjoy the outdoors, especially during the Covid-19 Pandemic, where our gardens and fields are the only means to exercise and ensure wellbeing of mental health. This would no longer be the case, if this field is included as a site for residential development, as we'd be living next to a building site, and then being overlooked by housing, with no access to the right of way paths to the canal, and no access to our rear garden.
A0016	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 St Martins SMH038	Yes	Yes	Yes	The public sewerage network can accept the potential foul flows from the proposed development site.
A0122	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Trefonen	Not Specified	No	Not Specified	Trefonen does not have "significant Employment opportunities" or "peak time public transport". Trefonen has been proposed as a "Hub Settlement". It is the only proposed "Hub Settlement" that have neither of the above key requirements. Giving Trefonen "Hub" status would contravene the substance on SP3 Climate Change and Sustainability Objectives SO5/6 & 12. Trefonen as a "Hub Settlement" is unsound.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0436	B001	The development boundary for St Martins should be reviewed to correctly reflect the development that has occurred on the edge of the settlement and ensure the Plan is positively prepared.	Shropshire Council considers that the development strategy proposed for St Martins (including existing and proposed allocations), which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). It is also considered that the proposed development boundary for St Martins is appropriate, having had due consideration of the built form of the settlement.	No	S14.2 St Martins
A0436	B002	As a sustainable Community Hub, amendments to the development boundary of St Martins are required to ensure the plan is positively prepared.	Shropshire Council considers that the development strategy proposed for St Martins (including existing and proposed allocations), which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). It is also considered that the proposed development boundary for St Martins is appropriate, having had due consideration of the built form of the settlement.	No	S14.2 St Martins
A0583	B002	Owing to a technical inaccuracy in respect of the allocation wording, as explained above, the following text should be deleted from forming commentary alongside SMH031 on page 249 of the Regulation 19 document. 'The site is crossed by a sewer, therefore protection measures in the form of an easement width or a diversion of the pipe would likely be required which may impact upon the housing density achievable on site. An assessment of the Sewage Pumping Station (SPS) would need to be undertaken to establish whether improvements are required.'	A minor modification to Schedule S14.2(i) is proposed to SMH031 to recognise the presence of a utility in the site	Yes	S14.2 St Martins
A0347	B075	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S14.2 St Martins (SMH031 and SMH038)
A0016	B002	n/a	Noted.	No	S14.2 St Martins (SMH031)
A0644	B001	The smaller field directly behind 1-14 Moors Bank, should be excluded from this development site, leaving just the main larger field for development.	A PROW runs near the site, with its nearest point around 130m from the preferred allocation's SE corner. However, the main access points for this PROW are from either Moors Lane to the south or off an unnamed road off Church Street to the north. Notably there are no PROWs running through the preferred allocation. All sites promoted since the Call for Sites went through a robust site assessment process and this site is deemed appropriate for residential development. Any planning application for housing would have to ensure that it is appropriate in terms of encroachment on existing dwellings etc. however this is dealt with at the planning application stages.	No	S14.2 St Martins (SMH031)
A0016	B003	n/a	Noted.	No	S14.2 St Martins (SMH038)
A0122	B002	Trefonen should be regarded as a "Rural Settlement" with housing development to meet the needs of local people over the plan period. This can be achieved by "Affordable Exception" and "Rural Exception" as a housing policy set out in the Draft Plan for rural settlements with a school, This would include many type of housing such as houses, bungalows starter homes. This could be achieved with small developments of say 5 homes. Also consideration should be given to the extensive work performed by the community to produce the Village Design Statement. This should be referred to in the SP5 High Quality Design.	Shropshire Council undertook a robust assessment during the Hierarchy of Settlement process and Trefonen's services and facilities meant that its score resulted in it being a Hub. Notably there are no housing allocations in the settlement as part of this Plan Review. Community Led Plans are considered to be appropriately referenced within the proposed explanation of draft Policy SP5 and other draft policies/proposed explanations to draft policies. Village Design Statements are considered a form of community-led plan. However, for clarity a minor modification is proposed to the explanation to draft Policy SP5.	Yes	S14.2 Trefonen

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0127	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 - Oswestry place plan area: Trefonen Hub	Not Specified	No	Not Specified	Trefonen is the only proposed hub settlement with neither significant employment opportunities or peak time public transport. Making it a hub would be contrary to Shropshire's climate change and sustainability objectives and is unsound. Sufficient housing to meet the needs of local people during the plan period can be achieved by 'exception' mechanisms. Trefonen as a rural settlement should only have small scale housing of a type and size that reflects requirements for starter, intermediate, downsize and accessible houses or bungalows. Any development should conform to the village design statement. Important to guard against the cumulative impact of developments by additional wording within the affordable exception policies DP4,5,6 and 7.
A0138	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	x	Yes	No	Yes	Draft Plan is "unsound" in its use of the criteria it is applying to Trefonen and its proposed Hub status. Para 5.41 which relaxes the need for Hubs to have both employment opportunities and peak time public transport is in direct contradiction to the Councils SP3 Climate Change and Sustainability Objectives SO5, SO6, & SO12 which seek to minimise car travel, increase usage of sustainable travel and reduce carbon emissions. Trefonen which has no significant employment opportunities or peak time public transport is the only proposed Hub settlement with neither of these key requirements. Trefonen has a full school, with no scope for expansion, and with existing housing provision meeting "identified local needs" for local people. Future housing needs can be provided for by Rural Exceptions Policies DP4, DP5, DP6 & DP7 "ascertained by reference to Shropshire Council's Home Point Housing Waiting List or by Right Homes Right Places or local Housing Needs Survey." The village would benefit from these small-scale developments of affordable housing over a period of time. Shropshire Council should respect our Village Design Statement 2016.
A0139	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	x	Yes	No	Yes	Draft Plan is "unsound" in its use of the criteria it is applying to Trefonen and its proposed Hub status. Para 5.41 which relaxes the need for Hubs to have both employment opportunities and peak time public transport is in direct contradiction to the Councils SP3 Climate Change and Sustainability Objectives SO5, SO6, & SO12 which seek to minimise car travel, increase usage of sustainable travel and reduce carbon emissions. Trefonen which has no significant employment opportunities or peak time public transport is the only proposed Hub settlement with neither of these key requirements. Trefonen has a full school, with no scope for expansion, and with existing housing provision meeting "identified local needs" for local people. Future housing needs can be provided for by Rural Exceptions Policies DP4, DP5, DP6 & DP7 "ascertained by reference to Shropshire Council's Home Point Housing Waiting List or by Right Homes Right Places or local Housing Needs Survey." The village would benefit from these small-scale developments of affordable housing over a period of time. Shropshire Council should respect our Village Design Statement 2016.
A0335	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S14.2	Not Specified	No	Not Specified	Trefonen does not have significant employment opportunities or peak time public transport. It is the only proposed Community Hub with neither of these key requirements and this proposal does not tie-up with climate change and sustainability objectives. As such Trefonen should be in the other rural settlement category.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0127	B002	Trefonen is the only proposed hub settlement with neither significant employment opportunities or peak time public transport. Making it a hub would be contrary to Shropshire's climate change and sustainability objectives and is unsound. Sufficient housing to meet the needs of local people during the plan period can be achieved by 'exception' mechanisms. Trefonen as a rural settlement should only have small scale housing of a type and size that reflects requirements for starter, intermediate, downsize and accessible houses or bungalows & conforms to the village design statement. Important to guard against the cumulative impact of developments by the additional wording within the affordable exception policies DP4,5,6 and 7.	<p>Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment.</p> <p>As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub.</p> <p>Shropshire Council also considers that the development strategy proposed for Trefonen, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable. It is noted that the proposed requirements in draft Policy S14.2, which applies to the proposed Community Hubs in the Oswestry Place Plan Area - including Trefonen, includes "development proposals will be expected to positively respond to policies and guidelines within any relevant community-led plans and local needs."</p>	No	S14.2 Trefonen
A0138	B001	Trefonen should be removed as a Community Hub in Policy S14.2	<p>Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen.</p> <p>Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0372	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Trefonen	Not Specified	No	Not Specified	Trefonen is the only proposed Hub that does not have significant employment and peak time public transport. It would be contrary to SP3 Climate Change and Sustainability Objectives SO5, SO6 and SO12 if it was allocated hub status. This would be unsound.
A0429	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2	Not Specified	No	Not Specified	Policy SP2 para 6 Hierarchy of Settlements is unsound. Trefonen has very little employment at all and no prospect of any in the future. No peak time public transport- very little bus service at all and non at peak. These are contrary to SP3 climate change and sustainability objectives... SO5. SO6. SO12 policies render these documents unsound.
A0430	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Trefonen	Not Specified	No	Not Specified	Trefonen is the only Hub with no allocations, and so is wholly inconsistent with the approach to all other hubs, with no evidence to justify the lack of a housing allocations. The justification for Trefonen having no allocations is poor.
A0488	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Trefonen	Not Specified	No	Not Specified	Trefonen does not have any "significant employment opportunities" or "peak time public transport". It is the only proposed Hub settlement with neither of these key requirements, and allocating it as such would be contrary to SP3 Climate Change and Sustainability Objectives SO5, SO6, & SO12.
A0518	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Trefonen	Not Specified	No	Not Specified	Trefonen does not have significant employment opportunities or peak time public transport, and is the only hub without these. The Plan is therefore unsound
A0604	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Trefonen (TRF006, TRF008, TRF010, TRF015 and TRF017)	Not Specified	Not Specified	Not Specified	Development of housing on sites TRF006, TRF008, TRF010, TRF015 & TRF017 would have an adverse impact on both the setting of Offa's Dyke (Scheduled Monument (SM)) and the Offa's Dyke National Trail path. Would be very concerned in particular, at the prospect of any development on TRF008, this field contains a section of Offa's Dyke SM along the entire eastern side (inside the hedge-line) and is clearly visible to walkers from the National Trail path. Any development of this field, would be contrary to the guidance laid down in the Offa's Dyke Conservation Management Plan (ODCMP 2018) - which has been adopted by regional authorities along the length of the monument, including Shropshire Council. Would also have very strong reservations in the event of housing development on TRF010, as this would be immediately adjacent to (and overlook) the Offa's Dyke National Trail path. Development on TRF006, TRF015 & TRF017 would not affect the monument as much as TRF008 & TRF010, but would still go against the core principles of the ODCMP.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0372	B002	Trefonen should be removed from the Community Hub settlements and allocated as a rural settlement	Shropshire Council undertook a robust assessment during the Hierarchy of Settlement process and Trefonen's services and facilities meant that its score resulted in it being a Hub. Notably there are no housing allocations in the settlement as part of this Plan Review. A minor modification is proposed to reduce the gross housing requirement for the village over the plan period (see response to A0605)	No	S14.2 Trefonen
A0429	B001	Para 5.41 relaxes Hub requirements of employment and peak time transport. This conflicts with climate change emergency policy which opens the door for subjective assessment and opens up just an opinion only and is in conflict with how other settlements are assessed which proves SP2 unsound	Shropshire Council undertook a robust assessment during the Hierarchy of Settlement process and Trefonen's services and facilities meant that its score resulted in it being a Hub. Notably there are no housing allocations in the settlement as part of this Plan Review.	No	S14.2 Trefonen
A0430	B002	In order for the draft SLP to be justified, effective and consistent we suggest the following changes are necessary: <input checked="" type="checkbox"/> We consider that housing allocations should be identified for Trefonen to ensure delivery of the residential development requirement. <input checked="" type="checkbox"/> Our Client's site (TRF014) should be considered as a site allocation to secure delivery of the housing requirement for Trefonen and key objectives for the area.	The site assessment conclusion for TRF014 states: "Site has good access but is slightly far out but is still in proximity to the main services of the village. However available information about local housing need suggests that the greatest need is for affordable and low cost market housing of a range of types and tenures. No site allocations are therefore proposed and it is instead proposed that the housing guideline will be delivered through the development of appropriately located 'cross-subsidy' exception sites." Therefore site would be appropriate for cross subsidy or affordable etc. The housing guideline is also relatively small and a large site of the size suggested may be considered inappropriate.	No	S14.2 Trefonen
A0488	B002	Trefonen should be removed from the Community Hub settlements in Policy S14.2 Community Hubs – Oswestry Place Plan Area and Schedule SP2.2: Community Hubs. It should be a Rural Settlement. We believe that sufficient housing to meet the needs of local people over the Plan period can be met by "Affordable Exception" and "Rural Exception" Housing policies set out in the Draft Plan for rural settlements with a school, including the type & size of housing that is identified to be required (starter, intermediate, downsize, accessible - houses or bungalow). Any development should conform to the Village Design Statement. Reference to compliance with VDS should be added into SP5 High Quality Design	Shropshire Council undertook a robust assessment during the Hierarchy of Settlement process and Trefonen's services and facilities meant that its score resulted in it being a Hub. Notably there are no housing allocations in the settlement as part of this Plan Review. A minor modification is proposed to reduce the gross housing requirement for the village over the plan period (see response to A0605) Community Led Plans are considered to be appropriately referenced within the proposed explanation of draft Policy SP5 and other draft policies/proposed explanations to draft policies. Village Design Statements are considered a form of community-led plan. However, for clarity a minor modification is proposed to the explanation to draft Policy SP5.	Yes	S14.2 Trefonen
A0518	B001	Trefonen should not be a Hub and should not have a housing guideline. It should be a rural settlement	Shropshire Council undertook a robust assessment during the Hierarchy of Settlement process and Trefonen's services and facilities meant that its score resulted in it being a Hub. Notably there are no housing allocations in the settlement as part of this Plan Review. A minor modification is proposed to reduce the gross housing requirement for the village over the plan period (see response to A0605)	No	S14.2 Trefonen
A0604	B001	N/A	Noted. No sites are proposed for allocation at Trefonen.	No	S14.2 Trefonen

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0605	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Trefonen	Not Specified	No	Not Specified	<p>Trefonen cannot reasonably be considered as meeting the requirements of a proposed Community Hub.</p> <p>Consider the methodology used and conclusions reached in the "Hierarchy of Settlements" (HoS) as applied to Trefonen are fundamentally wrong and the village falls well short of fulfilling several of the criteria required for Community Hub status.</p> <p>Previously to qualify as a Community Hub, "significant employment" and "peak time public transport" were required, Trefonen has neither (and is the only proposed Community Hub with neither). This is now relaxed by para 5.41 of the HoS, which undermines proposals relating to climate change and sustainability, introduces a subjective element into an objective assessment and leads to the conclusion that some aspects of HoS are unsound.</p> <p>Other factors which demonstrate the HoS has not been correctly applied in Trefonen include:</p> <ul style="list-style-type: none"> <li>-The library is a mobile library with short fortnightly visits, this cannot be considered a full service. Note that TRF001 and TRF017 score 0 within the site assessment for access to library, showing two different and contradictory assessments.</li> <li>-There is no "convenience store", rather there is a very small shop which has a Post Office counter within it.</li> <li>-Whilst there is a primary school, it is understood that there is little or no capacity for additional pupils.</li> </ul> <p>In addition to the above, consider Trefonen should not be a Community Hub as it is in the wrong place. Community Hub status would cause significant residential development pressure, with residents (apart from retirees), needing jobs. The main focus for jobs in the Oswestry area is the other site of town (near Mile End Roundabout). This and job locations further afield (Wrexham, Shrewsbury, Chester etc) all require travel through/round Morda in private vehicles (often single occupied) on heavily trafficked unclassified roads. Makes no sense to identify a Community Hub that will significantly increase existing traffic problems in and around Oswestry at peak hours</p> <p>Identification of Trefonen as a Community Hub is contract to draft Policy SP3 and Sustainability Appraisal (SA) objectives SO5, SO6, &amp; SO12.</p> <p>Parish Council have consistently indicated wish for Trefonen to remain classified as countryside, which allows for 100% affordable small scale rural exception development for identified local needs (reflecting the Trefonen, Treflach and Nantmawr VDS (2016) and the Council's Housing Needs Survey (2018)).</p> <p>Proposed for an additional 50 houses in Trefonen during the proposed Plan period cannot be considered modest growth the context of the built community of Trefonen and would constitute overdevelopment.</p> <p>Consider sites at Trefonen (including TRF 001, 006, 008, 009, 010, 015 &amp; 017) identified as having long-term potential within the Strategic Land Availability Assessment (SLAA) are entirely unsuitable for residential development, for reasons including location, access, traffic, flooding and drainage, geology/geomorphology, heritage, preservation of the rural environment, landscape character and ecology.</p>
A0627	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S14.2	Not Specified	No	Not Specified	<p>Trefonen does not have any "significant employment opportunities" or "peak time public transport". It is the only proposed Community Hub settlement with neither of these key requirements.</p> <p>Allocating Trefonen as a Community Hub is contrary to draft Policy SP3 and Sustainability Objectives SO5, SO6, &amp; SO12 which seek to minimise car travel/maximise trips by sustainable travel and reduce carbon emissions. Housing provision required to meet "identified local needs" for truly "Affordable Homes" for local people ascertained by application to Home Point Housing Waiting List or by Right Homes Right Places or local Housing Needs Survey during the period of the Plan can be met by draft Rural Affordable Exceptions Policies DP4 – DP7 – and contribute as 'Windfall' to the overall Housing Target.</p> <p>Very concerned that multiple "small" developments to reach the currently proposed "guideline" of 50 additional dwellings would have a cumulative impact amounting to the same, or arguably greater, impact as a large development on our village over the course of time. Do not believe that is the intention of the National Planning Policy Framework (NPPF) in allowing Rural Exception developments in and around rural settlements.</p> <p>Appendix to this representation includes a landscape and heritage assessment for Trefonen.</p>
A0630	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2 and S14.2	Not Specified	No	Not Specified	<p>SP2.2 Community Hubs. Trefonen is the only proposed Hub that does not have significant employment and peak time public transport. It would be contrary to SP3 Climate Change and Sustainability Objectives SO5, SO6 and SO12 if it was allocated hub status. This would be unsound.</p>
A0640	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Unspecified	No	No	No	Support views of Trefonen Rural Protection Group
A0651	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Not specified	Not Specified	Not Specified	Not Specified	Regarding planning for building in Trefonen, surely the extra traffic generated would impact on the bottle neck getting into town passed the Catholic school and Oswestry School. I understand planning permission was recently refused on a plot near to the school due to the congestion it would cause.
A0030	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 West Felton	No	Not Specified	Not Specified	Not legally complaint as there has been no public consultation. The target of 25,400 is too high, other sites in West Felton have a better SA score, 60 new houses in West Felton will bring issues

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0605	B001	Trefonen should not be identified as a Community Hub, rather it should be classified as countryside (associated changes to the draft Shropshire Local Plan should be undertaken). If retained as a Community Hub, reduce the proposed residential guideline.	Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen. Whilst the data relating to the availability of services and facilities, public transport, significant employment opportunities and high-speed broadband have been appropriately and consistently updated within the Hierarchy of Settlements Assessment, the methodology used and application of the Hierarchy of Settlements Assessment has remained consistent. Specifically with regard to Community Hub status, at no point has it been suggested that the presence of regular public transport links or significant employment opportunities is a mandatory requirement to attain Community Hub status, rather it is recognised that whilst the exact combination varies, such settlements are considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities. It is to allow appropriate consideration and comparison between these differing categories that points are ascribed to them within the Assessment. As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub. With regard to the proposed local housing requirement, it is considered appropriate to review the position having regard to consistency with other similarly scaled community hub settlements, as well as the likelihood of delivery over the plan period, having taken account of the overall net requirement remaining to be delivered over the remainder of the plan period, and that it has not been considered appropriate to allocate any land in the village due to site constraints identified through the SLAA process. It is therefore proposed to include a minor modification to the Plan to reduce the gross housing requirement for the village from 55 to 35 dwellings. It is considered this requirement will be met by: Suitable infill development within the defined development boundary; single plot and larger affordable housing exception schemes, potentially outside the development boundary but on sites well related to the village; and Cross-subsidy exception schemes (at least 70% affordable housing), potentially outside the development boundary but on sites well related to the village.	yes	S14.2 Trefonen
A0627	B009	Trefonen should be designated 'other rural settlement', with no housing guideline (development can come forward to meet identified local needs for truly affordable housing under draft Policies DP4, DP5 and DP7). Appropriate updates made to the draft Shropshire Local Plan. Limitations on cumulative "Exception Site" developments adjacent to individual settlements must be included within policies DP4, DP5, & DP7.	Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Trefonen. As such it is considered appropriate for Trefonen to be identified as a proposed Community Hub. Shropshire Council also considers that the development strategy proposed for Trefonen, which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable. Notably there are no housing allocations in the settlement within the draft Shropshire Local Plan. A minor modification is proposed to reduce the gross housing requirement for the village over the plan period (see response to A0605) As specified within draft Policies DP4, DP5 and DP7 the primary factor that determines the size threshold for affordable housing exception sites is local need (with DP7 also specifying schemes will not normally exceed 10 dwellings). However, they also include a cross-reference to para 4(a-d) of draft Policy SP9, which identify considerations for developments including scale, design and layout of development (in the context of the site and its surroundings) and infrastructure capacity. It is considered that this effectively manages cumulative impact.	No	S14.2 Trefonen
A0630	B002	Trefonen should be removed from the Community Hub settlements in Policy S14.2 Community Hubs – Oswestry Place Plan Area and schedule SP2.2 Trefonen should be allocated as a Rural Settlement. Affordable Exception and Rural Exception would provide for the needs of local people in small scale development. The cumulative impact of these should be controlled by additional wording in the Affordable Exception Policies DP4, DP5, DP6 and DP7. Any development should conform to the Village Design Statement and this should be written into SP5 High Quality Design.	Shropshire Council undertook a robust assessment during the Hierarchy of Settlement process and Trefonen's services and facilities meant that its score resulted in it being a Hub. Notably there are no housing allocations in the settlement as part of this Plan Review. A minor modification is proposed to reduce the gross housing requirement for the village over the plan period (see response to A0605)	No	S14.2 Trefonen
A0640	B001	Trefonen should not be a hub - its should be open countryside	Shropshire Council undertook a robust assessment during the Hierarchy of Settlement process and Trefonen's services and facilities meant that its score resulted in it being a Hub. Notably there are no housing allocations in the settlement as part of this Plan Review. A minor modification is proposed to reduce the gross housing requirement for the village over the plan period (see response to A0605)	No	S14.2 Trefonen
A0651	B001	n/a	There are no housing allocations for Trefonen. Rather, the housing need for Trefonen is to be met by infill and windfall sites. Therefore any concerns relating to traffic will be considered at the planning application stages	No	S14.2 Trefonen
A0030	B001	Decrease the housing for the county, and have smaller sites in West Felton, rather than one large one	Contrary to this response, there have been numerous public consultations over several years for residents to express their views. A robust approach was taken during site assessments which deemed that the allocation was suitable. 60 houses is considered appropriate for this settlement and is in a good location given that it extends the recent development across to the east.	No	S14.2 West Felton

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0433	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 West Felton	Yes	No	Yes	In West Felton, Shropshire Council has allocated site WEF025. Shropshire council's sustainability assessment gave this site a rating on -5 (Good). 10 sites had a better sustainability score than this site. 15 had a worse score. One other site had the same score. Objectively there were more sustainable sites they could have chosen.
A0347	B076	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	West Felton	No	No	Not Specified	The site is within the SPZ3 of a public water supply borehole. The depth to groundwater is likely to be relatively shallow. There are also a number of private supplies. Appropriate land use, mains foul drainage, surface water drainage design and pollution prevention measures would therefore be required. Foundation dewatering will need to be considered.
A0577	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 West Felton WEF032 WEF002	Yes	No	Yes	This is a well located and fully deliverable site with an area of 0.33 ha or 2.00ha. We believe this site is suitably placed to provide development in West Felton towards the target of dwellings by 2038, being situated with an established access to the former A5 and adjoining recently developed land. Our proposed site WEF002/WEF032 has achieved a sustainability rating of GOOD, which is one of the better ratings compared to the other sites in West Felton. The land is well positioned with access to the highway on the southern boundary and is adjoining land that has recently gained planning permission and has already been developed for caravan storage.
A0508	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 (WRP001VAR)	Not Specified	Yes	Not Specified	Confirm that site WRP001VAR is promoted for development and the proposed allocation is supported.
A0347	B077	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Weston Rhyn	No	No	Not Specified	The site is adjacent to springs/issues and surface water course. So groundwater is likely to be shallow. Foundation dewatering and surface water management aspects will need consideration.
A0016	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Weston Rhyn WRP001VAR	Yes	Yes	Yes	A hydraulic modelling assessment (HMA) of the sewerage network will be required to assess its capacity to accommodate additional foul flows. Potential developers would be expected to fund investigations during pre-planning stages. The findings of the HMA would inform the extent of any necessary sewerage upgrades which can be requisitioned through the provisions of the Water Industry Act 1991 (as amended). The sewerage system in this area drains to Five Fords WwTW which can accommodate the foul flows from the proposed growth figure.
A0016	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Weston Rhyn WRP017	Yes	Yes	Yes	A hydraulic modelling assessment (HMA) of the sewerage network will be required to assess its capacity to accommodate additional foul flows. Potential developers would be expected to fund investigations during pre-planning stages. The findings of the HMA would inform the extent of any necessary sewerage upgrades which can be requisitioned through the provisions of the Water Industry Act 1991 (as amended). The sewerage system in this area drains to Five Fords WwTW which can accommodate the foul flows from the proposed growth figure.
A0587	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2 Weston Rhyn WRPVAR001	Yes	Yes	Yes	Support the site and its associated guidelines. Site is available, deliverable and viable.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0433	B001	A robust needs assessment must take place before sites are allocated and the needs properly weighted in the sustainability assessments	The SA is not the defining factor when allocating sites. Other criteria and factors are taken into consideration as outlined in the site assessments. The conclusion for WEF025 is: "Site is adjacent to existing development and would link onto this, acting as a natural extension to an area already under development. The site is suitably located in terms of proximity to services, and would support an appropriate number of dwellings for the village. Furthermore, there are few constraints given by service providers for this site. Good SA scoring. Southern element of site not to be allocated - see Design Requirement below." Notably the SA score was 'Good' for the preferred allocation	No	S14.2 West Felton
A0347	B076	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S14.2 West Felton (WEF025)
A0577	B001	WEF002 and WEF032 should be considered for residential allocation	Shropshire Council undertook a robust site assessment for all sites promoted for housing or employment. In terms of WEF002 and WEF032, the conclusions in the site assessment was:  WEF002 - "As the sites availability for residential development is unknown the site will not proceed to the next stage of the site assessment process."  WEF032: "Site is slightly set away from the core of the settlement. There are other more suitable sites to allocate."  Shropshire Council still considers that the preferred allocation (WEF025) is a more suitable site for allocation.	No	S14.2 West Felton (WEF032 and WEF002)
A0508	B001	N/A	Noted.	No	S14.2 Weston Rhyn
A0347	B077	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S14.2 Weston Rhyn (WRP001VAR and WRP017)
A0016	B004	A hydraulic modelling assessment (HMA) of the sewerage network will be required to assess its capacity to accommodate additional foul flows	Noted. The Council expects hydraulic modelling to be carried out by the developer at the planning application stage and assessed through the Development Management process. Information on capacity of Five Fords WwTW is welcomed (see also Statement of Common Ground with Dwr Cymru Welsh Water).	No	S14.2 Weston Rhyn (WRP001VAR)
A0016	B005	A hydraulic modelling assessment (HMA) of the sewerage network will be required to assess its capacity to accommodate additional foul flows	Noted. The Council expects hydraulic modelling to be carried out by the developer at the planning application stage and assessed through the Development Management process. Information on capacity of Five Fords WwTW is welcomed (see also Statement of Common Ground with Dwr Cymru Welsh Water).	No	S14.2 Weston Rhyn (WRP017)
A0587	B001	n/a	Noted	No	S14.2 Weston Rhyn (WRPVAR001)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0348	B036	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14.2(i) WHN024	Not Specified	Yes	Not Specified	Welcome that the Council has undertaken a 'Supplementary Site Assessment' for WHN024, regarding the potential impact on the significance of the Whittington Conservation Area as a consequence of impacts upon its setting and the potential impacts on the setting and significance of the Scheduled Monument and Grade I Listed Building of Whittington Castle (NHLE refs. 1019450 & 1178307). Note proposed Development Guidelines for WHN024 include the requirement for a proportionate Heritage Impact Assessment to be carried out, and its recommendations taken into account, with respect to the impact of the development on the significance of the Whittington Conservation Area and its setting, and the significance, including the setting, of any other heritage assets close to the site. Also note that the Supplementary Assessment undertaken recommends that an archaeological desk based assessment, and if appropriate a field evaluation, should be submitted with any planning application so that a suitable level of archaeological mitigation can be secured by condition if necessary. However, this is not mentioned in the proposed Development Guidelines, recommend that these specific requirements also be included.
A0403	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S14 (WHN024)	Yes	Yes	Yes	Support classification of Whittington as a proposed Community Hub, which is considered a significant rural service centre. Support allocation of site WHN024 for the development of 70 dwellings. The site is viable and deliverable within the first five years of the Local Plan Review period, consistent with draft Appendix A7. It is also considered that development of WHN024 is capable of complying with draft Policy SP7. A highway report (summarised within the representation) confirms appropriate access consistent with proposed guidelines can be achieved, whilst traffic calming/extension of the 30mph zone/pedestrian footways will be investigated in support of any future Planning Application. Heritage and ecology assessments would also be undertaken at this stage. High quality design and layout (range of house types and sizes including necessary affordables), biodiversity enhancements, habitat enhancement/mitigation (including retention of mature trees) and sustainable drainage (informed by a sustainable drainage strategy) would be achieved. Consider it can positively respond to any mitigation measures associated with Cole Mere. Potential additional land (0.3ha) promoted, which would allow for a direct pedestrian link into the centre of Whittington (plan appended to representation) and open space provision/enhanced tree planting. Query why within the Sustainability Appraisal (SA) WHN024 is identified as being within a conservation area (Section 13), not within proximity of a bus stop (Section 6) and not within 480m of a mobile library (Section 5). Consider the SA score should increase by 3 points.
A0347	B078	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whittington	No	No	Not Specified	The site is located within SPZ3 of a public water supply borehole and shallow groundwater in places. Given the proposed scale of the development mains foul drainage will be required. Foundation dewatering and surface water management aspects will need consideration
A0001	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Development Strategy: Shifnal Town	Not Specified	Not Specified	Not Specified	Object to allocation of SHF015 & SHF029 for ecological issues. Site guidelines do not reflect the nature of the sites.
A0060	B021	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal: SHF018b/SHF018d	No	No	Not Specified	Consider proposed allocations SHF018b/SHF018d are contrary to NPPF Green Belt policy, the law, Gunning Principles and policy on sustainable development and sustainability appraisal and the legal requirement to consider reasonable alternatives and to give reasons why those alternatives were not selected and the need to justify exceptional circumstances (as required for Green Belt release). As such they are not considered sound. -It is illogical to allocate land for development whilst leaving undeveloped land between it and the town boundary (SHF018a/P14). -SHF018a/P14, benefit from a functional relationship with the adjacent Industrial Estate - lacking for SHF018b/SHF018d yet referenced in draft site guidelines. -SHF018a/P14 would lead to less harm to the Green Belt than SHR018b/SHF018d (SHF18b/SHF018d would represent encroachment into the countryside and beyond Lamledge Lane. SHF018d also lacks defined boundaries, as recognised within the Green Belt Review, contrary to para 139(f) of the NPPF. Para 5.211 of the draft Shropshire Local Plan incorrectly references the harm of proposed employment allocations and medium-high when it will be high). -Site SHF018d has not been subject to a Sustainability Approval as required by law and policy despite having a high degree of harm to the Green Belt as shown in the evidence base. -Safeguarded sites SHF018a/P14 are more sustainable sites in the SLAA assessment than the allocated employment sites SHF018b/SHF018d. -Sites SHF018a/P14 have a lower negative sustainability score in the Sustainability Appraisal. -Sites SHF018a/P14 have a similar site areas to SHF018b and would meet the original requirement for 14ha of additional employment land (without the unjustified further 24ha). -Past consultation documents stated the Council recognised the important contribution the promoters of SHF018b/SHF018d will make to the future of Shifnal through expeditious delivery, yet no evidence of this is provided. This also suggests pre-determination of the allocation. As does the inclusion of the site in the Invest In Shropshire Brochure. No evidence has been submitted to justify why sites SHF018a/P14 were not considered appropriate for allocation as the preferred employment sites, even though they were 'reasonable alternative' sites. SHF018b could then be safeguarded (if needed) and SHF018d remain in the Green Belt. Draft site guidelines for SHF018b/SHF018d include significant improvements to Stanton Road and no traffic to go west into Shifnal. However, no evidence of improvements, costs or how they will be undertaken (including restrictions to traffic to the west). As such proposals are unsound (must be effective and deliverable). It appears the increase to the employment land guideline proposed for Shifnal is simply to accommodate SHF016b/SHF018d, rather than to meet the needs of the town. The proposed employment development land located off Stanton Road will create a substantial increase in traffic on Stanton Road and Aston Street even if commercial vehicles could be effectively restricted from using this route. The main commercial centre in East Shropshire is Telford, which lies to the west of Shifnal, and Aston Street is the direct route to Telford from the proposed development. Vehicles wishing to access and egress from the west will use the Aston Street / Stanton Road route as it is more than 8 kilometres shorter than the A41 / M54 route to Junction 4 of the M54. The A41/Stanton Road junction is also a site of morning and evening stationary traffic for vehicles trying to travel in the direction of the M54 Stanton Road and Aston Street are not suitable for carrying the additional volume and increased unit weight of the generated traffic because: (1) The junction with Bradford Street and the A464 trunk road is already well beyond capacity and causes substantial delays and congestion at peak periods. Proximity of buildings within the Shifnal conservation area preclude any opportunity of additional land take for upgrading. (2) The turning movements at this junction currently disrupt traffic flows on both the A464 and the A4169. (3) The existing carriageway is narrow (6 metres) and cannot be widened due to the proximity of buildings. (4) The existing carriageway construction is not engineered and is not capable of taking additional and heavier traffic. It is currently in a poor state of repair. (5) The station approach and the main shopping car park access onto Aston Street, both junctions having severely impaired sight. (6) Aston Street residents are obliged to park on Aston Street causing single line traffic flows as there is no access to the rear of their properties. (7) Aston Street dwelling doorways access directly onto the pavement, and the increase in noise, dust and vibration will be detrimental to their environment. (8) The Bradford Street/ Aston Street junction is crossed by the principal walking route to the train station from the town centre including provision for those with impaired sight and wheelchair users. (9) The existing pedestrian footpaths at the junction are narrow and hazardous.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0348	B036	Proposed Development Guidelines for WHN024 should require an archaeological desk based assessment, and if appropriate a field evaluation to be undertaken and submitted with any Planning Application.	A minor modification is proposed to the 2nd paragraph of the draft Site Guidelines for site WHN024 in Schedule 14.2(i) to reflect the need for an archaeological assessment (desk based with field work as necessary).	Yes	S14.2 Whittington
A0403	B001	Do not consider changes are necessary to site allocation WHN024.	Noted.	No	S14.2 Whittington
A0347	B078	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S14.2 Whittington (WHN024)
A0001	B001	1&2. Removal of site allocation SHF015 & SHF029.	The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings including sites SHF015 & SHF029 that will make an important contribution to meeting the housing needs of Shifnal and helping to conserve the important historical building of Beech House and its curtilage structures and land. In identifying the proposed site allocations including SHF015 and SHF029, a comprehensive site assessment process has been undertaken, which included consideration of ecological issues. As such no change is proposed.	No	S15.1 Shifnal
A0060	B021	Delete proposed allocations SHF018b/SHF018d. If the employment land guideline justifies it, allocate sites SHF018a/P14 and safeguard SHF018b.	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. Whilst Shropshire Council has proposed to support the Black Country Authorities to meet their unmet needs in Shropshire, it is not proposed to identify specific sites to accommodate the intended contribution to cross-boundary needs arising within the Black Country (1,500 dwellings and 30ha of employment land). Rather this is included within the proposed housing and employment land requirements subject to the proposed strategic approach for the level and distribution of development across Shropshire.	No	S15.1 Shifnal

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0086	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15- Shifnal	yes	yes	Not Specified	The proposed Development Boundary along Park Lane as shown on the Shifnal Inset Plan to incorporate existing built development on either side of the Lane is logical and appropriate and fully supported. The Development Boundary should remain as indicated regardless of whether proposed Safeguarded Land to the west of Shifnal, between Park Lane and Madeley Road is retained in the Plan.
A0109	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal	Not Specified	No	Not Specified	Aware of the need for housing, but don't want it to blight the lives of people already living in small towns and villages in the County. Shifnal has already had more than its share of development. Infrastructure in Shifnal cannot cope with current loads, never mind any more associated with new development (particularly roads (also in need of repair), GP surgery (expansion promised for years), schools, parking difficulties (making the settlement a dormitory as people spend their money elsewhere). Agricultural land should be protected to grow crops, instead extensive brownfield land within the West Midlands should be developed. Shifnal has lost much of its identity.
A0137	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15	No	No	No	Support overall aims of draft Policy S15. However would note the draft Policy and its supporting text indicates: -Shifnal will be a focus for investment, employment, housing and development on the M54/A5 Strategic Corridor and have a key role to play in providing homes, jobs, services and facilities to the Place Plan Area, other Green Belt communities and the M54/A5 strategic corridor. -New employment development is proposed to be delivered through a significant new investment opportunity on a proposed employment allocation (SHF018b and SHF018d), which will deliver 15.6ha net of development (single storey B1c, B2 and B8 uses 'serving the sub-regional supply chains on the A5, M54 and M6 corridors). -The proposed employment allocation SHF018b and SHF018d is within the Green Belt. Within the Green Belt Review undertaken to inform the draft Shropshire Local Plan the site is covered by two parcels, one has moderate-high harm the other high harm to the Green Belt if released. Shropshire Council considers exceptional circumstances exist to support this proposed allocation. -The strategy for Shifnal is to change the business investment and employment offer in its scale, quality, range of uses and choice of premises to enable Shifnal to function as a sustainable investment location in the M54 corridor, benefitting from access via Junction 3 and close proximity to the i54 major investment site. Proposed allocation SHF018b and SHF018d would be serviced from the A41/M54 Junction 3 but this would be via a minor rural route, Stanton Road. The draft Shropshire Local Plan acknowledges the need for a Strategic Transport Assessment to assess the effects of this development and cumulative growth of Shifnal on the Junction 3 of the M54 and the A41/Stanton Road junction. Distance from the strategic road network, lack of transport evidence and scale of the site (not sufficient to meet strategic regional and sub-regional need) demonstrates Shifnal is not likely to be able to make a 'significant contribution' to regional and sub-regional strategies. As such SHF018b and SHF018d is likely to meet local employment needs only. Land at Junction 3 would meet sub-regional and regional needs but, importantly, would also be complementary to the local employment offer at Shifnal and assist in addressing its jobs/homes balance to 2038 as required under the draft Shropshire Local Plan.
A0147	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Not Specified	Not Specified	Not Specified	Not Specified	As well as the joint submission with Miller Homes (summarised under response ref A0146), a separate Lodge Hill vision framework/illustrative masterplan (Lodge Hill Extension Development Framework Document (Sept 20) & consideration of site against technical assessments has been prepared specifically for the Lodge Hill site (informed by extensive supporting assessments including a Preliminary Landscape and Visual Appraisal (2020, Pegasus Group), Flood Risk Assessment (2020, SWECO), Ecological Appraisal (2020, FPCR) and Historic Environment Desk-Based Assessment (2020, Nexus) which also form Appendices to this representation), demonstrating consideration of opportunities/constraints, how the site could be delivered. It is concluded that the technical studies that have been undertaken demonstrate that there are no constraints that would prevent the allocation of the site. Submission further seeks to demonstrate that site is suitable, sustainable and deliverable and should be allocated as a sustainable extension capable of accommodating sustainable residential development to meet medium and long-term housing needs as well as delivering a new link road and community facilities. Site Plan and phasing provided for the site with phases to deliver up to 1,100 new home. A range of socio-economic benefits are identified. Consider the site would represent a logical expansion of the settlement Shifnal & site location & context plans are provided in the response. The site is located in the M54 growth corridor & able to contribute to the Council's economic and demographic strategies. The site has a 'good' overall score in the Council's Sustainability Appraisal & is a highly sustainable location with proximity to large areas of employment. Confirms that the site has no significant constraints and the site will not materially reduce the gap between Shifnal and Telford. The need for sustainable development in the M54 growth corridor contributes to the case for exceptional circumstances for the release of the Green Belt. A bespoke Green Belt assessment for the site is provided. Exceptional circumstances for release are set out & potential for Green Belt environmental improvements are identified. A landscape led approach can ensure that a scheme embeds mitigation in the overarching design principles and recognises the local landscape character. On the basis of the published LVSS and the more detailed PLVA, the site is considered to be of low to medium visual and landscape sensitivity to new residential development and is suitable and preferable for a residentially led masterplan. New landscaped edge will be created to form a robust green edge between Shifnal and the Green Belt. Together with improved public access to greenspace, this will improve the environmental character of the Green Belt. It is considered that a major benefit is that the development of this site will not exacerbate traffic conditions in the town centre & will deliver a new link road around the south and west of Shifnal( plan provided) on a phased basis over the life of the development. The through road from the A464 Wolverhampton Road to Park Lane serving the site has the potential to offer wider strategic benefits to Shifnal. It would form the first section of a local link road, ultimately connecting to the A4169, with the potential to connect to the A464 Priorslee Road. Link road will enable a significant proportion of through traffic to be removed from the town centre which could be combined with already proposed improvement to the Five-Ways roundabout & Innage Road on-street parking/waiting control. The link road will provide an alternative route that by-passes the town and will ensure that the development does not generate any further pressure on key junctions in the town. The development of the site could ease current traffic congestion conditions associated with St Andrews Primary School by also including provision of a pick-up and drop-off . The introduction of the roundabout for access and improvements to footways would act as a gateway feature at the entrance to the town from the southwest. This will act as a traffic calming feature facilitating a reduction in the speed limit. The site has good connectivity with the wider settlement by sustainable transport modes & is also ideally located to encourage travel by sustainable modes as described in the response. An Illustrative Masterplan and potential phasing to deliver is provided to deliver approximately 1,100 new homes, in conjunction with public open space & new transport infrastructure and community facilities as required in the early part of the plan period. The masterplan has been informed by site technical assessments relating to environmental considerations, heritage designations, flooding and drainage, landscape, open space and ecology, and phasing of new homes. Delivery of new housing in the Shifnal will address historic under provision and provide : a range of homes to meet long term housing needs address affordability ratio issue ; provide choice of well designed energy efficient homes; Shifnal's growth will reinforce sustainability, helping address ageing population profile through growth of the working-age population. Appendix also provides an analysis of the housing requirement and Five Year Land Supply. It is considered that using Governments proposed revised standard method that there will be a need for the local plan to address under provision and calculations of five-year requirement are provided. Supplied Appendices: Appendix preliminary landscape and visual assessment Lodge hill; Appendix Historic Environment Assessment Lodge hill; Appendix Ecological Assessment – Lodge hill; Appendix FRA- Lodge Hill; Appendix – Reg 18

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0086	B001	The Development Boundary at Park Lane Shifnal should remain as indicated, regardless whether or not the proposed Safeguarded Land to the west of Shifnal, between Park Lane and Madeley Road, is the subject of Modification.	The Local Plan has established the development boundary for Shifnal on the Policies Map and it is not proposed to amend this boundary any further and the land proposed to be released from the Green Belt at Lodge Hill between Park Lane and the A4169 will be safeguarded for future development and it is intended that this land will remain open and undeveloped during the remaining Plan period to 2038.	No	S15.1 Shifnal
A0109	B001	Reduce the level of growth in Shifnal.	On the completion of the proposed 1,500 dwellings in Shifnal, which is expected to occur before 2026 it is proposed that housing development should cease and not be resumed again until after 2038. This period of respite from housing development will also allow infrastructure improvements to occur in the town including programmed improvements to key locations on the highway network in the town and for the community to assimilate the growth of the town since the adoption of the SAMDev plan in 2015. In relation to the anticipated respite from further housing development in Shifnal, it is proposed that much of the land released from the Green Belt will be safeguarded for future development and it is intended that this land will remain open and undeveloped during the remaining Plan period to 2038.	No	S15.1 Shifnal
A0137	B015	N/A	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0148	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15	Not Specified	Not Specified	Not Specified	Support retention of 'saved' allocation SHIF006 (Land north of Wolverhampton Road) as well as the housing allocation of SHF022 and SHF023 (Land between Windmill View and The Monument on A464).
A0286	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal Town Strategy	No	No	No	Council need to present evidence to justify the release of Green Belt land for safeguarding for future development beyond 2038 to the east, south and west of Shifnal. This designation implies the principle of development on this land is accepted despite the community not being consulted on this prior to including the land the Plan. The safeguarding of this significant area of land will also place further strain on Shifnal should the County be unable to demonstrate an adequate housing land supply in the short to medium term. Council need to justify the reason for considering Green Belt policies in the event that an earlier development proposal was considered for the safeguarded land under very special circumstances and whether the development of the land would be afforded the same weight as Green Belt land. Council need to demonstrate the very special circumstances for the release of allocations SHF018b and SHF018d and show that this omission will not provide a precedent for the release of further safeguarded land in a future review of the Local Plan. Council also need to have regard to the conservation of the historic character of Shifnal and make available any submitted heritage assessments to illustrate the proposed mitigation of to conserve and enhance the historic character of the town. The Local plan also needs to recognise the underlying consensus of the local community set out in the objectives of the Shifnal Neighbourhood Plan that any development should retain the small market town character as a principle attraction of the town. Council should justify the large release of Green Belt land which are contrary to national policy including paragraph 006 of the Planning Policy Guidance and which undermine the Shifnal Neighbourhood Plan. it is recognised that the Neighbourhood Plan only goes to 2026, the principle issues brought forward by the community and underpinning the Plan, are still relevant and should be reflected in the Local Plan proposals. The proposals are clearly a significant departure from the Neighbourhood Plan and the community and Shifnal Town Council has understandably raised the question about whether their efforts to produce the Plan were worthwhile. If the proposals were to go ahead this would naturally cause a great deal of local resentment. Council take into account both Market Drayton and Broseley Neighbourhood Plans, while Shifnal's Plan has not been acknowledged. We would like to understand why this is the case.
A0305	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15 Shifnal	No	No	Yes	NPPF paragraph 70 states that whenever an allowance is made for windfall development as part of anticipated supply, compelling evidence is needed that windfall sites will provide a reliable source of supply. The Council have failed to provide any evidence, let alone compelling evidence to justify such a high proportion of windfall allowance and so their proposal is not sound and contrary to national policy. Having regard to the potential windfall sites in Shifnal, the percentage of windfall allocations in other settlements and the potential for pressure to release Safeguarded Land/Green Belt in the future to meet unmet windfall allowance, the existing figure of 92 dwellings is excessive.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0148	B012	L&Q Estates disagree with the proposed approach to the safeguarding of land between Revells Rough, Lamledge Lane and the eastern rail line and considers that this land should be allocated for housing in order to meet an increased housing requirement	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This provision of land for housing development in the period to 2038 includes sites SHF022 and SHF023 and the saved allocation SHIF006 is contained in Appendix 2 to the draft Local Plan. It is considered that the remaining safeguarded land north of Revells Rough is remotely located from the built form and highway network of Shifnal and the release of this remaining safeguarded land should be determined as part of a future strategy for Shifnal.	No	S15.1 Shifnal
A0286	B019	Council should not remove the proposed safeguarded land from the Green Belt and should instead demonstrate the very special circumstances for the release of land for further development. The Council should also publish any submitted heritage assessments to illustrate the proposed mitigation to conserve and enhance the historic character of the town should any land be released from the Green Belt for development.	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. . Development guidelines for sites released for development will ensure the site design, layout and landscaping respects the character and significance of adjoining land uses. In the Green Belt, this is required to strengthen the boundary to the urban area to help maintain the openness and permanence of the Green Belt around Shifnal. On the completion of the proposed 1,500 dwellings in Shifnal, which is expected to occur before 2026 it is proposed that housing development should cease and not be resumed again until after 2038. This period of respite from housing development will also allow infrastructure improvements to occur in the town including programmed improvements to key locations on the highway network in the town and for the community to assimilate the growth of the town since the adoption of the SAMDev plan in 2015. In relation to the anticipated respite from further housing development in Shifnal, it is proposed that much of the land released from the Green Belt will be safeguarded for future development and it is intended that this land will remain open and undeveloped during the remaining Plan period to 2038.	No	S15.1 Shifnal
A0305	B010	Amend the windfall allowance for Shifnal from 92 dwellings (28%) of the residual housing requirement of 322 dwellings to 48 dwellings (15%) of the residual requirement.	The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021 subject to the delivery of the modest windfall allowance for the town. At current rates of development in Shifnal (at 200 dwellings/year) the windfall allowance represents a supply of housing land equal to only a 6 month period. The windfall allowance will allow for smaller developers to enter the market and for development to be delivered that may target the local market and so, it is considered important to sustain this windfall allowance in the draft Local plan.	No	S15.1 Shifnal

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0305	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15 Shifnal - employment	No	No	Yes	The reasons given for the huge increase on the originally proposed 16ha do not stand up to scrutiny as the net built floorspace argument was already built into the total County employment requirement and so is double counting when applied here. Similarly the size of buildings reason is no different to that proposed for other settlements where no such increase has been proposed. The subsequent increase to between 39-41ha (there is inconsistency in this Plan and previous consultations on exact figures) is not based on evidence to justify the release of so much land from the Green Belt. Past decisions of the Council on releasing employment land for housing, the Council's own Employment Land Review (which is part of the evidence base), allowing 1100 houses in the town without requiring any employment land and past history of employment take up rate, plus the current doubts on the future of economic development resulting from the impact of Covid-19 are detailed evidence to support the originally proposed figure of 16ha.
A0312	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15 Shifnal	No	No	Yes	Proposals for Shifnal are contrary to draft Policy DP25 and unsound as defined in the National Planning Policy Framework (NPPF). The community are very concerned about existing infrastructure deficiencies following recent large housing development approvals (resulting in 40% population increase). Infrastructure has not had, but requires urgent investment to support existing approvals before further development is permitted (improvements to support further development should also occur before it is permitted). Consider the draft Shropshire Local Plan fails to adequately consider infrastructure requirements and deliverability of proposals. Proposals (role of the town, amount of employment, new neighbourhood to the south west and meeting non-local (unmet cross boundary) needs) also fail to reflect the character, need and opportunities of Shifnal as required by para 9 of the NPPF. Views of the local community and the content of the Neighbourhood Plan which forms part of the adopted Development Plan (no recognition of this document despite the incomplete plan for Market Drayton informing proposals there) have not been taken into account, as required by para 15 and 16c of the NPPF. Proposals for Shifnal should be amended to closely align with the objectives of the Neighbourhood Plan. NPPF requires consideration of all reasonable alternatives and demonstration of exceptional circumstances to justify any changes to Green Belt boundaries. Proposals for Shifnal are inconsistent and contradictory in its justification and as such contrary to national policy. Residential windfall allowance for Shifnal (92 dwellings constituting 30% of the additional housing proposed) is excessive, unsustainable and unjustified - there is limited potential to accommodate it within the proposed development boundary and as such it is contrary to para 70 of the National Planning Policy Framework (NPPF). Greater certainty about meeting the proposed housing guideline should be provided. Size/density of proposed allocations is unclear and inconsistent between different documents. Based on past densities (Preferred Sites consultation), SLAA site areas and NPPF requirement to make efficient use of land, the three proposed allocations could accommodate majority/more than the proposed net guideline (SHR013 and SHF022/pt023 could accommodate all needed housing), reducing the amount of land needed to be allocated, reducing/removing the windfall allowance and reducing the need for Green Belt release (the amount of allocated land for housing impacts on Green Belt release). It is essential that the size of allocated sites and density of housing proposed is clear, appropriate and unambiguous, but this is not the case. Failure to provide this information is contrary to case law and inconsistent with national policy. Given need to assimilate existing housing development, proposed allocations should be phased to post 2026 (raised during previous consultations). Current approach is inconsistent with community opinion (Statement of Community Involvement and Gunning Principles, Place Plan data, draft Policy SP7. There are inconsistencies in the employment land supply/guideline/capacity of proposed allocations within the document and other associated documents (examples provided in representation) which is not explained/justified. Further changes from that in past consultations have not been justified. Given land is proposed to be removed from the Green Belt it is important this is clear and precise so minimum Green Belt is lost. Public comments on previous consultations have referred to these inconsistencies but not been corrected so failing Gunning Principles and soundness. Consider the proposed employment land guideline is not justified and unsound. Original proposals were for 16ha but this increased to 40ha and then 41ha (significant increase to Green Belt loss (160%)). No reason for this can be supported by the evidence. Shropshire Council indicates local circumstances: 1. that employment floorspace represents 40% of total site size, yet this applies to all of Shropshire (as per para 5.212) but uplift is inconsistently only applied in Shifnal and the 40% consideration is already applied to the total employment land requirement/guideline for Shifnal (as documented within the Preferred Scale and Distribution of Development Consultation), so is double counted. 2. Commercial buildings are singly storey, However the type of employment proposed is similar to other sites and no justification is given why Shifnal is treated differently. As such these are not justified or consistent and are therefore unsound and inconsistent with national policy. As such there is no justification to increase the employment land

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0305	B012	Revise the employment guideline figure downwards from 41ha to 16ha (with 14ha of new sites) as originally proposed in the Preferred Scale and Distribution of Development consultation in October 2017.	<p>Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development in the period to 2038 in order to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. Whilst Shropshire Council has proposed to support the Black Country Authorities to meet their unmet needs in Shropshire, it is not proposed to identify specific sites to accommodate the intended contribution to cross-boundary needs arising within the Black Country (1,500 dwellings and 30ha of employment land). Rather this is included within the proposed housing and employment land requirements subject to the proposed strategic approach for the level and distribution of development across Shropshire.</p>	No	S15.1 Shifnal
A0312	B013	<p>Align the strategy for Shifnal with the objectives of the Neighbourhood Plan.            Ensure existing infrastructure deficits are addressed and infrastructure required to support new development is delivered before permitting further development.            Amend the windfall allowance for Shifnal from 92 dwellings (28%) of the residual housing requirement of 322 dwellings to 48 dwellings (15%) of the residual requirement.            Delete the housing allocation on Sites SHF015/SHF029 and leave the sites as safeguarded land for future development in the period after 2038. Allocate the residual housing requirement of 274 dwellings for Shifnal up to 2038 on the remaining sites SHF013 and SHF022/SHF023.            Revise the employment guideline figure downwards from 41ha to 16ha (with 14ha of new sites) as originally proposed in the Preferred Scale and Distribution of Development consultation in October 2017, or lower.            Remove/reduce/safeguard proposed employment land allocations.</p>	<p>Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). The purpose of a Local Plan is to set the strategy and development requirements for any subsequent Neighbourhood Plans and as such, it is not possible to align the draft Local Plan to the currently approve Neighbourhood Plan for Shifnal. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings including sites SHF015 &amp; SHF029 that will make an important contribution to meeting the housing needs of Shifnal and helping to conserve the important historical building of Beech House and its curtilage structures and land. These allocation complement the existing committed supply of 370 dwellings which will further complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021 subject to the delivery of the modest windfall allowance for the town. At current rates of development in Shifnal (at 200 dwellings/year) the windfall allowance represents a supply of housing land equal to only a 6 month period. The windfall allowance will allow for smaller developers to enter the market and for development to be delivered that may target the local market and so, it is considered important to sustain this windfall allowance in the draft Local Plan. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. . Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. Whilst Shropshire Council has proposed to support the Black Country Authorities to meet their unmet needs in Shropshire, it is not proposed to identify specific sites to accommodate the intended contribution to cross-boundary needs arising within the Black Country (1,500 dwellings and 30ha of employment land). Rather this is included within the proposed housing and employment land requirements subject to the proposed strategic approach for the level and distribution of development across Shropshire.</p>	No	S15.1 Shifnal

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0313	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal Town Strategy	No	No	Not Specified	<p>Council need to present evidence to justify the release of Green Belt land for safeguarding for future development beyond 2038 to the east, south and west of Shifnal. This designation implies the principle of development on this land is accepted despite the community not being consulted on this prior to including the land the Plan. The safeguarding of this significant area of land will also place further strain on Shifnal should the County be unable to demonstrate an adequate housing land supply in the short to medium term. Council need to justify the reason for considering Green Belt policies in the event that an earlier development proposal was considered for the safeguarded land under very special circumstances and whether the development of the land would be afforded the same weight as Green Belt land. Council need to demonstrate the very special circumstances for the release of allocations SHF018b and SHF018d and show that this omission will not provide a precedent for the release of further safeguarded land in a future review of the Local Plan. Council also need to have regard to the conservation of the historic character of Shifnal and make available any submitted heritage assessments to illustrate the proposed mitigation of to conserve and enhance the historic character of the town. The Local plan also needs to recognise the underlying consensus of the local community set out in the objectives of the Shifnal Neighbourhood Plan that any development should retain the small market town character as a principle attraction of the town. Council should justify the large release of Green Belt land which are contrary to national policy including paragraph 006 of the Planning Policy Guidance and which undermine the Shifnal Neighbourhood Plan. it is recognised that the Neighbourhood Plan only goes to 2026, the principle issues brought forward by the community and underpinning the Plan, are still relevant and should be reflected in the Local Plan proposals. The proposals are clearly a significant departure from the Neighbourhood Plan and the community and Shifnal Town Council has understandably raised the question about whether their efforts to produce the Plan were worthwhile. If the proposals were to go ahead this would naturally cause a great deal of local resentment. Council take into account both Market Drayton and Broseley Neighbourhood Plans, while Shifnal's Plan has not been acknowledged. We would like to understand why this is the case.</p>
A0313	B020	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal: SHF018b/SHF018d - Traffic Impacts	No	No	Not Specified	<p>The proposed employment development land located off Stanton Road will create a substantial increase in traffic on Stanton Road and Aston Street even if commercial vehicles could be effectively restricted from using this route. The main commercial centre in East Shropshire is Telford, which lies to the west of Shifnal, and Aston Street is the direct route to Telford from the proposed development. Vehicles wishing to access and egress from the west will use the Aston Street / Stanton Road route as it is more than 8 kilometres shorter than the A41 / M54 route to Junction 4 of the M54. The A41/Stanton Road junction is also a site of morning and evening stationary traffic for vehicles trying to travel in the direction of the M54 Stanton Road and Aston Street are not suitable for carrying the additional volume and increased unit weight of the generated traffic because: (1) The junction with Bradford Street and the A464 trunk road is already well beyond capacity and causes substantial delays and congestion at peak periods. Proximity of buildings within the Shifnal conservation area preclude any opportunity of additional land take for upgrading. (2) The turning movements at this junction currently disrupt traffic flows on both the A464 and the A4169. (3) The existing carriageway is narrow (6 metres) and cannot be widened due to the proximity of buildings. (4) The existing carriageway construction is not engineered and is not capable of taking additional and heavier traffic. It is currently in a poor state of repair. (5) The station approach and the main shopping car park access onto Aston Street, both junctions having severely impaired sight. (6) Aston Street residents are obliged to park on Aston Street causing single line traffic flows as there is no access to the rear of their properties. (7) Aston Street dwelling doorways access directly onto the pavement, and the increase in noise, dust and vibration will be detrimental to their environment. (8) The Bradford Street/ Aston Street junction is crossed by the principal walking route to the train station from the town centre including provision for those with impaired sight and wheelchair users. (9) The existing pedestrian footpaths at the junction are narrow and hazardous.</p>

It is recognised that whilst housing development may cease on the completion of the proposed 1,500 dwellings, it is proposed that employment development will commence at an early stage following the adoption of the Local Plan. This may result in traffic using the Aston Street junction subject to the impacts of the now programmed Town Centre (highway) Enhancement Scheme. It is proposed that the impacts of this scheme be monitored to assess the implications for the Aston Street junction with a view to considering further measures to manage the highway capacity of this junction.</p>	No	S15.1 Shifnal

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0410	B018	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15	Not Specified	No	Not Specified	<p>The proposed employment guideline for Shifnal earlier in the Local Plan Review was some 16ha (based on the 'balanced' employment land calculation identified within the Preferred Scale and Distribution of Development Consultation), this increased during the Local Plan Review process to 40ha and then to 41ha (and remains as such in the draft Shropshire Local Plan), to address 'local circumstances'. Nowhere in the draft Shropshire Local Plan or in the Shifnal section of the Green Belt Exceptional Circumstances Statement is there any quantified justification for this massive proposed increase in the employment land guideline, or for the departure from balance with the housing guideline. The description of the employment guideline is also inconsistent, with references to 40ha and 16ha in both the draft Shropshire Local Plan and Green Belt Exceptional Circumstances Statement. The fact that employment land is developed out to 40% of the total land area was accounted for in the formula arriving at the initial guideline for Shifnal of 16ha. The Council seem to be incorrectly grossing up again at 40% for a second time in moving from the 16ha to the 40ha figure. Therefore conclude that the proposed allocation of 39ha of employment land at SHF018b &amp; SHF018d is not based on proportionate evidence, and is therefore not justified.</p> <p>By the same logic, do not consider that any need has been soundly evidenced for the release from the Green Belt of the amount of safeguarded land proposed. Note that no site references have been given for the land listed in Schedule S15.1(iii), which makes it more difficult to cross-check to other evidence documents.</p>
A0554	B001	See Representation A0060.	See Representation A0060.	See Representation A0060.	See Representation A0060.	See Representation A0060.	See Representation A0060.
A0586	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Evidence Omissions	No	No	Not Specified	<p>There are a number of inconsistencies, alterations and omissions contained within the stage 2 and 3 site assessment process (and its associated evidence base) which has informed proposed site identifications as such this process, proposed identification of SHF034, the draft Shropshire Local Plan and associated Sustainability Appraisal are not robust, consistent with the National Planning Policy Framework (NPPF) are unsound and should be reviewed.</p> <p>No relevant scoring criteria is included for Sustainability Appraisal Objective SO5 and SO6 within stage 2a of the site assessment for the preferred sites or strategic sites consultations (subsequently included within the next Regulation 18 consultation), no explanation for this omission was made. Would also question whether criteria now included meets the requirements of the Sustainability Objectives SO5 and SO6 as set out within the Sustainability Appraisal.</p> <p>Stage 2a assessment of sites within the assessment process for Shifnal and Strategic Sites are inconsistent with their scoring:</p> <ul style="list-style-type: none"> <li>-SHF034 incorrectly scored for having a tree preservation order within or on site boundary in the Shifnal assessment.</li> <li>-SHF034 incorrectly scored for proximity (480m) of a primary school, children's playground outdoor sports facility and amenity green space within the Shifnal assessment.</li> <li>-SHF034 incorrectly scored for proximity (480m) of a GP surgery within the Strategic Sites assessment (due to exclusion of land north of the railway line).</li> <li>-SHF034 incorrectly scored for being all/part in flood zones 2 or 3 in the Shifnal assessment.</li> <li>-SHF034 incorrectly scored for being wholly/partly brownfield land (SHF034 excludes land north of the railway line and the proposed masterplan does not involve redevelopment of Lodge Hill Farm) in the Strategic Sites assessment.</li> <li>-SHF035 is incorrectly scored for proximity to a primary school and children's playground in the Shifnal assessment.</li> <li>-SHF035 is incorrectly scored for proximity (480m) of an outdoor sports facility and amenity green space, in both the Shifnal and Strategic Sites assessments.</li> </ul> <p>With these errors rectified, SHF035 achieves -4 (Good) and SHF034 achieves -5 (Good). As such SHF034 is more sustainable, also born out when considering the sustainability credentials of each site.</p> <p>Also consider amendments to criteria should be made to reflect best practice, including changing walking distance to 800m; include additional criteria about quality of walking routes; accessibility for cyclists; a site level analysis of the Green Belt, whilst still drawing on past conclusions, would create a more robust assessment; more refined approach to landscape and visual analysis (define between medium, medium-low and medium-high; consider spatial relationship between proposals to consider combined impacts/benefits; consider non-designated heritage; and consider potential heritage benefits.</p> <p>Studies referenced in stage 3 of the site assessment have not been published, neither has background evidence or submissions by site promoters. This is not robust and does not allow a full consideration of the Assessment process and assumptions utilised.</p> <p>Detailed commentary on limitations of elements of the evidence base informing the site assessment provided, also specifically comparing sites SHF034 and SHF035 within appendix to the representation.</p> <p>Concerned evidence submitted in support of site SHF035 has not been considered.</p> <p>Failure to disclose evidence upon which SHF034 is proposed as safeguarded land (highway strategy for Shifnal, evidence around the proposed by-pass and justification for no longer pursuing, site promoter documents, management of flood risk, ecological impacts - Freedom of Information Requests appended to representation) undermines credibility of the decision making process, deliverability of SHF034 and soundness of the draft Shropshire Local Plan's evidence base. If this has occurred in Shifnal, not inconceivable to assume it has happened elsewhere.</p> <p>Consideration of compensatory improvements to the environmental quality and accessibility of the remaining Green Belt, as required in the NPPF and National Planning Practice Guidance when undertaking the site assessment and identification process, has been insufficient.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0410	B018	The quantum of employment land proposed to be released from the Green Belt, both now and as safeguarded land, needs to be reappraised. Site references should be given for the land listed in Schedule S15.1(iii).	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. On the completion of the proposed 1,500 dwellings in Shifnal, which is expected to occur before 2026 it is proposed that housing development should cease and not be resumed again until after 2038. This period of respite from housing development will also allow infrastructure improvements to occur in the town including programmed improvements to key locations on the highway network in the town and for the community to assimilate the growth of the town since the adoption of the SAMDev plan in 2015. In relation to the anticipated respite from further housing development in Shifnal, it is proposed that much of the land released from the Green Belt will be safeguarded for future development and it is intended that this land will remain open and undeveloped during the remaining Plan period to 2038. A0554	B001	See Representation A0060.	See Representation A0060.	See Representation A0060.	S15.1 Shifnal
A0586	B007	Review the site assessment process. SHF035 should be identified as a reserve housing site or SHF035 should replace SHF034 as the preferred safeguarded land for future housing in Shifnal or SHF035 should be identified as additional safeguarded land for future housing need in Shifnal.	Shropshire Council considers a proportionate and robust evidence base has been prepared to inform the Local Plan Review. Shropshire Council also consider that the proposed development strategy for Shifnal and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that proposed safeguarded land is not allocated for development but safeguarded for beyond the proposed Plan period. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Comments on the Sustainability Appraisal (SA) noted. Proposed changes to SA would have no material effect so are not considered necessary.	No	S15.1 Shifnal

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0586	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SHF034	No	No	Not Specified	<p>The site assessment process utilised to identify SHF034 as safeguarded land is inappropriate and unsound. More sustainable sites exist.</p> <p>The site is located within the gap between Shifnal and Telford, which is inconsistently considered within the site assessment process.</p> <p>Failure to disclose evidence upon which SHF034 is proposed as safeguarded land (highway strategy for Shifnal, evidence around the proposed by-pass and justification for no longer pursuing, site promoter documents, management of flood risk, ecological impacts - Freedom of Information Requests appended to representation) undermines credibility of the decision making process, deliverability of SHF034 and soundness of the draft Shropshire Local Plan's evidence base. If this has occurred in Shifnal, not inconceivable to assume it has happened elsewhere.</p> <p>Consider SHF034 has not been fully considered in terms of the tests of deliverability, likely to lead unsustainable, poorly located and remote housing (contrary to the climate emergency); an under delivery of housing and particularly affordable housing; and will necessitate an early Green Belt Review contrary to the provisions of the NPPF.</p> <p>Understand SHF034 is proposed as it can deliver a bypass of Shifnal, however deliverability and impact on congestion not assessed when proposed, contrary to the requirement that proposed allocations/identified sites should be demonstrated to be achievable, suitable and available. The full extent of the bypass has now been discounted (required land no longer included) as it is not deliverable, removing the premise for this site and as such consider the location of new housing in Shifnal should be revisited.</p>
A0586	B012	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SHF035	No	No	Not Specified	<p>SHF035 has not been properly considered within the site assessment process. Concerned evidence submitted in support of site SHF035 has not been considered.</p> <p>Greenfield sites such as SHF035, provide potential to deliver more affordable housing than more technically constrained Greenfield sites and Brownfield land with high infrastructure and/or remediation costs.</p> <p>SHF035 would be an exemplar in sustainable development practises, aligning itself to achieve all 17 of the United Nations sustainable development goals and helping to overcome the global challenges we face, can deliver sustainably located housing adjacent to the proposed employment allocation (would enhance performance and suitability/achievability/deliverability of the proposed employment allocation, through enhanced accessibility from Wolverhampton and the south side of Shifnal (key to its success)).</p> <p>Submitted evidence (including a Site promotion/vision document and exhibition boards, access/transport appraisals, Green Belt appraisal, Landscape and Visual appraisal, Supplementary Green Belt &amp; Landscape Appraisal, Heritage appraisals, Ecology appraisals and Flood Risk appraisals appended to this representation) demonstrates SHF035 is subject to no technical constraints and provides benefits (many not associated with SHF034 or other locations), including: accessibility by a range of means (delivery of a footpath/cycle link to the town centre/train station and through the site; improved public transport; highway improvements including improved/new road link from A454 to the proposed employment allocation and J3 of the M54 (reducing impacts/traffic in and enhancing the town centre) and improvements to the A464/Upton Lane junction), proximity to services and employment (and potential for on-site services), ecologically unconstrained, protection/enhancement of the Old Windmill, 22ha of open space, re-purposing bio-sterile fishing lakes to delivery biodiversity net gain, avoidance of the Green Belt gap between Shifnal and Telford, avoiding know area of flood risk, housing within the M54 corridor (potential to contribute to meeting unmet cross-boundary need), and ability to make efficient use of land.</p> <p>Cumulative benefits of allocating/safeguarding SHF035 have not been considered, particularly in terms of its relationship with employment allocations SHF18b and SHF18d and to development currently underway to the west which enables the provision of direct and dedicated green cycle and footpath accesses straight into the town centre.</p> <p>Consider site SHF035 performs better than SHF034 (evidenced through submission of a range of site assessments and technical reports) and should be safeguarded for future development instead. Alternatively more land could be safeguarded to provide greater choice and flexibility in the future, particularly given the 'need' and 'affordability' challenges surrounding Shifnal and having regard to likely Green Belt review restrictions as a consequence of the current White Paper.</p>
A0586	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SHF018b/SHF018d	No	No	Not Specified	<p>SHF035 can deliver sustainably located housing adjacent to the proposed employment allocation (would enhance performance and suitability/achievability/deliverability of the proposed employment allocation, through enhanced accessibility from Wolverhampton and the south side of Shifnal (key to its success)).</p> <p>Cumulative benefits of allocating/safeguarding SHF035 have not been considered, particularly in terms of its relationship with employment allocations SHF18b and SHF18d and to development currently underway to the west which enables the provision of direct and dedicated green cycle and footpath accesses straight into the town centre.</p>
A0586	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15	No	No	Not Specified	<p>Draft Policy S15 is unsound.</p> <p>The current strategy for Shifnal will result in successive Green Belt reviews (contrary to the NPPF), as it does not make adequate provision for non-delivery of sites, affordability (it will exacerbate existing issues - detailed within appendices to this representation) and local demand. This supports justification for reserve sites.</p> <p>Consider insufficient safeguarded land has been identified to meet the longer term needs of Shifnal, allowing flexibility and opportunity for a choice of potential allocation sites in future, ensuring the longer term sustainability of the Local Plan or achieving key aspirations to improve the Green Belt. This is a significant error of the site assessment process and will likely result in the need for a further Green Belt Review at the end of the proposed Plan period, contrary to para 139 of the National Planning Policy Framework (NPPF).</p> <p>No allowance is made for reserve sites to meet shortfall in housing delivery or an increase in affordability issues in locations such as Shifnal (the pandemic has already impacted on house prices in commutable rural locations, worsening affordability), which has the second lowest quartile affordability ratio and worst median affordability ratio in the County.</p> <p>Consideration of compensatory improvements to the environmental quality and accessibility of the remaining Green Belt, as required in the NPPF and National Planning Practice Guidance when undertaking the site assessment and identification process has been insufficient.</p> <p>See wider representations on SHF108b/d, SHF034 and SHF035.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0586	B011	Review the site assessment process. SHF035 should replace SHF034 as the preferred safeguarded land for future housing in Shifnal.	Shropshire Council considers that the proposed development strategy for Shifnal and the existing and proposed allocations and identification of 'safeguarded' land contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). The councils evidence base has been available for the public to see throughout the process, with additional information being added to the Council's website as and when prepared. There is a clear distinction between the Council's evidence base, and the evidence of site promoters, which is not the Council's evidence base and will only be submitted to the EIP if it has formed part of a duly made representation. Decisions on proposed site allocations, and to the identification of proposed additional 'safeguarded' land have been subject to a robust and transparent site assessment process, captured within the Council's Sustainability Appraisal process in order to reduce any concern about a 'paper chase'. In the case of Shifnal this process has been further supported by an Exceptional Circumstances report, detailing the Council's rationale for proposing to release Green Belt land for new allocated sites and additional 'safeguarded' land. The objectors concerns with regard to the transparency of the process are therefore not considered to accurately reflect the Council's plan making process. The proposed 'safeguarded' land is not a proposed allocation; this is made very clear in Policy S15.1. The 'safeguarded' land is specifically identified for potential development beyond 2038 in order to provide a degree of certainty. However, any future allocation of this site will need to come through a review of the Local Plan and a further site assessment process. No change proposed.	no	S15.1 Shifnal
A0586	B012	Review the site assessment process. SHF035 should be identified as a reserve housing site or SHF035 should replace SHF034 as the preferred safeguarded land for future housing in Shifnal or SHF035 should be identified as additional safeguarded land for future housing need in Shifnal.	Shropshire Council considers that the proposed development strategy for Shifnal and the existing and proposed allocations and identification of 'safeguarded' land contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). The Council's evidence to support the release of green belt land in order to 'safeguard' it for future use is set out in the Council's Exceptional Circumstances Statement, and within the Green Belt assessment/review For clarity, this land is not proposed for allocation, and if it is to be allocate this will need to come through a future review of the Local Plan. No change proposed	No	S15.1 Shifnal
A0586	B013	SHF035 should replace SHF034 as the preferred safeguarded land for future housing in Shifnal.	Shropshire Council considers that the proposed development strategy for Shifnal and the existing and proposed allocations and identification of 'safeguarded' land contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). No change proposed.	No	S15.1 Shifnal
A0586	B014	Review the site assessment process. Identify further sites for residential development both for within the proposed Plan period and beyond. SHF035 should be identified as a reserve housing site or SHF035 should replace SHF034 as the preferred safeguarded land for future housing in Shifnal or SHF035 should be identified as additional safeguarded land for future housing need in Shifnal.	Shropshire Council considers that the proposed development strategy for Shifnal and the existing and proposed allocations and identification of 'safeguarded' land contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). It is considered the objector is unclear as to what they wish the Council and EIP to consider with the proposed alternative site. The argument is made that Shifnal does not have sufficient 'safeguarded' land proposed, yet one of the options presented is to replace the proposed area of 'safeguarded' land with theirs. Furthermore, it is considered the option of allocating their site as a 'reserve site' fails to address the issue of Green belt release in any meaningful manner. The Council has addressed the issue of delivering increased levels of affordable housing in draft policies DP3-DP7. No change proposed.	No	S15.1 Shifnal

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0621	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15	Not Specified	Not Specified	Not Specified	The draft policy for Shifnal is supported. The approach to safeguarded land is questioned to ensure that the land identified for Green Belt release is the most suitable available and the extent allocated is justified, to ensure the approach is sound. The allocation of the employment sites (SHF018b and SHF018d) is strongly supported and justified based on the clear need for additional employment land in Shifnal, as set out in the Council's own evidence base. Similarly, based on Shifnal's historic under delivery of housing and to support the town's economic growth, it is considered that there is a strong case to reinstate previous allocation SHF032. Para 5.212 outlines the requirement for commercial buildings to be 'developed as single storey properties that here, are expected to largely provide Class B1c, B2, and B8 uses serving the sub-regional supply chains on the A5, M54 and M6 corridors.' This requirement is considered to be overly restrictive and will constrain the ability for the strategically important employment allocations SHF018b and SHF018d to respond to market demand and requirements. In addition, allowing for floorspace to be provided across more than one storey (limited to a certain height) would help to deliver the Council's aspiration for a landscape-led campus, as opposed to large, single storey units, with a more substantial footprint.
A0621	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1	Not Specified	Yes	Not Specified	Fully support the employment allocations SHF018b and SHF018d. Modifications to the policy wording for the allocation from Regulation 18 stage are welcomed, as amended in the current draft. Notwithstanding this however, it remains to be considered that the policy wording is overly prescriptive, and the detail referred to would evolve, be fully justified and ultimately secured through a planning application. An overly prescriptive policy may unnecessarily restrict future flexibility and adaptability. The policy continues to propose the consideration of a link with the Lamledge Lane Industrial Area (Shifnal Industrial Estate). Whilst this potential can be explored as part of a future planning application, this requirement should not be a precursor for development given the opportunities for pedestrian and cycle access via Stanton Road and Upton Lane. In addition, connectivity would be reliant on a third-party and as delivery remains outside of the control of the landowner and Council, it is suggested this reference is omitted from the policy. In terms of transport considerations, the current wording is overly prescriptive and should allow for greater in-built flexibility in line with NPPF paragraph 87. Any requirement to improve Stanton Road should arise from an evidenced safety or capacity assessment as part of a planning application, and be necessary and appropriate, rather than be pre-conceived.
A0633	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15 Shifnal	No	No	No	Having regard to the potential windfall sites in the town, the percentage of windfall allocations in other settlements and to avoid pressure to release Safeguarded Land/Green Belt in the future to meet unmet windfall allowance, the existing figure is excessive. NPPF paragraph 70 states that "where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. The Council have failed to provide any evidence, let alone "compelling" evidence to justify such a high proportion of windfall allowance and so their proposal is unsound as being contrary to national policy. The Plan does not indicate size or proposed densities of the allocated sites, and from assessments there are differences in both site size and housing densities proposed between this Plan, previous consultation plans for the same sites and other evidence documents such as the Green Infrastructure Plan. As sites allocated will impact on the amount of land required to be taken out from Green Belt and Safeguarded Land, it is essential for the Plan to be considered sound that accurate figures are provided and justified, which is not the case here. A detailed assessment of these sites showing these inconsistencies is given in the attached Appendix1. In summary, with a revised windfall allowance of 48 results in a requirement for allocating 274 houses. Site SHF013 is stated as being 3.87ha on the SLAA as assessment. On the Preferred Sites consultation plan, all housing sites for Shifnal were given a density of 28.57 dwellings/ha. This gives 111 houses for the site. However, no justification has been given in any of the consultation plans for the density of housing proposed for any allocated site. Government policy is to make efficient use of land with increased densities wherever possible with 30 dwelling/ha being a more realistic figure for sites in Shifnal. This gives a figure of 116 houses. Site SHF022 is given as 1.74ha in SLAA: SHF023 in total is given as 13.99ha in SLAA with the Plan saying that the part proposed for Safeguarded Land as 10.4ha leaving 3.59ha as the remaining allocated for housing – the total for the allocated SHF022/pt. SHF023 is, therefore 5.33ha. At a density of 28.57 dwelling/ha gives a figure of 152 and with a more appropriate 30dwg/ha gives 160 houses. For the two sites at 30dwg/ha gives a total of 276 so not requiring the allocation of site SHF015/SHF029.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0621	B005	<p>Deletions in [square brackets], additions in ** asterisks ** Amend:</p> <p>S15.1 (7) Land beyond the development boundary that is not part of the Green Belt is safeguarded for Shifnal's future development needs, beyond the Plan period after 2038. This extensive land release from the Green Belt is located to the east <b>[and to the south and west]</b> of the town as shown in Schedule S15.1(iii) and on the Policies Map. Development of this land during the Plan period will only be permitted in 'very special circumstances' to meet Shifnal's development needs in accordance with national and local Green Belt policies.</p> <p>Schedule S15.1(i). Residential Allocations: Shifnal Key Centre Add: ** Land east of Coppice Green Lane (SHF032) **</p> <p>Safeguarded Land Site Area Amend:</p> <p>[Land between Park Lane and A4169 at Lodge Hill 46.1 hectares [Land between A4169 and the western rail line 12.8 hectares] [5.215 – 5.217 which refer to south-west safeguarded land .] ** SHF018c (29.7ha) Land between Coppice Green Lane and Stanton Road **</p>	<p>Shropshire Council welcomes the support for Policy S15.1. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. Development guidelines for sites released for development will ensure the site design, layout and landscaping respects the character and significance of adjoining land uses. In the Green Belt, this is required to strengthen the boundary to the urban area to help maintain the openness and permanence of the Green Belt around Shifnal.</p>	No	S15.1 Shifnal
A0621	B006	<p>Deletions in square brackets:</p> <p>Schedule S15.1(ii). Employment Allocations: Shifnal Key Centre Land east of Shifnal Industrial Estate, Upton Lane, Shifnal (SHF018b &amp; SHF018d) [The development of land west of Upton Lane should consider the functional relationship with Shifnal Industrial Estate and the opportunity to link the two employment areas to: create a secondary access into the new employment area; and to alleviate the constraints imposed on Shifnal Industrial Estate through the existing intensity of the uses within this employment area]. [The priority given to Stanton Road as the primary access will require improvements to Stanton Road along its length.] [The potential to operate a dedicated Park and Ride service should be investigated in partnership with appropriate local community groups and bus operators].</p>	<p>Shropshire Council welcomes the support for Policy S15.1. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. Development guidelines for sites released for development will ensure the site design, layout and landscaping respects the character and significance of adjoining land uses. In the Green Belt, this is required to strengthen the boundary to the urban area to help maintain the openness and permanence of the Green Belt around Shifnal. It is recognised that Park and Ride service operating from the employment allocation would encourage more provide vehicle movements between the Town Centre and the employment allocation. It is therefore proposed to make the following minor modification to the development guidelines for sites SHF018b and SHF018d to state "The potential to operate a Demand Responsive Transport service should be investigated in partnership with appropriate local community groups and bus operators."</p>	Yes	S15.1 Shifnal
A0633	B007	<p>Amend windfall allowance from 30% of 322 housing required to be allocated (92 houses) to maximum 15% (48).</p> <p>Delete housing site SHF015/SHF029 as allocated site. Modify plan to show size of sites and housing densities proposed</p>	<p>The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings including sites SHF015 &amp; SHF029 that will make an important contribution to meeting the housing needs of Shifnal and helping to conserve the important historical building of Beech House and its curtilage structures and land. These allocation complement the existing committed supply of 370 dwellings which will further complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021 subject to the delivery of the modest windfall allowance for the town. At current rates of development in Shifnal (at 200 dwellings/year) the windfall allowance represents a supply of housing land equal to only a 6 month period. The windfall allowance will allow for smaller developers to enter the market and for development to be delivered that may target the local market and so, it is considered important to sustain this windfall allowance in the draft Local Plan.</p>	No	S15.1 Shifnal

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0633	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15 Shifnal	No	No	No	<p>If it was considered that additional Safeguarded Land required to provide choice and flexibility in the future, then SHF032/pt. SHF 018c would be more sustainable than Lodge Hill proposals, as closer to schools, employment area and town centre car park. The justification for removing the SHF017 and P16 (Lodge Hill) from the Green Belt does not stand up to scrutiny as evidenced in detail in the attached Appendix 1 statement. It is noteworthy that the Council have failed to respond to any of these detailed objections or to rebut them in any way. The fact that the Council have allocated this Safeguarded Land for specific development is inconsistent with such land allocated in other Green Belt settlements, contrary to NPPF Green Belt policy and failing to consider reasonable alternatives is contrary to the law. The alternative proposals are in more sustainable locations and their removal from the Green Belt would have less harm, especially as they would not see a significant reduction in the narrow belt of Green Belt separating Shifnal from Telford which would be the result with the Plan's proposed allocation.</p>
A0636	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal Town Strategy	No	No	No	<p>Council need to present evidence to justify the release of Green Belt land for safeguarding for future development beyond 2038 to the east, south and west of Shifnal. This designation implies the principle of development on this land is accepted despite the community not being consulted on this prior to including the land the Plan. The safeguarding of this significant area of land will also place further strain on Shifnal should the County be unable to demonstrate an adequate housing land supply in the short to medium term. Council need to justify the reason for considering Green Belt policies in the event that an earlier development proposal was considered for the safeguarded land under very special circumstances and whether the development of the land would be afforded the same weight as Green Belt land. Council need to demonstrate the very special circumstances for the release of allocations SHF018b and SHF018d and show that this omission will not provide a precedent for the release of further safeguarded land in a future review of the Local Plan. Council also need to have regard to the conservation of the historic character of Shifnal and make available any submitted heritage assessments to illustrate the proposed mitigation of to conserve and enhance the historic character of the town. The Local plan also needs to recognise the underlying consensus of the local community set out in the objectives of the Shifnal Neighbourhood Plan that any development should retain the small market town character as a principle attraction of the town. Council should justify the large release of Green Belt land which are contrary to national policy including paragraph 006 of the Planning Policy Guidance and which undermine the Shifnal Neighbourhood Plan. it is recognised that the Neighbourhood Plan only goes to 2026, the principle issues brought forward by the community and underpinning the Plan, are still relevant and should be reflected in the Local Plan proposals. The proposals are clearly a significant departure from the Neighbourhood Plan and the community and Shifnal Town Council has understandably raised the question about whether their efforts to produce the Plan were worthwhile. If the proposals were to go ahead this would naturally cause a great deal of local resentment. Council take into account both Market Drayton and Broseley Neighbourhood Plans, while Shifnal's Plan has not been acknowledged. We would like to understand why this is the case.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0633	B009	<p>delete SHF018a/P14 and allocate SHF018b as Safeguarded Land (SHF018d to remain in the Green Belt).</p> <p>delete SHF017pt/P16 (land between Park Lane and A4169) and SHF017pt (land between A4169 and railway line). Replace with allocated housing site SHF015/SHF029; P15a Upton Lane/Lamledge Lane (part of which is Sub Opportunity Area Sh-1a in Green Belt Review Assessment); P15b (north-west Upton Lane), part of Sub Opportunity Area Sh-1a (north-west of Windmill/East A464).</p>	<p>Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. On the completion of the proposed 1,500 dwellings in Shifnal, which is expected to occur before 2026 it is proposed that housing development should cease and not be resumed again until after 2038. This period of respite from housing development will also allow infrastructure improvements to occur in the town including programmed improvements to key locations on the highway network in the town and for the community to assimilate the growth of the town since the adoption of the SAMDev plan in 2015. In relation to the anticipated respite from further housing development in Shifnal, it is proposed that much of the land released from the Green Belt will be safeguarded for future development and it is intended that this land will remain open and undeveloped during the remaining Plan period to 2038.</p>	No	S15.1 Shifnal
A0636	B019	<p>Council should not remove the proposed safeguarded land from the Green Belt and should instead demonstrate the very special circumstances for the release of land for further development. The Council should also publish any submitted heritage assessments to illustrate the proposed mitigation to conserve and enhance the historic character of the town should any land be released from the Green Belt for development.</p>	<p>Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. . Development guidelines for sites released for development will ensure the site design, layout and landscaping respects the character and significance of adjoining land uses. In the Green Belt, this is required to strengthen the boundary to the urban area to help maintain the openness and permanence of the Green Belt around Shifnal. On the completion of the proposed 1,500 dwellings in Shifnal, which is expected to occur before 2026 it is proposed that housing development should cease and not be resumed again until after 2038. This period of respite from housing development will also allow infrastructure improvements to occur in the town including programmed improvements to key locations on the highway network in the town and for the community to assimilate the growth of the town since the adoption of the SAMDev plan in 2015. In relation to the anticipated respite from further housing development in Shifnal, it is proposed that much of the land released from the Green Belt will be safeguarded for future development and it is intended that this land will remain open and undeveloped during the remaining Plan period to 2038.</p>	No	S15.1 Shifnal

A0636	B020	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal: SHF018b/SHF018d - Traffic Impacts	No	No	No	The proposed employment development land located off Stanton Road will create a substantial increase in traffic on Stanton Road and Aston Street even if commercial vehicles could be effectively restricted from using this route. The main commercial centre in East Shropshire is Telford, which lies to the west of Shifnal, and Aston Street is the direct route to Telford from the proposed development. Vehicles wishing to access and egress from the west will use the Aston Street / Stanton Road route as it is more than 8 kilometres shorter than the A41 / M54 route to Junction 4 of the M54. The A41/Stanton Road junction is also a site of morning and evening stationary traffic for vehicles trying to travel in the direction of the M54 Stanton Road and Aston Street are not suitable for carrying the additional volume and increased unit weight of the generated traffic because: (1) The junction with Bradford Street and the A464 trunk road is already well beyond capacity and causes substantial delays and congestion at peak periods. Proximity of buildings within the Shifnal conservation area preclude any opportunity of additional land take for upgrading. (2) The turning movements at this junction currently disrupt traffic flows on both the A464 and the A4169. (3) The existing carriageway is narrow (6 metres) and cannot be widened due to the proximity of buildings. (4) The existing carriageway construction is not engineered and is not capable of taking additional and heavier traffic. It is currently in a poor state of repair. (5) The station approach and the main shopping car park access onto Aston Street, both junctions having severely impaired sight. (6) Aston Street residents are obliged to park on Aston Street causing single line traffic flows as there is no access to the rear of their properties. (7) Aston Street dwelling doorways access directly onto the pavement, and the increase in noise, dust and vibration will be detrimental to their environment. (8) The Bradford Street/ Aston Street junction is crossed by the principal walking route to the train station from the town centre including provision for those with impaired sight and wheelchair users. (9) The existing pedestrian footpaths at the junction are narrow and hazardous.
A0637	B019	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal Town Strategy	No	No	No	Council need to present evidence to justify the release of Green Belt land for safeguarding for future development beyond 2038 to the east, south and west of Shifnal. This designation implies the principle of development on this land is accepted despite the community not being consulted on this prior to including the land the Plan. The safeguarding of this significant area of land will also place further strain on Shifnal should the County be unable to demonstrate an adequate housing land supply in the short to medium term. Council need to justify the reason for considering Green Belt policies in the event that an earlier development proposal was considered for the safeguarded land under very special circumstances and whether the development of the land would be afforded the same weight as Green Belt land. Council need to demonstrate the very special circumstances for the release of allocations SHF018b and SHF018d and show that this omission will not provide a precedent for the release of further safeguarded land in a future review of the Local Plan. Council also need to have regard to the conservation of the historic character of Shifnal and make available any submitted heritage assessments to illustrate the proposed mitigation of to conserve and enhance the historic character of the town. The Local plan also needs to recognise the underlying consensus of the local community set out in the objectives of the Shifnal Neighbourhood Plan that any development should retain the small market town character as a principle attraction of the town. Council should justify the large release of Green Belt land which are contrary to national policy including paragraph 006 of the Planning Policy Guidance and which undermine the Shifnal Neighbourhood Plan. it is recognised that the Neighbourhood Plan only goes to 2026, the principle issues brought forward by the community and underpinning the Plan, are still relevant and should be reflected in the Local Plan proposals. The proposals are clearly a significant departure from the Neighbourhood Plan and the community and Shifnal Town Council has understandably raised the question about whether their efforts to produce the Plan were worthwhile. If the proposals were to go ahead this would naturally cause a great deal of local resentment. Council take into account both Market Drayton and Broseley Neighbourhood Plans, while Shifnal's Plan has not been acknowledged. We would like to understand why this is the case.

A0638	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whole Document	Not Specified	No	Not Specified	Petition coordinated by Shifnal Matters and signed by multiple parties. Object to the draft Shropshire Local Plan for Shifnal and its surround area as: -Insufficient consideration undertaken for planned removal of land from the Green Belt. Evidence cited is factually incorrect and insubstantial. -The level of new strategic residential allocations proposed would change the character of Shifnal as a place to live to the detriment of existing residents and the setting of the town. -Infrastructure (including roads, schools and medical facilities) insufficient to support proposals and no assessment of these has been undertaken. -Proposed 41ha employment allocation (providing about 1,750,000sq ft of space) is excessive, especially as there are better sites for employment use within a 10 mile radius of Shifnal. -Shropshire have not been proactive, positive or collaborative in their approach to preparing the draft Shropshire Local Plan.
A0662	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal	Not Specified	Not Specified	Not Specified	Given the scale of development proposed and the additional safeguarding of approximately 93 ha of land around Shifnal for future development, evidence should be provided to demonstrate, through discussions with Highways England, that the strategic transport impacts on Junctions 3 and 4 of the M54 have been considered and appropriately addressed. There should be a mechanism to capture the impacts of growth around Shifnal for future improvements to these junctions. If the evidence concludes there is no spare capacity to meet the impact of the proposed development, clarification should be provided in the Local Plan or infrastructure planning evidence that contributions would be collected towards strategic highways infrastructure works. The strategic implications of the Shropshire Council Water Cycle Study (July 2020) for Telford & Wrekin Council are unclear. Clarification should therefore be provided through the relevant Local Plan policies (Policy S15 Shifnal Place Plan Area and Policy DP25 Infrastructure Provision) and supported by evidence of engagement with the Environment Agency and Severn Trent Water. The Council are also interested in understand in the impact of development proposed within the plan on secondary school provision.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0637	B020	See summary of main issues.	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. On the completion of the proposed 1,500 dwellings in Shifnal, which is expected to occur before 2026 it is proposed that housing development should cease and not be resumed again until after 2038. This period of respite from housing development will also allow infrastructure improvements to occur in the town including programmed improvements to key locations on the highway network in the town and for the community to assimilate the growth of the town since the adoption of the SAMDev plan in 2015. In relation to the anticipated respite from further housing development in Shifnal, it is proposed that much of the land released from the Green Belt will be safeguarded for future development and it is intended that this land will remain open and undeveloped during the remaining Plan period to 2038. It is recognised that whilst housing development may cease on the completion of the proposed 1,500 dwellings, it is proposed that employment development will commence at an early stage following the adoption of the Local Plan. This may result in traffic using the Aston Street junction subject to the impacts of the now programmed Town Centre (highway) Enhancement Scheme. It is proposed that the impacts of this scheme be monitored to assess the implications for the Aston Street junction with a view to considering further measures to manage the highway capacity of this junction.	No	S15.1 Shifnal
A0638	B001	Reconsider evidence for Green Belt release. Reduce the level of housing proposed in Shifnal. Reduce the amount of employment land proposed in Shifnal and reconsider proposed site allocations.	Shropshire Council considers that the proposed development strategy for Shifnal and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that proposed safeguarded land is not allocated for development but safeguarded for beyond the proposed Plan period. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Comments on the Sustainability Appraisal (SA) noted. Proposed changes to SA would have no material effect so are not considered necessary.	No	S15.1 Shifnal
A0662	B003	Given the scale of development proposed and the additional safeguarding of approximately 93 ha of land around Shifnal for future development, evidence should be provided to demonstrate, through discussions with Highways England, that the strategic transport impacts on Junctions 3 and 4 of the M54 have been considered and appropriately addressed. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0682	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15	Not Specified	Not Specified	Not Specified	<p>Shifnal is considered an inherently sustainable location (one of the most sustainable settlements in Shropshire), on the M54 growth corridor, subject to significant market demand and well-related to Birmingham/Black Country (with unmet need) and provides an opportunity to delivery housing and employment in parallel (rather than risking employment delivery commencing as housing tails off). As such, it should receive a higher level of residential growth. Additional growth in Shifnal will support aspirations for growth corridors. Consider land proposed to be safeguarded for future development (particularly Land between Park Lane and the A464) should instead be allocated for development. If they remain as safeguarded land, a mechanism should be included that allows for them to come forward during the proposed Plan period if the need arises.</p> <p>Land between Park Lane and the A464, which is identified as proposed safeguarded land (currently within the Green Belt), is the right location for growth in a Shifnal context and comprehensively aligns with aspirations of the draft Shropshire Local Plan. It is deliverable during the proposed Plan period and has the potential to accommodate 175-200 dwellings; is owned/controlled by a single landowner/developer; is in close proximity of a range of services and facilities; is not subject to any overriding environmental or physical constraints; and access could be secured off both the A464 and Park Lane. A vision framework/illustrative masterplan (Appendix to this representation) has been prepared for the site (informed by extensive supporting assessments including a Landscape Visual Assessment, Transport Note, Flood Risk Assessment, Preliminary Ecological Appraisal and Initial Heritage Assessment which also form Appendices to this representation), demonstrating consideration of opportunities/constraints, how the site could be delivered and how it can contribute to a sense of place for Shifnal and wider growth within this part of Shropshire.</p> <p>Have also committed to preparing a holistic masterplan (with adjoining landowners of land also proposed as safeguarded land) for delivering development to the south and west of Shifnal. A vision framework/illustrative masterplan (appended to this representation) which demonstrates opportunity for comprehensive delivery, although Land between Park Lane and the A464 can come forward independently.</p> <p>Previous consultation responses on this site have been considered an clarification on issues raised is provided as an appendix to this representation.</p> <p>It would be beneficial to give safeguarded land site references.</p>
A0682	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3	Not Specified	Not Specified	Not Specified	<p>Support overall goal of making Shropshire Council net greenhouse neutral by 2030, as set out in the Climate Change Strategy Framework.</p> <p>Consider more growth at Shifnal will assist in endeavours to transition to a zero carbon economy, and would avoid the need for development to be brought forward in less sustainable locations elsewhere. Land between Park Lane and the A464 at Shifnal is just such a sustainable location, with good access to services and facilities. The potential design for this site (set out in technical survey reports which form appendices to this representation) can contribute to reducing carbon emissions and mitigating/adapting to climate change.</p>
A0633	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15 Shifnal	No	No	No	<p>The subsequent increase to between 39-41ha (there is inconsistency in this Plan and previous consultations on exact figure – see Appendix 1 for evidence) is not based on evidence to justify the release of so much land from the Green Belt. The reasons given for the huge increase on that originally proposed do not stand up to scrutiny as the net built floorspace argument was already built into the County wide employment total required and so is double counting when applied here. Similarly the size of buildings reason is no different to that proposed for other settlements where no such increase has been proposed. The Council has double counted the alleged reasons for increasing the figure so these cannot be considered as justifiable exceptional circumstances and so are contrary to NPPF Green Belt policy. Past decisions of the Council on releasing employment land for housing, the Council's own Employment Land Review (which is part of the evidence base), allowing 1100 houses in the town without requiring any employment land and past history of employment take up rate, plus the current doubts on the future of economic development resulting from the impact of Covid-19, are detailed evidence to support the originally proposed figure.</p> <p>The proposed alternative has a lower negative sustainability appraisal score, is a more sustainable site on the SLAA assessment of sites, and has a lower Green Belt harm rating. In particular, SHF018d was originally proposed by the Council without carrying out any sustainability appraisal of the site as required by law and policy, and has a High harm score in the Green Belt Review Assessment (included in the evidence base) despite the Plan stating that the combined site only has Moderate-High harm, which is incorrect. No evidence has been submitted to show why the "reasonable alternative" site has not been considered as being appropriate and so the requirement that there be exceptional circumstances to remove SHF018b/SHF018d from the Green Belt has not been met. The allocation of the proposed site rather than SHF018a is contrary to the NPPF on Green Belt, the law and policy on sustainable development and sustainability appraisal, and the legal requirement for reasonable alternatives to be considered and reasons given to show why those alternatives were not selected</p>
A0453	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 SHF015, SHF029	Yes	Yes	Yes	n/a

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0682	B006	Identify a higher housing guideline than that proposed for Shifnal. Land proposed to be safeguarded for future development should instead be allocated for development. If these sites remain as safeguarded land, a mechanism should be included that allows for them to come forward during the proposed Plan period, if the need arises.	Noted. Shropshire Council considers that the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Shropshire Council has undertaken a robust and proportionate site assessment process to inform identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. A summary of this assessment, including an explanation of why proposed allocations and proposed safeguarded land have been identified for development is provided as an appendix to the Sustainability Appraisal of the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan. With regard to the proposed safeguarded land, it is noted that the National Planning Policy Framework (NPPF) states Plans should "make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development". The explanation to draft Policy SP2 outlines potential responses where any issues with the supply or delivery of new dwellings arises, which include such measures as preparation of a Housing Delivery Action Plan or Local Plan Review. With regard to the proposed safeguarded land, it is noted that the National Planning Policy Framework (NPPF) states Plans should "make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development". It is not considered necessary to provide site references for proposed safeguarded land. Consistent with the NPPF, such land can only come forward for development following an update to a plan which proposes its development.	No	S15.1 Shifnal
A0682	B009	Identify a higher housing guideline than that proposed for Shifnal. Land proposed to be safeguarded for future development should instead be allocated for development. If these sites remain as safeguarded land, a mechanism should be included that allows for them to come forward during the proposed Plan period, if the need arises.	Noted. Shropshire Council considers that the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Shropshire Council has undertaken a robust and proportionate site assessment process to inform identification of proposed allocations and proposed safeguarded land. This was informed by a robust Green Belt Review. A summary of this assessment, including an explanation of why proposed allocations and proposed safeguarded land have been identified for development is provided as an appendix to the Sustainability Appraisal of the Regulation 19: Pre-Submission Draft of the Shropshire Local Plan. With regard to the proposed safeguarded land, it is noted that the National Planning Policy Framework (NPPF) states Plans should "make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development".	No	S15.1 Shifnal
A0633	B008	Revise employment figure to 16ha (14ha new) as originally proposed at Preferred Scale and Distribution consultation. Delete SHF018b/SHF018d as allocated employment site and allocate SHF018a/P14 as allocated employment site.	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. . Development guidelines for sites released for development will ensure the site design, layout and landscaping respects the character and significance of adjoining land uses. In the Green Belt, this is required to strengthen the boundary to the urban area to help maintain the openness and permanence of the Green Belt around Shifnal.	No	S15.1 Shifnal
A0453	B001	n/a	Shropshire Council welcomes the intention to attend the proposed Examination to support the proposed allocation of sites SHF015 and SHF029 for housing development in Shifnal in the period to 2038 as evidence of the soundness of the Local Plan.	No	S15.1 Shifnal (SHF015 and SHF029)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0305	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15 Shifnal - SHF015/SHF029	No	No	Yes	The Plan does not indicate size or proposed densities of allocated housing sites as these figures vary for some housing sites between this Plan, previous consultation Plans and other evidence documents like the Green Infrastructure Plan. As allocated housing sites will determine the amount of land released from the Green Belt or protected as Safeguarded Land, the Plan should present accurate figures to be considered sound for the reasons given in Appendix 1. If the windfall allowance is adjusted downwards to 48 dwellings there would be a residual requirement for 274 dwellings from a total residual requirement of 322 dwellings. Allocated site SHF013 is stated to be 3.87ha on the SLAA Assessment and could provide up to 111 dwellings at a prescribed density of 28.57dws/ha. In the absence of any justified density calculations, Government policy seeks the most efficient use of land up to 30dws/ha providing for up to 116dws on site SHF013. Sites SHF022 comprises 1.74ha in the SLAA and SHF023 comprises 13.99ha of which 10.4ha are already safeguarded and 3.59ha is allocated with a capacity for up to 152 dwellings as 28.57dws/ha or 160dws at 30dws/ha. Therefore sites SHF013 and SHF022/SHF023 have a combined capacity for up to 276dws and there is no need to allocate sites SHF015/SHF029 for housing development in Shifnal and this land may remain as safeguarded for future development.
A0060	B022	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal: Safeguarded Land	No	No	Not Specified	<p>Safeguarded land proposals are contrary to the Gunning Principles, case law, national Green Belt policy (demonstrating consideration of reasonable alternatives and exceptional circumstances) and are unsound: -There are no parcel references for proposed safeguarded land, this means it is not possible for the public to relate parcels to accompanying documents and the Sustainability Appraisal (SA), this is legally flawed. -There are disparities in the size of parcels proposed to be released from the Green Belt. -The amount of safeguarded land is considered excessive and unjustified - it exceeds previous proposals and that needed for choice and flexibility to meet long term needs. As such there are no required exceptional circumstances and proposals are contrary to national policy and unsound. -There are better sites available for safeguarding (and SHF018/P14 are better for allocation than proposed allocations). SHF015/029 is not required to meet the stated housing guideline so could be safeguarded as could land north of Upton Lane (below the skyline). These would not impact on the narrow and critical gap to Telford, have a lower harm to the Green Belt and would be more logical and sustainable (including access to schools and employment). -Objections raised in previous consultations have not been responded to, including those about deliverability meaning proposals are not effective or consistent with national policy. -Extent of sites to south-west is claimed to be required to meet highway issues, suggesting pre-determination through discussions with site promoters prior to consultation. -Decision to in effect allocate safeguarded land for specific uses is contrary to para 139d of the NPPF and unsound. This is also inconsistent, without explanation, to the approach for other settlements. -The site to the south-west (described as a new neighbourhood community) would be self-contained, splitting the community and losing the towns character and feel (contrary to the Neighbourhood Plan). Lack of clarity about what is proposed in the draft Shropshire Local Plan. -Consider the principal reason for proposals are strategic objectives (role of the town on the M54 corridor), rather than meeting the town's needs. This is contrary to the Neighbourhood Plan and an unrealistic and inappropriate objective for the town (given size and nature, presence of Green Belt, proximity to Telford etc, would just result in housing without corresponding development) and not supported by the community. -Council suggests the need for a progressive and steady rate of growth to permit necessary infrastructure improvements, however there is no guarantee of this, likely to have just housing as per recent experiences. -Significant adverse affect on the Green Belt (reduced gap to Telford, loss of open countryside and encroachment) and it is not considered exceptional circumstances have been demonstrated to justify this high harm. -Land between A464 and M54 not pursued as it would close the gap to Telford, but the same applies to the land proposed between A4169 and the railway.</p> <p>With regard to proposed exceptional circumstances for land south-west of the town:</p> <ul style="list-style-type: none"> <li>-Provision of a new strategic highway between the A464 and A4169: not been subject to public consultation, informed by detailed proposals; contrary to expressed public opinion during the Reg 18 Preferred Sites Consultation; it would not create the suggested 'by-pass' (new residents will still have to just the town centre junction for toe town centre exacerbating issues); if so important, why is the land only proposed for safeguarding and not allocation; given the costs of such a scheme, unlikely development proposals could carry it - need detailed costings and only represents an exceptional circumstances if development can fully meet them; as the route no longer links to the A464 (north) where considerable traffic originates, only likely to serve the new extension and even then only a small part of journeys south to Wolverhampton; claims it will avoid traffic going into the town are incorrect.</li> <li>-Highway improvement at Five Ways/Innage Road: S106 funds already secured from existing development for this, unclear what else is needed; Innage Road can be addressed by stopping on-street parking, recently proposed but not implemented; development of the safeguarded land would exacerbate issues on Innage Road (additional traffic).</li> <li>-Provision of a significant range/choice of housing: Cannot forecast need beyond 2039, unreasonable to use such a factor to justify Green Belt release.</li> <li>-Future opportunity to connect A4169-A464: No technical evidence an appropriate link can be formed under the railway arch (available evidence indicates commercial vehicles could not use it making a one way system unworkable) or that Network Rail would support this; relevant land is not proposed for release from the Green Belt, undermining this argument.</li> <li>-Increased access to community facilities: Majority are north of the site (employment is to the east), so access cannot be improved; scale of development would increase traffic and make access worse; recent major housing development has not seen improvements to facilities (school or GP) so no guarantee such improvements would be delivered; proximity to Telford undermine potential for retail; open space is only for residents so of no overall benefit to the community.</li> <li>-Green Infrastructure gains and management of flooding: the land is already important green infrastructure (see Green Belt Assessment), therefore development of safeguarded land would harm provision; improvements to flooding are already programmed, additional development would likely exacerbate the issue and no evidence provided of how flooding would be reduced and why this cannot be achieved without development.</li> <li>-Improved access into the town, to recreational open space and countryside in the Green Belt: No evidence provided, as above consider access will be worsened with additional traffic; also difficult to substantiate large development will improve environmental quality of the Green Belt (Green Belt Review shows land would weaken Green Belt).</li> </ul> <p>The Water Cycle Study identifies constraints to water supply and sewerage. Full consideration needed of these constraints before major housing is proposed.</p> <p>Decisions on amendments to Green Belt boundaries could be deferred to the Neighbourhood Plan, if the draft Shropshire Local Plan establishes the need for such amendments, allowing significant community input (as per Broseley).</p>
A0305	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15 Shifnal - SHF017/P16	No	No	Yes	The justification for removing the SHF017 and P16 (Lodge Hill) from the Green Belt does not stand up to scrutiny as evidenced in detail in the attached Appendix 1 statement and these safeguarded sites should not be released from the Green Belt. It is noteworthy that the Council failed to respond to any of the detailed objections to these two sites or to rebut the objections in any way. The fact the Council have allocated SHF017 and P16 as Safeguarded Land and specified the types of development to be constructed on the land is not consistent with NPPF Green Belt policy and is not consistent with the manner in which land proposed to be released from the Green Belt has been designated in other settlements in the Local Plan. The failure to also consider reasonable alternative sites that may also be released from the Green Belt is also contrary to law. The alternative proposals in Shifnal are in more sustainable locations and their release from the Green Belt would have less harm, especially as they would not lead to a significant reduction in the narrow area of Green Belt separating Shifnal from Telford as with the release of land at Lodge Hill, proposed in the Local Plan. In preference, it is suggested that additional land be safeguarded to the east of Shifnal on existing safeguarded sites SHF015/SHF029 and through the release of sites P15a and P15b from the Green Belt. If it was considered that additional Safeguarded Land is required to provide choice and flexibility in the future, then site SHF032/SHF018c(part) would be more sustainable being closer to schools, employment area and town centre car park than the sites at Lodge Hill which are proposed in the Local Plan.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0305	B011	Amend the windfall allowance for Shifnal downwards from 92 dwellings (28%) to 48 dwellings (15%) from the residual housing requirement of 322 dwellings for Shifnal. Delete the housing allocation on Sites SHF015/SHF029 and leave the sites as safeguarded land for future development in the period after 2038. Allocate the residual housing requirement of 274 dwellings for Shifnal up to 2038 on the remaining sites SHF013 and SHF022/SHF023.	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings including sites SHF015 & SHF029 that will make an important contribution to meeting the housing needs of Shifnal and helping to conserve the important historical building of Beech House and its curtilage structures and land. These allocation complement the existing committed supply of 370 dwellings which further complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021 and which will deliver the 1,500 housing guideline figure for Shifnal. The delivery of the housing guideline figure is subject to the delivery of the modest windfall allowance for the town. At current rates of development in Shifnal (at 200 dwellings/year) the windfall allowance of 92 dwellings represents a supply of housing land equal to only a 6 month period. The windfall allowance will allow for smaller developers to enter the market and for development to be delivered that may target the local market and so, it is considered important to sustain this windfall allowance in the draft Local Plan.	No	S15.1 Shifnal (SHF015/SHF029 )
A0060	B022	Delete proposed safeguarded land. If the employment land guideline justifies it, allocate sites SHF018a/P14 and safeguard SHF018b. Identify proposed allocation SHF015/029 and land north of Upton Lane (below the skyline) as safeguarded land.	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. These proposals and the evidence supporting the strategy have been made available for consultation at a number of stages during the preparation of the Local Plan.	No	S15.1 Shifnal (SHF017/P16)
A0305	B014	Delete the safeguarding designation from sites SHF017pt/P16 (land between Park Lane and A4169) and SHF017pt (land between A4169 and railway line) and do not release these sites from the Green Belt. Instead replace the safeguarding provision for future development in Shifnal after 2038 on existing safeguarded sites SHF015/SHF029 and safeguard site P15a Upton Lane/Lamledge Lane (part of which is Sub Opportunity Area Sh-1a in the Green Belt Review Assessment) and site P15b (north-west Upton Lane), part of Sub Opportunity Area Sh-1a (north-west of Windmill/East A464) after releasing these sites from the Green Belt for future development. If it is considered that additional Safeguarded Land required to provide choice and flexibility in the future, then release sites SHF032/SHF018c (in part) from the Green Belt and safeguard the land as these sites are more sustainable than Lodge Hill proposals being closer to schools, employment areas and the town centre car park.	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. On the completion of the proposed 1,500 dwellings in Shifnal, which is expected to occur before 2026 it is proposed that housing development should cease and not be resumed again until after 2038. This period of respite from housing development will also allow infrastructure improvements to occur in the town including programmed improvements to key locations on the highway network in the town and for the community to assimilate the growth of the town since the adoption of the SAMDev plan in 2015. In relation to the anticipated respite from further housing development in Shifnal, it is proposed that much of the land released from the Green Belt will be safeguarded for future development and it is intended that this land will remain open and undeveloped during the remaining Plan period to 2038.	No	S15.1 Shifnal (SHF017/P16)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0312	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15 Shifnal: Safeguarded Land	No	No	Yes	<p>Safeguarded land proposals are contrary to the Gunning Principles, case law, national Green Belt policy (demonstrating consideration of reasonable alternatives and exceptional circumstances) and are unsound: -There are no parcel references for proposed safeguarded land, this means it is not possible for the public to relate parcels to accompanying documents and the Sustainability Appraisal (SA), this is legally flawed. -There are disparities in the size of parcels proposed to be released from the Green Belt.</p> <p>-The amount of safeguarded land is considered excessive and unjustified - it exceeds previous proposals and that needed for choice and flexibility to meet long term needs. As such there are no required exceptional circumstances and proposals are contrary to national policy and unsound. -There are better sites available for safeguarding (and SHF018/P14 are better for allocation than proposed allocations). SHF015/029 is not required to meet the stated housing guideline so could be safeguarded as could land north of Upton Lane (below the skyline). These would not impact on the narrow and critical gap to Telford, have a lower harm to the Green Belt and would be more logical and sustainable (including access to schools and employment). -Objections raised in previous consultations have not been responded to, including those about deliverability meaning proposals are not effective or consistent with national policy. -Extent of sites to south-west is claimed to be required to meet highway issues, suggesting pre-determination through discussions with site promoters prior to consultation. - Decision to in effect allocate safeguarded land for specific uses is contrary to para 139d of the NPPF and unsound. This is also inconsistent, without explanation, to the approach for other settlements. -The site to the south-west (described as a new neighbourhood community) would be self-contained, splitting the community and losing the towns character and feel (contrary to the Neighbourhood Plan). Lack of clarity about what is proposed in the draft Shropshire Local Plan. -Consider the principal reason for proposals are strategic objectives (role of the town on the M54 corridor), rather than meeting the town's needs. This is contrary to the Neighbourhood Plan and an unrealistic and inappropriate objective for the town (given size and nature, presence of Green Belt, proximity to Telford etc, would just result in housing without corresponding development) and not supported by the community. -Council suggests the need for a progressive and steady rate of growth to permit necessary infrastructure improvements, however there is no guarantee of this, likely to have just housing as per recent experiences. -Significant adverse affect on the Green Belt (reduced gap to Telford, loss of open countryside and encroachment) and it is not considered exceptional circumstances have been demonstrated to justify this high harm. -Land between A464 and M54 not pursued as it would close the gap to Telford, but the same applies to the land proposed between A4169 and the railway.</p> <p>With regard to proposed exceptional circumstances for land south-west of the town:</p> <p>-Provision of a new strategic highway between the A464 and A4169: not been subject to public consultation, informed by detailed proposals; contrary to expressed public opinion during the Reg 18 Preferred Sites Consultation; it would not create the suggested 'by-pass' (new residents will still have to just the town centre junction for toe town centre exacerbating issues); if so important, why is the land only proposed for safeguarding and not allocation; given the costs of such a scheme, unlikely development proposals could carry it - need detailed costings and only represents an exceptional circumstances if development can fully meet them; as the route no longer links to the A464 (north) where considerable traffic originates, only likely to serve the new extension and even then only a small part of journeys south to Wolverhampton; claims it will avoid traffic going into the town are incorrect. -Highway improvement at Five Ways/Innage Road: S106 funds already secured from existing development for this, unclear what else is needed; Innage Road can be addressed by stopping on-street parking, recently proposed but not implemented; development of the safeguarded land would exacerbate issues on Innage Road (additional traffic). -Provision of a significant range/choice of housing: Cannot forecast need beyond 2039, unreasonable to use such a factor to justify Green Belt release. -Future opportunity to connect A4169-A464: No technical evidence an appropriate link can be formed under the railway arch (available evidence indicates commercial vehicles could not use it making a one way system unworkable) or that Network Rail would support this; relevant land is not proposed for release from the Green Belt, undermining this argument. -Increased access to community facilities: Majority are north of the site (employment is to the east), so access cannot be improved; scale of development would increase traffic and make access worse; recent major housing development has not seen improvements to facilities (school or GP) so no guarantee such improvements would be delivered; proximity to Telford undermine potential for retail; open space is only for residents so of no overall benefit to the community.</p> <p>-Green Infrastructure gains and management of flooding: the land is already important green infrastructure (see Green Belt Assessment), therefore development of safeguarded land would harm provision; improvements to flooding are already programmed, additional development would likely exacerbate the issue and no evidence provided of how flooding would be reduced and why this cannot be achieved without development. -Improved access into the town, to recreational open space and countryside in the Green Belt: No evidence provided, as above consider access will be worsened with additional traffic; also difficult to substantiate large development will improve environmental quality of the Green Belt (Green Belt Review shows land would weaken Green Belt). The Water Cycle Study identifies constraints to water supply and sewerage. Full consideration needed of these constraints before major housing is proposed. Decisions on amendments to Green Belt boundaries could be deferred to the Neighbourhood Plan, if the draft Shropshire Local Plan establishes the need for such amendments, allowing significant community input (as per Broseley).</p>
A0060	B020	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal Town Strategy	No	No	Not Specified	<p>Consider proposed allocations SHF018b/SHF018d are contrary to NPPF Green Belt policy, the law, Gunning Principles and policy on sustainable development and sustainability appraisal and the legal requirement to consider reasonable alternatives and to give reasons why those alternatives were not selected and the need to justify exceptional circumstances (as required for Green Belt release). As such they are not considered sound.</p> <p>-It is illogical to allocate land for development whilst leaving undeveloped land between it and the town boundary (SHF018a/P14).</p> <p>-SHF018a/P14, benefit from a functional relationship with the adjacent Industrial Estate - lacking for SHF018b/SHF018d yet referenced in draft site guidelines.</p> <p>-SHF018a/P14 would lead to less harm to the Green Belt than SHR018b/SHF018d (SHF18b/SHF018d would represent encroachment into the countryside and beyond Lamledge Lane. SHF018d also lacks defined boundaries, as recognised within the Green Belt Review, contrary to para 139(f) of the NPPF. Para 5.211 of the draft Shropshire Local Plan incorrectly references the harm of proposed employment allocations and medium-high when it will be high).</p> <p>-Site SHF018d has not been subject to a Sustainability Approval as required by law and policy despite having a high degree of harm to the Green Belt as shown in the evidence base.</p> <p>-Safeguarded sites SHF018a/P14 are more sustainable sites in the SLAA assessment than the allocated employment sites SHF018b/SHF018d.</p> <p>-Sites SHF018a/P14 have a lower negative sustainability score in the Sustainability Appraisal.</p> <p>-Sites SHF018a/P14 have a similar site areas to SHF018b and would meet the original requirement for 14ha of additional employment land (without the unjustified further 24ha).</p> <p>-Past consultation documents stated the Council recognised the important contribution the promoters of SHF018b/SHF018d will make to the future of Shifnal through expeditious delivery, yet no evidence of this is provided. This also suggests pre-determination of the allocation. As does the inclusion of the site in the Invest In Shropshire Brochure.</p> <p>No evidence has been submitted to justify why sites SHF018a/P14 were not considered appropriate for allocation as the preferred employment sites, even though they were 'reasonable alternative' sites. SHF018b could then be safeguarded (if needed) and SHF018d remain in the Green Belt.</p> <p>Draft site guidelines for SHF018b/SHF018d include significant improvements to Stantion Road and no traffic to go west into Shifnal. However, no evidence of improvements, costs or how they will be undertaken (including restrictions to traffic to the west). As such proposals are unsound (must be effective and deliverable).</p> <p>It appears the increase to the employment land guideline proposed for Shifnal is simply to accommodate SHF016b/SHF018d, rather than to meet the needs of the town.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0312	B015	Delete proposed safeguarded land. If the employment land guideline justifies it, allocate sites SHF018a/P14 and safeguard SHF018b. Identify proposed allocation SHF015/029 and land north of Upton Lane (below the skyline) as safeguarded land.	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings including sites SHF015 & SHF029 that will make an important contribution to meeting the housing needs of Shifnal and helping to conserve the important historical building of Beech House and its curtilage structures and land. These allocation complement the existing committed supply of 370 dwellings which further complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021 and which will deliver the 1,500 housing guideline figure for Shifnal. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. . Development guidelines for sites released for development will ensure the site design, layout and landscaping respects the character and significance of adjoining land uses. In the Green Belt, this is required to strengthen the boundary to the urban area to help maintain the openness and permanence of the Green Belt around Shifnal.	No	S15.1 Shifnal (SHF017/P16)
A0060	B020	Delete proposed allocations SHF018b/SHF018d. If the employment land guideline justifies it, allocate sites SHF018a/P14 and safeguard SHF018b.	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings including sites SHF015 & SHF029 that will make an important contribution to meeting the housing needs of Shifnal and helping to conserve the important historical building of Beech House and its curtilage structures and land. These allocation complement the existing committed supply of 370 dwellings which further complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021 and which will deliver the 1,500 housing guideline figure for Shifnal. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. . Development guidelines for sites released for development will ensure the site design, layout and landscaping respects the character and significance of adjoining land uses. In the Green Belt, this is required to strengthen the boundary to the urban area to help maintain the openness and permanence of the Green Belt around Shifnal.	No	S15.1 Shifnal (SHF018a/P14a and SHF018b/SHF018d)

A0305	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15 Shifnal - SHF018a/P14a and SHF018b/SHF018d	No	No	Yes	Safeguarded sites SHF018a/P14 are more sustainable sites in the SLAA assessment than the allocated employment sites SHF018b/SHF018d. Sites SHF018a/P14 also have a lower negative sustainability score in the Sustainability Appraisal and would cause less harm if released from the Green Belt. No evidence has been submitted to justify the reasons why sites SHF018a/P14 were not considered appropriate for allocation as the preferred employment sites even though they were 'reasonable alternative' sites. It is considered that the requirement for 'exceptional circumstances' for releasing sites SHF018b/SHF018d from the Green Belt has not been met. In particular, site SHF018d has not been subject to a Sustainability Approval as required by law and policy despite having a high degree of harm to the Green Belt as shown in the evidence base and leading to the incorrect statement in the Plan that the combined effect of releasing sites SHF018b/SHF018d has a Moderate-High harm. This is contrary to NPPF Green Belt policy, the law and policy on sustainable development and sustainability appraisal and the legal requirement to consider reasonable alternatives and to give reasons why those alternatives were not selected.
A0312	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15 Shifnal - SHF018a/P14a and SHF018b/SHF018d	No	No	Yes	<p>Consider proposed allocations SHF018b/SHF018d are contrary to NPPF Green Belt policy, the law, Gunning Principles and policy on sustainable development and sustainability appraisal and the legal requirement to consider reasonable alternatives and to give reasons why those alternatives were not selected and the need to justify exceptional circumstances (as required for Green Belt release). As such they are not considered sound.</p> <p>-It is illogical to allocate land for development whilst leaving undeveloped land between it and the town boundary (SHF018a/P14).</p> <p>-SHF018a/P14, benefit from a functional relationship with the adjacent Industrial Estate - lacking for SHF018b/SHF018d yet referenced in draft site guidelines.</p> <p>-SHF018a/P14 would lead to less harm to the Green Belt than SHF018b/SHF018d (SHF018b/SHF018d would represent encroachment into the countryside and beyond Lamledge Lane. SHF018d also lacks defined boundaries, as recognised within the Green Belt Review, contrary to para 139(f) of the NPPF. Para 5.211 of the draft Shropshire Local Plan incorrectly references the harm of proposed employment allocations and medium-high when it will be high).</p> <p>-Site SHF018d has not been subject to a Sustainability Approval as required by law and policy despite having a high degree of harm to the Green Belt as shown in the evidence base.</p> <p>-Safeguarded sites SHF018a/P14 are more sustainable sites in the SLAA assessment than the allocated employment sites SHF018b/SHF018d.</p> <p>-Sites SHF018a/P14 have a lower negative sustainability score in the Sustainability Appraisal.</p> <p>-Sites SHF018a/P14 have a similar site areas to SHF018b and would meet the original requirement for 14ha of additional employment land (without the unjustified further 24ha).</p> <p>-Past consultation documents stated the Council recognised the important contribution the promoters of SHF018b/SHF018d will make to the future of Shifnal through expeditious delivery, yet no evidence of this is provided. This also suggests pre-determination of the allocation. As does the inclusion of the site in the Invest In Shropshire Brochure.</p> <p>No evidence has been submitted to justify why sites SHF018a/P14 were not considered appropriate for allocation as the preferred employment sites, even though they were 'reasonable alternative' sites. SHF018b could then be safeguarded (if needed) and SHF018d remain in the Green Belt.</p> <p>Draft site guidelines for SHF018b/SHF018d include significant improvements to Stanton Road and no traffic to go west into Shifnal. However, no evidence of improvements, costs or how they will be undertaken (including restrictions to traffic to the west). As such proposals are unsound (must be effective and deliverable).</p> <p>It appears the increase to the employment land guideline proposed for Shifnal is simply to accommodate SHF016b/SHF018d, rather than to meet the needs of the town.</p>
A0076	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.1 Shifnal SHF018b & SHF018d	Yes	Yes	Not Specified	Support this site and its removal from the Green Belt

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0305	B013	Allocate sites SHF018a/P14 as the preferred employment sites in Shifnal for the period to 2038 and remove the safeguarding designation from these two sites. Remove the employment allocations from sites SHF018b/SHF018d and instead safeguard site SHF018b for future development for the period after 2038 and continue to protect site SHF018d as land within the Green Belt and do not allocate or safeguard this land for development.	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings including sites SHF015 & SHF029 that will make an important contribution to meeting the housing needs of Shifnal and helping to conserve the important historical building of Beech House and its curtilage structures and land. These allocation complement the existing committed supply of 370 dwellings which further complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021 and which will deliver the 1,500 housing guideline figure for Shifnal. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. Sites SHF018b and SHF018d are proposed by a developer with a proven record of delivery and the resources to bring forward the site in a location where other interest has been expressed in the delivering this employment allocation. Sites SHF018b and SHF018d are both proposed for development to reduce the risks involved in delivering the strategic highway and utilities infrastructure that is essential for the delivery of this important employment development opportunity in Shifnal. . Development guidelines for sites released for development will ensure the site design, layout and landscaping respects the character and significance of adjoining land uses. In the Green Belt, this is required to strengthen the boundary to the urban area to help maintain the openness and permanence of the Green Belt around Shifnal.	No	S15.1 Shifnal (SHF018a/P14a and SHF018b/SHF018d)
A0312	B014	Delete proposed allocations SHF018b/SHF018d. If the employment land guideline justifies it, allocate sites SHF018a/P14 and safeguard SHF018b.	Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings including sites SHF015 & SHF029 that will make an important contribution to meeting the housing needs of Shifnal and helping to conserve the important historical building of Beech House and its curtilage structures and land. These allocation complement the existing committed supply of 370 dwellings which further complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021 and which will deliver the 1,500 housing guideline figure for Shifnal. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Shropshire Council has set out in detail the exceptional circumstances for releasing land from the Green Belt for employment development to promote the growth and development of the town. This seeks to achieve sustainable development for Shifnal through the planned strategy in the Local Plan. To be considered as sustainable development the planned strategy should meet the broader social, economic and environmental needs of the community at the heart of the strategy. Whilst there are a range of employment opportunities in the areas around Shifnal and its Place Plan area, there are significant limits to the availability of employment in Shifnal itself and there are very few new employment development opportunities in the town. Consequently, it is considered appropriate for the draft Local Plan to address the need for new employment opportunities to be delivered in Shifnal in the period to 2038. A0347	B080	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Shifnal	No	No	Not Specified	The proposed development sites overlie sand and gravel deposits which in turn overlie the Permo-Triassic sandstone. These form a strategically important source of public water supply. They fall within SP22. Groundwater levels are relatively shallow at 5 to 10mbgl. It is therefore essential that appropriate land uses, drainage design and pollution prevention measures are adopted. This is particularly important for the employment site where a potentially wide range of activities may be proposed. The mains foul drainage infrastructure will have to be sufficient to support the development proposals.
A0347	B081	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Shifnal	No	No	Not Specified	These sites overlie the PWS abstraction and associated SPZ1. Appropriate foul and surface water drainage design and pollution prevention measures will be required. Early consultation with the water utility provider as Key Stakeholder will be essential in order to prevent delays to development planning process. Within SPZ1 the Environment Agency will object to certain land uses
A0621	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Policy SHF15.1 Shifnal and DP28. Communications and Transport	Not Specified	Yes	Not Specified	The land east of Shifnal, encompassing employment allocations SHF018b and SHF018d, proposed reinstated allocation SHF032 and proposed residential safeguarded land at SHF018c, have been appraised in the context of these objectives. Being located on the eastern edge of Shifnal, they are able to benefit from excellent opportunities for both future residents and employees to travel to the Town Centre on-foot or bicycle. In terms of walking and cycling routes, the sites will be developed with a focus on prioritising pedestrian activity and cycle movements. Links to wider routes will be provided by linking proposed internal pedestrian and cycle routes with existing and proposed off-site routes on Coppice Green Lane and along Stanton Road, including connection to National Cycle Route 81. The travel planning strategy for the respective sites will also seek to ensure that the long-term management of the promotion and delivery of sustainable transport initiatives will be secured and managed, both for the employment and residential uses. This transport approach to the land east of Shifnal has been developed to align with the requirements of draft Policy DP28 and is considered to similarly accord with NPPF paragraph 103. This states that 'significant development should be focussed on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes.'
A0682	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	DP28	Not Specified	Not Specified	Not Specified	Consider Land between Park Lane and the A464 meets the requirements of draft Policy DP28. This site is in a highly sustainable location and benefits from good access to existing public transport and offers opportunities for active travel. Shifnal is an inherently sustainable location (as recognised within the assessment of services/facilities in the Hierarchy of Settlements Assessment undertaken to inform the draft Shropshire Local Plan) which we consider should receive a higher level of housing growth within the plan period, and that the safeguarded sites identified around Shifnal, should not be safeguarded but allocated for delivery within the plan period.
A0578	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S15.4 Sutton Maddock Shifnal	Yes	No	Yes	We believe this site is suitably placed to provide development towards the target of dwellings by 2038, being situated with an access to the A442 and adjoining developed land, the Telford Hotel and Golf Course. The land is well positioned with access to the highway on the eastern boundary adjoining land that has residential developed land. The land includes woodland which could be for community amenity use. This site is within easy reach of Halesfield employment opportunities and Telford schools and amenities plus within range of M54 motorway. The site is bounded on three sides by Sutton Hill residential, Telford Hotel and Golf Course plus the A442. A woodland can be planted on the southern boundary to define a limit to development

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0347	B080	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S15.1 Shifnal (SHF018b and SHF018d)
A0347	B081	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S15.1 Shifnal (SHF022&23, SHF029 and SHF016)
A0621	B003	Reinstate SHF032	Shropshire Council considers that the proposed development strategy for Shifnal and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that proposed safeguarded land is not allocated for development but safeguarded for beyond the proposed Plan period. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	S15.1 Shifnal and DP28. Communications and Transport
A0682	B005	Identify a higher housing guideline than that proposed for Shifnal. Land proposed to be safeguarded for future development should instead be allocated for development.	Shropshire Council considers that the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	S15.1 Shifnal and DP28. Communications and Transport
A0578	B001	This parcel of Green Belt land situated on the A442 adjoining the Telford urban boundary close to the settlement of Sutton Maddock should be considered for residential development and to help overcome the objections to further growth in the Key Centre of Shifnal.	Shropshire Council considers that the proposed development strategy for Shifnal and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. It should be noted that proposed safeguarded land is not allocated for development but safeguarded for beyond the proposed Plan period. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding, landscape and Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. This site would not satisfy the requirement for exceptional circumstances to justify the release of this land from the Green belt which would be contrary to the purposes of the Green Belt. The site is situated in the open Green Belt adjoining the urban area of Telford as a large built up area, it would encourage the merging of Telford with other settlement inset into the Green Belt and would result in an urban encroachment into the countryside and as such would affect the openness and permanence of the Green Belt.	No	S15.4 Sutton Maddock Shifnal

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0146	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Not specified	Not Specified	Not Specified	Not Specified	<p>Site adjacent Shifnal and should be brought forward as an allocation, for the medium and long-term needs of Shifnal. It has been informed by a comprehensive suite of technical assessments ( included as appendices) that appraise the site with regards to landscape, ecology, heritage, transport and access, flood risk and drainage to demonstrate that the site is sustainable, deliverable and free from constraints for the purpose of development. A unique &amp; valuable benefit is the delivery of new link road around the south and west of Shifnal &amp; this is the natural direction for future growth.</p> <p>Confirm that whilst land east of Park Lane is controlled by Miller while land west of Park Lane is controlled by Wallace both parties working jointly to deliver a sustainable extension to Shifnal that will deliver housing, a new link road around the south-west of Shifnal together with community facilities and new public open space that will benefit the existing residents. The masterplan for the site shows how the site can deliver approximately 1,265 new homes and associated infrastructure and community facilities; and how the site integrates with the existing settlement. The masterplan has been informed by site technical assessments (Appendices) relating to environmental considerations, heritage designations, flooding and drainage, landscape, open space and ecology, and phasing of new homes.</p> <p>Shifnal is a recognised as sustainable as a key centre. The site lies within the highly connected and regionally important M54 Corridor, close to main employment centres, by road and by train with the train station is within walking distance of the site.</p> <p>It is ideally placed to help address development pressure in Shifnal as well as the Black Country &amp; will make a positive contribution to housing requirements of both. Higher levels of housing in the plan period are prudent in the context of the significant housing need pressures in Shifnal and the M54 Corridor. Better to locate housing close to the source of high demand, rather than displace it elsewhere in Shropshire. Reducing carbon emissions by actively reducing commuting distances should be part of Council's approach to tackling the threat of climate change. The proposals also respond positively to the important matter of climate change by: Locating homes close to a wide range of jobs &amp; within walking distance of a railway station schools, shops and community facilities; providing carbon-friendly houses; improving the Wesley Brook's environmental capacity &amp; developing sufficient 'critical mass' of new housing to enable significant upgrades in infrastructure that will benefit all residents in Shifnal.</p> <p>Population growth from new housing provision will offer the opportunity to indirectly support the wider growth of the local economy including retail and other services supported by good social infrastructure.</p> <p>The proposals meet the 'exceptional circumstances' necessary to release land from the Green Belt, providing essential space to meet Shifnal's needs for sustainable growth. It will also deliver environmental and access improvements to remaining Green Belt in accordance with national policy. Site has been proposed to be released from the Green Belt and safeguarded but compelling case to allocate the site in the plan, for the medium and long-term needs of Shifnal as evidenced by submitted supporting information. Evidence ref landscape, ecology, heritage, transport and access, flood risk and drainage demonstrates that the site is deliverable and free from constraints.</p> <p>The entire site is immediately adjacent to the existing settlement of Shifnal &amp; site location &amp; context plans are provided in the response. Response sets out case for and emerging proposals for sites as a sustainable extension to Shifnal. Also response ( including Appendix 1) sets out case for: Green Belt release; summary of the socio-economic benefits; vision &amp; draft masterplan (included) ; phasing proposals ( included with phasing plan) ; Alignment of housing delivery with new highways infrastructure.</p> <p>The site is well related to the existing urban area &amp; the site is below ridge of higher land to the west of the town which creates a strong visual barrier between Shifnal &amp; Telford. Areas of woodland, hedgerows and water features e.g. Wesley Brook create natural boundaries and/or visual barriers to help to define the setting of the site. Maps of context, topography and illustrative landscape strategy are provided. The Illustrative Masterplan takes into account the landscape setting of the site and the extent of development responds to the 'development envelope' that can accommodate built form and infrastructure whilst also establishing a robust &amp; appropriately enhanced green infrastructure framework. The masterplan uses &amp; retains existing features to define &amp; screen the development.</p> <p>Impact of long-term restraint of Shifnal's housing growth, resulted in significant demand for housing in the town reflected in significant residential expansion from 2016 with all SAMDev Plan allocations completed or with planning permission. Shifnal has high market demand and can deliver housing growth more effectively than most settlements in Shropshire. Response sets out detail of Shifnal housing market context including historic delivery; demography; sustainability of location &amp; opportunity for sustainable growth; affordability &amp; need &amp; economic and social benefits.</p> <p>Housing market evidence strongly demonstrates a case for a higher level of housing delivery and confirms strong links to job opportunities in Telford and in the Black Country, with good public transport links along the M54 Corridor( illustrated), a strategic corridor with role in driving economic prosperity identified in M54 Growth Corridor – Strategic Options Study 2019, including strategic allocations. The submission sets out further contextual information re the role &amp; significance of the M54 corridor, including recognition by the Draft Plan the importance of this strategic corridor, and that it thus seeks to focus major economic growth and employment development along it. To support this the Plan the plan is seeking to release Green Belt land and allocate for employment. Also closeness of Cosford growth and its implications need to be taken into account (illustrative plan provided) . The growth in employment within the strategic corridor at Shifnal, RAF Cosford and elsewhere, will inevitably increase housing demand in Shifnal and may well be needed before the end of the plan period.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0146	B001	Site should be allocated as a sustainable extension to Shifnal	<p>Shropshire Council considers the proposed development strategy for Shifnal and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable). In identifying proposed site allocations and proposed safeguarded land a comprehensive site assessment process has been undertaken. The draft Local Plan makes a nominal addition of three smaller sites for 230 dwellings to the existing committed supply of 370 dwellings which will complement the 1,000+ dwellings that are anticipated to have been built or are under construction in the town up to 2021. This site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. On the completion of the proposed 1,500 dwellings in Shifnal, which is expected to occur before 2026 it is proposed that housing development should cease and not be resumed again until after 2038. This period of respite from housing development will also allow infrastructure improvements to occur in the town including programmed improvements to key locations on the highway network in the town and for the community to assimilate the growth of the town since the adoption of the SAMDev plan in 2015. In relation to the anticipated respite from further housing development in Shifnal, it is proposed that much of the land released from the Green Belt will be safeguarded for future development and it is intended that this land will remain open and undeveloped during the remaining Plan period to 2038. Whilst Shropshire Council has proposed to support the Black Country Authorities to meet their unmet needs in Shropshire, it is not proposed to identify specific sites to accommodate the intended contribution to cross-boundary needs arising within the Black Country (1,500 dwellings and 30ha of employment land). Rather this is included within the proposed housing and employment land requirements subject to the proposed strategic approach for the level and distribution of development across Shropshire.</p>	No	S15.1 Shifnal

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0146	B001 Cont'd						<p>In recognition of development pressures in the east of Shropshire, the Pre-Submission Draft Plan safeguards land to meet longer term development needs and the Plan identifies delivery of a range of expected benefits enabled by a new neighbourhood community including: highway &amp; other infrastructure improvements and links ; services &amp; facilities and open space enhancements etc. The response sets out required infrastructure improvements that development on the site could contribute to. It is considered that to provide choice and better balance in the town, land to the south and west of Shifnal is the natural direction for future growth. Support for the Green Belt release which should be directed to the most sustainable settlements such as Shifnal, with a range of services &amp; facilities and rail transport (A services and facilities plan is included). Release of Green Belt in this location is wholly in accordance with the NPPF's requirement to promote sustainable patterns of development &amp; will secure the town's long-term future. The contribution of the site to the Green Belt has been appraised (Wallace and Miller Appendix 1 and 3) The assessments conclude that development of the site would only cause low-moderate harm overall and the location is entirely logical to be released from the Green Belt.</p> <p>The delivery of around 200 dwellings per annum in Shifnal since 2016 shows that this is a location in which development is quickly delivered but Pre-Submission Draft Plan seeks to provide very few new homes from around 2025. No reasons why the site could not come forward as an allocation to provide much needed homes and infrastructure. The site can be delivered in a chronological way that aligns delivery of new housing with new infrastructure &amp; detailed phasing strategy is set out (including plan). Wallace and Miller have a successful track record of delivering sites of this nature. Comprehensive technical assessments undertaken for the site do not identify any issues or constraints to delivery.</p> <p>Acknowledging community identified traffic concerns it is considered that a major benefit is that the development of this site will not exacerbate traffic conditions in the town centre &amp; will deliver a new link road around the south and west of Shifnal( plan provided) on a phased basis over the life of the development. The through road from the A464 Wolverhampton Road to Park Lane serving the site has the potential to offer wider strategic benefits to Shifnal. It would form the first section of a local link road, ultimately connecting to the A4169, with the potential to connect to the A464 Priorslee Road. Link road will enable a significant proportion of through traffic to be removed from the town centre which could be combined with already proposed improvement to the Five-Ways roundabout &amp; Innage Road on-street parking/waiting control. The link road will provide an alternative route that by-passes the town and will ensure that the development does not generate any further pressure on key junctions in the town. There are no other prospects for any similar intervention to be delivered from development elsewhere in Shifnal.</p> <p>The site has good connectivity with the wider settlement by sustainable transport modes &amp; is also ideally located to encourage travel by sustainable modes as described in the response &amp; Appendices. The development of the site provides an opportunity to assist in easing current traffic conditions close to (and knock on impacts beyond) St Andrews Primary School on Park Lane with the provision of a pick-up and drop-off facility as described. The release of land for development creates opportunities for improved vehicle movements to and from Park Lane, as detailed in the Phasing Strategy and Access Arrangements report(Appendix) which also sets out further information on the site access proposals set out in the response(including phasing and indicative masterplans) .</p> <p>In order to address the requirement for additional capacity at St. Andrew's Primary School the masterplan includes provision for new school infrastructure if required.</p> <p>The current Green Belt restricts opportunities for Shifnal's retail offer to be increased. The town currently lacks a large supermarket and the site offers an opportunity for the town to attract new retail such as a supermarket, reducing expenditure leakage and travel.</p> <p>The site provides an opportunity to deliver a generous area of semi-natural new public open space along the Wesley Brook ( shown on masterplan) with associated biodiversity enhancements and potential to provide new footpaths for improved resident access (as described) with ecological considerations detailed in appendix 1 &amp; 1.3 ) .</p> <p>The proposals incorporate measures to address flood risk and drainage. Detailed proposals are contained in the technical assessments contained at Appendix 1 and 3.</p> <p>Heritage and archaeology assessments undertaken (Appendix 1 and 3) show no heritage constraints that would prevent site allocation of the site. Designated and/or non- designated assets within or within the vicinity of the site are capable of being preserved through the detailed design and layout of the proposed development.</p> <p>The NPPF requires Local Plans to make sufficient provision to meet all its development needs, including making provision for infrastructure, community facilities and natural environment enhancement. The proposed sustainable strategic extension achieves this &amp; would help Shropshire Council deliver NPPF requirements. Response cross references other submitted representations that the housing requirement for Shropshire may increase significantly when taking into account likely revision to standard method for calculating local housing needs, and level of Black Country's unmet housing needs. Highlight NPPF strong support for setting a housing requirement which is higher than that implied as a 'minimum' level through the standard method. A higher target recognising role &amp; economic ambitions for the M54 Growth Corridor &amp; addressing the consequences of historic under provision; meeting the significant housing need pressures identified in the Greater Birmingham and Black Country housing market area in the area closest to their source, avoids displacing their housing demand pressures onto other parts of Shropshire; delivery of new housing in the Shifnal will address affordability ratio issue ; Shifnal's growth will reinforce its vitality and sustainability, helping address ageing population profile that is a consequence of previous constraints on housing in the town and worsening housing affordability. The growth of the working-age population represents an opportunity to sustainably support the local economy and community vitality.</p>

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0146	B001 Further Cont'd						<p>Key community benefits of the site: a range of homes to meet local and regional needs; attracting younger families to Shifnal &amp; addressing ageing demographic; New road infrastructure ; St Andrew's Primary School parents' access and drop off; new school site provision and land for new retail facilities, and play areas; • Significant investment in the town, with direct and indirect economic benefits; support from new households for shops and services in Shifnal; improved settlement edge with a landscaped buffer; and, new public park along the Wesley Brook .</p> <p>Delivery of 1295 new homes with resulting CIL around £7m &amp; the proposals provides co-ordinated investment in Shifnal of around £120 million. Estimated the site will create around 335 indirect &amp; direct local jobs per annum and generate economic spin-offs in the region of £341 million.</p> <p>The site also makes provision to deliver new public open space, health centre, school and other community facilities. The initial phases of the development can commence within the early part of the plan period, if required.</p> <p>The site has no technical constraints, has strong market demand and is highly deliverable and can deliver a quality scheme, together with infrastructure that contributes to the local community's needs. The site will help support the continued economic vitality of the town, its services and environment, contributing to the wider sustainability of Shropshire and the wider sub-region.</p> <p>Submitted supporting appendices:</p> <p>Appendix 1 – Development Framework Document provides supporting detail in respect of elements summarised and summaries of technical assessments referencing – sustainability appraisal; landscape assessment; Green Belt assessment &amp; release, heritage, ecology, drainage &amp; flood risk, transport &amp; access; economic &amp; community benefit elements; masterplan &amp; phasing</p> <p>Apdx 1.1.1 preliminary landscape and visual assessment</p> <p>Apdx 1.1.2 Historic Environment Assessment</p> <p>Apdx 1.1.3 Ecological Assessment</p> <p>Apdx 1.1.4 FRA</p> <p>Apdx 1.4 Phasing Strategy &amp; access arrangements joint Wallace &amp; Miller site</p> <p>Wallace Site (Safeguarded land SW of Shifnal) includes illustrative plans &amp; photographs:</p> <p>As well as the joint submission, a separate Lodge Hill vision framework/illustrative masterplan (Appendix to this representation) &amp; consideration of site against technical assessments has been prepared specifically for the Wallace site (informed by extensive supporting assessments including a Preliminary Landscape and Visual Appraisal (2020, Pegasus Group), Transport &amp; Access Note, Flood Risk Assessment (2020, SWECO), Ecological Appraisal (2020, FPCR) and Historic Environment Desk-Based Assessment (2020, Nexus) which also form Appendices to this representation), demonstrating consideration of opportunities/constraints, how the site could be delivered. Submission further seeks to demonstrate that site is suitable, sustainable and deliverable and should be allocated as a sustainable extension capable of accommodating sustainable residential development to meet medium and long-term housing needs as well as delivering a new link road and community facilities. Site Plan and phasing provided for the site with phases to deliver up to 1,100 new home.</p> <p>Consider the site would represent a logical expansion of the settlement Shifnal &amp; site location &amp; context plans are provided in the response. The site has a 'good' overall score in the Council's Sustainability Appraisal &amp; is considered to be a highly sustainable location. Confirms that the site has no significant constraints and the site will not materially reduce the gap between Shifnal and Telford &amp; the proposed development will provide an improved landscape buffer with the remaining Green Belt.</p> <p>A bespoke Green Belt assessment for the site is provided. Exceptional circumstances for release are set out &amp; potential for Green Belt environmental improvements identified in Appendix 1 . A landscape led approach can ensure that a scheme embeds mitigation in the overarching design principles and recognises the local landscape character. On the basis of the published LVSS and the more detailed PLVA, the site is considered to be of low to medium visual and landscape sensitivity to new residential development and is suitable and preferable for a residentially led masterplan.</p> <p>Miller Site Specific Rep as set out in :</p> <p>Apdx 1.2 Vision Framework Miller site (includes illustrative plans &amp; photographs)</p> <p>Apdx 1.3 Miller Site ( Land East of Park Lane) – Consideration against technical evidence (including Evidence as appendices) March 2020</p> <p>Apdx 1.4 Phasing Strategy &amp; access arrangements joint Wallace &amp; Miller site Sept 20</p> <p>As well as the joint submission ,a vision framework/illustrative masterplan (Appendix to this representation) &amp; consideration of site against technical assessments has been prepared specifically for the Miller site (informed by extensive supporting assessments including a Landscape Visual Assessment, Transport &amp; Access Note, Flood Risk &amp; Drainage Assessment, Preliminary Ecological Appraisal and Initial Heritage Assessment which also form Appendices to this representation), demonstrating consideration of opportunities/constraints, how the site could be delivered. Submitted Vision Document further seeks to demonstrate that land east of Park Lane is suitable, sustainable and deliverable and should be allocated as capable of accommodating sustainable residential development to meet the clear, identified need for new housing within Shropshire. The site is subject to no technical constraints which cannot be appropriately mitigated. The site would represent a logical expansion of the settlement Shifnal &amp; site location &amp; context plans are provided in the response.</p> <p>Response seeks to demonstrate that land east of Park Lane (identified on Plan) is suitable, sustainable and deliverable and should be allocated for future development providing an opportunity close to the town centre with</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0146	B001 Further Cont'd				S15.1 Shifnal

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0146	B001 Further Cont'd						<p>Allocation of the site for housing development would comply with the key objectives of the Framework as outlined including presumption in favour of sustainable development and housing, green belt; sustainable transport, natural and historic environment and other relevant NPPF policies. National &amp; local policy directs new housing development to sustainable locations. Suitability of Shifnal to accommodate additional development has been recognised by Key Centre status. Response sets out site context highlighting excellent accessibility &amp; proximity of employment. Shifnal is a very sustainable location with good access to existing public transport &amp; a wide range of facilities and services as detailed. A series of technical studies have been undertaken to inform the emerging proposals for the site and support its allocation for residential development.</p> <p>Landscape and visual analysis has been carried out which identifies the likely landscape and visual opportunities and constraints which influence the site's ability to accommodate residential development. The site is set within a relatively enclosed location, close to the southern fringe of Shifnal. Due to the site's location within this enclosed landscape it is considered appropriate for development in landscape and visual terms. The containment of the site provides the potential for successfully integrating development within the landscape and providing a new defensible settlement boundary. Notably the visibility of the site in the wider landscape is reduced by its topography and the influence of surrounding mature vegetation. Identified design principles have been incorporated into the emerging layout to help reduce the 'impact of change' on the area's landscape. Overall, the landscape is considered to be of medium landscape and visual sensitivity and to have a moderate capacity to accommodate development &amp; to be appropriate for development in landscape and visual terms. .</p> <p>No impacts to any statutory wildlife sites are envisaged and other species and ecological considerations are identified &amp; addressed as set out. With the exception of boundary habitats, the site is of low ecological value &amp; mitigation measures can be incorporated to ensure no significant impacts. Illustrative Site Masterplan for identifies positive design measures &amp; there is potential to deliver a net biodiversity gain across the site .</p> <p>Arrangements for access, including primary &amp; secondary access, footway &amp; cycleway provision &amp; sustainable transport opportunities are set out.</p> <p>Flood Risk Assessment illustrates no constraints to the development of the site for residential development The site is located wholly within Flood Zone 1 and other forms of flood risk have been considered and appropriate Surface Water Management &amp; application of Sustainable Urban Drainage Systems (SuDS) is proposed as set out in detail .</p> <p>An Initial Heritage Appraisal sets out the key heritage considerations to be taken into account in developing the site including consideration of the grade II listed The Terrace. Recommendations are made to ensure new development responds to the significance of the listed building.</p> <p>Response sets out development framework for the site identifying constraints &amp; opportunities, access &amp; movement, SUDs, open space etc arrangements which is developed into the concept plan provided . Through a robust assessment of the site's policy, spatial and environmental context, it has been demonstrated that the site is suitable and appropriate for future development &amp; a sensitive, high quality development which responds to the attributes of the site can be achieved.</p> <p>The site would deliver a high quality &amp; sensitive residential development within an attractive landscape setting that would bring a number of benefits to the town, including: delivering 175- 200 homes to provide new market and affordable housing that can address local need through type and tenure and provide mix and choice with up to 33% affordable homes; strong landscape framework comprising new areas of open space; Promoting Healthy Communities as the adjacent to a highly sustainable settlement and in close proximity to existing community facilities and services which are easily accessible by foot; the proposed development will provide a boost to the local economy through new households giving additional expenditure in the local economy.</p> <p>If the site is allocated a comprehensive engagement strategy will be undertaken with stakeholders and the local community.</p> <p>Committed to early delivery of the site via the planning application process.</p> <p>Development of the site will support the five-year supply and contribute towards the delivery of the Council's economic growth strategy and sustainable communities</p> <p>Potential for site to be delivered independently of Wallace land site</p> <p>Further detailed submission is provided also considering the Wallace site against technical evidence prepared (Landscape and Green Belt; Transport and Accessibility; Heritage; Ecology; Flood Risk and Drainage reports which are included as appendices) . The submission reviews the Council's Green Belt Assessment noting that it identifies the 's site as an 'opportunity area' &amp; that it is already proposed for safeguarding , the Council's evidence demonstrating that it, together with preferred housing allocation SHF022 and part SHR023, are located in the least harmful direction of growth surrounding Shifnal. The site specific Landscape &amp; Visual Assessment identifies that the site's natural boundaries will provide for a new robust Green Belt boundary supporting removal of the site from the Green Belt, as well as identifying opportunities for site design.</p> <p>Transport assessment (Appendix) considers local highway network, existing public transport and active travel opportunities to and from &amp; within the vicinity of the site. Also, potential new accesses into the site from the A464 and Park Lane respectfully. The proposals demonstrate that safe access can be provided, on its own or in combination with promoted Wallace land to the west of Shifnal.</p> <p>Masterplan responds to the site's immediate environs and technical evidence base meaning that it will be 'deliverable' in accordance with the NPPF i.e. suitable, available ( promoted by developers on behalf of landowners) &amp; achievable (based on development expertise of promoter) . Consider that Shifnal should see a higher level of growth than was directed to it at 'Preferred Options.</p>

A0146	B001 Further Cont'd				S15.1 Shifnal

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0356	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1(i) (SHR060, SHR158 and SHR161)	Not Specified	Yes	Not Specified	<p>Draft Policy S16.1(i), Policy Map Inset S16(b) and Mixed Use Allocation SHR060, SHR158 &amp; SHR161 are supported. SHR060, SHR158 &amp; SHR161 is a significant allocation and provides a unique opportunity to meet the social, environmental, and economic needs of Shrewsbury and Shropshire, during the proposed Plan period and beyond. Consider it is essential that flexibility on the precise amount and mix of uses is provided so it best meets development requirements of the town.</p> <p>The promoter of the majority of the proposed site allocation (SHR158) has extensive experience and a proven track record of delivery (including adjacent development at Bowbrook). They are collaborating with the two parties controlling the remainder of the proposed allocation and a draft Masterplan is being prepared (concept framework plan to inform this appended to representation). Fully committed to preparing this masterplan, submitting a planning application and bringing forward the site for development early in the proposed Plan period (early discussions with housebuilders have occurred). Also committed to working proactively and positively with the Council, all landowners, the local community and other stakeholders.</p> <p>There are no abnormal costs or technical constraints that would render the development of the site unviable or undeliverable. If necessary, a detailed site-specific viability assessment can be provided in support of the draft allocation, however continue to question and would welcome engagement on some of the broad-brush assumptions and conclusions in the Council's current evidence on viability.</p> <p>With regard to proposed site guidelines for SHR060, SHR158 &amp; SHR161:</p> <ul style="list-style-type: none"> <li>-Support the overall quantum of housing development proposed.</li> <li>-Support the quantum of employment land proposed, however request this is expressed as 5ha rather than minimum of 5ha to provide certainty for masterplanning and subsequent development.</li> <li>-Principle of providing a centre including neighbourhood shopping facilities, leisure and community uses is supported. However precise size, composition and location should be considered through masterplanning/planning application process. It should also be described as a Neighbourhood Centre to reflect scale and function of the proposed allocation.</li> <li>-Support the principle of providing safeguarded land for new educational and health facilities. However, careful consideration required of precise quantum, configuration and location through masterplanning process. Any references to specific land areas need to be fully evidenced.</li> <li>-Recognise need for a masterplan and quality, design, mix and layout of the development will be informed by site constraints and opportunities.</li> <li>-Support general approach taken to vehicular access points, pedestrian, and cycle links within and through the site, which will be considered through the masterplanning process.</li> </ul> <p>Concerned about reference "all necessary improvements to the Local and Strategic Road Networks will be funded through the development" as it is imprecise and open ended. Request the Council consider alternative wording which ensures mitigation necessary to accommodate unacceptable impacts of development on the highway network are provided/funded by the developer. Note suggested provision of a Park and Ride facility on SHR161 and recognise desire to ensure integration/linkages from the Park and Ride to the wider development.</p> <ul style="list-style-type: none"> <li>-Support the approach taken to green and blue infrastructure. Sustainable drainage and green infrastructure strategies will be key components of masterplanning.</li> <li>-Concerned about the proposal that "a decision on a planning application will not be made until such time as a Masterplan for the site has been approved by Shropshire Council". Request alternative wording which provides greater clarity on the process by which the Council intends approve a masterplan to avoid undue delays.</li> </ul>
A0029	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 Shrewsbury	Not Specified	Not Specified	Not Specified	<p>There was concern about the level encouragement of developer direction rather than prescribing direction. Members continue to worry about the loss of the greenfield land as development is being driven to the edge of the town's development boundary. Some of our members have questioned the sustainability of the NWRR and the rationale in the development of large infrastructure projects like this. We fear that the sentiments of the Shrewsbury Test as defined in the Big Town Plan are watered down. Members feel there is a need for a Cycling &amp; Walking Infrastructure Strategy. There is reference in the Local Plan to a Green Infrastructure Strategy but members are unaware of its existence.</p>
A0036	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 Shrewsbury Proposals Map	Not Specified	Not Specified	Not Specified	<p>Generally support proposed amendments to the development boundary for Shrewsbury, but consider that they should be extended to includes Meole Brace Park and Ride. This seems a natural extension with the A5 acting as a defensible boundary against urban sprawl.</p>
A0108	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7 and S16.1 Shrewsbury	Yes	No	Yes	<p>Shrewsbury has been identified as a Strategic Centre. A major role of a Strategic Centre is to provide a range of site allocations to increase chances of delivery. However, many of the sites proposed for allocation in Shrewsbury do not have reasonable scope for immediate delivery.</p> <p>For example: SHR173 is reliant on the construction of the North West Relief Road (NWRR), which does not yet have Planning Permission. SHR060, SHR158 and SHR161 is large and complex meaning it will take many years to be delivered.</p> <p>Suggest inclusion of land at Bicton (plan appended to representation) to provide scope for immediate delivery as it has no constraints in relation to highways, drainage, ecology etc. It appears that Council did not give sufficient consideration to the benefits of this site to deliver housing. This site is in proximity of existing development and infrastructure, the proposed North West Relief Road and Shrewsbury West Urban Extension (logical extension of this site). It lies in a sustainable location adjacent to Bicton, Bicton Heath and the eastern fringe of Shrewsbury. The site has the potential to help meet future housing requirements of both open-market and affordable units, and support the growth of the Shrewsbury urban area.</p>
A0123	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Policy Map - Shrewsbury Inset	No	No	Yes	<p>Note sites on Castle Foregate and Sentinel Works are identified as protected employment sites on the draft Policy Map - Shrewsbury Inset. Understand this designation is supportive in principle of expansion and improvement of existing operations, so no comments at this stage. However, note potential conflict with the Big Town Plan (also subject to consultation) which proposes office and residential uses in this location. Support employment uses as proposed rather than these alternative uses.</p> <p>Have significant concerns regarding impact of proposals for the North West Relief Road and applications within the Shrewsbury West Sustainable Urban Extension (SUE) (identified on the draft Policy Map - Shrewsbury Inset) on the viability of Oxon Hall caravan park.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0356	B003	<p>With regard to the proposed site guidelines for SHR060, SHR158 &amp; SHR161:</p> <ul style="list-style-type: none"> <li>-Express the proposed employment land provision as 5ha rather than a minimum of 5ha.</li> <li>-The local centre should be described as a Neighbourhood Centre. Its precise size, composition and location of the should be considered through masterplanning/planning application process.</li> <li>-Provide alternative wording which ensures mitigation necessary to accommodate unacceptable impacts of development on the highway network are provided/funded by the developer rather than the current open ended "all necessary improvements to the Local and Strategic Road Networks will be funded through the development".</li> <li>-Provide greater clarity on the process by which the Council intends approve a masterplan to avoid undue delays to development.</li> </ul>	<p>General support for this proposed allocation is welcomed. In supporting an appropriate mixed development, it continues to be considered appropriate to express the employment land guideline as a minimum. This will ensure the greatest opportunity to deliver an appropriate range of high quality and flexible employment uses, potentially as part of an enhancement to the town's Park and ride offer to the north of the site. It is considered the current proposed policy wording with regards to the Council agreement of the masterplan is sufficient. A minor modification is proposed to ensure greater clarity with regards to level of developer contribution to highway infrastructure.</p>	No	S16.1 (SHR060, SHR158 and SHR161)
A0029	B001	N/A	<p>The comments of Shrewsbury Town Council are noted, and it is recognised that they do not raise any objection to the legality and robustness of the Local Plan, rather there is a genuine desire for the Town Council to continue to be actively engaged in a number of ongoing Planning matters.</p>	No	S16.1 Shrewsbury
A0036	B006	<p>Include the Meole Brace Park and Ride site within the proposed development boundary.</p>	<p>Noted. The proposed development boundary for Shrewsbury is considered appropriate. It is not considered that the Meole Brace Park and Ride needs to be included within the development boundary to facilitate its continued operation.</p>	No	S16.1 Shrewsbury
A0108	B001	<p>Consider allocation of site promotion (plans appended to representation) at Bicton, Shrewsbury.</p>	<p>Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.</p>	No	S16.1 Shrewsbury
A0123	B003	<p>Undertake dialogue regarding concerns about the North West Relief Road and applications within the Shrewsbury West Sustainable Urban Extension (SUE).</p>	<p>Noted. Significant engagement has occurred in relation to the proposed North West Relief Road (NWRR). The scheme is now the subject of a Planning Application to which consultation responses can be submitted. Any Planning Application on the existing allocation Shrewsbury West SUE would also be subject to consultation.</p>	No	S16.1 Shrewsbury

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0123	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16	No	No	Yes	Note draft Policy S16 makes reference to the proposed alignment of the North West Relief Road (NWRR) and the Council's support in principle for this new highway. Have significant concerns about the impact of the NWRR on the future viability of Oxon Hall Caravan Park. Have particular concerns about para 7 of draft Policy S16, specifically proposed support for potential commercial uses along the NWRR corridor and would not support proposals which increase the extent of development in proximity of Oxon Hall Caravan Park over and above that previously approved and particularly any uses which would create noise and disturbance to Oxon Hall visitors. Note reference to applications on the Shrewsbury Sustainable Urban Extension (SUE) West reflecting the previously approved Masterplan. Request the Council implement the provisions in determination of the current planning application which cannot be deemed in compliance and should be refused. Note draft Policy S16 includes reference to supporting delivery of the Shrewsbury Big Town Plan (SBTP). However, the SBTP is at an early stage, has not been subject to consultation as such this could be premature. Alternatively it could imply current consultation on the SBTP is limited and decisions already made. Would not disagree or resist appropriate improvements to the town centre but concerned the SBTP proposes office and residential uses on sites on Castle Foregate, this site is not deliverable as the current occupier has no intention of leaving.
A0124	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SHR057 & SHR177	Yes	Yes	Yes	Support the modifications made at the Reg 18 stage. Site guidelines should additionally state that developers will be expected to demonstrate how the provision of any new on-site facilities will be managed and maintained.
A0124	B015	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SHR060,158 & 161	Yes	No	Yes	The development guidelines for two other major housing allocations in Shrewsbury (SHR057 & SHR177 and SHR173) were modified to include requirements for playing field provision at Reg 18 ( a modification which Sport England supports) so it is unclear why the Council have not included the same provision for playing fields within the development guidelines for this site.
A0124	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SHR173	Yes	Yes	Yes	Support the modifications made at the Reg 18 stage. Site guidelines should additionally state that developers will be expected to demonstrate how the provision of any new on-site facilities will be managed and maintained.
A0347	B014	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 Shrewsbury	No	No	Not Specified	1. Explanatory text; The Shrewsbury Big Town Plan (BTP) is referenced as a significant material consideration. We would not want the LPR to infer that any sites identified in the BTP have the same weight as those allocated in the documents such as an SPD, Neighbourhood Plan etc which have been through a statutory consultation process. We did discuss this issue with you as part of earlier evidence base conversations. It might be reasonable for the policy to have regard to a potential design steer from the BTP instead. Care should be taken to ensure viability and not to show inaccurate details or significant elements that haven't been decided upon. We will treat development opportunities within Shrewsbury as windfall development and as part of any future strategic planning consultation we formally receive. Such documents should be supported by appropriate evidence. 2. Paragraph 7. The line of the NWRR is included in the Plan and we read this as an indicative route only. We have flagged environmental issues and concerns as part of EIA scoping and have outlined the need to consider and be transparent on potential alternative routes/design for the road to avoid impacts on water resources and environmental issues. We have also previously expressed reservations about potential allocations/infill sites in the Shelton area, between the line of the road and the development boundary and we now strongly object to any such development sites, in line with our previous comments. We support the removal of that potential allocation. 3. Paragraph 10 c. Our preference is for avoidance of inappropriate development within the floodplain. 4. Paragraph 12 b. This should include water abstraction areas', as a key environmental consideration to avoid inappropriate development and impact upon.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0123	B015	Revise the wording of para 7 of draft Policy S16 to respond to concerns about development in proximity to Oxon Hall caravan park. Remove reference to supporting delivery of the Shrewsbury Big Town Plan.	Noted. The proposed strategy for Shrewsbury to 2038 is considered to provide a robust, justified and effective strategy for the town and it is appropriate for the strategy to reflect upon and acknowledge wider Council priorities, including the delivery of the NWRR and the Big Town Plan. No change suggested.	No	S16.1 Shrewsbury
A0124	B014	n/a	For the sake of clarity, it is proposed that a minor modification is made to the 6th paragraph of the guidelines for site SHR057 & SHR177.	Yes	S16.1 Shrewsbury
A0124	B015	Modify the proposed development guidelines to include the following text or similar: On site provision and off site developer contributions are to be made for additional playing field provision and associated ancillary facilities for changing and car parking in line with the Council's Playing Pitch and Outdoor Sports Strategy (PPOSS). Developers will be expected to demonstrate that any new on-site provision will be provided to an appropriate standard in accordance with Sport England guidance, and will be required to put in place appropriate arrangements for management and maintenance of the playing field thereafter.	For the sake of consistency and clarity, it is proposed that a minor modification is made to insert a new paragraph into the guidelines for site SHR060, 158 & 161.	Yes	S16.1 Shrewsbury
A0124	B016	n/a	For the sake of clarity, it is proposed that a minor modification is made to the 9th paragraph of the guidelines for site SHR057 & SHR177	Yes	S16.1 Shrewsbury
A0347	B014	n/a	1. The Shrewsbury Big Town Plan is a visionary urban design document which has established a compelling and challenging shared vision and development framework for the town. It is considered appropriate to identify the objectives of the Big Town Plan and its associated masterplan documents as material considerations in decision making as they underpin the proposed strategy for Shrewsbury. We would note that the draft Shropshire Local Plan, if adopted, would represent the starting point for decision making in accordance with Planning law, but that the specific proposals within or resulting from the Big Town Plan would be material in decision making. 2. Support for the removal of site SHR216 is noted. 3. The Plan should be read as a whole. Policy DP21 follows national policy and guidance on minimising flood risk. No change proposed. 4. The Plan should be read as a whole. Policy DP19 safeguards groundwater Source Protection Zones. No change proposed.	No	S16.1 Shrewsbury

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0354	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 (SHR216a)	Not Specified	No	Not Specified	<p>If the need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision) is divided among the towns in proportion to their proposed settlement housing targets, Shrewsbury with 28% of the county's housing provision would need to deliver 980 specialist C3 units and 700 specialist C2 units. However, Policy S16.1 and associated proposed site allocations make no specific provision.</p> <p>Welcome the new draft Shropshire Local Plan, but consider it currently fails all four tests of soundness in relation to older persons' accommodation in relation to draft Policies SP2, DP1, SP9 and S16.1, as:</p> <ul style="list-style-type: none"> <li>-Draft policies do not set a target for provision of specialist housing for the elderly or specifically seek to meet this identified need, despite the clear and acknowledged (para 4.20 of the draft Shropshire Local Plan) need and fail to meet the needs for specialist housing for the elderly in Shrewsbury, as such it is not 'positively prepared'.</li> <li>-The draft Shropshire Local Plan evidence base illustrates Shropshire's ageing population profile (particularly the Strategic Housing Market Assessment (SHMA) which is summarised in Para 4.40 of the draft Shropshire Local Plan as identifying a need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision), as do the 2018-based household projections (which forecasts higher growth of the elderly than the 2016-based household projections that underpin the SHMA (the majority in the 75-84 and 85+ age groups) - table provided summarising difference within representation). However the draft Shropshire Local Plan makes no specific provision to deliver housing to meet this need, apart from a proposed requirement to provide an appropriate mix of housing within draft Policy DP1. This is inadequate (particularly given the challenges identified in Para 4.20 of the draft Shropshire Local Plan) and will not deliver the quantity or quality of older persons' housing needed in Shropshire. As such it is 'not justified'.</li> <li>-The draft Shropshire Local Plan will fail to deliver sufficient specialist housing and as such is not 'effective' at meeting needs for older persons accommodation, neither across Shropshire or in Shrewsbury. Policy DP1 encourage older persons' housing on sites of 50 or more dwellings, but is unlikely to fully meet Shropshire's needs for this type of housing, due to the limited number of large developments. Schedule A7 of the draft Shropshire Local Plan identifies 76 allocations, of which 36 are for 50+ dwellings. However, 20 of these are for up to 100 dwellings and as such unlikely to make significant contributions amongst the normal housing mix, leaving only 16 sites to make any significant contribution to the need for at least 6,000 units. Furthermore, few of the promoters of proposed allocations have provided evidence they will make significant specialist housing provision on what are largely general housing sites. Quantity and quality of units needed will only be delivered if the proposed approach is supplemented by specialist housing allocations and includes support for 100% specialist housing sites.</li> <li>-Para 61 of the National Planning Policy Framework (NPPF) states the size, type and tenure of housing for different groups in the community (including older people) should be assessed and reflected in policy. National Planning Practice Guidance (NPPG) supports this and also encourages specific allocations for specialist housing and a positive approach to 100% specialist housing. However, the draft Shropshire Local Plan does not include a specific targets for specialist housing within its policies, does not allocate any sites specifically for this purpose and is silent on Planning Applications specifically for specialist housing. As such it is not consistent with national policy in failing to adequately plan for this category of housing.</li> </ul> <p>Site SHR216a should be allocated specifically for a specialist retirement village comprising a range of types of older persons' housing including bungalows, assisted living and extra care housing, located opposite the recent development of retirement flats at Shire Living on Holyhead Road (Location and draft Layout Plans alongside an explanation/justification for the proposed allocation provided as an Appendix to the representation), to meet the identified need in Shrewsbury. Retirement villages are a successful model providing opportunities for residents to move from more independent accommodation to more supported accommodation as their needs change and also provides services for resident and the wider community. It is well served by public transport, benefits from good access to the countryside, is well screened in the landscape, is entirely outside the source protection zone and drainage will have no impact on it, and benefits from an existing access. The site is in proximity of existing facilities/complementary services on Clayton Way (Severn Hospice and Marches Care Home), Isle Court Nursing Home in Bicton and Shrewsbury Hospital. It is also compatible/natural extension to the Shrewsbury West SUE allocation (including existing health/care element).</p>
A0356	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1	Not Specified	Yes	Not Specified	<p>Draft Policy S16.1 is supported as it recognises the strategic role of Shrewsbury in the County and directs a significant proportion of the County's housing and employment land growth during the proposed Plan period to it.</p> <p>Also support identification of land to the west of the town (SHR060, SHR158 &amp; SHR161) as a focus for growth during the plan period. This land is unconstrained and lies in a highly sustainable location. The land will make a significant and unique contribution towards meeting the growth needs of both the Town and the County.</p>
A0381	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1	Not Specified	Not Specified	Not Specified	The general thrust of this draft policy is supported.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0354	B004	<p>If the need for around an additional 3,500 specialist older persons accommodation units and around 2,500 additional units of residential care provision) is divided among the towns in proportion to their proposed settlement housing targets, Shrewsbury with 28% of the county's housing provision would need to deliver 980 specialist C3 units and 700 specialist C2 units. However, Policy S16.1 and associated proposed site allocations make no specific provision. To make the draft Shropshire Local Plan sound, site SHR216a should be allocated specifically for a specialist retirement village comprising a range of types of older persons' housing including bungalows, assisted living and extra care housing, located opposite the recent development of retirement flats at Shire Living on Holyhead Road (Location and draft Layout Plans alongside an explanation/justification for the proposed allocation provided as an Appendix to the representation), to meet the identified need.</p> <p>Allocation of SHR216a would also require associated changes to the proposed Policies Map (example provided as an Appendix to the representation) and Schedule S16.1(i) (example provided within the representation).</p>	<p>Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>It is considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate for both Shropshire and Shrewsbury. Specifically:</p> <ul style="list-style-type: none"> <li>-Draft Policy DP1 requires all residential development to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. It also specifically requires the provision of an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings.</li> <li>-Settlement policies (S1-S19) allow for appropriate windfall development within identified development boundaries (or in the case of Community Clusters on specified types of sites) where they comply with other policy requirements, which can of course include accommodation for older people.</li> <li>-Draft Policy SP10 allows for affordable exception, entry level exception and cross subsidy exception housing schemes which meet evidenced local housing needs and other policy requirements. This again can include appropriate tenures of older person accommodation.</li> </ul>	No	S16.1 Shrewsbury
A0356	B002	N/A	Noted.	No	S16.1 Shrewsbury
A0381	B005	<p>We consider that this policy should be amended to specifically acknowledge that residential development on under-utilised or vacant employment land that is no longer suitable for this use will be supported, particularly where it would contribute towards the regeneration objectives for the wider town centre, providing the necessary technical and environmental constraints can be satisfactorily managed.</p>	<p>Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p>	No	S16.1 Shrewsbury

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0385	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16	Not Specified	No	Not Specified	<p>Whilst supporting of the urban focused strategy, consider a higher proportion of growth (including that proposed for the Shrewsbury Place Plan Area) should be directed to Shrewsbury in order for the draft Shropshire Local Plan to be considered sound.</p> <p>Para 72 of the National Planning Policy Framework (NPPF) specifies supplying large numbers of new homes can often best be achieved through large scale development. However there are a number of key considerations including a realistic assessment of likely rates of delivery (which takes into account lead in times). In line with the NPPF the draft Shropshire Local Plan provides up to date trajectories for proposed allocations (these are high level rather than detailed), but none are provided for existing allocations key to delivering the proposed strategy. Detailed trajectories should be provided for existing and proposed allocations. Information on a sites' suitability, availability and achievability can be used to assess likely timescales as well as indicative lead-in times and build out rates, with advice of developers and local agents being important in this regard. The Council should be confident on the delivery trajectory and the need to factor in any further flexibility to ensure the housing requirements of Shrewsbury are met within the plan period. Note the proposed trajectory for proposed allocation SHR060, 158 and 181 extends throughout the proposed Plan period and beyond and parts of the site have not yet been marketed and no option agreement/developer is in place; proposed allocation SHR173 can only commence following construction of the North West Relief Road (NWRR); and proposed allocation</p> <p>There are a number of Community Hubs with a total residential guideline of 1,280 dwellings and many rely on small scale sites/windfall to achieve them (almost 50% of the guideline for Dorrington is attributed to windfall) which are more at risk of non-delivery (lapsing). A more sustainable and secure approach is focus this growth in Shrewsbury. This also aligns with para 10 of draft Policy S16.1 and would serve to deliver the ambitions of the Shrewsbury Big Town Plan.</p> <p>Land at Nobold is considered a sustainable location for development, adjacent to the existing built form of Shrewsbury with access to a range of services and facilities. It is considered suitable and available for development and is currently in agricultural use. Two concept masterplans (appendices to this representation) have been prepared for the site:</p> <p>Option 1 bounded by the A488 to north west, A5 to south and the railway line in part to the south, allows for a 138ha mixed use development (around 1,750 dwellings, a primary school, local centre and variety of open spaces north of the A5 and 18 ha employment and open space to the south).</p> <p>Option 2 bounded by the A488 to north and A5 to south, allows for a 93ha residential development (around 1,750 dwellings a primary school, local centre and variety of open spaces north of the A5).</p> <p>Both options could also provide a range of infrastructure on-site including a primary school, local centre, green infrastructure, highways infrastructure and pedestrian connectivity through and beyond the site. Land beyond the site could also be included as part of a comprehensive masterplan.</p> <p>Within the site assessment process the main reason the site (or various components of it) is not proposed for allocation is lack of a need to expand beyond the A5 (Option 1 employment - although would note presence of the railway line to the south of this area and that appropriate design/landscaping can create new boundaries) and sufficient capacity on other proposed allocations which offer greater potential benefits for the town and can support the objectives of the Big Town Plan and to achieve a comprehensively planned development. Therefore the site is not dismissed on significant suitability/availability/achievability grounds and it is considered the site can equally contribute to Council ambitions in terms of benefits to the town, achieving aspirations of the Shrewsbury Big Town Plan (particularly movement and green infrastructure) and comprehensive development (note the site assessment considers the individual parcels of Land at Nobold rather than the site comprehensively and consider comprehensive consideration should occur).</p> <p>The proximity of existing and proposed allocations demonstrates the sustainability of this location to the south-west of Shrewsbury. Land at Nobold would complement these existing and proposed allocations and is the next logical location for development. Furthermore flood risk to the east, centre and north west of town constrains these directions for growth.</p>
A0393	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	<p>S16.1 7, 10a The largest council promoted scheme detailed in the plan is the proposed North West Relief Road (DP28 3e and 4.257 and S16.1 7, 10a). based on information available at this time our calculations indicate that the scheme will lead to higher levels of car use and an increase in carbon emissions in the county during the plan period. It is therefore not appropriate for the Local Plan to include the promotion of this scheme.</p> <p>S16.1 (7) Reiterate comments about the weak case for the NWRR expressed with reference to DP28. NWRR s should be omitted from the Local Plan unless a revised business case and carbon assessment shows that it still makes economic and environmental sense.</p> <p>The Shrewsbury Place Plan appears to allow commercial development but not residential in the area west of Ellesmere Rd but this is not clear in the document.</p> <p>Part 10a Re the reinforcement and enhancement of the local and strategic highway network: Investment in new roads is not consistent with the Climate Emergency or Net Zero CO2 target. Shrewsbury Integrated Transport Strategy, the Big Town Plan Movement Strategy and the Shropshire Local Transport Plan: None of these documents are available for the consultation and it is not clear how they support or are supported by the NWRR</p> <p>Para 5.225 Allocation of SHR173 assumes NWRR will be built but its traffic won't be included in NWR assessment and should be as the understanding cumulative impacts of developments is essential</p>
A0413	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1	Yes	No	Yes	<p>Support identification of Shrewsbury as a Strategic Centre and the primary focus for development in draft Policy S16.1.</p> <p>Consider Shrewsbury should be an increased focus for growth and therefore accommodate more development, given the towns role and function (highest order settlement as supported by the Sustainability Appraisal and Hierarchy of Settlements Assessment undertaken to inform the draft Shropshire Local Plan); development opportunities available; jobs, services and facilities available to the town and its hinterland; and availability of existing and proposed infrastructure (including the north west relief road).</p> <p>In principle support for delivery of the NWRR. But object to proposed restrictions to residential development in bullet 7 of draft Policy S16.1 and draft Policy SP10 regarding land between the proposed NWRR and the existing development boundary, this is neither effective or justified and is therefore unsound as:</p> <ul style="list-style-type: none"> <li>-Implementation of the NWRR represents a fundamental change to landscape character/visual relationship of the countryside to the town in this location.</li> <li>-Little logic in not supporting residential and commercial development, given commercial is supported.</li> <li>-No rationale/justification for not supporting residential development as sites in this location (including SHR163, SHR174, SHR109 and SHR023) perform as well as proposed allocation SHR173.</li> </ul> <p>Collective promotion of predominantly greenfield sites to the west of Ellesmere Road, mainly (but not entirely) covered by sites SHR163, SHR174, SHR109 and SHR023 (site plan appended to representation). The proposed North West Relief Road (NWRR) pass through this collective promotion. The site is not encumbered by physical or environmental constraints, character and accessibility of this location will change as a result of the NWRR, it is capable of supporting sustainable development contributing to meeting the needs of Shrewsbury/Shropshire and can contribute towards critical infrastructure provision identified in the settlement strategy. The site is considered suitable, available and achievable. Consider this collective promotion should be proposed for allocation.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0385	B009	<p>-A higher proportion of the overall levels of growth, particularly housing, should be directed towards the urban locations/areas including Shrewsbury as the Strategic Centre for Shropshire/            -Within the Shrewsbury Place Plan Area a higher proportion of housing growth should be directed to the Strategic Centre of Shrewsbury versus the Community Hubs and Clusters.            -Land at Nobold should be considered for allocation as a sustainable urban extension to Shrewsbury town, providing for additional sustainable growth in line with an urban focused strategy that directs further development towards the strategic centre.            -Alternatively, Land at Nobold should be considered as a reserve site for the Plan or a direction for growth in Shrewsbury in the longer term.            -Further information should be provided on the housing trajectories for the identified housing land supply, consisting of the proposed allocations and SAMDev Plan saved allocations.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach (including in relation to achieving a step change in productivity) are appropriate, effective, sustainable and deliverable.            Shropshire Council also considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.            The draft Shropshire Local Plan and Housing Land Supply Statement present information on trajectories for the development of proposed allocations and existing SAMDev allocations as appropriate.</p>	No	S16.1 Shrewsbury
A0393	B005	<p>See issues summary . Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed .Modify policy to reflect comments;            The following specific modifications identified:            Do not include promotion of NWRR ;            NWRR s should be omitted from the Local Plan unless a revised business case and carbon assessment shows that it still makes economic and environmental sense.            Clarify development proposals west of Ellesmere Rd;            Address inconsistency that investment in new roads to achieve reinforcement and enhancement of the local and strategic highway network incompatible with carbon reduction:</p>	<p>The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.</p>	No	S16.1 Shrewsbury
A0413	B001	<p>The proposed residential development guideline for Shrewsbury should increase.            Bullet 7 of draft Policy S16.1 should be modified to allow residential development in the areas between the development boundary and the proposed NWRR.            Sites SHR163, SHR174, SHR109 and SHR023 should be allocated for development.            Make associated changes to the proposed development boundary.</p>	<p>Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of the component sites of this site promotion.</p>	No	S16.1 Shrewsbury

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0413	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Schedule S16.1 (i)	No	No	Yes	Support principle of development to the west of Shrewsbury but object to omission of the site mainly (but not entirely) covered by sites SHR163, SHR174, SHR109 and SHR023 (site plan appended to representation). The site is available, suitable and achievable for sustainable residential-led development. Characteristics and accessibility of this area will fundamentally change as a result of the North West Relief Road (NWRR). This will create a hard urban edge which should be used positively to form a new sustainable residential development area. There is no clear evidence why this area is not proposed for allocations when SHR173 is, it is equally if not more appropriate and provides the added benefit of positively addressing the NWRR. Consider the Sustainability Appraisal (SA) analysis for this and other sites are inconsistent and not comprehensive, applying different weight and emphasis to the implications and potential mitigation/management of issues such as developability, highway/traffic, ecology, air quality and noise. There has also been a failure to consider the relative importance/significance/magnitude of different SA indicators/measures and generalised assumptions about capacity/effects of development.
A0413	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Schedule S16.1 (i) (SHR173)	No	No	Yes	Do not object to principle of development of land to the west of Ellesmere Road for housing and supportive of this broad location as a sustainable part of Shrewsbury, particularly in the context of the North West Relief Road. Overall SHR173 is a sustainable site and do not object to the principle of its allocation. However, proposed allocation SHR173 is not justified and the draft Shropshire Local Plan is unsound as it is unclear how the decision to propose this site for allocation has been reached, given other available, suitable and achievable sites in this location (including collective promotion of SHR163, SHR174, SHR109 and SHR02 - site plan appended to this representation) which are equally if not more appropriate and provide the added benefit of positively addressing the NWRR. Consider the Sustainability Appraisal (SA) analysis for this and other sites are inconsistent and not comprehensive, applying different weight and emphasis to the implications and potential mitigation/management of issues such as developability, highway/traffic, ecology, air quality and noise. There has also been a failure to consider the relative importance/significance/magnitude of different SA indicators/measures and generalised assumptions about capacity/effects of development.
A0476	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 Shrewsbury	Yes	No	Yes	Taking into account commitments and allocations this leaves a shortfall of 505 dwellings against what is needed and which the Council have identified are expected to come forward as windfalls. We have previously commented on this matter, expressing our concern about relying on windfalls to come forward when there are available suitable sites in the SLAA and Site Assessment paper that have not been allocated. The land at Whitehall, Monkmoor Road is one such site that is included in the SLAA and which is considered suitable for development and would make a contribution to meeting the housing needs of the town and wider District. By relying on windfalls to deliver the housing needs of the District, this can result in uncertainty and a lack of clarity about how and where they are to be delivered. In turn this has a knock-on effect to planning for the location of jobs, services and the infrastructure that are required to support the growing population and which are key objectives to be delivered through the Plan.
A0476	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1	Yes	No	Yes	In light of our comments to Policy S16 we object to the omission of the land at Monkmoor Road, Shrewsbury as a housing allocation in the Plan. The site is previously developed land within the urban area and is therefore considered an ideal site to be allocated for residential development. The site is given a 'Good' rating in the Sustainability Appraisal and is identified a suitable housing site in the Site Assessment paper. It is still the case that the site is expected to become vacant in the near future, with the existing occupier choosing to vacate the site. In redeveloping the site, a number of potential benefits of a residential scheme on this site have also identified, including better amenity for the surrounding residential occupiers; the opportunity to enhance the setting of adjoining Listed Buildings; and securing the occupation of redundant and vacant Listed Buildings within the site. As, such we can see no reason not to allocate the site with a view to delivery in years 6-10. In light of the site's omission from the Plan we consider it is unsound on the basis that the Plan will not be effective in meeting its housing needs over the Plan Period and that by allocated additional housing sites greater certainty will be provided that the housing requirement will be met

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0413	B002	Sites SHR163, SHR174, SHR109 and SHR023 should be allocated for development rather than/in addition to SHR173. Make associated changes to the proposed development boundary.	Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of the component sites of this site promotion.	No	S16.1 Shrewsbury
A0413	B003	Sites SHR163, SHR174, SHR109 and SHR023 should be allocated for development rather than/in addition to SHR173. Make associated changes to the proposed development boundary.	Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of the component sites of this site promotion.	No	S16.1 Shrewsbury
A0476	B002	It is our view that suitable and sustainable sites that meet the both the objectives of the Framework and now published Big Town Plan should be allocated, including land at Whitehall, Monkmoor Road which is owned by TT and is identified as a suitable site in the Site Assessment paper. In doing so, it would reduce the windfall allowance and increase certainty over delivery of sufficient houses to meet the need identified in the town and towards meeting needs across the County. This site will allow for 88 dwellings and lessen the dependency on unplanned windfall development.	Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of the component sites of this site promotion.	No	S16.1 Shrewsbury
A0476	B003	Include the site at Monkmoor Road as a housing allocation	Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of the component sites of this site promotion.	No	S16.1 Shrewsbury

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0522	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1	No	No	Not Specified	<p>Proposed site guidelines for site SHR173 include recognition that it is directly dependent on construction of the North West Relief Road (NWRR) and planning permission will not be entertained until a Masterplan is approved for the site. Given this, consideration must be given as to whether the site is deliverable within the proposed Plan period, as necessary processes (such as planning permission for the NWRR, preparing business cases for its approval, associated compulsory purchases, contracting and constructing the road and subsequent design and approval of SHR173). A series of scenarios for timescales for development of the site have been prepared (scenarios and an explanation of them is appended to the representation and informed by a guide on how quickly large scale housing sites deliver - also appended to the representation).</p> <p>-Scenario 1 is based on Council timescales for the NWRR and sees completion of the site by 2035/36, but taking into account above factors and associated timescales, is wholly unrealistic - supported by legal opinion.</p> <p>-Scenario 2 is considered a highly optimistic best-case timescale for the delivery of the NWRR and site SHR173 thereafter. It involves completion in 2039 but highlights little flexibility in Council assumptions (also raises concerns about the financial package as timescales involve development before associated payments from the Shrewsbury West Sustainable Urban Extension (SUE) relied upon for the NWRR - payments for the first phase expected in 2023/24 and 2025/26 based on Council assumptions in the Five Year Housing Land Supply Statement, outside the construction programme of the NWRR. Furthermore subsequent phases (apart from a mixed use development for formation of roadside services) have not been subject to Planning Applications but presumably contribute to the NWRR. This site has been subject to significant delay as evidenced in delivery assumptions made at the time the current Local Plan was adopted).</p> <p>-Scenario 3 represents a set of realistic timescales (again supported by the legal opinion) which would see the construction of the NWRR completing end of Q1 2030 and commencement of SHR173 in 2035, towards the end of the proposed plan Period and completion in 2042, beyond the proposed Plan period (funding issues associated with the Shrewsbury West SUE under scenario 2 still apply).</p> <p>Also highlight that delivery of the NWRR requires significant funding of around £85m in total of which £17m (plus any cost increases) is to be funded by Shropshire Council - no evidence of where this is coming from. Further LEP funding of £4.2m must be spent by 2024, raising concerns about whether this will be lost. Shrewsbury West SUE is expected to make £8m financial contributions to the NWRR but has been subject to significant delays, affecting payment of financial contributions and leaving a further gap. Finally construction costs have increased and public finance is less certain due to the pandemic, meaning funding from the NWRR is highly uncertain based on available information.</p> <p>This raises soundness issues regarding the draft Shropshire Local Plan - to be effective it must be deliverable over the proposed Plan period (key focus of examinations), based on realistic assumptions about what can be achieved and when. This includes paying careful attention to providing an adequate supply of land, identifying what infrastructure is required, how it can be funded and brought forward (whilst considering viability) informed by discussions with site promoters. Whilst accept extensions to existing settlements may not have 'certainty' and/or funding secured for necessary strategic infrastructure, still need to demonstrate there is a reasonable prospect proposals can be developed within timescales envisaged. These issues are often the cause of failures of Plans, particularly where planned infrastructure is dependent on willing landowners (example provided).</p> <p>SHR173 cannot be considered deliverable and is unsound on the basis that it is not justified by clear evidence nor will it be effective due to serious concerns over deliverability of the associated NWRR (timescales and funding).</p> <p>Land at the Berwick Estate should be allocated to deliver up to 450 dwellings as a first phase of development (as part of a comprehensive, long term Whole Estate Plan to deliver a range of public and environmental benefits whilst ensuring the Estate, including its numerous listed buildings and registered park and garden, remain viable in years to come) in the proposed Plan period. This will safeguard delivery of the NWRR (contribution in lieu, assisting funding and delivery timescales) of the road and the subsequent delivery of any allocations that rely on the NWRR. Representation supported by a transport note. This could also assist in delivering environmental initiative and ecological off-setting/carbon off-setting associated with the NWRR. A transport note (appended to this representation) demonstrates 450 dwellings can be delivered on this site in advance of the NWRR. Site guidelines could include appropriate improvements to the highway network, effective and justified sustainable transport initiatives and garden village principles. Legal opinion provided in support of this representation.</p>
A0566	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 Shrewsbury Inset Map	Yes	No	Yes	<p>We have considered and assessed the draft inset map for Shrewsbury town in some detail, and given we are now at the stage of the final details, we feel that the land to the East of Hollycroft and draft allocation SHR060 and to the West of the built housing site of SHREW019 should be included within the development boundary to allow for some form of windfall development, connectivity, cycle routes, green corridor to be provided through the plan period. It is clear from the draft development Strategy for Shrewsbury Town, that SHR060 is recognised as a sustainable and deliverable growth area during the new plan period, given its highly sustainable location immediately adjacent to the western development boundary of the town and unconstrained nature it forms a natural area for expansion. With this in mind and also the existing built out development to the East, this area would provide a great opportunity as a connectivity route between built development at SHREW019 and the proposed allocation of SHR060.</p>
A0599	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1	Not Specified	Not Specified	Not Specified	<p>The general extent of the Shrewsbury West Sustainable Urban Extension (SUE) (plan provided within representation) was identified within the adopted Core Strategy, a masterplan/phasing plan was then prepared for the site (phasing plan provided within the representation) to inform its specific allocation as a mixed-use SUE (parcel R2 is for residential development) within the adopted SAMDev Plan.</p> <p>Confirm parcel R2 of the Shrewsbury West SUE is suitable (forms part of a long-standing strategic allocation that is critical to delivering the housing requirement for Shrewsbury and there are no policy or technical constraints that are likely to impact on the delivery of the site in the short-term - no circumstances have changed which would warrant its reconsideration); available (there are no legal or ownership impediments that prevent the site from coming forward for development - owned by a land promoter who intends to sell the site to a house builder in due course and at the earliest opportunity); achievable (there is clear market demand for residential development in this location - outline and subsequent reserved matters applications were granted on the adjacent element of the SUE and parcel R2 is a logical next phase) as defined within the National Planning Policy Framework (NPPF). As such it is considered that the site is deliverable (as defined in the NPPF) and support continued/saving of the allocation of the SUE. Reviewed the policies and proposals related to the Shrewsbury West SUE and broadly supportive of the overall approach.</p> <p>Based on progress being made on bringing forward the Shrewsbury West SUE, broadly supportive of the assessment that all dwellings on the site will be delivered by 2038 and expected trajectory for the site (including 167 dwellings completed by 2024/25 documented within the housing land supply statement (2020)).</p>

A0601	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16	Not Specified	No	No	<p>Support the overarching principle of draft Policy S16, which recognises Shrewsbury as the Strategic Centre for Shropshire and the primary focus of new development in the County.</p> <p>Also support proposed housing guideline for Shrewsbury of at least 8,625 dwellings (28% of the total housing requirement for Shropshire).</p> <p>However, have fundamental soundness concerns over the proposed employment land guideline of around 100ha (32% of the total employment land guideline for Shropshire).</p> <p>As documented within representation A0601 B002 on draft Policy SP2, consider that to meet to meet economic growth projections and regeneration objectives/commitments in the Marshes LEP Strategic Economic Plan, a only 7.6ha of employment land per annum is necessary and justified and that a housing figure greater than 1,400 dwellings per annum is necessary. Consequentially, Shrewsbury's apportionment of:</p> <ul style="list-style-type: none"> <li>-The overarching housing requirement is too low and additional housing land needs to be identified as part of the Local Plan process.</li> <li>-The overarching employment land requirement is too high and should be reduced.</li> </ul> <p>To assist in meeting the additional housing land required at Shrewsbury, undeveloped allocated/approved employment land, such as that associated with the South Shrewsbury Strategic Urban Extension (SUE) (which has been actively marketed with little interest as it does not have direct access to the strategic road network and take-up is stronger around established employment sites), should be released for residential-led mixed development to meet the additional housing land required.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0601	B005	<p>Decrease the proposed employment land requirement to 7.6 ha per annum (8.9 ha per annum once contributions to unmet needs arising from the Black County is considered). Undertake further housing modelling to determine the housing requirement necessary to align with the proposed employment land requirement. Amend the proposed housing requirement as appropriate and allocate additional land for housing development.</p> <p>Increase the proposed housing guideline and reduced the proposed employment land guideline for Shrewsbury.</p> <p>Identify additional housing land. Given the very significant over supply of employment land in Shropshire, reallocate undeveloped/approved employment land, such as that associated with the South Shrewsbury SUE, to help meet market and affordable housing needs.</p>	<p>The proposed employment land requirement seeks to support the achievement of the aspirations of the Economic Growth Strategy for Shropshire through the provision of sufficient appropriately located land to deliver high-quality new employment development which contributes to making Shropshire more productive, prosperous and sustainable and also responds to key quantitative and qualitative evidence including that within the Economic Development Needs Assessments (EDNA), Employment Land Review (ELR) and Authority Monitoring Report (AMR) undertaken to inform the draft Shropshire Local Plan.</p> <p>With regard to this evidence, we would note that calculations of the employment land requirement are based on the national assumption that employment land when developed, delivers 40% net floorspace from the gross land area, and that new employment is generated on that basis. However, available evidence suggests that employment land when developed, delivers on average 25% net floorspace in Shropshire. This has been given careful consideration when determining an appropriate employment land requirement. Furthermore, we would also note that the proposed employment land requirement actually represents a reduction to that within the adopted Local Plan (whilst the housing requirement has actually increased).</p> <p>The proposed employment land requirement incorporates up to 30ha of employment land to support the employment needs of the emerging Black Country Plan, where evidence indicates employment delivery opportunities are constrained. This reflects a positive approach to cross boundary cooperation and responds to the functional relationship between the two areas.</p> <p>In order to achieve the proposed employment land requirement, respond to the wider range of employment uses now being accepted in the draft Shropshire Local Plan and respond to the varying needs of employers and local communities (including reflecting the diverse needs of the resident labour force), it is considered important to provide choice and competition in the market. There is also a need to provide sufficient land to off-set the re-use of existing employment land for other purposes. As such, a satisfactory supply of land will inevitably exceed the proposed employment land requirement.</p> <p>It is considered that the draft Shropshire Local Plan has achieved this objective by proposing an employment land requirement of 300ha against a proposed employment land supply that exceeds 400ha (as documented within Appendix 6 of the Draft Shropshire Local Plan and the Authority Monitoring Report 2020). This supply includes a range of types of site (size, location and quality) to satisfy demands for employment land throughout the proposed Plan period to 2038.</p> <p>It is considered that an appropriate balance is achieved between the proposed housing and employment land requirements. It is important to note that the proposed employment land requirement needs to respond to numerous factors in addition to the proposed housing requirement, including: achieving key economic objectives of the strategic approach in Policy SP2, such as providing for the delivery of a growing and diverse labour force (including those which commute out of the County), and in turn supporting the delivery of an improving rate of economic growth and an increase in the productivity of the local economy; wider aspirations within the Economic Growth Strategy for Shropshire; the nature of employment development in Shropshire (including the proportion of an employment site that results in net employment floorspace); the need to off-set the re-use of existing employment land for other purposes; and the wider range of employment uses now being accepted in the draft Shropshire Local Plan.</p>	No	S16.1 Shrewsbury

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0608	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1	Not Specified	Not Specified	Not Specified	<p>Welcome and strongly support proposed allocation SHR173. This site has been continuously promoted at all stages of the plan making process and thorough engagement within the Council has been undertaken. Location Plan, Illustrative Framework Plan and Vision Statement (underpinned by technical analysis and assessment including in relation to minerals, highways, landscape, heritage and ecology) for the site appended to the representation. This confirms SHR173 is suitable, available and achievable for delivering a sustainable residential development. It is expected to deliver housing in accordance with identified policy requirements.</p> <p>Whilst the specified capacity of SHR173 is 450 dwellings, the Illustrative Framework Plan demonstrates it has capacity to accommodate up to 500 dwellings, whilst also providing requisite infrastructure such as play areas, strategic green space and wildlife ponds. The requirement of a local centre on at least 0.25ha of the site is not yet reflected in the Vision Document, however SHR173 could still accommodate up to 500 dwellings without altering wider development parameters. There is no reason to artificially restrict the capacity of SHR173 (especially following delivery of the North West Relief Road (NWRR)). As such, consider capacity should be increased to 500 dwellings, this extra provision would contribute to delivery of the recognised housing needed over the proposed Plan period and would be in accordance with para 122 of the National Planning Policy Framework regarding efficient use of land/site densities.</p> <p>Broad principles of the draft site guidelines for SHR173 are supported, including provision of a local centre, although would welcome flexibility within the draft Policy wording to enable this to more easily provided as a single retail outlet in place of a 'local centre', to maximise attractiveness and suitability to potential retail operators.</p> <p>However, substantive concern with the draft site guidelines is that restricting commencement until the NWRR is operational (also in para 5.225 of the explanation to draft Policy S16.1). This is unnecessary, not wholly justified and there are a number of policies within the draft Shropshire Local Plan that the Site's development will support, along with the appropriate level of housing delivery. Government funding has been granted to the NWRR and a Planning Application recently submitted for the scheme (including a construction timetable indicating it will be fully operational in Spring 2024). A Highway Technical Note for SHR173 (appended to the representation) demonstrates up to 100 dwellings can immediately come forward prior to the NWRR being operational, without having a significant adverse impact on the current highway network. The Note suggests the figure could be higher, but additional delivery would need to be supported by post Covid surveys and detailed capacity assessments. As a minimum, therefore, consider the draft site guidelines for SHR173 should be amended to allow for up to 100 dwellings to be delivered without restrictions related to the NWRR being operational.</p> <p>However given the overall commentary on the NWRR timetable and site delivery expectations, evidence for the need for any Plan based restriction on delivery is unclear. Specifically, a reasonable scenario for delivery would be: a Planning Application in Autumns 2021; subject to their being no material objections to the proposed allocation, Outline Permission granted in Spring 2022; Reserved Matters granted by the end of 2022; construction commencing in Spring/Summer 2023 (taking 2 years to deliver beyond the minimum 100 dwelling threshold identified in the Highway Technical Note). The NWRR would be fully operational by Spring 2024, therefore in practice the restriction proposed by the allocation will serve no useful purpose. Important that any trigger relating to the NWRR being operational is linked to occupation of dwellings rather than commencement of development. Site guidelines require preparation and adoption of a masterplan for SHR173 prior to determination of any planning application for it. This is not necessary for the effective delivery of a sustainable residential development. Instead, the site guideline should be amended to specify a comprehensive masterplan should be submitted as part of a planning application that has been demonstrably informed by public consultation and engagement. This will alleviate delays, would not materially change/influence the decision making process and would be entirely consistent with Government's drive for delivery and boosting the supply of housing.</p> <p>Site guidelines for SHR173 require either on or off-site contributions to the delivery of additional playing pitch provision in line with the Council's Playing Pitch and Outdoor Strategy. However, the published evidence base contains only a Shropshire Council Action Plan and Shropshire Council Playing Pitch &amp; Outdoor Sports Strategy Executive Summary. It should be clear which document is referenced or this guideline deleted. If retained the guideline should be amended to indicate such provision is where necessary and identified as part of the Council's Playing Pitch and Outdoor Strategy.</p> <p>Consider the forecast for delivery of SHR173 are too protracted. Delivery is expected to occur in the Short-Term (200 dwellings) and Medium-Term (300 dwellings). This needs to be recognised so as not to artificially constrain the appropriate delivery of housing.</p>
A0628	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16	No	No	Yes	<p>The draft Shropshire Local Plan recognises Shrewsbury as the Strategic Centre of Shropshire and the primary focus for new development in the County. Support this approach and the aspiration for 8,625 dwellings to be delivered in and around the town across the plan period.</p> <p>Shrewsbury West Sustainable Urban Extension (SUE) has a hybrid outline permission for development of 296 residential units and other uses. There is currently a new full application pending consideration for 340 residential units and associated on the site (to make the best possible use of the land and increase the number of houses, helping to contribute to tackling housing need in Shropshire).</p> <p>The new full application represents 340 of the 750 homes expected to be delivered as part of the Shrewsbury West SUE (around 46%), including providing 51 affordable units, and setting a high standard for development of future parcels of land within the SUE allocation.</p> <p>As well as the material benefits of new homes and a new community, the new permission will be supported by numerous contributions made through a S.106 agreement - based upon the Heads of Terms of the extant hybrid outline permission (summarised in the representation). Intention is to deliver homes in a timely manner, in line with Shropshire's housing trajectory.</p> <p>Shrewsbury West SUE is included as a saved policy in the draft Shropshire Local Plan. However, it has not been designated its own policy with the draft Shropshire Local Plan. Consider that as part of draft Policy S16, the Shrewsbury West SUE should be discussed and benefits highlighted. This will ensure a coordinated approach for the Shrewsbury area, as suggested in para 5.222 of the explanation to draft Policy S16.1. The full application also demonstrates it may be possible for Shrewsbury West SUE to accommodate more houses than previously allocated, this should be explored.</p> <p>Consider illustration of the Shrewsbury West SUE on the draft Policies map could be improved - more clear and precise. Reference should also be made to the adopted Shrewsbury West Masterplan. Rather than multiple sub-divided maps the Draft Shropshire Local Plan could provide a single map showing the whole of the Shrewsbury area and the spatial strategy for future development, helpful for the purposes of understanding and coordination.</p> <p>Support the proposed approach to the Shrewsbury North West Relief Road (NWRR), but recommend detailed reference to the Shrewsbury West SUE is made in this context, as they are directly linked. The NWRR should also be framed as part of a wider spatial approach for the Shrewsbury area, highlighting its importance.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0608	B001	<p>The capacity of proposed allocation SHR173 should be increased from 450 dwellings to 500 dwellings.</p> <p>Amend the site guideline restricting commencement of SHR173 until the North West Relief Road (NWRR) is operational to either: 1. Remove this restriction in its entirety; or 2. Allow for up to 100 dwellings to be occupied prior to delivery of the NWRR, with additional delivery beyond this subject to the outcome of detailed capacity assessments of the local road network. Occupation of remaining dwellings should follow the operational opening of the North West Relief Road."</p> <p>Amend the site guideline regarding the need for a Masterplan to be prepared and adopted for SHR173 prior to any decision on a Planning Application for the site to specify a comprehensive masterplan should be submitted as part of a planning application that has been demonstrably informed by public consultation and engagement.</p> <p>Site guidelines for SHR173 require either on or off-site contributions to the delivery of additional playing pitch provision in line with the Council's Playing Pitch and Outdoor Strategy. Unclear which document is referenced, this should be clarified or the guideline deleted. If the guideline is retained it should be amended as follows "Where identified as part of the Council's Playing Pitch and Outdoor Strategy, and where necessary, either on or off site contributions are made towards the delivery of additional playing pitch provision."</p> <p>Delivery timescales for SHR173 within Appendix 7 need to be amended to indicate delivery in the Short-Term (200 dwellings) and Medium-Term (300 dwellings).</p>	<p>Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury, including the proposed development guidelines for Site SHR173 are appropriate and will contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.</p> <p>Furthermore, the developer guidelines have been through several stages of public consultation and have been confirmed by the promoter to be viable for delivery.</p>	No	S16.1 Shrewsbury
A0628	B001	<p>As part of draft Policy S16, the Shrewsbury West SUE should be discussed and benefits highlighted. The potential for the site to accommodate more development should also be explored.</p> <p>Improve graphics on the proposed Policies Map and provide a comprehensive map showing the whole of the Shrewsbury area and the spatial strategy for future development.</p> <p>The North West Relief Road (NWRR) should be framed as part of a wider spatial approach for the Shrewsbury area, highlighting its importance.</p>	<p>Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.</p> <p>Shrewsbury West Sustainable Urban Extension (SUE) is a proposed saved allocation. Development of proposed saved allocations should be in accordance with specified development guidelines and approximate site provision figures within associated saved policies and all other relevant policies of the draft Shropshire Local Plan.</p> <p>Shropshire Council also considers that the draft Policies Map effectively illustrates the spatial aspect of draft policies. We would note that alongside the PDF versions of the maps (extents informed by file sizes and maximum print sizes) an interactive version of the policies map, which covers the entirety of Shropshire is available.</p> <p>References to the North West Relief Road (NWRR) are considered appropriate. The overall spatial strategy for Shropshire is not predicated on the delivery of the NWRR, although it is appropriate to identify the proposed route of the NWRR on the Policies Map.</p>	No	S16.1 Shrewsbury

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0629	B007-5	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	<p>S16.1 7, 10a The largest council promoted scheme detailed in the plan is the proposed North West Relief Road (DP28 3e and 4.257 and S16.1 7, 10a). based on information available at this time our calculations indicate that the scheme will lead to higher levels of car use and an increase in carbon emissions in the county during the plan period. It is therefore not appropriate for the Local Plan to include the promotion of this scheme.</p> <p>S16.1 (7) Reiterate comments about the weak case for the NWRR expressed with reference to DP28. NWRR s should be omitted from the Local Plan unless a revised business case and carbon assessment shows that it still makes economic and environmental sense.</p> <p>The Shrewsbury Place Plan appears to allow commercial development but not residential in the area west of Ellesmere Rd but this is not clear in the document.</p> <p>Part 10a Re the reinforcement and enhancement of the local and strategic highway network: Investment in new roads is not consistent with the Climate Emergency or Net Zero CO2 target. Shrewsbury Integrated Transport Strategy, the Big Town Plan Movement Strategy and the Shropshire Local Transport Plan: None of these documents are available for the consultation and it is not clear how they support or are supported by the NWRR</p> <p>Para 5.225 Allocation of SHR173 assumes NWRR will be built but its traffic won't be included in NWR assessment and should be as the understanding cumulative impacts of developments is essential</p>
A0629	B028	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16	Yes	No	Yes	<p>Para 8 of draft Policy S16.1 defines the specific aspirations for Shrewsbury Town Centre and references the Big Town Plan but no reference is made in the Big Town Plan to the need for carbon free development, so it must be added here to ensure the completeness of the draft Shropshire Local Plan document in reference to Shrewsbury Town Centre.</p>
A0646	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16	Yes	Yes	Yes	<p>The Estate considers the Councils approach to development in Shrewsbury as set out within S16 is sound when considered against the tests set out in para 35 of the NPPF.</p>
A0655	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16	Not Specified	Not Specified	Not Specified	<p>S16 makes only passing reference to the Town's highly unusual architectural and heritage richness. This Place Plan has categories concerning housing development, retail improvement, industry and employment, etc., but none for heritage enhancement or protection – the very aspects that make the town an enduring visitor destination. This is in spite of the fact that Shropshire Council owns several of the town's heritage asset buildings that are in poor repair. In a previous version of the Local Plan, housing allocations for the town of Shrewsbury took account of the Big Town Plan's aspirations of "Balanced Growth" and how there were opportunities for many homes within the very centre. There had been an allocation of some 1400 new homes that would effectively be "windfall" homes reducing the overall need for the Shrewsbury Place Plan. The latest version of the Big Town Plan estimates a possible 1904 units just for the master-planned Centre. It takes no account of the areas between the centre and the fringe estates but some of these would reuse existing buildings with retro-fitting and so contribute to the Council's Climate Emergency aims. A similar over-allocation may be made for employment provision, especially when there is likely to be some a reduction (20%) in demand for office space, since the pandemic, etc. Many of the fringe sites allocated for housing, were already in previous version of the Plan. However, experience suggests that communities are very concerned about the quality and facilities they provide. Many recent site applications provide insufficient quality in terms of access, community provision (shops or etc), energy efficiency and distinctiveness of building design. We have seen how such features can be required only if they are entered into the site allocation plan. New trends of home-working and green travel suggest that larger estates will need considerable upgrading of local facilities. This needs addressing in the Plan now. Without such basic facilities generations are being relegated to inappropriate places to live.</p>
A0676	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1	Yes	No	Yes	<p>Supportive of draft Policy S16.1. However consider for clarity, the draft Policy should be reworded to recognise and support expansion of the Local Centre at Bicton Heath as part of the Shrewsbury West Sustainable Urban Extension (SUE) and the new Local Centre within the Shrewsbury South SUE, to help meet current and future residents shopping needs.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0629	B007-5	See issues summary . Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed .Modify policy to reflect comments; The following specific modifications identified: Do not include promotion of NWRR ; NWWR s should be omitted from the Local Plan unless a revised business case and carbon assessment shows that it still makes economic and environmental sense. Clarify development proposals west of Ellesmere Rd; Address inconsistency that investment in new roads to achieve reinforcement and enhancement of the local and strategic highway network incompatible with carbon reduction:	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	S16.1 Shrewsbury
A0629	B028	Within para 8 of draft Policy S16.1 include "Further, to take advantage of the implementation of the Big Town Plan as a key intervention opportunity to begin the development of a zero carbon Town Centre through low carbon refurbishment and the introduction of a low carbon heat network", between the existing sentences relating to opportunities for mixed-use development incorporating retail, leisure, residential and employment and proposals which support the delivery of the objectives of the Big Town Plan, and which are in line with the other policies of the Local Plan, will be supported.	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed	No	S16.1 Shrewsbury
A0646	B003	n/a	Support noted.	No	S16.1 Shrewsbury
A0655	B008	S16 makes only passing reference to the Town's highly unusual architectural and heritage richness. This Place Plan has categories concerning housing development, retail improvement, industry and employment, etc., but none for heritage enhancement or protection – the very aspects that make the town an enduring visitor destination. This is in spite of the fact that Shropshire Council owns several of the town's heritage asset buildings that are in poor repair. In a previous version of the Local Plan, housing allocations for the town of Shrewsbury took account of the Big Town Plan's aspirations of "Balanced Growth" and how there were opportunities for many homes within the very centre. The latest version of the Big Town Plan estimates a possible 1904 units just for the master-planned Centre. It takes no account of the areas between the centre and the fringe estates but some of these would reuse existing buildings with retro-fitting and so contribute to the Council's Climate Emergency aims. A similar over-allocation may be made for employment provision, especially when there is likely to be some a reduction (20%) in demand for office space, since the pandemic, etc. Many of the fringe sites allocated for housing, were already in previous version of the Plan. However, experience suggests that communities are very concerned about the quality and facilities they provide. Many recent site applications provide insufficient quality in terms of access, community provision (shops or etc), energy efficiency and distinctiveness of building design. We have seen how such features can be required only if they are entered into the site allocation plan. New trends of home-working and green travel suggest that larger estates will need considerable upgrading of local facilities. This needs addressing in the Plan now. Without such basic facilities generations are being relegated to inappropriate places to live.	Noted. The Plan should be read as a whole, and it is considered several policies pick up on many of the issues raised by the objector. The Big Town Plan and its associated documents continue to be developed, and it is the role of the Shropshire Local Plan, and in particular policy S16.1 to provide an appropriate cross reference to this work to support it as a material consideration in decision making as appropriate. No change is proposed to the policy.	no	S16.1 Shrewsbury
A0676	B003	Amend para 13 of draft Policy S16.1 to include "new services and facilities within the new and expanded local centres" as requirements of the respective Sustainable Urban Extension Masterplans (representation lays out proposed change).	The comments are noted. However, it is considered the current proposed policy wording is appropriate and provides a suitable policy framework with which to use agreed masterplans as material considerations in the delivery of the 'saved' SUEs to the south and west of the town. No change proposed.	No	S16.1 Shrewsbury

A0657	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16 ELR006	Not Specified	Not Specified	Not Specified	The Local Plan Review Map continues to allocate the ABP Plant and much of the surrounding area as a 'Protected employment Area', and the land north of the site, ELR006, as a future Employment area. ABP would be in support of these land-use allocations. the Company supports the plan provisions with respect to the 'Protected Employment Area' at Battlefield Road. Nevertheless, ABP remains extremely concerned with potential encroachment of non-employment uses towards its Plant. Amongst the reasons for this concern is the potential for future conflict due to non-compatible land-uses encroaching on the Plant. ABP considers non-compatible land-uses to include uses that attract significant numbers of the general public to the area and would include uses such as restaurants, retailing, car-showrooms and hotels. As previously stated, ABP is a very important employment provider in the area and it is fundamental to ensure this employment is retained. The Company supports the proposed employment land-use allocation north of the ABP Plant (ELR006).
A0043	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 Shrewsbury SHR054a	Not Specified	No	Not Specified	The Guideline figure fails the 'consistent with national policy' and 'justified' test.
A0347	B083	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Shrewsbury	No	No	Not Specified	This site is adjacent to a number of private water supplies and close to a spring/issues. Therefore drainage design and pollution prevention measures will be required.
A0347	B082	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Shrewsbury	No	No	Not Specified	These sites are located within SPZ3. Therefore it will be necessary to ensure appropriate mains foul drainage and surface water drainage.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0657	B001	An explicit policy reference to ELR006 (Employment land allocation north of ABP) and SHREW09-115 (Housing Land Allocation North of ABP) that access to and use of these new development areas must take full account of existing employment uses and employment allocations to the south, including ABP and not in any way impede or be detrimental to the operational requirements of the ABP Plant, including any aspects of access and egress to the public road network. ABP requests that any proposed access to Battlefield Road from the ELR006 land allocation would be such as to not impede any traffic movements to or from the ABP facility as the access / egress to the ABP facility is only a short distance to the south of these new land-use allocations and the Company is conscious of the number of junctions onto this section of Battlefield Road. ABP does not object to the new housing allocation SHREW095-115 but requests development proposals in this area, including access, design of dwellings and layout of development proposals should be such as not to impede or cause any detriment to the operational requirements of the ABP Plant.	The comments are noted. However, no changes are proposed to the wording of this policy.	No	S16.1 Shrewsbury (ELR006)
A0043	B001	The housing guideline for the site should increase from 60 to 85 dwellings	Noted . it is considered the current housing guideline, which provides an approximate figure for in-site delivery, should be maintained and is justified given it has been subject to the site assessment at this level. It is, however, recognised that the planning application process will provide additional opportunity for an applicant to justify a potential increase in housing on the site as material considerations.	No	S16.1 Shrewsbury (SHR054a)
A0347	B083	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S16.1 Shrewsbury (SHR054a)
A0347	B082	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S16.1 Shrewsbury (SHR057 and SHR177)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0373	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 SHR060	Yes	No	Yes	I do not feel this plan is sound as it proposes to create and excess of development on an area that contains established natural beauty, that has been established for centuries. The level of development is excessive and the density of housing will also be an incredible burden on the already saturated land. The water level is already rising in the local area ponds, the run off from the fields is extreme, and this development will increase this issue. Within SHR060 on its East boundary there is a large pool which is recognised within the Site Assessments of the Sustainability Appraisal (App Q p517-519). However, this fails to attract any negative scoring (p16) for what should be considered a Wildlife Site. This is the area that I think needs urgent protection.
A0390	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SHR060	Not Specified	No	Not Specified	Site SHR060 contains wildlife pond, which is a habitat, including for many nesting birds. It is adjoined to the west by high density residential development. Green corridor between pond & development is too narrow and proposals will have a significant negative impact on pond & wildlife. Density of proposed development too high.
A0565	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 Shrewsbury SHR060	Yes	No	Yes	It is clear from the draft development Strategy for Shrewsbury Town, that SHR060 is recognised as a sustainable and deliverable growth area during the new plan period, given its highly sustainable location immediately adjacent to the western development boundary of the town and unconstrained nature it forms a natural area for expansion. The site is part of a wider strategic masterplan which includes sites SHR158 and SHR161 which are promoted for development by CEG. We confirm that SHR060 is deliverable within the short term of the plan period and the landowners intention is to submit a planning application as soon as possible. The wider site including SHR158/SHR161 is also deliverable in the plan period. SHR060 is fully supported and is clearly deliverable both independently or as part of a wider masterplan and provides a significant opportunity to generate sustainable development and meet housing need through the plan period and beyond.
A0036	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 Shrewsbury SHR145	Not Specified	Not Specified	Not Specified	Support identification of Shrewsbury as the primary focus for new development in Shropshire, this will support the objective of maintaining the towns role as the Strategic Centre of Shropshire and develop it into a sub-regional centre. The town is well established to manage new development (housing, employment, retail, leisure and necessary infrastructure improvements). Support proposed allocation of SHR145 as it represents a sustainable location for housing, with good access to services and facilities, and will contribute towards meeting the objectives of the draft Shropshire Local Plan by supporting housing growth in Shrewsbury. Site is available, viable and deliverable (demonstrated through a recent Planning Application that was refused but established that there are no technical reasons why the site cannot be developed). However, consider minor amendments to proposed site guidelines for SHR145 should be made, to provide greater clarity, in relation to access; mature trees, hedgerows and priority habitats; and noise. Specific minor amendments proposed documented within representation.
A0655	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 SHR145	Not Specified	Not Specified	Not Specified	SHR 145 is an unwelcome addition to Schedule S16.1 (i) and we have had both pre-app talks and objected to a planning application here. The site could have several other uses but it is inappropriate for a small housing estate. This is because it would be 'islanded' without easy access routes apart from heavily used traffic roads. We think it is a suitable site for development but not for homes. The allocation of 150 dwellings may be found within the large, unaccounted "windfall" developments, likely to be made available from Big Town Planning and from the additional "windfall" dwellings created out of the town centre but not at urban extensions.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0373	B001	<p>I would like to see the following:</p> <ul style="list-style-type: none"> <li>☒ Reduction in the density of housing.</li> <li>☒ Insistence on the retention of existing green spaces and natural habitats.</li> <li>☒ Creation of a green corridor that runs through the estate that enhances and protects the existing habitats, and provides a pleasant outdoor space for well being and safer recreational space.</li> <li>☒ Separate cycle paths for safe travel within and beyond the development boundary – especially for and around travel to the new schools.</li> <li>☒ Separate pedestrian paths for safe movement within and beyond the development boundary – especially for and around travel to the new schools.</li> <li>☒ The significant pond adjacent to Violet Grove and Bluebell place, which is recognised as a core/priority habitat (p518) should be given appropriate negative scores (1-3) in recognition of it being a wildlife site with diverse permeant and migrating waterfowl and amphibious creatures. This site is a Poor site for development due to the potential damage to these existing habitats, which are established and recorded on the OS maps from over 100 years ago.</li> <li>☒ The existing trees and hedgerows will not be protected with this density of development.</li> <li>☒ Proposed Key Green corridor is not in the best place and ignores the previously published Shrewsbury Big Town Plan Green Network and seems to fail to identify the significant pond to the East of SHR060 which is a significant wildlife attraction.</li> <li>☒ The Master Plan suggests building almost to the waters edge which would severely affect the migrating birds that use those fields and impact the existing permanent resident waterfowl.</li> <li>☒ This area would provide be an excellent green space and corridor and enable a nature walk around the other existing natural ponds in the area.</li> <li>☒ The proposal does not maintain the link between existing ponds and buffer as much as possible from these.</li> <li>☒ The proposal does not include a sustainable drainage plan as water levels are already an issue with them rising annually and recent heavy rain has seen streams of water flowing from the fields in SHR060 to the existing large pond.</li> <li>☒ Flood concerns and erosion for some existing properties, will only get worse when there is less natural surface run off and pools with more built-up areas.</li> <li>☒ The schools are planned to be completed before this proposed development, but other essential community services need to be guaranteed as part of the planning permission. Access for the schools is already a concern as it will be off Squinter Pip and Red Deer Road as they are too narrow, bendy and parking causes further issues. Additional Access from the new site to the school is essential.</li> <li>☒ Park and Ride towards Mytton Oak Road would be good but access from it and then through to Hanwood Road a concern.</li> <li>☒ This development in combination with the proposed inner link road will become very busy when there are issues on the A5 in peak season.</li> <li>☒ Roads already busy when A5 has congestion. The roundabout between Red Deer Road and Bank Farm is not fit for purpose now and needs serious consideration with increased traffic which will be generated. The new development will add to this congestion.</li> <li>☒ Consideration of adding traffic signals where the Hanwood Road joins the A5 as already queues form in peak times; with significant housing added this will only worsen.</li> <li>☒ Need to wait for NWRR to be completed before further development occurs, rather than this. Local centre to North of SHR158 great but must be guaranteed, still waiting for the play areas in Bowbrook and Darwin's Walk. There is no current allocation of play areas for youngsters defined on the development plan.</li> </ul>	<p>Noted. However, it is considered the proposed development guidelines for the site are appropriate and provide a comprehensive policy framework for the delivery of a masterplan for the site, and for a subsequent planning application. No change proposed.</p>	no	S16.1 Shrewsbury (SHR060)
A0390	B001	<p>Safeguard pond in SHR060 by turning it and land to its west into a nature reserve. Widen &amp; extend the green corridor, preferably to top hedge, for public access &amp; education purposes . Pond to be shown on map</p>	<p>Noted. The proposed site guidelines include the requirement for the site promoter/applicant to develop a masterplan for the site, and for this to be agreed by Shropshire Council, before a planning application is considered. Whilst the Masterplan is in preparation it is yet to be finalised and has not been agreed by the Council as a material planning consideration. It is expected that there will be the opportunity for further community engagement to happen as part of the masterplan process and many of the issues raised in this rep can be considered further at that stage.</p>	no	S16.1 Shrewsbury (SHR060)
A0565	B001	<p>With reference to the current allocation, the principle of providing an area of land for future education needs within the allocation for SHR 060/158/161 so as to consolidate these facilities is supported, however we suggest that some form of evidence based assessment is required in order to understand the potential quantum of future education need in the local area.</p> <p>The allocation should allow for a suitable expansion area to be determined once a evidence based assessment of future education need is undertaken and prior to publication of the next iteration of the Local Plan.</p> <p>The provision of funding for road network improvements is acknowledged, however allocation wording should be amended to provide for contributions to mitigate the impact of the individual development.</p>	<p>Noted . Discussions have been had with the Council's education department and it is currently considered this scale of provision for a new education facility is appropriate to meet future needs. No change is proposed.</p>	no	S16.1 Shrewsbury (SHR060)
A0036	B005	<p>Amend proposed site guidelines for SHR145 as documented within representation.</p>	<p>Noted. The proposed site guidelines for SHR145 are considered appropriate and provide clarity to the decision maker, local community and development industry.</p>	No	S16.1 Shrewsbury (SHR145)
A0655	B009	<p>Remove SHR145 as a housing allocation</p>	<p>Noted . it is considered the proposed allocation of SHR 145 has been through a robust site assessment process and represents a sustainable option for the town's growth. No change proposed</p>	No	S16.1 Shrewsbury (SHR145)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0348	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16 SHR166 and Policies map S16.b	Not Specified	No	Not Specified	<p>1. Development is likely to result in a direct negative impact to the significance of a non-designated heritage asset and its setting.</p> <p>2. There is insufficient evidence about the significance of archaeological remains (which comprise the non-designated heritage asset as above) to inform this allocation. If allocation proceeds, there is a risk that a non-designated heritage asset that is demonstrably of equivalence to a scheduled monument would be lost. Mitigation is not a clear and convincing justification for the substantial harm that is likely to be caused by development. A thorough archaeological evaluation is needed to determine the appropriate level of significance of this asset. This should be carried out before the site is considered for allocation.</p> <p>4. Development of this site is within the setting of three Scheduled Monuments on Haughmond Hill, one of which is also a Grade I Listed Building. Whilst the harm to their settings would be less than substantial, the cumulative impact of development for all three would be detrimental to understanding their relationship to Shrewsbury. This is particularly so because an employment use means very large sheds which would be in the foreground of views.</p> <p>5. The allocation of this site would mark a major change to the eastern edge of Shrewsbury. The current rural setting of the town to the east of the river Severn is not only important for the Scheduled Monuments on Haughmond Hill, it also provides a finer grain and more accessible context for understanding the town's historical setting within the tight loop of the river.</p> <p>6. Development in this location may result in pressure for further development between the river Severn and Haughmond Hill and it is not clear how this site's allocation fits with other development opportunities that may arise to the north and west of Shrewsbury linked to the planned North West Relief Road.</p>
A0646	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 SHR166	Yes	Yes	Yes	The Estate considers the proposed allocation SHE166 is sound when considered against the tests set out in para 35 of the NPPF. In response to Historic England's previous comments, a Heritage Assessment has been undertaken to support the proposed allocation.
A0374	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 SHR173	No	No	Not Specified	The NE of SHR173 is within a few metres of the SSSI but Appendix Q states it is not within 500m of a Special Area of Conservation. A Special Area of Conservation should not be treated differently to a SSSI. Building houses here will affect wildlife and conservation requirements. 450 houses seems excessive on the site, the majority of housing should be in the centre of the site.
A0391	B001	Sustainability Appraisal	SHR173 policy map s16b-	No	No	Not Specified	<p>SHR173.assessments is incorrect. This site is within 500 m of the Old River Bed SSSI – north eastern part of the site across road – approx. 30 yards. The Old Riverbed SSSI is one of the most important nature conservation areas in Shropshire and the area of river bed just to the west of Ellesmere Road, to the north of SHR173 is of similar character. Draft local plan has failed to properly assess the site's relationship to the SSSI or to other parts of the old riverbed to the north or to correctly record the landscape as being of exceptionally high character.</p> <p>Limited housing which meets local needs may be desirable at this location but SHR173 is far too large and needs to be reconsidered taking better account of the local environment, amenity value, wildlife corridors including protected bat colonies at Hencote to the north, transport capacity and impact on CO2 emissions.</p> <p>Since site development depends on building the NWRR road &amp; full details of the NWRR ,including its environmental, traffic and carbon impact, were unavailable during Plan consultation ,the pre-submission draft is not legally compliant, as consultees could not assess whether the local plan can meet its climate change obligations.</p>
A0393	B043	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	para 2.31	No	No	Not Specified	<p>Allocation assumes NWRR will be built but its traffic won't be included in NWR assessment and should be as the understanding cumulative impacts of developments is essential.</p> <p>The presence of an adjacent Local Wildlife Site and nearby SSSI are included in Sustainability Appraisal text but not counted in the assessment matrix.</p> <p>Question that the site scores well in terms of the climate change assessment (bus stop within 480 m) despite the issue of the number of car journeys being generated being of such a scale that the development would be dependent on the proposed NWRR to accommodate the additional traffic.</p>
A0451	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 SHR173	Not Specified	No	Yes	<p>The draft Local Plan S16 Shrewsbury Place Plan Area cites that SHR173 Land west of Ellesmere Road, Shrewsbury is allocated for housing (approx. 450) and that: "the delivery of this development is directly dependent on the approval and construction of the North West Relief Road."</p> <p>S16.1 Development Strategy: Shrewsbury Strategic Centre para. 7 states that "the delivery of the North West Relief Road (NWRR) is supported in principle" However at this stage only a scoping opinion has been issued therefore without supporting evidence the Plan should not support the NWRR 'in principle' and allocate a housing site solely on the basis of the approval of the road. In addition, the policy goes onto say that the "...development of this site will be in accordance with a Masterplan which will need to reflect the objectives of the Big Town Plan and any related masterplans..." It should be noted that the Big Town Plan is also currently under public consultation and therefore subject to change.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0348	B001	Remove allocation of SHR166	Agreement has been reached on the issue of the impact of development on the significance of the settings of the Scheduled Monuments on Haughmond Hill and a minor modification is proposed to the 7th paragraph of the site guidelines. Haughmond Abbey Scheduled Monument has been excluded from this on the basis of no likely effect due to distance from the proposed allocation. Agreement has not been reached on the allocation's effect on the significance of the early Roman Marching Camp and the Council proposes to continue with the site's allocation with the addition of a second minor modification to the 7th paragraph of the site guidelines. Details of the Council's responses to these issues are set out in the Statement of Common Ground between Historic England and Shropshire Council.	Yes	S16.1 Shrewsbury (SHR166)
A0646	B004	It is suggested that the 'Development Guidelines' as currently set out against Site SHR166 could be expanded to include additional detail on how the site could be brought forward which mitigates against any potential harm, particularly to the setting of the heritage assets. This would require a Masterplan to be brought forward for the site, which would respond to a series of Development Guidelines	Noted. Appropriate minor modifications are proposed to the draft site guidelines for SHR166.	No	S16.1 Shrewsbury (SHR166)
A0374	B001	A revision of the proposed plan moving the boundary at least 500m away from the SSSI	Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S16.1 Shrewsbury (SHR173)
A0391	B001	Page 22 :Amend criteria for SHR173 to reflect that the site is within 500 m of the Old River Bed SSSI and near landscape of high amenity value, a noted wildlife corridor with protected bat colonies ( north of the old river bed at Hencote) as recognised in planning conditions for the Hencote development and by Historic England re the car park adjacent to the Flaxmill Maltings, where extensive efforts have been made to protect bat roosts and protect their route to the Old River Bed. To be compliant and sound, site SHR 173 needs to be of much smaller scale or removed, in order to reflect the proximity of the SSSI, wildlife corridors and amenity value of the land to the north and north.	The landscape and visual sensitivity for housing on this site are medium for housing and medium low respectively, so the Sustainability Appraisal and Site Assessment conclusion is correct. Proposed changes to the scoring in respect of the SSSI would have no material effect so are not considered necessary.	No	S16.1 Shrewsbury (SHR173)
A0393	B043	See issues summary. Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed. Need for the traffic implications of SHR173 to be included in the NWRR traffic modelling to assess cumulative impacts; Address highlighted inconsistencies in SA	The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed.	No	S16.1 Shrewsbury (SHR173)
A0451	B001	Removal of housing site SHR173 from the Shropshire Local Plan	Noted . it is considered the proposed allocation of SHR 173 has been through a robust site assessment process and represents a sustainable option for the town's growth. No change proposed	No	S16.1 Shrewsbury (SHR173)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0584	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 SHR173	Yes	No	Yes	There is an absence in the LPR of an objectively assessment requirement for C2 / care provision and effective strategy to meet this need. Whilst we agree with the focus on Shrewsbury to deliver housing and economic development, we disagree that the housing needs of the town will be met as currently set out Policy 16.1. In respect of housing there is an absence of identified sites for specialist age appropriate accommodation and those in need of care. Specifically identified sites are required to accommodate this specialised form of development in a manner which meets the care community financial model as distinct from normal housing development. Policy SP10 does not include specific reference to specialist accommodation for the older population. The Hencote proposal has been generated in response to ongoing dialogue and engagement, but its key overall advantage compared to anything Shropshire has encountered before is that it provides a flexible range of accommodation with graduated access to supporting care, social, recreational, therapy and well-being facilities, within a safe setting, offering access to open space, wildlife and other interests
A0617	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 SHR173	No	No	Not Specified	I refer to Appendix Q: Shrewsbury Place Plan Area Assessment, December 2020, page 22. The Old River Bed SSSI, a very important nature conservation area, and wildlife corridor, is within 500m of the proposed houses ( at one point being within 50m). The area of the river bed to the west of Ellesmere Road is of a similar character and is vital to the conservation of wildlife, including the protected Bat colony to the north of Hencote. SHR173 is also tied to a road which will boost carbon emissions and increase traffic on nearby existing roads. Any benefit of the NWR will be cancelled out by the size of the proposed development
A0629	B007-43	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP1 / DP26	Yes	No	Yes	Allocation assumes NWRR will be built but its traffic won't be included in NWR assessment and should be as the understanding cumulative impacts of developments is essential. The presence of an adjacent Local Wildlife Site and nearby SSSI are included in Sustainability Appraisal text but not counted in the assessment matrix. Question that the site scores well in terms of the climate change assessment (bus stop within 480 m) despite the issue of the number of car journeys being generated being of such a scale that the development would be dependent on the proposed NWRR to accommodate the additional traffic.
A0655	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 SHR173	Not Specified	Not Specified	Not Specified	SHR173 is a puzzling addition to the allocated development sites, ostensibly for 500+ houses. Our concerns about the sufficiency of facilities on fringe estates (as above) are not fully met in plans for this site. We presume that the fact that this site is listed as dependent upon the NWRR, is due to possible additional pressure on Ellesmere Road. Earlier conclusions about traffic were questionable concerning congestion along Ellesmere Road. The data that drives those conclusions is now dated and needs re-assessment, due to additional pressure on the Coton Hill Junction, and from several more recent developments along the road, as well as pandemic-driven changes. Up-to date, evidence-based forecasts are necessary.
A0574	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.1 SHR221	Yes	No	Yes	SHR221 is a well located and fully deliverable site with an area of 10.15 ha. We believe this site is suitably placed to provide development in the Strategic Centre of Shrewsbury towards the target of dwellings by 2038, being situated adjoining recently developed land. The land is well positioned adjoining land that has gained residential planning permission and has already been developed. As being the adjoining landowners, it may be of benefit for Shropshire County Council to collaborate with our client to enable residential development

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0584	B001	<p>The Plan could include a criteria based policy establishing the considerations to be applied to site identification and defining the key scheme content including the range of supporting facilities and levels of care, as set out in response to the Residential Mix section of the Plan. A proposed care community on SHR173 will meet and comply with the objectives and policies set out in the LPR to address the need for accommodation for the older sector of the population, and will do so in an effective manner. It will deliver results, whereas the policies as currently written will not, meaning the Plan as drafted is not sound.</p> <p>Land at Hencote located adjacent to the Council's proposed SHR173 housing site, should be allocated for a Care Community Use Class C2. Supporting text explaining the allocation and differentiating it from ordinary housing should be included.</p>	<p>It is considered that the proposed approach to meeting the housing need of older people within the draft Shropshire Local Plan is clear and appropriate. Specifically:</p> <ul style="list-style-type: none"> <li>-Draft Policy DP1 requires all residential development to provide appropriate dwelling mixes to meet the identified needs of local communities, including older people. It also specifically requires the provision of an appropriate range of specialist housing designed to meet the diverse needs of older people on sites of 50 or more dwellings.</li> <li>-Settlement policies (S1-S19) allow for appropriate windfall development within identified development boundaries (or in the case of Community Clusters on specified types of sites) where they comply with other policy requirements, which can of course include accommodation for older people.</li> <li>-Draft Policy SP10 allows for affordable exception, entry level exception and cross subsidy exception housing schemes which meet evidenced local housing needs and other policy requirements. This again can include appropriate tenures of older person accommodation. No change proposed</li> </ul>	No	S16.1 Shrewsbury (SHR173)
A0617	B001	<p>I would suggest smaller developments to meet local need may be beneficial, but the size of SHR173 is too large and exceeds that of central government proposals. Furthermore it is greater in size than any option Shirehall has consulted upon, with most respondents wanting less.</p> <p>It needs to be redrawn taking into account the local housing demand and infrastructure, impact on wildlife, CO2 emissions, transport capacity, and amenity value.</p>	<p>Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations will contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). The site assessment for SHR173 has considered fully a number of potential on site constraints and it is considered these can be mitigated through development. Furthermore, whilst the proposed allocation seeks to establish the principle of development on this site, the proposed development guidelines for the allocation include the need for the site promoter/applicant to prepare a masterplan to be approved by Shropshire Council in advance of a planning application, to include the consideration of, amongst other things, the site's design and layout to be informed by site constraints including the site's proximity to the Old River Bed. No change proposed.</p>	No	S16.1 Shrewsbury (SHR173)
A0629	B007-43	<p>See issues summary. Changes identified as part of a commentary on issues with draft Plan's approach and highlights concerns to be addressed.</p> <p>Need for the traffic implications of SHR173 to be included in the NWRR traffic modelling to assess cumulative impacts;</p> <p>Address highlighted inconsistencies in SA</p>	<p>The Council considers that the approach taken to climate change and reducing carbon emissions throughout the Local Plan is appropriate and consistent with national planning policy and guidance and all other relevant legislation. No change proposed</p>	No	S16.1 Shrewsbury (SHR173)
A0655	B010	<p>The data that drives the sites' conclusions is now dated and needs re-assessment, due to additional pressure on the Coton Hill Junction, and from several more recent developments along the road, as well as pandemic-driven changes. Up-to date, evidence-based forecasts are necessary.</p>	<p>Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.</p>	no	S16.1 Shrewsbury (SHR173)
A0574	B001	<p>SHR221 should be considered for residential allocation</p>	<p>Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.</p>	no	S16.1 Shrewsbury (SHR221)

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0595	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SHR177	Yes	No	Yes	<p>Object to the Site Selection process and approach which has assessed and evaluated the land at Weir Hill Phase 3 is flawed &amp; unsound. Weir Hill Phase 3 site SHR177 is a suitable, sustainable and deliverable site for residential development and a logical extension to the settlement, adjoining the existing residential areas. Allocation of the site would create a strong and well-defined settlement edge, without extending out into the wider open countryside. The site is further enclosed by the proposed employment allocation SHR166 to the north east of the site.</p> <p>The Vision Statement for the site previously provided has adequately addressed issues raised as well as opportunities which have emerged through phases 1 and 2 of the development.</p> <p>The site selection process (from SLAA to SA) is flawed &amp; has not been fairly assessed land at Weir Hill Phase 3. The findings &amp; conclusions of the SLAA lack evidence in support. The SLAA conclusions have unduly and incorrectly influenced the assessment of the site in key respects of landscape impacts, transport infrastructure and access, as well as sustainable land uses. The Sustainability Appraisal includes errors and incorrectly scores the site. These concerns are fundamental in respect of the soundness of the site selection process as it relates to the land at Weir Hill Phase 3, which is not allocated without good and sound planning reasons. The Sustainability Appraisal incorrectly underscores the site in a number of key aspects and also fails to take into account aspects of the proposed mixed use components to the proposals which would directly address any perceived deficiencies in local infrastructure or facilities. Specific issues with site assessments (in Appendix Q): -The existence of a Tree Preservation Order to the boundary of the site should not count negatively as no TPO trees are affected by the proposed development; -There is a Primary School within 480m of the site -The opportunity is proposed within the site for provision of a Doctors Surgery -Phase 1 and 2 of the development have facilitated bus access to the site and the site is well served within 480m by a regular service - None of the proposed site within a high-risk flood zone &amp; assessment that "much of the it is in flood zones 2 and 3" is incorrect - Landscape sensitivity and visual impact over stated &amp; evidence provided to show this -Highway access considerations judged without evidence and miss-conception that the London Road link road will not be delivered until much later in the plan period - None of the site proposed for development within the Environmental Network, &amp; submitted proposals respond to opportunities to enhance the river corridor - Any suggested expectation of loss of the environmental network is incorrect - no impact by development on the River Severn, retention of trees and hedgerows &amp; ecology surveys support the development without any undue harm as per Phases 1 and 2. Biodiversity gain proposed; - No contaminated land constraint -Noise from the railway line to the north is not a constraint -The development of the site would not have to await the development of Phases 1 &amp; d 2 as London Road access to Phase 2 is complete</p> <p>Contrary to the Council's site assessment, supporting evidence submitted shows that the development can deliver a high-quality scheme including a new local centre with a range of uses to support the sustainability, including earlier phases of the development. The vision for the site is landscape led including significant open and mixed recreation space with areas close to the river protecting existing ecology interests &amp; promoting enhanced biodiversity. Community use opportunities include new dedicated parking for walkers and country park visitors &amp; other community space provision.</p> <p>The site is suitable for allocation for around 400 dwellings. Evidential material in support of the allocation in respect of landscape, transport and traffic, ecology, drainage etc has been previously submitted. The Council have misunderstood the delivery of associated infrastructure including the delivery timeframe for the new London Road link which will be in place to serve this site phase 3 (including construction traffic) as well as earlier phases. The delivery of the link road was conditioned in the planning permission for Phases 1 and 2 and the London Rd access and link road are completed and open to traffic and therefore available to provide access to Phase 3. Therefore, highway &amp; traffic considerations have been incorrectly judged. Transport analysis undertaken on potential traffic implications for Phase also identifies the site is highly accessible including by non-car means; vehicle access is available and safe; traffic from the development has minimal impact on Preston Street, or the wider highway network and there is no highway or safety concerns that should prevent the site from being allocated. The Council have no transport evidence for the site which contradicts these findings. Council has also failed to appropriately and fairly consider localised, site specific landscape implications. This is evidenced by submitted supporting information - Vision Document (September 2020), Landscape and Visual Appraisal (PGLA, September 2020) and Transport Technical Note (Croft, September 2020);</p> <p>The Council's Landscape review &amp; sensitivity assessment is a strategic assessment which does not make judgements on the appropriateness of specific developments on individual sites undertaken for which more detailed studies relating to specific site allocations and development proposals need to be undertaken. The character area classification of landscape sensitivity is therefore not a definitive factor in assessing site proposals, which have to be done in the context of the specific proposals. The supporting assessment provided highlights flaws and issues in the Council's landscape evidence including the lack of granularity and inaccurate and distorted broad brush gradings of landscape and visual sensitivity which render it unsuitable for specific site assessment for a site such SHR176 &amp; inappropriate for making decisions on site allocations. The more appropriate and focused landscape assessment provided confirms significantly less sensitivity, less than other sites selected for allocation. The site and its sensitivity assessed as Medium Low and landscape impacts moderate to negligible in respect of the particular proposals including proposed open space and landscaping.</p> <p>Concerns regarding local of social infrastructure, to support overall development of 1000 addressed by the masterplan and proposals for the site (see Vision Document, September 2020) which provide a logical location for local community and social infrastructure in the heart of the development which is part of a wider vision for the site building on phases 1 &amp; 2 with a riverside park the scheme components aligning with the Council's green infrastructure aspirations &amp; Big Town Plan &amp; integrating mixed community uses within the park with biodiversity gains and river as a local wildlife site.</p> <p>The Vision for Phase 3 of the Weir Hill development presents a high quality sustainable development supported by evidence which if more fairly and correctly assessed would have been allocated. Phase 3 is available for very early delivery in the Plan period and will support the plan housing delivery trajectory as other larger schemes will take some time to come forward.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0595	B004	The assessment process should be re-run to re-evaluate this site and a revised comparative assessment of its merits with others considered in order to soundly evaluate it as a reasonable alternative site which should be allocated for housing.	Noted. Shropshire Council considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.	No	S16.1. Shrewsbury
A0589	B001	n/a	Noted .	No	S16.2 Baschurch
A0347	B084	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S16.2 Baschurch (BNP024 and BNP035)
A0038	B001	Increase the site's housing guideline to 60.	Shropshire Council considers the proposed capacity of BNP024 is appropriate. It should be noted that Para 4 of Draft Policy S16.2 recognises that the Provision figures are 'approximate'. It states "Development of site allocations should be in accordance with specified development guidelines and approximate site provision figures and all other relevant policies of this Local Plan." Shropshire Council has generally taken a precautionary approach to site capacity to ensure that the proposed housing requirement and proposed settlement guidelines are achieved. The specific number of dwellings and density of development that is appropriate on any proposed allocations will, if they are ultimately allocated, be determined at the Planning Application stage.	No	S16.2 Baschurch (BNP024)
A0032	B001	Remove BNP035 - infill can accommodate these numbers	Shropshire Council considers that the proposed development strategy for Baschurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This strategy has been informed by consideration of the characteristics, constraints and opportunities that exist within the settlement. Proposed site allocations have been informed by a robust and proportionate site assessment process.	No	S16.2 Baschurch (BNP035)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0129	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Para 5.227 ; Policy:S16.2	No	No	Not Specified	Support policy in identifying Bayston Hill as a Community Hub Settlement and providing for around 200 dwellings. Residential development will be delivered through saved allocations; identified Local Plan/ Neighbourhood Plan residential allocations; appropriate, policy compliant small-scale windfall within the settlement boundary. BAY040 should be reconsidered (for the reasons set out in A0129 BA001) and allocated for development.
A0350	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Bayston Hill BAY005	Not Specified	No	Not Specified	<p>The proposed residential guideline for Bayston Hill in draft Policy S16.2 and the proposed priority of retaining a 'Green Gap' in para 5.229 of the proposed explanation for draft Policy S16.2 fail the 'positively prepared', 'justified' and 'effective' tests of soundness.</p> <p>-The housing requirement in draft Policy SP2 does not reflect latest housing projections and fails to meet objectively assessed housing need and is therefore unsound. Bayston Hill shares in this failure, it is the largest village in Shropshire and has a good range of services and significant local employment (second highest performing Community Hub within the Council's Hierarchy of Settlements Assessment (HoS)), but the level of annual growth proposed (0.45%) is significantly less than that proposed for Shropshire (1.01%). As such, the low settlement guideline for Bayston Hill fails the 'positively prepared' test of soundness.</p> <p>-In addition to the size and availability of services documented above, Bayston Hill is also located on the A49 strategic corridor and the proposed strategic approach responds to the Shropshire Economic Growth Strategy objective to prioritise investment into strategic corridors. But the annual rate of growth proposed (0.45%) is unjustifiably lower than other Community Hubs with similar scores in the HoS (1.03% for Pontesbury, 1.66% for St Martins, 1.1% for Clun and 1.2% for Gobowen), calling into question the basis for settlement growth figures. As such, the low settlement guideline for Bayston Hill fails the 'justified' test of soundness.</p> <p>-Para 5.229 of the explanation for draft Policy S16.2 refers to retention of a Green Gap between Shrewsbury and Bayston Hill, but there is no evidence to support this approach, as it does not feature in either the Shropshire Open Space and Recreation Needs Assessment (September 2018) or Green Infrastructure Strategy for Shrewsbury (July 2020) (extract provided in representation), as such it fails the 'justified' test of soundness. In contrast, land south of Bayston Hill is associated with Lyth Hill, crossed by many well-walked public rights of way and to the south and east of Bayston Hill are the South Shropshire Hills AONB (nationally recognised landscape designation). Further the Shropshire Council Landscape &amp; Visual Sensitivity Assessment (2018) identifies land to the south as more landscape and visually sensitive than land to the north (extract provided in representation). Also, consider the draft Shropshire Local Plan can do better than simply retaining a gap between Bayston Hill and Shrewsbury, by providing for improved recreation benefitting residents of Shrewsbury and Bayston Hill. This opportunity was previously recognised in the Shrewsbury and Atcham Local Plan (extract provided in representation). This could potentially be provided by private investment, through a strategy of actively promoting sites that will provide additional planting and new areas of public open space.</p> <p>-Site BAY005 promoted as a potential site allocation to deliver housing and attractive open space/landscaping (draft masterplan provided in representation). It is well located to access services and facilities (performing 'fair' within the site assessment) and is deliverable.</p>
A0614	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2	Not Specified	No	Not Specified	Given the level of services available and the surrounding countryside, as well as the proximity of additional working opportunities in Shrewsbury, it is clearly an attractive place to live. There is unmet housing need within Bayston Hill which could be fulfilled either through its designation as a Key Centre or the identification of an appropriate development guideline. The 2020 version of the SHMA does not provide statistics on the need for affordable homes at a settlement level. During years of comparatively very high housing completions, the level of affordable delivery is still well below identified need figure of 800 dwellings per annum. This provides further justification for the identification of allocations in higher market areas where affordable housing is viable and will be delivered. 200 dwellings should be the minimum figure for consideration in Bayston Hill. This scale of development will enable the provision of much needed affordable housing and market housing in an area which is attractive to developers. There are also less sustainable Community Hubs with larger development guidelines than Bayston Hill.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0129	B002	<p>The Council should commit to the inclusion of reserve sites within the Local Plan review identified to meet housing requirements in the event that the Government's standard methodology is once again amended, or delivery of allocated sites is stalled. This would allow the Local Plan Review to be flexible, deal with rapid change and avoid delays and resourcing associated with a partial or wholesale plan review.</p> <p>The alternative would be to follow Stratford upon Avon District approach &amp; include a policy within the Plan requiring the commencement of a separate Site Allocation document to include a series of reserve sites and to be read in conjunction with the Local Plan including adherence to the development strategy.</p> <p>Site BAY040 should be reconsidered on basis of the evidence presented &amp; allocated within the Local Plan.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council also considers that the proposed development strategy for Bayston Hill and the existing commitments, proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This strategy has been informed by consideration of the characteristics, constraints and opportunities that exist within the settlement. The retention of the Green Gap between Shrewsbury and Bayston Hill is considered an appropriate policy consideration.</p> <p>Proposed site allocations have been informed by a robust and proportionate site assessment process, including consideration of the landscape and policy considerations such as retention of Green Gaps between settlements.</p>	No	S16.2 Bayston Hill
A0350	B005	<p>Increase the proposed housing guideline for Bayston Hill to at least 445 dwellings. Include site BAY005 as a site allocation (proposed draft guidelines provided within representation).</p> <p>Seek to improve rather than protect the Green Gap between Shrewsbury and Bayston Hill.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council also considers that the proposed development strategy for Bayston Hill and the existing commitments, proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This strategy has been informed by consideration of the characteristics, constraints and opportunities that exist within the settlement. The retention of the Green Gap between Shrewsbury and Bayston Hill is considered an appropriate policy consideration.</p> <p>Proposed site allocations have been informed by a robust and proportionate site assessment process, including consideration of the landscape and policy considerations such as retention of Green Gaps between settlements.</p>	No	S16.2 Bayston Hill
A0614	B001	<p>In order to significantly boost the supply of new homes, and avoid potentially under delivering on the identified requirements, the wording should be amended to "at least 200 dwellings". Any provision over and above these guidelines should therefore be considered on its own merits and whether it comprises sustainable development. It is specifically the use of "around" in regard to the development guidelines for all Community Hubs with which our client disagrees and objects to. The approach as currently drafted is not positively prepared and is therefore not sound.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2.</p> <p>Shropshire Council also considers that the proposed development strategy for Bayston Hill and the existing commitments, proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This strategy has been informed by consideration of the characteristics, constraints and opportunities that exist within the settlement. The retention of the Green Gap between Shrewsbury and Bayston Hill is considered an appropriate policy consideration.</p> <p>Proposed site allocations have been informed by a robust and proportionate site assessment process, including consideration of the landscape and policy considerations such as retention of Green Gaps between settlements.</p> <p>The proposed approach to managing development proposals where they exceed settlement residential development guidelines is also considered appropriate.</p>	No	S16.2 Bayston Hill

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0382	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2	Not Specified	No	Not Specified	The draft Local Plan should allocate additional land to meet the settlement housing guideline of 200 dwellings. Further land to the North of the proposed allocation BAY039 is available, suitable and viable for residential development.
A0614	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 BAY039	Not Specified	No	Not Specified	BAY039's residential development guideline is too low. 115 dwellings would mean an appropriate 19.8 dwellings/ha. The lack of development in the previous plan period means that there may be limited windfall opportunities in Bayston Hill. "Approximately" 100 dwellings lacks certainty.
A0347	B085	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Shrewsbury	No	No	Not Specified	This site is located within SPZ3 and is adjacent to a well. Therefore it will be necessary to ensure appropriate mains foul drainage and surface water drainage.
A0352	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 BIT022	Not Specified	Not Specified	Not Specified	Agree with BIT022, but the housing guideline is too small given the site's size.
A0537	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 BIT022	Not Specified	Not Specified	Not Specified	Agree with the allocation, however the housing guideline is too low. Given the housing guideline for the settlement is 30, this site should take all of these dwellings. The council should consider increasing the housing guideline for Bicton. The site can be extended north to accommodate further dwellings if required.
A0568	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 BIT023	Yes	No	Yes	BIT023 is a well located and fully deliverable site with an area of 2.37 ha. We believe this site is suitably placed to provide the development in the Community Hub of Bicton with 30 dwellings by 2038 with 15 yet to be allocated, being situated with an access to Bicton Lane and adjoining previously developed land and the development boundary, plus walking distance to the new school. The current preferred site, BIT022 will have a much higher implications in terms of highways with it being advised in the site assessment report
A0350	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Bomere Heath BOM19 & BOM020	Not Specified	No	Not Specified	Strongly support designation of Bomere Heath as a Community Hub, as it is a sustainable settlement with a good range of services and significant local employment. SAMDev Plan allocation BOM004 experienced very strong local demand and is now fully built out. Confident allocations BOM019 and BOM020, which form natural extensions of the village linking it to the football/cricket pitches (map provided in representation), will likewise be very popular and will be delivered quickly. Unfortunately site guidelines remain inaccurate, despite previous representations. Specifically: -The requirement for BOM019 to be accessed off Shrewsbury Road is unnecessary as the recently constructed roundabout access onto Shrewsbury Road (for an adjacent site) was designed to also accommodate traffic from this site (plans provided within representation). -Guidelines seek to duplicate an already provided pedestrian footway between the cricket/football pitches and village. This is unnecessary and fails the 'justified' test. Would also note that the adjacent site also included SUDs designed to also cater for BOM019 and BOM020.
A0564	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Bomere Heath	Not Specified	Not Specified	Not Specified	There are 3 sites to the SE of the village (off Broomhall Lane) with poor agricultural value compared to the preferred site, and these sites would fit better into the rural setting of the village.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0382	B001	Land to the north of allocated site BAY039 should be allocated for residential development.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Shropshire Council also considers that the proposed development strategy for Bayston Hill and the existing commitments, proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This strategy has been informed by consideration of the characteristics, constraints and opportunities that exist within the settlement. The retention of the Green Gap between Shrewsbury and Bayston Hill is considered an appropriate policy consideration. Proposed site allocations have been informed by a robust and proportionate site assessment process, including consideration of the landscape and policy considerations such as retention of Green Gaps between settlements.	No	S16.2 Bayston Hill (BAY039)
A0614	B002	Support allocation of BAY039 and have taken on board the development guidelines but believe the quantum of development (approximately 100 dwellings) is not sound and therefore the policy wording should be amended from "approximately 100 dwellings" to "at least 115 dwellings".	Shropshire Council considers the proposed capacity of BAY039 is appropriate. It should be noted that Para 4 of Draft Policy S16.2 recognises that the Provision figures are 'approximate'. It states "Development of site allocations should be in accordance with specified development guidelines and approximate site provision figures and all other relevant policies of this Local Plan." Shropshire Council has generally taken a precautionary approach to site capacity to ensure that the proposed housing requirement and proposed settlement guidelines are achieved. The specific number of dwellings and density of development that is appropriate on any proposed allocations will, if they are ultimately allocated, be determined at the Planning Application stage.	No	S16.2 Bayston Hill (BAY039)
A0347	B085	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S16.2 Bicton (BIT002)
A0352	B001	The proposed allocation site BIT022 should have an increased housing provision of a minimum of 30 dwellings.	Shropshire Council considers the proposed capacity of BIT022 is appropriate. It should be noted that Para 4 of Draft Policy S16.2 recognises that the Provision figures are 'approximate'. It states "Development of site allocations should be in accordance with specified development guidelines and approximate site provision figures and all other relevant policies of this Local Plan." Shropshire Council has generally taken a precautionary approach to site capacity to ensure that the proposed housing requirement and proposed settlement guidelines are achieved. The specific number of dwellings and density of development that is appropriate on any proposed allocations will, if they are ultimately allocated, be determined at the Planning Application stage.	No	S16.2 Bicton (BIT022)
A0537	B001	BIT022 should increase its guideline to at least 30 dwellings	Shropshire Council considers the proposed capacity of BIT022 is appropriate. It should be noted that Para 4 of Draft Policy S16.2 recognises that the Provision figures are 'approximate'. It states "Development of site allocations should be in accordance with specified development guidelines and approximate site provision figures and all other relevant policies of this Local Plan." Shropshire Council has generally taken a precautionary approach to site capacity to ensure that the proposed housing requirement and proposed settlement guidelines are achieved. The specific number of dwellings and density of development that is appropriate on any proposed allocations will, if they are ultimately allocated, be determined at the Planning Application stage.	No	S16.2 Bicton (BIT022)
A0568	B001	BIT023 should be considered for residential allocation	Shropshire Council considers that the proposed development strategy for Bicton and the existing commitments, proposed allocation and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This strategy has been informed by consideration of the characteristics, constraints and opportunities that exist within the settlement. Proposed site allocations have been informed by a robust and proportionate site assessment process.	No	S16.2 Bicton (BIT023)
A0350	B006	Update the draft development guidelines for proposed allocation BOM019 to: -Reference access via the roundabout and associated road (Trinity View) which serves the adjacent development site, rather than access via Shrewsbury Road. -Recognise that a pedestrian footway has already been provided between the village and cricket/football pitch.	Noted. The current proposed guideline indicates that "an appropriate highway access will be provided off Shrewsbury Road". Should the current access be acceptable when assessed against the detail of a planning application, the policy does not stipulate that the access arrangements need to new. No change proposed.	No	S16.2 Bomere Heath
A0564	B001	BOM021, BOM022a and BOM022b should be allocated instead of the preferred options BOM019 and BOM020.	Shropshire Council considers that the proposed development strategy for Bomere Heath and the existing commitments (including the existing allocation), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This strategy has been informed by consideration of the characteristics, constraints and opportunities that exist within the settlement. Proposed site allocations have been informed by a robust and proportionate site assessment process.	No	S16.2 Bomere Heath

A0124	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	BOM020	Yes	No	Yes	The proposed allocation adjoins an existing playing field, previously laid out as a football pitch. This pitch has now been leased to the cricket club to the south (and adjacent) with a view to developing a 2nd cricket pitch. The location of the proposed housing allocation gives rise to concerns that the development may prejudice the use of the playing field due to the proximity of the playing field to the proposed housing site, and the associated risk of ball strike. From experience, Sport England is aware that club cricketers are capable of striking a cricket ball in the region of 70-80 metres, which would potentially put the proposed development at risk of ball strike, since the cricket pitch would be likely to be in the region of 45 metres from the site boundary.
A0526	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Condover	Not Specified	No	Not Specified	The Shrewsbury Place plan area disregards the significance of the settlement of Condover which is a major settlement close to Shrewsbury on the southern side and should be a community Hub delivering substantial housing development. The proposal to rely solely on the Neighbourhood Plan to possibly bring any form of housing forward renders the Plan unsound and is an abdication of the Councils duties a LPA.
A0037	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Cross Houses	Not Specified	No	Not Specified	Only 90 dwellings as a guideline for Cross Houses – no explanation for reduction from 130 (at 2018 Preferred Options). Low guideline will restrict delivery in a sustainable village.
A0156	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Cross Houses	Not Specified	No	Not Specified	Cross Houses should be identified as countryside rather than a Community Hub, to ensure no significant housing development occurs within the proposed Plan period. Furthermore whilst the draft Shropshire Local Plan does not propose to allocate significant new housing sites in the settlement, Community Hub status allows for the possibility of future development when the draft Plan is next refreshed. Concerned about the significant level of housing that has recently occurred in Cross Houses. Residents have had to put up with associated increases in traffic, construction/traffic noise and loss of countryside. Consider the majority of residents do not want further large scale development in the village. A housing need survey needs to be undertaken to establish what the community wants. The consultation did not ask the community if they want more housing or to remain as countryside. There are several areas of contention within the Hierarchy of Settlements Assessment, which the Inspector should review. Specifically Cross Houses: -Is awarded points for a library, however only provision is a mobile library (visits 2x a month for 25 minutes each). Consider a library for the purpose of this assessment is a permanent fixture, as per all other facilities. -Has only a single children's playground and amenity green space, not multiple provision. -Outdoor sports facility is not owned by the Parish and regularly flooded over the last 3 months.
A0157	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Cross Houses	Not Specified	No	Not Specified	Cross Houses should be identified as countryside rather than a Community Hub, to ensure no significant housing development occurs within the proposed Plan period. Furthermore whilst the draft Shropshire Local Plan does not propose to allocate significant new housing sites in the settlement, Community Hub status allows for the possibility of future development when the draft Plan is next refreshed. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0124	B010	Site guidelines be amended to include the following: The developer should undertake a ball strike assessment to assess the risk of ball strike from the use of the adjoining playing field to the south of the site. The assessment should be submitted with any planning application to develop the site. Subject to the recommendations of this assessment, where any mitigation is deemed to be required in the form of ball catch fencing or similar that such works will be required to be undertaken and subsequently maintained in perpetuity by the developer.	For the sake of clarity, it is proposed that a minor modification is made to the 5 <sup>th</sup> paragraph of the guidelines for site BOM020.	Yes	S16.2 Bomere Heath BOM020
A0526	B001	Condover should be a community hub. Our proposed site should be included.	Shropshire Council considers that the approach to identifying proposed Community Hubs, through a Hierarchy of Settlements Assessment, is appropriate. It is also considered that the methodology applied within the Hierarchy of Settlements Assessment, is appropriate and has been applied consistently across Shropshire. As such is considered appropriate for Condover to not be identified as a proposed Community Hub.	No	S16.2 Condover
A0037	B001	Increase housing guideline for Cross Houses back to 130 and include CSH006.	Cross Houses is appropriately designated as a Community Hub on the size of the settlement and the services and facilities it provides. The settlement strategy for Cross Houses is clearly explained in the Draft Local Plan. Cross Houses is a modest sized settlement which experiences significant development pressures due to its location to the south-east of Shrewsbury. Larger scale housing development has already been permitted in Cross Houses as a result of previous housing land supply issues in the County. This occurred even though Cross Houses was designated as a Countryside settlement where housing development is strictly controlled. The proposed change in the status of Cross Houses to become a Hub settlement did include a proposal for a further housing site but this has not been allocated for development due to unresolved access constraints. An alternative allocation for housing development has not been identified in Cross Houses so the village and its community may assimilate the significant housing development currently being delivered in the village. This will also relieve the pressure from further development on two separate Ramsar sites located close to Cross Houses. The preferred strategy for Cross Houses as a Hub settlement is therefore for a slightly lower scale of housing development to be delivered on small scale infilling or redevelopment sites within the village.	No	S16.2 Cross Houses
A0156	B001	Identify Cross Houses as countryside rather than a Community Hub.	Noted. Shropshire Council considers the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cross Houses where the service score has been adjusted but did not affect the suitability of the settlement to function as a Community Hub. As such it is considered appropriate for Cross Houses to be designated as a Community Hub in the draft Shropshire Local Plan. The proposed strategy for Cross Houses as a Community Hub recognises the level of development that has occurred over recent years including the level of new housing that is already committed within the village. The draft Shropshire Local Plan proposes a development guideline which can now be fully achieved through further small-scale windfall development alone and does not propose to allocate any additional land for significant housing development in the village. It is considered that this proposed strategy for Cross Houses is appropriate, effective, sustainable and deliverable.	No	S16.2 Cross Houses
A0157	B001	Identify Cross Houses as countryside rather than a Community Hub.	Noted. Shropshire Council considers the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cross Houses where the service score has been adjusted but did not affect the suitability of the settlement to function as a Community Hub. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0163	B001	Identify Cross Houses as countryside rather than a Community Hub.	<p>Noted. Shropshire Council considers the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cross Houses where the service score has been adjusted but did not affect the suitability of the settlement to function as a Community Hub. As such it is considered appropriate for Cross Houses to be designated as a Community Hub in the draft Shropshire Local Plan.</p> <p>The proposed strategy for Cross Houses as a Community Hub recognises the level of development that has occurred over recent years including the level of new housing that is already committed within the village. The draft Shropshire Local Plan proposes a development guideline which can now be fully achieved through further small-scale windfall development alone and does not propose to allocate any additional land for significant housing development in the village. It is considered that this proposed strategy for Cross Houses is appropriate, effective, sustainable and deliverable.</p>	No	S16.2 Cross Houses
A0164	B001	Identify Cross Houses as countryside rather than a Community Hub.	<p>Noted. A0167	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Cross Houses	Not Specified	No	Not Specified	<p>Cross Houses should be identified as countryside rather than a Community Hub, to ensure no significant housing development occurs within the proposed Plan period. Furthermore whilst the draft Shropshire Local Plan does not propose to allocate significant new housing sites in the settlement, Community Hub status allows for the possibility of future development when the draft Plan is next refreshed.</p> <p>Concerned about the significant level of housing that has recently occurred in Cross Houses. Residents have had to put up with associated increases in traffic, construction/traffic noise and loss of countryside. Consider the majority of residents do not want further large scale development in the village. A housing need survey needs to be undertaken to establish what the community wants.</p> <p>The consultation did not ask the community if they want more housing or to remain as countryside.</p> <p>There are several areas of contention within the Hierarchy of Settlements Assessment, which the Inspector should review. Specifically Cross Houses:</p> <ul style="list-style-type: none"> <li>-Is awarded points for a library, however only provision is a mobile library (visits 2x a month for 25 minutes each). Consider a library for the purpose of this assessment is a permanent fixture, as per all other facilities.</li> <li>-Has only a single children's playground and amenity green space, not multiple provision.</li> <li>-Outdoor sports facility is not owned by the Parish and regularly flooded over the last 3 months.</li> </ul>
A0168	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Cross Houses	Not Specified	No	Not Specified	<p>Cross Houses should be identified as countryside rather than a Community Hub, to ensure no significant housing development occurs within the proposed Plan period. A0179	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Cross Houses	Not Specified	No	Not Specified	<p>Cross Houses should be identified as countryside rather than a Community Hub, to ensure no significant housing development occurs within the proposed Plan period. Furthermore whilst the draft Shropshire Local Plan does not propose to allocate significant new housing sites in the settlement, Community Hub status allows for the possibility of future development when the draft Plan is next refreshed.</p> <p>Concerned about the significant level of housing that has recently occurred in Cross Houses. Residents have had to put up with associated increases in traffic, construction/traffic noise and loss of countryside. Consider the majority of residents do not want further large scale development in the village. A housing need survey needs to be undertaken to establish what the community wants.</p> <p>The consultation did not ask the community if they want more housing or to remain as countryside.</p> <p>There are several areas of contention within the Hierarchy of Settlements Assessment, which the Inspector should review. Specifically Cross Houses:</p> <ul style="list-style-type: none"> <li>-Is awarded points for a library, however only provision is a mobile library (visits 2x a month for 25 minutes each). Consider a library for the purpose of this assessment is a permanent fixture, as per all other facilities.</li> <li>-Has only a single children's playground and amenity green space, not multiple provision.</li> <li>-Outdoor sports facility is not owned by the Parish and regularly flooded over the last 3 months.</li> </ul>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0191	B001	Identify Cross Houses as countryside rather than a Community Hub.	<p>Noted. Shropshire Council considers the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cross Houses where the service score has been adjusted but did not affect the suitability of the settlement to function as a Community Hub. As such it is considered appropriate for Cross Houses to be designated as a Community Hub in the draft Shropshire Local Plan.</p> <p>The proposed strategy for Cross Houses as a Community Hub recognises the level of development that has occurred over recent years including the level of new housing that is already committed within the village. The draft Shropshire Local Plan proposes a development guideline which can now be fully achieved through further small-scale windfall development alone and does not propose to allocate any additional land for significant housing development in the village. It is considered that this proposed strategy for Cross Houses is appropriate, effective, sustainable and deliverable.</p>	No	S16.2 Cross Houses

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0204	B001	Identify Cross Houses as countryside rather than a Community Hub.	<p>Noted. Shropshire Council considers the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cross Houses where the service score has been adjusted but did not affect the suitability of the settlement to function as a Community Hub. As such it is considered appropriate for Cross Houses to be designated as a Community Hub in the draft Shropshire Local Plan.</p> <p>The proposed strategy for Cross Houses as a Community Hub recognises the level of development that has occurred over recent years including the level of new housing that is already committed within the village. The draft Shropshire Local Plan proposes a development guideline which can now be fully achieved through further small-scale windfall development alone and does not propose to allocate any additional land for significant housing development in the village. It is considered that this proposed strategy for Cross Houses is appropriate, effective, sustainable and deliverable.</p>	No	S16.2 Cross Houses

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0224	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Cross Houses	Not Specified	No	Not Specified	Cross Houses should be identified as countryside rather than a Community Hub, to ensure no significant housing development occurs within the proposed Plan period. Furthermore whilst the draft Shropshire Local Plan does not propose to allocate significant new housing sites in the settlement, Community Hub status allows for the possibility of future development when the draft Plan is next refreshed. Concerned about the significant level of housing that has recently occurred in Cross Houses. Residents have had to put up with associated increases in traffic, construction/traffic noise and loss of countryside. Consider the majority of residents do not want further large scale development in the village. A housing need survey needs to be undertaken to establish what the community wants. The consultation did not ask the community if they want more housing or to remain as countryside. There are several areas of contention within the Hierarchy of Settlements Assessment, which the Inspector should review. Specifically Cross Houses: -Is awarded points for a library, however only provision is a mobile library (visits 2x a month for 25 minutes each). Consider a library for the purpose of this assessment is a permanent fixture, as per all other facilities. -Has only a single children's playground and amenity green space, not multiple provision. -Outdoor sports facility is not owned by the Parish and regularly flooded over the last 3 months.
A0375	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16	Not Specified	Yes	Not Specified	Berrington Parish Council is commenting on that part of the Local Plan that relates to Cross Houses within the Shrewsbury Rural Place Plan. The Parish Council is content with what is set out for Cross Houses of 0 allocations within the Local Plan but with windfall allowance of 9 properties. The Parish Council commented on their desire to remain as Open Countryside rather than be identified as a Hub in a previous consultation but accept that Cross Houses does meet with many of the criteria to identify it as a Hub.
A0581	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 DGN018	Yes	No	Yes	DGN018 is a fully deliverable site with an area of 0.64 ha. We believe this site is suitably placed to provide development in the Community Hub of Dorrington towards the preferred dwelling guideline to be determined by the Parish Council of 150 dwellings. The land is situated with an established excellent access to the A49 and adjoining recently developed land providing natural infill. Site DGN018 has achieved a sustainability rating of '-5', which is one of the better ratings compared to the other sites within Dorrington. The land is well positioned with the southern boundary adjoining the highway and the western boundary adjoining land that has recently gained residential planning permission. To the north and the east boundaries is an established boundary hedge providing natural screening.
A0108	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP7 and S16.2 Ford	Yes	No	Yes	Ford has been identified as a Community Hub, however one residential allocation is proposed. The Council should have a duty to allocate more than one site to provide more potential for delivery. Proposed allocation FRD011 will be a dominant feature when passing through the village via the A458. Suggest inclusion of our land in the heart of Ford (plan appended to representation) as it provides scope for housing in the historic heart of the village and offer the potential for other facilities which are beneficial to the village in the future. It appears the Council did not give sufficient consideration to the benefits of this site to deliver housing, albeit initial discussions occurred. This site benefits from good access to the A458 and is within walking distance of a range of local facilities.
A0348	B037	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2(i) FRD011	Not Specified	Yes	Not Specified	Welcomes proposed Development Guideline for FRD011 which requires supporting studies, including a heritage assessment with particular focus on potential archaeology and that their recommendations should be clearly reflected in the development scheme for the site.
A0366	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Ford	Not Specified	No	Not Specified	Support Ford's allocation as a Hub, however there is too much reliance on windfall development. The Plan in its current format ignores the cluster of development in Ford around the junction of Back Lane with the A458 and therefore the opportunity to enable windfall residential development in an area centred around some of the settlements most significant services and facilities. This is a missed opportunity to provide additional windfall opportunities in a highly sustainable location within the settlement.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0224	B001	Identify Cross Houses as countryside rather than a Community Hub.	<p>Noted. Shropshire Council considers the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Cross Houses where the service score has been adjusted but did not affect the suitability of the settlement to function as a Community Hub. As such it is considered appropriate for Cross Houses to be designated as a Community Hub in the draft Shropshire Local Plan.</p> <p>The proposed strategy for Cross Houses as a Community Hub recognises the level of development that has occurred over recent years including the level of new housing that is already committed within the village. The draft Shropshire Local Plan proposes a development guideline which can now be fully achieved through further small-scale windfall development alone and does not propose to allocate any additional land for significant housing development in the village. It is considered that this proposed strategy for Cross Houses is appropriate, effective, sustainable and deliverable.</p>	No	S16.2 Cross Houses
A0375	B001	n/a	Noted.	No	S16.2 Cross Houses
A0581	B001	DGN018 should be considered for residential development.	A Neighbourhood Plan is being progressed which covers the settlement of Dorrington. The Neighbourhood Plan will include the strategy for achieving the housing and employment guidelines for the proposed Community Hub of Dorrington.	No	S16.2 Dorrington (DGN018)
A0108	B002	Consider allocation of site promotion (plans appended to representation) at Ford.	<p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Ford. Consequently, it is considered appropriate that Ford is identified as a proposed Community Hub and it is further proposed to identify a development guideline, development boundary and a housing allocation on site FRD011 consistent with other rural settlements considered to be appropriate for designation as a Community Hub for policy purposes. Shropshire Council also considers that the proposed development strategy for Ford and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this other promoted site. The development boundary is focused on the area of the village directly fronting onto the A458 Trunk Road or serviced from the primary junction with the A458 at But Lane. The development boundary provides for the allocation at FRD011 and will permit further small scale windfall development to meet a modest allowance for the remaining plan period to 2038. The anticipated windfall development is expected to reflect the pattern of recent approvals for small housing schemes in the village. It is therefore considered that Ford is appropriately designated as a Community Hub in the draft Shropshire Local Plan and that suitable provision has been made for housing development to meet the development guideline for the village.</p>	No	S16.2 Ford
A0348	B037	N/A	The support is welcomed for Policy S16.2 in the draft Shropshire Local Plan setting out the settlement strategy for Ford and recognising the significance of the proposed housing allocation to the role of the village and the opportunity to secure new housing within this community and recognising the contribution this will make to the growth of Shropshire.	No	S16.2 Ford
A0366	B001	<p>The development boundary identified on Inset Map S16a – 'Ford' is amended to include:</p> <ul style="list-style-type: none"> <li>☑ the cluster of development around the junction of Back Lane with the A458, which forms an important part of the settlement and is a sustainable location for future development; and</li> <li>☑ brownfield sites previously found by the Authority to be sustainable locations for new development and residential sites currently under construction</li> </ul> <p>This proposed extension to the development boundary of the settlement, to include the land identified on the plan at figure 1 below, will provide further opportunities for windfall development, ensuring that the needs of the settlement and its hinterland are met over the Plan period.</p>	<p>Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Ford. Consequently, it is considered appropriate that Ford is identified as a proposed Community Hub and it is further proposed to identify a development guideline, development boundary and a housing allocation on site FRD011 consistent with other rural settlements considered to be appropriate for designation as a Community Hub for policy purposes. The development boundary around Ford reflects the need to identify an appropriate development guideline to recognise existing planned commitments in the village and to make provision for further new housing and to define an appropriate development boundary within which, this development may occur. The development boundary is focused on the area of the village directly fronting onto the A458 Trunk Road or serviced from the primary junction with the A458 at But Lane. The development boundary excludes the more sensitive areas of the village within the Conservation Area and more isolated and less accessible locations including Back Lane. The development boundary provides for the allocation at FRD011 and will permit further small scale windfall development to meet a modest allowance for the remaining plan period to 2038. The anticipated windfall development is expected to reflect the pattern of recent approvals for small housing schemes in the village. It is therefore considered that Ford is appropriately designated as a Community Hub in the draft Shropshire Local Plan and that suitable provision has been made for housing development to meet the development guideline for the village.</p>	No	S16.2 Ford

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0457	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Ford	No	No	No	Ford should not be a Hub - the Hierarchy of Settlements is flawed. Ford has scored 51 points but the scoring system has been misapplied and the correct number of points is 42. Hub status should also be removed due to Conservation Area, lack of infrastructure, soils, minerals, species, contrary to RHRP findings. Petition against this Hub status. Plan is unsound as consultation responses ignored. Question the summary of the previous consultation. No evidence has been produced that the local housing need will be met. There is no infrastructure plan.
A0540	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Ford	No	No	Not Specified	Ford does not enjoy the facilities to cope with the housing proposed in the LPR. Previous developments in the village have been met with false promises. Further house building in Ford before the promised infrastructure changes are delivered is, therefore, contrary to the Government's and the Council's own guidelines. Ford is not a Hub by any nationally agreed definition and lacks many services. School numbers cannot cope. 125 is contradictory to the Government's green strategy and the Council's 2019 declaration of a climate emergency. Car dependency - affects climate change. No local demand for affordable housing. The current proposal appears to be no more than a justification for meeting a house-building target, away from real Community hubs and with no apparent regard for the quality of life of those who live there. The consultees' comments were never presented to the decision-making body. What was presented instead was a 'summary' of the comments. These summaries were so short, and so general in nature that the thrust and importance of the issues raised was lost. This appears to be a clear case of maladministration by Shropshire Council.
A0347	B086	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Shrewsbury	No	No	Not Specified	This site falls within SPZ2/3 of a public water supply source. Consequently the hydrogeological setting is highly sensitive. It is therefore essential that appropriate land uses, drainage design and pollution prevention measures are adopted.
A0110	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Hanwood	Yes	No	Yes	Hanwood has been identified as a Community Cluster, however consider the housing guideline cannot be delivered within the out-of-date development boundary. To accommodate the proposed 'windfall' dwellings, it is necessary to either extend the development boundary or allocate new sites for residential development. This has already happened in that two large development sites have occurred beyond the development boundary in the adopted Local Plan. Suggest Policy S16.2 is amended to propose an extension to the development boundary for Hanwood to include land west of Orchard Lane as an allocated site (plan appended to representation). This site (HWD005) has previously been identified as a "Long Term Potential" residential site in the SLAA. this site could deliver an upgrade to Orchard Lane and the unmade track to Highfield, which would represent significant benefits to the community. The landowners through their agents are continuing to talk with the local highways authority regarding existing highway concerns and are considering making a Planning Application for the confirmation of existing recently approved development.
A0466	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.4 HWD001X	Yes	Not Specified	Not Specified	No more housing needed for this area. Overdevelopment in recent years. Access restricted. Very small site
A0466	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.4 HWD002	Yes	Not Specified	Not Specified	No more housing needed for this area. Overdevelopment in recent years. Access restricted. Access via an unadopted road which is not suitable for more vehicular traffic. Access of the unadopted road onto the main highway unsafe.
A0466	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.4 HWD003	Yes	Not Specified	Not Specified	No more housing needed for this area. Overdevelopment in recent years. Access restricted. Access onto the main highway not good. Area separated from Hanwood by area of open countryside.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0457	B001	Ford should no longer be designated as a community hub in Policy S16.2 and associated maps and supporting text. Ford should instead be Open Countryside	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Ford. Consequently, it is considered appropriate that Ford is identified as a proposed Community Hub and it is further proposed to identify a development guideline, development boundary and a housing allocation on site FRD011 consistent with other rural settlements considered to be appropriate for designation as a Community Hub for policy purposes. Ford has a service points score of 51 points above the threshold of 48 points to be designated as a Community Hub. This service score recognises the accessibility of the village from Shrewsbury by public transport and its broadband connectivity to electronic communications and services. The village also has a good range of local services including a primary school, local shop and petrol filling station, community hall, mobile library service, public house and church with a range of outdoor sports and play spaces. The proposed allocation FRD011 is expected to meet its own infrastructure requirements and to further improve the capacity of services where necessary to improve the infrastructure capacity of the village. It is therefore considered that Ford is appropriately designated as a Community Hub in the draft Shropshire Local Plan along with the allocation of site FRD011 for housing development.	No	S16.2 Ford
A0540	B001	Remove Ford's hub status. The Plan is amended to defines how an upgrade to the primary schooling capacity in Ford will be delivered before any new house building in Ford is approved. The plan is amended to reconcile the climate and environmental impact of additional house building in Ford with national and local requirements and aspirations, before any new house building in Ford is approved. The Plan details the evidence that there is local demand for 125 new homes in Ford before any new house building in Ford is approved. The Plan mandates a full assessment of the capability of all local services to cope with 125 new homes and that changes required as a result of that review are implemented before any new house building in Ford is approved. The Council re-runs the review of the public comments with the FULL text of the comments, un-edited by Council office workers, and re-issues the Plan following that review.	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Ford. Consequently, it is considered appropriate that Ford is identified as a proposed Community Hub and it is further proposed to identify a development guideline, development boundary and a housing allocation on site FRD011 consistent with other rural settlements considered to be appropriate for designation as a Community Hub for policy purposes. Ford has a service points score of 51 points above the threshold of 48 points to be designated as a Community Hub. This service score recognises the accessibility of the village from Shrewsbury by public transport and its broadband connectivity to electronic communications and services. The village also has a good range of local services including a primary school, local shop and petrol filling station, community hall, mobile library service, public house and church with a range of outdoor sports and play spaces. The proposed allocation FRD011 is expected to meet its own infrastructure requirements and to further improve the capacity of services where necessary to improve the infrastructure capacity of the village. It is therefore considered that Ford is appropriately designated as a Community Hub in the draft Shropshire Local Plan along with the allocation of site FRD011 for housing development.	No	S16.2 Ford
A0347	B086	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S16.2 Ford (FRD011)
A0110	B001	Suggest Policy S16.2 is amended to propose an extension to the development boundary for Hanwood to include land west of Orchard Lane as an allocated site. This site (HWD005) has previously been identified as a "Long Term Potential" residential site in the SLAA.	Noted. Shropshire Council considers that the proposed development strategy for Hanwood and the existing commitments (including the existing allocation) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This strategy has been informed by consideration of the characteristics, constraints and opportunities that exist within the settlement. It has also been informed by a proportionate and robust site assessment process has been undertaken, including consideration of this promoted site as part of a wider site promotion.	No	S16.2 Hanwood
A0466	B004	No more housing needed for this area. Overdevelopment in recent years. Access restricted. Very small site	Noted. Shropshire Council considers that the proposed development strategy for Hanwood and the existing commitments (including the existing allocation) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This strategy has been informed by consideration of the characteristics, constraints and opportunities that exist within the settlement. It has also been informed by a proportionate and robust site assessment process has been undertaken, including consideration of this promoted site as part of a wider site promotion.	No	S16.2 Hanwood (HWD001X)
A0466	B006	No more housing needed for this area. Overdevelopment in recent years. Access restricted. Access via an unadopted road which is not suitable for more vehicular traffic. Access of the unadopted road onto the main highway unsafe.	Noted. Shropshire Council considers that the proposed development strategy for Hanwood and the existing commitments (including the existing allocation) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This strategy has been informed by consideration of the characteristics, constraints and opportunities that exist within the settlement. It has also been informed by a proportionate and robust site assessment process has been undertaken, including consideration of this promoted site as part of a wider site promotion.	No	S16.2 Hanwood (HWD002)
A0466	B003	No more housing needed for this area. Overdevelopment in recent years. Access restricted. Access onto the main highway not good. Area separated from Hanwood by area of open countryside.	Noted. Shropshire Council considers that the proposed development strategy for Hanwood and the existing commitments (including the existing allocation) and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). A0580	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Hanwood	Yes	No	Yes	This site is suitably placed to provide the development of 22 dwellings by 2038, being situated with an access off B488 and adjoining previously developed land and the development boundary, plus walking distance to the school, local amenities and playing fields. The land is well positioned with access to the highway on the western adjoining land that has already been developed. The recently constructed residential developments sold very quickly, proving the demand for this site. All infrastructure is available. The land is well placed for the expansion of Hanwood in terms of its location to the school and facilities. There will be no requirement for children and parents to walk on a footpath on the very busy main road (A488), as the school would be accessed via the much safer route. The land is also well placed for access to the village hall, playing fields and school via walking and therefore without vehicles.
A0466	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.4 HWD004	Yes	Not Specified	Not Specified	No more housing needed for this area. Overdevelopment in recent years. Access restricted. Access onto the main highway not good. Area separated from Hanwood by area of open countryside.
A0466	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.4 HWD005	Yes	Not Specified	Not Specified	No more housing needed for this area. Overdevelopment in recent years. Access restricted. Access onto the main highway not good. Area separated from Hanwood by area of open countryside.
A0466	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.4 HWB006	Yes	Not Specified	Not Specified	No more housing needed for this area. Overdevelopment in recent years. Access restricted. Access onto the main highway not good. Area separated from Hanwood by area of open countryside. North Side of village wrong area for any further development. Important to maintain the green wedge between existing developments. Rurality of area would be lost. Large Development (1500 houses) being recommended on a nearby site off the A5
A0002	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Shrewsbury Hubs: Longden	Not Specified	No	Not Specified	Disagree with Hierarchy of Settlements as applied to Longden. Disagree with sites which have been included despite appeals on these sites being rejected (016 & 022).
A0003	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Shrewsbury Hubs: Longden	Not Specified	No	Not Specified	Disagree with Hierarchy of Settlements as applied to Longden. It has also been informed by a proportionate and robust site assessment process has been undertaken, including consideration of this promoted site as part of a wider site promotion.	No	S16.2 Hanwood (HWD006)
A0002	B001	Refers to correspondence from LVAG. Remove Community Hub status from Longden Village.	Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Longden. As such it is considered appropriate for Longden to be identified as a proposed Community Hub. However recognising the level of development that has occurred over recent years within the settlement, and its characteristics, constraints and opportunities the draft Shropshire Local Plan has identified a low residential development guideline of some 50 dwellings (equating to just over 2 dwellings per annum) for the settlement. Completions already achieved within the draft Shropshire Local Plan period from 2016-2038 and current commitments achieve around half of this proposed residential guideline. As such, it has been concluded that no specific site allocations are required to achieve the proposed residential development guideline and the remaining windfall allowance is some 27 dwellings (as at 31st March 2019). This is considered an appropriate, effective, sustainable and deliverable approach. In order to undertake a comprehensive site assessment process, numerous sources have been used to identify sites for consideration, including past Planning Applications. Consideration of such sites does not necessarily mean Shropshire Council endorses their development.	No	S16.2 Longden
A0003	B001	Refers to correspondence from LVAG. Remove Community Hub status from Longden Village.	Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Longden. As such it is considered appropriate for Longden to be identified as a proposed Community Hub. However recognising the level of development that has occurred over recent years within the settlement, and its characteristics, constraints and opportunities the draft Shropshire Local Plan has identified a low residential development guideline of some 50 dwellings (equating to just over 2 dwellings per annum) for the settlement. Completions already achieved within the draft Shropshire Local Plan period from 2016-2038 and current commitments achieve around half of this proposed residential guideline. As such, it has been concluded that no specific site allocations are required to achieve the proposed residential development guideline and the remaining windfall allowance is some 27 dwellings (as at 31st March 2019). This is considered an appropriate, effective, sustainable and deliverable approach. In order to undertake a comprehensive site assessment process, numerous sources have been used to identify sites for consideration, including past Planning Applications. Consideration of such sites does not necessarily mean Shropshire Council endorses their development.	No	S16.2 Longden
A0034	B001	Refers to correspondence from LVAG. Remove Community Hub status from Longden Village. Recognise needs of those with disabilities, particularly in Longden.	Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Longden. The consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. It is important that the needs of all groups within the community, including those with disability are met. The housing need of groups within the community are considered within the Strategic Housing Market Assessment (SHMA), which forms part of the evidence base and has informed draft Policies within the draft Shropshire Local Plan. Draft Policies also address such issues as high-quality design and health and wellbeing.	No	S16.2 Longden

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0045	B001	The Hierarchy of Settlements should include "weighting," to reflect the size of infrastructure, services and employment opportunities. The draft Shropshire Plan should have been paused earlier to assess issues raised by communities.	<p>Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Longden.</p> <p>As such it is considered appropriate for Longden to be identified as a proposed Community Hub.</p> <p>However recognising the level of development that has occurred over recent years within the settlement, and its characteristics, constraints and opportunities the draft Shropshire Local Plan has identified a low residential development guideline of some 50 dwellings (equating to just over 2 dwellings per annum) for the settlement. Completions already achieved within the draft Shropshire Local Plan period from 2016-2038 and current commitments achieve around half of this proposed residential guideline. As such, it has been concluded that no specific site allocations are required to achieve the proposed residential development guideline and the remaining windfall allowance is some 27 dwellings (as at 31st March 2019). This is considered an appropriate, effective, sustainable and deliverable approach.</p> <p>The evidence base for the Local Plan Review includes the Place Plans (documents which focus on local infrastructure needs in communities across the County), which are informed by proactive engagement with Town and Parish Council and Strategic Infrastructure Providers. It also includes a Strategic Infrastructure Implementation Plan, which is informed by the Place Plans.</p> <p>Shropshire Council is preparing the next Local Transport Plan (LTP4), which will be informed by proposals within the Local Plan Review.</p> <p>In order to undertake a comprehensive site assessment process, numerous sources have been used to identify sites for consideration, including past Planning Applications. Consideration of such sites does not necessarily mean Shropshire Council endorses their development.</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. A0057	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Shrewsbury Hubs: Longden	Not Specified	No	Not Specified	Disagree with Hierarchy of Settlements as applied to Longden. Disagree with sites which have been included despite appeals on these sites being rejected (016 & 022).
A0058	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Shrewsbury Hubs: Longden	Not Specified	No	Not Specified	Disagree with Hierarchy of Settlements as applied to Longden. Disagree with sites which have been included despite appeals on these sites being rejected (016 & 022).
A0077	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Longden	Not Specified	No	Not Specified	Do not consider the draft Shropshire Local Plan is sound or sustainable. Do not agree with the methodology adopted in the Hierarchy Assessment as applied to Longden. Specific concerns addressed within the Longden Village Action Group (LVAG) Regulation 18 response. Obtaining the same level of points for a permeant and mobile library is inappropriate. Unclear why sites previously rejected/refused at appeal are considered.
A0095	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Longden	Not Specified	No	Not Specified	Do not consider the draft Shropshire Local Plan or the Hierarchy of Settlement evidence base document to be sound or sustainable. Consider the Hierarchy of Settlements is inappropriate as it does not apply 'weighting' to services and facilities so large settlements are scored the same was as small settlements. For instance it seems ludicrous that a permanent library facility is scored the same as a mobile library that visits once a month. How can Longden with few employment opportunities be judged on the same basis as a larger settlement. See LVAG letter for further examples. Disagree with sites which have been included despite appeals on these sites being rejected (016 & 022). With regard to the Zero Carbon target, consider building large numbers of housing in rural settlements is not sound as more residents will need to commute, increasing carbon emissions. See LVAG letter.

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0097	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Longden	Not Specified	No	Not Specified	<p>Concerned the draft Shropshire Local Plan is unsound as the methodology for distributing site allocations throughout the county is flawed and irrational. The allocation of Longden as a Community Hub has not been “justified” and is not supported by the evidence. This status is inappropriate for the village and its residents. Other Community Hubs are much larger, aligning Longden with them will inevitably lead to pressure for development. Community considers remaining a Community Cluster would preserve the character of the Parish and safeguard open countryside, traditional customs and the landscape.</p> <p>The Hierarchy of Settlements methodology and scoring of Longden is flawed, blunt and wrong. Points allocations do not recognise size and capacity of facilities. No employment provision in Longden should result in a negative score. Providing the same points for a mobile library (which visits for 10 minutes once a fortnight when people are unable to use) as a permanent library is ridiculous. The Longden shop is also the post office and is very small, it is unfair that this gets so many points and the same amount of points as a settlement with multiple provision. The Longden Public transport link is regular but so infrequent it has little effect on sustainability (timetable does not allow for use by office/shop workers in Shrewsbury and connection timing prohibit onward transportation to other towns), it is wrong that this scores 10 points. Reducing points in the Settlement Hierarchy Assessment to a more realistic and rational number in these areas would lower the village points to below the Community Hub status threshold.</p> <p>Aware that other villages and individuals have concerns regarding the scoring system. This should be considered before any decision on 'soundness' is reached.</p> <p>The proposed development boundary for Longden provokes discussion regarding where and how new housing will be delivered. Shropshire Council identify exception sites. The Right Home Right Place survey highlighted particular housing need and how this is expected to be met by exception sites is unclear. Do not want an unplanned adhoc approach to development resulting in the loss of high-value agricultural fields.</p> <p>Particularly concerned that previous well documented objections to the draft Shropshire Local Plan will not be presented to the examining inspector.</p> <p>Level of development proposed contradicts Core Strategy objective 3 which seeks to support rural communities by the delivery of local housing, appropriate to the role, size, and function of each settlement. The section on Longden (para 19.75) refers to a 'modest amount of additional housing'. Little weight has been given to the character and quality of the local environment and the impact further development would have on the village character as required by objective 11 of the Core Strategy.</p> <p>There has been significant development in Longden Parish (nearly double that within the SAMDev guideline). Residents now consider enough is enough. Infrastructure, road links and amenities in the village are at capacity. Others, like primary care services are only accessible via car down single track lanes. Congestion on road links (including the single link from Longden Parish into Shrewsbury) have also been exacerbated by development north and south of the village. Yet no infrastructure Plan has been prepared.</p> <p>When considering climate change and carbon emissions, it would make more sense to focus development in urban areas, saving car journeys.</p> <p>Concerned about dissemination of information, particularly during Covid 19 limitations.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0097	B001	<p>Longden Parish Council have consulted the residents on several occasions recently and the overwhelming consensus is that Longden Village should be designated a Community Cluster rather than a Community Hub and the other settlements within the Parish be designated open countryside.</p> <p>Consider the scoring system for allocating points in the Hierarchy of Settlements is wrong and should be revisited to enable the new Local Plan to be deemed sound and fit for purpose.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Longden.</p> <p>As such it is considered appropriate for Longden to be identified as a proposed Community Hub.</p> <p>The proposed development strategy for Longden, including the proposed development boundary and approach to delivering the proposed development guideline, is also considered appropriate, effective, sustainable and deliverable. Specifically, recognising the level of development that has occurred over recent years within the settlement, and its characteristics, constraints and opportunities the draft Shropshire Local Plan has identified a low residential development guideline of some 50 dwellings (equating to just over 2 dwellings per annum) for the settlement. Completions already achieved within the draft Shropshire Local Plan period from 2016-2038 and current commitments achieve around half of this proposed residential guideline. As such, it has been concluded that no specific site allocations are required to achieve the proposed residential development guideline and the remaining windfall allowance is some 27 dwellings (as at 31st March 2019).</p> <p>Shropshire Council considers that the consultation process undertaken to inform the Local Plan Review has been appropriate and complies with the requirements of the current and emerging Statement of Community Involvement. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy. The Consultation Statement for the draft Shropshire Local Plan includes appendices summarising previous stages of consultation.</p>	No	S16.2 Longden
A0154	B001	<p>Revisit the Hierarchy of Settlements assessment and allocate Longden Village as a Community Cluster rather than a Community Hub.</p>	<p>Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Longden.</p> <p>As such it is considered appropriate for Longden to be identified as a proposed Community Hub.</p> <p>However recognising the level of development that has occurred over recent years within the settlement, and its characteristics, constraints and opportunities the draft Shropshire Local Plan has identified a low residential development guideline of some 50 dwellings (equating to just over 2 dwellings per annum) for the settlement. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0237	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2	Not Specified	No	Not Specified	Do not consider the draft Shropshire Local Plan is sound or sustainable. Do not agree with the methodology adopted in the Hierarchy Assessment as applied to Longden. Specific concerns addressed within the Longden Village Action Group (LVAG) Regulation 18 response. Unclear why sites previously rejected/refused at appeal are considered.
A0494	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Longden	No	No	No	Do not consider the Draft Shropshire Local Plan sound or sustainable - see previous Regulation 18 representations. In particular, consider the points system/methodology used within the Hierarchy of Settlements is totally unsound and do not agree with its application in Longden - as explained in detail by the letter from LVAG. Thought Community Hub status would be identified by services and facilities, including employment opportunities and believe Longden does not provide them. It has a small primary school and nursery; no secondary school; pub only open 3 days a week; village shop and post office are combined, costly, have limited stock and are very small; no permanent library (mobile once a fortnight for 10 mins only); no doctors surgery; no superfast broadband; sports facilities are limited to two tennis courts and a football field adjacent to a small children's playground; few employment opportunities (resulting in significant commuting to Shrewsbury and beyond); no cycle lanes or potential for them due to narrow roads; and a limited bus service (regular but it is not sufficiently frequent to have a major impact on sustainability - it is impossible to connect with either trains or other buses out of Shrewsbury town centre to reach other destinations at a reasonable time in the morning or returning in the evening and the service does not go direct to Pontesbury, Bayston Hill or Dorrington where catchment GPs are located). This cannot be compared to other settlements like Pontesbury and Minsterley which achieve similar scores. This increases reliance on private vehicles. Longden is a very small and ancient village with mature trees and hedgerows, that is only a fraction of the size of all the other villages in the area. It has limited road infrastructure (in places roads are narrow and single width, it is difficult for two large vehicles to pass, and there is no pavement) that reflects the size of the current community. The main road to Shrewsbury is unclassified. Connections to the A49 and A5 require travel on narrow, often single-track lanes, where large vehicles cannot pass. In 2018 a community survey was undertaken and concluded the community wished to remain a Community Cluster and was opposed to becoming a Community Hub. Distressed local views are being ignored. Development in Longden and Community Hub status for the village will have a negative impact on the climate, significantly increase carbon emissions and congestion. It could also destroy the villages ethos and result in loss of hedgerows (replacements take years to mature). Arrow Court is one such example - blot on the landscape; construction caused noise, dust, etc disturbances; road too narrow and gardens paved for parking. Community Cluster status would enable Longden to experience some growth through infill (in addition to the significant growth experienced in recent years) whilst minimising carbon emissions, although even this should be carefully looked at to protect the village ethos. If we are to meet Climate Change targets, limitations in infrastructure needs to be addressed before significant numbers of housing are built. Feel strongly about and distressed by proposals to designate Longden a Community Hub, as building could be anywhere in the village. Supported Right Home, Right Place surveys which indicated a need for 18 homes, this has been ignored as it did not provided anticipated need. Furthermore I do not understand why some proposed development sites are included when they have been subject to appeals and previously rejected. In particular, sites 016 and 002.
A0612	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 Longden	Not Specified	No	Not Specified	Concerned regarding proposals for Longden to be identified as a Community Hub and feel this is fundamentally unsound. Development resulting from this status would be out of keeping with the character and beyond the capacity of this small rural community. It would also result in loss of green spaces. Longden is not a community on the scale of Hanwood, Pontesbury or Bayston Hill. Development on the scale of these other communities, without the infrastructure or support for it (the school is full, the shop is small but ideal for the village etc) would eradicate its attraction and identity. Disagree with Hierarchy of Settlements as applied to Longden. The ways in the small shop, very brief visit by the library van and occasionally opening pub have been considered as being major facilities is unsound. Disagree with sites which have been included despite appeals on these sites being rejected (016 & 022).

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0467	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2 NES012	Not Specified	Not Specified	Not Specified	The parish council supports the Nesscliffe policy
A0353	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.2	Not Specified	No	Not Specified	See A0353 B001. Consider the correct Hierarchy of Settlements Assessment (HoS) points score for Westbury is some 52, which exceeds the threshold for Community Hub status. As such, the draft Shropshire Local Plan is unsound as Westbury has not been identified as a proposed Community Hub. Based on consideration of the correct HoS score and population size (in comparison with other proposed Community Hubs - table provided within representation), consider a residential guideline of around 60 dwellings would be appropriate. Most of the central and western portions of Westbury lie within the conservation area (map provided within representation). However, sites WEY006 and WEY019 (site plan appended to representation) to the east of the town are unconstrained (arboricultural and ecological reports have previously been submitted and a suitable access can be established off Shrewsbury Road (plan provided as appendix to representation).
A0575	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP2.3	Yes	No	Yes	The site to the south of Westbury [WEY015] is a well located and fully deliverable site. The land is well placed for the expansion of Westbury in terms of its location. Therefore, we believe Westbury should be deemed a Community Hub. The land is also well placed for access to the village hall, Church and public house. This is a site that can be fully self-contained to provide a phased level of housing required, with an access that will not have a negative impact on the existing infrastructure.
A0534	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16.3	Yes	No	Yes	The Council appears to have removed the Community Cluster status of Uffington without reasoned justification. This is surprising in the circumstances that the SAMDev housing requirement for Uffington has not been delivered by the development allocated UFF006/10 site which has only provided a single very large dwelling. No discussions have taken place with the landowners or LSP as their agent in their regards despite the interest shown by the landowners in making their land available for development over a number of years and who are currently looking to collaborate with a developer, to put together a scheme of cross subsidy housing which would provide a range of housing opportunities in the village and local community area.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0467	B003	query an apparent inconsistency in the document – on p322 of the main document part of Site Ness012 is identified as being allocated but the sustainability appraisal states the site should remain as countryside. It is very hard to check this accurately from the map as Site 0012 is not labelled. This inconsistency needs to be reviewed and be consistent with the sustainability appraisal.	Shropshire Council welcomes the support for Policy S16.2 in the draft Shropshire Local Plan setting out the settlement strategy for Nesscliffe and recognising the significance of the proposed housing allocations to the role of the village and the opportunity to secure new housing within this community and also recognising the contribution this will make to the growth of Shropshire.	No	S16.2 Nesscliffe
A0353	B002	Include Westbury as a proposed Community Hub in the draft Shropshire Local Plan. Identify a proposed residential guideline for Westbury of around 60 dwellings and include two proposed allocations (WEY006 for 20 dwellings and WEY019 for 30 dwellings, proposed site guidelines provided within representation) to contribute to achieving this proposed residential guideline. The draft Policies Map should be amended to show a development boundary around Westbury, extending the village development boundary eastwards along Shrewsbury Road/B4386 Roman Road to include sites WEY006 and WEY019 (map provided as an appendix to the representation). Make necessary associated corrections to the draft Shropshire Local Plan.	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Westbury. Consequently, it is considered appropriate that Westbury is not identified as a proposed Community Hub and it is not proposed to identify a development guideline, development boundary or identify proposed allocations - consistent with other rural settlements considered countryside for policy purposes. Within the HoS, the size of a settlements population/number of dwellings are specifically considered within Stage 2: Screening of Settlements, whilst provision of services and facilities; high speed broadband; employment opportunities; and public transport links are specifically considered within Stage 3: Assessment of Screened-In Settlements. This is considered an appropriate methodology by which to identify Community Hubs, which are considered significant rural service centres. With regard to Westbury: -Within the HoS consideration of open space is primarily informed by the Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Within this Open Space Needs Assessment two outdoor sports facilities were identified in and around Westbury, however one was excluded from the assessment as it was a dedicated school facility (consistent with the HoS methodology). Whilst this primary school has since closed, this facility is now used as a special education needs school, as such the associated outdoor sports facility remains a dedicated school facility. Within this Open Space Needs Assessment, no amenity green space is identified in or around Westbury, rather Westbury Recreation Ground is identified as an outdoor sports facility (and included within the assessment as such). -Within the HoS both Nigel Farr Farm Services and G O Davies (Westbury) Ltd were considered within the assessment of significant employment opportunities. However, whilst it was concluded that G O Davies (Westbury) Ltd represented a significant employment opportunity as defined within the HoS (and is included within the HoS as such), it was concluded that Nigel Farr Farm Services did not constitute a significant employment opportunity as defined within the HoS. Westbury Special Education Needs School is also not considered to constitute a significant employment opportunity as defined within the HoS. With regard to the Proposed Development Sites: - Sites WEY006 and WEY019 are located to the east of the village on the Shrewsbury Road giving access to the Shropshire side of the village with the west side being located closer to the Welsh border. The two sites are located some distance from the route of the Westbury Brook and the sites themselves are situated outside the worst affected flood risk areas in Westbury albeit WEY019 has some lower lying areas affected by surface water flooding. - WEY006 does have a primary road frontage and is located close to some of the principal services in Westbury. WEY006 also does not have any flood risks within the site and WEY006 might be considered suitable for development. WEY006 has not been identified for development because the site has not been subject to a detailed site assessment and comparison with other potential development opportunities and Westbury is not proposed to be designated as a Community Hub. - WEY019 is a larger site than WEY006 and is located to the rear of WEY006 but still with reasonable access to the principal services but in a more isolated location. WEY019 does not have a direct access from the primary road network through the village being accessed along a narrow lane already serving the special needs school in the former primary school campus. WEY019 and the service lane would also be serviced through some of the flood affected areas on the primary road network through Westbury with some isolated surface water flooding affecting parts of WEY019 itself. WEY019 has not been identified for development because the site has not been subject to a detailed site assessment and comparison with other potential development opportunities and Westbury is not proposed to be designated as a Community Hub.	No	S16.2 Westbury
A0575	B001	Westbury should be a Community Hub and WEY015 should be considered for residential allocation	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the methodology applied within the Hierarchy of Settlements Assessment (HoS) is appropriate and has been applied consistently across Shropshire, including in relation to Westbury. As such it is considered appropriate that Westbury is not identified as a proposed Community Hub. As such it is not proposed to identify a development guideline, development boundary or identify proposed allocations - consistent with other rural settlements considered to be a settlement in the countryside for policy purposes. Site WEY015 is a very large parcel of land located in the centre west of the village with a primary road frontage onto the B4386 and the mans to achieve a secondary access onto the circular road route through the central Conservation Area in Westbury located to the north. WEY015 does have reasonable access to some of the principal services in the village. The site is affected within the site itself by isolated areas of surface water flooding and being located on the western side of the village is affected by flood affected areas on the primary road network through Westbury. The size and open aspect of WEY015 would suggest that the site may be too large for the potential scale of development in this smaller settlement and the site may not readily lend itself to sub-division. WEY015 has not been identified for development because the site has not been subject to a detailed site assessment and comparison with other potential development opportunities and Westbury is not proposed to be designated as a Community Hub.	No	S16.2 Westbury
A0534	B001	Consider the development status of Uffington should remain as a 'Cluster' with further sites being allocated to address the shortfall in delivery since the SAMDev was adopted and meet the growing need for the different types of housing identified in the NPPF and the draft Local Plan (Policies DP1-DP7). Our client has a site suitable of providing a mix of housing types, and is considering submitting a planning application with a developer.	Shropshire Council considers that the approach used to identify Community Clusters, by which communities can opt-in or opt-out is appropriate and reflects the intended purpose of such Community Clusters - settlements with aspirations to maintain or enhance their sustainability. As such, it is considered appropriate for Uffington to be classified as countryside.	No	S16.3 Uffington

A0379	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S16 (SHR197VAR)	Yes	No	Yes	<p>Consider an inconsistent and unjustified approach has been used to arrive at proposed allocations and draft policies meant to present a mechanism for meeting both the County's qualitative and quantitative employment needs over the plan period.</p> <p>The minimum employment land needed for Shropshire is 300ha (Oxford Economics Growth Forecast - 2016). Throughout the Local Plan Review, Shrewsbury has been the focus for development (proposed employment land guideline was 90ha but has increased to 100ha (likely to meet needs arising in the Black Country), of this 50ha was to be achieved through new allocations). However, the quantity of employment land identified for the town is inadequate to meet its strategic needs - employment allocations proposed earlier in the Local Plan Review have either not been included or their capacity has been reduced, which is extremely ill-founded, means proposed employment allocations fall below the net residual requirement for additional employment land (50ha), and as such the draft Shropshire Local Plan is contrary to para 81 of the National Planning Policy Framework (NPPF) and unsound.</p> <p>-SHR166 is subject to numerous constraints that restrict its net developable area (Council Site Assessments and Sustainability Appraisal), including: flood risk (pluvial and fluvial resulting in undevelopable elements of the site and requiring on-site surface water attenuation); ecology (abuts a Local Wildlife Site and unclear if ecological surveys of the site have occurred as may support foraging/nesting/migration); loss of agricultural land (grade 2 - best and most versatile); and heritage impact (may affect the setting of Haughmond Hill and Queen Eleanor's Bower ringwork, both Scheduled Ancient Monuments (appears Historic England objected to the site at Regulation 18) and archaeology which may need to be retained in situ limiting site capacity); landscape impact (high landscape sensitivity for employment development and visual prominence - landscape buffers will reduce capacity and limit visibility from the A49 (affecting market attractiveness)); lack of sustainable travel (detached from urban area of Shrewsbury by the river Severn and its corridor and no public rights of way or public transport links - this is at odds with the vision of the Shrewsbury Big Town Plan and results in complete reliance of the car). The Preferred Sites consultation indicated expected capacity was 18ha (net), which accords with our own analysis of constraints. This represents 40% gross to net, but would normally expect at least 60% to ensure sites effectively meet needs. This alone suggests a need for 9ha of additional employment land.</p> <p>-SHR158/SHR060/SHR161 5ha (reduced from 20ha) as part of a mixed-use sustainable urban extension (SUE). Development of the site is forecast to continue beyond the proposed Plan period and it is unclear when the employment will come forward within this - expect higher value uses in first phases. The draft Shropshire Local Plan also indicates need for upfront work (masterplanning and infrastructure assessments) prior to first delivery. Delivery will also require coordination between various landowners and stakeholders during masterplanning. As such, anticipate delivery of the employment uses will only occur later in the proposed Plan period. Evident that even if the proposed allocations deliver anticipate levels of development, there would be a deficit of 5ha (gross), rising to 12ha (net). Also, earliest likely delivery on them is beyond 2025. Therefore, a clear need exists for additional allocations to increase flexibility, ensure proposed targets are met and ensure the draft Shropshire Local Plan accords with the tests of soundness set out in the NPPF. Currently it is not effective in delivering employment needs of Shrewsbury or Shropshire; is not justified with reference to the evidence base; nor does it adequately reflect the desire of national policy for Local Plans to provide a clear strategy to meet their area's objective needs.</p> <p>In addition to quantitative deficits in employment land, there are also qualitative issues, as not enough is done to exploit growth of e-commerce, tech, research and food science and production industries related to the local agricultural landscape (most recent AMR demonstrates increased demand for these uses). There is a clear need for provision of smaller, modern and flexible commercial premises in Shrewsbury not satisfied by the current tapestry of draft allocations and existing commitments.</p> <p>Furthermore, a key objective of the draft Shropshire Local Plan is to support delivery of the Shropshire Economic Growth Strategy (SEGS). Its aspirations include:</p> <p>-Balanced growth, so identification of deliverable employment sites is just as vital to the growth of Shrewsbury as housing sites. Further, employment sites need to balance high demand for Class B2/B8 with job creation in higher value knowledge-based and research and development sectors (Class B1b and B1c in particular). According to the Shropshire AMR, growth in B1b and B1c seems to take place away from Shrewsbury across Community Hubs in rural Shropshire, likely due to the ability to deliver more bespoke units at lower market rates.</p> <p>-Step change in inward investment, but the employment strategy in the draft Shropshire Local Plan does not provide an adequate platform for this (envisaged in the SEGS).</p> <p>-Directing economic growth towards specified transport corridors and economic hubs (including Shrewsbury and the A49 corridor), SHR197VAR can directly assist this.</p> <p>-Targeting growing and under-represented sectors, including research and development and creative and digital technologies, SHR197VAR can also directly assist this.</p>

A0379	B001	SHR197VAR should be allocated for at least 9ha of flexible land suitable for employment generating uses as defined by draft Policy SP13 of the draft Shropshire Local Plan. Proposed site guidelines for SHR197VAR appended to representation.	Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. Shropshire Council also considers that the proposed development strategy for Shrewsbury and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.	No	S16.1 Shrewsbury

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0379	B001 Cont'd						<p>The Economic Development Needs Assessment (EDNA) identifies a shortage of sites in Shrewsbury, warning "the shortage of sites considered appropriate for development in the short term may mean that Shropshire is unable to maximise on the opportunity that the growth of e-commerce and 'reshoring' or 'on-shoring' provides". This is a clear challenge to the Council to do more to secure attractive and marketable smaller flexible premises in the early years of the proposed Plan period. But the draft Shropshire Local Plan does not allow for such a pipeline for these or other growing sectors despite the clear need identified in the evidence (proposed allocations will not deliver in the earlier proposed Plan period as documented in Appendix 7 and there is only 1 detailed application for a standalone Class B1 unit. In addition, limited land is available in Shrewsbury for anything other than traditional business park uses seeking a single-plot format premise).</p> <p>SHR197VAR (location plan appended to the site representation) is ideally suited to address quantitative and qualitative issues in the employment land supply in Shrewsbury/Shropshire. It was identified as a key proposed employment allocation (9ha) within the last Regulation 18 consultation and this represented a logical and positive response to issues raised in the Council's evidence, earlier deficiencies in the employment strategy and would have ensured employment land provision complied with para 81 of the NPPF. Substantial evidence demonstrating SHR197VAR's suitability (no physical or environmental constraints), availability, sustainability, flexibility (potential for single significant investor all the way through to incubator units for emerging tech), commerciality and deliverability (soft marketing and a local employment market report (appended to this representation) confirms commercial appeal of this site now and in the future), potential for early and quick delivery (maximum of two phases) and ability to comply with proposed Policies was provided.</p> <p>However, SHR197VAR is not included in the draft Shropshire Local Plan. Insufficient justification for its exclusion is provided. Specified reasons include difficulties caused by introduction of the new Use Class E and the site resulting in a new direction of growth at the town beyond the A49:</p> <ul style="list-style-type: none"> <li>-Consider relationship to the built form was apparent earlier in the process (and is recognised within the Strategic Land Availability Assessment) and it was still proposed for allocation within the last Regulation 18 consultation, so this issue was clearly accepted. Irrespective, terming the site a 'major new direction' due to breaching artificial boundaries formed by the strategic road network (SRN) is incorrect and ill-founded, the site would in fact consolidate an existing direction of commercial and employment growth at Battlefield Roundabout (plan provided within representation). SHR197VAR would complement the commercial uses/existing allocations (local employment market report appended to this representation) on three sides of the adjacent roundabout (one of which lies to the north, is comparable in size to SHR197VAR and already breaches the boundary defined by the SRN).</li> <li>-Concerns about ability to control end uses due to new use class E apply to all proposed allocations and can be appropriately managed. Specifically, allocations could specifically reference sub-classes of Use Class E or be carefully worded, this issue has been considered and appropriately managed at other Local Plan Examinations (examples appended to representation). There are also examples of how this issue is appropriately managed at the Planning Application stage.</li> <li>-Note that no major new constraints were identified and nothing has changed with regard to need for employment land or merits of the site.</li> </ul> <p>The draft Shropshire Local Plan is therefore:</p> <ul style="list-style-type: none"> <li>-Not positively prepared: The plan fails to provide a strategy which, as a minimum, seeks to meet the area's objectively assessed needs in respect of employment land and jobs growth. It also fails to seize a clear opportunity to allocate a deliverable and entirely suitable commercial site at one of its key employment hubs (SHR197VAR at Shrewsbury);</li> <li>-Not justified: In providing a strategy which fails to meet both the quantitative and qualitative needs of the local commercial market, and in avoiding the allocation of sites such as SHR197VAR that would significantly overcome this deficit, the strategy cannot be concluded as appropriate or one which has fully taken into account reasonable alternatives. Most importantly the strategy fails to respond to the challenges identified in the EDNA;</li> <li>-Not effective: The employment strategy of the plan does not effectively meet the identified needs of the local commercial market on either a qualitative or quantitative basis; and</li> <li>-Not consistent with national policy: Fails to provide the certainty or flexibility required by the NPPF (including para 81) that would ensure that both the immediate and long term needs of the local commercial market can be met over the lifetime of the plan.</li> </ul>
A0009	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.1 Wem	Not Specified	Not Specified	Not Specified	WEM033 could accommodate 84 dwellings rather than the 60 dwelling guideline.
A0360	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.1	Not Specified	No	Not Specified	<p>Strongly support identification of Wem as a Key Centre as it is a sizeable settlement, has a good range of services and facilities (highest scoring Key Centre within the Hierarchy of Settlements Assessment undertaken to inform the draft Shropshire Local Plan Review), is identified as a strategic focus for growth in north-east Shropshire (proposed explanation to draft Policy S17.1) and is located on a Strategic Corridor (as recognised within the draft Shropshire Local Plan) and draft Policy SP14 seeks to focus major development into such corridors. This status is vital to its long-term future. Despite this and high demand for housing/affordability issues in the town (documented within the Strategic Housing Market Assessment (SHMA) undertaken to inform the draft Shropshire Local Plan), a low level of growth is proposed and a significant reliance placed on windfall development (89 dwellings) to meet need over the proposed Plan period. The level of growth proposed is also less than that experienced during the current Plan period (27.2 and 32.8 per annum respectively), less than the Shropshire average (20.8% and 21.9% respectively), and less than the average percentage growth forecast for Shropshire in latest 2018-based household projections (20.8% and 26.9% respectively) which would indicate demand for 774 dwellings, although in practice Wem's popularity is likely to attract higher demand than the County average - low levels of development will result in pressure on house prices and reduce affordability, undermining social and economic sustainability. Given the strategic importance of growth in Wem, this is considered inappropriate and not positively prepared, justified or effective.</p> <p>Additionally, the group of proposed housing allocations north-west of Wem are subject to infrastructure capacity constraints (highway congestion/pinch points (including the rail crossing), being on the opposite side of the town from main employment areas, strategic road links and the railway station; and surface/foul water drainage constraints), and as such are not considered justified. Furthermore:</p> <ul style="list-style-type: none"> <li>-Proposed saved Allocation WEM003 is also not considered deliverable and may not be developable (as defined within para 67 of the National Planning Policy Framework (NPPF)) as it is undeveloped but has been allocated for a number of years and an Outline Planning Application was refused in 2020, as based on available information benefits did not outweigh visual and biodiversity harm (Appendices to this representation include material relating to this decision).</li> <li>-Proposed allocation WEM010 is intended to represent phase 2 of WEM003, so subject to the same uncertainties.</li> </ul> <p>WEM033, whilst closer to services than WEM010, is considered subject to the same highway infrastructure constraints and so also not justified.</p> <p>Consider WEM035 is unconstrained (as evidenced in the site assessment undertaken to inform the draft Shropshire Local Plan) far more sustainable, and deliverable/developable than proposed allocations (illustrative Plan appended to representation). It is not proposed for allocation due to its location on the opposite side of the rail line to the town centre and distance from services and facilities compared to proposed allocations (but residents of all these sites could walk to many services and facilities) and the site assessment does not consider proximity to employment areas and strategic road network (involving vehicular travel through the town centre for proposed allocations and not WEM035).</p> <p>Furthermore due to size, on-site provision of some services can be made (including allotments and a playground), over provision (15%) of affordable housing, 10% on-site renewable energy generation, a good housing mix and biodiversity net gain etc.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0379	B001 Cont'd				S16.1 Shrewsbury
A0009	B001	Increase site guideline from WEM033 to 84 dwellings.	Shropshire Council considers the proposed capacity of WEM033 is appropriate. It should be noted that Para 6 of Draft Policy S17.1 recognises that the Provision figures are 'approximate'. It states "Development of site allocations should be in accordance with specified development guidelines and approximate site provision figures and all other relevant policies of this Local Plan." Shropshire Council has generally taken a precautionary approach to site capacity to ensure that the proposed housing requirement and proposed settlement guidelines are achieved. The specific number of dwellings and density of development that is appropriate on any proposed allocations will, if they are ultimately allocated, be determined at the Planning Application stage.	No	S17.1 Wem
A0360	B002	Either: -Increase the housing guideline for Wem; or -Redistribute housing growth to alternative allocations (part of WEM035 for 40 dwellings) in the settlement to ensure housing needs of the settlement are addressed and no unacceptable adverse impacts upon existing infrastructure arise during the Plan period.	Noted. Shropshire Council considers that the proposed development strategy for Wem and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S17.1 Wem

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0531	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17	Not Specified	No	Not Specified	Fails to address the duties under the Self Build Acts or allocate sufficient land (if any) for self build and custom build housing. The site at Chez Nous was specifically put forward to meet an existing need by 3 local residents and an additional 5 plots for other interested self build residents. This representation concerns Wem Place Plan S17 site allocations and the failure to include land at Chez nous for self build housing and the failure of the LPR to properly address the need for self build housing expressed by the hundreds of registrants
A0579	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.1	Yes	No	Yes	Land south east of Wem Industrial Estate, Soultou Road, Wem is a well located and fully deliverable site with an area of 3.259 ha. We believe this site is suitably placed to provide the development in the Key Centre of Wem being situated with an access off the B5056 and adjoining previously developed land and the development boundary. The land is well positioned with access to the highway on the southern boundary and is adjoining land that has already been developed. The land is well placed for the expansion of Wem in terms of its location to the A49. A smart new commercial development here would enhance the entry towards Wem from the North.
A0675	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17	Not Specified	Not Specified	Not Specified	Relieved concerns about traffic congestion east of the level crossing in Wem have been taken into account. Removal of the level crossing would divide the town into two parts, significantly damage retail businesses operating in Wem High Street and increase the number and length of car journeys. As such, this option is not available and residents have to live with existing congestion, but they do not want it (and associated problems) exacerbated. Further development in this area would lead to just that situation. Also encouraged that the integrity of small settlements, such as Aston, has been maintained. All 'sensible' areas for development at Wem have been taken but the town still has to develop, so it is a case of choosing the least damaging options. There will be concerns about all the three proposed allocations, but we are where we are. However, would ask for reconsideration of WEM025. The ecological value of this area is clearly recognised by the Council, since numerous mitigation measures are required. All area aware that such mitigation measures have differing degrees of success. Additionally, any development should have regard to neighbouring developments and the character of the town, rather than appearing parachuted in - matching the shades and types of bricks really does not cut it. Pleased that development proposals will be expected to positively respond to policies and guidelines identified within the Wem Town Design Statement any other relevant community-led plans and any master plans adopted by Shropshire Council. During the last Regulation 18 consultation, requested that the development boundary on Mill Street be amended so an area of open land would be excluded from development. Many Wemians feel strongly that development should not take place on this site as it is a key gateway, provides essential green space and natural/historic environment concerns (numerous applications refused on the site). Adjustment of the development boundary in this area would have a minimal impact on the development of Wem but a major and positive impact on the environment of Wem.
A0099	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.1 Wem	Not Specified	No	No	Site WEM025 should not be included – WEM033 could have its capacity increased to 90 as an alternative.
A0099	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.1 Wem Development Boundary	Not Specified	No	No	Development Boundary should be amended to run parallel with Mill Street from Roden Weir alongside the western edge of the pavement on Mill Street to the Mill House.
A0582	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.1 WEM003	Not Specified	Not Specified	Not Specified	Agree with WEM003, this could be expanded to the west.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0531	B001	Include the land at Chez Nous for self build housing restricted to parties on both part 1 and part 2 of the register, deemed to be so if the Council does not adopt both sections in its policy.	Noted. Shropshire Council considers that the proposed development strategy for Wem and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S17.1 Wem
A0579	B001	Land south east of Wem Industrial Estate, Saulton Road, Wem should be considered for residential development.	Noted. Shropshire Council considers that the proposed development strategy for Wem and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S17.1 Wem
A0675	B001	Amend the development boundary to exclude an area of open land on Mill Street is excluded. Reconsider proposed allocation WEM025.	Noted. Shropshire Council considers that the proposed development strategy for Wem and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Shropshire Council also considers that the proposed development boundary is appropriate. We would note that with regard to the design of development, a draft Policy (SP5) specifically on high-quality design is proposed within the draft Shropshire Local Plan. Furthermore draft Policy S11.1 recognises development proposals should positively respond to community-led plans, this includes in relation to design.	No	S17.1 Wem
A0099	B001	Remove WEM025 as an allocation, possibly increase WEM033's guideline to meet the loss	Noted. Shropshire Council considers that the proposed development strategy for Wem and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S17.1 Wem
A0099	B002	Development Boundary should be amended to run parallel with Mill Street from Roden Weir alongside the western edge of the pavement on Mill Street to the Mill House.	Noted. Shropshire Council considers that the proposed development strategy for Wem and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Shropshire Council also considers that the proposed development boundary is appropriate. We would note that with regard to the design of development, a draft Policy (SP5) specifically on high-quality design is proposed within the draft Shropshire Local Plan. Furthermore draft Policy S11.1 recognises development proposals should positively respond to community-led plans, this includes in relation to design.	No	S17.1 Wem
A0582	B001	Expand site WEM003 to the west	Noted. Shropshire Council considers that the proposed development strategy for Wem and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S17.1 Wem (WEM003)

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0567	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.1 Wem	Yes	No	Yes	WEM037 is a good site and is deliverable, sustainable, has a better SA score than some of the preferred allocations, and is positioned well in terms of highways. We are pleased to note this site has been identified as a 'Long Term Potential SLAA Residential Site' within the consultation.
A0010	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive	Not Specified	No	Not Specified	Clive should not be identified as a Community Hub as two services/facilities identified within the Hierarchy of Settlements Assessment are no longer presented. Specifically the bowling green is located within a private garden (and has been for 2 years) and the village shop has now closed (October 2020) and the owner has confirmed it will not be re-opening. Taking these out would lower its score to 47, meaning Clive would no longer exceed the threshold for Community hub status. The post office operates only 2-4 hours a week and as such does not warrant significant points for this service.
A0011	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive	No	No	No	Clive should not be a Hub as some of its services are no longer available (bowling green is closed and shop closed in Oct 2020).

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0567	B001	The site (WEM037) has no significant constraints. We believe this land can be considered for short term potential and should be considered for residential allocation	<p>Noted. Shropshire Council considers that the proposed development strategy for Wem and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.</p>	No	S17.1 Wem (WEM037)
A0010	B001	Update the Hierarchy of Settlements Assessment to remove the points attributed to Clive for the bowling green and village shop. This results in the settlements score dropping below Community Hub status. Remove Community Hub status from the settlement within the draft Shropshire Local Plan.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	S17.2 Clive
A0011	B001	Remove the bowling green and village shop from the scoring, which would result in a score of 47, therefore giving Clive Cluster Status.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0021	B001	Remove the bowling green and village shop from the scoring, which would result in a score of 47, therefore giving Clive Cluster Status.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. A0064	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2. Community Hubs: Wem Place Plan Area	Not Specified	No	Not Specified	Information used to determine Clive's score of 54 and status as a Hub is incorrect. Council have previously not properly acknowledged that the identified bowling green is private and shop is closed and would not be financially viable to reopen . Decision should only be based on current status of these facilities

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0063	B001	Assessment to take into account loss of village services/facilities	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	S17.2 Clive
A0064	B001	Take into account changes to available services/facilities & accept that insufficient points for Hub status	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. 1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0094	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2. Community Hubs: Wem Place Plan Area	Not Specified	No	Not Specified	<p>Draft Policy S17.2 is unsound as associated overarching draft Policies SP2 and SP8 are unsound.</p> <p>The policy is based on inaccurate, out of date and inconsistency evidence on settlement sustainability.</p> <p>In addition, there has been inconsistent consideration and treatment of the presence of local facilities and changing circumstances across Parishes during plan development.</p> <p>In Clive, the current scoring within the Hierarchy of Settlements Assessment for Clive includes the bowling green as an outdoor sports facility and the local convenience store, but neither of these facilities are publicly accessible to the community, following closure of both the bowling green and local convenience shop. Both now fall under private residential ownership and use. As such Clive does not meet the requirements for Community Hub status.</p> <p>With regard to the bowling green, Shropshire Council recognise there is no active club in the Shropshire Council Playing Pitch and Outdoor Sports Strategy Assessment Report (Oct 2020) (PPOSS), a comprehensive assessment undertaken between 2018 and 2019 within which Clive is not recorded as having such a facility. However, Shropshire Council justify retention of the facility in Clive following its inclusion in the Open Space Needs Assessment (2017 - based on 2009 data with limited desk-based updates) (OSNA), this assessment acknowledges that “without a catchment area analysis it cannot detect the reality of variations in provision within each Place Plan Area”... this data is considered out-of-date, has not been verified locally and has been superseded by the PPOSS.</p> <p>With regard to the local convenience store, Shropshire Council has acknowledged receipt of recent correspondence from both the Parish Council and store owner that it is no longer in use and now falls within a residential curtilage. This has now been formalised with a change of use planning application to convert the store to a residential annex (ref 21/00048/FUL).</p> <p>An inconsistent approach has been taken to reflecting changes during development of the draft Shropshire Local Plan. For instance Myddle was initially identified as a Community Hub, but following the closure of the local convenience store in 2018, fell below Community Hub status within the assessment. Similar situations occurred in Cockshutt and Westbury. The same circumstances occurred in Clive but it remains a Community Hub. Also, there is no evidence that other Parish Councils were required to provide additional evidence to support this change in designation other than notification of the change. In comparison, Clive Parish Council were asked for evidence of marketing more widely and suitable assurances about the potential future uses for the facility. This deferred a decision on any change.</p> <p>The policy is therefore not considered effective or justified and therefore unsound.</p>
A0116	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive	Not Specified	No	Not Specified	<p>Consider the draft Shropshire Local Plan is unsound as Clive should not be identified as a Community Hub. Clive's Community Hub status is informed by outdated and inaccurate information within the Hierarchy of Settlements Assessment. Specifically the bowling green and village shop attributed points for Clive within the assessment do not exist. As such Clive would only achieve 47 points, below the threshold for Community Hub status.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0094	B005	Policy SP17.2 should remove reference to Clive as Community Hub as current evidence on availability and accessibility of local facilities and services means it does not meet the definition of a significant rural service centre as defined by the Hierarchy of Settlements evidence base and subsequent Local Plan policies.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	S17.2 Clive
A0116	B001	Update the Hierarchy of Settlements and remove Community Hub status from Clive.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0117	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive	Not Specified	No	Not Specified	Consider the draft Shropshire Local Plan is unsound as Clive should not be identified as a Community Hub. Clive's Community Hub status is informed by outdated and inaccurate information within the Hierarchy of Settlements Assessment. Specifically the bowling green and village shop attributed points for Clive within the assessment do not exist. As such Clive would only achieve 47 points, below the threshold for Community Hub status.
A0128	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17 .2 - Clive	Not Specified	No	Not Specified	<p>Policy S17 is based on inaccurate and out of date evidence on settlement sustainability The Village Store and bowling green amenities included within Hierarchy of Settlements assessment score no longer exist. This is evidenced by various correspondence &amp; communications, meeting minutes, planning applications, Playing Pitch and Outdoor Sports Strategy (Oct 2020) from May 2018 on ( full details submitted with response). Evidence has been submitted that the shop is unviable and closure permanent ( with a change of use application) and that change of ownership had taken place causing loss of bowling green. Taking into account these changes to available facilities the correct assessment score for Clive should be 47 points which falls below the threshold for Community Hub designation. Inclusion of Clive as a Hub is therefore not justified. Additionally, the Playing Pitch and Outdoor Sports Strategy evidence does not identify any need for or shortfall in bowling provision. Therefore, demand and value of a bowling green and justification for including in Clive's Hierarchy of Settlements services and amenities points score are also not justified or sound.</p> <p>Approach to inconsistent in Shropshire, with respect to considering changes in amenities and services and subsequent reassessment against the Hierarch of Settlements methodology e.g. approach in Clive compared to Myddle &amp; Westbury Hub re-assessments &amp; reclassification following notification of loss of services/facilities in these settlements. Clive's settlement designation has been repeatedly and unnecessarily deferred. Evidence required to confirm loss of services has been more onerous than elsewhere &amp; extensive evidence of loss of services in Clive has not been acted on resulting in inclusion as a Hub at Regulation 19 and the need for consideration of settlement status a main modification. Negative impact of this is that if Hub status removed by the Planning Inspector, default would be countryside status and option of Community Cluster, which may have been supported by the community is not now available without lengthy and expensive Neighbourhood Plan process. Inconsistent application of the Hierarchy of Settlements methodology with regard to Clive also raises serious questions over the soundness of the Local Plan.</p>

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0130	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	not specified	Yes	Yes	No	<p>Clive Hub: support the designation of Clive as a Community Hub in the new Local Plan to encourage development which will sustain the level of village's facilities into the future. Objections submitted on basis that the Hierarchy of Settlements for Clive is based on facilities that do not exist and will not open again, and that this takes the settlement scoring for Clive below the threshold for designation as a Community Hub are not correct.</p> <p>The village convenience store is a well valued, established, important and needed community facility. Insufficient evidence that loss of shop permanent to justify loss of points awarded. Despite Parish Council support for the current change of use application for reversion to private- still requires Council approval. Objection to the planning application on the basis that rather than an 'A1' retail use , it is a community facility under Class F2(a) of the amended Use Classes Order (2020), and loss of this important community facility is contrary to Core Strategy Policy CS8, and Paragraph 92 of the NPPF. For this reason, the Council have indicated that they will resist the loss of the village shop. The Council highlighted a requirement for additional information and in particular evidence of marketing (at the Council's Cabinet meeting on 7 December 2020). Demonstration of lack of financial viability and marketing evidence however has not been provided with the planning application and given vacancy only since October 2020, scope for marketing would have been severely limited by the pandemic. It is understood that reasons for relinquishing lease were personal and that the business was successful and viable . A continuing need for the facilities has been highlighted by the pandemic.</p> <p>The bowling green facility can be privately owned and qualify as an open space. Whilst not currently in use, the bowling green has not been removed, is included within the Open Space Needs Assessment and removal would need to show this facility is surplus to requirements (in line Sport England advice) as well as meeting any other policy requirements. It therefore should not be deleted from the scoring. There is an additional facility Renshaw's Field, a community owned asset in regular use which should be also be included as an outdoor sports facility which would contribute a further 3 points.</p> <p>No points are scored under the assessment for a public house, however Clive Hub on Back Lane in Clive village is bar and social club open to the public with ( pre Covid19 ) regular opening hours and events which is treated by Clive residents as a public house. Additionally The Railway Inn ,Yorton (approximately 500 metres from the proposed development boundary of Clive) retains its public house sui generis use and is being renovated with the intention of marketing it for rent as a public house later this year. These facilities should be taken into consideration and appropriate points allocated.</p> <p>Whilst Clive has scored four points for community hall, due to the inclusion of Clive Village Hall the Clive Hub provides an additional facility so used as a community events &amp; meeting place Any re-assessment of the scoring for Clive should also consider whether there is a need to include Clive Hub as a secondary community hall, which would add two points to the current score of four, giving six points overall for this category.</p> <p>The Council has undertaken extensive consultation in advance of publication of the Regulation 19 Draft Local Plan &amp; it is sound and legally compliant. As a rural village with a large range of facilities Clive meets the criteria to be designated as a community hub. Inadequate justification for the evidence base relating to Clive's designation as a Community Hub to be reviewed at this stage. Should re-assessment be required the following facilities should be taken into consideration :Convenience Store ( 4 points ) ; Outdoor sports facilities to include the Bowling green (3 points) + Renshaw's field outdoor sports field (+1 point);Clive Hub /Railway Inn as Public Houses ( + 4 points for both or +3 if Clive Hub is not counted); Community Halls to include Clive village hall ( 4 points) , + 2 points if Clive Hub counted. This could increase total points score from 54 to 61.</p> <p>Land East of Clive Hall: Identified site allocations ( CLV012 &amp; CLV018) for Clive will facilitate delivery of 20 dwellings , needing 18 dwellings to come forward as windfall infill sites, in addition to existing commitments to achieve 40 dwellings proposed for Clive. Land to the East of Clive Hall (as shown on plan provided) which is within the settlement boundary and more accessible to village services and facilities than the allocated sites is well placed to contribute to Plan housing requirements . As it is an even more suitable location for residential development it should be allocated to ensure delivery of the site.</p>
A0150	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2	Not Specified	No	Not Specified	Clive point score inaccurate & out of date , includes services are no longer available i.e. bowling green and shop. Shop closure permanent. Bowling green not publicly available. Correct score 47

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0326	B001	Clive does not have a high enough score for Hub status once the corrections relating to the bowling green and shop are made.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	S17.2 Clive

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0355	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive (CLV012 and CLV018)	Not Specified	No	Not Specified	<p>Consider proposed allocations CLV012 and CLV018 fail the 'justified' and 'effective' tests of soundness, as they are further from the railway station and village shop than CLV010 (previously preferred allocation) and cannot make the contributions to village infrastructure associated with CLV010.</p> <p>The justification for CLV012 and CLV018 rather than CLV010 within the site assessment relate to traffic through the village to access the A49 and access to services and facilities due to gradients. However, construction traffic through the village could be managed through condition requiring access of the A528 to the west and the gradient is very slight and CLV010 would also create a pedestrian footway along this length of Station Road, benefitting new and existing dwellings.</p> <p>CLV010 would also create a new footpath link to the existing public right of way (PROW) to the south of the village (intervening land owned by site promoter), providing residents with a largely off-road route to the railway station, school and village facilities (plan provided in representation) and would also provide hard surfacing to the element of the PROW between the school and CLV010. Land and the derelict Hilltop Cottages adjoining the school would also be made available to the school (it is currently physically constrained) as a contribution to community infrastructure and the sustainability of Clive (this is supported by school governors).</p> <p>The promoter has an excellent reputation for delivering housing.</p>
A0392	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17	Not Specified	No	Not Specified	<p>Clive should not be a Hub as some identified services are no longer available (bowling green is not available to the community and shop permanently closed). The decision to continue to include these two amenities in Clive's Hierarchy of Settlements assessment score, despite being advised of their loss, means methodology has been used unfairly and inconsistently. Without these two amenities, Clive does not meet the criteria for Community Hub designation, and therefore Clive's inclusion as a Community Hub is not based on accurate evidence and is not justified. Combined with the Council's deferral of matters relating to Clive settlement, this means the Plan is not effective, and therefore it is unsound.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0355	B005	Allocate site CLV010 instead of sites CLV012 and CLV018.	<p>Shropshire Council considers that the proposed development strategy for Clive and the proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The proposed allocations have been informed by a proportionate and robust site assessment process.</p>	No	S17.2 Clive
A0392	B001	<p>Clive settlement should not be identified as a Community Hub &amp; be removed from both S17.2 and S17.4 (paragraphs 5.245 and 5.247) as the evidence clearly shows the settlement does not meet the definition of a significant rural service centre, as defined by the Hierarchy of Settlements evidence base.</p>	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. A0437	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	<p>There are inaccuracies in the HoS. The current scoring within the Hierarchy of Settlements for Clive includes a bowling green as an outdoor sports facility and a local convenience store. Neither of these facilities exist following the closure of both the bowling green and the local convenience shop. The shop has now closed three times in recent years and has been shut for significant periods. It is clearly unviable as a convenience store.</p> <p>The Local Planning Authority has previously recognised that there is no bowling green as the facility now falls under a private residential dwelling. This was confirmed in the Shropshire Council Playing Pitch and Outdoor Sports Strategy Assessment Report (Oct 2020). This should supersede the Open Space Needs Assessment 2017 as it is based on more up to date and comprehensive information. The Open Space Needs Assessment 2017 was a desk based update of data from 2009.</p> <p>The Local Planning Authority has acknowledged that it has received correspondence from both the Parish Council and the shop owner that the shop is no longer in use. This has been confirmed through a formal change of use planning application from the owner to provide a residential annex for this former shop (ref 21/00048/FUL). The Local Planning Authority were notified of these changes through the Regulation 18 consultation but no associated updates have been made to the Regulation 19 Plan, rendering Policy SP8 as unjustified and unsound.</p> <p>The Hierarchy of Settlements evidence base and Local Plan Policies are now based on inconsistencies which render them unsound.</p> <p>Revisions to the Hierarchy of Settlements evidence base over the Plan development has led to inconsistencies in the policy with the definition of Community Hubs continuing to be set out as 'settlements considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities'. The assessment criteria and associated threshold no longer require such facilities to be present. This is illustrated by the example of Clive which when assessed evidently doesn't meet the criteria for a Community Hub in that it relies upon other settlements to meet many day to day needs such as employment and convenience goods. The Plan and Policy SP8 is therefore considered to be unsound as the methodology and application of associated evidence does not meet the intended definition of a Community Hub and overall settlement hierarchy needed to maintain overall sustainability and is therefore not justified.</p>

A0437	B002	Policy SP8 should remove reference to Clive as Community Hub as current evidence means it does not meet the definition of a significant rural service centre as defined by the Local Plan Review	<p>Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to those Community Hubs proposed in the Wem Place Plan Area.</p>	No	S17.2 Clive

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0437	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive	Not Specified	No	Not Specified	<p>As policies (SP2 and SP8) that guide Settlement policy 17.2 are unsound, Policy S17.2 is therefore also rendered unsound. Policy 17.2 is based on inaccurate and out of date evidence on settlement sustainability. In addition, there has been inconsistent consideration and treatment about the presence of local facilities and changing circumstances across parishes during the plan development.</p> <p>The current scoring within the Hierarchy of Settlements for Clive includes the bowling green as an outdoor sports facility and the local convenience store. Neither of these facilities exist following the closures of both the bowling green and local convenience shop.</p> <p>These both are under private residential ownership and use. As a result, the scoring threshold for significant rural service centres has not been met and the village of Clive does not meet the requirements to be deemed a Community Hub under Policy S17.2. The Local Planning Authority itself has recognised that there is no bowling green as the facility now falls under a private residential dwelling. This was evidenced in the Shropshire Council Playing Pitch and Outdoor Sports Strategy Assessment Report (Oct 2020). This was a comprehensive assessment undertaken between 2018 and 2019 the accuracy of which has been confirmed by Shropshire Council. In this assessment of bowls clubs and greens, Clive is not recorded as having such a facility. Despite this, consultation with the Local Planning Authority justifies its retention as a local facility for Clive following its inclusion in the Council's Open Space Needs Assessment which is based on out of date data from 2009. The Open Space Needs Assessment itself acknowledged that "without a catchment area analysis it cannot detect the reality of variations in provision within each Place Plan Area". With regard to Clive's local convenience store, the Local Planning Authority has acknowledged that officers have received recent correspondence from the both the Parish Council and owner that the shop is no longer in use and now falls within a residential curtilage. This earlier engagement with the Local Planning Authority has been formalised into a change of use planning application from the owner to provide a residential annex for this former shop (ref 21/00048/FUL).</p> <p>The Local Planning Authority appears to have been inconsistent in taking into account such changes in local services and facilities during the Plan development. Comparative changes have taken place in the village of Myddle where the closure of its local shop resulted in a swift change in designation to Open Countryside. Similar changes have taken place in Cockshutt and Westbury. There is no evidence that any other Parish Council has been asked to provide additional evidence to support this change in designation. Indeed, correspondence regarding changing local facilities between Parish Councils and the Local Planning Authority appear to have been sufficient. In comparison, there is evident disparity between the requirements placed on Clive Parish to further evidence these changes and a deferral by the Local Planning Authority to address via a main modification to the Regulation 19 Plan rather than addressing prior to the Regulation 19 consultation. As a result, the Plan and Policy S17.2 do not meet the tests around being justified and effective and are therefore considered unsound.</p>
A0438	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive	Not Specified	No	Not Specified	<p>Clive should not be identified as a Community Hub as two services/facilities identified within the Hierarchy of Settlements Assessment are no longer presented. Specifically the bowling green is located within a private garden (and has been for 2 years) and the village shop has now closed (October 2020) and the owner has confirmed it will not be re-opening. Taking these out would lower its score to 47, meaning Clive would no longer exceed the threshold for Community hub status.</p> <p>The post office operates only 2-4 hours a week and as such does not warrant significant points for this service.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0437	B003	Policy SP17.2 should remove reference to Clive as Community Hub as current evidence on availability and accessibility of local facilities and services means it does not meet the definition of a significant rural service centre as defined by the Hierarchy of Settlements evidence base and subsequent Local Plan policies.	<p>Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	S17.2 Clive
A0438	B001	Update the Hierarchy of Settlements Assessment to remove the points attributed to Clive for the bowling green and village shop. This results in the settlements score dropping below Community Hub status. Remove Community Hub status from the settlement within the draft Shropshire Local Plan.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0445	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP8	Not Specified	No	Not Specified	Evidence in HoS is inaccurate. Clive's bowling green and local convenience store are available to the community – both have closed. Clive has been treated different to other settlements, such as Myddle and Cockshutt and Westbury where changes have been taken into account in the scoring. Revisions to the Hierarchy of Settlements evidence base over the Plan development has led to relaxation around the requirement for Community Hubs to have employment and peak time public transport, which should be fundamental to the determination of 'significant rural service centres'. As a result, there are now inconsistencies in the policy, with the definition of Community Hubs continuing to be set out as 'settlements considered to provide a combination of services and facilities; public transport links (often operating regularly through peak travel times); significant employment opportunities; and high speed broadband generally considered sufficient to meet the day-to-day needs of their resident communities' but the assessment criteria and associated threshold no longer require such facilities to be present. This is illustrated by the example of Clive which when assessed clearly doesn't meet the criteria for a Community Hub in that there is a reliance upon other settlements to meet day to day needs such as employment and local convenience goods. The Plan and Policy SP8 is therefore considered to be unsound as the methodology and application of associated evidence does not meet the intended definition of a Community Hub and the overall settlement hierarchy needed to maintain sustainability and is therefore not justified.
A0445	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2	Not Specified	No	Not Specified	S17 is unsound as SP8 and SP2 are unsound. SP17.2 is based on inaccurate and out of date evidence. The HoS scoring is incorrect (bowling green and shop). Clive has been treated differently to other settlements in such situations such as Cockshutt, Myddle and Westbury where updates have been made to reflect reality.

A0474	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S8	Not Specified	Yes	Not Specified	Clive should be a Hub - The PC are suggesting that the bowling green should not be included in the HoS as an area of open space/outdoor recreation as the notice had been served to vacate the premises. However, the residents of Clive have the enjoyment of Ravenshaw's field, with is an area of open space in the centre of the village. This land was purchased by the village residents and paid through an increase in council tax. It is currently run by a group of volunteers from the village (the Ravenshaw's Field Association) and is available for hired events. It is used regularly by the local school for P.E and sports day and has 2 full-sized goalposts for anyone to play at any anytime – access is unrestricted. This facility clearly represents both an amenity green space and outdoor sports facility. Yet the Parish Council make no mention of this within their submissions. The convenience store remains as A1 retail use. Since the consultation on the Issues and Strategic Options Consultation, the former Clive Village Club has been set up as a Village Hub. This has a fully licenced bar, full-size snooker/billiards table, pool table, darts and dominoes. It is also available to book for private events/functions. The Hub holds quiz nights, bingo evenings, live music and private functions (when able to do so and restrictions permitting). This is a clear community facility that offers an array of services and supports the local and wider communities, further points should be awarded on this basis. There are also many small businesses in Clive, including 2 car repair garages. If Clive was to be dropped from Hub status, so too would all the settlements below it, a total of 17 further settlements being dropped to 'other rural settlements'.
A0498	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive	Not Specified	No	Not Specified	Clive should not be identified as a Community Hub as two services/facilities identified within the Hierarchy of Settlements Assessment are no longer presented. 1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0500	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2	Not Specified	No	Not Specified	<p>Draft Policy S17.2 is unsound as draft Policies SP2 and SP8 are unsound. Community Hubs in draft Policy S17.2 have been identified through a Hierarchy of Settlements Assessment (HoS). However the evidence within the HoS is not based on accurate information and has not been consistently applied in relation to changing services/facilities provision, therefore Policy S17.2 is not justified and unsound.</p> <p>Specifically, the HoS for Clive includes a bowling green as an outdoor sports facility and a convenience store. Neither now exist following their closures and are in residential ownership:</p> <ul style="list-style-type: none"> <li>-The loss of the bowling green was recognised within the Shropshire Council Playing Pitch and Outdoor Sports Strategy Assessment Report (PPOSS) (Oct 2020), this is a comprehensive assessment and should supersede the Open Space Needs Assessment (OSNA) (2017 desk based assessment using 2009 data) as it is based on more up to date and comprehensive information and the OSNA itself acknowledges that “without a catchment area analysis it cannot detect the reality of variations in provision within each Place Plan Area”.</li> <li>-Shropshire Council has also acknowledged receiving correspondence from the Parish Council and convenience store owner regarding its closure. This has been confirmed through submission of a Planning Application (21/00048/FUL) for change of use to a residential annexe.</li> </ul> <p>Shropshire Council stated it would consistently apply the methodology for identification of Community Hubs within the HoS, however despite informal and formal consultation responses (including to the last Regulation 18 consultation) highlighting changing evidence on availability of local services and facilities (loss of the convenience store) in Clive, these have not been taken into account. In contrast where Myddle lost its convenience store and the HoS was updated and Community Hub status was removed. Similar changes occurred in Cockshutt and Westbury which were also reflected. Also, for other changes no evidence was required, however Clive was asked to demonstrate further evidence, thereby deferring the decision.</p>
A0525	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive	Not Specified	No	Not Specified	<p>Clive should not be identified as a Community Hub as two services/facilities identified within the Hierarchy of Settlements Assessment are no longer presented. Specifically the bowling green is located within a private garden (and has been for 2 years) and the village shop has now closed (October 2020) and the owner has confirmed it will not be re-opening. Taking these out would lower its score to 47, meaning Clive would no longer exceed the threshold for Community hub status.</p> <p>The post office operates only 2-4 hours a week and as such does not warrant significant points for this service.</p>
A0530	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2	Not Specified	No	Not Specified	<p>The settlement comprises three cluster of development north, south and central all of which contribute to the services and welfare of the community. They are all linked by the same A49 highway and the same foot path. In terms of physical compactness and visual appreciation they are little different and certainly no different to warrant excluding the Northern Cluster from the settlement for an allocation for housing development . This is irrational and unsound.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0500	B003	Remove reference to Clive as a Community Hub.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." With regard to the Shropshire Playing Pitch and Outdoor Sports Strategy (PPOSS) we would note that the documents states "As far as possible the assessment report aims to capture all of the outdoor sports facilities within Shropshire. Where pitches have not been recorded within the report they remain as pitches and for planning purposes continue to be so. Furthermore, exclusion of a pitch does not mean that it is not required from a supply and demand point of view." As such, the requirements of para 97 of the NPPF continue to apply. As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	S17.2 Clive
A0525	B001	Update the Hierarchy of Settlements Assessment to remove the points attributed to Clive for the bowling green and village shop. This results in the settlements score dropping below Community Hub status. Remove Community Hub status from the settlement within the draft Shropshire Local Plan.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0542	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 HDL006	Yes	Yes	Yes	I fully support Hadnall Parish Council's endorsement of HDL006 as the preferred site and the adoption of Hadnall as a community hub. I would also like to see HDL008, HDL009 and HDL014 included within the development boundary.
A0602	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17	Not Specified	No	Not Specified	<p>Identification of Clive as a proposed Community Hub is based on inaccurate, out-of-date and invalid data within the Hierarchy of Settlements Assessment (HoS) and as such draft Policy S17 is unsound as it is not based on accurate evidence, is not justified and is not effective.</p> <p>Shropshire Council have indicated the HoS will be consistently applied, amended if amenities were lost and if this means a settlement drops below the Community Hub threshold it would no longer be classified as such.</p> <p>The HoS includes two facilities for Clive that do not exist, without them Clive does not meet the criteria for Community Hub designation. These are:</p> <ul style="list-style-type: none"> <li>-A bowling green, situated within the private grounds of Clive Hall. The green was formerly used by Clive Bowling Club but in May 2018, the owners of the property issued notice to the Bowling Club that the facility was no longer available following sale of the property. This bowling green was not included within the original HoS but was subsequently added. The Parish Council notified Shropshire Council of the error and were assured it would be corrected. However, Shropshire Council argue the Open Space Needs Assessment (OSN) includes the bowling green and it is up to the community to demonstrate it is now surplus to requirements. Although this is demonstrably the case (since the Bowling Club now plays at an alternative green outside the Parish). The Playing Pitch and Outdoor Sports Strategy (PPOSS), supersedes the OSNA and was formally adopted by Shropshire Council in Nov 2020. PPOSS does not include this bowling green. It is therefore unjustified and unsound to allocate points to a facility that, as evidenced by the Council's own documentation, does not exist.</li> <li>-A convenience store, which closed in October 2020. Shropshire Council refused to accept permanent closure had taken place and, further, insisted on submission of a change of use planning application from the property owner (now submitted). However, the Council continues to include points for this non-existent facility. It is therefore unjustified and unsound to allocate points to a facility that does not exist.</li> </ul> <p>Consider the HoS has not been applied consistently throughout Shropshire with respect to how changes in amenities and services and subsequent reassessment of community status have been carried out. When the shop in Myddle closed and the Post Office in Westbury closed the HoS was updated and their settlement status also. No requirement was made for a change of use Planning Application. For Clive, the Council have refused to correct the HoS, deferring action and therefore requiring a main modification.</p>

A0607	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2	Not Specified	No	Not Specified	S17.2 is based on inaccurate evidence which is out of date. Scoring is incorrect for Clive – the bowling green and shop do not exist. Removal of these will result in Clive scoring too low for hub status. Other settlements have been updated based on recent data, Clive has not.
A0611	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive	Yes	Yes	Yes	The Plan is considered sound and the accompanying evidence base is clear in how decisions and judgements were made across the board. Despite members of the community having concerns over the appraisal of the services and facilities afforded Clive, in assessment of the hierarchy of settlements, the status of Clive as a Hub is appropriate, reflective of the range of services and facilities afforded. As a Hub only a modest amount of future managed growth will be allowed, securing much needed community infrastructure, protecting the village from speculative inappropriate development via. the proposed settlement boundary.
A0618	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Hadnall	Yes	Yes	Yes	I fully support Hadnall PC's endorsement of HDL006 as the preferred site and the adoption of Hadnall as a hub.

A0650	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive	No	No	No	<p>Clive has dropped below the 48 points which would designate it as a local hub. The shop is now closed and a planning application has been submitted to turn the property into a residential dwelling. Furthermore, points were allocated to a Bowling Club which has now been denied its home on private property and has relocated to a club outside of the village (Preston Brockhurst).</p> <p>What if the shop closes? It was clarified that if the shop was to close during this process (i.e. up until the final plan is submitted to the inspectorate towards the end of this year), then Clive would fall out of Community Hub status. Shropshire Council has to live by the consistent methodology they have adopted. If Clive drops below the 48 point threshold then the village would simply not be a Community Hub.</p> <p>Clive is now below the points threshold and S.C. should honour the commitments made by Mr West and remove Community Hub status.</p>
A0653	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Clive	Not Specified	No	Not Specified	<p>Clive should not be identified as a Community Hub as two services/facilities identified within the Hierarchy of Settlements Assessment are no longer presented. Specifically the bowling green is located within a private garden (and has been for 2 years) and the village shop has now closed (October 2020) and the owner has confirmed it will not be re-opening. Taking these out would lower its score to 47, meaning Clive would no longer exceed the threshold for Community hub status.</p> <p>The post office operates only 2-4 hours a week and as such does not warrant significant points for this service.</p>

A0668	B001	Update the Hierarchy of Settlements Assessment to remove the points attributed to Clive for the bowling green and village shop. This results in the settlements score dropping below Community Hub status. Remove Community Hub status from the settlement within the draft Shropshire Local Plan.	<p>Noted. Shropshire Council considers that the methodology applied within the Hierarchy of Settlements Assessment is appropriate and has been applied consistently across Shropshire, including in relation to Clive.</p> <p>With regard to the bowling green in Clive, the concerns raised are noted, however it remains a designated open space and is included within the Council's published Open Space Needs Assessment undertaken to inform the draft Shropshire Local Plan. Any proposal to use this open space for an alternative purpose would need to be considered against both Local and National policy. Paragraph 97 of the National Planning Policy Framework (NPPF) states "Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: a) an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or b) the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or c) the development is for alternative sports and recreational provision, the benefits of which clearly outweigh the loss of the current or former use." As such it is considered appropriate and accurate to retain this facility within the Hierarchy of Settlements Assessment. It is also noted that the Hierarchy of Settlements Assessment does not include Renshaw Field, which is of course an Outdoor Sports Facility in Clive which was recently purchased by Renshaw Field Association. This purchase was part funded by Community Infrastructure Levy (CIL) generated as a result of residential development. Any future update of the Hierarchy of Settlements would need to reflect the presence of this facility.</p> <p>With regard to the convenience store, it is understood that the shop closed in October 2020 and the owner is no longer seeking to re-let it. As this closure occurred during the Covid-19 pandemic it was considered important to establish why the facility had closed and whether this was a permanent closure. It is now understood that the closure is intended to be permanent and a Planning Application to convert the shop to a residential annexe (21/00048/FUL) has been granted. Whilst generally the loss of community facilities is something resisted by local communities and local Town and Parish Councils, it is understood in this instance the Parish Council supported this Planning Application to re-use this building, and therefore accept the loss of any future opportunity to use the premises for a local convenience store. Given this Planning Permission, this would of course need to be acknowledged in any future update of the Hierarchy of Settlements Assessment. However, importantly, even if the shop in Clive is removed from the Hierarchy of Settlements Assessment, it is considered that Clive would still exceed the Community Hub threshold. As such it is considered appropriate for Clive to be identified as a proposed Community Hub.</p> <p>Shropshire Council also recognises the diverse nature of Community Hub settlements across Shropshire. As such the proposed development strategy and development guidelines for each settlement has been informed by consideration of each settlements characteristics, constraints and opportunities.</p>	No	S17.2 Clive

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0355	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Hadnall (HDL012 and HDL014)	Not Specified	No	Not Specified	<p>Strongly support designation of Hadnall as a Community Hub, this is vital to ensure the village's long-term future. However the proposed residential guideline fails the 'justified' and 'positively prepared' tests of soundness.</p> <p>-Hadnall has a strong relationship to Shrewsbury (recognised within para 5.248 of the draft Shropshire Local Plan) and as such has significant potential for rural growth socially and economically. It is also located on the A49 strategic corridor (the draft Shropshire Local Plan proposes to prioritise investment in strategic locations and growth zones along strategic corridors), but the proposed residential guideline fails to reflect this.</p> <p>-The proposed residential guideline, excluding the 73 commitments, equates to just 3 dwellings per annum which is unjustifiably low for a well located, sustainable village. Also, as the capacity of the proposed allocation is 40 dwellings, the windfall allowance is just 13 dwellings.</p> <p>-The overall housing requirement for Shropshire is too low (see A0355 B001), Hadnall is ideally located to help meet the County's housing needs.</p> <p>-Previous experience shows incremental growth/single allocations fail to deliver much housing or significant changes to sustainability. A longer term strategic approach is required for transformational change (long-term plan for Sansaw Estates thriving business park is an example). A long-term vision for Hadnall (set out in an Appendix to the representation) has been ignored by the draft Shropshire Local Plan. As such, the draft Shropshire Local Plan fails to deliver significant improvements village sustainability and is not 'positively prepared' or 'justified'. Sites HDL012 and HDL014 are centrally located and can contribute to the vision set out in the Appendix to the representation. Both scored 'good' within the Council's sustainability appraisal (HDL014 scored higher than proposed allocation HDL006). Whilst the site assessment that informs the draft Shropshire Local Plan shows HDL014 has no major problems and was only discounted due to a preference for HDL006; and there are no technical reasons why HDL012 cannot be allocated (highway information with the assessment is now out-of-date, as the highway authority has since undertaken work to the A49 that resolves the drainage issue).</p>
A0431	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Hadnall	Yes	Yes	Yes	Fully support Hadnall's status as a Hub and site HDL006. I would also like to see HDL013 and HDL016 included within the development boundary.
A0442	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Hadnall	Not Specified	No	Not Specified	<p>The preferred site for the Pre-Submission Draft of the Shropshire Local Plan for Hadnall (Wem area) has identified the site HDL006. I believe that this decision is unsound because there are other sites which are more appropriate as defined in the sustainability appraisal which have scored considerably higher and therefore should be placed as a priority over the site HDL006. For example the chosen site HDL006 has scored -1 where sites HDL0017 and HDL018 have scored +2 and +1 respectively. I also add that due to the scoring being so close, the difference of 3 points in real terms is statistically significant, and should as such be apportioned appropriately. Appraisal scores identified the "Range" of scores green colour code as a positive and white as zero, with amber being given with a negative score. Again how can a negative amber site have precedence over a green positive score site? This decision is not sound.</p>
A0473	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Hadnall	Yes	No	No	<p>Plans presented in the Pre-submission Regulation 18 and subsequent Pre-submission Regulation 19 Drafts of the Shropshire Local Plan provide no such protection and leaves unnecessary ambiguity in areas where further development would be inappropriate. The plans presented at these stages do not resemble the plans presented to the public throughout the various consultation phases prior to the Reg 18 and 19 stages. No explanation has been provided to why plans were changed at such a late stage of the development of the Local Plan.</p> <p>Shropshire Council declared Hadnall a Hub using the Hierarchy of Settlements methodology. Shropshire Council also stated that Hadnall was "in the third quarter of the list of 43 community hubs". The third quarter by Shropshire Council's definitions aims for 25% less development than the average 112 dwellings required in each rural area identified as a Hub. Using Shropshire Council's own figures and methodology the plan could be challenged as unsound as Hadnall should have been allocated 25% of 112 and therefore 84 dwellings not the current 125 allocated. Following this logic Hadnall would be required to build a further 11 dwellings to meet their own narrative which can be met by Windfall/infill/conversion.</p> <p>The preferred site in the Plan is not the preferred site locally. Alternative sites to the W and E of the village allow for a more practical and planned growth of the village. The proposed allocation was previously refused by an Inspector, and the PC concurs with the Inspector's conclusions. There is significant and historical flood risk. The access to the A49 is poor and this area of road is dangerous.</p> <p>Initial discussions with Shropshire Council during the early stages of consultation indicated that an even longer term strategic intent for the future direction of growth beyond the life of the plan could be developed (as indicated in the Local Plan 2016-38 Key shown on page 2 of the Wem-place-plan-area-inset-maps).</p> <p>Despite this initial early consultation and objections to SC's preferred site no changes to the preferred site or inclusion of strategic intent has been forthcoming.</p>
A0475	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S8, S17.2 Hadnall	Yes	Yes	Yes	The Plan is considered sound and the accompanying evidence base is clear in how decisions and judgements were made across the board. As a Hub only a modest amount of future managed growth will be allowed, securing much needed community infrastructure, protecting the village from speculative inappropriate development via the proposed settlement boundary. Owing to the amount of services and facilities available within Hadnall and in assessment with the hierarchy of settlements, the status of Hadnall as a Hub is appropriate and reflective of the range and services.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0355	B006	Increase the proposed housing guideline for Hadnall to around 300 dwellings. Include sites HDL012 for 40 dwellings and HDL014 for 150 dwellings as proposed allocations (suggested guidelines provided in representation).	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The proposed housing requirement has been informed by and will achieve the Local Housing Need (LHN) identified for Shropshire, calculated using Governments standard methodology. The proposed housing requirement also provides some flexibility to respond to changes to LHN over the plan period, includes a contribution of 1,500 dwellings to unmet cross-boundary need arising within the Black Country, and an opportunity to respond/support other objectives, as identified with the Explanation of draft Policy SP2. Shropshire Council considers that the proposed development strategy for Hadnall and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). The proposed allocation have been informed by a proportionate and robust site assessment process.	No	S17.2 Hadnall
A0431	B001	I would like to see HDL013 and HDL016 included within the development boundary.	The Development Boundaries are considered appropriate for each of the Hubs in relation to their built form and areas which are appropriate for development over the plan period.	No	S17.2 Hadnall
A0442	B001	The sustainability Appraisal has scored several sites higher than the chosen preferred site of HDL006. The requirements for selection of a site include the requirement that a landowner has expressed an intention to develop and or sell land for this purpose. Two sites which have scored higher HDL017 and HDL018 have been part of the landowners (Sansaw Estate) proposal for "a vision for the future" for Hadnall. This proposal secures a blueprint for the future in a structured and phased approach which future proofs any and all future developmental requirements for many years to come. Not just for this current local plan, but also the next and future generation of local plans. One plan, one strategy, one future.....one highly professional sustainable approach. HDL017 and or HDL018 should be the preferred chosen site for the Hadnall local plan.	Shropshire Council has undertaken a robust site assessment process and considers that the preferred allocations are appropriate for the settlement. The scores outlined in the SA are not the determining factor when deciding on a preferred site for allocation. Rather, it is a combination of many more factors, which includes expertise from those in areas such as Highways, Ecology, Public Protection etc. to ultimately determine the most appropriate site for an allocation.	No	S17.2 Hadnall
A0473	B001	Reinstate the development boundary and plans the public were initially consulted upon, giving key areas of the village protection from future development. address the issue and provide a response on the anomaly that, using Shropshire Councils own Hierarchy of Settlements methodology, Hadnall being in the third quarter of the list of 43 community hubs definitions has had proposed more than the 25% less development than the average 112 dwellings required in each rural area identified as a Hub. Provide an explanation as to why after such a wide reaching Local Plan review no longer term strategic intent for the 'future direction of growth' has been included despite being an option indicated in the Local Plan 2016-38 Key (see page 2 of the Wem-place-plan-area-inset-maps).	The Development Boundaries are considered appropriate for each of the Hubs in relation to their built form and areas which are appropriate for development over the plan period. There have been numerous consultations throughout this Local Plan Review, and amendments have been made between each of these based on the most recent and reliable information available. This can either reinforce Shropshire Council's stance on a site, Development Boundary etc. or ultimately result in changes being made.	No	S17.2 Hadnall
A0475	B001	n/a	n/a	No	S17.2 Hadnall

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0639	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2	Yes	Yes	Yes	I fully support Hadnall Parish Council's endorsement of HDL006 as the preferred site and the adoption of the Hadnall as a community hub. I would also like to see HDL013 and HDL016 included within the development boundary
A0670	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 HDL006	Yes	Yes	Yes	Fully support Hadnall Parish Councils endorsement of HDL006 as the preferred site and adoption of Hadnall as a Community Hub. Would also like to see HDL0013 & HDL016 included within the development boundary.
A0100	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Wem HDL006	Yes	Yes	Yes	Support site HDL006 and the Development Boundary
A0454	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 HDL006	Yes	Yes	Yes	n/a
A0472	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 HDL006	Yes	Yes	Yes	I fully support Hadnall PC's endorsement of HDL006 as the preferred site and the Hub status. I believe that the consultation with the PC has been sufficient and they have been afforded the opportunity to respond to the pre-submission draft but chose instead to respond individually to represent their own personal interests.
A0576	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 HDL015	Yes	No	Yes	As Hadnall has been proposed as a Community Hub, we believe this site to have significant potential, particularly as we can confirm this is a fully deliverable site with an area of 1.94 ha to deliver housing towards the preferred dwelling guideline of 125 dwellings, of which 52 remain to be identified. We believe HDL015 to be the most suitably placed to provide further parking to the Hadnall School, plus land suitable for a multipurpose sports centre, which the owner of the site has confirmed he would be pleased to make as a donation to the community subject to a review of the requirements of the school and the capacity needed (Please note: 1/3 an acre could provide up to 50 parking spaces). This land is the nearest available land to the school for car parking and providing a pavement, with access via Astley Lane. Therefore, there will be no requirement for a new access or pedestrian walkway on the very busy A49. This will provide a much safer route to the school for the children and parents than HDL006 which provides a potentially dangerous pedestrian route along the side of the busy A49.
A0347	B090	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Wem	No	No	Not Specified	The groundwater is relatively shallow within the superficial deposits and there are a number of ponds/spreads, springs and watercourses in the vicinity. There is the potential for contamination issues associated with adjacent land uses which should be considered prior to development. Mains foul drainage should be adopted and the surface water drainage should also be carefully designed as there are a number of private water supplies in the immediate vicinity.
A0600	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17	Yes	No	Yes	Support reference to the need for noise from defence activities to be appropriately managed and requirement for engagement with the MOD as part of production of an appropriate noise assessment in the site guidelines for SHA019 - changed from an earlier draft. Also welcome and in principle support para 5.250 of the explanation to draft Policy S17.2. However, consider it needs to be amended to ensure clarity and factual accuracy. Also concerned this para only relates to development in the village and the designated safeguarding zones. In practice, sensitive development can still be impacted by noise from defence activities outside of these areas - see comments on draft Policy DP18.
A0572	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 SHA012VAR	Yes	No	Yes	SHA012VAR is a well located and fully deliverable site with an area of 3.84 ha. We believe this site is suitably placed to provide development in the Community Hub of Shawbury towards the target of dwellings by 2038, being situated with an established access to the A53 and adjoining developed land. Shawbury is a thriving Community Hub with local facilities such as shops, public house, post office, medical centre and a school

A drawing is provided which shows the site area, access and the issues surrounding the development of the site. As the only allocation in Shawbury anticipated that Phase 1 of the site be developed for up to 40 dwellings and Phase 2 for up to 40 dwellings. Plan is provided showing phases, access; open space, drainage and other considerations. A topographical survey is provided;</p> <p>The land is available, viable and deliverable and will be brought forward at the earliest opportunity. The site is confirmed as meeting the conditions (including landowners wishing to sell) for being available for development. The site will be made available for development when formally allocated. It is anticipated that the sites will come forward in the 'Short Term' (2020 to 2025) with completion in the 'Medium Term' (2025 to 2030)</p> <ul style="list-style-type: none"> <li>•Highlights that part b) of Policy DP1 Residential Mix' will apply as no RHRP Local Housing Need Survey for Shawbury and that the suggested affordable housing requirement of 10% will be through mix of affordable rent/discounted sale/shared equity etc determined in consultation with the provider and the Shropshire Council .</li> <li>•CIL payment requirement is identified;</li> <li>•Arrangements for appropriate vehicular access via A53 roundabout and through Oaklands Park &amp; protection of Bus Turning/Parent Parking Facility are confirmed;</li> <li>•Development Guideline for footpath links are identified and routes of proposed footpath link shown on submitted aerial imagery extract.</li> <li>•It is suggested that the strategic area of open space could be alongside the other open space area within existing Lioncourt 'Oaklands Park' Development with localised areas of open space within the allocated site area;</li> <li>•Confirmation that the layout and design of the properties close to the site will respect the identified heritage assets, although it is expected that the built development will be a significant distance from these structures;</li> <li>•aerial imagery extract shows trees and hedge lines &amp; indicates that although elements of the internal hedge lines will be lost to provide access routes within the site but the remainder should be accommodated within the development of the site wherever possible;</li> <li>•Accommodation of Anaerobic Digester standoff distance of 175m can be accommodated;</li> <li>•Arrangements for foul and surface water drainage referencing site guidelines and agreed assistance (with £30, 000 allocated ) in improving culvert related flood problems are set out ( including detailed Plans of Shropshire Council agreed drainage works )</li> <li>•Noise considerations are detailed;</li> <li>•Measures to protect the amenity of the neighbouring properties are set out;</li> <li>•Availability of services detailed</li> </ul>
A0649	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.2 Shawbury SHA019	Not Specified	No	No	<p>False promises have been made relating to the recent development adjacent to SHA019. This was scheduled to be 50 houses maximum. Residents have been misled on historic developments. SHA019 has flood issues. Problems with the sewage systems in this area. Ecology and wildlife in this area needs protecting. Dangerous for pedestrians if roads are built around the PROW. There is a possible conflict of interest in relation to the agent, the landowner and his family and their planning backgrounds.</p>
A0019	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP9	Not Specified	Not Specified	Not Specified	<p>Grinshill Parish Council wishes to re-affirm its requirement for Grinshill to become an independent Community Cluster. This is in line with our aspirations to maintain or enhance sustainability through modest levels of appropriate development.</p>
A0434	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S17.3 Grinshill	Not Specified	No	Not Specified	<p>There is insufficient justification for Grinshill village having ' Community Cluster ' status. The following points support this removal :-</p> <p>The Government has placed a presumption in favour of sustainable development at the heart of its approach to planning (NPPF).</p> <p>Further new residential development in Grinshill would not be sustainable because the village is not served by any safe and accessible public transport. There is no village shop or public house to sustain. More residential development in Grinshill would conflict directly with the stated climate change aims of SP3 (there is no public transport serving Grinshill or to link or integrate with ).</p> <p>In 2015 when the residents were asked for their views on future village priorities as part of the Grinshill Parish Plan review, only 3 out of 60 returned responses wanted to extend the village boundary.</p> <p>During the Local Plan preparation period Grinshill village was linked with the nearby larger Clive settlement to justify a Community Cluster designation for Grinshill, with Clive being proposed as a Community Hub. More recently Clive has permanently lost two key community facilities (village shop and bowling green) which results in Clive not meeting the definition of a significant rural service centre. Without this nearby Community Hub the justification for Grinshill becoming a Community Cluster is further reduced. The Neighbourhood Plan process should be used to determine if the residents of Grinshill want Community Cluster status for their village.</p>
A0005	B002	Sustainability Appraisal	S18. Whitchurch	Not Specified	No	Not Specified	<ol style="list-style-type: none"> <li>1.Two doctors surgeries have already closed, the primary school is at full capacity and expansion has been repeatedly delayed.</li> <li>2.Public transport serving Whitchurch has continued to decline over the last several years, with reduced services and reliability. There are no published plans to improve public transport, both rail and bus services continue to be reduced.</li> <li>3. With reference to "existing access to health, leisure, recreational and cultural activities." - as stated above 'health care' is already stretched with access to hospitals and emergency services severely compromised following the closure of the ambulance station and paramedic capacity compromised: leisure and recreational activities limited (in particular for young people with the decrease in youth provision) and cultural activities few and far between e.g. the nearest cinema is 12 miles (Wrexham). Therefore, the statement "this level of growth is likely to minimise the need for additional car-based transport" is misleading.</li> </ol>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0592	B001	n/a	Noted	No	S17.2 Shawbury (SHA019)
A0649	B001	<p>1. The proposed development of SHA019 should be re examined as a preferred location for housing development</p> <p>2. Alternative developments on a much smaller scale should be considered from those inspected as earlier proposed development sites around Shawbury as part of a modification to the plan.</p> <p>3. The responsibility to consult with Shawbury Parish Council in identifying a site for further development has not been considered by Shropshire Council equivocally in a transparent way, who announced 1 year ago that non of the identified planning sites had preference.</p>	Shropshire Council has undertaken a robust site assessment process and considers that the preferred allocations are appropriate for the settlement.	No	S17.2 Shawbury (SHA019)
A0019	B001	n/a	Noted.	No	S17.3 Grinshill
A0434	B001	Remove Grinshill village from Schedule SP2.3: Community Clusters and S17.3(1a).	Shropshire Council considers that the approach used to identify Community Clusters, by which communities can opt-in or opt-out is appropriate and reflects the intended purpose of such Community Clusters - settlements with aspirations to maintain or enhance their sustainability. As such, it is considered appropriate for Grinshill to be identified as a proposed Community Cluster.	No	S17.3 Grinshill
A0005	B002	The statements in the review indicating that this situation is likely to be maintained or improved should be clarified and changed to reflect the correct situation regarding these important areas which are indicated as highly likely to continue to degrade. It is also highly likely that car based transport will increase in line with further developments and not be 'minimised' to any degree as stated.	Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire is appropriate, effective, sustainable and deliverable. The draft Shropshire Local Plan should be read as a whole. Draft Policy DP28 addresses transport.	No	S18.1 Whitchurch

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0020	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18. Whitchurch Place Plan Area	Not Specified	No	Not Specified	Concern over SAMDev sites: Tilstock Road site and Alport Road sites have not started and account for 600 dwellings. We contend that the Council should look at other sites particularly MPG's site at Tarporley Road.
A0107	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 Whitchurch	Yes	No	Yes	Whitchurch has been identified as a Principal Centre with three sites proposed for allocation. As a Principal Centre, consider a broader portfolio of sites should be identified for allocation in order to maximise housing delivery and offer the widest possible range of dwellings. Have previously promoted land in Whitchurch (plans appended to this representation) which provides scope for delivery of housing and it appears the Council has not given sufficient consideration to the benefits of this site. It has the potential for access from the bypass thus avoiding adding congestion onto roads in the town, it is within walking distance of a range of local services and facilities and there are also a range of facilities and services proposed for the site (including medical facilities, leisure and recreation).
A0201	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18	Yes	No	Yes	Support identification of Whitchurch as a Principal Centre and the town acting as a focus for significant development over the plan period. This is consistent with the evidence base for the Plan and consistent with the plan's urban-focused spatial strategy that outperforms reasonable alternatives considered through the Sustainability Appraisal process. Support allocation of WHT014 for 70 new homes. The site is suitable, available, achievable and therefore deliverable (promoters committed to its development early in the proposed Plan period and intend to submit a Planning Application upon adoption of the Local Plan, delivering 50 dwellings per annum), sustainable, complements the proposed spatial strategy and can be delivered in line with aspirations contained in the draft Policy. Refreshed illustrative Masterplan and visuals prepared (Appendices to this representation) show how the site could be developed in a manner that avoids adverse impacts, complies with the draft provisions set out in Schedule S18.1(i), whilst maximising the efficiency of the site to deliver the balance of the allocation. The site is not subject to any technical, physical or environmental constraints that would prevent its development: -Consideration of past Planning Applications on the site established access onto Liverpool Road was acceptable and no wider issues arose on the road network requiring mitigation, whilst additional highway work shows principal accesses are deliverable and opportunities exist to support pedestrian/cycle connectivity. -Updated ecology work shows there are no fundamental ecological constraints as the site is dominated by poor semi-improved grassland with species-poor hedgerows and fencing field boundaries and that Great Crested Newts are not present in nearby ponds. -Consideration of past Planning Applications on the site did not raise any heritage concerns (Whitchurch Conservation Area is some distance away). Object to omission of part of WHT046 (plan and visuals showing proposed allocation WHT014 and part of WHT046 provided as appendices to this representation). This land is deliverable; free from any technical, physical or environmental constraints; provides the potential to 'round off' proposed allocation WHT014; could be developed alongside WHT014 in a comprehensive manner (green infrastructure, highway etc); would improve the overall layout of these developments and allow efficient use of land; and provide around 30 additional dwellings. The site is enclosed on two sides by proposed allocation WHT014 and another by properties fronting Alkington Road. If additional housing land is required to meet cross-boundary needs, sites adjacent to proposed allocations should be considered. Concerned about deliverability of existing allocations WHIT009 and WHIT021 (capacity for 600 dwellings). Both sites have Planning Permission but neither are being developed to meet needs. As such consider additional sites and land in Whitchurch should be identified in order to provide a buffer and ensure that the housing requirement for the town is met. Part of WHT046 presents a sensible way to do this.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0020	B007	In order to address our concern over soundness and delivery, we contend that the land at Tarporley Road should be considered for an allocation either instead of current allocations or sites that have been carried forward from the SAMDEV Plan, in order to meet housing needs in town in the early part of the Plan Period.	Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S18.1 Whitchurch
A0107	B001	Consider allocation of site promotion (plans appended to representation) at Whitchurch.	Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S18.1 Whitchurch
A0201	B004	Include part of site WHT046 as a proposed allocation.	Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S18.1 Whitchurch

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0262	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 (WHT037 and WHT044)	Not Specified	No	Not Specified	<p>The draft Shropshire Local Plan is unsound as it fails to fully address surface water flooding and concentrates the sequential test on fluvial flooding, to the extent that the sequential approach to surface water flooding has been missed. As such, do not consider that the flood risk sequential test adequately (in line with National Planning Policy Framework (NPPF) policy and guidelines) considers all sources of flooding, including surface water.</p> <p>Proposed allocations WHT037 and WHT044 are unsound. Whilst these sites are not located in flood zones 2 or 3, they suffer from considerable surface water (pluvial) flooding. This is evidenced in:</p> <ul style="list-style-type: none"> <li>-The Environment Agency surface water flooding map (extract appended to representation) which shows a sizeable area of high surface flood risk in the central area of the two sites and along the watercourse that skirts around the Grove Estate on Tarporley Road;</li> <li>-Photograph of past flooding (appended to representation);</li> <li>-Site geology;</li> <li>-Written evidence from 30+ local households (within the Regulation 18 consultation);</li> <li>-Local knowledge as this area is recognised as being very wet; and</li> <li>-Past flood events in the area, exacerbated by recent construction. Development causes concentration of water which previously percolated into the ground, which is surfacing at lower level weak points and inundating homes and gardens.</li> </ul> <p>New development sites at Oak Tree Way and the Beeches (adjacent to WHT037 and WHT044), have caused flood issues. An outstanding application (18/02583/FUL) validated in July 2018 remains for construction of storm drainage on Oak Tree Way, comments on this application document the major flooding problems residents in the Chester Road area experience, but the developer has sold all associated plots and moved on.</p> <p>Do not want existing problems to be further exacerbated by development. No comfort in proposals to include appropriate sustainable drainage as they don't work well, even if they happen, and result in ongoing issues once the developer has departed as per Oak Tree Way and the Beeches. The developer should be required to demonstrate necessary investigations and modelling has occurred and WHT037 and WHT044 are suitable for development during examination, rather than the local Councillor and residents arguing the case to prevent increased flood risk to existing properties.</p> <p>Page 61 of the level 1 Strategic Flood Risk Assessment (SFRA) recognises the surface water flood risk associated with runoff from high-ground to the unnamed watercourse which flows into Grindley Brook - this is the Chester Road area associated with WHT037 and WHT044.</p> <p>Awaiting a response to a Cabinet Question on infrastructure and facility deficiencies in Whitchurch. As such, reserve the right to produce further information evidencing deficiencies of infrastructure and utilities to sustain new development in Whitchurch.</p>
A0364	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1	Not Specified	No	Not Specified	<p>Too much reliance on windfall for Whitchurch. The LVSS identifies the south of the settlement as having the lowest landscape and visual sensitivity for housing development. WHT022 has a Good SA score. A recent (withdrawn) application addressed the concerns on the site relating to ecological features.</p>
A0421	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18	Not Specified	No	Not Specified	<p>Oppose proposed housing allocations in Whitchurch, as more appropriate and sustainable alternative sites (such as WHT035) exist.</p> <p>WHT035 is suitable, available and viable. It has clearly defined boundaries, has no overriding constraints to development and benefits from direct access onto Tarporley Road, and can help deliver the housing needs of Whitchurch and would represent sustainable development.</p> <p>Consider suitability of WHT035 has been overlooked and the strategic land availability assessment (SLAA) and wider site assessment process is flawed. The site assessment concludes WHT035 is divorced from the town, but this is incorrect as it is adjacent to the well-established Grove development, would represent a natural extension of the town and is in proximity of current and proposed allocations. Given this, it is clearly a sustainable location, benefits from direct and convenient access to services and facilities in the town centre and would help promote use of sustainable modes of transport. Indeed, its sustainability is confirmed within the Sustainability Appraisal (SA) of the draft Shropshire Local Plan which rates the site 'fair', with a better score than proposed allocations on Chester Road.</p> <p>Note a local Cllr has raised significant infrastructure concerns in relation to proposed allocations WHT037 and WHT044. Given these concerns, clear there are underlying issue which have not been properly considered in relation to proposed allocations.</p> <p>WHT044 was also rejected in the SLAA due to poor relationship to the existing built form/separation from the development boundary and WHT037 is dependent on WHT044 for access. Note this is a joint allocation, but it is difficult to see how this improves suitability given each sites failings.</p> <p>WHT042 is landlocked and requires the adjacent allocation to be developed first, before it can be considered available and its deliverability is questionable.</p> <p>As such consider the draft Shropshire Local Plan is unsound.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0262	B001	Removed proposed allocations WHT037 and WHT044 from the draft Shropshire Local Plan. Retain the existing development boundary as illustrated on plans appended to this representation.	Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity. The Council considers that the risk of flooding from all sources has been adequately and appropriately assessed through the Strategic Flood Risk Assessments (Stages 1 and 2) and that the Sequential and Exception Tests (based on the SFRA-1 and SFRA-2) are compliant with national planning policy and guidance. We would also note that neither the Environment Agency or Welsh Water have objected to this proposed allocation.	No	S18.1 Whitchurch
A0364	B001	To make the Plan 'sound' requires the allocation of additional land in Whitchurch to deliver housing. Policy S18.1 and the Whitchurch Policies Map should therefore be amended to include site WHT002, within the development boundary of the settlement and allocated for residential development for up to 50 dwellings. The allocation of this land would result in a greater level of certainty that the aims and objectives of the Plan, including the strategic growth objectives in this area of the County, will be realised over the Plan period.	Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S18.1 Whitchurch
A0421	B001	Allocate site WHT035 for residential development.	Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S18.1 Whitchurch

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0422	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18	Not Specified	No	Not Specified	<p>Consider the proposed housing allocations in Whitchurch are inappropriate, do not represent the most suitable or sustainable options for Whitchurch and are unsound. As such, the draft Shropshire Local Plan does not meet the principles/requirements of draft Policy SP1 or the principles of sustainable development prescribed by the National Planning Policy Framework (NPPF) and is unsound.</p> <p>Also consider there is a lack of consistency in the Council's approach to assessing suitability of the sites and identifying proposed allocations and the site assessment process is poor and vague. For example:</p> <ul style="list-style-type: none"> <li>-Consideration of landscape/visual impact provides no explanation of the assessment, reaches inconsistent conclusions for sites and includes no recognition of site boundaries.</li> <li>-WHT042 is landlocked and requires the adjacent allocation to be developed first, before it can be considered available and its deliverability is questionable. It is also in close proximity of Staggs Brock Wildlife site and in flood zones 2/3 - it is difficult to see how the Council have determined these issues can be mitigated, particularly as a similar approach is not take within WHT017VAR.</li> <li>-A local Cllr has raised significant infrastructure concerns in relation to proposed allocations WHT037 and WHT044. Given these concerns, clear there are underlying issue which have not been properly considered in relation to proposed allocations. WHT044 was also rejected in the SLAA due to poor relationship to the existing built form/separation from the development boundary and WHT037 is dependent on WHT044 for access. Note this is a joint allocation, but it is difficult to see how this improves suitability given each sites failings. WHT037 and WHT044 is proposed for allocation despite the need for further highway assessment and part of the justification is a link between Chester Road and Tarporley Road, which is considered unnecessary as both routes are directly into town. This brings into question wider reasoning.</li> </ul> <p>Site WHT017VAR is appropriate, suitable, available, viable and developable. It benefits from good access to services and facilities and the town centre, an appropriate access can be established, flood risk (identified as a concern within the site assessment process) is assessed and can be appropriately managed (access and sustainability appraisal and flood risk assessment for the site is appended to the representation), and it provides an opportunity to expand and restore the environmental network and has clearly defined boundaries. It represents a more sustainable and suitable housing allocation to meet the needs of Whitchurch than proposed allocations.</p> <p>The Sustainability Appraisal (SA) of WHT017VAR is incorrect scores for presence of tree preservation orders; access to a leisure centre and natural green space; presence of grade 1/2/3 agricultural land; and being in flood zones 2/3. The SA fails to consider access to essential goods and local shops. With these scores corrected it is a more sustainable site than the proposed allocations. WHT017VAR also scores comparably with the proposed allocations within the highway accessibility ratings. As such it is considered clearly a better and more sustainable housing option.</p> <p>Consider the proposed windfall allowance for Whitchurch is too high and there is no guarantee it will be delivered. This could be reduced by allocating WHT017VAR.</p>
A0515	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1i (WHT037 & WHT044)	Yes	No	Yes	<p>Support proposed allocation of WHT037 and WHT044 for residential development. The site is available, deliverable and will come forward for development, at the first opportunity (site investigations have been undertaken, including ground investigation tests, arboriculture surveys, ecology, highways and drainage assessments in readiness for a full Planning Application in 2021). Promoter has a track record of delivery. The site forms a logical extension to the now completed WHIT046 site and will make a positive contribution to meeting the identified housing need for Whitchurch.</p> <p>However, consider the draft Shropshire Local Plan is unsound as site capacities are expressed in terms of 'Provision' (in the case of WHT037 and WHT044, 200 dwellings). Consider this should be expressed as a minimum, otherwise it has the potential to jeopardise housing delivery (and meeting housing need) and there is a realistic possibility that allocated sites could be developed at low densities which would not represent effective use of land. As currently expressed, the draft Policy is considered contrary to section 11 (paras 117 and 122) of the National Planning Policy Framework (NPPF) on making effective use of land.</p> <p>WHT037 and WHT044 has capacity to accommodate more than 200 dwellings, whilst complying with other Local Plan policies such as open space provision, sustainable drainage and habitat enhancement. As such, the provision should be a minimum of 200 dwellings, to ensure efficient use of land and maximise the prospect that the objectively assessed housing need will be met.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0422	B001	<p>Re-assess potential housing allocations in Whitchurch.  Revisit the sustainability criteria utilised.  Allocate site WHT017VAR for residential development.</p>	<p>Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity. Shropshire Council also considers that the Sustainability Appraisal (SA) of the draft Shropshire Local Plan is appropriate and robust.</p>	No	S18.1 Whitchurch
A0515	B001	<p>Modify column 3 of Schedule S18.1(i) (Provision) to read minimum level of provision, 200 dwellings.  The principle of a minimum level of provision ought to be applied to WHT037 and WHY044 and all residential allocations identified in the draft Shropshire Local Plan.</p>	<p>Noted. Para 6 of Draft Policy S18.1 recognises that the Provision figures are 'approximate'. It states "Development of site allocations should be in accordance with specified development guidelines and approximate site provision figures and all other relevant policies of this Local Plan." Shropshire Council has generally taken a precautionary approach to site capacity to ensure that the proposed housing requirement and proposed settlement guidelines are achieved. The specific number of dwellings and density of development that is appropriate on any proposed allocations will, if they are ultimately allocated, be determined at the Planning Application stage.</p> <p>With regard to the efficient use of land, Shropshire Council would note that draft Policies SP1 and SP5 specify development should make efficient use of land. Furthermore draft Policy DP1 specifies a residential mix for sites of 5 or more dwellings which will contribute to ensuring efficient use of land. Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.</p>	No	S18.1 Whitchurch

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0517	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1	Yes	Yes	Yes	Support the sites allocated for development on the Policies Map for Whitchurch - WHT014, WHT037, WHT042 and WHT044; and those saved and continued from the SAMDev.
A0523	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	WHT044	Yes	No	Yes	Historically little development had occurred in this part of Whitchurch (around WHT044), but 4 schemes have occurred in the last 6-7 years, which is why the site is now described as infill. Rather it is loss of remaining fields and hedges. WHT044 is subject to groundwater issues which have caused problems for properties and damaged roads. Significant development has occurred in Whitchurch over the last 25 years and 500 dwellings at Tilstock Road is underway after delay. Brownfield sites such as Mile Bank Creamery should be prioritised. Given extent of approved development, see no need for WHT044.
A0610	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 WHT042	Yes	Yes	Yes	The plan proposal for Whitchurch is considered sound and logical, with site WHT042 providing a logical rounding off of the settlement alongside delivering the adjacent Employment site.
A0652	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 Whitchurch	Not Specified	Not Specified	Not Specified	The site at Hill Valley Golf Course should be included.
A0016	B007	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 Whitchurch WHT014	Yes	Yes	Yes	The public sewerage network can accept the potential foul flows from the proposed development site. The sewerage system in this area drains to Whitchurch WwTW which can accommodate the foul flows from the proposed growth figure.
A0031	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 Whitchurch WHT014	Not Specified	No	Not Specified	WHT014 should be retained as the area is already densely populated. The greenfield site is good for mental & physical health. Traffic problems exist here.
A0441	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 WHT014	Not Specified	No	Not Specified	Inclusion of land at Liverpool Road, Whitchurch, (WHT014) for the provision of 70 dwellings is unsound for the following reasons:- If this development goes ahead an extra 100 vehicles may use Wrexham Road twice a day during the rush hours. This highway is extremely narrow and due to off street parking is limited to single lane traffic. The consequent stopping, starting and reversing of vehicles causes delays, frustration to motorists and creates much pollution to pedestrians and residents, where dwellings are situated close to the highway, many of which have their ground floors lower than the road. Pollution in the UK exceeds the WHO recommended levels according to research carried out for Asthma UK. Data released by the House of Commons Library states that Whitchurch, Shropshire has the highest rate of Asthma incidents in England with 9.3 per cent of the population registered with this condition compared with a national average of 5.9 per cent.
A0517	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 WHT014	Not Specified	Yes	Not Specified	This site continues the new housing that has been built in this part of town. Like WHT037 and WHT044 it is very well situated for the town centre. It makes perfect sense to continue to build houses on Liverpool Road. WHT014 is far more sustainable, both in terms of access to services and shops, and has less impact on things like roads and landscape than alternative options. The Council is correct to allocate WHT014 and I support it.
A0016	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 Whitchurch WHT037 & 044	Yes	Yes	Yes	The public sewerage network can accept the potential foul flows from the proposed allocation. Welsh Water will seek to control the points of communication to the sewerage network via appropriate planning conditions as such there would be a requirement for off-site sewers to be provided to the boundary of the development site. The sewers can be requisitioned through the provisions of the Water Industry Act 1991 (as amended). The sewerage system in this area drains to Whitchurch WwTW which can accommodate the foul flows from the proposed growth figure.
A0456	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 Whitchurch WHT037 WHT044	No	No	No	Unsound – Both these sites WHT037 and WHT044 were not included in the original Local plan which was not signed off within the original time frame. Therefore why have the areas, which were originally deemed too wet and prone to flooding, now been considered for development. There have been serious sewage issues at The Brambles and The Mount estate off the Tarpoley Road. Development should not be allowed to take place when it causes increased run off and flooding of existing properties, as has occurred on Chester Road, as a consequence of Oak Tree Way and The Beeches being built.

A0465	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 WHT037 & WHT044	Yes	No	Yes	These sites will cause over-development of the area. The sites have flood issues. Habitats on site.
A0517	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 WHT037 / 044	Not Specified	Yes	Not Specified	These sites will continue the successful housing development that has already taken place around them. They are very well located and genuinely within walking distance of the town centre, including Sainsbury's which is only a few minutes away. I therefore support their allocation.
A0590	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Whitchurch WHT037 WHT044	Yes	Yes	Yes	Support and press for the retention of the allocation of sites WHT037 and WHT044. The site lies within a highly sustainable location close to Whitchurch town centre and its services and facilities. It is on the built up edge of Whitchurch and sits comfortably within the existing pattern of development. Opportunity for access to serve WHT044 from B5395 road frontage & for WHT037 via WHT004. Note 'Development Guidelines' suggest that there should not be a link between Chester Road and Tarporley Road The highway network is capable of accommodating the development proposed. Acknowledging local concerns raised regarding the issues of drainage around the site the response details drainage requirements, investigations & drainage solutions available including main sewer connection, SUDs and alternatives. It also confirms that drainage issues will be the subject of detailed assessment at the planning application stage and will fulfil the criteria within Building Regulation Approved Document H (extract provided) , NPPF and Local Plan Policy CS18 The land is available, viable and deliverable and will be brought forward at the earliest opportunity. The site is confirmed as meeting the conditions (including landowners wishing to sell) for being available for development. The site will be made available for development when formally allocated. It is anticipated that the sites will come forward in the 'Short Term' (2020 to 2025) with completion in the 'Medium Term' (2025 to 2030).
A0593	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	WHT037 and WHT044 (Whitchurch)	Yes	Yes	Yes	The settlement boundary of the town has been amended to accommodate the allocations WHT037 and WHT044 along Chester Road which form a logical extension to the settlement. The site lies off the B5395 (formerly an A41 trunk road). The highway network is capable of accommodating the development. However, the position of the site access should not prejudice the longer term development of site WHT043 on the opposite side of the B5395. Ideally the 2 sites would be accessed from a roundabout which would also provide traffic calming. It is requested that the Development Guidelines be amended to ensure the land to the west is not sterilized.
A0016	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 Whitchurch WHT042	Yes	Yes	Yes	A hydraulic modelling assessment (HMA) of the sewerage network will be required to assess its capacity to accommodate additional foul flows. Potential developers would be expected to fund investigations during pre-planning stages. The findings of the HMA would inform the extent of any necessary sewerage upgrades which can be requisitioned through the provisions of the Water Industry Act 1991 (as amended). The sewerage system in this area drains to Whitchurch WwTW which can accommodate the foul flows from the proposed growth figure.
A0517	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1 WHT042	Not Specified	Yes	Not Specified	This site is very well located by the railway station and to the jobs around Waymills. This combination delivers sustainable development. Both the station and industrial estate are walkable, as is the town centre along Station Road into Green End. This site is far superior to other options that the Council has quite correctly rejected for failing to deliver sustainable development. I therefore support its allocation.
A0386	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18	Not Specified	No	Not Specified	Support proposed residential allocation WHT037 & WHT044. They represent a logical solution to meeting housing need at Whitchurch; the adjoin residential development on existing SAMDev allocation WHIT046 (natural second phase/extension and complementary to this site); they are accessible to existing transport networks, local facilities/services; and are a sustainable location for residential development. A Vision Document/Concept Plan form an appendix to the representation and demonstrate site suitability and how the site can sustainably and comprehensively developed meeting housing needs and also providing appropriate connectivity, landscaping, open space & sustainable drainage technologies to prevent flooding. The site can be delivered early in the proposed Plan period. However would welcome the following minor amendments: -Increase the proposed capacity from 200 dwellings to 215 dwellings (reflecting strategic objectives of the draft Shropshire Local Plan, the sites sustainable location and that this can be delivered whilst also meeting policy required open space/biodiversity mitigation) It would also increase effectiveness and alignment with the National Planning Policy Framework (NPPF) and provide greater certainty about housing land supply (reducing reliance on windfall). -Query guideline related to quality, design, mix and layout as there is no assessment of impact of different housing mix provisions on viability, a consistent theme in Planning Appeal Decisions regarding Planning Authority attempts to impose a housing mix on market dwellings. There is also no reference to demand, a key component of housing provision. Remaining development guidelines are in line with proposals submitted to date and supported. Detailed requirements should be informed by additional site specific evidence as part of the Planning Application process. Comments on other policies relevant in the site-specific context.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0465	B001	Development could be restricted to the northern strip of land, parallel to the bypass, between Tarporley Road and Chester Road roundabouts.	Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S18.1 Whitchurch (WHT037 & WHT044)
A0517	B005	n/a	Noted.	No	S18.1 Whitchurch (WHT037 & WHT044)
A0590	B001	n/a	Noted.	No	S18.1 Whitchurch (WHT037 & WHT044)
A0593	B001	As referenced in comments, request that Development Guidelines include the references to the site access to ensure the land to the west is not sterilized	Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity. The draft site guidelines for proposed allocation WHT037 & WHT044, including those relating to highways, are also considered appropriate.	No	S18.1 Whitchurch (WHT037 & WHT044)
A0016	B006	A hydraulic modelling assessment (HMA) of the sewerage network will be required to assess its capacity to accommodate additional foul flows	Noted. The Council expects hydraulic modelling to be carried out by the developer at the planning application stage and assessed through the Development Management process. Information on capacity of the Whitchurch WwTW is welcomed (see also Statement of Common Ground with Dwr Cymru Welsh Water).	No	S18.1 Whitchurch (WHT042)
A0517	B006	n/a	Noted.	No	S18.1 Whitchurch (WHT042)
A0386	B008	The overall capacity of WHT037 & WHT044 should be amended from 200 to 215 dwellings. The first proposed site guideline for WHT037 & WHT044 should be amended to provide further clarity on housing mix, with a reference included to demand; or alternatively deletion of the reference to 'identified local needs'.	Noted. Para 6 of Draft Policy S18.1 recognises that the Provision figures are 'approximate'. It states "Development of site allocations should be in accordance with specified development guidelines and approximate site provision figures and all other relevant policies of this Local Plan." Shropshire Council has generally taken a precautionary approach to site capacity to ensure that the proposed housing requirement and proposed settlement guidelines are achieved. The specific number of dwellings and density of development that is appropriate on any proposed allocations will, if they are ultimately allocated, be determined at the Planning Application stage. Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity. The draft site guidelines for proposed allocation WHT037 & WHT044, including those relating to residential mix, are also considered appropriate. Furthermore, the draft Shropshire Local Plan should be read as a whole. Draft Policy DP1 specifically addresses residential mix.	No	S18.1 WHT037 & WHT044

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0348	B038	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.2(i) PPW025	Not Specified	Yes	Not Specified	Note the Council has undertaken a 'Supplementary Site Assessment' for PPW025, regarding the potential impact on the significance of the Prees Conservation Area as a consequence of impacts upon its setting and the potential impacts on the settings and significance of the three closest listed buildings (all Grade II): Nos. 14 to 16 (inclusive), Whitchurch Road (NHLE ref. 1236426); No. 9 Whitchurch Road (NHLE ref. 1222022); and the barn c.20m N of Tudor House (NHLE ref. 1264627). This concludes in principle development would not cause harm to the significance of the Conservation Area as a result of inappropriate impacts on its setting, due to the Conservation Area being bounded by existing development to the north and west and thus this land parcel not being considered to make any particular contribution to the significance of the Conservation Area's setting. However, it is noted that the Supplementary Assessment states this would be subject to development being of a comparable scale to adjacent form and of good design standard, with a palate of materials that is informed by and is in keeping the local vernacular. Whilst proposed Development Guidelines require a proportionate Heritage Impact Assessment and its recommendations to be taken into account, they do not include the above requirements, it is suggested they should. With regard to the adjacent listed buildings, the Supplementary Assessment identifies the potential for harm to nos. 14 to 16 Whitchurch Road and also to the setting of the Barn c.20m north of Tudor House, which mainly comprises the surrounding historic farmstead of which it forms a part. Suggested mitigation, set out in the Supplementary Assessment includes careful consideration of scale, massing and layout of development on the part of the site fronting Whitchurch Road and provision of a suitable and well-designed landscape buffer at the southern end of the site, to provide an area of amenity space and a stand off from the Barn. These are not included within the proposed development guidelines and it is strongly suggested that these be added, together with the requirement for an archaeological desk-based assessment, and if appropriate a field evaluation, to be submitted with any planning application, also referenced in the Supplementary Assessment.
A0591	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Prees PPW025	Yes	Yes	Yes	Response seeks to support the allocation of site PPW025. The site lies in a highly sustainable location on the built up edge of Prees and sits comfortably within the existing pattern of development Scheme for site responds positively to all of the issues raised within the Development Guidelines including: appropriate mix of dwelling types informed by Prees 'Right Home Right Place' survey 2018; planning permission 14/03511/OUT agreed access point and design will be used along with any other required highways works; retention of frontage trees and hedges and provision of open space along the western side of the site; appropriate consideration of nearby listed buildings and heritage asset; use of acoustic design will be used to appropriately manage road noise; 2018 application included an appropriate Flood Risk Assessment, informed by a sustainable drainage strategy & houses will be excluded from the elements of the site located in flood zones 2 and/or 3 which form part of the Green Infrastructure network. It is confirmed that the site is available, deliverable & viable. The site in one ownership which simplifies delivery & an option is held to develop the land for residential purposes. Previous planning application 14/03511/OUT demonstrates the desire to develop the site & the documents required for a planning application are ready for submission & this would be done within 1 month of Plan adoption. Hawk Developments plan to swiftly develop once planning approval obtained. Timescales are set out in the representation which expect completion by Autumn 2026 assuming Plan & planning application approvals. Supporting information provided which includes supporting statement; existing site plan; indicative site plan; flood plan; tree report; ecological appraisal; flood risk assessment
A0594	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.2 Land N of Tudor House, Prees	No	No	Not Specified	Allocation of site PPW025 is not justified, is unsound, unsustainable and not demonstrated as deliverable & superior, more sustainable site PPW021a which is within the Prees Community Hub should be allocated instead. Site PPW021a can deliver around 60 units with the added benefits of additional open space to serve the community as well as the provision of retail until. The site is deliverable with no insurmountable constraints and should be allocated in preference to site PPW025. Site PPW021a has not been properly or fairly assessed. Representation details lack of consideration of the site PPW021a with submitted supporting evidence not being considered & request for meetings ignored & not arranged at a sufficiently early opportunity to allow inclusion of the site for allocation. The Council has failed to work proactively with site promoters as is expected by the NPPF for applicants and can reasonably have been expected in relation to the Local Plan review given the substantial supporting information submitted. The Council have identified a site as a preferred option at a very early stage and have failed to justify why alternative sites (including PPW021a) are unacceptable and there is doubt whether they have received due consideration. 2018 SLAA status the same for PPW025 & PPW021 & Regulation 18 SA scores PPW021a higher (good) than PPW025 (fair). Both sites in flood zone 3. There is evidence that preferred site (PPW025) was considered unacceptable by the Parish Council (Appendix A to response). Consideration of policy for allocation PPW025 demonstrates significant & fundamental issues requiring resolution including flood risk management and acoustic mitigation with no evidence, including site layout, of how such issues can be overcome. No evidence of benefits are achieved through development of PPW025 to outweigh the benefits of PPW021a, including whether the development will help to address the existing flood issues in the vicinity. PPW025 likely to increase water run off to the brook. The proposed allocation PPW025 is close to the Conservation Area and several listed buildings and it is not clear if or how impact on the historic environment can be mitigated which may prevent development. Benefits of PPW021a include: provision of a shop on site (unachievable on PPW025), spacious well landscaped layout with opportunities for flexibility of development, better design & substantial housing mix; addressing flood issues; Development of the site PPW021a can meet the 3 overarching objectives for sustainable development due to: close proximity of railway station; provision of convenience retail to serve the immediate area and discourage car use; high standard of design & spacious layout, including substantial open space; proposed mix of housing; make effective use of the land that is viewed as part of the existing village but has no public access to it, including open central area for community use, public footpaths along the brook through the site thus providing informal recreation facilities that are currently lacking in the village; all dwellings & gardens outside flood zone; provision of balancing ponds that will help ease existing flooding mitigating flood risk on site & providing betterment elsewhere; safe access outside flood zone or mitigated by ground raising achievable; Substantial site landscaping will encourage wildlife. Section 3 part (b) of the NPPF objective is particularly relevant as the site would provide a development of a high standard with benefits to the village that other sites cannot provide due to restrictions on size or siting. Site Assessment reference to back land inappropriate as site has a road frontage as identified in Access Statement. Appendices submitted to support response include: A Letter of objection from Prees Council to application No 14/03511/OUT which is now the preferred option site PPW025. B Letter in connection with application 14/03511/OUT to applicant from Environment Agency regarding hydraulic flood modelling and need for updated FRA C Email to Mark Barrow dated 29.8.2020 and response dated 11.9.2020.- regarding requests for meetings & mishandling of site consideration D Letter (17 09 2020) as part of SC Regulation 18 Consultation – highlighting inconsistencies in the consideration of flood, highway aspects and other site matters; summarising benefits of development of PPW021a and questioning existence of contamination & rationale for preference of PPW025 over PPW21a. E Updated letter from Shingler Group confirming site can be delivered in two phases. Phase 1 in years 1-5 and Phase 2 years 6-10 with 20% affordable and one retail unit

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0594	B002	Sustainability Appraisal	S18.2 Land N of Tudor House, Prees	No	No	Not Specified	Response highlights omission of reference to site PPW021a in the council's sustainability report n extract included as Apdx M to response) which needs to be addressed as unacceptable omission. Sustainability report appendices include preferred site (PPW025). Page152 but no reference is made regards the sustainability of PPW021a.
A0485	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1	No	No	Yes	Hollins Strategic Land gained planning approval for TIL001 in December 2020. The land hatched out on plan S18 Whitchurch - Tilstock wrongly includes part of the cemetery and war memorial, and leave out the Vicarage and land to the east [attached plan in rep]
A0613	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.3	Yes	Yes	Yes	The Plan is considered sound and the accompanying evidence base is clear in how decisions and judgements were made across the board. As a property owner in Ash Magna, I wish to self build a modest house on a previously developed site adjoining the settlement of Ash Magna, but outside of the current development boundary.
A0624	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S18.1	Yes	No	Yes	<p>Policy S18.1 fails to plan positively for the opportunity to accommodate higher amounts of growth in Whitchurch, to take advantage of the arrival of HS2 in Crewe and associated economic and housing growth expected to be generated.</p> <p>The settlement guideline figure for Whitchurch should be increased reflecting that it is capable of accommodating a higher amount, reflecting its sustainability and range of services and facilities it contains making it a highly sustainable location.</p> <p>Whitchurch appropriate location as a highly sustainable settlement with a wide range of facilities and services and sustainable travel connections to strategic settlements such as Shrewsbury and Crewe. Additionally, strategically located relative to HS2 and other economic opportunities which new development in Whitchurch can support &amp; benefit from. Area to the west of Whitchurch particularly sustainable &amp; the promoted site is well related to the town centre, local shops and services and served by sustainable modes of transport. Lack of allocations in the West</p> <p>Need for additional sustainable sites as insufficient housing supply identified – site allocation offers opportunity to address this by providing range and mix of good quality family and affordable dwelling.</p> <p>Representation sets out relevant background including: relevant national &amp; local policy context ( Appendix compares site performance against SP1) &amp; evidence base ; site &amp; surroundings context including relevant local planning permissions; Compatibility with Surrounding Uses; specific site characteristics &amp; sustainability factors and benefits ; critique of the approach to identifying sufficient housing land supply in Whitchurch and the Council's identification and assessment of potential sites</p> <p>Seek allocation of land south of Wrexham Road, Whitchurch for residential development. Submission seeks to demonstrate that site is suitable, sustainable and deliverable in the medium term and should be allocated as a sustainable housing site for residential development to meet housing needs. Development is capable of contributing positively to the achievement of a number of identified strategic objectives and policies of the Local Plan. None of the Council's assessments of the sites have identified technical or environmental constraints that would prevent development. Proposal has also been informed by technical assessments including ecological, Transport Statement, a preliminary Flood Risk Assessment (FRA) and drainage strategy which demonstrates absence of known ecological, highway, flood constraints that would prevent site development.</p> <p>The site has been previously recognised as a suitable housing site, having been a proposed allocation in the North Shropshire District Local Plan in 2004 but not required to meet need at that time. The location has more recently been recognised in the Council's own reports and assessments to be in a sustainable location. There is scope to improve the sustainability and connectivity of the site to further improve its sustainability.</p> <p>Site is in single ownership with willing landowners &amp; free from constraints that would prevent development and is viable &amp; capable of being deliverable and developable. It can therefore contribute to housing supply in the short (0-5 years) and medium (6-10 year) horizons. It can accommodate approx.325 dwellings</p> <p>The submitted Development Framework to accompany the representations has been prepared to demonstrate the sites sustainability &amp; support the inclusion of land at Wrexham Road, Whitchurch as a sustainable housing allocation. It sets out the policy, economic, local &amp; site context; constraints &amp; opportunities and details the sustainability benefits achievable. It responds to strategic and site-specific considerations &amp; specifically demonstrates how development of the site could integrate into the wider area and provide a range of sustainability benefits, including pedestrian and cycle connections &amp; climate change adaptation and mitigation measures. A number of technical reports have been prepared to assess the site &amp; an illustrative masterplan prepared to reflect considerations. In line with evidence the Development Framework demonstrates there are no significant technical constraints or environmental issues that would prevent development and that any impacts arising are capable of being minimised, mitigated or compensated for. The analysis of the site and subsequent development framework illustrates how a high quality development which responds to the attributes of the site can be achieved.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0594	B002	Response highlights omission of reference to site PPW021a in the council's sustainability report & an extract included as Apdx M to response) which needs to be addressed as unacceptable omission	Shropshire Council has undertaken a robust Sustainability assessment & site assessment process to inform identification of proposed allocations which included PPW021a at Regulation 18 & 19 stages.	No	S18.2 Prees (PPW025)
A0485	B001	Site TIL001 should be hatched out in accordance to the approved plan. It would also make logical sense to include the land to the south of the development within the Shropshire Local Plan (see attached plan Land to the south of 20.02640.REM). This site can be accessed from the already approved TIL001 and create a defined southern edge to Tilstock. The plan referenced above shows land associated with the Reserved Matters application 20/02640/REM outlined in red which is the reserved matters application for 26 dwellings, the blue outlined area shows the land within application 20/04375/FUL, which refers to the formation of an attenuation basin in connection with residential development under planning application reference 20/02640/REM and the yellow edged area shows land that could be brought forward for residential development through this plan.  The site is very contained, with the land to the north being built out this year offering 26 dwellings, to the east is a lane with the hedgerow continuing from the northern site. To the south the site borders a public footpath and to the west the site shares the border with a farm. The site could offer circa 25-30 dwellings.	TIL001 is an existing allocation within the SAMDev Plan. The draft Policies Map accurately reflects the extent of this existing allocation.	No	S18.2 Tilstock
A0613	B002	n/a	Noted.	No	S18.3 Ash Magna
A0624	B001	The settlement guideline figure should be increased above 1,600 dwellings. Sustainable sites capable of accommodating additional growth available include the allocation of land at Wrexham Road.	Shropshire Council considers that the proposed development strategy for Whitchurch and the existing commitments (including existing allocations), proposed allocations and proposed windfall allowance identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). This proposed development strategy has given due consideration to the settlements characteristics, constraints and opportunities that exist. Proposed allocations have been identified through a proportionate and robust site assessment process. This included consideration of such issues as highways, flooding, ecology, heritage, public protection, mineral safeguarding and landscape/visual sensitivity.	No	S18.1 Whitchurch

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0624	B001 Cont'd						<p>Council has failed to take an effective or justified approach to the identification of potential housing allocations in Whitchurch. Wrexham Road site excluded despite meeting the requirements. There are a number of specific inconsistencies in the assessment of the site in the SLAA2018 and Whitchurch Site Assessments for the SAMDev. In each case the site has been marked negatively in the SLAA2018 despite scoring positively previously. The approach taken in the SASA is also flawed for reasons set out in the response and the conclusions reached reflect this. Highlights lack of consideration given to mitigation &amp; consideration of proximity and disagrees with the scoring in relation to the identified aspects as detailed pages 19- 22 of the response. A reassessment of the site against the criteria used in the SASA is provided at Appendix 4 of the response.</p> <p>The approach taken by the Plan in seeking to meet housing and employment requirements is based of disaggregation of the overall requirements to the settlements (with requirements reflective of the standing of a settlement in the hierarchy) in order to achieve a sustainable and appropriate pattern of development. Thus, if the amounts of development envisaged for the priority settlements are not achieved, the underlying principles and of the Plan and ability to achieve sustainable development. Given identified flaws in the approach taken to the identification of sufficient housing supply in Whitchurch , which may result in not meeting requirements for each settlement, the soundness of the plan is threatened by virtue of failing to plan positively manner, being ineffective and not being in accordance with national policy. Specific issues detailed include inappropriate &amp; too low a settlement requirement given sustainability, hierarchy score, strategic role &amp; opportunities for and to support growth, including HS2, also potential over reliance on delivery of existing commitments &amp; windfall.</p> <p>Unclear in terms of what allowance, if any, has been made in respect of non-delivery or delayed delivery of committed and allocated sites or what assumptions have been made about delivery from commitments. The evidence base &amp; planning applications identify a number of major constraints (threats to delivery) in relation to proposed allocations which set out in the response &amp; are summarised at Appendix 5 . A number of sites with full permissions 8-10 years old have not delivered any dwellings &amp; no evidence that they will. The SASA also identifies issues with the proposed allocations which threaten the ability to either deliver or deliver within the timescales envisaged. The potential issues with the proposed allocations support the assertion that non-allocation of Wrexham Road land in favour of other sites is not supported by the evidence base. There is a need to build in flexibility in sources of supply which will allow a range and choice of sites reducing the delivery risk which is currently inherent and ensure the plan is consistent Government guidance meets the test of soundness of being "effective" – i.e. deliverable over its plan period.</p> <p>In addition to the quantitative supply shortcomings set out, there are qualitative supply issues including role of small sites( less than 10 dwellings) many of which will not provide needed affordable housing and not be capable of accommodating features or facilities that might benefit the wider community (such as public open space). Despite the strong evidential requirements in PPG for relying on windfall allowance there is none only a contrived figure, the difference between the settlement guidance figure less completions and the total supply from commitments and allocations. As such no reliance can be placed on any allowance made for windfall housing. Conclude therefore that the approach to housing supply is unsound, not justified and ineffective and contrary to national planning policy.</p>
A0124	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S19: Clive Barracks	Yes	No	Yes	<p>1.Site includes an existing area of playing field laid out to provide two pitches. The PPOSS recommends that playing pitches are protected and re-used to meet the needs of development. Clive Barracks development generates a need for 1.89 pitches and 2.52 changing rooms, so these existing pitches would be sufficient. However, this is not reflected in the site guidelines.</p> <p>2. The site could also accommodate one of the sports clubs which would be displaced if the Greenfields site in Market Drayton is developed for housing or it could meet other team's demand in the area.</p>
A0347	B092	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S19 Clive Barracks, Tern Hill	No	No	Not Specified	Given its history contaminated land aspects will need consideration. Appropriate land uses, drainage design and pollution prevention measures will be required.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0624	B001 Cont'd				S18.1 Whitchurch
A0124	B004	Amend site guidelines to include additional text as follows or similar: The development shall retain the existing playing field (or re-provide an area of playing field that is equitable in quantity and quality elsewhere within the site). This shall include the provision of new playing pitches, ancillary changing rooms and car parking provision to meet the needs of the proposed development in accordance with the Council's adopted Playing Pitch and Outdoor Sports Strategy (PPOSS). The developer will be expected to ensure that the facilities are provided to an appropriate standard in accordance with Sport England guidance, and make appropriate provision for their subsequent management and maintenance thereafter.	For the sake of clarity, it is proposed that a minor modification to Policy S19 paragraph d) is made.	Yes	S19 Clive Barracks, Tern Hill
A0347	B092	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S19 Clive Barracks, Tern Hill

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0455	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S19 Clive Barracks, Tern Hill	Yes	Yes	Yes	<p>Support proposed allocation of Clive Barracks, Tern Hill. The site forms part of the Ministry of Defence (MOD) commitment to provide land for 55,000 dwellings and has been identified for release by the MOD as part of the Better Defence Estate Strategy (vacated and available from 2025). Whilst development cannot commence until 2025, allocation is essential to provide confidence to continue preparatory works and site disposal exercises ahead of vacation. This lead-in time is normal on strategic sites and will assist in ensuring expedited delivery once on-site operations can commence.</p> <p>Redevelopment for new homes and employment generating uses will contribute towards Shropshire's housing &amp; employment needs through the effective re-use of a predominantly brownfield site, which is encouraged throughout national policies and guidance.</p> <p>Site promoter remains fully committed to delivery of housing &amp; employment at Clive Barracks and recognise the role of the site in the delivery of housing during the Local Plan Review plan period and beyond.</p> <p>A suite of technical evidence has been prepared by the site promoter to confirm suitability and deliverability of the site for a residential led mixed-use development. Representation identifies assessments undertaken. This evidence and workshops undertaken by the Clive Barracks Task Force have informed an indicative masterplan for the site which illustrates how approximately 750 dwellings and 5.75 hectares of employment land can be accommodated - copy of the indicative masterplan reproduced within representation. Shropshire Council evidence also addresses this site.</p> <p>Allocation of Clive Barracks, Tern Hill entirely conforms with the National Planning Policy Framework (NPPF), despite not being immediately available. Para 22 of the NPPF sets out the need for policies to look ahead 15 years from adoption to anticipate/respond to long-term requirements and opportunities. Para 67 of the NPPF states strategic policy-making authorities should have a clear understanding of available land in their area and planning policies should identify...specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan. Para 72 of the NPPF states the "supply of large numbers of new homes can often be best achieved through planning for larger scale development, such as new settlements".</p> <p>Allocation of Clive Barracks, Tern Hill is also in accordance with the Economic Growth Strategy for Shropshire which seeks to prioritise investment in strategic locations along strategic corridors, such as the A41 on which Clive Barracks, Tern Hill is located.</p> <p>Part 3 of draft Policy S19 requires preparation of a comprehensive Masterplan for the site, to be adopted by Shropshire Council. This requirement is recognised and supported. Committed to ongoing engagement with the Council and Clive Barracks Task Force Group in working up the masterplan.</p> <p>Comments on proposed guidelines which the masterplan/development will confirm with, identified within Part 3 of draft Policy S19, are:</p> <p>Criteria A and B. Quantity of development (750 dwellings, accommodating a mix of housing types and 5.75ha of employment land) that can be accommodated on the site has been informed by the site specific technical evidence prepared. Committed to working with the Council to ensure that the employment generating opportunities at Clive Barracks reflect local need, market demands and the aspirations of the Economic Growth Strategy for Shropshire. Site Guidelines which seek employment generating uses on the site and provide flexibility rather than a prescriptive approach to deliver the best possible employment offer for the site are supported.</p> <p>Criteria C. Nature/phasing of local centre confirmed at Planning Application stage. Proposed local centre will benefit residents on the site, living in the area and passing on the A41, as noted by local residents responding to previous consultations.</p> <p>Criteria D. To provide certainty, consider the "appropriate quantity" of Green Infrastructure needs to be defined. Illustrative Masterplan shows a range of types of open space (which also buffers environmental assets) totalling around 4.4ha. Areas of woodland within the site (including their buffers) extend this to approximately 17.8 ha in total. High-quality scheme can be delivered under those parameters.</p> <p>Criteria E. Illustrative Masterplan confirms 1ha of land can be provided in a central location on site to facilitate merging of Duntingsdale School and Stoke on Tern Primary School</p>
A0662	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S19	Not Specified	Not Specified	Not Specified	<p>The Council previously commented on the proposed site allocation and recognises the benefits of regenerating a large previously developed site. The approach in Policy S19 requires a comprehensive masterplan to be adopted by Shropshire Council, it is assumed prior to the submission of an application for planning permission.</p>
A0385	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S19 and S20	Not Specified	No	Not Specified	<p>Consider that in order for draft Policies S19 and S20 to be considered sound and fully justified, further evidence should be provided. There does not appear to be any evidence/information with the explanation to the draft Policy demonstrating how the trajectory has been derived and no updates on assessment work have been provided sites the Regulation 19 Consultation on Strategic Sites in 2019.</p> <p>Information on a sites' suitability, availability and achievability can be used to assess likely timescales as well as indicative lead-in times and build out rates, with advice of developers and local agents being important in this regard. The Council should set-out a clear delivery trajectory, be transparent on assumptions applied (which should reflect site specific considerations e.g. existing use, brownfield status and infrastructure requirements) to ensure risks to delivery are fully considered.</p> <p>If the risk assessment demonstrates such sites are likely to be delivered longer term/further beyond the plan period than anticipated, there is a need to identify further flexibility within the housing land supply by directing additional allocations to the urban locations as per the urban focused spatial strategy for development (draft Policy SP2).</p> <p>Clive Barracks may be better suited to a strategic employment allocation given its location adjacent to the A41, which the plan recognises is an important strategic corridor thereby providing greater alignment with Policy SP12.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0455	B001	<p>Site Guidelines which seek employment generating uses on the site and provide flexibility rather than a prescriptive approach to deliver the best possible employment offer for the site are supported.</p> <p>To provide certainty in delivering the proposed development at Clive Barracks it is considered that the “appropriate quantity” of Green Infrastructure needs to be defined. A Plan detailing MOD safeguarding zones is included at Appendix 1 and should be referenced within the draft Policy. Further explanation should be provided on this requirement.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole.</p> <p>It is considered that the proposed site guidelines for Clive Barracks, Tern Hill, alongside other relevant policies relating to employment provision (including SP12, SP13 and SP14), provide a flexible approach to employment provision on the site, which allows this provision to positively respond to local need, market demands and the aspirations of the Economic Growth Strategy.</p> <p>It is considered that the proposed site guidelines for Clive Barracks, Tern Hill, alongside other relevant open space and green infrastructure policies (including DP13 and DP15) provide clarity on what is considered an appropriate quantity of green infrastructure provision for the site.</p> <p>A map illustrating MOD safeguarding zones, as provided by the MOD, forms part of the evidence base for the draft Shropshire Local Plan and forms a consideration within the Planning Application process. The specific approach to the design and layout, dimensions of structures and materials used within any development of Clive Barracks, Tern Hill, to ensure it does not impede operation of the adjacent airfield and associated transmitter/receiver facilities will be determined through the Planning Application process, which can of course be informed by consultation with the MOD. As such it is considered sufficient certainty exists on this matter whilst also recognising the strategic nature of the draft Shropshire Local Plan.</p>	No	S19 Clive Barracks, Tern Hill
A0662	B004	<p>Policy S19 should reference Policy DP25 and recognise the cross boundary infrastructure implications, notably the highways impact along the A41 towards Newport and also Junction 3 of the M54. Clarification is still required on the long term use of the adjacent airfield at RAF Ternhill given that further development in this location beyond that set out in Policy S19 could have significant cross-boundary infrastructure impacts.</p>	<p>Noted. The draft Shropshire Local Plan should be read as a whole. Draft Policy DP25 applies to all development proposals including those upon proposed site allocations. For clarity a minor modification is proposed to the explanation of draft Policy DP25 regarding cross-boundary CIL spend. The proposed Strategic Settlement at Clive Barracks, Tern Hill does not extend onto the adjacent airfield, which it is understood is intending to remain an active RAF airfield.</p>	No	S19 Clive Barracks, Tern Hill
A0385	B010	<p>Provide further detail to support the housing trajectory identified for Clive Barracks, Tern Hill and the Former Ironbridge Power Station, taking into account the site specific risks and constraints to delivery.</p>	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach (including in relation to achieving a step change in productivity) are appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the proposed development strategy for Clive Barracks, Tern Hill and the Former Ironbridge Power Stations are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.</p> <p>The draft Shropshire Local Plan presents information on trajectories for the development of these proposed allocations, informed by discussions with and submissions from the relevant site promoters.</p>	No	S19. Strategic Settlement Clive Barracks S20. Strategic Settlement Former Ironbridge Power Station

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0387	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S19 and S20	Not Specified	No	Not Specified	<p>Consider draft Policies S19 and S20 are unsound as they are not fully justified or effective.</p> <p>There does not appear to be any evidence/information with the explanation to the draft Policy demonstrating how the trajectory has been derived and no updates on assessment work have been provided sites the Regulation 19 Consultation on Strategic Sites in 2019.</p> <p>Information on a sites' suitability, availability and achievability can be used to assess likely timescales as well as indicative lead-in times and build out rates, with advice of developers and local agents being important in this regard. The Council should set-out a clear delivery trajectory, be transparent on assumptions applied (which should reflect site specific considerations e.g. existing use, brownfield status and infrastructure requirements) to ensure risks to delivery are fully considered.</p> <p>If the risk assessment demonstrates such sites are likely to be delivered longer term/further beyond the plan period than anticipated, there is a need to identify further flexibility within the housing land supply by directing additional allocations to the urban locations as per the urban focused spatial strategy for development (draft Policy SP2).</p> <p>Have significant concerns about whether proposed development at Clive Barracks is sustainable, given it is too small to have any degree of self-sufficiency and its distance from Market Drayton may encourage dependency on the car (measures to deliver bus services will require subsidies early and throughout development - this needs to be considered alongside other viability factors to ensure the site is viable and deliverable). Consider growth should be directed to Market Drayton in the first instance, as this can deliver growth that is not as reliant on journeys by car. Clive Barracks itself may be better suited to a strategic employment allocation given its location adjacent to the A41, which the plan recognises is an important strategic corridor thereby providing greater alignment with Policy SP12.</p>
A0586	B006	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S19	No	No	Not Specified	<p>This is a mainly greenfield site that will deliver a limited development in a location poorly served by existing facilities, being locationally remote.</p> <p>Technical documents provided to the Council by the MOD in relation to Clive Barracks, Tern Hill have not been published, meaning there is a lack of transparency.</p> <p>Timescales for release pushed back from 2022 to 2025, perhaps two defence reviews away. Given recent changes to the list of disposal sites, consider more flexibility should be built into the draft Shropshire Local Plan through inclusion of reserve sites, which would enable response to housing delivery shortfalls.</p>
A0600	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S19	Yes	Yes	Yes	<p>From a safeguarding and ongoing operational requirements perspective, support the addition of part 3i of draft Policy S19. This provides clear direction that the design of new development would be required to have no detrimental impact on the operation of the airfield and associated technical assets.</p>
A0088	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S13. Much Wenlock Place Plan Area	No	No	No	<p>Redevelopment of power station is extremely important in determining the role of Much Wenlock in accommodating further housing and understanding the impact of growth in the area. Scale of development at Ironbridge Power Station site significantly detrimental to Much Wenlock due to increased traffic flows along unsuitable roads &amp; within the Conservation Area. SC has not put forward mechanisms for addressing traffic and highways issues. Redevelopment on and around the site of the former Ironbridge Power Station includes plans to build 1000 new homes in the narrowing strip of agricultural land still separating Much Wenlock from Telford. Do not agree that Ironbridge strategic site is only providing additional housing to buffer supply &amp; irrelevant to allocations for Much Wenlock town. No acknowledgement that infrastructure in Much Wenlock also serves needs of Cressage and Buildwas, therefore development here will impact &amp; high risk of significant overdevelopment in the town &amp; Place Plan area</p>

A0387	B011	Provide further detail to support the housing trajectory identified for Clive Barracks, Tern Hill and the Former Ironbridge Power Station, taking into account the site specific risks and constraints to delivery.	<p>Noted. Shropshire Council considers that the proposed strategic approach to the level and distribution of development across Shropshire and the mechanisms for achieving this strategic approach (including in relation to achieving a step change in productivity) are appropriate, effective, sustainable and deliverable.</p> <p>Shropshire Council also considers that the proposed development strategy for Clive Barracks, Tern Hill and the Former Ironbridge Power Stations are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, including consideration of this promoted site.</p> <p>The draft Shropshire Local Plan presents information on trajectories for the development of these proposed allocations, informed by discussions with and submissions from the relevant site promoters.</p>	No	S19. Strategic Settlement Clive Barracks S20. Strategic Settlement Former Ironbridge Power Station
A0586	B006	Provide greater flexibility through identification of reserve sites, in the event that Clive Barracks, Tern Hill does not come forward when anticipated.	<p>Shropshire Council considers that the proposed development strategy for Clive Barracks, Tern Hill is appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken.</p> <p>Shropshire Council also considers it has a robust proposed housing land supply, sufficient to provide certainty that the proposed housing requirement is deliverable. The draft Shropshire Local Plan presents information on trajectories for the development of these proposed allocations, informed by discussions with and submissions from the relevant site promoters.</p>	No	S19. Strategic Settlement: Clive Barracks
A0600	B008	N/A	Noted.	No	S19. Strategic Settlement: Clive Barracks
A0088	B005	<ul style="list-style-type: none"> <li>Identified site MUW012VAR should be deleted &amp; scale, location and type of additional housing development be addressed through MWNP review, in line with community aspiration, sustainable development and climate change policies.</li> <li>To achieve balanced growth a delivery plan for employment land, subject to catchment wide flood risk assessment, should be identified.</li> <li>Strategic flood risk assessment should be undertaken as a priority and underpin all future development policy and decisions. The Local Plan should commit to comprehensive, whole catchment flood risk assessment and development proposals should be considered in this context of clearly defined options for addressing the risks and securing long term resilience. Approach should conform to the NPPF and the Government's National Flood Risk Strategy</li> <li>Shropshire Council should commit to meaningful, proper and lawful community engagement through a Neighbourhood Plan review with the community shaping a future for Much Wenlock which integrates solutions to flooding, infrastructure and development needs</li> <li>The Local Plan should identify and commit to a delivery plan for the employment site allocated in the Neighbourhood Plan &amp; release of the housing site(s) should be linked to the employment provision of employment to ensure balanced development</li> <li>Much Wenlock should be deleted from being within a 'strategic growth corridor'</li> <li>Identifying within the Local Plan a deliverable programme of infrastructure and funding arrangements, agreed with the community, to meet the town's needs, also reflecting development in the Place Plan area and elsewhere which will impact, aligned with current policies on climate change and sustainability.</li> </ul>	<p>Shropshire Council considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).</p> <p>The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. The draft Shropshire Local Plan has also been subject to a Stage 1 and Stage 2 Strategic Flood Risk Assessment, which alongside discussions with colleagues in the Flood and Water Management Team, have informed proposed site guidelines for MUW012VAR.</p> <p>Shropshire Council also considers appropriate and effective consultation has been undertaken to inform the Local Plan Review and that all consultation responses have been given due consideration. It is recognised that there will sometimes be local opposition to Local Plan proposals. It is therefore necessary to assess the materiality of issues raised within consultation responses, rather than simply responding to the number of consultation responses on an issue. Where there has been disagreement or objection to proposals within responses to any stage of consultation, which have not led to subsequent changes, this does not mean Shropshire Council has failed to consider these consultation responses. Rather it is the role of the Local Plan to balance the material considerations raised as part of the consultation process against a number of other issues, whether these be other consultation responses, evidence base documents, or the application of national planning policy.</p> <p>The draft Shropshire Local Plan should be read as a whole. Draft Policy DP25 addresses infrastructure provision to support development.</p>	No	S20 Former Ironbridge Power Station

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0089	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S20 Ironbridge Power Station	Yes	Yes	Yes	<p>Landowner / developer of this site fully support the emerging allocation at Policy S20. &amp; have worked collaboratively with Shropshire Council &amp; Telford and Wrekin Council to develop the proposals for site redevelopment alongside the Local Plan process.</p> <p>Outline planning applications have been submitted to Shropshire Council &amp; Telford and Wrekin Council in December 2019 for up to 1,000 dwellings, a retirement village, employment land, retail, allotments, sports pitches, a railway, leisure uses, nursery/primary school, a park and ride facility, walking and cycling routes, and associated landscaping, drainage and infrastructure works. The development proposals reflect the requirements of Policy S20, the emerging policy, completed technical work and have been informed by extensive preapplication and continuing discussions with local authorities' officers and stakeholders.</p> <p>The landowner/agent has been actively engaged with Shropshire Council in the local plan preparation process. Representations were made at Regulation 18 consultation stages. Extensive public consultation has been undertaken prior to submission of the planning applications, including a stakeholder workshop and two public exhibitions. These exercises sought local community input in developing the site masterplan. As a result of this collaborative approach, the development proposals have been developed to comply with the Policy S20 site specific requirements .</p> <p>The mix of uses ensures that a comprehensive, appropriate, and sustainable development can be delivered . Whilst detailed design and layout to follow later in reserved matters applications, the submitted illustrative Masterplan demonstrates how the site can be developed to deliver a high quality and attractive mixed use development.</p> <p>Revised planning application documents have been submitted (June &amp; December 2020), with additional technical work and amendments to the Illustrative Masterplans, following requests from Shropshire Council for further information, initially under Regulation 25 of the Town and Country Planning (Environmental Impact Assessment) Regulations 2017. Shropshire Council is currently undertaking further consultation on revised proposals but it is anticipated that the planning application will be formally considered in March 2021. NPPF seeks strategies which optimise use of previously-developed land that planning policies and decisions should give substantial weight to the value of using suitable brownfield land within settlements for homes and other identified needs, supporting opportunities for remediation. The redevelopment of Ironbridge Power Station will contribute towards achieving the aspirations of the Economic Growth Strategy (2017 – 2021), which identified the opportunity to capitalise on the strategic opportunity at this site, and will contribute towards meeting housing and employment need in Shropshire through the effective re-use of this partly brownfield site.</p> <p>The proposed allocation at Policy S20 represents a deliverable and sustainable opportunity that can be developed within the plan period. The site makes an important contribution to the Council's development strategy and supports the regeneration and remediation of a partly brownfield site to ensure a deliverable supply of housing and employment land in accordance with the requirements of the NPPF. The proposed allocation is sound, and the Illustrative Masterplan (Appendix 1) and planning application as submitted, demonstrate that the site can be developed to deliver a high quality sustainable development, fully in accordance with Policy S20.</p>
A0347	B093	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Former Ironbridge Power Station	No	No	Not Specified	<p>Given its history contaminated land aspects will need consideration. Appropriate land uses, drainage design and pollution prevention measures will be required. We are currently reviewing information to inform a number of planning applications at this location.</p>
A0348	B039	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S20 IRN001	Not Specified	Yes	Not Specified	<p>Welcomes the masterplan approach to inform the redevelopment of the Former Ironbridge Power Station site.</p> <p>Note the draft Shropshire Local Plan requires redevelopment of the Former Ironbridge Power Station site to conform to a number of site guidelines, comments are as follows:</p> <p>3a. Consider that Buildwas Abbey, as a visitor destination should be recognised as both a constraint, to which nearby development must respond and especially in terms of how the Abbey's setting contributes to its significance, and an opportunity to enhance visitor experience within the Masterplan. It is important that the Council and the developers engage with English Heritage in discussions on this issue.</p> <p>3e. Note reference to a heritage centre and the aim that the community facilities and buildings will tap-into the heritage of the site.</p> <p>3j. Recommend that the design and layout of the site should be informed by clearer design guidance both of individual buildings and the overall structure of the development. As a consultee on the planning application Historic England notes that the approach taken to date highlights the influences both of nearby medieval market towns as well as C18th industrial villages in the World Heritage Site (WHS). Consider this to be potentially confusing and would place emphasis on the latter over the former, as the development will border the WHS and be within the head of the Ironbridge Gorge. This should be evidenced and informed by local character and also by an assessment of how setting contributes to the significance of the WHS, which should focus wider than just views, and recommendations included in the Policy Guidelines with respect to the design of urban realm, buildings, including roofing materials, heights, massing and lighting etc.</p> <p>3k. This guideline is supported as it will ensure that the Grade II listed Albert Edward railway bridge on the site's boundary and buildings and structures associated with the Ironbridge A interwar power station will be sympathetically retained, enhanced/maintained and adaptively reused.</p>
A0418	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S20 IRN001	No	No	Yes	<p>Recognise the Former Ironbridge Power Station site needs to be redeveloped to mitigate impacts of its previous use. However, disagree that the adjacent greenfield land should be included within the proposed allocations given the impact of its development on highways/surrounding communities and the wider development capacity identified within the draft Shropshire Local Plan.</p> <p>Development of this site alongside proposals for Much Wenlock (MUW012VAR) and Cressage (CES005) will more than double the population of the Much Wenlock Place Plan Area (within a concentrated part of it), placing a disproportionate burden on Much Wenlock town and does not constitute balanced growth (housing, employment and infrastructure balanced which is a clear aspiration of the Much Wenlock Place Plan).</p> <p>Significant concern about ability/capacity of road infrastructure to support redevelopment of the Former Ironbridge Power Station (road infrastructure already a concern noted in the Much Wenlock Place Plan), particularly the junction of B4380/A4169 where it crosses the River Severn adjacent to the site (steep and dangerous); junction of A4169/A458 (Gaskell corner) in Much Wenlock (which is heavily congested, dangerous for pedestrians and often leads to rat running on narrow streets some without footways and further congestion); the A4169 and A458 themselves (steep, heavily used particularly at peak times and when other roads are flooded, used by HGV's, limited visibility for vehicles turning onto side road/drives and safety concerns for pedestrians (particularly because footways are not continuous) and vehicles etc). Linked to this is concerns of wider rat-running, noise, vibration and emissions. Walking and cycling from the site to Much Wenlock is unlikely due to the above issues, increasing congestion. This needs very careful assessment and measures devised which ensure safety/health of those living along onward routes.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0089	B001	n/a	No soundness issues are raised by the respondent.	No	S20 Former Ironbridge Power Station
A0347	B093	n/a	Local Plan policies cover the issues raised. No change proposed.	No	S20 Former Ironbridge Power Station
A0348	B039	Proposed Development Guidelines for the Former Ironbridge Power Station should: -Recognise Buildwas Abbey, as both a constraint and an opportunity to within the Masterplan. Engagement with English Heritage in discussions on this issue is important. -Require design and layout of the site should be informed by clear design guidance both of individual buildings and the overall structure of the development. This should be evidenced and informed by local character and also by an assessment of how setting contributes to the significance of the WHS, which should focus wider than just views, and recommendations included in the Policy Guidelines with respect to the design of urban realm, buildings, including roofing materials, heights, massing and lighting etc.	Noted. Proposed site guidelines proposed for the Former Ironbridge Power Station Site include the requirement to prepare a masterplan to inform the sites redevelopment. It is considered that this process is the appropriate mechanism to consider any necessary design guidance for the site. With regard to Buildwas Abbey, proposed site guidelines include that high-quality design and layout of the site will also reflect and respect the sites heritage, heritage assets on the site and its relationship with heritage assets within the wider area, which includes Buildwas Abbey (which is specifically referenced). As such it is considered that the need to consider the constraints and opportunities associated with Buildwas Abbey are already recognised within the draft site guidelines.	No	S20 Former Ironbridge Power Station
A0418	B001	Include a realistic approach to highway impacts.	Noted. Shropshire Council considers that the proposed development strategy for the proposed Former Ironbridge Power Station Strategic Settlement is appropriate, effective, sustainable and deliverable. Proposed site guidelines for the proposed Former Ironbridge Power Station Strategic Settlement include a requirement to undertaken "any necessary improvements to the local and strategic road network...", this would be informed by an appropriate Transport Assessment at the Planning Application stage (site is currently subject to a Planning Application and it is understood a Transport Assessment has been undertaken in support of this application).	No	S20 Former Ironbridge Power Station

A0469	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S20	Not Specified	No	Not Specified	The former Ironbridge Power Station has been designated a Strategic Settlement in the Much Wenlock Place Plan Area (8.13). 8.20 is a proposed development of more than 1000 homes on the A4169 at Buildwas. There is no mention of what would be the impact of this development on Much Wenlock and the rest of the Place Plan area. The A4169 meets the A458 at the Gaskell Junction in Much Wenlock. Congestion already causes queues and rat-running through the narrow medieval streets of a town whose economy is heavily dependent on tourism. Although the impact on traffic is the most obvious effect to be considered the development will also have a considerable impact on a variety of local services in Much Wenlock such as the workload of the medical centre and secondary school places where capacity is already limited. The absence of any consideration of these effects on Much Wenlock must be regarded as a serious defect in the soundness of the draft plan.
A0471	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S20	Not Specified	No	Not Specified	The former Ironbridge Power Station has been designated a Strategic Settlement in the Much Wenlock Place Plan Area (8.13). 8.20 is a proposed development of more than 1000 homes on the A4169 at Buildwas. There is no mention of what would be the impact of this development on Much Wenlock and the rest of the Place Plan area. The A4169 meets the A458 at the Gaskell Junction in Much Wenlock. Congestion already causes queues and rat-running through the narrow medieval streets of a town whose economy is heavily dependent on tourism. Although the impact on traffic is the most obvious effect to be considered the development will also have a considerable impact on a variety of local services in Much Wenlock such as the workload of the medical centre and secondary school places where capacity is already limited. The absence of any consideration of these effects on Much Wenlock must be regarded as a serious defect in the soundness of the draft plan. There are even plans under discussion to make the A458 part of a western development corridor.
A0662	B002	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S20, DP25	Not Specified	Not Specified	Not Specified	Our previous response highlighted issues arising from the proposal including transport infrastructure in and around Ironbridge and the wider Telford area including the M54, the impact of development on the setting of the World Heritage Site (including buffering and screening of the site from Ironbridge), health and education provision and seeking clarification on Shropshire Council's aspirations for redevelopment of the site.
A0380	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S20, S16.1	Not Specified	Not Specified	Not Specified	A plan showing details of the site locations and details of National Grid's assets is attached to this letter, relating to the proposals at Ironbridge Power Station and some of the Shrewsbury allocations

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0469	B004	Comply with Government legislation and Planning Policies. The policy for the development of the former Ironbridge Power Station Site for 1000 plus homes needs to take into account what the impact will be on the rest of the Much Wenlock Place Plan Area in particular the A458/A4169 junction.	The draft Shropshire Local Plan should be read as a whole. Draft Policy DP25 addresses infrastructure provision to support development.	No	S20 Former Ironbridge Power Station
A0471	B002	The policy for the development of the former Ironbridge Power Station site for 100+ homes needs to take into account what the impact will be on the rest of the Much Wenlock Place Plan Area in particular the A458/A4169 Junction. Current suggested plans for the junction by the developer that only accounted for three roads have been demonstrated by a professional with a life time experience in major traffic management to fail. Advice is also that a suitable alternative is unlikely to be found for this five-way junction. The council should be asked to consider whether a bypass is a suitable alternative.	Shropshire Council considers that the proposed development strategy for Much Wenlock and the proposed allocation identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). The identification of proposed allocations have been informed by a comprehensive site assessment process, including consideration of issues such as flooding and highways. Proposed site guidelines for the proposed Former Ironbridge Power Station Strategic Settlement include a requirement to undertaken "any necessary improvements to the local and strategic road network...", informed by an appropriate Transport Assessment at the Planning Application stage (site is currently subject to a Planning Application and it is understood a Transport Assessment has been undertaken in support of this application). The draft Shropshire Local Plan should be read as a whole. Draft Policy DP25 addresses infrastructure provision to support development.	No	S20 Former Ironbridge Power Station
A0662	B002	S20 in the pre-submission draft plan makes no reference to Telford or to the site's location relative to Telford. The fact that it is a cross-boundary application, as both Shropshire Council and Telford & Wrekin Council are dealing with the planning applications, should be acknowledged in the policy wording or supporting text. This should include reference to the significant infrastructure impacts that will need to be addressed through developer contributions. This includes the estimated £6m package of developer contributions identified as required to mitigate the infrastructure impacts within Telford & Wrekin alone. The need to reflect this position in Policy S20 is further reinforced by Policy DP25 which requires new development, which would lead to a shortfall in infrastructure provision, to fund necessary improvements through a suitable developer contribution (unless addressed by other means). This is an immediate pressure arising from the development proposal which could not have been factored into preparation of the existing Telford & Wrekin Local Plan because the power station proposals were not clear at the time of Local Plan preparation and examination. The impact of the development on secondary school capacity in Telford is a cross boundary issue and should be appropriately mitigated through the planning process. Policy DP25 is clear that development proposals should address any shortfalls in infrastructure provision. Consequently, there should be a clear reference in Policy S20 that infrastructure shortfalls arising from development of the former Ironbridge Power Station could be addressed by Shropshire Council. The link between Policies DP25 and S20 should be strengthened.	Noted. Proposed site guidelines for the proposed Former Ironbridge Power Station Strategic Settlement include a requirement to undertaken "any necessary improvements to the local and strategic road network...", informed by an appropriate Transport Assessment at the Planning Application stage (site is currently subject to a Planning Application and it is understood a Transport Assessment has been undertaken in support of this application). The draft Shropshire Local Plan should be read as a whole. Draft Policy DP25 addresses infrastructure provision and applies to all development proposals, including on proposed site allocations. However, for clarity a minor modification is proposed to the explanation of draft Policy DP25 regarding cross-boundary CIL spend.	No	S20 Former Ironbridge Power Station
A0380	B001	n/a	Noted.	No	S20 Former Ironbridge Power Station S16.1 Shrewsbury
A0124	B005	Include additional text as follows or similar: The development shall retain the existing playing field (or re-provide an area of playing field that is equitable in quantity and quality elsewhere within the site). This shall include the provision of new playing pitches, ancillary changing rooms and car parking provision to meet the needs of the proposed development in accordance with the Council's adopted Playing Pitch and Outdoor Sports Strategy (PPOSS). The developer will be expected to ensure that the facilities are provided to an appropriate standard in accordance with Sport England guidance, and make appropriate provision for their subsequent management and maintenance thereafter.	For the sake of clarity, it is proposed that a minor modification to Policy S20, paragraph d) is made.	Yes	S20 Ironbridge Power Station

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0305	B016	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 RAF Cosford	No	No	Yes	The proposed site for the new Midlands Air Ambulance ground base has now been granted planning permission for the stated use as an exceptional circumstance in the Green Belt. There are, therefore, no longer any exceptional circumstances to justify its removal from the Green Belt or indeed to require any allocation of the site. The proposal to also allocate the site as a Strategic Site would encourage non-air ambulance development on the site in future undermining the stated reasons for removing the site from the Green Belt, contrary to NPPF Green Belt policy, which is not sound.
A0312	B017	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 RAF Cosford	No	No	Yes	The proposed Midland Air Ambulance Charity (MAAC) site is given different references within different documents - contrary to Gunning Principles. The size of the site is also unclear. The proposed site for the new Midlands Air Ambulance ground base has now been granted planning permission for the stated use as an exceptional circumstance in the Green Belt. There are, therefore, no longer any exceptional circumstances to justify its removal from the Green Belt or indeed to require any allocation of the site. The proposal to also allocate the site as a Strategic Site would encourage non-air ambulance development on the site in future undermining the stated reasons for removing the site from the Green Belt, contrary to NPPF Green Belt policy, which is not sound.
A0060	B024	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 Midlands Air Ambulance	No	No	Not Specified	Note that the MAAC site is being promoted as part of the RAF Cosford Strategic Site and not as a one-off allocation for the MAAC. SC have no controls to ensure that the site is only developed for MAAC (consistent with earlier concerns about alternative employment uses of RAF Cosford). The proposed Midland Air Ambulance Charity (MAAC) site is given different references within different documents - contrary to Gunning Principles. The size of the site is also unclear. If it can be established there is an overriding need for MAAC to relocate here/no alternatives outside the Green Belt or within RAF Cosford and the site is the minimum size needed, then the site should not be included as part of the RAF Cosford Strategic Site, but given a separate and specific allocation (Green Belt status could be retained over the site to protect from alternative development now or in the future, this is the approach taken at the M54 service area at Junction 4 and current RAF Cosford) or it could demonstrate very special circumstances through the Planning Application process, enabling stronger planning controls. Planning permission has now been granted as an exception for MAAC in the Green Belt, so this site no longer needs removing from the Green Belt or provided as a strategic allocation.
A0286	B021	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 Midlands Air Ambulance	No	No	No	Shifnal Town Council also note that the MAAC site is being promoted as part of the RAF Cosford Strategic Site and not as a one-off allocation for the MAAC. SC have no controls to ensure that the site is only developed for MAAC. Planning permission has now been granted as an exception for MAAC in the Green Belt, so this site no longer needs removing from the Green Belt or provided as a strategic allocation.
A0313	B022	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 Midlands Air Ambulance	No	No	Not Specified	Shifnal Town Council also note that the MAAC site is being promoted as part of the RAF Cosford Strategic Site and not as a one-off allocation for the MAAC. SC have no controls to ensure that the site is only developed for MAAC. Planning permission has now been granted as an exception for MAAC in the Green Belt, so this site no longer needs removing from the Green Belt or provided as a strategic allocation.

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0636	B022	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 Midlands Air Ambulance	No	No	No	Shifnal Town Council also note that the MAAC site is being promoted as part of the RAF Cosford Strategic Site and not as a one-off allocation for the MAAC. SC have no controls to ensure that the site is only developed for MAAC. Planning permission has now been granted as an exception for MAAC in the Green Belt, so this site no longer needs removing from the Green Belt or provided as a strategic allocation.
A0637	B022	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 Midlands Air Ambulance	No	No	No	Shifnal Town Council also note that the MAAC site is being promoted as part of the RAF Cosford Strategic Site and not as a one-off allocation for the MAAC. SC have no controls to ensure that the site is only developed for MAAC. Planning permission has now been granted as an exception for MAAC in the Green Belt, so this site no longer needs removing from the Green Belt or provided as a strategic allocation.
A0018	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21: RAF Cosford	Not Specified	No	Not Specified	Support identification of RAF Cosford as a Strategic Site. However, the area of land to be removed from the Green Belt is considered inadequate to meet the stated aims of the Local Plan and RAF Cosford operational requirements to be a growth zone on a strategic corridor. Given the mix of existing uses/users on the site (not identified on the site plan) and areas of open space protected from development, it is unclear how much developable land is actually available for the competing needs identified. Also much of the undeveloped land is in proximity of the runway and considered undevelopable whilst the runway remains in operation and its development would also undermine the air show. Development potential of available land is also restricted by extensive site guidelines. Constraints to the extent of land are evidenced by the need to remove 15ha of land from the Green Belt for the Midland Air Ambulance Charity. Therefore insufficient land is available to meet development needs to 2038 and beyond. The Local Plan is informed by a Green Belt Review, which should take account of potential demand post 2038 and this has not been allowed for in the current allocation as no land has been allocated as safeguarded land to accommodate the future growth of this strategic site. The area of land removed from the Green Belt has been artificially restricted to that in MOD ownership and this will reduce the ability of this strategic site to accommodate supporting uses as desired by the Local Plan.
A0060	B023	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 RAF Cosford	No	No	Not Specified	Policy S21 designates RAF Cosford as a strategic site to be removed from the Green Belt to complement and enable the growth aspirations in the east of the County. The potential employment and training provision on this strategic site are expected to facilitate the sustainable growth of the local economy and contribute to meeting the employment needs of nearby Albrighton. The strategic site consists of around 221ha of land, over half of which is previously developed land but the land within the site and the aspirations for future development are not included in the identified need for 300 ha of employment land over the next plan period. The Council therefore need to demonstrate the exceptional circumstances for this land release in the Green Belt contrary to paragraph 135 of the NPPF. Policy S21 will not prevent coalescence between settlements nor will it assist in safeguarding the countryside from encroachment or ensure the site is not used for alternative employment provision. Instead future development will have fewer restrictions (particularly in the context of wider draft Policies as referenced in representation) leading to future sprawl of different types of employment uses and requiring further Green Belt release. This has resulted in a contradiction in the Plan between RAF Cosford being removed from the Green Belt to meet the development aspirations of the military and museum and releasing the land as a Strategic Site for other major developments without the constraints of the Green Belt - Invest in Shropshire brochures made reference to the site as a potential mixed use/employment site, which is evidence of pre-determination. Significant development to date at RAF Cosford and Cosford Museum have already been permitted and developed under existing planning policies CS5 and MD6 without requiring uncontrolled Green Belt land releases - consider these same policies would facilitate development proposed in the draft Shropshire Local Plan and circumstances (including the Defence Review) have not changed since the adopted Local Plan was prepared to justify release of the site from the Green Belt, as such no exceptional circumstances exist to support release of the site from the Green Belt and this proposal is unsound. Any alternative uses of the site (mixed-use/employment) are also not justified, considered within the Council's Green Belt Exceptional Circumstances Statement and would also be premature given Covid 19 and the short period addressed within the Shropshire Economic Growth Strategy to release such a large area of land for new employment development. The lack of clarity for the proposed strategic allocation is at odds with paragraph 16 (f) of the NPPF and paragraph 4 point N of Policy S21 that requires 'opportunities to reinforce Green Belt boundaries, reduce and mitigate impacts on the Green Belt and enhance beneficial use of the Green Belt will be included as part of any new development proposals in accordance with Green Belt Policy SP11'.

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0313	B021	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 RAF Cosford	No	No	Not Specified	Policy S21 designates RAF Cosford as a strategic site to be removed from the Green Belt to complement and enable the growth aspirations in the east of the County. The potential employment and training provision on this strategic site are expected to facilitate the sustainable growth of the local economy and contribute to meeting the employment needs of nearby Albrighton. The strategic site consists of around 221ha of land, over half of which is previously developed land but the land within the site and the aspirations for future development are not included in the identified need for 300 ha of employment land over the next plan period. The Council therefore need to demonstrate the exceptional circumstances for this land release in the Green Belt contrary to paragraph 135 of the NPPF. Policy S21 will not prevent coalescence between settlements nor will it assist in safeguarding the countryside from encroachment instead future development will have fewer restrictions leading to future sprawl of different types of employment uses and requiring further Green Belt release. This has resulted in a contradiction in the Plan between RAF Cosford being removed from the Green Belt to meet the development aspirations of the military and museum and releasing the land as a Strategic Site for other major developments without the constraints of the Green Belt. Significant development to date at RAF Cosford and Cosford Museum have already been permitted and developed under existing planning policies CS5, MD6 without requiring uncontrolled Green Belt land releases. The lack of clarity for the proposed strategic allocation is at odds with paragraph 16 (f) of the NPPF and paragraph 4 point N of Policy S21 that requires 'opportunities to reinforce Green Belt boundaries, reduce and mitigate impacts on the Green Belt and enhance beneficial use of the Green Belt will be included as part of any new development proposals in accordance with Green Belt Policy SP11'.
A0347	B094	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	RAF Cosford	No	No	Not Specified	The site lies within the SP22/3 of the Cosford, Hellbank and Neachley public water supply boreholes. Appropriate land uses, drainage design and pollution prevention measures will be required. Being an active MOD site/airfield there is a strong likelihood of land contamination issues across parts of the site. The effects of groundworks/development in liberating and mobilising contaminants should be of particular consideration with regard to risk to the public water supply boreholes. We advise the inclusion of land contamination risk assessments and remediation plans as a pre-requisite to drainage design such that early resolution of related issues informs the site layout and drainage planning process. It will also give developers the certainty for any remediation costs and timescales. Given the site history, consideration should be given to detection and assessment of potential (chlorinated) solvent dnapl plumes (e.g. aircraft maintenance activities) and also per- and polyfluoroalky substances (e.g. firefighting activities).
A0395	B001	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21	Not Specified	Not Specified	Not Specified	Support proposed release of the Midland Air Ambulance Charity element of the RAF Cosford site from the Green Belt. The Midland Air Ambulance Charity site was selected as the optimum location for its new airbase with considerable care, having systematically tested all other possibilities. Following a successful Planning Application, work is now underway to construct the airbase with completion and occupation programmed for late summer 2022. This facility will enable the Charity to deliver a world-class, pre-hospital emergency medical service to six million people in the Midlands area. Aware consideration of this Planning Permission balanced consideration of advantages of this service and potential harm to the Green Belt and great effort was placed into building design and landscaping to avoid need for change and minimise further harm to the Green Belt (including a robust 'edge' to the Green Belt on the Northern boundary of the site). Release of the site from the Green Belt is not to facilitate further substantial development but to provide future flexibility in modifying/making modest additions to the facility including such factors as: -Provision of gardeners' sheds or small pavilions within the landscaped areas. -Introduction of sculptural public artwork in memorial to patients and other minor built items marking significant donations. -Improvements to the events areas, planting of gardens. -Changes arising from different energy supply solutions such as different methods of helicopter fuel storage or placing additional solar panels on the roof of the building. -Adaptation and development of delivery areas. -Making further ecology / wildlife / tree areas with other Charities or in conjunction with the local community. Green Belt status would make securing necessary consents substantially more difficult.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0313	B021	Need to understand how SC intend to mitigate the resulting impacts caused from the proposed Green Belt release on the wider landscape. Surely the openness of Green Belt will not be retained, so we are not sure why para 4n has been included.	<p>Shropshire Council considers the proposals for the RAF Cosford Strategic Site are appropriate, effective, sustainable and deliverable. It is considered the land identified will support and facilitate the extensive range of development aspirations that have been identified for the RAF Cosford site.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken. The comprehensive site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. The site assessment process also included consideration of landscape/visual amenity and strategic issues such as the relationship to the existing built form. Indeed, the extent of the proposed strategic site has been informed by consideration of the need to maintain an appropriate gap between RAF Cosford and Albrighton.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p> <p>Furthermore proposed site guidelines recognise the need to make compensatory improvements to the Green Belt, consistent with national policy, including through appropriate additional planting to improve visual amenity and biodiversity and creation of linkages to green infrastructure networks and corridors beyond the site.</p>	No	S21 RAF Cosford
A0347	B094	N/A	Noted. Draft Policy S21 includes a proposed guideline that "Noise, odour and any contaminated land will be appropriately considered and if necessary mitigated." Furthermore, the draft Shropshire Local Plan should be read as a whole. Draft Policy DP19 comprehensively addresses the issue of water infrastructure and water quality.	No	S21 RAF Cosford
A0395	B001	N/A	Noted.	No	S21 RAF Cosford

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0586	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21	Not Specified	No	Not Specified	<p>Fully support underlying principles of draft Policy S21 and its development growth objectives. Identifying RAF Cosford as a 'strategic site' and removing it from the Green Belt will support its long-term sustainability and transformation into a Centre for Excellence (delivering a flexible, affordable, modern and effective technical training centre which meets current and future UK Armed Forces needs). This will also support the Council's economic growth strategy by attracting more high-skilled people into the County.</p> <p>However, consider the proposal is currently 'unsound', unsustainable, fails to address Sustainability Objectives (S05 and S06) and is contrary to the Climate Emergency due to failure to identify adequate well located (cycle/walk to work) housing land to support expansion and provide alternatives to RAF Base housing for Service Personnel, Retiring Service Personnel and Civilian Staff (the site itself only provides accommodation for those in active service or on contract to the MOD) - retaining and growing a skilled workforce (supporting the Council's Economic Growth Strategy). Lack of sufficient housing will also put pressure on the important gap between RAF Cosford and Albrighton and exacerbate local affordability issues.</p> <p>Land at Newport Road, Cosford (CFD003), located next to RAF Cosford, is suitable/available/achievable (including viable), represents a sustainable opportunity for delivery of housing to support the role of/co-located with employment at RAF Cosford (site promotion material appended to this representation), and is located within the M54 strategic corridor. Disappointed the site is not assessed on its own merits. There are no major constraints to the development of this site and any identified can be mitigated. The site could be tailored to deliver open market/affordable dwellings aimed at services personnel, retired service personnel and civilian support staff (housing would also be on the M54 corridor and could potentially assist in meeting cross-boundary need); offers opportunities for wider linkages into the existing transport network (pedestrians, cyclists and vehicles); increase publicly available open space/Green Infrastructure; enhance biodiversity; enhance the landscape framework; the site performs a more limited contribution to the Green Belt than other areas around RAF Cosford; and its development would reduce pressure on Albrighton/the gap between RAF Cosford and Albrighton. Part of the site could be safeguarded for development beyond the proposed Plan period, avoiding need for successive Green Belt Reviews.</p>
A0633	B010	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 Cosford	No	No	No	<p>The present Green Belt and SAMDev policies for the site have not prevented major development being permitted and taking place at both the military base and Museum, with no time delay. All the development proposals in the Plan could similarly be approved within existing policies so there are no new exceptional circumstances to now remove the site from the Green Belt. Such removal is, therefore, unsound. The Plan states that the only reason to remove the site from the Green Belt is to allow for the specific developments referred to in the Plan; but by also including the site as a Strategic Site would leave the land open for unplanned economic development completely unrelated to its military/museum functions. By including the site as a Strategic Site contradicts the exceptional circumstances given for removing the site from the Green Belt. If the site is removed from the Green Belt, then it should not allocated as Strategic Site but solely proposed for the specific military/museum functions stated.</p>
A0636	B021	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 RAF Cosford	No	No	No	<p>Policy S21 designates RAF Cosford as a strategic site to be removed from the Green Belt to complement and enable the growth aspirations in the east of the County. The potential employment and training provision on this strategic site are expected to facilitate the sustainable growth of the local economy and contribute to meeting the employment needs of nearby Albrighton. The strategic site consists of around 221ha of land, over half of which is previously developed land but the land within the site and the aspirations for future development are not included in the identified need for 300 ha of employment land over the next plan period. The Council therefore need to demonstrate the exceptional circumstances for this land release in the Green Belt contrary to paragraph 135 of the NPPF. Policy S21 will not prevent coalescence between settlements nor will it assist in safeguarding the countryside from encroachment instead future development will have fewer restrictions leading to future sprawl of different types of employment uses and requiring further Green Belt release. This has resulted in a contradiction in the Plan between RAF Cosford being removed from the Green Belt to meet the development aspirations of the military and museum and releasing the land as a Strategic Site for other major developments without the constraints of the Green Belt. Significant development to date at RAF Cosford and Cosford Museum have already been permitted and developed under existing planning policies CS5, MD6 without requiring uncontrolled Green Belt land releases. The lack of clarity for the proposed strategic allocation is at odds with paragraph 16 (f) of the NPPF and paragraph 4 point N of Policy S21 that requires 'opportunities to reinforce Green Belt boundaries, reduce and mitigate impacts on the Green Belt and enhance beneficial use of the Green Belt will be included as part of any new development proposals in accordance with Green Belt Policy SP11'.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0586	B009	Amend draft Policies S21 and SP11 to remove from the Green Belt and allocate for residential development (or safeguard) Land at Newport Road, Cosford (CFD003) to support the strategic growth objectives of RAF Cosford.	Shropshire Council considers the proposals for the RAF Cosford Strategic Site are appropriate, effective, sustainable and deliverable. It is considered the land identified will support and facilitate the extensive range of development aspirations that have been identified for the RAF Cosford site. This will of course complement and be complemented by the wider proposals within the draft Shropshire Local Plan.	No	S21 RAF Cosford
A0633	B010	Delete removal of site from Green Belt and delete site being a designated Strategic Site. The site should remain in the Green Belt as was accepted by the Inspector on the previous Local Plan. Delete Air Ambulance site allocation. This site has now been granted planning permission for the stated use as an exceptional circumstance in the Green Belt. There are, therefore, no longer any exceptional circumstances to justify its removal from the Green Belt or indeed to require any allocation of the site. The proposal to also allocate the site as a Strategic Site would, for the same reasons as stated above for the rest of RAF Cosford, leave the site open for non-air ambulance development in the future, again undermining the stated reason for removing the site from the Green Belt. The proposal to remove the site from the Green Belt and allocate as part of the Strategic Site would be contrary to NPPF Green Belt policy as there are now no exceptional circumstances to justify such removal, and so is unsound.	Shropshire Council considers the proposals for the RAF Cosford Strategic Site are appropriate, effective, sustainable and deliverable. It is considered the land identified will support and facilitate the extensive range of development aspirations that have been identified for the RAF Cosford site. In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.	No	S21 RAF Cosford
A0636	B021	Need to understand how SC intend to mitigate the resulting impacts caused from the proposed Green Belt release on the wider landscape. Surely the openness of Green Belt will not be retained, so we are not sure why para 4n has been included.	Shropshire Council considers the proposals for the RAF Cosford Strategic Site are appropriate, effective, sustainable and deliverable. It is considered the land identified will support and facilitate the extensive range of development aspirations that have been identified for the RAF Cosford site. In identifying proposed site allocations a comprehensive site assessment process has been undertaken. The comprehensive site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. The site assessment process also included consideration of landscape/visual amenity and strategic issues such as the relationship to the existing built form. Indeed, the extent of the proposed strategic site has been informed by consideration of the need to maintain an appropriate gap between RAF Cosford and Albrighton. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. Furthermore proposed site guidelines recognise the need to make compensatory improvements to the Green Belt, consistent with national policy, including through appropriate additional planting to improve visual amenity and biodiversity and creation of linkages to green infrastructure networks and corridors beyond the site.	No	S21 RAF Cosford

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0637	B021	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21 RAF Cosford	No	No	No	Policy S21 designates RAF Cosford as a strategic site to be removed from the Green Belt to complement and enable the growth aspirations in the east of the County. The potential employment and training provision on this strategic site are expected to facilitate the sustainable growth of the local economy and contribute to meeting the employment needs of nearby Albrighton. The strategic site consists of around 221ha of land, over half of which is previously developed land but the land within the site and the aspirations for future development are not included in the identified need for 300 ha of employment land over the next plan period. The Council therefore need to demonstrate the exceptional circumstances for this land release in the Green Belt contrary to paragraph 135 of the NPPF. Policy S21 will not prevent coalescence between settlements nor will it assist in safeguarding the countryside from encroachment instead future development will have fewer restrictions leading to future sprawl of different types of employment uses and requiring further Green Belt release. This has resulted in a contradiction in the Plan between RAF Cosford being removed from the Green Belt to meet the development aspirations of the military and museum and releasing the land as a Strategic Site for other major developments without the constraints of the Green Belt. Significant development to date at RAF Cosford and Cosford Museum have already been permitted and developed under existing planning policies CS5, MD6 without requiring uncontrolled Green Belt land releases. The lack of clarity for the proposed strategic allocation is at odds with paragraph 16 (f) of the NPPF and paragraph 4 point N of Policy S21 that requires 'opportunities to reinforce Green Belt boundaries, reduce and mitigate impacts on the Green Belt and enhance beneficial use of the Green Belt will be included as part of any new development proposals in accordance with Green Belt Policy SP11'.
A0600	B009	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	S21	Yes	No	Yes	RAF Cosford is, and will continue to be, an important defence establishment. Therefore, continue to support inclusion of the majority of RAF Cosford within this proposed Strategic Site allocation, and associated removal of the site from the Green Belt. Removal of the site from the Green Belt and the in-principle support for defence related development will reduce planning risk and support national defence. Whilst the principle of draft Policy S21 is supported, have the following comments: -Part 4: requires development of different parts of the site to be coordinated and complementary, however it is unclear how this will be achieved (particularly as the Midland Air Ambulance Charity (MAAC) element has recently gained planning permission). Requirement for a Masterplan for RAF Cosford needs to acknowledge it is an existing facility and this should not prevent development to support ongoing activities. It is also unclear what proactive engagement is envisaged. Modifications proposed in association with these issues. -Criterion B: welcome and support reference to a requirement for development on the MAAC site to not adversely impact on Ministry of Defence operations at RAF Cosford. -Criterion Q: welcome reference to the consideration of opportunities for improvements to pedestrian and cycle links into Albrighton. -Criterion H: acknowledge and support change made to this criterion from the previous draft so it no longer automatically requires the MOD to re-provide sports and recreation facilities if there is no longer an operational requirement for them, but will give the MOD the opportunity to demonstrate where facilities are surplus to requirements. -Criterion M: amendments from the previous draft of this Policy go some way to address previous concerns. However, inclusion of the wording "any new development" implies sustainable drainage will be required for all future applications, when, dependant on the nature of the application, this may not be appropriate. In order to ensure that the policy is fully justified, MOD would like to see the criterion amended to remove the first word "Any". -Criterion N: recognise para 138 of the National Planning Policy Framework sets out a requirement for compensatory improvements to the environmental quality and accessibility of remaining Green Belt land to offset the impact of removing land from the Green Belt and understand the purpose of this criterion is to address this requirement. However, this criterion still has the potential to be onerous and confusing (applying to small scale development which would not be appropriate or achievable (as third party land may be involved) and could be read as requiring a number of improvements for each development) and would benefit from further clarification to ensure it is fully justified. A minor, factual clarification to Para 7.11 of the explanation to draft Policy S21 should be included for clarity. An editorial change is required to Para 7.14 of the explanation to draft Policy S21.
A0347	B045	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (BRID001 and BRD0020b)	No	No	Not Specified	These sites are the livestock market so contaminated land aspects would have to be considered. There is a licensed borehole at this site which, if no longer used would have to be appropriately decommissioned
A0347	B046	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (W039)	No	No	Not Specified	This site is directly adjacent to the historic Old Worcester Road Tip, and on Principal aquifer so contaminated land aspects and potential landfill gas risks should be considered.
A0347	B049	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Morville Quarry Extension)	No	No	Not Specified	A water features survey will be needed to identify wells, springs, boreholes etc and demonstrate the nearby watercourse will not be adversely affected. A detailed conceptual model based on monitoring over a least one year is needed. Subsequent discharge should not result in adverse impacts. Restoration should protect water resources and will require an appropriate environmental permit. Dual-tracking of the planning and permitting process for mineral sites is advisable. If all potential adverse impacts are either unlikely or can be mitigated we would require a long term monitoring scheme and expect the applicants to remediate any deterioration to the water environment that this might detect.
A0347	B050	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (ELR078)	No	No	Not Specified	This site has serious implications for the SPZ and is likely to impose constraints on land use. The sources are particularly sensitive, and any surface pollution could rapidly pass to groundwater and potentially the abstraction boreholes.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0637	B021	Need to understand how SC intend to mitigate the resulting impacts caused from the proposed Green Belt release on the wider landscape. Surely the openness of Green Belt will not be retained, so we are not sure why para 4n has been included.	<p>Shropshire Council considers the proposals for the RAF Cosford Strategic Site are appropriate, effective, sustainable and deliverable. It is considered the land identified will support and facilitate the extensive range of development aspirations that have been identified for the RAF Cosford site.</p> <p>In identifying proposed site allocations a comprehensive site assessment process has been undertaken. The comprehensive site assessment process included consideration of whether the site is located within the Green Belt and if it is the harm that would result from releasing the site from the Green Belt. Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development. Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page. The site assessment process also included consideration of landscape/visual amenity and strategic issues such as the relationship to the existing built form. Indeed, the extent of the proposed strategic site has been informed by consideration of the need to maintain an appropriate gap between RAF Cosford and Albrighton.</p> <p>Before proposing the release of land within the Green Belt for development or safeguarding for future development, Shropshire Council has examined fully all other reasonable options for meeting its identified need for development.</p> <p>Where land is ultimately proposed for release from the Green Belt, exceptional circumstances are fully evidenced and justified within a Green Belt Exceptional Circumstances Statement available on the Shropshire Council Evidence Base page.</p> <p>Furthermore proposed site guidelines recognise the need to make compensatory improvements to the Green Belt, consistent with national policy, including through appropriate additional planting to improve visual amenity and biodiversity and creation of linkages to green infrastructure networks and corridors beyond the site.</p>	No	S21 RAF Cosford
A0600	B009	<p>Amend para 4 of draft Policy S21 so that it reads: "Development of the site will be informed by the preparation of detailed masterplans for each element of the site, informed by engagement, including with relevant landowners/occupiers of the wider Strategic Site; and will subsequently be adopted by Shropshire Council. These masterplans and any development proposals for the site will comply with the following site guidelines:"</p> <p>Amend para 4(m) of draft Policy S21 to remove the first word (Any).</p> <p>Amend para 4(n) of draft Policy S21 "Opportunities to reinforce Green Belt boundaries, reduce and mitigate impacts on the Green Belt and enhance beneficial use of the Green Belt will be included as part of new development proposals, in accordance with Green Belt Policy SP11. Compensatory provision to the remaining Green Belt at RAF Cosford could include appropriate additional planting to improve visual amenity and biodiversity and/or creation of linkages to green infrastructure networks and corridors beyond the site. Any such provision should not impede operational activities at RAF Cosford".</p> <p>Amend para 7.11 of the explanation of draft Policy S21 to clarify hosting of the Cosford Air Show.</p> <p>Amend para 7.14 of the explanation of draft Policy S21 to correct a minor editorial issue.</p>	<p>Noted. Shropshire Council considers that it is important and appropriate for the various components of the RAF Cosford Strategic Site to be coordinated and complementary, which will be achieved through the strategic planning, planning application and masterplanning processes. It is also considered appropriate to expect proactive engagement to occur on masterplans.</p> <p>Shropshire Council also considers it is appropriate to require any new development on the RAF Cosford Strategic Site to incorporate appropriate sustainable drainage and that this is consistent with the requirements of draft Policy DP22.</p> <p>Shropshire Council considers it is appropriate and consistent with national policy for any new development at RAF Cosford to contribute to opportunities to reinforce Green Belt boundaries, reduce and mitigate impacts on the Green Belt and enhance beneficial use of the Green Belt. This can effectively be achieved through a coordinated approach led through the strategic planning, planning application and masterplanning processes. To provide certainty that compensatory improvements can be provided, it is considered appropriate to indicate that specific improvements will occur, however this does not necessarily mean that other improvements cannot occur. It is however recognised that any improvements undertaken must not impede operational activities at RAF Cosford, and as such a minor modification on this issue is proposed.</p> <p>Minor modifications are also proposed to the explanation to draft Policy S21 in relation to the Cosford Air Show paragraph 7.11 and the editorial issue in para 7.14.</p>	Yes	S21. RAF Cosford
A0347	B045	n/a	These two sites are saved allocations from the SAMDev Plan. No change proposed.	No	Appendix 1 Schedule A2
A0347	B046	n/a	This site is a saved allocation from the SAMDev Plan. No change proposed.	No	Appendix 1 Schedule A2
A0347	B049	n/a	This site is a saved allocation from the SAMDev Plan. No change proposed.	No	Appendix 1 Schedule A2
A0347	B050	n/a	This site is a saved allocation from the SAMDev Plan. No change proposed.	No	Appendix 1 Schedule A2

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0347	B051	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (CSTR019)	No	No	Not Specified	This site is adjacent to groundwater springs/issues and surface watercourse, so groundwater is likely to be shallow. Contaminated land and surface water management aspects will need consideration
A0347	B052	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (All allocations)	No	No	Not Specified	The preferred sites overlie highly permeable sand and gravel deposits. The groundwater levels are also shallow. These superficial deposits have previously been used for public water supply, so are relatively high yielding. They will also provide baseflow to the River Onny. Appropriate development design and location (including dewatering of foundations, surface water drainage and pollution prevention measures etc) will therefore be essential in this area.
A0347	B056	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Tetchill)	No	No	Not Specified	Need to ensure adequate foul drainage and water supply. The protection of existing private supplies is also of importance as there are a number across these villages. In addition, a number of these locations, groundwater levels are known to be shallow and discharge of foul effluent to ground may not be appropriate.
A0347	B058	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Ellesmere Wood Lane Quarry)	No	No	Not Specified	1. There are a number of potentially adverse impacts that could arise due to the proposed activities (primarily any de-watering and the act of excavation potentially passively draining any perched groundwater systems). A water features survey will be needed to identify wells, springs, boreholes etc and private water supplies. A detailed conceptual model based on monitoring over a least one year is needed. Subsequent discharge should not result in adverse impacts. Restoration should protect water resources and will require an appropriate environmental permit. Dual-tracking of the planning and permitting process for mineral sites is advisable. If all potential adverse impacts are either unlikely or can be mitigated we would require a long term monitoring scheme and expect the applicants to remediate any deterioration to the `water environment that this might detect. 2. It is necessary to demonstrate no adverse impact on Colemere and other protected wildlife sites/species.
A0347	B060	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Onibury ONBY003)	No	No	Not Specified	The site overlies highly permeable sand and gravel deposits. The groundwater levels are likely also shallow. Appropriate development design and location (including dewatering of foundations, surface water drainage and pollution prevention measures etc) will therefore be essential in this area
A0347	B061	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Market Drayton ELR023/024 and MDR034)	No	No	Not Specified	These sites are on Helsby Sandstone or Chester Sandstone Formation. They are also partly located within SPZ3. There is a surface water course in the vicinity and groundwater is likely to be shallow. Appropriate land use, mains foul drainage, surface water drainage design and pollution prevention measures would therefore be required
A0347	B064	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Hinstock HIN009)	No	No	Not Specified	This site is located on the Permo-Triassic sandstone (principle aquifer) within SPZ3. Groundwater is shallow. Appropriate land use, dewatering of foundations, mains foul drainage, surface water drainage design and pollution prevention measures will be required.
A0347	B066	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Minsterley MIN007 and MIN018)	No	No	Not Specified	This site is adjacent to spring/surface watercourses. Groundwater is potentially shallow, so foundation dewatering and surface water management aspects will need consideration.
A0347	B069	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Oswestry ELR043 and ELR072)	No	No	Not Specified	These sites are located on mixed drift overlying the Permo-Triassic sandstone within SPZ3. Given the scale of the development appropriate mains foul drainage, surface water drainage and pollution prevention measures will be required.
A0347	B070	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Kinnerley KNY002)	No	No	Not Specified	The depth to groundwater is likely relatively shallow so foundation dewatering and surface water management aspects will need consideration
A0347	B071	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Knockin KK001)	No	No	Not Specified	The site falls within the SPZ3 of a public water supply borehole. The depth to groundwater is likely to be shallow. There are also a number of private supplies. Given the sensitive hydrogeological setting appropriate drainage solutions will be required, foundation dewatering will need to be considered and we would discourage the proliferation of non-mains foul drainage
A0347	B073	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Maesbrook)	No	No	Not Specified	The depth to groundwater is likely to be shallow. There are also a number of private supplies. Appropriate drainage solutions will be required and foundation dewatering will need to be considered and we would discourage the proliferation of non-mains foul drainage.
A0347	B079	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Shifnal)	No	No	Not Specified	The proposed development sites overlie sand and gravel deposits which in turn overlie the Permo-Triassic sandstone. These form a strategically important source of public water supply. They fall within SPZ2. Groundwater levels are relatively shallow at 5 to10mbgl. It is therefore essential that appropriate land uses, drainage design and pollution prevention measures are adopted. This is particularly important for the employment site where a potentially wide range of activities may be proposed. The mains foul drainage infrastructure will have to be sufficient to support the development proposals.
A0347	B087	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Shrewsbury)	No	No	Not Specified	This site is located in SPZ3 of a public water supply source and groundwater is relatively shallow. It will therefore be necessary to ensure appropriate foul (mains) and surface water drainage are provided.

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0347	B088	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Shrewsbury)	No	No	Not Specified	The site is underlain by sands and gravels which are in turn underlain by the Carboniferous Salop Formation. A water features survey will be needed to identify wells, springs, boreholes etc and private water supplies (records indicate the latter in the area). It will be necessary to show that those local wildlife sites in close proximity would not be adversely affected and a detailed conceptual model based on monitoring over a least one year is needed for this. Subsequent discharge should not result in adverse impacts. Restoration should protect water resources and will require an appropriate environmental permit. Dual-tracking of the planning and permitting process for mineral sites is advisable. If all potential adverse impacts are either unlikely or can be mitigated, we would require a long term monitoring scheme and expect the applicants to remediate any deterioration to the 'water environment that this might detect
A0347	B089	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Wem)	No	No	Not Specified	The groundwater is relatively shallow within the superficial deposits and there are a number of ponds/spreads, springs and watercourses in the vicinity. There is the potential for contamination issues associated with adjacent land uses which should be considered prior to development. Mains foul drainage should be adopted and the surface water drainage should also be carefully designed as there are a number of private water supplies in the immediate vicinity.
A0347	B091	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 1 (Whitchurch)	No	No	Not Specified	Mains foul drainage should be adopted and the surface water drainage should also be carefully designed as there are a number of private water supplies in the immediate vicinity.
A0014	B092	Habitats Regulations Assessment	Habitats Regulations Assessment Whole Document	Not Specified	Not Specified	Not Specified	Despite passing stage 2 of the HRA, question the assessment of Hencott Pool and the decision that the increased buffer (now over 200m) between the proposed North West Relief Road and the site is sufficient to determine that there will be no significant impacts. Construction of a major road within 200m of a site of international importance surely raises some uncertainty as to the significance of impacts. Within this assessment the possibility of windfall development (the potential for this is identified in para 5.224 of the local plan consultation document) should also be considered.
A0331	B003	Habitats Regulations Assessment	Habitats Regulations Assessment (BUR004)	Not Specified	No	Not Specified	Neither BUR002 or BUR004 are referenced within the Habitats Regulations Assessment (HRA). However their development could contaminate the River Teme, which runs to the River Severn. Wildlife and fauna on BUR004 should be assessed.
A0347	B034	Habitats Regulations Assessment	Habitats Regulations Assessment Severn Estuary SAC/SPA/Ramsar	No	No	Not Specified	HRA: Severn Estuary SAC/SPA/Ramsar 1. The estuary is designated for migratory fish and the HRA should consider impacts on water quality and water quantity for tributaries in Shropshire from increased recreational pressure and the potential for the introduction of aquatic diseases. 2. Section 3.13 uses a 20km drainage range. The use of the river by migratory fish means that this is not appropriate – it does not assess dependant habitat for the Severn Estuary SAC and Ramsar. 3. Section 3.2 does not include the Ramsar designation. 4. Section 3.5 does not include impacts from water quantity. Low flows from increased abstraction for development would exacerbate nutrient enrichment.
A0347	B035	Habitats Regulations Assessment	Habitats Regulations Assessment Hencott Pool Ramsar	No	No	Not Specified	HRA: Hencott Pool Ramsar Recreational impact has been screened out for Hencott Pool. Whilst there is no formal public access to Hencott Pool there is informal access. Increased residential housing in the area is highly likely to increase the amount of public usage of the site which could lead to water management impact; vegetation disturbance and destruction and the introduction of invasive plants.
A0347	B036	Habitats Regulations Assessment	Habitats Regulations Assessment Stage 2 Appropriate Assessment	No	No	Not Specified	HRA: Stage 2 Appropriate Assessment - invasive species Only sites with public access have been taken to Stage 2, but informal access is available around sites and if nearby residential numbers increase there is potential for impact, A mitigation measure of managing visitor numbers and access needs to be discussed in stage 2 for all of the sites
A0347	B037	Habitats Regulations Assessment	Habitats Regulations Assessment Air pollution	No	No	Not Specified	HRA: Air pollution The potential impacts of air pollution to the designated sites does not appear to have been discussed within the HRA such as from increased or closer road traffic and construction
A0347	B038	Habitats Regulations Assessment	Habitats Regulations Assessment Para 3.21	No	No	Not Specified	HRA: Paragraph 3.21 The conclusions of stage 2 assessment are that local plan sustainability policies DP20 to 23 will protect waterbodies from adverse effects. However a number of settlements have been scored as 'amber' or 'red' for water supply or wastewater infrastructure in the Shropshire Water Cycle Study meaning that significant infrastructure may be required to accommodate it. These settlements should be flagged as mitigation measures not yet agreed for the HRA assessment until further discussions and agreements have taken place between the water cycle study group and Severn Trent Water. There needs to be options presented to provide certainty and ensure deliverability.
A0347	B039	Habitats Regulations Assessment	Habitats Regulations Assessment Section 3.23	No	No	Not Specified	HRA: Section 3.23 The paragraph fails to also consider the inter-dependency of the Pearl Mussels on Trout and Salmon to complete their lifecycle. These fish require good water quality and adequate water quantity. Unnatural volumes and frequency of flooding and drought which could also be exacerbated by development would also impact the Pearl Mussels and fish.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0347	B088	n/a	This site is a saved allocation from the SAMDev Plan. No change proposed.	No	Appendix 1 Schedule A2
A0347	B089	n/a	This site is a saved allocation from the SAMDev Plan. No change proposed.	No	Appendix 1 Schedule A2
A0347	B091	n/a	This site is a saved allocation from the SAMDev Plan. No change proposed.	No	Appendix 1 Schedule A2
A0014	B092	Re-assess impact of proposals on Hencott Pool, both those resulting from the North West Relief Road and potential Windfall development in the vicinity.	The Council is satisfied that the HRA correctly assesses the effect of the Local Plan on Hencott Pool, including any windfall development which might result should the North West Relief Road be constructed. No change proposed.	No	Habitats Regulations Assessment
A0331	B003	Remove site BUR004 from the draft Shropshire Local Plan.	The HRA covers the River Severn, thus the impacts from development on site BUR004 has been assessed. No change proposed.	No	Habitats Regulations Assessment
A0347	B034	n/a	<p>1. Table 2 of the HRA (Hydrological potential effect pathways) identifies that the River Severn SAC/SPA/Ramsar is vulnerable to changes in water quality and quantity and this is discussed in more detail, and mitigation proposed in sections 3.2-3.22 of the HRA. This is considered to address issues pertaining to migratory fish. A minor modification is proposed to section 3.5 of the HRA to explicitly include reference to watercourses in the Plan area supporting migratory fish, which are features of the Severn Estuary SAC and Ramsar.</p> <p>2. The 2021 Addendum to the WCS presents a fuller assessment of the impact on designated wildlife sites and the application of policies DP19:Water Resources and Water Quality, DP20: Water Efficiency, DP21: Flood Risk and DP22: Sustainable Drainage will protect all watercourse (including those used by migratory fish) and in so doing are likely to prevent adverse effects on site integrity, alone and in combination, on the Severn Estuary SAC/SPA and Ramsar.</p> <p>3. Minor modification to HRA proposed to add in an overview of the Ramsar designation after section 3.4.</p> <p>4. Minor modification to HRA proposed to add in reference to water quantity being a key issue with potential to affect the Severn Estuary SAC/SPA/Ramsar.</p>	No	Habitats Regulations Assessment
A0347	B035	n/a	There needs to be credible evidence of an impact pathway to a European site for it to be subject to screening for likely significant effects. Informal access is hypothetically possible to every European site and therefore criteria presented in section 2.55 are considered sufficiently robust to identify sites where there is real risk of recreational impact pathways being present. No change proposed.	No	Habitats Regulations Assessment
A0347	B036	n/a	There needs to be credible evidence of an impact pathway to a European site for it to be subject to screening for likely significant effects. Informal access is hypothetically possible to every European site and therefore criteria presented in section 2.55 are considered sufficiently robust to identify sites where there is real risk of recreational impact pathways being present. No change proposed.	No	Habitats Regulations Assessment
A0347	B037	n/a	Consideration of impacts from air pollution upon European sites is considered in the HRA in sections 2.12 - 2.41, Table 1, table 2 and Appendix 3 as well as for individual sites - Hencott Pool Ramsar (sections 3.96-3.104). No change proposed.	No	Habitats Regulations Assessment
A0347	B038	n/a	The Statements of Common Ground between SC and Severn Trent Water and SC and Welsh Water demonstrate that the red and amber constraints for wastewater infrastructure shown in the WCS can be overcome. No change proposed.	No	Habitats Regulations Assessment
A0347	B039	n/a	The proposed reference to the importance of salmonids in the life-cycle of the Freshwater Pearl Mussel would have not have a material effect on the Appropriate Assessment so is not considered necessary.	No	Habitats Regulations Assessment

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0347	B041	Habitats Regulations Assessment	Habitats Regulations Assessment River Dee SAC	No	No	Not Specified	HRA: River Dee SAC Housing allocation within the River Dee catchment is relatively low and there is current or already planned upgrade capacity for wastewater and water resource infrastructure. Policy DP20-23 seems a reasonable mitigation option for HRAS2 assessment for the River Dee SAC.
A0347	B042	Habitats Regulations Assessment	Habitats Regulations Assessment Para 3.54	No	No	Not Specified	HRA Paragraph 3.54 - Montgomery Canal SAC 1. There are plans to restore and reconnect dry sections of the Montgomery Canal which require mitigation areas close to the canal for plants and animals from the canal. The Canal & River Trust should be consulted on; the HRA for the local plan allocations; pressure from increased recreational use of the canal; the requirement for individual developments to be subject to a full HRA; and adherence to DP13, 15, and 16. 2. Suggest the introduction of invasive plants and animal disease also needs to be added to this section.
A0347	B043	Habitats Regulations Assessment	Habitats Regulations Assessment Fenns, Whixal, Bettisfield, Wem. Cadney Mosses, Marton Pool, Morton Pool, Brown Moss, Colemere, Whitemere SAC and Ramsar sites.	No	No	Not Specified	HRA: Fenns, Whixal, Bettisfield, Wem. Cadney Mosses, Marton Pool, Morton Pool, Brown Moss, Colemere, Whitemere SAC and Ramsar sites. 1. HRAs at project scale that consider foul drainage, water resource and recreational pressures are sufficient mitigation for the HRA2. 2. Provision for new green open spaces and nature networks should be planned now within the local plan to ensure that there is a co-ordinated plan for providing alternatives to these sites, particularly near Colemere where adverse recreational pressure has not been ruled out.
A0444	B002	Habitats Regulations Assessment	Habitats Regulations Assessment Table 1	Not Specified	No	Not Specified	Table 1 pages 10-11 of the HRA Assessment omits significant impact pathways for air pollution and hydrological impacts. Nitrogen oxide, sulphur oxide and particulate matter are mentioned as being caused by residential and industrial combustion processes. This omits the fact that many intensive livestock units are significant sources of nitrogen oxides and particulate matter. There does not need to be a combustion process involved for there to be pollution from such chemicals and matter. The following point in the table does mention ILUs in connection with ammonia and thus gives the impression that this is the only source of air pollution of concern from such units. Under hydrological impacts there is no reference to agricultural pollution and no reference to surface water pollution from agriculture. The latest apportionment of phosphate sources could I am sure be checked (in the river wye catchment EA estimates it is 66% from agriculture) which should justify being more specific about the risks from inappropriate and excess manure spreading and disposal of manure from the increasing numbers of intensive livestock units being given planning permission. There are currently over 16 million chickens in Shropshire at any one time, plus 6 million collectively in the Severn and Teme catchments in Powys, and 600,000 in the Herefordshire Teme catchment, plus other types of livestock. Inadequate oversight of how the additional volumes of manure is being used creates a huge risk for eutrophication of the county's waterways and loss of biodiversity. This is a planning issue as there are more applications ongoing and manure impacts have been found to be planning matters in a recent legal case about the Tasley application. The omissions are particularly surprising when seen alongside the long list of recreational and disturbance risks which I would have thought would largely be much less extensive and serious.
A0634	B004	Habitats Regulations Assessment	Habitats Regulations Assessment 3.23-3.36	Yes	No	Not Specified	The analysis recognises the significance of agricultural activity in affecting the nutrient status of the river, but then goes on to focus almost exclusively on housing, with brief mentions of employment land. The existence within the catchment of intensive poultry units and anaerobic digesters with cumulative impacts including through changed land use, and the fact that these developments fall within planning control is not addressed at all. This would also include the impacts within Shropshire of such units which lie in Powys and Herefordshire. Incomplete assessment under HRA may make the Plan not sound. There are impacts which do not seem to be considered in adequate detail in Table 1 page 10-11 'Potential impact pathways.'. This table has a great deal of detail on fairly minor recreational impacts and very scant treatment of potentially significant indirect impacts such as manure from the millions of poultry raised in Shropshire. The full range of potential impacts associated with intensive poultry units should be addressed more explicitly within this section. The Appendix 2 tables SACs within the AONB (Table 14 River Clun and Table 20 Stiperstones & the Hollies) contain information which is out of date and incomplete. For example the River Clun SAC 'Site Vulnerability' section references fertiliser runoff due to poor practice but does not make a link with intensive poultry units. Both the tables mention Environmentally Sensitive Areas as a mitigation option, but this scheme closed to new applicants in 2005 and all agreements under the scheme terminated some years ago.
A0349	B002	Habitats Regulations Assessment	Habitats Regulations Assessment Appropriate Assessment: River Clun SAC	Not Specified	Not Specified	Not Specified	1. Table 3 on page 33 shows that 232 dwellings are proposed within the Clun catchment, however in para 3.27 319 are proposed. 2. Paragraph 3.23 does not acknowledge that salmon and trout are essential to the life cycle of the pearl mussel as juvenile mussels are encysted within the gills of these fish. 3. Paragraphs 3.27 and 3.39: we agree that the allocation of 319 houses and an employment site will have an adverse effect on the integrity of the SAC without mitigation and that there are particular difficulties in applying nutrient neutrality principles in the river Clun catchment.
A0131	B005	Habitats Regulations Assessment	Habitats Regulations Assessment Berwyn SPA and Berwyn and South Clwyd Mountain SAC	Not Specified	Not Specified	Not Specified	A meeting was held between NRW and representatives from the SCC Planning Policy team on the 12th January 2021 to discuss matters previously raised in our Reg.18 response. Clarification was provided on the general approach to investigating potential impacts from traffic emissions on internationally designated wildlife sites used in the DLP HRA. We are satisfied with the conclusions for this site (a copy of the meeting notes are provided in our Appendix 1).

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0347	B041	n/a	Noted. No change proposed.	No	Habitats Regulations Assessment
A0347	B042	n/a	1. The Canal & River Trust submitted comments to both the Regulation 18 and this consultation (Rep numbers 1844 and A402 respectively). The Council therefore considers that they have been adequately consulted on both the Local Plan and the HRA. No change proposed 2. As shown in the heading preceding section 3.51, 'introduction of invasive species or disease' is considered in sections 3.51 - 3.59. No change proposed.	No	Habitats Regulations Assessment
A0347	B043	n/a	1. Noted. No change proposed. 2. Policy DP15 provides for more than 30m2 per person per bedroom space of open space where an adverse effect on the integrity of an internationally designated site has been identified. Policy DP14 ensures that all new development enhances existing green infrastructure assets and extends the green infrastructure network in accordance with the Shropshire Green Infrastructure Strategy. The Council thus considers that adequate provision is made for new open space and green networks in the Plan. No change proposed.	No	Habitats Regulations Assessment
A0444	B002	Additional analysis and wording about air pollution and hydrological impacts from agricultural sources to clarify the pathways missing from the table and then in further detail in the text below.	The HRA evaluates the likely impacts from the development proposed by the Plan on internationally protected sites. Whilst the pathways described in the response are accurate, they mainly relate to agricultural activities which the Plan does not regulate. Policy DP12 provides for a project level HRA where agricultural activities require planning permission. No change proposed.	No	Habitats Regulations Assessment
A0634	B004	Additional analysis of the impact of agricultural developments, and updating of references to current agri-environment schemes. This supports our contention (submitted on a separate form b) that the Local Plan has not adequately developed policy in relation to intensive livestock units and large scale agricultural developments.	The Local Plan does not allocate land for intensive poultry units or anaerobic digesters. These are dealt with through the Development Management process and as such Policy DP12 provides for a project level HRA. No change proposed.	No	Habitats Regulations Assessment - 3.23-3.36
A0349	B002	none specified.	The Council's response to this representation is set out in the Statement of Common Ground with Natural England.	No	Habitats Regulations Assessment - AA River Clun
A0131	B005	None specified	Support welcomed.	No	Habitats Regulations Assessment - Berwyn SPA and Berwyn and South Clwyd Mountain SAC

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0131	B004	Habitats Regulations Assessment	Habitats Regulations Assessment Fenn's, Whixall, Bettisfield, Wem and Cadney Mosses SAC and Midland Meres & Mosses Phase 2 Ramsar	Not Specified	Not Specified	Not Specified	We note that the HRA includes an assessment of the effects upon the Fenns & Whixall Mosses SAC (paragraphs 3.75 – 3.79). The assessment appears to focus on recreational pressures on the site. In our Reg.18 response we highlighted that the site is highly vulnerable to nitrogen (N) deposition and is already widely in exceedance for its bryophyte-rich bog habitat and the SSSI feature waved fork-moss Dicranum bergeri. We received additional information as set out below from your authority via email dated 01/02/2021. The nearest site allocation for housing is 3.8km from the designated site and the Traffic Report (Traffic Impact on Air Quality at International Sites for the Habitat Regulations Assessment, WSP, 6 July 2020) commissioned by SCC shows that there are no busy roads within 200m of the designated site (the nearest is over 500m away). A likely significant effect (LSE) from traffic emissions was ruled out in section 2.32 of the Reg.19 HRA. As would be expected for a Local Plan, site allocations do not include intensive livestock units, agricultural renovations, anaerobic digester plants or other developments likely to generate significant amounts of atmospheric N. The nearest allocated employment sites are between 4.3 and 7.1km from the SAC. Any development proposed on land not allocated in the plan, which may generate atmospheric N, will be considered as described in the Regulation 19 HRA sections 2.15 – 2.26, and particularly 2.27 – 2.28. As the type and location of any windfall development is unknown, protection would be provided by applying policies DP12. The Natural Environment, DP18. Pollution and public amenity, DP26. Strategic, Renewable and Low Carbon Infrastructure and SP10. Managing Development in the Countryside. In view of this, SCC considers there will not be a LSE on the Fenn's, Whixall, Bettisfield, Wem and Cadney Mosses SAC via atmospheric N as a result of the Shropshire Local Plan. We concur with this conclusion.
A0131	B009	Habitats Regulations Assessment	Habitats Regulations Assessment Montgomery Canal SAC	Not Specified	Not Specified	Not Specified	We would refer you to our previous comments to the Reg.18 consultation which advised that NRW should be formally consulted when any plans to re-open the canal to boat movements close to the Welsh border at Llanymynech come to fruition, and that a HRA will be required.
A0131	B011	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Habitats Regulations Assessment Protected species	Not Specified	Not Specified	Not Specified	We are of the view that the submission is not likely to be detrimental to the maintenance of the Favourable Conservation Status of any the Welsh populations of protected species. We advise that our response identifies the requirement to consider mobile species included on Schedule 2 of the Habitats and Species Regulations 2017 (as amended). Considering the proposed allocations and extent and connectivity of the National Site Network, this will effectively be the otter in respect of the Dee catchment. We advise that our responses identify the requirement to ensure continued breeding, foraging and dispersal within the catchment.
A0131	B006	Habitats Regulations Assessment	Habitats Regulations Assessment River Dee and Bala Lake Special Area of Conservation (SAC)	Not Specified	Not Specified	Not Specified	Following our Reg.18 response, we have since, during January 2021, issued the results of phosphate monitoring for Welsh riverine SACs. This is presented in Evidence Report No. 489 Compliance Assessment of Welsh River SACs against Phosphorus Targets. In summary the evidence report found localised phosphorus failures in the River Dee. We note that part of the northernmost section of Shropshire falls within the catchment of the River Dee. Residential allocations at Weston Rhyn (c.126 dwellings) and part of site STM0029 at St Martins with SMH038 (140 dwellings) plus the Community Clusters at 'Rhoswiel, Wern and Chirk Bank' and 'Selattyn, Upper/Middle/Lower Hengoed and Pant Glas' fall within the Upper Dee catchment and are around 1-2 km from the river. Whitchurch falls within the Middle Dee catchment (12km away from the river itself). The assessment (pages 33 and 34 of the HRA) indicates that a LSE could not be ruled out on the SAC and so policies defer down to mitigate at project level. This is detailed at paragraph 3.37 onwards where it states that 'either the capacity is available for the plan period or upgrades at the appropriate time are technically possible' and it is concluded 'through the Water Development Policies and Settlement Policies wording and the statutory requirement for a project level HRA for development, there will be no adverse effects on the integrity of the River Dee and Bala Lake SAC as a result of the Draft Local Plan' [sic]. We have taken early steps, via our Planning Position Statement and Interim Planning Advice Following River SAC Compliance Report, following the publication of Evidence Report 489 on how in our opinion it affects policy preparation and development management. These standing advice documents outline the information needs we believe a competent authority, under the Habitat Regulations, should consider in preparing the HRA for a plan or project. In light of the new evidence report we advise the information presented in these documents should be considered in the HRA for the DLP.
A0131	B007	Habitats Regulations Assessment	Habitats Regulations Assessment Severn Estuary SAC, SPA, RAMSAR	Not Specified	Not Specified	Not Specified	In terms of Severn Estuary SAC, SPA, RAMSAR we note the HRA conclusion that 'application of policies DP20. to 23. in the DLP will protect water courses and water bodies, and in so doing are likely to prevent adverse effects on site integrity, alone and in combination, on international sites (paragraph 3.20). We concur with this conclusion.
A0131	B008	Habitats Regulations Assessment	Habitats Regulations Assessment Tanat & Vyrnwy Bat SAC	Not Specified	Not Specified	Not Specified	We would refer you to our previous comments to the Reg.18 consultation which identified that there is recent evidence to suggest that there is cross-border movement of protected species (lesser horseshoe bats) between Shropshire and Powys, although not specifically from the sites that make up this SAC. This may have implications where development could impact on potential commuting routes/ corridors of vegetation between the counties and should be considered at the planning application stage. We note and welcome the proposed amendments to the policy wording of Policy S14.2 which acknowledges this matter.

A0014	B091	Sustainability Appraisal	Whole Document	Not Specified	Not Specified	Not Specified	<p>Consider the Sustainability Appraisal (SA) fails to:</p> <p>Consider how a plan contributes to improvements in environmental, social and economic conditions.</p> <p>Identify any significant adverse effects that a plan might have.</p> <p>Amend proposals in a plan to avoid any significant adverse effects.</p> <p>Propose mitigation measures to counter any remaining significant adverse effects.</p> <p>There has been little done to respond to concerns raised during previous consultations.</p> <p>It is incredible that the SA concludes that the delivery of 30,800 new dwellings and around 300 hectares of employment land with all the associated infrastructure will have no significant negative effects.</p> <p>The layout of the document is very confusing and hard to follow so it has proved impossible to give comments on particular sections as paragraph numbering is sporadic.</p> <p>Amendments to the SA site assessment methodology are insufficient to address the key issue of climate change (assessing whether a bus stop is within 480m gives an indication of the scale of the problem).</p> <p>Unable to check the assessment of all sites but note fundamental scoring errors. For example, SHR173: although the presence of an adjacent Local Wildlife Site and nearby SSSI are mentioned in various sections of text, they are not counted in the assessment matrix. Also, the site scores well in terms of the climate change assessment (bus stop within 480m) despite the scale of associated car journeys meaning development is dependent on the proposed North West Relief Road to accommodate traffic.</p>
A0024	B001	Sustainability Appraisal	Para 16, App Q SHR060	Yes	No	Yes	<p>Within SHR060 to its East boundary there is a large pool which is recognised within the Site Assessments of the Sustainability Appraisal (App Q p517-519). However, this fails to attract any negative scoring (p16) for what should be considered a Wildlife Site.</p>
A0025	B001	Sustainability Appraisal	Page 518, App Q, SHR060	Not Specified	No	Not Specified	<p>Insufficient information provided regarding the pool &amp; its surroundings to the east</p>
A0025	B002	Sustainability Appraisal	Para 16, App Q SHR060	No	No	Not Specified	<p>Within the original Preferred Sites Assessment, SHR060 was given a rating of Good, now it is Fair. No mention has been made to the large wildlife pond, fen/marsh &amp; surrounding grassland to the east of this site. If this was included, it would push the rating for this site towards the boundary of fair/poor. No inclusion of whether it can be included in the biodiversity net gain of <math>\geq 10\%</math></p>
A0025	B003	Sustainability Appraisal	Page 517 LVSS, App Q SHR060	Not Specified	No	Not Specified	<p>As the LVSS provided an overall assessment for the three sites combined, it provides an inaccurate assessment for SHR060, therefore it is flawed.</p>
A0053	B001	Sustainability Appraisal	S3. Bridgnorth Place Plan Area	Yes	No	Yes	<p>Need to reduce carbon emissions and importance of linkage of green infrastructure &amp; pedestrian and cycle access is recognised in the document but satisfactory extensive linked route provision required before development to achieve realistic alternative to car use.</p> <p>Black Country residential needs should be met through re- use of unused office buildings.</p>

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0014	B091	The Sustainability Appraisal should be subject to a thorough review and rewrite.	The Council considers that the SA and site assessment process complies with the Environmental Assessment of Plans and Programmes Regulations 2004 and is a robust, proportionate and fair way of evaluating sites. The comments on the scoring of site SHR173 are noted but the proposed changes to SA would not change the rating of the site (it would still be Fair) so are not considered necessary.	No	Sustainability Appraisal
A0024	B001	The significant water feature which is recognised as a core/priority habitat (p518) should be given appropriate negative scores (1-3) in recognition of it being a Wild Life site (not yet officially recognised I believe) with permanent and amphibious residents and a significant spot for migrating birds such as Grey Lag and Canada Geese utilising the adjoining fields. This would then show that this site is on the closer end to a Poor site than just making Fair from Good. With a housing development already to its West bank, failure to protect this pond further could destroy an established wildlife habitat.	The Sustainability Appraisal only takes designated wildlife sites into account. This pool is not a designated wildlife site and so therefore has not been considered in the SA. No change proposed.	No	Sustainability Appraisal
A0025	B001	Inclusion of facts needed from rep, a comprehensive commitment to protection, enhancement & wide buffering of this pond/wildlife area (as per paras 2.21, 2.31, DP12-3, DP12-7, 4.121 & 4.123 and reference to commitment to follow Shropshire Council's policies (Big Town Plan/SEN) and the government's 25 Year Plan to Protect & Enhance the Environment	The Sustainability Appraisal only takes designated wildlife sites into account. This pool is not a designated wildlife site and so therefore has not been considered in the SA. No change proposed.	No	Sustainability Appraisal
A0025	B002	Site should be re-rated and should be poor and removed from consideration	The assessment of sites promoted between the Regulation 18 and Regulation 19 consultations has meant that some scores have changed as all sites are assessed in a settlement context. The Sustainability Appraisal only takes designated wildlife sites into account. This pool is not a designated wildlife site and so therefore has not been considered in the SA. No change proposed.	No	Sustainability Appraisal
A0025	B003	Provide a re-assessment for SHR060 independently of SHR158/SHR161 & also recognise that SHR060 has two separate/distinct landscapes (the flat fields & the sloping fields down to the wildlife pond).	The landscape sensitivity (based on the Council's Landscape and Visual Sensitivity Stud) is the same for all three sites SHR060, SHR158 and SHR161. No change proposed.	No	Sustainability Appraisal
A0053	B001	1.Protection of agricultural and forested areas from development required 2.Identify roads as freight free 3.Link communities with cycle routes and implement maintenance programme for all paths	These matters cannot be addressed by the Sustainability Appraisal. No change proposed.	No	Sustainability Appraisal

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0060	B006	Sustainability Appraisal	Sustainability Appraisal	No	No	Not Specified	Shropshire Council failed to satisfy Section 19 of the Planning and Compulsory Purchase Act 2004(PCPA), Regulation 5(1) and Regulation 12 and Schedule 3 of the Environmental Assessment of Plans and Programmes Regulations 2004 (as amended) and the European Directive 2001/42/EC in Recital 17 to use the environmental report to inform the Plan and generally in “the assessment of the effects of certain plans and programmes on the environment”. The Council also failed in relation to the Strategic Environmental Assessment and Sustainability Appraisal guidance note Paragraphs 002 to undertake an iterative process and Para 018 to consider all reasonable alternative sites and the reasons for setting them aside. The preparation of the Pre-Submission Plan is therefore legally flawed and unsound. This failure is endorsed by Seaport Investments Ltd 2002 NIQB 62 that there must be parallel development of the environmental report and draft plan. In Berkeley v SoS Others 2002 3 WLR & Save Historic Newmarket Ltd v Forest Heath DC (2011 EWHC 606, and Royal Brompton & Harefield NHS Foundation Trust v Joint Committee of Primary Care Trusts (2011) EWHC 2986, there must be an environmental statement in a single accessible format prepared from the start of the process and presenting relevant environmental information with a non-technical summary to assist potential consultees. The Sustainability Appraisal fails to properly assess sites against all scoping objectives especially proximity to public transport (SO6 incorrectly recorded as quality of agricultural land), reduction of CO2 emissions (SO12) and adaptation and mitigation to climate change (SO13). The SA used to inform the site assessments failed to assess these key Scoping Objectives in the Pre-Submission Plan and Strategic Sites consultation rendering the process not legally compliant and producing site selection decisions that are inadequate, incorrect and unintelligible under the Gunning Principles. Site SHF018d was also not included in the SA and not assessed individually or against reasonable alternatives including SHF018a with a lower sustainability scoring. This indicates a pre-determination of the selected sites contrary to the Gunning Principles requiring consultation at a formative stage before final decisions are made. The SA on the Preferred Scale and Distribution (PSD) consultation stage was prepared on the basis Shifnal would receive 16ha of employment land and would minimise the need for additional car based transport. The Preferred Sites (PS) stage increased the amount of employment land for Shifnal to 40ha, but the SA failed to assess public transport criteria and to assess the SHF018d individually or against alternatives. The Council cannot show the increase in employment from 16 to 40ha and the allocation of Shif18d for employment use, would be sustainable development as these matters were not appraised at the appropriate time. The SLAA Report 2018 did not present a map with sites boundaries and these boundaries could only be ascertained through a web-site search without any cross referencing in the SLAA report. There was no map in the SA for the public to identify the location and boundaries of sites appraised. Case law states that a disparate collection of documents traceable only by a person with a good deal of energy and persistence does not satisfy legal requirements on making documents available to the public.
A0073	B009	Sustainability Appraisal	Sustainability Appraisal Appendix L: Market Drayton MDR006	Not Specified	Not Specified	Not Specified	SA incorrectly assess MDR006 as being best and most versatile agricultural land.
A0090	B004	Sustainability Appraisal	Sustainability Appraisal and SP2	Yes	No	Yes	Consider the Sustainability Appraisal (SA) is very poor quality (it does not compare carbon emissions between sites, assesses against specified measures rather than comparing sustainability with alternative sites, and fails to recognise societal conditions regarding access to private vehicles and efficiency of public transport) and cannot be taken to support the strategy proposed in draft Policy SP2. Development is Community Hubs and Clusters is unsustainable.
A0118	B007	Sustainability Appraisal	Sustainability Appraisal	Yes	Yes	Yes	Generally agree with the findings of the SA and consider the site to be worthy of its ‘Good’ score. However, criteria 5 attributes positive ‘+’ scores when a site is within 480m of one or more of the facilities listed. Consider this criteria doesn’t reflect that proposed developments have the ability to provide facilities such as children’s playgrounds, amenity green space and accessible natural green space, which would further enhance the site’s sustainability. Request consideration is given to allotting further ‘positive’ scores when a site proposal will provide such benefits.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0060	B006	See summary of main issues.	The Council considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.	No	Sustainability Appraisal
A0073	B009	Agri-land should be considered to be sub-grade 3B, and negative score amended to 0.	The SA does not differentiate between Grade 3a and 3b agricultural land - Grade 3 is all that is assessed. The site is on Grade 3 land so the assessment is correct. No change.	No	Sustainability Appraisal
A0090	B004	See summary of main issues.	The Council considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.	No	Sustainability Appraisal
A0118	B007	Update scoring of Criteria 5 to reflect where sites will provide facilities on site.	The provision of facilities and amenities is considered at the planning application stage when the details of a proposal are known. Such issues cannot be taken into account at the Plan making stage and thus cannot form part of any SA. No change proposed.	No	Sustainability Appraisal

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0129	B001	Sustainability Appraisal	Para 9.4	No	No	Not Specified	<p>Site selection methodology used by the Council in their site selection has incorrectly assessed site BAY040 within its Sustainability Appraisal and Site Assessment Environmental Report and as such has undermined its opportunity to assist in delivering strategic growth at Bayston Hill.</p> <p>Plan does not conform with NPPF guidance that requires allocations to be based on an adequate, up to date and appropriate evidence base and economic signals which assess the role and function of each settlement and the capacity of these to accommodate new housing and employment growth. Local Plan not based on robust assessment that demonstrates all sites submitted to the Council have been assessed logically taking on board the available evidence. Serious concerns in relation to the omission of site BAY040. Not clear from site assessment how the proposed allocations within Bayston Hill were chosen over BAY040 as all have similar scorings/anticipated development impacts.</p> <p>Article 5(1) of the SEA Directive and regulation 12(2) of the SEA Regulations requires that the environmental report must identify, describe and evaluate the likely significant effects of the reasonable alternatives to the plan taking into account the objectives and geographical scope of the plan. Needs to be clear what reasonable alternatives have been identified and on what basis; how they have been assessed and compared (including consideration of sustainability issues) &amp; what are the preferred alternatives and why are they preferred over alternatives. Proposed two allocations at Bayston Hill have been selected have been through a site sifting process set out in Sustainability Appraisal and Site Assessment Environmental Report (December 2020)( described in response) to provide a scoring with criteria shown in a matrix . Matrix extract illustrates why it is difficult to understand why the lower scoring site BAY039 which achieved a FAIR score chosen over the site at BAY040 which was attributed a higher score and rating of GOOD. Further discrepancies are highlighted within stage 2b with common issues &amp; similarities between perceived constraints across the 3 sites. Site availability &amp; the commissioning of tech reports to demonstrate no constraints to the development had been confirmed for site BAY040 at Reg 18. Thus Shropshire Council in failing to assess site BAY040 and its supporting technical information are in breach of the guidance, including NPPG, having failed in their duty to review all reasonable alternatives, with specific failure to undertake a comprehensive assessment of the alternatives utilising up to date information in relation to site BAY040.</p> <p>Reassessment provided for BAY040 shows suitability for allocation within the Plan. Council need to give the site proper consideration as a demonstrated available, suitable, economically viable and deliverable residential allocation. Supporting information includes Vision statement (a site promotion document provided as an appendix to response)which provides background, planning history, delivery timescales &amp; a summary of key points and recommendations made within technical and environmental assessments (all supplied as appendices) which include ecological constraints &amp; opportunities, landscape and visual impact, transport/access, built heritage &amp; archaeology. These have fed into Concept Framework Plan which incorporates mitigatory measures and design &amp; layout demonstrating delivery of around 250 houses on 17.50 hectare site. Key considerations during the design process has been to assimilate the proposals into the surroundings and to take account of all identified constraints identified. Landscape and visual and highways impact in particular have been pivotal to the approach taken. Framework masterplan derived from a constraints and opportunities assessment informed by the technical and environmental testing of the site. The assessment of landscape opportunities and constraints feed into a masterplan to ensure that a sympathetic layout that respects its landscape and visual context can be achieved. Ecology and Heritage assessments have confirmed that the Ramsar site and Heritage Assets in the area are not constraints to development of the site and recommended mitigation has been taken into account on the indicative plan. All issues fundamental to the decision not to allocate the site for residential use have been dealt with as detailed in respect of: addressing highway and access requirements ( including roundabout access , footway &amp; new bus stops ); sympathetic design to reflect landscape and visual matters ;rights of way, trees, ecological &amp; heritage considerations. Open space &amp; biodiversity opportunities are identified. Vision Statement has addressed all of the concerns raised within the SLAA as well as the refusal reasons cited on a previous proposal for small scale residential development. There are no technical or environmental constraints which would indicate that the site is not capable of being brought forward for development. The site is being promoted by a developer who has an established and proven track record in delivering sites and subsequent housing completions. It is demonstrated that the site is fully capable of providing much needed market and affordable housing in accordance with the policies of the emerging Local Plan.</p> <p>The environmental and technical information available from the consultant reports, can be used with the Council's scoring system to create a clear and reasonable comparison exercise and effectively re-score site BAY040's SA score. The response summarises in a table how the score is increased to 2, taking into account development of the site could include a children's play area and natural open space thereby removing negative scores. The Council has not considered up to date technical information in relation to site BAY040 and have not based their decision on an accurate suitability assessment. Council has failed to properly address reasonable alternatives to the proposed allocations BAY039 and BAY050 within Bayston Hill in clear breach of guidance within the NPPG and SEA Directive. Failure to re-assess in the light of up to date supporting technical &amp; environmental assessment in forming a decision on site BAY040 makes the proposed strategy fundamentally flawed and leaves the Council at risk of legal challenge.</p>
A0148	B002	Sustainability Appraisal	Chapter 5	Not Specified	Not Specified	Not Specified	Chapter Five confirms that three Housing Requirement Options were assessed against the respective Sustainability Objectives. The approach is considered flawed on two grounds: the total number of dwellings tested in the 'Option 3: High Growth' scenario does not reflect the 30,800 dwellings identified in the DSLP and the annualised housing requirement for each of the three options suggests a 20-year plan period has been utilised, as opposed to a 22-year plan period (2016-2038) as proposed in the DSLP.
A0271	B001	Sustainability Appraisal	Sustainability Appraisal	Not Specified	No	Not Specified	Sustainability Criterion 5 (Access to Amenity Green Space) is incorrect for site HNN010. There is an amenity green space on the recreation ground. On the same grounds are the library, leisure centre, children's playground, outdoor sports facility which all score +1.
A0271	B002	Sustainability Appraisal	Sustainability Appraisal	No	No	Not Specified	<p>HNN016 does not conserve and enhance soil reserves; conserve and enhance landscape character; and promote landscape management. As such Sustainability Objective 16 for the site should be double negative (--) rather than 0.</p> <p>HNN016 is located outside the settlement development boundary and the Parish Council consider it very important to prevent housing on the seven valley slopes, particularly as there are more suitable sites available.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0129	B001	Reassessment of BAY040 required giving proper and full consideration to updated evidence provided ; legal and policy requirements and other issues raised in response. Site BAY040 should be reconsidered on basis of the evidence presented & allocated within the Local Plan.	The Council considers that its Sustainability Appraisal and Site Assessment methodology is comprehensive, robust and complies with both the legal requirements for SA and government policy and guidance on site assessment. No change proposed.	No	Sustainability Appraisal
A0148	B002	L&Q Estates recommends that the Council re-run the appraisal of housing growth options through the SA in order to reasonably conclude on a preferred option which has been robustly tested.	The preparation of a Local Plan is an iterative process. Chapter 5 of the SA assesses the Issues and Options version. Subsequent versions of the Plan have also been subject to SA and this is presented in the SA Report. The Council thus considers the SA to process to be robust and does not propose any change.	No	Sustainability Appraisal
A0271	B001	Correct scoring of Sustainability Criterion 5 (Access to Amenity Green Space) for site HNN010.	Noted. Access to open space within the Sustainability Appraisal is primarily based on the information provided within the Open Space Assessment undertaken to inform the draft Shropshire Local Plan. This Open Space Assessment does not identify Amenity Green Space on the recreation ground at Highley. However, as noted within the representation there is a significant outdoor sports area, children's playground and young person's area. As such no change is required.	No	Sustainability Appraisal
A0271	B002	Correct scoring of Sustainability Criterion 15 (relating to Landscape Character) for site HNN016.	Noted. Landscape character within the Sustainability Appraisal is primarily based on the information provided within the Landscape and Visual Sensitivity Assessment undertaken to inform the draft Shropshire Local Plan. This Assessment identifies the parcel containing site HNN016 as having medium landscape sensitivity, which correlates with the scoring applied within the Sustainability Appraisal. As such no change is required.	No	Sustainability Appraisal

The Preferred Sites (PS) stage increased the amount of employment land for Shifnal to 40ha, but the SA failed to assess public transport criteria and to assess the SHF018d individually or against alternatives. The Council cannot show the increase in employment from 16 to 40ha and the allocation of Shif18d for employment use, would be sustainable development as these matters were not appraised at the appropriate time. The SLAA Report 2018 did not present a map with sites boundaries and these boundaries could only be ascertained through a web-site search without any cross referencing in the SLAA report. There was no map in the SA for the public to identify the location and boundaries of sites appraised. Case law states that a disparate collection of documents traceable only by a person with a good deal of energy and persistence does not satisfy legal requirements on making documents available to the public.</p>

The Council considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.	No	Sustainability Appraisal

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0331	B002	Sustainability Appraisal	Sustainability Appraisal (BUR004)	Not Specified	No	No	<p>Table 1.2 of the Sustainability Appraisal (SA) rates site BUR004 as 'Good', but consider the scoring is incorrect as scoring options in Table 2.6 of the SA are not met. Specifically:</p> <ul style="list-style-type: none"> <li>-SO1: BUR004 is in an area rich in habitats/species and development would indirectly impact on them (accept BUR004 is not officially protected but is diverse).</li> <li>-SO2: Development of BUR004 would not encourage a strong and sustainable economy throughout Shropshire. Rather, its development will negatively affect local farmers despite a lack of need for more housing (plenty of supply in the immediate area including Tenbury Wells).</li> <li>-SO2: Burford/Tenbury Wells is a rural community with limited employment opportunities (do not want to become a dormitory settlement). Public transport links are minimal and this is unlikely to change. Capacity of the local primary school needs to be considered.</li> <li>-SO6: BUR004 will increase the need to travel.</li> <li>-SO8: Land suitable for agriculture would be lost, therefore the positive score is incorrect.</li> <li>-SO9 and 10: BUR004 is in an area of high flood risk (river Teme flood plain) and is regularly flooded. Flood risk may increase as a result of Tenbury Wells flood prevention schemes. The site would also not reduce flood risk/improve flood management. Therefore the positive score is incorrect.</li> <li>-SO13: BUR004 does not promote adaptation or mitigation of climate change and its development will negatively effect the surrounding area. Not aware of protected trees on the site, but development will have an effect on those no the sites northern boundary.</li> <li>-SO14: Development of BUR004 would further increase capacity to manage waste.</li> <li>-SO15: BUR004 is in an area of beauty looking down Teme valley SSSI.</li> <li>-SO16: BUR004 is in an area of high landscape sensitivity to locals and visitors. Development would effect this character - BUR002 and BUR004 would lead to development along the A456.</li> </ul>
A0357	B010	Sustainability Appraisal	Sustainability Appraisal	Yes	No	Not Specified	<p>As previously documented, the Sustainability Appraisal (SA) is incorrect for site ALB017 as it does not recognise proximity of a children's play area and amenity open space. These are being constructed on a site within 100 metres of ALB017. This converts two negative scores (-2) into two positive scores (+2) and thereby changes the SA scores for site ALB017 from -6 to -2, changing its rating from 'Fair' to 'Good'.</p>
A0410	B002	Sustainability Appraisal	Whole Document	No	No	Not Specified	<p>In para 2.19 of the Sustainability Appraisal (SA) reference to SO1 needs changing to SO3.</p> <ul style="list-style-type: none"> <li>-Development will occur not just at the boundary of a site. For Criteria 6, the measurement of 480m should have been taken from the centre of the site, not from its boundary. The same applies to Criteria 5.</li> <li>-The detailed criteria listed against Criteria 4/5 and 6 should have a better match with those listed in Table 1 of the Hierarchy of Settlements (HoS) document. The simplistic, binary scoring criteria used in the SA does not match the sustainability criteria used in the HoS of villages to determine their suitability as Community Hubs. There is no similar weighting of the relative importance of each criteria.</li> <li>-The scoring system used in the stage 2a (site assessment) should use absolute scores, not scores that are relative only to other sites in that particular settlement - the implication is that the best sites within a settlement are picked out, with little reference as to how they fit in to a county-wide standard.</li> <li>-To assess the CO2 emissions saving potential of a site, it seems insufficient only to consider the items within Criteria 4/5 and 6. Other factors could have included the propensity of the site for solar gain (e.g. north facing or south facing), or the distance from a supermarket.</li> <li>-The whole methodology as summarised in Diagram 1.1 at page 5 of the SA is undermined when it is possible to override a highly negative sustainability score, as is the case with the Ironbridge site, by proposing mitigation measures. The implication is that the site has been allocated for other reasons than sustainability, and in spite of the sustainability appraisal process.</li> <li>-Little thought has gone into how well a site might help achieve carbon saving goals.</li> </ul>
A0436	B003 for MJ	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SA para 7.11	Not Specified	No	Not Specified	<p>An outline consent was refused on site SMH041 due to it being open countryside. However a development has completed immediately south of the site and should now be included in the development boundary. On this basis, the current SA appraisal of SMH041 is flawed. The assessment states:</p> <p>The Surrounding character is described as "Residential to west, north and east. Agriculture (grazing) to south." This gives the incorrect impression that it is adjacent to open fields. That is not the case; three boundaries are adjacent to residential development and one is adjacent to the road. To all intents and purposes this is a pocket of land situated within the built-up and physical boundaries of the Community Hub settlement. The development of this site would not therefore extend the physical development boundary of St Martins. The development boundary has just not been updated to reflect more recent development surrounding it. This is an entirely illogical stance given the current Plan review. Errors flow from the Council's failure to ensure development boundaries remain up to date. The incorrect description of the site in the site selection process – the positive impact on Sustainability Objectives including SO2 – SO6, SO10-12, SO15 and 16 is not recognised or assessed to reflect the location of the site. This site should have been found suitable for development now.</p> <p>Had the Council correctly assessed the site it would have scored as 'Good' rather than 'Fair'.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0331	B002	Remove site BUR004 from the draft Shropshire Local Plan.	The SA Scoping Report set out the proposed criteria for site evaluation. The Scoping Report was subject to consultation in the early stages of the Plan making process and amendments made as a result. As such, the Council considers the SA criteria for site evaluation to be appropriate and does not propose any change.	No	Sustainability Appraisal
A0357	B010	Correct Sustainability Appraisal (SA) scores for site ALB017 in relation to proximity to a children's play area and amenity open space. Undertake associated corrections to the SA results.	The Sustainability Appraisal (SA) does not consider future open space provision to be made through development - this is considered at the planning application stage when the details of a proposal are known. Such issues cannot be taken into account at the Plan making stage and thus cannot form part of any SA. No change proposed.	No	Sustainability Appraisal
A0410	B002	The SA is not a reliable guide to the true sustainability of any one site and should not be relied on as a determinant of allocated sites.	The Planning and Compulsory Purchase Act 2004 requires SA to be carried out for new or revised Local Plans and as such SA is an important consideration in the site assessment process. However, as the Council's site assessment documents show, SA is one of many considerations of the suitability of a site for housing or employment use. It is thus not the main determinant. No change proposed.	No	Sustainability Appraisal
A0436	B003 for MJ	It is necessary to review the development boundary for St Martins to include existing, now well-established developments adjacent to the existing boundary. SHLAA sites should be reviewed to take account of those revisions where necessary. SMH041 should be allocated	The Council considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.  Shropshire Council considers that the development strategy proposed for St Martins (including existing and proposed allocations), which has been informed by consideration of the specific characteristics, constraints and opportunities that exist within the village, is appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). It is also considered that the proposed development boundary for St Martins is appropriate, having had due consideration of the built form of the settlement. Likewise with the preferred allocations - the sites selected are considered as being the most suitable for allocation for the settlement in terms of their respective characteristics and location within the settlement and the housing numbers that could be delivered in these sites.	No	Sustainability Appraisal

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0455	B016	Sustainability Appraisal	Sustainability Appraisal	Yes	Yes	Yes	<p>Concerned regarding the conclusions reached in the sustainability Appraisal (SA) in relation to the Clive Barracks, Tern Hill sites. Specifically the SA allocates a '-' for strongly negative effect as the site contains Ancient Woodland and proximity of Local Wildlife Sites. The effect is described to be: "Likely to have a significant adverse impact on the whole, or on a large part of, Shropshire, on internationally or nationally protected assets or on areas outside the county. The effect is predicted to be direct, permanent, irreversible and of major magnitude". This is not considered a fair assessment.</p> <p>Whilst Ancient Woodland falls within the site, it will be retained. Supporting work undertaken by the site promoter has been used to inform the proposed buffers to the woodland to ensure that it is not impacted by the development (a buffer of a minimum of 30m).</p> <p>Local Wildlife Sites fall outside of the Clive Barracks, Tern Hill site. But again have been considered in full in developing the proposals for the site, with buffers of a minimum of 15m have been taken forward in developing the masterplan.</p> <p>Understand that in respect of Criterion 2 the site is within the prescribed distance to reserve a '-' scoring, consider insufficient justification for the scoring of the site in respect of Criterion 1 to justify the '--' scoring against the prescribed methodology for impacts on Ancient Woodlands as referenced at para 2.73.</p> <p>Development of Clive Barracks, Tern Hill will provide additional woodland planting which will connect the Ancient Woodland with other woodland onsite, providing an enhancement to both of these habitats. An appropriate woodland management regime could also be introduced which would enhance the structural diversity of the woodlands. As such it is considered that the SA scoring relating to Ancient Woodland and Wildlife Sites should be amended from '--' to '0' score denoting a neutral impact.</p> <p>Also concerned regarding scoring of Clive Barracks, Tern Hill in relation to accessibility of open space. The site is marked down in relation to access to a children's playground, outdoor sports facility, amenity green space and accessible natural green space (natural/semi-natural). This does not take into account that all of the above facilities already exist onsite and the proposed development (as demonstrated by the Illustrative Masterplan) will reinstate these amenities, and more. Scoring should therefore be amended to '0'.</p> <p>Accounting for these suggestions, SA scoring would change from -14 (Fair) to -6 (Good), which better reflects its suitability for allocation.</p>
A0469	B005	Sustainability Appraisal	Sustainability Appraisal Appendix N	Not Specified	No	Not Specified	<p>The Much Wenlock Civic Society questions the soundness of the Site Assessments and the conclusions drawn from them. For instance Site MuW008 (page 23) This describes the site as having Planning Permission for an attenuation pond after which its suitability may be reassessed. The attenuation pond is one of two costing well over a million pounds and which was built before the LPR process was started.</p> <p>Site MuW012VAR the preferred Site (page 62) The inaccurate assessment includes amongst other inaccuracies 'The percentage of the site within 20m of an historic flood event 0%'. There are photographs over time including 2020 and 2021 showing part of the Site itself flooded.</p>
A0471	B003	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Sustainability Appraisal Appendix N	Not Specified	No	Not Specified	<p>SA is inaccurate. MUW008 (page 23) This describes the site as having Planning Permission for an attenuation pond after which its suitability may be reassessed. The attenuation pond is one of two costing well over a million pounds and which was built before the LPR process was started.</p> <p>Site MuW012VAR the preferred Site (page 62) The inaccurate assessment includes amongst other inaccuracies 'The percentage of the site within 20m of an historic flood event 0%'. There are photographs over time including 2020 and 2021 showing part of the Site itself flooded." SC has chosen the site most prone to flooding.</p>
A0480	B001	Sustainability Appraisal	Page 22, SHR173, S16b	No	No	Not Specified	<p>I refer to Site SHR173 in particular. The criteria given on Page 22 of SA Site Assessment Process: Cover and Summary document is not correct. This site is within 500 metres of the Old River Bed SSSI - in fact the north-eastern part of the site is just across the road from it (30 yards or so). The Old River Bed SSSI is one of the most important nature conservation areas in Shropshire and the area of river bed just to the west of Ellesmere Road, to the north of SHR173 is of similar character. The draft local plan has failed to properly assess its relationship to the SSSI or to other parts of the old river bed to the north or to correctly record the landscape as being of exceptionally high character. Some limited housing to meet local needs might be desirable at this location but the size of SHR173 is clearly far too large and needs to be redrawn taking better account of the local environment, amenity value, wildlife corridors including protected bat colonies at Hencote to the north, transport capacity and impact on CO2 emissions.</p>
A0497	B005	Sustainability Appraisal	Chapter 10	Not Specified	No	Not Specified	<p>Representations made to the Regulation 18 Pre-Submission Draft Plan (Appendix 1 of this representation) remain relevant. Changes to reflect comments in respect of limitations of the methodology on proximity to employment and assessment of heritage assets have not been made.</p> <p>Table 10.1 Assessment Matrix of the Regulation 19 Sustainability Appraisal (SA) of Sites Criteria 13 and 14 (heritage) do not match the site-specific assessments in the Annex D Bridgnorth. The criteria are also different to the earlier Regulation 18 SA. As shown in Table 10.1, criteria 13 would mean a listed building within a site would not be recorded, and criteria 14 would only record the top two grades of listed buildings (i.e. a grade II listed building would not be recorded) and the buffer has changed.</p> <p>As there is no text to suggest the criteria assessment has been purposely amended, it is thought Table 10.1 has been altered in error. This needs amendment or clarification as to why it has changed.</p> <p>Object if Table 10.1 criteria 13 and 14 have been changed purposefully and Annex D site specific assessment is incorrect.</p>
A0497	B006	Sustainability Appraisal	Sustainability Appraisal Appendix D Bridgnorth Place Plan Area	Not Specified	No	Not Specified	<p>As Stanmore Garden Village (BRD032) scores better than Tasley Garden Village (BRD030) the evidence base does not support allocation of BRD030, as a more sustainable alternative exists.</p> <p>Within the assessment, justification is required with respect to trees subject to Tree Preservation Orders (TPO's). Footnote 2 of Table 10.1 Assessment matrix of the Regulation 19 Sustainability Appraisal (SA) of sites, states TPO's within 30m of a site boundary (stated to be "advised by Shropshire's Tree Team") score a negative. Justification of why this distance is appropriate is required given it goes beyond the maximum root protection area and in terms of any other indirect impact, is considered arbitrary.</p> <p>Welcome assessment of Stanmore Garden Village (BRD032) as an individual site, rather than as a series of sites.</p> <p>Note that BRD032 is now correctly scored in relation to ancient woodland and landscape sensitivity. However, explanation required in relation to TPO's - why is 30m used and where are these trees located.</p>

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0455	B016	Amend the Sustainability Appraisal for Clive Barracks, Tern Hill. Criteria 1 should be amended from '-' to '0' for ancient woodland and wildlife site. Criteria 5 should be amended from '-' to '0' for children's playground, outdoor sports facility, amenity green space and accessible natural green space (natural/semi-natural).	NPPF paragraph 175c gives national protection to Ancient Woodland so the Council considers the score for Ancient Woodland on this site be correct. The Council also considers the score for the nearby Wildlife Sites to be correct – the River Tern and R.A.F. Tern Hill Wildlife Sites are adjacent to the site boundary and in the case of R.A.F. Tern Hill partly within the site. Additionally, the Council's Open Space Assessment does not indicate the presence of a children's playground, outdoor sports facility, amenity green space or accessible green space within the site. Developer's proposals to retain or provide facilities can only be considered at the planning application stage when the details of a proposal are known. Such issues cannot be taken into account at the Plan making stage and thus cannot form part of any SA. No change proposed.	No	Sustainability Appraisal
A0469	B005	Comply with Government Legislation and Planning Policies. Re-assess the possible Sites in Much Wenlock accurately. Use the provisions of the Much Wenlock Neighbourhood Plan, preferably suitably updated to evaluate them and identify suitable Sites.	The Council considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.	No	Sustainability Appraisal
A0471	B003	Re-assess the possible Sites in Much Wenlock accurately. Use the provisions of the Much Wenlock Neighbourhood Plan, preferably suitably updated to evaluate them and identify suitable Sites to meet the development target, which may involve decreasing the size of MUW012VAR	The Council considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.	No	Sustainability Appraisal
A0480	B001	Page 22 of the document and the criteria relating to site SHR173 should be altered to reflect that the site is within 500 metres of the Old River Bed SSSI and additionally very near landscape of high amenity value, a noted wildlife corridor with protected bat colonies in the trees to the north of the old river bed at Hencote. To be compliant, site SHR 173 must be redrawn on a much smaller scale, to more closely reflect the proximity of the SSSI, wildlife corridors and amenity value of the land to the north and north east of the site.	The landscape and visual sensitivity for housing on this site are medium for housing and medium low respectively, so the SA is correct. A site's proximity to an area of higher sensitivity is not evaluated as part of the SA.	No	Sustainability Appraisal
A0497	B005	Table 10.1 of the Sustainability Appraisal should be amended. Site-specific assessments should also be amended as a consequence. To address SO6: Reduce the need of people to travel by car, Criteria No. 5 or 6 should be amended to add to 'site boundary within 480m of a protected employment site'. To address SO15: Conserve and enhance features and areas of heritage value and interest, Criteria No. 13 and 14 should be amended to reflect significance, not distance. Criteria 13 and 14 to be corrected with reference to listed buildings and grade II listed buildings.	Table 10.1 incorrectly omits the criteria 'site contains a Listed Building', however, the SA matrix for the Bridgnorth does score sites against this criteria. No change proposed. With regard to the other issues raised, the Council considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.	No	Sustainability Appraisal
A0497	B006	BRD030 should be deleted and Stanmore Garden Village (BRD032) (part) should be allocated for 70ha comprising 850 dwellings, 16ha employment land, new local centre and green space. Provide explanation of 30m distance used for trees subject to TPO protection.	Noted. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). In identifying proposed site allocations a comprehensive site assessment process has been undertaken, which included consideration of an appropriate range of factors used to identify constraints and opportunities. This site assessment process is considered proportionate and robust. Within the SA, criteria 3 relating to presence of tree preservation orders (TPO's) is whether they are on or within 30m of the site, as advised by the Council's Tree Officers. In addition to being identified as Ancient Woodland, trees located along Hermitage Ridge are subject to a group TPO.	No	Sustainability Appraisal

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0521	B001	Sustainability Appraisal	BKL001	Not Specified	No	Not Specified	Stage 2b of the site assessment incorrectly describes BKL001 as gently undulating, it is to all intents and purposes flat. Stage 3 of the site assessment incorrectly assesses BKL001 with regard to surface flood risk (recently incidents of heavy rain formed ponds on site). It also describes access as via a lane, it is actually via Chapel Lawn Road. Dispute final sentence of the recommendation in the Stage 3 site assessment, regarding walking to services. Children walk to school from Ladywell without complaint, consider residents of BKL001 would walk easily to the services to the east.
A0521	B002	Sustainability Appraisal	BKL002	Not Specified	No	Not Specified	Stage 2b of the site assessment for BKL002 includes a typo should be by rather than buy. With regard to Stage 3 of the site assessment for BKL002, recent events resulted in significant flooding of the site. With regard to the recommendation within stage 3 of the site assessment, consider reference to 'gateway into the village' is irrelevant; reference to consolidation of current open form is incorrect as it would take away from this; and the final sentence is wrong as services are to the east rather than west.
A0521	B003	Sustainability Appraisal	BKL004	No	No	Not Specified	In the Stage 3 of the site assessment recommendation for BKL004, it incorrectly references the site as BKL002. Also consider reference to consolidation of current open form is incorrect as it would take away from this; and the final sentence is wrong as services are to the east rather than west.
A0521	B004	Sustainability Appraisal	BKL008	Not Specified	No	No	Stage 2b of the site assessment for BKL008 makes no reference to the adjacent Shropshire Hills AONB within the surrounding character. Note that Stage 3 site assessments for other sites make much play of how development will affect views from/of the AONB. This should be the same for BKL008. In stage 3 of the site assessment, with regard to surface water flood risk, BKL008 regularly becomes waterlogged and it the natural drainage 'sponge' from the AONB to Redlake valley. In the strategic considerations of stage 3 of the site assessment, consider highway issues are under-represented for BKL008. The same issues identified for BKL010 exist for BKL008. In the recommendation of stage 3 of the site assessment, consider reasoning for BKL008 is poor with regard to: -Proximity to key services - BKL008 would represent a maximum of an additional 100m and would be negated by reasoning that development should provide footways linking to the existing village network although a footway into the Redlake Meadow development would address this matter. -Suggestion the development will over-house Bucknell, yet assessment of BKL008a recognises the parcel must facilitate development of the remaining land at some future time. Village's view has been strongly expressed - it is firmly opposed to development of BKL008. Not opposed to development per se, it is just this greenfield site, with the deleterious effect on the AONB, the difficult access to B4367, surface water flooding, the blot on essential agricultural land and small developments, that they are opposed to. The village feels especially aggrieved this site is even considered when there is a brownfield site crying out for development.
A0521	B005	Sustainability Appraisal	S2.2 BKL008a	Not Specified	No	No	Stage 2a of the site assessment for BKL008a incorrectly assesses the site as within proximity of a playground, there is none as per BKL008. Stage 2b of the site assessment for BKL008a makes no reference to the adjacent Shropshire Hills AONB within the surrounding character. In stage 3 of the site assessment for BKL008a: -Note Stage 3 site assessments for other sites make much play of how development will affect views from/of the AONB. This should be the same for BKL008. -With regard to surface water flood risk, the site regularly becomes waterlogged and it the natural drainage 'sponge' from the AONB to Redlake valley. -Consider highway issues are under-represented for BKL008a. The same issues identified for BKL010 exist for BKL008a. -Tree comments regarding large visibility splay and 'hedge stepping stones' highlight complexity of access. In the strategic considerations of stage 3 of the site assessment: -Consider highway issues are misleading and have not been given sufficient weight in assessing for BKL008a. The same issues identified for BKL010 exist for BKL008a, whether approached from north or south, will introduce a dangerous junction bringing significant additional traffic into an already busy and potentially dangerous section of roadway. -Worse is the additional building to allow for development of the remainder of BKL008 in due course. Additionally, there will be increased pedestrian issues – walkers, families with buggies and mobility scooters. These issues have received only a cursory reference. -Reference is made in the final sentence to a footpath link to Redlake Meadow, this would involve a path through the element of BKL008 excluded from BKL008a, which will either continue as grazing land or need to be otherwise suitably maintained.
A0521	B007	Sustainability Appraisal	BKL009	No	Not Specified	Not Specified	Within stage 2b of the site assessment, BKL009 should be described as Land south of Chapel Lawn Road at junction with Daffodil Lane, Bucknell.
A0521	B008	Sustainability Appraisal	BKL010	No	No	Not Specified	Stage 2b of the site assessment incorrectly describes BKL010 as gently undulating, it is in fact steeply sloped. Also no reference is made to the site lying entirely within the Shropshire Hills AONB. The description of the site in Stage 3 of the site assessment relates to a different site. In stage 3 of the site assessment, surface flood risk is incorrect at 0%, the site becomes very wet.
A0521	B009	Sustainability Appraisal	BKL011	No	No	Not Specified	Stage 2b of the site assessment indicates the site is 50% brownfield, consider it is actually 70%. Furthermore, the indicative dwelling capacity is some 34, yet it is programmed for at least 70. In stage 3 of the Site Assessment there is a type under the heritage – management of constraints: Delete 'good shed' Insert 'goods shed'. The strategic considerations description provided is not of this site.

1	2	9	10	11	Admin
Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0521	B001	Review, correct and store/save corrected version of the Sustainability Appraisal. Resubmission not considered necessary in this case.	The Council considers that its Sustainability Appraisal and Site Assessment process is accurate. Flood risk in the SA, including surface water flooding is based on the Council's SFRA which is considered to be accurate and up to date. No change proposed.	No	Sustainability Appraisal
A0521	B002	Review, correct and store/save corrected version of the Sustainability Appraisal.	Comments noted. Proposed changes to SA would have no material effect so are not considered necessary.	No	Sustainability Appraisal
A0521	B003	Review, correct and store/save corrected version of the Sustainability Appraisal.	Proposed changes to SA would have no material effect so are not considered necessary.	No	Sustainability Appraisal
A0521	B004	Insert reference to AONB being directly opposite to and overlooking BKL008 and note the impact any development on the site will have on the AONB. Reassess Visual Impact to 'High'. Review and increase Surface Water Flood Risk percentages. Include the traffic and pedestrian arguments used against BKL010 within the assessment of BKL008 and re-evaluate to further 'down-assess' the site. In the recommendations for BKL008 make a cogent case for pedestrian access. Ensure no greenfield sites are developed before the brownfield site development commences.	Comments noted. Proposed changes to SA would have no material effect so are not considered necessary.	No	Sustainability Appraisal
A0521	B005	Re-assess BKL008a with regard to proximity to a playground. Insert reference to AONB being directly opposite to and overlooking BKL008a and note the impact any development on the site will have on the AONB. Reassess Visual Impact to 'High'. Review and increase Surface Water Flood Risk percentages. Include the traffic and pedestrian arguments used against BKL010 within the assessment of BKL008a and re-evaluate the site. Re-assess issues around the splay/access and reflect in the site's overall rating. Redraft to reflect: -The highlighted traffic control issues. -Note particularly the pedestrian/buggy/mobility scooter aspects. -Address the footpath issue through southern section of BKL008. -Amend overall site assessment to reflect the complications and linked increased risks.	Correction could be made to SA matrix for BKL008a Comments noted. Proposed changes to SA would have no material effect so are not considered necessary. The Council considers that the SA and site assessment process complies with the Environmental Assessment of Plans and Programmes Regulations 2004 and is a robust, proportionate and fair way of evaluating sites	No	Sustainability Appraisal
A0521	B007	Correct address, update and store as necessary.	The suggested amendment would have no material effect and so is not considered necessary.	No	Sustainability Appraisal
A0521	B008	Provide correct description of the site – including significant AONB issue. Re-assess surface water flood risk.	Comments noted. Proposed changes to SA would have no material effect so are not considered necessary. Additionally, the Council considers that the SA and site assessment process complies with the Environmental Assessment of Plans and Programmes Regulations 2004 and is a robust, proportionate and fair way of evaluating sites	No	Sustainability Appraisal
A0521	B009	Review, correct and update as necessary the Sustainability Appraisal. In view of this serious error linked to this key site, it is suggested that the consultation period should be restarted, to allow for submission by Shropshire Council of the correct description and assessment of this site and the subsequent review by consultees.	Comments noted. Proposed changes to SA would have no material effect so are not considered necessary.	No	Sustainability Appraisal

Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0586	B008	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	SP3 / SO6	Not Specified	No	Not Specified	No relevant scoring criteria is included for Sustainability Appraisal Objective SO6 within stage 2a of the site assessment for the preferred sites or strategic sites consultations (subsequently included within the next Regulation 18 consultation), no explanation for this omission was made. Would also question whether criteria now included meets the requirements of the Sustainability Objectives SO6 as set out within the Sustainability Appraisal. Consider the draft Shropshire Local Plan, its Sustainability Appraisal and evidence base give insufficient consideration to the climate emergency declared by Shropshire Council.
A0600	B014	Sustainability Appraisal	RAF Cosford	Yes	No	Yes	Concerned that some of the assessments / conclusions in relation to the RAF Cosford Strategic Site are not factually accurate. Specifically the assessment of Part 28 and parts of CFD001, P30 and P40 (understand this relates to the RAF Cosford Site - would have been helpful if this was clarified) in Appendix T is inaccurate for the following: -A - score is given for proximity to a Local Nature Reserve, however consider the nearest is 500m away, greater than the 100m used in the assessment. Therefore a score of 0 should be given. -A - score is provided for TPO's within/on-site boundaries, unless this is evidenced should be a score of 0. -A - score is given due to lack of a GP surgery within 480m of the site, however this is an unfair assessment as there is a medical centre at RAF Cosford, which is primarily for regular uniformed personnel and their families / dependants. Therefore a + or at the least a 0 score should be given. -A -- score is given due to presence of listed buildings on the site. This is an unfair assessment as this building (Fulton Block) is being maintained and is in use. Therefore, it is not clear how the Strategic Site allocation would have such a negative impact on the listed building and the score should be adjusted accordingly to a '-' at most. -A - score is given for being within 300m of a conservation area. However the nearest is more than 300m for the site. Therefore the score should be amended to 0.
A0609	B032	Sustainability Appraisal	Sustainability Appraisal	Not Specified	No	Not Specified	The following concerns with the Sustainability Appraisal (SA) methodology are identified: -The assessment omits SAMDev Plan allocations that are proposed to retained. As such the Council may be criticised for not being able to compare these allocations with the sites within the SA. Recognise the SAMDev Plan allocations were subject to SA at allocation, however assessment criteria and spatial context is now different. This may be a significant oversight given National Planning Practice Guidance (NPPF) requires SA to develop Local Plan options including reasonable alternatives and evaluate the likely effects of the Local Plan and alternatives. -The SA scoring utilised a distance of 480m as the average 10 minute walking distance (derived from the Council's Open Space, Sports & Recreation Interim Planning Guidance (September 2010). This was based on Planning Policy Guidance 17 (PPG17) which has been revoked. 800m is the normal proxy for a 10 minute walking distance as established by reputable and much utilised sources. Consider use of 480m is not justified and instead 800m should be used. -It is unclear how measurements have been taken - walking distance or as crow flies. This should be clarified. With regard to Stage 2a for BRD030: -Criterion 3 relates to tree preservation orders (TPOs). It indicates a TPO is present within the site, however this is not the case (and it is not identified as a constraint in stage 3 of the site assessment). Consider this is an error. -Criterion 5 relates to access to services and facilities. However access to a children's playground needs to be corrected (there is one located on Wenlock Risk within approx. 385m of the site). With regard to Stage 2b for BRD030: -No comments. With regard to Stage 3 for BRD030: -Fully support the findings of Stage 3 of the assessment with regards to BRD030. The site can deliver a sustainable urban extension to address the housing and employment needs of Bridgnorth. -Concerned with the referenced highways accessibility score, as no clarification is provided on what this means and why some sites are and are not assessed.
A0624	B002	Sustainability Appraisal	Whitchurch	Yes	No	Yes	Council has failed to take an effective or justified approach to the identification of potential housing allocations in Whitchurch. Wrexham Road site excluded despite meeting the requirements. The SASA takes a crude and fundamentally flawed approach to the assessment of sites which results in the land at Wrexham Road, Whitchurch (site ref. WHT026) being scored significantly lower than it should. The SASA takes an inconsistent approach in relation to previous Council and Planning Inspectors' assessments, it fails to recognise the ability to mitigate potential impacts, consideration of proximity is crude and approach does not recognise the ability to provide additional facilities on larger sites (such as the land at Wrexham Road which serve to enhance their sustainability). It does not take proper account of the three objectives of sustainable development set out in the National Planning Policy Framework. The result is that the site has been ranked much lower than the proposed allocations in Whitchurch. A re-assessment, however, which is based on a more objective assessment and takes account of previous evidence base and Council assessments results in it scoring higher than all but 1 of the proposed and saved allocations. (Section 5 of the representation details) . Issues with the scoring detailed pages 19- 22 of the response . A reassessment of the site against the criteria used in the SASA is provided at Appendix 4 of the response

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0586	B008	Review the site assessment process and consideration of the Climate Emergency.	The omission was made in error and corrected in later appraisals. As such the Council considers that the SA and site assessment process is legally compliant, appropriate, robust and proportionate. No change proposed.	No	Sustainability Appraisal
A0600	B014	Scores should be amended within the Sustainability Appraisal for site Part 28 and parts of CFD001, P30 and P40 (see main issues for relevant scores).	The Donnington and Albrighton Local Nature Reserve lies either side of Rectory Road and is within 480m of the site boundary. There are no TPO's or Conservation Areas within 30m and 250m of the site boundary respectively. The SA process does not record a GP surgery on site and the Listed Building status is independent of the use of the building. Amending the scores for the TPOs and Conservation Area criteria would not change the site's rating – it would still be Fair- so the Council considers the proposed changes are not necessary.	No	Sustainability Appraisal
A0609	B032	Assess SAMDev Plan allocations proposed to be retained within the draft Shropshire Local Plan. Utilise 800m rather than 480m when assessing access via a 10 minute walk. Update Stage 2a of the site assessment regarding presence of a tree preservation order (TPO) on BRD030. Update Stage 2a of the site assessment regarding access to a children's playground for BRD030. Update Stage 3 of the site assessment providing an explanation regarding the purpose and scope of the highway accessibility scoring.	Shropshire Council is not proposing to allocate existing SAMDev Plan Allocations, rather it is saving the existing allocations. As such it is not considered necessary or appropriate for these saved sites to be included within the Sustainability Appraisal (SA) for site assessment process, unless they have been considered for alternative uses. The SA Scoping Report set out the proposed criteria for site evaluation. The Scoping Report was subject to consultation in the early stages of the Plan making process and amendments made as a result. As such, the Council considers the SA criteria for site evaluation to be appropriate and does not propose any change. Within the SA, access to services has been assessed 'as the crow flies'. Whilst there will inevitably be debate about what is considered an appropriate distance for an average 10 minute walk, the priority is ensuring a consistent assessment: this is what has been undertaken to inform the draft Shropshire Local Plan, As such the SA and site assessment process are considered appropriate, proportionate and robust. There is a Group Tree Preservation Order on the opposite side of Ludlow Road, south of Glen View children's nursery – this is within 30m of the site boundary. The Council's Open Space assessment does not record a children's play area within the 480m of the site boundary. No change proposed. Within the stage 3 site assessment, highway accessibility scoring is not provided for smaller settlements or for very large sites/groups of sites, such as BRD030	No	Sustainability Appraisal
A0624	B002	A reassessment of the sites should be carried out to correct the flaws identified and a more rounded assessment carried out.	The Council considers that the SA and site assessment process complies with the Environmental Assessment of Plans and Programmes Regulations 2004 and is a robust, proportionate and fair way of evaluating sites. No change proposed.	No	Sustainability Appraisal

1	2	3	4	5	6	7	8
Part A Ref	Part B Ref	Relevant Document	Part of the Document Referenced	Legally Compliant	Sound	Compliant with Duty to Cooperate	Summary of Main Issue(s) Raised Within the Representation
A0636	B006	Sustainability Appraisal	Sustainability Appraisal	No	No	No	Shropshire Council failed to satisfy Section 19 of the Planning and Compulsory Purchase Act 2004(PCPA), Regulation 5(1) and Regulation 12 and Schedule 3 of the Environmental Assessment of Plans and Programmes Regulations 2004 (as amended) and the European Directive 2001/42/EC in Recital 17 to use the environmental report to inform the Plan and generally in “the assessment of the effects of certain plans and programmes on the environment”. The Council also failed in relation to the Strategic Environmental Assessment and Sustainability Appraisal guidance note Paragraphs 002 to undertake an iterative process and Para 018 to consider all reasonable alternative sites and the reasons for setting them aside. The preparation of the Pre-Submission Plan is therefore legally flawed and unsound. This failure is endorsed by Seaport Investments Ltd 2002 NIQB 62 that there must be parallel development of the environmental report and draft plan. In Berkeley v SoS Others 2002 3 WLR & Save Historic Newmarket Ltd v Forest Heath DC (2011 EWHC 606, and Royal Brompton & Harefield NHS Foundation Trust v Joint Committee of Primary Care Trusts (2011) EWHC 2986, there must be an environmental statement in a single accessible format prepared from the start of the process and presenting relevant environmental information with a non-technical summary to assist potential consultees. The Sustainability Appraisal fails to properly assess sites against all scoping objectives especially proximity to public transport (SO6 incorrectly recorded as quality of agricultural land), reduction of CO2 emissions (SO12) and adaptation and mitigation to climate change (SO13). The SA used to inform the site assessments failed to assess these key Scoping Objectives in the Pre-Submission Plan and Strategic Sites consultation rendering the process not legally compliant and producing site selection decisions that are inadequate, incorrect and unintelligible under the Gunning Principles. Site SHF018d was also not included in the SA and not assessed individually or against reasonable alternatives including SHF018a with a lower sustainability scoring. This indicates a pre-determination of the selected sites contrary to the Gunning Principles requiring consultation at a formative stage before final decisions are made. The SA on the Preferred Scale and Distribution (PSD) consultation stage was prepared on the basis Shifnal would receive 16ha of employment land and would minimise the need for additional car based transport. The Preferred Sites (PS) stage increased the amount of employment land for Shifnal to 40ha, but the SA failed to assess public transport criteria and to assess the SHF018d individually or against alternatives. The Council cannot show the increase in employment from 16 to 40ha and the allocation of Shif18d for employment use, would be sustainable development as these matters were not appraised at the appropriate time. The SLAA Report 2018 did not present a map with sites boundaries and these boundaries could only be ascertained through a web-site search without any cross referencing in the SLAA report. There was no map in the SA for the public to identify the location and boundaries of sites appraised. Case law states that a disparate collection of documents traceable only by a person with a good deal of energy and persistence does not satisfy legal requirements on making documents available to the public.
A0637	B006	Sustainability Appraisal	Sustainability Appraisal	No	No	No	Shropshire Council failed to satisfy Section 19 of the Planning and Compulsory Purchase Act 2004(PCPA), Regulation 5(1) and Regulation 12 and Schedule 3 of the Environmental Assessment of Plans and Programmes Regulations 2004 (as amended) and the European Directive 2001/42/EC in Recital 17 to use the environmental report to inform the Plan and generally in “the assessment of the effects of certain plans and programmes on the environment”. The Council also failed in relation to the Strategic Environmental Assessment and Sustainability Appraisal guidance note Paragraphs 002 to undertake an iterative process and Para 018 to consider all reasonable alternative sites and the reasons for setting them aside. The preparation of the Pre-Submission Plan is therefore legally flawed and unsound. This failure is endorsed by Seaport Investments Ltd 2002 NIQB 62 that there must be parallel development of the environmental report and draft plan. In Berkeley v SoS Others 2002 3 WLR & Save Historic Newmarket Ltd v Forest Heath DC (2011 EWHC 606, and Royal Brompton & Harefield NHS Foundation Trust v Joint Committee of Primary Care Trusts (2011) EWHC 2986, there must be an environmental statement in a single accessible format prepared from the start of the process and presenting relevant environmental information with a non-technical summary to assist potential consultees. The Sustainability Appraisal fails to properly assess sites against all scoping objectives especially proximity to public transport (SO6 incorrectly recorded as quality of agricultural land), reduction of CO2 emissions (SO12) and adaptation and mitigation to climate change (SO13). The SA used to inform the site assessments failed to assess these key Scoping Objectives in the Pre-Submission Plan and Strategic Sites consultation rendering the process not legally compliant and producing site selection decisions that are inadequate, incorrect and unintelligible under the Gunning Principles. Site SHF018d was also not included in the SA and not assessed individually or against reasonable alternatives including SHF018a with a lower sustainability scoring. This indicates a pre-determination of the selected sites contrary to the Gunning Principles requiring consultation at a formative stage before final decisions are made. The SA on the Preferred Scale and Distribution (PSD) consultation stage was prepared on the basis Shifnal would receive 16ha of employment land and would minimise the need for additional car based transport. Case law states that a disparate collection of documents traceable only by a person with a good deal of energy and persistence does not satisfy legal requirements on making documents available to the public.
A0644	B002	Sustainability Appraisal	S14.2 St Martins	Not Specified	No	Yes	Page 38 Site SMH031 has a very low score of -8 in the SA with only 3 other sites scoring lower, out of 41 sites. It is our opinion, this site should not have been included as a development site for residential homes.
A0133	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 6 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Concerned about the note (without details) within Appendix 6 regarding potential for Recycling and Environmental Industries on site in Bridgnorth. Such facilities are unlikely to be provided on a new employment site associated with a garden village (BRD030), so concerned they may be established in a location away from the main urban area – very possibly Stanmore. Proposed allocation STC002 and P58a are proposed for removal from the Green Belt, but would still be surrounded by it and located in the countryside where there is no need for such development and it would be inappropriate for such activities. There is already such an operation not far from Stanmore, towards Worfield (within the Green Belt), which is the source of environmental problems, and an intensification of that use would not be an acceptable situation. Calculation of employment land need for Bridgnorth in the Shropshire Employment Land Review 2019 indicates an “additional provision to address local circumstances” of 12ha is needed, however there is no explanation of how this is calculated. Consider there is no “local circumstance” that would justify this, as evidenced by the current large areas of undeveloped land (some never having been developed), and empty factory units at Stanmore Industrial Estate (in over 40 years since its establishment, existing land and buildings have never been fully developed and put to operational use). As such, additional 11.5ha at STC002 and P58a is not justified or evidenced, and there is no certainty that it can be delivered. The only certainty is it will adversely affect the Green Belt, and act as a precedent for any similar unjustified incursions into the green belt if the future.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0636	B006	See summary of main issues.	The Council considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.	No	Sustainability Appraisal
A0637	B006	See summary of main issues.	The Council considers that it has complied with the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 and the Planning and Compulsory Purchase Act 2004 for its SA and site assessment process. No change proposed.	No	Sustainability Appraisal
A0644	B002	It is our opinion, this site SMH031 should not have been included as a development site for residential homes due to the low scoring on the sustainability appraisal.	SA is an important consideration in the site assessment process, but this is balanced against a number of other issues meaning that a site's SA rating is not the sole determinant. No change proposed.	No	Sustainability Appraisal
A0133	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Within the adopted SAMDev Plan (2015), allocation W039 (Land at Old Worcester Road), which is a proposed Saved Allocation within the draft Shropshire Local Plan, has a presumption in favour of the development of recycling and environmental industries. Proposed allocations STC002 and P58a are proposed to be targeted towards the engineering and advanced manufacturing sectors, complement the employment offer on the existing Industrial Estate and contribute towards the objectives of the Shropshire Economic Growth Strategy. Any amenity and other impacts would be a material planning consideration taken into account in decision making in any future Planning Applications. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	Appendix 6

Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). A0141	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 6 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Concerned about the note (without details) within Appendix 6 regarding potential for Recycling and Environmental Industries on site in Bridgnorth. Such facilities are unlikely to be provided on a new employment site associated with a garden village (BRD030), so concerned they may be established in a location away from the main urban area – very possibly Stanmore. Proposed allocation STC002 and P58a are proposed for removal from the Green Belt, but would still be surrounded by it and located in the countryside where there is no need for such development and it would be inappropriate for such activities. There is already such an operation not far from Stanmore, towards Worfield (within the Green Belt), which is the source of environmental problems, and an intensification of that use would not be an acceptable situation. Calculation of employment land need for Bridgnorth in the Shropshire Employment Land Review 2019 indicates an “additional provision to address local circumstances” of 12ha is needed, however there is no explanation of how this is calculated. Consider there is no “local circumstance” that would justify this, as evidenced by the current large areas of undeveloped land (some never having been developed), and empty factory units at Stanmore Industrial Estate (in over 40 years since its establishment, existing land and buildings have never been fully developed and put to operational use). As such, additional 11.5ha at STC002 and P58a is not justified or evidenced, and there is no certainty that it can be delivered. The only certainty is it will adversely affect the Green Belt, and act as a precedent for any similar unjustified incursions into the green belt if the future.
A0142	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 6 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Concerned about the note (without details) within Appendix 6 regarding potential for Recycling and Environmental Industries on site in Bridgnorth. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0141	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Within the adopted SAMDev Plan (2015), allocation W039 (Land at Old Worcester Road), which is a proposed Saved Allocation within the draft Shropshire Local Plan, has a presumption in favour of the development of recycling and environmental industries. Proposed allocations STC002 and P58a are proposed to be targeted towards the engineering and advanced manufacturing sectors, complement the employment offer on the existing Industrial Estate and contribute towards the objectives of the Shropshire Economic Growth Strategy. Any amenity and other impacts would be a material planning consideration taken into account in decision making in any future Planning Applications. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	Appendix 6
A0260	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Within the adopted SAMDev Plan (2015), allocation W039 (Land at Old Worcester Road), which is a proposed Saved Allocation within the draft Shropshire Local Plan, has a presumption in favour of the development of recycling and environmental industries. Proposed allocations STC002 and P58a are proposed to be targeted towards the engineering and advanced manufacturing sectors, complement the employment offer on the existing Industrial Estate and contribute towards the objectives of the Shropshire Economic Growth Strategy. Any amenity and other impacts would be a material planning consideration taken into account in decision making in any future Planning Applications. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	Appendix 6
A0261	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. A0265	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 6 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Concerned about the note (without details) within Appendix 6 regarding potential for Recycling and Environmental Industries on site in Bridgnorth. Such facilities are unlikely to be provided on a new employment site associated with a garden village (BRD030), so concerned they may be established in a location away from the main urban area – very possibly Stanmore. Proposed allocation STC002 and P58a are proposed for removal from the Green Belt, but would still be surrounded by it and located in the countryside where there is no need for such development and it would be inappropriate for such activities. There is already such an operation not far from Stanmore, towards Worfield (within the Green Belt), which is the source of environmental problems, and an intensification of that use would not be an acceptable situation. Calculation of employment land need for Bridgnorth in the Shropshire Employment Land Review 2019 indicates an “additional provision to address local circumstances” of 12ha is needed, however there is no explanation of how this is calculated. Consider there is no “local circumstance” that would justify this, as evidenced by the current large areas of undeveloped land (some never having been developed), and empty factory units at Stanmore Industrial Estate (in over 40 years since its establishment, existing land and buildings have never been fully developed and put to operational use). As such, additional 11.5ha at STC002 and P58a is not justified or evidenced, and there is no certainty that it can be delivered. The only certainty is it will adversely affect the Green Belt, and act as a precedent for any similar unjustified incursions into the green belt if the future.
A0266	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 6 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Concerned about the note (without details) within Appendix 6 regarding potential for Recycling and Environmental Industries on site in Bridgnorth. Such facilities are unlikely to be provided on a new employment site associated with a garden village (BRD030), so concerned they may be established in a location away from the main urban area – very possibly Stanmore. There is already such an operation not far from Stanmore, towards Worfield (within the Green Belt), which is the source of environmental problems, and an intensification of that use would not be an acceptable situation. Calculation of employment land need for Bridgnorth in the Shropshire Employment Land Review 2019 indicates an “additional provision to address local circumstances” of 12ha is needed, however there is no explanation of how this is calculated. Consider there is no “local circumstance” that would justify this, as evidenced by the current large areas of undeveloped land (some never having been developed), and empty factory units at Stanmore Industrial Estate (in over 40 years since its establishment, existing land and buildings have never been fully developed and put to operational use). As such, additional 11.5ha at STC002 and P58a is not justified or evidenced, and there is no certainty that it can be delivered. The only certainty is it will adversely affect the Green Belt, and act as a precedent for any similar unjustified incursions into the green belt if the future.
A0309	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 6 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Concerned about the note (without details) within Appendix 6 regarding potential for Recycling and Environmental Industries on site in Bridgnorth. Such facilities are unlikely to be provided on a new employment site associated with a garden village (BRD030), so concerned they may be established in a location away from the main urban area – very possibly Stanmore. Proposed allocation STC002 and P58a are proposed for removal from the Green Belt, but would still be surrounded by it and located in the countryside where there is no need for such development and it would be inappropriate for such activities. There is already such an operation not far from Stanmore, towards Worfield (within the Green Belt), which is the source of environmental problems, and an intensification of that use would not be an acceptable situation. Calculation of employment land need for Bridgnorth in the Shropshire Employment Land Review 2019 indicates an “additional provision to address local circumstances” of 12ha is needed, however there is no explanation of how this is calculated. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0288	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Within the adopted SAMDev Plan (2015), allocation W039 (Land at Old Worcester Road), which is a proposed Saved Allocation within the draft Shropshire Local Plan, has a presumption in favour of the development of recycling and environmental industries. Proposed allocations STC002 and P58a are proposed to be targeted towards the engineering and advanced manufacturing sectors, complement the employment offer on the existing Industrial Estate and contribute towards the objectives of the Shropshire Economic Growth Strategy. Any amenity and other impacts would be a material planning consideration taken into account in decision making in any future Planning Applications. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	Appendix 6
A0300	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Such facilities are unlikely to be provided on a new employment site associated with a garden village (BRD030), so concerned they may be established in a location away from the main urban area – very possibly Stanmore. Proposed allocation STC002 and P58a are proposed for removal from the Green Belt, but would still be surrounded by it and located in the countryside where there is no need for such development and it would be inappropriate for such activities. There is already such an operation not far from Stanmore, towards Worfield (within the Green Belt), which is the source of environmental problems, and an intensification of that use would not be an acceptable situation. Calculation of employment land need for Bridgnorth in the Shropshire Employment Land Review 2019 indicates an “additional provision to address local circumstances” of 12ha is needed, however there is no explanation of how this is calculated. Consider there is no “local circumstance” that would justify this, as evidenced by the current large areas of undeveloped land (some never having been developed), and empty factory units at Stanmore Industrial Estate (in over 40 years since its establishment, existing land and buildings have never been fully developed and put to operational use). As such, additional 11.5ha at STC002 and P58a is not justified or evidenced, and there is no certainty that it can be delivered. The only certainty is it will adversely affect the Green Belt, and act as a precedent for any similar unjustified incursions into the green belt if the future.
A0324	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 6 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Concerned about the note (without details) within Appendix 6 regarding potential for Recycling and Environmental Industries on site in Bridgnorth. Such facilities are unlikely to be provided on a new employment site associated with a garden village (BRD030), so concerned they may be established in a location away from the main urban area – very possibly Stanmore. Proposed allocation STC002 and P58a are proposed for removal from the Green Belt, but would still be surrounded by it and located in the countryside where there is no need for such development and it would be inappropriate for such activities. Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0323	B002	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Within the adopted SAMDev Plan (2015), allocation W039 (Land at Old Worcester Road), which is a proposed Saved Allocation within the draft Shropshire Local Plan, has a presumption in favour of the development of recycling and environmental industries. Proposed allocations STC002 and P58a are proposed to be targeted towards the engineering and advanced manufacturing sectors, complement the employment offer on the existing Industrial Estate and contribute towards the objectives of the Shropshire Economic Growth Strategy. Any amenity and other impacts would be a material planning consideration taken into account in decision making in any future Planning Applications. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	Appendix 6
A0324	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. Any amenity and other impacts would be a material planning consideration taken into account in decision making in any future Planning Applications. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	Appendix 6
A0427	B009	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Within the adopted SAMDev Plan (2015), allocation W039 (Land at Old Worcester Road), which is a proposed Saved Allocation within the draft Shropshire Local Plan, has a presumption in favour of the development of recycling and environmental industries. Proposed allocations STC002 and P58a are proposed to be targeted towards the engineering and advanced manufacturing sectors, complement the employment offer on the existing Industrial Estate and contribute towards the objectives of the Shropshire Economic Growth Strategy. Any amenity and other impacts would be a material planning consideration taken into account in decision making in any future Planning Applications. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)). A0449	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 6 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Concerned about the note (without details) within Appendix 6 regarding potential for Recycling and Environmental Industries on site in Bridgnorth. Such facilities are unlikely to be provided on a new employment site associated with a garden village (BRD030), so concerned they may be established in a location away from the main urban area – very possibly Stanmore. Proposed allocation STC002 and P58a are proposed for removal from the Green Belt, but would still be surrounded by it and located in the countryside where there is no need for such development and it would be inappropriate for such activities. There is already such an operation not far from Stanmore, towards Worfield (within the Green Belt), which is the source of environmental problems, and an intensification of that use would not be an acceptable situation. Calculation of employment land need for Bridgnorth in the Shropshire Employment Land Review 2019 indicates an “additional provision to address local circumstances” of 12ha is needed, however there is no explanation of how this is calculated. Consider there is no “local circumstance” that would justify this, as evidenced by the current large areas of undeveloped land (some never having been developed), and empty factory units at Stanmore Industrial Estate (in over 40 years since its establishment, existing land and buildings have never been fully developed and put to operational use). As such, additional 11.5ha at STC002 and P58a is not justified or evidenced, and there is no certainty that it can be delivered. The only certainty is it will adversely affect the Green Belt, and act as a precedent for any similar unjustified incursions into the green belt if the future.
A0489	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 6 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Concerned about the note (without details) within Appendix 6 regarding potential for Recycling and Environmental Industries on site in Bridgnorth. The only certainty is it will adversely affect the Green Belt, and act as a precedent for any similar unjustified incursions into the green belt if the future.
A0558	B005	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 6 and S3.1 (STC002 and P58a)	Not Specified	No	Not Specified	Concerned about the note (without details) within Appendix 6 regarding potential for Recycling and Environmental Industries on site in Bridgnorth. Such facilities are unlikely to be provided on a new employment site associated with a garden village (BRD030), so concerned they may be established in a location away from the main urban area – very possibly Stanmore. Proposed allocation STC002 and P58a are proposed for removal from the Green Belt, but would still be surrounded by it and located in the countryside where there is no need for such development and it would be inappropriate for such activities. There is already such an operation not far from Stanmore, towards Worfield (within the Green Belt), which is the source of environmental problems, and an intensification of that use would not be an acceptable situation. Calculation of employment land need for Bridgnorth in the Shropshire Employment Land Review 2019 indicates an “additional provision to address local circumstances” of 12ha is needed, however there is no explanation of how this is calculated. Consider there is no “local circumstance” that would justify this, as evidenced by the current large areas of undeveloped land (some never having been developed), and empty factory units at Stanmore Industrial Estate (in over 40 years since its establishment, existing land and buildings have never been fully developed and put to operational use). As such, additional 11.5ha at STC002 and P58a is not justified or evidenced, and there is no certainty that it can be delivered. The only certainty is it will adversely affect the Green Belt, and act as a precedent for any similar unjustified incursions into the green belt if the future.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0544	B001	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Within the adopted SAMDev Plan (2015), allocation W039 (Land at Old Worcester Road), which is a proposed Saved Allocation within the draft Shropshire Local Plan, has a presumption in favour of the development of recycling and environmental industries. Proposed allocations STC002 and P58a are proposed to be targeted towards the engineering and advanced manufacturing sectors, complement the employment offer on the existing Industrial Estate and contribute towards the objectives of the Shropshire Economic Growth Strategy. Any amenity and other impacts would be a material planning consideration taken into account in decision making in any future Planning Applications. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	Appendix 6
A0556	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. A0600	B013	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 7	Yes	Yes	Yes	Support recognition in Appendix 7 that delivery of development at the strategic site at RAF Cosford falls across the whole plan period, and beyond. RAF Cosford is an existing, operational defence site and as such is likely to see development brought forward within the short, medium and longer term, whether this is required to expand / intensify the defence use of the site or help to maintain / support existing site uses and activities.
A0621	B004	Regulation 19: Pre-Submission Draft of the Shropshire Local Plan	Appendix 7	Not Specified	No	Not Specified	Schedule A7 of the Draft Local Plan sets out indicative timescales for the development of allocations for short-, medium- or long-term delivery timescales. SHF018b & 018d is indicated as medium- to long term, including beyond the plan period. SHF018b & 018d are readily available for delivery and development can therefore be brought forward in the plan period to the short & medium term stages. There is no reason to seek to delay delivery of the employment sites, which would meet an identified current need and can assist the growth of Shifnal and Shropshire.

Part A Ref	Part B Ref	Summary of Main Proposed Modification(s)	Shropshire Council Response	Proposed Minor Modification(s)	Officer Ascribed Policy
A0678	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Within the adopted SAMDev Plan (2015), allocation W039 (Land at Old Worcester Road), which is a proposed Saved Allocation within the draft Shropshire Local Plan, has a presumption in favour of the development of recycling and environmental industries. Proposed allocations STC002 and P58a are proposed to be targeted towards the engineering and advanced manufacturing sectors, complement the employment offer on the existing Industrial Estate and contribute towards the objectives of the Shropshire Economic Growth Strategy. Any amenity and other impacts would be a material planning consideration taken into account in decision making in any future Planning Applications. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	Appendix 6
A0679	B005	Proposed employment allocations STC002 and P58a at Stanmore (Bridgnorth) should be deleted from the draft Shropshire Local Plan. There is no requirement for an alternative site to be identified.	Noted. Within the adopted SAMDev Plan (2015), allocation W039 (Land at Old Worcester Road), which is a proposed Saved Allocation within the draft Shropshire Local Plan, has a presumption in favour of the development of recycling and environmental industries. Proposed allocations STC002 and P58a are proposed to be targeted towards the engineering and advanced manufacturing sectors, complement the employment offer on the existing Industrial Estate and contribute towards the objectives of the Shropshire Economic Growth Strategy. Any amenity and other impacts would be a material planning consideration taken into account in decision making in any future Planning Applications. Sites STC002 and P58a are proposed to be removed from the Green Belt and allocated for development to support the role of Stanmore Industrial Estate, contribute towards achieving the proposed development strategy for Bridgnorth and contribute towards the proposed development strategy for Shropshire. Shropshire Council considers that the proposed development strategy for Bridgnorth and the existing and proposed allocations identified to contribute towards achieving this proposed development strategy are appropriate, effective, sustainable and deliverable (for a site to be considered deliverable it needs to be suitable, available and achievable (including viable)).	No	Appendix 6
A0600	B013	N/A	Noted.	No	Appendix 7
A0621	B004	Appendix 7 changes to be inserted (delivery timetable amendments) SHF18b & 18d to be delivered in the short & medium term within the plan period.	Noted. Given the need to prepare a masterplan and design code in consultation with the public and Shropshire Council; likely lead-in times; the need to deliver associated infrastructure improvements; and the cautious approach taken to delivery assumptions by Shropshire Council, it is considered appropriate to retain the current assumptions identified within Appendix 7 of the draft Shropshire Local Plan for site SHF018b and SHF018d. However, we would note that Appendix 7 acknowledges that delivery timescales for many proposed allocations will change over the proposed Plan period and that it is not considered necessary to seek to phase the delivery of these allocations, although development on the larger sites, such as SHF018b and SHF018d will need to be undertaken in a coordinated manor to ensure that they deliver sustainable, comprehensive, high-quality and complementary development which meets local needs. On such sites aforementioned masterplanning exercises will be necessary to manage their development.	No	Appendix 7
