1 - I have lived in Albrighton using the train and bus network regularly. I also use the shops and other amenities locally and moved here to be in a rural location for the mental health and wellbeing of my family. Moving to Albrighton was the best move I made because of the rural green space that needs to remain and not built on for generations to come.

I am fully supportive of the Local Plan because it clearly outlines the areas for current and future land uses I comment further on the proposed development by Bonningale Homes for Albrighton.

People in this country choose to live where they would like to live be it in a town a city or a village, just because there is a mandate to build thousands of houses, that doesn't mean we should change the entire footprint of how we have lived for thousands of years. If a village wants to remain a village, then it should have the right too. Telford and Wrekin council are building thousands of houses just the number of houses they are building should meet Shropshire's commitment to the number of houses built over the next twenty years that's besides the houses being built in Perton, Codsall, and Shifnal ETC.

If housing development continues like this we will have no villages left and our country side will just disappear, We already have plenty of development happening in Albrighton and that is to continue for years to come, this proposed development is in the wrong place, There will not be enough jobs or infrastructure to support this development at the meeting the developers said they would extend the existing pre-school to cope with the influx of children until the school is built this basically means that children in Albrighton will have to be taught in **PORTA CABINS** that is how ridiculous the

proposals are, if that in its end
know what will.

I am 100 percent opposed to further development in Albrighton on the scale outlined by Bonnigale Homes, due to the over expansion and pressure on infrastructure that will impact on those who already have property in Albrighton and have chosen to live in a rural location – build on brownfield sites / renovate building leave our green spaces to future generations and agriculture.
