

CORNER OSWESTRY PATCH

Individual products made by individual people

O U R S T O R Y

In 1993 Patchworks, a Shropshire Council day service, was established and for 15 years have been making Patchwork quilts at their small shop at Radfields Industrial Estate in Oswestry. In summer 2007 the service users and staff had a vision day with Taking Part (an advocacy group for Adults with Learning Disabilities), to discuss

the future of Patchworks and its place in the retail market.

At the vision day the service users were clear that they wanted a retail space in the centre of Oswestry where they felt part of the retail community. Furthermore, service users were keen to develop their skills in relation to employment.

As a result of this, Corner Patch was created and is now the new home and shop for Patchworks.

Corner Patch shop will also sell products made by people attending Shropshire Council day services at Maesbury Metals in Oswestry and Greenacres Farm in Baschurch, North Shropshire.

Patchworks

Patchworks provides training, employment and work experience for adults with learning disabilities.

We produce bespoke textiles, bags, bunting, aprons for adults and children, felted knitted purses as well as throwovers, duvet covers and cushions, which can be individually tailored to the customers requirements.

Greenacres

Greenacres provides training, employment and work experience for adults with learning disabilities.

We offer a wide variety of products at Corner Patch and our farm shop in Baschurch including, preservatives, free range eggs, an extensive choice of annual bedding plants and vegetables, hanging baskets, Christmas trees, wreaths and decorations, garden ornaments and patio slabs.

Maesbury Metals

Maesbury Metals provides training, employment and work experience for adults with learning disabilities.

We offer a wide variety of bespoke products at Corner Patch and our workshop including bespoke candles, weather stations, plant holders and wrought iron products such as gates, railings, garden furniture, and one off fabrications. We also provide a fitting and welding repair service on and off site.
